Recruitment – Guidance on Research Projects Seeking to use Western Sydney Staff as Participants

Researchers who are not staff, student or affiliated with Western Sydney University, are able to access publicly available staff details. For example, going to the University's webpage will allow any member of the public to source information listed for staff on various pages.

The University's website also has a Staff Directory. The conditions of use of the Staff Directory conditions are the following: *'Obtaining information from this Directory must be for the legitimate purposes of doing business with and within the Western Sydney University and must not be used for unsolicited bulk e-mailing (spamming) or similar purposes.'*

Recruitment of potential research participants is, therefore, excluded from permitted usage. To recruit Western staff for a research project, Western researchers can publish a short message via E-update and/or Yammer to reach potential participants.

For a more targeted approach, i.e. staff from a specific field of expertise, it is suggested that researchers contact the relevant School or Institute Manager to discuss options for recruiting participants.

Students are encouraged to work alongside their supervisory panel to agree on the most effective recruitment strategy.

Western Sydney University broadcast emails – Western All – may not be used for participant recruitment.

http://www.westernsydney.edu.au/broadcast_email

For any questions related to staff communication, please contact the Internal Communications team at internalcomms@westernsydney.edu.au

The recruitment method and initial contact with participants need to be clearly identified in the ethics application. How information will be communicated to these participants and their consent gained, also need to be clearly articulated in the application.
