HIV/AIDS and Social Work: Modelling HIV protective behaviour from a social work perspective and experiences with cooperative prevention intervention development.

19 October 2016
Parramatta (South) campus
11:30am – 12.30pm

PRESENTER
Professor & Dean Daniel Gredig of University of Applied Sciences North-western Switzerland.

Daniel Gredig is a Professor and Dean of Master-Studies in Social Work at the School of Social Work, University of Applied Sciences Northwestern Switzerland. Currently, he is a visiting professor at the University of Newcastle, NSW.

He was trained in Social Work at the University of Fribourg (Switzerland) and at the Freie Universität Berlin (Germany). He received his PhD from the University of Zurich.

His recent research and publications have focused on the history of social work, research-based intervention development and innovation in social work, HIV protective behaviour and HIV prevention, stigma experiences of people living with diabetes, and cooperation of researchers and professionals in social work.

RSVP by 12 October to SSAP-Research@westernsydney.edu.au
