Think Different? Draw It!

The Spark in the Art: What are the Mysteries of Associations between Traditional Chinese Medicine (TCM) and the Universe? *TCM and Universe: A Connection Colored with Imagination.*

**We never stop exploring the universe.**

As Lao-tzu’s *Tao Te Ching* says, “A Way called *Way* is not the perennial Way. A name that names is not the perennial name: the named is mother to the ten thousand things, but the unnamed is origin to all heaven and earth” (Hinton, 2015). This is also the origin and beginning of the universe in ancient Chinese cosmology.

As a key to open the treasury of ancient Chinese cosmology, civilization, and philosophy, TCM contains profound theoretical knowledge that can decode the mysteries of the universe, such as the concept of Yin and Yang.

Beijing University of Chinese Medicine (BUCM) is hosting a drawing competition under the theme of “The Cosmology of Traditional Chinese Medicine”. This competition invites students to compose an artwork to share their understanding on the relationship between cosmology and Traditional Chinese Medicine. We encourage you to build a deeper connection with the theory of the “correspondence between man and universe”, and at the same time, unleash your creativity!
