Antarctic Cities and the Global Commons: Rethinking the Gateways

The project

How we care for Antarctica is key to the planet's future. As pressures on the continent increase, five gateway cities will become critical to its future.

These five cities, Cape Town, Christchurch, Hobart, Punta Arenas, and Ushuaia have complex histories of engagement with the Antarctic. Located in zones with intense interconnectivity to the Antarctic, they are formally recognised international gateways through which most travel to the region flows. All significant engagement with the Southern Polar Region is coordinated through them, but the ensuing competition for economic advantage that this traffic offers is not always constructive.

This project is the first substantial comparative program to investigate how gateway cities might both reimagine and intensify their relations to Antarctica and each other. In doing so, constituents across the Antarctic gateway cities of Hobart, Christchurch and Punta Arenas will be drawn into an ongoing partnership to research the significance of their Antarctic connection.

The aims of this project is to demonstrate how ecological stewardship, political cooperation, cultural vibrancy, and economic prosperity can be mutually reinforcing, and determine how these cities see themselves into the future in relation to Antarctica and to each other.

This project also intends to revitalise these relations through assessment and research processes that include supporting citizens to frame future forms of engagement. It will develop a platform of tools (including a connectedness index and a collaborative online game) to instigate a more robust Antarctic custodial network of partner organisations to support these cities in evaluating and valuing the impact of their Antarctic connection in an integrated way. This also includes working with youth across the five cities to instigate the engagement of young people in debating the future of these cities and the futures of Antarctica.

RESEARCHERS

Associate Professor Juan Salazar,
Institute for Culture and Society

Professor Paul James,
Institute for Culture and Society

Associate Professor Elizabeth Leane,
University of Tasmania

Dr Liam Magee,
Institute for Culture and Society

Mr Tim Short,
Hobart City Council

Professor Denzil Miller,
Antarctic Tasmania,
Department of State Growth

Dr Daniela Liggett,
University of Canterbury,
Christchurch, New Zealand

Ms Chloë Dear,
Canterbury City Council,
New Zealand

Dr Eric Assendelft,
Canterbury City Council,
New Zealand

Mr Elías Barticevic,
Chilean Antarctic Institute,
Chile

Professor Claudia Estrada Goic,
University of Magallanes,
Chile

FUNDING

Australia Research Council, Linkage
Project
Hobart City Council
Christchurch City Council
University of Tasmania
University of Canterbury

The Institute for Culture and Society researches transformations in culture and society in the context of contemporary global change.

It champions collaborative engaged research in the humanities and social sciences for a globalising digital age, and is the largest dedicated research concentration of its kind in Australia.

The Institute encourages collaboration from Australian and international institutions, and students interested in postgraduate studies.
