WORKSHOP
SHIPPING AND SUSTAINABILITY: THE NEXT FRONTIER FOR TACKLING CLIMATE CHANGE

DATE
25 September 2019

TIME
9.00am – 5.30pm

VENUE
Female Orphan School
(Room PS-EZ.G.22, 23 & 36 Conf)
Western Sydney University (WSU)
James Ruse Drive, Parramatta NSW 2150

WORKSHOP
SHIPPING AND SUSTAINABILITY: THE NEXT FRONTIER FOR TACKLING CLIMATE CHANGE

AIMS
The workshop will bring together academics, industry and government representatives to a round table discussion on the challenges and opportunities related to the new regulations adopted by the International Maritime Organization (IMO) aimed at reducing greenhouse gas emissions. It will also discuss how our research can best support the Australian government and the shipping industry in the transition towards a low-carbon future.

BACKGROUND
In April 2018, the shipping industry has agreed to cut GHG emissions in international maritime shipping, after decades of work and talks at the IMO. The deal requires a reduction by 50% of GHG emissions from ships by 2050, compared to 2008 levels. It also involves changes in ships’ design, technology and fuel use. The new climate deal has the potential to change the way shipping companies operate. It presents an opportunity for the shipping industry to become part of the solution when it comes to climate change.
