WESTERN SYDNEY UNIVERSITY

MASTER OF INFORMATION GOVERNANCE (3779)

Join the next generation of managers and consultants in the critical area of information governance.

This degree is designed to give you the skills to meet the ever-growing demand for effective information security management, and become a leader in tomorrow's changing information landscape.

Information governance provides a framework for managing information including creating, using, sharing, storing and deleting information. This helps in ensuring appropriate behaviours and decisions around effective and efficient use of information. The Master of Information Governance provides the knowledge and skillset required for the next generation of managers and consultants that cover the technical, business and legal aspects of information governance. Students will undertake 120 hours of industry placement as a Work Integrated Learning component which is required for successful completion of this program. Possible job roles include information governance officer, information manager, information management specialist, and data protection officer.

Entry via: International students apply direct to Western Sydney University. *www.westernsydney.edu.au/international/apply*

Accreditation: Australian Computer Society at Professional Level

GUIDE, GOVERN, PROTECT INFORMATION

As the knowledge economy continues, information is now the most important asset for businesses. Companies with a proactive and protective information-governance program create opportunities to maximise the value of all business information. They ensure regulatory compliance and minimise risk in an increasingly security-conscious global environment.

At Western, the continually changing information landscape has led to the development of our Master of Information Governance degree. The only program of its kind, this degree transforms you into a professional with cross-disciplinary knowledge of information governance, including an in-depth understanding of the leading issues in business, law and computing.

If you want to be a leader in information management and data security, apply for our upcoming intake.
