

Return to Campus Ready, Tech, Go!

Have you completed your Tech-Check?

Plan Ahead!

If you've recently changed your WSU password on your Windows 10 laptop while working remotely, you'll need IT support when you come back to campus. Schedule this in advance by contacting It Service Desk via the WesternNow portal.

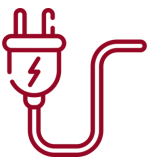

Request New Equipment

If your current equipment is faulty. Contact the IT Service Desk via the WesternNow Portal.

Gather your Equipment

Ensure you know where everything is! From computer cords, chargers, your mouse or laptop stand.. Everything that you need to return to your office environment.

Plugging in

Where does that cord go again? Review the step-by-step guide to plugging back in on the Return to Camps: Ready, Tech, Go webpage.

Allocate Enough Time

Your laptop will need time to resynchronise with the WSU network, and may need to perform security and other updates. This could take some time.

Check that you can

Access your regular Shared Network Drives, and print as normal. Review the step-by-step guides on the Return to Camps: Ready, Tech, Go webpage.
