## What are the SFU and SFT?

The Student Feedback on Unit (SFU) and Student Feedback on Teaching (SFT) are online surveys that ask students to evaluate unit performance and teaching effectiveness.

## Why are the surveys important?

SFU and SFT feedback provides crucial information for teachers to improve their performance and provide the best possible learning experience for students. SFU and SFT results are a key point of evidence in application for academic promotions.

## How to get valuable feedback

SFUs are issued for all units automatically. SFTs are issued for teachers whose names are against classes in the timetable, so to make sure your SFT is issued correctly, check that your name is assigned to your classes in the timetable each session. You need at least 5 responses to populate your final report. Monitor the Response Rate Dashboards, remind your students and make time during classes for students to take the surveys.
