

Researcher Record

Addition or Update

Researcher Record – Addition or Update

These pages are for researchers who would have liked to have been listed in the directory, as well as for those who are incorrectly listed.

The authors regret these omissions and errors. The constraints of the project and research methods employed in producing *Tributaries* inevitably meant that not all relevant researchers were contacted or identified for inclusion, and that despite the team's best efforts, some details listed will be wrong, or will have changed since first gathered.

At the time of final production it was not known whether support could be found for taking the directory dataset to a more animated stage as an accessible on-line editable database. Like much of the social and cultural research listed within it, *Tributaries* was a product of researchers working on a fixed-term project and getting it further will take some voluntary efforts.

As a hopeful investment in this possible future on-line directory, and a demonstration of interest to prospective funders of that development, you may want to add or amend your directory details using this form (or an email approximation of it). Email to z.sofoulis@uws.edu.au prior to 30 March 2012.

The rest of this form contains 3 sections.

1. Directory record information – complete fields

2. Additional Publications (for bibliography) – where possible include urls for project reports and publications; include only those most relevant to urban water.

3. List of keywords – select up to five keywords or phrases from list to enter into directory record.

If the source of the information for the 'research summary' section of the directory record comes from a staff or research centre website, please give the web address for later checking.

1. Directory record information

Please enter relevant information into the fields below, using directory entries as models.

Directory Record:

Title	
First Name	
Second Name	
Position	
Centre/Department/Program or Organisation	
Organisation	
Email	
Affiliation to Position	
Affiliation to Organisation/Centre/Department/ Program	
Research Summary (and web source)	
Key Words Summary (please select from the list on the next page)	
1. Project/Publication (title, description, date, collaborators/organisation or publisher, website)	
2. Project/Publication (title, description, date, collaborators/organisation, publisher, website)	
3. Project/Publication (title, description, date, collaborators/organisation, publisher, website)	

2. Additional Publications (for bibliography)

Please list additional publications (last 5 years). The *Tributaries* document had restricted space for bibliographical samples but this limit might not apply in an on-line version.

3. List of keywords

Note: please select no more than five of these to put into the directory record table.

Attitudes	Governance – rural/regional/remote	Policy and regulation
Behavioural change	Governance – urban, Health	Pricing
Catchment	History	Pricing – policy and regulation
Climate Change Adaptation	Household use	Professional Development
Coastal, estuarine, marine,	Human-Environment Interaction	Public Acceptance/Trust
Communication	Impact analysis	Recycling
Community capacity building	Indigenous knowledge	Regional
Community education	Indigenous water management	Research communication/ translation
Community Engagement	Indigenous water rights	Research management
Compliance	Integrated approaches	Research planning
Coordination	Interdisciplinary partnerships	Residential use
Cross-Cultural	Irrigation	Restrictions
Cultural values, beliefs and practices	Knowledge brokering	Rights
Decentralised	Labelling	Rural and/or remote
Decentralised – recycling	Lakes, rivers, floodplains,	Sanitation
Decentralised – supply	Land and water	Smart Metering
Decentralised– sanitation	Law	Stakeholder consultation
Demand management	Market Research	Stormwater
Desalination	Markets	Supply
End use studies	Media Studies	Urban
Equity and Access	Methodologies	Utility
Gender and consumption	Organisational change	Wastewater
Governance	Participatory planning	Water Quality
Governance – climate change adaptation	Pilot project	Water Security
Governance – marine	Planning	Water sensitive urban design
	Policy	

Thanks for taking the time to do this.

Email new or amended records to z.sofoulis@uws.edu.au prior to 30 March 2012.
