

Round 2019

Taiwan Inter-professional Public Health Immersion Experience (25356)

The Inter-professional public health Taiwan immersion experience program offers Medicine, Nursing and Allied Health students the opportunity to gain exposure to community care practice in Taiwan as an expatriate by studying, living and engaging with communities in Taiwan for a period of four weeks. Whilst in Taiwan students will be hosted by the College of Humanities and Social Sciences & College of Medical and Health Science of Asia University. The students will attend class for six hours per day; acquire Mandarin Chinese by task-based learning; and explore community care models including aged care in a series of field trips. Each student will have one local student as Teaching Assistant to immerse them in a Chinese-speaking environment by practicing their Mandarin Chinese daily and participating in social activities, which will lead to an understanding of Taiwanese culture and lifestyles.

Round 2019

Japan and the Indo-Pacific (25421)

The three-week study tour has been running for four years as part of an initiative to strengthen institutional links between WSU and Meiji University. The first two weeks in Tokyo involve participation in the Meiji University Asia Pacific Partnership Program. As well as WSU, students from China, South Korea, Vietnam, Thailand and Indonesia participate. The final week involves travel to Hiroshima and Kyoto. NCP funding is requested to expand the program and increase the number of students participating from ten to 15.

In 2019, additions include a two-day placement at the Japan Forum on International Relations (NGO) and Q&A sessions with a political advisor to a member of Japan's National Diet and a diplomat at the Australian Embassy. Students will enhance their political and cultural knowledge of Japan, appreciate the role of NGOs and network with students from Japan and the Indo-Pacific while also meeting the WSU strategic goal of work-ready graduates with international experience.

Round 2019

Green Materials and a Sustainable Environment: Taiwan Immersion (25424)

The Green Materials and a Sustainable Environment project provides Academy students with an opportunity to be part of a transformative international learning program in Taiwan. In this three-weeks interdisciplinary program, students will be exposed to academic, professional and a cultural learning experiences while gaining academic credit in their Bachelor Degrees. The project is designed in partnership with Tamkang University which is also the hosting university where students will be enrolled in a summer program that focuses on; emerging green materials and water technologies, and Taiwanese living heritage and community construction. This program takes a work integrated learning approach by including field trips and industry visits to water purification and flood prevention facilities. To foster life-long relationships between Australia and Taiwan, students will compare water management systems between the two countries in group assignments and engage in extra-curricular activities on the rich Taiwanese culture. Furthermore, Australian students will be accompanied by Taiwanese students during their field trips and during their stay in Taiwan.

Round 2019

Mobile Stories (25589)

This project will provide ten communication students with an opportunity to gain professional media production experience in Timor-Leste as interns with Casa de Produção Audiovisual (CPA) that incorporates a linkage between students from Western Sydney University (WSU) and the National University of Timor-Leste (UNTL) through multiplatform storytelling. Established in 2003 CPA is a multimedia production centre that seeks to promote peace-building and sustainable development through audio-visual productions broadcast on television and online. As interns, students will produce a series of short documentary profiles in collaboration with local students. Completion of the internship will lead to a co-production between CPA and WSU of an interactive multiplatform documentary exploring the lives and aspirations of students at WSU and UNTL. Mobile Stories will also act as an ongoing communication network between students and support continuing partnerships between WSU and CPA. This initiative is linked to the University's commitment to emerging technologies and will serve as a strategic model for multiplatform curriculum development within the Bachelor of Communication.

Round 2019

A field study: Enhancing collaborative and culturally appropriate care (25839)

This project will provide students from multiple health disciplines the opportunity to engage with Taiwanese culture and develop an understanding of health care delivery and contemporary issues confronting health care in Taiwan. The Department of Nursing, Fu Jen Catholic University who are experienced in hosting international students for such field studies will host WSU students. Students will have the opportunity to participate in a two-three week on site visit and clinical practicum in Taiwan in remote area community care. By participating in this field study, it is anticipated that students will be able to demonstrate professional skills in terms of health assessment and the culturally appropriate health care delivery relevant to their discipline. Students will benefit from working with peers from Taiwan as well as from interdisciplinary learning and practice. The program will be held annually to encourage the development of long lasting relationships between both countries.

Round 2019

The Taiwan Experience Education Program: Expanding Intercultural Capabilities for Australian Education Students (25845)

Since 2015, Western Sydney University's (WSU) School of Education has partnered with the Southern Taiwan University of Science and Technology (STUST) to provide 20 Australian education students with a three-week teaching practicum in Taiwan. The three-year pilot project was funded by the Taiwanese Ministry of Education (MOE) to enhance Taiwan's bilingualism and internationalisation strategies. Due to the success of this cross-institutional collaboration, the Taiwanese MOE has recently committed on-going funding to continue this teaching practicum specifically for WSU pre-service teachers. The practicum includes teaching an English-language summer camp for Taiwanese middle school students. Outcomes for Australian students include gaining valuable cross-cultural experience and enhancing career-readiness and employability through deepening their knowledge of the Indo-Pacific region. The cultural program includes Chinese language instruction, field trips to historic sites, calligraphy, tea making, and Zen meditation, amongst other educational experiences. The program enables future Australian teachers to further develop their intercultural competencies and better prepare them to enter into diverse 21st Century classrooms and educational settings.

Round 2019

Community Development, Traditional Knowledge and Conservation in Shangri-La (25893)

Western Sydney University is committed to producing future of work graduates that are culturally competent global citizens and critical thinkers. This project will provide a mixed cohort of twenty (20) biology and anthropology students through a dynamic study program based in rural Shangri-La, the Tibetan Autonomous Prefecture, in China. Students will connect with a diverse group of local organisations and communities including the Shangri-La Institute for Sustainable Communities, Shangri-La Vocational College; Tibetan University, Baimaxueshan Nature Reserve and the Dongzhulin Monastery for cultural and language workshops, peer-to peer learning exchanges and volunteering. Students will conduct multi-disciplinary empirical field studies on community development and conservation challenges with traditional Asian knowledge in one of the most biodiverse eco-systems in the world. It is intended that the program will develop long lasting student engagement and ongoing institutional collaborations by facilitating semester study placements, virtual learning exchanges and further student research collaborations that are self-sustaining.

Round 2019

Sharing our Legacy: Engaging with Communities in PNG (25896)

Western Sydney University is committed to producing future graduates that are culturally competent, active global citizens. This immersive program will be open to all Western Sydney students and will provide twenty (20) students with the opportunity to engage with local indigenous communities in Kokoda, Papua New Guinea. Based around the Sogeri Agricultural Learning Centre this program will showcase and highlight our important war history and the legacy that our nation shares with Papua New Guinea. WSU students will have the opportunity to volunteer with the communities that supported our Australian soldiers during the Pacific War (1942-45). Students will connect with a diverse group of local organisations including Network Kokoda, the Sogeri Agricultural Learning Centre, University of Papua New Guinea, Rotary Club of Richmond and two local high schools. It is intended that the program will develop long lasting student engagement and ongoing collaborations that are self-sustaining.

Round 2019

Semester based mobility with Panjab University, India (26171)

This mobility project would involve students from WSU to travel and stay at Panjab University, Chandigarh India and complete a semester of study or more that gives them credits for each unit completed at Panjab University towards their course enrolled at, WSU. Students would be able to travel in Feb 2020 to commence first semester of study.

Since India is becoming one of the first choices for outsourcing jobs this mobility program would involve students to visit education partner institutions, and research institutions and would also expose students to local culture and language during their stay of few months. Further, this program would help staff to support students' active participation in learning experiences and would assist in bring knowledge back to Western Sydney University. Hence this program would help strengthen and sustain the existing partnerships and offer students mobility to engage in the international environment.

Round 2019

Chinese Internship: 360 degree view of Chinese business and culture (26185)

Chinese Internship: 360 degree view of Chinese business and culture is a five week internship for Western students from any discipline. Via the internship in a China-based international company related to their field of study, students will learn technical skills and develop a range of soft skills, all of which are highly sought after by employers. Students will also undertake 15 hours of group Mandarin Chinese language classes every Monday morning, with cultural classes in the afternoon, such as calligraphy, Chinese cooking and Tai Chi. Living with a Chinese host family for the duration of the project will help further their language skills and cultural appreciation. The goals of the internship are to improve Western students' understanding of international/Chinese business practice and Chinese culture; their understanding of Mandarin Chinese language skills; and their international employability and career prospects.

Round 2019

Global Firsts Korean Language and Cultural Program (26202)

The Global Firsts Korean Language and Cultural Program program will see students undertake a 4 week program at the University of Seoul International Summer School (UoSISS), during which they will complete academic courses, field-trips and cultural activities designed to enhance the context of the academic coursework. Students will also participate in a unique 4 day excursion to the World Heritage-listed site on Jeju Island, deepening their cultural experience. The structure of the program supports students taking courses in their major, while at the same time taking advantage of their location to study local language and culture.

This first-year mobility program is a short, multidisciplinary and credit-bearing program that is designed to give first-year students an early taste of, and then foster a culture of, global mobility. The aim is to encourage engagement with further study abroad opportunities, including semester programs, and deepen the interest and links with the Indo-Pacific region.

Round 2019

Forgotten Heritage – A Chinese conservation project for Australians (27167)

We propose a ground-breaking, 4-week experimental learning project for 10 students in the Kaiping region of China, focusing on language, cultural exchange, conservation and the preservation of Chinese-Australian history.

From the 1800's, thousands of Chinese nationals from this region emigrated to New South Wales as part of the Gold Rush. Many aging 'Diaolou' (watchtowers) and villages, four of which were inscribed on UNESCO's World Heritage List in 2007, were constructed using money earned in New South Wales. These historic villages represent the initial waves of Chinese émigré to Australia, to where many Australian born Chinese can trace their roots. Some buildings have been restored, yet others stand neglected despite being of great historical significance.

Students from different backgrounds will cooperate to raise Australia's awareness of the area's historical significance. This unique, immersive experience will consist of language classes, seminars, one-to-one support and guided tours of the local villages/industries.

This opportunity also aims to include other Australian universities in the future.

Round 2019

Bringing Indian Enterprise Innovation & Entrepreneurial Practice to Western Sydney (21915 (21916))

This three-year project will enable 60 Business students to contribute to the Government's National Innovation & Science Agenda, by studying enterprise innovation, entrepreneurship and business start-ups in India. The country is the fastest-growing economy globally, a key Asian business hub, and each year, 10 study tour participants and 10 Summer interns will engage with the Indian start-up communities, universities and the Bombay Stock Exchange Institute (which maintains a junior exchange for start-ups) to understand how local innovation strategies and business incubator conditions can be adopted in Western Sydney to support the projected quantum growth here. Students will complete research reports to be presented at the Western Sydney University Launchpad. In-country language training will be provided by Antipodeans. The project can be scaled up or down, with reference to the student activities and the number participating students each year, and the number of years covered by the project.

Round 2019

Managing Eco-tourism and Sustainability in the Philippines (22144 (22145))

This project will grow an existing university pilot, to provide 20 undergraduate science students with an opportunity to experience and research Philippine culture and the issues challenging growth and sustainability of the country. By furthering established networks, students will actively engage with a range of stakeholders including local government and Australian Government (ACIAR funded research). Students will develop a deeper understanding of culture, language and socio economic factors that affect the environmental sustainability of key tourism areas on the island of Panglao. Students will be exposed to the conflicting priorities of economic growth and environmental sustainability. By combining prior learning with culturally immersive experiences, students will successfully contribute to local government projects, addressing these conflicts of interest. Through a week-long internship with local Government, students will gain transferable skills, industry networks and connections to leverage further opportunities in the Asia-Pacific region as science graduates.

Round 2019

A Comparative Study on Chinese Law and Transnational Legal (23756 (23757))

This Project aims to provide undergraduate law students with an opportunity to study at the China University of Political Science and Law (CUPL), and the Southwest University of Political Science and Law (SWUPL), to foster a deeper understanding of Chinese law, language and legal culture. The Project will also provide legal clinic experience at Chinese law firms and Courts.

Through engagement with Chinese legal professionals in Australia at pre-departure programs, and with academics, lawyers and judges during the study tour in China, it will empower students with a practical, contemporary and commercially relevant edge by enlivening students with practical legal skills.

This Project is intended to be four weeks, with a possibility to expand to include six months internship in the future. It aims to prepare students to become global citizens with international experience and comparative perspective for competitive career opportunities, and to develop long lasting relationships between both countries.

Regional Experience on Innovation for Business Students (17887 (17889))

The project aims to strengthen the partnership between Western Sydney University (WSU) and Xiamen University and to enhance global competitiveness of WSU business students by providing them with regional culture and business experience in the largest emerging economy, China. It proposes a four-week study as an accelerated offer of an undergraduate unit on innovation. This project incorporates a work-integrated learning component which allows students link new knowledge to applications in the business sector in emerging economies. It also includes a Chinese language training course 'Doing business in China' which will be provided by School of Management, Xiamen University. With support from two universities and business sectors in two countries, it is possible to expand the duration of the proposed three years to a continuing project and expand the scope to include a larger student group and to develop an exchange project allowing visits of Chinese business undergraduates to Australia.

Vietnamese immersion experience: an intersection of culture and business (18131 (18133))

The Vietnam Immersion Experience offers second and third year business students the opportunity to gain exposure to life as an expatriate by working and living in Vietnam for a period of six to eight weeks. Students will receive mentorship from senior management within their host organisation as they participate in a structured work placement program that will highlight the accessibility of working in the Indo-Pacific region. In order to generate a mutually beneficial outcome for students and host organisations, participating organisations would be presented with a report by the students investigating a negotiated topic, with this report then being assessed as part of a for credit unit. With increasing success of the placement program since its inception in 2013, ten students have undertaken successful placement with four placement organisations. Interest from further industry partners provides an opportunity to expand this program and as such this program may be scaled up.

Round 2019

Bringing Asian Enterprise Innovation & Entrepreneurial Practice to Western Sydney (18267 (18269))

This three-year project is part of a broader three-country program that enables 60 Business students from each program to contribute to the Federal Government's Ideas Boom (National Innovation & Science Agenda), by studying enterprise innovation, entrepreneurship and business start-ups. Hong Kong is a key Asian business hub, and each year, 10 study tour participants and 10 Summer interns will engage with the Hong Kong start up communities, universities and government to understand how local innovation strategies and business incubator conditions can be adopted in Western Sydney to support the projected quantum growth here. Students will complete research reports to be presented at the WSU Launchpads.

In-country language training will be provided by Next Step Connections in Hong Kong. The project can be scaled up or down, with reference to the student activities and the number participating students each year, and the number of years in the Hong Kong project.

Round 2019

Internship for SCEM students with TATA Consultancy Services, Kochi (18264 (18266))

SCEM students will work for either six weeks or three months at TATA Consultancy Services, Kochi. This opportunity will allow students to gain knowledge about the Indian culture and work habits. It will also give students the opportunity to excel in their own area of interest, learn and gain an international experiences while working for one of the large world recognised organisations.

This experience will be fully supported by TATA Consultancy Services - from early pre-departure sessions to help and assistance with accommodation to work and supervision and training on the job. Upon students' return to Australia TATA Consultancy will continue to engage with students and will provide them with ongoing mentorships and further engagement opportunities. TATA offers internships and placements in both Australia and India and therefore provides fantastic opportunities for future career options. This partnerships is likely to lead to new exciting collaborative opportunities.

Round 2019

Semester based mobility with Chitkara University, India (20004 (20006))

This mobility project would involve students travelling to Chitkara University, Chandigarh India and completing a semester of study or more that gives them credits for each unit completed at Chitkara University towards their course enrolled at SCEM, UWS. Students would be able to travel in July 2017 to commence first semester of study.

Since India is becoming one of the first choices for outsourcing jobs, this program would involve students to visit education partner institutions, and research institutions and would also expose students to local culture and language during their stay of few months. Further, this program would help staff to support students' active participation in learning experiences and would assist in bring knowledge back to Western Sydney University. Hence this program would help strengthen and sustain partnerships and offer students mobility to engage in the international environment. Language training will be provided by the Hindi Teaching Scheme, New Delhi.

Round 2019

Mastering clinical skills in the country where traditional Chinese medicine originates (19252 (19254))

As the first country in the West, Australia has introduced statutory regulation of traditional Chinese medicine (TCM) practice. A memorandum of understanding (MoU) between WSU and a Chinese university was signed in 2015 in the presence of Australian Prime Minister and Chinese President in the context of the Free Trade Agreement (FTA). The MOU highlighted the joint support for the validation and translation of TCM and students' exchange. All these events have scaled up the standards of practice in TCM in the West.

WSU offers Bachelor of Traditional Chinese Medicine (BTCM) course as an initial qualification for registration. The clinical practice component (400-hour) in the program is capstone experience for students to become registrable practitioners, which is delivered at a fostering teaching hospital of Nanjing University of Chinese Medicine (NUCM) in China. This requires substantial financial commitment from students for covering tuition, airfares, food, accommodation, and transportation costs.
