IT Services

Request for connection of private or non-standard device to the UWS wired Network

Note that UWS has a wireless network available for use by staff, students and external users. Details of how to connect your device to the wireless network can be found at: www.uws.edu.au/wireless. The wired network is restricted to managed UWS devices for necessary security reasons and the wireless network is the most appropriate solution for non-standard devices or devices not owned by UWS.

UWS.	
If the wireless network has not met your needs, please detail in the business case below how it doesn't meet your needs and what steps you have followed that have led you to this conclusion along with details of why you need UWS network access. Attach separate documentation if necessary.	
Requester's/device user's Details	
Name & contact telephone number:	
Department/School (or organisation name if not a UWS member):	
Location (UWS room number):	
Details of device to be connected:	
Machine name and model:

Form – Request for connection to UWS wired network Version: 1.1, issued 17/03/10 (Manager, IT Support Services)

Conditions of approval, if given:-

- 1. Your device must have up to date anti-virus protection running at all times
- 2. You will agree to the terms of our acceptable use policy http://policies.uws.edu.au/view.current.php?id=00124
- 3. We reserve the right to audit your device and/or remove access if there is any identified risk to the university or if there is any breach of terms of conditions of use. You will allow auditing to take place on your device.
- 4. You will take responsibility for any damage caused by the device (e.g. as a result of malware)
- 5. You will take responsibility for ensuring that the device will be appropriately patched and managed (in terms of software/security updates)
- 6. You will take responsibility for any activity undertaken via the device.
