This subject provides students with the knowledge to work, using a primary health care approach, with women and their families during childbirth including the transition to parenthood. Emphasis will be placed on the biological, psychosocial and cultural aspects of the pregnancy, birth and the postnatal period and understanding of the role of the midwife in maintaining a woman and family focus within a continuity of care model. The neonatal period will also be examined. Childbirth in our culturally diverse maternity health system will be explored, investigated, analysed and discussed with a specific focus on Aboriginal and Torres Strait Islander peoples. This will include the history of Aboriginal and Torres Strait Islander peoples and how events in history have impacted on their health and birthing practices. Experiences of women from other countries and cultures will be examined.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7012 Clinical Practice: Infant and Child Nutrition and Feeding (10 Credit Points)
Subject Details (p. 4731) **Legacy Code:** 400830
This subject focuses on infant feeding including breast feeding as a significant social and cultural process not just an issue of physiology and nutrition. The theoretical component of this subject will focus on the age-appropriate nutrition of infants and young children linked to developmental stages and the role the child and family health professional in supporting families manage associated issues. All areas of early nutrition will be covered including breastfeeding, use of breast-milk substitutes, introduction of solids and toddler nutrition. The knowledge gained in this subject will be consolidated through virtual clinical placement.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7013 Clinical Supervision in Health Care (10 Credit Points)
Subject Details (p. 4732) **Legacy Code:** 401139
This subject aims to provide students with foundational knowledge related to clinical supervision. Clinical supervision is a supportive formal process which enables health care professionals to develop and improve practice, thus potentially improving outcomes for services and service users. Students will explore various models and theories which underpin clinical supervision, and the principles of effective supervision, including legal, ethical and professional considerations. Students will be encouraged to develop skills in self-awareness and reflective practice and to apply these skills to enhance professional growth and outcomes for service users.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7015 Clinical Teaching for Learning (10 Credit Points)
Subject Details (p. 4733) **Legacy Code:** 400974
This subject prepares nurse educators, clinical facilitators and clinicians for their role as a clinical teacher. Students will identify learner needs to create, plan and implement evidence based teaching interventions and evaluation strategies. Theoretically informed teaching and learning frameworks will be drawn upon in the subject to enable students to develop their knowledge and skills as a clinical teacher in their workplace. The subject utilises an authentic assessment approach to enable students to develop expertise with clinical teaching, student learning and program evaluation.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7016 Collaborative Inquiry for Primary Health Care Action (10 Credit Points)
Subject Details (p. 4734) **Legacy Code:** 400839
This subject provides the opportunity for students to apply the principles of primary health care in a proposal to address an issue of primary health care concern in their workplace or community. The student will gain comprehensive knowledge of the process of action research, participatory action research and cooperative inquiry. Each student will have the opportunity to write a proposal using a collaborative inquiry approach that involves planning a genuine partnership to examine and make changes to improve an identified issue in the student's specific area of work / practice.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7017 Complex Care (10 Credit Points)
Subject Details (p. 4735) **Legacy Code:** 401091
This subject provides students with knowledge of complex conditions that may arise during pregnancy, labour, birth and the postnatal period for the woman or her newborn/s. Emphasis will be placed on the biological and physiological aspects of these conditions. In addition, issues surrounding infertility and reproductive technologies available to women will be explored. The subject also integrates physiological, psychosocial and cultural aspects relating to a woman experiencing a complex pregnancy, labour, birth or post birth period. The role of the midwife in maintaining partnerships with women even when childbearing experiences are complex will be discussed and critically analysed. In addition this subject includes critical analysis of ethical aspects affecting midwifery and maternity care.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): NURS 7011 AND
NURS 7034
Co-requisite(s): NURS 7035
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7018 Contemporary Professional Practice in Mental Health Nursing (10 Credit Points)
Subject Details (p. 4736) **Legacy Code:** 400220
Professional practice in Mental Health Nursing is continually evolving to meet changing social, political and legal requirements related to mental health issues. These requirements include changes in social and political understandings of mental illness and the rights and responsibilities of consumers, carers and providers. There has also been increased emphasis on health promotion, prevention and education in population specific contexts (eg, aged care, child and family, adolescent mental health, alcohol and other drugs services). Mental Health Nurses thus face challenges to develop practice that is congruent with the context of these changing requirements. This subject aims to provide a basis of inquiry into contemporary practice(s) from which the nurse can build an ongoing understanding and appreciation of changing influences.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7019 Cultural and Social Diversity in Health Care (10 Credit Points)
Subject Details (p. 4737) **Legacy Code:** 401082
This subject encourages students to investigate and discuss the concepts of health and illness in the context of cultural and social diversity. The subject promotes the attainment of critical knowledge and core principles necessary for students to become holistic, culturally and socially sensitive and appropriately adaptable when meeting the health needs of Aboriginal and Torres Strait Islander people, other marginalised and vulnerable groups including refugees and those from LGBTI community, and people from culturally and linguistically diverse (CALD) backgrounds. A multicultural approach provides a framework for students to explore the impact of different attitude and value systems relating to the health of peoples in Australia.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7020 Essentials in Vascular Access (10 Credit Points)
Subject Details (p. 4739) **Legacy Code:** 401241
Vascular access devices (VADs) are utilised in health care settings across the world. Nurses, junior medical officers and paramedics are typically at the forefront of having to gain peripheral venous access. Many important aspects of vascular access are taught in isolation which are typically brief and provide surface learning rather than good theoretical understanding that underpin sound clinical skill and safe practice required for inserting and managing VADs. This subject focuses on developing knowledge, competency and skills to safely insert peripheral VADs and manage most acute and chronic devices through access to online material, facilitated simulated workshops and practical application in the workplace with a nominated clinical mentor approved by the school.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7021 Essentials of Best Practice in Midwifery (10 Credit Points)
Subject Details (p. 4740) **Legacy Code:** 401092
This subject provides students with the opportunity to critically evaluate and apply evidence-based approaches to midwifery practice. The subject addresses the value of evidence-based midwifery practice, overviews the contribution of different research approaches to midwifery knowledge development and assists students to develop skills to locate and critique sources of evidence including systematic reviews, meta-analysis, meta-synthesis, integrative reviews, and clinical guidelines. Students are encouraged to become critical consumers of evidence relevant to midwifery practice and to appreciate the process of research design, practice development and practice change.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7022 Ethics in Health Research (10 Credit Points)
Subject Details (p. 4741) **Legacy Code:** 400975
This subject equips students to explore ethical issues impacting on the conduct of research in the health setting. Students will critically explore ethical issues and their implications in health research, understand the process of gaining Human Research Ethics Approval for research, gain practical experience of developing an ethically sound research plan and application for human ethics approval.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7023 Evidence Based Health Care (10 Credit Points)
Subject Details (p. 4742) **Legacy Code:** 401168
This subject is designed to develop students' knowledge of the principles and processes necessary for evidence-based clinical practice. General concepts associated with evidence-based health care are explored. In addition, students are assisted to formulate focused clinical questions and conduct a comprehensive literature search for research evidence that may assist in answering such questions. Issues and techniques involved in the rigorous appraisal of research reports are addressed. The importance of clinical significance when making clinical judgements about the implementation of research findings are also explored. All assessments in this subject are mandatory.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: NURS 7024 Evidence Based Nursing
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7025 Health Promotion and the Nurse (10 Credit Points)
Subject Details (p. 4743) **Legacy Code:** 400210
The challenge for nursing in terms of health promotion is to acknowledge the complex interrelatedness between a person's social and economic situation, their sense of power and control over their life and their physical, emotional and spiritual well-being, i.e. To understand that health is determined by the totality of a person's life circumstances and their inherent traits. This subject uses a social health perspective to examine evidence-based health promotion strategies that can be implemented in the context of nursing practice.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7026 Healthy Families and Communities (10 Credit Points)
Subject Details (p. 4744) **Legacy Code:** 400831
This subject explores the diversity and complexity of families and communities by examining differing cultural and social values, beliefs and practices relating to family structure, functioning and parenting practices. Students will be encouraged to reflect on their own cultural values and beliefs and how these influence practice when working with children and families. The subject will provide an introduction to community needs, assessment and principles of community development. Focusing on contemporary issues, content includes transition to parenthood, father-inclusive practice, parenting children with disabilities, the changing role of grandparents and carers in Australian society and how neighbourhood and communities influence outcomes for children. This subject will provide students with foundational knowledge in identifying and supporting families with vulnerabilities and fostering resilience. Child protection issues will be addressed.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7027 Infant Mental Health (10 Credit Points)
Subject Details (p. 4745) **Legacy Code:** 400835
This subject will provide an overview of the issues that impact on infant mental health. Theoretical frameworks influencing the study of infant-parent relationships will be discussed. Nursing management strategies relating to infant mental health disorders and the promotion of positive parent-child relationships will be examined.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 7114 - Introduction to Infant Mental Health - Child and Family Health Nursing
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7028 Leadership in Clinical Practice (10 Credit Points)
Subject Details (p. 4746) **Legacy Code:** 400235
We are all confronted with the challenge of leadership, regardless of nursing or other healthcare speciality, role, or status. Encompassed within leadership is knowledge of self, relevant theories, skills, and political awareness which are developed through higher education. By developing leadership skills and knowledge we can influence better outcomes for our patients/clients and create more positive working environments. In the unit, Leadership in Clinical Practice, nursing and other healthcare leadership arising from expert clinical practice is explored as a general notion rather than as one arising from any particular clinical speciality. Content includes theories, concepts and styles of leadership, the development of leadership potential, motivation, coaching, and mentorship, concepts of power, authority and empowerment and discussion of contemporary leadership issues. Assignments provide students with the opportunity to apply new knowledge about leadership to their practice, whether they be in management, education, or clinical roles.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): Prerequisite for students in 4691 and 4780 - NURS 3032
Prerequisite for students in 4685 - NURS 7075
Equivalent Subjects: NURS 3003 Clinical Leadership and Professional Relationships
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7029 Mental Health Assessment and Application (10 Credit Points)
Subject Details (p. 4748) **Legacy Code:** 400217
Assessment is an essential component of the nurse/client interaction in mental health/psychiatric nursing. Effective nursing depends on comprehensive, accurate, systematic and continuous data collection. This assists the nurse and client to accurately identify and document critical client issues and formulate management strategies. This subject prepares the student in the area of mental health assessment, in identifying the factors that affect individual/family mental health and applying this knowledge to decisions about appropriate interventions.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): Prerequisite for students in 4691 4780 - NURS 3032 Professional Practice Experience 5
Prerequisite for students in 4785 - NURS 7075 Nursing Practice 3
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7030 Mental Health Nursing Practice 1 (10 Credit Points)
Subject Details (p. 4750) **Legacy Code:** 400218
This subject will assist the student to develop a comprehensive understanding of the nurse-client relationship in mental health nursing, presenting this relationship in its multiple contexts, (e.g., the interpersonal, cultural and socio-political), in order to appreciate factors influencing this relationship and the way it might be 'lived out' in practice. The subject assists students to understand: (1) the nurse-client relationship and its development; (2) the nature of the relationship between the client and nurse; (3) how skilled nurses use this relationship to assist their clients; and (4) how the type of relationship the nurse develops with the client frequently determines the quality of work they do together.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7031 Mental Health Nursing Practice 2 (10 Credit Points)
Subject Details (p. 4750) **Legacy Code:** 400219
This subject is designed to challenge the student to consider evidence-based practice in mental health nursing. Nurses are required to be accountable for their clinical practice and to be able to argue the evidence for specific nursing interventions. Students undertake critical analysis of evidence-based practice in mental health nursing as a concept, a means of accountability, as a means of defining nursing knowledge. Students will apply evidence-based practice concepts to specific psychiatric disorders and problems.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7032 Mental Health for Communities (10 Credit Points)
Subject Details (p. 4751) **Legacy Code:** 400773
Evolving diversity and changes within societies mean that what are understood as adaptive and maladaptive lifestyles, behaviours and attitudes towards mental illness and traditional healing approaches will vary greatly. This subject presents an outline of the themes and topics central to discussions of mental health and illness within a community. It examines the influences of stereotype and stigma, environment, culture, adaptive ability and support systems for psychological well-being while considering approaches which focus on and promote resilience, attachment, a sense of belonging and empowerment. Contemporary mental health and illness issues relating to selected vulnerable groups will be explored.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7034 Midwifery Practice 1 (10 Credit Points)
Subject Details (p. 4752) **Legacy Code:** 401090
In this subject students will develop skills for the provision of midwifery care across the childbirth continuum through working with women in a continuity of care model and also practice experience in designated maternity practice areas. Using a woman-centred, primary health care model, students will commence recruitment and follow 10 women throughout their pregnancy, labour, birth and for up to six weeks post birth; and under supervision will provide midwifery care to these women. The subject commences with a one week intensive workshop, to expose the students to an elementary level of understanding and application of midwifery care in the antenatal clinic, antenatal ward, birth unit, postnatal ward and special care nursery in preparation for their employment. Concepts introduced during this intensive week will be covered with more complexity during future subsequent weekly workshops.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): NURS 7011
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7035 Midwifery Practice 2 (10 Credit Points)
Subject Details (p. 4754) **Legacy Code:** 401093
During this subject students will continue to gain practical experience in designated clinical areas and follow their 10 women throughout pregnancy, labour, birth and the postnatal period in a continuity of care model. They will strengthen their skills in undertaking psychosocial assessment, effectively engaging women in services, facilitating groups and working in collaboration with other professionals to support women. In addition, they will work with women with complex health issues. This subject provides students with the knowledge to collaborate with all health professionals and includes assessing procedures for managing obstetric emergencies; transferring women or newborns with complex health issues; and assessing referral pathways.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): NURS 7011 AND
NURS 7034
Co-requisite(s): NURS 7017
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7036 Midwifery Practice 3 (20 Credit Points)
Subject Details (p. 4755) **Legacy Code:** 401094
In this subject students will consolidate their knowledge and midwifery skills in preparation for their role as a midwife. They will continue to practice in designated clinical areas and follow through their 10 continuity of care experiences. Students will have completed a professional portfolio and reflected on how they can identify and plan for personal professional development and leadership as midwives, including the professional development needs of others. Students will be assessed across the seven midwife standards for practice.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): NURS 7035
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7037 Midwifery as a Profession (10 Credit Points)
Subject Details (p. 4756) **Legacy Code:** 401087
This subject introduces students to the profession of midwifery. It explores: the meaning of birth; the historical and social contexts of birth; and the role of the midwife through the continuum, from early beginnings to its current legal and professional standing. Within a legal and ethical framework, the Australian College of Midwives (ACM) philosophy and role of the midwife will be explored. Students will also be required to discuss and critically analyse current models of midwifery care.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7038 Partnership in Practice (10 Credit Points)
Subject Details (p. 4756) **Legacy Code:** 400832
Health services across Australia have demonstrated commitment to the roll-out of Family Partnership Training to all health professionals who support families with young children. This subject will provide an overview of the Family Partnership Model. Participants will examine the theoretical framework underlying the model which emphasises the need for highly skilled professional communication to develop supportive and effective relationships with families. Students will participate in 5 interactive webinars to embed the fundamental concepts and skills associated with the model. Facilitating groups for parents is a key skill of the child and family health professional. In this subject participants will also study how adults learn, and the key skills in understanding and promoting the group process. Working in partnership extends to other professional and agencies, enabling students to develop skills in professional collaboration.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7040 Perspectives on Nursing (10 Credit Points)
Subject Details (p. 4757) **Legacy Code:** 400774
This subject addresses the origins and development of nursing knowledge. A major focus is the development and progress of the discipline of nursing. It includes an in-depth exploration of the history and philosophy of nursing science, including epistemology and strategies for theory generation in nursing. The impact of borrowed perspectives on research, theory and practice in the discipline of nursing is also explored. In addition, the subject addresses the development of theoretical perspectives in nursing including areas of controversy in the discipline. Numerous perspectives on the relationship between nursing theory, research and practice are considered. A major emphasis in the subject is development of knowledge and understanding of the link between nursing theory, research, practice and related issues.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 7149 - Nursing Knowledge Concepts Models and Theories
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7041 Psychopharmacology for Advanced Practice Mental Health Nurses (10 Credit Points)
Subject Details (p. 4758) **Legacy Code:** 400858
This subject examines pharmacological principles including functional neuroanatomy review, pharmacokinetic principles, pharmacodynamic principles, and neuropharmacology. Students examine a number of psychotropic drugs: antipsychotic, mood stabilisers, complementary medicines, drugs of abuse/misuse, antidepressant, anxiolytic and hypnotic drugs in relation to targeted symptoms, titration, side-effects, and monitoring of clients from across the lifespan. Decision-making in psychopharmacology is explored. The importance of appropriate collaborative processes between the nurse practitioner, clients across the lifespan and their families in medication management is addressed.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7042 Research Project in Health Care (10 Credit Points)
Subject Details (p. 4759) **Legacy Code:** 401084
This is a 20 credit point year-long subject taken over two terms (10 credit points in each term). This subject will assist in the further development and maintenance of research culture in health care, and thus enhance the implementation of evidence-based practice. This subject is designed to assist students in applying their research knowledge and skills and provides them with the opportunity to undertake an independent research project and write a dissertation. It is recommended that students interested in undertaking this subject first complete Applied Research in Health Care (NURS 7004) and Ethics in Health Research (NURS 7022) where the dissertation topic will be identified and students will be allocated a supervisor.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): Students in the Master of Child Family Health (Karitane) Master of Nursing or Master of Mental Health Nursing must complete NURS 7004 Applied Research in Health Care AND NURS 7022 Ethics in Health Research before enrolling in this unit
Students in the Master of Primary Health Care must pass NURS 7022 Ethics in Health Research before enrolling in this unit
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7043 Scholarship for Practice Change in Health Care (10 Credit Points)
Subject Details (p. 4760) **Legacy Code:** 401085
The transformation of practice in healthcare is facilitated when information about creative and innovative practice change and development is documented, disseminated and critiqued through professional channels such as peer reviewed journals, conference papers, discussion papers or project reports. In this subject students will be provided with an opportunity to produce a scholarly piece of work that will disseminate information about transforming practice and improving patient care. The subject aims to enhance scholarly communication skills, provide a vehicle for demonstrating leadership by informing the health professions of innovative solutions for practice change.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: NURS 7044 - Transforming Nursing Practice
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7045 Writing for Publication (10 Credit Points)
Subject Details (p. 4761) **Legacy Code:** 401086
This subject is about writing for publication in the scholarly health and welfare literature. Students will investigate: the range of publications available and the media through which they are delivered; the process of publishing, the key people involved and their roles; the means by which quality is assured in the publishing process and the ways publications are rated for quality and impact; and the influence of social networking media on publishing. Specifically, the influence of online publishing will be investigated. Students will also gain experience of writing for publication under the guidance of an experienced editor and colleagues from the publishing industry. The subject is also available as an elective to all Postgraduate students in the University.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7048 Aboriginal and Torres Strait Islander Maternal and Newborn Health (10 Credit Points)
Subject Details (p. 4761) **Legacy Code:** 401349
This subject will specifically enable students to investigate, discuss and develop an understanding of Aboriginal and Torres Strait Islander peoples' sense of identity, culture, and health. Health statistics, as well as historical and contemporary practice issues will be identified. In addition, the subject will explore strategies that have been implemented to address inequities in health outcomes for Aboriginal and Torres Strait Islander families. Further, the subject promotes the development of critical knowledge essential for students to understand their own values, beliefs, biases, and perceptions to become culturally sensitive and appropriately adaptable when meeting the health needs of Aboriginal and Torres Strait Islander women and families.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7049 Care of People with Tuberculosis (TB) (10 Credit Points)
Subject Details (p. 4762) **Legacy Code:** 401376
This subject examines the care of individuals with Tuberculosis (TB), from initial diagnosis through treatment phases of the disease. Students will explore the role of case management in the care of patients with TB, including strategies to enhance the effectiveness of case managers. Drug resistant TB will be a focus of the subject, especially in relation to its prevention, and the safe management and treatment of patients with different types of drug resistance. Strategies for facilitating community participation in health care will be provided and students will have the tools to develop a community-based health education program focusing on TB. Case studies drawn from across the lifespan and different populations will provide a focus for exploring the pathophysiology of Tuberculosis, diagnostic options, modes of transmission and the pharmacological and non-pharmacological treatment options available.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7050 Clinical Management of Tuberculosis (TB) (10 Credit Points)
Subject Details (p. 4763) **Legacy Code:** 401377
This subject examines the clinical management of Tuberculosis, particularly in relation to cause, prevalence, transmission, diagnosis, treatment and prevention of the disease. Students will be introduced to the different diagnostic tests used in the management of the disease in both adults and children. Case studies drawn from across the lifespan and different populations will provide a focus for exploring the pathophysiology of Tuberculosis, diagnostic options, modes of transmission and the pharmacological and non-pharmacological treatment options available.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7051 Complex Midwifery Care (10 Credit Points)
Subject Details (p. 4764) **Legacy Code:** 401350
This subject provides students with knowledge of complex conditions that may arise during pregnancy, labour, birth and the postnatal period for the woman or her newborn/s. Emphasis will be placed on the biological and physiological aspects of these conditions. In addition, issues surrounding infertility and reproductive technologies, and contemporary issues that impact women, such as pre-existing medical conditions and mental health, will be explored. The subject integrates physiological, psychosocial and cultural aspects relating to a woman experiencing a complex pregnancy, labour, birth or post birth period. The role of the midwife in maintaining partnerships with women, even when childbearing experiences are complex, will be discussed and critically analysed. Students will also critically analyse key ethical and legal aspects affecting midwifery and maternity care.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): NURS 7053 AND
NURS 7054
Co-requisite(s): NURS 7052
Equivalent Subjects: NURS 7017 Complex Care
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7052 Complex Midwifery Practice (10 Credit Points)
Subject Details (p. 4765) **Legacy Code:** 401351
This subject provides students with the knowledge to collaborate with all health professionals and includes developing clinical skills; assessing procedures for managing obstetric emergencies; undertaking simulations of obstetric emergencies; transferring women or newborns with complex health issues; and assessing referral pathways. Students will continue to gain practical experience in designated clinical areas and follow their 10 women throughout pregnancy, labour, birth and the postnatal period in a continuity of care model. They will strengthen their skills in undertaking psychosocial assessment, effectively engaging women in services, facilitating groups and working in collaboration with other professionals to support women.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): NURS 7053 AND
NURS 7054
Co-requisite(s): NURS 7051
Equivalent Subjects: NURS 7035 Midwifery practice 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7053 Foundations of Antenatal and Birth Care (10 Credit Points)
Subject Details (p. 4766) **Legacy Code:** 401347
This subject provides students with an understanding of the biological and physiological aspects of human reproduction, pregnancy, labour and birth. Emphasis will be placed on the normal maternal anatomy and physiology of pregnancy, labour and birth and applications of skills in the Clinical Practice Unit. Students will apply a primary health care approach to working with women and their families during pregnancy and childbirth. Students will consider psychosocial and cultural aspects of pregnancy, birth and breastfeeding, and the role of the midwife in maintaining a woman and family focus within a continuity-of-care model. Childbirth in our culturally diverse maternity health system will be explored, analysed and discussed. The experiences of Aboriginal and Torres Strait Islander women across health services will also be examined. Concepts introduced during the intensive week will be covered in greater complexity across the semester.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): NURS 7054
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7054 Foundations of Postnatal and Newborn Care (10 Credit Points)
Subject Details (p. 4767) **Legacy Code:** 401348
This subject is centred on using a primary health, with continuity of- care approach to the care of women and their families during transition to parenthood. Students will investigate the biological, physiological and psychosocial aspects of the postnatal period and the midwife's role.at this time. Culturally diverse practices, including those of Aboriginal and Torres Strait Islander peoples and women from other countries and cultures will be explored. Students develop midwifery skills working with women in a continuity-of- care model and gain experience in maternity practice areas. The subject commences with a one-week intensive workshop exposing students to an elementary level of understanding and application of midwifery care in a maternity setting in preparation for employment. Postnatal care concepts introduced during this intensive practice week will be covered in more detail during subsequent weeks.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): NURS 7053
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7055 Perinatal, Infant and Child Mental Health (10 Credit Points)
Subject Details (p. 4769) **Legacy Code:** 401375
This subject replaced by NURS 5003 - Perinatal, Infant and Child Mental Health in Spring 2023. This subject enables students to explore the complex issues related to Perinatal, Infant and Child mental health including: the importance of the parent infant relationship to maternal and infant mental health, antenatal and postnatal depression and anxiety, substance misuse and domestic violence. Through examination of these complex issues, students will gain knowledge of the risk and protective factors that influence outcomes for infants, children and families. Strategies to promote emotional wellbeing, positive parent- child relationships and social support for these families is an essential learning component supported by the concepts of targeted and specialist intervention, and early intervention. The knowledge gained in this subject will be consolidated through virtual clinical placement.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7056 Preparation for Midwifery Practice (10 Credit Points)
Subject Details (p. 4770) **Legacy Code:** 401352
In this unit, students will consolidate their knowledge and midwifery skills in preparation for their role as a midwife. They will continue to practice in designated clinical areas and follow through their 10 continuity of care experiences. Students will complete the professional portfolio and reflect on how they can identify and plan for personal professional development and leadership as midwives, including the professional development needs of others. Students will be assessed across the midwife standards for practice. In addition, students will have the opportunity to examine leadership development and styles within the midwifery profession. Students are encouraged to consider their role in future midwifery leadership.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): NURS 7052
Incompatible Subjects: NURS 7036 Midwifery Practice 3
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7057 Professional Foundations of Midwifery (10 Credit Points)
Subject Details (p. 4771) **Legacy Code:** 401374
This subject will introduce students to the profession of midwifery from a philosophical, historical, global, and Australian perspective. It will highlight the important role Midwifery plays in the provision of cost effective, high quality care to both women and newborns globally. It will focus on policies and practices that promote respectful and collaborative woman centred care and the value of continuity of midwifery care to achieving these goals. Students will be required to reflect on beliefs around childbirth including their own personal beliefs.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: NURS 7037 Midwifery as a Profession
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7058 Public Health Management of Tuberculosis (TB) (10 Credit Points)
Subject Details (p. 4772) **Legacy Code:** 401378
This subject examines the ways in which Tuberculosis (TB) is managed from a public health perspective. Students will be introduced to the essential components of a TB Program, particularly focusing on preventing transmission of TB and promoting the health of individuals and communities affected by TB. Learning materials in the subject will be provided to enable students to undertake a Tuberculosis contact investigation, including risk assessment of transmission and management of contacts. Case studies will be utilised to facilitate students' development of effective patient and community education programs.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7059 Ageing in Place: Wellbeing and Sustainability (10 Credit Points)
Subject Details (p. 4772) **Legacy Code:** 401417
This subject addresses a multi-faceted perspectives of healthy and successful ageing. A major focus is to raise awareness about creating an age-friendly community which facilitates older age groups, including those from culturally diverse backgrounds, and Aboriginal and Torres Straits Islander peoples, to be actively involved in all community activities to stay connected to people and place that are important to them. The multiple perspectives of ageing in place integrates biomedical, physical environment/design, legal, ethical, policy, service provision and social contexts of ageing. Knowledge and skills acquired in this subject are useful for planners, managers and health care providers for those working with aged communities. The subject covers evidence-based approaches affecting physical environment, personal characteristics and psychosocial mechanisms that facilitate older people to age successfully.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): Prerequisite for students in 4785 - NURS 7075 Nursing Practice 3
Prerequisite for students in 4691 and 4780 - NURS 3032 - Professional Practice Experience 5
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7060 Optimising Contribution of Older People (10 Credit Points)
Subject Details (p. 4774) **Legacy Code:** 401418
This subject addresses issues related gerontocracy (a society whereby elders have power and influence), versus ageism (age-related prejudice or discrimination based on a person's age). Stages of ageing and risk will also be covered, including ethical issues related to the aged communities and the aged care sector. Importantly, this subject will address strategies that need consideration to optimise integration of aged communities, including: active adult retirement communities, poverty safety net and governmental policies, housing, the use of technology, strategies to slow and reverse age-related decline including emerging developments. Issues related to optimising self-determination and 'dignity of risk' among aged communities will also be covered.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7061 Professional Focus: Age-Friendly Future (10 Credit Points)
Subject Details (p. 4775) **Legacy Code:** 401420
Accepting and embracing the ageing population as assets and not a burden is important towards enabling older people to continue living in security and to fully participate in society. For this to occur, the future of work, design and social spaces need to be responsive to the needs of ageing populations. This subject offers students with the opportunity to assess and reflect on the domains of age-friendliness in alignment with World Health Organisation (WHO) Age-friendly framework relevant to their interest, or their work practice settings. The WHO age-friendly domains, inputs from older people, carers of older people and service providers, are elements to be considered in this proposed quality improvement project.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7062 Project Management in Healthcare (10 Credit Points)
Subject Details (p. 4775) **Legacy Code:** 401419
Project management knowledge and skills are vital in the healthcare professional work environment. Using scenarios, students will explore their topic of interest, applying principal project management concepts, and integrate these into project planning. Students will learn how to appraise existing projects using a review framework, and identify the key steps within a project life cycle, starting from the conception stage to creating a project implementation plan.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7064 Clinical Teaching and Workplace Learning for Competent Practice (10 Credit Points)
Subject Details (p. 4776) **Legacy Code:** 401437
This subject prepares educators and clinicians for their role in clinical education by examining educational theory and its relevance and application to teaching and learning in the clinical workplace. Students will identify and operationalise key priorities for learning and teaching in their organisation and address these by providing appropriate and relevant teaching and learning experiences that build the capacity of colleagues (this can also be extended to include patient and family education). The subject also explores the principles and challenges that are associated with the assessment of competence and the strategies that can be utilised to further develop the knowledge and skills of the clinical educator in the professional practice environment.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 7676 - Clinical Teaching and Professional Development NURS 7014 - Clinical Teaching and Professional Development
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7065 Capstone Experience in Health Care (20 Credit Points)
Subject Details (p. 4777) **Legacy Code:** 401440
This subject offers a range of options for students to integrate, extend and reflect on the professional knowledge and skills gained through their master's level studies. It will provide a framework within which students can explore professionally relevant situations. Students will have the opportunity to nominate, plan and execute a capstone experience relevant to their professional interests. In doing so, students will develop a professional portfolio or e-portfolio that will incorporate the work undertaken during the degree studies and extend to include a critical reflection of their graduate capacity and professional development.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: NURS 7008 - Capstone Experience in Health Care
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7066 Acute Exacerbations of Chronic Conditions (10 Credit Points)
Subject Details (p. 4778) **Legacy Code:** 401446
Acute Exacerbations of Chronic Conditions utilises an evidence-based approach to develop an understanding of pathophysiology, pharmacological interventions, and nursing care for patients who experience acute exacerbations of chronic conditions.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): NURS 7071 - Introduction to alterations in health
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7067 Acute Life-Threatening Conditions (10 Credit Points)
Subject Details (p. 4779) **Legacy Code:** 401447
Acute Life-Threatening Conditions utilises an evidence-based approach to develop an understanding of the pathophysiology, pharmacological interventions, and nursing care for people across the lifespan who experience an acute life-threatening condition. An important area of focus is detecting and recognising acute deterioration and escalating care.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): NURS 7066
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7068 Chronic Conditions and Disability (10 Credit Points)
Subject Details (p. 4780) **Legacy Code:** 401456
Chronic Conditions and Disability utilises an evidence-based approach to develop an understanding of pathophysiology, pharmacological interventions, and nursing care for people across the lifespan who experience chronic conditions and/or disability.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): NURS 7071 - Introduction to alterations in health
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7069 Foundations of Nursing Practice (10 Credit Points)
Subject Details (p. 4781) **Legacy Code:** 401457
This subject is conducted in an intensive study mode that is offered to students with a previous Bachelor degree, Master degree, or higher and completed within the last 10 years. The subject provides the essential foundational and core learning activities to support student transition into the Master of Nursing Practice (Graduate Entry). If a student is unsuccessful in attaining a satisfactory grade for this subject they may be requested to transfer into the undergraduate Bachelor of Nursing. All assessments in this subject are mandatory. Attendance is also mandatory in all tutorials and Clinical Practice Unit sessions in this subject.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7070 Health, Culture and Wellbeing of Aboriginal and Torres Strait Islander Peoples (10 Credit Points)
Subject Details (p. 4783) **Legacy Code:** 401445
This subject will specifically enable nursing students to investigate, discuss and develop an understanding of Aboriginal and Torres Strait Islander health, health statistics, historical and present-day issues associated with poor health outcomes in Indigenous Australians. The concepts of cultural safety, health, illness and wellbeing will be discussed and synthesised in relation to Aboriginal and Torres Strait Islander Peoples. Students will explore and reflect on the impact of the different attitudes, institutional policies and value systems relating to the health of Aboriginal and Torres Strait Islander Peoples in Australia.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7071 Introduction to Alterations in Health (10 Credit Points)
Subject Details (p. 4784) **Legacy Code:** 401458
The primary focus of this subject is the application of the National Safety and Quality Health Service Standards related to regional, national and global Health Priorities . This introduction to Alterations in Health utilises an evidence-based approach to develop an understanding of pathophysiology, pharmacological interventions, and justification of appropriate safe nursing care of people across the lifespan who are experiencing acute, but usually resolvable alterations in their health.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): NURS 3040 - Foundations of Nursing Practice
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7072 Mental Health Nursing Practice (10 Credit Points)
Subject Details (p. 4785) **Legacy Code:** 401459
Mental Health Nursing Practice develops knowledge and skills to support nursing practice when providing care for people with mental health issues in a range of health care settings. It explores contemporary models of care such as recovery-oriented practice, trauma-informed care, and social determinants approach. Students will develop awareness and plan evidence-based initiatives that promote mental health, prevent and intervene early in illness, facilitate recovery, and promote wellbeing. The subject includes 80 hours of clinical placement.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): NURS 3040 - Foundation of Nursing Practice
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7073 Nursing Practice 1 (10 Credit Points)
Subject Details (p. 4787) **Legacy Code:** 401460
Nursing Practice 1 focuses on the development of the role and skills of the registered nurse when assessing and providing care for people across the lifespan who are experiencing acute, but usually resolvable conditions. A simulated professional task will assist with the development of essential clinical communications and simulated skills assessment and a professional experience placement will support clinical skill development. The subject includes 160 hours of Professional Experience Placement.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): NURS 3040 Foundations of Nursing Practice
NURS 7077 Pharmacology Knowledge for Nursing Practice
NURS 7071 Introduction to Alterations in Health
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7074 Nursing Practice 2 (10 Credit Points)
Subject Details (p. 4788) **Legacy Code:** 401461
Nursing Practice 2 focuses on the development of the role and skills of the registered nurse when providing care for people experiencing an acute exacerbation of a chronic condition. A simulated professional task will assist with the development of essential clinical communications and simulated skills assessment and professional experience placement will support clinical skill development. The subject includes 160 hours of Professional Experience Placement.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): NURS 7073
Co-requisite(s): NURS 7068 AND
NURS 7066
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7075 Nursing Practice 3 (10 Credit Points)
Subject Details (p. 4790) **Legacy Code:** 401462
Nursing Practice 3 focuses on the development of the role and skills of the registered nurse when assessing and caring for people across the lifespan who are experiencing acute life-threatening illness and life limiting illness. A simulated professional task will assist with the development of essential clinical communications and simulated skills assessment and professional experience placement will support clinical skill development. The subject includes 160 hours of Professional Experience Placement.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): NURS 7074
Co-requisite(s): NURS 7067
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7076 Palliative and End of Life Care (10 Credit Points)
Subject Details (p. 4792) **Legacy Code:** 401463
Palliative and End of Life Care focuses on the palliative approach as a model of care, exploring the benefits of this approach when supporting dying individuals with any life limiting illness. Students will acquire the capabilities to develop self-care strategies to manage their own grief, loss and stress associated with working in a palliative care context.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): NURS 7066
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7077 Pharmacology Knowledge for Nursing Practice (10 Credit Points)
Subject Details (p. 4792) **Legacy Code:** 401464
Safe medication administration is a fundamental requirement in nursing. It is vital that registered nurses have a solid understanding of pharmacology in order to maximise patient safety in the quality use of medications. This subject will introduce the principles and core concepts of pharmacology where students will combine cognitive, technical and research skills to develop the essential knowledge of pharmacokinetics and pharmacodynamics. Students will be required to systematically develop an understanding of actions and reactions of commonly prescribed drugs using concepts of person-centred care across the lifespan. Principles of safe administration, prescribing, electronic medication management systems, patient education and engagement in medication management are the focus of this subject.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): NURS 7023 - Evidence-based Health Care
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7078 Professional Nursing Practice (20 Credit Points)
Subject Details (p. 4794) **Legacy Code:** 401465
Professional Nursing Practice provides an opportunity to consolidate the development of the role and clinical skills of the registered nurse in preparation for transition to graduate practice. A simulated professional task will assist with the development of essential clinical communications and a professional experience placement to evaluate clinical skills development. The subject includes 240 hours of Professional Experience Placement. All assessments in this subject are mandatory. Attendance is also mandatory in all workshops and Clinical Practice Unit sessions in this subject.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): NURS 7074 and NURS 7075
Co-requisite(s): NURS 7079
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7079 Transition to Professional Nursing (10 Credit Points)
Subject Details (p. 4795) **Legacy Code:** 401466
Transition to Professional Nursing explores the process of transition from student to registered health care professional. Students analyse their role as a registered nurse, reflecting on accountability, responsibility, therapeutic and professional relationships, as well as their capability for practice. This subject will build capacity in students to meet their professional responsibilities as capable practitioners in nursing and assist in demonstrating job readiness skills in preparation for new graduate employment opportunities.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): NURS 7075
Co-requisite(s): NURS 7078
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7080 Waluwin: Health across the lifespan for Mob (10 Credit Points)
Subject Details (p. 4796) **Legacy Code:** 401502
In Spring 2023, this subject replaced by NURS 5005 - Waluwin: Health across the lifespan for Mob. Building on the broad concepts learnt in core subject 401454 - Indigenous Australian Health, Wellness and Culture or subject 401445 - Health, Culture and Wellbeing of Aboriginal and Torres Strait Islander Peoples, this subject introduces the student to perspectives of Aboriginal and Torres Strait Islander people's health looking across the lifespan. Critical aspects of nursing care across the lifespan are examined focusing on the patients emotional, social, physical, and significantly, spiritual wellbeing in addition to family and the communities' response to the key alterations in health. Classroom learning will be supported by a field trip which allows students to experience a culturally immersive experience on Country facilitated by Aboriginal Elders. The field trip will also allow students to develop new skills for practice and develop a deeper appreciation for Aboriginal and Torres Strait Islander peoples and culture. This subject will interest anyone with an interest in contemporary Aboriginal and Torres Strait Islander culture and health care.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): NURS 7070 OR
NURS 2039
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 9001 Higher Degree Research Thesis - Aged Care Nursing (10,20 Credit Points)
Subject Details (p. 4797) **Legacy Code:** 800111
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 9002 Higher Degree Research Thesis - Midwifery (10,20 Credit Points)
Subject Details (p. 4799) **Legacy Code:** 800109
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 9003 Higher Degree Research Thesis - Nursing (10,20 Credit Points)
Subject Details (p. 4802) **Legacy Code:** 800107

Restrictions: Please see the Subject Details page for any restrictions for this subject

Other Ag, Env and Related (AGEN)

AGEN 1001 Water Quality Assessment and Management (10 Credit Points)
Subject Details (p. 2037) **Legacy Code:** 300814
Water is essential for all life on earth. This subject will equip students with skills in biological, chemical and physical water quality assessment for a sustainable water future. The subject introduces students to healthy natural waterways and contrasting degraded waters impacted by disturbance from human activities. A broad range of pollutants, their sources and the consequences for human health and the ecology of water ways will be investigated. Management strategies will also be examined based on the sound scientific assessment of water quality. Students in this subject will cover water quality legislation, regulation, policy, guidelines and develop competencies in water monitoring, regulation, treatment and management.
Level: Undergraduate Level 1 subject
Equivalent Subjects: AGEN 2002 - Water Quality Assessment and Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

AGEN 1002 Water Quality Assessment and Management (WSTC) (10 Credit Points)
Subject Details (p. 2038) **Legacy Code:** 700298
Water is essential for all life on earth. This subject will equip students with skills in biological, chemical and physical water quality assessment for a sustainable water future. The subject introduces students to healthy natural waterways and contrasting degraded waters impacted by disturbance from human activities. A broad range of pollutants, their sources and the consequences for human health and the ecology of water ways will be investigated. Management strategies will also be examined based on the sound scientific assessment of water quality. Students in this subject will cover water quality legislation, regulation, policy, guidelines and develop competencies in water monitoring, regulation, treatment and management.
Level: Undergraduate Level 1 subject
Equivalent Subjects: AGEN 2002 Water Quality Assessment and Management
AGEN 1001 Water Quality Assessment and Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

AGEN 1003 Water Quality Assessment and Management (UG Cert) (10 Credit Points)
Subject Details (p. 2039) **Legacy Code:** 500052
Water is essential for all life on earth. This subject will equip students with skills in biological, chemical and physical water quality assessment for a sustainable water future. The subject introduces students to healthy natural waterways and contrasting degraded waters impacted by disturbance from human activities. A broad range of pollutants, their sources and the consequences for human health and the ecology of water ways will be investigated. Management strategies will also be examined based on the sound scientific assessment of water quality. Students in this subject will cover water quality legislation, regulation, policy, guidelines and develop competencies in water monitoring, regulation, treatment and management.

AGEN 3001 Animal Behaviour (10 Credit Points)
Subject Details (p. 2040) **Legacy Code:** 300878
Focusing on a variety of wildlife and domestic animal species, the subject addresses how classic ecological and evolutionary principles shape animal behaviour by weighing the experimental and observational evidence for each idea. We illustrate concepts with examples from a wide range of taxonomic groups of animals in diverse ecosystems. Students will conduct experimental field and laboratory procedures, as well as observe and work with groups of animals on the UWS Hawkesbury campus.
Level: Undergraduate Level 3 subject
Equivalent Subjects: AGEN 3002 - Animal Behaviour
Restrictions: Please see the Subject Details page for any restrictions for this subject

AGEN 4001 Researching our Changing Environment (10 Credit Points)
Subject Details (p. 2041) **Legacy Code:** 800195
This subject focuses on learning to critically evaluate current research in topics under study at the Hawkesbury Institute for the Environment and how advanced scholarship in your field of study is conducted. The Hawkesbury Institute for the Environment spans a broad set of fields from soil microbial genomics and microbial ecology to the biogeochemistry, ecology and physiology of plants and microbes, animal ecology and evolution, to ecosystems, landscapes and Australia-wide processes. Teaching sessions are designed around a thematic cross-section of research within HIE, representing many of these areas. The subject also involves enhancing skill in evaluating appropriate research methodologies for asking questions and testing hypotheses, including an introduction to some of the large-scale research facilities within HIE that students may be involved with.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

AGEN 7001 Bushfire Behaviour (10 Credit Points)
Subject Details (p. 2042) **Legacy Code:** 200457
This subject describes the factors affecting bushfire behaviour and the models which are used to predict bushfire behaviour, the principles of fire ecology, and the assessment of bushfire hazards on property and the environment. Topics include the measurement of fuel, rates of spread and flame length equations, fire danger indices and landscape issues, topographical influences on fire behaviour, the importance of fire regimes and fire thresholds on flora and fauna, habitat and fire impacts on environmental services such as soils and water catchments. The role of fire behaviour in determining impacts on structures is also described.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

AGEN 7002 Ecosystems in a Changing World (10 Credit Points)
Subject Details (p. 2042) **Legacy Code:** 800170
Natural and managed ecosystems on our planet are experiencing a rapidly changing environment as a consequence of changing patterns of land and resource use, loss of biodiversity, altered atmospheric composition and anthropogenic climate change. This subject will introduce students to ecosystem concepts in the context of ecological and evolutionary responses to global change. Students will obtain practical experience in quantitative analysis of carbon, nutrient, water and energy budgets, and explore the consequences of global change for ecosystem services and biodiversity over a range of spatial and temporal scales. Teaching will be led by HIE staff with expertise in ecosystem responses to environmental change, soil microbial contributions to ecosystem function and the impacts of environmental change on plants, animals and their interactions.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

AGEN 7004 Perspectives of Sustainable Development (10 Credit Points)
Subject Details (p. 2043) **Legacy Code:** 300397
This subject explores the philosophy, policies and practice of sustainable development. In exploring environmental philosophy the subject provides students with an understanding of the nature and emergence of both modern and post-modern paradigms that influence the direction and nature of current development policy. The nature of environmental policy is examined by developing an understanding of how values and attitudes shape a governing ethic about environmental management. The social, political, economic and ecological elements of sustainable development are unfolded to aid students understanding of what needs to be managed. Particular attention is given to those issues confronting developing countries as they move to become industrialised nations yet have high levels of poverty. Finally, the subject introduces the practice of environmental impact assessment as one management tool used in the management process.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYB 8266 - Environmental Management Core Studies 1 LGYB 8275 - Environmental Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

AGEN 7005 Research Protocol Design and Practice (10 Credit Points)
Subject Details (p. 2044) **Legacy Code:** 401080
In this subject postgraduate students develop a proposal for a research study in an area of interest, drawing upon their knowledge and experiences from other subjects in their program of study. Students learn how to apply research methods to a variety of research situations and questions; to understand how research questions are developed and answered empirically through suitable choice of research methodology, design and method; and how research findings are validated and communicated.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): All Students must do PUBH 7016
HLTH 7008 for students in 4702
HLTH 7025 for students in 4698
CMPL 7012 for students in 4716
Equivalent Subjects: AGEN 7003 - Methods of Researching
Restrictions: Please see the Subject Details page for any restrictions for this subject

AGEN 9001 Higher Degree Research Thesis - Hawkesbury Institute for the Environment (10,20 Credit Points)
Subject Details (p. 2045) **Legacy Code:** 800148
Level: PhD and Research Masters Level 9 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

Other Creative Arts (CART)

CART 3001 Modernism (10 Credit Points)
Subject Details (p. 2553) **Legacy Code:** 101033
This subject aims to introduce students to important works of literature from the earlier part of the 20th century. Throughout the course we will be concentrating on literature but will make reference to other art forms (in particular the visual arts) to provide the intellectual context necessary to understanding the ideas of the period. There will be a close study of a small number of important novels or works of poetry from the period, with a close consideration of techniques of writing and the way these techniques contribute to an understanding of the themes in the works.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CART 6001 Writers at Work (10 Credit Points)
Subject Details (p. 2554)
This subject introduces students to Australian writers currently at work in the industry. How do Australian writers juggle the business and creative aspects of writing? Where do they publish, what forms do their creative practices take, and how do they survive financially? The classes will be a mixture of guest lectures and interviews in which writers, editors and agents share their experience of writing industries. Students will be encouraged to actively engage with industry professionals, and to engage critically with the work of significant Australian writers.
Level: Postgraduate Coursework Level 6 subject
Equivalent Subjects: CART 7020 - Writing Form
Restrictions: Please see the Subject Details page for any restrictions for this subject

CART 6002 Reading and Writing Australia (10 Credit Points)
Subject Details (p. 2554)
This subject will be a course of reading, taking in a variety of Australian narratives across the country's long cultural history. Students will look at art, oral storytelling, film, fiction, poetry and non-fiction, and use these texts as a jumping-off point or inspiration for their own work, simultaneously finding themselves in and creating new spaces in Australian narrative. The subject will consider Indigenous storying, urban and regional literatures, colonial legacies and how these shape aesthetics and narratives of belonging. Does Australia have a national literature, and if so, what does it mean to writers and readers in the 21st century?
Level: Postgraduate Coursework Level 6 subject
Equivalent Subjects: CART 7022 - Writing Sounds Images Texts
Restrictions: Please see the Subject Details page for any restrictions for this subject

CART 6003 Research Methods in the Creative Arts (10 Credit Points)
Subject Details (p. 2555)
This subject investigates conceptual, theoretical and practice-based models used in Creative Arts Research. It introduces students to a variety of important methodologies, including empiricism, experimentation, practice-based research, performativity-as-method, and narrative inquiry. It also focuses on writing as a creative praxis that has an important relationship to all the creative arts. Methodologies will be explored through the analysis of various theoretical and conceptual models that are produced through and applied in creative work. The subject will include the production of a creative work, and a variety of strategies for analysing and documenting this and other creative work, including observation, participation, reflection, contextualisation and representation. The subject also examines the relationships between theory and practice, and it will look at the conditions under which creative arts research is produced, exploring its meanings, effects and affects. The subject is suitable for academic research students who intend to include some non-traditional research outcomes in their work.
Level: Postgraduate Coursework Level 6 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CART 6004 Creative Writing Practice (20 Credit Points)
Subject Details (p. 2556)
This subject consolidates the student's journey towards producing an extended creative work in Year 2 for the Masters Project. Students are guided in responding to writing exercises set by their tutor and are given feedback on their writing practice. They explore and experiment within different forms and genres, including genres of fiction (such as the short story, the novel, YA fiction and auto-fiction), non-fiction (including the personal essay, environmental writing, memoir and the art of criticism) and poetry (including experimental narrative). This subject progresses towards writing and workshopping a lengthier creative piece, which will form part of the student's final assessment.
Level: Postgraduate Coursework Level 6 subject
Equivalent Subjects: CART 7002 Applied Practice in Literary Studies and Creative Writing
Restrictions: Please see the Subject Details page for any restrictions for this subject

CART 6006 Creative Non-Fiction (10 Credit Points)
Subject Details (p. 2557)
This subject engages with the diverse and growing field of creative non-fiction. Students will read and analyse a wide range of non-fiction forms and subjects such as the personal essay, memoir, criticism, true crime, nature and travel. They will discuss various ethical complexities of telling true stories or representing 'truth', and address why creative non-fiction has become one of the most visible and rapidly growing genres in Australian and international publishing. Students will consider voice, form and point-of-view and produce a creative assessment with a view to pitching for publication in an Australian journal.
Level: Postgraduate Coursework Level 6 subject
Equivalent Subjects: CART 7019 - Writing Process
Restrictions: Please see the Subject Details page for any restrictions for this subject

CART 7001 Applied Methods in Literary Studies and Creative Writing (20 Credit Points)
Subject Details (p. 2557) **Legacy Code:** 102220
This subject familiarises students with methods of pursuing and presenting research across the discipline of literary studies as well as with regard to the kinds of research required for undertaking creative writing. It further provides students with the opportunity to explore these methods in their own research or creative practice. The subject is comprised of specific training exercises, which will enable students to develop the research skills necessary to developing for their masters project.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: HUMN 4009 - Research Design 1 Theories of Enquiry HUMN 4010 - Research Design 2 Practices of Research
Restrictions: Please see the Subject Details page for any restrictions for this subject

CART 7002 Applied Practice in Literary Studies and Creative Writing (20 Credit Points)
Subject Details (p. 2558) **Legacy Code:** 102222
In 2023, this subject is replaced by CART 6004 - Creative Writing practice. This subject familiarises students with the practice of pursuing and presenting research and methods in literature and related forms as well as with regard to the kinds of research required for undertaking creative work. It provides students with the opportunity to explore these methods in their own research and/or creative practice. This subject opens out into workshops in which students work through elements of the work they are developing for their masters project.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: HUMN 4009 - Research Design 1 Theories of Enquiry HUMN 4010 - Research Design 2 Practices of Research
Restrictions: Please see the Subject Details page for any restrictions for this subject

CART 7004 Art Therapy: Approaches and Applications (20 Credit Points)
Subject Details (p. 2559) **Legacy Code:** 102354
This subject introduces the spectrum and variety of contemporary art therapy approaches, as they are taken up with and regarded by diverse participants in a range of community and clinical contexts. Students will critically consider how art therapy is applied and adapted to assist people with particular problems and categories of distress. The emergence and problematisation of clinical populations and client groups will be examined, with a view to developing an art therapy practice informed by critical psychological and social perspectives. An experiential component will provide practical experience in exploring art therapy processes and techniques by working in group situations led by experienced art therapists.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): CART 7005
Equivalent Subjects: CART 7003 - Art Therapy Application to Client Groups
Restrictions: Please see the Subject Details page for any restrictions for this subject

CART 7005 Art Therapy: Histories, Theories, Groups (20 Credit Points)
Subject Details (p. 2560) **Legacy Code:** 101303
This subject explores theories and practical experiences relevant to art therapy. Consideration is given to the major theoretical frameworks of art therapy, its historical development and group processes. There is a major experiential component which provides practical experience in exploring the process of art therapy by working in a group situation led by an experienced art therapist/s. The process will be explored and examined in relation to the self, to the self as artist and to therapeutic practice.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: LGYA 7428 - Art Therapy Theory and Practice 1 LGYA 9676 - Art Therapy Theory and Practice 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

CART 7007 Creativity: Theory and Practice (20 Credit Points)
Subject Details (p. 2560) **Legacy Code:** 102376
Research in communication arts utilises a range of investigative procedures appropriate to the theory and practice of each creative arts discipline. This subject will introduce fundamental research languages, methods, and outcomes relevant to the creative arts disciplines, and encourage students to develop approaches best suited to their theory and practice. Students will write and defend a research proposal and paper for a research program: the subject will enable students to apply a rigorous research framework to their work. Students will engage with a range of significant and critical texts which address the broad implications of practices and theories in creative arts disciplines.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CART 7010 Integrating Arts and Therapy (20 Credit Points)
Subject Details (p. 2561) **Legacy Code:** 102527
This subject introduces art therapy students to an understanding of art psychotherapy theory through the lens of contemporary art and the translation of foundational psychotherapy knowledge and skills into art therapy practice. This subject builds on the micro skills of counselling and psychotherapy learned in Counselling Skills for the Allied Professions, through the scaffolded introduction and practice of art therapy clinical skills during intensive group work supported by staff. The subject also offers an opportunity for students to demonstrate their emerging understandings of art therapy by producing and exhibiting an artwork on a chosen aspect of the relationship between art and psychotherapy.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): CART 7005 AND
WELF 7032 AND
WELF 7029
Equivalent Subjects: WELF 7005 - Counselling 2
Incompatible Subjects: WELF 7010 - Foundations of Psychotherapy and Counselling 2 CART 7011 - Integrating Arts and Therapy
Restrictions: Please see the Subject Details page for any restrictions for this subject

CART 7013 Masters Project (40 Credit Points)
Subject Details (p. 2562) **Legacy Code:** 102255
The Masters Project is the culmination of the Master of Arts in Literature and Creative Writing. Students will build up to being able to complete a long written project. For many students this will be a creative project (creative writing, or related media including music). This involves both the creative work (normally 11,000 words) along with an 'exegesis' that offers a critical overview of the ideas within it (4,000 words). Other students might choose to write a long critical essay in literary studies (15,000 words). There is no class work; rather, students work individually with a supervisor with significant expertise in the area in researching and writing their Project.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: LGYA 1660 - Masters Project
Restrictions: Please see the Subject Details page for any restrictions for this subject

CART 7014 Research Methods in the Creative Arts (20 Credit Points)
Subject Details (p. 2563) **Legacy Code:** 102375
This subject investigates conceptual and theoretical models used in Creative Arts Research. It introduces students to a variety of important methodologies, including empiricism, experimentation, practice-based research, performativity-as-method, and narrative inquiry. It will also focus on writing as a creative praxis that has an important relationship to all the creative arts. Methodologies will be explored through the analysis of various theoretical and conceptual models that are applied in and produced through creative work. The subject will include a variety of strategies for analysing and documenting creative work, including observation, participation, reflection and representation. It will also examine the divisions between theory and practice, asking whether theory is in itself a practice that empiricism describes. It will look at the conditions under which creative arts research is produced, exploring its meanings, effects and affects.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CART 7018 Writing Practice and Tradition (10 Credit Points)
Subject Details (p. 2564) **Legacy Code:** 102498
This subject will consider the nature of writing in terms of both writing and editorial practice. It will involve the analysis of major works by writers (both of fiction and non-fiction) within particular traditions and communities and reflect on the themes of these works and the processes through which they emerge. It will explore the power of the word to shape our understanding of the world. This reflection will be both theoretical and practical.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: CART 7016 - Word (Literary Traditions)
Restrictions: Please see the Subject Details page for any restrictions for this subject

CART 7019 Writing Process (10 Credit Points)
Subject Details (p. 2565) **Legacy Code:** 102499
In Quarter 4 2023, this subject is replaced by CART 6006 - Creative Non-Fiction. This subject will consider elements of the physical world around us: the phenomena we inhabit which form our sense of self. Focusing on literature and how meaning is created in literary form the subject will consider the interaction between the created world and the real world. It will focus on method and process in writing. In doing this it will engage with ideas from a number of areas, including science, philosophy, and literary theory in considering particular aspects of both our interaction with world, and how it shapes us, and the manner in which art shapes and forces itself upon the world. A specific theme related to the process of creation in art will be addressed.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: CART 7017 - World (Art and Nature)
Restrictions: Please see the Subject Details page for any restrictions for this subject

CART 7020 Writing and Form (10 Credit Points)
Subject Details (p. 2565) **Legacy Code:** 102500
In Quarter 2, 2023 this subject replaced by CART 6001 - Writers at Work. Literature has always involved playing with language and shaping words into specific forms. The European avant-gardes of the 1910s, 20s and 30s swept aside traditional forms and valued kinds of playing that many cultural institutions and aesthetic authorities of the times regarded as childish. This unit will examine the interactions of play and form in experimental writing. Taking the manifesto as a means for outlining the scope and parameters of experimentation, it will explore a variety of calls-to-action regarding writing and form, and reactions to these in a range of literary forms including short fiction, poetry, and the essay.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: CART 7015 - Search (Translation)
CART 6001 - Writers at Work
Restrictions: Please see the Subject Details page for any restrictions for this subject

CART 7021 Writing and Ideas (10 Credit Points)
Subject Details (p. 2566) **Legacy Code:** 102497
This subject will focus on a particular idea or concept that is of major importance to the diverse cultural, artistic and philosophical understandings we have of ourselves. It will then look to explore how the idea operates through these differing understandings and the problems it poses for representation. The theoretical and creative texts examined will focus both on the nature of the idea and how it might be better understood or made use of in creative practice.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: CART 7009 - Idea (Conceiving Experience)
Restrictions: Please see the Subject Details page for any restrictions for this subject

CART 7022 Writing, Sounds, Images, Texts (10 Credit Points)
Subject Details (p. 2567) **Legacy Code:** 102501
In Spring 2023 this subject replaced by CART 6002 - Reading and Writing Australia. This subject will involve a reflection on practice-based research in the arts. It will involve a consideration of how various art-forms might interact and inform one another. There will, then, be a focus on interdisciplinary interaction in the arts: across music, visual arts, and writing, with a strong interest in the potentials of new media. Throughout we will make comparisons with the relationship between sound and text in film, and in the media more broadly.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: CART 7008 - Display (Sounds Images Text)
Restrictions: Please see the Subject Details page for any restrictions for this subject

CART 9001 Higher Degree Research Thesis - Creative Arts (10,20 Credit Points)
Subject Details (p. 2567) **Legacy Code:** 800005
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

Other Engr. and Related Tech (ENGR)

ENGR 0001 Academic Skills for Engineering (WSTC Prep) (10 Credit Points)
Subject Details (p. 3127) **Legacy Code:** 700202
This subject is designed to assist students to become successful independent reflective learners. It introduces students to a range of theories and concepts to facilitate the development of practical skills and personal attitudes necessary for success in tertiary study. Emphasis is placed on developing the key competencies of scientific inquiry - collecting, analysing, organising and communicating information as well as solving problems, particularly when related to using mathematical ideas and techniques.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 0002 Computing, Engineering and Mathematics Exchange Unit 1 (10 Credit Points)
Subject Details (p. 3128) **Legacy Code:** 900626
Level: Undergraduate Level 0 Preparatory subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1004 Design Science (WSTC) (10 Credit Points)
Subject Details (p. 3132) **Legacy Code:** 700126
An explanation and description of how the built environment works is essential to designers and construction professionals. This subject provides an introduction to physical units of measurement, tolerance, statics, dynamics, acoustics and thermal properties. It also allows students to interpret and apply the concepts of electricity, energy, work and power to the built environment. Students engage with these concepts through a hands-on learning experience including practical projects and live demonstrations.
Level: Undergraduate Level 1 subject
Pre-requisite(s): Students enrolled in 7015 Diploma in Construction Management or 7065 Diploma in Construction Management Extended or 7042 Bachelor of Construction Management (WSTC FYP) or 7081 Bachelor of Construction Management Extended (WSTC FYP) must pass MATH 0027 Scientific Methods for Construction Management (WSTC Prep) before enrolling in this unit
Equivalent Subjects: ENGR 1003 Design Science
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1006 Design Studio 2: Form and Production (10 Credit Points)
Subject Details (p. 3132) **Legacy Code:** 301075
From Spring 2020, this subject will be replaced by301286 - Designing for People: Applied Ergonomics. This subject equips students with the skills to use creative design and structured decision making to solve challenging problems. Students will develop their understanding of design process by creating experimental models using various methods, including 3D rapid prototyping. Students will also record their design process via multimodal media, in both digital and non-digital format. They will also reflect upon the design process through the CDIO framework (Conceive, Design, Implement, Operate) and CAD (Computer-Aided Design).
Level: Undergraduate Level 1 subject
Equivalent Subjects: ENGR 1017 - Form and Production ENGR 1014 - Engineering and Design Concepts
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1008 Engineering Materials (10 Credit Points)
Subject Details (p. 3133) **Legacy Code:** 300965
This subject will introduce fundamentals of engineering materials. The topics will include materials structure, properties, processing and applications, degradation of materials, sustainability, and the selection of materials for various engineering applications.
Level: Undergraduate Level 1 subject
Equivalent Subjects: ENGR 1014 - Engineering Design Concepts (EDC) ENGR 1034 - Engineering and Design Concepts (UWSC) LGYB 0481 - Engineering and Design Concepts (UWSC Assoc Deg) ENGR 1009 - Engineering Materials (WSTC Assoc Deg) ENGR 1010 - Engineering Materials (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1009 Engineering Materials (WSTC AssocD) (10 Credit Points)
Subject Details (p. 3134) **Legacy Code:** 700147
This subject will introduce fundamentals of engineering materials. The topics will include materials structure, properties, processing and applications, degradation of materials, sustainability and the selection of materials for various engineering applications.
Level: Undergraduate Level 1 subject
Equivalent Subjects: ENGR 1014 - Engineering and Design Concepts ENGR 1034 - Engineering and Design Concepts (UWSC) LGYB 0481 - Engineering and Design Concepts (UWSC Assoc Deg) ENGR 1008 - Engineering Materials ENGR 1010 - Engineering Materials (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1010 Engineering Materials (WSTC) (10 Credit Points)
Subject Details (p. 3135) **Legacy Code:** 700152
This subject will introduce fundamentals of engineering materials. The topics will include materials structure, properties, processing and applications, degradation of materials, sustainability and the selection of materials for various engineering applications.
Level: Undergraduate Level 1 subject
Pre-requisite(s): Students enrolled in 6033 Diploma in EngineeringBachelor of Engineering Studies or 7034 Diploma in Engineering or 7066 Diploma in Engineering Extended must pass MATH 0008 Mathematics 2 before enrolling in this unit
Equivalent Subjects: ENGR 1014 - Engineering and Design Concepts ENGR 1008 - Engineering Materials ENGR 1034 - Engineering and Design Concepts (UWSC) LGYB 0481 - Engineering and Design Concepts (UWSC Assoc Deg) ENGR 1009 - Engineering Materials (WSTC Assoc Deg)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1011 Engineering Physics (10 Credit Points)
Subject Details (p. 3136) **Legacy Code:** 300963
This subject serves as an introduction to the fundamentals of engineering physics with appropriate applications in a wide range of engineering and industrial design systems.
Level: Undergraduate Level 1 subject
Equivalent Subjects: ENGR 1028 - Physics and Materials ENGR 1035 - Physics and Materials (UWSC) LGYB 0486 - Physics and Materials (UWSC Assoc Deg) ENGR 1013 - Engineering Physics (WSTC) ENGR 1012 - Engineering Physics (WSTC AssocD)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1012 Engineering Physics (WSTC AssocD) (10 Credit Points)
Subject Details (p. 3138) **Legacy Code:** 700153
This subject serves as an introduction to the fundamentals of engineering physics with appropriate applications in a wide range of engineering and industrial design systems. Students will be expected to solve problems by applying the laws and principles of engineering physics in the following areas covered by the subject - units and vectors, linear and circular motion, photons, electrons and atoms, force systems and equilibrium, work and energy applications, dynamics of rotational motion, fluid dynamics, heat and thermodynamics, periodic motion and wave phenomena, electricity and magnetism.
Level: Undergraduate Level 1 subject
Equivalent Subjects: ENGR 1011 - Engineering Physics ENGR 1013 - Engineering Physics (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1013 Engineering Physics (WSTC) (10 Credit Points)
Subject Details (p. 3138) **Legacy Code:** 700151
This subject serves as an introduction to the fundamentals of engineering physics with appropriate applications in a wide range of engineering and industrial design systems.
Level: Undergraduate Level 1 subject
Pre-requisite(s): Students enrolled in 7034 Diploma in Engineering 7066 Diploma in Engineering Fast Track or 6033 Diploma in EngineeringBachelor of Engineering Studies must pass PHYS 0003 Foundation Physics 2 before enrolling in this unit
Equivalent Subjects: ENGR 1028 - Physics and Materials ENGR 1011 - Engineering Physics ENGR 1035 - Physics and Materials (UWSC) LGYB 0486 - Physics and Materials (UWSC Assoc Deg) ENGR 1012 - Engineering Physics (WSTC Assoc Deg)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1018 Fundamentals of Mechanics (10 Credit Points)
Subject Details (p. 3140) **Legacy Code:** 300463
In this subject students acquire knowledge about the action and interaction of forces, moments and couples in two and three dimensions. Students then apply this to the analysis of the equilibrium of single bodies, and of trusses, mechanisms, and transversely loaded beams. In addition, students study the dynamics of a non-rotating body, and a body rotating about a fixed axis. Further, they study the friction between bodies. Students conduct experiments to see how the lecture content applies to the real world, and make extensive use of vector algebra.
Level: Undergraduate Level 1 subject
Equivalent Subjects: ENGR 1020 Fundamentals of Mechanics (WSTC) ENGR 1019 Fundamentals of Mechanics (WSTC Assoc Deg)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1019 Fundamentals of Mechanics (WSTC AssocD) (10 Credit Points)
Subject Details (p. 3141) **Legacy Code:** 700113
This subject deals with the action and interaction of forces, moments and couples in two and three dimensions. It examines the equilibrium of single bodies, and of trusses and mechanisms. It then looks at the friction between bodies. It covers the dynamics of a non-rotating body, and a body rotating about a fixed axis. Finally, internal loadings are investigated - particularly within a transversely loaded beam. The subject makes extensive use of vector algebra.
Level: Undergraduate Level 1 subject
Equivalent Subjects: ENGR 1020 - Fundamentals of Mechanics (WSTC) ENGR 1018 - Fundamentals of Mechanics
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1020 Fundamentals of Mechanics (WSTC) (10 Credit Points)
Subject Details (p. 3142) **Legacy Code:** 700023
This subject deals with the action and interaction of forces, moments and couples in two and three dimensions, on machine elements and simple structures. It examines the equilibrium of single bodies, of multi-body structures and of mechanisms. It then covers the dynamics of a particle. A systematic approach to solving practical engineering design problems is provided. The subject makes extensive use of vector algebra.
Level: Undergraduate Level 1 subject
Pre-requisite(s): Students enrolled in 7034 Diploma in Engineering 7066 Diploma in Engineering Extended or 6033 Diploma in EngineeringBachelor of Engineering Studies must pass PHYS 0003 Foundation Physics 2 before enrolling in this unit
Equivalent Subjects: ENGR 1018 - Fundamentals of Mechanics ENGR 1019 - Fundamentals of Mechanics (WSTC Assoc Degree)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1023 Introduction to Engineering Business Management (WSTC AssocD) (10 Credit Points)
Subject Details (p. 3144) **Legacy Code:** 700114
This subject will cover aspects of modern engineering business management. This subject of study will provide students an opportunity to look at small, medium and large Engineering businesses and the role of Engineering Associates in those organisations.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1024 Introduction to Engineering Practice (10 Credit Points)
Subject Details (p. 3145) **Legacy Code:** 300964
This subject encourages students to explore the professional responsibilities and challenges faced by Engineers. Students are introduced to emerging issues and approaches in the engineering profession, with particular attention given to using a systems approach to solve engineering problems. Students engage in a semester-long research and problem solving task that addresses technical, environmental and social sustainability imperatives and fosters fundamental research, communication skills. Special emphasis is placed on lifelong learning, academic literacy and professional skills including information literacy, project management, engineering drawing and teamwork which equip students for subsequent academic and professional pursuits.
Level: Undergraduate Level 1 subject

ENGR 1038 Design Graphics: Presenting Innovation (10 Credit Points)
Subject Details (p. 3152) **Legacy Code:** 301283
Design visualisation in the form of 2D and 3D graphics is fundamental to the overall design process. This subject provides students with essential knowledge of design principles as used in visual communication. Students will employ graphic techniques to effectively convey a design proposal using creativity, technical skill, and quality design principles in a manner that is consistent with industry expectations. Students will produce graphic work that is portfolio-ready and suitable to display to potential clients and employers.
Level: Undergraduate Level 1 subject
Equivalent Subjects: ENGR 1022 Industrial Graphics 1 Presentation ENGR 1021 Graphics 1 2D 3D Industrial Design Communication
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1039 Designing for Circular Economy (10 Credit Points)
Subject Details (p. 3152) **Legacy Code:** 301281
Traditional linear consumption patterns have placed considerable load on available natural resources. The lack of comprehensive mitigation strategies has motivated local and international efforts around the United Nations Sustainable Development Goals (UNSDGs 2030) to finding resolutions towards making the world more equitable, sustainable, liveable and with opportunities for new sustainable businesses. Students will choose an existing product and apply the principles of the UNSDGs and Circular Economy to create a proposal and prototype to improve upon its current design. Throughout this process the students will consider product usage, durability, bio-ingredients, the product lifecycle, community impact, and sustainability.
Level: Undergraduate Level 1 subject
Equivalent Subjects: ENGR 1004 Design Science (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1040 Designing for People: Applied Ergonomics (10 Credit Points)
Subject Details (p. 3153) **Legacy Code:** 301286
Ergonomics is the study of the interaction between people, their environments, and their objects. A sound understanding of the principles of ergonomics allows a designer to develop products, systems and environments with optimum product usability and end user safety. In this unit, students are introduced to modelling workshop procedures and undertake their own ergonomic study. Students then build and test a hand-held scale product, and integrate user feedback into their redesign.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1041 Designing for User Experience (UX) (10 Credit Points)
Subject Details (p. 3154) **Legacy Code:** 301284
Understanding product-oriented user requirements and mapping user experience journeys provide rich inputs for new product and service innovations. In this subject students will focus on user needs and the interactive elements which, when combined, create successful user experiences through impactful user interfaces, and highly differentiated outcomes. Students will engage in an applied project in response to an interaction design challenge. As part of their project students will incorporate elements to evoke strong emotional, sensorial and functional connections which are essential in creating inclusive design, engaged usability, and high-quality human-centred experiences, for successful products and services.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1042 Sustainable Materials and Smart Manufacturing (10 Credit Points)
Subject Details (p. 3155) **Legacy Code:** 301288
In this subject we explore the circular 'Cradle to Cradle' design philosophy through material choice and manufacturing systems. Introduced are conventional materials, smart materials, and manufacturing systems within an ecological assessment framework, equipping designers with the tools to select and assess materials and manufacturing processes appropriate to use. Students undertake a life cycle materials research project and a design for manufacture (DFM) project in the context of emergent Industry 4.0 principles.
Level: Undergraduate Level 1 subject
Equivalent Subjects: ENGR 1032 Sustainable Design Materials Technology ENGR 1031 Sustainable Design 1 Materials Technology
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1043 Co-Designing Change with Local Communities (10 Credit Points)
Subject Details (p. 3156) **Legacy Code:** 301282
Collaboration is the foundation for some of the most successful world achievements ranging from medical breakthroughs, to space travel, to smart phones, to drones. Effective collaboration in diverse teams promotes a dynamic environment for creativity and innovation with good prospects for developing novel solutions. In a real world collaborative, co-design partnership with an external university partner, students will create a design proposal and prototype, based on a project brief. Through this collaborative process, students will develop skills in research, conceptualisation, communication and reflective practice whilst prototyping and testing their ideas before presenting them to their client.
Level: Undergraduate Level 1 subject
Equivalent Subjects: ENGR 1002 Applied Erognomics ENGR 1005 Design Studio 1 Patterns and Products
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1044 Drawing Skills for Design Thinking (10 Credit Points)
Subject Details (p. 3157) **Legacy Code:** 301285
Drawing skills can unlock and translate creative thoughts as actions, iterations, and guide collaborative dialogue in meeting common goals. In combination with Design Thinking essentials which include empathy, ideation, and experimentation, practiced drawing skills can accelerate decision-making for individuals or groups. This subject is focused on developing hand drawing skills as a tool for generating creative ideas and design solutions. Students will attain an understanding of spatial relationships between humans and objects, and natural and built environments. The emphasis is on using drawing as a method for conducting exploratory investigations, recording creative thinking processes through ideation and inspiring innovation. Students will gain confidence in communicating their creative ideas to a wide audience.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1045 Engineering Programming Fundamentals (10 Credit Points)
Subject Details (p. 3158) **Legacy Code:** 301335
An introduction to problem-solving via programming, which aims to have students develop proficiency in using a high level programming language. Topics covered in this subject include: algorithms, program structures (statements, sequence, selection, iteration, functions), data types (numeric, character), data structures (arrays, tuples, pointers, lists), storage structures (memory, addresses), introduction to analysis of algorithms, testing, code quality, teamwork, and reflective practice. The subject includes extensive practical work in labs and programming projects.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1046 Human Centred Design Research Methods (10 Credit Points)
Subject Details (p. 3158) **Legacy Code:** 301280
This subject introduces Human-Centred Design (HCD) to students as an interactive practice that puts people's views, behaviour, and their environment at the centre of problem-solving, design and innovation processes. Students will work on an applied research project that allows them to observe, experiment, gain feedback from participants, and think critically through co-designing to propose new interpretations and solutions for our changing built environment, design artefacts and social habits. In alignment with the United Nations Sustainability Development Goals (UNSDG), this subject's research methods cover professional skills on ethics, academic literacy, design and research iteration processes, interdisciplinary team approaches, and sustainability. Students will be presented with opportunities to interact with industry and community experts to enhance their understandings and make potential career connections.
Level: Undergraduate Level 1 subject
Equivalent Subjects: LGYA 5705 - Introduction to Professional Practice ENGR 1015 - Engineering Industrial Design Practice ENGR 1016 - Engineering Design Construction Practice ENGR 1033 - Engineering Design Construction Practice LGYB 0482 - Engineering Design Construction Practice ENGR 1027 - Introduction to Industrial Design methods
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1047 Advanced Engineering Physics 1 (10 Credit Points)
Subject Details (p. 3159) **Legacy Code:** 301334
This subject will be offered at Engineering Innovation Hub - Hassall St, Parramatta campus. The aim of this subject is to introduce students to the conceptual, mathematical and practical aspects of the following topics in advanced engineering physics, viz: vectors, linear and circular motion, photons, electrons and atoms, Newtons laws of motion, work and kinetic energy, dynamics of rotational motion, fluid dynamics, thermodynamics, periodic motion and waves/acoustics. The content will be delivered via a combination of lectures, tutorials and hands-on practicals in order to develop the growth of theoretical and applied engineering physics knowledge. This will provide students with a solid foundation for their engineering studies.
Level: Undergraduate Level 1 subject
Equivalent Subjects: ENGR 1011 - Engineering Physics ENGR 1013 - Engineering Physics
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1048 Engineering Materials (UG Cert) (10 Credit Points)
Subject Details (p. 3160) **Legacy Code:** 500066
This subject will introduce fundamentals of engineering materials. The topics will include materials structure, properties, processing and applications, degradation of materials, sustainability and the selection of materials for various engineering applications.
Level: Undergraduate Level 1 subject
Equivalent Subjects: ENGR 1008 Engineering Materials ENGR 1014 Engineering and Design Concepts ENGR 1009 Engineering Materials (WSTC AssocD) ENGR 1010 Engineering Materials (WSTC) ENGR 1034 Engineering and Design Concepts (WSTC) LGYB 0481 Engineering and Design Concepts (WSTC AssocD)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1049 Introduction to Engineering Practice (Block) (10 Credit Points)
Subject Details (p. 3161) **Legacy Code:** 500063
This subject encourages students to explore the professional responsibilities and challenges faced by Engineers. Students are introduced to emerging issues and approaches in engineering profession, especially particular attention will be given to systems approach. Students engage in a term-long research and problem solving task that addresses technical, environmental and social sustainability imperatives and fosters fundamental research, communication skills. Special emphasis is placed on lifelong learning, academic literacy and professional skills including information literacy, project management, engineering drawing and teamwork which equip students for subsequent academic and professional contexts.
Level: Undergraduate Level 1 subject
Equivalent Subjects: ENGR 1024 Introduction to Engineering Practice ENGR 1025 Introduction to Engineering Practice (WSTC) ENGR 1026 Introduction to Engineering Practice (UWSC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1050 Sustainable Engineering Fundamentals (10 Credit Points)
Subject Details (p. 3162) **Legacy Code:** 301418
Engineers need to ensure that their practice is guided by sustainability principles. This subject will introduce students to sustainability and provide an understanding of the environmental and social impacts of human development. Students will be introduced to various national and international initiatives including the United Nations Sustainable Development Goals. Students will learn fundamental scientific concepts in chemistry and ecology, and conduct and report on laboratory experiments relevant for emerging issues. Students will apply concepts such as material and energy flow, limiting nutrients, carrying capacity, climax, biodiversity, food chain and irreversibility in relation to how an ecosystem responds to changes in the environment to real world case studies.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1051 Engineering Physics (Block) (10 Credit Points)
Subject Details (p. 3163)
This subject serves as an introduction to the fundamentals of engineering physics with appropriate applications in a wide range of engineering and industrial design systems. Students will be expected to solve problems by applying the laws and principles of engineering physics in the following areas covered by the Subject – units and vectors, linear and circular motion, photons, electrons and atoms, force systems and equilibrium, work and energy applications, dynamics of rotational motion, fluid dynamics, heat and thermodynamics, periodic motion and wave phenomena, electricity and magnetism.
Level: Undergraduate Level 1 subject
Equivalent Subjects: ENGR 1011 (300963) Engineering Physics
ENGR 1013 (700151) Engineering Physics (WSTC)
ENGR 1028 (300464) Physics and Materials
ENGR 1035 (700020) Physics and Materials (WSTC)
700117 Physics and Materials (WSTC Assoc Deg)
ENGR 1012 (700153) Engineering Physics (WSTC AssocD)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1052 Fundamentals of Mechanics (Block) (10 Credit Points)
Subject Details (p. 3164)
In this subject students acquire knowledge about the action and interaction of forces, moments and couples in two and three dimensions. Students then apply this to the analysis of the equilibrium of single bodies, and of trusses, mechanisms, and transversely loaded beams. In addition, students study the dynamics of a non-rotating body, and a body rotating about a fixed axis. Further, they study the friction between bodies. Students conduct experiments to see how the lecture content applies to the real world, and make extensive use of vector algebra.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 2001 Automated Manufacturing (10 Credit Points)
Subject Details (p. 3165) **Legacy Code:** 300735
Automated manufacturing is about increasing the capacity of productivity through a range of integrated technologies, such as digital transformation platforms so that manufacturing operations can run simultaneously. These processes are used in industrial settings. Students will be introduced to the fundamentals of manufacturing operations, automation, and control technologies, including numerical control and industrial robotics. This subject aims to deepen the understanding of the material selection process and enables students to identify appropriate manufacturing processes in a product manufacturing design. Various manufacturing processes such as material removal, bulk deformation, sheet-metal forming, and non-traditional processes will be examined. Through problem-solving activities, students will enhance their manufacturing engineering skills in the computer-aided design (CAD) and computer-aided manufacturing (CAM) areas and acquire the skills to machine their CAD models on a computer numerical control (CNC) machine.
Level: Undergraduate Level 2 subject
Pre-requisite(s): Students must have passed the two subjects MATH 1016 Mathematics for Engineers 1 and ENGR 1018 Fundamentals of Mechanics OR must have passed the two subjects MATH 1034 Mathematics for Engineers 1 (Advanced) and ENGR 1018 Fundamentals of Mechanics before they can enroll in this subject
Equivalent Subjects: ENGR 3002 - Automated Manufacturing
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 2009 Engineering Management for Engineer Associates (WSTC AssocD) (10 Credit Points)
Subject Details (p. 3166) **Legacy Code:** 700109
The subject will provide the knowledge and skills to enable students to support the achievement of organisational goals through applying knowledge of environment and internal culture. The subject evaluates planning processes and goal setting to achieve superior performance and compares alternative approaches to motivation of work team members. Students will consider types of managerial communications and their associated communications channels in achieving best professional practice.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 2010 Engineering Project (WSTC AssocD) (10 Credit Points)
Subject Details (p. 3167) **Legacy Code:** 700110
In this unit, students will use project management tools, techniques and practices to plan and control a project that achieves stated requirements on time and within budget. Students will plan a project including the creation of a statement of work, a work breakdown structure and an appropriate set of supporting work packages.
Level: Undergraduate Level 2 subject
Pre-requisite(s): ENGR 2018 OR
ENGR 2031
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 2011 Graphics 2: Visual Simulation (10 Credit Points)
Subject Details (p. 3168) **Legacy Code:** 301076
From 2020, this subject will be replaced by 301287 - Designing Graphics: Engineering Documentation. Three-dimensional digital simulations are used to model manufactured artefacts, create virtual environments and simulate dynamic processes or systems. In this subject students will use 3D modelling software to simulate static and dynamic 3D structures. High quality photorealistic rendering and 3D printing file preparation will also be covered.
Level: Undergraduate Level 2 subject
Equivalent Subjects: ENGR 2015 - Industrial Graphics 3 3D Solids
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 2012 Graphics 3: 3D Engineering Specifications and Visualisation (10 Credit Points)
Subject Details (p. 3169) **Legacy Code:** 301079
From 2020, this subject will be replaced by 301290 - Design Graphics: Communication for Manufacture. This subject introduces formal graphical communication methods used by professionals engaged in the design, manufacture and management of manufactured items. Students will learn how to follow Australian Standards for engineering drawings, and to use Computer-Aided Design (CAD) software for accurately representing and modelling basic parts and assemblies. The documentation of design concepts in the form of three dimensional (3D) computer models provides data that can be applied in a wide variety of ways to facilitate the understanding and production of parts and assemblies. The objective of this subject is to introduce students to the industry standard software and hardware employed to generate these models, via a "hands on" approach to creating 3D data. Issues such as data transfer, rapid prototyping, computer numerical control (CNC) machining and visualisation will also be discussed.
Level: Undergraduate Level 2 subject
Pre-requisite(s): ENGR 2011 OR
ENGR 1024
Equivalent Subjects: ENGR 2014 Industrial Graphics 2 Transition
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 2013 Graphics 4: Kinetic Narratives (10 Credit Points)
Subject Details (p. 3169) **Legacy Code:** 301091
From 2020, this subject will be replaced by 301308 - Design Practice: Sustainable Manufacturing. This subject introduces students to real life applications of graphics technology, such as 3D games, 3D virtual environments, immersive learning spaces, dynamic 3D simulations of ecosystems, artwork for public spaces, virtual agents. Students will use different software platforms to create interactive 3D environments. They will apply theories of human-computer interaction to design projects where they develop: "a dynamic simulation of a natural or artificial ecosystem", a dynamic 3D virtual environment in which users interact with agents.
Level: Undergraduate Level 2 subject
Pre-requisite(s): ENGR 2012
Equivalent Subjects: ENGR 3018 - Industrial Graphics 4 Surface
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 2016 Pavement Materials and Design (10 Credit Points)
Subject Details (p. 3170) **Legacy Code:** 300984
This subject will provide students the basic knowledge and concepts on pavement materials and design. It will cover the common materials used in pavement construction such as aggregates, cement, asphalt, and concrete. It will also cover the pavement design system, pavement construction, design of flexible pavements, design of rigid pavements, and pavement maintenance.
Level: Undergraduate Level 2 subject
Pre-requisite(s): ENGR 1008 or PROC 1008
Equivalent Subjects: ENGR 1007 - Engineering Geology and Concrete Materials ENGR 2017 - Pavement Materials and Design
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 2017 Pavement Materials and Design (WSTC AssocD) (10 Credit Points)
Subject Details (p. 3171) **Legacy Code:** 700239
This subject will provide students with the basic knowledge and concepts on pavement materials and design. It will cover the common materials used in pavement construction such as aggregates, cement, asphalt and concrete. It will also cover the pavement design system, pavement construction, design of flexible pavements, design of rigid pavements and pavement maintenance.Offerings of alternate subjects are dependent on there being sufficient student enrolment numbers. If enrolments are low, the College may cancel delivery of the alternate subject.
Level: Undergraduate Level 2 subject
Pre-requisite(s): ENGR 1009
Equivalent Subjects: ENGR 2016 - Pavement Materials and Design
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 2018 Professional Practice for Engineer Associates (WSTC AssocD) (10 Credit Points)
Subject Details (p. 3172) **Legacy Code:** 700118
This subject will provide the knowledge and skills to enable students to support the achievement of organisational goals through applying knowledge of environment and internal culture. The subject evaluates planning processes and goal setting to achieve superior performance and compares alternative approaches to motivation of work team members. Students will consider types of managerial communications and their associated communications channels in achieving best professional practice.
Level: Undergraduate Level 2 subject
Pre-requisite(s): ENGR 2009
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 2022 Design Practice: Sustainable Manufacturing (10 Credit Points)
Subject Details (p. 3173) **Legacy Code:** 301308
Reflecting upon the life cycle of products and their components is important in understanding how decisions at the design level impact on people, resources, sustainable goals and how these contribute towards sustainability-oriented local and global value chains. This subject focuses on sustainable decision-making at the design level. It challenges and motivates students towards using sustainability principles to promote good Design for Disassembly (DfD) practices with linkages to material durability, and material reuse. Through a project-based approach, students will appraise manufacturing considerations for product design applying in succession Design for Manufacturing, Assembly and Disassembly (DfM, DfA, DfD) principles to their products and reflect on product lifecycle management best practice.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 2023 Advanced Engineering Physics 2 (10 Credit Points)
Subject Details (p. 3174) **Legacy Code:** 301351
This subject will be offered at Engineering Innovation Hub - Hassall St, Parramatta campus. The aim of the subject is to introduce students to topics such as electricity, magnetism, induction and semiconductivity, and to equip them with mathematical approaches for solving problems in these areas. Content in this subject will be delivered via the combination of lectures, tutorials and practicals in order to foster in students the growth of theoretical and applied physics knowledge. Students completing this subject will have a solid foundation upon which to base their continued engineering studies.
Level: Undergraduate Level 2 subject
Pre-requisite(s): ENGR 1047
Co-requisite(s): MATH 1035
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 2024 Design Graphics: Communication for Manufacture (10 Credit Points)
Subject Details (p. 3175) **Legacy Code:** 301290
Students will design manufacture ready product samples through the use of computer graphics including three-dimensional (3D) surfacing and solids modelling methods used by professionals engaged in engineering and industrial design practice. Students will produce two-dimensional (2D) and three-dimensional (3D) documentation, which can be widely applied to facilitate the understanding and production of parts and assemblies.
Level: Undergraduate Level 2 subject
Pre-requisite(s): ENGR 2025
Equivalent Subjects: ENGR 2014 Industrial Graphics 2 Transition
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 2025 Design Graphics: Engineering Documentation (10 Credit Points)
Subject Details (p. 3176) **Legacy Code:** 301287
Current and future growth in the areas of product design, virtual reality, and high technology innovation industries require a foundation and working knowledge of 3D computer modelling. In this subject students will be introduced to 3D modelling software and the fundamental principles of current Australian Standards for engineering drawing and documentation. The skills gained will contribute to preparation for future complex projects in engineering, industrial design and creative industries that require prototyping, files for additive manufacturing (3D printing), and component designs that can perform at exact specifications and standards.
Level: Undergraduate Level 2 subject
Equivalent Subjects: ENGR 2011 - Graphics 2 Visual Simulation
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 2026 Design Semantics: Exploring Product Form (10 Credit Points)
Subject Details (p. 3177) **Legacy Code:** 301289
Products can engage our senses to evoke an emotional response or mediate an experience. This is a powerful psychological tool for industrial designers to understand in terms of the design interface as it provides a strategic opportunity for innovation. In this subject students will create meaningful and active product relationships, and use product semantics as an agency for proposing design solutions in areas such as health and well-being, ageing populations, and sustainable design.
Level: Undergraduate Level 2 subject
Equivalent Subjects: ENGR 2006 - Design Studio 1 Themes and Variations ENGR 2008 - Design Studio 3 Design Process and Function
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 2027 Engineering Design (10 Credit Points)
Subject Details (p. 3178) **Legacy Code:** 301341
This subject will be offered at Engineering Innovation Hub - Hassall St, Parramatta campus. Design thinking is a fundamental skill that every engineer must have for the 21st Century. It is one of the skills that profoundly distinguish human intelligence from artificial intelligence, which greatly impacts an engineer's long-term career success in the workplace. This subject aims to equip students with the domain-independent and solution-neutral design thinking, which can be applied to whatever technical stream students choose to pursue in the future.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 2028 New Product Innovation with IoT Data (10 Credit Points)
Subject Details (p. 3178) **Legacy Code:** 301305
Design Thinking has had a considerable effect on the ways firms innovate, design and evaluate products and services for use. The evolution of smart products and services in recent years offers both challenges and rewards for organisations as the big data generated provides insights to current product and service utilisation. Interpretation and integration of these new knowledge streams can support future product development, by enhanced understanding of human behaviour and features of sensor technologies. Students will produce an IoT influenced project design brief that provides the directional basis for the deployment of both human and technological resources in preparation for their career progression as a future innovation manager in a global, online marketplace.
Level: Undergraduate Level 2 subject
Equivalent Subjects: ENGR 2003 - Design Management 1 Product Design Audit
ENGR 2002 - Design Management 1 Process and Manufacturing
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 2029 Simulation in Virtual and Augmented Realities (10 Credit Points)
Subject Details (p. 3179) **Legacy Code:** 301306
Simulation in three-dimensional (3D) environments provide valuable insights to human-centred perspectives. Whilst investigating the fundamentals of Virtual Reality (VR) and Augmented Reality (AR), students will analyse aspects of functionality, user interfaces, spatial relationships in built environments, sustainability, efficient resource management, instructional support for safety and training, and accelerated design conceptualisation in detailed new product, service or environmental innovation. Students' experiences will equip them for future employment as VR and AR experience designers, interactive experience producers, or creative technologists.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 2030 Industrial Experience (Associate Engineer) (WSTC AssocD) (10 Credit Points)
Subject Details (p. 3180) **Legacy Code:** 700311
Industry experience provides a significant opportunity for students to understand employer expectations in relation to working on projects and with others in a professional capacity. Students undertake six weeks full-time (37.5 hours per week) employment (or part time equivalent) to obtain relevant workplace experience in Engineering under the supervision of professional engineers in one or more companies. Students identify learning opportunities and goals with a focus on applying academic learning in practice, learning project management, work culture, professional attitude and self-awareness. Students develop critical reflective skills in reporting their progress.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 2031 Management Practices for Engineer Associates (WSTC AssocD) (10 Credit Points)
Subject Details (p. 3181) **Legacy Code:** 700307
This subject will enable students to support the achievement of organisational goals. The unit's major focus is project management, culminating in a practical project which gives students the opportunity to work as part of a team to apply key project management skills and knowledge. It also introduces some of the management practices engineers need to understand and master in order to work effectively in the field. This includes effective communication, especially when working in a team, work health and safety, and an ability to plan, develop and build a career as an Engineer Associate.
Level: Undergraduate Level 2 subject
Equivalent Subjects: ENGR 2009 Engineering Management for Engineer Associates (WSTC AssocD)
ENGR 2018 Professional Practice for Engineer Associates (WSTC AssocD)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 2032 Sustainability Analysis and Design (10 Credit Points)
Subject Details (p. 3181) **Legacy Code:** 301419
In this unit, students will learn and appropriately apply technical and socio-economic approaches of achieving sustainability, such as life cycle assessment, environmental impact assessment, environmental auditing, circular economy, design for the environment and cleaner production to real world problems. The students will be taught about policy, financial and social approaches to achieving sustainability through real life problems/cases.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 2033 Industrial Experience (Engineering Technologist) (0 Credit Points)
Subject Details (p. 3182) **Legacy Code:** 301441
Industry experience is a significant opportunity for students to understand employer expectations in relation to working on projects and with others in a professional capacity. Students undertake 8 weeks full-time (37.5 hours per week) employment (or equivalent) to obtain relevant workplace experience in Engineering under the supervision of professional engineers or engineering technologists in one or more companies. Students identify learning opportunities and goals with a focus on applying academic learning in practice, learning project management, work culture, professional attitude and self-awareness. Students develop critical reflective skills in reporting their progress.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 2034 Geometric Design of Roads (WSTC AssocD) (10 Credit Points)
Subject Details (p. 3183)
This is an introductory subject covering the design of dimensions and configurations of the visible features of a roadway. It will provide students with an understanding of pavement widths, horizontal and vertical alignment, slopes channelization, intersections and other features that can significantly affect the operations, safety, and capacity of the roadway network. This subject is designed in collaboration with Transport for NSW.
Level: Undergraduate Level 2 subject
Pre-requisite(s): MATH1010 Fundamentals for Engineering Studies
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 2035 Modern Digital Design and Development (10 Credit Points)
Subject Details (p. 3184)
This subject provides fundamental knowledge and skills development in Digital Manufacturing and Design (DMD) technologies for Advanced Manufacturing, Product Design and Industry 4.0. Digital transformation happens throughout the world in Product Development and Design (PDD). Students will engage with digital technologies which stimulate innovative, integrated and sustainable product development processes and workflows from design to manufacturing. As part of their engagement with real-world design projects, students will apply their skills to areas such as design, scenario analysis, rapid prototyping and testing for improved manufacturing outcomes. A number of opportunities, such as the WSU Formula SAE Race Car project, will allow students to work alongside industry partners and develop job ready practices for their future careers.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 3001 Advanced Engineering Topic 1 (10 Credit Points)
Subject Details (p. 3184) **Legacy Code:** 300666
This subject provides students with the opportunity to tackle challenging engineering problems. They will study advanced topics in selected areas under the supervision of academics. The advanced topics will prepare students for further study and research.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 3003 Biomedical Electronics (10 Credit Points)
Subject Details (p. 3185) **Legacy Code:** 301122
This subject will cover recent advances in biomedical electronics including electronic diagnostic devices, implanted devices, human-computer-interface, bioinstrumentation and neuromorphic engineering. Topics covered span from the bio-electromagnetism and related applications to regulatory aspects (IEC standards and TGA/FDA approval processes) and electrical safety of instrumentation. This subject will have a strong practical design focus with laboratories and tutorials focused on the design of real instrumentation (including manufacturing) dealing with real biomedical signals.
Level: Undergraduate Level 3 subject
Pre-requisite(s): ELEC 2001 OR
ENGR 2001
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 3004 Biomedical Signals and Data Analysis (10 Credit Points)
Subject Details (p. 3186) **Legacy Code:** 301121
This subject will cover recent advances in biomedical signal and data analysis including electrocardiography, electroencephalography, human-computer-interface, electromyography, biomedical images and spikes processing. Topics covered span from basic to advanced signal processing. This subject will have a strong practical design focus with laboratories and tutorials focused on the design of usable software packages dealing with real biomedical signals.
Level: Undergraduate Level 3 subject
Pre-requisite(s): ELEC 2001 OR
ENGR 2001
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 3006 Control Systems (10 Credit Points)
Subject Details (p. 3187) **Legacy Code:** 300009
This subject introduces the fundamental concepts of automatic control engineering. It covers traditional and contemporary design and analysis techniques; the concepts required to design continuous time and discrete time controllers. Matlab is utlilized considerably.
Level: Undergraduate Level 3 subject
Pre-requisite(s): ELEC 2011 OR
MECH 3004
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 3010 Design Studio 4: Innovation through Systems Thinking (10 Credit Points)
Subject Details (p. 3188) **Legacy Code:** 301080
From 2020, this unit will be replaced by 301292 - Biomechanics in Product Innovation. This unit explores strategies for Industrial Design within the complex context of design work in the 21st century. Students will carry out projects in user-centred design, developing an innovative responses to a semi-open and open briefs using the CDIO (Conceive, Design, Implement, Operate) process. The projects will range from low fidelity cardboard prototypes to more fully developed everyday products and services that can be implemented and operated to meet an identified user need.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 3013 Engineering Science Project 1 (10 Credit Points)
Subject Details (p. 3188) **Legacy Code:** 300967
This subject describes engineering as a profession, including professional ethics, legal obligations and fundamentals and theories related to project management. The focus will be on development of research and presentation skills of students enrolled in this subject. It will be achieved through employment of appropriate research skills on a capstone project which demonstrates student's knowledge in identifying and planning an engineering project.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 3014 Engineering Science Project 2 (10 Credit Points)
Subject Details (p. 3190) **Legacy Code:** 300968
In this unit, the focus will be on development of research and presentation skills of students, which will be achieved through employment of appropriate research skills on a capstone project. It will demonstrate student's knowledge by conducting an engineering project and completion of a technical report.
Level: Undergraduate Level 3 subject
Pre-requisite(s): ENGR 3013
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 3017 Industrial Experience (Engineering) (0 Credit Points)
Subject Details (p. 3191) **Legacy Code:** 300741
Industry experience is a significant opportunity for students to understand employer expectations in relation to working on projects and with others in a professional capacity. Students undertake 12 weeks full-time (37.5 hours per week) employment (or equivalent) to obtain relevant workplace experience in Engineering under the supervision of professional engineers in one or more companies. Students identify learning opportunities and goals with a focus on applying academic learning in practice, learning project management, work culture, professional attitude and self-awareness. Students develop critical reflective skills in reporting their progress.
Level: Undergraduate Level 3 subject
Equivalent Subjects: ENGR 3016 - Industrial Experience (Engineering)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 3020 Numerical Methods in Engineering (10 Credit Points)
Subject Details (p. 3193) **Legacy Code:** 300488
The finite element method is a powerful numerical tool for analysing a wide range of engineering problems. The objective of this subject is to introduce the basic and fundamental principles of the finite element techniques by primarily focusing on their applications in the area of structural, solid and soil mechanics.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MATH 1019 AND
MECH 2003
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 3021 Professional Practice (10 Credit Points)
Subject Details (p. 3194) **Legacy Code:** 300053
This subject focuses on ethical conduct for construction managers and on the range of procurement systems utilised in the modern construction industry. It deals with matters of professional responsibility to the community, as well as, honourable and lawful practices in the conduct of business. The issues of confidentiality of information and conflict of interest are examined in the context of real project histories. Risk management and its relationship with quality project delivery are considered in the light of the changing nature of an industrialised, digitalised and globalised construction industry.
Level: Undergraduate Level 3 subject
Pre-requisite(s): ENGR 1029 OR
ENGR 1024 OR
ENGR 1036
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 3022 Special Technical Project (10 Credit Points)
Subject Details (p. 3195) **Legacy Code:** 301089
This is an elective subject offered to students who are engaged in a School of Engineering, Design and Built Environment approved project (solar car, Greenhouse, Formula SAE, Purple roof and sustainable house). The subject can be taken during the third year of Engineering, Construction Management and Industrial Design programs and is a capstone subject for students enrolled in Minor Eco-Socially Conscious Design and Manufacturing. This subject consolidates and deepens a student's knowledge and capabilities developed through previous years of study. Students will develop complex solutions by collaborating with various discipline specialists. This subject develops management, reflective and leadership skills including the ability to work with team members from other fields of study through practical application.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 3023 Biomechanics in Product Innovation (10 Credit Points)
Subject Details (p. 3196) **Legacy Code:** 301292
In this subject students apply practical design thinking skills to propose viable solutions for solving complex problems in both human and environment centred contexts. Whilst working on an industry-based project, students will develop an understanding of human biomechanics and human anatomy and the challenges they bring to the design process. Students interested in design-based careers which involve improving ways people interact with products, systems and spaces will benefit from the skills developed in this subject.
Level: Undergraduate Level 3 subject
Equivalent Subjects: ENGR 3010 Design Studio 4 Innovation through Systems Thinking
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 3024 Design Research Methods (Advanced) (10 Credit Points)
Subject Details (p. 3197) **Legacy Code:** 301291
Design and user research methods are critical in establishing efficient and effective processes around resource utilisation in designing, conducting and presenting research findings that are succinct yet open to new innovations. A range of advanced research design methods are presented and students are guided to the strategic selection of methods appropriate to their own self-sourced project theme. Data collection instruments are designed, operationalised, data coded and analysed via both qualitative and quantitative techniques and discussed in a vibrant peer environment inspired by design thinking and other research methods unique to the design profession and within university human ethics policy protocols.
Level: Undergraduate Level 3 subject
Equivalent Subjects: ENGR 3012 - Designed Inquiry ENGR 3005 - Contextual Inquiry
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 3025 Designing for Circular Economy (Advanced) (10 Credit Points)
Subject Details (p. 3198) **Legacy Code:** 301293
Students examine their local circular economy and the United Nations Sustainable Development Goals 2030 (UNSDG) principles as they apply to designing a sustainable future with Circularity for extended product life cycle, reuse, remanufacture, value up-cycling, production, and waste resource management. Students work on an industry-based, real-world, socio-technical, environmental challenge project in collaboration with community and industry partners. The project is based in the local Western Sydney region and students propose design solutions that are scalable and relatable in diverse contexts. Students will be able to apply their awareness of the sustainability requirements within the community and industry to their future career activities, by creating new value, and new green employment opportunities with a sustainability skills approach.
Level: Undergraduate Level 3 subject
Equivalent Subjects: ENGR 2021 Sustainable Design Sustainable Futures
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 3026 Design Thinking for Successful Brands and Products (10 Credit Points)
Subject Details (p. 3199) **Legacy Code:** 301301
Students will learn how to develop a strategic design management plan that helps a firm not only present itself to its target audience but also clearly differentiate amongst competitors. Foundation design principles involving the evaluation of two-dimensional and three-dimensional designs are explored through a series of case studies based on commercially successful design management strategies. To simulate global, real-world design consultation scenarios students interact in an online environment in preparation for evidence-based innovation in their future workplaces as design managers.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 3027 Mentored Practice in Design Innovation (0 Credit Points)
Subject Details (p. 3199) **Legacy Code:** 301296
Students will be acculturated to professional practice and conduct in a real work environment setting through a series of webinars and self-guided industry placement. On conclusion of the unit, students will develop a report that summarises their own personal reflections relating to workplace responsibilities, and other experiences accrued throughout the unit. Mentored Practice in Design Innovation seeks to match students with mentors in areas they aspire to be prospective employees or in related fields of professional interest across a 10-week program.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 2390 - Industrial Experience ENGR 3015 - Industrial Experience
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 3028 Mentored Practice in Design Innovation (10 Credit Points)
Subject Details (p. 3200) **Legacy Code:** 301401
Mentored Practice offers a program of professionally oriented activities that refine planning for graduate destinations in the design, innovation and manufacturing industries and in particular new product development. Students will focus on career and practical industry attributes, and attend design industry seminars that directly influence their major project, honours thesis, or industrial design capstone project from a strategic and professional practice perspective. This subject assists students on preparing a strategic early career plan which includes a personal portfolio of works with tips on how to commercialise their current academic project, observations and analysis of current design industry practice, and a self-directed practical placement for up to 70 hours.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 3029 Specialisation Workshop 1 (10 Credit Points)
Subject Details (p. 3201) **Legacy Code:** 301438
This subject is designed to enhance technical skills development in an engineering discipline. The subject enables students to perform the practical aspects that relate to product development, manufacturing, infrastructure development and service delivery. It also enables students to gain skills to plan, communicate, operate and manage workshops, laboratory settings and work sites while working in a team environment.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 3030 Specialisation Workshop 2 (10 Credit Points)
Subject Details (p. 3202) **Legacy Code:** 301439
This subject is designed to further enhance technical skills development in a team environment and in an engineering discipline through additional workshops that compliment and strengthen those completed in previous subject Specialisation Workshop 1. The subject enables students to perform and manage the practical aspects that relate to product development, manufacturing, infrastructure development and service delivery. It also enables students to gain skills to plan, communicate, operate and manage workshops, laboratory settings and work sites while working in a team environment.
Level: Undergraduate Level 3 subject
Pre-requisite(s): ENGR 3029
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 3031 Mentored Practice in Design (Industry) (10 Credit Points)
Subject Details (p. 3202)
Mentored Practice in Design (Industry) is designed to provide students with professional practice experience working with an industry mentor and a multi-disciplinary team. Students prepare for their experience and create an action plan documenting their skills and knowledge with the aim of enhancing these throughout the semester. This prepares them for a reflective report and mentorship presentation. Students are assisted finding a suitable mentor in areas in which they aspire to be prospective employees or in related fields of professional interest across a 10-week program responding to the changing Future of Work. This subject can be undertaken during any semester during the year and can most likely be completed during semester breaks either in Winter or Summer. Students gain valuable insights in the professional practice setting of themselves and of industry expectations, providing opportunities for employment.
Level: Undergraduate Level 3 subject
Equivalent Subjects: ENGR3015 Industrial Experience
ENGR3027 Mentored Practice in Design Innovation
ENGR3028 Mentored Practice in Design Innovation
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 3032 Humanitarian Design and Practice (10 Credit Points)
Subject Details (p. 3203)
In this subject, students will learn community engagement strategies and prototype development using the framework of human-centered design. Through international and domestic mobility programs students will collaborate with local stakeholders to co-develop solutions for priority community needs. Drawing on inter-disciplinary approaches (combining social sciences, design and engineering), students will gain socio-technical skills and apply these to real-world humanitarian problems such as disaster preparedness and sustainable development. This subject is co-designed and delivered with industry partners (e.g. Engineers Without Borders, RedR) and will prepare students for career pathways working with regional and international industry agencies and local community partners in other countries to develop humanitarian engineering interventions.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4001 Advanced Engineering Topic 2 (10 Credit Points)
Subject Details (p. 3203) **Legacy Code:** 300667
This subject provides students with the opportunity to tackle engineering problems that are more challenging than those in Advanced Engineering Topic 1. They will study advanced topics in selected areas under the supervision of academics. The advanced topics will prepare students for further study and research.
Level: Undergraduate Level 4 subject
Pre-requisite(s): ENGR 3001
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4004 Design Studio 6: Ambience, Place and Behaviour (10 Credit Points)
Subject Details (p. 3204) **Legacy Code:** 301084
Designers responding to complex societal challenges require focus on people, places and systems thinking to make sense in guiding new investment in innovation. This subject builds industrial design expertise in four domains including human environments, responsible design, user-centred design, and technology development through applied design research, contextual inquiry methods, and articulation of innovation proposals through conceptual and validated physical modelling, and an interdisciplinary consultative viewpoint.
Level: Undergraduate Level 4 subject
Pre-requisite(s): ENGR 4003
Equivalent Subjects: ENGR 3011 - Design Studio 4 Simulate to Innovate
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4005 Engineering Project (10 Credit Points)
Subject Details (p. 3205) **Legacy Code:** 300483
This is a 20 credit point year-long subject taken over two terms (10 credit points in each term). This subject includes a capstone project which demonstrates student's professional level of identifying, planning, designing, executing, testing and documenting an engineering project or activity.
Level: Undergraduate Level 4 subject
Pre-requisite(s): ENGR 3021
Co-requisite(s): ENGR 3017
Equivalent Subjects: LGYB 1037 - Civil and Environmental Engineering Project 2
Incompatible Subjects: LGYA 6084 - Engineering Thesis ENGR 4023 - Advanced Engineering Thesis
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4006 Engineering Project 1 (10 Credit Points)
Subject Details (p. 3206) **Legacy Code:** 300971
This subject describes engineering as a profession, including professional ethics and legal obligations highlighted. Fundamentals and theories related to contract and project management will form part of this subject. Throughout the semester, the focus will be on development of research and presentation skills of students enrolled in this subject. This will be achieved through employment of appropriate research skills on a capstone project which demonstrates student's professional level of identifying, planning, and designing engineering project and completion of a technical progress report. The capstone project will be continued in subject 300972 Engineering Project 2.
Level: Undergraduate Level 4 subject
Co-requisite(s): ENGR 3017
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4007 Engineering Project 2 (10 Credit Points)
Subject Details (p. 3206) **Legacy Code:** 300972
Throughout the semester, the focus will be on development of research and presentation skills of students enrolled in this subject. This will be achieved through employment of appropriate research skills on a capstone project which demonstrates student's professional level of executing, testing and documenting an engineering project and completion of a technical report. This subject is a continuation of 300971 Engineering Project 1.
Level: Undergraduate Level 4 subject
Pre-requisite(s): ENGR 4006
Co-requisite(s): ENGR 3017
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4010 Major Project Completion (30 Credit Points)
Subject Details (p. 3207) **Legacy Code:** 300460
Major Project Completion is the project realisation component of the student's final year program. The subject offers the student the chance to consolidate the range of methodologies and processes developed and evaluated in Major Project Commencement, that contextualise the principles and practices that will lead to the realisation of their identified design solution. The final design outcome will form part of the final year graduate exhibition. The design solution which students will be developing and submitting for this subject responds to the design brief developed in Major Project Commencement.
Level: Undergraduate Level 4 subject
Pre-requisite(s): ENGR 4009
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4011 Sustainability and Risk Engineering (10 Credit Points)
Subject Details (p. 3208) **Legacy Code:** 300798
Analysis of sustainability with engineering perspectives is increasingly becoming important in the modern world. Also, often the risk analysis is required to be carried for true sustainable solutions. Engineers with in-depth understanding of different tools that can be used for both sustainability and risk analysis will have significant edge in their future career. The students will discuss and understand various engineering issues including renewable/alternative energy systems, energy/resource efficiency, sustainable/green buildings, sustainable transport and infrastructure, sustainable water management, environmental management systems, sustainability reporting, life cycle analysis, probability/reliability theory, risk assessment models and, overall system analysis.
Level: Undergraduate Level 4 subject
Pre-requisite(s): CIVL 2002 AND CIVL 4017
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4012 Industrial Design Major Project (Ideation) (10 Credit Points)
Subject Details (p. 3210) **Legacy Code:** 301297
In this capstone subject students will immerse themselves in a complex real-world design problem and apply their expertise in conceptualisation, problem solving, human factors and aesthetics to create a novel solution. User-centred design, digital futures and sustainable design practice underpin all learning activities. A multidisciplinary approach is fostered, whereby students will engage with industry experts and community groups reinforcing the role of the graduate designer as an empathetic innovator.
Level: Undergraduate Level 4 subject
Pre-requisite(s): ENGR 4020 OR
ENGR 4004
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4013 Creative Business Model Innovation (10 Credit Points)
Subject Details (p. 3210) **Legacy Code:** 301303
Innovation requires an agile mindset (being flexible and responsive), a broad view of social, economic, and environmental factors, and awareness of interdisciplinary approaches to succeed in a competitive marketplace. Students explore strategic directions for enterprises in creative ways through practical engagement and application of business model innovation methods and tools in a fully online learning environment comprising digital content and live webinars. Creative sustainable business model specialists are sought after in the marketplace, and this subject provides insights in developing these specialist skills, thus highlighting students' potential as future business leaders.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4014 Design Practice: Manufactured Product Lifecycle (10 Credit Points)
Subject Details (p. 3211) **Legacy Code:** 301310
Visualisation analytics for sustainable manufacturing practices provide an essential contribution to planning and adoption for new product development. The application of product lifecycle management (PLM) methods through software interfaces permits the establishment of a digital environment to create, manufacture and manage innovation on a comprehensive basis. Students will engage with an innovation project from a PLM perspective as an extended enterprise with focus on time to market, waste optimisation, prototyping efficiency, and value chain collaboration.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4015 Design Practice: Self-Directed Specialised Mentor Project (10 Credit Points)
Subject Details (p. 3211) **Legacy Code:** 301311
Mentorship is highly regarded in preparation for accelerated understanding of the competitiveness and excitement of professional practice. Specialised mentors provide insights and engage students in co-creative processes and guide the pursuit of design innovations that challenge markets and redefine career progression and employment opportunities. This subject permits students to develop their own idea from conceptual discovery to market strategy and launch preparations with the view to build a new commercial pathway and personal resilience by creating a new value proposition of merit.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4016 Design Practice: Sustainable Components (10 Credit Points)
Subject Details (p. 3211) **Legacy Code:** 301309
New Product development in architecture and construction industries draws upon construction knowledge, applied materials specification, design for durable systems, component interfaces supporting assembly and robust design principles with aesthetic considerations, functional and desirable product attributes. This subject forms part of the Design Practice specialisation and builds upon the principles of sustainable manufacturing and product life cycle in response to an emergent construction theme. In this subject, entrepreneurship and product detailing assist decisions that drive future advancements in construction component design.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4017 Design Thinking for Competitive Advantage (10 Credit Points)
Subject Details (p. 3212) **Legacy Code:** 301302
Design Thinking has become widely adopted as a novel problem solving mechanism and asset to market growth, resource utilisation, and competitiveness. This approach incorporates human-centric attributes and iterative processes which are features of professional designers co-creating with stakeholders. In this unit, students focus on empathic viewpoints associated with understanding people, markets and the environment. They explore future possibilities for communities using decision-making processes, informed by global challenges as represented through the UNSDGs. This new global societal driver for equitable living standards, economic prosperity, and sustainable societies is explored through online study involving a series of webinars, digital interactions, and conclude with a student prototype presentation.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4018 Industrial Design Major Project (Conclusion) (20 Credit Points)
Subject Details (p. 3213) **Legacy Code:** 301298
In collaboration with industry experts and community groups students will refine and complete their capstone project which was conceptualised and proposed in Industrial Design Major Project (Ideation). Students will advance their responses to complex, real-world design problems and refine their expertise in conceptualisation, problem solving, human factors, aesthetics, innovation and communication to deliver a novel product solution to stakeholders as work-ready graduates.
Level: Undergraduate Level 4 subject
Pre-requisite(s): ENGR 4020 OR
ENGR 4004
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4019 Start-Up Product Launch (10 Credit Points)
Subject Details (p. 3214) **Legacy Code:** 301304
Students, working in cross functional teams and as individuals, will develop a mature value proposition for validation and launch of a market-ready product or service that includes promotional narratives and artefacts. Students will focus on entrepreneurial innovation and lean start-up models using design-led strategies such as CANVAS modelling, minimum viable product (MVP), and launching in addition to strategies for securing external funding for projects. Students will be well placed to create dynamic adaptive organisation for business, government, wider communities and start-up businesses as career professionals.
Level: Undergraduate Level 4 subject
Equivalent Subjects: ENGR 3008 - Design Management 4 Design Process ENGR 4002 - Design Management 4 Strategy and Lean Start-Up
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4021 Studio: Interdisciplinary Global (10 Credit Points)
Subject Details (p. 3214) **Legacy Code:** 301294
This subject engages students in a collaborative evidenced based project with local and international expert partners including NASA in the thematic area of Designing for Space Missions 2025 for astronaut health and space architecture for habitat design. Students are able to explore new concepts and integrate their skills within teams across unique research domains. The traditional linear thinking of creativity and innovation is challenged, giving way to a dynamic workspace for discussion, exploration, discovery, critical reflective practice, and maker-culture. This leads to new co-created interdisciplinary innovations which assist in the preparation of students for the Future of Work and decision-making across diverse teams. The focus on the physical and psychological aspects of space are also informing new viewpoints in designing with COVID19 in the Built Environment.
Level: Undergraduate Level 4 subject
Equivalent Subjects: ENGR 3009 - Design Studio 3 Product Realisation ENGR 4003 - Design Studio 5 Symbol and Meaning Making
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4022 Studio: Design Synthesis Capstone (10 Credit Points)
Subject Details (p. 3215) **Legacy Code:** 301402
This subject engages students in a significant project that synthesises creative thinking, design strategy and practical design skills in preparation to be 'work-ready' as a designer upon graduation. Students will apply the skills that they have acquired throughout their degree in core and specialised elective subjects toward their Design Capstone project. The amalgamation of multidisciplinary viewpoints with industry collaborators throughout the subject ensures a vibrant learning environment, culminating in well resolved design outcomes within a Work Integrated Learning (WIL) Framework with linkages to a real-world challenge.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4023 Advanced Engineering Thesis (30 Credit Points)
Subject Details (p. 3216) **Legacy Code:** 300668
This is a 60 credit point year-long subject taken over two terms (30 credit points in each term).This subject provides students with the opportunity to conduct original research on their chosen topics under the supervision of academics. Students are encouraged to disseminate their research results as refereed publications.
Level: Undergraduate Level 4 subject
Incompatible Subjects: LGYA 6084 - Engineering Thesis ENGR 4005 - Engineering Project ENGR 4033 Honours Thesis
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4024 Construction Management Honours Thesis (10 Credit Points)
Subject Details (p. 3217) **Legacy Code:** 301160
This is a 20 credit point year-long subject taken over two terms (10 credit points in each term). This subject provides honours level students with the opportunity to undertake research on a specialist topic within their program of undergraduate studies. Each student is assigned to a supervisor (an expert researcher) based on the chosen research topic. Students are expected to meet the supervisor regularly and work progressively to complete the research. This research will be an extended investigation of a chosen subject that is undertaken using appropriate research methods. In addition to the specialist knowledge on the chosen research topic, students will learn a range of skills including academic writing, project management, critical thinking and analytical skills.
Level: Undergraduate Level 4 subject
Incompatible Subjects: BLDG 4005 - Major Project in Construction
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4025 Final Year Project 1 (UG Engineering) (10 Credit Points)
Subject Details (p. 3218) **Legacy Code:** 301245
This subject describes engineering as a profession, highlighting professional ethics and legal obligations. The focus will be on the development of design skills or research and presentation skills for students enrolled in this subject. This will be achieved through the use of appropriate design/research skills on a capstone project, which will be either design oriented or research oriented on a specialist topic. Under the direction of an academic supervisor and research mentor, the project will demonstrate the student's professional level of identifying, planning, and designing an engineering project while at the same time completing a technical progress report. The capstone project will be continued in the subject Final Year Project 2 (UG Engineering).
Level: Undergraduate Level 4 subject
Co-requisite(s): ENGR 3017
Equivalent Subjects: ENGR 4031 Engineering Thesis 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4026 Final Year Project 2 (UG Engineering) (10 Credit Points)
Subject Details (p. 3220) **Legacy Code:** 301246
This subject continues the on-going work started in subject Final Year Project 1 (UG Engineering). Throughout the semester students will further develop their design, research and presentation skills. This will be achieved through employment of appropriate design/research skills to finish a capstone project, either design-oriented or research-oriented project, which demonstrates student's professional level of executing, testing, documenting an engineering project and completing a technical report.
Level: Undergraduate Level 4 subject
Pre-requisite(s): ENGR 4025
Equivalent Subjects: ENGR 4032 Engineering Thesis 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4027 Industrial Design Applied Research Project (Honours) (20 Credit Points)
Subject Details (p. 3222) **Legacy Code:** 301299
The Industrial Design Honours Program provides candidates with an opportunity to undertake a significant design research project and research training component that explores design issues including products, services, systems and research methods. In this subject students combine scholarly inquiry, critical thinking, design thinking, applied design research methods and exploratory prototyping informed by state of the art research via literature review, and human-centred design methods with ethical considerations. Discussion of results of preliminary concept explorations of low to medium fidelity are further refined towards a reframed and detailed design brief, research project timeline, and evolved design research methodology in preparation for a high quality research proposal and a substantial creative work.
Level: Undergraduate Level 4 subject
Equivalent Subjects: LGYC 4734 Industrial Design Project (Commencement)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4029 Industrial Design Project (Completion) (40 Credit Points)
Subject Details (p. 3223) **Legacy Code:** 300774
The Industrial Design Honours Program provides students with an opportunity to apply their industrial design skills to an in-depth year long design research project. In Industrial Design Major Project (Completion), Honours candidates respond to the research findings and design brief that they produced in Autumn semester. They undertake detailed design development to resolve and communicate a final design solution, which is publicly exhibited at the end of the year. Their design and research communications present a strong argument for the final design and demonstrate the honours candidates capacity to undertake postgraduate design research and to join professional design practice.
Level: Undergraduate Level 4 subject
Pre-requisite(s): ENGR 4028
Equivalent Subjects: LGYB 1049 - Industrial Design Project (Completion)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4030 Industrial Design Research Thesis (Honours) (20 Credit Points)
Subject Details (p. 3224) **Legacy Code:** 301300
In this unit, students will extend their research journey using appropriate applied design research methods that explore usability, design semantics, functionality, sustainability and product considerations. Students will submit a creative project and exegesis on their research endeavour providing a critical analysis and reflection on outcomes that situate the work within relevant literature, ideas and industrial design field discourse. In addition to the specialist knowledge on the chosen research topic, students will learn a range of skills including academic writing, and project management.
Level: Undergraduate Level 4 subject
Pre-requisite(s): ENGR 4027
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4034 Climate Smart Engineering (10 Credit Points)
Subject Details (p. 3224) **Legacy Code:** 301420
Climate change is one of the most significant and urgent challenges facing the world today. In this unit, students will learn and appropriately apply scientific principles, in an engineering context, to reduce our impact on climate as well as in adopting to changing climate conditions. Students will explore both current and emerging technologies, that address climate change, in order to propose workable real world solutions.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4035 Smart and Liveable Cities (10 Credit Points)
Subject Details (p. 3225) **Legacy Code:** 301423
Students will apply smart and sustainability perspectives to design urban centres. Students will use a range of tools to conduct integrated system analysis for smart and liveable cities. Students work on real world projects including green buildings, blue/green space, sustainable transport and infrastructure, sustainable water management. Though these projects, students will achieve significant edge in their employability.
Level: Undergraduate Level 4 subject
Pre-requisite(s): CIVL 2002 OR ENGR 1050
Equivalent Subjects: ENGR 4011 Sustainability and Risk Engineering
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4036 Advanced Engineering Thesis 2: Detailed Investigations (10 Credit Points)
Subject Details (p. 3226) **Legacy Code:** 301484
Advanced Engineering Thesis 2 - Detailed Investigations subject consists of a research project designed and implemented under the direction of an academic supervisor and research mentor. This subject is the culmination of studies for students who have completed their first three years of an undergraduate degree and provides substantial training in detailed Investigations. Under staff supervision, students are allocated a particular topic for their research, design their own programme of research, and perform the research. The emphasis of this subject is on the application of research knowledge gained in other subjects and in Engineering Thesis 1 - Preliminary Investigations to the practical conduct of the individual research project. This subject provides final year Advanced engineering students with the opportunity to undertake research on a specialist topic within their Key Program of undergraduate study.
Level: Undergraduate Level 4 subject
Pre-requisite(s): ENGR 4037
Equivalent Subjects: MECH 4006 - Advanced Engineering Thesis 2 Detailed Investigations
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4037 Advanced Engineering Thesis 1: Preliminary Investigations (10 Credit Points)
Subject Details (p. 3227) **Legacy Code:** 301485
Advanced Engineering Thesis 1 - Preliminary Investigations subject consists of a research project designed and implemented under the direction of an academic supervisor and research mentor. This subject is the culmination of studies for students who have completed their first three years of an undergraduate degree and provides substantial training in Preliminary Investigations. Under staff supervision, students are allocated a particular topic for their research, design their own programme of research, and perform the research. The emphasis of this subject is on the application of research knowledge gained in other subjects to the practical conduct of the individual research project. This subject provides final year Advanced engineering students with the opportunity to undertake research on a specialist topic within their undergraduate field of study.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4038 Biomedical Electronics (10 Credit Points)
Subject Details (p. 3227)
This subject will cover recent advances in biomedical electronics including electronic diagnostic devices, implanted devices, human-computer-interface, bioinstrumentation and neuromorphic engineering. Topics covered span from the bio-electromagnetism and related applications to regulatory aspects (IEC standards and TGA/FDA approval processes) and electrical safety of instrumentation. This subject will have a strong practical design focus with laboratories and tutorials focused on the design of real instrumentation (including manufacturing) dealing with real biomedical signals. This subject uses basic and advanced electronic concepts including circuit simulator(s), embedded systems and requires manual assembly of circuits. Recap and catch-up modules to electronics, signal conditioning, advanced mathematics concepts such us Fourier Transform and their application to electronics as well as circuit simulator training and electronic instruments use training are provided, for students from non Electronic/Electrical background.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4040 Industrial Design Major Project (Ideation & Studio Practice) (20 Credit Points)
Subject Details (p. 3229)
In this Industrial Design capstone subject, students will immerse themselves in a complex real-world design problem, with considerable social impact, which consolidates their industrial design knowledge and skills. Students will apply themselves in the areas of concept generation and iterative industrial design processes and problem solving. They will incorporate human factors and desirable consumer attributes to produce a creative and novel solution which meets manufactured quality standards and high-level sustainability principles. All learning activities are underpinned by Industrial Design professional practice, as well as research methods for user-centred design, health and wellbeing, digital futures, ergonomics, and sustainable design practice. During their design project, students will engage with industry experts and community groups reinforcing their role, upon graduation, as empathic innovators, and industrial design practitioners with a multidisciplinary viewpoint.
Level: Undergraduate Level 4 subject
Pre-requisite(s): ENGR4022 Studio Design Synthesis Capstone
OR
ENGR4004 Design Studio 6
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 5001 Fire Engineering 1 (Fire Dynamics) (10 Credit Points)
Subject Details (p. 3230)
This subject is essential for anyone considering a career in Fire Safety and aims to develop detailed knowledge of fire behaviour and dynamics in the built environment. Students will better understand fuels and combustion processes, the chemistry of combustion, flammability limits, ignition characteristics and different types of flames and fire plumes. The subject also introduces students to the basic principles of fire safety design so that they can appreciate fire safety and develop appropriate fire safety engineering solutions.
Level: Postgraduate Coursework Level 5 subject
Equivalent Subjects: ENGR7006 Fire Engineering 1 (Fire Dynamics)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 6001 Bushfire Design and Climate Change (10 Credit Points)
Subject Details (p. 3231)
This subject considers the concept of 'design bushfire' and the impact of climate change upon varying weather and climate conditions in Australia and globally. The potential implications of climate change on bushfire behaviour and bushfire design are developed. Students will be introduced to the concept of "Bushfire Protection Design Guidelines" including the concepts of Bushfire Design Brief and Bushfire Design Subsystems, as well as the Bushfire Verification Method adopted by the National Construction Code. Students will be able to calculate recurrence conditions for bushfire behaviour and bushfire weather conditions using extreme values techniques. Students will compare different bushfire behaviour models and their implications for future climatic conditions in developing performance solutions for bushfire protection. The role of landscape fires and fire generated winds will also be considered in the context of planning and building for bushfire protection. The role of traditional Aboriginal burning practices and culture also forms an important aspect of this subject.
Level: Postgraduate Coursework Level 6 subject
Equivalent Subjects: -
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 6002 Planning for Bushfire Prone Areas (10 Credit Points)
Subject Details (p. 3232)
This subject describes the relevant planning issues for bushfire prone areas and the measures that can be implemented to ensure appropriate development in these areas. Through collaboration with industry professionals students learn that knowledge and understanding of the planning, design and construction of the urban form is important in managing the risk of bushfire in the community. It is also fundamental in understanding of the management of development for bushfires and the necessary infrastructure requirements for bushfire suppression and property protection in bushfire prone areas. Students evaluate and report on planning principles and legal issues in bushfire prone areas, as well as use the legislative framework to determine impacts on property and assets. This subject challenges students to become more strategic thinkers in planning and preparing for bushfire. Knowledge gained in this subject/program will benefit students aspiring to careers such as bushfire consultants and land-use planners.
Level: Postgraduate Coursework Level 6 subject
Equivalent Subjects: ENGR 7016 - Planning for Bushfire Prone Areas
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 6003 Fire Technology and Engineering Principles (10 Credit Points)
Subject Details (p. 3232)
The subject introduces students to the basic principles of fire behaviour and fire safety design so that they can appreciate fire safety principles and interpret fire safety engineering design concepts. Students will learn the basics of combustion, building fire characteristics, smoke movement, responses of fire safety devices, building fire resistance, response of building occupants, fire safety engineering design and assessment methodology. The subject provides the basis for understanding fire safety engineering and the techniques and tools used in fire safety engineering. The subject is designed for building surveyors, who will be assessing performance solutions by fire safety engineers.
Level: Postgraduate Coursework Level 6 subject
Incompatible Subjects: ENGR7011 Fire Technology Principles ENGR7009 Fire Engineering Principles
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 7001 Advanced Engineering Project 1 (10 Credit Points)
Subject Details (p. 3233) **Legacy Code:** 301006
In this unit, the students will be working on a major engineering project as a team of 2 to 5 students. The project will be supervised by an academic staff on topics related to his/her research expertise. The students will apply and further develop their expertise in research, engineering project management and planning, work health and safety, and professional writing skills. The students are required to present outcomes using a professional report which should include a background, objectives, a comprehensive literature review, the methodology and a project plan which can then be completed in Advanced Engineering Project 2.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): ENGR 7013
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 7002 Advanced Engineering Project 2 (10 Credit Points)
Subject Details (p. 3234) **Legacy Code:** 301007
In this subject, students will complete the major engineering project commenced in subject 301006 Advanced Engineering Project 1. The students are expected to develop advanced technical knowledge and skills in their field of study as well as the ability to function effectively as an individual in a team, with the capacity to be a leader or manager. The students are required to present outcomes using a professional report and an oral presentation.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): ENGR 7001
Co-requisite(s): ENGR 7013
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 7004 Bushfire Fighting (10 Credit Points)
Subject Details (p. 3235) **Legacy Code:** 200500
This subject describes the techniques, hardware and extinguishing agents used to fight and control bushfires and focuses on the logistics involved in ensuring safe, efficient and effective control. The content includes bushfire fighting strategies in the context of rural and interface environments, hazard reduction and brigade structure arrangements. The role of planning in supporting firefighting through water supply and access is also considered as are the findings from various Public Inquiries.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 7005 Emergency Management for Bushfire Prone Areas (10 Credit Points)
Subject Details (p. 3235) **Legacy Code:** 200459
This subject describes the organisational and administrative arrangements for the management of emergency events in Australia, including the role of States and local government and the techniques available to develop risk management strategies in order to minimise loss of life and property arising from bushfire emergencies. The subject describes how the three tiers of Government interact during major emergency events, the role of community engagement in emergency management and the process of developing a risk management plan for bushfire emergencies. The subject also discusses the role of post-event survey and emergency and evacuation planning at the property scale.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 7006 Fire Engineering 1 (Fire Dynamics) (10 Credit Points)
Subject Details (p. 3236) **Legacy Code:** 300709
This subject aims to develop a detailed knowledge of fire behaviour and dynamics in the built environment. Students will be able to understand fuels and combustion processes; the chemistry of combustion; flammability limits; ignition characteristics; and different types of flames and fire plumes. The content also covers the burning of liquids and solids; flammable vapour/air mixtures; extinction and extinguishment; flame spread mechanisms and modeling; flashover; fire resistance and fire severity; projection of flames from burning compartment openings; spread of fire from a compartment; production and measurement of smoke; and smoke movement.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYB 8308 - Fire Engineering 1 (Fire Dynamics)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 7007 Fire Engineering 2 (Fire Models) (10 Credit Points)
Subject Details (p. 3237) **Legacy Code:** 300710
This subject aims to develop an understanding of various types of computational tools used in engineering design of fire safety systems. The fundamentals of control volume, applications of conservations laws in modeling and the form of predictive equations are explained. The content includes evaluations of fire severity, fire resistance levels of various types of building structures and elements. Hand calculation equations, zone models and field models are covered. The limitations of the models in representing the real phenomena are also discussed.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYC 0673 - Fire Engineering 2 (Fire Models)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 7008 Fire Engineering Design and Assessment (10 Credit Points)
Subject Details (p. 3238) **Legacy Code:** 300718
This subject helps to develop a high level of knowledge of fire safety systems relevant to life protection and the design and assessment of such systems. The subject covers the process of fire safety engineering design and assessment including the fire engineering brief, conceptual design, regulatory objectives, fire safety engineering subsystems, verification methods, timeline analysis, design fires, evaluation of performance of passive and active fire protection systems, risk analysis and fire engineering project reporting.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYB 5425 - Fire Safety Systems (Life Safety)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 7010 Fire Engineering Science (10 Credit Points)
Subject Details (p. 3239) **Legacy Code:** 301048
This subject aims to enhance students' knowledge of the fundamental principles of physics, including heat and mass transfer, fluid mechanism and thermodynamics, which govern the natural phenomena associated with fires. The subject also covers properties of materials, basic mathematics and numerical methods for students to become familiar with quantitative analysis of fire dynamics and structural response. In addition, students will learn probability and risk concepts in fire safety engineering. This is a bridging subject for students who are admitted to the Graduate Certificate and Graduate Diploma in Fire Safety Engineering without an engineering or physical science background. It lays the foundation for further studies in fire safety engineering courses.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 7012 Fire Technology and Engineering Principles (10 Credit Points)
Subject Details (p. 3240) **Legacy Code:** 300948
The subject introduces students to the basic principles of fire behaviour and fire safety design so that they can appreciate fire safety systems and interpret fire safety engineering design concepts. The subject covers the basics of combustion, building fire characteristics, smoke movement, responses of fire safety devices, building fire resistance, response of building occupants, fire safety engineering design and assessment methodology. The subject provides the basis for understanding fire safety engineering and the techniques and tools used in fire safety engineering.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: ENGR 7011 - Fire Technology Principles ENGR 7009 - Fire Engineering Principles
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 7013 Industrial Experience (PG) (0 Credit Points)
Subject Details (p. 3240) **Legacy Code:** 301027
Students will undertake 12 weeks full time (37.5 hours per week) employment (or part time equivalent) to obtain relevant workplace experience in Engineering companies under the supervision of professional engineers in one company or more. This will give the student a solid grounding in the Key Program of engineering which they have chosen to pursue.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 7014 Master Project 1 (10 Credit Points)
Subject Details (p. 3241) **Legacy Code:** 300597
This subject is a problem based project subject. Students are expected to conduct self studies under supervision by academic staff. Students will identify research topics in consultation with supervisors, carry out literature survey in one of the fields of engineering, construction, information technology or data science. Students will be required to define research objectives and scope, establish research methodology and prepare a research plan.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 5830 - Master of Engineering Specialist Reading LGYA 4574 - Built Environment Project LGYA 4576 - Built Environment Research Project
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 7015 Master Project 2 (10 Credit Points)
Subject Details (p. 3242) **Legacy Code:** 300598
This subject is a continuation of subject Master Project 1 and is a problem based project subject. Students are expected to conduct self studies under supervision by academic staff and deliver the final outcomes of the research topics that are proposed in Master Project 1. Students will employ the identified methodologies to carry out the research plans and fulfil the research objectives with the defined scope. Each individual student is required to produce an oral presentation and a final written report in one of the fields of engineering, construction, information technology or data science. Students will acquire problem solving skills in this subject.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): ENGR 7014
Equivalent Subjects: LGYA 5829 - Master of Engineering Project LGYA 4576 - Built environment Research Project
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 7016 Planning for Bushfire Prone Areas (10 Credit Points)
Subject Details (p. 3243) **Legacy Code:** 301049
This subject describes the relevant planning issues for bushfire prone areas and the measures that can be implemented to ensure appropriate development in these areas. A knowledge and understanding of the planning, design and construction of the urban form is important if we are to manage the risk of bushfire on the community. It is also fundamental in our understanding of the management of development for bushfires and the necessary infrastructure for bushfire suppression and property protection in bushfire prone areas. Topics include conceptual planning issues, determining bushfire prone areas, bushfire and planning legislation, strategic and regional planning for bushfire, subdivision, defendable space and construction, design, staging and siting, vulnerable developments, industry and other forms of commercial use, landscaping and maintenance, and water and access.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: ENGR 6002 - Planning for Bushfire Prone Areas ARCH 7004 - Planning and Development Control
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 7017 Professional Practice and Communication (10 Credit Points)
Subject Details (p. 3244) **Legacy Code:** 301005
This subject introduces some of the concepts, standards and techniques associated with the current professional practice for engineering and information technology students. These include the various elements of engineering and IT practice, basic knowledge of contract laws and legal responsibility, competence in verbal and written communication, and an understanding of ethical considerations.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 7019 Specialised Software Applications (10 Credit Points)
Subject Details (p. 3245) **Legacy Code:** 301002
This subject offers several streams of practical applications in engineering and industrial design software. Students get to choose a software application stream depending on their key program. Lectures and assignments are delivered online and are enhanced by face to face contact with stream coordinators. Emphasis is placed on teaching students practical software applications skills relevant to industry needs.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: ELEC 7007 - Engineering Software Applications
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 7020 Sustainability and Risk Engineering (PG) (10 Credit Points)
Subject Details (p. 3246) **Legacy Code:** 300939
Analysis of sustainability with engineering perspective is increasingly becoming important in the modern world. Also, in the future sustainability will include risk engineering. Hence, engineers with in-depth understanding of different tools that can be used for both sustainability and risk analysis will have significant competitive edge in their future career. The main objective of this subject is to introduce different tools available for sustainability and risk analysis in various engineering applications. The content includes renewable/alternative energy systems, energy/resource efficiency, sustainable/green buildings, sustainable transport and infrastructure, sustainable water management, environmental management systems, sustainability reporting, life cycle analysis, probability/reliability theory, risk assessment models, overall system analysis.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 7023 Advanced Biomedical Data and Images (10 Credit Points)
Subject Details (p. 3247) **Legacy Code:** 301211
This subject will cover advanced biomedical signal and data analysis including electrocardiography, electroencephalography, human-computer-interface, electromyography, machine learning and biomedical images. This subject will have a strong practical design focus with laboratories and tutorials focused on the design of usable software packages dealing with real biomedical signals.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 7024 Advanced Biomedical Electronics (10 Credit Points)
Subject Details (p. 3248) **Legacy Code:** 301209
This subject will cover advanced design of biomedical electronic devices including, implanted devices, human-computer-interface, bioinstrumentation and neuromorphic engineering. Topics covered span from the bioelectromagnetism and related applications to regulatory aspects (IEC standards and TGA/FDA approval processes) and electrical safety of instrumentation. This subject will have a strong practical design focus with laboratories and tutorials focused on the design of real instrumentation (including manufacturing) dealing with real biomedical signals.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 7025 Human Physiology and Biomedical Technologies (10 Credit Points)
Subject Details (p. 3249) **Legacy Code:** 301210
This subject aims to introduce a wide range of biomedical technologies and how they are used in medical practice. Topics will span from data acquisition technologies such as ECG, EEG, body plethysmography, to large imaging diagnostics such as CT scanner, PET scanner and bio-mechanical assisting devices often used for rehabilitation and support. The first part of this subject will include a module on human physiology and bio-mechanics. This module gives a basic understanding of the human body and introduces the scientific and medical terminology used for anatomy, physiology and biochemistry and bio-mechanics.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 7026 Performance Solutions for Bushfire Protection (10 Credit Points)
Subject Details (p. 3250) **Legacy Code:** 301265
This subject describes the processes and techniques available to develop performance outcomes to the planning and building of structures required for bushfire protection in Australia. This subject provides advanced methods to address performance when considering bushfire protection measures. It also introduces the 'bushfire protection guidelines' and processes similar to that used in developing performance solutions under the National Construction Code. These include the use of event tree analysis, verification methods, consideration of climate change and the use of annual exceedance probabilities when developing performance solutions. Students are required to develop suitable measures through a performance solution for bushfire protection of a building.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): None
Co-requisite(s): None
Equivalent Subjects: ENGR 7003 Alternate Solutions for Bushfire Prone Areas
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 7027 Spatial Tools and Mapping (10 Credit Points)
Subject Details (p. 3251) **Legacy Code:** 301264
This subject offers practical applications in spatial information software. Students will be taught using Geographical Information Systems (GIS) software to prepare maps (such as bushfire prone land) as well as management plans required of planning and design practitioners. Workshops are provided to assist students in the practical use of the GIS system. Students are provided with online module notes and readings as well as assignments being submitted online. Emphasis is placed on teaching students practical software applications skills relevant to industry needs.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 7028 Engineering Project 1 (PG) (20 Credit Points)
Subject Details (p. 3251) **Legacy Code:** 301395
This subject introduces the professional engineering skills necessary to practice as an engineer, including project management, professional communication, professional ethics and legal obligations. Students are required to conduct a critical literature survey on a relevant area, identify the design or research problems, propose a plan and methodology for the design or research problems, conduct some preliminary work and analysis, present their work, and complete a project proposal and a project report.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 7029 Engineering Project 2 (PG) (20 Credit Points)
Subject Details (p. 3252) **Legacy Code:** 301396
This subject is a continuation of subject Engineering Project 1 (PG). Students will further develop their professional skills in engineering design, research, and presentation. This will be achieved through the independent work on the proposed engineering design or research topic under an academic supervisor. Students are required to employ the identified design plan or research methodologies to carry out the proposed design or research work, fulfil the design or research objectives, evaluate and analyse the results, and present the results and findings in an oral presentation, a research paper and a final project report. This subject will demonstrate students' professional level of conducting an engineering project.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): ENGR 7028
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 7030 Bushfire Design and Climate Change (10 Credit Points)
Subject Details (p. 3253)
This subject considers the concept of 'design bushfire' and the impact of climate change upon varying weather and climate conditions in Australia and globally. The potential implications of climate change on bushfire behaviour and bushfire design are developed. Students will be introduced to the concept of "Bushfire Protection Design Guidelines" including the concepts of Bushfire Design Brief and Bushfire Design Subsystems, as well as the Bushfire Verification Method adopted by the National Construction Code. Students will be able to calculate recurrence conditions for bushfire behaviour and bushfire weather conditions using extreme values techniques. Students will compare different bushfire behaviour models and their implications for future climatic conditions in developing performance solutions for bushfire protection. The role of landscape fires and fire generated winds will also be considered in the context of planning and building for bushfire protection. The role of traditional Aboriginal burning practices and culture also forms an important aspect of this subjectt.
Level: Postgraduate Coursework Level 7 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 9003 Higher Degree Research Thesis - Engineering (Environmental) (10,20 Credit Points)
Subject Details (p. 3259) **Legacy Code:** 800061
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

Other Health (HLTH)

HLTH 0001 Health Care Environments (WSTC Prep) (10 Credit Points)
Subject Details (p. 3319) **Legacy Code:** 700226
Health care environments introduces students to foundation knowledge for health science level subjects in their degree. This includes supporting the independence and well being of clients, regardless of age or disability. Focus in this subject includes working legally and ethically, working with diverse people and following safe work practices. Effective communication is imperative, through written care plans, identifying what has been provided using client centred practice. This subject incorporates most core and elective subjects in the Certificate III in Individual Support. Students can pursue a qualification through the College RTO in one of three specialisations- Disabilities, Ageing, and Home & Community.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: HLTH 0002 - Health Care Environments (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 0002 Health Care Environments (WSTC) (10 Credit Points)
Subject Details (p. 3320) **Legacy Code:** 900106
Health care environments introduces students to foundation knowledge for health science level subjects in their degree. This includes supporting the independence and wellbeing of clients, regardless of age or disability. Focus in this subject includes working legally and ethically, working with diverse people and following safe work practices. Effective communication is imperative, through written care plans, identifying what has been provided using client centred practice. This subject incorporates most core and elective subjects in the Certificate III in Individual Support. Students can pursue a qualification through the College RTO in one of three specialisations- Disabilities, Ageing, and Home & Community.

Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 0003 Literacy in Health Science (WSTC Prep) (10 Credit Points)
Subject Details (p. 3321) **Legacy Code:** 700227
This subject provides an introduction to the provision of health, services and fields associated with the provision of health in Australia. The subject covers a range of health science concepts, including what health literacy is and why it is important and other concepts such as acute care, chronic care, National Health Priority Areas (NHPAs) in Australia, and health education, The subject also introduces examples of terminology used for measuring the distribution and determinants of disease and illness in varied population groups (epidemiology). This includes terms such as health data, morbidity, co-morbidities, mortality, quality of life and disability adjusted life years. This subject aims to give students an understanding of health science practice in Australia both in city and rural settings and identifies minority group issues and challenges in accessing healthcare and services.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 0004 Organisation for Tertiary Study (WSTC) (5 Credit Points)
Subject Details (p. 3322) **Legacy Code:** 900089
This subject aims to familiarise students with some of the concepts and issues surrounding healthy living, particularly for young people in an environment far from parental support. It introduces students to academic skills and the expectations of learners in a tertiary environment while further developing their language skills. By the end of this subject, the goal is for students to have a better knowledge and understanding of how to improve their health, develop organisational skills and learn to manage their time. The subject also aims to develop their understanding of the effect of drug use on health and lifestyle. There will be a range of teaching and learning strategies used in this subject including working in groups. The aims of this subject are to develop an understanding of the concept of health and wellbeing; develop and maintain organisational skills for various areas of life; create a mindset and learn skills to manage time well.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: LGYB 1377 - Living Skills (UWSC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 0005 The Health Science Professional (WSTC Prep) (10 Credit Points)
Subject Details (p. 3323) **Legacy Code:** 700303
The Health Science Professional is designed to enhance Academic English skills whilst exploring different pathways available in the Bachelor of Health Science degree, and the majors associated with Testamur majors including Clinical Science, Health Promotion, Health Services Management, Public Health and Recreation Therapy. The subject will lead students through the compliance requirements of their intended pathway, and map out the process of meeting these requirements. Students are encouraged to develop their ideas and understanding of health sciences and the areas of specialisation they can pursue.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 1001 Foundations of Research and Evidence-Based Practice (10 Credit Points)
Subject Details (p. 3324) **Legacy Code:** 400863
This subject considers the reasons and roles for evidence-based practice and research in healthcare, introducing students to core concepts and relevant terminology. Skills are developed for asking clinical or professional healthcare questions and translating these skills into search strategies for finding evidence. To make sense of that evidence, students are introduced to quantitative and qualitative research methods, types of data, how data are described and how biostatistics is used to provide meaning to research data.
Level: Undergraduate Level 1 subject
Equivalent Subjects: HLTH 1002 - Foundations of Research and Evidence-Based Practice (UWSC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 1002 Foundations of Research and Evidence-Based Practice (WSTC) (10 Credit Points)
Subject Details (p. 3324) **Legacy Code:** 700064
This subject will consider the reasons and roles of evidence-based practice and research, and introduce students to their language and core concepts. Skills will be developed for asking clinical or professional healthcare questions and to translate these into search strategies for finding evidence. To make sense of that evidence, students will be introduced to quantitative and qualitative research methods, types of data, how data is described and how biostatistics is used to provide meaning to research data.
Level: Undergraduate Level 1 subject
Equivalent Subjects: HLTH 1001 - Foundations of Research and Evidence-Based Practice
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 1003 Introduction to Paramedicine (10 Credit Points)
Subject Details (p. 3325) **Legacy Code:** 401066
This subject introduces students to the paramedic profession and its scope of practice in Australia. It includes exploration of the roles and responsibilities of paramedics in the context of the changing health environment. Ethical issues and relevant legal and regulatory requirements will also be discussed. Students will be introduced to the key concepts of paramedicine and to the complexity of normal development and its relationship to the processes of health science.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 1006 Movement and Skill Development (10 Credit Points)
Subject Details (p. 3326) **Legacy Code:** 400891
This subject examines the scientific basis for movement and sports skill development. An understanding of the principles of movement and motor skill and how they apply to performance is examined through a range of movement tasks required for track and field athletics and some team sports. Laboratory activities will focus upon the basic movement tasks of throwing, jumping, balancing, striking, running and rotary activities. An examination of the instruments used in efficient movement analysis is undertaken.
Level: Undergraduate Level 1 subject
Pre-requisite(s): BIOS 1022 OR
BIOS 1035 AND
SPRT 1001
Incompatible Subjects: HLTH 1008 - PDHPE Exploring Movement Skills
HLTH 3013 - PDHPE Efficient Movement Principles
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 1009 Paramedic Practice 1 (10 Credit Points)
Subject Details (p. 3327) **Legacy Code:** 401067
This subject allows the student to develop professional and clinical skills and techniques in preparation for paramedic practice. Students will be exposed to manual handling techniques to enable safe lifting and movement of patients and equipment, and discuss principles of infection control and scene safety. Students will learn how to undertake a holistic patient assessment and perform basic diagnostic tests. Students will have the opportunity to practice new skills and become oriented to the prehospital setting during clinical placements on non-emergency transport ambulances, preparing them for an extended emergency ambulance clinical placement in the following semester.
Level: Undergraduate Level 1 subject
Pre-requisite(s): HLTH 1003
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 1010 Professional Health Competencies (10 Credit Points)
Subject Details (p. 3328) **Legacy Code:** 400871
This subject introduces skills for studying and working in health science. Students will gain an understanding of the interdisciplinary and multi-disciplinary nature of health science practice in the 21st century, and how this interacts with the specialty health professions, client and community expectations of health care and employment opportunities in health science. Students will learn foundation competencies that will underpin their academic development and their safe, responsible and ethical practice in health science service environments.
Level: Undergraduate Level 1 subject
Equivalent Subjects: HLTH 1011 - Professional Health Competencies (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 1011 Professional Health Competencies (WSTC) (10 Credit Points)
Subject Details (p. 3329) **Legacy Code:** 700067
This subject introduces skills for studying and working in health science. Students will gain an understanding of the interdisciplinary and multi-disciplinary nature of health science practice in the 21st century, and how this interacts with the specialty health professions, client and community expectations of health care and employment opportunities in health science. Students will learn foundation competencies that will underpin their academic development and their safe, responsible and ethical practice in health science service environments.
Level: Undergraduate Level 1 subject
Equivalent Subjects: HLTH 1010 - Professional Health Competencies
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 1012 Evidence in Health (10 Credit Points)
Subject Details (p. 3329) **Legacy Code:** 401383
This subject will introduce skills for finding and using the best available evidence in health. This begins with understanding thinking systems, biases and why we often don't accept, or respond, to facts, science and evidence. Students will learn the evidence-based practice process to formulate questions and find appropriate and relevant evidence from the unending amount of information available. The subject covers key concepts in how to read and understand a research paper. Students will develop skills for communicating evidence to strengthen arguments in academic writing and professional practice.
Level: Undergraduate Level 1 subject
Equivalent Subjects: HLTH 1001 - Foundations of Research and Evidence-Based Practice HLTH 1002 - Foundations of Research and Evidence-Based Practice (UWSC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 1013 Professional Competencies in Health (10 Credit Points)
Subject Details (p. 3331) **Legacy Code:** 401396
This subject, taken in the first session for commencing students in health science courses, offers an introduction to foundation knowledge and skills required for future practice in the health workforce. Students will gain an understanding of their roles and will develop skills required for safe, responsible and ethical practice required as health professionals. There is a specific focus on developing students' understanding of the roles of others in the interprofessional health care team as a way of establishing -professional identity. The International Classification of Functioning provides a framework within which client centred and community focussed approaches to practice is discussed. The subject also uses a 'student capital' framework to facilitate reflection of academic capability and development of skills required for success at university.
Level: Undergraduate Level 1 subject
Equivalent Subjects: HLTH 1011 - Professional Health Competencies HLTH 1010 - Professional Health Competencies
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 1014 Evidence in Health (WSTC) (10 Credit Points)
Subject Details (p. 3332) **Legacy Code:** 700315
This subject will introduce skills for finding and using the best available evidence in health. This begins with understanding thinking systems, biases and why we often don't accept, or respond, to facts, science and evidence. Students will learn the evidence-based practice process to formulate questions and find appropriate and relevant evidence from the unending amount of information available. The subject covers key concepts in how to read and understand a research paper. Students will develop skills for communicating evidence to strengthen arguments in academic writing and professional practice.

HLTH 1018 Paramedicine Foundations 1 (10 Credit Points)
Subject Details (p. 3336)
This subject introduces students to the theoretical and practical aspects of modern paramedicine throughout Australia and internationally. It includes exploration of the roles and responsibilities of paramedics within healthcare systems considering relevant regulatory, ethical, and legal issues. Students will gain foundational practical knowledge in key concepts of paramedicine, in line with standards such as the National Safety and Quality Health Services Standards (NSQHS). Students will also begin to analyse typical out of hospital case scenarios to introduce the application of theory to practical contexts.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 1019 Paramedicine Foundations 2 (10 Credit Points)
Subject Details (p. 3337)
In this Subject, students develop additional skills around patient assessment and the management of basic medical and trauma conditions. Students also learn to work in clinical teams in a range of environments and focus on the provision of person-centred care. Students continue to explore the role and context of paramedicine within the health system including existing and emerging paramedic practice environments. Students will have the opportunity to practice new and existing skills. Students become oriented to the out of hospital setting during clinical placements in the community preparing them for an emergency ambulance clinical placement in the following semester
Level: Undergraduate Level 1 subject
Pre-requisite(s): 401481 Paramedicine Foundations 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 1020 Foundations of HPE (10 Credit Points)
Subject Details (p. 3338)
This subject introduces foundational disciplinary knowledge and elementary principles of practice within sport, health, and physical education across a variety of contexts. It aims to commence the development of the key professional practices of the field, where students will learn the basic processes of design, implementation, and evaluation inherent in the teaching and learning cycle. This will require students to engage in a variety of practical activities such that they begin to understand the essential requirements for creating learning experiences in HPE and sport settings.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 2001 A Field Study: Comparative Studies of Health Care Delivery (10 Credit Points)
Subject Details (p. 3339) **Legacy Code:** 400958
Australia has strict border measures in place to protect the health of the Australian community. Travel restrictions between Australian states and territories and in some remote areas of Australia are in place to help prevent the spread of COVID-19. Further to this, there is a ban on overseas travel from Australia. You can't leave Australia unless you get an exemption from the Department of Home Affairs (source - https://covid19.homeaffairs.gov.au/leaving-australia). Due to this ban on international travel, this subject will not be offered 2021 Summer A. The focus of this subject is to provide nursing students with the problem-solving skills required in assessing and caring for people who are living in poverty in remote or rural areas in Australia and/or internationally. This subject is designed to enable students to develop cultural awareness and understanding of health care delivery and contemporary issues confronting health care for people who are living in remote or rural areas in Australia and/or internationally. Students will be eligible for up to 80 hours of approved clinical hours following successful completion of the clinical assessment tool by an accredited registered nurse.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 2003 Biomechanics (10 Credit Points)
Subject Details (p. 3340) **Legacy Code:** 401140
Level: Undergraduate Level 2 subject
Equivalent Subjects: BIOS 2004 - Biomehanics and Kinesiology HLTH 2008 - Introduction to Biomechanics
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 2004 Exercise Bioenergetics (10 Credit Points)
Subject Details (p. 3341) **Legacy Code:** 400883
This subject investigates exercise metabolism and related genomics and proteomics in an integrated fashion. Covering: energy pathways; metabolic control; metabolism, oxygen consumption and respiratory quotient relationships; metabolic responses to acute and chronic exercise; pathway contributions to exercise; metabolic limitations to exercise; metabolic contributions to fatigue; metabolic acidosis, cellular and systemic implications of metabolic thresholds, conditions that can alter cellular metabolism. Whilst skeletal muscle metabolism is the primary focus, liver and adipose tissue metabolism are also considered as are anabolic pathways. Students will be exposed to basic biochemical assays of interest to the exercise physiologist.
Level: Undergraduate Level 2 subject
Pre-requisite(s): NATS 1009 AND
NATS 1010 AND
SPRT 1001 AND
HLTH 1001
Equivalent Subjects: BIOS 2003 - Bioenergetics of Exercise
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 2005 Exercise Prescription I (10 Credit Points)
Subject Details (p. 3343) **Legacy Code:** 401143
This subject is designed to give students an understanding of and experience in exercise prescription and fitness program construction for the general population (apparently healthy) across all ages and genders. It will focus on the development of general health-related exercise programs, which improve aerobic and anaerobic fitness, muscular strength and endurance, flexibility and body composition. Students will design, implement, supervise and evaluate a self-prescribed exercise program, and instruct training sessions for fellow students.
Level: Undergraduate Level 2 subject
Pre-requisite(s): HLTH 2003 AND
SPRT 2002
Equivalent Subjects: HLTH 2006 - Exercise Prescription for General Populations
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 2006 Exercise Prescription for General Populations (10 Credit Points)
Subject Details (p. 3344) **Legacy Code:** 400326
In 2016, this subject is replaced by 401143 - Exercise Prescription I. The exercise prescription area is designed to give students an understanding of and experience in exercise prescription and fitness program construction for the general population of all ages and both genders, including pre exercise screening and fitness testing. It will focus on the development of general health related fitness programs, which improve aerobic and anaerobic fitness, flexibility, muscular strength and endurance, including resistance training. Students will design, implement and evaluate a self-prescribed exercise program as well as provide one-to-one training sessions for fellow students.
Level: Undergraduate Level 2 subject
Pre-requisite(s): HLTH 2008 AND
BIOS 2011 AND
BIOS 2037
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 2007 Fundamentals of Medical Concepts and Terminology (10 Credit Points)
Subject Details (p. 3345) **Legacy Code:** 300950
This subject is designed to provide the student with the knowledge necessary to understand the information contained in the health record, to function in a medical environment through an understanding of the fundamentals of medicine and to effectively use disease classification systems. Within each body system, the student will study anatomy and physiology, disease processes and their treatment, and medical terminology (disease titles, symptomatic terms, surgical terms and investigations). The subject will also focus on specialist topics such as mental health, obstetrics, paediatrics, infectious diseases, oncology, radiotherapy, nuclear medicine, diagnostic and surgical interventions.
Level: Undergraduate Level 2 subject
Pre-requisite(s): INFS 2004
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 2009 Mental Health and Substance Abuse (10 Credit Points)
Subject Details (p. 3346) **Legacy Code:** 401095
This subject introduces students to mental health and behavioural presentations, and emergencies arising from legal and illegal substance use. Students will explore the epidemiology, pathophysiology, manifestation, recognition, assessment and management of common mental health problems, behavioural presentations, and cases involving legal and illegal drug use in the context of paramedicine. Students will practice techniques for managing these presentations from an interpersonal communication perspective and a clinical management perspective. Acute and sub-acute presentations will be discussed, with specific attention given to the role of the paramedic regarding risk assessment, counselling, and health promotion. Legalities associated with management of behaviourally disturbed or cognitively impaired patients will be discussed, and issues relating to multi-agency care, collaboration and co-operation will be examined.
Level: Undergraduate Level 2 subject
Pre-requisite(s): HLTH 1009
Co-requisite(s): HLTH 2017
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 2012 Nutrition and Health 1 (10 Credit Points)
Subject Details (p. 3347) **Legacy Code:** 300933
Nutrition is the science that applies knowledge of the nutritional components of foods to ensure the wellbeing of the human body. This subject presents the basic principles and concepts of human nutrition including nutrient requirements, functions, deficiency symptoms and the effects of dietary excess as well as energy balance and weight control. Students will gain a general understanding of the macronutrients such as carbohydrates, proteins and lipids in human metabolism, energy release and common diseases and disorders such as obesity, malnutrition, diabetes etc. The role of water and electrolytes in cellular and tissue functions, as well as alcohol metabolism and its impact on human health will be covered. The micronutrients are also studied, including the properties, general requirements, functions and the effects of deficiency and excess consumption of vitamins and essential minerals.
Level: Undergraduate Level 2 subject
Equivalent Subjects: HLTH 2011 - Nutrition and Health 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 2013 Nutrition and Health 2 (10 Credit Points)
Subject Details (p. 3348) **Legacy Code:** 300934
This subject explores the basic concepts of human nutrition in relation to various stages of the lifespan from infants to late adulthood. It also explores nutrition in relation to chronic health conditions such as obesity, cardiovascular disease and eating disorders. Students will learn about the development of the Australian Dietary Guidelines and Nutrient Reference Values. Students will also learn to make informed decisions with regard to nutritionally critical moments of the life span, emerging nutrition opinions or contemporary uses of nutrition in physical activity, sports and chronic health conditions.
Level: Undergraduate Level 2 subject
Pre-requisite(s): HLTH 2012
Equivalent Subjects: HLTH 2014 - Nutrition and Health 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 2015 Out-of-hospital Medical Care 1 (10 Credit Points)
Subject Details (p. 3349) **Legacy Code:** 401074
The aim of this subject is to extend knowledge and clinical skills required for the assessment and management of cardiovascular, respiratory and neurological medical emergencies. The subject combines pathophysiological principles development of skills and interpretation of diagnostic technology with clinical decision-making to implement advanced life support.
Level: Undergraduate Level 2 subject
Pre-requisite(s): BIOS 2029 or
NATS 2038
Co-requisite(s): HLTH 2018
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 2017 Paramedic Practice 2 (10 Credit Points)
Subject Details (p. 3350) **Legacy Code:** 401068
This subject focuses on the core competencies for paramedic practice in real world situations. These competencies will be developed through on-campus simulation learning, clinical placements with an emergency ambulance crew over a period of 3 weeks, and through an evidence-based exploration of paramedic practice. The core competencies include communication, documentation, reflections and professional ethical behaviour. In addition, students will practice patient assessment and supervised procedures appropriate to their level.
Level: Undergraduate Level 2 subject
Pre-requisite(s): HLTH 1009 AND
NATS 1010 AND
NATS 1009
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 2018 Paramedic Practice 3 (10 Credit Points)
Subject Details (p. 3351) **Legacy Code:** 401073
This subject introduces students to advanced elements of paramedic practice including advanced life support (ALS) resuscitation, and systematic examination of the cardiorespiratory and neurological systems. Core psychomotor procedures will be explored including advanced airway management and intravenous access. The subject has a strong practical component, during which students can apply theoretical learning to simulated cases of moderate complexity. The unit is underpinned by a strong focus on reasoning and decision making.
Level: Undergraduate Level 2 subject
Pre-requisite(s): HLTH 2017
Co-requisite(s): HLTH 2015
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 2021 Research Methods (Quantitative and Qualitative) (10 Credit Points)
Subject Details (p. 3352) **Legacy Code:** 400864
This subject further explores research methods used to acquire knowledge in healthcare. This includes research designs, international standards, key statistics, and interpretation of results. The range of health research methods will be presented, and studies about treatment effectiveness (clinical trials and systematic reviews), diagnostic effectiveness and qualitative approaches will be explored in detail. Pathways for early-career research are also introduced.
Level: Undergraduate Level 2 subject
Pre-requisite(s): HLTH 1001
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 2022 Biostatistics in Health (10 Credit Points)
Subject Details (p. 3353) **Legacy Code:** 401381
This subject introduces concepts and practice of biostatistics related to public health, healthcare policy and practice, and health science generally. Evidence-based health professionals must be able to interpret and act upon quantitative data from research about the health of individuals, communities and populations; and factors affecting health including determinants of health, and the effects of policies and interventions on the health of individuals and groups. The subject covers essential principles of statistical reasoning, assumptions and methods applied to health scenarios. Learning is achieved by students exploring available statistical information and through analysis of numerical data sets.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 2023 Introduction to Physical Cultural Studies (10 Credit Points)
Subject Details (p. 3354) **Legacy Code:** 401413
From 2020 this subject replaces 401239 - Introduction to Physical Cultural Studies. The subject explores the interconnection between physical movement, culture, and society. Students will investigate the relationships among physical culture in its various forms (including health, physical activity, sport, dance, leisure, and movement related practices) and broader contexts (pedagogical, social, cultural, political, economic, and technological). The subject will equip students with knowledge and skills in becoming active, reflective and critical learners in physical culture thereby enacting meaningful changes in sites of inequality.
Level: Undergraduate Level 2 subject
Equivalent Subjects: PUBH 1005 - Foundations of Wellbeing PUBH 2014 - Introduction to Physical Cultural Studies
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 2024 Research Methods in Health (10 Credit Points)
Subject Details (p. 3355) **Legacy Code:** 401403
This subject explores quantitative and qualitative research methods used to generate and expand knowledge in healthcare. The principal practice and policy questions in healthcare are identified, along with the research paradigms, methodologies, rationales, designs, sampling, data collection and measurement methods, analysis, controls over bias and validity, reporting methods and ethical standards applied to answer these questions and inform evidence-based practice. Practical experience is gained with tools for the appraisal of research evidence guiding practice. Workplace research and organisation research for quality assurance are included. Pathways to a professional career in research are explained.
Level: Undergraduate Level 2 subject
Pre-requisite(s): HLTH 1012 OR
HLTH 1001
Equivalent Subjects: HLTH 2021 Research Methods (Quantitative and Qualitative)
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 2025 Exercise Nutrition (10 Credit Points)
Subject Details (p. 3356) **Legacy Code:** 401436
This subject provides students with an understanding of the interdependent areas of nutrition within the context of sport, physical activity, and exercise. Nutritional needs and recommendations for all levels and types of physical activity are covered along with the links between nutrition and health, sport performance, body composition and control of body weight. Students will develop skills in nutritional analysis and program development, measurement of energy expenditure and body composition assessment. Students will use these skills and knowledge in the individualisation of advice on exercise nutrition for health and sport performance.
Level: Undergraduate Level 2 subject
Pre-requisite(s): NATS 1009 AND
SPRT 1001
Equivalent Subjects: BIOS 2010 - Exercise Nutrition BIOS 2011 - Exercise Nutrition Body Composition and Weight Control
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 3001 Applied Nutrition (10 Credit Points)
Subject Details (p. 3358) **Legacy Code:** 300908
This subject builds on basic concepts in human nutrition and facilitates the study of nutrition needs across the lifecycle and for specific lifestyle and nutrition related diseases. This study will incorporate how to assess nutritional status (incorporating anthropometric, biochemical, clinical, dietary and physical activity assessment) of individuals and groups, understand the strengths and limitations of various methods, how to manipulate diets to ensure nutritional sufficiency and how to provide nutrition education regarding lifestyle related diseases and sports nutrition.
Level: Undergraduate Level 3 subject
Equivalent Subjects: HLTH 3002 - Applied Nutrition
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 3003 Clinical Leadership and Patient Safety (10 Credit Points)
Subject Details (p. 3359) **Legacy Code:** 401097
This subject introduces students to clinical leadership, supervision and patient safety in the context of paramedicine. Students will undertake a 4 week clinical placement block with an emergency ambulance crew, which will in part be used as a basis for reflective learning activities and critical analysis. Students will explore and discuss concepts of clinical leadership and supervision, drawing from their clinical placement experiences. Students will learn about leadership styles, principles of clinical education, mentoring and supervision in the field, clinical governance and patient safety.
Level: Undergraduate Level 3 subject
Pre-requisite(s): HLTH 3014
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 3004 Emergency Care for Special Populations (10 Credit Points)
Subject Details (p. 3360) **Legacy Code:** 401070
This subject explores the issues in caring for special populations in the emergency situation - multicultural and Indigenous settings, the elderly, people with disabilities and people experiencing mental illness. Current trends underlying policies and services and determinants of wellbeing in these contexts are discussed. Particular attention is given to issues, principles and practices relating to ageing, and to the assessment, treatment, rehabilitation strategies and crisis counselling for people experiencing mental illness.
Level: Undergraduate Level 3 subject
Pre-requisite(s): HLTH 3014
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 3005 Evidence-Based Practice (10 Credit Points)
Subject Details (p. 3360) **Legacy Code:** 400865
In this subject, students incorporate previous research and biostatistics knowledge to develop new skills for using evidence to inform all aspects of their professional practice. Evidence-based practice uses an enquiry led approach to manage expanding and uncertain knowledge by formulating answerable questions, effectively searching literature, critically appraising evidence validity and results, and to assess its significance in clinical practice and healthcare decision-making. Students will incorporate evidence in communication and shared decision making processes for patient scenarios relevant to their program.
Level: Undergraduate Level 3 subject
Pre-requisite(s): Students need to have done HLTH2024 Research Methods in Health PLUS ONE clinical subject from their specific program This will be one of four possible subjects
Students enrolled in Program Code 4661 (Continuing) or 4708 (Current) must have completed REHA 2007
Students enrolled in Program Code 4663 (Continuing) or 4711 (Current) must have completed REHA 2004
Students enrolled in Program Code 4662 (Continuing) or 4706 (Current) must have completed REHA 3003 AND
REHA 3049 - Speech Pathology Practice 3 for students enrolled in 4763 - Bachelor of Speech Pathology (First clinical practice subject)
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 3007 Global Nutrition, Food and Community (10 Credit Points)
Subject Details (p. 3361) **Legacy Code:** 300917
This subject aims to develop an understanding of the inter relationship between nutrition and health in Australian and Global contexts. The aim is to provide the student with a sound foundation in nutritional anthropology, public health nutrition and health promotion in order that they can systematically analyse nutritional problems associated with world food issues; including those affecting minority and culturally and linguistically diverse groups within Australia; diseases of affluence and current health and nutrition issues in the community. An important objective of the subject is that students learn the principles of health promotion and how to apply effective nutrition promotion strategies in community and population settings in order to reduce the burdens of various nutritional and lifestyle related disorders and diseases like: obesity, some cancers, diabetes and cardiovascular disease and malnourishment.
Level: Undergraduate Level 3 subject
Pre-requisite(s): HLTH 2012
Equivalent Subjects: HLTH 3010 - Nutrition and Community Health
HLTH 3006 - Global Nutrition Food and Community
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 3008 Gymnastics and Dance (10 Credit Points)
Subject Details (p. 3362) **Legacy Code:** 400896
Students actively engage in a variety of gymnastics activities to develop skill competencies on vault, bars, beam, and floor. Students will also learn about a variety of dance styles and apply movement composition principles. Students will consider safety principles and learn teaching strategies that will enable them to teach gymnastics and dance accurately and safely in line with the Health and Physical Education curriculum. Students will also design their own original teaching and learning ideas that are active, enjoyable, and educational, to ensure they can implement quality gymnastics and dance learning experiences in PE.
Level: Undergraduate Level 3 subject
Incompatible Subjects: LGYA 0700 - Human Movement 5 PERF 3008 - Introduction to Dance
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 3009 Major Incident Management (10 Credit Points)
Subject Details (p. 3363) **Legacy Code:** 401075
This subject examines the tactical and strategic issues facing a health response team in a major incident. Students will practice team responses to critical incidents and evaluate the effectiveness of different approaches to response and recovery.
Level: Undergraduate Level 3 subject
Pre-requisite(s): HLTH 3014
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 3011 Obstetrics and Paediatrics (10 Credit Points)
Subject Details (p. 3363) **Legacy Code:** 401072
The aim of this subject is to prepare the student for out-of-hospital care and management of obstetric, neo-natal and paediatric emergencies. It focuses on understanding human birth and development, normal and complicated delivery and the changes that occur in the pregnant woman. Developmental changes throughout childhood and the skills required to manage a broad range of clinical paediatric emergencies are explored.
Level: Undergraduate Level 3 subject
Pre-requisite(s): HLTH 2018 AND
HLTH 2015
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 3012 Out-of-hospital Medical Care 2 (10 Credit Points)
Subject Details (p. 3364) **Legacy Code:** 401096
The aim of this subject is to extend the foundational knowledge relating to the assessment and management of medical presentations across the spectrum of acuity, including, gastrointestinal, renal, genitourinary, gynaecological and endocrine medical emergencies, sepsis, ear/nose/throat presentations and complex co-morbid conditions. The unit combines pathophysiological principles with development of skills in the use and interpretation of diagnostic technology with clinical decision-making to implement advanced life support. Students will investigate fundamental elements of paramedic practice relating to medicolegal documentation, risk assessment and clinical reasoning relating to determination of patient disposition.
Level: Undergraduate Level 3 subject
Pre-requisite(s): NATS 1009 AND
NATS 1010 AND
HLTH 2015
Co-requisite(s): HLTH 3014
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 3014 Paramedic Practice 4 (10 Credit Points)
Subject Details (p. 3365) **Legacy Code:** 401069
This subject focuses on the core competencies for paramedic practice in real world situations. Students will review high fidelity simulation scenarios to facilitate simulation debrief sessions exploring scene management, interpersonal communication, decision making, inter-professional cooperation and clinical management, Students will then consolidate and extend these skills through supervised clinical placements with an emergency ambulance crew over a period of 5 weeks. Experiences and exposure gained during the placement will form the basis for analysis of case studies and reflective learning.
Level: Undergraduate Level 3 subject
Pre-requisite(s): HLTH 2018
Co-requisite(s): HLTH 3012
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 3015 Resistance Training and Physiology (10 Credit Points)
Subject Details (p. 3366) **Legacy Code:** 400890
In 2016, this subject is replaced by 401148 - Strength and Conditioning. Resistance Training and Physiology presents the growing body of research evidence supporting specific methods of resistance exercise and training, as well as the role of resistance exercise in disease prevention and health promotion. Students gain an increased understanding of the energetics and physiology of resistance exercise by also completing laboratories focussed on the research of important applied concepts in resistance exercise and training. Students also experience resistance training.
Level: Undergraduate Level 3 subject
Pre-requisite(s): HLTH 2004 AND
BIOS 2037 AND
BIOS 3003
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 3016 Strength and Conditioning (10 Credit Points)
Subject Details (p. 3367) **Legacy Code:** 401148
Strength and Conditioning presents the growing body of research evidence supporting specific methods of resistance exercise and training, as well as the role of resistance exercise in disease prevention and health promotion. Students gain an understanding of the energetics and physiology of resistance exercise by also completing and experiencing laboratories focussed on the important applied concepts in resistance exercise and training.
Level: Undergraduate Level 3 subject
Pre-requisite(s): HLTH 2003 AND
BIOS 2012 AND
SPRT 2002
Equivalent Subjects: HLTH 3015 - Resistance Training and Physiology
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 3017 Traumatic and Environmental Emergencies (10 Credit Points)
Subject Details (p. 3368) **Legacy Code:** 401071
This subject deals with pathophysiology and pathogenesis of traumatic injuries and environmental emergencies as well as safe and effective out-of-hospital management of these patients. Best patient outcomes are achieved when out-of-hospital care forms part of a trauma system. Paramedics are required to make decisions to achieve the provision of the right care and transfer to the right hospital in the right time. This applies to both, the single-patient incident and the mass casualty situation. This subject aims to develop the knowledge and skills to safely and effectively manage the patient(s) suffering traumatic injury or an environmental emergency. Furthermore, the subject aims to prepare the paramedic student to be part of a major incident response.
Level: Undergraduate Level 3 subject
Pre-requisite(s): HLTH 3014
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 3018 Ethical and Legal Issues in Health Care (10 Credit Points)
Subject Details (p. 3369) **Legacy Code:** 401408
From 2020 this subject replaces 400249 - Ethical and Legal Issues in Health Care. This subject enables students to explore and develop an understanding of the ethical and legal issues important within contemporary health care. Through the use of case studies students will analyse profound ethical and legal challenges facing current health care that are equally important to health professionals, patients/clients and society generally. Critical thinking about these issues will be encouraged. Students will also be encouraged to consider differing theoretical perspectives in their examination of ethical issues. Additionally, students studying to work within health care, including complementary medicine, will develop a comprehensive understanding of the requirements for ensuring that their practice conforms to legal doctrines and ethical standards.
Level: Undergraduate Level 3 subject
Equivalent Subjects: JUST 3005 - Ethical and Legal Issues in Health Care
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 3019 Nutrition, Health and Disease (10 Credit Points)
Subject Details (p. 3371) **Legacy Code:** 301457
In this subject you will explore the basic concepts of human nutrition in relation to various stages of the lifespan from infants to late adulthood. It also explores nutrition in relation to chronic health conditions such as obesity, cardiovascular disease and eating disorders. You will learn about the development of the Australian Dietary Guidelines and Nutrient Reference Values. You will also learn to make informed decisions with regard to nutritionally critical moments of the life span, emerging nutrition opinions or contemporary uses of nutrition in physical activity, sports and chronic health conditions.
Level: Undergraduate Level 3 subject
Equivalent Subjects: HLTH 2014 - Nutrition and Health 2 HLTH 2013 - Nutrition and Health 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 3020 Global Nutrition and Food (10 Credit Points)
Subject Details (p. 3372) **Legacy Code:** 301458
This subject aims to develop an understanding of the inter relationship between nutrition and health in Australian and Global contexts. The aim is to provide you with a sound foundation in nutritional anthropology, public health nutrition and health promotion in order that they can systematically analyse nutritional problems associated with world food issues; including those affecting minority and culturally and linguistically diverse groups within Australia; diseases of affluence and current health and nutrition issues in the community. An important objective of the subject is that you will learn the principles of health promotion and how to apply effective nutrition promotion strategies in community and population settings in order to reduce the burdens of various nutritional and lifestyle related disorders and diseases like: obesity, some cancers, diabetes and cardiovascular disease and malnourishment.
Level: Undergraduate Level 3 subject
Equivalent Subjects: HLTH 3007 Global Nutrition Food and Community HLTH 3006 Global Nutrition Food and Community HLTH 3010 Nutrition and Community Health
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 3021 Obstetrics and Gynaecology (10 Credit Points)
Subject Details (p. 3373)
The aim of this subject is to prepare the student for out-of-hospital care of gynaecological, obstetric, and neonatal patient presentations. It focuses on understanding the theoretical and practical requirements to assess and manage female patients throughout the lifespan including management of the foetus and neonate.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 3022 Paramedicine Leadership (10 Credit Points)
Subject Details (p. 3373)
This subject introduces students to Paramedicine leadership in the context of an emerging profession. Students will undertake a 4-week clinical placement block with an emergency ambulance crew, which will, in part, be used as a basis for reflective learning activities and critical analysis. Students will explore and discuss concepts of organisational and clinical leadership and supervision, drawing from their clinical placement and other experiences. Students will learn about leadership styles, principles of clinical education, mentoring and supervision strategy, as well as risk assessment, mass casualty and organisational behaviour. Staff wellness, organisational efficiency and sustainable practices will be common goals to aspire to. This ground-up leadership is intended to contribute to organisational success and mitigates the risk of victimology among new entrants to the field.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 3023 Integrated Paramedicine (10 Credit Points)
Subject Details (p. 3373)
In this capstone subject students will extend their learning to include knowledge production and translation to practice. Students will investigate clinical questions through engagement in collaborative processes such as peer to peer teaching and critical observation. Students will develop the capacity to analyse practice and provide constructive feedback to improve clinical quality and enable translation and dissemination of knowledge into practice.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 3024 Safety and Quality in Paramedicine (10 Credit Points)
Subject Details (p. 3373)
This subject develops core competencies for paramedic practice in real-world situations by facilitation of an emergency ambulance placement. This unit introduces students to patient safety and quality in paramedicine. Students are taught about the principles of patient safety and how these are applied in the out-of-hospital setting and paramedicine context. Besides ensuring patient safety, healthcare organisations need to monitor, analyse, and improve the care they provide. This unit will teach students about quality in healthcare and more specifically in paramedicine. Students will learn about the science of improvement and how it can be applied to continuously improve the care for patients. The role and responsibilities of the individual frontline paramedic within an organisation's patient safety and quality framework will be explored.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 3025 Paramedicine Trauma Care (10 Credit Points)
Subject Details (p. 3373)
This subject deals with pathophysiology and pathogenesis of traumatic injuries, conditions arising from uncompensated environmental exposures, and toxicological emergencies. Students are taught how to care for these patients in the out-of-hospital setting. Best patient outcomes are achieved when out-of-hospital care forms part of a trauma system. Therefore, paramedics are required to make decisions to achieve the provision of the right care and transfer to the right hospital in the right time. This unit aims to develop the knowledge and skills to safely and effectively care, treat and manage adult and paediatric patients who have sustained traumatic injury or injuries, conditions arising from uncompensated environmental exposures, and toxicological emergencies.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 3026 Movement and Skill Analysis (10 Credit Points)
Subject Details (p. 3374)
This subject examines the scientific basis for movement and sports skill development. An understanding of the principles of movement and motor skill and how they apply to performance is examined through a range of movement tasks required for track and field athletics and some team sports. Laboratory activities will focus upon the basic movement tasks of throwing, jumping, balancing, striking, running and rotary activities. An examination of the instruments used in efficient movement analysis is undertaken.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 4001 Professional Reasoning (10 Credit Points)
Subject Details (p. 3374) **Legacy Code:** 401125
This final year subject focuses on the transition from student to practitioner. The aim of this subject is to provide students with learning opportunities that will consolidate and enhance their competence in professional practice throughout their career. Professional competencies of central concern include advanced professional reasoning skills, evidence based-practice, reflective practice, personal and career management strategies, self-directed and life-long learning. These competencies contribute positively to the effective management of graduates' professional practice in various work contexts, and their future career paths. Acquisition of such skills will allow the graduate to direct and adapt to change in these areas.
Level: Undergraduate Level 4 subject
Incompatible Subjects: HLTH 7013 - Professional Reasoning
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 4002 Evidence-Based Practice (Advanced) (10 Credit Points)
Subject Details (p. 3375) **Legacy Code:** 400944
In this subject, students incorporate previous research and biostatistics knowledge to develop new skills for using evidence to inform all aspects of their professional practice. Evidence-based practice uses an enquiry led approach to manage expanding and uncertain knowledge by formulating answerable questions, effectively searching literature, critically appraising evidence validity and results, and to assess its significance in clinical practice and healthcare decision-making. Students will incorporate evidence in communication and shared decision-making processes for patient scenarios relevant to their program. Students will embark on research training through studying the theory and application of research methods to honours research in their chosen field and practising the skills to analyse evidence in the health sciences.
Level: Undergraduate Level 4 subject
Pre-requisite(s): Students need to have done HLTH2024 Research Methods in Health PLUS students in Occupational Therapy Physiotherapy and Podiatric Medicine must have done ONE clinical subject from their specific program These are outlined below
Students enrolled in Program Code 4663 (Continuing) or 4711 (Current) must have completed REHA 2007
Students enrolled in Program Code 4663 (Continuing) or 4711 (Current) must have completed REHA 2004
Students enrolled in Program Code 4663 (Continuing) or 4711 (Current) must have completed REHA 3004 AND
HLTH 2024 - Research Methods in Health AND
REHA 3049 - Speech Pathology Practice 3 for students enrolled in 4788 - Bachelor of Speech Pathology (Honours)
Incompatible Subjects: HLTH 3005 - Evidence-Based Practice
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 7001 A Global Perspective on Social Determinants of Health (10 Credit Points)
Subject Details (p. 3376) **Legacy Code:** 400841
Evidence is mounting that the health of individuals, groups and whole populations is significantly determined by social factors - the social determinants. The related research has its origins in concern for the growing inequalities in health both within and between countries. This subject examines the framework of the social determinants of health in a global perspective and includes a reflection on the phenomenon of globalisation and its impact, both positive and negative on people's health. Students will critically reflect on this relatively new and emerging body of knowledge and research which clearly situates the maintenance of health and healthy societies within their socioeconomic and socio-cultural contexts. They will also examine implications for policy, health systems and different groups within society.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 7002 Building Organisational Capacity in Health Care (10 Credit Points)
Subject Details (p. 3377) **Legacy Code:** 400846
The concept, form and structure of health care organisations are explored. Organisational theory is used to analyse contemporary health care structures. Factors which influence organisational design, function and effectiveness are discussed including: organisational behaviour, strategy, culture, power and politics, technology, sustainability and effectiveness. A major focus is planning for strategic organisational development to meet the challenges of rapid change and the need for performance improvements in patient care delivery. Concepts related to the strategic development of workforce capacity in the health care arena considered through the application of theories including the learning organisation. Leadership is examined with emphasis on change management.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: PUBH 7017 - Leadership and the Development of Organisational Capacity in Health Care
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 7003 Community and Public Health Nutrition (10 Credit Points)
Subject Details (p. 3378) **Legacy Code:** 301186
This subject examines the principles of public health nutrition and a systems approach, and enables students to use them to identify and analyse nutrition issues and outcomes. Students will learn about the food and nutrition system and its drivers, and examine their impact on current food, nutrition and nutrition-related health issues. They will explore public health nutrition priorities in Australia and 'at risk' groups such as Aboriginal and Torres Strait Islander peoples, culturally and linguistically diverse groups, and other vulnerable groups. They will learn to interrogate nutrition-related policies in relation to public health nutrition priorities and contemporary topics in Australia and similar contexts. Students will learn about the role of advocacy in promoting a sustainable and equitable food supply system, and improving food and nutrition outcomes for populations.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 7004 Dissertation (40 Credit Points)
Subject Details (p. 3379) **Legacy Code:** 401079
This subject requires students to complete a substantial piece of independent research. Dissertations will involve the in-depth examination of a particular topic/question, and should demonstrate evidence of ability to undertake sustained critical analysis. The dissertation provides an opportunity for students to demonstrate that they can consolidate knowledge acquired throughout their course of study, understand how existing evidence/information relates to research topics, and how their own work adds to this body of knowledge. Independent thinking is required, including the ability to critique one's own work and that of others, as well as articulating the implications of their own research and support their findings through their written dissertation. Students will have the opportunity to participate in workshops where they will gain skills in defining a clear research question, preparing a formal research proposal, conducting a literature review, ethics and research, and formal writing at a professional standard. Findings of student work with be presented at an end of semester research seminar. This subject can also be taken over two semesters (see 401282 Dissertation (Part-Time)).
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): For students enrolled in 4702 Master of Public Health or 4698 Master of Health Science courses only
AGEN 7005 Research Protocol Design and Practice
and
HLTH 7008 Introduction to Biostatistics
OR
HLTH 7025 Healthcare Data for Decision making
OR
HLTH 7015 Qualitative Research Methodology in Health
For students enrolled in 3749 Master of Science and 4738 Master of Epidemiology courses only
HLTH 7008 Introduction to Biostatistics
For all students
PUBH 7016 Introduction to Epidemiology
Equivalent Subjects: The two units below are equivalent to each other
HLTH 7004 Dissertation (Full-time)
HLTH 7020 Dissertation (Part-time)
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 7005 Health Financial Management (10 Credit Points)
Subject Details (p. 3381) **Legacy Code:** 400845
This subject provides health leaders with an introduction to financial management in health and aged care settings as a basis for understanding the impact of leadership decision-making on financial outcomes and how financial decision-making impacts on clinical service delivery. Content includes an overview of health economics and economic evaluation, health care funding models, the principles, practices and tools for financial planning and management, basic accounting principles and financial terminology and using financial information and reporting for negotiating financial plans, tracking and evaluating financial performance and using financial information in decision-making within the clinical environment.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 7322 - Health Economics and Comparative Health Systems LGYA 7489 - Resources management in Aged Care
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 7006 Health Services and Facilities Planning (10 Credit Points)
Subject Details (p. 3382) **Legacy Code:** 400844
Planning occurs at all levels within all health organisations, government, non-government and in the private sector. There is a hierarchy in planning health services with some global overarching policy documents, national agreed priorities which affect corporate and regional plans as well as local services and projects. Planning focuses on future directions for health, is value based and resource allocation driven. The process of health planning will be outlined including how to conduct a needs analysis, develop an evidence based approach, consult with stakeholders including the community, document an implementation plan and evaluate outcomes.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: BUSM 7104 - Strategic Analysis and Decision Making
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 7007 Health Workforce Planning (10 Credit Points)
Subject Details (p. 3382) **Legacy Code:** 400843
This is a flexible learning subject looking at Human Resource Management as a strategic activity of health organisations especially as workforce shortages pose significant challenges to the health, welfare and aged care sectors. The workforce, with appropriate knowledge and expertise, is essential to the efficient and effective delivery of quality health services. Successful organisations shape their workforce to anticipate current and future business directions and goals. Workforce planning is a crucial element of this approach and its success.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 8572 - Human Resources Management LGYA 7490 - Workforce Planning and HR Issues in Aged Care LGYA 4898 - Human Resource Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 7008 Introduction to Biostatistics (10 Credit Points)
Subject Details (p. 3383) **Legacy Code:** 401077
Most professions in the health sciences need to read and interpret statistics relating to individual health status, interpret health risks in communities, and engage in the evaluation of interventions, or impact of health policies or programs. Many public health practitioners are actively involved in surveillance, quantitative research and/or evaluation. This subject provides students with the fundamental skills they need to analyse and interpret results from quantitative data collections. Content includes descriptive statistics, undertaking comparisons between groups, quantifying associations between variables, and statistical power. The subject is highly applied with the main focus being on interpretation and appraisal of statistical results and conducting analyses using statistical software.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 7009 Leadership and Change (10 Credit Points)
Subject Details (p. 3384) **Legacy Code:** 400414
Within the context of a society where change is ongoing, leadership is required in order to achieve optimum outcomes. Students in this subject will be encouraged to critically explore leadership styles, leadership and change theories, leadership in learning organisations and the community within a primary health care framework. This subject will enable students to assess both the internal and external environments of organisations, communities and individuals as the need for change is identified, planned and implemented. The subject identifies the central strategies necessary for the development of leaders who are able to achieve sustainable change outcomes.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYC 0566 - Processes of Change
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 7010 Nutrition Promotion (10 Credit Points)
Subject Details (p. 3385) **Legacy Code:** 301185
This subject aims to introduce students to the principles and practices of nutrition and health promotion, for use in primary and secondary prevention. Students will learn and critically appraise all aspects of the program planning cycle, from needs assessment to evaluation. Students will develop their capabilities to design initiatives that are responsive to, and contribute to, the community and public health nutrition evidence base. Students will acquire knowledge related to communication, food and social marketing, nutrition education, and nutrition and behaviour change theories; and learn how to translate this into effective nutrition promotion initiatives that aim to influence food choice, intake, supply and/or access. Lastly, students will learn to work in, and/or manage, multi-disciplinary teams and work with key stakeholders. Negotiation and influencing skills, together with capacity building skills, to guide and upskill individuals and groups, will be developed for the purpose of improving the nutritional status of groups.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 7011 Nutritional Assessment Methods (10 Credit Points)
Subject Details (p. 3386) **Legacy Code:** 301184
This subject aims to introduce students to methodologies that incorporate anthropometric, biochemical, clinical, dietary and physical activity assessment to assess the nutritional status of individuals and groups. Students will critically explore the strengths and limitations of various methods. Students will also learn to make professional judgement regarding when and how to use methods, including validating nutritional status assessment methods to achieve valid and reliable nutritional assessment outcomes.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 7013 Professional Reasoning (10 Credit Points)
Subject Details (p. 3387) **Legacy Code:** 400925
This final year subject focuses on the transition from student to practitioner. The aim of this subject is to provide students with learning opportunities that will consolidate and enhance their competence in professional practice throughout their career. Professional competencies of central concern include advanced clinical reasoning skills, evidence based-practice, reflective practice, personal and career management strategies, self-directed and life long learning. These competencies contribute positively to the effective management of graduates clinical practice in various work contexts, and their future career paths. Acquisition of such skills will allow the graduate to direct and adapt to change in these areas.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): REHA 7011 OR
REHA 7013
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 7014 Professional Topic (10 Credit Points)
Subject Details (p. 3387) **Legacy Code:** 400850
This subject is designed to allow high achieving students to comprehensively explore a relevant topic of interest to them, either through a minor supervised research project or industry-based project. This unit's flexible delivery offers a unique experience specific to each project and student. Students in this subject will develop extensive skills through project-based learning essential for employment and/or higher degree studies.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 7015 Qualitative Research Methodology in Health (10 Credit Points)
Subject Details (p. 3388) **Legacy Code:** 401238
This subject prepares students to conduct qualitative research. The subject covers ontologies, epistemologies, methodologies, and research methods, particularly those that involve the collection, management and analysis of qualitative data, and how findings are communicated. It also addresses the ethics of research.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 7016 Quality and Safety in Health Care (10 Credit Points)
Subject Details (p. 3389) **Legacy Code:** 400842
Health care managers and clinicians are responsible for the quality and safety of patient care within their subjects. To introduce a culture of safety they must understand and work within current policy, surveillance and governance strategies. In this subject students will study the cultural and governance environments within which quality and safety systems are introduced in health care. Students will also develop skills required to effectively use the tools available for managing and monitoring quality and safety issues within their workplace.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: PUBH 7018 - Leadership in Quality and Safety in Health Care
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 7020 Dissertation (Part Time) (20 Credit Points)
Subject Details (p. 3389) **Legacy Code:** 401282
This is a 40 credit point year-long subject taken over two terms (20 credit points in each term). This subject requires students to complete a substantial piece of independent research. Dissertations will involve the in-depth examination of a particular topic/question, and should demonstrate evidence of ability to undertake sustained critical analysis. The dissertation provides an opportunity for students to demonstrate that they can consolidate knowledge acquired throughout their program of study and understand how existing evidence/information relates to research topics, and how their own work adds to this body of knowledge. Independent thinking is required, including the ability to critique one's own work and that of others, as well as articulating the implications of their own research and support their findings through their written dissertation. Students will have the opportunity to participate in workshops where they will gain skills in defining a clear research question, preparing a formal research proposal, conducting a literature review, ethics and research, and formal writing at a professional standard. Findings of student work with be presented at an end of semester research seminar. This subject can also be taken over one semester (see HLTH 7004 Dissertation (Full Time)).
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): For students enrolled in the 4702 Master of Public Health or 4698 Master of Health Science courses only
AGEN 7005 Research Protocol Design and Practice
and
HLTH 7008 Introduction to Biostatistics
OR
HLTH 7025 Healthcare Data for Decision making
OR
HLTH 7015 Qualitative Research Methodology in Health
For students enrolled in 3749 Master of Science and 4738 Master of Epidemiology courses only
HLTH 7008 Introduction to Biostatistics
For all students
PUBH 7016 Introduction to Epidemiology
Equivalent Subjects: The two units below are equivalent to each other
HLTH 7004 Dissertation (Full-time)
HLTH 7020 Dissertation (Part-time)
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 7022 Advanced Health Service Management (10 Credit Points)
Subject Details (p. 3391) **Legacy Code:** 401361
This subject focuses on the principles and practice of health service management. The subject draws on material from different settings to consider governance, policy, and strategic planning. Students will critique health system reforms, including those that aim to address healthcare inequity. The role of politics and policy will be discussed to clarify the impact on health service management. The subject will explore how health service operations are managed and how performance and outcomes are measured. Students will also explore how patients, carers, and other stakeholders shape health service management.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): PUBH 7031
Equivalent Subjects: HLTH 7007 Health Workforce Planning
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 7023 Advanced Sport and Exercise Science (20 Credit Points)
Subject Details (p. 3392) **Legacy Code:** 401414
Please note, subject 401291.1 Advanced Sport and Exercise Science replaced by 401414.1 Advanced Sport and Exercise Science from 2020.This subject provides Bachelor of Research Studies/Masters of Research candidates with an interest in Sport & Exercise Science with an opportunity to further their knowledge and skill-sets in the field. Working closely with their assigned supervisor(s), students will prepare a work-plan to further enhance their theoretical knowledge through a combination of independent and guided-study. The subject will provide students with an opportunity to strengthen their knowledge and expertise in their selected field of Sport & Exercise Science. The subject is focused on the development of discipline-specific knowledge (theoretical and practical) to prepare students for their research thesis and future career in a Sport & Exercise Science related field.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 7024 Health Services Financing (10 Credit Points)
Subject Details (p. 3393) **Legacy Code:** 401362
This subject provides health leaders with an introduction to financial management in both public and private sector health services.
The learning from this subject forms a basis for understanding the impact of leadership decision-making on financial outcomes and how financial decision-making impacts on clinical service delivery. The development of different approaches to funding to address issues of effectiveness, efficiency and acceptability (including equity) are examined. Pressures for reform are linked to developments at various levels of management and organisation type to enable analysis of potential impacts on clinical delivery. Students will critically analyse the relationship between performance and principles of governance, focusing on developing an improvement in the quality of service delivery. Reflective practice will be used to facilitate the application of resource management and clinical governance to a self-identified workplace issue warranting a clinical governance business case.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): PUBH 7031
Equivalent Subjects: HLTH 7005 Health Financial Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 7025 Healthcare Data for Decision-Making (10 Credit Points)
Subject Details (p. 3394) **Legacy Code:** 401365
Most professions in the health sciences need to read and interpret data relating to individual health status, interpret health risks in communities, and engage in the evaluation of interventions, or impact of health policies or programs. Many public health practitioners are actively involved in surveillance, quantitative research and/or evaluation. This subject provides an opportunity to learn about making health service decisions using appropriate data. Students learn how to explore and use data that are assembled to replicate real patient data to both generate and answer questions. The focus may be managerial or clinical, or an integration of these. Students analyse the assembled patient dataset to generate and interpret health statistics, and translate them into health information and knowledge for decision-making. Students completing this subject develop the ability to explore health data and provide recommendations based on the findings.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 7026 Professional Internship in Health (40 Credit Points)
Subject Details (p. 3396) **Legacy Code:** 401368
This subject provides students with the opportunity to translate the content of the postgraduate program to the context of the workplace through an integrated workplace internship. This experience will allow the student to develop the necessary skills and competencies expected of high performing health professionals. The Internship enables a focused opportunity to work in contemporary healthcare settings with leaders and managers from a variety of professions. Students will also engage in coursework with a focus on creating an portfolio that revisits all content learned throughout their courses to critically assess their learning journey and learning outcomes. This process will teach students how to systematically self-reflect in deep and transformative ways, engaging with theory and knowledge acquired and developed through their studies to design and create a portfolio of their skills and competencies through a social capital framework. The subject will culminate in a presentation of the results of their internship project in a research and practice seminar.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 7027 Professional Project in Health 1 (20 Credit Points)
Subject Details (p. 3397) **Legacy Code:** 401369
Health professionals, particularly those at managerial positions, are frequently tasked with solving very complex problems in their practice. Some of these problems are so complex that they can be called 'wicked' problems, or problems that are highly resistant to resolution. This subject uses project-based learning to provide students with the opportunity to work collaboratively and inter-disciplinarily to solve an industry-driven 'wicked' problem, using systematic and evidence-based techniques to do so. Students will be challenged to think broadly to take into account the interrelationships among a full range of causal factors underlying the 'wicked' problem at hand, and will be required to use more collaborative and innovative approaches to solve industry challenges. Students will be exposed to a range of industry representatives who will pose the difficult, 'wicked' problems to them and who will return to assess the proposed solutions.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 7028 Professional Project in Health 2 (20 Credit Points)
Subject Details (p. 3398) **Legacy Code:** 401370
This capstone subject intends to develop students' work-readiness. Health professionals are recurrently asked to engage in reflective practice as a way to improve clinical and non-clinical reasoning. The ability to reflect on action and in action allows health professionals not only to improve their practice but also to more clearly articulate their strengths and weaknesses to potential employers. In this subject, students will focus on creating an portfolio that will require revisiting all content learned throughout their courses to critically assess their learning journey and learning outcomes. It will teach students how to systematically self-reflect in deep and transformative ways, engaging with theory and knowledge acquired and developed through their studies to design and create a portfolio of their skills and competencies through a social capital framework.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: HLTH 7026 Professional Internship in Health
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 7029 Quality and Safety (10 Credit Points)
Subject Details (p. 3399) **Legacy Code:** 401371
This subject provides an overview of emerging health policy with particular attention to quality and safety. Students develop a critical view on the organisation of healthcare, measurement and delivery of outcomes from the patient and population perspective as well as organisational accountability for quality and safety. The course consists of three components. The first component targets the main constituents of clinical governance, including practice design, analysis and improvement, error reporting and investigation, public accountability and open disclosure, multi-disciplinary teamwork and clinical leadership. The second component introduces the tools of clinical process redesign which help managers make practical improvements to practices in their subjects. The third component targets risk management by providing an overview of the kinds of risks faced by health service managers by outlining perceptions of risk such as adverse effect versus opportunity capital.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: HLTH 7012 - Organisational Governance and Performance Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 7030 Professional Internship in Health (Part-time) (20 Credit Points)
Subject Details (p. 3401) **Legacy Code:** 401435
This is a 40 credit point year-long subject taken over two terms (20 credit points in each term). This subject provides students with the opportunity to translate the content of the postgraduate program to the context of the workplace through an integrated workplace internship. This experience will allow the student to develop the necessary skills and competencies expected of high performing health professionals. The Internship enables a focused opportunity to work in contemporary healthcare settings with leaders and managers from a variety of professions. Students will also engage in coursework with a focus on creating a portfolio that revisits all content learned throughout their programs to critically assess their learning journey and learning outcomes. This process will teach students how to systematically self-reflect in deep and transformative ways, engaging with theory and knowledge acquired and developed through their studies to design and create a portfolio of their skills and competencies through a social capital framework. The subject will culminate in a presentation of the results of their internship project. This subject can also be taken over one semester (see HLTH 7026 Professional Internship in Health (Full Time).
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 9001 Higher Degree Research Thesis - Health (10,20 Credit Points)
Subject Details (p. 3402) **Legacy Code:** 800204
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 9002 Higher Degree Research Thesis - Health (10,20 Credit Points)
Subject Details (p. 3405) **Legacy Code:** 800133

Other information Technology (INFO)

INFO 0001 Academic Skills for Information Communications Technology (WSTC Prep) (10 Credit Points)
Subject Details (p. 3643) **Legacy Code:** 700205
This subject is designed to assist students to become successful independent reflective learners. It introduces students to a range of theories and concepts to facilitate the development of practical skills and personal attitudes necessary for success in tertiary study. Emphasis is placed on developing the key competencies of scientific inquiry - collecting, analysing, organising and communicating information as well as solving problems, particularly when related to using mathematical ideas and techniques.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 0002 Academic Skills for Information Communications Technology (WSTC) (10 Credit Points)
Subject Details (p. 3644) **Legacy Code:** 900100
This subject is designed to assist students to become successful independent reflective learners. It introduces students to a range of theories and concepts to facilitate the development of practical skills and personal attitudes necessary for success in tertiary study. Emphasis is placed on developing the key competencies required to be successful in an Information Communications Tschnology course-research, analysis, problem solving, communication and team work.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: INFO 0001 - Academic Skills for ICT (UWSCFS)
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 0003 Advanced Computer Studies (WSTC Prep) (10 Credit Points)
Subject Details (p. 3645) **Legacy Code:** 700259
This subject has been developed to enhance a student's problem solving skills in the context of software development. Students are introduced to more advanced material in computer studies, including advanced features of Microsoft Access, web page development using HTML and CSS, the fundamentals of Systems Analysis and Design, programming and object-oriented analysis.
Level: Undergraduate Level 0 Preparatory subject
Pre-requisite(s): INFO 0008
Equivalent Subjects: INFO 0004 - Advanced Computer Studies (UWSC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 0004 Advanced Computer Studies (WSTC) (10 Credit Points)
Subject Details (p. 3645) **Legacy Code:** 900076
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 0005 Computer Competency (WSTC) (5 Credit Points)
Subject Details (p. 3646) **Legacy Code:** 900027
Computer Competency aims to provide students with the computing skills necessary to research information on the Internet and produce documents and presentations at a level suitable for their academic studies.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 0006 Computer Fundamentals (WSTC Prep) (10 Credit Points)
Subject Details (p. 3646) **Legacy Code:** 700277
The Computer Fundamentals subject aims to develop a solid theoretical foundation to help students prepare for further study in Information and Communications Technology while developing/enhancing students' practical skills in Business Processing Applications. Topics in the subject include the underpinning concepts of Information Technology, Software and Hardware, Computer Networking, Internet, Security of Information Systems, Privacy and Ethics, Use of MS Office applications and HTML.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 0007 Computer Literacy (WSTC) (5 Credit Points)
Subject Details (p. 3647) **Legacy Code:** 900051
This subject is intended to familiarise the University Foundation Studies students with the basic functions of computers and the skills necessary to use the common applications such as Microsoft Word, Microsoft PowerPoint and the Internet. These skills are introduced to students through structured activities that will assist students to complete the research and document preparation requirements of their other subjects.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 0008 Computer Studies (WSTC Prep) (10 Credit Points)
Subject Details (p. 3647) **Legacy Code:** 700201
This subject introduces and develops basic competencies in using computers and application software for the Building Design Management and Construction Management industries. The ability to use computers and application software for creating word-processed documents, spreadsheets, as well as understanding the processes involved with creating and analysing designs and managing projects has become an integral part of the required skill set for these industries. This subject has been developed to enhance students' practical ability as well as build a theoretical foundation for further study.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: INFO 0009 - Computer Studies (UWSC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 0009 Computer Studies (WSTC) (10 Credit Points)
Subject Details (p. 3648) **Legacy Code:** 900028
Computer Studies introduces to the students the new age of information, where computers and communication play an integral part in our lives. The course has been developed to enhance a student's practical ability as well as build a solid theoretical foundation for further study.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 0010 Information Technology in Business (WSTC Prep) (10 Credit Points)
Subject Details (p. 3649) **Legacy Code:** 700278
This subject introduces basic business concepts and how Information Systems can be used in Business. It also deals with Systems Analysis and Design, and Database Design and Development concepts. These concepts are introduced using a variety of case studies to provide authentic learning opportunities.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 1001 Introduction to Information Technology (10 Credit Points)
Subject Details (p. 3649) **Legacy Code:** 300134
This introductory subject gives students an insight into the history, structure, operations and uses of computers, and their impact on society. This will be complemented by hands-on use of computers and popular application software packages in a graphical user interface environment. Students gain a basic understanding of the uses of computers, and the skills necessary to use popular applications software, including word processing, spreadsheet and database packages, and Internet tools and services.
Level: Undergraduate Level 1 subject
Equivalent Subjects: LGYB 4133 - Introduction to Computers LGYB 9621 - Computer Fundamentals LGYA 9786 - Information Technology
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 1002 PC Workshop (10 Credit Points)
Subject Details (p. 3651) **Legacy Code:** 300150
This subject introduces students to the hardware and software components of a stand-alone personal computer (PC). Students become familiar with the CPU, memory, secondary storage, IO peripherals and communications devices commonly found in a PC. They learn to assemble and disassemble a PC and to install hardware and software components according to supplier specifications. Students also learn to use and customise the PC operating system to maintain and optimise PC performance.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 1003 Professional Practice, Communication and Ethics (10 Credit Points)
Subject Details (p. 3652)
Working in ICT business environments requires awareness of how individuals can collaborate to achieve project goals in an ethical and professional way. This subject introduces students to concepts of professional behaviour, including ethics and professional conduct and associated industry behavioural codes, as well as legal aspects related to ICT. Students learn about various types of written and oral communication, professional behaviour when working in teams, and personal project management. In addition, the subject also introduces students to academic integrity and how to practice this during their degree. Students with professional practice skills combined with technical abilities are in high demand.
Level: Undergraduate Level 1 subject
Equivalent Subjects: COMM 1026 Principles of Professional Communication 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 1004 Data Analysis and Storytelling (10 Credit Points)
Subject Details (p. 3653)
This subject will introduce students to the fundamentals of data analysis and data storytelling skills for the communication industries. Students will gain practical experience finding data sets, cleaning and analysing data, developing insights and communicating findings in visual, oral and written formats for various audiences in contexts including advertising, journalism and public relations. Students will use industry standard analysis and visualisation tools to effectively answer research problems and communicate the impact of data, ethically and mindfully. Skills learned are transferable, for example, to audience analysis, market research, product development and other research contexts.This subject will introduce students to the fundamentals of data analysis and data storytelling skills for the communication industries. Equivalent Subjects: DESN 1018 - Visual Storytelling and DESN 1019 - Visual Storytelling (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 2002 Tangible Interaction Design (10 Credit Points)
Subject Details (p. 3654) **Legacy Code:** 301088
This subject will provide students with the capacity to create interactive products that can sense environmental stimuli and exhibit an appropriate yet intelligent response. Students will be expected to write script based programs to control hardware circuits connecting various Input/Output peripherals (sensors, actuators). The range of interactive products studied and built by the students will be diverse; ranging from household everyday products to artifacts that can be used in public spaces.
Level: Undergraduate Level 2 subject
Pre-requisite(s): INFO 3003
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 2003 Technologies for Mobile Applications (10 Credit Points)
Subject Details (p. 3655) **Legacy Code:** 300976
This subject introduces students to the technologies used to develop and deploy mobile applications. The subject covers evaluating organisational needs in the mobile space, responsive web design, web technologies, interface challenges, location awareness, cloud services and data storage.
Level: Undergraduate Level 2 subject
Pre-requisite(s): COMP 1005
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 2004 Cyber Crime and Social Engineering (10 Credit Points)
Subject Details (p. 3655) **Legacy Code:** 102700
This subject focuses on both the theory and application of cyber crime and cybersecurity. More specifically, it focuses on the intersection between human behaviour, cyber crime, and cyber security with topics ranging from social engineering to organisational security infrastructure. It asks - What outcomes do cyber criminals seek? How can you protect yourself and your business from cyber crime? What methods do cyber criminals typically use to gain their desired outcomes? In this subject, cyber crime and cyber security is covered from both a theory-based and applied understanding of how to reduce the likelihood of or harm caused by cyber crime.
Level: Undergraduate Level 2 subject
Pre-requisite(s): INFS 1002
Equivalent Subjects: INFO 2001 Cyber Crime and Cyber Safety
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 2005 Cyber Security and Behaviour Research Project (20 Credit Points)
Subject Details (p. 3656) **Legacy Code:** 102704
This is a 40 credit point year-long subject taken over two terms (20 credit points in each term). This subject comprises the research pathway of the Bachelor of Cyber Security and Behaviour. Students will undertake a major research project in the field of behavioural cyber security. The specifics of the project will be coordinated between the student and the research supervisor at Western, which is undertaken over two semesters. Students should firstly discuss their proposed research project with the research supervisor, as it may require prior approval by the University's Ethics Committee depending on the research topic chosen. In the first semester, students plan their research, complete a literature review and propose the project plan to a panel of experts. By the end of the second semester students will have completed their thesis by research and will defend that thesis to a panel of experts. As such, students will have contributed to research in the field of cyber security and behaviour which prepares them for further studies towards a Masters or PhD qualification.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 2006 Usable Security (10 Credit Points)
Subject Details (p. 3657) **Legacy Code:** 102757
This subject will cover the human factors of security and privacy, as well as address emerging issues, challenges and regulations which underpin the need for usable security and privacy. After introducing the fundamental principles of security and privacy, these will be explored while considering how these principles shape the experience of users who are interacting with the designed product. Humans are an essential part of security and privacy, and they also inherently pose significant challenges. Students will be introduced to some of the fundamental security and privacy standards and regulations. They will learn about cognitive and perceptual approaches to usable security as well as how to create systems that are usable and trusted alongside fulfilling the requirements of remaining secure and private. Research topics such as how to design user studies to critically evaluate security, privacy, trust and usability interfaces will be addressed to provide students with an informed view on emerging best practices.
Level: Undergraduate Level 2 subject
Pre-requisite(s): BEHV 1025 AND
COMP 1005
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 2007 Cyber Crime and Social Engineering (Block) (10 Credit Points)
Subject Details (p. 3658) **Legacy Code:** 500075
This subject focuses on both the theory and application of cyber crime and cybersecurity. More specifically, it focuses on the intersection between human behaviour, cyber crime, and cyber security with topics ranging from social engineering to organisational security infrastructure. It asks - What outcomes do cyber criminals seek? How can you protect yourself and your business from cyber crime? What methods do cyber criminals typically use to gain their desired outcomes? In this subject, cyber crime and cyber security is covered from both a theory-based and applied understanding of how to reduce the likelihood of or harm caused by cyber crime.
Level: Undergraduate Level 2 subject
Pre-requisite(s): INFS 1013
Equivalent Subjects: INFO 2001 - Cyber Crime and Cyber Safety
INFO 2004 - Cyber Crime and Social Engineering
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 2008 Cyber Incident Response and Risk Management (10 Credit Points)
Subject Details (p. 3660)
Cyber risk management is the process of identifying, analysing, and evaluating how to handle an organisations' cyber security threats. This subject will introduce the fundamental tenets of risk management, and explore cybersecurity risk management frameworks. Cyber incident response is an organised approach to addressing and managing a major security breach, threat or attack. The goal is to handle the incident in a way that limits damage, reduces recovery time and losses, and take pro-active measures in the follow up and recovery phase to prevent future attacks. Students will explore common cyber attacks requiring incident response such as payment diversion fraud (business email compromise), ransomware, data breach, and advanced persistent threats. They will learn about each of these threats and how to manage such threats through the development of incident response plans including people, process, technology and information. This subject is taught with industry partners through case studies and simulations. Due to the sensitive nature of the subject and the requirement of hands on training, it cannot be taught online and is not on offer to WSU Online students. Online students will take an additional elective.
Level: Undergraduate Level 2 subject
Co-requisite(s): INFO3001 - Computer Security
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 2009 Multiliteracies (10 Credit Points)
Subject Details (p. 3661)
This subject develops students' skills, knowledge and competencies to address a wide range of literacies across multiple technologies, platforms and contexts. In any society there are a range of literacies, and contexts in which those literacies might be deployed. These include the digital, written, visual, aural, spatial, gestural, and tactile dimensions of meaning production. Multiliteracies go beyond the traditional textual models of literacy to describe the rich variety of cognitive and cultural tools we use to make sense of the everyday. Multiliteracy is key to our professional and personal effectiveness, as well as to our functioning as individuals and citizens in a world characterised by increasing dependency on information technologies.
Level: Undergraduate Level 2 subject
Equivalent Subjects: COMM2050 Multiliteracies
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 3001 Computer Security (10 Credit Points)
Subject Details (p. 3662) **Legacy Code:** 300569
This subject aims in particular at, but is not limited to, the implementation and management of security and privacy policies of organisations within the standards and legal framework that is also applicable to the Australian standards.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 3002 Ethical Hacking Principles and Practice (10 Credit Points)
Subject Details (p. 3664) **Legacy Code:** 301124
This subject teaches students ethical hacking principles and skills with the ultimate goal of defence. It covers practical skills in different stages of ethical hacking, including reconnaissance on public information, port and vulnerability scanning, exploitation of vulnerabilities, post exploitation, and writing a comprehensive report to document detected vulnerabilities and proposed solutions. Students will not only practice with major tools in ethical hacking, but also learn the principles of how these tools work and hence how to defend against them.
Level: Undergraduate Level 3 subject
Pre-requisite(s): COMP 2004 OR
COMP 2005 AND
COMP 2020
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 3003 Human-Computer Interaction (10 Credit Points)
Subject Details (p. 3665) **Legacy Code:** 300570
A key component to the discipline of Information Systems is the understanding and the advocacy of the user in the development of IT applications and systems. IT graduates must develop a mind-set that recognizes the importance of users and organisational contexts. They must employ user centered methodologies in the development, evaluation, and deployment of IT applications and systems. This subject examines human-computer interaction in order to develop and evaluate software, websites and information systems that not only look professional but are usable, functional and accessible.
Level: Undergraduate Level 3 subject
Equivalent Subjects: INFS 3015 - Software Interface Design
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 3004 Human-Computer Interaction (Advanced) (10 Credit Points)
Subject Details (p. 3667) **Legacy Code:** 300901
IT graduates must be able to develop and evaluate software, websites and mobile apps that not only look professional but are usable, functional and accessible. However, the study of HCI is often restricted to its use as a tool in the software development process. This advanced subject also examines HCI as a field of research and how to conduct research into human user factors. Students in this advanced subject will be required to complete a research project and produce a final research report, which is of a standard capable of being considered for publication in a HCI conference or journal.
Level: Undergraduate Level 3 subject
Incompatible Subjects: INFO 3003 - Human-Computer Interaction INFS 3015 - Software Interface Design
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 3005 I.T. Support Practicum (10 Credit Points)
Subject Details (p. 3668) **Legacy Code:** 300136
This subject provides students real-world experience in the area of Information Technology (IT) support. Students are located with industry partners in the Greater Western Sydney region in IT support positions for 10 hours per week over a 12 week period. In addition, students receive instruction and tuition in aspects of professional practice such as code of ethics.
Level: Undergraduate Level 3 subject
Pre-requisite(s): INFO 1002 AND
COMP 2013 OR
LGYA 6157
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 3006 Information Security (10 Credit Points)
Subject Details (p. 3669) **Legacy Code:** 300128
Information Security is concerned with the protection and privacy of information in computer systems. The focus is primarily on introducing cryptography concept, algorithm and protocol in information security and applying such knowledge in the design and implementation of secure computer and network systems. The subject also addresses conventional and public key encryption, number theory and algebra and their application in public key encryption and signature. Students will learn the application of cryptography algorithm in current computer systems and information security management. This subject also provides students with the practical experience around security programming.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MATH 1006 AND
COMP 2009 OR
COMP 2015 OR
COMP 2016
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 3007 Network Security (10 Credit Points)
Subject Details (p. 3670) **Legacy Code:** 300143
This subject is concerned with the protection of information transferred over computer networks. It includes discussion of techniques for securing data transported over local and wide area networks. At the conclusion of the subject students will have a good understanding of the practical aspects of securing a computer network against internal and external attacks.
Level: Undergraduate Level 3 subject
Pre-requisite(s): COMP 2007 OR
COMP 2004 OR
COMP 2005
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 3008 Professional Development (10 Credit Points)
Subject Details (p. 3671) **Legacy Code:** 300578
This is a final year subject that builds on foundation and intermediate computing subjects to prepare students for professional experience. The subject covers the content in three modules as 1) Ethics and Professional Code of Conduct, 2) Project Management, and 3) Legal, Social, Environmental issues, Quality Assurance and IT Compliance. The content covered in these three modules are carefully designed to fill in the gaps in knowledge that is not so far covered in previous subjects in preparing students for the challenging projects subjects and professional working life ahead. This subject is a pre-requisite to the capstone project, covered in Professional Experience Project subject.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 5983 - Professional Preparation and Project Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 3011 Social Computing (10 Credit Points)
Subject Details (p. 3673) **Legacy Code:** 300961
Rapid growth of computational devices connected to the internet such as mobile phones, tablets, personal computers have made us into a digitally connected society. This has enabled us to develop a new computing paradigm: Social Computing to enhance ways we can fulfil a range of primary and secondary human needs. Already many new businesses have evolved making use of these possibilities surpassing the number of users in corresponding conventional businesses such as retail, transportation and hotel chains. In this subject you will learn the fundamental concepts of Social Computing, how Social Computing is evolving, explore interaction models of social networks, analyse a few reported cases that relate to social computing in detail to understand the impact on society and businesses, and explore ways to enhance a range of livelihood activities and future possibilities. This subject will also cover underpinning technologies related to social computing such as Web 2.0, knowledge management and related security and privacy issues.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 3012 Cyber Security and Behaviour Placement 1 (20 Credit Points)
Subject Details (p. 3674) **Legacy Code:** 102702
In 2022, this subject replaced by subject 102904 - Cyber Security and Behaviour Industry Placement. This subject is the initial placement for the work integrated learning embedded in the Bachelor of Cyber Security and Behaviour degree. There are three options: 1. WSU-brokered industry placement on a competitive basis; 2. an approved placement at the student's place of work, or via the student's networks and contacts; 3. an industry project report based on industry-generated case studies and problems. In addition, workshops will be conducted throughout the semester to aid in your learning and to support your professional development during this placement or project. Contact the subject coordinator well in advance to elect your own industry placement (such as your current employer). Only options 2 and 3 are available to WSU Online students.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 3013 Cyber Security and Behaviour Placement 2 (20 Credit Points)
Subject Details (p. 3675) **Legacy Code:** 102703
In 2022, this subject replaced by subject INFO 3016 - Cyber Security and Behaviour Community Placement. This subject is the second placement for the work integrated learning embedded in the Bachelor of Cyber Security and Behaviour degree. There are three options: 1. WSU-brokered industry placement on a competitive basis; 2. an approved placement at the student's place of work, or via the student's networks and contacts; 3. an industry project report based on industry-generated case studies and problems. Students may continue the option chosen for Cyber Security and Behaviour Placement 1, or choose another available option. Workshops will be conducted throughout the semester to aid in your learning and to support your professional development during this placement or project. Contact the subject coordinator well in advance to elect your own industry placement (such as your current employer). Only options 2 and 3 are available to WSU Online students.
Level: Undergraduate Level 3 subject
Pre-requisite(s): INFO 3012
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 3014 Digital Investigations and Forensics (10 Credit Points)
Subject Details (p. 3676) **Legacy Code:** 102701
This subject focuses on the concepts, theories, and practice of digital investigations and forensics. More specifically, it focuses on using a detailed hands-on approach to the use of computer technology in investigating and demonstrating that particular digital media contains incriminating evidence. With topics ranging from data acquisition, file systems examination, social media, email and network investigations, mobile and cloud forensics, a working knowledge of how to approach digital investigations and utilise various forensic tools to collect, analyse and present digital evidence will be gained. In this subject, digital investigations and forensics is covered from both a theory-based and applied understanding of how to recover admissible legal evidence after an incident, or proactively as a key defence to reduce the likelihood of cyber attacks.
Level: Undergraduate Level 3 subject
Pre-requisite(s): INFS 1002 AND
INFO 2001 OR
INFO 2004
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 3015 Internet of Things and Smart Environments (10 Credit Points)
Subject Details (p. 3677) **Legacy Code:** 301436
This subject covers the essential components and the dominant and emerging applications of the Internet of Things (IoT) and smart environments. These include the functions of sensors, actuators, and relevant communication networks in collecting, analysing, and acting on smart environment data. The role of machine learning in developing smart environment solutions, such as smart cities, smart transportation, smart healthcare, and other leading applications, are also discussed. The subject additionally covers critical IoT cybersecurity and privacy issues and examines approaches for addressing them. It presents the relevant principles and current practices and explores the trends in IoT and smart environments.
Level: Undergraduate Level 3 subject
Pre-requisite(s): COMP 2004
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 3016 Cyber Security and Behaviour Community Placement (20 Credit Points)
Subject Details (p. 3678) **Legacy Code:** 102905
This subject is the first placement for the work integrated learning embedded in the Bachelor of Cyber Security and Behaviour degree. Students will do an internal cyber security placement with the new live security operations centre known as the Western centre for Cybersecurity Aid and Community Engagement (Western CACE). Western CACE will provide training for students as well as members of the small business communities with cyber preparedness training. Students will be guided through handling real cyber attacks and assisting small business respond to these attacks. There are a paucity of government services that address and aid small business with live cyber attacks. Western CACE fills this necessary gap where students will exit knowing how to deal with ransomware, payment diversion fraud, data breach, emerging threats, and the security control implementations post-incident. The placement with Western CACE acts as a stepping stone to their next placement which is their external industry placement (INFO 3017 Cyber Security and Behaviour Industry Placement). A two day induction/workshops will be conducted in the week prior to commencing with Western CACE with ongoing professional development onsite within the Centre as directed by the Centre Manager, Director and industry leaders. WSU Online students will not do a face to face placement at Western CACE unless they are able to attend face to face sessions in Sydney for both INFO 2008 Cyber Incident Response and Risk Management and this unit. WSU Online students will have the following options: an approved placement at the student's place of work, or via the student's networks and contacts OR an industry project report based on industry-generated case studies and problems.
Level: Undergraduate Level 3 subject
Equivalent Subjects: INFO 3012 - Cyber Security and Behaviour Placement 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 3017 Cyber Security and Behaviour Industry Placement (20 Credit Points)
Subject Details (p. 3679) **Legacy Code:** 102904
This subject is the industry placement for the work integrated learning embedded in the Bachelor of Cyber Security and Behaviour degree. Students will work with an industry placement or its equivalent. There are four options for industry placement: 1. WSU-brokered industry placement on a competitive basis; 2. an approved placement at the student's place of work, or via the student's networks and contacts; 3. an industry project report based on industry-generated case studies and problems; 4. continuing at WCACE. In addition, workshops will be conducted throughout the semester to aid in your learning and to support your professional development during this placement or project. Contact the subject coordinator well in advance to elect your own industry placement (such as your current employer). Only options 2 and 3 are available to WSU Online students.
Level: Undergraduate Level 3 subject
Equivalent Subjects: INFO 3013 - Cybersecurity Placement 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 3018 Computing Practicum (10 Credit Points)
Subject Details (p. 3680)
This subject provides students with real-world experience in the Computing industry in Australia and other locations around the world. Students undertake 120 hours of full-time or part-time equivalent industry placement as a Work Integrated Learning (WIL) component, carrying out computing related tasks and receive instructions and tuition in aspects of professional practice. Students may nominate an organisation of their choice, in Australia, or within a department/ division of Western Sydney University carrying out computing related tasks locally or globally, with the exception of their home country for non-Australian resident students. However, for all cases, students must seek the approval of the Subject Coordinator before the commencement of their industry placement.
Level: Undergraduate Level 3 subject
Pre-requisite(s): Students in 3687 Bachelor of Information Systems and 3639 Bachelor of Information and Communications Technology - COMM 1026 INFS 1006
Students in 3688 Bachelor of Information Systems (Advanced) - COMM 1026 INFS 1015
Students in 3506 Bachelor of Computer Science - COMM 1026
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 3020 Cyber Security and Behaviour Research Project (20 Credit Points)
Subject Details (p. 3681)
This is a 40 credit point year-long subject taken over two terms (20 credit points in each term). This subject comprises the research pathway of the Bachelor of Cyber Security and Behaviour. Students will undertake a major research project in the field of behavioural cyber security. The specifics of the project will be coordinated between the student and the research supervisor at Western, which is undertaken over two semesters. Students should firstly discuss their proposed research project with the research supervisor, as it may require prior approval by the University's Ethics Committee depending on the research topic chosen. In the first semester, students plan their research, complete a literature review and propose the project plan to a panel of experts. By the end of the second semester students will have completed their thesis by research and will defend that thesis to a panel of experts. As such, students will have contributed to research in the field of cyber security and behaviour which prepares them for further studies towards a Masters or PhD qualification.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 5001 Workflow Management for Business Solutions (10 Credit Points)
Subject Details (p. 3682)
Through project-based learning, students will learn how to configure digital workflows applications and build custom applications with a strong emphasis on human centered design and end-to-end process re/engineering. Mentoring and coaching is provided by the industrial-academic team to allow students to develop real world, work ready skills to fulfil various organisational roles implementing the digital workflows platform. Teaching and learning activities focus on ServiceNow which is a cloud-based platform that delivers cross-enterprise digital workflows, connecting people, functions and systems. At the conclusion of this subject, you will have completed certifications for both the ServiceNow Fundamentals and Application Development Fundamentals, both highly sought after in the current job market.
Level: Postgraduate Coursework Level 5 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 6001 IT Project Management (10 Credit Points)
Subject Details (p. 3683)
This subject is designed to provide students with an opportunity to learn and apply the knowledge, values and skills of consultancy, project management, and research by undertaking an IT project. The subject prepares students on presenting project proposals in various ICT areas, project management, time management, communication skills, and the evolving legal, ethical, and social responsibilities of IT professionals. Students will work in teams under the supervision of a staff member, to plan and investigate their project.
Level: Postgraduate Coursework Level 6 subject
Pre-requisite(s): ENGR 7017 - Professional Practice and Communication
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 7001 Advanced Machine Learning (10 Credit Points)
Subject Details (p. 3683) **Legacy Code:** 301119
Advanced Machine Learning explores modern methods of classification, clustering and regression to make predictions and analyse different forms of data. Issues that face all machine learning methods, such as model evaluation, assessment and generalisation will also be analysed.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): COMP 7024
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 7002 Advanced Topics in Artificial Intelligence (10 Credit Points)
Subject Details (p. 3684) **Legacy Code:** 301196
This subject introduces the most fundamental techniques of artificial intelligence (AI), including knowledge representation, searching, machine learning and intelligent agents. Students will learn the basic theories and algorithms that are essential in the design and development of intelligent systems. The subject will focus on two typical AI applications: game playing and e-trading. Students will have the chance of using existing multiagent system platforms to design and develop intelligent software for game playing and automated trading in e-markets.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: LGYA 5875 Intelligent Agents LGYA 5991 Automated Negotiation and e-Trading INFO 7006 Intelligent Agents for eMarkets
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 7003 Advanced Topics in User System Interaction (10 Credit Points)
Subject Details (p. 3685) **Legacy Code:** 301045
The domain of User System Interaction or also known as Human Computer Interaction (HCI) dictates that IT graduates must be able to develop and evaluate interfaces that not only look professional but are usable, functional and accessible. This post graduate subject also examines HCI as a field of research and discusses novel areas of research in the area. Students in this subject will be required to complete a research project alongside a literature review document both of which comprise of content that is of a standard of being able to be considered for publication and/or presentation in a HCI conference or journal.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: INFO 3003 - Human-Computer Interaction INFO 3004 - Human-Computer Interaction (Advanced)
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 7004 ICT Practicum (0 Credit Points)
Subject Details (p. 3686) **Legacy Code:** 301047
In this subject, students undertake 120 hours of full-time or part-time equivalent industry placement as a Work Integrated Learning (WIL) component required for the successful completion of their course. Students can nominate an organisation of their choice however, they must seek the approval of the Subject Coordinator before the commencement of the industry placement. Students have the option to work in an organisation in Australia, or within a department/division of Western Sydney University carrying out ICT related tasks or globally, with the exception of their home country for non-Australian resident students. This provides an opportunity for real-world experience in the ICT industry in Australia as well as anywhere in the world. Students with substantial post-qualification work experience in Australia or globally (with the exception of their home country for non-Australian residents) may be eligible for advanced standing for this subject.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): For students enrolled in 3698 Master of Information and Communications Technology (Advanced) or 3699 Master of Information and Communications Technology - ENGR 7017 Professional Practice in Communication
For students enrolled in 3765 Master of Artificial Intelligence - COMP 7020 Artificial Intelligence Ethics and Organisations
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 7005 IT Project Management (10 Credit Points)
Subject Details (p. 3687) **Legacy Code:** 300260
This subject is designed to provide students with an opportunity to learn and apply the knowledge, values and skills of consultancy, project management, and research by undertaking an IT project. The subject covers preparing and presenting project proposals in various ICT areas, project management, time management, communication skills, and the evolving legal, ethical, and social responsibilities of IT professionals. Students will work in teams under the supervision of a staff member, to plan and investigate their project.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 7007 Masters Thesis (40 Credit Points)
Subject Details (p. 3688) **Legacy Code:** 301125
This is a 80 credit point year-long subject taken over two terms (40 credit points in each term). This subject provides an opportunity for masters students to carry out a comprehensive investigation and practical work on a cutting edge research topic in the area of Information and Communication Technologies. Students are encouraged to select topics they envisage to be of value to their future careers. Students will undertake individual research-intensive project-based study under the guidance of an academic supervisory panel.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): ENGR 7017 AND
ENGR 7018 AND
HUMN 4009 AND
HUMN 4010
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 7009 Network Security (20 Credit Points)
Subject Details (p. 3689) **Legacy Code:** 301068
With organisations increasingly dependent on their information systems, there is a greater need to ensure that the underlying network infrastructure being used by these systems is secure. Western Sydney University is a leading Cisco Academy and this Cisco Certified Networking Associate (CCNA) Security module will give students a foundation to prepare for the Certified Information Systems Security Professional (CISSP) qualification. This online subject will provide the knowledge, understanding and practical experience to manage secure communication across a large-scale internetwork using Cisco equipment. Students will be expected to undertake individual research to contextualise their Cisco study in the broader security management environment.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): COMP 7001 AND
COMP 7010
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 7010 Research Project A (20 Credit Points)
Subject Details (p. 3690) **Legacy Code:** 301055
This subject is a problem based research subject. Students are expected to conduct individual studies under supervision by academic staff. Students will acquire the basic skills that are essential for completing a research project. They will learn how to identify research topics in the fields relevant to their courses. They will be required to define research objectives and scope, conduct literature survey, establish research methodology, prepare a research plan and present these contents in a final report and through an oral presentation. This subject is a pre-requisite of subject Research Project B in which the research plan will be carried out.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): Students enrolled in 3716 Master of Mathematics student must have successfully completed MATH 7006 Calculus of Variations and Advanced Calculus MATH 7010 Non-linear Ordinary Differential Equations MATH 7004 Applied Complex Variables and MATH 7005 Approximation Theory
Students enrolled in 3752 Master of Project Management must have successfully completed BUSM 7064 Managing Project Teams and Stakeholders MGMT 7003 Financial Management of Projects BUSM 7097 Time and Quality Management BLDG 7009 Project Procurement Systems BUSM 7082 Risk Management and Decision Making and BUSM 7090 Strategic Project Management
Incompatible Subjects: ENGR 7014 Master Project 1 ENGR 7015 Master Project 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 7011 Research Project B (20 Credit Points)
Subject Details (p. 3691) **Legacy Code:** 301056
This subject is a continuation of the subject Research Project A and is a problem based project subject. Students are expected to conduct individual studies under supervision by academic staff and deliver the final outcomes/findings on the research topics that are proposed in Research Project A. Students will employ the identified methodologies to carry out the research plans and fulfil the research objectives with the scope defined in the Research Project A. Each individual student is required to produce an oral presentation and a final written report. In this subject, students will acquire research related problem solving skills. Note that students enrolled in the course Master of Project Management (only) must seek permission to enrol in this subject.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): INFO 7010
Incompatible Subjects: ENGR 7014 Master Project 1 ENGR 7015 Master Project 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 7012 Strategy for Technological Innovation (20 Credit Points)
Subject Details (p. 3692) **Legacy Code:** 301053
This online subject introduces a range of perspectives on the strategy formation process, recognising that there is no one universal process to fit all needs. A significant part of the teaching centres on an overview of strategic management. This is then placed into the context of technological innovation through six teaching blocks, each block providing a different perspective on the strategy formation process.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 7013 Web Engineering (10 Credit Points)
Subject Details (p. 3693) **Legacy Code:** 300443
Today organizations extensively rely on web based information systems to market, sell, manage customer relations, and for most of the internal operations. Users are increasingly using mobile devices to interact with this information. Due to rapidly changing business environment these systems need to be designed in away to accommodate the frequent changes. New technologies and frameworks have been developed to support development of large, complex, mobile based, maintainable and evolutionary web systems. In this subject students will study some of these technologies, design methods and frameworks that can be successfully used to engineer such web systems. They will get hands on experience by developing such a system.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 5881 - Web Application Development
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 7014 Advanced Topics in Cybersecurity (10 Credit Points)
Subject Details (p. 3694) **Legacy Code:** 301236
This subject focuses on the advanced features of Cybersecurity, contemporary views on security, and the solutions that aim to protect the emerging services and technologies. The emphasis is on the development of student skills to enable them to do proficient research and development works and studies in the cybersecurity discipline. On successful completion of this subject, students will be equipped with an in-depth understanding of relevant issues, attacks on massively interconnected systems, and the evolving approaches to improve the reliability of advanced services.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 7015 Applied Cybersecurity (10 Credit Points)
Subject Details (p. 3695) **Legacy Code:** 301235
This subject covers the current approaches, technologies, and applied practices pertinent to cybersecurity and helps the student to understand important related protocols and standards. It describes the features needed for the mitigation of cyber vulnerabilities for improving the reliability of the underlying systems, privacy preservation, and achieving protections against cybercrime and internet fraud. It also examines the basics of ethical hacking, network assurance, cyber risk management, and incident analysis. The subject discusses the trends in applied cybersecurity and introduces some of the relevant current key research issues and features of the field.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): COMP 7013
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 7016 Postgraduate Project A (10 Credit Points)
Subject Details (p. 3695) **Legacy Code:** 301384
This is a project-based subject for the Master studies in Computers, Data and Mathematical Sciences. The purpose of this subject is to develop research skills and learn how to manage a research project. Students will engage in research investigation and practical work on a topic in a field of current research interest that is of value to the candidate's professional and intellectual development. Students are expected to actively pursue their interest in an individual research area and undertake self-studies under guidance of a project supervisor. Students will identify research topics in consultation with supervisors, carry out a literature review, define research objectives, establish research methodology, and prepare a research plan. Eventually each student is required to produce a research report with preliminary findings.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: ENGR 7014 - Master Project 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 7017 Postgraduate Project B (10 Credit Points)
Subject Details (p. 3697) **Legacy Code:** 301385
This project based subject is a continuation of subject Postgraduate Project A. Students are expected to work individually under the supervision of academic staff to solve a research problem and deliver the final outcomes on the research topics they selected in Postgraduate Project A. Students will carry out the research plans, employ the identified methodologies, and fulfil the research objectives within the defined scope. Students will acquire problem solving skills and research experience necessary to participate in a future research projects. To complete their project each student is required to deliver an oral presentation and a final written report detailing the outcomes of their research project.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): INFO 7016
Equivalent Subjects: ENGR 7015 - Master Project 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 7018 Cloud Systems Development (10 Credit Points)
Subject Details (p. 3698) **Legacy Code:** 301386
The majority of backend systems supporting modern mobile applications as well as commercial applications are built to run on the cloud. This requires a shift of design where reliability, scalability, performance, and security are key considerations in every stage of the software development process. This subject incorporates the AWS Academy Cloud Developing curriculum, to support learning in the areas of designing, developing, deploying, and monitoring applications for the cloud. Through the completion of an applied project, students will implement the techniques they have learned to enable communication and coordination between services, options for data persistence in the cloud, and optimization of applications for, potentially, millions of users.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: INFO 7008 Modern Software Architectures
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 7019 Smart Construction (10 Credit Points)
Subject Details (p. 3699) **Legacy Code:** 301491
This subject introduces the evolving smart technologies applicable to construction and facilitates critical thinking in how these technologies can be gainfully applied in the construction industry. It builds up understanding of the subject content from baseline principles of management information systems moving towards evolving new technologies such as digital engineering, Building Information Modelling, Blockchain, Artificial Intelligence among others. The modern construction enterprises are critically analysed to determine the application of suitable technologies for their advancement.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 9001 Higher Degree Research Thesis - Information Technology (10,20 Credit Points)
Subject Details (p. 3699) **Legacy Code:** 800178
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 9002 Higher Degree Research Thesis - Information Technology (10,20 Credit Points)
Subject Details (p. 3702) **Legacy Code:** 800201
This is a 80 credit point year-long subject.
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 9003 Higher Degree Research Thesis - Mathematics Sciences (10,20 Credit Points)
Subject Details (p. 3704) **Legacy Code:** 800223
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

Other Management and Commerce (MGMT)

MGMT 1001 Introduction to Property (10 Credit Points)
Subject Details (p. 4357) **Legacy Code:** 200601
Introduction to Property comprises six main topic areas. The first section covers the various professions within the property industry with particular emphasis on the valuation profession. The second section covers land law and legal concepts concerning property. The third section addresses issues in property development controls and planning. The fourth section concentrates on the areas of academic and industry report writing. This section also addresses the areas of academic study, lecture procedures and examination technique. The fifth section covers topics in relation to residential valuation and introduces methodologies for valuing more advanced properties as well as the skills required for collecting data for valuation purposes. The sixth section introduces students to mathematics required for later valuation units.
Level: Undergraduate Level 1 subject
Equivalent Subjects: LGYC 1563 - Introduction to Property
Restrictions: Please see the Subject Details page for any restrictions for this subject

MGMT 1002 Principles of Valuation (10 Credit Points)
Subject Details (p. 4358) **Legacy Code:** 200602
This subject covers five main topic areas. The first area covers various valuation methods and extends the students' knowledge in relation to industrial property valuation. The second area covers the hypothetical development method of valuation as well as strata valuation principles. The third area introduces the valuation of partial interests and advanced valuation mathematics. The fourth area provides an introduction to statutory valuation, rating and taxing of property. The last area introduces the students to commercial property valuation.
Level: Undergraduate Level 1 subject
Equivalent Subjects: LGYC 1564 - Principles of Valuation
Restrictions: Please see the Subject Details page for any restrictions for this subject

MGMT 2001 Commercial Valuation (10 Credit Points)
Subject Details (p. 4359) **Legacy Code:** 200603
This subject provides students with a comprehensive understanding of theory and practice of commercial valuation. All aspects of commercial valuation are covered, including commercial valuation reporting standard of the Australian Property Institute. Knowledge of land use planning, property economics and property investment are applied to commercial valuation in this subject.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYC 1565 - Commercial Valuation
Restrictions: Please see the Subject Details page for any restrictions for this subject

MGMT 3001 Property Project (10 Credit Points)
Subject Details (p. 4360) **Legacy Code:** 200360
Property Project is the integrating capstone subject, which brings together the skills that property students have developed during the course in preparing high quality professional property industry reports. The subject enables students to critically evaluate issues in the property industry to determine and assess potential property industry implications as well as conduct a feasibility study using an appropriate property software.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MGMT 3002 Rural Valuation (10 Credit Points)
Subject Details (p. 4361) **Legacy Code:** 200605
To provide students with a full understanding of rural land/property valuation procedures and techniques. This includes being aware of those factors, inherent and external, that need to be taken into account when assessing different types of rural property holdings. To be aware of those environmental factors that affect rural land productivity, sustainability and end value.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYC 1567 - Rural Valuation
Restrictions: Please see the Subject Details page for any restrictions for this subject

MGMT 3003 Specialised Valuation (10 Credit Points)
Subject Details (p. 4361) **Legacy Code:** 200876
The value of special premises constitutes an important segment of valuation practice in Australia. A number of special valuation considerations arise in the appraisal of this class of premises. However, the most compelling reason for studying the valuation of special premises is the fact that these classes of property provide an ideal vehicle whereby valuation principles and methods of valuation can be critically evaluated by students.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYC 1566 Valuation of Special Premises MGMT 3005 Valuation of Special Premises
Restrictions: Please see the Subject Details page for any restrictions for this subject

MGMT 3004 Statutory Valuation (10 Credit Points)
Subject Details (p. 4362) **Legacy Code:** 200711
This subject covers the area of statutory valuation. It is the prescribed subject for registration as a valuer with the NSW Fair Trading. It is also the prescribed subject for Certified Practicing Valuer (CPV) membership of the Australian Property Institute. Upon completion of this subject, students will demonstrate a comprehensive understanding of the relevant property and related laws, necessary valuation methods and principles required for statutory valuations.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 4819 - Compulsory Acquisition and Litigation
Restrictions: Please see the Subject Details page for any restrictions for this subject

MGMT 7003 Financial Management of Projects (10 Credit Points)
Subject Details (p. 4363) **Legacy Code:** 301194
Projects are always unique and their processes are always subject to elements of uncertainty and change. The skill of project management professionals in securing the best return for their organisation's efforts is thus held in great value. This subject is concerned with financial aspects of project management from both theoretical and practical perspectives. The aim is to explain how financial management tasks are carried out in the context of projects as well as stimulate students' reflection on best practice in project financial management.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MGMT 9001 Higher Degree Research Thesis - Management and Commerce (10,20 Credit Points)
Subject Details (p. 4364) **Legacy Code:** 800206
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MGMT 9002 Higher Degree Research Thesis - Management and Commerce (10,20 Credit Points)
Subject Details (p. 4367) **Legacy Code:** 800183
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

Other Natural and Physical Sci (NATS)

NATS 0001 Academic Skills for Health Science (WSTC Prep) (10 Credit Points)
Subject Details (p. 4441) **Legacy Code:** 700225
This subject is designed to assist students to become successful independent learners. It introduces students to a range of theories and concepts to facilitate the development of practical skills and personal attitudes necessary for success in tertiary study. Emphasis is placed on developing the key competencies such as time management, critical thinking, researching, learning how to learn and referencing.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: NATS 0002 - Academic Skills for Health Science (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 0002 Academic Skills for Health Science (WSTC) (10 Credit Points)
Subject Details (p. 4442) **Legacy Code:** 900099
This subject is designed to assist students to become successful independent learners. It introduces students to a range of theories and concepts to facilitate the development of practical skills and personal attitudes necessary for success in tertiary study. Emphasis is placed on developing the key competencies such as time management, critical thinking, researching, learning how to learn and referencing.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: NATS 0001 - Academic Skills for Health Science (UWSCFS)
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 0003 Academic Skills for Science (WSTC Prep) (10 Credit Points)
Subject Details (p. 4443) **Legacy Code:** 700230
This subject is designed to assist students to become successful independent reflective learners. It introduces students to a range of theories and concepts to facilitate the development of practical skills and personal attitudes necessary for success in tertiary study. Emphasis is placed on developing the key competencies of scientific enquiry - collecting, analysing, organising and communicating information as well as solving problems, particularly when related to using mathematical ideas and techniques.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 0004 Academic Skills for Science (WSTC) (10 Credit Points)
Subject Details (p. 4444) **Legacy Code:** 900101
This subject is designed to assist students to become successful independent reflective learners. It introduces students to a range of theories and concepts to facilitate the development of practical skills and personal attitudes necessary for success in tertiary study. Emphasis is placed on developing the key competencies of scientific enquiry - collecting, analysing, organising and communicating information as well as solving problems, particularly when related to using mathematical ideas and techniques.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: NATS 0003 - Academic Skills for Science (UWSCFS)

NATS 0005 Foundations of Science (WSTC) (10 Credit Points)
Subject Details (p. 4445) **Legacy Code:** 900053
This subject aims to provide students with sufficient knowledge of scientific facts and theories to provide the basis for further studies in science, engineering and technology. Emphasis is placed on developing the key competencies of scientific inquiry - collecting, analysing, organising and communicating information as well as solving problems, particularly when related to using mathematical ideas and techniques. Major areas of science - physics, chemistry and biology are represented within the subject and presented in context within an integrated framework.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 0006 Fundamentals of Health Science (WSTC Prep) (10 Credit Points)
Subject Details (p. 4446) **Legacy Code:** 700190
The depth of knowledge and practical skills required by health professionals in the 21st century is very different to that which was required in the past. Medical treatment of illness and disease has become increasingly technical and health professionals are expected to work in partnership in determining patient care. In order to achieve this, today's health professional must have a basic understanding of the fundamental scientific principles behind health and disease. Increasingly, modern health science is concerned with maintaining health as a way of preventing disease and this is achieved through a holistic approach to the human condition. This subject is an introduction to the basic concepts in human body systems, health and disease, that is required in order to commence any tertiary health science course.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: NATS 0016 - Science for Health Professionals (UWSC) NATS 0018 - Science for Health Science (UWSCFS)
Incompatible Subjects: BIOS 1023 - Introduction to Human Biology (WSTC) BIOS 1022 - Introduction to Human Biology
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 0007 Fundamentals of Science (WSTC Prep) (10 Credit Points)
Subject Details (p. 4447) **Legacy Code:** 700231
In its broadest sense, science is an evolving body of skills, theories and knowledge about the nature of the world, based on observation, measurement and experiment. In order to begin participating in tertiary science studies, students require a fundamental toolkit of scientific literacy that includes key concepts, language, and skills. This subject provides an overview of, and grounding in, fundamental scientific concepts including the nature of matter and energy, and the flow of energy and cycling of matter through key processes in the biosphere. Integrating these concepts within a framework of a contemporary issue, climate change, enables students to build skills in applying scientific concepts, methods and problem-solving techniques, as well as furthering an understanding of interrelationships between science and other aspects of society. The subject imparts a basic body of essential scientific knowledge, as well as facilitating skills in collecting and analysing information and writing coherent explanations within a scientific framework.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: NATS 0008 - Fundamentals of Science (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 0008 Fundamentals of Science (WSTC) (10 Credit Points)
Subject Details (p. 4448) **Legacy Code:** 900105

NATS 0009 Health Communication (WSTC) (10 Credit Points)
Subject Details (p. 4449) **Legacy Code:** 900081
Health Care Professionals work in an environment where a high level of communication with others is of paramount importance. Oral, written and interpersonal communication skills form the cornerstone of good professional practice. This subject is designed to help students develop self-awareness, increase their confidence and skills in communicating with others in preparation for the practicum experiences during their undergraduate studies.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: LGYB 1382 - Nursing Communication (UWSC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 0010 Interpreting Data In Science (WSTC Prep) (10 Credit Points)
Subject Details (p. 4450) **Legacy Code:** 700287
Science is a way of knowing about the world. It is a process of discovery whose product, an evolving body of scientific knowledge and technology, is a significant determinant of modern Western societies. Engaging with the content, process, and social functions of science requires foundational scientific literacy, including the ability to access multiple textual forms, to construct meaning, and to critically evaluate new information in a scientific framework. In this subject students will develop skills in scientific literacy through undertaking case studies of contemporary relevance. Emphasis is placed on key competencies in scientific academic writing - collecting, analysing, organising, interpreting and communicating information - as well as solving problems related to mathematical ideas and techniques.

NATS 0019 Scientific Method (WSTC) (5 Credit Points)
Subject Details (p. 4457) **Legacy Code:** 900038
The subject Scientific Method is designed to encourage those intending tertiary study in science and computing to use their knowledge of science and technology, together with strategies of design, to solve practical and ideological problems.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 0020 Skills for Health Science (WSTC) (5 Credit Points)
Subject Details (p. 4458) **Legacy Code:** 900112
This subject is designed to give students skills in health science to become successful independent reflective learners in health sciences. It introduces students to a range of theories and concepts to facilitate the development of referencing conventions used in health science as well as practical skills and personal attitudes necessary for success in tertiary study and eLearning. Emphasis is placed on developing the key competencies of inquiry - analysing, organising, researching and communicating information as well as problem solving.
Level: Undergraduate Level 0 Preparatory subject

NATS 1001 Concepts in Human Anatomy (10 Credit Points)
Subject Details (p. 4459) **Legacy Code:** 301126
This subject provides a basic understanding of human embryological development, anatomical terminology, and a range of foundation concepts in human anatomy. Students must attend a 'wet' laboratory session where the learning of anatomy will be enhanced through the study of human cadaveric material. Wet laboratory sessions are not available on all campuses, and therefore students will need to travel to other campuses in order to attend.
Level: Undergraduate Level 1 subject
Equivalent Subjects: NATS 1013 - Introduction to Anatomy
NATS 1002- Concepts in Human Anatomy (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 1002 Concepts in Human Anatomy (WSTC) (10 Credit Points)
Subject Details (p. 4460) **Legacy Code:** 700266
This subject provides a basic understanding of human embryological development, anatomical terminology, and a range of foundation concepts in human anatomy. Students must attend a 'wet' laboratory session where the learning of anatomy will be enhanced through the study of human cadaveric material. Wet laboratory sessions are not available on the Nirimba campus, and therefore students will need to travel to Campbelltown in order to attend these sessions.
Level: Undergraduate Level 1 subject
Equivalent Subjects: NATS 1001 - Concepts in Human Anatomy
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 1003 Digital Forensic Photography (10 Credit Points)
Subject Details (p. 4461) **Legacy Code:** 300874
Forensic photography serves an important function within forensic science for the purpose of scene and item documentation, as well as the detection and enhancement of forensic evidence. This subject introduces the student to the fundamental principles and practices of forensic photography. Topics include: principles of light science, digital imaging, camera and lighting operations, technical photography composition, and the maintenance of image integrity.
Level: Undergraduate Level 1 subject
Pre-requisite(s): NATS 1008
Equivalent Subjects: NATS 2012 - Digital Forensic Photography 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 1004 Drugs on Line (10 Credit Points)
Subject Details (p. 4462) **Legacy Code:** 400961
This subject deals with selected issues in drug use, misuse and abuse. An introductory section discusses mechanisms of drug action in the body and their likely effects. Some topical areas include; drugs in society (illicit drug taking and drug taking in sports), antidepressants and weight management therapeutic agents, and the exploration of complementary alternative medicines (CAMs) in Australian society.
Level: Undergraduate Level 1 subject
Equivalent Subjects: NATS 1005 - Drugs On Line
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 1008 Forensic Science (10 Credit Points)
Subject Details (p. 4462) **Legacy Code:** 300806
This subject aims to give students a basic understanding of scientific methodology as it applies to the collection, analysis and interpretation of forensic evidence. Students are introduced to a range of crime scene investigation methods and analysis methods that are used with various types of forensic evidence. The concept of individualisation is introduced and the importance of this concept in forensic science is explained. Case studies are used to explain the concepts discussed in this subject. The role of human factors is discussed, together with the importance of critically evaluating forensic evidence and the means by which it was obtained.
Level: Undergraduate Level 1 subject
Equivalent Subjects: NATS 1006 - Forensic Science NATS 1007 - Forensic Science
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 1009 Human Anatomy and Physiology 1 (10 Credit Points)
Subject Details (p. 4463) **Legacy Code:** 400868
This is the first of two subjects covering systematic anatomy and physiology at an introductory level. This subject is designed to provide students in medical science and applied health science programs with an overview of body systems and their functions to ensure a suitable basis for their future studies. The subject studies the basic concepts of biochemistry and histology, general anatomy and physiology of the major body systems including the central and peripheral nervous systems, integumentary system, musculoskeletal system (bones, muscles and joints), special senses and endocrine system. Emphasis will be placed on the interconnection and relationship between structure and function at every level of organisation.
Level: Undergraduate Level 1 subject
Equivalent Subjects: BIOS 1033
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 1010 Human Anatomy and Physiology 2 (10 Credit Points)
Subject Details (p. 4464) **Legacy Code:** 400869
Human Anatomy and Physiology 2 systematically covers anatomy and physiology at an introductory level. This subject is designed to provide students, especially those in clinical health science programs, with an overview of body systems and their functions, to ensure a suitable basis for their future studies. The subject studies the basic structure and function of the major body systems such as cardiovascular, respiratory, digestive, urinary, reproductive and lymphatic. This subject also explores the physiological processes involved in the immune response, cell metabolism, regulation of body fluids and acid-base balance. Emphasis is placed on the interconnection and relationship between structure and function at every level of organisation.
Level: Undergraduate Level 1 subject
Equivalent Subjects: NATS 1030
NATS 1001

NATS 1019 Scientific Literacy (10 Credit Points)
Subject Details (p. 4465) **Legacy Code:** 300811
This subject is designed to provide students with scientific literacy, personal and employability skills and attitudes required to successfully undertake science-related undergraduate studies and to prepare for professional life. Students learn, develop and utilise academic and interpersonal methodologies and approaches within the context of applied scientific principles and take responsibility for their own learning and develop a work ethic. Students are introduced to the contestable and uncertain nature of science and the scientific method that underpins academic integrity and ethical behaviour. Activities encourage development of oral and written communication skills, self-confidence, self-efficacy, creative and critical thinking through problem solving, group process, and peer support and assessment. Academic and employability skills include scientific reading and writing, time management, researching scientific information and library skills, oral presentation, taking tests and exams, effective personal and group based learning strategies, and approaches to online learning.
Level: Undergraduate Level 1 subject
Equivalent Subjects: NATS 1018 - Professional Skills for Science NATS 1020 - Scientific Literacy (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 1020 Scientific Literacy (WSTC) (10 Credit Points)
Subject Details (p. 4467) **Legacy Code:** 700124
This subject is designed to provide students with scientific literacy, personal and employability skills and attitudes required to successfully undertake science-related undergraduate studies and to prepare for professional life. NATS 1021 Concepts in Human Physiology (WSTC) (10 Credit Points)
Subject Details (p. 4468) **Legacy Code:** 700295
This subject introduces the core concepts and terminology necessary to provide a basic understanding of the physiological responses of the human body using relevant examples. These include the processes of homeostasis, cell-cell interactions and the physical and chemical transport processes that are required to carry out integrated functions. Students will explore these key physiological concepts through practical hands-on experiments and in interactive group work in prac and tutorial classes, respectively. The subject provides the foundation to study the physiology of human organ systems.
Level: Undergraduate Level 1 subject
Equivalent Subjects: BIOS 1033 Concepts in Human Physiology

NATS 1022 Functional Anatomy (10 Credit Points)
Subject Details (p. 4469) **Legacy Code:** 401410
From 2020 this subject replaces 400881 - Functional Anatomy. This subject covers in depth the functional anatomy of the musculoskeletal system. Special attention is given to the relationship between form and function, the terminology used to describe human movement and thorough knowledge of the bony landmarks, joints, muscle attachments, innervation, blood supply along with detailed actions of specific muscles and muscle groups. Emphasis is on a practical functional context with the relevance to clinical applications such as surface and imaging anatomy, and the anatomical basis of common injuries. Learning experience intends to stimulate proactive deep approach in learning anatomy motivated by the outcomes driven from specialist work within the Health professions.
Level: Undergraduate Level 1 subject
Pre-requisite(s): NATS 1009
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 1023 Introduction to Physiology (10 Credit Points)
Subject Details (p. 4470) **Legacy Code:** 301353
From 2020 this subject replaces 300818 - Introduction to Physiology. This subject introduces the concept of homeostasis and critically examines examples of how the body systems are regulated and homeostatically controlled. The subject uses a body-systems approach to examine the physiology of tissues, organs and systems in order to develop an integrated view of the regulated functioning of the human body.
Level: Undergraduate Level 1 subject
Equivalent Subjects: NATS 1017 - Introduction to Human Physiology LGYA 6186 - Physiology 1 BIOS 1026 - Introduction to Physiology (WSTC) BIOS 1025 - Introduction to Physiology
Incompatible Subjects: BIOS 1022 - Introduction to Human Biology
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 1024 Introduction to Physiology (WSTC) (10 Credit Points)
Subject Details (p. 4471) **Legacy Code:** 700302
This subject introduces the concept of homeostasis and critically examines examples of how the body systems are regulated and homeostatically controlled. The subject uses a body-systems approach to examine the physiology of tissues, organs and systems in order to develop an integrated view of the regulated functioning of the human body.
Level: Undergraduate Level 1 subject

NATS 1025 Management of Aquatic Environments (UG Cert) (10 Credit Points)
Subject Details (p. 4471) **Legacy Code:** 500051
This subject introduces students to the physical, chemical and biological nature of water systems and the linkages to human activity. These linkages include a development of an appreciation of the essential services and broad uses and values of water in modern human society, and the natural environment. Students are challenged to examine the causes and effects of water pollution and environmental degradation. Students are introduced to scientific water sampling, analysis and reporting of water quality and pollution.
Level: Undergraduate Level 1 subject
Equivalent Subjects: BIOS 1028 Management of Aquatic Environments BIOS 1027 Management of Aquatic Environments BIOS 1034 Management of Aquatic Environments
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 1026 Digital Forensic Photography (WSTC) (10 Credit Points)
Subject Details (p. 4472) **Legacy Code:** 700329
Forensic photography serves an important function within forensic science for the purpose of scene and item documentation, as well as the detection and enhancement of forensic evidence. This subject introduces the student to the fundamental principles and practices of forensic photography. Topics include: principles of light science, digital imaging, camera and lighting operations, technical photography composition, and the maintenance of image integrity.

NATS 2001 Advanced Science Project A (10 Credit Points)
Subject Details (p. 4477) **Legacy Code:** 300937
The subject is design to teach students what is required to successfully begin to answer a scientific question. It specially focuses on teaching students how to access and critically review literature on a given topic, chosen in consultation with a supervisor in the student's preferred field of study. Students will present their findings in both written and poster formats. Students also attend a one day workshop where they engage with researchers in a wide variety of fields to broaden their understanding of research.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYA 6165 - Advanced Science Research Project A
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 2002 Advanced Science Project B (10 Credit Points)
Subject Details (p. 4478) **Legacy Code:** 300938
This subject continues the students' training in thinking as a research scientist whilst developing analytical and critiquing skills in a range of science disciplines. Students will form hypothetical companies and develop a portfolio of scientific products that they will have to present as prospectus and in oral presentations. The students will have to assess the constraints of research having to address the WHS, gene technology, ethics and other legislative issues impacting their projects. Students will also have to manage budgets, market analyses and intellectual property issues.
Level: Undergraduate Level 2 subject
Pre-requisite(s): NATS 2001
Equivalent Subjects: LGYA 6166 - Advanced Science Project B
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 2004 Anatomy of the Thorax and Abdomen (10 Credit Points)
Subject Details (p. 4480) **Legacy Code:** 300894
This subject builds on the systems anatomy studied during first year, and explores the regional anatomy of the contents and walls of the human thorax and abdominopelvic cavities. Emphasis is placed on the relationship between structures, and the nexus between form and function. Cadaveric specimens are used in this subject to illustrate the array of normal anatomical variation.
Level: Undergraduate Level 2 subject
Pre-requisite(s): NATS 1010
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 2005 Appendicular Skeleton (10 Credit Points)
Subject Details (p. 4480) **Legacy Code:** 300898
This musculoskeletal subject builds on the basic anatomy taught during the first year, offering a regional study of the human upper and lower limbs, including their respective girdles. Emphasis is placed on the identification and description of the structures, including the correlation of structure and function. Cadaveric specimens are used to aid the learning of these regions and their three-dimensional aspect, including the anatomical variation found in these regions.
Level: Undergraduate Level 2 subject
Pre-requisite(s): NATS 1013 OR
NATS 1001
Equivalent Subjects: NATS 2029 - The Appendicular Skeleton LGYA 5937 - The Appendicular Skeleton
Incompatible Subjects: BIOS 1015 - Functional Anatomy
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 2006 Approved Industrial Experience (0 Credit Points)
Subject Details (p. 4481) **Legacy Code:** 300655
This is a "Work Experience" subject, for which no student contribution fee is charged, nor will it consume Student Learning Entitlement (SLE). Students are required to obtain at least ten weeks, vocationally relevant, industrial experience during their course of study. The aim of this is to provide students with opportunities to apply theoretical concepts to real world situations, assisting their personal and professional development. Approved industrial experience aims to provide flexibility for students to pursue areas of interest and to assist in their selection of appropriate elective subjects in their program and to met the professional accreditation requirements as maybe required in your key program. Students are required to organise, formalise and validate at least ten weeks of university approved industry experience within an industrial, commercial or government situation during the course of their study.
Level: Undergraduate Level 2 subject
Equivalent Subjects: NATS 2007 - Approved Industrial Experience LGYB 8194 - Approved Industrial Experience
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 2008 Clinical Pharmacology (10 Credit Points)
Subject Details (p. 4482) **Legacy Code:** 400981
This subject explores in depth clinical pharmacology fundamental to the practice of allied health (Physiotherapy, Podiatric Medicine and Paramedicine) and complementary medicine (Traditional Chinese Medicine). General principles of pharmacology, pharmacokinetics and pharmacodynamics will be discussed. Key drug categories affecting the main body systems will be introduced in terms of their mechanisms of action, adverse reactions and clinical applications. In the context of antimicrobial pharmacology, general concepts of microbiology will be introduced offering students an understanding of the causative microorganisms, the complex relationship between host and pathogen, the pharmacological actions of antimicrobial drugs and the principles of infection control.
Level: Undergraduate Level 2 subject
Pre-requisite(s): NATS 2038
Equivalent Subjects: LGYA 7037 - Clinical Pharmacology and Microbiology
Incompatible Subjects: NATS 2026 - Pharmacology
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 2010 Crime Scene Investigation (10 Credit Points)
Subject Details (p. 4483) **Legacy Code:** 300873
A substantial amount of forensic evidence used in the prosecution of criminal cases is initially established at the crime scene. Recognising, detecting, recovering, preserving and recording this evidence forms a critical function within forensic science and criminal investigation. This subject introduces the student to a range of crime scene practices that provides the knowledge and skill to interpret a complex scene with voluminous detail, into a more specifically targeted range of forensic evidence items. This subject will explore aspects of crime scene investigation including; crime scene processes, recognition of evidence, documentation of crime scenes, evidence detection and enhancement, and maintaining evidence integrity. It also introduces professional practices associated with maintaining evidence integrity and continuity.
Level: Undergraduate Level 2 subject
Pre-requisite(s): NATS 1003
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 2015 Evidence and Crime Scene Management (10 Credit Points)
Subject Details (p. 4484) **Legacy Code:** 300935
Evidence and Crime Scene Management is a subject designed to provide students with an understanding and knowledge of critical principles associated with the management of evidence and sites considered as crime scenes. The subject is particularly designed for students wishing to enter professional domains involving; policing, nursing, animal welfare, workplace investigators, health inspectors, WHS officers, fire investigation, council and park rangers, social welfare, environmental protection, fraud and insurance investigation and others where the collection of evidence is a component of professional practice within the discipline. The subject covers topics such as; recognition of various evidence, the recording and documentation of evidence, crime scene or site photography, managing scenes, maintaining evidence integrity, sexual assault evidence, the reporting and presentation of evidence in court and others.
Level: Undergraduate Level 2 subject
Equivalent Subjects: NATS 2014 - Evidence and Crime Scene Management
Incompatible Subjects: NATS 2010 - Crime Scene Investigation
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 2019 Forensic and Environmental Analysis (10 Credit Points)
Subject Details (p. 4485) **Legacy Code:** 300843
This subject extends the student's knowledge and experience of analytical techniques by applying them to forensic investigations and analysis in the environmental and food sciences. It will provide an understanding of the chemical and physical principles underlying the use of instrumentation in chemical analysis. Topics include principles of spectroscopic techniques, separation methods; sample collection and storage; presumptive testing; modern chemical instrumentation for gas and liquid chromatography; atomic spectroscopy; mass spectroscopy; x-ray methods and spectroscopic methods.
Level: Undergraduate Level 2 subject
Pre-requisite(s): CHEM 1008 - Introductory Chemistry
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 2021 Imaging Science (10 Credit Points)
Subject Details (p. 4486) **Legacy Code:** 401171
Imaging science is a key area within the forensic sciences. This subject explores the application of imaging science and forensic photography practices to detect, preserve, enhance and examine forensic evidence. The subject focuses on optical and digital enhancement methods that provide essential non-destructive methods for evidence preservation and analysis. The subject provides the learner with necessary theoretical concepts of imaging science that underpin the practice of forensic photographic evidence.
Level: Undergraduate Level 2 subject
Pre-requisite(s): NATS 1003 - Digital Forensic Photography
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 2023 Integrated Science (10 Credit Points)
Subject Details (p. 4487) **Legacy Code:** 300931
Science and the scientific process of discovery have been successful in offering explanations for the world we live in. Due to scientific advances, we have eradicated some disease, explored the moon and the deepest parts of our oceans and created communication across distances on the planet previously unimaginable. We now face the major challenge of creating a future world which is sustainable for life on Earth. Solving our contemporary complex human and environmental issues to create a sustainable future, however, requires integrative and multidisciplinary research frameworks, an understanding of the relationship between science and society including cultural, social, economic and political and ethical factors. Students will critically examine such perspectives in a series of contemporary 'real-life' case studies such as climate change, medical breakthroughs, biodiversity loss, environmental sustainability and human-animal interactions. They will undertake research into the relationship of science integrated with society, and the uncertainty and bias of evidence in decision making.
Level: Undergraduate Level 2 subject
Equivalent Subjects: NATS 1011 - Integrated Science AGEN 2001 - Science in Society NATS 2024 - Integrated Science (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 2024 Integrated Science (WSTC) (10 Credit Points)
Subject Details (p. 4488) **Legacy Code:** 700096
Science and the scientific process of discovery have been successful in offering explanations for the world we live in. Due to scientific advances, we have eradicated some disease, explored the moon and the deepest parts of our oceans and created communication across distances on the planet previously unimaginable. We now face the major challenge of creating a future world which is sustainable for life on Earth. Solving our contemporary complex human and environmental issues to create a sustainable future, however, requires integrative and multidisciplinary research frameworks, an understanding of the relationship between science and society including cultural, social, economic, political and ethical factors. Students will critically examine such perspectives in a series of contemporary 'real-life' case studies such as climate change, indigenous health, medical breakthroughs, biodiversity loss, environmental sustainability and human-animal interactions. They will undertake research into the relationship of science integrated with society, and the uncertainty and bias of evidence in decision making. They will demonstrate their understanding by analysis of a contemporary issue by producing a scientific report and a powerpoint or video.
Level: Undergraduate Level 2 subject
Equivalent Subjects: NATS 1011 - Integrated Science 1 AGEN 2001 - Science in Society NATS 2023 - Integrated Science
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 2025 Natural Science Research Methods (10 Credit Points)
Subject Details (p. 4489) **Legacy Code:** 300932
This subject aims to introduce students to the theories and practices underpinning the scientific processes. Students will learn to identify an issue, review the literature to identify gap(s) and formulate a hypothesis or a question to address the gap(s). Students will then explore research methods and designs to safely and ethically conduct an experiment or study to collect data to answer the hypothesis/question. They will also learn to analyse and interpret the data and report on the findings of the research in a written format. The subject is structured so that lectures will provide theoretical expertise and workshops will reinforce student learning with practical experience. This knowledge and skills are essential for stage 3 subjects and a career in science.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYA 5920 - Research Communities and their Environments NATS 2028 - Research Methods LGYA 6151 - Animal Research
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 2027 Pharmacology (10 Credit Points)
Subject Details (p. 4490) **Legacy Code:** 300884
Pharmacology is the study of the therapeutic interactions of drugs with the human body, focusing on mechanisms of action at the biochemical and cellular level, on adverse reactions and on clinical applications. This subject provides students with a sound understanding of fundamental aspects of this field to prepare for further study of advanced pharmacology or other biomedical sciences. General principles of pharmacokinetics and pharmacodynamics, will be discussed in detail. The major drug categories that affect different organ systems will be addressed, and research methods in pharmacology and the drug development process will also be introduced.
Level: Undergraduate Level 2 subject
Pre-requisite(s): BIOS 1025 OR
BIOS 1026 OR
BIOS 1033 OR
BIOS 1033
Equivalent Subjects: NATS 2026 - Pharmacology
Incompatible Subjects: NATS 2008 - Clinical Pharmacology LGYA 7037 - Clinical Pharmacology and Microbiology
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 2031 Toxicology (10 Credit Points)
Subject Details (p. 4491) **Legacy Code:** 300877
Toxicology is the study of toxicants or poisonous substances: their nature, effects on the human body, and on human, animal and plant populations. Poisonous substances have been used by humans from antiquity for both beneficial and malevolent purposes and today a vast array of toxic industrial chemicals are produced. Both accidental (workplace and environmental) and intentional (forensic) exposure are covered, in terms of group properties, chronic and acute, toxicity, exposure potential, health impact and intervention are presented through forensic case studies. Students carry out a toxicology audit of an operation or premises of their choice.
Level: Undergraduate Level 2 subject
Equivalent Subjects: NATS 2030 - Toxicology
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 2032 Work Integrated Learning in Science (10 Credit Points)
Subject Details (p. 4491) **Legacy Code:** 301161
This subject will provide second and third year science students with an opportunity to undertake a short work placement within a professional organisation. The placement will allow students to observe and develop professional skills and behaviour and integrate theoretical and practical science knowledge and conventions into a real world setting. During the semester preceding the placement students need to complete three career preparation workshops run by Western Sydney University Careers and attend a Pre-Placement seminar run by the subject coordinator. These will aid students in finding their own placement. Prior to the placement, and in consultation with the subject coordinator and the workplace supervisor, students will develop a Professional Task to accomplish during the placement. The task will enhance their workplace skills and highlight how their science knowledge can be adapted and integrated into a professional career. The subject aims to promote greater engagement with career planning and progression and hence improve job readiness.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 2033 Cell Form and Function (10 Credit Points)
Subject Details (p. 4492) **Legacy Code:** 301267
This subject will develop a comprehensive understanding of eukaryotic cellular components, with an emphasis on animal cells. The subject will focus on distinct functions of organelles/cellular structures, the relevant mechanisms involved, and the broader role of such functions in a whole cell context. The subject will encompass a detailed study of cellular components including: the nucleus, ribosomes, the endoplasmic reticulum, the Golgi apparatus, lysosomes, the plasma and organellar membranes, mitochondria, peroxisomes and the cytoskeleton. This subject will also investigate how organellar function is relevant to an appropriately functioning cell, and how cell dysfunction impacts the cell and leads to disease. The subject covers contemporary techniques used to study cells including: cell culture, advanced cell imaging, a range of investigative and analysis techniques, and additional experimental approaches enabling thorough understanding of the incredibly fascinating yet complex nature of cells.
Level: Undergraduate Level 2 subject
Pre-requisite(s): BIOS 1012
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 2034 Human Systems Physiology 1 (10 Credit Points)
Subject Details (p. 4493) **Legacy Code:** 301269
This subject builds upon the core concepts and terminology introduced in Concepts in Physiology, focussing on the function of body organ systems, exploring the knowledge of how these organ systems are regulated, integrated, and function within the human body. The focus will be on the muscular, nervous, cardiovascular, respiratory and endocrine organ systems. Students will collect, interpret and analyse data to develop an understanding of the physiological responses of the human body.
Level: Undergraduate Level 2 subject
Pre-requisite(s): NATS 1009 - Human Anatomy and Physiology 1
Incompatible Subjects: BIOS 1025 - Introduction to Physiology BIOS1022 - Introduction to Human Biology
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 2035 Human Systems Physiology 2 (10 Credit Points)
Subject Details (p. 4494) **Legacy Code:** 301270
Human Systems Physiology 2 builds upon the core concepts and terminology introduced in Concepts in Physiology and Human Systems Physiology 1, focusing on the function of visceral organs and explore how these organ systems are regulated, integrated, and function within the human body. The focus will be on the lymphatic, immune, digestive, renal and reproductive systems. Students will collect, interpret and analyse data to develop an understanding of the physiological responses of the human body.
Level: Undergraduate Level 2 subject
Pre-requisite(s): NATS 1010 - Human Anatomy and Physiology 2
Incompatible Subjects: BIOS 1025 - Introduction to Physiology BIOS1022 - Introduction to Human Biology NATS1009 - Human Anatomy Physiology 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 2036 Immunology (10 Credit Points)
Subject Details (p. 4495) **Legacy Code:** 301354
From 2020 this subject replaces 300847 - Immunology. This subject aims to provide students with an understanding of the structure and function of the immune system, and particularly highlights common and unique systems that exist across kingdoms and phyla. A foundation is built by examining the organs and cells of the human immune system. The peculiarities associated with the immune systems of marsupials, due to their early developmental stage at birth, will also be examined. Students will also develop laboratory expertise that involves immunological principles, investigative proficiency, and science communication skills, leading to understanding the knowledge base through self-learning and group work.
Level: Undergraduate Level 2 subject
Pre-requisite(s): BIOS 2014
Equivalent Subjects: LGYA 5863 - Immunology BIOS 2020 - Immunology
Incompatible Subjects: LGYA 5857 - Cell Signalling and Molecular Immunology
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 2037 Pathological Basis of Disease (10 Credit Points)
Subject Details (p. 4496) **Legacy Code:** 301356
From 2020 this subject replaces 300889 - Pathological Basis of Disease. Pathology is the study of disease. Students will gain an understanding of human pathogenesis, general and systems pathological processes, and the scientific basis of diagnostic and treatment options. The subject also introduces normal human tissue and organ histology, and examines histopathological changes evident in disease states.
Level: Undergraduate Level 2 subject
Pre-requisite(s): BIOS 1025
Equivalent Subjects: BIOS 2028 - Pathological Basis of Disease BIOS 2027 - Pathological Basis of Disease
Incompatible Subjects: BIOS 2029 - Pathophysiology 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 2038 Pathophysiology 1 (10 Credit Points)
Subject Details (p. 4496) **Legacy Code:** 401407
This subject is intended for students enrolled in Health and Medical Science courses and is designed to equip students with a detailed knowledge of pathophysiological processes evident in a number of key human diseases that are vocationally relevant to these students. The content is organised using a systems-based approach. Problem-based learning methods will be adopted in the tutorial component of this subject to help students develop crucial problem-solving skills.
Level: Undergraduate Level 2 subject
Pre-requisite(s): NATS 1010 - Human Anatomy and Psysiology 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 2039 Pathophysiology 2 (10 Credit Points)
Subject Details (p. 4498) **Legacy Code:** 401409
From 2020 this subject replaces 400267 - Pathophysiology. This subject extends the scope of topics explored in Pathophysiology 1 and is designed to equip students enrolled in health science courses of the School with detailed knowledge of pathophysiological processes evident in a number of key human diseases that are vocationally relevant to these students. Problem-based learning methods will be adopted in the tutorial component of this subject to help students develop crucial problem solving skills.
Level: Undergraduate Level 2 subject
Pre-requisite(s): NATS 2038 - Pathophysiology 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 2040 Physical Activity, Nutrition and Health (10 Credit Points)
Subject Details (p. 4498) **Legacy Code:** 401411
From 2020 this subject replaces 400892 - Physical Activity, Nutrition and Health. This subject examines the interdependence between physical activity, nutrition and health and the role of key lifestyle behaviours in improving health outcomes, longevity, and quality of life. Throughout this theoretical and practical subject, students explore personal and socio-cultural health issues, and identify how these health issues can be addressed in a proactive, holistic, and sustainable manner at an individual and population level.
Level: Undergraduate Level 2 subject
Equivalent Subjects: HLTH 1007 - Nutrition Physical Activity Mental Health HLTH 2019 - Physical Activity Nutrition and Health
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 2041 Experimental Foods (10 Credit Points)
Subject Details (p. 4499) **Legacy Code:** 301455
Developing innovative foods requires an understanding of food science and the principles that are applied when experimenting with food ingredients and processes. This subject will enable you to gain the scientific knowledge and methodology skills the food industry employs in the sustainable production of nutritious, healthy and appealing foods. Understanding the physical and chemical properties of, and current process techniques to produce different food types, will enable you to develop attributes required by the world's largest employment sector.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 2042 Science Research Methods (10 Credit Points)
Subject Details (p. 4500) **Legacy Code:** 301445
This subject aims to introduce you to the theories and practices underpinning scientific method. Through the course of the subject, you will develop analytical skills to quantify and interpret agricultural, zoological, and environmental data. You will use real-world issues, formulate an aim and research hypothesis and explore research methods and designs to conduct an experiment to test the hypothesis. You will also will be introduced to the types of biological variables, sources of measurement error, and the relationship between sample size and the conclusions that can be drawn from data; This subject enables you to develop skills in data analysis, interpretation and how to report on the findings of the research. The subject is structured so that lectures will provide theoretical expertise and workshops will reinforce your learning with practical experience preparing you for a career in science.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYA 5920 - Research Communities and their Environments NATS 2028 - Research Methods LGYA 6151 - Animal Research NATS 2025 - Natural Science Research Methods
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3001 Advanced Immunology (10 Credit Points)
Subject Details (p. 4501) **Legacy Code:** 300905
The human immune system is a milieu of cells, cytokines, chemokines, growth factors and cell adhesion molecules which form an elaborate molecular communication network through a number of signalling networks and molecules. The relevance of this knowledge for understanding the pathology and specific diseases of the human immune system are emphasised through the subject. This subject also provides an in depth analysis of the molecular mechanisms of cell to cell communication, cell activation, the immunological synapse, transplant rejection (including adoptive transfer experimentation), antigen presentation, B and T cell recruitment and MHC restriction. Medical and diagnostic applications of hybridoma technology, antibody engineering and advances in vaccine development are discussed. The laboratory course will develop technical and interpretative skills in relevant techniques, in particular the ImmunoCAP technology for asthma and allergy diagnosis.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BIOS 2014
Equivalent Subjects: NATS 3033 - Molecular Biological of the Immune System
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3002 Advanced Medicinal Chemistry (10 Credit Points)
Subject Details (p. 4502) **Legacy Code:** 300891
Medicinal Chemistry is an interdisciplinary science that exists at the intersection of chemistry, pharmacology, physiology and human health. Students will explore the multidisciplinary nature and interconnectedness of medicinal chemistry through in-depth study of topics that relate medicinal chemistry to disciplines such as physiology, natural product science, biochemistry and pharmacology. It will also explore the expectations of a professional medicinal chemist.
Level: Undergraduate Level 3 subject
Pre-requisite(s): CHEM 1005
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3003 Advanced Mortuary Practice (10 Credit Points)
Subject Details (p. 4503) **Legacy Code:** 301128
This subject further develops skills in a forensic mortuary practice. Students will undertake a placement within a NSW Forensic and Analytical Science Service (FASS) facility or NSW Organ and Tissue Donation Service. This subject, together with completion of 301127 Mortuary Practice is essential for graduates of this course seeking employment as a forensic technician with FASS.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MEDI 3008 - Mortuary Practice
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3004 Advanced Science Project C (10 Credit Points)
Subject Details (p. 4504) **Legacy Code:** 300910
This subject advances the students' training in thinking as a research scientist whilst developing practical skills in a particular area of interest. The student undertakes a minor research project under supervision, during which they plan how to answer a research problem, conduct research and present their findings in a research paper format and seminar.
Level: Undergraduate Level 3 subject
Pre-requisite(s): NATS 2002
Equivalent Subjects: LGYA 6169 - Advanced Science Research Project C
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3006 Anatomy of the Head and Neck (10 Credit Points)
Subject Details (p. 4505) **Legacy Code:** 300897
This subject builds on the systems anatomy taught during the first year, offering a regional study of the human head & neck. Emphasis is placed on the identification and description of the structures, including the correlation of structure and function. Cadaveric specimens are used to aid the learning of these regions and their three-dimensional aspect, including the anatomical variation found in these regions.
Level: Undergraduate Level 3 subject
Pre-requisite(s): NATS 1010 - Human Anatomy and Physiology 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3008 Complex Forensic Studies (10 Credit Points)
Subject Details (p. 4506) **Legacy Code:** 300911
This is an advanced and integrating capstone subject for students studying forensic science. It incorporates previous science, forensic science and social science subjects to form a comprehensive examination of the functionality of forensic evidence within the contemporary Australian judicial system. This capstone highlights the needs for an interdisciplinary approach to define and critique forensic science evidence from various perspectives including science, law, criminology, policing and social science. Students are required to use their skills and knowledge with additional independent research and inquiry using a range of set literature. The subject will study a range of contemporary issues including how the judicial system evaluates the reliability of evidence from an admissibility threshold, identification evidence from CCTV, contextual bias with forensic examination, contamination issues with forensic evidence and methods of expressing forensic findings and/or significance.
Level: Undergraduate Level 3 subject
Pre-requisite(s): NATS 3026 - Forensic Biology
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3009 Consumer Issues in Nutrition (10 Credit Points)
Subject Details (p. 4507) **Legacy Code:** 300928
This subject explores current food and nutrition issues. It introduces students to the factors that influence public health nutrition and explores (a) the contribution food systems and food security makes to consumer wellbeing; (b) the changing global marketplace and the impact of globalisation on food security and ecological sustainability; and (c) the complex inter-connections between government policy, globalisation, consumerism and human health. Students will assess nutritional status from available data and explore the role of community food systems. Students will also be introduced to social research methods and plan a social research study to address a nutrition related issue.
Level: Undergraduate Level 3 subject
Equivalent Subjects: NATS 2009 - Consumer Issues in Nutrition
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3010 Culinary Science (10 Credit Points)
Subject Details (p. 4507) **Legacy Code:** 300871
This subject applies scientific principles to the development, preparation and presentation of food products. Students are encouraged to become autonomous learners through problem-solving activities and experiential techniques. Students integrate and apply knowledge and skills from areas such as chemistry, biology, food science and nutrition to nutritionally focussed food products. Students are encouraged to keep abreast of food trends in the dynamic food industry as well as current nutritional issues within domestic, multicultural and indigenous communities. Students will utilise prior knowledge and skills to address specific nutritional issues and the development of new food products to fit within these boundaries.
Level: Undergraduate Level 3 subject
Pre-requisite(s): NATS 3014
Equivalent Subjects: NATS 3011 - Culinary Science LGYA 6198 - Culinary Studies
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3012 Environmental Forensic Investigations (10 Credit Points)
Subject Details (p. 4508) **Legacy Code:** 300981
This subject examines the forensic processes required to conduct investigations into environmental crime and incidents. The subject extends the student's knowledge and understanding of forensic science concepts to environmental scenarios, including illegal dumping, spills and water pollution incidents. The subject will discuss how scenes are investigated, what methods and techniques are used to analyse environmental samples, and how the results are interpreted and presented in the NSW Land and Environment Court. Factors effecting the collection, analysis and interpretation of evidence, such as weathering, are also discussed, as these are crucial to understand the scenes and to correctly present evidence in court.
Level: Undergraduate Level 3 subject
Pre-requisite(s): NATS 2019 - Forensic and Environmental Analysis
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3014 Experimental Foods (10 Credit Points)
Subject Details (p. 4509) **Legacy Code:** 300879
This subject aims to build on students' knowledge of food preparation gained in Food Science 1 and 2, the focus of this subject includes; food science and principles, the interaction of ingredients and the added effects of physical procedures on the end product. Students develop advanced scientific methodologies to give reproducibility. This is a recommended subject for those intending to advance in the areas of recipe development and new product development.
Level: Undergraduate Level 3 subject
Pre-requisite(s): PROC 2002 - Innovative Foods
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3015 Field Project 1 (10 Credit Points)
Subject Details (p. 4509) **Legacy Code:** 300913
Subject NATS 3015 Field Project 1 and the associated subject NATS 3017 Field Project 2 are designed as capstone subjects of study for either the Bachelor of Science or Bachelor of Natural Science degrees. They draw together the skills acquired in previous years of the course and apply them in the context of either a six-month or a year-long research project exploring a real world problem on behalf of an industry, government or community agency client. The student will develop skills in scoping, planning, implementing, reporting on the research project; reflecting on what has been learned in the context of their personal and professional development and how this can be used in future career planning. In this Field Project 1 subject the focus is on developing skills in designing an appropriate research project in collaboration with the industry client, contextualising the problem and appropriate research methods in the academic literature, developing and implementing a pilot study to test the proposed research methods, and reporting the results. Note: Students enrolling in the external offering of this subject must be externally enrolled in either the Bachelor of Science (Environmental Health) or Bachelor of Natural Science (Environment and Health) degrees. All other students enrolling externally will need Subject Coordinator approval.
Level: Undergraduate Level 3 subject
Equivalent Subjects: NATS 3016 - Field Project 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3017 Field Project 2 (10 Credit Points)
Subject Details (p. 4510) **Legacy Code:** 300914
Field Project 2 allows the student to extend the research project undertaken as the pilot study in Field Project 1. Note: Students enrolling in the external offering of this subject must be externally enrolled in either the Bachelor of Science (Environmental Health) or Bachelor of Natural Science (Environment and Health) degrees. All other students enrolling externally will need Subject Coordinator approval. Students who completed the Field Project 1 Subject in a previous year (i.e. are not continuing directly into this unit) will need to demonstrate that they have the data from this earlier Subject that can be used to produce an analysis and a report for their original client.
Level: Undergraduate Level 3 subject
Pre-requisite(s): NATS 3015
Equivalent Subjects: NATS 3018 - Field Project 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3020 Food Safety (10 Credit Points)
Subject Details (p. 4511) **Legacy Code:** 300859
Food safety is rapidly evolving with the emergence of new foodborne diseases, changing disease patterns, evolving approaches to risk analysis and an emerging requirement that food producers, processors, handlers and consumers take shared responsibility for food safety. This subject aims to equip students with the necessary skills to identify, evaluate and control foodborne hazards in order to protect the safety and quality of the food supply and reduce associated risks to human health. Content includes the key elements of food safety and regulation, food contamination, food spoilage agents, foodborne hazards, principles of good hygienic practice and preservation in food production, preparation and distribution.
Level: Undergraduate Level 3 subject
Equivalent Subjects: NATS 3021 - Food Safety
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3023 Forensic Anthropology (10 Credit Points)
Subject Details (p. 4512) **Legacy Code:** 301120
The objectives of this subject are to gain an understanding of the changes to the human body from death to discovery and how we can use the biological variability of humans to assist in the identification of human remains. Students will learn the fundamentals of detection, excavation and identification of human and non-human remains and learn how to prepare their findings for court. Students will be required to apply the knowledge gained during lectures to a practical based excavation, analysis and preparation of a case file.
Level: Undergraduate Level 3 subject
Pre-requisite(s): NATS 1008 - Forensic Science
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3026 Forensic Biology (10 Credit Points)
Subject Details (p. 4513) **Legacy Code:** 401170
This subject is designed to extend your knowledge and understanding regarding forensic biology and its relevance to forensic investigations. You will gain experience and understanding regarding the recognition and collection of biologically relevant evidence (including blood, semen and saliva), through to the application of presumptive testing, confirmatory testing, DNA profiling methods and evidence reporting. There is a focus on front-end forensic biology work (item examination, presumptive testing, DNA recovery via swabbing and isolation of biological material) coupled with a theoretical understanding of the scientific principles that underpin current DNA analysis techniques, presumptive tests and DNA profiling results.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BIOS 2018
Equivalent Subjects: NATS 2017 - Forensic Analysis of Physical Evidence BIOS 3017 - Invertebrate Biology
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3027 Laboratory Quality Management (10 Credit Points)
Subject Details (p. 4514) **Legacy Code:** 300883
This capstone subject is directed towards the accreditation of a laboratory for chemical, microbiological or forensic testing, using the standards that are applicable in industry. The subject focuses upon the importance and coordination of good laboratory management, teamwork, calibration, record keeping and laboratory manuals. Groups of students are required to develop, establish and operate a comprehensive Laboratory Quality Management system designed for a specific class of chemical, microbiological or forensic test. The students' technical competence and quality system are then assessed using the guidelines laid down by the National Association of Testing Authorities (NATA).
Level: Undergraduate Level 3 subject
Equivalent Subjects: NATS 3029 - Laboratory Quality Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3030 Medical Microbiology (10 Credit Points)
Subject Details (p. 4515) **Legacy Code:** 300826
Infectious diseases worldwide are the most common cause of illness. Medical microbiology is subdivided into four areas: virology, bacteriology, mycology (the study of fungi) and parasitology. The rapid evolution of microbes means that this is an area that does not remain static. This subject has a modern approach to the study of the balance between the host, humans, and the very large army of potential invaders. Students will embark on a journey into the world of pathogenic micro-organisms exploring the molecular mechanisms by which these override host defences leading to disease. Infectious diseases of the human body systems as well those of the immunocompromised and infections contracted in the healthcare setting (nosocomial) are discussed. The theory will be supported with laboratory experience representing diagnostic procedures for the identification of infectious agents.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BIOS 2022
Equivalent Subjects: LGYA 5866 - Medical Microbiology NATS 3031 - Medical Microbiology
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3032 Medical Science Project (10 Credit Points)
Subject Details (p. 4516) **Legacy Code:** 300892
Students will undertake a short research project specific to the field of Medical Science. This will involve undertaking a review of the literature and generating appropriate hypotheses that will subsequently be tested and analysed. Findings will be presented orally and as a written manuscript.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 6140 - Biomolecular Science Project NATS 3039 Science Research Project
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3034 Molecular Medicine (10 Credit Points)
Subject Details (p. 4516) **Legacy Code:** 300927
Molecular Medicine is an inquiry based capstone subject that integrates core concepts in molecular and cell biology with a focus on cancer as a framework to discuss autoimmune, infectious and genetic diseases. This subject aims to enhance critical thinking for the professional environment and prepares students for future innovations in prevention, management and cure of catastrophic diseases. Current research, diagnosis, treatment and policy issues, related to health and disease states, are placed in the context of real world experiences and changing imperatives.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 6144 - Molecular Basis of Disease LGYA 6012 - Mamalian Molecular Medicine
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3035 Molecular Pharmacokinetics (10 Credit Points)
Subject Details (p. 4517) **Legacy Code:** 300912
Molecular Pharmacokinetics builds on the fundamental chemical kinetic principles learnt in Physical Chemistry and extends them to the study of absorption, distribution, metabolism, and elimination of pharmaceutical drugs in human body. Upon completing this unit, students will gain a firm understanding of why the pharmacokinetic behaviour of a drug can be fully described by two key pharmacokinetic parameters (i.e. clearance and volume of distribution) and why the absorption rate of a drug can be predicted by examining its chemical structural features alone. Students will also gain the capability of designing dosage regimens for simplified pharmacokinetic scenarios and extracting important kinetic information from plasma drug concentration versus time data obtained experimentally.
Level: Undergraduate Level 3 subject
Pre-requisite(s): CHEM 2010
Equivalent Subjects: LGYA 6080 - Molecular Pharmacokinetics
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3037 Neuroanatomy (10 Credit Points)
Subject Details (p. 4518) **Legacy Code:** 300754
This subject builds on the human anatomy and physiology studied in first and second year, equipping students with detailed knowledge of functional neuroanatomy, with particular emphasis on the central nervous system. Cadaver specimens are used to facilitate the learning of spatial relationships between structures. The study of neurological function and dysfunction integrates many previously learned scientific principles.
Level: Undergraduate Level 3 subject
Pre-requisite(s): NATS 1009 Human Anatomy and Physiology 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3038 Quality Assurance and Food Analysis (10 Credit Points)
Subject Details (p. 4519) **Legacy Code:** 300922
This subject covers the knowledge and tools required to maintain food quality. Students will develop an awareness of food laws, regulations and codes at the state, national and international levels. Students will be introduced to elementary toxicology and risk analysis as it applies to the regulation of food additives. The subject also integrates previous studies in HACCP (Hazard Analysis Critical Control Point) to develop deeper understanding of food quality assurance and quality management systems as they are applied to the control and management of the food supply. Students are introduced to the standard methods of analysis of foods as used for nutritional and quality assessment of foods. Practicals include determination of major and minor food components; functionality tests and sensory analysis of foods.
Level: Undergraduate Level 3 subject
Pre-requisite(s): PROC 2002 - Innovative Foods
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3039 Science Research Project (10 Credit Points)
Subject Details (p. 4520) **Legacy Code:** 300924
Science Research Project is a final-year capstone subject that gives students an introduction to scientific research, while extending their knowledge and practical skills. Each student undertakes a research project supervised by an academic staff member. With the assistance of their supervisor, students will research the literature and define the problem to be studied, carry out a risk assessment, develop the appropriate experimental methods, carry out research on their project, and present a final written report and a poster or oral presentation. This subject offers a challenge to final-year students, and allows innovation by the student with respect to both method and research direction.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 6252 - Science Research Project
Incompatible Subjects: LGYA 6201 - Science Research Project 2 LGYA 5927 - Chemistry Project 3 LGYB 9720 - Biological Science Project 3 LGYA 3545 - Chemistry Project LGYA 6140 - Biomolecular Science Project
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3040 Topics in Medical Science (10 Credit Points)
Subject Details (p. 4521) **Legacy Code:** 300893
This subject builds on the content and concepts developed across multiple discipline areas during the Bachelor of Medical Science, integrating them together into the context of human health and disease. Students will work in groups to undertake an in depth exploration of an issue related to Medical Science. Topics addressed each year will vary, and will include issues currently at the forefront of Medical Science, issues for which there is currently significant scientific debate, and issues in which students have expressed a particular personal interest.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3041 Topics in Physiology (10 Credit Points)
Subject Details (p. 4522) **Legacy Code:** 300819
This subject builds on the physiological concepts of "Introduction to Physiology". It provides a greater depth and breadth of understanding of aspects of whole-body physiology which are explored in group work. Topics may include, but are not limited to, locomotion, physiology of reproductive technology, physiology of interaction between humans, physiology under extreme conditions (including pathophysiology), physiology of learning and memory, sleep physiology, animal physiology, nutritional physiology and others.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BIOS 1025 OR
BIOS 2006 OR
BIOS 3002
Equivalent Subjects: NATS 3042 - Topics in Physiology
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3043 Advanced Science Research Project C (10 Credit Points)
Subject Details (p. 4523) **Legacy Code:** 301258
This is a 20 credit point year-long subject taken over two terms (10 credit points in each term). This subject provides a unique opportunity for Advanced Science and Advanced Medical Science students to work with and be mentored by academics in diverse areas of science. In this 20 credit point subject, students will complete a small research project aligned with the research activity of the academic and be integrated into the research environment of the School. Students will demonstrate time management skills, project design, data collection, analysis and communication. Students will be required to reflect on their capacity and areas of passion for transitioning into either further education or the workplace. Please note this subject is not timetabled so completion will be subject to approved timelines negotiated with the appropriate academic staff and subject co-ordinator. Students may be required to travel to a different campus or location to undertake this subject.
Level: Undergraduate Level 3 subject
Incompatible Subjects: NATS 3004 - Advanced Science Project C
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3044 Complex Case Studies in Science (10 Credit Points)
Subject Details (p. 4525) **Legacy Code:** 301261
Science and the scientific process of discovery have been successful in offering explanations for the world we live in. Even seemingly simple problems can disguise a far greater degree of complexity. Indeed, the more we develop our tools for scientific discovery the greater the degree of complexity that is revealed. Exploring and unravelling the complexity of the world we live in requires integrative and multidisciplinary research frameworks, and it can be complicated further by the relationship between science and society, culturally, socially, economically and politically. In this subject we will begin the life-long journey to develop the enquiring scientific mind by exploring the complexities of seemingly innocuous everyday elements. Students will critically examine such perspectives in a series of contemporary 'real-life' case studies such as foods and food security, medicines and drugs.
Level: Undergraduate Level 3 subject
Incompatible Subjects: NATS 2023 Integrated Science
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3045 Work Internship for Science Professionals (10 Credit Points)
Subject Details (p. 4526) **Legacy Code:** 301259
This subject will provide second and third year science students with an opportunity to undertake a short work placement within a professional organisation. The placement will allow students to observe and develop professional skills and behaviour and integrate theoretical and practical science knowledge and conventions into a real world setting. Students will find their own placement but may be aided by the Subject Coordinator. In consultation with the Subject Coordinator and the workplace supervisor, students will develop a Professional Task to accomplish during their placement. The Professional Task will enhance their workplace skills and highlight how their science knowledge can be adapted and integrated into a professional career. The subject will assure that students have job readiness. Students may need to travel to other campuses or locations to complete this subject.
Level: Undergraduate Level 3 subject
Equivalent Subjects: NATS 2032 Work Integrated Learning in Science
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3046 Advanced Physiology (10 Credit Points)
Subject Details (p. 4527) **Legacy Code:** 301355
From 2020 this subject replaces 300851 - Advanced Physiology. Physiology is the study of the way in which a living organism and its bodily parts function. This subject will examine integrative aspects of physiological control mechanisms comprising multiple organ systems and mechanisms of adaptation to environmental factors. It will focus on regulatory function of ion channels, neurophysiology, sensory physiology, motor control, metabolism, cardiovascular and respiratory systems. Students will have the opportunity to independently research, in depth, an area of physiology pertinent to their interest.
Level: Undergraduate Level 3 subject
Pre-requisite(s): NATS 2034 - Human Systems Physiology 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3047 Applied Physiology (10 Credit Points)
Subject Details (p. 4528) **Legacy Code:** 401412
From 2020 this subject replaces 401146 - Applied Physiology. This subject focuses on the application of exercise physiology in sporting and physically demanding occupation contexts. Concepts covered include: muscular fatigue, soreness & recovery, General Adaption Syndrome Theory, testing, training and periodisation in an individualised approach to the client. Students will develop skills to appropriately: select, justify perform and evaluate a number of laboratory, field and functional tests; analyse, interpret and communicate test results; prepare, justify, implement and evaluate individualised training and recovery plans (long and short term); incorporate other sport and exercise science sub-disciplines into plans and appropriately adjust plans for environmental challenges.
Level: Undergraduate Level 3 subject
Pre-requisite(s): HLTH 2005 AND
HLTH 2004 AND
BIOS 2012
Equivalent Subjects: BIOS 3022 - Sport Physiology BIOS 3003 - Advanced Sport Physiology BIOS 3008 - Applied Physiology
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3048 Food Formulations (10 Credit Points)
Subject Details (p. 4529) **Legacy Code:** 301453
This subject applies scientific principles to the development, preparation and presentation of food products. You will be encouraged to become autonomous learners through problem-solving activities and experiential techniques. You will integrate and apply knowledge and skills from areas such as chemistry, biology, food science and nutrition to nutritionally focussed food products. You will also be encouraged to keep abreast of food trends in the dynamic food industry as well as current nutritional issues within domestic, multicultural and indigenous communities. Students will utilise prior knowledge and skills to address specific nutritional issues and the development of new food products to fit within these boundaries.
Level: Undergraduate Level 3 subject
Equivalent Subjects: NATS 3011 - Culinary Science LGYA 6198 - Culinary Studies NATS 3010 - Culinary Science
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3051 Innovation in Design and Delivery (10 Credit Points)
Subject Details (p. 4530)
What is innovation? Innovation can be thought of as the application of existing knowledge or processes to solve a problem. Innovation requires an interdisciplinary approach to problem solving, encompassing discipline-specific knowledge, as well as an awareness of social, economic, and environmental factors. You will work as part of a team to use existing data or processes to deliver an innovative solution to a problem. In this subject you will develop important job-ready skills to translate ideas into outcomes.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 5001 Crime Scene Investigation (PG) (10 Credit Points)
Subject Details (p. 4531)
A substantial amount of forensic evidence used in the prosecution of criminal cases is initially established at the crime scene. Recognising, detecting, recovering, preserving, and recording this evidence forms a critical function within forensic science and criminal investigation. This subject explores the main aspects of crime scene investigation, including: crime scene processes, recognition of evidence, documentation of crime scenes, evidence detection and enhancement, maintaining evidence integrity, and bloodstain pattern analysis. It also covers professional practices associated with evidence handling and case file management.
Level: Postgraduate Coursework Level 5 subject
Equivalent Subjects: NATS7006 Crime Scene Investigation (PG)
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 6001 Introduction to Neuroscience (10 Credit Points)
Subject Details (p. 4532) **Legacy Code:** 401471
This subject is an introduction to the nervous system with a focus on its role and the function. It provides a strong foundation in modern neuroscience for those wishing to apply the principles of sensory and motor system function with the aim of mimicking human biology via neuromorphic implementations. Students will have access to expertise from a multidisciplinary team, guiding their learning in the areas of cellular, computational, behavioural and biomedical neuroscience. Topics covered in the subject will include introductory biology, structure and function of the nervous system, computational modelling, bio-signal acquisition and signal processing. This subject will be undertaken at Parramatta City - Hassall St campus.
Level: Postgraduate Coursework Level 6 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7001 Advanced Criminalistics (10 Credit Points)
Subject Details (p. 4532) **Legacy Code:** 301151
This subject is designed to provide an in-depth knowledge of the following eight evidence categories: glass, textile fibres, paint, fire debris, explosives, firearm discharge residues, illicit drugs, and hair. Each stand-alone module introduces the evidence type and its forensic significance, details the relevant distinguishing and discriminating characteristics for the trace material in question, presents the analytical techniques commonly applied in the criminalistics laboratory, and discusses data interpretation and evidential value. The subject is unique in terms of its coverage of these trace evidence categories from an operational forensic science perspective.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7002 Biological Agents 1 (10 Credit Points)
Subject Details (p. 4533) **Legacy Code:** 301154
This subject introduces students to the key concepts involved in Biosecurity and Microbial Forensics, with a focus on understanding the types of biological agents that pose potential security risks and the system and practices involved in investigation and management of potential threats.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7003 Biological Agents 2 (10 Credit Points)
Subject Details (p. 4534) **Legacy Code:** 301155
This subject builds on the knowledge gained in the Biological Agents 1 and develops students' understanding of the tools and processes involved in the field of biosecurity. This subject is taught by the University of Canberra as part of a collaborative venture between the University of Canberra and Western Sydney University. Note: Further information on this subject is available from the University of Canberra.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7004 Blood Distribution and Spatter (10 Credit Points)
Subject Details (p. 4534) **Legacy Code:** 301149
This subject will provide an in-depth review of the principles of blood spatter creation, and blood stain interpretation as it pertains to biological evidence. This subject is taught by the University of Florida as part of a collaborative venture between the University of Florida and Western Sydney University. Note: Further information on this subject is available from the University of Florida.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7005 Chinese Medicine Specialities 1 (10 Credit Points)
Subject Details (p. 4535) **Legacy Code:** 400687
This subject will enable practitioners to extend their understanding of the Traditional Chinese Medicine (TCM) diagnosis and management of a range of gastrointestinal and paediatric disorders. A feature of this subject is the integration of TCM and western medical approaches. Treatment will focus on acupuncture with common patent Chinese herbal medicine treatments included.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7006 Crime Scene Investigation (PG) (10 Credit Points)
Subject Details (p. 4536) **Legacy Code:** 301131
A substantial amount of forensic evidence used in the prosecution of criminal cases is initially established at the crime scene. Recognising, detecting, recovering, preserving and recording this evidence forms a critical function within forensic science and criminal investigation. This subject explores the main aspects of crime scene investigation, including: crime scene processes, recognition of evidence, documentation of crime scenes, evidence detection and enhancement, maintaining evidence integrity, and bloodstain pattern analysis. It also covers professional practices associated with evidence handling and case file management.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7007 Drug Biotransformation and Molecular Mechanisms of Toxicity (10 Credit Points)
Subject Details (p. 4537) **Legacy Code:** 301139
This subject provides a strong conceptual foundation of enzymology and mechanisms of drug biotransformation pathways. As a foundation for learning we will provide examples of drugs and other xenobiotics that exhibit toxicity related to biotransformation. This subject is taught by the University of Florida as part of a collaborative venture between the University of Florida and Western Sydney University. Note: Further information on this subject is available from the University of Florida.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): NATS 7030
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7008 Environmental Forensics 1 (10 Credit Points)
Subject Details (p. 4538) **Legacy Code:** 301152
The subject is designed for professionals working in environmental regulatory authorities and laboratories at the federal, state or local level. This includes but is not limited to police jurisdictions, environmental protection agencies (EPAs), coastguards, park rangers, customs and quarantine officials. It is designed to give the environment law enforcement officer a background in the principles of contaminant analysis and transport in the environment with the ultimate aim of determining liability for pollution. The syllabus includes the main modes of contaminant transport in air, water and land, as well as an in-depth look at hydrocarbon fingerprinting.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7009 Environmental Forensics 2 (10 Credit Points)
Subject Details (p. 4539) **Legacy Code:** 301153
The subject is designed for professionals working in environmental regulatory authorities and laboratories at the federal, state or local level. This includes but is not limited to police jurisdictions, environmental protection agencies (EPAs), coastguards, park rangers, customs and quarantine officials. The subject consists of four case studies drawn from real-world scenarios. The skills and knowledge gained from Environmental Forensics 1 will be used to produce environmental forensic reports related to the case studies. The assessment is problem-based.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): NATS 7008
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7011 Experimental Design and Analysis PG A (20 Credit Points)
Subject Details (p. 4539) **Legacy Code:** 401266
Experimental Design and Analysis can be taken independently or in combination in Autumn (Experimental Design and Analysis PG A) and/or Spring (Experimental Design and Analysis PG B) semesters. Working closely with their assigned supervisor(s), students in the health, medical, biomedical and natural sciences will enhance their expertise in experimental methodologies and knowledge of advanced discipline-specific concepts in the first year of the Masters of Research. Completion of one these two units will allow students to demonstrate theoretical and practical skills directly relevant to their proposed research project. Completion of both units will allow students to build upon initial results, and to gain experience in additional methodologies and experimental techniques. These units will also complement the Master of Research core units Research Design 1 and 2, providing a foundation for students to formulate their research question and thesis proposal.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: NATS 7010 - Experimental Design and Analysis PG NOTE Co-Requisite units removed from Spring 2021
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7012 Experimental Design and Analysis PG B (20 Credit Points)
Subject Details (p. 4541) **Legacy Code:** 401267
Experimental Design and Analysis can be taken independently or in combination in Autumn (Experimental Design and Analysis PG A) and/or Spring (Experimental Design and Analysis PG B) semesters. Working closely with their assigned supervisor(s), students in the health, medical, biomedical and natural sciences will enhance their expertise in experimental methodologies and knowledge of advanced discipline-specific concepts in the first year of the Masters of Research. Completion of one these two units will allow students to demonstrate theoretical and practical skills directly relevant to their proposed research project. Completion of both units will allow students to build upon initial results, and to gain experience in additional methodologies and experimental techniques. These units will also complement the Master of Research core units Research Design 1 and 2, providing a foundation for students to formulate their research question and thesis proposal.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: NATS 7010 - Experimental Design and Analysis PG NOTE Co-Requisite units removed from Spring 2021
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7013 Explosives (10 Credit Points)
Subject Details (p. 4542) **Legacy Code:** 301156
The subject provides information on the range of explosive compounds that may be encountered in incidents involving national security. It also covers improvised explosive devices, security screening applications, bomb scene management, and the forensic recovery and analysis of explosive residues. The subject concludes with case studies designed to illustrate the concepts covered in the preceding modules.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7014 Fingerprint Detection and Identification (10 Credit Points)
Subject Details (p. 4542) **Legacy Code:** 301132
This subject aims to provide the student with a detailed understanding of the scientific methodologies applied to the detection, enhancement and identification of fingerprint evidence in a forensic context. The detection methods presented cover all of the current optical, physical and chemical techniques, as well as an insight into new approaches that are likely to have an impact over the next decade. The generally-accepted ACE-V methodology for fingerprint identification is discussed, together with the application of Bayesian statistics that has gained momentum as a preferred assessment method for this form of forensic evidence.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7015 Food Evaluation (10 Credit Points)
Subject Details (p. 4543) **Legacy Code:** 301181
This subject aims to provide students with the knowledge and skills required to evaluate food quality and safety. Students are introduced to contemporary methods of analysis of foods as used for nutritional, quality and safety assessment. Practical work includes determination of major and minor food components; physical and functionality tests; sensory assessment and microbiological analysis of foods.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7016 Food Preservation and Packaging Technologies (10 Credit Points)
Subject Details (p. 4544) **Legacy Code:** 301180
The objective of this subject is to provide students with an understanding of food preservation and food packaging technologies. Contemporary physical and chemical food preservation technologies will be examined, including chilling, freezing, thermal processing, fermentation, dehydration, chemical agents and novel non-thermal techniques. The chemical, physical, functional and nutritional properties of food commodities will also be examined, providing a scientific context for food quality, safety and nutrition. Students will study packaging materials science to be able to select the most appropriate packaging solutions for a range of food applications.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7017 Food Product Design (10 Credit Points)
Subject Details (p. 4545) **Legacy Code:** 301183
This subject introduces students to theories and practices underpinning new product development, including idea generation, market research and product lifecycles. Students will apply emerging technologies, new ingredients and other innovative concepts relating to food preservation and food evaluation to research and develop new food products. Students will work on formulation design, assessment of ingredient and additive functions, effects of processing, optimization of quality and acceptability of foods. They will assess product packaging and storage stability, along with developing a food safety plan. They will also produce a final product specification and labelling requirements compliant with current food regulations.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): NATS 7015 - Food Evaluation
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7018 Food Quality Management (10 Credit Points)
Subject Details (p. 4546) **Legacy Code:** 301182
This subject introduces students to food quality management principles and their application in ensuring product quality and safety. Students will learn to develop, evaluate and audit food safety programs based on Hazard Analysis and Critical Control Point and total quality management systems. Students will also examine statistical process control, food laws, regulations and codes at the state, national and international levels, as well as the application of scientific risk assessment to the development of food regulations.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): NATS 7016
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7019 Forensic Analysis of DNA (10 Credit Points)
Subject Details (p. 4547) **Legacy Code:** 301148
This subject will introduce students to the identification and evaluation of biological evidence in criminal matters using DNA technologies, including the methods routinely used for the isolation of DNA from cells and techniques applied to DNA quantitation, electrophoretic separation, sequence determination, as well as data interpretation, analysis and reporting. This subject is taught by the University of Florida as part of a collaborative venture between the University of Florida and Western Sydney University. Note: Further information on this subject is available from the University of Florida.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7020 Forensic Anthropology (PG) (10 Credit Points)
Subject Details (p. 4548) **Legacy Code:** 301147
This subject will provide an introduction to the basic knowledge needed to perform some of the forensic anthropologist's tasks, especially anatomy and human osteology. Due to the impossibility of teaching a laboratory class, we will substitute the hands-on experience by a carefully selected set of pictures and material in order to familiarize you with the practice of the discipline. This subject is taught by the University of Florida as part of a collaborative venture between the University of Florida and Western Sydney University. Note: Further information on this subject is available from the University of Florida.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7022 Forensic Genetics (10 Credit Points)
Subject Details (p. 4549) **Legacy Code:** 301144
The subject is designed to introduce genetics so that even if you haven't studied it before you will develop an understanding that will inform your practice in work. The context of this subject is forensic science but rather than jump straight into forensic DNA analysis this is a foundation subject, designed to give a framework of human molecular genetics. We will also look at some of the important issues in genetics including genome mapping and the role of gene dysfunction in disease. The first module is an overview and it is very important that you use the assignment time to check out some websites that will be very useful later on. This subject is taught by the University of Florida as part of a collaborative venture between the University of Florida and Western Sydney University. Note: Further information on this subject is available from the University of Florida.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7023 Forensic Immunology (10 Credit Points)
Subject Details (p. 4550) **Legacy Code:** 301146
This subject will introduce students to the principles of immunology, immunological techniques, and their application to forensic analyses. This subject is taught by the University of Florida as part of a collaborative venture between the University of Florida and Western Sydney University. Note: Further information on this subject is available from the University of Florida.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7024 Forensic Medicine I (10 Credit Points)
Subject Details (p. 4551) **Legacy Code:** 301133
This subject covers the basic elements of forensic medicine and focuses on the role of the forensic pathologist in the investigation of crime and death. Although much of forensic medicine, based as it is on observations made at a post-mortem examination, relies on the principles of morbid anatomy as discovered in earlier centuries, more recent techniques are also presented. This subject is taught by the University of Florida as part of a collaborative venture between the University of Florida and Western Sydney University. Note: Further information on this subject is available from the University of Florida.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7025 Forensic Medicine II (10 Credit Points)
Subject Details (p. 4552) **Legacy Code:** 301134
This subject gives knowledge and understanding of relevant medical concepts, techniques and methods in order that the candidate has sufficient competence to interpret human diseases, conditions and behavior in a forensic setting. An understanding of the organizational structures involved in the practice of forensic medicine both locally and internationally, increase in the candidate's awareness of how forensic medicine relates to the wider context of society and how it contributes towards improving that society. This subject is taught by the University of Florida as part of a collaborative venture between the University of Florida and Western Sydney University. Note: Further information on this subject is available from the University of Florida.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): NATS 7024
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7026 Forensic Research 1 (10 Credit Points)
Subject Details (p. 4553) **Legacy Code:** 301129
This subject provides the basic framework and methodology required for planning and executing forensic research. The subject encompasses the scientific methods, practical tools and organizational skills important for implementing independent and original forensic research at an international level.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7027 Forensic Research 2 (10 Credit Points)
Subject Details (p. 4554) **Legacy Code:** 301130
This subject builds on the knowledge gained in the prerequisite subject Forensic Research 1 and further develops skills to enable the independent and confident planning, design and execution of an original forensic research project chosen by the student. The skills and tools acquired in Forensic Research 1 will help facilitate effective communication of research project findings through scientific report writing and presentation in formats appropriate for international journal publication and conferences.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): NATS 7026
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7028 Forensic Toxicology I (10 Credit Points)
Subject Details (p. 4555) **Legacy Code:** 301136
This course has been developed to introduce students to the concepts, procedures, processes and terminology routinely encountered in the execution of applied forensic toxicological analyses. Our objective is to educate students in the theoretical aspects of drug and analytical chemistry applied to forensic toxicology. This subject is taught by the University of Florida as part of a collaborative venture between the University of Florida and Western Sydney University. Note: Further information on this subject is available from the University of Florida.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7029 Forensic Toxicology II (10 Credit Points)
Subject Details (p. 4556) **Legacy Code:** 301137
This subject will expand on concepts encountered in Forensic Toxicology I, providing in-depth knowledge of pharmacology and toxicology as it pertains to commonly encountered abused and toxic substances. This subject is unique in offering modules in doping control, expert testimony and human performance and postmortem toxicology. This subject is taught by the University of Florida as part of a collaborative venture between the University of Florida and Western Sydney University. Note: Further information on this subject is available from the University of Florida.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): NATS 7028
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7030 General Toxicology (10 Credit Points)
Subject Details (p. 4557) **Legacy Code:** 301135
This subject, which is primarily book-based, is structured to comprehensively provide the student with the fundamental concepts of toxicology as they relate to specific organ and tissue systems. We aim to supplement this information with online study guides, detailed module objectives and critical thinking exercises. The objective of this subject is to familiarize students with the procedures for using WWW resources for communication and educational purposes and to introduce students to the principles, concepts and terminology utilized in the field of toxicology. This subject is taught by the University of Florida as part of a collaborative venture between the University of Florida and Western Sydney University. Note: Further information on this subject is available from the University of Florida.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7033 MSc Research Project (20 Credit Points)
Subject Details (p. 4558) **Legacy Code:** 401156
Science Research Project is a capstone subject that gives students the opportunity to conduct scientific research, while extending their knowledge and practical skills. Each student undertakes a research project supervised by an academic staff member which has as its central focus the scientific analysis and resolution of a complex problem. The research project is conducted in an area of relevance to professional discipline, and students can choose from a range of approved research designs. Students must undertake a review of the relevant literature, formulation of a research question, design of an appropriate method, collection and analysis of data, interpretation of findings, the production of a research report and presentation of these findings.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7034 Managing for Sustainability (20 Credit Points)
Subject Details (p. 4559) **Legacy Code:** 401155
This online subject is concerned with delivering and supporting sustainability management. Students will develop a multi-disciplinary perspective on resources, sustainability and health and safety management which will incorporate strategy, policy, data collection and knowledge management. It will introduce students to a systemic approach for studying organisational operations and methods for quantifying and optimising resource use and energy use while using tools to reduce environmental, societal and financial risk. Students will also learn how to improve the efficiency and effectiveness with which organisations can incorporate sustainability issues and to identify future trends and drivers for change in this area.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7035 Medicinal Chemistry of Drugs of Abuse (10 Credit Points)
Subject Details (p. 4560) **Legacy Code:** 301140
This subject will address the fundamental concepts and principles involved in the examination of biological evidence and the practices of serology as they relate to crime scene and forensic investigation. This subject is taught by the University of Florida as part of a collaborative venture between the University of Florida and Western Sydney University. Note: Further information on this subject is available from the University of Florida.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7037 Natural Medicinal Products (10 Credit Points)
Subject Details (p. 4561) **Legacy Code:** 301141
This subject has been developed to introduce students to the procedures and processes associated with the production, isolation, characterization and use of medicinal drugs of plant origin. This subject is taught by the University of Florida as part of a collaborative venture between the University of Florida and Western Sydney University. Note: Further information on this subject is available from the University of Florida.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7039 Pharmaceutical Analysis (10 Credit Points)
Subject Details (p. 4562) **Legacy Code:** 301143
This subject focuses on the characterisation and the structural proof of drug compounds routinely encountered in Forensic and Pharmaceutical laboratories. This subject is taught by the University of Florida as part of a collaborative venture between the University of Florida and Western Sydney University. Note: Further information on this subject is available from the University of Florida.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7040 Research Skills in Science (20 Credit Points)
Subject Details (p. 4563) **Legacy Code:** 401154
This subject builds on undergraduate level science to develop a strong appreciation of postgraduate research skills. It will develop knowledge and understanding of techniques and skills applicable to postgraduate scientific study and research methodologies and critical awareness of literature. It will support you in understanding and evaluating current research. You will use technology to develop your information literacy skills, to communicate and to collaborate with others. You will also learn to act autonomously in planning and implementing work at a professional level. You will recognise how skills are continually developed through experience and can be transferred to other situations.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7044 Science and Health Research Project PG (10 Credit Points)
Subject Details (p. 4563) **Legacy Code:** 300742
This is a 20 credit point year-long subject taken over two terms (10 credit points in each term). This subject develops critical and analytical skills by undertaking and completing a research project in an area of relevance. The project is carried out on an individual basis. Research projects are offered in consultation with staff who possess research interests and experience in relevant areas.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): AGEN 7003 OR
LGYA 6022
Equivalent Subjects: LGYB 8292 - Masters research project LGYB 9563 - Research Project 811 LGYB 9568 - Research Project 821 LGYB 9570 - Research Project 831 LGYB 9572 - Research Project - Science LGYB 9574 - Research Project 841 LGYA 6231 - Science Research Project PG
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7045 Special Issues in Science - PG (10 Credit Points)
Subject Details (p. 4564) **Legacy Code:** 300685
This is an individual project subject that is designed for the Master of Science program. It provides the student with an in depth understanding of a specific topic relevant to their field of study. It will include information retrieval techniques as well as written and oral communication skills. In addition, it may include the acquisition of technical skills.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYB 8291 - Special Issues In Sustainable Development LGYB 8470 - Special Issues In Environmental Management LGYC 0924 - Special Issues In Science Technology LGYB 9581 - Personal Study M
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7046 Strategic Management in the Sciences A (20 Credit Points)
Subject Details (p. 4565) **Legacy Code:** 401158
This preparatory online subject introduces students to the strategic, business and operational aspects of the life science industry. The subject equips students to understand the challenges and conventional wisdom within this industry with a particular focus on research and innovation. Students will learn techniques to develop coherent and credible alternative future scenarios including an understanding of strategic option development, and strategic resource allocation. Students will also acquire research, analytical and critical judgement skills enabling them to deal with important issues such as finance, uncertainty and risk.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7047 Synthetic Medicinal Chemistry (10 Credit Points)
Subject Details (p. 4565) **Legacy Code:** 301142
This subject has been developed to introduce students to the chemical principles and procedures surrounding the synthesis of commonly encountered licit and illicit chemical substances, and to introduce you to the processes involved in the forensic analysis of clandestine drug laboratories. This subject is taught by the University of Florida as part of a collaborative venture between the University of Florida and Western Sydney University. Note: Further information on this subject is available from the University of Florida.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7048 Toxic Substances (10 Credit Points)
Subject Details (p. 4566) **Legacy Code:** 301138
This subject, which is primarily book-based, will comprehensively provide the student with the fundamental concepts of toxicology as they relate to specific organ and tissue systems. We aim to supplement this information with online study guides, detailed module objectives and critical thinking exercises using online journal articles. The objective of this subject is to familiarize students with many of the most important toxic substances, their toxic effects, and ways to treat poisoned patients. Several example toxicants are presented and discussed in detail.. There are literally tens of thousands of chemicals in commerce, and nature offers even greater numbers of chemicals to which individuals are exposed. According to the basic tenets of toxicology, any of these substances in sufficient doses is toxic, although some clearly are of greater health concern than others. The objective of this subject is to provide the student with information on the toxic properties of selected chemicals to illustrate principles regarding mechanisms of toxicity, the array of signs and symptoms associated with intoxication, approaches to clinical assessment of poisoning, and methods of treatment. Examples have been selected from several chemical classes and include agents that may be encountered occupationally, environmentally, in medicine, or in the context of substance abuse. This subject is taught by the University of Florida as part of a collaborative venture between the University of Florida and Western Sydney University. Note: Further information on this subject is available from the University of Florida.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): NATS 7030
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7049 Toxicology of Chemical Weapons (10 Credit Points)
Subject Details (p. 4567) **Legacy Code:** 301150
This subject is structured to comprehensively provide the student with the fundamental toxicologically relevant concepts of weapons that can be used to create mass casualties. These weapons are often called weapons of mass destruction, a term that is closely related to but not synonymous with mass-casualty weapons (a technically more appropriate term). This subject will focus on chemical agents and toxins as the toxicologically relevant mass-casualty weapons. Each of the eight modules in the subject will consist of specific objectives, one or more illustrative cases, a list of the primary references that the student will be expected to acquaint himself or herself with, a brief introduction, a section of teaching material and study tips, and assignments designed to stimulate critical thinking. The general objectives of this subject are to familiarize the student with the toxicological concepts applicable to chemical and toxin weapons of mass destruction; to provide useful references for study, discussion, and reference; and to provide experience in critical thinking about the clinical toxicology of these agents. This subject is taught by the University of Florida as part of a collaborative venture between the University of Florida and Western Sydney University. Note: Further information on this subject is available from the University of Florida.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7050 Transferable Research Skills (10 Credit Points)
Subject Details (p. 4568) **Legacy Code:** 401164
This subject is an elective subject as part of the Master of Research and provides training in essential skills for research students in the health, medical, biomedical and natural sciences. Students will select two modules that will provide experience in advanced techniques and methodologies directly relevant to a specific area of research. It is expected that this subject, together with the subject Experimental Design and Analysis, will provide students in the health, medical, biomedical and natural sciences with a solid foundation before commencing the research project in the second year of the Master of Research degree.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7051 Applied research with marginalised populations and sensitive health topics (10 Credit Points)
Subject Details (p. 4569) **Legacy Code:** 800215
This subject will teach students practical knowledge and skills for conducting research with marginalised populations and on sensitive health topics. Students will learn ethical, methodological, and practical considerations in applied qualitative and mixed method research. Upon completion of the subject students will be able to develop a theoretically coherent qualitative or mixed method research protocol and justify their decision making at every stage of the research process. The skills developed in this subject will enable students to adapt research methods to ensure the integrity of the research process with marginalised populations and sensitive health topics.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7053 MSc Research Project (extended) (20 Credit Points)
Subject Details (p. 4570) **Legacy Code:** 301372
This subject extends the research project undertaken in 401156 MSc Research Project into a substantial piece of research work. This subject provides a further opportunity for students to demonstrate that they can consolidate the knowledge acquired through their course of study, understand how existing evidence/information relates to research topics, and how their own work adds to this body of knowledge. The finding of the project will be presented in a thesis and in an oral presentation. On completion of the MSc with this subject, the student should have sufficient research project work to qualify for entry into a PhD program.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): NATS 7033
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7054 Professional Topic (10 Credit Points)
Subject Details (p. 4571) **Legacy Code:** 301374
This subject is designed to allow high achieving students to comprehensively explore a relevant topic of interest to them, either through a minor supervised research project or an investigation of an issue directly related to their chosen discipline or a work internship in your chosen discipline. This unit's flexible delivery offers a unique experience specific to each project and student. Students in this subject will develop extensive skills through project-based learning essential for employment and/or higher degree studies.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7055 Experiment Design and Project Management (10 Credit Points)
Subject Details (p. 4571) **Legacy Code:** 301371
Essential to a career in any branch of science is the ability to design the experiments of a project and manage this project to an outcome. This subject provides an introduction to the general theory of experiment design. The subject reviews the role of randomisation and replication in experiment design, considers the design techniques of constancy, blocking, and presents a number of experimental designs. This subject also covers the tools and techniques for effectively managing projects. Topics include development of project plans; estimation of time and resources; risk analysis and management; scheduling and control; resource allocation; project tracking; project closure and review.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7056 Clinical Research in Health Science (10 Credit Points)
Subject Details (p. 4572) **Legacy Code:** 800225
This subject will teach students practical knowledge and skills for conducting clinical research within the field of Health Science. Students will learn ethical, methodological and practical considerations in applied quantitative and mixed- method research within the framework of a human clinical trial. Upon completion of the subject students will have an understanding of basic human clinical trial design, novel clinical trial designs, specialisation within various study fields. They will also have consideration of stakeholders and translational importance, trial governance, regulations and the Therapeutic Goods Administration (TGA), intellectual property, commercialisation, recruitment, and advertising and marketing. Finally, they will understand the importance of translational impact via publications and the media, and be able to synthesise trial data via knowing how to conduct systematic reviews and meta-analyses.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7057 Research Preparation in Post Graduate Studies (10 Credit Points)
Subject Details (p. 4573) **Legacy Code:** 301387
Life is research! This subject introduces students to the nature of research and why it is essential to today's way of living. What are the current and big questions in research? How to prepare for conducting a research in various areas? What are the differences between study, investigation and research? In this subject, the main emphasis will be on different types of modern research and their methods/methodologies with special emphasis on Science, Technology, Engineering & Mathematics (STEM). This subject will also encompass various advanced tools that support research, its writing styles, publication channels and research ethics. Key elements of good research design are also introduced as well as the concepts of intellectual property and commercialisation.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: ENGR 7018 - Research Preparation in Post Graduate Studies
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7058 Forensic Analysis of DNA 2 (10 Credit Points)
Subject Details (p. 4574) **Legacy Code:** 301434
Forensic Analysis of DNA 2 is a continuation of 301148 Forensic Analysis of DNA where students learn about the methods routinely used for the isolation of DNA from cells and techniques applied to DNA quantitation and electrophoretic separation, as well as data analysis, interpretation and reporting. In DNA 2, students learn how to interpret DNA data to include mixture deconvolution and the statistics that apply to DNA matches/inclusions. Modules also guide the student through the basis of Y-STR and Kinship testing statistical applications. Students will also learn the report writing, review and testimony skills required of a DNA analyst. This subject is taught by the University of Florida as part of a collaborative venture with Western Sydney University. (Note: This subject description is as provided by the University of Florida; see: https://forensicscience.ufl.edu/programs/courses/forensic-analysis-of-dna-2/)
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): NATS 7019
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7059 Forensic Digital Imaging (10 Credit Points)
Subject Details (p. 4575) **Legacy Code:** 301442
This online subject is designed to provide an in-depth knowledge of scientific and forensic imaging. Forensic digital imaging serves important functions within forensic science for the purpose of scene and item documentation, detection and enhancement of forensic evidence, and as a means of communicating forensic observations and interpretations. The subject includes modules covering the following areas: physics of light, colour and optics; forensic photographic lighting techniques; image recording systems; image processing; and principles of forensic photography and imaging. This subject is taught by the University of Lausanne, Switzerland, as part of a collaborative venture between Western Sydney University and the University of Lausanne.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 9001 Higher Degree Research Thesis - NICM Health Research Institute (10,20 Credit Points)
Subject Details (p. 4576) **Legacy Code:** 800214
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 9002 Higher Degree Research Thesis - Food Science and Biotechnology (10,20 Credit Points)
Subject Details (p. 4578) **Legacy Code:** 800085
Level: PhD and Research Masters Level 9 subject

CULT 0006 Key Concepts and Skills in the Social Sciences (WSTC Prep) (10 Credit Points)
Subject Details (p. 2898) **Legacy Code:** 700323
The subject will introduce academic skills allowing students to become successful, reflective and independent tertiary learners. Students will develop a foundational understanding of key theories, concepts, debates and perspectives relevant to the successive first year university subjects within the field of Social Sciences. This subject will support students towards completion of an interactive authentic task, designed to explore possible positive change in contemporary social life.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: HUMN 0016 - Key Ideas in Arts and Social Science (WSTC Prep)
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 1001 Asia in the World (10 Credit Points)
Subject Details (p. 2900) **Legacy Code:** 101442
This subject introduces Asian societies, cultures, religions, and histories. Considering both traditional and contemporary times, it seeks to place Asia's diverse cultures in a global context. It examines issues such as how to define Asia, how Asian states related to each other, and how Western ideas of international relations have transformed these relations. The subject considers how the great religions/philosophies of Asian societies - Buddhism, Hinduism, Islam, Christianity and Confucianism - have influenced Asian states and relations between them. It explores other forces which have shaped the civilisations, polities and communities of Asia and how they have related to each other and the world beyond.
Level: Undergraduate Level 1 subject
Equivalent Subjects: LGYA 0912 - Foundations of Asia
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 1005 Crime, Deviance and Society (10 Credit Points)
Subject Details (p. 2901) **Legacy Code:** 102039
This subject introduces students to the theory and practice of criminology and the sociology of deviance. It considers the ways in which social order is produced, maintained and transgressed from a range of perspectives, including the Chicago school, labelling and deviance theory, Marxism, feminism, and post-colonial theory. These perspectives are explored through a discussion of contemporary issues and controversies, such as terrorism, asylum seeking, the criminalisation of protest, Indigenous incarceration, alcohol and other drug use, and transnational crime.
Level: Undergraduate Level 1 subject
Equivalent Subjects: CULT 1009 - Introduction to Criminology LGYB 0467 - Introduction to Criminology CULT 1006 - Crime Deviance and Society (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 1006 Crime, Deviance and Society (WSTC) (10 Credit Points)
Subject Details (p. 2902) **Legacy Code:** 700156
This subject introduces the major approaches to the study of criminology and the sociology of deviance. It considers the ways in which social order is produced, maintained and transgressed from a range of perspectives, including the Chicago school, labelling and deviance theory, Marxism, feminism and queer theory. These perspectives are explored through a discussion of contemporary issues and controversies, such as crime in Western Sydney, the media and moral panic, the criminalisation of HIV transmission, Indigenous incarceration, and alcohol and drug abuse. The subject also addresses the politics of law and order and the resurgence of neo-liberalism in debates over crime and deviance.
Level: Undergraduate Level 1 subject
Equivalent Subjects: CULT 1009 Introduction to Criminology CULT 1005 Crime Deviance and Society LGYB 0467 Introduction to Criminology (UWSC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 1007 Introduction to Crime and Criminal Justice (10 Credit Points)
Subject Details (p. 2904) **Legacy Code:** 101560
In 2019 this subject replaced by 102709 - Introduction to Criminal Justice.This subject provides an introduction to the study of criminal justice from a critical criminological perspective. How crime is measured and explained, who are identified as criminals or victims, and how to effectively respond to crime is not straightforward. The subject examines the workings of the criminal justice system, and analyses how police, courts and corrections influence the processes of criminalisation and victimisation, and the societal context in which this occurs. The subject looks at other forms of control and prevention beyond those of the criminal justice system.
Level: Undergraduate Level 1 subject
Equivalent Subjects: CULT 1024 - Introduction to Criminal Justice CULT 1025 - Introduction to Criminal Justice (WSTC) CULT 1008 - Introduction to Crime and Criminal Justice (WSTC) CULT 1003 - Crime and Criminal Justice
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 1012 Policing, Justice and Society (10 Credit Points)
Subject Details (p. 2904) **Legacy Code:** 102318
In this introductory subject to policing, who the police are, what they do and the practice of policing will be described explained and analysed. The subject will consider the communities, groups and individuals the practice of policing exposes the police and other criminal justice agencies to. Students will consider and critically think about contemporary strategies and approaches applied to policing practice in the 21st Century. Students in this subject will also explore policing theory and apply it to practice. As this is an introductory subject, a focus on developing students' academic skills such as writing for university, reading and annotating will feature throughout the delivery of content.
Level: Undergraduate Level 1 subject
Equivalent Subjects: CULT 1013 - Policing Justice and Society JUST 2012 - Law Evidence and Procedure CULT 1016 - Theories and Concepts of Policing CULT 1015 - Theories and Concepts of Policing
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 1013 Policing, Justice and Society (WSTC) (10 Credit Points)
Subject Details (p. 2905) **Legacy Code:** 700238
In this unit, the role and function of police from a social, historical and comparative perspective as well as different policing practices in Australia and other nations, are described, explained and analysed. The structure, roles, and reform of police are addressed, as are other issues such as social diversity and community relations and debates about distinct policing strategies and their social impact. Students will explore the relevance of policing theories and concepts in contemporary society.
Level: Undergraduate Level 1 subject
Equivalent Subjects: JUST 2012 - Law Evidence and Procedure CULT 1016 - Theories and Concepts of Policing (UWSC) CULT 1015 - Theories and Concepts of Policing CULT 1012 - Policing Justice and Society
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 1017 Understanding Society (10 Credit Points)
Subject Details (p. 2906) **Legacy Code:** 101551
Understanding Society introduces first year students to key sociological concepts, methods and theories used for the examination of individuals, social interactions, institutions and structures. Students explore how individual experiences are connected to wider social patterns. Considering questions of power, students will be introduced to various debates concerning structure and agency, and will examine social inequality. With a focus on contemporary social life, the subject provides opportunity for students to consider current social issues and processes of social change. At the conclusion of their studies in this subject students will have been presented with opportunities to develop skills in critical reading and sociological analysis.
Level: Undergraduate Level 1 subject
Equivalent Subjects: HUMN 1037 – Introduction to Sociology CULT 1019 - Understanding Society (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 1018 Understanding Society (Block Mode) (10 Credit Points)
Subject Details (p. 2908) **Legacy Code:** 101763
Understanding Society will introduce students in the first year of their studies to key concepts and theories used in examining and understanding social action, social policy, social institutions, social structure and social change. Students enrolled in the subject will be introduced to factual information concerning contemporary societies and the methods of interpreting such information. At the conclusion of their studies in this subject students will have been presented with opportunities to develop skills in critical reading and sociological analysis.
Level: Undergraduate Level 1 subject
Equivalent Subjects: LGYA 7648 - Introduction to Sociology 1 (AREPMETRO)
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 1019 Understanding Society (WSTC) (10 Credit Points)
Subject Details (p. 2908) **Legacy Code:** 700049
Understanding Society introduces first year students to key sociological concepts, methods and theories used for the examination of individuals, social interactions, institutions and structures. Students explore how individual experiences are connected to wider social patterns. Considering questions of power, students will be introduced to various debates concerning structure and agency, and will examine social inequality. With a focus on contemporary social life, the subject provides opportunity for students to consider current social issues and processes of social change. At the conclusion of their studies in this subject students will have been presented with opportunities to develop skills in critical reading and sociological analysis.
Level: Undergraduate Level 1 subject
Equivalent Subjects: CULT 1017 - Understanding Society
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 1020 Working with Communities (10 Credit Points)
Subject Details (p. 2909) **Legacy Code:** 101900
In 2021, this subject replaced by 102815 - Introduction to Indigenous Australia: Peoples, Places and Philosophies. A diverse range of professionals use social science research, theories and principles in their work with communities. In this subject students will explore common scholarly ideas and practices that inform work with communities and how these are applied in a range of professional settings. This subject introduces students to the methods and principles of community participation, capacity-building, community needs assessment, and resilience. Students will be guided to identify and analyse global, local, government and organisational aspects and interests in the development of their own and wider communities. Students will plan a professional approach to working with an example community by building and reporting on a chosen case study.
Level: Undergraduate Level 1 subject
Equivalent Subjects: CULT 1011 - Organisations Communities and Communication BUSM 1033 - Working with Communities HUMN 1060 - Introduction to Indigenous Australia Peoples Places and Philosophies CULT 1021 Working with Communities (WSTC)

Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 1021 Working with Communities (WSTC) (10 Credit Points)
Subject Details (p. 2910) **Legacy Code:** 700139
This introductory subject provides foundational skills and knowledge required for professional practice in a range of social science related careers in which working with and as part of communities is essential. With an emphasis on practical understanding through both team-work and fieldwork it introduces students to a range of skills in interpersonal and written communication, and to community and organisational processes and structures. It enables students to identify issues of change; conflicting and collaborative interests; participation and collaboration. It provides practical experience in working with others to achieve shared objectives with mechanisms for goal setting, issues identification, information and resource sharing that operate in everyday life and all professional contexts
Level: Undergraduate Level 1 subject
Equivalent Subjects: CULT 1011 - Organisations Communities and Communication CULT 1020 - Working with Communities LGYB 0465 - Organisations Communities and Communication
Incompatible Subjects: WELF 1008 - Skills Development in the Human Service
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 1022 Working with Cultural Differences (10 Credit Points)
Subject Details (p. 2911) **Legacy Code:** 101664
This subject is designed to develop student awareness of culture, identity and difference in the Australian context. Students are introduced to and expected to develop a working knowledge of the concepts of culture, identity, power relations, whiteness and difference. From these theoretical bases, issues of identity and difference and power relations are explored in the Australian context with particular focus on Indigenous/non-Indigenous relations and multiculturalism. In addition, the effects of socially constructed differences of race, gender, class, and sexuality are explored.
Level: Undergraduate Level 1 subject
Equivalent Subjects: CEDS 2002 - Working with Cultural Differences in Educational Settings (UG) CULT 1023 - Working with Cultural Differences (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 1023 Working with Cultural Differences (WSTC) (10 Credit Points)
Subject Details (p. 2912) **Legacy Code:** 700140
The purpose of this subject is to develop awareness and understanding of cultural differences, whiteness and power relations in Australian society. Students are introduced to and required to develop a working understanding of theories of whiteness, culture, identity, difference and relations of power. Through assignments and activities students have the opportunity to work through the application of these theories in relation to different groups and social issues in the Australian context.
Level: Undergraduate Level 1 subject
Equivalent Subjects: CULT 1022 Working with Cultural Differences HUMN 1046 Tourism in Society (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 1024 Introduction to Criminal Justice (10 Credit Points)
Subject Details (p. 2914) **Legacy Code:** 102709
This subject introduces students to criminal justice issues and practices through an examination of the Australian criminal justice system and its processes. This is achieved through a court visit (either virtual or physical) as a method of unobtrusive participant observation. Students will examine how the criminal justice system works (and sometimes fails to work), and how police, courts, and corrections influence the processes of criminalisation, victimisation, and (in)justice.
Level: Undergraduate Level 1 subject
Equivalent Subjects: CULT 1007 - Introduction to Crime and Criminal Justice CULT 1003 - Crime and Criminal Justice CULT 1008 - Introduction to Crime and Criminal Justice (WSTC) CULT 1025 - Introduction to Criminal Justice (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 1025 Introduction to Criminal Justice (WSTC) (10 Credit Points)
Subject Details (p. 2915) **Legacy Code:** 700300
This subject introduces students to criminology, policing, and criminal justice issues and practices through an examination of the Australian criminal justice process. Students will examine how the criminal justice system works (and sometimes fails to work), and how police, courts, and corrections influence the processes of criminalisation, victimisation, and (in)justice.
Level: Undergraduate Level 1 subject

CULT 1028 Introduction to Criminology and Justice (WSTC) (10 Credit Points)
Subject Details (p. 2919)
This subject introduces students to the development of criminology as a framework for analysis and offers a critical introductory insight into various applied institutional and legislative contexts through which criminal justice occurs. Students will consider the ways in which deviant and/or criminal behaviour is defined and how the legislative and policy responses to crime operate at the level of Police, Courts and Corrections as well as the communities in which they operate. By the end of this subject, students will consider a crime or deviance issue and reflect on current practice. Students will gain skills in assessing criminal justice issues holistically through a critical lens.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 2004 Culture, Identity, Difference (Block Mode) (10 Credit Points)
Subject Details (p. 2919) **Legacy Code:** 101766
This subject introduces students to a range of contemporary theories and concepts that will develop their understanding and analysis of culture, identity and difference within the Australian context. Students will explore the historical and social aspects of culture and identity, and the power and positioning within these. Locations of difference will also be explored such as gender, race, class, ethnicity, sexuality, ability, geography in the Australian context.
Level: Undergraduate Level 2 subject
Equivalent Subjects: CULT 1022 - Working with Cultural Differences CEDS 2002 - Working with Cultural Differences in Educational Settings LGYA 7380 - Working with Cultural Differences in Educational Settings
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 2005 Ethics in the Social Sciences (10 Credit Points)
Subject Details (p. 2920) **Legacy Code:** 101555
This subject introduces students to the nature of western ethics and moral discourses, to ethical methodology and to the possibilities and limits of ethical discourse and practice. It covers the history of the formalisation of ethics as well as its current philosophical, sociological, and professional dimensions. It also deals with various case studies of ethical issues and moral debates students may encounter in their everyday day and professional lives. Students will be invited to reflect on moral discourse(s), their own understanding of morality, and on the use of ethics for social justice and fairness.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 2006 Evidence, Investigations and Police Intelligence (10 Credit Points)
Subject Details (p. 2922) **Legacy Code:** 101567
This unit aims to provide an overview of police investigations with a specific focus on understanding the interaction of police powers and the investigative process. The unit will introduce the common criminal offences in order to outline the investigative process through scenario based case studies. The unit will refer to both NSW and Commonwealth legislation. The unit will also examine the role of the courts in applying the rules of evidence to determine whether or not evidence gathered by investigators is sufficiently reliable to be admitted into evidence at a trial. The unit will examine the impact of technological change on the investigative process including the impact of forensic science. Whilst NSW legislation will be a significant focus, the investigative process is universally applicable.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 2007 International Politics of North Asia (10 Credit Points)
Subject Details (p. 2922) **Legacy Code:** 100872
This subject examines contemporary foreign policy issues in North Asia from the perspective of China and Japan. Core issues include a critical evaluation of contemporary Sino-Japanese relations, the role both countries play in regional affairs and why North Asia (in particular the Korean Peninsular) is an intersection point for geo-politics.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYA 0268 - International Relations of Northeast Asia
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 2011 Prisons, Punishment and Criminal Justice (10 Credit Points)
Subject Details (p. 2922) **Legacy Code:** 102036
The demise of corporal punishment and the regular use of imprisonment are defining features of control in modern states. This subject provides an historical and sociological examination of the models, practices and justifications for punishment and incarceration. It begins with an overview of early liberal notions of the social contract, the modern movement away from corporal punishment towards incarceration, and criminology's emphasis on treatment, reform and rehabilitation. Following from this, the subject explores the development of probation and parole systems, decarceration, community corrections, mass imprisonment, and the contemporary control of risk and 'dangerous' populations. These themes are considered through the role of intersecting structural factors such as age, gender, sexuality, social class, racial/ethnic identity and disability, and the impact of imprisonment and corrections on different individuals and groups.
Level: Undergraduate Level 2 subject
Equivalent Subjects: CULT 2010 - Prisons and Punishment
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 2016 Evidence and Investigation (10 Credit Points)
Subject Details (p. 2923) **Legacy Code:** 102691
This subject provides an overview of police investigations with a specific focus on understanding the interaction of police powers and the investigative process. The subject will build on knowledge of the common criminal offences covered in the subject 'Criminal Law for Policing' and outline the investigative process through scenario-based case studies. The subject will refer to both NSW and Commonwealth legislation, and examine the role of the courts in applying the rules of evidence to determine its reliability to be admitted as evidence at a trial. The subject will examine the impact of technological change and forensic science on the traditional investigative process, and provide students an introduction to research into the organisation, processes and governance of Investigative Units.
Level: Undergraduate Level 2 subject
Equivalent Subjects: JUST 2005 - Criminal Investigations
Incompatible Subjects: CULT 2006 - Evidence Investigations and Police Intelligence
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 2017 Youth Justice and Practice (10 Credit Points)
Subject Details (p. 2924) **Legacy Code:** 102699
This subject develops an understanding of the complexity of youth justice by addressing the historical, political, cultural and socio-economic factors associated with youth crime, constructions of youth, and, governmental strategies for regulating and preventing youth crime. Insights from legal practitioners, police, youth workers, adolescent psychologists, and juvenile justice case managers form part of the unit's inter-disciplinary framework. This is used to develop a critical appreciation of the impacts of the regulation of particular youth groups that are over-represented in the juvenile justice system, including Aboriginal and Torres Strait Islander youth, youth in out-of-home care, and other racial/ethnic minority youth. Lastly, the subject critically assesses a range of official interventions for working with young people within the youth justice system.
Level: Undergraduate Level 2 subject
Equivalent Subjects: CULT 2009 - Juvenile Crime and Justice
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 2018 Crime Prevention and Drugs (10 Credit Points)
Subject Details (p. 2925) **Legacy Code:** 102708
This subject will examine the theory, politics and practice of crime prevention while exploring how this relates to alcohol, illicit drug use and criminalisation. In particular, this subject will explore key elements of alcohol and other drugs (AOD) research, service delivery and policy approaches that are framed, both practically and symbolically as crime prevention measures. It will address current approaches to crime prevention, evaluate their effectiveness and examine emerging strategies in the field. Some key case studies in the field of critical drugs studies will be used throughout this subject to demonstrate some principles of crime prevention introduced in the first part of the subject.
Level: Undergraduate Level 2 subject
Incompatible Subjects: CULT 3008 - Crime Prevention and Community
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 2019 First Peoples and Criminal Justice (10 Credit Points)
Subject Details (p. 2927) **Legacy Code:** 102712
In 2022 this subject replaced by 102916 First Peoples and Criminal Justice. How does colonialism underscore the foundational narratives, knowledges and operation of the legal and criminal justice institutions of colonised nations? Focusing primarily on the Australian context of colonial invasion and settlement, this subject explores the plight of Indigenous peoples and their severe over-representation in the Australian criminal justice system. Studying the impact of colonisation and exploring Indigenous narratives, students will critically examine issues faced by Aboriginal and/or Torres Strait Islander people and their experience of criminal justice in Australia. Overall, the subject will equip students with an understanding of the relationship between dominant colonial narratives of race and institutional racism, while considering how Indigenous knowledge can inform better social and criminal justice outcomes for Indigenous populations. Comparative examples of criminal (in)justice for Indigenous populations in other colonised nations will also be considered.
Level: Undergraduate Level 2 subject
Incompatible Subjects: WELF 2008 - Human Rights Human Services and the Law
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 3001 Applied Social Research (10 Credit Points)
Subject Details (p. 2927) **Legacy Code:** 101552
In this subject students continue their education in social research, building on 400337 Social Research Methods. Students gain experience in using tools and techniques for the collection, analysis and interpretation of quantitative and qualitative data using real world examples. They gain experience in using various primary and secondary sources of data and designing the collection of data through surveys and interviews. Students will also examine the application of research to, for example, program evaluation and policy development, thus preparing students for professional contexts as generators and critical consumers of social research.
Level: Undergraduate Level 3 subject
Pre-requisite(s): HUMN 2066 Investigating and Communicating Social Problems
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 3002 Children's Culture (10 Credit Points)
Subject Details (p. 2929) **Legacy Code:** 101265
This subject explores the concept of children's culture and the diversity of cultures to which children belong. The subject focuses on current debates about childhood and children's culture, including the rise of children's consumer culture. Students will gain insights into children's lives and culture by critically engaging with a variety of objects and institutions that are part of children's lives, for example, toys, videogames, children's television programs, films and books. The subject will also examine the role of adults in children's culture, including in marketing and advertising to children.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 3004 Consumer Culture (10 Credit Points)
Subject Details (p. 2930) **Legacy Code:** 102413
Consumption and consumerism are words that frequently have negative connotations in popular usage, yet globally, rates of consumption and consumerism continue to grow. This subject presents cultural research that investigates the range of consequences - positive, negative or otherwise - that the rise of consumer culture has brought to contemporary global societies. Students analyse a range of cultural products and practices, and consider topics including the ethics of consumption, the role of consumption in forming identities, how consumer culture relates to class, gender, race and ethnicity, the rise of brands, and consumer culture in the digital age.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 1026 - Consumer Culture
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 3007 Contemporary Social Issues and Professional Practice (10 Credit Points)
Subject Details (p. 2931) **Legacy Code:** 102203
Focused upon professional practice this subject will provide Social Sciences students with an opportunity to improve their career readiness. Using a combination of practical and theoretical teaching framework, this subject will teach students how to translate their social science knowledge to professional, career relevant knowledge. In doing so, it will also provide students an opportunity to engage with contemporary social issues related, for example, to diversity, work and employment, place, sustainability, violence and alternative to violence, health and cyberworld and cyber-experiences.
Level: Undergraduate Level 3 subject
Equivalent Subjects: CULT 3005 - Contemporary Debates in Social Sciences
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 3008 Crime Prevention and Community (10 Credit Points)
Subject Details (p. 2933) **Legacy Code:** 102038
In Spring 2020 this subject replaced by 102708 - Crime Prevention and Drugs. This subject will examine the theory, politics and practice of crime prevention. It will address current approaches to crime prevention, evaluate their effectiveness and examine emerging strategies in the field. The subject will consider the diversity of crimes and the ways in which some are constructed as preventable and others are not, while discussing the challenges posed by unreported crime, fear of crime and the relation between patterns of victimisation and social disadvantage. The subject will draw on empirical literature linking individual, social and contextual factors to the production and prevention of deviant behaviours and explore the potential of crime prevention strategies for alleviating the social ills associated with crime and deviance.
Level: Undergraduate Level 3 subject
Equivalent Subjects: CULT 2014 - Victimisation and Crime Prevention
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 3010 Culture and Crime (10 Credit Points)
Subject Details (p. 2933) **Legacy Code:** 101562
In 2020 this subject replaced by 102710 - Crime, Media, Culture. Contemporary societies are replete with images of crime, including in fiction, the media, film and television. In this subject we explore this phenomenon through the lens of cultural criminology and its interest in the exciting and adrenaline-inducing aspects of crime. We explore the link between culture and crime by looking at both textual/visual and ethnographic research. This means studying the way crime is experienced as 'thrilling' not only by those who consume it via images but also by those who actually engage in violent and transgressive conduct. This subject examines the relationship between cultural images of crime, the lived experience of criminal activity and its social and cultural impact.
Level: Undergraduate Level 3 subject
Equivalent Subjects: CULT 3024 - Crime Media Culture
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 3011 Ethical Leadership (10 Credit Points)
Subject Details (p. 2934) **Legacy Code:** 102250
This subject focuses on major ethical theories, challenges, and concepts in a cross disciplinary environment. Students' knowledge and understanding of ethics will be further developed through interdisciplinary lenses on critical ethical thinking and decision-making. Students will be required to analyse ethical frameworks and systemic failure to discuss and reflect on various cross disciplinary challenges in diverse settings. By applying ethical concepts to personal journeys as citizen scholars and future professionals, students will develop their own ethical framework and gain skills required for future success as emergent leaders.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 3013 Gender, Crime and Violence (10 Credit Points)
Subject Details (p. 2935) **Legacy Code:** 101561
In recent decades, models and understanding of gender have become a major way of explaining crime and victimisation. Most obviously, feminist researchers have pioneered studies of the neglected victimisation of women from male violence and the impact of gendered discourses on the criminal justice system. This subject will critically engage with this material and also focus on contemporary accounts of the links between criminal offending and different violent and non-violent masculinities. Lastly, the shifting regulation of different sexualities and their criminalisation will be analysed.
Level: Undergraduate Level 3 subject
Pre-requisite(s): CULT 1024
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 3014 Heritage Interpretation (10 Credit Points)
Subject Details (p. 2936) **Legacy Code:** 101643
In 2023, this subject is replaced by HUMN 3117 - Place-Making for Tourism and the Cultural Economics. This subject examines the theory and practice of heritage interpretation for visitors at natural and cultural heritage sites. It examines the development of heritage interpretation within national parks and museums and explores the various issues facing contemporary interpretation in the context of multicultural and postcolonial societies and the advent of digital media.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 6067 Heritage Interpretation LGYA 1270 - Heritage Interpretation
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 3015 Heritage and Tourism (10 Credit Points)
Subject Details (p. 2937) **Legacy Code:** 101599
In 2023 this subject is replaced by TOUR 3002 - Cultural Tourism and Events. This subject examines the relationship between heritage (both cultural and natural) resources and tourism. It firstly provides an introduction to contemporary issues in heritage and tourism management. Secondly, it investigates the phenomenon of heritage and tourism - its nature, the market, visitors, the issues in planning and management - in the context of sustainable tourism praxis in Australia (and globally) as well as in the context of local communities.
Level: Undergraduate Level 3 subject
Incompatible Subjects: LGYA 6066 Cultural Heritage and Tourism LGYA 1269 Cultural Heritage and Tourism
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 3016 Indigenous Cultures: A Global Perspective (10 Credit Points)
Subject Details (p. 2938) **Legacy Code:** 101905
In 2023, this subject is replaced by HUMN 3118 - Indigenous Cultures: A Global Perspective. Drawing on global case studies, this subject aims to introduce students to some of the pressing socio-cultural issues facing indigenous peoples around the world. The subject examines the complex relationships between globalisation, colonialism and post-colonialism and contemporary indigenous cultures and identities. It draws attention to the way in which issues of representation, cultural autonomy, cultural commodification, development and human rights play out with respect to indigenous peoples' lives. More specifically, the subject interrogates the power relations and politics central to many of these issues and examines the nature of contemporary indigenous and non-indigenous interactions, particularly in the contexts of tourism and heritage, the cultural industries, the environment, development and urbanisation.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 5759 - Indigenous Tourism LGYA 0631 - Indigenous Cultures and Tourism A Global Perspective
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 3017 Legislation, Courts and Policing (10 Credit Points)
Subject Details (p. 2939) **Legacy Code:** 101568
This subject introduces students to the adversarial system, the legislative context of everyday policing, and the different forms of state and federal courts. It includes an emphasis on police powers (NSW and elsewhere), summary and indictable offences, and the role of enforcement and discretion. In particular alternative resolution and specialist courts are described and their role and function analysed. This subject is of value to students in policing, criminology, law, and community welfare.
Level: Undergraduate Level 3 subject
Incompatible Subjects: JUST 2012 - Law Evidence and Procedure
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 3018 Perspectives in Criminology (10 Credit Points)
Subject Details (p. 2940) **Legacy Code:** 102037
Contemporary criminological knowledge typically concerns explanations of offending, victimisation, prevention and safety, but debates about these matters also reflect unequal power, social division and exclusion. The subject will focus on the criminological concern with offenders across all domains, with particular attention to crimes of the powerful. Additionally, it will analyse the impacts of the blurred lines between the public and private, the national and global, citizens and aliens, as well as evidence about the expansion of more intensive forms of governance in national and global contexts.
Level: Undergraduate Level 3 subject
Pre-requisite(s): CULT 1005 AND
CULT 1024
Equivalent Subjects: CULT 3006 - Contemporary Perspectives in Criminology
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 3020 Representing Crime (10 Credit Points)
Subject Details (p. 2941) **Legacy Code:** 101005
This subject deals with the evolution of the figure of the detective and of the criminal; the development of an aesthetics of crime from the later 18th Century; the dynamic nature of fiction, film and television genres of detection. Literatures of sensation, detective fictions, true crime writing and the non-fiction novel will all be examined to allow an in-depth analysis of the changing ethical and psychological character of the detective, and of his nemeses. The crime story in film, television and in other new media may also be addressed to facilitate an analysis of changing cultural contexts for the crime story.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYC 1299 - Representing Crime
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 3021 Theories of Authority (10 Credit Points)
Subject Details (p. 2942) **Legacy Code:** 101913
The subject will trace the idea of authority in the West back to its genesis in Ancient Greece and track its development in modern thought. The aim is to demonstrate the variegated relation between power, law and revolution by closely examining a wide array of texts in a variety of disciplinary fields, including literature.
Level: Undergraduate Level 3 subject
Equivalent Subjects: CULT 3019 - Politics and Religion
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 3023 Global Citizenship and Engagement (5 Credit Points)
Subject Details (p. 2942) **Legacy Code:** 301218
This is a 10 credit point year-long subject taken over two terms (5 credit point in each term). The subject claims to engage students with current global contexts to integrate professional knowledge and develop skills, attitudes and behaviours that support them to be global citizens with inter-cultural competence. As part of the subject students will be required to undertake an global learning experience relevant to their studies. This experience may involve travel to an overseas organisation and/or community, or participation with a local or online globally focused organisation. The subject is completed across a year of study, with the first semester a preparatory experience, mid-semester the opportunity to complete an global short program, and the final semester a time to reflect. Students will immerse themselves in their new global environment, make sense of the organisation's or a community's modes of action and meaning, and negotiate their ways of acting and being in the process of becoming a member and contributing to the organisation and/or community with which they engage. Students in this subject will reflect on global engagement experiences to discuss self-learning and how this learning informs personal and professional development.
Level: Undergraduate Level 3 subject
Pre-requisite(s): Students must have completed 120cp in their currently enrolled course prior to enrolling in this unit
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 3024 Crime, Media, Culture (10 Credit Points)
Subject Details (p. 2943) **Legacy Code:** 102710
There is a close relationship between representations of crime in mass and social media, and policy and legal responses to crime. Media consumers are producing and circulating content about crime and criminality through new media technologies, and some are using social media and the internet to engage in new forms of criminality. In this subject, we explore the complex role of mass media and 'new' media in debates over crime and crime control, and the facilitation of criminality by media technologies. This means studying contemporary media theory and its relevance for criminology, and the effects of social media and computing technology on representations and practices of criminality. The subject maintains a strong focus on the ways in which media and culture informs crime policy and criminal justice processes.
Level: Undergraduate Level 3 subject
Equivalent Subjects: CULT 3010 - Culture and Crime
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 3025 Prisons, Punishment and Criminal Justice (10 Credit Points)
Subject Details (p. 2945) **Legacy Code:** 102711
The demise of corporal punishment and the rise of incarceration are defining features of control in modern states. This subject provides an historical and sociological examination of the models, practices and justifications for punishment and incarceration. It begins with an overview of early liberal notions of the social contract, the modern movement away from corporal punishment towards incarceration, and a subsequent welfare oriented emphasis on treatment, reform and rehabilitation. Following from this, the subject explores the development of probation and parole systems, decarceration, community corrections, mass imprisonment, and the contemporary control of risk and 'dangerous' populations. These themes are considered through an intersectional analysis of structural factors such as age, gender, sexuality, social class, racial/ethnic identity and the impact of imprisonment and corrections on different individuals and groups. This subject pays particular attention to the over-representation of Indigenous populations in Australian prisons.
Level: Undergraduate Level 3 subject
Incompatible Subjects: CULT 2011 - Prisons Punishment and Criminal Justice (Level 2)
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 6002 Gender Security and Violence (10 Credit Points)
Subject Details (p. 2947)
Deploying critical feminist and gender theory, this subject examines and distinguishes between specific issues pertaining to gender violence within war and peace, and across different domestic and international contexts. Through the lens of actual, threatened, and symbolic gender violence and its consequences, this subject also unpacks the concept of gender (in)security as both a part of, and as a distinct component from, human security more broadly. Throughout the semester, students will consider these themes through domestic and international case studies and will be required to discern effective practices and responses to gender violence, from those approaches that perpetuate gender inequity and harm. By the end of this subject, students will be able to draft theoretically informed gender security initiatives.
Level: Postgraduate Coursework Level 6 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 7001 Economies and Ecologies (10 Credit Points)
Subject Details (p. 2947) **Legacy Code:** 800174
This subject examines how the economy is being reclaimed as a space of political decision in the Anthropocene, the new geological epoch in which human activity is having global impact on the Earth's ecosystems. It critically explores how different ways of thinking about economy shape the worlds we inhabit. It analyses contemporary examples of economic experimentation and human-non-human assemblages that are making 'other worlds' possible. It explores connections between ecological and economic thinking and asks how our conception of the economy and subjectivity changes when we consider the needs of other species as well as our own.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 7002 Engaging Discursive Fields (10 Credit Points)
Subject Details (p. 2948) **Legacy Code:** 102340
This subject creates an opportunity for intensive reading on the candidate's research project. Lectures and seminars direct students to identify classic texts, watershed publications, leading scholars, and current debates in their chosen field of research. While expanding their knowledge of existing scholarship, they will become aware of the discursive structures and academic protocols that govern their discipline. What theoretical approaches are used? What does the field of research require of its scholars? What makes their work authoritative? What sources do they use? What questions guide their research? In what context? How has the discursive field changed over time? Such questions direct the formulation of a research project of current relevance.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 7003 Environmental Humanities (10 Credit Points)
Subject Details (p. 2948) **Legacy Code:** 102339
This subject provides an overview of the emerging interdisciplinary field of Environmental Humanities. It provides a space of dialogue for Humanities, Arts and Social Sciences (HASS) and Science, Technology, Engineering and Mathematics (STEM) students to work collaboratively in developing novel ways of thinking about the relationships between culture and nature. The subject centres on emerging conceptual trends interrogating notions such as: Anthropocene, extinction, planetary boundaries, critical zones, socio-ecological change dynamics, as a way of engaging with fundamental questions of meaning, justice, value, responsibility and purpose in a time of rapid and escalating change. The subject also focuses on methodological issues and tackles questions of co-construction between HASS and STEM disciplines.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 7004 Global Digital Futures (10 Credit Points)
Subject Details (p. 2949) **Legacy Code:** 102412
This subject explores how innovation in the digital era is transforming society on a global scale. Reflecting on examples drawn from around the world, students learn about the latest trends in communication, media, computing and the knowledge economy. Current and future directions are surveyed in the context of contemporary issues such as big data, digital identity and privacy, social media and crowdsourcing, gaming and visualisation, geographical information systems, virtual environments and artificial intelligence.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: CULT 7007 - Text Media and Memory
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 7006 Rethinking Culture and Society (10 Credit Points)
Subject Details (p. 2950) **Legacy Code:** 800196
This subject explores key ideas in social and cultural analysis - such as culture, society, experience, power, nature, local/global, etc - as a way of helping students think through their own research projects. It draws on an approach to cultural and social research, developed at the Institute for Culture and Society, which addresses the contradictions of a world that is increasingly globalised, culturally diverse and technologically mediated. A key aspect of this approach is to revisit the central concepts of social and cultural theory, linked to an overview of existing approaches, developing skills of critical analysis and reflecting on the challenges of interdisciplinarity, methodological pluralism, cultural complexity and engaged research.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 7008 The Cutting Edge: Advanced Studies in Humanities and Communication Arts (10 Credit Points)
Subject Details (p. 2951) **Legacy Code:** 102298
The School of Humanities and Communication Arts teaches across a range of disciplines including Design, Music, Creative Arts, Communications and Media, Languages and Linguistics, Cultural and Social Analysis, Philosophy, Literary Studies, History and Political Thought, International Relations and Asian Studies, Indigenous Studies. This shell subject provides advanced academic training, advanced knowledge and intellectual development in the student's academic discipline by focusing on current debates in selected fields of study. The content of this subject will change according to fields of research represented in the cohort of each year, the issues of current concern in the discipline streams taught, and staff expertise. It will be taught in streamed, parallel seminars organised by broadly defined disciplinary grouping.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 7010 Researching Post-Capitalist Possibilities (PhD Summer School) (10 Credit Points)
Subject Details (p. 2951) **Legacy Code:** 800216
Researching Post-Capitalist Possibilities offers HDR students the opportunity to explore how the humanities and social sciences can play a role in making other worlds possible. It develops the thinking capacities we need as scholars to shape the world and reviews the ethical responsibilities that come with this work. It offers an opportunity to work with scholar members of the Community Economies Collective within the Institute for Culture and Society (ICS) who have been thinking outside or beyond capitalist relations since the publication of J.K. Gibson-Graham's The End of Capitalism (As We Knew It) in 1996.

Performing Arts (PERF)

PERF 1010 Music Performance 1 (10 Credit Points)
Subject Details (p. 4806) **Legacy Code:** 102553
In this subject, students will develop their performance skills through participating in three modularised workshops. The first two workshops will run in parallel with each other and will be rotated: module 1 will focus on improvisation; and module 2 will focus on (western or non-western) music from an oral tradition. Module 3 will then extend students' skills in reading and arranging music, utilising their preferred performing media (voice or instrument). In this third module, they will perform set technical tasks (such as scales and arpeggios) and, in groups, they will arrange and perform one set piece of music from a basic notated score, and they will choose, arrange and perform another piece. They will perform one piece chosen from modules 1, 2, or 3 in a public venue on campus. The subject will also introduce basic music business skills, such as how to advertise and mount a public performance.
Level: Undergraduate Level 1 subject
Equivalent Subjects: PERF 1008 - Introduction to Music Performance
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 1012 Music Performance 2 (10 Credit Points)
Subject Details (p. 4807) **Legacy Code:** 102554
Students will extend their performance skills acquired in Music Performance 1 through participating in three modularised workshops. The first two workshops will run in parallel with each other and will be rotated: module 1 will focus on free and notated improvisation; and module 2 will focus on choral performance. Module 3 will extend the skills of reading and arranging music in students' preferred performing media (voice or instrument). In this module, they will perform set technical tasks (such as scales and arpeggios), adding to the skills acquired in Music Performance 1 and, continuing to work in small groups, they will arrange and perform one set piece of music from a basic notated score, and choose, arrange and perform another piece that is different from the music performed in Music Performance 1. They will perform one piece chosen from modules 1, 2, or 3 in a public venue on campus. The subject will also introduce music business skills, such as how to publicise and mount a performance, and how to upload a sample of work to YouTube.
Level: Undergraduate Level 1 subject
Pre-requisite(s): PERF 1008 OR
PERF 1010
Equivalent Subjects: PERF 1013 - Music Performance 2 Notated and Free Musics PERF 1007 - Free and Notated Music Performance
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 1014 Music Production (10 Credit Points)
Subject Details (p. 4808) **Legacy Code:** 102558
This subject presents an overview of the basic concepts and applications of electronic and digital music production technology in current music and media arts practice. Students will learn the fundamentals of musical acoustics, stereo recording and mixing techniques, and they will be introduced to MIDI systems and sequencing. Technical concepts are contextualised within a survey of current music production practice.
Level: Undergraduate Level 1 subject
Equivalent Subjects: PERF 1005 - Digital Musics 1 Musical Contexts PERF 1009 - Introduction to Sound Technologies
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 1015 Music Theory Fundamentals (10 Credit Points)
Subject Details (p. 4808) **Legacy Code:** 102564
This subject introduces basic theoretical knowledge such as scales, intervals, chords and progressions. It provides musicianship training in aural, reading and keyboard skills and an introduction to Finale software. Students will learn to analyse harmony and to compose melodies and simple chordal accompaniments in song and theme and variation forms. Keyboard and aural classes will build on the theoretical content presented in lectures.
Level: Undergraduate Level 1 subject
Equivalent Subjects: PERF 1003 - Composition Craft and Theory 1 PERF 1001 - Basic Composition Craft and Theory
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 1016 Popular Music Histories (10 Credit Points)
Subject Details (p. 4809) **Legacy Code:** 102547
Students will explore some of the most significant trajectories of popular music of the last 100 years. Each week will look a different facet of popular music history, stretching from the stars of the early years of the recorded music industry to the development of electronic dance music. The subject will touch upon folk, jazz, blues, rock, soul, funk, pop, disco, metal, punk, and hip hop to offer a necessarily incomplete tapestry of music scenes, chains of influence, and theories on the points of origin of styles and genres. Concepts that will be investigated include the relationship of recording and dissemination technologies with popular music creation; the notion of a "mainstream" and its margins; and the idea of a grand narrative of popular music history, including the problems of canonicity.
Level: Undergraduate Level 1 subject
Equivalent Subjects: CART 1006 - Music History 2 PERF 1022 - Western Art Music 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 1023 Western Art Music History (10 Credit Points)
Subject Details (p. 4810) **Legacy Code:** 102546
This subject explores a range of musical works, styles, genres and composers from the Middle Ages to the twenty-first century. It shows how music evolved through the centuries, suggesting that stylistic changes are linked to innovative musical thinking on the one hand and conformity to established practices on the other. The subject asks how and why different genres and styles in different periods in western art music history come to the foreground while others recede into the background. Within a socio-historical context, the subject investigates the practices that produce musical innovation and considers how the various historical epochs have shaped our understanding of music. The subject includes some rudimentary music analysis and key terminologies and music vocabularies.
Level: Undergraduate Level 1 subject
Equivalent Subjects: CART 1005 - Music History 1 PERF 1021 - Western Art Music 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 1024 Music Theory and Songwriting (10 Credit Points)
Subject Details (p. 4811) **Legacy Code:** 102770
This subject studies harmony and musical techniques used in a variety of styles, and applies these in the development of song-writing and composition skills. Keyboard and aural classes include practical musicianship training related to the lectures.
Level: Undergraduate Level 1 subject
Pre-requisite(s): PERF 1001 OR
PERF 1015 OR
PERF 1001
Equivalent Subjects: PERF 1004 - Composition Craft and Theory 2 LGYA 6571 - Music Craft and Theory 2 PERF 1002 - Composition Craft and Theory PERF 1017 - Songwriting and Music Theory
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 1025 Sound Design and New Electronic Media (10 Credit Points)
Subject Details (p. 4812) **Legacy Code:** 102759
The subject builds on the conceptual and practical work presented in Music Production, deepening students' understanding of technology in contemporary music and media arts practice. Students will study the digital field recording for sound design and composition, the basic principles of sound synthesis procedures and musical acoustics, and creative sound design and synthesiser patch editing. Technical concepts are contextualised within a critical survey of contemporary music and sound design practice.
Level: Undergraduate Level 1 subject
Pre-requisite(s): PERF 1009 OR
PERF 1014
Equivalent Subjects: PERF 1006 - Digital Musics 2 - Studio and Soundscape PERF 1019 - Sound Synthesis and the Sound Environment PERF 1018 - Sound Design
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 2001 Arranging Music (10 Credit Points)
Subject Details (p. 4813) **Legacy Code:** 102566
This subject introduces concepts and skills necessary to arrange music in popular-commercial and orchestral contexts. Lectures provide background on the use of instruments, harmony, timbre and texture, and tutorials provide practical exercises in preparation for the assignments.
Level: Undergraduate Level 2 subject
Pre-requisite(s): PERF 2015 OR
PERF 2004
Equivalent Subjects: LGYA 0425 - Arranging Popular Music PERF 2002 - Arranging Musics
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 2004 Composition and Creativity (10 Credit Points)
Subject Details (p. 4814) **Legacy Code:** 102548
This subject provides students with a firm grasp of creative principles and practical experience in the range of compositional techniques and skills required as a composer within a range of commonly employed artistic media and genres (classical, world, popular and avant-garde styles). These skills will provide the basis for professional compositional activity. Students will cover creative and technical issues with reference to a wide range of genres to stimulate across boundary thinking towards personal voice within lectures and tutorials. Practical workshops using compositional principles through student improvisation within creative groups will provide sonic demonstration of compositional ideas. The assessments will include both notated scores and recordings (improvisations; one notated score), in keeping with the Internet distribution age.
Level: Undergraduate Level 2 subject
Pre-requisite(s): PERF 1001 OR
PERF 1015
Equivalent Subjects: LGYA 1103 - Music Composition PERF 2015 - Music Composition Concepts and Creativity
Incompatible Subjects: PERF 2009 - Digital Musics 3 Composition Crossovers
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 2011 From Corroborees to Curtain Raisers (Day Mode) (10 Credit Points)
Subject Details (p. 4814) **Legacy Code:** 101754
This subject will provide students with an understanding of the historical framing and cultural re-framing of Indigenous Australians in the live arts. Students will be provided with a theoretical understanding of the politics of representation through examining and reflecting on the transitional shifts that Indigenous artists' have made from: cultural performance to theatre productions; 'traditional' storytelling to telling of stories through poetry and writing; ceremonial sounds to music and spoken word performance; documentary film to screen based drama to exploring new technologies and moving image performance. Students will be introduced to a variety of Indigenous artists and their creative works.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 2016 Music Group Performance (10 Credit Points)
Subject Details (p. 4815) **Legacy Code:** 102555
This subject replaces 101521- Collaboration and Live Music Performance. Through a series of lectures and workshops, students will pursue two main threads of practical study imperative to any working musician. The first is collaboration, which will be practised in workshops (with repertoire determined by lecturers) and probed in a written task. The second area of study is the development of a suite of onstage skills and strategies including physical gesture, audience communication and facility with musical equipment.
Level: Undergraduate Level 2 subject
Pre-requisite(s): PERF 1007 OR
PERF 1008 OR
PERF 1012 OR
PERF 1010
Equivalent Subjects: LGYA 1098 - Music Performance 3 Australian Repertoire PERF 2003 - Collaboration and Live Music Performance
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 2017 Music and Wellbeing (10 Credit Points)
Subject Details (p. 4816) **Legacy Code:** 102248
This subject looks at the psychosocial importance of music to our wellbeing throughout our lives and during each day. Delivered in a lectorial format (lecture with practical activities throughout), the subject explores the relationship between music and the body, mind, emotions, mood, memory, communication and creativity from experimental studies through to practice-based evidence. This subject is not necessarily about performing music, although some music making will take place. Rather, it is focused on how music can improve our wellbeing throughout our lives. The ideas and approaches discussed are important across the humanities, the social sciences and the health sciences, as well as to musicians who are looking to use their music in the therapeutic context.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 2020 Popular Music Communities (10 Credit Points)
Subject Details (p. 4817) **Legacy Code:** 102281
Music is a means through which people create, socialise, consume, disseminate information, engage in power relationships, and agitate for political and social change. People form communities from their shared musical tastes and interests, and hierarchies are formed around particular kinds of music. Music can symbolise and facilitate solidarity, and expresses identity in ways that transcend physical boundaries. This subject examines popular music communities in a variety of contexts, from the local to the global to the virtual. It explores the functions and uses of music that commonly inform human activity, while also considering how these functions and uses have been articulated through recent changes in technology.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 2023 The Composer-Performer (10 Credit Points)
Subject Details (p. 4818) **Legacy Code:** 101539
Students are required to both perform and compose in this subject. While students may choose to perform their own work, this subject also offers the opportunity for students to experience the particular challenges and rewards offered by the close collaboration entailed in both sides of the composer/performer interface. Each student will choose a balance of performance and composition tasks appropriate to her/his specific musical path. The subject presents basic compositional techniques and canvasses issues regarding the composer/performer relationship through a series of lectures, tutorials and workshops. Students will also continue to develop their event administration skills.
Level: Undergraduate Level 2 subject
Pre-requisite(s): PERF 1017
Equivalent Subjects: LGYA 1099 - Music Performance 4 The Composer-Performer
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 2024 The Musical (10 Credit Points)
Subject Details (p. 4819) **Legacy Code:** 101795
The Musical will involve the examination of the history and development of the stage musical in its social and cultural context. The subject will also explore the structure of the musical as a 'text' and performance genre, looking closely at narrative structure, the structure of songs and the construction of character types and interaction. 'The Musical' will also involve students in the critical analysis of the representation of gender and race in the stage musical.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 2025 The Politics of Australian Music (10 Credit Points)
Subject Details (p. 4819) **Legacy Code:** 102552
In 2020 this subject replaced by 102762 - World Music. The subject explores the histories and politics that have shaped the development of Australian music from 1788 to the present day. It critically engages with the historical narrative that perpetuates the dominance of white, post-settler composers and musicians, asking what mechanisms have given rise to some music becoming silenced. How have post-settler musicians approached indigenous music as a challenge that is both aesthetic and ethical? In what ways does the diverse make-up of the Australian population since the mid-twentieth century erode the sharp distinction between the indigenous and the non-indigenous populations in music? Completing this subject will teach students how to critically evaluate Australian music history, to recognise the power of the dominant historical narrative, and to question the assumptions on which it is based. The subject is framed by Attali's theory of noise, which shows how the production, performance, and consumption of music are linked with power and order in society, and introduces Bourdieu's field theory.
Level: Undergraduate Level 2 subject
Equivalent Subjects: PERF 3002 - Contemporary Arts 3 Politics and Communities PERF 2014 - Modes and Codes of Music Production PERF 2028 - World Music
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 2028 World Music (10 Credit Points)
Subject Details (p. 4821) **Legacy Code:** 102762
This subject examines music from diverse cultures, such as African, Latin American, Middle Eastern, Asian, and the Australia-Oceania region, focusing on the performance, production, and transmission of contemporary fusion music. It explores the cultural-political ways in which the West represents world music as a commodity and considers how the music is inflected with notions of identity, modernity, globalisation, displacement and migration. It charts the ways in which, as a social practice, world music engages politics to promote change, giving voice to marginalised groups. Students will have the opportunity to perform selected rhythms from different cultures. Additionally, they will learn elements of music theory that pertain to the cultures studied in the subject.
Level: Undergraduate Level 2 subject
Equivalent Subjects: PERF 3002 - Contemporary Arts 3 Politics and Communities PERF 2014 - Modes and Codes of Music Production PERF 2025 - The Politics of Australian Music
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 2029 Music Project 1: Multimedia (10 Credit Points)
Subject Details (p. 4821) **Legacy Code:** 102855
In small groups, students will develop a creative music/sound and multimedia project. The multimedia aspects can include any thematically linked subset of video, art, text, lighting, digital technology and installations, sound spatialisation, or algorithmic sound/music generation. Students will learn how to integrate music and sound with multimedia; develop their skills in digital audio and video software and digital technology. Students will gain experience in collaborating on a creative project and contextualising and promoting their work within a broader cultural context. The teaching material comprises pre-recorded lectures and guided workshops, which can be undertaken on campus or online.
Level: Undergraduate Level 2 subject
Pre-requisite(s): PERF 1025
Equivalent Subjects: PERF 2027 - Electronic Music Production PERF 2010 - Digital Musics 4 Synthesis and Performance PERF 2021 - Sound Technologies and Machine Musicianship PERF 2008 - Digital Musicianship
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 2030 Musicology as a Professional Practice (10 Credit Points)
Subject Details (p. 4822) **Legacy Code:** 102858
This subject offers the opportunity for students to apply musicological skills and knowledge to real-world contexts, such as writing program notes, music reviews, and blogs, researching and retrieving music repertories for performance in various ensemble configurations, researching, analysing and critically writing about music from a range of genres, and adopting key analytical strategies for considering music in its cultural, intercultural and historical contexts. The teaching materials and content in this subject will be designed to closely align with and support the practical projects being chosen and designed by students in two project subjects (1 and 3) in the Bachelor of Music. The subject will provide students with a broadly informed view of current issues in music practice.
Level: Undergraduate Level 2 subject
Equivalent Subjects: PERF 2006 - Contemporary Arts Music (Histories) PERF 2007 - Cultural Paradigms and Music
PERF 2018 - Music Culture and Discourse
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 2031 The Music Industry (10 Credit Points)
Subject Details (p. 4823) **Legacy Code:** 102854
In this subject students will be given an overview of the music industry, applying music industry theory to real-life situations, and working on real-world projects such as creating a unique image for an artist or band, and promoting and marketing a live gig. Responsibilities, and the pros and cons of going solo or working as a group will be explored together with income generation through record sales, live performance, song publishing, merchandise, and sponsorship. Other aspects, such as artist management, copyright, and contracts, will be covered along with the independent musician and new DIY models for the fast-paced, high-tech world of the future.
Level: Undergraduate Level 2 subject
Equivalent Subjects: PERF 2009 - Digital Music 3 - Composition Crossovers PERF 2013 - Introduction to the Sound Studio PERF 2022 - Studio Production PERF 2026 - Advanced Production
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 2032 Music-making applications for education and therapy (10 Credit Points)
Subject Details (p. 4824) **Legacy Code:** 102910
This subject assists you in developing your musical competency with a view to applications in education and therapy, since particular types of music skills and applied competencies are required for music teachers and music therapists as they work with students and clients. If you want to develop your musical skills to engage more actively in musical interaction with people, then this is the subject for you! This very practically oriented subject explores applied music literacy and aspects of using music as a tool within the social/educational context, engaging you in vocal, guitar, piano/keyboard and aural activities, as taught by experienced music therapy and education staff. This subject helps you expand your musical potential and career options, supporting you in developing skills to set you up for success in entering your chosen field of study, completing your studies and ultimately being career-ready for your future in the musical context.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 3009 Music Careers Research (10 Credit Points)
Subject Details (p. 4825) **Legacy Code:** 102429
What music careers were sustainable in the past? How has the music industry changed over the last 3 decades? What would sustainable music careers look like in the future? Students will work on research projects that focus on music careers and the music industry. They will gain a good understanding of the careers available in music, including the qualifications and skills needed for jobs in music. They will also evaluate the research focused on music careers, including assessing the currency of websites that provide lists of music careers. Students will evaluate the degree to which the Bachelor of Music learning outcomes sufficiently prepare graduates for their chosen careers. Students will be introduced to a range of relevant methodologies. They will be expected to propose a topic, report on the progress of their research, retrieve and critically evaluate an appropriate literature for their project, and discuss the methods intended or used for their data collection and analysis.
Level: Undergraduate Level 3 subject
Equivalent Subjects: PERF 3017 - Music in Theory and Practice
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 3013 Music and Analysis (10 Credit Points)
Subject Details (p. 4826) **Legacy Code:** 101152
Analysis enables students to acquire a deep and rich understanding of music. This subject will focus on the formal designs, rhythmic, melodic and harmonic structures of notated music, and the structures, contexts and processes of non-notated music. It will include notated and recorded music from the popular song traditions, as well as studio recordings, electronic music and improvisation. It will consider the strengths, weaknesses and cultural biases of various modes of analysis, including the use of musical notation. Students will learn to apply these methods in lectures and tutorials.
Level: Undergraduate Level 3 subject
Pre-requisite(s): PERF 2001 OR
PERF 2004
Equivalent Subjects: LGYA 0424 - Analytical Models in Music
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 3014 Music and Critical Thought (10 Credit Points)
Subject Details (p. 4827) **Legacy Code:** 102573
Music and Critical Thought considers definitions of music and how music is constituted. It asks how we encounter and experience music, and what makes a piece of music aesthetically pleasing and who decides. It asks whether the meanings attributed to music are as much intrinsic as they are cultural. The subject considers emotions and feelings in music, and why we would listen to music if it makes us feel sad. When music is used as an instrument of torture is it still music? How do we view the composer in the musical work? Where does creativity reside in a musical work? Is there a difference between musical thinking and thinking about music? Is music representational or immanent or both? Is music political? The subject provides an historical overview of the important debates and considers the poststructuralist critique of these debates. Students will design a question chosen from the topics covered in the subject, and retrieve and critically evaluate the appropriate literature for their project.
Level: Undergraduate Level 3 subject
Equivalent Subjects: PERF 3015 - Music and Meaning PERF 3016 - Music and Philosophy
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 3022 Screen Media Composition (10 Credit Points)
Subject Details (p. 4828) **Legacy Code:** 102563
This subject is the final stage in the Composition and Music Production sub-major sequences. The subject is also available to Media Arts Production and Creative Industries students. The subject aims to prepare students creatively and technically to undertake self-directed sound composition projects for screen media. The areas to be examined include: sound studio techniques, mix processing for sound recording and screen media, an introduction to surround audio techniques, sound composition (score-based and/or sound-scape) for screen, film spotting for sound, audio-visual interactions, and professional communication/pitching of sound composition proposals. Each student produces a complete sound-composition for screen package including sound composition, sound recording, screen media product (including film), and promotional documentation and samples.
Level: Undergraduate Level 3 subject
Pre-requisite(s): PERF 1009 OR
PERF 1014 OR
COMM 2030 OR
PERF 2015 OR
PERF 2004 OR
PERF 3010 OR
PERF 3023
Equivalent Subjects: PERF 3024 - Sound Composition for Screen Media
Incompatible Subjects: PERF 3005 - Digital Musics 6 - Performance Contexts LGYA 1104 - Music Composition Advanced
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 3023 Songwriting and Composer Collaborations (10 Credit Points)
Subject Details (p. 4829) **Legacy Code:** 102549
This subject extends on the creative principles and practical experience in the range of compositional techniques and skills in the preceding subject Composition and Creativity. It will have two focuses: songwriting in both popular and art-music traditions to allow for the exploration of lyrics/texts; and composer collaborations with large scores for film, photography and dance. Students will work in a wide variety of commonly-employed artistic media and genres at a higher level than in the preceding subject. They will acquire the ability to write for larger instrumental combinations in cross-artform collaborations and songwriting skills. Practical workshops using compositional principles through student improvisation within creative groups will provide sonic demonstration of compositional ideas in relation to songwriting and other media. The assessments will include both notated scores (with visual media options) and recordings (improvisation; one notated score), in keeping with the Internet distribution age.
Level: Undergraduate Level 3 subject
Pre-requisite(s): PERF 2015 OR
PERF 2004
Equivalent Subjects: LGYA 1104 - Music Composition Advanced PERF 3010 - Music Composition Text and Visual Interactions
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 3028 Music Project 2: Creative Performance (10 Credit Points)
Subject Details (p. 4831) **Legacy Code:** 102856
In small groups, students will plan, prepare, and perform a substantial artistically and technically challenging live performance project. Students' performance practices will be expanded by integrating any thematically linked subset of software, hardware (controllers and synths), video and other multimedia, stagecraft, lighting, spatialisation, algorithms, theory, and improvisation. Students will learn how to integrate music and sound with multimedia and technology; develop their skills in digital audio software and interactive technology; gain experience of working collaboratively on a creative project; and contextualise their work within a broader cultural context. The teaching material comprises pre-recorded lectures and guided workshops, which are undertaken on campus.
Level: Undergraduate Level 3 subject
Pre-requisite(s): PERF 1025
Equivalent Subjects: PERF 3025 - Sound and Performance Expanded Practice PERF 3007 - Expanded Music Performance PERF 3027 - Interactive Electronic Media and Performance
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 3029 Music Project 3: Intercultural Interactions (10 Credit Points)
Subject Details (p. 4831) **Legacy Code:** 102857
This subject provides students with the opportunity for industry experience in applied professional contexts, which include collaboration with musicians and ensembles from diverse communities in relation to the UN cultural diversity mandate. Activities such as performance, composition, teaching, sound engineering, music administration and other industry-related work will occur in integrated learning contexts and/or placement opportunities that have practical creative or project management outcomes. This subject provides training in music business and personal branding, and allows students to work as individuals or in groups to build on skills and knowledge developed through their degree.
Level: Undergraduate Level 3 subject
Equivalent Subjects: PERF 3019 - Professional Music Project PERF 3012 - Music Project PERF 3026 - Applied Professional Music Contexts

PERF 3030 Performing as a Professional Musician (10 Credit Points)
Subject Details (p. 4832) **Legacy Code:** 102859
Performance as a Professional Musician builds upon preceding subjects in the Performance sub-major to equip students for performance opportunities in real-world environments. Subject matter canvassed includes arrangement and interpretation, real-world writing about performance, stagecraft and event production. With the guidance of the subject coordinator/tutors, vetted through a professional project proposal process, students will prepare and mount a 30-minute performance project as featured performer. The type of repertoire, instrumentation and personnel will be up to the student and will reflect acquired strengths and aspirations. Through a workshop process, students will be encouraged to refine their performance and to further develop their capacity to give colleagues measured and constructive feedback. Short written tasks reflect real-world expectations of the professional musician in the form of project proposal, program note and festival pitch.

PERF 6001 Music Therapy Foundations & Approaches (10 Credit Points)
Subject Details (p. 4833)
Music Therapy Foundations & Approaches provides a background to the historical development and theoretical underpinnings of music therapy, with focus on a broad range of music therapy approaches and orientations including Culture-Centred Music Therapy and Nordoff-Robbins Music Therapy. Human development through the lifespan is studied, along with an overview of disability and disorders. The fundamental principles of self-care and supervision for music therapy practitioners and students are introduced within this subject and continued in later subjects of the Master of Creative Music Therapy program.
Level: Postgraduate Coursework Level 6 subject
Equivalent Subjects: PERF 7003 - Music Therapy Method
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 6002 Music Therapy Theory & Practice 1 (10 Credit Points)
Subject Details (p. 4834)
This subject focuses on the delivery of music therapy to infants, children and adolescents with various approaches and settings being explored across the semester. There is an emphasis on the eclectic music therapy approach and how current psychotherapy approaches, practice approaches and music therapy approaches can be successfully combined to meet the therapeutic needs of the music therapy participant/s. An introduction to music therapy research, with particular attention to writing a literature review, is included. The Australian Music Therapy Association (AMTA) standards of practice are overviewed and explored through active group work. In addition, musical analysis, teamwork approaches, creative arts therapy models and group work in music therapy are also explored.
Level: Postgraduate Coursework Level 6 subject
Pre-requisite(s): PERF 7003 - Music Therapy Method
OR
PERF6001 - Music Therapy Foundations Approaches
Equivalent Subjects: PERF 7007 - Music Therapy Theory and Practice 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 6005 Music Therapy Skills & Practice C (20 Credit Points)
Subject Details (p. 4835)
This subject focuses on the development of creative therapeutic music skills to support the delivery of music therapy to individual and group participants across the lifespan. Students learn, practice, and demonstrate a diverse range of skill sets that can be applied within their Simulated Music Therapy Practicum or Registered Music Therapist Practicum Placement as appropriate. This subject utilises creative active learning experiences within a lectorial format and addresses focus areas including: practicum placement; therapeutic music skills; music therapy methods (compositional); technology in music therapy; and culture-centred music therapy.
Level: Postgraduate Coursework Level 6 subject
Equivalent Subjects: PERF 7006 Music Therapy Skills 2 and PERF 7011 Music Therapy Skills Practice C
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 6006 Music Therapy Skills & Practice D (10 Credit Points)
Subject Details (p. 4837)
This subject focuses on the development of creative therapeutic music skills to support the delivery of music therapy to individual and group participants across the lifespan. Students learn, practice, and demonstrate a diverse range of skill sets that can be applied within their Registered Music Therapist Practicum Placement or Independent Placement as appropriate. This subject utilises creative active learning experiences within a lectorial format and addresses focus areas including: practicum placement; therapeutic music skills; music therapy methods (receptive); technology in music therapy; and culture-centred music therapy.
Level: Postgraduate Coursework Level 6 subject
Pre-requisite(s): PERF 6003 - Music Therapy Skills Practice A
OR

PERF 7003 Music Therapy Method (10 Credit Points)
Subject Details (p. 4838) **Legacy Code:** 100910
In 2023, this subject replaced by PERF 6001 - Music Therapy Foundations & Approaches. Music Therapy Method provides a background to the historical development and theoretical underpinnings of music therapy, with focus on a broad range of music therapy approaches and orientations including Culture-Centred Music Therapy and Nordoff-Robbins Music Therapy. Human development through the lifespan is studied, along with an overview of disability and disorders. The fundamental principles of self-care and supervision for music therapy practitioners and students are introduced within this subject and continued in later subjects of the Master of Creative Music Therapy course.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 7004 Music Therapy Professional Practice & Research (10 Credit Points)
Subject Details (p. 4839) **Legacy Code:** 100911
This subject introduces students to research principles and research proposal development as relevant to evaluation and small projects within music therapy clinical practice in a wide range of settings. The subject engages students in reflective practice and critical thinking processes for effective music therapy practice. Multidisciplinary and interprofessional issues are addressed. Professional practice issues are taught and discussed including ethics, standards of practice, self-care, professional supervision, and the music therapy work workplace. The subject provides students with resources and experience with regard to professional presentation and writing skills. The subject is delivered within a lectorial format.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): PERF 6001 - Music Therapy Foundations Approaches
PERF 6002 - Music Therapy Theory Practice 1
PERF 7008 - Music Therapy Theory Practice 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 7007 Music Therapy Theory and Practice 1 (10 Credit Points)
Subject Details (p. 4840) **Legacy Code:** 100912
In 2023, this subject replaced by PERF 6002 - Music Therapy Theory & Practice 1. This subject focuses on the delivery of music therapy to infants, children and adolescents with various approaches and settings being explored across the semester. There is an emphasis on the eclectic music therapy approach and how current psychotherapy approaches, practice approaches and music therapy approaches can be successfully combined to meet the therapeutic needs of the music therapy participant/s. An introduction to music therapy research, with particular attention to writing a literature review, is included. The Australian Music Therapy Association (AMTA) standards of practice are overviewed and explored through active group work. In addition, musical analysis, teamwork approaches, creative arts therapy models and group work in music therapy are also explored.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): PERF 7003
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 7008 Music Therapy Theory & Practice 2 (10 Credit Points)
Subject Details (p. 4841) **Legacy Code:** 100914
This subject develops skills within the second year of the Master of Creative Music Therapy to understand the aetiology and treatment of a wide range of clinical conditions and diverse needs affecting adult clients, including applications to aged care, mental health, palliative care and music medicine. The role of emotions in therapy and verbal counselling skills are addressed within the time available. This subject draws on evidence and examples from music therapy and related fields, supporting students in developing applied critical thinking approaches and gathering knowledge in a systematic manner culminating in a systematic literature review. In addition, students are introduced to abstract writing and beginning information for research proposal development.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): PERF 6001 - Music Therapy Foundations Approaches
PERF 6002 - Music Therapy Theory Practice 1
Equivalent Subjects: PERF 7008 - Music Therapy Theory and Practice 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 7009 Music Therapy Skills & Practice A (20 Credit Points)
Subject Details (p. 4842) **Legacy Code:** 102800
This subject focuses on the development of therapeutic music skills to support the delivery of music therapy to individual and group participants ranging in age from infants to the elderly. Students learn, practice and demonstrate a diverse range of skill sets that can be applied within their SiMPrac field work or Practicum Placement as appropriate. This subject utilises active learning methods within a lectorial format and addresses focus areas including: methods; goals; technology; culture and improvisation.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: PERF 7005 - Music Therapy Skills 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 7010 Music Therapy Skills & Practice B (20 Credit Points)
Subject Details (p. 4843) **Legacy Code:** 102801
This subject focuses on the development of therapeutic music skills to support the delivery of music therapy to participants ranging in age from infants to the elderly. Students practice and demonstrate a diverse range of skill sets that can then be applied within their practicum placement as a major component of this subject. Considerations when planning and delivering individual and group programs are explored, along with technology, composition and cultural issues within music therapy. This subject utilises active learning techniques within a lectorial format.
Level: Postgraduate Coursework Level 7 subject

Philosophy and Religious (PHIL)

PHIL 1001 Ethics and Philosophy (10 Credit Points)
Subject Details (p. 4852) **Legacy Code:** 101915
This subject introduces students to ethical enquiry - the ways in which we explain what is right and wrong behaviour, perceive good and evil, and try to deal with the different values people hold. Philosophy has long traditions of debating ethical matters, and offers perspectives for trying to answer our ethical questions: this subject introduces the most important and established of those fundamental perspectives, and explains how they arose in their social and historical contexts. The philosophical material will be also be explored through practical examples and questions from contemporary life, in order to enable students to consider ethics today and the sorts of issues they might face.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 1002 Hadith: The Prophetic Tradition (10 Credit Points)
Subject Details (p. 4853) **Legacy Code:** 102296
The Islamic canon is comprised of two chief sources: Qur'an and Hadith. Muslim life is governed by the manner in which these are understood and applied to the everyday. Whilst the Qur'an is the foundational corpus of the religion, it does not provide specifics on many facets of social and political activity. For this, Muslims rely on sunnah: "habitual practice", which is the body of traditional social and legal custom and practice of the Islamic community. The specialised documentation of Hadith (sayings or actions attributed to the Prophet) made this body of text a reliable and favoured method of knowing the sunnah of the Prophet Muhammad. In this subject students will explore the origin and development of hadith, its sources, and function in Muslim life.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 1003 Hadith: The Prophetic Tradition (WSTC) (10 Credit Points)
Subject Details (p. 4854) **Legacy Code:** 700161
Islam is a way of life which is governed by the Qur'an, the Muslim principal source of guidance. However, while the Qur'an is the foundation of authority in Islam, it provides few legal injunctions. Hadith (the saying, deeds and actions of Prophet Muhammad) forms the basis for the details of Islamic law and for many tenets of Islamic creed. This subject introduces students to the second most fundamental source of Islam, Hadith. It aims to familiarise students with the origins of the Hadith, its overall structure, content and importantly, its function in Muslim living and to assist them in understanding contemporary issues and debates surrounding Islam.
Level: Undergraduate Level 1 subject
Equivalent Subjects: PHIL 1002 - Hadith The Prophetic Tradition
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 1004 Introduction to Logical Thinking (10 Credit Points)
Subject Details (p. 4854) **Legacy Code:** 101189
This subject introduces psychology students to the basic aspects of reasoning and argument, with particular emphasis on psychological and scientific thinking. It aims to help students develop the skills needed to understand and evaluate psychological research and the processes of scientific reasoning, and to present their own ideas and arguments effectively. Topics covered include: barriers to critical thinking; nonrational forms of persuasion; the structure of arguments; the concepts of knowledge, belief, truth, validity, soundness, values; linguistics sources of confusion; evaluating arguments; formal and informal fallacies in reasoning; deduction and induction in science; arguments related to enduring debates and worldviews in psychology.
Level: Undergraduate Level 1 subject
Equivalent Subjects: PHIL 1005 - Introduction to Logical Thinking
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 1006 Introduction to Philosophy (10 Credit Points)
Subject Details (p. 4855) **Legacy Code:** 101918
This subject is an introduction to Western philosophical inquiry: it looks at fundamental questions we have about the way we think of the world around us, and the way we act. It presupposes no prior knowledge of philosophy. We will examine philosophical issues by looking at classic statements from the philosophical tradition. The subject will also help students to develop their skills in writing clear arguments. After completion of the subject students will have a critical understanding of some of the fundamental ideas that shape our thinking and our world.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 1007 Advanced Standing for Studies of Religion 110 (10 Credit Points)
Subject Details (p. 4856)
Level: Undergraduate Level 1 subject

Subject Details (p. 4857) **Legacy Code:** 102463
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 2008 Philosophy and the Good Life (10 Credit Points)
Subject Details (p. 4857) **Legacy Code:** 101881
What does it mean to live a "good life"? One conception of philosophy that goes back to the teachings of the ancient Greeks and Romans is that it is the discipline pre-eminently concerned with teaching people how to live a good life. This subject will investigate the idea of "the good life" through an examination of select texts in ancient and modern philosophy. It will address questions that both ancient and modern philosophers have grappled with: on the right relation between reason and emotion, on the role of pleasure in human life, on the development of character, on the "care of the self," and on pursuing a meaningful life.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 2010 The Ethical Life (10 Credit Points)
Subject Details (p. 4857) **Legacy Code:** 101867
This subject introduces students to time-honoured ethical questions and controversies. The issues to be examined point to questions that students are likely to face at some stage during their lives: Is death always a bad thing? Is abortion immoral? Are we obligated to give to charity? Should we be vegetarian? Should you have sex outside of a committed relationship? Is ethics founded upon religion, reason or community standards? As well as examining specific issues, students will be introduced to the leading secular and theistic ethical theories.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 2011 The Qur'an: An Introduction (10 Credit Points)
Subject Details (p. 4858) **Legacy Code:** 101911
This subject is an introduction, in English translation, to the most important text of Islam, the Qur'an, which Muslims regard as the primary source of Islam. Students will study: the origins of the Qur'an, its overall structure and content, major themes, approaches to its interpretation, and its function in Muslim religious, social, cultural and political life. The themes and topics covered (such as God, ethics, women, state, inter-faith relations, and violence) should assist students in understanding contemporary debates on the relevance of Islam today.
Level: Undergraduate Level 2 subject
Pre-requisite(s): HUMN 1047
Equivalent Subjects: LANG 2017 - Great Texts of Islam Qur'an and Hadith
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 2012 The Qur'an: An Introduction (WSTC) (10 Credit Points)
Subject Details (p. 4859) **Legacy Code:** 700163
This subject is an introduction, in English translation, to the most important text of Islam, the Qur'an, which Muslims regard as the primary source of Islam. Students will study: the origins of the Qur'an, its overall structure and content, major themes, approaches to its interpretation and its function in Muslim religious, social, cultural and political life. The themes and topics covered (such as God, ethics, women, state, inter-faith relations and violence) should assist students in understanding contemporary debates on the relevance of Islam today.
Level: Undergraduate Level 2 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 2014 Thinkers That Changed the World (10 Credit Points)
Subject Details (p. 4860) **Legacy Code:** 102571
This subject involves detailed study of a thinker whose work has had a significant influence on how we understand the world. The subject will focus on the thinker's important primary texts, and any other writings that aid an understanding of their contribution to philosophical tradition, ethics, politics, and culture in general. Students will study how the philosopher's ideas have been original, and influenced others to see the world and themselves in new ways. A different philosopher will be the focus of study each year. Thinkers that may be studied in depth include Plato, Aristotle, Hume, Locke, Spinoza, Kant, Kierkegaard, Hegel, Marx, Nietzsche, Arendt, Foucault, Derrida and Girard.
Level: Undergraduate Level 2 subject
Equivalent Subjects: PHIL 2006 - Key Philosophers PHIL 2005 - Case Studies in Philosophy Thinker
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 2015 Thinking Cinema (10 Credit Points)
Subject Details (p. 4860) **Legacy Code:** 101989
Through close examinations of key philosophical and theoretical writings on film, this subject considers the many ways in which cinema has been 'thought' throughout its short history. Incorporating ontological, phenomenological, psychoanalytic, poststructuralist, cognitivist and other approaches, the subject explores the ways in which key philosophical and theoretical concepts have been taken up and addressed by film, in addition to considering the ways in which cinema can be seen to 'think' for itself.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYA 1673 - Film and Philosophy
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 2016 Truth and Knowledge (10 Credit Points)
Subject Details (p. 4861) **Legacy Code:** 101983
Attaining knowledge and defining truth are fundamental concerns for all university studies. Philosophy has a long history of explaining what constitutes truth, and how we know what counts as legitimate knowledge. This subject introduces students to the most important conceptions of truth and knowledge, and explains the fundamental methods of reasoning and testing knowledge claims established through the Western philosophical tradition. It should be useful to both studentsspecialising in philosophy, and those interested in discovering more about how knowledge is justified and standards of truth established.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 2017 Western Political Philosophy (10 Credit Points)
Subject Details (p. 4862) **Legacy Code:** 101912
The major social and political philosophy of the West, from the 5th century BC Greece till the 18th century will be examined. The development of ideas of citizenship, subjectivity, freedom, equality and the democratic state will be explored. The influence of Christianity will also be a major theme. Authors will include: Plato, Aristotle, Augustine, Aquinas, More, Hobbes, Locke, Vico, Rousseau.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYB 0228 - The Western Philosophical Tradition PHIL 2013 - The Western Philosophical Tradition

Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 3005 Aesthetics (10 Credit Points)
Subject Details (p. 4863) **Legacy Code:** 101295
The major philosophies of art will be examined. The Western tradition will be surveyed from the Ancient Greeks through medieval and Renaissance theories of art to modern and postmodern aesthetics beginning with Kant. Marxist and feminist aesthetics will be especially emphasised. The artistic material will primarily come from the visual arts.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYB 0055 - Aesthetics
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 3006 Books that Changed how we Think (10 Credit Points)
Subject Details (p. 4864) **Legacy Code:** 102570
This subject involves an in-depth study of a philosophical text that has reshaped our understanding about the world we live in. The close reading and discussion will develop the students' capacity to read and think deeply about particular problems. Students will follow the text step by step, gaining insights as to why it has had such a lasting influence.
Level: Undergraduate Level 3 subject
Equivalent Subjects: PHIL 3014 - Philosophy in Focus PHIL 3007 - Case Studies in Philosophy Text
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 3008 Classics of Modern Philosophy (10 Credit Points)
Subject Details (p. 4864) **Legacy Code:** 102420
Classics of Modern Philosophy introduces students to a selected number of 'great' (highly influential) philosophical texts from the seventeenth up to the twentieth century. Addressing fundamental issues such as human freedom, the nature of truth and knowledge, technological progress, problems of modern life, this subject guides students through key statements with supporting explanation of the philosophers, their projects and careers, and relevant social contexts.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 0902 - Classics of Modern Philosophy
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 3009 Ethical Traditions in Islam (10 Credit Points)
Subject Details (p. 4865) **Legacy Code:** 101466
This subject introduces students to the rich heritage of ethical traditions in Islamic thought. Students will study and critically evaluate the key features and contributions of Muslim theologians, philosophers and Sufis, who attempted to deal with revelation and rationalistic discourse in exploring the meaning of ethical life for Muslims and discussing whether philosophy and religious wisdoms were equals and allies in the pursuit of happiness. The origin and development of these traditions will be introduced with an emphasis on the relevance and application of some ethical issues, such as free will, predestination, human responsibility, and bioethics, to contemporary Muslim societies.
Level: Undergraduate Level 3 subject
Pre-requisite(s): HUMN 1047 OR
LANG 2017
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 3010 Philosophies of Love and Death (10 Credit Points)
Subject Details (p. 4866) **Legacy Code:** 100275
The Western experience of the fundamental questions of love and death will be examined. What is love? Is love between friends more important than romantic love? Is death always a bad thing? Is 'coming to terms with death' important for a meaningful life? Ancient Greek, Christian and medieval attitudes will be contrasted with romantic and contemporary views.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 3012 Philosophy and Environment (10 Credit Points)
Subject Details (p. 4867) **Legacy Code:** 102417
Philosophy and Environment focuses on how we understand and value our interactions with the natural environment, how humans have changed the world and themselves through those interactions and the questions and problems created through that dynamic. Contemporary issues such as climate change, resource depletion, land degradation, conflict over resources, and treatment of animals have become prominent ethical, political and philosophical concerns. This subject looks at these sort of environmental problems through philosophical methods that reveal the traditions of thought, attitude and action underlying them. Students will be introduced to the major approaches and questions most relevant to explaining contemporary environmental problems.
Level: Undergraduate Level 3 subject
Equivalent Subjects: PHIL 2007 - Philosophy and Environment
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 3015 Philosophy of History (10 Credit Points)
Subject Details (p. 4867) **Legacy Code:** 102493
What is History? This question has been an object of inquiry as much for philosophers as for historians themselves. Large historical forces were at work in the Enlightenment--both in the sciences and in politics--and philosophers like Rousseau and Kant sought to understand these movements philosophically. For Rousseau, the lens was genealogical as he worked to produce a "natural history" of politics and society; for Kant, the historical lens was teleological as he narrated instead a philosophical history full of notions of progress and improvement. In the 19th century, philosophers like Hegel and Marx were concerned to think about history as a dialectical movement, while Nietzsche applied Darwin's new theory of evolution to his understanding of history and morals alike. The great shockwaves wrought by the two World Wars of the 20th century brought new philosophical writers to the problem of history, though now with an eye back toward the seemingly failed vision of inevitable progress so successfully peddled by the Enlightenment. This philosophical tradition and its changing approaches to history will be the focus of this unit.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 3016 Philosophy of Religion (10 Credit Points)
Subject Details (p. 4868) **Legacy Code:** 101965
This subject examines central issues in the philosophy of religion. Students will look at a variety of ideas emanating from a philosophical consideration of religious belief and practice. Issues include arguments for and against the existence of God, conceptions of religious experience and faith, the relationship between science and religion, and religion and ethics.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 3017 The Body in Culture (10 Credit Points)
Subject Details (p. 4869) **Legacy Code:** 101009
This subject introduces students to key theorists, concepts, and debates in socio-cultural studies of embodiment. The first module introduces the field of study and explores influential perspectives on bodies as biocultural and social. The subject explores topics such as the social brain, culture and the senses, the modern 'civilised' body, sexed and racialised bodies, ableism and bodily diversity. It will demonstrate how even colonialism, multiculturalism and socio-economic inequalities are lived on the skin, in the body and through the senses. The second module explores current debates and body politics and the content is determined in collaboration with enrolled students. The topics can be as diverse as digital self-tracking; 'fat wars'; race and cosmetic surgery; bodies as commodities, and; sexual difference and sport.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYC 1291 - Gender Culture and the Body LGYA 0293 - The Body in Culture
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 3018 Philosophy of Race and Racism (10 Credit Points)
Subject Details (p. 4869) **Legacy Code:** 102789
This subject focuses on philosophical approaches to race and racism. Academic discourse about race sits at the intersection of overlapping research programs taking place in a number of fields including cultural anthropology, the history of science, sociology, political theory, communication studies, and critical philosophy of race. This subject will draw on discussions from a number of these fields. Students will interrogate the ways in which subjects are racialized, both by culture and by the state. They will analyse major texts concerned with race and racism, and examine and critique the role of ignorance within racist discourse.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 3019 Thought and Action in Greece and Rome (10 Credit Points)
Subject Details (p. 4870) **Legacy Code:** 102908
The end of the Peloponnesian War marks the end of the classical period in the history of Ancient Greece. The rise of the Macedonian Empire and then of the Roman Republic prompted the ancients to reflect on their social and political existence. In this subject you will examine how the schools of thought from the Hellenistic period onwards influenced the history, politics and culture of the period. The competing conceptions of thought and action had a profound influence in the history of the political events, economic arrangements, and technological progress of the period.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 3020 Advanced Standing for Studies of Religion 310 (10 Credit Points)
Subject Details (p. 4871)
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 7001 Advanced Research Project in Philosophy (10 Credit Points)
Subject Details (p. 4871) **Legacy Code:** 102617
Advance Research Project in Philosophy enables students with significant knowledge in philosophy and some experience in research techniques and methodologies in philosophy to plan and draft a philosophical project. By identifying a significant question suitable for graduate-level research, students will each develop an individual written project that articulates a coherent philosophical perspective. The aim of the subject is to develop students' capacity to employ philosophical vocabularies and specific discourses in an advanced and sophisticated way.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): PHIL 7012
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 7002 Ethics (10 Credit Points)
Subject Details (p. 4871) **Legacy Code:** 102381
Since the beginning of philosophy, the question of how to live has taken on an indefinite variety of forms, as befits the variability of its subject matter. This includes the Platonic and Aristotelian conception of the good life, the Kantian categorical imperative, and social ethics. In recent Continental philosophy, this has encompassed the ethics of responsibility, the attempt to investigate the ethics of alterity, interest in the 'care-of-the-self', and the ethics of truth.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 7003 History of Ideas (10 Credit Points)
Subject Details (p. 4872) **Legacy Code:** 102583
Ideas matter. It has been said that "ideas are what men and women live by, and will occasionally die for." If you want to explore and understand the relationship between ideas and actions across a range periods, places and perspectives, then this is the subject for you. The history of ideas is concerned with exploring and understanding the lived experience, the reality of ideas. We consider how the history of ideas can help us to interpret key thinkers and their ideas and how these ideas have shaped societies past and present.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 7004 Masters Project in Philosophy (40 Credit Points)
Subject Details (p. 4873) **Legacy Code:** 102401
In this unit, those enrolled in the MA in Continental Philosophy will write a minor thesis on a research question in philosophy. For this project, the students will be supervised by one or two members of staff working in philosophy.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 7005 Philosophical Aesthetics (10 Credit Points)
Subject Details (p. 4873) **Legacy Code:** 102380
This subject involves study of aesthetics, which may include philosophical approaches to art and artistic genres such as literature and cinema, and to beauty itself. It will include an historical overview of the field, an analysis of one particular set of problems or debates, and a close examination of a specific school or thinker. It will explore concepts of aesthetic judgement and value, as well as the relationship between aesthetics and other aspects of philosophy.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 7006 Philosophy and Literature (10 Credit Points)
Subject Details (p. 4874) **Legacy Code:** 102616
The relationship between philosophy and literature is as old as philosophy itself. In fact, philosophy begins and defines itself in Ancient Greece by setting itself apart from literature - specifically, epic and tragic writings - and claiming for itself a more original role in the effort to understand what is true, what matters, and how one should be with others. From Ancient Greece, through Hellenism and the Roman world, and into the Medieval and Modern periods there was an enduring concern in philosophical traditions with literature, literary themes, and questions of style. However, at the end of the Modern period the concern with literature became so pronounced that philosophers began to write literary texts and to experiment with new styles of expression. Beginning with Kierkegaard and Nietzsche, and moving up to Sartre and Camus, this question of the relation of philosophy and literature has become a central concern of many contemporary philosophical traditions. This subject will be devoted to exploring both the history of this relation between philosophy and literature, as well as looking more carefully at various moments in that history.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 7007 Philosophy of History and Politics (10 Credit Points)
Subject Details (p. 4874) **Legacy Code:** 102582
What is History? What justifies the State? These questions have been an object of inquiry as much for philosophers as for historians and political theorists. Large socio-political forces were at work during the Enlightenment and philosophers like Rousseau and Kant sought to understand these movements philosophically. For Rousseau, the lens was genealogical as he worked to produce a "natural history" of politics and society; for Kant, the historical lens was teleological as he narrated instead a philosophical history full of notions of progress and improvement. In the 19th century, philosophers like Hegel and Marx were concerned to think about history and politics as a dialectical movement, while Nietzsche applied Darwin's new theory of evolution to his understanding of history and morals alike. The great shockwaves wrought by the two World Wars of the 20th century brought new philosophical writers to the problems of history and politics, though now with an eye back toward the seemingly failed vision of inevitable progress so successfully peddled by the Enlightenment. This philosophical tradition and its changing approaches to history and politics will be the focus of this unit.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 7008 Philosophy of Nature (10 Credit Points)
Subject Details (p. 4875) **Legacy Code:** 102619
This subject examines questions and problems concerning the concept of nature or 'naturalness'. What does it mean to call something 'natural' and how are natural things to be distinguished from artificial things or things that are human made? How does technology influence our understanding of nature? What are the ethical implications arising from human relations with the natural world? As well learning time-honoured answers to such questions, students will appreciate the practical relevance of philosophical theorising about nature.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 7009 Philosophy, History and Interpretation (10 Credit Points)
Subject Details (p. 4876) **Legacy Code:** 102620
The focus of this subject will be a topic, or range of topics, particularly relevant in philosophy, which will be analysed both in their historical context and through subsequent interpretations by other philosophers or philosophical traditions. The subject will combine the hermeneutic interpretation of texts together with conceptual and argumentative analysis. Close attention will be paid to the language and systematic content of the philosophical issues examined. Moreover, students will be guided in factoring in the historical situation both for the philosopher(s) examined and for us as interpreters.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 7010 Political Philosophy (10 Credit Points)
Subject Details (p. 4876) **Legacy Code:** 102384
According to Aristotle's famous definition, the human is a political animal. Since the first theorization of the political in ancient Greek philosophy, politics has been thought from a variety of different angles. These range from traditional approaches such as the forms of government or the ways in which the sovereign can exercise power, to contemporary alternative approaches, such as theories of radical democracy which emphasize the participatory and agonistic aspects of the political. This subject will cover some fundamental texts and ideas in political philosophy.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 7011 Practical Philosophy (20 Credit Points)
Subject Details (p. 4877) **Legacy Code:** 102618
The subject Practical Philosophy deals with the application of philosophical understanding to human activity. 'Practical philosophy' in principle encompasses questions of the meaning and appropriateness of various practices, as well as theoretical questions about the nature of practices themselves, questions such as 'What should we do?' and 'What is it that we are doing?' The subject may thus involve considering philosophical perspectives on ethical, political, educational, and legal questions, and more abstract considerations relating to practices such as the philosophy of action.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 7012 Research Project in Philosophy (10 Credit Points)
Subject Details (p. 4877) **Legacy Code:** 102382
Research Project in Philosophy develops research techniques, understanding of methodologies, and procedures in planning and drafting a philosophical project. Through identifying contemporary issues and questions suitable for graduate-level research. Students will each develop an individual written project that articulates a coherent philosophical perspective. The aim of the subject is to develop students' understanding of philosophical vocabularies, specific discourses, and logics as they pertain to a particular philosophical issue or problem that they will address in writing.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 7013 Special Topics in Philosophy (20 Credit Points)
Subject Details (p. 4878) **Legacy Code:** 102379
The Special Topics in Philosophy subject engages with current debates and developments in philosophy. These contemporary debates will be contextualized within the historical and conceptual framework of the continental tradition of philosophical inquiry. Engagement with contemporary topics in philosophy and the most recent developments in the field will enable students to find what is innovative and original in their own thought and field of research.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 7014 The Image of Thought: Art, Film and Philosophy (10 Credit Points)
Subject Details (p. 4878) **Legacy Code:** 102584
Working on the assumption that art is capable of exploring philosophical issues in its own right, the subject considers how various arts from poetry to contemporary film help shape our understanding of things like metaphysics, epistemology, ethics and morality.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 7015 Theoretical Philosophy (20 Credit Points)
Subject Details (p. 4879) **Legacy Code:** 102615
Theoretical Philosophy focuses on theories of knowledge, theories of being, and systems of thought. While it is traditionally described under the heading of epistemology and metaphysics, theoretical philosophy should be more broadly understood as devoted to philosophical investigations into the underlying systems, theories, and presuppositions upon which any account of the world, experience, or even truth has been built. This subject will be devoted to an explication of either thematically related theoretical investigations, such as, for example, '17th-century theories of matter,' or 'the nature of language,' or it will focus instead on one central philosophical figure, e.g., 'Plato's metaphysics of the soul,' 'Kant's system of transcendental idealism,' etc.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 7016 Topics in the History of Philosophy (20 Credit Points)
Subject Details (p. 4880) **Legacy Code:** 102383
This subject surveys selected philosophers or philosophical movements in the history of philosophy, and of the relevance of such philosophical perspectives for contemporary debates. The subject will include a selection of material that will give students a deeper understanding of the history of philosophy from Ancient Greece to the present day.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 7017 What is Islam? (10 Credit Points)
Subject Details (p. 4880) **Legacy Code:** 102585
The 'Muslim question' has been a topic of interest to Western scholarship for over four hundred years. The subject addresses this question in two ways: firstly, by exploring internal historical conceptualisations of the faith-identity of Islam, and examining how these have shaped modern understandings of Islam from within the faith; secondly, by introducing students to multidisciplinary approaches to the study of Islam and inviting them to consider the construction and deconstruction of Islamic Studies as a field of study at various stages of history. The subject provides students with the opportunity to gain increased awareness of both debates within the field and those that scrutinise the field, that is, becoming comfortable with interrogating the cluster of theoretical and methodological strategies for scholarly inquiry into the study of Islam.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

Physics and Astronomy (PHYS)

PHYS 0001 Foundation Physics 1 (WSTC Prep) (10 Credit Points)
Subject Details (p. 4881) **Legacy Code:** 700144
This subject replaces 700026 - Physics (UWSCFS) from Term 1 2014. This subject provides a brief introduction to the essentials of Physics. This subject is focused on skills and knowledge that students from a variety of science, construction and engineering courses need in their first year of study. Students cover introductory topics in Mechanics, Energy and Power, Electricity and waves.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: PHYS 0002 - Foundation Physics 1 (UWSC)
Incompatible Subjects: PHYS 0006 - Physics (UWSCFS) PHYS 0005 - Physics (UWSC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHYS 0002 Foundation Physics 1 (WSTC) (10 Credit Points)
Subject Details (p. 4882) **Legacy Code:** 900079
This subject provides a brief introduction to the essentials of Physics. This subject is focused on skills and knowledge that students from a variety of science, construction and engineering courses need in their first year of study. Students cover introductory topics in Mechanics, Energy and Power, Electricity and Waves.
Level: Undergraduate Level 0 Preparatory subject

PHYS 0006 Physics (WSTC Prep) (10 Credit Points)
Subject Details (p. 4885) **Legacy Code:** 700026
This subject serves as an introduction to the fundamentals of physics with appropriate applications in a wide range of engineering areas.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: PHYS 0005 - Physics (UWSC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHYS 1002 Physics 1 (10 Credit Points)
Subject Details (p. 4885) **Legacy Code:** 300828
Physics is the study of the fundamental nature of matter, energy, space-time, and motion. It uses conceptual, mathematical and experimental tools to achieve this understanding. In this subject, we survey mechanics, electromagnetism, optics and thermal physics, and briefly consider relativity, quantum physics and nuclear physics. Conceptual, mathematical and experimental understanding of physics will be developed, and the use of the tools of physics (e.g. estimation, uncertainty, dimensional analysis) will be introduced. This subject provides non-specialists (e.g. students in other majors and aspiring secondary teachers) with a good basic overview of the subject, and prepares specialist students for further study.
Level: Undergraduate Level 1 subject
Equivalent Subjects: PHYS 1003 - Physics 1 PHYS 1004 Physics 1 (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHYS 1004 Physics 1 (WSTC) (10 Credit Points)
Subject Details (p. 4886) **Legacy Code:** 700035
This subject provides an introduction to physics for science and medical science students as well as providing a basis for further study of more advanced physics for students pursuing courses in nanotechnology, chemical, physical and mathematical sciences. It provides a foundation to understand the physical principles which underlay scientific instrumentation and analysis. Topics covered include systems of units; Introductory mechanics, Newton's laws, work, conservation of energy and momentum; Electricity, electrostatics, DC and AC circuits and components, introductory electromagnetism; Waves and optics, electromagnetic radiation, reflection, refraction, image formation, polarisation, interference and diffraction.
Level: Undergraduate Level 1 subject
Equivalent Subjects: LGYA 3630 - Engineering Physics PHYS 1001 - Physics 1 LGYA 5727 - Physics 1D PHYS 1003 - Physics 1 PHYS 1002 - Physics 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHYS 1006 Physics 2 (10 Credit Points)
Subject Details (p. 4887) **Legacy Code:** 300829
This subject develops a deeper understanding of physics for students pursuing courses in nanotechnology, chemical, physical and mathematical sciences. Topics covered include Mechanics: Equilibrium, stress and strain, harmonic oscillators, rotational motion, moment of inertia. Gravitation, types of force in nature. Thermal Physics: temperature, specific & latent heat, heat transfer, kinetic theory of gases, first law of thermodynamics, isothermal, isobaric & adiabatic processes. Introduction to Modern Physics: special relativity, time dilation, length contraction, momentum, mass, rest energy, velocity addition. Basic quantum theory, Planck's hypothesis, wave nature of matter, quantum mechanical view of atoms. Nuclear physics, radiation, half-life, nuclear reactions.
Level: Undergraduate Level 1 subject
Equivalent Subjects: LGYA 6150 - Physics 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHYS 2004 The Cosmos in Perspective: Information and Life (10 Credit Points)
Subject Details (p. 4888) **Legacy Code:** 300966
From the Big Bang to the end of the Universe, from our own Solar System to the farthest superclusters of galaxies, our knowledge of the Universe is growing at an amazing rate. This subject will explore the cosmos at scales from planets to the edge of the visible universe. We develop an appreciation of the processes of science, and an understanding of how astrophysicists know what they know. We will consider cultural perspectives on the cosmos, including that of indigenous Australians. We will consider our place in the cosmos: the requirements for life to exist, and the possibility of other life in the Universe.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHYS 2005 Classical Physics and Advanced Technologies (10 Credit Points)
Subject Details (p. 4888) **Legacy Code:** 301393
This subject explains in depth aspects of classical mechanics related to forced and damped oscillations. Physical waves are introduced and formalized by describing applications of the wave equation to mechanical systems and electromagnetic radiation. Interference and diffraction are detailed using electromagnetic fields (physical optics). Main technological applications of mechanical oscillations and electromagnetic waves are also explained, such as the atomic force microscope, laser, optical tweezers and the zeta-sizer.
Level: Undergraduate Level 2 subject
Pre-requisite(s): PHYS 1006
Equivalent Subjects: LGYA 6024 - Applied Instrumentation in Nanotechnology
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHYS 3001 Astroinformatics (10 Credit Points)
Subject Details (p. 4889) **Legacy Code:** 300916
Modern astronomy is strongly driven by large datasets, which require advanced computing procedures to analyse. Students will learn about the science of stars, planets and galaxies; the use of computers in science; and how to formulate and solve challenging problems in modern science using high-level computer skills. These skills are highly transferable to other occupations.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHYS 3006 Classical Physics (10 Credit Points)
Subject Details (p. 4890) **Legacy Code:** 301262
This subject covers the key components of classical physics to the advanced level expected of a physics major. Newtonian mechanics will focus on realistic problems, in three dimensions and in the presence of friction and drag. Electromagnetism introduces Maxwell's equations, and applies them in the presence of matter. Thermodynamics is presented rigorously, focusing on the most general forms of the first and second laws. We will also introduce the basic elements of statistical physics. Fluids and waves will introduce the basic equations of fluids, and in particular the full (PDE) wave equation and its solution.
Level: Undergraduate Level 3 subject
Pre-requisite(s): PHYS 1006
Incompatible Subjects: CHEM 2003 Classical Physics and Applied Technologies
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHYS 3007 Quantum Physics (10 Credit Points)
Subject Details (p. 4890) **Legacy Code:** 301392
The subject builds on quantum concepts that have been introduced in earlier subjects such Physics 1,2, Nanotechnology and Chemistry. It aims at developing the student's understanding of quantum principles as they apply to hard and soft matter systems, including atoms , molecules and extended arrays such as metal and semiconductors as well as biological tissue
Level: Undergraduate Level 3 subject
Pre-requisite(s): PHYS 1006 - Physics 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHYS 3008 Biomedical Physics (10 Credit Points)
Subject Details (p. 4891) **Legacy Code:** 301459
Students completing this subject will be able to apply the principles and practice of physics to advanced biomedical applications, to critically analyse data regarding, and solve problems involving the physics of living systems, and to work with a range of advanced instrumentation. This subject will provide advanced training in biomedical physics and prepare students for career pathways in medical and biomedical physics. The subject content includes concepts of diffusion and Brownian motion; applications of thermodynamics to biological systems and the origin of life; biomolecular self-assembly; nuclear magnetic resonance and magnetic resonance imaging; atomic force microscopy; molecular dynamics simulations; biophotonics; and nuclear and radiation physics in biomedical sciences.
Level: Undergraduate Level 3 subject
Pre-requisite(s): PHYS 1006 - Physics 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHYS 7001 A Cosmic Perspective (10 Credit Points)
Subject Details (p. 4892) **Legacy Code:** 301247
The subject explores and challenges scientific as well as cultural perspectives on the cosmos, from its composition, expansion and the development and endings of the stars and planets, to life, its limits, evolution and mass extinctions on Earth. The subject also considers the development of consciousness, astrology vs astronomy, expanding horizons, space travel and space exploration.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHYS 7002 Space Instrumentation, Technology and Communication (10 Credit Points)
Subject Details (p. 4893) **Legacy Code:** 301248
The Space Instrumentation, Technology and Communication subject is focussed on the application of space technology in industrial settings. Its main objective is to provide a sound knowledge of the underlying principles which form a thorough basis for careers in space technology, satellite communications and related fields. This subject gives the student grounding in the technologies used in space science. By considering the underlying scientific principles and case studies of the instrumentation used in space, students will not only understand the current state of the art in space science, but also the foundations of the field in order to be able to stay current in this fast-moving field. Content includes but is not limited to: Imaging, Detectors, Principles of Communication, and Principles of Space Technology.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHYS 7003 Space Science, Planetary Science and Meteorology (10 Credit Points)
Subject Details (p. 4893) **Legacy Code:** 301249
This subject examines the six key priorities of the Australian Space Agency: communication, space debris monitoring, navigation and positioning, Earth observation, space technology research and development, and remote asset management. Students will examine the Sun and Solar System, planetary science, meteorology, and the physics of rockets and satellites. Students will explore the interconnections between the Earth land, ocean, atmosphere, and life of our planet in the era of modern satellite technologies. These include the critical review of our understanding about the cycles of water, carbon, rock, and other materials that continuously shape, influence, and sustain Earth and its inhabitants. Students will also be able to design new models of the cyclical interactions between the Earth system and the Sun, Moon and will discover the fundamental processes which define our Universe and our planet.
Level: Postgraduate Coursework Level 7 subject

Political Science and Policy (POLI)

POLI 1001 Australian Politics (10 Credit Points)
Subject Details (p. 4896) **Legacy Code:** 100848
In 2013 this subject replaced by 101973 - Australian Politics. This subject provides an introduction to Australian Politics. It outlines the central features of the federal political system with attention to both historical background and current debates. In addition to study of the institutional frameworks (the Constitution, parliament, political parties and so on), the subject examines the dynamics of inclusion and exclusion that have shaped Australian politics. It explores what it has meant in the past, what it means in the future, for Australians to live together as members of a political community.
Level: Undergraduate Level 1 subject
Equivalent Subjects: LGYB 0226 - Australian Politics LGYA 0270 - Introduction to Australian Politics
Restrictions: Please see the Subject Details page for any restrictions for this subject

POLI 1002 Introduction to International Relations (10 Credit Points)
Subject Details (p. 4896) **Legacy Code:** 101956
In 2022, this subject is replaced by POLI 1008 World Politics and International Relations (WSTC). This is a foundation subject for the major in International Relations and Asian Studies. As such, this subject will introduce students to key topics and debates in the field of International Relations (IR). The subject will familiarise students with leading IR theories and their explanation of political events, phenomena, and processes which cross the territorial boundaries of the state. Students will be exposed to the interplay between power, interest, ideas, identity, and resistance, in explaining continuity and change in international relations. The subject is designed to provide students with the analytical tools and intellectual frameworks needed to understand the behaviour of different international actors in contemporary global affairs.
Level: Undergraduate Level 1 subject
Equivalent Subjects: POLI 1003 - Introduction to International Relations (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

POLI 1003 Introduction to International Relations (WSTC) (10 Credit Points)
Subject Details (p. 4897) **Legacy Code:** 700268
In Term 3, 2022 this subject replaced by POLI 1008 - World Politics and International Relations (WSTC). This subject will introduce students to key topics and debates in the field of International Relations (IR). The subject will familiarise students with leading IR theories and their explanation of political events, phenomena, and processes which cross the territorial boundaries of the state. Students will be exposed to the interplay between power, interest, ideas, identity, and resistance, in explaining continuity and change in international relations. The unit is designed to provide students with the analytical tools and intellectual frameworks needed to understand the behaviour of different international actors in contemporary global affairs.
Level: Undergraduate Level 1 subject
Co-requisite(s): Students enrolled in the combined DiplomaBachelor courses listed below must pass all College Preparatory units listed in the course structure before progressing to the Year 2 units
Equivalent Subjects: POLI 1002 - Introduction to International Relations
Restrictions: Please see the Subject Details page for any restrictions for this subject

POLI 1007 World Politics and International Relations (10 Credit Points)
Subject Details (p. 4898)
This subject is an introduction to the key topics and debates that make up contemporary world politics and international relations. The subject will address the major historical developments, key issues and the various actors and institutions that make up world politics. Students will be introduced to some of the principal international relations theories that will provide them with the tools to investigate specific challenges confronting states, citizens, and non-state actors in our increasingly interconnected world. Issues of war and peace, state sovereignty, globalisation, global inequality, humanitarian intervention and human security will be addressed.
Level: Undergraduate Level 1 subject
Equivalent Subjects: POLI 1002 Introduction to International Relations POLI 1003 Introduction to International Relations (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

POLI 1008 World Politics and International Relations (WSTC) (10 Credit Points)
Subject Details (p. 4899)
This subject is an introduction to the key topics and debates that make up contemporary world politics and international relations. The subject will address the major historical developments, key issues and the various actors and institutions that make up world politics. Students will be introduced to some of the principal international relations theories that will provide them with the tools to investigate specific challenges confronting states, citizens, and non-state actors in our increasingly interconnected world. POLI 2006 Politics of Australia and Asia Relations (10 Credit Points)
Subject Details (p. 4901) **Legacy Code:** 100277
In this subject students will become familiar with Australian diplomacy and appreciate the range of pressing historical, political and cultural issues that affect Australia's place in the Asia Pacific region. It explores the factors that have shaped Australia's relationships with key countries in the region and considers the vital impact of political actors and their ideological stances. In developing a depth of knowledge on the importance of Australia's regional policies, this subject provides students with the opportunity to be involved in a simulation task dealing with a 'hot topic' for Australia's relations within the Asia Pacific region.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

POLI 3001 Activism, Engagement and Social Change (10 Credit Points)
Subject Details (p. 4902) **Legacy Code:** 101981
This subject is designed for students interested in the politics, processes and ethics of social change. It covers the topics of Internet activism, NGO politics and ethics, identity politics, legal lobbying, revolutions and regime changes, and the role of art in consciousness raising. We will explore the efficacy of different social change strategies, the ethics of various modes of activism, the role that national and transnational politics plays in campaigning, the importance of identity for engagement with social change processes, and the ideologies informing theories of change.

POLI 3004 American Foreign Policy Since 1945 (10 Credit Points)
Subject Details (p. 4903) **Legacy Code:** 100985
This subject will analyse both the major international issues and crises which America confronted after 1945 and how successive American presidents and their policy makers responded to these problems
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYB 4964 - American Foreign Policy LGYA 0954 - American Foreign Policy Since 1945
Restrictions: Please see the Subject Details page for any restrictions for this subject

POLI 3005 Democracy in Asia (10 Credit Points)
Subject Details (p. 4903) **Legacy Code:** 100903
This subject is concerned with the theory and practice of democracy in modern and contemporary history of Asia. It explores a range of issues relating to liberalism, human rights, political reform and democratization. It seeks to explain the differences in the ways in which democracy has been conceived, understood and practiced in different cultures and societies. It also examines the East-West debate on "Asian values" and the suitability of Western-style democracy to Asia. Finally, it discusses the prospects for democracy in Asia.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 9998 - Democracy in Asia
Restrictions: Please see the Subject Details page for any restrictions for this subject

POLI 3006 International Organisations and Global Governance (10 Credit Points)
Subject Details (p. 4904) **Legacy Code:** 102189
This subject addresses the competing concepts inherent in global governance through an examination of the existing international society of states whose principle is based on respect for state sovereignty. It also addresses the complex process of global governance in which states, non-governmental organisations, multinational corporations, and intergovernmental organisations participate and pursue their goals. It will specifically look at the complex role of the United Nations, the United Nations Security Council, and the role of international organisations aimed at addressing issues, such as security, human rights, humanitarian intervention, trade, the environment, health, migration, and labour rights.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

POLI 3007 International Relations of Southeast Asia (10 Credit Points)
Subject Details (p. 4905) **Legacy Code:** 102190
This subject focuses on the key international relations issues and challenges facing the Southeast Asian region in the 21st century. Commencing with the historical issues that have shaped the nations of Southeast Asia it will then consider the issues, such as the war on terrorism; the economic demands of globalism; maritime security; and social and political demands centred around issues such as democracy, human rights, the environment, and transnational crime. Finally, it will consider the shifting power structure within the Asian region and whether this will result in Southeast Asia gaining genuine autonomy and the impact this has on regionalism.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

POLI 3008 International Special Study (10 Credit Points)
Subject Details (p. 4905) **Legacy Code:** 102193
This subject provides students with opportunities outside the usual classroom experience. It is designed particularly for students who (1) enrol in short-course study tours, and/or (2) who take a placement within an international workplace. Several UWS partner institutions (e.g., the University of Seoul) run annual short-course study programs. With regard to placements (internships), students must seek a placement that connects directly with their areas of study.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

POLI 3009 Looking at Global Politics Through Film (10 Credit Points)
Subject Details (p. 4906) **Legacy Code:** 101733
Popular representations of world politics shape our collective understanding of political history and international relations. This subject examines the ways in which film can communicate political messages to its audience, as well as the far more difficult issue of the effects that those messages might have on viewers. Although the discipline of International Relations (IR) has overwhelmingly ignored popular culture, it is the argument of this subject that popular culture actually provides us with a wealth of significant representations of world politics.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

POLI 3010 Politics of Post-War Japan (10 Credit Points)
Subject Details (p. 4907) **Legacy Code:** 100278
The subject studies the post-war Japanese political experience: a vanquished country transformed into an economic super power with a 'peace' constitution and now in relative decline. In particular the subject will examine the impact of the dominance of the Liberal Democratic Party on domestic politics and the intersection between domestic political developments and security and foreign policy matters.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

POLI 3012 The Politics of Civilisation (10 Credit Points)
Subject Details (p. 4908) **Legacy Code:** 102005
What is civilisation? What are civilisations? What does it mean to be civilised? What does it mean to be uncivilised, barbaric or savage? These are some of the key questions explored in this unit. We will investigate the normative demands of civilisation, from 16th Century European colonial 'civilising missions' to the 21st Century global war on terror. We will explore the history of relations between civilisations in light of the 'clash of civilisations' thesis, including relations between the Western and Islamic worlds. We will discover the power of ideas and the influence they can have on real world policy-making.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

POLI 3014 War and Peace (10 Credit Points)
Subject Details (p. 4908) **Legacy Code:** 101375
This subject examines problems and issues in international politics. In particular the subject critically assesses the major theoretical paradigms associated with attempts to explain international behaviour of key individuals, nations and the international system. Major issues and key problems in world affairs since the end of World War Two (such as justice and equality, human rights and terrorism) are examined.
Level: Undergraduate Level 3 subject
Incompatible Subjects: LGYB 0053 - War and Peace
Restrictions: Please see the Subject Details page for any restrictions for this subject

POLI 7001 Development and Security (10 Credit Points)
Subject Details (p. 4909) **Legacy Code:** 101896
Successful development requires the provision of security. As a corollary, lack of development can breed insecurity and violence. The overall nexus between development and security is not only about a country's domestic affairs; it concerns the global community. Amid the increasing pace of globalisation, global inequalities both within and between countries have increased, which have been complicated by competitions between groups, actors and countries. These may pose development and security challenges at national and global scales. This subject will concentrate on three key aspects. First, it will interrogate the complex relationship between development and security from interdisciplinary perspectives. Second, this subject will examine the development roots of insecurity focusing on social and economic structures and key issues in development and security from local and global perspectives as well as from micro and macro outlooks. Third, relevant case studies will be embedded throughout the subject contents to enhance students' analytical skills and practical orientation on the field of development and security.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

POLI 7002 Translation from Theory and Research to Policy (10 Credit Points)
Subject Details (p. 4909) **Legacy Code:** 102180
The focus of study in this subject is on policy-making and implementation and the place of theory and research in policy formation. In the first part of the subject students explore the nature of public policy - addressing constructs of policy and policy-making and approaches to analysing public policy. The political and social practices of policy-making and implementation in Australia are contextualised and examined at the local, national and global levels. The second part of the subject takes examples of policy-making in the field of social sciences and examines the role of theory and research in the problematisation of issues and identification of solutions. The identification of competing interests, relations of power and key players in understanding, analysing and responding to policy and its outcomes will be undertaken.

Process and Resources Eng. (PROC)

PROC 1002 Food Science 1 (10 Credit Points)
Subject Details (p. 4912) **Legacy Code:** 300805
Food provides sustenance to life, nutrition for good health, enjoyment and cultural identity. Students will gain an awareness of the history and cultural significance of food and its traditions in Australia and around the world. This subject introduces the basic principles for understanding the science behind food; its composition, chemical, physical and functional characteristics. Fruits and vegetables, cereal, meat and dairy products will be covered, how they are processed and impacts on food quality and nutrition. Current issues will be discussed, such as world food supply, food-borne disease, diet and health, and new trends in food.
Level: Undergraduate Level 1 subject

PROC 1006 Materials Engineering Fundamentals (10 Credit Points)
Subject Details (p. 4914) **Legacy Code:** 301414
This subject will introduce students to the foundations of chemistry, exploring the molecular nature of matter and change which is essential foundational knowledge for a career in materials engineering. From atomic structure and the understanding of the periodic properties of elements, students learn about the chemical bonds and intermolecular forces that are responsible for determining the structure and properties of materials. Students put theory into practice by conducting and reporting on laboratory experiments to test the principles of chemical equilibrium, chemical reactions involving acids/bases, electron transfer as well as thermodynamics and kinetics of chemical processes.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PROC 1007 Introduction to Food Science (WSTC) (10 Credit Points)
Subject Details (p. 4915) **Legacy Code:** 700334

PROC 1008 Introduction to Materials Engineering (10 Credit Points)
Subject Details (p. 4916) **Legacy Code:** 301421
Modern science and technology is highly dependent on materials whose properties can be controlled to accommodate a wide range of applications. Materials are of the utmost importance for scientists and engineers who need to select appropriate materials for system design and engineering applications. Students will explore the structure and properties of all types of materials, including metals, ceramics, polymers and composites through theories, principles and a range of experiments. Participation in the lab experiments puts theoretical knowledge into practice enhancing each student's understanding of materials properties, diffusion mechanisms, corrosion, and degradation as well as ways to achieve equilibrium. Graduates who have completed this subject may pursue careers as materials scientists, engineers, researchers, or consultants in industries such as aerospace, automotive, electronics, energy, biomedical, and manufacturing, among others.
Level: Undergraduate Level 1 subject
Equivalent Subjects: ENGR 1008 - Engineering Materials
ENGR 1010 - Engineering Materials (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

PROC 2001 Food Science 2 (10 Credit Points)
Subject Details (p. 4917) **Legacy Code:** 300842
This subject introduces students to the principles of food preservation, including heat treatments, chilling, freezing, dehydration, pickles and fermentation. Factors affecting food quality are explored with respect to microbial, chemical and physical changes in food and their effects on food safety, nutritional value and sensory characteristics. The basic principles of good manufacturing practises, sanitation and Hazard Analysis Critical Control Point (HACCP) for control of food safety will be studied in relation to the design of safe food manufacturing processes. The application of the food preservation principles to the processing of food products is covered through hands-on practicals in the pilot plant.
Level: Undergraduate Level 2 subject
Pre-requisite(s): PROC 1002
Equivalent Subjects: LGYB 8737 - Food Science Technology Practicum 12 PROC 1004 - Food Science 2

PROC 2002 Innovative Foods (10 Credit Points)
Subject Details (p. 4917) **Legacy Code:** 301452
This subject introduces students to the principles of food preservation, including heat treatments, chilling, freezing, dehydration, pickles and fermentation. Factors affecting food quality are explored with respect to microbial, chemical and physical changes in food and their effects on food safety, nutritional value and sensory characteristics. The basic principles of good manufacturing practises, sanitation and Hazard Analysis Critical Control Point (HACCP) for control of food safety will be studied in relation to the design of safe food manufacturing processes. The application of the food preservation principles to the processing of food products is covered through hands-on practicals in the pilot plant.
Level: Undergraduate Level 2 subject
Pre-requisite(s): PROC 1005 - Introduction to Food Science
Restrictions: Please see the Subject Details page for any restrictions for this subject

PROC 2003 Materials Selection and Design (10 Credit Points)
Subject Details (p. 4918) **Legacy Code:** 301415
Materials are a critical point of consideration when designing a solution to a technical problem. However, materials can also be quite complex by themselves and can possess a range of properties which may only partially suit an intended solution. In this unit, students use real world scenarios to learn to make decisions concerning material selection under different circumstances, based upon technical requirements, and balanced against sustainability and cost.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PROC 3002 Advanced Food Science and Technology (10 Credit Points)
Subject Details (p. 4919) **Legacy Code:** 300904
This subject will extend student understanding of current and emerging food processes and packaging technologies. Students will gain an appreciation of the physicochemical processes involved in food manufacture and their integration to produce safe, nutritious and palatable food. Students will become familiar with methods to monitor shelf life of foods, learn about packaging science and be able to select the most appropriate packaging solution for a range of food applications. The environmental impact of food processing and packaging will also be explored, along with the factors affecting the sustainability of food manufacture. Practical workshops will be conducted to produce and analyse food products, plus factory tours to food manufacturing and packaging sites.
Level: Undergraduate Level 3 subject
Pre-requisite(s): PROC 2001 AND
NATS 3038
Equivalent Subjects: PROC 3001 - Advanced Food Science and Technology
Incompatible Subjects: NATS 2016 - Food Processing and Analysis
PROC 3006 - Packaging Science and Technology

PROC 3003 Food Product Development (10 Credit Points)
Subject Details (p. 4919) **Legacy Code:** 300915
This subject is a final year capstone subject where students work in a team environment to apply the knowledge previously gained through their studies in nutrition and food science to develop a novel food product. The entire process of product development will be covered, including: idea generation; collating market, technical and consumer information; consumer surveying to establish the need/desire for a new product; product innovation development; quality testing and packaging. Students will develop specialised knowledge of the total product development system, including the ability to design, develop formulations and evaluation of sensory properties. Final product assessment includes nutritional composition, microbiological analysis, sensory evaluation and labelling compliant with regulations. The project is run in the simulated industry environment; team work among the members plays a key part of the subject.
Level: Undergraduate Level 3 subject
Pre-requisite(s): NATS 3038 - Quality Assurance and Food Analysis
Restrictions: Please see the Subject Details page for any restrictions for this subject

PROC 3007 Food Innovation and Technology (10 Credit Points)
Subject Details (p. 4920) **Legacy Code:** 301454
This subject will extend your understanding of current and emerging food processes and packaging technologies. You will gain an appreciation of the physicochemical processes involved in food manufacture and their integration to produce safe, nutritious and palatable food. You will become familiar with methods to monitor shelf life of foods, learn about packaging science and be able to select the most appropriate packaging solution for a range of food applications. The environmental impact of food processing and packaging will also be explored, along with the factors affecting the sustainability of food manufacture.
Level: Undergraduate Level 3 subject

PROC 3008 Materials Processing and Applications (10 Credit Points)
Subject Details (p. 4921) **Legacy Code:** 301411
This subject focuses on the materials aspects of advanced material processing with an emphasis on microstructures. This extends students' knowledge in advanced materials, their properties, processing technologies, potential applications and simulations. Students will gain skills and experience with commercial software packages to solve sophisticated problems associated with materials engineering as well as develop experimentation techniques for the validation of these problems.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PROC 4001 Advanced Materials Topics (10 Credit Points)
Subject Details (p. 4922) **Legacy Code:** 301416
Advancements in materials have underpinned technological development since the earliest days of human civilisation. As the challenges of the 21st Century emerge, the development of advanced materials will undoubtedly prove crucial for achieving sustainable solutions. This subject is a research-led learning experience for students whereby advanced materials researchers from WSU and beyond will deliver a series of real-world case studies on their research. Students will be challenged to assess these different material contexts and respond to hypothetical problems by performing critical reviews, in-depth analyses and presenting expert recommendations.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PROC 4002 Engineering Materials from Waste (10 Credit Points)
Subject Details (p. 4922) **Legacy Code:** 301417
Students will learn about the high potential of waste materials produced by continually growing rapid urbanisation and rising populations, which can be widely reused in engineering projects such as buildings, roads. The focus of this subject is the use of solid waste such as glass, tailings and demolished waste in engineering materials such as concrete, road base and asphalt. In addition, students will explore several recycling and recovery processes and investigate the performance of waste incorporated into engineering materials. Students report on real world state-of-the-art developments while integrating concepts of the circular economy, Australian standards and regulations to ensure the compliance of the developed materials. Work Integrated Leaning (WIL) is a component of this subject.
Level: Undergraduate Level 4 subject

Public Health (PUBH)

PUBH 0001 Empowering Individual Health (WSTC Prep) (10 Credit Points)
Subject Details (p. 4923) **Legacy Code:** 700279
Empowering Individual Health focuses on the health care system in Australia. It aims to give students an understanding of the different elements that constitute the health care system in Australia and abroad. The subject will look at how the structure and funding of the health care system, as well as the political environment in which it operates, impacts life expectancy in a country, as well as how the elements of the health care system impact national and individual health enabling behaviours.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 1005 Foundations of Wellbeing (10 Credit Points)
Subject Details (p. 4924) **Legacy Code:** 400962
This subject provides an introduction to wellbeing through a reflective and strengths-based approach that seeks to enhance personal, social and community wellbeing. Students will be able to understand, analyse and synthesize personal and structural factors that influence wellbeing. When considering how these factors and how issues of social justice and equity have differential impacts on both individuals and communities, students will be able to develop relevant strategies for taking personal and social action to enhance wellbeing.
Level: Undergraduate Level 1 subject
Equivalent Subjects: HUMN 1020 - Foundations of Wellbeing
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 1006 Population Health and Society (10 Credit Points)
Subject Details (p. 4924) **Legacy Code:** 400870
This subject will provide you with foundational concepts and factors relating to population health in our society. The social and environmental determinants of health will be introduced and their roles toward disease, health and wellbeing will be explored. The Australian health care system will be compared with alternative models to examine strengths and challenges in advancing population health.
Level: Undergraduate Level 1 subject
Equivalent Subjects: PUBH 1007 - Population Health and Society (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 1007 Population Health and Society (WSTC) (10 Credit Points)
Subject Details (p. 4926) **Legacy Code:** 700066
This subject will provide you with foundational concepts and factors relating to population health in our society. The social and environmental determinants of health will be introduced and their roles toward disease, health and wellbeing will be explored. The Australian health care system will be compared with alternative models to examine strengths and challenges in advancing population health.
Level: Undergraduate Level 1 subject
Equivalent Subjects: PUBH 1006 - Population Health and Society PUBH 1001 - Dynamics of Health HLTH 1005 - Meanings of Health and Models of Care
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 1008 Professional Pathways in Health Science (10 Credit Points)
Subject Details (p. 4927) **Legacy Code:** 400783
The subject introduces students to the health science workforce. It discusses professional issues, history and philosophy in health sciences as they relate to health promotion, health service management, therapeutic recreation and public health. In addition, this subject explores the career pathways for health science students, discusses the Australian health system, and examines the impacts of potential changes in the health system to a career in health science. This subject helps students define what area within health science they would like to examine and study in more detail.
Level: Undergraduate Level 1 subject
Equivalent Subjects: PUBH 1004 - Foundations of Health Sciences LGYA 7157 - Foundation of Therapeutic Recreation PUBH 1009 - Professional Pathways in Health Science (UWSC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 1009 Professional Pathways in Health Science (WSTC) (10 Credit Points)
Subject Details (p. 4928) **Legacy Code:** 700075
This subject introduces students to professional issues, history and the philosophy in health sciences: health promotion, health service management and therapeutic recreation. Theories and key concepts of health promotion, health service management and therapeutic recreation are introduced. Students will be introduced to an understanding of human development and the health science processes. Students will examine how human growth and development influences development of socio-economic, cultural, gender, environmental, health science issues. Students will begin an electronic portfolio to help them take more control over their education and assist students to make connections with their learning experiences while building critical and reflective skills.
Level: Undergraduate Level 1 subject
Equivalent Subjects: PUBH 1008 - Professional Pathways in Health Science PUBH 1004 - Foundations of Health Science LGYA 7157 - Foundations of Therapeutic Recreation
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 1010 Health Promotion Theory and Approaches (10 Credit Points)
Subject Details (p. 4928) **Legacy Code:** 401392
Health promotion is a process that seeks to enable individuals, communities and populations to increase control over their health. It does so by addressing the determinants of health and equity issues, in addition to providing individuals and communities with the skills and knowledge to make healthy lifestyle choices and to improve health outcomes. Theoretical underpinnings of the various approaches to health promotion are explored in this unit. In addition, factors that enhance and limit health promotion are analysed in conjunction with bigger picture approaches of working with policy. The evidence-based practice for health promotion is outlined together with the need to move beyond education. Approaches to health promotion at the individual, community and population level are explored, including particular considerations for working with Indigenous people.
Level: Undergraduate Level 1 subject
Incompatible Subjects: PUBH 2001 - Approaches to Health Promotion
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 1011 Promoting Health Collaboratively in Communities (10 Credit Points)
Subject Details (p. 4930) **Legacy Code:** 401415
Health Promotion is everyone's business. All health professionals should seek opportunities to promote health equity and social justice, to support healthy lifestyle choices and to connect communities with appropriate health and social services. To do this effectively, health professionals must work collaboratively with communities. This subject focuses on theories and principles that support community-centred transformative action in health promotion, and how to apply them in various local, national and global contexts. Students will be introduced to concepts and practice related to community engagement, participation, development and empowerment; community capacity and resilience-building. There will also be a focus on community identity, social justice and ethical considerations associated with working with communities. Particular focus is made on approaches to working with Aboriginal and Torres Strait islander peoples, marginalised and vulnerable communities.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 1012 Public Health (10 Credit Points)
Subject Details (p. 4931) **Legacy Code:** 401398
The subject introduces fundamental concepts of public health. Public health is examined from individual, community, historical, contemporary, cultural, gender, ethnic, economic, political, environmental, population, emergency and epidemiological perspectives. The subject shows how innovation and development in public health thinking and practice have improved the health of populations in Australia and globally. Continuing and recently emerging challenges to local, Indigenous, national and international public health are explored, along with public health challenges facing future generations.
Level: Undergraduate Level 1 subject
Incompatible Subjects: PUBH 2016 - Public Health
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 1013 Health Promotion Theory and Approaches (UG Cert) (10 Credit Points)
Subject Details (p. 4933) **Legacy Code:** 500059
Health promotion is a process that seeks to enable individuals, communities and populations to increase control over their health. It does so by addressing the determinants of health and equity issues, in addition to providing individuals and communities with the skills and knowledge to make healthy lifestyle choices and to improve health outcomes. Theoretical underpinnings of the various approaches to health promotion are explored in this unit. In addition, factors that enhance and limit health promotion are analysed in conjunction with bigger picture approaches of working with policy. The evidence-based practice for health promotion is outlined together with the need to move beyond education. Approaches to health promotion at the individual, community and population level are explored, including particular considerations for working with Indigenous people.

PUBH 2001 Approaches to Health Promotion (10 Credit Points)
Subject Details (p. 4935) **Legacy Code:** 400867
For Campbelltown or Online 4656 Bachelor of Health Science students, 400867 Approaches to Health Promotion is replaced with 401392 Health Promotion Theory and Approaches. Health promotion is a process that seeks to enable individuals, carers, communities and populations to increase control over their health. It does so by addressing the determinants of health and equity issues, leading to improved health outcomes. Theoretical underpinnings of the various approaches to health promotion are explored in this unit. In addition, factors that enhance and limit health promotion are analysed in conjunction with bigger picture approaches of working with policy. The best evidence-based practice for health promotion is outlined together with the need to move beyond education.
Level: Undergraduate Level 2 subject
Equivalent Subjects: PUBH 2011 - Essentials of Health Promotion PUBH 2002 - Approaches to Health Promotion (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 2002 Approaches to Health Promotion (WSTC) (10 Credit Points)
Subject Details (p. 4936) **Legacy Code:** 700065
Health promotion is a process that seeks to enable individuals, carers, communities and populations to increase control over their health. It does so by addressing the determinants of health and equity issues, leading to improved health outcomes. Theoretical underpinnings of the various approaches to health promotion are explored in this unit. In addition, factors that enhance and limit health promotion are analysed in conjunction with bigger picture approaches of working with policy. PUBH 2003 Bugs and Drugs (10 Credit Points)
Subject Details (p. 4937) **Legacy Code:** 400621
Throughout history humans have sought to control their well-being whether it be in response to disease-producing microbes or situations inherent in modern day life. This subject examines an eclectic range of treatments and technologies. Some have been triggered by ancient and enduring infectious foes such as smallpox and the plague or emerging menaces including Ebola and SARS. Others are nested within contemporary living and may be constructed as communicable in the social sense. Selected issues will be explored including agents utilised in the alteration of sensory perception including hallucinogens as well as reaction to and manipulation of body image.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 2004 Clinical Classification and Coding (10 Credit Points)
Subject Details (p. 4938) **Legacy Code:** 300951
This subject is designed to enable the student to classify diseases and interventions using the current version of the International Statistical Classification of Diseases and Related Health Problems, Tenth Revision, Australian Modification, the Australian Classification of Health Interventions and the Australian Coding Standards (ICD-10-AM/ACHI/ACS). The subject will also include the historical development of clinical classification systems as well as the purpose and value of classifying diseases and interventions within the health system. The student will become familiar with the structure and content of ICD-10-AM ACHI/ACS and be introduced to the rules and conventions associated within ICD-10-AM/ACHI. The primary ACS for ICD-10-AM/ACHI will be studied and applied when coding from line diagnoses/interventions, case studies, simple discharge summaries and clinical record reports. They will gain skills in data abstraction for clinical coding, specifically, the selection of principal and additional diagnoses and interventions.
Level: Undergraduate Level 2 subject
Pre-requisite(s): HLTH 2007
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 2005 Culture, Diversity and Health (10 Credit Points)
Subject Details (p. 4939) **Legacy Code:** 400866
This subject introduces skills for understanding and engaging effectively with the culturally and socially diverse world in which we live and work. Indigenous Australia is a major theme and students will gain an appreciation of the achievements and needs of Indigenous Australians. The subject examines cultural safety more broadly and puts these issues in the context of health professionals working in multi-cultural settings and handling culturally different health philosophies and practices. Cultural diversity is increasingly recognised as a major issue in the delivery of health care and a major determinant of Indigenous health.
Level: Undergraduate Level 2 subject
Equivalent Subjects: PUBH 2006 - Culture Diversity and Health (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 2006 Culture, Diversity and Health (WSTC) (10 Credit Points)
Subject Details (p. 4941) **Legacy Code:** 700072
This subject introduces skills for understanding and engaging effectively with the culturally and socially diverse world in which we live and work. Indigenous Australia is a major theme and students will gain an appreciation of the achievements and needs of Indigenous Australians. The subject examines cultural safety more broadly and puts these issues in the context of health professionals working in multi-cultural settings and handling culturally different health philosophies and practices. Cultural diversity is increasingly recognised as a major issue in the delivery of health care and a major determinant of Indigenous health.
Level: Undergraduate Level 2 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 2010 Epidemiology (10 Credit Points)
Subject Details (p. 4942) **Legacy Code:** 300872
Epidemiology is an analytical science concerned with the distribution and determinants of health-related states in populations, aimed at the management of health problems. Epidemiology is not limited to controlling epidemics but assesses and manages physical, mental and social well-being in living, working and recreational environments. The subject introduces identification and understanding of risk factors for health and disease, and assists the student to develop an investigation protocol for assessing a specific health state within their own field of interest. This addresses career needs for a range of health studies while introducing the epidemiological analytical approach to risk assessment and research.
Level: Undergraduate Level 2 subject
Equivalent Subjects: PUBH 2009 - Epidemiology
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 2012 Health Care Systems (10 Credit Points)
Subject Details (p. 4943) **Legacy Code:** 400965
The tools of economic appraisal and decision making permeate all aspect of modern life. Reliance on economic analysis is highly evident in contemporary health care systems. The funding and provision of health care/services is continuingly changing and subject to ever increasing demand for limited and finite resources. The subject explores, examines and reviews the impact these limitations have on selected health care systems. Students are encouraged to research and examine their own and other health care systems and investigate the differences in access, equity, and efficiency. Practical, contemporary and applied case studies/examples are continuously utilised and students are encouraged to channel the knowledge gained into key areas of interest at the macro and micro level.
Level: Undergraduate Level 2 subject
Equivalent Subjects: BUSM 2019 - Health Care Systems
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 2015 Mental Health in the Community (Block Mode) (10 Credit Points)
Subject Details (p. 4944) **Legacy Code:** 101773
Mental health service delivery in the community is now the main form of care for people across the lifespan living with mental and emotional disorders. The development of a wider range of pharmacological, psychological and psychosocial treatments has enabled many people to live productively in the community. This subject explores the changes in policy and practice in the development of integrated mental health care and the impact of these changes on the lives of people living with mental illness and their communities. Early intervention, resilience and community capacity building are concepts explored in this subject in terms of mental health and wellbeing. The subject explores these issues with a focus on Aboriginal and Torres Strait Islander communities and mental health.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYA 7541 - Community Mental Health Services
BEHV 2008 - Mental Health in the Community
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 2016 Public Health (10 Credit Points)
Subject Details (p. 4944) **Legacy Code:** 400285
This is a flexible learning subject that deals with foundational concepts and issues relating to public health. The philosophical and historical development and the roles of public health in Australia are examined, as are the theories, policies, politics and principles that govern and inform practice. Emphasis is placed on understanding health issues and concerns in Greater Western Sydney Region as well as on national and international contexts of population health. The subject draws on current and emerging practical situations to highlight the dynamic yet continuing legacy of public health.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 2018 Culture Diversity and Health (UG Cert) (10 Credit Points)
Subject Details (p. 4945) **Legacy Code:** 500056
This subject introduces skills for understanding and engaging effectively with the culturally and socially diverse world in which we live and work. Indigenous Australia is a major theme and students will gain an appreciation of the achievements and needs of Indigenous Australians. The subject examines cultural awareness more broadly and puts these issues in the context of health professionals working in multi-cultural settings and handling culturally different health philosophies and practices. Cultural diversity is increasingly recognised as a major issue in the delivery of health care and a major determinant of Indigenous health.
Level: Undergraduate Level 2 subject
Equivalent Subjects: PUBH 2006 Culture Diversity and Health (WSTC)
PUBH 2005 Culture Diversity and Health
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 2020 Epidemiology for Public Health (10 Credit Points)
Subject Details (p. 4946)
Epidemiology is the foundation of public health and as outlined by the Council of Academic Public Health Institutions Australasia (CAPHIA). In their national core competency framework, epidemiology and biostatistics are key competencies for all public health graduates. The current subject will build on prior biostatical knowledge to equip students with foundation skills that are essential for public health practice. The subject will provide public health students with a foundational understanding of the distribution and determinants of diseases or disorders within populations and how to apply this knowledge in the public health setting.
Level: Undergraduate Level 2 subject
Pre-requisite(s): HLTH 2022 Biostatistics in Health
Equivalent Subjects: PUBH 2010 (300872) Epidemiology
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 3003 Contemporary Issues in Public Health (10 Credit Points)
Subject Details (p. 4947) **Legacy Code:** 401194
This subject focuses on contemporary issues in public health. These priority concerns include chronic and age-related disease, communicable disease, mental health, sexual and reproductive health, child and maternal health, indigenous health, migrant health and environmental health. You will bring together your knowledge in public health, epidemiology, sociology and economics to identify and evaluate social and environmental factors that affect these health issues. By evaluating effectiveness of current public policy you will make recommendations for policy and program development to improve outcomes for contemporary health issues. These topics will be explored in national and international contexts.
Level: Undergraduate Level 3 subject
Pre-requisite(s): PUBH 2016 AND
PUBH 2010
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 3005 Disaster and Emergency Management (10 Credit Points)
Subject Details (p. 4948) **Legacy Code:** 300880
This subject explores the management of planning and preparation for and community responses to disasters and emergencies. Through case studies and presentations from current and cutting-edge professional practitioners in the field, students develop a 'hands on' understanding of risk assessment and prevention strategies for community safety during times of critical incidents. This includes emergency management strategies for community recovery and public education and preparation for potentially critical incidents. Workshop activities facilitate collaborative student learning through the use of developing scenarios including infectious disease pandemics, natural disasters and manmade emergencies such as terrorism.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 6064 - Environment Health and Emergency Management PUBH 3004 - Disaster and Emergency Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 3007 Disease Prevention and Control (10 Credit Points)
Subject Details (p. 4949) **Legacy Code:** 300867
Globally we are witnessing an epidemiological transition with the emergence and re-emergence of diseases through social, political and environmental changes including rapid urbanisation, social media influence, international migration/travel, political instability and climate change. This subject of study will provide students with an introduction into the epidemiology of public health diseases of significance in Australia and internationally through exploration of current strategies for the detection, monitoring and control of existing and emerging diseases. The principles of risk management will also be discussed and applied in relation to disease prevention, containment or eradication including vector-borne, vaccine preventable, zoonotic, food and waterborne disease.
Level: Undergraduate Level 3 subject
Equivalent Subjects: PUBH 3006 - Disease Prevention and Control
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 3008 Drugs in Sport (10 Credit Points)
Subject Details (p. 4950) **Legacy Code:** 400963
This subject examines the dominant issues and discourse around the use of drugs in sport. The focus will be on exploring the socio-cultural, political and personal reasons why drugs are used in sport from the perspective of athletes, coaches, administrators and educators. Students will need to continually reflect upon their own practices and beliefs around drug use and sport. The subject offers challenging and relevant theoretical and practical experiences to students from a variety of professional backgrounds.
Level: Undergraduate Level 3 subject
Equivalent Subjects: CEDS 3002 - Drugs in Sport
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 3010 Health Planning Project (10 Credit Points)
Subject Details (p. 4950) **Legacy Code:** 400275
This subject extends the theoretical concepts introduced in the subject, Health Politics, Policy and Planning with an emphasis on practical application and obtaining skills in health project management. It concentrates on the development of project management skills required for comprehensive assessment, planning and implementation of health programs or projects. The subject is designed so that students work collaboratively as a multidisciplinary team to develop and manage a workplace health planning project, on a current health issue identified by the health industry. Students thus develop knowledge of skills in project management, stakeholder negotiation, intergroup dynamics, committee structure and functioning, project consultation and planning and management with a deliverable outcome (report).
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 3011 Health Politics, Policy and Planning (10 Credit Points)
Subject Details (p. 4951) **Legacy Code:** 401195
Health professionals work in a complex health and healthcare sector governed by policy on population health and healthcare. This subject considers the role of policy in health and healthcare. It examines policy making as both a rational and linear process responding to population health needs in just and fair ways, and the reality of policy making which occurs within a complex socio-political and economic environment, shaped by powerful groups. The aim of this subject is therefore to consider how health professionals can develop effective policy and the role advocacy can play in the health policy arena to engender greater health equity.
Level: Undergraduate Level 3 subject
Equivalent Subjects: PUBH 2013 - Health Politics Policy and Planning
LGYA 7182 - Health Politics Policy and Planning
PUBH 3025 - Health Policy and Advocacy
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 3012 Health Promotion Practice 1 (10 Credit Points)
Subject Details (p. 4952) **Legacy Code:** 400784
This subject builds on the knowledge gained in Approaches to Health Promotion. It provides the opportunity to apply health promotion theory to practical projects in the field related to current population health priorities, through 120 hours service learning experience. It is concerned with developing knowledge and skills related to needs analysis, prioritising, and awareness of core values and principles associated with health promotion practice.
Level: Undergraduate Level 3 subject
Pre-requisite(s): PUBH 2001 or
PUBH 1010
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 3013 Health Promotion Practice 2 (10 Credit Points)
Subject Details (p. 4954) **Legacy Code:** 400785
This subject builds on the knowledge gained in Health Promotion Practice 1 through ongoing study of the processes required in project design and management in health promotion. The 120 hour placement provides students with the opportunity to apply health promotion theory to practical projects on current population health priorities. Students develop knowledge and skills related to implementation and evaluation of health promotion projects, highlighting the importance of the core values and principles necessary for effective and ethical health promotion practice.
Level: Undergraduate Level 3 subject
Pre-requisite(s): PUBH 2001 AND
PUBH 3012
Equivalent Subjects: LGYA 7184 - Community Development and Health
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 3014 Injury Prevention (10 Credit Points)
Subject Details (p. 4955) **Legacy Code:** 400286
Injury Prevention is a National Health Priority. Injury is the preferred term rather than 'accident' with its connotations of inevitability and lack of apparent cause, to promote development of inter-disciplinary prevention initiatives. An evidence based scientific approach to injury research and prevention is well established for road and occupational safety, supported by well resourced implementation structures. Other settings/sectors include sport, recreation, falls, firearms, farm, product and water safety, which are also seeing the benefits of injury prevention principles, but are less well developed. Injury prevention principles include thorough analysis of current data and the literature to identify what works to reduce injury rates, also use of intervenation strategies termed the 4Es, (education, enforcement, engineering and environment).
Level: Undergraduate Level 3 subject
Pre-requisite(s): PUBH 2001
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 3017 Occupational Health and Safety (10 Credit Points)
Subject Details (p. 4956) **Legacy Code:** 300919
This subject provides students with an essential working knowledge of occupational health and safety (OHS), work health and safety (WHS) legislation and risk management required which is a requirement for graduate employment across a broad range of workplaces and industries. The subject provides a foundation in the principles and practice of hazard identification and risk management, including an introduction to specific workplace hazards such as; moving and fixed plant, electrical, biomechanical (ergonomic), gravitational (slips, trips and falls), manual handling. Students will also explore the chemical, biological and physical hazards that may be encountered in a variety of graduate employment industries, as well as the management of health and safety hazards in relation to current WHS legislation, Codes of Practices and Australian and International Standards.
Level: Undergraduate Level 3 subject
Equivalent Subjects: PUBH 3016 - Occupational Health and Safety
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 3018 Professional Transition Project (10 Credit Points)
Subject Details (p. 4957) **Legacy Code:** 400786
This subject is designed to assist students to make the transition from undergraduate student life to professional life. Professional Transition Project provides students with a unique opportunity to integrate knowledge gained throughout their course from an operational, practical and theoretical perspective into an engaging project. Students will engage in comprehensive projects which bring together real world opportunities and health science theory.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 3019 Public Health Practice (10 Credit Points)
Subject Details (p. 4958) **Legacy Code:** 401193
This subject is an online equivalent of a workplace learning (placement) subject. You will engage in workplace activities with a public health organisation by using prepared resources, online discussion and videoconferencing. In this subject you will evaluate, develop and recommend public health policy or program change. The subject will involve the use of skills required to work in the public health arena; conducting needs analysis, collecting quantitative and qualitative data, facilitating stakeholder engagement, project development, management and evaluation, report writing and competent oral presentation skills, in an organisational setting.
Level: Undergraduate Level 3 subject
Pre-requisite(s): PUBH 2016
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 3020 Work Health and Safety (10 Credit Points)
Subject Details (p. 4959) **Legacy Code:** 200861
Work Health and Safety introduces participants to work health and safety concepts, terminology, legal frameworks and research sources. It includes practical activities around hazard identification and risk assessment. The many academic disciplines that contribute to work health and safety policy and practice will be critiqued: from epidemiology to engineering to ergonomics to employment relations. Ideologies that shape how workers, managers and organisations approach work health and safety will be examined, particularly via the notion of safety culture. This subject is designed for participants from all academic programs. Successful completion means being able to engage critically and practically in work health and safety challenges in multiple contexts, with competing stakeholder interests in mind.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 9851 - Occupational Health and Safety PUBH 3015 - Occupational Health and Safety BUSM 3049 - Occupational Health and Safety
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 3021 Air Pollution & Control (10 Credit Points)
Subject Details (p. 4960) **Legacy Code:** 301276
Air Pollution and Control introduces students with an interest in working in the fields of environmental science, environmental consulting, environmental management and environmental health to the basic principles and practices of air quality assessment and management. Air pollution does not recognise socio-political boundaries, and air pollutants transfer intercontinentally through pathways both close to the Earth's surface and upper atmosphere. Air Quality management represents a major challenge facing humanity because it poses a threat to human health, agriculture and environmental sustainability, as it can penetrate even remote and once pristine environments. As such, air pollution management and control is of International, National, State and Local government and community concern. This subject critically analyses the natural and anthropogenic sources of air pollution, their nature, health and environmental impacts, monitoring, regulation and control.
Level: Undergraduate Level 3 subject
Incompatible Subjects: PUBH 3002 Air Quality and Climate Change
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 3022 Advances and Challenges in Health Promotion (10 Credit Points)
Subject Details (p. 4961) **Legacy Code:** 401380
This subject presents current advances and challenges in health promotion. Advances in technology are critiqued with regards to their positive and negative contribution to health promotion. This subject also reviews social marketing strategies and how these can be used in health promotion campaigns. Complexities in working with vulnerable communities in different settings are explored including schools, workplaces, communities (including Indigenous, culturally and linguistically diverse, refugee and homeless groups), healthcare settings, rural/remote areas and prisons. New patterns in health and their challenges are covered. Ethical and political considerations in health promotion are also included.
Level: Undergraduate Level 3 subject
Pre-requisite(s): PUBH 3026 AND
PUBH 1010
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 3023 Evidence in Professional Reasoning (10 Credit Points)
Subject Details (p. 4962) **Legacy Code:** 401384
In this unit, you will incorporate the evidence knowledge and skills developed in previous units into professional practice. The evidence-based practice process manages expanding and uncertain knowledge by formulating answerable questions, effectively searching literature, critically appraising evidence and applying and evaluating its significance in clinical practice and healthcare decision-making. Professional reasoning requires consideration of best available evidence, client or patient perspectives, professional expertise and practice context. You will learn professional reasoning for shared decision-making and safe and effective communication for patient scenarios relevant to your program.
Level: Undergraduate Level 3 subject
Pre-requisite(s): HLTH2021 Research Methods - Students need to have done HLTH2021 Research Methods PLUS ONE clinical unit from their specific program This will be one of four possible units See the Rationale for the reason for this change
HLTH1012 Evidence in Health
HLTH2024 Research in Methods Health
REHA2007 Podiatry Pre-Clinical - Students enrolled in Course Code 4661 (Continuing) or 4708 (Current) must have completed this Subject
REHA2004 Occupational Therapy Practice 2 - Students enrolled in Course Code 4663 (Continuing) or 4711 (Current) must have completed this Subject
REHA3003 Clinical Education General - Students enrolled in Course Code 4662 (Continuing) or 4706 (Current) must have completed this Subject
REHA3049 Speech Pathology Practice 3 - First clinical practice subject in Speech Pathology curriculum
REHA3004 Physiotherapy Clinical Education A - Students enrolled in Program Code 4663 (Continuing) or 4711 (Current) must have completed this subject
Equivalent Subjects: HLTH 3005 Evidence-based Practice
Incompatible Subjects: PUBH 4001 Evidence in Professional Reasoning (Honours)
HLTH 4002 Evidence-based Practice (Advanced)
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 3024 Harm Minimisation and Prevention (10 Credit Points)
Subject Details (p. 4963) **Legacy Code:** 401387
Injury and harm have been recognised as contributing factors to the Global and Australian Burden of Disease and Injury and have been identified as a National Health Priority in Australia. To effectively measure the impact of injury and harm, and develop prevention strategies, insight and understanding of the causes, risk factors, Disability Adjusted Life Years (DALYs) and Quality Adjusted Life Years (QALYs) must be taken into consideration. Evidence-based approaches to injury prevention and harm minimisation must be applied and effectively communicated to stakeholders of differing capacities and viewpoints. This subject utilises injury prevention and harm minimisation theory, case-based and project-based learning to challenge future public health leaders to develop effective injury prevention and harm minimisation strategies and also to communicate their message effectively, navigating the complexities of differing worldviews and stakeholder responsibilities.
Level: Undergraduate Level 3 subject
Equivalent Subjects: PUBH 3014 - Injury Prevention
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 3025 Health Policy and Advocacy (10 Credit Points)
Subject Details (p. 4964) **Legacy Code:** 401390
Health professionals work in a complex sector governed by policy on population health and healthcare. This subject considers the role of policy in international and national healthcare. It examines policy making as both a rational and linear process responding to population health needs in just and fair ways, and the reality of policy making which occurs within a complex socio-political and economic environment shaped by powerful groups. Therefore, the aim of this subject is to consider how health professionals can develop effective evidence-based policy and the role advocacy can play in the health policy arena to engender greater health equity.
Level: Undergraduate Level 3 subject
Pre-requisite(s): PUBH 1012 OR
PUBH 1010
Equivalent Subjects: PUBH 2013 - Health Politics Policy and Planning LGYA 7182 - Health Politics Policy and Planning PUBH 3011 - Health Politics Policy and Planning
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 3026 Health Promotion Planning and Implementation (10 Credit Points)
Subject Details (p. 4966) **Legacy Code:** 401391
This subject builds on the knowledge gained in Health Promotion: Theory and Approaches. It is concerned with developing knowledge and skills related to undertaking needs analysis at community and population levels. It focuses on planning and implementing interventions aligned with core values and principles necessary for ethical health promotion. The need for evaluation throughout this process is emphasised.
Level: Undergraduate Level 3 subject
Pre-requisite(s): PUBH 1010
Incompatible Subjects: PUBH 3012 - Health Promotion Practice 1 PUBH 3013 - Health Promotion Practice 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 3027 Public Health in a Changing World (10 Credit Points)
Subject Details (p. 4967) **Legacy Code:** 401397
This subject engages students to explore public health in relation to dynamic social, political, economic, environmental and cultural contexts. Students will critique research, policy, practice and evaluation processes to identify their impact on health practices and health outcomes over time. Using their knowledge in public health, epidemiology, sociology and economics students will be required to identify and articulate gaps in current health care and learn to develop a plan towards addressing them. The subject will engage students in reflecting on the future of health care across national and international contexts. Priority health issues that will be discussed in this subject may include chronic and age-related disease, communicable disease, mental health, sexual and reproductive health, child and maternal health, Indigenous health, migrant and refugee health, and environmental health.
Level: Undergraduate Level 3 subject
Pre-requisite(s): PUBH 1012 AND
PUBH 2010
Equivalent Subjects: PUBH 3003 - Contemporary Issues in Public Health
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 3028 Transforming Health (10 Credit Points)
Subject Details (p. 4968) **Legacy Code:** 401405
This subject focuses on utilising previously acquired health science knowledge and skills to identify, co-design and create innovative ways to address a current health issue identified by the health industry. Students will consider interventions, projects, research proposals and recommendations on service delivery options. The subject requires students to work collaboratively with multiple stakeholders to plan, manage, deliver and review a simulated project. Students thus develop and apply knowledge and skills in leading and managing health projects, stakeholder negotiation, committee structure and functioning, project consultation, planning and management with a deliverable outcome such as a report or research proposal.
Level: Undergraduate Level 3 subject
Equivalent Subjects: PUBH 3010 Health Planning Project
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 4001 Evidence in Professional Reasoning (Honours) (10 Credit Points)
Subject Details (p. 4969) **Legacy Code:** 401379
In this subject, students will incorporate the evidence knowledge and skills developed from previous subjects in professional practice. The evidence-based practice process manages expanding and uncertain knowledge by formulating answerable questions, effectively searching literature, critically appraising evidence and applying and evaluating its significance in clinical practice and healthcare decision-making. Professional reasoning requires consideration of best available evidence, client or patient perspectives, professional expertise and practice context. Students will learn professional reasoning for shared decision-making, and safe and effective communication for patient scenarios relevant to your program. Students will study the theory and application of research methods to honours research in their chosen field, and practise the skills to analyse evidence in the health sciences.
Level: Undergraduate Level 4 subject
Pre-requisite(s): HLTH2024 Research Methods in Health
HLTH2021 Research Methods (Qualitative and Quantitative)
REHA2007 Podiatry Pre-Clinical - Students enrolled in Course Code 4661 (Continuing) or 4708 (Current) must have completed this subject
REHA2004 Occupational Therapy Practice 2 - Students enrolled in Course Code 4663 (Continuing) or 4711 (Current) must have completed this subject
REHA3003 Clinical Education General - Students enrolled in Course Code 4662 (Continuing) or 4706 (Current) must have completed this subject
REHA3049 Speech Pathology Practice 3 - First clinical practice subject in 4788 Speech Pathology curriculum
Equivalent Subjects: HLTH 4002 - Evidence-based Practice (Advanced)
Incompatible Subjects: HLTH 3005 - Evidence-Based Practice
PUBH 3023 - Evidence in Professional Reasoning
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 4002 Honours Thesis in Health Science (F/T) (30 Credit Points)
Subject Details (p. 4970) **Legacy Code:** 400558
This is a 60 credit point year-long subject taken over two terms (30 credit points in each term).This subject is the culmination of studies for students who have completed an undergraduate degree in Health Science and provides substantial training in research. Under staff supervision, students choose the particular topic for their research, design their own program of research, perform the research and analyse the results. The culmination of this process is the production of a thesis in which students describe the rationale for their topic, their research program, ethical issues, results, and their conclusions.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 4003 Honours Thesis in Health Science (P/T Year 1) (10 Credit Points)
Subject Details (p. 4970) **Legacy Code:** 400559
This is a 20 credit point year-long subject taken over two terms (10 credit points in each term). This subject is the culmination of studies for students who have completed an undergraduate degree in Health Science and provides substantial training in research. Under staff supervision, students choose the particular topic for their research, design their own program of research, perform the research and analyse the results. The culmination of this process is the production of a thesis in which students describe the rationale for their topic, their research program, ethical issues, results, and their conclusions.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 4004 Honours Thesis in Health Science (P/T Year 2) (20 Credit Points)
Subject Details (p. 4971) **Legacy Code:** 400560
This is a 40 credit point year-long subject taken over two terms (20 credit points in each term). This subject is the culmination of studies for students who have completed an undergraduate degree in Health Science and provides substantial training in research. Under staff supervision, students choose the particular topic for their research, design their own programme of research, perform the research and analyse the results. The culmination of this process is the production of a thesis in which students describe the rationale for their topic, their research programme, ethical issues, results, and their conclusions.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 5001 Infectious Diseases and Outbreak Response (10 Credit Points)
Subject Details (p. 4971)
Infectious disease occurs following interaction between a host and microbial by parasites. This subject will encompass clinical aspects, epidemiology, prevention and control of important communicable diseases, both in Australia, and globally. Starting at a foundational level, this subject will explain how infectious agents interact with human hosts. Prevention of infectious disease will then be investigated through examination of immunisation approaches and vaccine preventable diseases, infection control in healthcare settings and infectious disease surveillance and legislative requirements. Key principles of outbreak response to infectious disease will be explored through practical application of contemporary outbreak investigation methods and disaster response aspects of infectious disease control measures. The subject will conclude with an examination of emerging global infectious disease threats including through bioterrorism climate change and indigenous aspects of infectious disease.
Level: Postgraduate Coursework Level 5 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 6001 Epidemiology of Climate Change (10 Credit Points)
Subject Details (p. 4972)
By looking at air quality, nutrition, infectious diseases, and human migration, this subject explains how increases in greenhouse gases impact public health and people around the globe, and how climate change directly affects us and our lives. It details things we can do to mitigate negative health risks associated with rising temperatures and what factors make some populations more vulnerable than others to climate change's negative health impacts. Finally, it explains how measures to reduce greenhouse gas emissions can not only limit future climate changes but can also generate substantial immediate health "co-benefits" over and above the benefit of reducing climate change.
Level: Postgraduate Coursework Level 6 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 6002 Systems Science and Population Health (10 Credit Points)
Subject Details (p. 4973)
This subject will introduce students to applications of system science methods to population health problems in epidemiology that can be used to guide policy and program decision making. Students will be provided with an overview of the sorts of problems that might benefit from system science techniques, and the different types of dynamic modelling methods that can be used (e.g. system dynamics models, agent-based models) using a series of case studies focussing on a range of chronic disease outcomes. Participants will also have the opportunity to interact with example models, to explore model structures, underlying assumptions, and conduct scenario testing of suites of policy interventions.
Level: Postgraduate Coursework Level 6 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 6003 Applied Clinical Epidemiology (10 Credit Points)
Subject Details (p. 4973)
This subject will introduce students to topics in applied epidemiology that can inform clinical practice, research and health program evaluation, and health policy decisions. Students will develop skills in conducting systematic reviews of the literature and meta-analyses, and the design and analysis of clinical trials. Students will also be provided with an overview of principles ethical clinical research, and strategies for the dissemination and communication of epidemiological findings.
Level: Postgraduate Coursework Level 6 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 6004 Applied Epidemiology Research Design (10 Credit Points)
Subject Details (p. 4974)
This subject is designed to extend students' practical application of different epidemiological study designs to give them a practical understanding of how epidemiological principles and practices are used in real world settings. Students should have basic knowledge and skills in epidemiology to be successful in this subject. Students will have the opportunity to acquire and apply the practical knowledge and skills needed to undertake epidemiological research to investigate contemporary local and global health issues.
Level: Postgraduate Coursework Level 6 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 6005 Applied Epidemiology Project (40 Credit Points)
Subject Details (p. 4975)
This subject is a capstone subject for high-achieving students (GPA >5.5) enrolled in the Master of Epidemiology. Students will get the opportunity to apply the epidemiological skills learnt during their postgraduate study as a supervised intern within a professional health, research or non-governmental organisation setting. The placement will consist of a minimum of 300 hours work (approximately 10 weeks full time work or equivalent part time). The placement will allow students to you will undertake a project which will make a useful contribution to the workplace and will be assessed via a final report and presentation as well as your professional placement supervisor's report. Professional settings are usually located external to the University. Examples include Western Sydney Local Health District, South Western Local Health District, Nepean Blue Mountain's Primary Health Network, Wentwest (Western Sydney) Primary Health Network.
Level: Postgraduate Coursework Level 6 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7001 Advanced Health Classifications and Coding (10 Credit Points)
Subject Details (p. 4975) **Legacy Code:** 301178
This subject is designed to enable the student to classify diseases and interventions using the current version of the International Statistical Classification of Diseases and Related Health Problems, Tenth Revision, Australian Modification, the Australian Classification of Health Interventions and the Australian Coding Standards (ICD-10-AM/ACHI/ACS). The subject will also include the historical development of clinical classification systems as well as the purpose and value of classifying diseases and interventions within the health system. The students will become familiar with the structure and content of ICD-10-AM ACHI/ACS and be introduced to the rules and conventions associated within ICD-10-AM/ACHI. Further, students will carry out research based analytical tasks gaining an in-depth knowledge in relation to health classification systems and terminology systems such as SNOMED-CT (Systematized Nomenclature of Medicine - Clinical Terms).
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7002 Analytic Approaches in Epidemiology (10 Credit Points)
Subject Details (p. 4976) **Legacy Code:** 401175
This subject extends the basic principles of epidemiology introduced in 401076 'Introduction to Epidemiology' and equips students with practical analytical skills to design and conduct epidemiological studies. The subject considers the principle models of causation and analytical approaches to epidemiological study design and analysis. Students will use causal diagrams and evidence from the literature to develop analytic strategies for specific study designs, develop practical skills in calculating and interpreting measures of association and effect modification, and be introduced to principles and strategies for quantitative bias analysis.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): PUBH 7016 OR
PUBH 7015
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7003 Approaches to Epidemiology (10 Credit Points)
Subject Details (p. 4977) **Legacy Code:** 400856
This subject presents the principles, strategies and activities associated with social epidemiology and the contribution that this epidemiology makes to the understanding of health and illness of individuals, families and communities. Consideration of social epidemiology in supplementing classical approaches is included, as is consideration of primary health care epidemiology in relation to health service delivery and planning. Students will explore the consequences of primary health care decision making that will enable evidence-based health care practice and relate it to their practice.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYB 9174 - Approaches to Epidemiology
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7004 Communicable Diseases (10 Credit Points)
Subject Details (p. 4978) **Legacy Code:** 400840
In Spring 2023, this subject replaced by PUBH 5001 - Infectious Diseases and Outbreak Response. This subject will encompass clinical aspects, epidemiology, prevention and control of important communicable diseases, both in Australia, and globally. Specific topics covered include causative agents, routes of transmission, host responses, risk factors, environmental influences, vector- and food-borne diseases, vaccine-preventable diseases, legislative requirements, surveillance, outbreak investigations, bioterrorism, strategies for prevention and control and emerging challenges.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7005 Controversies in Epidemiology (10 Credit Points)
Subject Details (p. 4979) **Legacy Code:** 401178
This subject offers students an opportunity to synthesise theories and methodologies from epidemiology. It highlights current controversies and practices in epidemiology. Students attend weekly presentations on topics related to content area interests, and other relevant seminars. Students will convene with faculty to reflect on and critique components of research presentations relevant to the students' interest and to the contemporaneous topics being covered in the core epidemiology curriculum. Course assignments involve critical appraisal of conceptual and methodological issues presented in the seminars, and related issues relevant to student's own research.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): PUBH 7016 OR
PUBH 7015
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7006 Data Management and Programming for Epidemiology (10 Credit Points)
Subject Details (p. 4979) **Legacy Code:** 401179
Modern epidemiology deals with ever increasing volumes of data and complexity of analysis. This course is aimed at equipping students with effective practices for managing data and programme code and ensuring the security of their data. Students will be taught the fundamentals of managing code and data in a revision control system as well as good programming practices and techniques which can form a basis for a robust, repeatable and test-driven research methodology. Programming instruction and exercises will use the SAS and R languages, and SQL databases.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): HLTH 7008
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7007 Disaster and Emergency Management (PG) (10 Credit Points)
Subject Details (p. 4981) **Legacy Code:** 301050
This subject consists of project based studies that explore how human societies prepare for and respond to disasters and emergencies. The subject uses case studies to investigate the historical practice of preparation, prevention, response and recovery strategies for community safety during times of critical incidents. The subject will facilitate improved understanding by developing scenarios of impending issues such as natural disasters and man made emergencies. Focus will be on Australian national and State coordination arrangements for disaster planning including the comprehensive approach to emergency management. Students will need to attend a 5 day workshop and undertake a group presentation and report as well as an exercise in Incident Control System principles at a workshop.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7008 Environmental Epidemiology (10 Credit Points)
Subject Details (p. 4981) **Legacy Code:** 401177
Environmental Epidemiology is the study of the environmental causes of ill-health and disease with a view to prevention. It is a discipline that has changed significantly over time, more recently becoming concerned with complex systemic change such as global warming. Environmental Epidemiology encompasses a broad range of activities, from exposure assessment to adaptation planning, implementation and evaluation. The course aims to equip students with the knowledge and skills to understand and critically appraise evidence from the relevant literature, to design a study suitable for exposure and vulnerability assessment, and to develop appropriate health policy.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): PUBH 7016
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7009 Epidemiology and Quantitative Methods (10 Credit Points)
Subject Details (p. 4982) **Legacy Code:** 400417
In this subject, students will study the fundamental concepts and principles of epidemiology and biostatistics and will be given the opportunities through exercise and tutorials to apply these concepts and principles to published public health literature. The subject is designed to give students the skills to interpret and critically evaluate public health literature and to equip the students with the skills for public health research. A range of research studies is examined, including studies of occurrence and risk factors for disease, and studies evaluating intervention treatments or programs. Both the epidemiological and statistical evidence for the findings are critically assessed.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYB 7971 - Epidemiology and Quantitative Methods
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7010 Epidemiology of Non-Communicable Diseases (10 Credit Points)
Subject Details (p. 4983) **Legacy Code:** 401174
This subject will document the fundamental concepts in epidemiology and control of non-communicable diseases (NCDs), common research methods used in NCD epidemiology, and unique applications of these methods in key NCD areas, including reproductive epidemiology, behavioural epidemiology, epidemiology of ageing and epidemiology of specific NCDs (including cardiovascular disease, diabetes, cancer, chronic respiratory diseases, musculoskeletal problems and mental health problems). The principal goals of this subject are to provide a broad overview of the field, and to develop the knowledge and skills needed to (i) critically evaluate published research in NCD epidemiology and (ii) design an epidemiological study to address an NCD topic.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): PUBH 7016 OR
PUBH 7015
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7011 Health Advancement and Health Promotion (10 Credit Points)
Subject Details (p. 4984) **Legacy Code:** 400418
By investigating and addressing the multilevel determinants of health outcomes and inequalities, health promotion initiatives aim to improve the health and wellbeing of individuals and societies. In this unit, we will nurture an understanding of concepts and models of health promotion, evaluate the relative successes of recent and classic initiatives within Australia and overseas, and critically engage with debates concerned with the most appropriate strategies for tackling health inequalities in the context of major societal challenges (e.g. population ageing, urbanisation and climate change). Core competencies are nurtured (e.g. Plan and evaluate an intervention) to prepare students for practicing and further study in the field of health promotion.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7012 Health Economics and Comparative Health Systems (10 Credit Points)
Subject Details (p. 4985) **Legacy Code:** 400967
The unit explores contemporary examples of the role of economics in the organisation, funding and provision of health services. Case examples include, Australia, America, China, Hong Kong, Scandinavia, United Kingdom and India. Students use the principles of economics to assess funding of health with a focus on the interface between economics, ethics and equity in decision making. They also consider the tendency for health systems to be organised around economic principles in areas such as, contracting out, health insurance and pharmaceuticals. Students are encouraged to reflect on the challenges and future directions of their own health system in the context of the unit components.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7013 Health Promotion: A Primary Health Care Approach (10 Credit Points)
Subject Details (p. 4986) **Legacy Code:** 400836
An individual's personal characteristics and their family, social and community environments have complex interrelationship with their health and health behaviours. The challenge for health professionals is to understand this complexity and encourage the practice of health promotion within a primary health care framework so enabling people to achieve a sense of power and control over their lives. The subject explores the health of individuals and communities in the context of health promotion. Evidence-based health promotion strategies are examined using social health and ecological perspectives.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 7318 - Context of Health Promotion
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7014 Health and Socio-political Issues in Aged Care (10 Credit Points)
Subject Details (p. 4986) **Legacy Code:** 400837
This subject examines health and socio political issues in aged care within a social capital framework. Social constructs and contexts of ageing are explored and issues of social and economic disadvantage are examined. Equity and access to health care services and the experiences of older people within these services are also highlighted. The role of health professionals and managers in actively engaging in health and social policy debate for ethically just care and services for older people is addressed.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 7153 - Contemporary Issues in Aged Care
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7015 Introduction to Clinical Epidemiology (10 Credit Points)
Subject Details (p. 4987) **Legacy Code:** 401173
This subject aims to impart the principles of population based (epidemiologic) evidence to the understanding of variations in the outcome of illness and the reasons thereof (Clinical Epidemiology) thereby providing the framework for finding the best answers to "real world" questions about clinical practice and health care. Individuals taking this course (who usually have a health care background) acquire the basic skills required to understand the fundamental questions about the effectiveness of clinical therapies, usefulness of screening and diagnostic tools, prognosis and disease causation and gain the skills required of effective Evidence-Based Medicine practitioners.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: PUBH 7016 - Introduction to Epidemiology
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7016 Introduction to Epidemiology (10 Credit Points)
Subject Details (p. 4989) **Legacy Code:** 401076
Epidemiology is the study of the distribution and determinants of disease and other health-related conditions in populations, and the application of this study to the control of health problems. Epidemiology encompasses a broad range of activities fundamental to the health sciences. The course is aimed to equip students with the ability to understand and critically appraise evidence from the health sciences used in the formulation of clinical interventions, assessments of population disease burden, and development of health policy. Students will be taught the fundamental concepts and principles of epidemiology and will be given the opportunities through exercises and tutorials to apply these concepts and principles to case studies from current epidemiological research and practice.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: PUBH 7015
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7017 Leadership and the Development of Organisational Capacity (10 Credit Points)
Subject Details (p. 4990) **Legacy Code:** 400778
This subject examines the concept, form and structure of health care organisations. Organisational theory is explored and used to analyse a range of structures used in nursing and contemporary health care. Factors which influence organisational design, function and effectiveness are explored and discussed including: organisational behaviour, strategy, culture, power and politics, technology, sustainability and effectiveness. A major focus in the subject is planning for strategic organisational development to meet the challenges of rapid change and the need for performance improvements in patient care delivery. Concepts related to the strategic development of workforce capacity in the health care arena are considered through the application of a range of theories including the learning organisation. Leadership will be examined within the context of the subject with a particular emphasis on change management.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7018 Leadership for Quality and Safety in Health Care (10 Credit Points)
Subject Details (p. 4991) **Legacy Code:** 400777
Increasingly clinical leaders, practitioners and health service managers are being held accountable for improving the quality and safety of patient care and for developing a culture of quality improvement within their teams. In this subject students learn about quality, patient safety and governance frameworks and strategies that they can employ within healthcare to improve system performance, patient safety and patient outcomes. The main approaches used to address quality of care and patient safety are examined and their applications critiqued. Students will explore leadership issues for developing systematic, coherent quality improvement frameworks and quality initiatives that can be applied within their own sphere of practice.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: HLTH 7016 - Quality and Safety in Health Care
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7019 Occupational Health Management (10 Credit Points)
Subject Details (p. 4992) **Legacy Code:** 300391
This subject focuses on the practice of occupational health within national and international frameworks. It explores issues such as the physical, social and mental impact of the occupational environment on health and includes the human body's response to occupational health hazard exposure through toxicological and epidemiological principles. Strategies for the management of occupational health are examined, together with methods of monitoring and evaluating occupational health programs.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYB 8273 - Occupational Health Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7020 Policy, Power and Politics in Health Care Provision (10 Credit Points)
Subject Details (p. 4993) **Legacy Code:** 400238
This subject enables students to gain an understanding of the political and social constructions that underpin health care services such as social determinants of health. It also provides students with the opportunity to explore and critically analyse issues related to the development, implementation and outcomes of health and aged care policies.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): Students enrolled in program 4673 Master of Mental Health Nursing (Nurse Practitioner) must have passed the following three subjects before they can enrol in this subjects - NURS 7018 Contemporary Professional Practice in Mental Health Nursing and NURS 7023 Evidence-based Nursing and NURS 7028 Leadership in Clinical Practice
Equivalent Subjects: LGYB 9177 - Policy Power and Politics in Health Care Provision
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7021 Primary Health Care and its Applications (10 Credit Points)
Subject Details (p. 4995) **Legacy Code:** 400412
This subject explores the impact and relevance of Primary Health Care in its context as a World Health Organization (WHO) strategy for achieving "Health for All". It examines the ways in which Primary Health Care, along with other significant WHO initiatives, provides a framework for the organisation of just and humane health care systems and provides an opportunity for detailed discussion of the complex factors that impact on the health status of populations. The integration of associated theoretical concepts will enable an understanding of the complex dimensions of health and well-being to evolve and then to inform health care practices and the planning of programs that can lead to sustainable health within a primary health care framework.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7022 Public Health, Policy and Society (10 Credit Points)
Subject Details (p. 4996) **Legacy Code:** 400416
This subject examines the nature of public health and develops a systemic understanding of various public health policy frameworks and issues. The subject provides the context and history for understanding public health approaches, explores the cultural and social dimensions of health and illness and the economic and political environment in which health policies and strategies are developed and implemented. The subject advocates a view of health that includes an implicit recognition of the physical, social and economic environment, affirms the importance of social justice and equity in health care, and emphasises the importance of inter-sectoral collaboration.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYB 7972 - Health Management Policy and Society LGYB 8025 - Health Management Policy and Society
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7023 Safe and Sustainable Construction (10 Credit Points)
Subject Details (p. 4996) **Legacy Code:** 301190
This subject introduces two important aspects of construction projects: workplace safety and sustainability. Safety and sustainability are crucial issues in the upper echelons of the construction industry. This subject is intended to explore the theoretical frameworks and best practices to support health and safety in construction projects. It introduces various assessment tools and techniques that can be used to measure and improve sustainability in construction projects.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7024 Safety and Risk Management (10 Credit Points)
Subject Details (p. 4997) **Legacy Code:** 300677
This subject provides a critical insight into the theory and practice of managing safety and health at the workplace with a dual focus on risk management and safety management. Students have the opportunity to develop a safety systems approach concentrating on hazard identification, risk assessment and devising control measures incorporating safety management principles. Safety culture and its influence on Occupational Health and Safety (OHS) practice is also detailed. In addition, the subject addresses the legal underpinning of OHS requirements at the workplace. Labour market change and the role of government, unions and employer organisations are also examined. Global perspectives on OHS from various jurisdictions ranging from the USA, Hong Kong and China are also scrutinised.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 5996 - Safety Management LGYA 6000 - Risk Assessment
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7025 Statistical Methods in Epidemiology (10 Credit Points)
Subject Details (p. 4998) **Legacy Code:** 401176
Statistical ideas are integral to the conceptual basis of epidemiology and provide the tools needed to interpret epidemiological information and conduct epidemiological studies. Most professions in the health sciences need to be able to read and interpret statistics relating to individual and population health status and health risks, and to identify appropriate statistical methods to evaluate interventions, health policies and programs. Many public health practitioners are actively involved in surveillance, quantitative research and/or evaluation. This subject aims to support students to reach a level of proficiency in the selection of appropriate statistical methods to address specific research questions with a given dataset, conduct the selected analysis, interpret the results appropriately and draw valid and insightful conclusions about the research question.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): HLTH 7008
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7026 Supporting Aged Communities (10 Credit Points)
Subject Details (p. 4999) **Legacy Code:** 400241
The subject aims to analyse the dynamic systems of aged care services, to challenge orthodox strategies for reform in aged care and to identify ways in which primary health care can be employed as a process of change in aged care services.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7027 Supporting Individuals and Communities in Crisis (10 Credit Points)
Subject Details (p. 5000) **Legacy Code:** 400838
The planning, development and implementation of primary health care initiatives rest largely on the capacity of health care workers to develop and engage in partnerships with a diverse range of consumers, health care workers and organisations. In this subject students will critically examine the complexities inherent in developing and sustaining effective and active partnerships with individuals and groups in primary health care contexts. The interpersonal, cultural and socio-political issues that shape communication and the development of partnerships will be examined. Current approaches used to plan for and respond to crises, emergencies and disasters at an individual, organisational and community level will also be explored.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7028 Surveillance and Disaster Planning (10 Credit Points)
Subject Details (p. 5001) **Legacy Code:** 400847
As the world responds to climate change and increased globalisation, the human population is becoming increasingly vulnerable to natural and human disasters. This subject equips students with skills in disaster preparedness and public health surveillance. It addresses the psychosocial and mental health aspects of disaster management, the systems of disaster response and how these aspects are relevant across the all-hazard approach to Prevention, Preparation, Response and Recovery (PPRR). Using current evidence and understanding of this field, students will gain knowledge, skills and experience in leadership and management across the PPRR spectrum and the public health, clinical and other coordination in terms of impact and outcome. Australian requirements and systems in relation to surveillance and disaster planning will be analysed as will international and Australian roles in the region.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7029 Digital Health Management (10 Credit Points)
Subject Details (p. 5002) **Legacy Code:** 401366
Digital health technologies and services are significant contributors to the transformation of healthcare delivery. Uncertainty, abandonment and lack of organisational willingness to adopt, and failure to manage the realisation of business benefits from health information technology investments lead digital technology projects to fail.
This subject provides an overview of capability required to enable health organisations to measure and optimise the value of digital health initiatives. Students will be introduced to various concepts and frameworks used to measure and quantify the benefits of digital health in Australia and elsewhere. Students will have opportunities to participate in industry case studies and analysis.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): For students enrolled in 4778 Graduate Diploma in Digital Health and 4698 Master of Health Science 2-year and 15-year pathways
PUBH 7031 Health Systems and Policy
Note Students in the 1 year pathway will need to complete a rule waiver form to enrol in this unit
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7030 Health Systems Planning and Evaluation (10 Credit Points)
Subject Details (p. 5003) **Legacy Code:** 401364
This subject addresses health services planning and evaluation, as well as health economics. This subject aims to provide students with the necessary knowledge and skills to understand and apply the major concepts involved in health services planning and evaluation. Workforce planning and service capability frameworks are addressed as well as planning capital infrastructure for health services. How to evaluate and implement a health services plan is also described. The second module introduces the student to several economic concepts relevant to healthcare management and demonstrates how they are applied to actual situations in the healthcare industry.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): For students enrolled in 4700 Graduate Diploma in Health Science and 4777 Health Services Management and in 4698 Master of Health Science 2-year and 15-year pathways
PUBH 7031 Health System and Policy
Equivalent Subjects: PUBH 7012 Health Economics and Comparative Health Systems
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7031 Health Systems and Policy (10 Credit Points)
Subject Details (p. 5004) **Legacy Code:** 401363
A detailed understanding of the structure and functioning of the health system is essential to effectively work, manage and lead in health services. This subject explores concepts that form the basis for the way health systems are designed and operate. This subject will equip students with the skills to critique challenges and opportunities that can influence how health services are delivered and resourced such as health workforce shortages, digital health innovations, public-private partnerships, and changing demographics. This subject will also examine the crucial role of governance and health policy in determining funding priorities and shaping health systems with a particular focus on the Australian health system, but within an international context. These issues are critiqued with health reform and the drivers for change nationally and internationally.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: PUBH 7022 Public Health Policy and Society
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7032 Patient-centred digital healthcare (10 Credit Points)
Subject Details (p. 5006) **Legacy Code:** 401367
Patient-Centred Digital Healthcare introduces students to consumer engagement and consumer informatics approaches and many other examples of innovations using data analytics and digital health strategies in clinical, community-based, and home-based settings. Students will learn about the role of Patient-facing Technologies to empower patients and improve safety and the importance of standardisation of the electronic management of healthcare information and the automation of clinical processes in delivering patient-centred care. Central to fulfilling this role is ensuring that care is delivered in a safe and effective manner. Students are encouraged to identify, articulate, reflect upon, and value digital health technologies in their local health services.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): For students enrolled in 4778 Graduate Diploma in Digital Health and 4698 Master of Health Science 2-year and 15-year pathways
PUBH 7031 Health Systems and Policy
Note Students in the 1 year pathway will need to complete a rule waiver form to enrol in this unit
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7033 The Social Determinants of Health (10 Credit Points)
Subject Details (p. 5007) **Legacy Code:** 401372
The social determinants of health recognise that the health and wellbeing of individuals and communities are influenced by a range of social factors such as wealth, education, gender, and ethnicity. Such factors determine access to and use of resources influencing health outcomes and resulting in disparities in health or health inequalities. In this unit, students will use theories and frameworks for the social determinants of health to assess the role of key social factors in affecting the health and illness of individuals and communities. Students will be introduced to the challenges of measuring and addressing the social determinants of health, and critically examine examples of programmatic and policy interventions aimed at reducing health inequalities and addressing the social determinants of health.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: HLTH 7001 A Global Perspective on the Social Determinants of Health
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7034 Workplace Safety and Risk Management (10 Credit Points)
Subject Details (p. 5008) **Legacy Code:** 401373
This subject provides a critical insight into the theory and practice of managing health and safety in the workplace. Students have the opportunity to develop a safety systems approach, concentrating on hazard identification, risk assessment and devising control measures incorporating safety management principles to address current and emerging workplace health and safety issues. Students will learn the importance of developing a safety culture in the workplace as a core principle of safe work system management. In addition, the subject addresses the legal underpinning of health and safety requirements at the workplace. Labour market change and the role of government, unions and employer organisations are also examined. Global perspectives on workplace health and safety from various jurisdictions are also scrutinised.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): PUBH 7031
Equivalent Subjects: PUBH 7024 Safety and Risk Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 9001 Higher Degree Research Thesis - Community Health (10,20 Credit Points)
Subject Details (p. 5009) **Legacy Code:** 800115
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 9002 Higher Degree Research Thesis - Public Health (10,20 Credit Points)
Subject Details (p. 5012) **Legacy Code:** 800113
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

Radiography (RADI)

RADI 7001 Advanced Principles and Practice of Cardiac Sonography (10 Credit Points)
Subject Details (p. 5015) **Legacy Code:** 401247
This subject is an essential part of the final year of the Masters in Cardiac Sonography. It will build on the student's knowledge and skills gained in prior units, as they select and study a contemporary cardiac ultrasound technology. Students are required to research and write a literature review about their chosen technology, and to evaluate their own use of the technology in clinical practice. In addition, students will have the opportunity to teach first year cardiac sonographers, and write a reflection on their teaching experience.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): RADI 7009 AND
RADI 7005
Restrictions: Please see the Subject Details page for any restrictions for this subject

RADI 7002 Practice of Cardiac Sonography 1 (10 Credit Points)
Subject Details (p. 5015) **Legacy Code:** 401189
This subject introduces students to the practice of cardiac sonography. Students learn how to acquire and optimise images and to make basic measurements. They will learn how to draw conclusions from the images and measurements, and to write a basic report. The skills learnt in this subject, which includes work integrated learning, provides students with the foundational skills in cardiac sonography.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): RADI 7006
Restrictions: Please see the Subject Details page for any restrictions for this subject

RADI 7003 Practice of Cardiac Sonography 2 (10 Credit Points)
Subject Details (p. 5016) **Legacy Code:** 401190
This subject will build on the knowledge and skills developed in Practice of Cardiac Sonography 1. Students will learn to perform a more extensive echocardiographic examination as they study measuring left ventricular systolic and diastolic function, and are introduced to assessing valvular function. Image interpretation, report writing, and essential aspects of professional practice will also be included in this subject.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): RADI 7002
Co-requisite(s): RADI 7007
Restrictions: Please see the Subject Details page for any restrictions for this subject

RADI 7004 Practice of Cardiac Sonography 3 (10 Credit Points)
Subject Details (p. 5017) **Legacy Code:** 401191
This subject aims to further develop students' understanding of the essential aspects of working in a clinical environment and to consolidate their imaging skills. Students will learn to how to image a variety of lesions and diseases, including common adult congenital heart defects, systemic diseases that affect the heart, pericardial and pulmonary diseases and cardiac masses. Considerable time will be spent in the clinical environment refining imaging techniques, and students will prepare an evaluation of their imaging skills. .
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): RADI 7003
Co-requisite(s): RADI 7008
Restrictions: Please see the Subject Details page for any restrictions for this subject

RADI 7005 Practice of Cardiac Sonography 4 (10 Credit Points)
Subject Details (p. 5018) **Legacy Code:** 401192
This subject aims to assure that students have gained adequate knowledge and skills to be able to practice competently, confidently and ethically as cardiac sonographers. Care for and communication with patients and colleagues, continual professional development (CPD) and exposure to advanced and leading edge imaging technologies will be given particular emphasis during this subject. Once more, considerable time will be spent in the clinical environment performing imaging skills and activities independently (as per special requirements).
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): RADI 7004
Restrictions: Please see the Subject Details page for any restrictions for this subject

RADI 7006 Principles of Cardiac Sonography 1 (10 Credit Points)
Subject Details (p. 5019) **Legacy Code:** 401185
This subject introduces students to two key areas of knowledge for cardiac sonographers: 1) cardiac anatomy and physiology, and 2) ultrasound physics. Students will learn about the normal and abnormal anatomy and physiology of the human heart. They will also learn about the essential physical principles that underpin ultrasound imaging. This subject provides an essential basis for future study in the Graduate Diploma in Cardiac Sonography.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

RADI 7007 Principles of Cardiac Sonography 2 (10 Credit Points)
Subject Details (p. 5019) **Legacy Code:** 401186
This subject will build on the knowledge acquired in Principles of Cardiac Sonography 1, via a blend of theoretical and practical activities. The students' understanding of cardiac anatomy and physiology will be extended, and they will begin studying cardiovascular diseases. Aspects of ultrasound physics studied in this subject include identifying imaging artifacts, recognizing equipment limitations, and bio-effects and safety.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): RADI 7006
Restrictions: Please see the Subject Details page for any restrictions for this subject

RADI 7008 Principles of Cardiac Sonography 3 (10 Credit Points)
Subject Details (p. 5020) **Legacy Code:** 401187
This subject will extend the knowledge students have gained from Principles of Cardiac Sonography 2. Students will utilise their knowledge of normal and abnormal cardiac anatomy and physiology to study congenital and acquired heart lesions. They will examine systemic, pulmonary and pericardial diseases and cardiac masses, analyse data from basic echocardiogram measurements, and learn case study research skills by undertaking a case report. The university library's vast resources will provide an important aid to learning in this subject.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): RADI 7007
Restrictions: Please see the Subject Details page for any restrictions for this subject

RADI 7009 Principles of Cardiac Sonography 4 (10 Credit Points)
Subject Details (p. 5021) **Legacy Code:** 401188
This subject aims to assure that students have gained adequate knowledge and skills to be able to practice competently and confidently as cardiac sonographers. Students will learn about more complex heart dis-ease and how to detect them by echocardiography and other imaging modalities. They will further devel-op their research skills and start contributing to the sonographic practice through conducting a case pro-ject and presenting the report to the professional audience. The university library's vast teaching and re-search resources will provide an important means for facilitating learning in this subject.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): RADI 7008
Restrictions: Please see the Subject Details page for any restrictions for this subject

RADI 7010 Research Project in Cardiac Sonography (20 Credit Points)
Subject Details (p. 5021) **Legacy Code:** 401248
In 2021 this subject replaced by 401467 - Medical Research Project (PG). The primary aims of this subject are to: i. Design, and ii. Execute and complete, a research project based on the cardiac ultrasound technology chosen by the student in Advanced Principles and Practice of Cardiac Sonography. Successful completion of the subject results in the composition of a report, and in an oral presentation, which will include details of the aims, methods, results and conclusions of the project.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): HLTH 7008 AND
RADI 7001
Restrictions: Please see the Subject Details page for any restrictions for this subject

RADI 7011 Practice of Vascular Sonography 1 (10 Credit Points)
Subject Details (p. 5022) **Legacy Code:** 401293
This subject introduces students to the practice of vascular sonography. Students will learn how to acquire and optimise ultrasound images and to make basic measurements, In addition, they will learn to draw conclusions about cardiovascular anatomy and function based on the images and measurements, as well as learning how to write a basic report. The skills learnt in this subject, which includes work-integrated learning, provides foundational skills in vascular sonography.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): RADI 7015
Restrictions: Please see the Subject Details page for any restrictions for this subject

RADI 7012 Practice of Vascular Sonography 2 (10 Credit Points)
Subject Details (p. 5023) **Legacy Code:** 401295
In this unit, students will build on the knowledge and imaging skills they developed in Practice of Vascular Sonography 1. Additionally, they will learn to perform non-imaging physiological measurements, and be introduced to treatment protocols for vascular patients to complement their understanding of pathology. Image interpretation, report writing and essential aspects of professional practice are also included in this unit.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): RADI 7011
Co-requisite(s): RADI 7016
Restrictions: Please see the Subject Details page for any restrictions for this subject

RADI 7013 Practice of Vascular Sonography 3 (10 Credit Points)
Subject Details (p. 5025) **Legacy Code:** 401297
This subject aims to further develop students' understanding of the essential aspects of working in a clinical environment and will help to consolidate their imaging skills. Students will learn how to image a variety of arterial and venous pathologies. Considerable time will be spent in the clinical environment refining imaging techniques, and students will prepare and evaluation of their imaging skills.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): RADI 7012
Co-requisite(s): RADI 7017
Restrictions: Please see the Subject Details page for any restrictions for this subject

RADI 7014 Practice of Vascular Sonography 4 (10 Credit Points)
Subject Details (p. 5026) **Legacy Code:** 401299
This subject aims to assure that students have gained adequate knowledge and skills to be able to practice competently, confidently and ethically as vascular sonographers. Care for and communication with patients and colleagues, continued professional development (CPD) and exposure to advance and leading edge imaging technologies will be given particular emphasis during this subject. Once more, considerable time will be spent in the clinical environment performing imaging skills and activities independently (as per special requirements)
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): RADI 7013
Co-requisite(s): RADI 7018
Restrictions: Please see the Subject Details page for any restrictions for this subject

RADI 7015 Principles of Vascular Sonography 1 (10 Credit Points)
Subject Details (p. 5027) **Legacy Code:** 401292
In this subject, students will study two essential areas of knowledge for vascular sonographers: I. cardiovascular anatomy and physiology and II. ultrasound physics. The normal anatomy and physiology of the cardiovascular system, and the key physics principles utilized in ultrasound imaging will comprise the majority of the subject content. This subject provides an essential basis for future study in the Graduate Diploma in Vascular Sonography.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): RADI 7011 - Practice of Vascular Sonography 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

RADI 7016 Principles of Vascular Sonography 2 (10 Credit Points)
Subject Details (p. 5028) **Legacy Code:** 401294
This subject builds on the knowledge acquired in Principles of Vascular Sonography 1, via a blend of theoretical and practical activities. Students' knowledge of general pathology principles will be extended, and they will also cover the principles of coagulation and atherosclerotic disease. Aspects of ultrasound physics studies in this subject include identifying imaging artefacts, recognizing equipment limitations and bio-effects and safety. Basic vascular pharmacology is also covered.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): RADI 7015
Co-requisite(s): RADI 7011 - Practice of Vascular Sonography
Restrictions: Please see the Subject Details page for any restrictions for this subject

RADI 7017 Principles of Vascular Sonography 3 (10 Credit Points)
Subject Details (p. 5029) **Legacy Code:** 401296
This subject will extend the student's knowledge of cerebrovascular and peripheral vascular arterial disease, along with thrombotic venous disease. Students will learn essential research skills, for which the university's vast learning resources will provide an important aid.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): RADI 7016
Co-requisite(s): RADI 7013 - Practice of Vascular Sonography 3
Restrictions: Please see the Subject Details page for any restrictions for this subject

RADI 7018 Principles of Vascular Sonography 4 (10 Credit Points)
Subject Details (p. 5030) **Legacy Code:** 401298
This subject aims to provide students with adequate knowledge and skills to practice competently and safely as vascular sonographers. Students will learn about more specialised diseases and how to detect them using ultrasound and other imaging modalities. Research skills will also be developed and students will start contributing to a wider sonographic practice by conducting a case project and presenting the report to the professional audience. The university library's vast teaching and research resources will provide an important means for facilitating learning in this subject.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): RADI 7017
Co-requisite(s): RADI 7014 - Practice of Vascular Sonography 4
Restrictions: Please see the Subject Details page for any restrictions for this subject

Rehabilitation Therapies (REHA)

REHA 1001 Introduction to Occupational Therapy (10 Credit Points)
Subject Details (p. 5031) **Legacy Code:** 400160
This subject introduces students to the profession of occupational therapy, conceptual foundations underpinning the profession, and areas of clinical practice. Students will learn about the important and unique contribution made by occupational therapists in peoples lives to promote health and well-being. The important role of occupation in daily life will be discussed. In particular, this subject presents an overview of how occupational therapy reduces activity limitations people may have, and in doing so enhances the social participation for people of all ages and abilities. The problem solving process used by occupational therapists to assist clients will be introduced.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 1002 Introduction to Physiotherapy Practice (10 Credit Points)
Subject Details (p. 5032) **Legacy Code:** 400906
This subject introduces students to the concept of physiotherapy as a profession, including regulatory, ethical and legal frameworks underpinning practice within the context of the changing health environment. In addition, students will be introduced to fundamental aspects of physiotherapy practice, including gathering, analysing and problem-solving information through a process of clinical reasoning. Students will also develop practical skills in relation to assessment of movement, patient manual handling and transfers, and patient education regarding gait and use of assistive devices.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 1003 Introduction to Podiatry (10 Credit Points)
Subject Details (p. 5033) **Legacy Code:** 400905
The broad aim of this subject is to introduce the work of podiatrists in health care and explain the important role of podiatric services in the community. Students will develop basic skills in dealing with professional, legislative and health issues. The focus will primarily be on areas designed to prepare students for incorporating the clinical standards for infection control and general clinical assessment skills in preparation for competent and safe practice in clinical subjects.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 1004 Occupational Therapy Practice 1 (10 Credit Points)
Subject Details (p. 5034) **Legacy Code:** 400907
This subject introduces students to the principles of professional practice. Students will be provided with learning opportunities through a variety of experiential and community engagement activities that will begin to develop their skills and competence. Professional competencies addressed include communication, documentation, reflection and professional and ethical behaviour. A professional practice placement is incorporated in this subject. Students will complete practice hours in accordance with World Federation of Occupational Therapy accreditation guidelines.
Level: Undergraduate Level 1 subject
Pre-requisite(s): REHA 2006 People Environments and Occupations
COMM 1007 Communication in Health
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 1005 Introduction to Speech Pathology Practice (10 Credit Points)
Subject Details (p. 5036) **Legacy Code:** 401300
This subject introduces students to the profession of speech pathology, including the regulatory, ethical and legal frameworks which underpin speech pathology practice within the context of the changing health environment. Students will explore and reflect on their developing professional identity with reference to the Professional Standards for Speech Pathologists in Australia, including the domains of professional conduct, reflection and lifelong learning, and speech pathology practice. In addition, students will have opportunities to develop core skills in communication and professional interaction, including gathering, analysing and reflecting on information through a process of clinical reasoning. Students will also develop introductory level skills in core speech pathology processes such as safe and effective observation, documentation and therapeutic communication through practical activities with academic staff and other students.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 1006 Communication and Mealtime Foundations (10 Credit Points)
Subject Details (p. 5037) **Legacy Code:** 401416
This subject provides an orientation to the foundational concepts that underpin Speech Pathologists' practice in the areas of communication and mealtimes across the lifespan. The subject will introduce students to core practice areas and explore the role of the Speech Pathologist in working with individuals, families and communities across different clinical contexts. Students will have the opportunity to compare and contrast typical and disordered presentation of speech, language, voice, fluency, multimodal communication and swallowing in both children and adults. Throughout the subject, theoretical approaches to working effectively in partnership with individuals, families and models will be illustrated.
Level: Undergraduate Level 1 subject
Pre-requisite(s): REHA 1005
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 1007 Foundations of Recreational Therapy (10 Credit Points)
Subject Details (p. 5038) **Legacy Code:** 401386
This subject introduces students to the profession of recreational therapy, its models and modalities of practice as well as potential areas of work and intervention. It explores the conceptual foundations underpinning the profession, the different approaches to recreation therapy practice and areas of clinical intervention. Students will learn about the important and unique contribution made by recreation therapists in people's lives to promote human development and individual and collective well-being.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 1008 Introduction to Leisure and Recreation Theory (10 Credit Points)
Subject Details (p. 5040) **Legacy Code:** 401395
Introduction to Leisure and Recreation Theory introduces students to key concepts in leisure and recreation, particularly as they relate to health and well-being. Students will learn about models and theories that assist them in understanding leisure behaviours and recreation practices from different perspectives. The various disciplinary approaches to leisure studies and practice are reviewed, and the multifaceted nature of leisure is explored. In particular, students are encouraged to identify, articulate, reflect upon, and value leisure in their own lives and the lives of others.
Level: Undergraduate Level 1 subject
Incompatible Subjects: REHA 2002 - Introduction to Leisure and Recreation Theory
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 1009 Introduction to Leisure and Recreation Theory (UG Cert) (10 Credit Points)
Subject Details (p. 5041) **Legacy Code:** 500060
Introduction to Leisure and Recreation Theory introduces students to key concepts in leisure and recreation, particularly as they relate to health and well-being. Students will learn about models and theories that assist them in understanding leisure behaviours and recreation practices from different perspectives. The various disciplinary approaches to leisure studies and practice are reviewed, and the multifaceted nature of leisure is explored. In particular, students are encouraged to identify, articulate, reflect upon, and value leisure in their own lives and the lives of others.
Level: Undergraduate Level 1 subject
Equivalent Subjects: REHA 1008 Introduction to Leisure and Recreation theory
Incompatible Subjects: REHA 2002 Introduction to Leisure and Recreation Theory
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 2001 Core Competencies in Physiotherapy Practice (10 Credit Points)
Subject Details (p. 5042) **Legacy Code:** 400982
Students build on their knowledge and skills explored in their first 1.5 years of physiotherapy study. It focuses on the core competencies of physiotherapy professional practice, which will be developed through a variety experiential and community engagement learning activities. Professional competencies addressed in this subject include communication, documentation, and reflection, professional and ethical behaviour. In addition, students will develop skills in client assessment, and interpretation of findings to formulate hypothesized problem lists and goals for patients.
Level: Undergraduate Level 2 subject
Co-requisite(s): NATS 2008
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 2002 Introduction to Leisure and Recreation Theory (10 Credit Points)
Subject Details (p. 5043) **Legacy Code:** 400244
Introduction to Leisure and Recreation Theory introduces students to key concepts in leisure and recreation, particularly as they relate to health and well-being. Students will learn about models and theories that assist them in understanding leisure behaviours and recreation practices from various perspectives, but with a particular focus on insights from sociology and psychology. In particular, students are encouraged to identify, articulate, reflect upon, and value leisure in their own lives and the lives of others.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 2003 Musculoskeletal Disorders and Imaging (10 Credit Points)
Subject Details (p. 5044) **Legacy Code:** 401180
This subject will introduce students to clinical and theoretical foundations of musculoskeletal disorders that can impact on the function of the lower extremity and reduce patient quality of life. Musculoskeletal disorders including rheumatic diseases, inflammatory arthropathies, connective tissue disorders, bone disease and tumours will be covered. Advanced assessment evaluation will be taught with a focus on diagnostic imaging techniques including ultrasound, X-rays, magnetic resonance imaging, computer tomography and bone scans. This will assist in the clinical diagnosis of disease processes that present in podiatric settings
Level: Undergraduate Level 2 subject
Pre-requisite(s): REHA 1003 AND
REHA 2005 AND
NATS 1022
Co-requisite(s): REHA 2007
Equivalent Subjects: REHA 3032 - Podiatric Techniques 1B
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 2004 Occupational Therapy Practice 2 (10 Credit Points)
Subject Details (p. 5045) **Legacy Code:** 400909
This subject provides opportunities for students to understand the wide-ranging practice areas of relevance to occupational therapy. Students will complete a 90-hour project placement across the semester in partnership with diverse health and community-based service providers. Through a variety of experiential, self-directed, and flexible learning opportunities provided through class practicums and practice placement activities, students will develop critical occupational therapy skills and competence in communication, professional behaviours, ethical practice, critical reflection, quality improvement and project management.
Level: Undergraduate Level 2 subject
Pre-requisite(s): REHA 1004
Equivalent Subjects: LGYA 7061 - Occupational Therapy Clinical Practice 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 2005 Pathomechanics and Podiatric Medicine (10 Credit Points)
Subject Details (p. 5047) **Legacy Code:** 401181
This subject will introduce students to clinical/practical and theoretical foundations of human biomechanics of the foot and lower extremity, and the assessment, diagnosis and treatment of common foot and lower extremity pathologies. The subject consists of co-ordinated lectures and practical components to cover the theory and application of foot and lower extremity biomechanics and gait analysis, relevant physical examinations (bones, joints, soft tissues), diagnosing common foot and lower extremity conditions and related treatment options.
Level: Undergraduate Level 2 subject
Pre-requisite(s): NATS 1022 AND
REHA 1003
Co-requisite(s): HLTH 2003
Incompatible Subjects: REHA 3031 - Podiatric Techniques 1A
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 2006 People, Environment and Occupations (10 Credit Points)
Subject Details (p. 5048) **Legacy Code:** 400908
Analysing an individual's participation in meaningful occupations is an essential clinical reasoning process to be mastered by occupational therapists. Therapists must be able to analyse three factors to do so: the person's abilities; the demands of the occupation; and the impact of the environmental context on participation. This subject will facilitate the development of these skills so that students can maximise the person-environment-occupation fit to optimise participation for people with a variety of health challenges or disabilities.
Level: Undergraduate Level 2 subject
Pre-requisite(s): REHA 1001
Co-requisite(s): HLTH 1001 OR
HLTH 1012
Equivalent Subjects: LGYA 7691 - Functional Analysis
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 2007 Podiatry Pre-Clinical (10 Credit Points)
Subject Details (p. 5049) **Legacy Code:** 400933
This subject will prepare students for working with patients in the UniClinic and external placement through consolidation and application of podiatric theory and assessment skills first introduced in Year 1. This subject will emphasize UniClinic handbook procedures, and equip students with basic management, communication and correspondence skills. The subject will also apply student knowledge of functional anatomy, dermatological, vascular, neurological and biomechanical assessment techniques and management into the context of common podiatric conditions.
Level: Undergraduate Level 2 subject
Pre-requisite(s): REHA 1003 AND
HLTH 1010 AND
COMM 1007 AND
HLTH 2003 AND
REHA 2005
Co-requisite(s): REHA 2003
Incompatible Subjects: LGYA 7036 - Podiatry Pre-clinical Studies
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 2009 Workplace Learning 1 (Therapeutic Recreation) (10 Credit Points)
Subject Details (p. 5051) **Legacy Code:** 400246
This subject provides students with the opportunity to apply theoretical and practical knowledge and skills gained in the course to develop their practice and professional behaviours in a therapeutic recreation workplace setting. The subject develops skills for students in working with individuals in a therapeutic recreation program that include assessment, planning, programming and evaluation.
Level: Undergraduate Level 2 subject
Pre-requisite(s): PUBH 1008
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 2010 Adult Speech and Language (10 Credit Points)
Subject Details (p. 5052) **Legacy Code:** 401302
This subject discusses speech and language development and change from young adults to the elderly. It focuses on acquired communication disorders of neurological origin, such as aphasia and related disorders, apraxia of speech and dysarthria, and the diagnosis and treatment of serious communication disorders.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 2012 Speech Impairments in Children (10 Credit Points)
Subject Details (p. 5052) **Legacy Code:** 401303
This subject extends previous learning about child communication and the assessment and intervention for speech and language disorders in children. This approach integrates theoretical topics with an exploration of relevant clinical processes and stresses the importance of evidence-based practice.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 2013 Speech and Hearing Across the Lifespan (10 Credit Points)
Subject Details (p. 5053) **Legacy Code:** 401304
The subject discusses communication disorders in older children and adults and their assessment and treatment. The subject focuses on hearing impairment and its implications for communication, audiological assessment and diagnosis and treatment methods for hearing loss. The subject also introduces cultural and linguistic diversity and its impact on communication and communication disorders.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 2014 Recreational Therapy Assessment (10 Credit Points)
Subject Details (p. 5053) **Legacy Code:** 401399
Students will be required to complete an 80-hour industry based placement as part of the assessment requirements for this subject. This subject focuses on advanced study in the theoretical and practical aspects of procedures necessary for assessment, planning, implementation, management and evaluation specific to recreational therapy services. Students will learn how to apply assessments in all domains of health, for example psychological, physical, social, emotional, cognitive and leisure to further develop their recreational therapy assessment and evaluation skills.
Level: Undergraduate Level 2 subject
Pre-requisite(s): REHA 1007
Equivalent Subjects: REHA 3036 Workplace Learning 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 2015 Recreational Therapy Process and Planning (10 Credit Points)
Subject Details (p. 5055) **Legacy Code:** 401402
Students will be required to complete an 80-hour industry based placement as part of the assessment requirements for this subject. This subject introduces students to the development, implementation and evaluation of recreational therapy programming. Development and ongoing assessment of programs will be explored through theoretical and practical situations. Students will learn how to adapt recreation and leisure activities for clients with varying abilities and needs and apply recreation therapy models into practice.
Level: Undergraduate Level 2 subject
Pre-requisite(s): REHA1007 AND
REHA 1008
Equivalent Subjects: REHA 2009 Workplace Learning 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 2016 Hearing, Speech and Swallowing Science (10 Credit Points)
Subject Details (p. 5056) **Legacy Code:** 301381
Speech Pathologists require a sound knowledge of the relevant structures and functions of the central and peripheral nervous system to be able to understand hearing, language and swallowing processes, and how disease or dysfunction affects them. This subject covers the anatomical and vascular structures of the head and neck, their development and functions, medical imaging and neural plasticity. Topics include the somatosensory systems, motor systems, and the role of the brainstem, cranial nerves, and executive systems in controlling hearing, speech, language and swallowing processes. Common congenital, degenerative and acquired neurological disorders are described. This subject will develop knowledge relevant to other subjects related to speech pathology.
Level: Undergraduate Level 2 subject
Pre-requisite(s): NATS 1009
Co-requisite(s): NATS 1010
Incompatible Subjects: NATS 3006 Anatomy of the Head Neck
NATS 3037 Neuroanatomy
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 2017 Communication Changes Across the Lifespan (10 Credit Points)
Subject Details (p. 5057) **Legacy Code:** 401423
This subject discusses communication disorder in children and adults arising from physical, sensory, cognitive, linguistic, psychosocial, functional and environmental changes that occur across the lifespan. The subject focuses on assessment of communication skills, interpretation and reporting of findings, diagnosis, and planning of treatment and management priorities within holistic, person-centred frameworks. Students will have the opportunity to explore disordered presentation of speech, language, voice, and fluency and build on emerging clinical reasoning, critical reflection skills, and strategies for working effectively in partnership with individuals, families and communities.
Level: Undergraduate Level 2 subject
Pre-requisite(s): REHA 1006
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 2018 Elements of Language: Analysis and Application (10 Credit Points)
Subject Details (p. 5058) **Legacy Code:** 401434
This subject will introduce core linguistic concepts including the sound structure of language (phonetics), how sounds convey meaning (phonology), the formal structure of words (morphology) and sentences (syntax), and the ways in which each of these differ across languages. Emphasis will be placed on the cultural and linguistic diversity of the Western Sydney region, and this will serve as a lens through which the linguistic concepts covered throughout the course will be taught. Students will learn how to transcribe typical and disordered speech using the International Phonetic Alphabet and will be familiarised with how to analyse language at the phoneme, word, and sentence levels. Knowledge will be applied to the exploration of real-world clinical cases. The knowledge acquired within this subject will lay the foundations for understanding, diagnosing and treating speech and language disorders.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 2019 Optimising Communication for Adults (10 Credit Points)
Subject Details (p. 5059) **Legacy Code:** 401421
This subject discusses theoretical and evidence-based intervention approaches that underpin speech pathology practice for adults with communication disorders. The subject explores speech pathology management of speech, language, voice and fluency and multimodal communication through studying communication needs with adult cases. Students will have opportunities to plan evidence-based intervention goals and create management plans for individuals, families and communities in a range of clinical contexts. Students will continue to develop core speech pathology practice skills through demonstration, practice and simulation.
Level: Undergraduate Level 2 subject
Pre-requisite(s): REHA 2017
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 2020 Optimising Communication for Children (10 Credit Points)
Subject Details (p. 5061) **Legacy Code:** 401422
This subject discusses theoretical and evidence-based intervention approaches that underpin speech pathology practice for children with communication disorders. The subject explores speech pathology management of speech, language, voice and fluency with diverse paediatric cases. Students will have the opportunity to plan intervention goals and develop management plans for individuals, families and communities in a range of contexts. Students will continue to develop core speech pathology practical skills through demonstration, practice and simulation.
Level: Undergraduate Level 2 subject
Pre-requisite(s): REHA 2017
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3001 Cardiorespiratory Physiotherapy (10 Credit Points)
Subject Details (p. 5062) **Legacy Code:** 400984
This subject builds on the knowledge and skills developed in the first 2.5 years of physiotherapy study. This subject focuses on client assessment and evidence based management in acute cardiorespiratory physiotherapy contexts. Students will extend and advance the knowledge, competencies and skills in cardiorespiratory physiotherapy clinical reasoning including assessment, interpretation and prioritisation of findings, synthesis of complex information along with the implementation and evaluation of appropriate treatment strategies. This framework will also be applied to the management of patients in Intensive Care, where students will develop specialist knowledge and skills in cardiorespiratory assessment and treatment of acutely ill unstable patients with cardiorespiratory failure and complex comorbidities. This will require strong communication skills, ethical and professional behaviour and an appreciation of interprofessional care required in acute clinical scenarios including intensive care subjects.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 3003 AND
REHA 3009
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3002 Child and Adolescent Occupations (10 Credit Points)
Subject Details (p. 5063) **Legacy Code:** 400162
Students learn about occupational therapy practice with children and youth in different practice settings. This subject examines child development and explores the occupations of children and youth. The impact of family, social, cultural and political contexts on this period of life is analysed. Occupational therapy models, frames of reference, assessments and interventions are applied to practice scenarios. Family-centred practice is a key focus of this subject.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 2006 AND
REHA 2004
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3003 Clinical Education (General) (10 Credit Points)
Subject Details (p. 5064) **Legacy Code:** 401197
This clinical subject builds on the knowledge and skills developed in first 2 years of physiotherapy study. It focuses on generic aspects of physiotherapy professional practice, which will have been developed through a variety experiential and community engagement learning activities. Professional competencies addressed in this subject include communication, documentation, and reflection, professional and ethical behaviour. In addition, students will develop skills in client assessment, interpretation of findings and education. A professional practice placement is incorporated into this subject. This subject requires physiotherapy students to demonstrate assessment, intervention skills and problem solving skills in a general environment. The focus will be on generic skills such as communication, problem solving, manual handling, gait and basic assessment skills. The placement may include ambulatory care, acute care, rehabilitation or paediatrics.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 2001
Co-requisite(s): REHA 3009 AND
REHA 3017 AND
REHA 3015
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3004 Clinical Education A (Acute Care) (10 Credit Points)
Subject Details (p. 5065) **Legacy Code:** 400985
This clinical education placement will provide the context for students to apply the theoretical and research knowledge and skills learnt in 400984 Cardiopulmonary Physiotherapy. Students will be required to assess and treat clients in the acute care and intensive care settings. Assessments and treatments will focus on improving or preventing client impairments. These may include decreased mobility and function altered by acute illness or injury, which may be combined with a chronic disease or a disability. These assessment and treatments will tend to have a cardiorespiratory physiotherapy focus, but clients may also present with neurological and musculoskeletal conditions which require intervention. Students will, therefore, be expected to integrate knowledge and skills learnt across all physiotherapy-specific units in their provision of client-centred care as well as draw on more general knowledge and skills from earlier stages of the course.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 3018 AND
REHA 3001 AND
REHA 3016
Co-requisite(s): REHA 4015
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3005 Clinical Exercise Physiology 1 (10 Credit Points)
Subject Details (p. 5067) **Legacy Code:** 400887
In 2017, this subject is replaced by 401145 - Exercise for Health and Disease Prevention. Clinical Exercise Physiology 1 is primarily concerned with teaching students how to design and implement exercise assessments and exercise prescriptions for clinical populations (high-risk). Emphasis is placed on cardiovascular, metabolic, pulmonary and immunological diseases. Subject content relates to how exercise can be applied to prevent, manage and/or treat chronic diseases, informed by an understanding of the pathophysiology and its impact on health status. Students will be involved in designing exercise programs using an evidence-based approach, which will enable a client to achieve optimum results whilst maintaining a high regard for safety, adherence and motivation. Students will be involved in practical sessions aimed at developing the skills necessary for exercise screening, testing and prescription in clinical populations.
Level: Undergraduate Level 3 subject
Pre-requisite(s): HLTH 2006 AND
BIOS 2037
Equivalent Subjects: REHA 3008 - Exercise Prescription For Special Populations
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3006 Ergonomics and Work Occupations (10 Credit Points)
Subject Details (p. 5068) **Legacy Code:** 401121
The productivity role is a key aspect of adult life for most people. Occupational therapists play a major role in assisting clients who have had their productivity role affected in some way. This subject explores the importance of productivity for adults, in particular those engaged in paid employment. The focus of this subject is the rehabilitation of the injured worker within the context of the work health and safety legislation and the WorkCover case management system. In addition, this subject will explore vocational counselling and rehabilitation for clients with psychosocial, cognitive and physical disabilities.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 2006 AND
NATS 1022
Incompatible Subjects: REHA 7006 - Ergonomics and Work Occupations
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3007 Exercise Prescription II (10 Credit Points)
Subject Details (p. 5069) **Legacy Code:** 401144
This subject focuses on the role of exercise in the functional rehabilitation of musculoskeletal injuries including work and sporting injuries. It covers injury and re-injury prevention strategies; mechanisms of injury; patho-physiology of injury and repair process; design and evaluation of rehabilitation exercise programs; how the exercise program functions in concert with other methods of injury treatment and management; important pharmacological, communication, psychosocial and cultural considerations; the role of the exercise physiologist in the rehabilitation team; the effects of nervous system disorders and injury on skeletal muscle control, injury and rehabilitation are also considered.
Level: Undergraduate Level 3 subject
Pre-requisite(s): HLTH 2005
Equivalent Subjects: REHA 3011 - Exercise in Musculoskeletal Injury Rehabilitation REHA 3012 - Exercise in Musculo-Skeletal Rehabilitation
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3009 Exercise Rehabilitation (10 Credit Points)
Subject Details (p. 5070) **Legacy Code:** 400997
Exercise Rehabilitation focuses on the assessment and management of patients using exercise training. All patient groups are covered but there is an emphasis on cardiorespiratory disorders. Professional competencies addressed in this subject include an understanding of the normal physiological responses to exercise, the implications of pathology and exercise. The subject also includes further development and practice of skills in the patient physical examination, and clinical reasoning such that hypothesized problem lists and goals for patients are developed. The prescription of exercise-based interventions with other physiotherapy modalities is also covered. This subject also facilitates the attainment of professional competencies including effective communication skills, ethical reasoning, professional behaviour, and an appreciation of interprofessional care.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BIOS 2029 AND
REHA 2001
Co-requisite(s): REHA 3017 AND
REHA 3015 AND
AND
REHA 3003
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3010 Exercise for Health and Disease Prevention (10 Credit Points)
Subject Details (p. 5071) **Legacy Code:** 401145
This subject emphasises teaching students to design safe and effective exercise programs for optimal health, well-being, and the prevention of major chronic diseases. Holistic recovery strategies, including sleep, nutrition and stress-reduction are also explored. Students will learn about the aetiology of major chronic diseases, including cancers, cardiovascular disease, metabolic diseases, neurological diseases and mental illnesses, and how these conditions can be targeted with exercise. Students will also develop the practical skills necessary for screening and testing populations at-risk and with chronic diseases.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BIOS 2012 AND
HLTH 2005
Equivalent Subjects: REHA 3008 - Exercise Prescription For Special Populations REHA 3005 - Clinical Exercise Physiology 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3012 Exercise in Musculo-Skeletal Rehabilitation (10 Credit Points)
Subject Details (p. 5072) **Legacy Code:** 400902
In 2017, this subject is repalced by 401144 - Exercise Prescription II. This subject focuses on the role of exercise in the functional rehabilitation of musculoskeletal injuries including work and sporting injuries. It covers injury and re-injury prevention strategies; mechanisms of injury; patho-physiology of injury and repair process; design and evaluation of rehabilitation exercise programs; how the exercise program functions in concert with other methods of injury treatment and management; important pharmacological, communication, psychosocial and cultural considerations; the role of the exercise physiologist in the rehabilitation team; the effects of nervous system disorders and injury on skeletal muscle control, injury and rehabilitation are also considered.
Level: Undergraduate Level 3 subject
Pre-requisite(s): HLTH 2006
Equivalent Subjects: REHA 3011 - Exercise in Musculoskeletal Injury Rehabilitation
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3013 Leisure Education Programming and Mental Health (10 Credit Points)
Subject Details (p. 5073) **Legacy Code:** 400789
In this subject students will develop knowledge and skills required to facilitate and critically evaluate leisure education interventions to bring about changes in the leisure behaviour of individuals, particularly those at risk of developing or with a diagnosed mental illness. Students will analyse evidence to plan, implement and evaluate leisure education programs.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3014 Musculoskeletal Physiotherapy (10 Credit Points)
Subject Details (p. 5074) **Legacy Code:** 400999
This subject focuses on client assessment and treatment using manual physiotherapy techniques. An emphasis is placed on diagnostic reasoning and evaluation, understanding the implications of pathology in a physiotherapy context, prioritising problems and integrating manual therapy with other physiotherapy treatments. This requires strong communication skills, ethical and professional behaviour and an appreciation of interprofessional care.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 3004
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3015 Musculoskeletal Physiotherapy A (10 Credit Points)
Subject Details (p. 5075) **Legacy Code:** 401199
This subject builds on the knowledge and skills developed in the first two years of physiotherapy study. It focuses on client assessment and evidence-based management in musculoskeletal physiotherapy contexts. This will require strong communication skills, ethical and professional behaviour and an appreciation of interprofessional care. Professional competencies addressed in this subject include developing skills in musculoskeletal physiotherapy assessment, interpretation and prioritisation of findings along with the implementation and evaluation of appropriate treatment strategies.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 2001 AND
NATS 2008 AND
HLTH 1010 AND
BEHV 1014
Co-requisite(s): REHA 3009 AND
REHA 3017 AND
REHA 3003
Equivalent Subjects: REHA 3026 - Orthopaedic Physiotherapy
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3016 Musculoskeletal Physiotherapy B (10 Credit Points)
Subject Details (p. 5075) **Legacy Code:** 401200
This subject focuses on client assessment and treatment using manual physiotherapy techniques. An emphasis is placed on diagnostic reasoning and evaluation, understanding the implications of pathology in a physiotherapy context, prioritising problems and integrating manual therapy with other physiotherapy treatments. This requires strong communication skills, ethical and professional behaviour and an appreciation of interprofessional care.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 3003
Equivalent Subjects: REHA 3014 - Musculoskeletal Physiotherapy
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3017 Neurological Physiotherapy (10 Credit Points)
Subject Details (p. 5076) **Legacy Code:** 400986
This subject builds on the knowledge and skills developed in the first 2 years of physiotherapy study. It focuses on client assessment and evidence-based management in neurological physiotherapy contexts. This will require strong communication skills, ethical and professional behaviour and an appreciation of interprofessional care. Professional competencies addressed in this subject include introductory skills in neurological physiotherapy assessment, interpretation and prioritisation of findings, and formulation of basic interventions.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 2001 AND
NATS 3037 AND
NATS 2008 AND
HLTH 2021 AND
PUBH 2005
Co-requisite(s): REHA 3009 AND
REHA 3015 AND
REHA 3003
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3018 Neurological Rehabilitation (10 Credit Points)
Subject Details (p. 5077) **Legacy Code:** 400998
This subject focuses on client assessment and evidence-based physiotherapy management in neurological rehabilitation. This will require strong communication skills, ethical and professional behaviour and an appreciation of interprofessional care. Professional competencies addressed in this subject include clinical reasoning in neurological physiotherapy assessment and treatment, implementation and evaluation of evidence-based interventions and management of complex conditions.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 3017 AND
REHA 3003
Co-requisite(s): REHA3001
REHA3016
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3019 Occupation and Ageing (10 Credit Points)
Subject Details (p. 5078) **Legacy Code:** 400176
In this unit, students will examine the ageing process using the biopsychosocial model, and reflect on their own attitudes towards ageing, including how social stereotypes of older people must be challenged to promote a positive view of this stage of life. Students will gain knowledge about how occupational performance may be impacted due to ageing, including common conditions assessed and treated by occupational therapists. Students will use research evidence to prepare occupational therapy intervention plans that promote quality of life and maximum social participation for clients' and their families.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 2006
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3020 Occupation and Mental Health (10 Credit Points)
Subject Details (p. 5079) **Legacy Code:** 400169
This subject provides an understanding of the impact of major mental illnesses and disorders on occupational participation. These illnesses/disorders are examined from varying perspectives including consumer, recovery, population health and biomedical. Mental health legislation, policies, strategies and standards are examined in relation to clinical practice in this field. Occupational therapy theory, assessments, interventions and outcomes are incorporated together with cross-disciplinary approaches and current evidence to provide a foundation for practice in mental health settings.
Level: Undergraduate Level 3 subject
Pre-requisite(s): NATS 3037 AND
BEHV 1014 AND
REHA 2006
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3021 Occupation and Neurology (10 Credit Points)
Subject Details (p. 5080) **Legacy Code:** 400171
This subject prepares occupational therapy students to work in a variety of settings with individuals who have a neurological condition. The impact of common neurological conditions on the person, their environment and their occupations will be examined. Students will be exposed to a variety of assessments, interventions and evaluation tools suitable for this client population.
Level: Undergraduate Level 3 subject
Pre-requisite(s): Students enrolled in 4663 Bachelor of Health ScienceMasters of Occupational Therapy or 4711 Bachelor of Occupational Therapy 4 must have completed units NATS 3037 - Neuroanatomy and REHA 2006 - People Environment and Occupations
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3022 Occupation and the Environment (10 Credit Points)
Subject Details (p. 5081) **Legacy Code:** 400165
In this subject students will understand how the environment not only provides a context for the activities people choose to engage in, but also how well they can complete them. Students will learn how the social, cultural, physical and institutional environments that they live in can influence health and well-being, provide structures for social inclusion or exclusion, and enable or limit people to participate in everyday activities. Using an occupational lens, students will gain skills in analysing environmental barriers to occupational performance and modifying environments to increase participation.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 2006
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3023 Occupational Therapy Clinical Practice 3b (10 Credit Points)
Subject Details (p. 5082) **Legacy Code:** 400175
This subject will allow students to consolidate academic knowledge and clinical skills. There will be opportunities to actively participate in assessment, analysis, goal setting, treatment/programme planning and occupational therapy intervention under the supervision of an occupational therapist. The placement will allow students to work for 5 consecutive weeks with occupational therapists in one of the many settings where therapists currently practice.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LGYA 7062
Incompatible Subjects: LGYB 7771 - Clinical Placement 3
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3024 Occupational Therapy Practice 3 (10 Credit Points)
Subject Details (p. 5082) **Legacy Code:** 400910
This subject will enable students to consolidate academic knowledge and practice skills. On campus practicums will focus on occupational therapy skill development to equip students with the skills to provide occupational therapy interventions during off-site professional practice placements. There will be opportunities to actively participate in assessment, analysis, goal setting, intervention and evaluation under the supervision of an occupational therapist. Students will experience full time work with occupational therapists in practice settings. Students will complete practice hours in accordance with World Federation of Occupational Therapy accreditation guidelines.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 2004
Co-requisite(s): REHA 3020 AND
REHA 3021 AND
REHA 3002
Equivalent Subjects: LGYA 7071 - Occupational Therapy Clinical Practice 3A
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3025 Occupational Therapy Process (10 Credit Points)
Subject Details (p. 5084) **Legacy Code:** 400912
This subject provides students with the knowledge and skills to apply the occupational therapy problem-solving process in an evidence-based way, across a diverse range of practice situations. Students will gain knowledge in the application of each stage of the occupational therapy process, learn skills in the selection and implementation of assessments and outcome measures, and undertake intervention planning to suit clients with different occupational needs and health trajectories. Different occupational therapy approaches will be reviewed and students will gain skills in tailoring intervention approaches to suit client need and practice context.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3027 Pharmacology for Podiatrists (10 Credit Points)
Subject Details (p. 5084) **Legacy Code:** 401182
This subject will cover the pharmacological foundations and principles of drugs with a particular emphasis on those that may be prescribed by podiatrists upon appropriate qualification, including indications, contraindications, drug-drug interactions and adverse drug reactions. Student knowledge of national legislation relating to the effective and safe use of drugs will be developed, alongside an understanding of the process for obtaining prescribing rights and the attendant responsibilities. Upon successful completion of this subject and registration as a podiatrist, students will be eligible to seek further training to gain endorsement to prescribe.
Level: Undergraduate Level 3 subject
Pre-requisite(s): NATS 2008
Co-requisite(s): REHA 3028
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3028 Podiatric Practice 1 (10 Credit Points)
Subject Details (p. 5085) **Legacy Code:** 400929
This subject is the first of four podiatry clinical practice subjects. Building on previous core and podiatry specific theory subjects this subject introduces students to basic and general clinical skills, including history taking, patient communication, assessment, diagnosis, management and documentation in the clinical environment of common foot disorders under supervision. The student will also be introduced to basic skills in mechanical therapy as part of the clinical therapies component of the subject. Clinical activities will include UniClinic sessions, Clinical Therapies, Tutorials, and External Clinical Placement.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 2007 AND
REHA 2003
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3029 Podiatric Practice 2 (10 Credit Points)
Subject Details (p. 5088) **Legacy Code:** 400930
This subject will further develop students assessment skills encouraging the student to make the appropriate selection of techniques (biomechanical assessments) and to introduce the student to the diagnosis and management of a variety of simple foot pathologies. In this subject, the second of the four clinical practice units, students will participate in assessments of patients under supervision and continue with the management of foot pathologies. Clinical activities will be divided into five areas: General Medicine Clinic, Biomechanical Assessment Clinical, Tutorial, Clinical Therapies and External Clinical Placement.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 3028
Equivalent Subjects: LGYA 7043 - Podiatric Practice 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3030 Podiatric Surgery (10 Credit Points)
Subject Details (p. 5090) **Legacy Code:** 401183
This subject will introduce students to local anaesthesia, the theory of surgical procedures and the practice of skin and nail surgical techniques. As such, this subject allows students to assess patients' suitability for administration of local anaesthesia; understand procedures involved in obtaining voluntary consent, appreciate, and reasonably predict and describe the possible adverse effects of administering local anaesthesia. Surgery will focus the medico-legal requirements, principles of theatre protocol, peri-operative and post-surgical management of the patient and nail and skin surgery, in preparation for student undertaking surgery during Podiatric Practice 3 and 4.
Level: Undergraduate Level 3 subject
Pre-requisite(s): NATS 1010 AND
NATS 1022 AND
REHA 3028 AND
NATS 2008
Incompatible Subjects: REHA 3033 - Podiatric Techniques 2A
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3035 Therapeutic Recreation Professional Project (10 Credit Points)
Subject Details (p. 5092) **Legacy Code:** 400254
This subject will no longer be offered. Student are advised to enrol into the equivalent subject called REHA3041 Facilitation in Recreational Therapy in Spring 2022. The aim of this subject is for students to explore the facilitation of therapeutic recreation interventions. Students will have opportunities to apply practical professional skills, including working through the treatment process and building rapport with individuals and groups. This subject is a hands on subject where students engage in mock activity interventions.
Level: Undergraduate Level 3 subject
Pre-requisite(s): HLTH 1001 AND
REHA 3036
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3036 Workplace Learning 2 (Community Placement) (10 Credit Points)
Subject Details (p. 5092) **Legacy Code:** 400252
This subject provides students with the opportunity to experience the practice of therapeutic recreation in the workplace through a supervised placement experience with industry. Students will complete practice hours in accordance with the National Diversional and Recreation Therapy Australia requirements. Students will develop skills in client assessment, problem identification, program planning, implementation and evaluation in a range of therapeutic service settings. Students will develop learning contracts and explore the advocacy and support needs of the clients.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 2009
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3037 Clinical Practice 1 (10 Credit Points)
Subject Details (p. 5094) **Legacy Code:** 401307
This clinical subject will operationalise the knowledge and skills developed in the first three years of speech pathology study to provide appropriate and holistic care for paediatric clients. Students will undertake supervised clinical practice to assess and treat paediatric clients. Clinical experience placements may be in speech pathology subjects in hospital, community health, school or on-campus settings. Professional competencies addressed in this subject include communication, documentation, reflection and professional and ethical behaviour. In addition, students will develop skills in client assessment, interpretation of findings and education.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 2011
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3038 Clinical Practice 2 (10 Credit Points)
Subject Details (p. 5095) **Legacy Code:** 401309
This clinical subject will operationalise the knowledge and skills developed in the first three years of speech pathology study to provide appropriate and holistic care for paediatric clients. Students will undertake supervised clinical practice to assess and treat paediatric clients. Clinical experience placements may be in speech pathology subjects in hospital, community health, school or on-campus settings. Professional competencies addressed in this subject include communication, documentation, reflection and professional and ethical behaviour. In addition, students will develop skills in client assessment, interpretation of findings and education.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 2010
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3039 Fluency and Voice (10 Credit Points)
Subject Details (p. 5096) **Legacy Code:** 401308
This subject addresses the management of fluency disorders in children, adolescents and adults. It covers theoretical perspectives on stuttering and other fluency disorders, assessment and intervention principles, counselling and facilitating therapy, management of fluency disorders and indicators of successful change.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 2011 AND
REHA 2010
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3040 Swallowing Assessment and Management (10 Credit Points)
Subject Details (p. 5096) **Legacy Code:** 401305
The subject addresses normal and disordered swallowing at mealtimes. It focuses on the assessment and management of feeding and swallowing disorders in infants, children and adults and addresses assessment and intervention practices. Clinical assessment and specific intervention techniques are studied in relation to specific dysphagic populations.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3041 Facilitation in Recreational Therapy (10 Credit Points)
Subject Details (p. 5096) **Legacy Code:** 401385
This subject explores the facilitation of recreational therapy interventions, including processing and building rapport and trust with individuals and groups. Various recreational therapy modalities, and their application and benefits to achieving health outcomes will be explored and critiqued. This subject is designed to be hands-on and students will be tasked with facilitating a mock intervention for their peers.
Level: Undergraduate Level 3 subject
Co-requisite(s): REHA 2014
Equivalent Subjects: REHA 3035 - Therapeutic Recreation Professional Project
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3042 Health Practice Management (10 Credit Points)
Subject Details (p. 5097) **Legacy Code:** 401401
This subject examines the essential management skills that are required of an effective manager in clinical and non-clinical settings, including healthcare facilities, community-based or private leisure, therapy and recreation services, and the health service setting. Consumer management, quality service management, practitioner performance, legal liability and risk management are all examined.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3043 Recreational Therapy Internship (10 Credit Points)
Subject Details (p. 5099) **Legacy Code:** 401400
This is a 20 credit point year-long subject taken over two terms (10 credit points in each term). This subject focuses on meeting all National Council for Therapeutic Recreation Certification (NCTRC) requirements for a successful internship experience, leading to potential Certified Therapeutic Recreation Specialist (CTRS) designation. Under the supervision of a qualified Recreation Therapist, the internship will be completed totaling 560 full-time hours. The internship may be in any area of recreation therapy practice that serves students' needs and accreditation requirements.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 2014 AND
REHA 2015
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3044 Shaping the Future of Recreational Therapy (10 Credit Points)
Subject Details (p. 5100) **Legacy Code:** 401404
Recreation therapists are frequently tasked with solving very complex problems in their practice. This subject uses project-based learning to provide students with the opportunity to work collaboratively to solve an industry-driven problem, using systematic and evidence-based techniques to do so. Students will be challenged to think broadly to take into account the interrelationships among a full range of causal factors underlying the problem at hand, and will be required to use more collaborative and innovative approaches to solve industry challenges.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 2014 AND
REHA 2015
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3045 Communication Access in Communities (10 Credit Points)
Subject Details (p. 5101) **Legacy Code:** 401425
This subject will introduce the concept of 'Communication access for All' and focus on strategies to create communication accessible environments that promote inclusion of individuals with communication support needs across the lifespan. The scope of the subject will encompass the features of communication accessible environments, multimodal communication methods, assistive technology, and Augmentative and Alternative Communication (AAC). Students in Speech Pathology will develop competency in the assessment, management, measurement, and support of complex communication in individuals across the lifespan, and will explore how capacity building models and strategies can enhance the activities and participation of individuals, families and communities.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 2019 AND
REHA 2020
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3046 Optimising Mealtimes Across the Lifespan (10 Credit Points)
Subject Details (p. 5102) **Legacy Code:** 401424
This subject discusses theoretical and evidence-based approaches to assessment and management of a diverse range of swallowing disorders in infants, children and adults. Students will have opportunities to interpret and synthesise assessment findings and create management plans to optimise mealtime experiences by exploring cases that address the needs of individuals with swallowing disorders, their families and communities. Students will plan and implement core speech pathology assessment and therapy skills, related to swallowing and mealtime management through observation and practice. Evidence-based, interdisciplinary and holistic approaches to swallowing and mealtime management will be integrated during this subject.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 1006 AND
REHA 2016
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3047 Speech Pathologists Working with Adults, Families and Communities (10 Credit Points)
Subject Details (p. 5103) **Legacy Code:** 401433
The subject adopts a problem based learning approach towards speech pathology management of communication, hearing and mealtimes through collaboration with individual adults, families and communities. Students will synthesise their knowledge and skills in adult speech, language, voice, fluency and swallowing and multimodal communication in speech pathology practice to manage complex cases. They will engage with problem based learning experiences that require integration of theoretical and evidence based intervention approaches with collaborative person and family and centred practice. Students will critically evaluate of models of service delivery in response to community needs.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 2019
Co-requisite(s): REHA 3049
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3048 Speech Pathologists Working with Children, Families and Communities (10 Credit Points)
Subject Details (p. 5104) **Legacy Code:** 401427
This subject utilises a problem-based learning approach to explore assessment, management and measurement of change in complex cases of communication and mealtime disorder in children. Authentic case scenarios of paediatric clients will encourage students to integrate theoretical knowledge, clinical reasoning, and practical speech pathology skills to plan and evaluate approaches to working with children, their families and the communities in which they live. Individual, targeted and universal intervention strategies will be addressed within the context of collaborative, family centred philosophy.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 2020
Co-requisite(s): REHA 3049
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3049 Speech Pathology Practice 1 (10 Credit Points)
Subject Details (p. 5105) **Legacy Code:** 401426
This clinical placement subject will operationalise the knowledge and skills developed in the first three years of speech pathology study, to provide appropriate and holistic care for clients of speech pathology across the lifespan, their families and communities. Students will undertake 21 days of supervised clinical practice in a range of authentic speech pathology contexts including, but not limited to, hospitals, community health settings, schools / preschools / day-care, disability and/or not for profit organisations, private practice or on-campus settings. Professional competencies addressed in this subject include communication, documentation, reflection and professional and ethical behaviour. In addition, students will develop skills in client assessment, interpretation of findings, planning and implementation of speech pathology services, education, advocacy and advice. Students will be working at a near/approaching intermediate level of competency.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 2019 AND
REHA 2020
Co-requisite(s): REHA 3046
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3050 Speech Pathology Practice 2 (10 Credit Points)
Subject Details (p. 5107) **Legacy Code:** 401428
This second clinical practice subject will operationalise the knowledge and skills developed in the first three years of speech pathology study to provide appropriate and holistic care for clients of speech pathology across the lifespan, their families and communities. Students will undertake 21 days of supervised clinical practice in either adult or paediatric care (that which was not completed in Speech Pathology Practice 1). Clinical Practice will be taken in a relevant setting from among a range of authentic speech pathology contexts including, but not limited to, hospitals, community health settings, schools / preschools / day-care, disability and/or not for profit organisations, private practice or on-campus. Professional competencies addressed in this subject include communication, documentation, reflection and professional and ethical behaviour. In addition, students will develop skills in client assessment, interpretation of findings, planning and implementation of speech pathology services, education, advocacy and advice. Students will be working at an intermediate level of competency.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 3049
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3051 Leisure Education Programming and Mental Health (UG Cert) (10 Credit Points)
Subject Details (p. 5108) **Legacy Code:** 500062
In this subject students will develop knowledge and skills required to facilitate and critically evaluate leisure education interventions to bring about changes in the leisure behaviour of individuals, particularly those at risk of developing or with a diagnosed mental illness. Students will analyse evidence to plan, implement and evaluate leisure education programs.
Level: Undergraduate Level 3 subject
Equivalent Subjects: REHA 3013 Leisure Education and Mental Health
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4001 Clinical Education B (Rehabilitation) (10 Credit Points)
Subject Details (p. 5109) **Legacy Code:** 401110
This clinical education placement will operationalise the theoretical and research knowledge and skills learnt in the first three years of the course. Students will be required to assess and treat clients in rehabilitation settings. Treatments will be focused on improving client mobility and function that is altered by illness, injury, chronic disease or a disability. This will assist in preparation for client discharge home or to an appropriate residential facility, as well as enhance functioning at home or in the community. Assessment and treatments will tend to have a neurological physiotherapy focus, but clients may also present with cardiorespiratory and musculoskeletal conditions which require intervention. Students will, therefore, be expected to integrate knowledge and skills learnt across all physiotherapy-specific units in their provision of client-centred care as well as draw on their more general knowledge from earlier stages of the course.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 3018 AND
REHA 3016 AND
REHA 3001 AND
LGYA 7023
Co-requisite(s): REHA 4015
Incompatible Subjects: REHA 7001 - Clinical Education B (Rehabilitation)
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4002 Clinical Education C (Ambulatory Care) (10 Credit Points)
Subject Details (p. 5111) **Legacy Code:** 401111
This clinical education placement will operationalise the theoretical and research knowledge and skills learnt in the first three years of the course. Students will be required to assess and treat clients who present in hospital outpatient departments, community settings and private practices. This involves the assessment of the client's impairments, function and disability within their home and community environment. Interventions may include manual and exercise therapy; use of electrophysical agents, taping and bracing; and education regarding both prevention and management of conditions. Assessment and treatment will tend to have a musculoskeletal physiotherapy focus, however, clients may also present with neurological and cardiorespiratory conditions that require intervention. Students will therefore integrate knowledge and skills learnt across all physiotherapy-specific units in their provision of client-centred care as well as draw on their more general knowledge from earlier stages of the course.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 3001 AND
REHA 3018 AND
REHA 3016
Co-requisite(s): REHA 4015
Incompatible Subjects: REHA 7002 - Clinical Education C (Ambulatory Care)
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4003 Clinical Education D (Paediatrics) (10 Credit Points)
Subject Details (p. 5112) **Legacy Code:** 401112
This clinical education placement will operationalise the knowledge (theory and research) and skills learnt in Paediatric Physiotherapy. Students will also integrate and apply the knowledge and skills learnt in musculoskeletal, cardiorespiratory and neurological physiotherapy, as well as other health science units to provide appropriate and holistic family-centred care to paediatric clients. Students will be required to assess and treat paediatric clients in acute hospital, rehabilitation or community settings. This approach to management involves the consideration of a child's age, development, and diagnosis during assessment and treatment. Advanced communication skills are required to educate parents and children on the prevention and management of paediatric conditions.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 3001 AND
REHA 3018 AND
REHA 3016 AND
LGYA 7023
Co-requisite(s): REHA 4014 AND
REHA 4015
Incompatible Subjects: REHA 7003 - Clinical Education D (Paediatrics)
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4004 Clinical Education E (Advanced Care) (10 Credit Points)
Subject Details (p. 5114) **Legacy Code:** 401113
This clinical subject involves the integration of musculoskeletal, neurological and cardiorespiratory physiotherapy assessment and treatment skills in an advanced physiotherapy care environment. Advanced problem-solving skills will be required to manage complicated client presentations in various clinical environments. Advanced care environments may include speciality areas such as burns, spinal, emergency, intensive care and aged care subjects within a hospital, or private practice and community-based services where the physiotherapist is the primary care practitioner. Student preferences and prior clinical placement experience will be considered in the clinical placement allocation process. This will help to ensure all students are given the opportunity to explore the breadth of practice of physiotherapy in different environments.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 3009 OR
REHA 3004
Co-requisite(s): REHA 4015 AND
REHA 4001 OR
REHA 4002
Incompatible Subjects: REHA 7004 - Clinical Education E (Advanced Care)
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4005 Clinical and Professional Practice (Honours) (20 Credit Points)
Subject Details (p. 5115) **Legacy Code:** 401120
This subject will introduce practical principles of professional, ethical and legal issues associated with working as a podiatrist, focusing on the workplace, administrative policies and procedures as required for registration with the state Registration Board. Students then undertake a clinical block in a public sector placement designed to further consolidate podiatric assessment, communication and management skills. The student will be involved in treating pathologies in general health and the high risk patient encompassing all aspects of podiatry
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 3028 AND
REHA 3029 AND
REHA 4017 AND
REHA 4007 AND
REHA 3030 AND
REHA 4018
Co-requisite(s): REHA 4021
Incompatible Subjects: REHA 7020 - Podiatric Clinical Block for Honours REHA 7023 - Podiatric Professional Practice Studies
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4006 Complex Cases and Professional Issues (10 Credit Points)
Subject Details (p. 5117) **Legacy Code:** 401108
In this subject, students will further develop their clinical reasoning with respect to clients with complex presentations in areas such as aged care, women's health, return to work, private practice and culturally and linguistically diverse individuals. Complex information will be synthesized such as the theory, research and skills across the spectrum of physiotherapy care , and theories related to professionalism, ethics, safety and communication. This subject also contains the discussion of a range of recent professional developments in physiotherapy, which are relevant to entry level practitioners. These include registration as a physiotherapist, continuing education, workload control strategies, duty of care responsibilities and quality improvement processes (including critical reflection), employment strategies and career pathways.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 4015 AND
REHA 4014
Co-requisite(s): REHA 4001 OR
REHA 4002 OR
REHA 4003 OR
REHA 3004 AND
REHA 4008
Incompatible Subjects: REHA 7005 - Complex Cases and Professional Issues
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4007 Dermatology and Gerontology (10 Credit Points)
Subject Details (p. 5118) **Legacy Code:** 401116
This subject builds on previous clinical and theoretical subjects to develop in-depth knowledge in dermatology and gerontology. Foundations of dermatology including the function and structure of the skin, assessment, differential diagnosis, aetiological factors and the management of disorders of the skin, with particular emphasis on common foot conditions and co-morbidities will be investigated. Population's trends, aging norms, pathology, co-morbidities and attitudes to aging will be explored. Particular focus will be placed on pathophysiology, mechanics, diagnosis and treatment options to maintain normal daily activities.
Level: Undergraduate Level 4 subject
Pre-requisite(s): NATS 2008 AND
REHA 3027 AND
REHA 2003
Incompatible Subjects: REHA 7024 - Podiatric Techniques 3A and REHA 7025 - Podiatric Techniques 3B
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4008 Integrating Research into Physiotherapy Practice (10 Credit Points)
Subject Details (p. 5119) **Legacy Code:** 401109
In this unit, students will further develop their evidence based practice skills and knowledge by applying it in practice settings. This will involve applying the academic knowledge and skills from three prior evidence based practice and research units by synthesising it with their clinical experience and skills. Students will be allocated a topic area from which they will identify a clinical "problem" or health-related issue. Students will then plan and design a robust research project to answer this question. Students will be expected to reflect on the barriers and facilitators of evidence-based practice, and develop strategies and interventions to be used to facilitate the implementation of evidence in practice by clients and health care practitioners.
Level: Undergraduate Level 4 subject
Pre-requisite(s): HLTH 3005 OR
HLTH 4002 AND
REHA 3004 OR
REHA 4001 OR
REHA 4002 OR
REHA 4003
Incompatible Subjects: REHA 7007 - Integrated Research into Physiotherapy Practice
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4009 Occupational Justice (10 Credit Points)
Subject Details (p. 5120) **Legacy Code:** 401123
This subject critically examines practice in the community with a focus on social inclusion and occupational justice. Life perspectives of people experiencing occupational injustice are explored. Current and historical ideologies which underpin global and national legislation and policies on human rights are examined. The promotion of occupational participation through occupational therapy practice is outlined. This subject challenges popular myths and stereotypes of people with disabilities. Issues such as de-institutionalisation, duty of care, dignity of risk, choice-making, rights and negligence are critiqued against legal, ethical and personal perspectives. This subject assists students develop critical thinking and reflection skills for practice.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 3020
Co-requisite(s): REHA 3022
Equivalent Subjects: LGYA 7065 - Occupation and Social Participation
Incompatible Subjects: REHA 7010 - Occupational Justice
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4010 Occupational Therapy Practice 4A (20 Credit Points)
Subject Details (p. 5121) **Legacy Code:** 401126
This subject is the first of two final clinical placement subjects in the 4th year of the program. This subject aims to facilitate the transition from student to occupational therapy practitioner by allowing students to consolidate academic knowledge and practice skills in preparation for becoming a competent beginning practitioner. Students will be expected to actively participate in assessment, analysis, goal setting, intervention and evaluation under the supervision of an occupational therapist. Students will complete practice hours in accordance with World Federation of Occupational Therapy accreditation guidelines.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 3024 AND
REHA 4013
Incompatible Subjects: REHA 7013 - Occupational Therapy Practice 4 Workshop
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4011 Occupational Therapy Practice 4B (20 Credit Points)
Subject Details (p. 5123) **Legacy Code:** 401127
This subject is the second of two final clinical placement subjects in the Year 4 of the program. This subject aims to facilitate the transition from student to occupational therapy practitioner by allowing students to consolidate academic knowledge and practice skills in preparation for becoming a competent beginning practitioner. Students will be expected to actively participate in assessment, analysis, goal setting, intervention and evaluation under the supervision of an occupational therapist. Students will complete practice hours in accordance with World Federation of Occupational Therapy accreditation guidelines. This subject also emphasises career planning and preparation for entering the professional world as an occupational therapist.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 3024
Co-requisite(s): REHA 4010
Incompatible Subjects: REHA 7011 - Occupational Therapy Clinical Practice 4
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4012 Occupational Therapy Project (10 Credit Points)
Subject Details (p. 5124) **Legacy Code:** 401122
The aim of this subject is for students to critically apply their knowledge of professional theory, practice, research and evaluation skills to the investigation of an occupational therapy professional issue of interest or concern. Students will apply unobtrusive research methods to investigate their chosen topic. Students develop an extensive knowledge of their chosen topic and critically analyse the implications of their findings in terms of theory, policy and contemporary health care practice. Students will synthesise their findings into a scholarly research project report and present their findings at a professional-level capstone student conference.
Level: Undergraduate Level 4 subject
Pre-requisite(s): HLTH 3005
Incompatible Subjects: REHA 7014 - Occupational Therapy Project
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4013 Occupational Therapy Specialties (10 Credit Points)
Subject Details (p. 5125) **Legacy Code:** 401124
This subject provides occupational therapy students with the opportunity to select from, and undertake advanced study in, a range of occupational therapy clinical specialty areas. Several streams will run concurrently in this subject representing key clinical areas of specialisation in occupational therapy. Students will be able to focus their study, by selecting a combination of clinical specialty streams. Streams will cover relevant clinical content, examining the unique occupational therapy contribution in each specialty area.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 3002 AND
REHA 3020 AND
REHA 3019
Incompatible Subjects: REHA 7015 - Occupational Therapy Specialities
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4014 Paediatric Physiotherapy (10 Credit Points)
Subject Details (p. 5126) **Legacy Code:** 401106
This subject aims to prepare the student as a competent entry-level practitioner in paediatric physiotherapy. It focuses on understanding the changes which occur from infancy to maturity and the impact of congenital or acquired conditions, or lifestyle diseases causing dysfunction. Clinical and ethical reasoning and family-centred practice are both stressed. The approach will also emphasise the role of physiotherapy within inter-professional teams to prepare for different work settings (acute care, rehabilitation and/or community). The subject integrates prior learning from previous years (especially subjects related to neurology, musculoskeletal, cardiopulmonary physiotherapy and exercise rehabilitation).
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 3003 AND
REHA 3001 AND
HLTH 3005 OR
HLTH 4002
Co-requisite(s): REHA 4015
Incompatible Subjects: REHA 7017 - Paediatric Physiotherapy
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4015 Physiotherapy for Chronic Illness and Disease (10 Credit Points)
Subject Details (p. 5127) **Legacy Code:** 401107
This subject focuses on the role of physiotherapy in chronic disease management. A case-based learning approach will be undertaken to provide students with the theory, research and practice which underpins the assessment and treatment of people with chronic disease. The role of lifestyle factors in the development of chronic disease will be explored, along with health promotion and preventative strategies. The importance of client-centred care, which respects culture and diversity, and the multidisciplinary team approach will also be investigated in the context of frequently occurring chronic conditions.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 3018 AND
REHA 3016 AND
HLTH 3005 OR
HLTH 4002
Co-requisite(s): REHA 4001 OR
REHA 4002 OR
REHA 4003 OR
REHA 3004
Incompatible Subjects: REHA 7018 - Physiotherapy for Chronic Illness and Disease
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4016 Podiatric Clinical Block (20 Credit Points)
Subject Details (p. 5128) **Legacy Code:** 401117
This subject is the major clinical placement subject in the 4th year of the program. Students will participate in clinical activities in public and private sector placements. The subject builds on previous clinical and academic knowledge to further develop students' clinical reasoning skills encouraging appropriate selection of assessment techniques to diagnose, treat and provide optimal health outcomes. Students under supervision will manage foot and lower limb pathologies across the scope of practice including treating diverse patient cohorts and complex cases (including the high risk foot) transitioning towards a competent graduate entry podiatrist.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 4018 AND
REHA 3030
Equivalent Subjects: REHA 7019 - Podiatric Clinical Block
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4017 Podiatric Paediatrics and Sports Medicine (10 Credit Points)
Subject Details (p. 5130) **Legacy Code:** 401115
This subject will introduce students to clinical and theoretical foundations of biomechanical alignment, trauma, psychological and behavioural factors leading to pain and restricted function of the foot and lower extremity affecting daily living activities. Particular focus will be placed on the mechanics, diagnosis and treatment options of problems experienced in paediatrics and sports in normal daily activities or the sporting arena. This integration will enhance the previously taught assessment and diagnostic techniques in the development of appropriate management and treatment programs of the lower extremity in different populations.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 3028 AND
REHA 3029 AND
REHA 2005
Co-requisite(s): REHA 4018
Incompatible Subjects: REHA 7024 - Podiatric Techniques 3A REHA 7025 - Podiatric Techniques 3B
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4018 Podiatric Practice 3 (10 Credit Points)
Subject Details (p. 5131) **Legacy Code:** 401114
This subject is the third of four clinical practice subjects. Building on previous clinical subjects and academic knowledge the subject develops student assessment skills encouraging the student to make the appropriate selection of assessment techniques to diagnose, treat and provide short and long term health outcomes. Students will continue to participate in clinical activities under supervision to manage foot pathologies with increased scope to evaluate and manage more complex cases (i.e. surgery, paediatrics, high risk foot). Clinical activities include UniClinic sessions, Clinical Therapies, Tutorials, and External Clinical Placement.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 3029 AND
REHA 3030
Incompatible Subjects: REHA 7021 - Podiatric Practice 3
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4019 Podiatric Practice 4 (10 Credit Points)
Subject Details (p. 5133) **Legacy Code:** 401118
This subject is the final of four clinical podiatric practice subjects. The subject builds on student clinical reasoning encouraging the student to make the appropriate selection of assessment techniques to diagnose and manage a spectrum of foot and lower limb pathology. Students under supervision will consolidate skills managing diverse patient cohorts and complex cases (including surgery, paediatrics, sports injury and the high risk foot) transitioning towards a competent graduate entry podiatrist. Clinical activities include UniClinic sessions, Clinical Therapies, Clinical tutorials, and Specialist Clinical Activity.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 4018 AND
REHA 4021 AND
REHA 3030
Incompatible Subjects: REHA 7022 - Podiatric Practice 4
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4020 Podiatric Professional Practice Studies (10 Credit Points)
Subject Details (p. 5135) **Legacy Code:** 401119
This subject will introduce students to the principles of professional development and appropriate requirements to function as a registered podiatrist. As podiatrists may work as a primary provider, as part of a multidisciplinary team, in the public or private health care setting, they require extensive knowledge of many aspects of the management of a practice or business. During seminars, students will be introduced to a number of principles specific to professional, ethical and legal issues associated with working as a podiatrist, and practice and workplace administrative policies and procedures.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 4018
Co-requisite(s): REHA 4016 AND
REHA 4019
Incompatible Subjects: REHA 7023 - Podiatric Professional Practice Studies
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4021 The High Risk Foot (10 Credit Points)
Subject Details (p. 5136) **Legacy Code:** 401184
The subject builds on fundamentals of pathophysiology and podiatry specific subjects to understand and manage the impact of systemic disease on foot health. The subject specifically investigates pathology associated with the 'high risk foot' including lower extremity manifestations associated with vascular, endocrine, neurological pathology and immunosuppression. This subject aims to develop comprehensive, coherent and connected knowledge to assist making informed decisions and contribute to sustainable change and improvements in health care for people with systemic disease, with particularly emphasis on diabetes and wound management.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 2003 AND
REHA 2007 AND
NATS 2038
Co-requisite(s): REHA 3028
Incompatible Subjects: REHA 7026 - Podiatric Techniques 3C
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4022 Alternative and Augmentative Communication Systems (10 Credit Points)
Subject Details (p. 5139) **Legacy Code:** 401306
The subject focuses on disability across the lifespan, assistive technology, multi-modal communication methods and Alternative & Augmentative Communication (AAC) systems. The scope covers aided and unaided AAC systems with intentional communication and assessment and intervention methods for people with complex communication needs and those who use AAC.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4023 Clinical Practice 3 (10 Credit Points)
Subject Details (p. 5139) **Legacy Code:** 401311
This clinical subject will operationalise the knowledge and skills developed in the first three years of speech pathology study to provide appropriate and holistic care for paediatric clients. Students will undertake supervised clinical practice to assess and treat paediatric clients. Clinical experience placements may be in speech pathology subjects in hospital, community health, school or on-campus settings. Professional competencies addressed in this subject include communication, documentation, reflection and professional and ethical behaviour. In addition, students will develop skills in client assessment, interpretation of findings and education.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 2011
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4024 Clinical Practice 4 (10 Credit Points)
Subject Details (p. 5140) **Legacy Code:** 401313
This clinical subject will operationalise the knowledge and skills developed in the first three years of speech pathology study to provide appropriate and holistic care for paediatric clients. Students will undertake supervised clinical practice to assess and treat paediatric clients. Clinical experience placements may be in speech pathology subjects in hospital, community health, school or on-campus settings. Professional competencies addressed in this subject include communication, documentation, reflection and professional and ethical behaviour. In addition, students will develop skills in client assessment, interpretation of findings and education.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 2011
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4025 Complex Communication Needs (10 Credit Points)
Subject Details (p. 5141) **Legacy Code:** 401310
The subject focuses on complex cases arising in speech pathology, multi-modal communication methods and acquired disabilities and application of Alternative & Augmentative Communication (AAC) systems. Assessment and intervention methods for people with complex communication needs and those who use AAC are considered in detail. The scope includes acquired disabilities and various genetic conditions such as cleft palate and other craniofacial anomalies.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 4022
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4026 Professional Issues (10 Credit Points)
Subject Details (p. 5141) **Legacy Code:** 401312
Covering a range of ethical and professional issues for speech pathologists, the Professional Issues subject includes recent professional developments in speech pathology relevant to entry level practitioners, ethical and medico-legal issues, registration as a speech pathologist, communication and working with others (including interprofessional issues), safety, continuing education, workload control strategies, duty of care responsibilities, quality improvement processes (including critical reflection), employment strategies and career pathways.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4027 Innovative Speech Pathology Practice (10 Credit Points)
Subject Details (p. 5142) **Legacy Code:** 401429
The subject focuses on complex cases and contexts arising in speech pathology and innovative approaches to service delivery and workforce responsivity. Students will have the opportunity to design and develop solutions to novel and authentic clinical and service scenarios, integrating professional knowledge, skills and experiences. This subject will encourage students to consolidate clinical reasoning and reflection skills to a sophisticated level and engage creativity and innovation to solve contemporaneous problems in Speech Pathology practice.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 3050
Co-requisite(s): REHA 4028
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4028 Speech Pathology Practice 3 (10 Credit Points)
Subject Details (p. 5142) **Legacy Code:** 401430
This third clinical practice subject will operationalise the knowledge and skills developed in the first three years of speech pathology study, to provide appropriate and holistic care for individuals, families and communities. Students will undertake 32 days of supervised clinical practice in diverse speech pathology contexts including, but not limited to hospitals, community health, school, private practice, not for profit, disability or on-campus settings. Professional competencies addressed in this subject include communication, documentation, reflection and professional and ethical behaviour. In addition, students will develop skills in client assessment, interpretation of findings, planning and implementation of speech pathology services, education, advocacy and advice. Students will be working at an approaching/near entry level of professional competency during this clinical subject.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 3050 AND
REHA 3046 AND
REHA 3045 AND
REHA 3047 AND
REHA 3048
Co-requisite(s): REHA 4027
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4029 Speech Pathology Practice 4 (10 Credit Points)
Subject Details (p. 5144) **Legacy Code:** 401432
This fourth clinical practice subject will operationalise the knowledge and skills developed during four years of speech pathology study, to provide appropriate and holistic care for individuals, families and communities. Students will undertake 32 days of supervised clinical practice in diverse speech pathology contexts including, but not limited to hospitals, community health, school, private practice, not for profit, disability or on-campus settings. Professional competencies addressed in this subject include communication, documentation, reflection and professional and ethical behaviour. In addition, students will consolidate and extend their skills in client assessment, interpretation of findings, planning and implementation of speech pathology services, education, advocacy and advice. Students will be working at an entry level of professional competency during this clinical subject.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 4028
Co-requisite(s): REHA 4030
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4030 Speech Pathology Professional Issues (10 Credit Points)
Subject Details (p. 5145) **Legacy Code:** 401431
This subject will address contemporary professional issues relevant to entry-level and future speech pathology practice, Students will integrate knowledge and skills from the year 3 and 4 academic and clinical subjects to generate evidence-based and ethically sound approaches to managing complex and contemporary professional issues. Students will critically reflect on their roles and responsibilities as future professional practitioners, leaders and advocates for the speech pathology profession. Students will engage in career planning and develop strategies to facilitate their transition to professional practice and fulfilling the roles and responsibilities expected of new graduate speech pathologists.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 4028
Co-requisite(s): REHA 4029
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4031 Honours Research 1 (20 Credit Points)
Subject Details (p. 5146) **Legacy Code:** 400945
This subject commences the significant research component of the student's honours degree. Students will work on their specific research project in conjunction with their supervisor, engaging in the early stages of the research process related to critical review of the literature, designing their project, considering ethical dimensions of their study, and collecting data. The emphasis of this subject is on the application of research knowledge gained in other subjects to the practical conduct of the individual honours project.
Level: Undergraduate Level 4 subject
Pre-requisite(s): HLTH 4002
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4032 Honours Research 2 (20 Credit Points)
Subject Details (p. 5147) **Legacy Code:** 400946
In this subject students will complete the significant research component of their honours study. They will build upon the skills and knowledge of research, evidence-based practice and scholarly enquiry gained in subjects completed earlier in the program. The emphasis of this subject is the completion of a supervised honours research project. Each student will work individually with their supervisor to complete the stages of data collection and data analysis and will write their results into a format suitable for submission for examination. Students will also present their final at a student conference that is at professional conference level.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 4031
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4033 Honours Research 2 (Podiatric Medicine) (10 Credit Points)
Subject Details (p. 5148) **Legacy Code:** 401046
This is a 20 credit point year-long subject taken over two terms (10 credit points in each term). In this subject students will complete the significant research component of their honours study as a year-long subject of study (offered as 1H and 2H sessions). They will build upon the skills and knowledge of research, evidence-based practice and scholarly enquiry gained in subjects completed earlier in the program. The emphasis of this subject is the completion of a supervised honours research project. Each student will work individually with their supervisor to complete the stages of data collection and data analysis and will write their results into a format suitable for submission for examination.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 4031 AND
HLTH 4002 AND
REHA 3028 AND
REHA 3029
Co-requisite(s): REHA 4018
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4034 Occupational Therapy Clinical Practice 4 (20 Credit Points)
Subject Details (p. 5149) **Legacy Code:** 400179
In 2013 this subject replaced by 400914 - Occupational Therapy Practice 4. This subject will allow students to consolidate academic knowledge and clinical skills in preparation for becoming a competent beginning practitioner. Students will be expected to actively participate in assessment, analysis, goal setting, treatment/programme planning and occupational therapy intervention under the supervision of an occupational therapist.
Level: Undergraduate Level 4 subject
Pre-requisite(s): LGYA 7072 AND
REHA 3023
Equivalent Subjects: LGYB 7906 - Clinical Placement 4
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4035 Occupational Therapy Practice 4 (Honours) (20 Credit Points)
Subject Details (p. 5149) **Legacy Code:** 401161
This subject will allow students to consolidate academic knowledge and practice skills in preparation for becoming a competent beginning practitioner. Students will be expected to actively participate in assessment, analysis, goal setting, intervention and evaluation under the supervision of an occupational therapist. Students will complete practice hours in accordance with World Federation of Occupational Therapy accreditation guidelines. Career development workshops will be conducted to prepare students for entry into the profession of occupational therapy. In addition, honours students will examine their role as beginning practitioner researchers during their placement and the role of research in underpinning clinical decisions.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 3024 AND
REHA 4031
Incompatible Subjects: REHA 7012 - Occupational Therapy Practice 4 (Honours)
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 7005 Complex Cases and Professional Issues (10 Credit Points)
Subject Details (p. 5153) **Legacy Code:** 401049
From 2018 students should take 401108 Complex Cases and Professional Issues. In this subject, students will further develop their clinical reasoning with respect to clients with complex presentations. A framework will be presented, which synthesises complex information such as the theory, research and skills in musculoskeletal, cardiorespiratory and neurological physiotherapy across the lifespan, and theories related to professionalism, ethics, safety and communication. This framework will be applied to the area of Intensive Care, where students will develop further knowledge and skills in specific cardiorespiratory techniques such as manual hyperinflation and suctioning. This subject also contains the discussion of a range of recent professional developments in physiotherapy, which are relevant to entry level practitioners. These include registration as a physiotherapist, continuing education, workload control strategies, duty of care responsibilities and quality improvement processes (including critical reflection), employment strategies and career pathways.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): REHA 3001 AND
REHA 3014 AND
REHA 7018 AND
REHA 3004
Co-requisite(s): REHA 7001 OR
REHA 7002 OR
REHA 7003 OR
REHA 7004
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 7007 Integrating Research into Physiotherapy Practice (10 Credit Points)
Subject Details (p. 5153) **Legacy Code:** 401050
From 2018 students should take 401109 Integrating Research into Physiotherapy Practice. In this subject, students will further develop their evidence based practice skills and knowledge by applying it in practice settings. This will involve applying the academic knowledge and skills from three prior evidence based practice and research subjects by synthesising it with their clinical experience and skills. Students will be allocated a topic area from which they will identify a clinical "problem" or health-related issue. Students will then plan and design a robust research project to answer this question. Students will be expected to reflect on the barriers and facilitators of evidence-based practice, and develop strategies and interventions to be used to facilitate the implementation of evidence in practice by clients and health care practitioners. This subject also involves students developing leadership and educator skills by facilitating and participating in a journal club.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): HLTH 3005 OR
HLTH 4002 AND
REHA 7001 OR
REHA 7002 OR
REHA 7003 OR
REHA 7004
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 7008 Introduction to Podiatry and Clinical Education (10 Credit Points)
Subject Details (p. 5154) **Legacy Code:** 400942
This is the first subject to introduce Master's entry students to some basic theoretical and practical components related to podiatric practice with an emphasis on clinical competencies in patient communication and management that will be reinforced in the one week clinical placement in either a private practice or public sector setting. In addition, a clinical component will introduce students to skills required to treat basic skin conditions and evaluate the functional anatomy, gait and cursory examination as well as communication skills which are necessary components for the Podiatric Practice clinical subjects. Furthermore, general clinical treatment techniques will be covered such as chair side devices, strapping and removable pads to more complex skills such as the manufacture of non-cast orthotic devices will be covered.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 7009 Neurological Physiotherapy Practice (10 Credit Points)
Subject Details (p. 5155) **Legacy Code:** 400987
This subject introduces the scope of physiotherapy practice in Australia and around the world as well as ethical and professional behaviours and communication skills required by physiotherapists. Students will develop skills in conducting simple subjective and objective examinations of posture, range of movement, muscle strength and length and providing gait rehabilitation. These knowledge and skills will be applied to the physiotherapy management of clients with acute neurological disorders. physiotherapy contexts. Neurological competencies addressed in this subject include introductory skills in neurological physiotherapy assessment, interpretation and prioritisation of findings along with the selection and implementation and evaluation of appropriate treatment strategies.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): REHA 3026 AND
REHA 3001 AND
REHA 3004
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 7010 Occupational Justice (10 Credit Points)
Subject Details (p. 5156) **Legacy Code:** 400916
This subject critically examines practice in the community with a focus on social inclusion and occupational justice. Life perspectives of people experiencing occupational injustice are explored. Current and historical ideologies which underpin global and national legislation and policies on human rights are examined. The promotion of occupational participation through occupational therapy practice is outlined. This subject challenges popular myths and stereotypes of people with disabilities. Issues such as de-institutionalisation, duty of care, dignity of risk, choice-making, rights and negligence are critiqued against legal, ethical and personal perspectives. This subject assists students to develop critical thinking and reflection skills for practice.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): REHA 3022 AND
REHA 3020
Equivalent Subjects: LGYA 7065 - Occupation Social Participation
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 7011 Occupational Therapy Practice 4 (20 Credit Points)
Subject Details (p. 5156) **Legacy Code:** 400914
This subject will allow students to consolidate academic knowledge and practice skills in preparation for becoming a competent beginning practitioner. Students will be expected to actively participate in assessment, analysis, goal setting, intervention and evaluation under the supervision of an occupational therapist. Students will complete practice hours in accordance with World Federation of Occupational Therapy accreditation guidelines while undertaking the second of two final year clinical placements. Students will also gain knowledge and skills in relation to career planning, professional networking and workforce entry.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): REHA 7013
Equivalent Subjects: REHA 4034 - Occupational Therapy Clinical Practice 4
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 7012 Occupational Therapy Practice 4 (Honours) (20 Credit Points)
Subject Details (p. 5158) **Legacy Code:** 400949
From 2018 students in course code 4712 - Bachelor of Occupational Therapy (Honours) should take 401161 - Occupational Therapy Practice 4 (Honours). This subject will allow students to consolidate academic knowledge and practice skills in preparation for becoming a competent beginning practitioner. Students will be expected to actively participate in assessment, analysis, goal setting, intervention and evaluation under the supervision of an occupational therapist. Students will complete practice hours in accordance with World Federation of Occupational Therapy accreditation guidelines. Career development workshops will be conducted to prepare students for entry into the profession of occupational therapy. In addition, honours students will examine their role as beginning practitioner researchers during their placement and the role of research in underpinning clinical decisions.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): REHA 3024 AND
REHA 4031
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 7013 Occupational Therapy Practice 4 Workshop (10 Credit Points)
Subject Details (p. 5159) **Legacy Code:** 400915
This subject will facilitate the transition from student to occupational therapy practitioner. This subject will allow students to consolidate academic knowledge and practice skills in preparation for becoming a competent beginning practitioner. Students will be expected to actively participate in assessment, analysis, goal setting, intervention and evaluation under the supervision of an occupational therapist. Students will complete practice hours in accordance with World Federation of Occupational Therapy accreditation guidelines while undertaking the first of two final year clinical placements.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): REHA 7015
Equivalent Subjects: REHA 4034 - Occupational Therapy Clinical Practice 4
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 7014 Occupational Therapy Project (10 Credit Points)
Subject Details (p. 5160) **Legacy Code:** 400913
The aim of this subject is for students to critically apply their knowledge of professional theory, practice, research and evaluation skills to the investigation of an occupational therapy professional issue of interest or concern. Students will apply unobtrusive research methods to investigate their chosen topic. Students develop an extensive knowledge of their chosen topic and critically analyse the implications of their findings in terms of theory, policy and contemporary health care practice. Students will synthesise their findings into a scholarly research project report and present their findings at a professional-level capstone student conference.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): REHA 3025 AND
HLTH 3005
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 7015 Occupational Therapy Specialties (10 Credit Points)
Subject Details (p. 5161) **Legacy Code:** 400917
This subject provides occupational therapy students with the opportunity to select from, and undertake advanced study in, a range of occupational therapy clinical specialty areas. Several streams will run concurrently in this subject representing key clinical areas of specialisation in occupational therapy. Students will be able to focus their study, by selecting a combination of clinical specialty streams. Streams will cover relevant clinical content, examining the unique occupational therapy contribution in each specialty area.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): REHA 3025
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 7016 Occupational Therapy Theory and Practice (10 Credit Points)
Subject Details (p. 5161) **Legacy Code:** 400911
This subject introduces master's entry students to the theory and practice of occupational therapy. Students will explore the unique contribution of occupational therapists in the health care setting, apply theoretical and philosophical principles underpinning the profession to client groups, and learn analytical skills to examine the relationship between a person, their environment and their participation in daily occupations. The occupational therapy problem solving process will be briefly introduced. In addition, students will study clinical and professional competencies related to practice as a health professional. Finally, the above knowledge and skills will be applied during supervised fieldwork experience.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 7017 Paediatric Physiotherapy (10 Credit Points)
Subject Details (p. 5162) **Legacy Code:** 401047
From 2018 students should take 401106 - Paediatric Physiotherapy. This subject aims to prepare the student as a competent entry-level practitioner in paediatric physiotherapy. It focuses on understanding the changes which occur from infancy to maturity and the impact of congenital or acquired conditions, or lifestyle diseases causing dysfunction. Clinical and ethical reasoning and family-centred practice are both stressed. The approach will also emphasise the role of physiotherapy within inter-professional teams to prepare for different work settings (acute care, rehabilitation and/or community). The subject integrates prior learning from previous years (especially subjects related to neurology musculoskeletal and cardiopulmonary physiotherapy and exercise rehabilitation).
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): REHA 3009 AND
REHA 3018
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 7018 Physiotherapy for Chronic Illness and Disease (10 Credit Points)
Subject Details (p. 5163) **Legacy Code:** 401048
From 2018 students should take 401107 - Physiotherapy for Chronic Illness and Disease. This subject focuses on the role of physiotherapy in chronic disease management. A case-based learning approach will be undertaken to provide students with the theory, research and practice which underpins the assessment and treatment of people with chronic disease. The role of lifestyle factors in the development of chronic disease will be explored, along with health promotion and preventative strategies. The importance of client-centred care, which respects culture and diversity, and the multidisciplinary team approach will also be investigated in the context of frequently occurring chronic conditions.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): REHA 3009
Co-requisite(s): REHA 7001 OR
REHA 7002 OR
REHA 7003 OR
REHA 7004
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 7027 Research into Practice: bridging the clinician-researcher divide in applied and creative therapies (10 Credit Points)
Subject Details (p. 5165) **Legacy Code:** 102728
Evidence Based Research (EBR) can inform excellence in clinical practice in order to best meet the needs of our clients and patients. How we choose and use this research is critical, as is the way that we understand ourselves to be a researcher, beyond our practitioner identity. If you are seeking to translate benchtop research (basic laboratory approaches) into applied research practice, and if you are transitioning towards a new identity as a clinician-researcher, this is the subject for you. Our applied research focus considers broad applications relevant to the creative arts therapies, verbal therapies, allied and other health professions, by looking at research processes which ultimately improve practice in the 'real world'.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 9001 Higher Degree Research Thesis - Art Therapy (10,20 Credit Points)
Subject Details (p. 5166) **Legacy Code:** 800125
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 9002 Higher Degree Research Thesis - Chiropractic and Osteopathy (10,20 Credit Points)
Subject Details (p. 5168) **Legacy Code:** 800101
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 9003 Higher Degree Research Thesis - Occupational Therapy (10,20 Credit Points)
Subject Details (p. 5169) **Legacy Code:** 800127
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 9004 Higher Degree Research Thesis - Physiotherapy (10,20 Credit Points)
Subject Details (p. 5171) **Legacy Code:** 800099
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 9005 Higher Degree Research Thesis - Podiatry (10,20 Credit Points)
Subject Details (p. 5172) **Legacy Code:** 800103
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 9006 Higher Degree Research Thesis - Rehabilitation Therapies (10,20 Credit Points)
Subject Details (p. 5173) **Legacy Code:** 800097
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

Sales and Marketing (MKTG)

MKTG 0001 Marketing Skills (10 Credit Points)
Subject Details (p. 4370) **Legacy Code:** 201035
This subject delivers an overview of the marketing process and how it works within the business environment. Marketing segmentation and market positioning, new product development branding, channels, promotion and advertising plus the concept of marketing as a social system are areas of study. The subject provides a broad overview and a general understanding of marketing concepts and marketing within a social context.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 1001 Advertising: An Introduction (10 Credit Points)
Subject Details (p. 4371) **Legacy Code:** 100706
In this subject students gain a grounding in the key areas of advertising and the steps in the advertising process, viz. research, strategy, creative (copywriting & art direction), production, account service, media planning and marketing communication. Students are also introduced to the issues surrounding advertising and its role in society.
Level: Undergraduate Level 1 subject
Equivalent Subjects: LGYA 0210 - Advertising and Society LGYA 0580- Introduction to Advertising MKTG 1002 - Advertising An Introduction (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 1002 Advertising: An Introduction (WSTC) (10 Credit Points)
Subject Details (p. 4373) **Legacy Code:** 700088
In this subject students gain a grounding in the key areas of advertising and the key steps in the advertising process, viz. research, strategy, creative (copywriting & art direction), media planning and marketing communication. Students are also introduced to the issues surrounding advertising and its role in society.
Level: Undergraduate Level 1 subject
Co-requisite(s): Students enrolled in the combined DiplomaBachelor courses listed below must pass all College Preparatory units listed in the course structure before progressing to the Year 2 units
Equivalent Subjects: MKTG 1001 - Advertising An Introduction
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 1003 Consumer Behaviour (10 Credit Points)
Subject Details (p. 4374) **Legacy Code:** 200084
From 2022 this subject replaced by MKTG 2010 Customer Experience Fundamentals. A focus on the consumer is critical in marketing philosophy. Effective marketing strategies are necessarily formulated as a result of the understanding of basic consumer behaviour. The aim of the subject Consumer Behaviour is to introduce students to consumer behaviour as a critical component in marketing philosophy, and fundamental to the development of effective marketing strategies. This subject applies concepts, theories and models derived from disciplines such as sociology, anthropology, psychology, economics, and mass communications theory to a consumer context. Students will learn to apply such concepts, theories and models through a range of individual and collaborative means using a blended learning design that draws on current and future consumer trends in various marketplaces.
Level: Undergraduate Level 1 subject
Equivalent Subjects: LGYA 9902 - Consumer Behaviour LGYC 0177 - Buyer Behaviour MKTG 1004 Consumer Behaviour
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 1006 Marketing Principles (10 Credit Points)
Subject Details (p. 4375) **Legacy Code:** 200083
Marketing Principles is an introductory marketing course that delivers an overview of the marketing process and how it works within the field of business. This subject examines how organisations use marketing decisions to satisfy customer needs and deliver value, with a focus on the impact of digital technology. Areas of study include market segmentation and positioning; product decisions and branding; customer decision processes, omnichannel marketing; digital marketing communications; pricing strategies; and customer insights The subject provides a foundation for those students in the marketing major; however, it also provides a broad overview for those who seek a general understanding of marketing practice and theory.

MKTG 2002 Incubator 1: Innovation and Creativity for Entrepreneurship (10 Credit Points)
Subject Details (p. 4385) **Legacy Code:** 301165
From time to time we hear stories about successful multi-million (or billion) dollar companies that started in a suburban garage. Is it that simple? The heart of the success of entrepreneurship is innovation and creativity. This subject explores the ways innovative ideas for a product or service can be turned into a successful start-up business. As such, this subject will cover topics including, but not limited to: factors essential for being able to initiate a creative idea, what is innovation, stages of developing a conceptual idea. The subject will be delivered through a number of modules. As an integral part of the subject, students are expected to engage and work in "start-up co-working space" on a regular basis. At the successful completion of this subject, students would have some possible start-up options that could be further explored into creating that multi-million (or billion) dollar company.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 2003 Incubator 3: Product Development (10 Credit Points)
Subject Details (p. 4385) **Legacy Code:** 301168
A creative spark or innovative idea is not enough to succeed as a start-up organisation. A new idea behind a product or a service needs to be first verified to understand the business opportunities out there. Then the identified opportunities need to be adjusted to formalise in a business concept. This subject aims to guide students through that process of converting the creative or innovative idea into the development of a product or service as a sound business concept. This objective is driven through teams of students advancing with their practical projects and along the way learning about a number of theoretical topics such as: prototyping, user testing, etc. The subject will be delivered through a number of modules. As a vital part of the subject, students are expected to engage and work in "start-up co-working space" on a regular basis. At the successful completion of this subject, students would have converted the innovative idea into a business product or service.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 2004 International Marketing Research (10 Credit Points)
Subject Details (p. 4386) **Legacy Code:** 200374
This subject aims to provide students with tools to undertake and critically evaluate simple international marketing research projects. It covers basic marketing research concepts and statistical techniques with emphasis on the impact of the international environment in conducting both primary and secondary data research.
Level: Undergraduate Level 2 subject
Pre-requisite(s): MATH 1030 AND
MKTG 1006 AND
BUSM 1015
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 2005 Issues, Risk and Crisis Communication (10 Credit Points)
Subject Details (p. 4386) **Legacy Code:** 102064
This subject explores the principles and practice of issues management in order to avoid crises, manage when one arises, and seek opportunities to learn and benefit from a crisis where possible, using effective communication. It investigates the development of crisis management plans, and the testing and implementing of these plans. Dealing with the media and pressure groups is covered, along with training a crisis communication team and organising a response to a crisis situation.
Level: Undergraduate Level 2 subject
Pre-requisite(s): MKTG 1009
Equivalent Subjects: LGYA 1068 - Issues in Corporate Public Relations
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 2006 Marketing Communications (10 Credit Points)
Subject Details (p. 4388) **Legacy Code:** 200086
From 2022 this subject replaced by MKTG 3019 Marketing and Digital Communications. Developing and managing an effective integrated marketing communications (IMC) program is a vital part of successful marketing. Moreover, IMC is a highly visible and demanding aspect of marketing communication effort at brand level. This unit, grounded in marketing principles, provides students with an understanding of IMC, the marketing communication process, and coordinating major elements of the marketing communications mix - advertising, digital marketing, sales promotions, personal selling, sponsorship marketing, public relations, direct marketing.
Level: Undergraduate Level 2 subject
Pre-requisite(s): MKTG 1006
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 2007 Marketing Research (10 Credit Points)
Subject Details (p. 4388) **Legacy Code:** 200592
From 2022 this subject replaced by MKTG 2011 Customer Insights. Marketing Research provides a comprehensive appreciation of the methods, uses and limitations of contemporary marketing research. The emphasis is on a conceptual understanding of research method. Students gain exposure to concepts such as research design, information collection, data processing and analysis, and results communication involving qualitative and quantitative techniques.
Level: Undergraduate Level 2 subject
Pre-requisite(s): MATH 1030 AND
MKTG 1006
Equivalent Subjects: LGYA 4334 - Fundamentals of Marketing Research
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 2008 Principles of E-Marketing (10 Credit Points)
Subject Details (p. 4389) **Legacy Code:** 200233
This subject introduces students to emerging electronic business environments and their implications for the marketing manager. There will be emphasis on how organisations may rethink the ways in which they build relationships directly with customers. Using the Internet as an template for emerging new businesses, students will be introduced to electronic business models, concepts and tools. Students will explore at an introductory level legal, social and organisational issues related to the development of virtual communities and corporations within emerging electronic environments.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 2010 Customer Experience Fundamentals (10 Credit Points)
Subject Details (p. 4390) **Legacy Code:** 201082
Customer experiences occur when there is interaction between a company and their customers. Increasing digitisation of this interface has resulted in a shift of buyer expectations where communication is no longer a one-way process. The result being that this exchange comprises of the customer journey where internal factors such as attitudes, learning and emotions combined with external factors such as culture, social communities, and global networks influence decisions. This subject introduces the complexity of technology driven relationships where customers become co-creators of their own personalized experiences and how companies can be part of this. Students will learn the importance of creating positive customer experiences and how this adds value to organisation strategy.
Level: Undergraduate Level 2 subject
Equivalent Subjects: MKTG 1003 - Consumer Behaviour
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 2011 Customer Insights (10 Credit Points)
Subject Details (p. 4391) **Legacy Code:** 201084
Digital technologies are generating large volumes of information (data) about customers and markets. The key is determining how to organise and analyse this data to generate useful insights about customers for marketing decisions. The focus of this subject is on data analysis and reasoning to better understand the culture of insight-driven businesses. Students will examine different sources of information and the processes needed to ensure the generation of quality output. Activities around data visualization, and the role of social media platforms which support this, will prepare students for their future business careers.
Level: Undergraduate Level 2 subject
Pre-requisite(s): MATH 1030
Equivalent Subjects: MKTG 2007 - Marketing Research BUSM 3064 - Service Industry Analytics LGYA 4334 - Fundamentals of Marketing Research
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 3001 Brand and Product Management (10 Credit Points)
Subject Details (p. 4393) **Legacy Code:** 200088
From 2022 this subject replaced by MKTG 3021 Strategic Brand Management. Brand and Product Management focuses on the role brands and products play in the planning and execution of marketing strategies. Aspects of brand and product management include the building, implementation and maintenance of brands within a range of different contexts are covered in this subject. Students will develop a critical view of the inherent challenges firms encounter in creating and maintaining brands from a marketing perspective. This subject uses workshop sessions and online activities to create an interactive learning environment and bring the content to life.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MKTG 1006
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 3002 Business to Business Marketing (10 Credit Points)
Subject Details (p. 4394) **Legacy Code:** 200091
From 2022 this subject replaced by MKTG 3020 Omnichannel Marketing. Unlike consumer marketing where an individual makes decisions based on their own needs or those of their household, business-to-business (B2B) marketing involves individuals or companies promoting and selling products and/or services to other companies. This subject encompasses all these aspects of B2B marketing including organisational buying behaviour, B2B market research, management of the marketing mix from a B2B perspective, relationship and network marketing, supply chain management and Customer Relationship Management (CRM) strategies, and business marketing strategy.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MKTG 1006

Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 3003 Commercial Property Management (10 Credit Points)
Subject Details (p. 4395) **Legacy Code:** 200600
This subject examines the operation of commercial property management as a discrete professional discipline of the property industry. Students examine the fundamental principles of the day-to-day management of the various classes of mainstream commercial investment property. In this subject, students acquire an understanding of the various roles, duties, obligations and legal liabilities of the Commercial Property Manager. Various legislative and statutory provisions are explored, as well as the inter-relationship of commercial property management with the professional disciplines of asset management, investment management and portfolio management, and other sectors of the property Industry. Students also gain an understanding of contemporary commercial leasing practice and the relationships which operate between the building owner, the building manager, and commercial tenants, including the interests and objectives of all concerned parties.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYC 0055 - Commercial Property Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 3004 Export Strategy and Applications (10 Credit Points)
Subject Details (p. 4396) **Legacy Code:** 200589
Australia's export opportunities have yet to be fully realised. In other words, of all the firms that could be considered as having an export potential, only a very small percentage of them actually do (export). This subject teaches students about the management perspectives and the operational requirements needed for a successful export initiative. Specific topics include strategic intent, capability assessment, information gathering, export entry models evaluation, market mix factors, risk management, export finance, logistics and sales management. The overriding aim of the subject is to enable students to be confident in working in an international business environment and to seek out and undertake management and operational tasks necessary to the global development of the firm.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BUSM 1015
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 3005 Incubator 6: Funding and Start-up (10 Credit Points)
Subject Details (p. 4398) **Legacy Code:** 301171
This subject investigates various funding opportunities that might be suitable for your business concept through a number of theoretical topics, such as: possible funding sources including venture capitalists and angel investors, joint venture funding, pitching your ideas. The subject is structured into a number of modules. Further, as activities associated with this subject, students would have to actively seek and secure funding for the start-up.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 3006 Incubator 7: Growth and Exit Strategies (10 Credit Points)
Subject Details (p. 4398) **Legacy Code:** 301172
This subject will assist students with selecting the further growth strategy, which includes deciding whether their business would grow organically or will require a fast growth model and rapid expansion strategies. The growth strategy will determine further funding decisions. Apart from this, as entrepreneurs, the students would need to also consider possible exit strategies (e.g. initial public offering (IPO), trade sales or personal redundancies). This objective is driven through a number of topics such as: elements of market research and strategies for business growth, risk management, possible exit strategies, etc. The subject will be delivered through a number of modules. As a tangible outcome, at the completion of this subject, students would have developed a future growth plan with an identification of possible exit strategies. NOTE: This subject is offered at the Werrington Campus "Launch Pad".
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 3007 International Marketing (10 Credit Points)
Subject Details (p. 4399) **Legacy Code:** 200094
Marketing internationally has become a necessity for many firms that wish to survive and grow in today's dynamic and increasingly linked world economy. International Marketing is concerned with understanding and successfully managing the different international economic, cultural, political and legal environments as they affect the marketing activities of companies. International Marketing examines the role of marketing research, international finance, overseas market entry and expansion strategies and the marketing mix in international markets. On completion of this subject students will have acquired a sound theoretical basis and, particularly, a practical understanding of how companies operate in international markets.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MKTG 1006 OR
BUSM 1015
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 3009 Marketing Planning Project (10 Credit Points)
Subject Details (p. 4402) **Legacy Code:** 200096
Marketing planning project (MPP) assimilates and builds on the wide range of marketing units that students have previously completed. MPP assimilates students' specialist knowledge developed in other units through the use of a 'real-life' case context in which students demonstrate their mastery of marketing in the development and presentation of a professional marketing plan.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MKTG 1006

MKTG 3010 Marketing and Society (20 Credit Points)
Subject Details (p. 4404) **Legacy Code:** 200888
This online marketing subject is made up of three key themes. In Social Marketing students examine the nature of social marketing and how the adoption of marketing concepts, frameworks and techniques developed for commercial marketers can be applied to the solution of social problems. Ethics and Marketing considers why ethical conflict occurs in marketing and explores a range of ethical issues that can occur when applying the theory and practice of marketing. In Responsible Business Marketing students will be introduced to the idea that commercial marketing practices can take into account business responsibilities towards society and the environment.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 3011 Marketing of Services (10 Credit Points)
Subject Details (p. 4404) **Legacy Code:** 200090
Given the service-based nature of modern economies, business graduates will either work for firms whose central offering is service or be employed by organisations that use service as an integral supporting element in what they do and what they offer. Therefore, increasingly, knowledge and skills in the field of marketing of services are required by personnel operating across various industries and in a range of roles. The subject aims to: expose students to relevant theory and practice in the field of services marketing; develop participants into more complete marketers capable of operating in service marketing environments.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MKTG 1006
Equivalent Subjects: BUSM 2040 - The Service Enterprise
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 3013 Property Development 2 (10 Credit Points)
Subject Details (p. 4405) **Legacy Code:** 200748
This subject builds upon previous preliminary studies in the professional discipline of Property Development within the Bachelor of Business (Property) degree and is designed to provide a more in-depth and advanced educational exposure to the wide range of essential inherent functions, core activities, contemporary issues and associated considerations relevant to Property Development, in the context of both theory and practice.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 4693 - Property Development 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 3014 Property Development Process (10 Credit Points)
Subject Details (p. 4406) **Legacy Code:** 200874
In this unit, students critically evaluate the property development process, from the initial development concept through to the end-use of completed development projects. Consideration is given to the implications of the property development process and development decisions from the viewpoints of developers, end users, financiers, public authorities and the community. Students acquire a theoretical understanding of the property development process, development appraisal techniques including financial and feasibility aspects, as well as an understanding of how to apply these techniques to a property scenario. Planning issues are also critically examined.

Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 3016 Strategic Marketing Management (10 Credit Points)
Subject Details (p. 4407) **Legacy Code:** 200087
Customer-centric marketing strategies are vital to capturing competitive advantage and sustaining business success. This subject explores the core concepts and tools of contemporary strategic marketing management. The subject focuses on the skills and framework to develop and manage an integrated marketing strategy that creates value for customers and generates growth for the firm in both online and offline environments. Using a marketing simulation, the subject provides the students the opportunity to make a series of complex, real-world marketing decisions in a competitive environment.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MKTG 1006
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 3017 The Markets of Asia (10 Credit Points)
Subject Details (p. 4408) **Legacy Code:** 200098
Markets of Asia focuses on internationalisation and global competitiveness of organisations in the Asian region. The subject also encourages an appreciation of cultural diversity, and develops students' knowledge and skills so that upon completion of this subject, they will understand the relevant business practices needed to be responsive to enterprise opportunities and threats within this global community.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BUSM 1006

Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 3018 Public Relations: Campaigns (10 Credit Points)
Subject Details (p. 4410) **Legacy Code:** 102729
In this capstone subject students will learn to professionalise key aspects of the public relations management process. The subject links and applies theoretical understanding with writing, planning and presentation skills in response to a client brief. The 'real-world' situation allows students to demonstrate their capacity for problem analysis and to develop appropriate and timely program solutions. Students are required to work within a limited budget and to realistic industry timelines to produce a public relations campaign for their portfolios. Assessment tasks enable students to demonstrate emerging professional capacity to develop a campaign and prepare for a public relations position, either in an in-house or consultancy role.
Level: Undergraduate Level 3 subject
Pre-requisite(s): COMM 2011 AND
COMM 2015
Equivalent Subjects: COMM 3029 - Public Relations Campaigns COMM 3007 - Communication Campaigns
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 3019 Marketing and Digital Communications (10 Credit Points)
Subject Details (p. 4411) **Legacy Code:** 201086
The evolving role of digital technologies and digital media has changed how marketers effectively manage a communication campaign in the digital age. This subject offers insights into marketing communication strategies that can effectively reach tech savvy audiences. The principles taught in this subject will provide a strong understanding of the communication process and help utilise the marketing communications mix (advertising, sales promotions, personal selling, sponsorship marketing, public relations, and direct marketing) more effectively. Students completing this subject will be able to build and manage marketing and digital communication campaigns.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MKTG 1006
Equivalent Subjects: MKTG 2006 - Marketing Communications
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 3020 Omnichannel Marketing (10 Credit Points)
Subject Details (p. 4413) **Legacy Code:** 201087
Technology advances are changing customer value requirements. As a result, customers expect an efficient, insightful and tailored service which requires personalised selling processes through high performance technology and customer-centred business models. Multiple touchpoints and digitally driven processes are created to reach them in the right place at the right time. Omnichannel marketing is now central to business transactions. This subject provides students with an understanding of the dynamics and complexities in creating value across various touchpoints in the business to business space. It considers the need to develop an enterprise-wide digital strategy and align technology, organizational structure and processes to develop an omnichannel approach to provide consistent and seamless engagement with buyers.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MKTG 1006
Equivalent Subjects: MKTG 3002 - Business to Business Marketing
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 3021 Strategic Brand Management (10 Credit Points)
Subject Details (p. 4414) **Legacy Code:** 201083
Consumers' brand interaction in the marketplace is shaped by a digital and technology driven marketing environment. Innovative and interactive branding strategies have become the key to a successful marketing strategy. Students learn to strategically create, develop, innovate, position and protect branding in an ever-changing environment to establish a sustainable competitive advantage. Through these industry-related activities, students create a business driven portfolio, which can be presented to potential employers. This subject uses workshop sessions and online activities to create an interactive learning environment and bring the content to life.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MKTG 1006
Equivalent Subjects: MKTG 3001 - Brand and Product Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 7001 Applied Channel Systems (10 Credit Points)
Subject Details (p. 4416) **Legacy Code:** 200733
This subject introduces students to various channel structures and their differing supply and distribution patterns; especially contemporary channel structures (Retail, eMarkets, etc.) will be addressed. Topics include value chain strategy and management, negotiation as well as the dealing with power and other relationship atmosphere elements.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 8745 - Business Marketing Strategy
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 7007 Corporate Asset and Property Management (10 Credit Points)
Subject Details (p. 4417) **Legacy Code:** 201015
The subject focuses on the role and functions of corporate asset management as a strategic goal of a corporation. Students examine business structure and how corporate asset management fits into an organisation, and assess the operation of commercial property management and the various roles, duties, obligations and legal liabilities of a Commercial Property Manager. Various legislative and statutory provisions are explored, as well as the inter-relationship of commercial property management with the professional disciplines of asset management, investment management, portfolio management and other sectors of the property industry.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 7008 Creating Markets (10 Credit Points)
Subject Details (p. 4418) **Legacy Code:** 200732
Understanding markets is central to the effective management of the marketing system. This subject is designed to provide a framework for exploring well-established, current, and emerging topics in consumer and organisational buyer behaviour. An applied approach is used to explore how buyers (from different organisational, social and culturally diverse backgrounds) behave and how strategic marketing efforts can be adapted to create value in different markets.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 8734 - Buyer Behaviour
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 7009 Customer Relationship Marketing (10 Credit Points)
Subject Details (p. 4418) **Legacy Code:** 200736
This is a hands-on subject introducing students to the concept and application of customer relationship marketing. It will present an understanding of relationship management principles as well as an overview and analysis of the various techniques available to companies. This subject will examine CRM in the context of different industries and examine the impact that CRM can have on firm performance. The key is to develop an understanding of customer and consumer needs and aspirations to create effective and long-term relationship strategies. There will be a emphasis on consumer loyalty programs and value-added services. It will also examine how CRM can fit into the overall strategy of the firm.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 7010 Customer Value Management (10 Credit Points)
Subject Details (p. 4419) **Legacy Code:** 200791
In an economy where products, marketing campaigns and management practises are ever changing, business executives are increasingly recognising that understanding the value of their customers is vital to the survival of the business. Loyal customers are what every organisation seeks. However, increasingly complex supply/demand relationships also result in 'promiscuity' among customers. Therefore, it is crucial that managers have the skills to not only strive for excellence and consistency in product-centric perspectives, but also foster and strengthen those that are customer-centric. This subject fundamentally examines the opportunities and challenges in: a) identifying customers, b) adding value to supplier/consumer relationships, including tools that firms/organisations can use to provide value for customers while ensuring profitability over the entire life of the relationship.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: MKTG 7009 - Customer Relationship Marketing
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 7011 Feasibility Modelling (10 Credit Points)
Subject Details (p. 4420) **Legacy Code:** 201014
This subject emphasises the evaluation of a site for the purposes of selecting development projects, evaluating different options and making the decision as to whether to proceed to a more detailed feasibility study and modelling. The subject provides students with the knowledge and skills to prepare a full feasibility report and analysis of a project's concept and financial modelling. Students will apply theories and concepts to a case study using current and available applications.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: MKTG 7022 - Property Feasibility Study LGYB 7483 - Feasibility Study
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 7014 International Property Finance (10 Credit Points)
Subject Details (p. 4421) **Legacy Code:** 201012
This subject develops students' knowledge of finance with particular reference to the property industry. The theories on financial capital markets and market efficiencies are presented with an emphasis on property investment methods, financial leverage, and bankruptcy. The subject also explores various sources of financing and techniques to aid funding decision- making. Students examine recent and emerging developments in the international property investment and financing arena, as well as sustainable investment and financing strategies.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: ACCT 7020 - Property Finance and Taxation LGYC 0016 - Property Finance and Taxation
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 7015 Investment Property Valuation (10 Credit Points)
Subject Details (p. 4422) **Legacy Code:** 201011
This subject focuses on the theory and practice of valuing income-producing properties, specifically retail, office and industrial properties. Students will learn to critically evaluate the various factors affecting the valuation. The content covered in this subject provides a foundation for further study in property valuation.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): MKTG 7028
Equivalent Subjects: FINC 7018 - Property Valuation LGYA 4889 - Income Property Appraisal LGYC 1571 - Income Property Appraisal
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 7016 Marketing Innovation (10 Credit Points)
Subject Details (p. 4423) **Legacy Code:** 200738
This subject builds on previous coursework in marketing by developing analytical skills that address the development of strategic brands and products. It stresses customer, competitor and environmental analysis, and analysis of market segmentation and product positioning. A continual focus is made on creative and critical thinking, commercial innovation and entrepreneurship.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 7017 Marketing Management (10 Credit Points)
Subject Details (p. 4423) **Legacy Code:** 200786
Marketing Management is designed to provide an introduction to the key concepts, principles and practices that constitute the Marketing discipline. Marketing as a business philosophy that underpins the activities of the firm is a key focus. Areas covered include: the marketing process and marketing implementation; marketing and strategic planning, including return on marketing investment (ROMI); the marketing environment; marketing research and marketing information systems; consumer and business buying behaviour; market segmentation of consumer and business markets; product development and product management; brand management; pricing strategy; communication strategy; competitive marketing strategy; marketing implementation.
Level: Postgraduate Coursework Level 7 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 7019 Marketing Systems (10 Credit Points)
Subject Details (p. 4424) **Legacy Code:** 200737
This subject studies the marketing process from a holistic viewpoint, considering the intersection of the economy, the government, and the community. This perspective will help students to analyse and understand the interrelated and interdependent parts that comprise a marketing system. Specifically, this subject examines: consumer behaviour, market regulation, social responsibility and sustainability. Students will learn to consider the marketing process and its consequences at both an aggregate and micro level. This subject exposes students to the systematic and analytical approaches expected from them in postgraduate studies in marketing.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 8733 - Marketing Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 7022 Property Feasibility Study (10 Credit Points)
Subject Details (p. 4426) **Legacy Code:** 200893
In 2019 this subject is replaced by 201014 Feasibility Modelling. This subject emphasises the evaluation and development of feasibility studies for the purposes of selecting development projects, evaluating different options and making the decision as to whether to proceed to a more detailed feasibility study. The subject provides students with the knowledge and skills to prepare a full feasibility report and analysis of a project's concept and financial feasibility. This is achieved through the application of theories and concepts to a case study. Students will have access to applications being used in the industry to complete a feasibility report. Additionally, students will develop skills to carry out both scenario and sensitivity testing on the outcomes of the proposed development project.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYB 7483 - Feasibility Studies
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 7023 Property Investment and Risk Management (10 Credit Points)
Subject Details (p. 4427) **Legacy Code:** 201010
This subject discusses investment and risk management in the contemporary property context (both local and international). It explores the unique features of income-producing property and examines the performance of such properties, through the application of a variety of investment techniques. The significance of green property investment is also highlighted. Students will perform risk analysis techniques for income-producing properties and portfolios.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: FINC 7017 - Property Investment Analysis LGYB 6499 - Property Investment Analysis (V2)
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 7024 Property Portfolio Analysis (10 Credit Points)
Subject Details (p. 4428) **Legacy Code:** 200891
This subject examines the role of property in an investment portfolio, with particular attention given to property portfolio performance analysis, property investment vehicles and property investment strategy. The performance analysis of both direct and indirect property is also examined to assess the strategic contribution of property to an investment portfolio.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYB 6498 - Property Portfolio Analysis
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 7026 Statutory Valuation and Property Law (10 Credit Points)
Subject Details (p. 4429) **Legacy Code:** 201016
This subject covers valuation codes laid down by statute and their application in compulsory acquisition and resumption of property. It also includes compensation valuation for compulsory acquisition, professional negligence, litigation, evidence, and alternative dispute resolution. Students will develop an understanding of professional liability and responsibility, and prepare for role as an expert witness.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): MKTG 7028 AND
MKTG 7015
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 7027 Strategic Marketing for Hospitality and Tourism (10 Credit Points)
Subject Details (p. 4430) **Legacy Code:** 200840
Services marketing capabilities are essential for a career in hospitality. Marketing identifies customer needs, targets market segments, and designs products and communications to serve those customers. This subject examines service marketing in the hospitality context with particular focus on the accommodation sector. It considers the roles played by salespeople in packaging and joint branding marketing strategy for hospitality and tourism.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 7028 Strategic Property Market Analysis (10 Credit Points)
Subject Details (p. 4430) **Legacy Code:** 201009
Students will develop an understanding of the property industry and its role in the investment context, as well as the collection and analysis of property data. Markets, institutional property portfolios, the role of Government policy, and the controls that affect development, residential valuation and application of economic theory to property development will also be studied.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 7029 Strategic Value Creation (10 Credit Points)
Subject Details (p. 4431) **Legacy Code:** 200734
This subject focuses on a holistic approach to creating value through the brand building process and including integrated marketing communication strategies. The main objective of the subject is to address the value creation process and the central role that brands play as the mechanism for value creation and communication with interest groups (consumers, employees and other stakeholders). This subject will also cover corporate communications and new media as means of value creation strategies.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 8737 - Promotion Management LGYA 4475 - Promotion and Advertising Overseas
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 7030 Sustainable Property Development (10 Credit Points)
Subject Details (p. 4432) **Legacy Code:** 201013
The subject focusses on the importance of Planning and its role in relation to the property development process. This subject provides a wide ranging study of the objectives, functions, roles and methods of operation of the development process, the financial aspects of development, social considerations, taxation aspects and planning matters.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: MKTG 7021 - Property Development LGYC 0023 - Property Development (V2)
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 7032 Valuation of Special Premises (10 Credit Points)
Subject Details (p. 4433) **Legacy Code:** 201017
The value of special premises constitutes an important segment of valuation practice in Australia. A number of special valuation considerations arise in valuation of this class of premises. However, the most compelling reason for studying the valuation of special premises is the fact that such properties provide an ideal vehicle whereby valuation principles and methods of valuation can be practiced and critically evaluated by students.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): MKTG 7028
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 7033 Customer Experience (10 Credit Points)
Subject Details (p. 4434) **Legacy Code:** 201022
Customer experiences occur when there is interaction between a company and their customers for the duration of their relationship. It comprises the customer journey, the consumer-brand 'touchpoints' and the environment in which these experiences happen. Increasing digitisation of the organisation-customer interface has resulted in a shift of buyer expectations where it is easier to compare market offerings and where communication is no longer a one way interaction. This subject considers the complexity of the technology driven relationship where customers become co-creators of their own personalized experiences and how companies can be part of this.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: MKTG 7004 - Buyer Behaviour
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 7034 Digital Marketing (10 Credit Points)
Subject Details (p. 4435) **Legacy Code:** 201026
In the last decade or so, marketing has moved from traditional practice to the digital realm where technology now drives many decisions in marketing strategy. It is now even more important that all types of organisations are able to deliver the right message, to the right people, at the right time. Digital marketing is often closely linked to the internet as the primary channel of contact and where success is measured via mobile and social media marketing. This subject will teach students the principles of digital marketing so they understand the key frameworks of digital marketing technology and are able to apply marketing strategies to target tech savvy consumers.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: BUSM 7089 - Strategic Marketing for Managers
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 7035 Frontiers of Branding (10 Credit Points)
Subject Details (p. 4436) **Legacy Code:** 201024
Technology has dramatically changed the way brands interact in the marketplace. Marketers are increasingly faced with the challenge of meeting the needs of sophisticated consumers who have multiple brands to choose from in a very competitive environment. This makes innovative branding strategies the key differentiating variable. This subject helps students understand the concept of branding and the utilization of brand assets by learning to strategically create, develop, innovate, position and protect the brand in an ever-changing environment in order to establish a sustainable competitive advantage.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: BUSM 7049 - Integrated Brand Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 7036 MarketingMe (10 Credit Points)
Subject Details (p. 4437) **Legacy Code:** 201021
This subject provides a unique opportunity for students to personalise their postgraduate degree and have a meaningful readily-built portfolio for future employers. It comprises a range of short learning modules designed to provide students with a selection of employment related skills such as career preparation, personal brand building, industry certification and how to use the latest technology pertinent to their field of study. Students will follow certain paths in order to travel through 150 hours of educational participation time, including a range of modules and their final portfolio. Students can pick and choose the relevant modules at any time during their course, thus allowing flexibility to manage their choices as they progress through the degree. Please note that students in the Master of Marketing, will automatically be given access to vUWS to complete their learning modules, without the need to formally enrol in this subject. However, in order to successfully complete this subject, students should enrol in it when in their final session of study. You will be required to gain approval from your Director of Academic Program to enrol in this subject by submitting an online eForm.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): Students must be in the program 2817 - Master of Marketing and have completed 40 credit points of study before enrolling in this subject
Permission required to enrol in this subject in the last session of study
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 7037 Multichannel Marketing (10 Credit Points)
Subject Details (p. 4438) **Legacy Code:** 201023
Today's customers have far greater control over the buying process than previously, be that in business or consumer markets. Multichannel marketing is about providing your customers with every opportunity to engage with your business across a variety of offline and online platforms. This subject looks at how the messages and media deployed by an organisation create and sustain demand as a means to build network relationships. As customer expectations rise and the influences of technology becomes more prevalent, students will learn about the importance of personalized campaigns that will resonate with each customer account.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: BUSM 7009 - Business Marketing
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 7038 Social Marketing (10 Credit Points)
Subject Details (p. 4439) **Legacy Code:** 201025
Social Marketing is the application of marketing concepts to the achievement of social ends. Usually this will involve changing attitudes and behaviours in a way that benefits both individuals and communities. This subject builds students' knowledge of how social marketing theory can be used to facilitate behaviour change and improve social outcomes within communities. It will include how to design, manage and evaluate social and behaviour change programs.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 9001 Higher Degree Research Thesis - Marketing and International Business (10,20 Credit Points)
Subject Details (p. 4440) **Legacy Code:** 800045

Sport and Recreation (SPRT)

SPRT 1001 Fundamentals of Exercise Science (10 Credit Points)
Subject Details (p. 5174) **Legacy Code:** 400880
Level: Undergraduate Level 1 subject
Equivalent Subjects: SPRT 1007 - Professional Practice of Sport Exercise Science SPRT 1002 - Fundamentals of Exercise Science (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

SPRT 1002 Fundamentals of Exercise Science (WSTC) (10 Credit Points)
Subject Details (p. 5175) **Legacy Code:** 700073
This subject is designed to provide fundamental basic science and sport and exercise science content, with the intent to prepare the students for the more advanced scientific applications to the study and research of the sport and exercise sciences. Students will be exposed to computer software applications to aid data processing used in the sport and exercise sciences, with special applications to fields such as biomechanics, exercise physiology, motor learning, skill acquisition and sport psychology.
Level: Undergraduate Level 1 subject
Equivalent Subjects: SPRT 1001 - Fundamentals of Exercise Science
Restrictions: Please see the Subject Details page for any restrictions for this subject

SPRT 1005 Outdoor Recreation (10 Credit Points)
Subject Details (p. 5176) **Legacy Code:** 400808
Students will learn about the variety of outdoor recreation and educational pursuits available to individuals, in school or community settings. Through active participation and guided instruction, students will also learn how to supervise specific forms of outdoor recreation and education in activities such as hiking, canoeing and camping. Learning content will reinforce the rationale for the development, administration and delivery of school-based and community outdoor recreation and education programs within Australia.
Level: Undergraduate Level 1 subject
Equivalent Subjects: SPRT 2005 - Outdoor Recreation 1 SPRT 1006 - Outdoor Recreation (WSTC) TEAC 1014 - Experience based Outdoor Education
Restrictions: Please see the Subject Details page for any restrictions for this subject

SPRT 1006 Outdoor Recreation (WSTC) (10 Credit Points)
Subject Details (p. 5177) **Legacy Code:** 700063
Students will learn about the variety of outdoor recreational pursuits available to individuals, whether in a school-based or community setting. Through active participation and guided instruction, students will also learn how to supervise specific forms of outdoor recreation. Lecture content will reinforce learning and skill development through the study of the development, administration and delivery of school-based and community public recreation programs, as well as studying the role of recreation within Australia.
Level: Undergraduate Level 1 subject
Equivalent Subjects: SPRT 1005 - Outdoor Recreation
Restrictions: Please see the Subject Details page for any restrictions for this subject

SPRT 1008 Sport for Social Development (10 Credit Points)
Subject Details (p. 5178) **Legacy Code:** 401243
This subject provides an introduction to the concept of Sport for Development. Students will explore the role sports and physical recreation can play in achieving positive social outcomes in communities, both locally and internationally. Students will learn about the multidisciplinary nature of Sport for Development and how the disciplines of health and sports science, sports management and community development come together in the planning, implementation and evaluation of sports and physical recreation projects.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

SPRT 1009 Exercise Performance and Health (10 Credit Points)
Subject Details (p. 5179)
Students will learn the functional anatomy, basic exercise physiology, physical fitness, motor development and exercise training content required to practice as competent exercise/sport/health professionals. Students will also administer and undertake laboratory exercises designed to test, design and administer fitness programs for healthy individuals.
Level: Undergraduate Level 1 subject
Pre-requisite(s): SPRT 1001
Incompatible Subjects: SPRT 3001
Restrictions: Please see the Subject Details page for any restrictions for this subject

SPRT 2002 Exercise Testing and Measurement (10 Credit Points)
Subject Details (p. 5179) **Legacy Code:** 401150
Level: Undergraduate Level 2 subject
Co-requisite(s): SPRT 1001
Restrictions: Please see the Subject Details page for any restrictions for this subject

SPRT 2007 PDHPE: Games for Diverse Groups (10 Credit Points)
Subject Details (p. 5180) **Legacy Code:** 400798
This subject focuses on teaching and coaching young children in a range of Indigenous, striking/fielding, and target sports. The aim is to build on students' knowledge and application of various teaching / coaching styles with a focus on the game sense approach. In particular, the subject addresses issues of diversity and inclusion in school, sport, and recreation activities. As part of the subject, students will implement a teaching program in a local primary school and complete introductory coaching certificates in a variety of sports.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

SPRT 2009 Professional Development and Work Experience (10 Credit Points)
Subject Details (p. 5181) **Legacy Code:** 400903
Experience in the field of study is an essential ingredient in marketing an individual for employment and often for professional memberships. Professional Practice provides students with an opportunity to observe and assist Sport & Exercise Science practitioners in action and to learn in a practical hands on setting. Students will have the opportunity to see how knowledge and skills acquired in lectures and tutorials/ laboratories can be applied and also relate theoretical concepts and skills to situations in exercise-related settings. This subject is the first of two subjects which require a work placement which is usually off campus.
Level: Undergraduate Level 2 subject
Pre-requisite(s): SPRT 1001
Co-requisite(s): HLTH 2006
Equivalent Subjects: SPRT 2010 - Professional Practice in Sport Exercise Science 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

SPRT 2011 Sustainability, Tourism and Place (10 Credit Points)
Subject Details (p. 5182) **Legacy Code:** 102386
In 2023 this subject is replaced by TOUR 2003 - Managing Sustainable Places. Sustainability, Tourism and Place provides students with a fundamental understanding of the current debates in tourism management and sustainable places. The complex relationship and interaction among diverse stakeholders involved in places and tourism are explored. The subject encourages a systems approach, and focuses on traveller origin places, tourist experience and community development. The subject aims to assist students in the analysis of the role of tourism in sustainable places by applying a wide range of case studies.
Level: Undergraduate Level 2 subject
Equivalent Subjects: SPRT 2006 - Outdoor Recreation and Leisure
Restrictions: Please see the Subject Details page for any restrictions for this subject

SPRT 2012 Community Sport Development (10 Credit Points)
Subject Details (p. 5183) **Legacy Code:** 401283
The subject develops students' knowledge and understanding of the concept of community sports development and its role in addressing key issues of social inclusion, diversity, and health promotion. Students explore local and national Australian policies and initiatives, with a focus on monitoring and evaluating and exploring evidence around the social impact of sport. The module facilitates students' knowledge and understanding of community needs within the context of sport and active recreation. Further, students will propose innovative sport development initiatives and programs where students will design and implement a localised sport development initiative in partnership with a local sport organisation.
Level: Undergraduate Level 2 subject
Pre-requisite(s): SPRT 1008
Restrictions: Please see the Subject Details page for any restrictions for this subject

SPRT 2013 Leading Games and Sports (10 Credit Points)
Subject Details (p. 5184)
This subject focuses on teaching and coaching young people in a range of Indigenous games, non-mainstream sports, and various other inclusive activities. The aim is to build on students knowledge and application of various teaching /coaching styles with a focus on the game sense approach. In particular, the unit addresses issues of diversity and inclusion in school, sport, and recreation activities. As part of the subject, students will implement a teaching program in a local primary school and complete introductory coaching certificates in a variety of sports.
Level: Undergraduate Level 2 subject
Pre-requisite(s): HLTH 1020
Equivalent Subjects: SPRT 2007
Restrictions: Please see the Subject Details page for any restrictions for this subject

SPRT 3001 Applied Exercise Science for Personal Trainers and Coaches (10 Credit Points)
Subject Details (p. 5185) **Legacy Code:** 401056
Students will learn the functional anatomy, exercise physiology, physical fitness, motor development and exercise training content required to function as competent personal trainers and/or sports coaches. Students will also administer and undertake laboratory exercises designed to test and administer fitness programs for healthy individuals
Level: Undergraduate Level 3 subject
Pre-requisite(s): BIOS 1022 AND
SPRT 1001
Equivalent Subjects: LGYA 7759 - Personal Training and Coaching
Restrictions: Please see the Subject Details page for any restrictions for this subject

SPRT 3002 Aquatic Sports (10 Credit Points)
Subject Details (p. 5186) **Legacy Code:** 400895
From 2016, this subject is replaced by 400866 - Motor Control and Skill. Students will actively engage in a variety of aquatic activities including rowing, canoeing, kayaking, diving, water polo and swimming. Through participation in practical tutorials, students will develop their ability to teach and coach each of the aforementioned aquatic activities in a school or community recreation setting. Students will also train in swimming to improve stroke mechanics and fitness. This will form part of the Bronze Medallion Lifesaving certification, which involves developing competencies in resuscitation, four strokes of swimming, personal survival and rescue skills.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

SPRT 3003 Coaching Sport and Recreation Activities (10 Credit Points)
Subject Details (p. 5186) **Legacy Code:** 401169
Coaching Sport and Recreation Activities offers students with a learning experience based on the principles of physical education and sports coaching in variety of sports and recreational activities. This subject builds upon physical activity instruction and teaching games for understanding (game sense) introduced in earlier subjects. You will have the opportunity to plan, implement, and reflect on your own teaching practice during tutorials and within community sport contexts. You will learn to see things from multiple perspectives based on content delivered by university staff, peers, and external sport organisations. The subject incorporates experience in meaningful situations that will help prepare you for work in a dynamic field of education. This subject includes approximately 35 hours of work integrated learning.
Level: Undergraduate Level 3 subject
Pre-requisite(s): SPRT 2007
Equivalent Subjects: SPRT 3007 - Ethical Issues in Sport and Athletics SPRT 3010 - Recreational Sports LGYA 0701 - Human Movement 6
Restrictions: Please see the Subject Details page for any restrictions for this subject

SPRT 3005 Contemporary Youth Health Issues (10 Credit Points)
Subject Details (p. 5187) **Legacy Code:** 400894
This subject has been replaced by SPRT 3024 Contemporary Youth Health from 2023. The subject explores contemporary health issues related to young people. Students will examine a range of topics from a multidisciplinary approach, which include the social, cultural, political and biological factors that influence and construct young people's lives and health. Students will explore pathogenic and salutogenic approaches to understanding and promoting young people's health. When considering and analysing the influences and contexts, students will be able to gather resources and develop diverse meaningful strategies that will assist young people to promote health practices.
Level: Undergraduate Level 3 subject
Incompatible Subjects: HUMN 3072 - Sexuality SPRT 3006 - Introduction to Drug Use in Society
Restrictions: Please see the Subject Details page for any restrictions for this subject

SPRT 3008 Exercise Physiology Across the Lifespan (10 Credit Points)
Subject Details (p. 5188) **Legacy Code:** 401149
This subject is focused on physiological changes across the human lifespan and their effects on exercise tolerance. There is a particular focus on structural, physiological and motor development changes across the lifespan with emphasis on the control of neuromuscular, cardiovascular, respiratory and thermoregulatory function. Social determinants of health and physiological adaptation to exercise training will be covered, alongside contraindicated exercises and common injuries/conditions that are present at different stages across the lifespan.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BIOS 2012
Restrictions: Please see the Subject Details page for any restrictions for this subject

SPRT 3011 Sport Development Applied Project (10 Credit Points)
Subject Details (p. 5189) **Legacy Code:** 401246
The Sport Development Applied Project continues student's engagement with an organisation in the sport and active recreation industry. Building on the foundation laid in the Sport Development Internship, the Applied Project provides students with an opportunity to apply their acquired academic knowledge and skills into real-world applications in an engaged strategic project in sport development.
Level: Undergraduate Level 3 subject
Pre-requisite(s): SPRT 3012
Incompatible Subjects: SPRT 3014 Sport Management Applied Project BUSM 3066 Sport Management Internship
Restrictions: Please see the Subject Details page for any restrictions for this subject

SPRT 3012 Sport Development Internship (10 Credit Points)
Subject Details (p. 5190) **Legacy Code:** 401244
The Sport Development Internship provides students with the opportunity to experience the practice of sport development in the workplace through a supervised placement in the sport and active recreation industry. Internships will allow students to relate their acquired academic knowledge and to apply their skills to real-world applications in an industry setting. Students will have the opportunity to observe, develop and practice skills in negotiation, problem identification, program planning, implementation and evaluation in a range of settings. The work completed during the Sport Development Internship also lays the foundations for the Sport Development Applied Project to follow.Students will complete a minimum of 100 hours of placement/internship as part of this unit.
Level: Undergraduate Level 3 subject
Incompatible Subjects: SPRT 3014 Sport Management Applied Project BUSM 3066 Sport Management Internship
Restrictions: Please see the Subject Details page for any restrictions for this subject

SPRT 3014 Sport Management Applied Project (10 Credit Points)
Subject Details (p. 5191) **Legacy Code:** 200751
This subject provides students a unique opportunity to integrate knowledge gained from operational and theoretical perspectives of sport studies into application in an engaged research project in sport management. Students will engage in comprehensive projects which bring together real world industry problems and sport theory. Students studying Sport Management Applied Project may have the opportunity to undertake an international field trip to experience the sport environment from an international perspective.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BUSM 2036
Equivalent Subjects: LGYA 4813 - Sport Management Applied Project
Incompatible Subjects: BUSM 3019 - Hospitality Management Applied Project
Restrictions: Please see the Subject Details page for any restrictions for this subject

SPRT 3017 Work Experience in Sport and Exercise Science (10 Credit Points)
Subject Details (p. 5191) **Legacy Code:** 400904
Experience in the field of study is an essential ingredient in marketing an individual for employment and often for professional memberships. Work Experience in Sport and Exercise Science provides students with an opportunity to observe and assist Sport & Exercise Science practitioners in action and to learn in a practical setting. Students will have the opportunity to see how knowledge and skills acquired in lectures and tutorials/laboratories can be applied and also relate theoretical concepts and skills to situations in exercise-related settings. .
Level: Undergraduate Level 3 subject
Pre-requisite(s): Students in course versions 46581 46582 and 46583 must successfully complete three pre-requisite units - BIOS 2037 Sport and Exercise Physiology REHA 3012 Exercise in Musculo-Skeletal Rehabilitation and SPRT 2009 Professional Development and Work Experience Students in course version 46584 must successfully complete two prerequisite units - BIOS 2012 Exercise Physiology and HLTH 2005 Exercise Prescription 1
Equivalent Subjects: SPRT 3015 - Sport and Exercise Science in Practice
Restrictions: Please see the Subject Details page for any restrictions for this subject

SPRT 3020 Applied Research Project (10 Credit Points)
Subject Details (p. 5192)
This capstone subject requires students to design and conduct a detailed project of independent inquiry in an area of interest. In consultation with subject coordinators and academic staff, students will build on existing evidence synthesis skills by collecting data in a variety of formats to answer key questions related to their field, leading to outcomes and solutions relevant to real-world settings and future employment contexts.
Level: Undergraduate Level 3 subject
Equivalent Subjects: SPRT 3011 Sport Development Applied Project
Incompatible Subjects: SPRT 3014 Sport Management Applied Project 200664 Sport Management Internship
Restrictions: Please see the Subject Details page for any restrictions for this subject

SPRT 3022 Outdoor Education, Sustainability and Health (10 Credit Points)
Subject Details (p. 5193)
Students will learn in, through, and about a variety of outdoor recreation experiences available in community and school contexts. Through active participation, guided instruction, and independent exploration, students will learn how to supervise specific forms of outdoor recreation in activities such as bushwalking, canoeing, camping and the 'micro-adventure'. This subject applies an interdisciplinary approach to learning about people, the environment and health. Students will consider how these connections and interactions play an important role in promoting, supporting and sustaining the wellbeing of individuals, the community, and the environment, now and into the future.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

SPRT 3023 Advanced HPE and Sport Leadership (10 Credit Points)
Subject Details (p. 5194)
This subject offers students with a learning experience based on the principles of physical education and sports coaching in variety of sports and recreational activities. It builds upon physical activity instruction and teaching games for understanding (game sense) introduced in earlier subjects. You will have the opportunity to plan, implement, and reflect on your own teaching practice during tutorials and within community sport contexts. You will learn to see things from multiple perspectives based on content delivered by university staff, peers, and external sport organisations. The subject incorporates experience in meaningful situations that will help prepare you for work in a dynamic field of education.
Level: Undergraduate Level 3 subject
Pre-requisite(s): SPRT 3003 Leading Games and Sports
Equivalent Subjects: SPRT 3003 Coaching Sport and Recreation Activities
400893 Ethical Issues in Sport and Athletics
400799 Recreational Sports
100673 Human Movement 6
Restrictions: Please see the Subject Details page for any restrictions for this subject

SPRT 3024 Contemporary Youth Health (10 Credit Points)
Subject Details (p. 5195)
The subject explores contemporary health related to young people. Students will examine a range of topics from a multidisciplinary approach, which include the social, cultural, political and biological factors that influence and construct young people's lives and health. When considering and analysing the influences and contexts, students will be able to gather resources and develop diverse and meaningful strategies that will assist young people to promote health practices.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

SPRT 9001 Higher Degree Research Thesis - Sport and Recreation (10,20 Credit Points)
Subject Details (p. 5196) **Legacy Code:** 800095
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

Studies in Human Society (HUMN)

HUMN 0001 Academic Skills for Islamic Studies (WSTC Prep) (10 Credit Points)
Subject Details (p. 3423) **Legacy Code:** 700228
This subject introduces students to the essential academic skills required for success in tertiary studies. It employs an explicit pedagogy approach to teach students how to become independent, active, and reflective learners. The subject also includes essential research and writing skills specific to the Diploma in Islamic Studies.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 0002 Academic Skills for Policing (WSTC Prep) (10 Credit Points)
Subject Details (p. 3423) **Legacy Code:** 700235
This subject introduces students to the essential academic skills required for success in tertiary studies. It employs an explicit pedagogy approach to teach students how to become independent, active, and reflective learners. The subject also includes essential research and writing skills specific to the social sciences and policing.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 0003 Academic Skills for the Social Sciences (WSTC Prep) (10 Credit Points)
Subject Details (p. 3424) **Legacy Code:** 700233
This subject introduces students to the essential academic skills required for success in tertiary studies. It employs an explicit pedagogy approach to teach students how to become independent, active, and reflective learners. The subject also includes essential research and writing skills specific to the social sciences.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 0006 Australian Studies (WSTC Prep) (10 Credit Points)
Subject Details (p. 3425) **Legacy Code:** 700213
Australian Studies aims to inform students of some of the aspects of the historical development of Australia and highlight some of the important physical, social, political and economic issues and events which have helped shape the development of Australia as an independent, modern nation. The study of issues, events, attitudes and values in the Australian context along with the development of academic skills will assist students in their study of Humanities units at the tertiary level. In addition, all students, especially international students, should acquire a better appreciation of the environment in which they live and learn to think more critically about issues facing people in the 21st century.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: HUMN 0007 - Australian Studies (UWSC)
Incompatible Subjects: HUMN 0005 - Australian Studies (UWSC) HUMN 0004 - Australian Contemporary Studies (UWSC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 0007 Australian Studies (WSTC) (10 Credit Points)
Subject Details (p. 3426) **Legacy Code:** 900077
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 0008 Comparative World Religions (WSTC Prep) (10 Credit Points)
Subject Details (p. 3426) **Legacy Code:** 700229
This subject introduces students to the internally diverse and dynamic nature of religions in the world today. It explores the values and beliefs of religious traditions around the world, their points of difference and similarity. It aims to equip students with an understanding of the way that religions are embedded in culture. The subject provides students with a social science and humanities based vocabulary for discussing theological notions and debating the influence of religion on history, culture and contemporary issues. The subject also provides students with an opportunity to apply academic research and writing skills.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 0009 Cultural Perspectives (WSTC Prep) (10 Credit Points)
Subject Details (p. 3427) **Legacy Code:** 700212
This subject is designed to help students understand why people from diverse cultures and historical periods may think differently, behave differently and have vastly different worldviews. This subject is designed to help students understand more about themselves, their family and friends and the reasons why people do things in particular ways and believe the things that they do. It has a strong theoretical base but is also designed to encourage reflection.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: HUMN 0010 - Cultural Perspectives (UWSC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 0017 Key Ideas in Arts and Social Sciences (WSTC) (10 Credit Points)
Subject Details (p. 3429) **Legacy Code:** 900109
This subject explores some of the most influential ideas in the humanities and social sciences, including democracy, imperialism, romantic love and secularisation. The subject traces the origins of these ideas and their manifestation in the world today. The subject will equip students with the ability to identify and evaluate some of the central ideas underpinning public discussion on a range of political and cultural issues today. In addition, it will provide students with a solid foundation of cultural and historical knowledge which is assumed knowledge in many University level subjects.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: HUMN 0015 - History of Western Thought (UWSCFS) HUMN 0016 - Key Ideas in Arts and Social Sciences (UWSCFS)
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 0018 Literacy for Tertiary Studies (WSTC) (5 Credit Points)
Subject Details (p. 3429) **Legacy Code:** 900047
The University Foundations Studies Literacy for Tertiary Studies course aims to develop and consolidate some key academic skills which will assist students, especially those with limited exposure to quantitative and analytical study, successfully complete their Foundation Studies and future undergraduate study.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 0019 Studies of Society (WSTC) (10 Credit Points)
Subject Details (p. 3430) **Legacy Code:** 900091
This subject aims to help students develop an understanding and appreciation of Australian society. The subject will provide general information and familiarise students with key structures, events, concepts and terminology used in relation to Australian's modern society. At the end of this subject, students should have greater knowledge and understanding on Australia's history, governmental and political systems. They will learn about consumer laws, civilian rights and responsibilities as well as the composition of Australia's population and relevant variations and trends.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 0020 Understanding Academic Life (WSTC Prep) (10 Credit Points)
Subject Details (p. 3430) **Legacy Code:** 700281
This subject introduces students to the skills needed for success in academic life. It introduces students to a range of topics to facilitate and develop an increased confidence in fundamental academic skills, develop planning and goal setting skills necessary for university. This subject forms a pre-requisite to 700168 Tertiary Study Skills in Criminal and Community Justice, 700174 Tertiary Study Skills in Social Science and 700175 Tertiary Study Skills in Policing.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: HUMN 0003 - Academic Skills for the Social Sciences JUST 0001 - Academic Skills for Criminal and Community Justice HUMN 0002 - Academic Skills for Policing
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 0021 Understanding the Social Sciences (WSTC Prep) (10 Credit Points)
Subject Details (p. 3432) **Legacy Code:** 700234
The subject is designed to introduce students to the scientific basis of the social sciences, its basic research methodologies, and the impact social science has on social policy, social justice, and social change. The subject is also intended to provide students with an understanding of key disciplines that comprise the social sciences in order that students can make an informed choice about majors and sub-majors when they progress to a Bachelor degree. The subject will also provide students with an opportunity to acquire and apply basic research and digital literacy skills.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1001 Advanced Standing for Ancient History 110 (10 Credit Points)
Subject Details (p. 3433) **Legacy Code:** 102450
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1007 Brave New World: Negotiating Social Change in the 21st Century (10 Credit Points)
Subject Details (p. 3433) **Legacy Code:** 101886
The discipline of Sociology has witnessed a transformation reflecting significant changes in society and social life. This subject re-examines the sociological dimensions of a variety of social concerns, for example: environmental issues, global migration, health, religion, indigeneity, gender, ethnic conflict and sub-cultural groups and asks: In the 'brave new world' of contemporary society we need to re-evaluate the conventional sociological concern of social structure and inequality in the face of these broad social changes. This subject will examine the social transformations which characterise contemporary social life; in particular the pace of social change and the implications of social media. In exploring these social concerns the links are drawn between more recent theoretical constructs and the more traditional focus on national social structures and inequalities. The subject will place special emphasis on concepts such as risk, individualism and uncertainty.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1008 Cities: Introduction to Urban Studies (10 Credit Points)
Subject Details (p. 3434) **Legacy Code:** 101589
This subject is a keystone in the Geography and Urban Studies major. It aims to introduce students to the major urban challenges that will shape our society in the future and to the major substantive concerns in the field of urban management and planning It will develop students' understanding of how their own urban experiences are shaped by broader historical, cultural, economic, and social forces, and will enable students to compare the Australian urban context and issues with those in other world regions.
Level: Undergraduate Level 1 subject
Equivalent Subjects: LGYA 1336 - The Urban Context
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1010 Contemporary Society (Advanced) (20 Credit Points)
Subject Details (p. 3435) **Legacy Code:** 101516
Contemporary Society introduces students to central issues in social analysis and a range of perspectives that have been used to understand the social world. It provides them with a theoretical grounding in the central concepts and methods of social theory through an encounter with problems raised when social theory directly engages with practical problems such as racism, environmentalism and inequality.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1012 Contextualising Community Development Within Indigenous Australia (10 Credit Points)
Subject Details (p. 3435) **Legacy Code:** 102306
This subject provides students with the understanding and context for working collaboratively with Aboriginal and Torres Strait Islander peoples in the professional practice of community and social development. Students will learn the core concepts of community development theory and practice in Australian and international contexts, and will then apply them within the context of Indigenous Australia in light of the history of colonisation, the Stolen Generation, self-determination, and reconciliation. Emphasis is placed on ethical standards for Community Work practice and principles for working with Aboriginal and Torres Strait Islander peoples.
Level: Undergraduate Level 1 subject
Equivalent Subjects: HUMN 1014 - Contextualizing Indigenous Australia (Block Mode) HUMN 1013 - Contextualising Indigenous Australia (Day Mode) LGYA 6068 - Indigenous Australia Back to the Future
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1013 Contextualising Indigenous Australia (Day Mode) (10 Credit Points)
Subject Details (p. 3436) **Legacy Code:** 101751
This subject will provide a comprehensive overview of Indigenous Australian cultures, histories and identities. The scope of the subject spans pre-colonisation to the twenty-first century across Australia and all relevant fields of study. A cross-section of institutional, community and popular culture contexts will be explored through flipped mode of delivery supported by face to face tutorials. This body of knowledge will provide a context for various professions and discussions. Students will have the exciting opportunity to hear from a diverse range of Indigenous educators from academics to artists through to performers and community elders. A broad understanding of Indigenous Australia will position students to be advocates for change in contemporary Australia.
Level: Undergraduate Level 1 subject
Equivalent Subjects: LGYA 6068 - Indigenous Australia Back to the Future
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1015 Development and Sustainability (10 Credit Points)
Subject Details (p. 3437) **Legacy Code:** 101572
The subject introduces the basic concepts relating to sustainability and development, and explores their relevance to real-world situations at the local, national, and global levels. The causes of unsustainability as well as their short-term and long-term effects on society and the environment will be evaluated. Students will analyse, using appropriate sustainability indicators and social change theories, a social change initiative (i.e., program, project, policy) designed to integrate the socio-economic, cultural and environmental dimensions of sustainability within the context of a specific developmental focus (e.g. poverty alleviation, gender equality, human/social development, heritage conservation, biodiversity, tourism, green accounting, sustainable livelihoods). Students will engage in problem-based learning skills in order to critically analyse and discuss current issues in development, and provide solutions to sustainability.
Level: Undergraduate Level 1 subject
Equivalent Subjects: HUMN 1040 Peace Sustainability and World Futures
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1016 Different Ways of Being in the World: Introduction to Social Anthropology (10 Credit Points)
Subject Details (p. 3438) **Legacy Code:** 102344
The key and foundational focus of Social Anthropology is the relationship between people and their cultures. This subject provides an introduction to key concepts, methods and theories of classical and contemporary Social Anthropology. It will guide the students to an informed and critical understanding of the nature and extent of human diversity and differences, as well as the similarities which unite us as people. The subject has two parts. The first part introduces students to the history and scope of Social Anthropology through selected work of some classical anthropologists, introducing key concepts and conceptual frameworks. The second part is designed around selected case studies of Indigenous Peoples in Australia, the Asia Pacific, and the Americas, providing the students with critical insight into the application of anthropological theory and the epistemological contribution of the discipline of Social Anthropology.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1017 Everyday Life (10 Credit Points)
Subject Details (p. 3439) **Legacy Code:** 100897
This subject introduces students to key themes and issues in the study of everyday life. It draws on different disciplinary areas - especially anthropology, sociology and cultural studies - and different theoretical and methodological perspectives to examine the ways cultural practices and meanings are used to shape human identities and societies in everyday life. It will focus on rituals and routines in the different spaces of everyday life, and the ways these contribute to the production of local worlds and the key cultural categories that give meaning to these worlds. It will include a focus on how we research everyday life.
Level: Undergraduate Level 1 subject
Equivalent Subjects: LGYB 0187 - Introduction to Cultural Studies
HUMN 1018 - Everyday Life (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1018 Everyday Life (WSTC) (10 Credit Points)
Subject Details (p. 3440) **Legacy Code:** 700135
In Term 3, 2022 this subject replaced by HUMN 1067 - Introduction to Culture and Society (WSTC). This subject introduces students to key themes and issues in the study of everyday life. It draws on different disciplinary areas - especially anthropology, sociology and cultural studies - and different theoretical and methodological perspectives to examine the ways cultural practices and meanings are used to shape human identities and societies in everyday life. It will focus on rituals and routines in the different spaces of everyday life and the ways these contribute to the production of local worlds and the key cultural categories that give meaning to these worlds. It will include a focus on how we research everyday life.
Level: Undergraduate Level 1 subject
Co-requisite(s): Students enrolled in the combined DiplomaBachelor courses listed below must pass all College Preparatory units listed in the course structure before progressing to the Year Two units
Equivalent Subjects: HUMN 1017 Everyday Life
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1026 Global Structures, Local Cultures (10 Credit Points)
Subject Details (p. 3441) **Legacy Code:** 102345
Globalisation has created a world of convergence and, at the same time, of division. Nations appear now to be less sovereign and more limited, as their political, economic and cultural systems become enmeshed within, and in some instances subordinate to, a world system. Similarly, certain cultural styles, from the choice of footwear to neo-liberal politics, have become part of a global culture. However, while we as citizens are becoming increasingly international, we as humans are looking for meaning in smaller, local, communities. Globalisation has not, it seems, created an homogenous world culture, but rather, a world in which citizens participate in, and identify with, both global and local cultures. This subject traces the emergence of a global society and culture and, through the use of case studies drawn from throughout the world, examines the links between global structures and local cultures.
Level: Undergraduate Level 1 subject
Equivalent Subjects: HUMN 1024 - Global Structures Local Cultures
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1028 Human Rights, Peace and Development (10 Credit Points)
Subject Details (p. 3442) **Legacy Code:** 101573
The Universal Declaration of Human Rights (UDHR) was written in response to the atrocities of World War II. Since its ratification, the UDHR has been a 'roadmap' for peace, forming the basis for international responses to conflicts, poverty and disadvantage. This subject examines and critiques the concept of human rights. It will be shown how differentials of political and economic power between countries and groups within countries are used to prioritise and preference different rights so as to justify selective humanitarian efforts in the initial phases of peace-making and the policy requirements for peace-building in human social, economic and cultural development.
Level: Undergraduate Level 1 subject
Equivalent Subjects: HUMN 1033 - Inequality and Human Rights
HUMN 1029 - Human Rights Peace and Development (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1029 Human Rights, Peace and Development (WSTC) (10 Credit Points)
Subject Details (p. 3443) **Legacy Code:** 700158
The Universal Declaration of Human Rights (UDHR) was written in response to the atrocities of World War II. Since its ratification, the UDHR has been a "roadmap" for peace, forming the basis for international responses to conflicts, poverty and disadvantage. This subject examines and critiques the concept of human rights. It will be shown how differentials of political and economic power between countries and groups within countries are used to prioritise and preference different rights so as to justify selective humanitarian efforts in the initial phases of peace-making and the policy requirements for peace-building in human social, economic and cultural development.

Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1039 Modern European History and Politics (10 Credit Points)
Subject Details (p. 3444) **Legacy Code:** 102000
This subject introduces students to the major events and ideas that have shaped Europe in the late modern period. There is a strong focus on the dramatic events of the twentieth century following the demise of empire, and the subsequent rise of competing nationalisms and radical politics. The subject is concerned equally with the cultural and social contexts in which these events occurred. Students will study the diverse ways in which historians have approached the history of the twentieth century from the study of high politics to the focus on daily life. Methodological questions that will be addressed include the relative role of individual agency and of structural constraints in explaining historical change. The subject will encourage students to evaluate the period as a whole, drawing on scholarship which engages the modernity - democracy - violence nexus.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1041 People, Place and Social Difference (10 Credit Points)
Subject Details (p. 3445) **Legacy Code:** 102170
This subject focuses on the local experiences of cultural and socio-economic difference. This includes applied social science approaches to inequality, diversity, community, sense of place, and environmental sustainability in the urban setting. There is an emphasis upon spatial literacy for social scientists (fieldwork, mapping, data analysis and place description).
Level: Undergraduate Level 1 subject
Equivalent Subjects: LGYA 1337 - Geography of Urban and Regional Development HUMN 1045 - The Geographies of Social Difference (UWSC) HUMN 1044 - The Geographies of Social Difference HUMN 1042 - People Place and Social Difference (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1042 People, Place and Social Difference (WSTC) (10 Credit Points)
Subject Details (p. 3447) **Legacy Code:** 700159
This subject focuses on the local experiences of cultural and socio-economic difference. This includes applied social science approaches to inequality, diversity, community, sense of place, and environmental sustainability in the urban setting. There is an emphasis upon spatial literacy for social scientists (fieldwork, mapping, data analysis and place description).
Level: Undergraduate Level 1 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1043 Personal Identities in Professional Practice (10 Credit Points)
Subject Details (p. 3449) **Legacy Code:** 102308
In this subject students examine their own personal identity as a context for understanding Aboriginal and Torres Strait Islander clients in professional practice. Students will examine the constructions and meanings of Indigenous identity and compare non-Indigenous theories of identity. Research and presentation skills will be developed to create and describe a family tree. The subject will also focus on key social and political issues that have impacted on the lives and identities of Aboriginal and Torres Strait Islander peoples and implications for practice.
Level: Undergraduate Level 1 subject
Equivalent Subjects: HUMN 1050 - Who do You Think You Are? (Block Mode) HUMN 1051 - Who do You Think You Are? (Day Mode)
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1048 Understanding Islam and Muslim Societies (WSTC) (10 Credit Points)
Subject Details (p. 3449) **Legacy Code:** 700160
This is an introductory level subject that forms part of the Islamic Studies major. The subject will contribute to the development of sound disciplinary expertise in the academic study of Islam - historical and sociological. The subject will familiarise students with critical approaches to the study of Islam that touch on its origins and development, formation of traditions, social structures and institutions as well as familiarising students with issues regarding Islam in the Western context. The subject will assist students to develop cross-cultural awareness and interaction, communication and interpersonal skills, inventiveness and a capacity for independent thinking and analysis and problem solving skills.
Level: Undergraduate Level 1 subject
Equivalent Subjects: HUMN 1047 - Understanding Islam and Muslim Societies
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1049 Understanding Visual Culture (10 Credit Points)
Subject Details (p. 3450) **Legacy Code:** 101979
Visual media are a major feature of everyday life in contemporary society. The circulation of images shapes our sense of who we are individually and collectively; how we move through the world; and the possibilities that exist for enacting social change. This subject introduces students to the histories and theories of visual culture, from painting and photography, through cinema and television, to digital media, including social media and user-generated content. Students will gain practical skills in analyzing visual and audiovisual texts as well as a comprehensive understanding of the role of visual culture in the production and maintenance of power relations. These skills are crucial to engaging critically with contemporary culture.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1051 Who do you think you are? (Day Mode) (10 Credit Points)
Subject Details (p. 3451) **Legacy Code:** 101762
This subject is available to all Undergraduate students who have open electives. Who do you think you are? will provide students practice in the analysis of historical documents, family narratives, autobiography, political and social issues around a project that will give a context for their own personal story. Students will develop skills in oral history work, locating and retrieving archival documents and compiling their own 'family tree'. Students will also develop skills in practising speaking and writing genre appropriate to their own family history. An introduction to the theory of identity and identification will enable students to appreciate the complexities of becoming.
Level: Undergraduate Level 1 subject
Co-requisite(s): HUMN 1013
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1052 Australian Politics and Active Citizenship (10 Credit Points)
Subject Details (p. 3452) **Legacy Code:** 102738
We live in an increasingly interconnected world where international trade, foreign policy, digital communication and flows of migrants and cultures across borders appear to undermine the importance of national communities. Despite this, everyday life is still profoundly influenced by the decisions which national governments make and the powers they exercise. This subject introduces Australian political institutions, processes and contemporary issues. It traces democracy beyond Parliamentary representation to encompass active citizenship, through which public opinion is formed and expressed. Students will identify key political issues in contemporary Australia, understand how political institutions respond, and develop the skills to contribute to public debates.
Level: Undergraduate Level 1 subject
Equivalent Subjects: HUMN 1005 - Australia and the World HUMN 1006 - Australia and the World (WSTC) HUMN 1055 - Australian Politics and Active Citizenship (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1053 Diversity, Language and Culture (10 Credit Points)
Subject Details (p. 3453) **Legacy Code:** 102736
The purpose of this subject is to equip students with skills to understand and navigate a culturally and linguistically diverse society, including that of Greater Western Sydney. Students will gain an historically informed, critical understanding of the meaning of culture, the impact of colonisation, indigenous Australian cultures, and of approaches to diversity, multilingualism and multiculturalism. They will explore the value of their existing and emerging skills in multilingualism and cross-cultural communication as tools to navigate a rapidly changing global environment. Students will practise their intercultural communication skills in a team setting through interactive learning activities and group work.
Level: Undergraduate Level 1 subject
Equivalent Subjects: HUMN 1009 - Contemporary Society HUMN 1011 - Contemporary Society (WSTC) HUMN 1056 - Diversity Language and Culture (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1054 When Worlds Collide: European Empires and the World, c.1600-1950 (10 Credit Points)
Subject Details (p. 3454) **Legacy Code:** 102768
This subject provides an historical investigation of the interaction between European empires - specifically the British and the Dutch - and the Americas and Asia-Pacific region, from 1600-1950. It examines the combination of domination and cultural negotiation between colonisers and colonised, which included, among other processes, the trans-Atlantic slave trade. It examines both how peoples were managed as imperial subjects, and how they responded to this management. The subject explores both the effect of imperial rule on the colonised, and of empire upon the colonisers. It draws upon historical literature from a variety of sources and perspectives, and from European and Asian history.
Level: Undergraduate Level 1 subject

HUMN 1055 Australian Politics and Active Citizenship (WSTC) (10 Credit Points)
Subject Details (p. 3455) **Legacy Code:** 700294
We live in an increasingly interconnected world where international trade, digital communication and flows of migrants and cultures across borders appear to undermine the importance of national communities. Despite this, everyday life is still profoundly influenced by the decisions which national governments make and the powers they exercise. This subject introduces Australian political institutions, processes and contemporary issues. It traces democracy beyond Parliamentary representation to encompass active citizenship, through which public opinion is formed and expressed. Students will identify key political issues in contemporary Australia, understand how political institutions respond, and develop the skills to contribute to public debates.
Level: Undergraduate Level 1 subject
Equivalent Subjects: HUMN 1005 - Australia and the World HUMN 1006 - Australia and the World (WSTC) HUMN 1052 - Australian Politics and Active Citizenship
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1056 Diversity, Language and Culture (WSTC) (10 Credit Points)
Subject Details (p. 3457) **Legacy Code:** 700292
The purpose of this subject is to equip students with skills to understand and navigate a culturally and linguistically diverse society, including that of Greater Western Sydney. Students will gain an historically informed, critical understanding of the meaning of culture, the impact of colonisation, Indigenous Australian cultures, and of approaches to diversity, multilingualism and multiculturalism. They will explore the value of their existing and emerging skills in bilingualism and cross-cultural communication as tools to navigate a rapidly changing global environment. Students will practice their intercultural communication skills in a team setting through a field trip to a Western Sydney community.
Level: Undergraduate Level 1 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1057 Doing Sociology (10 Credit Points)
Subject Details (p. 3458) **Legacy Code:** 102787
With a focus on what it is that sociologists 'do' and why, this subject considers how sociology contributes to a better understanding of everyday life. That is, to the routine engagements, interactions and practices that make up our individual and social worlds. Where we live, what we consume, how we feel and the meanings we give our work, leisure, environments and relationships will all be analysed with reference to academic and popular content. Serving as an introduction to the discipline of sociology and its various sub-fields and methods, 'Doing Sociology' places emphasis on how sociological knowledge can be applied. In this way, the subject provides students with the opportunity to consider what they might do with sociology; how a sociological perspective might help them better understand the social world and contribute in a meaningful way to resolving contemporary social issues.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1058 Indigenous Landscapes (10 Credit Points)
Subject Details (p. 3459) **Legacy Code:** 102805
Indigenous Landscapes aims to explore 'traditional' Indigenous Australian ways of knowing landscape in contemporary, meaningful, and relevant ways. Specifically, the subject acknowledges and values pre-colonial Australian history and land-use practices. Content includes 'traditional' land management practices; cold-burning, protected area management, sustainable land use; cultural heritage and heritage landscapes, Sovereign land rights. This subject also aims to equip students with cultural competency in order to address issues of dispossession and disadvantage brought about by the historical destruction and disruption of ecological integrity.

HUMN 1059 When Worlds Collide: European Empires and the World, c.1600-1950 (WSTC) (10 Credit Points)
Subject Details (p. 3460) **Legacy Code:** 700299
This subject provides an historical investigation of the interaction between European empires-specifically the British and the Dutch-and the Americas and Asia-Pacific region, from 1600-1950. It examines the combination of domination and cultural negotiation between colonisers and colonised, which included, among other processes, the trans-Atlantic slave trade. It examines both how peoples were managed as imperial subjects, and how they responded to this management. The subject explores both the effect of imperial rule on the colonised, and of empire upon the colonisers. It draws upon historical literature from a variety of sources and perspectives, and from European and Asian history.
Level: Undergraduate Level 1 subject
Equivalent Subjects: CULT 1014 - The First Globalisation HUMN 1022 - Global History HUMN 1054 - When Worlds Collide European Empires and the World c1600-1950 HUMN 1023 - Global History (WSTC)

HUMN 1060 Introduction to Indigenous Australia: Peoples, Places and Philosophies (10 Credit Points)
Subject Details (p. 3462) **Legacy Code:** 102815
This subject introduces students to the rich diversity: past, present and future of Aboriginal and Torres Strait Islanders in Australia with emphasis placed on the importance of identity, diversity, representation and resilience. You will engage directly with Indigenous sources and learn to critically analyse content from Indigenous Standpoints. Presenting as a challenging and thought-provoking experience of Aboriginal and Torres Strait Islander peoples, places and philosophies, this subject provides a solid theoretical foundation of Indigenous perspectives for the knowledges and professional practices in your chosen field.
Level: Undergraduate Level 1 subject

HUMN 1061 Islam: Past, Present and Future (10 Credit Points)
Subject Details (p. 3463) **Legacy Code:** 102823
This is an introductory level subject that forms part of the Islamic Studies major. The subject will contribute to the development of sound disciplinary expertise in the academic study of Islam - historical, anthropological, and sociological. The subject will familiarise students with critical approaches to the study of Islam that touch on its origins and development, formation of traditions, social structures and institutions, and with issues regarding Islam in the Western context. The subject will aid students in developing cross-cultural awareness and interpersonal communication skills.
Level: Undergraduate Level 1 subject
Equivalent Subjects: HUMN 1047 - Understanding Islam and Muslim Societies HUMN 1048 - Understanding Islam and Muslim Societies (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1062 Introduction to Indigenous Australia: Peoples, Places and Philosophies (WSTC) (10 Credit Points)
Subject Details (p. 3464) **Legacy Code:** 700320
This subject introduces students to the rich diversity: past, present and future of Aboriginal and Torres Strait Islanders in Australia with emphasis placed on the importance of identity, diversity, representation and resilience. You will engage directly with Indigenous sources and learn to critically analyse content from Indigenous Standpoints. Presenting as a challenging and thought-provoking experience of Aboriginal and Torres Strait Islander peoples, places and philosophies, this subject provides a solid theoretical foundation of Indigenous perspectives for the knowledges and professional practices in your chosen field.

HUMN 1063 Critical and Systems Thinking (10 Credit Points)
Subject Details (p. 3465) **Legacy Code:** 800242
This subject is designed for high-achieving students enrolled in Bachelor of Creative Leadership or Advanced degrees. It enables students to develop high-level critical thinking skills that are essential for life-long career success. Students engage with key theoretical frameworks and concepts in critical and systems thinking using interdisciplinary approaches to enable them to think and act outside the silos of their disciplines. Throughout the subject, students are challenged to consider how they think as opposed to how they think they think (biases and heuristics). A clear understanding of the necessity of systems thinking approaches in leadership paradigms equips students to be the leaders of tomorrow.
Level: Undergraduate Level 1 subject
Equivalent Subjects: HUMN 1036 - Introduction to Critical Thinking
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1064 Digital Identities (10 Credit Points)
Subject Details (p. 3466)
This subject examines identity in a digitalising society. It asks questions such as: who are we becoming with digital technologies? How are digital experiences shaped by long standing social inequalities? Students learn about identities as the flows of data across formalised systems of governance and commerce, and as the ways we make ourselves in interactions with others in social media spaces. Pressing issues are explored such as online harm, privacy, surveillance, and human rights. Students reflect upon personal and professional digital identities, and reimagine digital technologies and social media for new possibilities of identity, equity and justice.
Level: Undergraduate Level 1 subject
Equivalent Subjects: BEHV 1009 Living Learning and Working on the Web
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1065 Diversity, Language and Culture (Block) (10 Credit Points)
Subject Details (p. 3467) **Legacy Code:** 500074
The purpose of this subject is to equip students with skills to understand and navigate a culturally and linguistically diverse society, including that of Greater Western Sydney. Students will gain an historically informed, critical understanding of the meaning of culture, the impact of colonisation, Indigenous Australian cultures, and of approaches to diversity, multilingualism and multiculturalism. They will explore the value of their existing and emerging skills in bilingualism and cross-cultural communication as tools to navigate a rapidly changing global environment. Students will practice their intercultural communication skills in a team setting through a field trip to a Western Sydney community.

HUMN 1066 Introduction to Culture and Society (10 Credit Points)
Subject Details (p. 3468) **Legacy Code:** 102913
Introduction to Culture and Society examines the ways culture - as both representation and practice - shapes individual and collective identities. It will focus on the rituals and routines of everyday life, and their connection to our wider social relationships. The subject will also explore inequality both in Australia and globally, the social structures that generate this inequality and the cultural processes by which we mark status and social distinction.
Level: Undergraduate Level 1 subject

HUMN 1068 Intersectionality: Identity, Diversity and Difference (WSTC) (10 Credit Points)
Subject Details (p. 3470)
This subject explores various relevant theories, narratives and concepts that underpin social scientific scholarship. Students will gain critical insight into ideas such as identity, culture, structures of inequality and difference (e.g. such as gender, race, class, sexuality), and their intersections. With a focus on contemporary social life, the subject provides opportunity for students to consider current social issues and various macro and micro forces impacting social change on a social and spatial level. By exploring a range of key theories and concepts in the social sciences, students will gain knowledge and skills in how to analyse our social world – the world in which they will be working in the future as professionals – and thereby be in a position to more fully comprehend the world around them, its issues, problems, inequalities and injustices that they will be working with. The subject will prepare students with a range of skills relevant to scholarship in the social sciences, such as critical reading, sociological theorisation and analysis, as well as statistical and spatial literacy.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1069 Human Rights and Community Action (WSTC) (10 Credit Points)
Subject Details (p. 3471)
In this subject, students engage with the concepts and philosophy of human rights and explore how these ideas influence the Australian experience within legal, governmental and social service institutions. Students will be challenged to consider if vulnerable groups have their human rights promoted or undermined by current practice and identify a human rights issue to address through a community action plan. Students will gain subject relevant skills linking theory to practice in the process of critical reflection and exercising statistical literacy.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1070 Indigenous Australia: People, Places and Philosophies (WSTC) (10 Credit Points)
Subject Details (p. 3472)
This subject introduces students to the rich diversity: past, present and future of Aboriginal and Torres Strait Islanders in Australia with emphasis placed on the importance of identity, diversity, representation and resilience. You will engage directly with Indigenous sources and learn to critically analyse content from Indigenous standpoints. Presenting as a challenging and thought-provoking experience of Aboriginal and Torres Strait Islander peoples, places and philosophies, this subject provides a solid theoretical foundation of Indigenous perspectives essential for the knowledge and professional practices in your chosen field.

HUMN 2011 Ancient Western Culture: Periclean Athens (10 Credit Points)
Subject Details (p. 3474) **Legacy Code:** 100244
The Athens of Pericles is studied from three perspectives: philosophy, politics, and history. The use of reason and rhetoric is examined through the works of some pre-Socratics, Sophists and Socrates. The focus on philosophy and politics will be placed in the context of the history of the city-state and democratic citizenship.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2012 Anthropologies of the Everyday (10 Credit Points)
Subject Details (p. 3475) **Legacy Code:** 102347
In 2021, this subject replaced by 102844 - Society, Culture and Human Diversity. Although people's lives vary significantly depending on ethnographic context, it is also through everyday practices and rituals that the universality of the human condition becomes most obvious. Close studies of how people create a living and make meaning of their everyday experiences in various contexts can thus provide valuable lessons about cultural difference as well as about what it means to be human, and is consequently a core aspect of anthropological inquiry. In this subject students engage with this overarching theme via ethnographic case studies as well as through inquiries into their own everyday lives.
Level: Undergraduate Level 2 subject
Pre-requisite(s): HUMN 1016
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2014 Civil Society in Contemporary China (10 Credit Points)
Subject Details (p. 3476) **Legacy Code:** 101968
This subject is intended to give students an understanding of the social development of the People's Republic of China (PRC). It will engage with some of the key concepts that scholars have utilised to understand social changes. In this vein, the subject will consider China's socio-political transformation from a civil society perspective. It will consider a range of stakeholders - from non-governmental organisations to trade associations - and examine the events that have contributed to the development of China's civil society.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2015 Community and Social Action (10 Credit Points)
Subject Details (p. 3476) **Legacy Code:** 101595
Dismantling oppressive and complex forms of disadvantage and inequality are social justice and human rights issues demanding collective action. Activism is not solely about disruption and disobedience. This subject focuses on local, national and global social movements, the use of digital technologies and differing forms of activism using theories of social change. We identify and reflect on diverse perspectives, challenging normative constructs between individual and structural explanations of inequality and explore tactics and strategies adopted by activists, from the early 20th century through to contemporary campaigns. Students are enabled to take part in meaningful ways as active change agents through design, planning and participation in a social action campaign, thereby building knowledge and skills in community engagement, relationship building and the strategies and methods involved in bringing about positive social change.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYA 1286 - Education for Social Action
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2017 Complex Emergencies and International Guidelines (10 Credit Points)
Subject Details (p. 3477) **Legacy Code:** 102367
In 2023, this subject replaced by HUMN 3116 - Complex Emergencies and International Guidelines. Over the last five decades, the world has experienced a significant number of disasters, which have occurred in many different forms including natural (e.g. Tsunami or drought) and human-induced (e.g. wars or ethnic conflicts), leading to an unplanned exponential increase in the number of international non-government organisations. This subject examines the causes and consequences of disasters and the application of international guidelines governing humanitarian responses. It provides an outline of theoretical approaches to the understanding of the political aspects of emergencies and introduces real-life case studies that aim to engage students in critical thinking and improve their knowledge of the core humanitarian standard on quality and accountability; the humanitarian charter and minimum standards; and the challenges related to interagency coordination in emergencies
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2018 Cultural and Social Geographies (10 Credit Points)
Subject Details (p. 3478) **Legacy Code:** 101590
Examines the nexus between society, culture and place. Considers contemporary social and cultural planning issues including: local community relations, place management, place redefinitions, ethnic concentration, cultural precincts, and the spatial politics of gender and sexuality. The roles of cultural products in carrying spatial information and reinforcing identity are examined. Introduction to cultural and social geography, and developments in cognate fields of cultural studies and anthropology. Key theories of identity. Case studies range across ethnicity, religion, age, gender, sexuality, class and nationalism. The analysis and assessment advances an appreciation of social and cultural difference and social justice.
Level: Undergraduate Level 2 subject
Equivalent Subjects: HUMN 2019 - Cultural and Social Geographies (UWSC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2020 Digital Humanities and Research Methods (UG) (10 Credit Points)
Subject Details (p. 3479) **Legacy Code:** 102425
This subject investigates the methodological possibilities of digital technologies for interdisciplinary humanities and social sciences research. It covers several major digital research methods, exploring previous applications and examining their orientations and implications. Digital research methods and applications may include digitisation, online curation, visualisation, network analysis, geographical information systems, data mining and simulation. In the context of these, the subject will probe histories of technology and knowledge production, the evolution of digital texts and practices, and issues in contemporary culture such as digital design, gamification, virtual identity, and digital rights.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2021 Doing Business in China (10 Credit Points)
Subject Details (p. 3480) **Legacy Code:** 101857
This subject is primarily aimed at acquainting undergraduate students with the academic theory and debates surrounding China's business etiquette and its globalizing economy. Drawing on a wide range of English-language studies, subject lectures will cover in broad strokes the historic background of the economic reforms carried out in China over the last three decades, as well as their societal implications. They will discuss, for example, the evolution of corporate law and property rights in the PRC since 1949, and the underlying differences and interdependence between the Chinese and Australian economies.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2022 Emergency Field Operations: Supply Management and Logistics (10 Credit Points)
Subject Details (p. 3480) **Legacy Code:** 102368
In 2023, this subject replaced by HUMN 3119 - Emergency Field Operations Supply Management and Logistics. This subject will equip students with the required skills to assess organisational capacity to respond to disasters and other complex humanitarian emergencies. The subject will cover logistical frameworks and tools for planning, the sustainable deployment of goods and services, and monitoring and evaluating the effectiveness of local and global supply chains. It will discuss the challenges, ethical, and political dimensions of supply chains and contingency plans in emergency and disaster response contexts.
Level: Undergraduate Level 2 subject
Co-requisite(s): HUMN 2017
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2023 Empire: European Colonial Rule and its Subjects, 1750-1920 (10 Credit Points)
Subject Details (p. 3481) **Legacy Code:** 100861
A historical investigation of the experience of the 19th century European empires from the perspectives of both the colonised and colonisers. It examines the combination of domination and cultural negotiation between colonisers and colonised. It examines both how peoples were managed as imperial subjects and how they responded to this management. It looks both at the effect of imperial rule on the colonised, and of empire upon the colonisers. It draws upon historical literature from a variety of sources and perspectives, and within European and Asian history. The focus is chiefly, though not exclusively, upon the British empire and its subject peoples.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYB 0089 - The World Encircled 1100 - 1600
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2024 Ethnographies of Southeast Asia and the Pacific (10 Credit Points)
Subject Details (p. 3481) **Legacy Code:** 102346
This subject will introduce students to ethnographic field study through a close examination of the anthropology of two regions with which Australia is geographically and politically aligned; the Pacific Islands and South-east Asia. Drawing upon classic and contemporary ethnography the subject will provide opportunities for comparative and trans-historical studies of how cultures in these regions have been constructed and changed in relation to larger global dynamics. It will also provide an insight into the ways in which anthropological theory is developed in the context of attempts to explain and interpret cultural difference. Key topics of study, explored through case studies, will include the colonial experience, traditions and modernities, nations and nationalism, transnationalism, religion, social conflict, and material cultures. The subject will include ethnographic films.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2025 Families and Intimate Life (10 Credit Points)
Subject Details (p. 3482) **Legacy Code:** 102143
This subject will critically examine sociological perspectives on families and intimate life, building on the approaches and theories introduced in the first year of Sociology studies. The familiarity of families and intimate relationships will be thrown into question. Students will be asked to examine their beliefs, unpack myths of the 'naturalness' of family, and question the 'personal'. Families and intimate relationships will be viewed as part of the wider social structure, their constitutions shaped by culture, economies, social policy, technology and globalisation. The subject will demonstrate the historical and cultural specificity of the nuclear family and its role in the creation and reproduction of social inequality and social difference.
Level: Undergraduate Level 2 subject
Equivalent Subjects: HUMN 2052 - Sociology of the Family HUMN 2016 - Comparative Studies of Families and Kinship
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2026 Growing the Indigenous Economy (10 Credit Points)
Subject Details (p. 3484) **Legacy Code:** 102307
In Growing the Indigenous Economy, we examine Australia's Indigenous economies and their dynamics. Students are challenged to reflect on the significant contribution Aboriginal and Torres Strait Islander peoples have made and continue to make to Australia's economy. They are also challenged to rethink the politics of the welfare economy as it relates to Aboriginal and Torres Strait Islander peoples; whilst reviewing relevant community development frameworks. Students are introduced to a number of enterprise development case studies, for example: The Arts, mining and land development, environmental and cultural tourism, sport, and small business.
Level: Undergraduate Level 2 subject
Equivalent Subjects: HUMN 2047 - Revaluing Indigenous Economics (Block Mode) HUMN 2048 - Revaluing Indigenous Economics (Day Mode))
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2027 Health, Illness and Biomedicine: A Sociological Perspective (10 Credit Points)
Subject Details (p. 3484) **Legacy Code:** 101610
The Sociology of Medicine and Health Care starts from the basic premise that illness and health are social as well as biological processes. Traditional areas of the discipline are explored and in each case their applicability to public health is stressed. At the same time, an important goal is to suggest how that field is being redefined and reinvigorated by social and cultural studies of science and technology. The theoretical perspectives and substantive issues raised and developed to study them are critically examined. The provision and organisation of health care are examined with emphasis on the social and political context in which public health is pursued and ill health treated within Australia.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYA 1357 Sociology of Medicine and Health Care
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2028 Identity and Belonging (10 Credit Points)
Subject Details (p. 3486) **Legacy Code:** 101612
Identity and belonging are foundational concepts in sociology. This subject commences with an overview of the ways in which these concepts are understood in the social sciences and how these understandings have been impacted more recently by processes of globalisation. Through engagement with films, documentaries and academic texts the subject explores different modes and sites of identity and belonging as they circulate on both local and global scales. Specifically, we will examine topics like gender and sexuality, home and neighbourhood, the nation state and nationality, social class, consumption, work and leisure, ethnicity, youth cultures and new media. The subject equips students with the concepts and theories necessary for an understanding of social continuity and social change and encourages them to reflect on their own identities and social and cultural positionings.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2030 Islam In the Modern World (WSTC) (10 Credit Points)
Subject Details (p. 3487) **Legacy Code:** 700162
This subject introduces students to Islam and its adherents within contemporary global context. It looks at key Muslim intellectuals from the 19th Century until the present and examines their attempts to come to terms with modernity as a Western project, while addressing critical issues facing Islam. Areas for consideration include: renewal and reform; the impact of colonialism and globalisation on Muslim discourse; independent judgement (ijtihad) versus emulation (taqlid); and issues associated with civil society. Students will also explore the challenge of shaping a Muslim identity in the modern world - in the context of key Muslim institutions and social movements.
Level: Undergraduate Level 2 subject
Equivalent Subjects: HUMN 3055 - Islam in the Modern World
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2031 Islam in the Modern World (10 Credit Points)
Subject Details (p. 3488) **Legacy Code:** 102294
This subject introduces students to Islam and its adherents within contemporary global context. It looks at key Muslim intellectuals from the 19th Century till the present and examines their attempts to come to terms with modernity as a Western project while addressing critical issues facing Islam. Areas for consideration include: renewal and reform; the impact of colonialism and globalisation on Muslim discourse; independent judgment (ijtihad) versus emulation (taqlid); and issues associated with civil society. Students will also explore the challenge of shaping a Muslim identity in the modern world in the context of key Muslim institutions and social movements.

HUMN 2032 Issues in World Development: Rich World, Poor World (10 Credit Points)
Subject Details (p. 3488) **Legacy Code:** 101331
This subject introduces students to the field of international development, where the divide between the rich world and poor world takes a centre stage. While development has created prosperity around the world, it is not without discontents. Social and economic inequality at the global level is a real problem and has been increasing. The 'developed' and 'developing' world paradigm will be critically examined. Students will be equipped with theories and practicum examining development, underdevelopment and their related issues within a contemporary political, economic and social framework. Students will also have exposure to current global development debates such as poverty, global inequality, sustainable development, democracy and security.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYA 7635 - Issues in Third World Development HUMN - 2033 Issues in World Development Rich World Poor World (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2033 Issues in World Development: Rich World, Poor World (WSTC) (10 Credit Points)
Subject Details (p. 3489) **Legacy Code:** 700267
This subject introduces students to the field of international development, where the divide between the rich world and poor world takes a centre stage. While development has created prosperity around the world, it is not without discontents. Social and economic inequality at the global level is a real problem and has been increasing. The 'developed' and 'developing' world paradigm will be critically examined. Students will be equipped with theories and case studies examining development, underdevelopment and their related issues within a contemporary political, economic and social framework. Students will also have exposure to current global development debates such as poverty, global inequality, sustainable development, democracy and security.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYA 7635 - Issues in Third World Development HUMN 2032 - Issues in World Development Rich World Poor World
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2034 Keeping the Past (10 Credit Points)
Subject Details (p. 3490) **Legacy Code:** 100001
Legislation requires the preservation of natural, built and movable heritage, but choices about what to keep often produce controversy and reveal starkly varying opinions about what is historic. From the choice of people commemorated in statues to modest buildings on the site of new developments, local communities and central governments are divided about whose past is protected and praised. The historian's investigation of places and objects is an important part of the formal assessment process and may be part of controversial debates. Parramatta has a rich selection of heritage places. How does heritage fit in a modern CBD? Site visits around the city will identify archaeological and architectural heritage to promote discussions, museums will showcase objects from the past, documents preserved in archives will offer insights and historical research techniques will help to answer the questions "What should be kept from the past?" and "Why should it be kept?"
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYA 9196 - Keeping the Past
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2036 Mangamai'bangawarra: Indigenous Science (10 Credit Points)
Subject Details (p. 3491) **Legacy Code:** 300959
This subject explores aspects of Aboriginal science and medical science in the treatment and prevention of illness. The subject has a particular focus on the knowledge of the local D'harawal People. The culture and history of Indigenous Australians is introduced to provide a contextual backdrop to the study of Indigenous medical remedies from eastern Australia, the deserts, and the tropics. To complement this study, Indigenous perspectives on the seasons, weather and land management will be studied.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2037 Peace-Making and Peace-Building (10 Credit Points)
Subject Details (p. 3492) **Legacy Code:** 101575
The concept of Peace is more than just an absence or cessation of conflict, but also the achievement of social justice and equitable standards of living. Humanitarian work/interventions in response to war and natural and human-made disasters that result in refugee crises are referred to as peace-making whilst the implementation of sustainable Community Development programs aimed at achieving the empowerment and improved standards of living for vulnerable groups is referred to as peace-building. This subject examines and critiques some of the strategies of peace-making and peace-building that have been adopted both within Australia and internationally.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2038 Pigments of the Imagination (10 Credit Points)
Subject Details (p. 3493) **Legacy Code:** 101752
This subject is available to all Undergraduate students who have open electives. Pigments of the Imagination challenges the accepted view that there is such a thing as 'race' based on skin colour and that identity is based on it. This subject will encourage students to consider their own definitions of race and explore the view that it is an imaginary concept. Students will examine the various ways race as an imaginary concept permeates our education practices and cultural representations influencing the construction of racially classified positions for Indigenous Australians as well as all Australians. Students will be encouraged, by critically analysing a range of cultural texts to re-imagine Indigenous and Non-Indigenous relations through flipped mode of delivery supported by face to face tutorials.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2039 Political Terror (10 Credit Points)
Subject Details (p. 3494) **Legacy Code:** 101797
Since the terrorist attacks of 11 September, 2001, threats of terrorism have been entrenched in both headlines and the collective psyche. Across the globe, terrorism, anti-terrorism and the politics of fear are influential factors in the formulation of domestic and foreign policies. The current wave of terror and counter-terror raises important questions. What do we mean by terror? Is the war on terror really a war like no other? Is the current terrorist threat unprecedented? This subject will examine historical precedents and theories of terrorism.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2040 Politics of Sex and Gender (10 Credit Points)
Subject Details (p. 3494) **Legacy Code:** 100882
This subject provides an introduction to the study of the contemporary politics of sex and gender. Students study key concepts and learn to apply these concepts in the analysis of current issues. Concepts covered include the meanings of sex, gender and sexuality; biology and social constructionism; gendered bodies; doing gender; equality and difference. The concept of intersectionality - how gender intersects in complex relationships of power with other differences such as ethnicity, sexuality, dis/ability and class - is central to this area of study. The subject explores the meaning and potential for social change for a more equitable society and the obstacles to that. Strategies examined range from the use of targets and quotas, to social and cultural activism. Students have the opportunity to explore areas of personal and scholarly interest.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYB 0160 - Sex Gender and Social Relations
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2044 Representing Everyday Life in Literary and Visual Cultures (10 Credit Points)
Subject Details (p. 3495) **Legacy Code:** 101917
This subject explores how the realm of everyday life has been imagined and represented in a range of literary traditions and visual and media cultures. It examines what we understand by this concept, realist and experimental approaches to its representation, and how everyday life is shaped by various historical, social and cultural factors (e.g. technology, gender, class, war). With a focus on modern and contemporary texts and contexts, students will study primary works in relation to key theories of the everyday. Possible topics include: Victorian realism, Surrealism, stream of consciousness narration, social documentary photography, social realist cinema, postmodern narrative, blogs.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2046 Researching Culture (10 Credit Points)
Subject Details (p. 3496) **Legacy Code:** 101906
This subject introduces students to the diverse field of cultural research. It outlines and explains qualitative research methods and methodologies used by cultural researchers. Tutorials and assessment tasks involve 'hands-on' activities designed to familiarise students with the research process and research practices that explore taken-for-granted aspects of everyday life such as interviews, focus groups and observation based research; as well as sensory research, the use of diary methods, and the critically important ethical dimensions of social and cultural research. Through completion of this subject, students will gain critical literacies in creating and analysing a range of qualitative data.
Level: Undergraduate Level 2 subject
Pre-requisite(s): HUMN 1017 OR
HUMN 1049
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2048 Revaluing Indigenous Economics (Day Mode) (10 Credit Points)
Subject Details (p. 3497) **Legacy Code:** 101753
Revaluing Indigenous Economics will examine Australia's Indigenous economy and its dynamics. It will challenge students to reflect on the significant contribution Indigenous Australians have made and continue to make to our growing economy. It will also challenge students to rethink the politics of the welfare economy as it relates to Indigenous Australians. Students will be introduced to a number of enterprise development case studies for example, The Arts, Mining and Land Development, Tourism and the Environment, Sports and Small Business.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2050 Social Research Methods (Block Mode) (10 Credit Points)
Subject Details (p. 3498) **Legacy Code:** 101767
In this subject students are introduced to the research process and different approaches to research. Key research themes and concepts are examined, and students learn methods and techniques for gathering, analysing, and interpreting research data. The ethical and practical implications of research and the use of research results are discussed. Indigenous research issues are addressed, particularly for research with Aboriginal and Torres Strait Islander participants and communities.
Level: Undergraduate Level 2 subject
Equivalent Subjects: HUMN 2049 - Social Research Methods LGYA 7650 - Research and the Human Services (AREPMETRO)
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2053 The Economics of Cities and Regions (10 Credit Points)
Subject Details (p. 3499) **Legacy Code:** 101591
'Economics of cities and regions' introduces the major political-economic issues facing cities and regions. Class discussions investigate how political-economic forces (such as globalisation, structural change etc) shape the development of cities and regions. Class activities enable students to apply economic principles to urban and regional planning and policy decisions, and teach students to analyse the social and distributional impacts of policy and planning decisions.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYA 1283 - Urban Development Resource Allocation
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2056 The Racial State (10 Credit Points)
Subject Details (p. 3500) **Legacy Code:** 101990
Racism is often thought of as both primordial and pathological. Racist states, such as Apartheid South Africa or Nazi Germany, are usually considered to be exceptions rather than the rule and mainly a thing of the past. This subject examines the ways in which, despite the challenge to racism, race remains a fundamental organising idea in modern western states, one that has a direct affect on our everyday realities. We will examine how race is reproduced through politics, culture, socialisation and economic structures. We will consider the effects this has on individual and societal lived experience in complex post-immigration, postcolonial societies.
Level: Undergraduate Level 2 subject
Equivalent Subjects: HUMN 2063 - New Ethnicities Old Racisms
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2057 Tourism in Society (10 Credit Points)
Subject Details (p. 3500) **Legacy Code:** 101598
In 2023 this subject replaced by TOUR 2004 - Tourism and Festivals in Society. In this subject students approach tourism as a cultural and social phenomenon and tourism industries, tourist behaviour, the tourist experience and tourism impacts are examined through a socio-cultural lens. Considering tourism as an agent of social change, the subject explores the interplay between tourism, mobility and globalisation, tourism and development, and tourism and world events. The subject will also unpack some of the common motivations for leisure travel, explore the role of tourism in everyday life, and examine the interconnections between the media, consumer culture, visual culture and the tourist experience.
Level: Undergraduate Level 2 subject
Equivalent Subjects: HUMN 1046 - Tourism in Society (UWSC) LGYA 1264 - Tourism in Contemporary Society LGYB 8188 - Tourism Issues and Change
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2058 Urban Life/Urban Culture (10 Credit Points)
Subject Details (p. 3501) **Legacy Code:** 100291
Big cities can be frantic, difficult, polluted and often dangerous places in which to live. Yet cities also contain possibilities for social and cultural stimulation not available elsewhere. This subject traces the origins and development of modern cities in all of their complexity. It looks at how industrial cities emerged in Europe and Australia, and at the threat that uncontrolled urban growth posed to social order. We examine the conditions of urban life that promote alienation and anonymity, and how people overcome social fragmentation. There is discussion of modern cities - from those that sprawl, like Sydney, to the relatively compact and dense centres of Europe, the north-eastern United States and Asia. We look at the gendered nature of public space, and how class and ethnic tensions are played out in cities. Students read a range of texts on urban culture and society. These include classic works by writers like Friedrich Engels, George Simmel and Walter Benjamin, to the contemporary work of David Harvey, Richard Sennet and Mike Davis.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2061 Women with Muslim Identity (10 Credit Points)
Subject Details (p. 3502) **Legacy Code:** 101879
An exploration of perceptions of Muslim women and of the meaning and significance of Muslim identity for women today. Students will analyse ways in which Muslim women perceive themselves and are perceived by others in the context of contemporary Islamic revivalism, focussing on differences and relationships among various outsider's and insider's perceptions. A central focus will be the resurgence of the veil in the context of contemporary Islamic revivalism; Students will explore the meanings of veiling in the context of discussions and debates on the role of women, equality and freedom, cultural diversity, religious values and secularity.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2062 Youth Cultures and Moral Panics (10 Credit Points)
Subject Details (p. 3503) **Legacy Code:** 100298
Young people have long been the focus of social fears. Public figures regularly express concern about the disorder created by unruly youths, or the effects of change on young people. This is the case in relation to popular music, 'youth gangs', new technologies and other areas. This subject will consider how young people became defined as a problem by politicians, policy, the media and others. Resulting 'moral panics' represent social anxieties around economic, social and technological change, producing calls for 'solutions' which often entail repressive laws or policing. Students will examine a range of case studies from Australia and elsewhere.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2064 Responses to Disaster: School of Social Sciences Winter School (10 Credit Points)
Subject Details (p. 3504) **Legacy Code:** 102790
This elective subject, focused on "responses to disaster", is applicable to all undergraduate degree programs with an elective component in the School of Social Sciences. Students will undertake a 14-day international field trip where they will be immersed in a rich intercultural learning and student-centred environment. Students are given the opportunity to apply their discipline specific skills and knowledge in understanding how natural disasters impact various facets of a local community, and how these are managed in a real-world setting. Students must have a medical clearance letter and any requisite vaccinations. They should provide this letter to the Subject Coordinator prior to enrolment and departure.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2065 Self and Society (10 Credit Points)
Subject Details (p. 3504) **Legacy Code:** 102788
This core theory subject for sociology majors introduces students to traditional and contemporary debates in social thought and provides tools for sociological analysis. The subject outlines the development of sociological thought in the context of changing social realities and relations between the individual and society, with a particular focus on the formation of the Self. A number of theorists and theoretical areas are addressed, spanning over 150 years of evolving sociological analysis. This enables students to better grasp the relation between theory and application, the diversity of sociological analysis, as well as providing the capacity to think across a number of different sociological schools of thought.
Level: Undergraduate Level 2 subject
Incompatible Subjects: HUMN 3071 - Self and Society
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2066 Investigating and Communicating Social Problems (10 Credit Points)
Subject Details (p. 3505) **Legacy Code:** 102816
This subject builds interdisciplinary social science skills to investigate and engage with social challenges that impact contemporary society. Students are introduced to the methods and principles of research for community consultation, strengths assessment and capacity building. Data literacy skills will be developed, with a focus on understanding and creating qualitative and quantitative data and how they are used within contemporary society. Students will be asked to investigate and intervene in social challenges using ethical and evidence-based analyses. The subject is aimed to suit students who are pursuing either a research or occupational trajectory and assessments are tailored to discipline-appropriate learning.
Level: Undergraduate Level 2 subject
Equivalent Subjects: HUMN 2049 - Social Research Methods
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2067 History of the Ancient World (10 Credit Points)
Subject Details (p. 3507) **Legacy Code:** 102814
Students explore the rise and fall of major civilizations in the ancient world. The subject surveys empires from Europe to East Asia. The subject surveys the transition from hunter gatherers to the age of agriculture and the rise of city states, and vast empires with far-flung trading networks. It also looks at the impact of ancient pandemics, technology and alcohol, mythology, religion and philosophical ideas. The subject allows students to explore how ideas of nature and spirituality defined imperial power centres and how these empires in turn drove trade and created vast cultural zones that still impact the world today. Students will read and respond to the voices of the past and forge their own interpretation of the broad outline of the ancient world.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2068 Cultures of Southeast Asia and Oceania (10 Credit Points)
Subject Details (p. 3508) **Legacy Code:** 102843
This subject will introduce students to ethnographic field study through a close examination of two regions with which Australia is geographically and politically aligned; Oceania (the Pacific Islands) and South-east Asia. Drawing upon classic and contemporary ethnography the subject will provide opportunities for comparative and trans-historical studies of how cultures in these regions have been constructed and changed in relation to larger global dynamics. The subject will also provide an insight into the ways in which social theory is developed in the context of attempts to explain and interpret cultural difference. Key topics of study, explored through case studies, will include the colonial experience, tradition and modernities, nations and nationalism, transnationalism, religion, social conflict, and material cultures. The subject will include a close study of visual and virtual research methodologies.
Level: Undergraduate Level 2 subject
Equivalent Subjects: HUMN 2024 - Ethnographies of Southeast Asia and the Pacific
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2069 Society, Culture and Human Diversity (10 Credit Points)
Subject Details (p. 3509) **Legacy Code:** 102844
In this subject students will conduct comparative studies of how people create a living and make meaning of their everyday experiences in various contemporary contexts. By using cultural diversity as an analytical lens, students will engage with the broader questions about what it means to be human, how cultures change and adapt and how studies of human diversity can provide answers to many of the challenges of the future. Through case studies, critical analyses and self-reflection students will also examine how key subject themes such as cultural competence, ethnographic inquiry and comparativism are applied in anthropology and other key employment areas for social science and humanities graduates.
Level: Undergraduate Level 2 subject
Equivalent Subjects: HUMN 2012 - Anthropologies of the Everyday
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2070 First Peoples and Criminal Justice (10 Credit Points)
Subject Details (p. 3510) **Legacy Code:** 102916
How does colonialism underscore the foundational narratives, knowledges and operation of the legal and criminal justice institutions of colonised nations? Focusing primarily on the Australian context of colonial invasion and settlement, this subject explores the plight of Indigenous peoples and their severe over-representation in the Australian criminal justice system. Studying the impact of colonisation and exploring Indigenous narratives, students will critically examine issues faced by Aboriginal and/or Torres Strait Islander people and their experience of criminal justice in Australia. Overall, the subject will equip students with an understanding of the relationship between dominant colonial narratives of race and institutional racism, while considering how Indigenous knowledge can inform better social and criminal justice outcomes for Indigenous populations. Comparative examples of criminal (in)justice for Indigenous populations in other colonised nations will also be considered.
Level: Undergraduate Level 2 subject
Equivalent Subjects: CULT 2019 - First Peoples and Criminal Justice
Incompatible Subjects: WELF 2008 - Human Rights Human Services and the Law
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2071 Knowledge Journeys (10 Credit Points)
Subject Details (p. 3511) **Legacy Code:** 800240
This subject is designed for high-achieving students enrolled in the Bachelor of Creative Leadership or Advanced degrees. It examines sources of knowledge and how we learn. Students are supported to approach new knowledge as a journey of developing skills as independent, life-long, self-directed learners. Analysis of knowledge journeys of others, using creative enquiry, and Indigenous learning techniques, are key learning activities in the unit. A focus on knowledge and research journeys, rather than 'outcomes' alone, facilitates learning from mistakes in seeking solutions to real world problems. Fundamental research approaches will be considered and applied in the subject.
Level: Undergraduate Level 2 subject
Equivalent Subjects: HUMN 2045 - Research Stories
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2072 Logic, Argumentation and Post-Truth (10 Credit Points)
Subject Details (p. 3511) **Legacy Code:** 800241
The subject is designed for high-achieving students enrolled in the Bachelor of Creative Leadership or Advanced degrees. This subject prepares learners for leadership roles by developing their skills in logical and rhetorical argumentation, and persuasive techniques. Throughout the subject, students will appraise the structure of logical and rhetorical arguments, apply persuasive techniques, and examine the influence of post-truth on global issues and public opinion.
Level: Undergraduate Level 2 subject
Equivalent Subjects: HUMN 2035 - Logic Rhetoric and Argumentation
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2073 Issues in Contemporary Heritage (10 Credit Points)
Subject Details (p. 3512)
The aim of this subject is to get students thinking critically about heritage. To do so, it examines two main questions: "What is heritage?" and "Why does it matter?". While the answers to both may appear fairly straightforward, this subject is designed to make students question and problematise their own assumptions, rethink what is and is not heritage, and consider why, in fact, we even care at all. The subject will introduce concepts such as national identity, memorialisation, belonging, collective memory, forgetting and repatriation. It will also introduce and examine heritage legislation, theory and practice.
Level: Undergraduate Level 2 subject
Equivalent Subjects: TOUR 2001 - Issues in Contemporary Heritage
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2074 Origins of the Secular West (10 Credit Points)
Subject Details (p. 3513)
Early Modern European culture was underpinned by religious conceptions of nature, society and morality. The Modern West sees itself as having emancipated itself from these religious underpinnings, and as being grounded in human naturalistic and scientific values. This subject traces the transition from the first of these conceptions to the second, through politics, philosophy, culture and science.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2075 Sports History in Global Perspective (10 Credit Points)
Subject Details (p. 3514)
The subject explores the history of popular sports, including cricket, rugby, soccer, golf, baseball, tennis, the Olympic Games, and table tennis. It uses case studies from different countries and time periods to highlight how sports shaped, and were shaped by national identity, politics, diplomacy as well as class, race and gender. Drawing on examples from Australia and the world, students learn about how the professionalisation of sports in the early 1900s created immense controversy over the participation of working class athletes. It also explores how sports became parts of national identity, such as cricket and rugby in Australia, sumo wrestling in Japan, and baseball in the United States of America. Students taking the subject will learn how popular attitudes towards men's and women's sports changed across the twentieth century as a result of large-scale social, political and cultural movements.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3001 Advanced Standing for Ancient History 310 (10 Credit Points)
Subject Details (p. 3515) **Legacy Code:** 102459

Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3002 Advanced Standing for Ancient History 320 (20 Credit Points)
Subject Details (p. 3515) **Legacy Code:** 102462
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3003 Advanced Standing for Cultural and Social Analysis 310 (10 Credit Points)
Subject Details (p. 3515) **Legacy Code:** 102473
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3004 Advanced Standing for Cultural and Social Analysis 320 (20 Credit Points)
Subject Details (p. 3515) **Legacy Code:** 102587
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3005 Advanced Standing for Indigenous Australian Studies 310 (10 Credit Points)
Subject Details (p. 3515) **Legacy Code:** 102597
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3006 Advanced Standing for Indigenous Australian Studies 320 (20 Credit Points)
Subject Details (p. 3515) **Legacy Code:** 102598
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3007 Advanced Standing for Modern History 310 (10 Credit Points)
Subject Details (p. 3516) **Legacy Code:** 102447
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3008 Advanced Standing for Modern History 320 (20 Credit Points)
Subject Details (p. 3516) **Legacy Code:** 102588
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3009 Alternatives to Violence (10 Credit Points)
Subject Details (p. 3516) **Legacy Code:** 101570
The key tenet of this subject is the belief that there are superior alternatives to violence for peace building. Holistic development (including socio-cultural, political, economic, governance, etc.) provides the best and most constructive alternatives to violence. The subject examines different alternatives to violence within the broader context of peace and development studies. Students will be equipped with theoretical approaches to alternatives to violence and an ability to evaluate and apply those alternatives in social development contexts.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3011 An Introduction to Contemporary Aboriginal Australia (10 Credit Points)
Subject Details (p. 3517) **Legacy Code:** 401242
This subject introduces the perspectives of Aboriginal people and communities and explores both diverse and unifying aspects of Aboriginal cultures. The subject is informed by a theoretical model of developing cultural competence - cultural knowledge, cultural awareness, cultural skills, cultural encounter and cultural desire (Campinha-Bacote, 2011). To maximize their learning, students will experience an 'on-country' field trip facilitated by Aboriginal Elders. The subject will interest anyone wishing to develop personal and organisational cultural competence related to Aboriginal Australia, extend their understanding of past and contemporary issues relating to Aboriginal people and communities and promote understanding of the intergenerational impacts of the past experiences of Aboriginal people and their communities.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3012 Applied Indigenous Research Project (10 Credit Points)
Subject Details (p. 3517) **Legacy Code:** 102310
In this subject students will undertake a guided personal inquiry project. Students will investigate and reflect on the practical, cultural and ethical complexities of being an Indigenous researcher. Students will examine ethics guidelines for research with Indigenous peoples and the realities of applying them in practice. They will study examples of Indigenous research scholarship to develop and present their own Statement of Research Philosophy.
Level: Undergraduate Level 3 subject
Pre-requisite(s): HUMN 2050
Equivalent Subjects: LGYA 1682 - Rethinking Research with Indigenous Australians Independent Study project (Block Mode) HUMN 3070 - Rethinking Research with Indigenous Australians Independent Study project (Day Mode)
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3013 Australian Colonial History (10 Credit Points)
Subject Details (p. 3518) **Legacy Code:** 102004
This subject introduces students to the 18th and 19th century foundations of modern Australia, and to the social, economic, political and cultural events that shaped Australian history. Students will be encouraged to consider the process of historical change within an historiographical framework and will use primary sources to explore some of these debates. Some of the themes explored will be colonisation, convictism, class, urbanisation, gender, land, indigenous society, culture and political developments leading to the federation of the Australian colonies in 1901.
Level: Undergraduate Level 3 subject
Equivalent Subjects: HUMN 1019 - Foundations of Modern Australia HUMN 3014 - Australian History 1860-1920
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3015 Australian History Around Us (10 Credit Points)
Subject Details (p. 3519) **Legacy Code:** 102516
Historians are detectives, searching for clues and unravelling the puzzles of the past. A walk down your local street holds many clues about the history of a local area - from the name of the street, the architecture of the buildings, the trees planted by the road, even the new building that indicates a recent change. Local studies are used as the foundation for socio-economic studies across many disciplines while an understanding of local history contributes to establishing personal and community identities. In this subject students will learn research skills to uncover the lives of people from the past, re-imagine familiar places and consider events long forgotten that happened in the streets of their suburbs. The final assignment is a chance to turn these discoveries into a new history for their community.
Level: Undergraduate Level 3 subject
Equivalent Subjects: HUMN 3038 - Exploring Local History
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3016 Australian History Since 1920 (10 Credit Points)
Subject Details (p. 3519) **Legacy Code:** 100987
In 2013 this subject replaced by 101999 - Twentieth Century Australia. This subject includes a general overview of major developments in Australian political and social history since 1920, and also focuses on particular issues such as the Great Depression, 1949 coal strike, the Petrov Affair and the Whitlam dismissal.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 0953 - Australian History Since 1920 LGYB 4929 - Australian History Since 1920
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3017 Australian Indigenous History from Federation to Reconciliation (10 Credit Points)
Subject Details (p. 3520) **Legacy Code:** 101872
This subject aims to explore the history of the relationship between Indigenous and non-Indigenous Australians from Federation (1901) to the present. At the beginning of the twentieth century, Australia became a nation without paying much attention to the first Australians. It was widely assumed that they would die out or at least remain an insignificant welfare problem. Instead, these first Australians survived and grew as a minority population; they also increasingly made themselves heard as a people - so successfully that in 2008 the Parliament of Australia felt obliged formally to apologise for their years of mistreatment. This subject highlights two stories: the non-Indigenous transition from complacency to engagement, and the survival and increasing political effectiveness of the descendants of Australia's first peoples.
Level: Undergraduate Level 3 subject

HUMN 3018 Australian Indigenous History: From first contact to 'dying race' (10 Credit Points)
Subject Details (p. 3520) **Legacy Code:** 101919
Until 1788, Australia was peopled by those who we now call Aborigines. Then Europeans arrived and began to spread across the continent, displacing and marginalising the Aborigines. This subject will tell the stories of that transformation, beginning with an account of the ideas and motivations of British authority in the late eighteenth century and concluding at the moment when six British colonies formed a federated nation. Topics to be covered will include: violence, humanitarianism, Christian missions, institutional authority. The course will emphasise and explain regional and temporal differences in the ways that Indigenous and non-Indigenous interacted. Students will study primary sources and learn to understand them in context.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 1557 - Australian Indigenous History
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3019 Britain in the Age of Botany Bay, 1760-1815 (10 Credit Points)
Subject Details (p. 3521) **Legacy Code:** 102079
This subject introduces the social, economic, political and cultural forces that shaped the society from which the first white Australians came. It considers processes of historical change and uses primary sources to explore historical debates concerning these changes. Themes covered include social class; sex and gender; crime and punishment; industrial revolution, urbanisation, and public health; the public sphere; political life; war, militarisation, and empire. This subject places special emphasis on the use of digitised primary sources, training students in their use. It also requires an extended piece of original primary source-based historical research. The subject spans the period 1760-1815.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3023 Climate Change and Culture (10 Credit Points)
Subject Details (p. 3522) **Legacy Code:** 101870
This subject introduces climate change as a complex social, cultural and political phenomenon, one that is re-shaping the way we live in the world and future lifestyles. Because climate change is highly contested, the course critically examines the issue from different theoretical, disciplinary, social and cultural perspectives. Topics range from cultural theory and forms of social action to the history and construction of climate change as concepts and debates around nature, culture, science, economics and consumption; to social justice, Indigenous knowledge systems, popular culture, the media and Australian politics, global governance, cities and urban planning.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3024 Comparative Nationalism (10 Credit Points)
Subject Details (p. 3522) **Legacy Code:** 102003
Nationalism, an ideology considered by many to have passed its peak, now dominates world politics and permeates political discourse. This phenomenon is crucial to understanding Trump's America First campaign, the problems affecting the EU and secession, the tensions and conflicts that are garbed in a religious rhetorical veil, and which constitute much of the agenda of today's "war on terror." What is nationalism? What is national identity? What are the main forms of its articulation in history and in the present, across geographical borders, class boundaries, gender and generational cleavages? This subject will survey the major theories of nationalism, and examine diverse examples of historical and contemporary nationalisms, predominantly within the European context. This is an upper level subject whose readings draw on a variety of approaches and examples and aim at providing a solid introduction to the scholarly literature.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3025 Conceptualising Islam (10 Credit Points)
Subject Details (p. 3523) **Legacy Code:** 102494
The 'Muslim question' has been a topic of interest to Western scholarship for over four hundred years. This subject introduces students to multidisciplinary approaches to the study of Islam and invites students to consider the construction and deconstruction of Islamic Studies as a field of study at various stages of history. The subject provides students with the opportunity to gain increased awareness of both the debates within the field and those that scrutinise the field. That is, becoming comfortable with interrogating the cluster of theoretical and methodological strategies for scholarly inquiry into Islamic Studies.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3026 Convicts and Settlers - Australian History 1788 - 1840 (10 Credit Points)
Subject Details (p. 3524) **Legacy Code:** 101799
In little more than half a century Australia was transformed from a convict prison to a parliamentary democracy. The people who made this transformation were the ex-convicts, free settlers and first generation of colonial born children. The survival of data about ordinary people between 1788-1840 makes it possible to investigate families, communities, employment, law and order and the daily experiences of urban and frontier life in these formative years. Using family history resources on the internet and sophisticated digital archives of historical records in Australia and overseas, this subject will challenge assumptions about "who do you think we were?"
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3029 Cultures of Crime and Punishment (10 Credit Points)
Subject Details (p. 3524) **Legacy Code:** 102479
The focus of this subject is on the ways in which crime and punishment are defined and practiced in a range of different cultures, and how different countries' social customs and cultural values influence the evolution of their understanding of, and response to, criminal behaviour. Drawing on both theoretical frameworks and practical examples, the subject will provide students with an opportunity to work in a collaborative learning environment, working with both instructors and other students to undertake and communicate research logically.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3030 Cyber Justice (UG) (10 Credit Points)
Subject Details (p. 3524) **Legacy Code:** 102529
The world is being transformed by digital technologies. The same technologies that make life more comfortable for some can unleash violence and destruction for others. Cyber war and cyber terrorism offer new risks for the international community. Bullying, identity theft and bank fraud, on a more local level, are given a new life in the cyber world. Cyber technologies also provide enhanced opportunities for detecting and apprehending criminals, resolving disputes and modernising justice processes. New social spaces are opened up (social media networks, the 'dark web'), and new identities made possible (online grooming profile, avatars). How does the law keep up with the emergence of new crimes and technology-enhanced versions of old ones, and how do the cultural worlds of hackers, crackers and trackers work? The subject examines how justice processes and spaces, as well as criminal networks and strategies, are being reimagined to take advantage of the new technologies.
Level: Undergraduate Level 3 subject
Incompatible Subjects: LAWS 3015 - Cyber Law and Justice
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3031 Death and Culture (10 Credit Points)
Subject Details (p. 3525) **Legacy Code:** 100996
This subject is a critical introduction to the social practices surrounding death in modernity. Although primarily addressing social arrangements in the West, the subject examines the bio-politics of death in a wider cultural framework, with attention to geographies of power and economic influence. The subject traces the historical development of concepts of the individual; the impact on Western ideas around death of genocide and modern warfare; and assesses contemporary ethical, social and medical controversies (like euthanasia and the trade in body parts). The subject attempts to demonstrate the relationship of death to: social institutions; ideas of community and the construction of self in modernity.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYC 1307 - Death and Culture LGYA 0949 - Death and Culture
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3032 Dictators, Democrats and Dreamers: Indonesia 1942 to now (10 Credit Points)
Subject Details (p. 3526) **Legacy Code:** 102188
This subject surveys the post-independence history of Indonesia, Australia's nearest and most important Asian neighbour. Commencing with the Japanese Occupation during World War II, it traces Indonesia's often turbulent contemporary history through dictatorship and poverty to democracy and prosperity, bringing the story up to the latest developments at the time of teaching. Students will study Indonesia's struggle for independence and then equally challenging struggle to build a new nation able to take its place in the world amidst serious economic problems and profound political differences. The subject is also concerned with the historiographical problems confronting students of Indonesian history.
Level: Undergraduate Level 3 subject
Incompatible Subjects: HUMN 2054 - The History of Modern Indonesia
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3033 Digital Cultures (10 Credit Points)
Subject Details (p. 3527) **Legacy Code:** 102410
This is the compulsory Level 3 capstone subject for the Cultural and Society major and a compulsory subject in the Digital Cultures major. It gives students essential skills for researching and analysing contemporary cultural and social processes through a digital lens. Key topics include youth and digital culture, digital citizenship, racism and the digital, film and games, and digital work and economies. Through this subject, students gain an understanding of how digital technologies transform everyday practices, meanings and identities, create new opportunities and problems for addressing societal challenges and explore what it means to participate in a digital society, now and in the future.
Level: Undergraduate Level 3 subject
Equivalent Subjects: HUMN 3028 - Culture Society and Globalisation
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3034 Emotions, Culture and Community (10 Credit Points)
Subject Details (p. 3528) **Legacy Code:** 100860
This subject examines forms of cultural expression and collective selfunderstanding articulated as emotional identifications. Topics covered may include shame, pride, responsibility, forgiveness,resentment, hope, disgust, generosity, happiness, hate and love. The subject explores how these have been taken up in contemporary cultural analysis as a focus for understanding affinities and conflicts between individuals and communities and for how Australians imagine their historical interconnectedness. It introduces some key theoretical perspectives that have been, and might be, applied to the study of emotions, culture and community.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3035 Enlightenment and Revolution (10 Credit Points)
Subject Details (p. 3528) **Legacy Code:** 101974
The Enlightenment and Age of Revolutions are pivotal moments in Western and global history and had lasting political and cultural repercussions. This module seeks to explore links between them and to place them in wider intellectual and cultural context. Particular focus will be placed upon the paradigmatic French revolution, but within a framework emphasising other revolutions of the period. Hence individual classes treat society and government in Europe; the moderate and radical strands of enlightenment; precursors to the French revolution in the Atlantic world; the public sphere; the French revolution and Terror; Revolutionary Imperialism and Napoleonic rule; the revolutionary legacy.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3036 Ethics in Historical Perspective (10 Credit Points)
Subject Details (p. 3529) **Legacy Code:** 102007
The subject provides an historical overview of the different types of ethical beliefs and practices that have been used in specific social settings from the classical world to the modern West. It looks at different types of spiritual and secular ethical behaviours, and the doctrines associated with each. It focuses upon the types of ethical argument and judgment-making specific to particular professions, occupations and social statuses over time. It concludes by surveying the different types of ethics taught to professionals today in the West, and on the differences between each, as well as the specific requirements of each. It will be of interest both to students with an interest in the history of ideas, and to students who want to learn more about ethics and moral decision-making.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 0908 - Ethical Cultures
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3039 Food: A Cultural History (10 Credit Points)
Subject Details (p. 3530) **Legacy Code:** 102305
The modern world seems obsessed by food. This subject will look at the historical development of sources of food, from archaeological evidence of the earliest human meals through the emergence of agriculture and its scientific modifications to the physical and cultural evidence of technological changes in methods of preservation, preparation, cooking and eating various foods. Food is also integral to our social, religious and cultural lives and the subject will investigate the historical origins of some of these customs. Students will have the opportunity to range across time and place (through readings, recipes and field trips) to explore foods that are part of their cultural heritage - or feasts that they wish they could have eaten from centuries long past.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3040 From Vindication to Liberation: A Comparative History of Feminism (10 Credit Points)
Subject Details (p. 3530) **Legacy Code:** 102520
Beginning with Mary Wollstonecraft's A Vindication of the Rights of Woman, this historical survey analyses the Western feminist ideas and action over the past two centuries, exploring examples from Australia, France, the UK and the US. Important stages in the history of Western feminism will be studied, from the early equality feminism of the eighteenth century, to domestic feminism and the woman suffrage campaigns of the nineteenth. Aspects of the history of more recent feminism will include such developments as the role of maternalism in the creation of the welfare state, and the shift to an emphasis on liberation in the 1960s and 1970s.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3041 Geographies of Migration (10 Credit Points)
Subject Details (p. 3531) **Legacy Code:** 101694
An international and cross-institutional discussion of immigration and settlement. Covering the theory and experience of immigration. Considers the international and national regulation of immigration and settlement policies, as well as refugee policy. Case studies are from Australia and Canada, and Singapore. Within mixed tutorial groups (with students from Singapore, Vancouver & Sydney) students will exchange experiences and opinions of immigration.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3042 Global Politics (10 Credit Points)
Subject Details (p. 3532) **Legacy Code:** 101735
The experiences of globalization are explored from a variety of levels across time and space, from the individual to the local, the national to the international. The focus in this course will be on issues of politics, both domestic and international, but we will keep in mind that globalization is a phenomenon that is explored and assessed by a wide range of disciplines, including history, sociology, politics, law, economics, anthropology, gender studies, human geography, economics, regional and area studies, science and technology, health and epidemiology.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3043 Globalisation and Sustainability (10 Credit Points)
Subject Details (p. 3533) **Legacy Code:** 200815
Globalisation and Sustainability introduces students to critical debates about the role of global and national institutions of power in determining economic, environmental, social and cultural outcomes. Students will be introduced to opposing and controversial theoretical perspectives on globalisation and sustainability and issues relating to Aboriginal and Torres Strait Islander peoples to improve policy and practice in the future. In the process students will be encouraged to consider problems relating to ethics, rights, justice and democracy in society. This subject can also be taken by students who have studied social science and humanities.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3044 Healing and Culture (10 Credit Points)
Subject Details (p. 3534) **Legacy Code:** 101716
This subject takes as its starting point the idea that disease has social and cultural as well as biological origins. What people define as good health and illness, and how they treat the latter are profoundly shaped by cultural frameworks. Healing practices, including biomedicine, are underpinned by cultural understandings and larger configurations of power. We will examine notions of disease causality across cultures and explore the argument that good and ill health are about more than just the body. Popular understandings of illness and its origins, and techniques for responding to and seeking to remedy illness can be a reflection of how different societies imagine their place in the world.
Level: Undergraduate Level 3 subject
Incompatible Subjects: LGYA 0933 - Special Topics in Cultural and Social Analysis
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3046 History of Modern China to 1949 (10 Credit Points)
Subject Details (p. 3535) **Legacy Code:** 100507
This Asian history subject is concerned with the transformation of China in a social, political and intellectual context since the late eighteenth century. The subject focuses on China's modern transformation in the first half of the twentieth century and its relevance for contemporary China. The scope is broad, encompassing changes from the last phases of the Qing Dynasty to the Republican era and the rise to power of the Communists in 1949. The approach is issue-oriented, thematic and, where appropriate, chronological.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYB 0142 - History of Modern China 1850-1949 Reform and Revolution
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3047 History of Muslim Civilisations and Ideas (10 Credit Points)
Subject Details (p. 3536) **Legacy Code:** 102184
This subject focuses on intellectual, societal, institutional and technological developments within the Muslim world. It looks at comparisons and interconnections between regions and peoples and outlines the history and context of Muslim political thought from the death of Mohamed to the contemporary period. The subject will have a strong historiographical focus that examines 'Islamic data-sets' and assesses the concepts of primary and secondary source materials which conventionally are used to construct interpretations of the past.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3048 History of Sexuality (10 Credit Points)
Subject Details (p. 3536) **Legacy Code:** 101991
This subject introduces students to some key debates about the definition and origin of sexuality as a concept, and to the historical origins of particular sexual identities and the political values attributed to them. It teaches students to take account of the differing ways that forms of desire, pleasure, obscenity, pornography, perversion, sin and transgression have been articulated across time and place. In the subject we traverse an array of temporal moments and geographic loci, drawn to the 'hotspots' of historiographic contention.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3049 Home and Away: Ethnicity and Migration in Australia (10 Credit Points)
Subject Details (p. 3537) **Legacy Code:** 101611
Using contemporary and historical sociological accounts of migration and ethnicity, this subject analyses the social, cultural and economic impact of international migration, with specific reference to Australia. It further introduces students to major sociological issues, both theoretical and empirical, relating to the construction of migrant groups within settler societies through interviews and qualitative analysis. Key concerns of the subject include the position of indigenous peoples, race and racism, ethnic identity, and ethnic conflict and cooperation in society.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 1305 - Sociology of Ethnicity and Migration
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3050 Housing Markets and Policy (10 Credit Points)
Subject Details (p. 3538) **Legacy Code:** 101592
Housing affordability and equity are central urban problems. This subject focuses on the history and current challenges of housing markets and policy in Australia. Comparisons are drawn between rental and home ownership, the roles of the public, social, and private sectors, and between Australian, European, and North American housing markets and policies. We will critically evaluate how policy, markets and the experiences and practices of households interact. We will consider key housing challenges including ending homelessness, housing for health, housing in an ageing society, and housing in times of crisis such as climate change, bushfire and pandemic.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 1331 Regional Planning
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3051 Human Rights and Culture (10 Credit Points)
Subject Details (p. 3539) **Legacy Code:** 101988
This subject examines the cultural consequences of the rise of the global human rights regime. It introduces debates about cultural relativism and universal human rights and explores a number of areas of contemporary conflict between cultural practices and human rights norms. It also examines the role of human rights NGOs in creating a new global human rights culture, and asks what it means to be a subject of human rights.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3054 Islam in Southeast Asia (10 Credit Points)
Subject Details (p. 3539) **Legacy Code:** 101467
Islam is a significant feature of Southeast Asia's past and present. Employing methodologies and insights drawn primarily from history, political science, and anthropology, this subject explores Islam's place in and contribution to contemporary Southeast societies and politics, as well as its history in the region. Major themes to be explored include: the debates about Islam's spread to Southeast Asia and its interaction with the region's established socio-religious features, the colonial experience, Islam's often contested place in the national life of Southeast Asian nations, its past and ongoing links with the rest of the Muslim world, as well as contemporary issues associated with the War on Terror and conflicts in Muslim societies.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYB 0177 - Islam in Asian and World Politics
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3056 Islam in the West (10 Credit Points)
Subject Details (p. 3540) **Legacy Code:** 101822
The subject focuses on the question of Muslim presence in the West with reference to the dynamics of inclusion and exclusion. Its aim is to enable students to look at the question of Muslim presence in terms of an action-reaction phenomenon in which different outlooks, ideas, institutions and nodes of information and authenticity interact to create an environment in which identities are developed. These identities then go on to shape the cooperative and conflictual relationships between different subsections of Muslim minorities and the majority non-Muslim Western states and societies. While focusing on the contemporaneity of the question, the subject looks at the study of Muslim presence in the West in a socio-historical context by providing an understanding of how Muslim-Western contacts shaped the nature of their relationship in the past. Then, the subject looks to contrasting the changes before and after 9/11 with reference to a set of ideas, institutions and contexts.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3057 Islam, Media and Conflict (10 Credit Points)
Subject Details (p. 3541) **Legacy Code:** 101468
Provides students with an understanding of global, regional and local news media production and representations of Islam and Muslim societies. It discusses new, emerging and alternative forms of media discourses of conflict in the Muslim world, and analyses selected news reports as forms of case studies. Taking the notion of 'Orientalism' as its starting point, the subject/unit critically examines the extent to which the mediatisation of conflict impacts relations between Islam and the West vis-a-vis debates on Orientalism, 'Asian values' and Islamic world views.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3058 Islamic Revivalism in the Globalised World (10 Credit Points)
Subject Details (p. 3542) **Legacy Code:** 102297
In the last decades there has been a surge in Islamic consciousness in Musllim communities across the globe. Islamic history has been punctuated by periods of revivalist activity and its hallmark always has been a desire for the return to Islamic origins - the basics of the faith as enshrined in the islamic scripture. This subject explores the phenomenon of contemporary Islamic revivalism. The subject contrasts contemporary Islamic revivalism with earlier expressions. It aims to demonstrate that contemporary Islamic revivalism has manifested itself in a multiplicity of forms as a defensive reaction to an epoch characterised as modernity.

Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3060 Modern Japanese History (10 Credit Points)
Subject Details (p. 3542) **Legacy Code:** 100271
This subject considers Japan's trajectory from the battle of Sekigahara in 1600 until the atomic bombings in 1945. We will examine the samurai and ritual suicide, the tea ceremony and Zen Buddhism. We will read tales told by those who frequented the "floating world," populated by wealthy merchants, geisha, and sumo wrestlers. We will consider the creation of Imperial Japan, and we will study its emergence as the only non-Western Great Power. We will enquire into Japan's fledgling democracy in the 1920s, and its descent into militarism and aggression in the 1930s. Finally, we will consider Japan's participation in World War II: its victories, its losses, its propaganda, and its abject defeat.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3061 Mystical Islam: The Emergence of Sufism in World History (10 Credit Points)
Subject Details (p. 3543) **Legacy Code:** 102495
Global Islamism has projected a particularly severe, even militant face of Islam across much of the world. Much less well known is the fact that for much of its history Islam has had a quite different face: it has been mystical and contemplative more than proselytising. The Sufist tradition was formed within the first three centuries of Islamic history; its influence spread far and wide across the Muslim World where "Sufis" played a pivotal role in engaging non-Muslim peoples both within and on the fringes of their world. The subject explores religious pluralism and an alternative narrative in Islam.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3062 Napoleon: the Making of a Legend (10 Credit Points)
Subject Details (p. 3544) **Legacy Code:** 102343
This subject appraises the achievement of Napoleon Bonaparte and the manner in which he has been portrayed in his own propaganda, by his contemporaries and by historians. It also considers the historical impact of the Napoleonic and anti-Napoleonic myths in the history of France and Europe. At the heart of the module is the paradox of Napoleon's enduring popularity in France, despite his responsibility for crushing defeats in 1812-1814 and again 1815.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3063 Peace & Development Project (10 Credit Points)
Subject Details (p. 3545) **Legacy Code:** 101571
The Peace & Development major is concerned with understanding and addressing inequities of power, wealth & opportunity that contribute to international and local conflicts and environmental degradation. In this capstone subject students will have the opportunity to consolidate their understanding, knowledge and skills of peace and development issues through planning, implementing and writing up individual or collective projects. Students will identify individual and collective actions that can be taken to improve conditions so that opportunities for peaceful, equitable & sustainable living are created locally & globally.
Level: Undergraduate Level 3 subject
Pre-requisite(s): HUMN 1028
Equivalent Subjects: LGYA 1314 - Work-based Learning Project Humanitarian Peace and Health Studies
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3064 Politics, Power and Resistance (10 Credit Points)
Subject Details (p. 3545) **Legacy Code:** 101985
This subject examines the effects of politics on society and of the social on politics. Politics is understood as a struggle for defining how we live in common with others. We examine how power is attained and maintained and how some ideologies dominate over others to shape opportunities for challenging the status quo. Our focus is the contemporary nation-state in the context of globalisation, increased transnationalism, and shifting balances of power. Key themes include economic and social inequality in the modern state, the colonial power matrix, discipline and punishment, gender and race, and resistance to oppression. Each week will combine theoretical approaches and case-study based 'perspectives' on the topic.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3065 Postcolonial Australian Cinema (10 Credit Points)
Subject Details (p. 3546) **Legacy Code:** 101987
This subject will examine the role of cinema in forming images of national and cultural identity. The subject will explore the development of Indigenous and postcolonial cinema in Australia. The subject will discuss political debates and issues in postcolonial Australian cinema, and will raise questions about the nature of memory as it is mediated by cinematic experience, the representation of history, and the history of representation of indigenous cultures and peoples. The subject will examine these questions through a study of postcolonial Australian cinema produced by both Indigenous and non-Indigenous filmmakers.
Level: Undergraduate Level 3 subject
Equivalent Subjects: HUMN 3021 - Cinema Culture Memory
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3066 Power as a Cultural System (10 Credit Points)
Subject Details (p. 3547) **Legacy Code:** 102348
In this subject students will explore notions of power, domination, authority and conflict from an anthropological perspective. Students will draw upon specific case studies of the social and political organisation of a variety of communities to understand how social order is perceived, achieved and maintained cross-culturally, through local systems of governance but also through social categories such as race, kinship, ethnicity and nations. Through these examinations students will also apply anthropological insights in order to understand how social practices such as participation, collaboration, resistance and violence operate in local political contexts. In the final part of the subject students will assess the various ways anthropologists work with and against local power structures and to what extent ethnography and applied anthropological work can intervene in systems of oppression.
Level: Undergraduate Level 3 subject
Pre-requisite(s): HUMN 1016
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3067 Power, Politics and Knowledge (10 Credit Points)
Subject Details (p. 3548) **Legacy Code:** 200752
Please note that this subject is no longer on offer. Please contact business.courses@uws.edu.au or phone (02) 9685 9200 for further information. The aim of this subject is to provide students with a thorough grasp of the complex relationships between power, politics and knowledge in organisational settings. It also highlights the need for managers to use power ethically and equitably in workplaces. These aims are addressed through an examination of a range of theories of power, and topics such as: distribution and exercise of power in organisations, organisational politics, gender and power, language and power, resistance to power, and others. Innovative class activities and assessment methods (e.g., brainstorming; storytelling; film analysis) are used in this subject to ensure that students are able to effectively apply theoretical concepts to real life situations.
Level: Undergraduate Level 3 subject

HUMN 3068 Public Health Response in Complex Emergencies (10 Credit Points)
Subject Details (p. 3548) **Legacy Code:** 102369
This subject examines several different aspects of public health in emergencies including rapid assessment of the health status of the population, public health surveillance measures, and the priorities in an emergency phase. To effectively respond to complex emergencies, government and non-government organisations must enact policy and activity to prevent, protect against, and respond to injuries and threats posed by infectious disease outbreaks and hunger. The subject provides an outline of the principles of disaster prevention, preparedness and mitigation, and introduces students to aspects of human resources in the coordination of different operational initiatives.
Level: Undergraduate Level 3 subject
Co-requisite(s): HUMN 2017
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3069 Queer Culture (10 Credit Points)
Subject Details (p. 3549) **Legacy Code:** 102191
Queer culture will introduce students to queer theory and provide opportunities to use these theories in the close study of cultural practice and politics. Queer theory counters the idea that people have stable sexes, genders and sexualities. Instead, queer theory argues that the experience of those that are homosexual, bisexual, transgender, and intersex highlight the frequent mis-matches in what are taken for granted to be 'normal' experiences of identity. Queer theory demonstrates the impossibility of a natural or normal sexuality, but it also demonstrates the problem with the terms 'man' and 'woman', 'male' and 'female', 'normal' and 'abnormal'. In Queer culture students will learn about queer theories and have the opportunity to apply these theories to an in-depth and personally engaging study of queer politics and activism; queer media, film and performance; and queer sex, selfhood, and identity trans/formations.
Level: Undergraduate Level 3 subject

HUMN 3070 Rethinking Research with Indigenous Australians: Independent Study Project (Day Mode) (10 Credit Points)
Subject Details (p. 3550) **Legacy Code:** 101759
This subject will provide students with an exciting opportunity to undertake an Independent Study Project on an Indigenous topic. Students will gain greater knowledge of Indigenous people and develop effective communication skills as well as a level of cultural competency. The Independent Study Project will expose students to the complexities of the cultural inter-relationships and the politics of undertaking research with Indigenous people. It will also provide students with skills and ideas for future research projects that will add to Indigenous knowledge and provide a sound foundation for ethical research.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3071 Self and Society (10 Credit Points)
Subject Details (p. 3551) **Legacy Code:** 101330
In Spring 2020 this unit replaced by 102788 - Self and Society. This core theory unit for sociology majors introduces students to traditional and contemporary debates in social thought. The unit reviews sociological thought in the context of changing conceptions of the relation between the individual and society and the formation of the self. A number of theorists and theoretical areas are addressed, employing as the focal point of study or analysis what has been called middle range theory. This enables students to better grasp the relation between theory and application and to uncover competing theorists and ideas that may complement or be opposed to the positions argued in the unit.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3075 Sociology of Religion (10 Credit Points)
Subject Details (p. 3551) **Legacy Code:** 101359
In this subject some of the main sociological approaches to the study of religion will be considered. The subject will be orientated particularly to the tension between religion and social theory in the evolution of sociological thought. It addresses the impact of religion and religious bodies on Australian society and politics. The subject will focus on the relation of theory and practice, on the research of contemporary religious practice, and on the contemporary relevance of major theorists in the sociology of religion. It will address issues such as Buddhism, Fundamentalism(s), gender in religion, globalisation, Islam, modernity/post modernity, neo-paganism, networks in spiritualities, New Age, popular culture, and new religious movements.
Level: Undergraduate Level 3 subject
Equivalent Subjects: Unit LGYB 5040 - Sociology of Religion
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3076 Sultans, Colonists and Nationalists: Indonesia C1200-1942 (10 Credit Points)
Subject Details (p. 3552) **Legacy Code:** 102187
This subject examines the historical background of Indonesia's struggle to attain independent nationhood. Emphasis will be placed on social, cultural and political factors that shaped Indonesia prior to 1942, encompassing the classical period of the Hindu-Buddhist kingdoms, the rise of the early modern Islamic sultanates, the first encounters between Europeans and the peoples of the 'Malay world', the emergence of the Dutch East India Company (VOC) as a dominant force in the region, the subsequent imposition of the Dutch colonial rule, and, most significantly, the development of modern Indonesian nationalism.
Level: Undergraduate Level 3 subject
Incompatible Subjects: HUMN 2054 - The History of Modern Indonesia
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3077 Sustainable Futures (10 Credit Points)
Subject Details (p. 3553) **Legacy Code:** 101569
In this subject we will explore the questions 'can we create a sustainable society? If so what would it look like and how could it be done; is it possible to live ethically with each other and the planet?' While major contemporary theoretical concepts will be explored the emphasis is on developing sustainable alternatives to the way we now live both locally and globally. Particular attention will be paid to thinking ecologically, postcolonial development and issues of race and gender.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3078 The Anthropologies of Gender and Sexualities (10 Credit Points)
Subject Details (p. 3554) **Legacy Code:** 102349
Examining the social construction of gender has been central to anthropological inquiries since the 1930s. Early ethnographic studies were instrumental in debunking gender essentialism and challenging the hegemony of western constructs about 'masculinity' and 'femininity'. Since the 1930s, critical Anthropological theories and ethnographies have through cross-cultural comparison, demonstrated the great variation in expressions of individual sexuality/ies, the dynamics and confines behind the construction of gender roles and the cultural meaning and expression of gender categories across the globe. This subject will address the ongoing exploration of and challenges to the sex (biology) vs. gender (culture) dichotomy and contemporary cultural, social and political transformation (manipulation) of these categories.
Level: Undergraduate Level 3 subject
Pre-requisite(s): HUMN 1016
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3079 The Asian Century (10 Credit Points)
Subject Details (p. 3555) **Legacy Code:** 101957
This subject explores whether the 21st century can be referred to as the Asian Century. It addresses itself to a host of questions, including: What is the Asian Century? How does it differ from the American Century (20th Century) and the British Century (19th Century)? What are the historical, cultural and philosophical foundations of the Asian Century? How has Asia been transformed since World War II, and more recently? What are the risks and challenges for Asian states in the Asian Century? What are the challenges and the opportunities for the West (including Australia) in the Asian Century?
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3080 The History of Southeast Asia (10 Credit Points)
Subject Details (p. 3556) **Legacy Code:** 102491
This subject introduces students to the history of Southeast Asia, and to the major ideas and debates pertaining to the historical development of Southeast Asia as an important and distinctive world region in its own right. The course will examine the historical, cultural and religious factors that have shaped Southeast Asian societies, from antiquity to the modern era. Key topics include the origins and characteristics of early civilisations, traditional patterns of state formation, global trade networks and European imperialism, popular resistance and the nationalist challenge to the colonial order, decolonisation in Cold War Southeast Asia, and nation-building in the twentieth century.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3081 The International Relations of the Middle East Since 1945 (10 Credit Points)
Subject Details (p. 3557) **Legacy Code:** 101783
This subject offers a historical study of the international relations of the Middle East from 1945 to the present. It examines the relations of Middle Eastern states to global structures of power; the pattern of relations between regional states; the causes of regional wars and international co-operation; the impact of domestic factors on the foreign policy of states; the importance of oil to international politics and the global economy; and the role of ideologies and non-state forces in international relations and between states in the Middle East.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3082 The Making of the 'Aborigines' (10 Credit Points)
Subject Details (p. 3557) **Legacy Code:** 101757
This subject is available to all undergraduate students who have open electives. The Making of the 'Aborigines' explores the complex human relations and historical forces that have constructed Australia's indigenous people as 'Aboriginal' and/or 'Torres Strait Islander'. It will involve a critical examination of a range of contemporary social and political issues impacting on and being engaged by Indigenous people. A more comprehensive understanding of the position of Indigenous people in contemporary Australian society will enable students to engage more effectively with Indigenous people.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3084 Theories of Conflict and Violence (10 Credit Points)
Subject Details (p. 3558) **Legacy Code:** 100969
Why do humans kill? What is the nature of war? This course is a selection of different established theories offering explanations of human violence and social conflict. Both theories of individual violence and aggression, and collective conflict are studied to give students a perspective on the forces behind these phenomena. Theories from politics, philosophy, psychoanalysis, sociobiology, sociology, and cultural studies are introduced to exemplify the classic positions and lines of reasoning. These are used to question and explain current forms of violence and conflict, and to give students better understanding of the issues behind attempts to forestall, manage or end conflict.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 0295 - Theories of Violence and Conflict
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3087 Twentieth Century Australia (10 Credit Points)
Subject Details (p. 3559) **Legacy Code:** 101999
This survey subject provides an overview of major events in Australian political, cultural and social history of the twentieth century. The subject will examine key events such as World Wars and the Great Depression, but will also discuss broader changes that affected Australians, black and white, male and female, rich and poor. In doing so, it will examine some of the ideas and political movements that dominated twentieth century Australia, including class politics, feminism, imperial loyalty, indigenous politics, nationalism, racism and sectarianism.
Level: Undergraduate Level 3 subject
Equivalent Subjects: HUMN 3014 - Australian History since 1860 - 1920 HUMN 3016 - Australian History since 1920
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3088 Understanding Freedom (10 Credit Points)
Subject Details (p. 3560) **Legacy Code:** 101798
"Understanding Freedom" consists of a close analysis of major theories of freedom from ancient times to the contemporary world. It explores the relation between freedom and imprisonment, freedom and politics, freedom and the everyday, as well as the way that freedom informs the production of culture.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3090 Understanding Power (10 Credit Points)
Subject Details (p. 3560) **Legacy Code:** 101731
This subject aims to explore contemporary understandings of power and its various manifestations in the modern world. Numerous themes are considered including informal and formal mechanisms of power, the uses and abuses of power, resistance, plus various examples of "powered" sites. The subject examines the relation between power, violence and the state. The subject concentrates on a few, influential theorists of power. Particular attention is paid to how power has an impact on the production of culture.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 1008 - Understanding Power
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3091 Violence in Everyday Life (10 Credit Points)
Subject Details (p. 3561) **Legacy Code:** 101898
The subject provides an overview of the 'dark side' of human society and culture - violence. It examines how violence shapes, threatens and informs aspects of everyday life at home, work, school, the sports field and the street. Through a series of structured learning activities students engage with a range of documents and images to explore practices and experiences of violence. The role of institutions like the state, churches and sporting bodies in regulating violence will be considered. Students will gain skills in understanding the cultural milieu of marginal groups, languages of power and the emotions of excitement, fear and terror produced by acts of violence, skills useful for effective functioning in the workplace and family. The subject provides skills for honours level research in social and cultural analysis, law and legal studies, criminology, and history and political thought.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3092 WWII in Asia and the Pacific (10 Credit Points)
Subject Details (p. 3562) **Legacy Code:** 101830
This subject provides inquiry into the origins, course, and aftermath of WWII in Asia and the Pacific. We will ask why Japan and China went to war with each other in the 1930s; we will also seek understanding of why and how that war came to include the United States, Britain, the Soviet Union, the Netherlands, Australia, New Zealand, and practically all of Asia. We will examine the atomic attacks against Hiroshima and Nagasaki: Was the bomb a necessary evil? Or could/should the US have avoided using the bomb? We will also look intensively at post-WWII Asia. How did two wartime allies - the US and the Soviet Union - become bitter enemies within months of the war's end? Why did China descend into civil war? What was the war in Korea all about? Were wars of independence throughout SE Asia unavoidable? How was it that Japan escaped much of this postwar misery?
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3093 War (10 Credit Points)
Subject Details (p. 3562) **Legacy Code:** 102423
Have you ever wondered what war is good for? Edwin Starr thought it was good for "absolutely nothing." This subject will take you on an intellectual journey, around the globe and across history, as you reach your own answer to this question. You will evaluate the norms associated with war as well as the experiences of warriors from ancient through modern times. You will assess the role of militias, armies, navies, and air forces in the broad sweep of history. You will consider nuclear weaponry, terrorism, guerrilla warfare, just war theory, as well as anti-war movements.
Level: Undergraduate Level 3 subject
Incompatible Subjects: HUMN 2059 - War
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3094 War and Society in the Twentieth Century (10 Credit Points)
Subject Details (p. 3563) **Legacy Code:** 101993
This subject explores the social and cultural history of warfare in the twentieth century, with a particular emphasis on the experience of 'ordinary' men and women during the First and Second World Wars. Drawing on case studies and scholarship from Australia, Britain and the United States, students will examine a diverse range of topics and themes, including the politics of gender, class and race in wartime.
Level: Undergraduate Level 3 subject
Equivalent Subjects: HUMN 2060 - War and Society 20th Century Australia
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3096 What is the Human? (10 Credit Points)
Subject Details (p. 3564) **Legacy Code:** 101010
This subject examines theories of human nature from a variety of historical and disciplinary perspectives. It engages with, and encourages the student to evaluate, conceptions of the human - some of which have had wide currency in the broader culture and some which have not. The subject also engages the idea of whether a unified conception of human nature is tenable at all.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYC 1283 - What is the Human?
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3098 Genders and sexualities: beyond the binary (10 Credit Points)
Subject Details (p. 3565) **Legacy Code:** 102733
This subject encourages students to critically reflect on how their own identities and experiences of genders and sexualities are shaped by broader social practices that define what is natural and what is normal. The subject focuses on two substantive topics: the body and institutions. Bodies are usually understood through biological explanations of gender and sexuality. However, this subject will consider how the body is shaped by the social discourses and practices through which genders and sexualities are produced. The subject investigates how age, race, class and ability are coded differently in terms of gender and sexuality. Institutions - families, schools, workplaces and religions - will be studied as sites where genders and sexualities may be observed but also produced and negotiated.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3100 Social Sciences International Placement (1): Preparation for Placement (10 Credit Points)
Subject Details (p. 3566) **Legacy Code:** 102723
This subject is designed to equip students with the knowledge and skills required to successfully undertake a placement abroad, or in the case of those students who need to undertake a local placement, an organisation in Australia that is focused on international development. To this end, to prepare students for HUMN 3101 Social Sciences International Placement (II) the subject examines issues of sustainability and the political and ethical dimensions of volunteering, development and/or fieldwork. It interrogates the rise of volunteering and learning for development abroad experiences, and provides opportunities for students to reflect on their own part in this growth 'industry'. Workshops and online activities will cover practical topics such as health and wellbeing, and living and working in development contexts. They will also provide students with opportunity to learn more about their placement country and/or organisation and to begin developing skills in intercultural communication and interaction, ethnographic observation and reflexivity.
Level: Undergraduate Level 3 subject
Pre-requisite(s): Students enrolled in course 1733 must complete the following pre-requisites CULT 1017 Understanding Society and BEHV 1021 The Individual in Society and CULT 1020 Working with Communities and HUMN 1041 People Place and Social Difference and CULT 2005 Ethics in the Social Sciences and HUMN 2049 Social Research Methods PLUS one of the following Advanced core units BUSM 1016 Leadership in a Complex World Or DESN 2002 Creativity Innovation and Design Thinking Or BEHV 2007 Internship and Community Engagement Or CULT 3011 Ethical Leadership
Students enrolled in courses 1664 and 6030 must complete the following pre-requisites CULT 1017 Understanding Society and CULT 1020 Working with Communities and HUMN 1041 People Place and Social Difference and SPRT 2011 Sustainability Tourism and Place and CULT 3015 Heritage and Tourism and CULT 3016 Indigenous Cultures A Global Perspective

Co-requisite(s): HUMN 3101
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3101 Social Sciences International Placement (II): Placement (20 Credit Points)
Subject Details (p. 3567) **Legacy Code:** 102724
This subject provides students with the opportunity to apply skills and knowledge acquired during the first two years of their degree to a 'real world' setting. Students will undertake a 14 week internationally focused placement with organisations in, for example, the community, not-for-profit or government sectors. The subject coordinator will partner students with an international organisation, and together with the placement host(s) will jointly supervise the student. The work that students undertake during placement will vary, but may include: community visits, community consultation, development of educational programs, policy evaluation, research and report writing. Relevant activities may also be undertaken at another university in the placement country. The work placement will provide students with invaluable experience working in social sciences related fields in cross-cultural contexts. Prior to commencing the placement, students are required to complete pre-placement coursework (in co-requisite subject HUMN 3100 Social Sciences International Placement (I)). On return from placement the experience will be rounded out with the completion of HUMN 3102 Social Sciences International Placement (III). Students are required to complete a Working with Children Check, and medical clearance may also be required to undertake placement in a developing country, along with a Working With Children check for certain organisations. Those students unable to undertake an internationally based placement for health or personal reasons should contact the Subject Coordinator before enrolment in this subject to discuss available options for being placed locally. Students should also note that NSW Health facilities have further, specific requirements, and should seek advice from the Subject Coordinator.
Level: Undergraduate Level 3 subject
Pre-requisite(s): Students enrolled in course 1733 must complete the following pre-requisites CULT 1017 Understanding Society and BEHV 1021 The Individual in Society and CULT 1020 Working with Communities and HUMN 1041 People Place and Social Difference and CULT 2005 Ethics in the Social Sciences and HUMN 2049 Social Research Methods plus one of the following Advanced core units BUSM 1016 Leadership in a Complex World or DESN 2002 Creativity Innovation and Design Thinking or BEHV 2007 Internship and Community Engagement or CULT 3011 Ethical Leadership
Students enrolled in courses 1664 and 6030 must complete the following pre-requisites CULT 1017 Understanding Society and CULT 1020 Working with Communities and HUMN 1041 People Place and Social Difference and SPRT 2011 Sustainability Tourism and Place and CULT 3015 Heritage and Tourism and CULT 3016 Indigenous Cultures A Global Perspective
Students enrolled in all other courses must complete the following pre-requisites CULT 1017 Understanding Society and BEHV 1021 The Individual in Society and CULT 1020 Working with Communities and HUMN 1041 People Place and Social Difference and CULT 2005 Ethics in the Social Sciences and HUMN 2049 Social Research Methods
Co-requisite(s): HUMN 3100
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3102 Social Sciences International Placement (III): Post-placement Reflections (10 Credit Points)
Subject Details (p. 3568) **Legacy Code:** 102725
This subject is the final component of the Social Sciences International Placement. Facilitated by the subject coordinators the subject comprises a series of workshops and assessments, which will provide opportunities for students to debrief and reflect critically on their placement experience. Assessments and workshops are designed so that students learn how to convey newly acquired skills, perspectives and life choices in different settings (classroom; job interviews and applications), and to apply the placement experience in immediate and life-long educational, professional and personal endeavours.
For those students who have undertaken a placement overseas, the subject is also designed to encourage reintegration into their home culture. Specifically, assessments and workshops are designed so that students intentionally process and analyse the layered meanings of their time spent abroad, and the feelings and experiences of coming 'home'.
Level: Undergraduate Level 3 subject
Pre-requisite(s): Students enrolled in course 1733 must complete the following pre-requisites CULT 1017 Understanding Society and BEHV 1021 The Individual in Society and CULT 1020 Working with Communities and HUMN 1041 People Place and Social Difference and CULT 2005 Ethics in the Social Sciences and HUMN 2049 Social Research Methods plus one of the following Advanced core units BUSM 1016 Leadership in a Complex World or DESN 2002 Creativity Innovation and Design Thinking or BEHV 2007 Internship and Community Engagement or CULT 3011 Ethical Leadership

HUMN 3103 Group Project (10 Credit Points)
Subject Details (p. 3569) **Legacy Code:** 102741
This subject is designed to extend the employability, professional skills and networks of Bachelor of Arts students. Every year, a range of options will be offered to students. These may involve activities as diverse as group research projects with existing available databases; simulation projects with 'real world' problems determined in partnership with an external agency or internal Western organisational unit; the development of a small-scale event that services a School objective and a community need; or a disciplinary or inter-disciplinary capstone project. The common objective is the development of students' skills in collaboration and team work through a focus on authentic tasks and problem-solving.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3104 Historical Methodologies (10 Credit Points)
Subject Details (p. 3570) **Legacy Code:** 102766
The subject is an overview of Western historical thought and writing, from Herodotus to Foucault, demonstrating different approaches to historical knowledge. We examine some of the many ideas and sources that have influenced historical writing as well as some of the enduring questions, such as 'What is historical truth?' and 'Can history ever be objective?' Our exploration will include both close reading of texts and more 'hands-on' exercises to gain insight into different historical methodologies.
Level: Undergraduate Level 3 subject
Pre-requisite(s): Any two of the following subjects -
HUMN 1054 OR
HUMN 1059 OR
HUMN 1039 OR
HUMN 2042 OR
HUMN 2067
Equivalent Subjects: HUMN 3083 - Theories and Methods of History
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3105 History of Religion (10 Credit Points)
Subject Details (p. 3571) **Legacy Code:** 102734
This subject will investigate 'religion' as an object of historical study. Students will consider a variety of approaches to historical considerations about beliefs, scriptures, and rituals that have come to be defined as religion, as well as those that have not. The subject will examine the development of various religious traditions from its foundation to its present state by exploring them in light of their cultural, political, and social context.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3106 Study Tours (10 Credit Points)
Subject Details (p. 3572) **Legacy Code:** 102742
This subject provides students with opportunities outside the usual classroom experience. It is designed particularly for students who (1) enrol in short course study tours and/or (2) take a placement with an international or domestic workplace. A number of WSU partners offer short course study programs either internationally or domestically. The study tours offer an opportunity to spend up to three weeks off campus and experience real-life settings that allow for application of academic knowledge and understanding of on-the-spot discoveries.
Level: Undergraduate Level 3 subject
Equivalent Subjects: HUMN 3053 - International Study Tours
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3107 Labour and Culture (10 Credit Points)
Subject Details (p. 3572) **Legacy Code:** 102781
In recent history, social, economic, political and technological forces have produced profound changes to work and working life, undermining the stability of jobs and vocational skills, and disrupting and fragmenting career structures. This subject traces 1) the history of work, from pre-industrial to post-industrial times, 2) the rise of the factory system, 'Fordism' and scientific management of production, 3) the modern idea and experience of leisure and recreation as an adjunct to wage labour, and, in post-Fordist times, of culture and creativity as a central part of work, 4) the influence of technology on skills, and the rise of the 'knowledge economy' in the digital era, 5) the role of worker organisations in securing and protecting conditions of work.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3108 We Are The University: Students Co-creating Change (10 Credit Points)
Subject Details (p. 3573) **Legacy Code:** 102791
This project-based subject offers students a chance to learn, negotiate and practise change-making skills in, and for, our University, Western Sydney University. At the heart of this subject is student partnership, curriculum co-creation, and an invitation for students to be involved in improving the educational experience at Western. Working in groups and alongside a university mentor, students will have an opportunity to contribute genuine solutions to an authentic education challenge that might be (a) commissioned by senior staff of the University; (b) intended to support students' aspirations to become a student leader; or (c) offers students a chance to undertake a project that advances their existing student leader or representative role. By choosing this elective subject, students not only receive credit for the partnership work they undertake, the University will have a new way of involving students in its decision-making processes. This is a subject intended to sharpen students' analytical skill-set and provide a taste of what it's like to operate as a change-maker inside a large and complex institution. This subject is recommended for all students, regardless of discipline.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3109 Catastrophe: The Environmental History of the Ancient World (10 Credit Points)
Subject Details (p. 3574) **Legacy Code:** 102835
This subject examines past human interactions with the environment with its primary focus on the ancient Mediterranean and Near East between 2000 BC to 1600 AD. Case studies include Sumer, the lost civilisations of the Sahara, Egypt, Greece, Rome, the Maya and later European colonial empires. Students will assess, evaluate and synthesize data drawn from environmental history to analyse how the limits of natural resources constrain civilisations. The subject asks how catastrophic collapse of civilisations informs the sustainability of our own societies. Key topics will be soil fertility, deforestation, desertification, and climate change from ancient times to the Anthropocene.
Level: Undergraduate Level 3 subject
Equivalent Subjects: HUMN 3020 - Catastrophe The Environmental History of the Ancient and Modern World
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3110 Gender and Sexualities Across Cultures (10 Credit Points)
Subject Details (p. 3575) **Legacy Code:** 102845
Examining the social construction of gender has been central to social science inquiries - including anthropology and sociology - since the 1930s. Early ethnographic studies were instrumental in debunking gender essentialism and challenging the hegemony of western constructs about 'masculinity' and 'femininity'. Since the 1930s, critical social theories and ethnographies have through cross-cultural comparison, demonstrated the great variation in expressions of individual sexuality/ies, the dynamics and confines behind the construction of gender roles and the cultural meaning and expression of gender categories across the globe. This subject will address the ongoing exploration of and challenges to the sex (biology) vs. gender (culture) dichotomy and contemporary cultural, social and political transformation (manipulation) of these categories.
Level: Undergraduate Level 3 subject
Equivalent Subjects: HUMN 3078 - The Anthropologies of Gender and Sexualities
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3111 History of the People's Republic of China (10 Credit Points)
Subject Details (p. 3576) **Legacy Code:** 102842
This subject is concerned with the historical complexities during the period between the establishment of the People's Republic in 1949 and up to the present day. It will equally focus on the Mao Zedong era (1949-1976) and on the post-1976 period, which saw the adoption and implementation of an "open-door" policy, and the launch of the "Four Modernisations". Due attention will also be paid to the Xi Jinping era (2012-present). We will explore a wide range of social and political issues that have a bearing on China's future as a potential world leader in the twenty-first century.
Level: Undergraduate Level 3 subject
Equivalent Subjects: HUMN 3074 - Social and Political Developments in Contemporary China
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3112 Indigenous Methodologies (10 Credit Points)
Subject Details (p. 3576) **Legacy Code:** 102850
This subject provides an introduction to Indigenous research methodologies. It will develop the conceptual and theoretical knowledge of Indigenist, decolonial and anti-racist research methodologies to research with Indigenous peoples, and research that is of significance to Indigenous Australians. The subject also addresses ethical considerations and processes providing students with the skills and knowledge to engage in ethical research praxis.
Level: Undergraduate Level 3 subject
Pre-requisite(s): HUMN 1060
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3113 Migration and Social Change (10 Credit Points)
Subject Details (p. 3577) **Legacy Code:** 102862
This subject will address the key concepts and issues of migration particular to settler colonies like Australia as well as nations in Europe and the Asia Pacific. It will consider the lives of first and second generation migrants and the spaces they inhabit, that is, rapidly growing suburbs and urban fringes. Attention will be paid to how migrant identities intersect with their class, gender and other categories. This includes a close examination of how their livelihoods are impacted by increasing gentrification, health and environmental crises, and intensified forms of border control and anti-immigration sentiment. Finally, the subject will encourage student to understand the contemporary influences such as solidarity movements and online cultures that impact our understanding of migration and prompt social change.
Level: Undergraduate Level 3 subject
Equivalent Subjects: HUMN 3085 - Transnational Migration HUMN 3086 - Transnationalism and Migration
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3114 Changemakers and Entrepreneurship (10 Credit Points)
Subject Details (p. 3578) **Legacy Code:** 800243
This subject is designed for high-achieving students enrolled in the Bachelor of Creative Leadership or Advanced degrees. The subject supports students to successfully navigate innovation and entrepreneurship journeys by pushing boundaries, experimenting, learning from mistakes, and adapting to find new ways of approaching technical and social problems. In this subject, students will develop knowledge and skills in pitching and communicating solutions, creating material for crowdsourcing platforms and collaborating in multi-disciplinary teams to design solutions to contemporary problems affecting both local and global communities.
Level: Undergraduate Level 3 subject
Equivalent Subjects: HUMN 3052 - Innovation Lab
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3115 Medieval Europe from the Fall of the Roman Empire to the Reformation (10 Credit Points)
Subject Details (p. 3579) **Legacy Code:** 102861
This subject is an introductory survey of European history from the Middle Ages to the Early Modern period. It begins chronologically with the fall of the Roman Empire, and concludes with the Protestant Reformation. Students will be introduced to three core themes. The first is the gradual emergence of a distinction between church and state in the Christian west, the second is the feudal organization of medieval societies, and the third is the development of intellectual life, including the origin of universities, natural law, and the Renaissance. Students will develop their knowledge as well as their skills in interpreting a variety of primary sources, including Medieval epic, theology, Renaissance art, political tracts, and archival documents including the Domesday book.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3116 Complex Emergencies and International Guidelines (10 Credit Points)
Subject Details (p. 3580)
Over the last five decades, the world has experienced historically significant disasters, which have occurred in many different forms including natural (e.g. Tsunami or drought) and human-induced (e.g. wars or ethnic conflicts), leading to an unplanned exponential increase in the number of international non-government response organisations. This subject examines the causes and consequences of disasters and the application of international guidelines governing humanitarian responses. It provides an outline of theoretical approaches to the understanding of the political aspects of emergencies and introduces real-life case studies that aim to engage students in critical thinking and improve their knowledge of the core humanitarian standard on quality and accountability; the humanitarian charter and minimum standards; and the challenges related to interagency coordination in emergencies.
Level: Undergraduate Level 3 subject
Equivalent Subjects: HUMN 2017 - Complex Emergencies and International Guidelines
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3117 Place-Making for Tourism and the Cultural Economies (10 Credit Points)
Subject Details (p. 3580)
The subject will explore the strategic use of practices and institutions like the arts, heritage, architecture and museums to enhance and attract creative economic activities. Theories that assist in framing and explaining these changes are presented and debated alongside exemplar and emerging case studies to encourage the analysis of space, culture and economic practice in contemporary contexts.
Level: Undergraduate Level 3 subject
Equivalent Subjects: CULT 3014 - Heritage Interpretation
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3118 Indigenous Cultures: A Global Perspective (10 Credit Points)
Subject Details (p. 3581)
Drawing on global case studies, this subject aims to introduce students to some of the pressing socio-cultural issues facing indigenous peoples around the world. The subject examines the complex relationships between globalisation, colonialism and post-colonialism and contemporary indigenous cultures and identities. It draws attention to the way in which issues of representation, cultural autonomy, cultural commodification, development and human rights play out with respect to indigenous peoples' lives. More specifically, the subject interrogates the power relations and politics central to many of these issues and examines the nature of contemporary indigenous and non-indigenous interactions, particularly in the contexts of tourism and heritage, the cultural industries, the environment, development and urbanisation.
Level: Undergraduate Level 3 subject
Equivalent Subjects: CULT 3016 - Indigenous Cultures A Global Perspective
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3119 Emergency Field Operations: Supply Management and Logistics (10 Credit Points)
Subject Details (p. 3582)
This subject will equip students with the required skills to assess organisational capacity to respond to disasters and other complex humanitarian emergencies. The subject will cover logistical frameworks and tools for planning, the sustainable deployment of goods and services, and monitoring and evaluating the effectiveness of local and global supply chains. It will discuss the challenges, ethical, and political dimensions of supply chains and contingency plans in emergency and disaster response contexts.
Level: Undergraduate Level 3 subject
Equivalent Subjects: HUMN 2022 - Emergency Field Operations Supply Management and Logistics
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 4001 Researcher Development 1: Reading ,Writing, and the Business of Research (10 Credit Points)
Subject Details (p. 3582) **Legacy Code:** 800218
Research is the process of using knowledge to generate new understandings of the world. Research is also a social enterprise, with communities and norms of behaviour, and is an industry that is shaped by numerous cultural and economic forces. Taking a holistic approach that includes general research skill development, this subject focuses on four main topics: (1) critical reading, (2) effective writing, (3) research as a professional industry, and (4) the ethics of stewardship and personal responsibility. The subject equips students with vital skills that underpin their discipline-specific learning, and lays the ground for their development as professional researchers.
Level: Undergraduate Level 4 subject
Equivalent Subjects: HUMN 4009 - Research Design 1 Theories of Enquiry
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 4002 Researcher Development 2: Proposing and Justifying Research (10 Credit Points)
Subject Details (p. 3584) **Legacy Code:** 800220
An essential skill required by researchers is the ability to propose research and justify it in a persuasive manner. Through interactive workshops, Researcher Development 2 helps students develop and refine a research proposal. The subject includes workshops on research ethics that will help students articulate the significance and relevance of their work and will assist those requiring ethics clearance. The written proposal is defended through the oral Presentation of Proposal (POP). After successful completion of this subject, students will have demonstrated an ability to design and justify a research project in their discipline.
Level: Undergraduate Level 4 subject
Pre-requisite(s): HUMN 4001
Equivalent Subjects: HUMN 4010 - Research Design 2 Practices of Research
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 4003 Writing Beyond the Academy: Knowledge Translation and Public Audience Communication (10 Credit Points)
Subject Details (p. 3585) **Legacy Code:** 800219
It is now more important than ever for researchers to explain their research to the public. Although it can be challenging to translate specialist knowledge for non-specialist readers, this is the skill students will receive training for in Writing Beyond the Academy. By following the model of The Conversation, a widely popular knowledge translation platform, students will learn the principles of public audience writing, how to pitch to an editor and how to work with their feedback, and produce their own public audience essay.
Level: Undergraduate Level 4 subject
Equivalent Subjects: HUMN 4012 - Research Literacies
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 4006 Honours Thesis Part Time 2 (20 Credit Points)
Subject Details (p. 3587) **Legacy Code:** 101807
This unit is the second unit of the research project and thesis of the BSS Honours program and consists of a research project designed and implemented under the direction of an academic supervisor and research mentor. It is only available to students who have been accepted into the honours programmes for the following Bachelors degrees - Community Welfare, Policing, Social Science and Tourism Management. This unit is the culmination of studies for students who have completed their undergraduate degree and provides substantial training in research. Under staff supervision, students choose the particular topic for their research, design their own programme of research , perform the research and analyse the results. The production of a thesis is at the end of this process. Students describe the rationale for their topic, their research programme, ethical issues, results and their conclusions.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 4008 Honours Thesis Part Time 4 (20 Credit Points)
Subject Details (p. 3587) **Legacy Code:** 101809
This unit is the fourth unit of the research project and thesis of the BSS Honours program and consists of a research project designed and implemented under the direction of an academic supervisor and research mentor. It is only available to students who have been accepted into the honours programmes for the following Bachelors degrees - Community Welfare, Policing, Social Science and Tourism Management. This unit is the culmination of studies for students who have completed their undergraduate degree and provides substantial training in research. Under staff supervision, students choose the particular topic for their research, design their own programme of research , perform the research and analyse the results. The production of a thesis is at the end of this process. Students describe the rationale for their topic, their research programme, ethical issues, results and their conclusions.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 4014 Social Work Honours Preparation (10 Credit Points)
Subject Details (p. 3587) **Legacy Code:** 101788
This unit supports the Social Work Thesis. It is an intensive study in two parts. Part 1 is an introduction to Honours study and to the research thesis. Topics covered include the research proposal, the literature review, research methodologies, ethics in social research and ethics applications. Part 2 focuses on the writing stage of the thesis. Topics covered include data analysis and thesis writing.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 6001 Transnational Crime and Human Security Threat (10 Credit Points)
Subject Details (p. 3587)
Transnational crime generates serious individual and collective social harm, and poses human security threats at national, regional and international levels. It challenges states, exploits individuals, compromises economies and the environment, destroys civil society, and ultimately weakens democracy. This subject begins by assessing the concepts and definitions of transnational crime. Instead of offering a general overview of transnational crime, this subject focuses on various types of transnational crime and examines their emergence, impact, and control from a human security perspective, by examining how globalisation affects criminal organisations. While considering the security threat that transnational crime and criminal organisations pose at national and global levels, this subject aims to equip students with a holistic understanding of transnational crime beyond conventional criminological perspectives, hence nurturing students' ability to develop just and human security focused policies to prevent and control transnational crime.
Level: Postgraduate Coursework Level 6 subject
Equivalent Subjects: HUMN 7047 - Transnational Crime
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7001 Advanced Social Research Methods (10 Credit Points)
Subject Details (p. 3588) **Legacy Code:** 102177
Students in Advanced Social Research Methods concentrate on methods for collecting and analysing research data. The subject builds on the key research concepts established in 102175 Research in the Social Sciences, in particular research methodology. Advanced Social Research Methods provides students with an overview of research design and the methods for collecting and analysing research data within the broad spectrum of the social sciences. This includes purposes, strengths and limitations and applications to professional domains and/or discipline contexts. Students attend in-depth workshops on specific methods offered by practicing researchers to evaluate the merits of different research methods.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): HUMN 7036
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7002 Applied Imagination (10 Credit Points)
Subject Details (p. 3589) **Legacy Code:** 101651
This subject asks students to reflect upon imagination and its use in research, inquiry, and social action. It challenges students to develop an applied understanding of imagination in the development of creative responses to personal and social concerns. Underlying this exploration is a challenge to students to reflect upon the relationship between form, content and communication, objectivity and subjectivity, arts theory and practice, the writer, performer, artist and educator. The subject considers mediums for expression and communication; imagination as an analytical tool, and imagination as a means for understanding, communicating and enabling intentions and outcomes.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7003 Applied Innovation and Entrepreneurship (10 Credit Points)
Subject Details (p. 3590) **Legacy Code:** 800211
Entrepreneurial & innovative skills are more important than ever for today's graduates where applying creativity to drive commercial outcomes is commonplace both for those working inside organisations and those developing their own business. This subject, based on the fundamental principle of 'doing', proposes to deliver principles and content through a highly applied approach. This is a subject that teaches entrepreneurship in a fundamentally different way to the traditional course structures. The subject is delivered through Western Sydney University's highly successful "Launch Pad Innovation Centre" which provides both Tech Start-up and SME business support. This subject maximises the opportunity for real-world application by delivering through a case study driven approach and utilising a mix of presenters including: academia, business mentors, industry specialists from Launch Pad partners such as KPMG, NAB and government industry representatives, and actual start-up and SME business owners as guest lecturers.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): HUMN 7038 AND
HUMN 7005 AND
HUMN 7026 AND
HUMN 7037
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7004 Australian Cultural Policy and Practice (10 Credit Points)
Subject Details (p. 3591) **Legacy Code:** 102542
Understanding of Australia's cultural identity is essential for those who intend to engage in its promotion or in the management of cultural exchanges between Australia and other countries. This subject will describe the main features of Australian cultures including Indigenous culture, Western culture as inherited through settlement from Britain and elsewhere, and of multiculturalism arising from recent migration patterns. Students will study the history and current status of Australia's political institutions, its important international alliances and treaties, and the development of its independent foreign policy. An introduction will be given to Australia's major cultural management organisations and arts institutions (including invited guest speakers).
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7005 Career and Personal Development (10 Credit Points)
Subject Details (p. 3592) **Legacy Code:** 800198
A key skill in becoming a professional researcher is learning how to manage your career options. Fundamental aspects of this include making strategic choices regarding research focus and employment directions, learning to build professional networks both locally and internationally, and undertaking self-directed learning to continually expand your abilities and knowledge. This subject is designed to provide a structured approach to these aspects of career planning, and will include collaborative workshops where experienced researchers join the group to discuss the art of navigating around external constraints while forging your own path forward. As an early application of these principles, the subject involves completion of your Confirmation of Candidature proposal.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7006 China Culture Study (10 Credit Points)
Subject Details (p. 3594) **Legacy Code:** 102544
This subject provides students with opportunities outside the usual classroom experience. The subject uses knowledge acquired previously in the subject Chinese Cultural Policy and Practice and offers a real life application of this knowledge within a Chinese cultural context. Students will be required to travel to China for two to three weeks during their inter session break. While in China, they will visit important cultural and academic institutions and keep a daily diary of this experience. On their return to Australia students will be finalising assessment tasks required as part of this subject.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): HUMN 7007
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7007 Chinese Cultural Policy and Practice (10 Credit Points)
Subject Details (p. 3594) **Legacy Code:** 102541
China's relationship with Australia and the rest of the world is critical to Australia's future success. This subject offers a broad introduction to Chinese society, history and politics and will cover in more detail cultural developments, including the creative arts such as music, literature, visual arts and film, together with popular arts and the digital transformation of media and the arts. An outline of Chinese aesthetic theories, cultural policies and the work of critics will be presented. The roles of art institutions such as museums, galleries, performance companies and publishers will be considered, together with agencies involved in international cultural exchange such as translators, censors and copyright agencies. The study of the interplay of Chinese language, thought and culture will be an integral part of this subject. A case study of a particular cultural medium may be presented by an invited guest speaker. This subject may be further developed through the China Culture Study subject which is an alternate subject within the Master of Chinese Cultural Relations course.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7008 Contemporary Theories of Religion and Society (10 Credit Points)
Subject Details (p. 3595) **Legacy Code:** 102201
Covering Australia and other parts of the world, this subject explores current social theories of religion at the micro, meso, macro, and cyber levels. Starting from the micro or individual level, it deals with theories on the emergence of post-dogmatic religion and the growth of subjectivised forms of religion in the non-institutional field. It then moves to the group or meso level and covers the activities of religious and non-religious groups in the public and post-secular sphere. It then reaches the global (macro) level to discuss notions of multiple modernities, transnationalism and civilizational analysis. Finally, at the cyber level the subject analyses recent theories on the impact of new social media on religion.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7009 Critical and Creative Enquiry (20 Credit Points)
Subject Details (p. 3595) **Legacy Code:** 102628
This subject is designed to extend students' capacity to undertake critical and creative research in the arts therapies. Students will have the opportunity to work together and extend each other's work while undertaking a small research project that does not involve human research subjects. The theories and ethics of difference and diversity will be central to the process of enquiry. This includes formulation of research questions or problems, the choice and articulation of appropriate methodologies; data gathering and analysis; and the preparation of a research report. Students will learn to systematically question the dominant assumptions of their field and generate alternatives to a tendency for practitioner research to reproduce 'the same'.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): WELF 7008 OR
HUMN 7036
Equivalent Subjects: HUMN 7025 - Integrated Project LGYA 7525 - Integrating Theory Research and Practice
Incompatible Subjects: HUMN 7010 - Critical and Creative Enquiry WELF 7020 - Practising Research and Researching Practice
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7011 Cultural Diplomacy and Soft Power (10 Credit Points)
Subject Details (p. 3596) **Legacy Code:** 102543
This subject provides an introduction to key topics and debates in diplomacy and international relations. Relationships with other governments depend on diplomacy, which has been defined as the art of persuasion. Diplomatic modes, including those based on universalist values and those based on pragmatic self-interest will be considered and tested in the context of contemporary bilateral, regional and multilateral relations. The concepts of soft power and international public relations will be considered in the light of current cultural diplomacy campaigns, and tested through simulated role-play.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7012 Cyber Justice (PG) (10 Credit Points)
Subject Details (p. 3597) **Legacy Code:** 102424
This subject explores the evolving relationship between digital technology, justice and crime. How are the temptations and risks associated with harmful or illicit behaviour being re-shaped by information and communication technologies, by social media and the computer networks that increasingly hold organisations together? Cyber crime is typically understood as use of information and communication technologies to assist in the commission of other crimes, actions that target computer networks or software, or new offences that could only exist with the technology. Cyber justice meanwhile emphasises the use of information and communication technologies to improve access to justice and the efficiency of justice procedures, not just to deal with cyber crime. How does the law keep up with the emergence of new crimes and technology-enhanced versions of old ones, and how do forensic investigators and analysts contribute to this process? The subject examines how justice processes and spaces, as well as criminal networks and strategies, are being reimagined to take advantage of the new technologies.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7013 Debates in Global History (10 Credit Points)
Subject Details (p. 3598) **Legacy Code:** 102341
The subject considers the history of the ways that different regions of humanity have interacted, since 1400. The subject will consider such topics as: ethnic-centrism (how to address it in historical and political knowledge?); the era of 'Pan Asia' (what does the rise of China and India mean for historical and political studies?); the prominence of 'nation' in historical knowledge (how to treat human history as 'global'?); the relationship of ethno-nationalism to globalization; the periodization of global history (turning points in the emergence of a global humanity); the determinants of difference and commonality in human history; the characteristics of 'empires'; the natural limits of humanity.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7015 Digital Humanities Research Methods (PG) (10 Credit Points)
Subject Details (p. 3599) **Legacy Code:** 102426
This subject investigates the methodological possibilities of digital technologies for interdisciplinary humanities and social sciences research. It covers several major digital research methods, exploring previous applications and examining their orientations and implications. Digital research methods and applications may include digitisation, online curation, visualisation, network analysis, geographical information systems, data mining and simulation. In the context of these, the subject will probe histories of technology and knowledge production, the evolution of digital texts and practices, and issues in contemporary culture such as digital design, gamification, virtual identity, and digital rights.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7016 Diversity in Practice (10 Credit Points)
Subject Details (p. 3599) **Legacy Code:** 102183
This subject offers students the opportunity to systematically apply the theories and concepts developed in the Difference and Diversity and /or Religion and Society Specialisations to a project relevant to students' areas of professional practice, or interest. The focus of the project will be drawn from those issues of race, class, sexuality, disability, gender, religion and ethnicity embedded in the theoretical and conceptual work undertaken in the earlier subjects of the named specialisations.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): HUMN 7044 AND
HUMN 7030
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7017 Ecopedagogies (10 Credit Points)
Subject Details (p. 3600) **Legacy Code:** 102157
In simplest terms, ecopedagogies is teaching and learning in partnership with Nature. This interdisciplinary subject examines place-based theory and outdoor-experiential education. Research has repeatedly shown that outdoor experiential learning promotes health, well-being, cognitive advancement, growth and development for children, youth and adults. Correspondingly, the importance of ecopedagogies in this historical era cannot be underestimated. The precariousness of human/nature interrelationships compels us to explore new ways of learning and knowing and ecopedagogies provides new ways of connecting with the natural world. Further insight is gained through engaging with First Peoples' knowledge systems through the conceptualisation of 'country' and relational frameworks.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7018 Ecopsychology and Cultural Change (10 Credit Points)
Subject Details (p. 3601) **Legacy Code:** 101652
From 2020 students should note that core subjects are now taught in semesters rather than half yearly sessions. Ecopsychology is concerned with the relationship between human consciousness, human actions and environmental issues. It seeks to understand the sources, both phenomenological and socio-cultural, of the disjuncture between nature and psyche and to develop possibilities for personal and cultural re-connection and healing. Through applying experiential methods, critical inquiry and engagement with ecopsychological writings, students develop their awareness of "self", "nature", "culture" and explore the dynamics between them. The subject incorporates perspectives on ecological identity, ecospirituality and sense of place as ways of re-imagining the human-nature relationship and effecting ecologically-oriented change.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7019 Emergency and Disaster Management (10 Credit Points)
Subject Details (p. 3601) **Legacy Code:** 102575
This subject uses comparative analysis of different emergency responses to humanitarian disasters to provide students with the skills and knowledge required to play a role in future emergency and disaster management. Students will gain knowledge of the geo-political forces and key international frameworks and standards that shape humanitarian responses, and of the motivations and approaches of aid donors and humanitarian NGOs when intervening in states. They will also gain foundational knowledge of assessment of NGO capacities and organisational infrastructure for managing emergencies, for example their organisational structures and cultures, donor priorities, support systems and personnel.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7021 Fieldwork in Complex and Hostile Places (20 Credit Points)
Subject Details (p. 3602) **Legacy Code:** 800213
Working overseas is demanding and poses unique research challenges as well as risks to personal security and safety. This seven-day intensive subject teaches a range of applied research approaches, field skills, techniques and technologies to prepare students for operating safely overseas. The immersive scenario-based role-play learning is delivered at an off-site location. Drawing on United Nations accredited curriculum, the subject equips students with an appreciation for the major methodological, ethical, legal, logistical and personal challenges they are likely to confront when working 'in the field.' The subject is of special relevance to students seeking employment in Government and NGO sectors.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7022 Global Criminology and Human Rights (10 Credit Points)
Subject Details (p. 3603) **Legacy Code:** 102200
Global criminology is concerned with the process of respecting and fostering ideals of justice, the rule of law and human rights in an expanding range of transnational and domestic locations. These include stable, divided and post-conflict societies that are variously dealing with issues of discrimination, exploitation, insecurity and violence via international agreements, judicial and political means. The global development of justice initiatives has challenged the traditional criminological concern with individual offenders prosecuted by the sovereign nation state acting on behalf of a sole victim. In this subject students will gain a critical understanding of theories and concepts of global criminology, detail of the key aspects and uses of international criminal law, and the potential of alternative modes of attaining social justice. Case studies from around the globe will be analysed along with an emphasis placed on assessing the significance of issues, rights and justice reforms in developing regions.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7023 Global Health, Migration and Development (10 Credit Points)
Subject Details (p. 3604) **Legacy Code:** 102576
This subject introduces students to the intersection between global health, human migration and economic development. Students are introduced to international efforts to manage and support better health for all populations, particularly those under stress through civil conflict or epidemic. Through the lens of migration theories, the course will examine why and how people migrate, the dynamisms and complexities of migrants' settlement in their new environment, the socio-economic and political dimensions of forced migration and its consequences, and the relationship between voluntary migration and economic and development goals at regional, national and international level.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7024 Humanitarian and Development Agendas and Progress (10 Credit Points)
Subject Details (p. 3605) **Legacy Code:** 102577
This subject enables students to map the emergence of international humanitarian and development agencies from the mid-20th century to the modern day. Students will consider and asses international efforts to end poverty, such as the United Nations Conference on the Human Environment, the Rome Declaration and Plan of Action on World Food security, the Millennium Development Goals (MDGs) and the post-2015 Sustainable Development Goals (SDGs). A particular emphasis is placed on developing the skills to gauge the accountability and ethical approaches of humanitarian actors and agencies in global development.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7026 Knowledge Translation (10 Credit Points)
Subject Details (p. 3605) **Legacy Code:** 800199
Knowledge translation looks at how knowledge created through research can be applied in real world contexts. It takes research from the theoretical stage (i.e. "that's interesting, but so what?") to the applied stage where it can be used to create real impact. In this subject, we explore the two main processes of knowledge translation - communication and implementation. This is a highly collaborative subject where the interdisciplinary group meets to engage in general theoretical discussion and practice various knowledge translation activities based on our various fields of research.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7027 Leading Change (10 Credit Points)
Subject Details (p. 3607) **Legacy Code:** 102161
From 2020 students should note that core subjects are now taught in semesters rather than half yearly sessions. This subject explores change and leadership through a range of contexts. In this subject we critically analyse cultural, structural and political dimensions of change in organisations, systems and communities. This subject is grounded in leadership models that feature collaborative and relationship enhancing approaches to enable purposeful change.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7028 Management and Evaluation of Aid Programs (10 Credit Points)
Subject Details (p. 3608) **Legacy Code:** 102578
Evaluation of development aid and relief programs is an instrument for accountability and effective learning in terms of what works, for whom, in what circumstances, and at what cost. This subject uses critical and practical analyses to provide students with the skills and knowledge required to plan, implement, manage, and evaluate development aid and relief programs. Students are introduced to program planning and management strategies, types of evaluation approaches and their application, and evaluation dissemination utilisation. They gain practical skills to translate evaluation into policy and practice
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7029 Master of Social Science Thesis (20 Credit Points)
Subject Details (p. 3609) **Legacy Code:** 102040
This is a 40 credit point year-long subject taken over two terms (20 credit points in each term). This yearlong subject requires the completion of a research thesis and associated activities. The purpose of this subject is the completion of a research study building on the research subjects so far completed in the core subjects of the Master of Social Science. Students will work with a supervisor to frame, conceptualise, conduct and complete a research study and present a final research thesis.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): HUMN 7036 AND
HUMN 7045
Co-requisite(s): HUMN 7001
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7031 Political Economy of Development (10 Credit Points)
Subject Details (p. 3609) **Legacy Code:** 101895
The subject introduces students to the main theories and the diverse political economy dimensions of development. It consists of three modules. The first deals with key concepts that interrogate the meaning of development, origins of prosperity and the concepts of poverty, inequality and redistribution, which are contentious in their applications to various groups. The second module examines core issues in the political economy of development, which include globalisation, foreign aid, democracy, conflict and the role of the state. The last module engages with pertinent case studies focusing on Asia, the Pacific as well as problems with development in the Western world.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7032 Public Health in Complex Emergencies (Advanced) (10 Credit Points)
Subject Details (p. 3610) **Legacy Code:** 102574
The health, socio-economic, and political aspects of conflicts and disasters are complex and multidimensional, requiring political commitment and coordinated and effective prevention. This subject uses critical analyses to provide students with the skills and knowledge required to understand the politics of public health response in emergency situations. Students will be introduced to rapid health assessment protocols in, and health priorities and the prevention of public health effects of, complex emergencies. They will gain practical skills to evaluate and critically appraise the evidence used to inform public health policy and the effectiveness of different decision-making practices in emergency situations.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7033 Religion and Law in Contemporary Public Discourse (10 Credit Points)
Subject Details (p. 3611) **Legacy Code:** 102202
Debates over the role of religion as well as religious law in the public sphere have been ongoing themes in recent decades in many countries. Religion and law are two important yet rival sources of normative reasoning of public order in which they are constitutive, regulative and coercive forces. The subject introduces students to various understanding of the interrelations between religion and law in the societal and individual domains of the public sphere; and reflects on the contentious nature of the relationships given sensitive issues such as religious education, equal marriage, abortion, human rights. In the first part of the subject, students study the relationship between law and religion in various faiths such as Judaism, Christianity, Islam and Hinduism. The second part examines how different religious traditions interact and intersect with different legal traditions (common and civil law system) in a range of countries (for example Australia, UK, Israel, Indonesia, India, Iran).
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7034 Research Project in Cultural Exchange (40 Credit Points)
Subject Details (p. 3612) **Legacy Code:** 102545
In this subject you will undertake a research/development project in relation to cultural exchange with China. This may include professional involvement in a cultural exchange activity and/or a research project on an issue relating to cultural exchange. The activity will include researching the literature and interpreting this in relation to the chosen task in a research/project report. There is no class work. Each student will be supervised by a member of staff in the School of Humanities and Communication Arts.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): HUMN 4010
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7035 Research and Public Policy (10 Credit Points)
Subject Details (p. 3613) **Legacy Code:** 800212
Public policy can effect change in society at global, national and local levels. This subject examines public policy and the role of research in its development. Students will explore, analyse and understand the link between research and public policy, will receive guest lectures from experts in public policy development, and have the opportunity to produce a peer-reviewed public policy paper or article.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): HUMN 7038 AND
HUMN 7005 AND
HUMN 7026 AND
HUMN 7037
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7036 Research in the Social Sciences (10 Credit Points)
Subject Details (p. 3614) **Legacy Code:** 102175
From 2016 this subject replaced by 102357 - Ethics and Diversity in Research and Therapy for students enrolled in 4595-Master of Art Therapy only. This subject provides foundational skills and knowledge for research in the Social Sciences including contemporary developments such as digital and online research. It introduces key research concepts of epistemology, ethics, theory and methodology drawing on different fields of studies within the Social Sciences. The subject canvasses critical debates and approaches to research in the Social Sciences; the processes by which knowledge is created through research; and the purposes to which knowledge is applied in the Social Sciences. Finally, the subject focusses on developing student's skills and knowledge for developing research questions and research proposals.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: CULT 7005 - Research for Practice
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7037 Researcher Engagement and Impact (10 Credit Points)
Subject Details (p. 3615) **Legacy Code:** 800209
Maximising impact requires strategy. In addition to an extensive relationship-building with external parties as well as a general commitment to knowledge translation, achieving impact also means being strategic with research design from the earliest stages of project planning. Who is your research targeted to? What are the broader social aims of your research? Which individuals and organisations might have a stake in the outcomes of your research? What are the relevant disciplinary, policy, economic, industry, and social contexts for your research? What barriers or opportunities exist within these contexts? What social media and other communication platforms are available for you to transfer knowledge? What types of public communication should you engage in, and at what stages of your research? This subject will explore how to design research projects with such questions in mind, by combining collaborative workshops with assessments tailored specifically to your own circumstances. Whatever stage your research is at, you will have the opportunity to produce output that will feed into your broader impact or engagement objectives.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7038 Researcher Knowledge and Development (10 Credit Points)
Subject Details (p. 3616) **Legacy Code:** 800197
Researchers must have an in-depth knowledge of their research area and the appropriate methods used, as well as the ability to access and manage large amounts of information. This subject will provide students with the opportunity develop a range of literacies and cognitive abilities, culminating in the presentation of the student's Early Candidature Plan.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7040 Social Ecology (10 Credit Points)
Subject Details (p. 3618) **Legacy Code:** 102152
This subject focuses on learning in the context of social-ecological understanding. It asserts that ecological sustainability is a consequence of the understanding and enactment of social-ecological relationships. In this regard 'social ecology' describes a field of understanding while 'sustainability' describes praxis in a social-ecological context. Both experience and the understanding of experience - learning- are subject matter. This study is undertaken through reference to ecological systems of understandings in the context of challenges to that understanding. It is grounded in reference to learning, change, creativity, culture, politics and the physical environment. The subject introduces key theorists and invites students to examine their personal relationship to social-ecological learning.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: HUMN 7039 - Researching Social Ecology
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7041 Social Research in the Digital World (10 Credit Points)
Subject Details (p. 3619) **Legacy Code:** 102194
This subject provides a critical introduction to the opportunities and challenges of digital social research as well as the theoretical, methodological, and ethical implications of carrying out research in and on the digital. The social web provides researchers both with a tool and an environment to explore the intricacies of everyday life. In this subject, students will be immersed in online environments to further understand the theoretical, methodological and ethical issues of social research in the digital world. Through such activities, students participate as active digital researchers in online social science spaces to result in a professional online web presence and an in depth understanding of current and future research trends in digital social research.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7042 Space, Place and the Field (10 Credit Points)
Subject Details (p. 3620) **Legacy Code:** 102295
This subject explores the relevance and application of the 'spatial turn' across social sciences and humanities disciplines. It examines various ways of thinking spatially, theorizing processes that shape urban space, and researching in place. Through concrete engagements with Sydney as a living laboratory it explores how the spatial turn adds to and counters dominant ways of thinking that privilege temporality or deep structure. Space, Place and the Field is analysed at varying scales, including from bodies to species, streets to cities, interpersonal to macro politics, drawing on the wealth of social, cultural, economic and environmental studies of Sydney.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7044 Theories of Difference and Diversity (10 Credit Points)
Subject Details (p. 3620) **Legacy Code:** 102176
This subject will introduce students at post-graduate level to contemporary theories and concepts of difference and diversity. The subject will particularly examine feminism, post-structuralism, new materialism, queer theory and critical realism. It will also address specific concepts such as inequality, human rights, freedom and marginalisation. It will apply these theories and concepts to investigations of contemporary social issues and debates related to race, disability, ethnicity, sexuality, gender and other categories of individual identity and collective belonging. The subject will provide a strong theoretical base to the work that students have undertaken in the subject Theories for Critical Practice, and inform the work to be undertaken in the other subjects in this specialisation.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7045 Theories of the Social (10 Credit Points)
Subject Details (p. 3621) **Legacy Code:** 102179
This subject examines the notions that humans are intrinsically social beings who are at once products of and producers of their own circumstances. By providing an overview and critical engagement with a wide array of social theories, the subject explores key aspects of human society including structure and agency; knowledge and power relations; culture and identity; class, economy and consumption; self, society and the public sphere; social change and social justice. Students consider the social, political and discursive processes through which theories are made and applied, and how theories may both limit and create possibilities for research and practice. Throughout the subject students will be encouraged to use critical social theory to not only expose and analyse social systems but also to engage in reflection about how theoretical perspectives can inform practices of change.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: HUMN 7043 - Theories for Critical Practice HUMN 7050 Theories of the Social
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7047 Transnational Crime (10 Credit Points)
Subject Details (p. 3622) **Legacy Code:** 102198
In 2023 this subject is replaced by HUMN 6001 Transnational Crime and Human Security Threat. In traditional criminology crimes have been understood as acts that breach the criminal code of a given nation state. By contrast, transnational crimes are defined as violations of law that embrace more than one nation in their planning, operation or impact. These crimes often have a much broader (though often veiled) relation to serious individual and collective social harm and can be especially difficult to prevent or investigate and prosecute. Students will be expected to understand the global and regional developments that foster transnational crime, its range and security impacts, and international agreements and conventions as well the new forms of policing developed to counter it.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7048 Understanding Race (10 Credit Points)
Subject Details (p. 3622) **Legacy Code:** 102601
What is race? What is racism? How are they related? Why do they continue to shape social, political and economic relations well after the biological concept of race was disproven? What are the links between race and colonialism and in Australia particularly, the invasion and settlement of Aboriginal land? How is race related to property? How do ideas of race become embedded in state institutions and why do they continue to shape disadvantage and inequality? Though race develops differently in different contexts, it is best thought about through relational readings that draw out both the differences but also the similarities between places and times. This subject will draw on race critical and decolonial texts to focus on race as a modern idea that is shaped in the contexts of colonialism, slavery, and persists in post-immigration multicultural societies.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7049 Violence, Culture and Criminal Justice (10 Credit Points)
Subject Details (p. 3623) **Legacy Code:** 102199
In recent decades, a new wave of racial, ethnic and religious violence and terrorism has been linked to rapid patterns of globalisation and tensions over group and national identities. Specific knowledge about violence and considerations about its real extent, causes and cultural meanings remain uncertain. Yet there is evidence of a recent general decline in violence with a significant role for legal and quasi-legal bodies for acknowledging injury, punishing previously 'deniable' violence and promoting reconciliation. Seminar topics in this course will include the global patterns and forms of violence; individual versus societal and historical explanations; biology, evolution and culture; gender, race and inequality; hatred, genocide, collective identity and psychoanalysis; the role of states and law in countering and condoning interpersonal and collective violence; debates about victimhood and the cultural symbols of violence and its memorialisation.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7051 How to Write History (10 Credit Points)
Subject Details (p. 3624) **Legacy Code:** 102661
This subject introduces students to specific styles of historical methodology, considering how each of these styles alter the kinds of questions historians ask, how they select their sources, and how they account for the differences between past and present. Students undertake an independent, guided Applied Project on a historical methodology relevant to their intended thesis project.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7054 Social Science Research Project (40 Credit Points)
Subject Details (p. 3624) **Legacy Code:** 102817
This subject requires students to design, plan and manage a research project using existing literature and/or data sets. Students will engage critically and analytically with the literature in the field, and undertake research to evaluate and report on research findings. Under the guidance of an academic supervisor students will develop a research question, conduct a systematic review of literature/write a case study/work on an existing dataset, and write a thesis on a topic related to the social sciences. Through this process, students will gain insight into the various components of the research process. Further, they will demonstrate an ability to identify issues, synthesise salient information, and articulate original ideas to make a practical contribution to the existing body of knowledge relevant to the social sciences.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: HUMN 7052 - Humanitarian and Development Research Project
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7055 Social Science Training Placement (40 Credit Points)
Subject Details (p. 3625) **Legacy Code:** 102818
This subject encompasses a three-month training placement (approximately 420 hours) which is designed to consolidate knowledge and skills in the area of contemporary humanitarian and development aid or in the overlapping arenas of international criminological issues such as trafficking, criminalisation and victimisation or other fields in the social sciences. Students will design, plan, implement and report their findings on a project or projects, during a placement with a domestic or international organisation in the community, the not-for-profit, or government sectors. Students will be required to undertake a specific, focused project or projects relevant to the host organisation's needs, as an opportunity to apply the skills, training and knowledge acquired through coursework in the Master of Humanitarian and Development Studies or the Master of International Criminology programs or other master's programs in social science related disciplines.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: HUMN 7053 - Humanitarian and Development Training Placement
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7056 Grant Proposals and Applications (10 Credit Points)
Subject Details (p. 3626) **Legacy Code:** 800226
Early career researchers engage in an exceedingly dynamic and competitive research and academic environment. They are expected to possess skills to successfully develop research projects, identify appropriate funding opportunities and communicate their knowledge by applying for research funding in line with their program of research. In this elective subject students will develop the knowledge and skills required to draft complex grant applications - using a framework that includes research design, hypotheses, research questions, and results - while communicating information in an accurate but accessible manner. Students will develop and refine their ideas for future research funding based on their knowledge gained across all the GCREDI subjects as well as their research studies. Students will communicate those ideas in practice through development of grant writing skills relevant to funding opportunities associated with their chosen career paths.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): HUMN 7038 AND
HUMN 7005 AND
HUMN 7026 AND
HUMN 7037
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7057 Thirty-Day Research Placement (10 Credit Points)
Subject Details (p. 3627) **Legacy Code:** 800227
In this experiential learning subject, Graduate Certificate in Researcher Engagement, Development and Impact (GCREDI) students undertake a 30-day internship placement to experience current research practice, to develop professional networks, and to demonstrate and strengthen the transferable, professional and technical research skills they have developed through the GCREDI course and their HDR candidature. Completion of an internship gives research candidates the opportunity to strengthen their research career options and allows for further development of skills in research, planning, management, strategy, professional communication and leadership. The 30-day internship placement can be undertaken in an industry, government or non-government organisation, and is self-sourced by the student in consultation with the Subject Coordinator.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): HUMN 7038 AND
HUMN 7005 AND
HUMN 7026 AND
HUMN 7037 AND
HUMN 7003 OR
HUMN 7035 OR
CEDS 7002

Teacher Education (TEAC)

TEAC 0001 English for Academic Purposes (EAP) - UWSCollege (10 Credit Points)
Subject Details (p. 5197) **Legacy Code:** 70061
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1001 Advanced Standing for Learning in Context 110 (10 Credit Points)
Subject Details (p. 5198) **Legacy Code:** 102599
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1002 Advanced Standing for Learning in Context 120 (20 Credit Points)
Subject Details (p. 5198) **Legacy Code:** 102600
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1005 Children's Digital Worlds (10 Credit Points)
Subject Details (p. 5198) **Legacy Code:** 102663
This subject will develop students' understanding of young children's digital engagement and how to build on their technology experiences to develop quality learning in early childhood settings. Vital to this process is an understanding of how young children use technology and the implications of their digital engagement for their play, learning and development. Students will critically explore various aspects of children's digital engagement including the various ways young children use technology, the factors that contribute to their use, and the learning that occurs through their device play. Strategies for building on children's digital worlds in the curriculum will also be critically reviewed. In this subject students will explore technology-based learning experiences for children in early childhood contexts.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1006 Children's Literature and Digital Texts (10 Credit Points)
Subject Details (p. 5198) **Legacy Code:** 102630
This subject introduces key concepts in literature for children and young adults, examining theory and research related to literature; the diversity of literature and multi-literate environments; and the impact of social and cultural influences on literature. Through reading a wide range of literature, including literary classics, popular texts, graphic novels, picture books, in paper-based and electronic forms, students will identify the interrelationships between image and writing and ideological assumptions conveyed through these texts. It will focus on Australian literature, Aboriginal and Torres Strait Islander literature, Asian literature and bilingual texts.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1007 Creative Arts for Early Learning (10 Credit Points)
Subject Details (p. 5199) **Legacy Code:** 102664
This subject will engage students in developing a critical appreciation for the role of the arts in their own right, in society and in the early years. Students will develop appreciation for the relevance of the arts in children's play and identity formation, and as meaning making and communication tools. Opportunities for creative thinking and creative expression will be explored firsthand through introductory experiences and theory in the areas of drama, music, visual arts, dance and media arts.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1008 Curriculum and Aboriginal Perspectives (10 Credit Points)
Subject Details (p. 5200) **Legacy Code:** 102115
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This subject is designed to introduce students to the characteristics of classrooms and curriculum implementation. Students will explore the structure of New South Wales/National curricula in all key learning areas, examine the perspectives which influence curriculum and the way in which curriculum is interpreted using Aboriginal and Torres Strait Islander perspectives. The subject provides an understanding of the importance of the art forms and Aboriginal ways of knowing as powerful teaching and learning strategies across the primary curriculum and as creative arts in their own right.
Level: Undergraduate Level 1 subject
Equivalent Subjects: EDUC 2001 - Creative Arts 1 - AREP
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1010 Early Primary Mathematics (10 Credit Points)
Subject Details (p. 5201) **Legacy Code:** 102119
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This subject is designed to extend the development of mathematical concepts, skills and understandings for children from Kindergarten to Year 3 based on the NSW Syllabus for the Australian curriculum Mathematics K-6. An awareness of relevant research and curriculum documents, combined with the practical knowledge of teaching, learning and assessment strategies, will assist teachers to design and implement a series of experiences that will enhance the conceptual knowledge of their students.
Level: Undergraduate Level 1 subject
Equivalent Subjects: EDUC 1002 - Early Primary Maths (AREP)
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1011 Educational Psychology (10 Credit Points)
Subject Details (p. 5202) **Legacy Code:** 102636
This subject is designed to facilitate students to develop the dispositions and critical skills to create learning communities that are academically challenging, developmentally appropriate and culturally responsive. The subject highlights how the inherent qualities of a child and their environmental systems interact to influence how they grow, develop and learn. It develops students' knowledge of the ways in which children's development is embedded in context to inform their instructional strategies. It examines a body of classic and current theories, research and practice relating to the cognitive, physiological, and social/emotional needs of children and the relevance of these for classroom practice. Particular emphasis is given to developing responsive teaching practices which promote social and emotional wellbeing of children and are underpinned by high-quality relationships which extend to include the valuing of families and the wider community.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1012 English as an International Language (10 Credit Points)
Subject Details (p. 5202) **Legacy Code:** 102438
English is the first Global Language and the most important international Lingua Franca today. The teaching of English as a second or foreign language is a huge industry internationally, and a driver of export dollars in the Australian economy. The teaching of English as an International Language (EIL) is a new area of study and it is indispensable for any student seeking to gain a competitive edge in an international career. This subject is a key introductory subject in the International English Major. It is designed to equip graduates with marketable skills across multiple areas, including International Relations, Marketing and Business, Interpreting and Translation, and TESOL.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1013 Everyday Childhoods (10 Credit Points)
Subject Details (p. 5203) **Legacy Code:** 102665
In this subject students will engage in an exploration of what it means to be a child in a postmodern world and how different theoretical approaches influence ways of understanding children's lives. Alongside questions of how gender, sexuality, ethnicity, 'race', language, class, ability and religion are constituted through a child's identity, students will explore the notion of a child's subjectivity. A child's subjectivity is the conscious and unconscious thoughts and emotions of the child, their sense of self, their body and their way of understanding their relationship to the world. Building on this knowledge, students will also explore the four key child-environment identities of the physical child, the social child, the learning child and the natural child and by analysing a variety of scholarly and non-scholarly texts around the child's body and behaviour will reflect on a child's individuality and emerging identity.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1014 Experience-based Outdoor Education (10 Credit Points)
Subject Details (p. 5204) **Legacy Code:** 102206
In this subject students connect with the natural world through outdoor adventure activities. Students learn about themselves, others, and the environment through a series of experiential activities. The subject focuses on self-reliance, resiliency, interdependence, managing personal risks, and the value of life-long outdoor recreation for enjoyment, health and well-being. This subject will involve two full-day practical field trips in the outdoors as well as lectures and tutorials. The practical field trips are physically demanding whilst also extending students mentally and socially. Given the nature of the bushwalking field trips, participants require a moderate level of personal fitness.
Level: Undergraduate Level 1 subject
Equivalent Subjects: SPRT 1005 - Outdoor Recreation
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1015 Exploring Patterns and Relationships in Mathematics 1 (10 Credit Points)
Subject Details (p. 5205) **Legacy Code:** 102632
This subject supports pre-service teachers in the understanding of mathematical processes and content. Pre-service teachers will develop competence and confidence in the content areas of number, algebra, and probability and will be able to solve problems related to these areas and communicate their solution methods.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1016 Exploring Patterns and Relationships in Mathematics 2 (10 Credit Points)
Subject Details (p. 5205) **Legacy Code:** 102635
This subject supports students in the understanding of mathematical processes and content. Students will develop competence and confidence in the content areas of Measurement, Geometry, and Statistics and will be able to solve problems related to these areas and communicate their solution methods.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1017 Identity and Voice in Multimodal Texts (10 Credit Points)
Subject Details (p. 5205) **Legacy Code:** 102114
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. Aboriginal and Torres Strait Islander people's identities are depicted in a wide range of texts pertaining to expressions of and about Aboriginality. These various representations form the way Indigenous identities are constructed, projected and reflected in society often through the media. Students will examine how we then set in motion a better understanding of this phenomenon using carefully selected texts, the diverse nature of them and compare the outcomes; particularly the way they affect relationships between Indigenous and non-Indigenous Australians. The subject explores genres, voice, authority, identity, the complexities surrounding these debates and discourses, and how teachers are the advocates for negotiating power, space and voice for communities into the future. The examination of the portrayal of Aboriginal and Torres Strait Islander people in texts in a school context will be deconstructed so students understand the process of producing current and future identities.
Level: Undergraduate Level 1 subject
Equivalent Subjects: EDUC 1003 - Indigenous Cultural texts in Education
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1018 Infant and Early Development (10 Credit Points)
Subject Details (p. 5206) **Legacy Code:** 102666
A child's development and learning is influenced by the people around them and the world they live in. To support children's learning and development, teachers require knowledge and understanding of the complex interactions between nature and nurture. This subject will provide pre-service teachers with an opportunity to investigate children's physical, socio-emotional, cognitive, language, moral, creative, spiritual and academic domains of development. Concepts covered include the holistic child, contemporary theories of development, early brain development research and the pedagogy of relationships. Students will use these concepts to plan for developmentally and culturally appropriate learning environments in early childhood settings. Exploring the complexity of children's development from conception to five years of age will enhance understandings of how best to analyse and support their development.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1020 Language and Literacy 1 (10 Credit Points)
Subject Details (p. 5207) **Legacy Code:** 102118
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. The subject examines ways of enhancing children's language learning through speaking, listening, reading and writing as they begin to create and understand the oral, written and visual texts of their environment. Current literacy and language theories are examined. The diverse needs of learners are considered and appropriate teaching strategies to develop literacy skills are explored. Students will appreciate children's literature and the way it can be used to promote literacy and language learning in a variety of early learning contexts K-2. The subject prepares individuals for more advanced subjects involving language and literacy, and primary English teaching specialisation.
Level: Undergraduate Level 1 subject
Equivalent Subjects: EDUC 2004 - Language and Literacy 1 - AREP
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1021 Learning, Teaching and Technologies (10 Credit Points)
Subject Details (p. 5208) **Legacy Code:** 102116
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. Beginning a teacher education course requires students to orient themselves to learning and teaching in a variety of ways. This subject introduces a range of issues that are critical to effective teaching and learning. These issues centre on learning environments; the roles of teachers in schools and as life-long learners; and the responsibilities of teachers to observe and understand the children in their care, plan for individual children on the basis of diagnostic evaluations, employ teaching approaches which cater for the needs of individuals as well as the group, and employ assessment processes that empower rather than simply compare children.
Level: Undergraduate Level 1 subject
Co-requisite(s): TEAC 1029
Equivalent Subjects: EDUC 1005 - Introduction to Learning and Teaching
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1022 Literacy Skills for Teacher Education (10 Credit Points)
Subject Details (p. 5209) **Legacy Code:** 102112
This subject introduces students to the profession of teaching and examines key priorities that are central to the literacy demands on a teacher-educator. It aims to develop oral and written communication skills, skills in reading for academic purposes, and knowledge, skills and confidence in literacy and academic writing. The subject also provides a general orientation to University life, familiarising students with the language of tertiary institutions and the general requirements for progression and assessment.
Level: Undergraduate Level 1 subject
Equivalent Subjects: COMM 1029 - University Study Skills
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1023 Literacy for Educators (10 Credit Points)
Subject Details (p. 5209) **Legacy Code:** 102631
This subject aims to develop students' personal literacy skills necessary for participating in academic and professional contexts. Students will have opportunities to develop their interpersonal and communication skills as part of the inherent requirements of a graduate teacher. The subject provides students with opportunities to develop critical self-awareness, self-regulation and the ability to organise oneself as a self-directed learner. Students will learn about essential elements of academic scholarship including; information media literacy, understanding assessment, academic referencing and academic integrity.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1024 Mathematical Patterns and Relationships (10 Credit Points)
Subject Details (p. 5210) **Legacy Code:** 102249
Students will use a variety of investigative techniques to highlight the evidence of patterns and relationships in mathematics. The inherent structure of mathematics will be approached through the examination of various mathematical systems. In addition, students will examine the nature of mathematical thought including inductive and deductive reasoning. This subject contributes directly to the achievement of a sound foundation in mathematics.
Level: Undergraduate Level 1 subject
Equivalent Subjects: TEAC 1025 - Mathematical Patterns and Relationships (WSTC)
TEAC 2041 - Mathematical Patterns and Relationships
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1025 Mathematical Patterns and Relationships (WSTC) (10 Credit Points)
Subject Details (p. 5211) **Legacy Code:** 700137
Students will use a variety of investigative techniques to highlight the evidence of patterns and relationships in mathematics. The inherent structure of mathematics will be approached through the examination of various mathematical systems. In addition, students will examine the nature of mathematical thought including inductive and deductive reasoning. This subject contributes directly to the achievement of a sound foundation in mathematics.
Level: Undergraduate Level 1 subject
Co-requisite(s): Students enrolled in the combined DiplomaBachelor programs must have passed or be enrolled in the College Preparatory subjects in order to enrol in this subject
Equivalent Subjects: TEAC 1024 - Mathematical Patterns and Relationships
TEAC 1040 - Mathematical Patterns and Relationships (Block)
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1027 Numeracy for Educators (10 Credit Points)
Subject Details (p. 5212) **Legacy Code:** 102634
This subject supports pre-service teachers to develop as numerate citizens. It will help them to strengthen positive attitudes, skills and knowledge about numeracy and its role in everyday contexts. Pre-service teachers will develop confidence and competence in their understanding of the role of numeracy in society, with particular emphasis on problem solving and effective communication in practical situations.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1028 Numeracy for Teaching (10 Credit Points)
Subject Details (p. 5213) **Legacy Code:** 102113
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This subject considers beginning teachers' own mathematics skills and knowledge and how they can use them to support their own numeracy. Primary school teacher education students need to feel confident and competent in their understanding of mathematics as well as in mathematics pedagogy. Students will use a variety of investigative techniques to increase their experience of patterns and relationships in mathematics. The inherent structure of mathematics will be approached through the examination of various mathematical systems and their relationship to the current mathematics K-6 syllabus. Mathematics is specifically taught within this subject to develop professional skills required to meet the demands of primary classroom teaching.
Level: Undergraduate Level 1 subject
Equivalent Subjects: EDUC 1007 - Numeracy for Teaching
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1029 Professional Experience 1: Introduction to Classrooms (10 Credit Points)
Subject Details (p. 5214) **Legacy Code:** 102117
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This subject is designed to introduce students to the characteristics of classrooms and curriculum implementation, Students will explore the structure of teaching, learning and curriculum in all key learning areas, with a particular focus on literacy and numeracy. They will examine the perspectives which influence the curriculum and the way in which curriculum is interpreted in the classroom environment. The subject will assist students in commencing the development of their professional portfolio with a ten day's practicum, focusing on professional experience and the work of teachers in primary classrooms.
Level: Undergraduate Level 1 subject
Equivalent Subjects: EDUC 1009 - Professional Experience 1 Introduction to Classrooms
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1030 Science and Engineering in Early Childhood (10 Credit Points)
Subject Details (p. 5215) **Legacy Code:** 102667
This subject will develop students' critical and meaningful understanding of the way in which engineering, science and technology shape our lives and the world we live in. It will extend students' understanding of how engineering, science and technology integrate and impact on each other and how they can be promoted in creative and meaningful ways in the learning environment. This subject will foster a positive disposition in students towards teaching and applying engineering, science and technology in diverse and multi-dimensional educational settings for children aged birth to 5 years. It will focus on investigation, critical thinking and problem solving as they relate to young children's learning processes. The subject will engage with relevant pedagogical approaches and the Early Years Learning Framework principles, practices and learning outcomes.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1031 Sociology for Educators (10 Credit Points)
Subject Details (p. 5216) **Legacy Code:** 102629
This subject includes the study of society, culture, gender, ethnicity, sexuality and social class. It explores sociological understandings of the impact of the social on individuals and how this influences education, knowledge, society and change. The subject addresses the diverse needs of children in complex contexts. It provides students with opportunities to reflect on universal assumptions often imposed on children, families and communities, through applying analytical tools and developing their professional identity as critical reflexive educators.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1032 The Developing Child (10 Credit Points)
Subject Details (p. 5217) **Legacy Code:** 102046
An in-depth knowledge of child development is essential for educators to plan and provide culturally and developmentally appropriate practices for children in the early years. In this context, this subject aims to explore the diverse nature, processes and aspects of children's development from conception to 12 years of age. The subject investigates the physical, socio-emotional, cognitive, language, moral, creative, spiritual and academic domains of development. Students will gather an understanding of the evolving methods used to develop theory about child development – from traditional case study approaches to contemporary brain research. The role of family, community, and other sociocultural influences will also be considered in relation to understanding the holistic nature of children's development. Students will apply their knowledge of theories and methods of child study in the compilation of a Child Portfolio.
Level: Undergraduate Level 1 subject
Equivalent Subjects: TEAC 1033 - The Developing Child (WSTC) TEAC 1041 - The Developing Child (Block)
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1033 The Developing Child (WSTC) (10 Credit Points)
Subject Details (p. 5218) **Legacy Code:** 700273
An in-depth knowledge of child development is essential for educators to plan and provide culturally and developmentally appropriate practices for children in the early years. In this context, this subject aims to explore the diverse nature, processes and aspects of children's development from conception to 12 years of age. The subject investigates the physical, socio-emotional, cognitive, language, moral, creative, spiritual and academic domains of development. Students will gather an understanding of the evolving methods used to develop theory about child development – from traditional case study approaches to contemporary brain research. The role of family, community, and other sociocultural influences will also be considered in relation to understanding the holistic nature of children's development. Students will apply their knowledge of theories and methods of child study in the development of a Child Portfolio. Students must complete the WSU's online Child Protection Awareness Training before undertaking the Child Portfolio.
Level: Undergraduate Level 1 subject
Co-requisite(s): Students enrolled in the combined DiplomaBachelor courses listed below must pass all College Preparatory units listed in the course structure before progressing to the Year Two units
Equivalent Subjects: TEAC 1032 - The Developing Child
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1034 Ways with Words and Images (10 Credit Points)
Subject Details (p. 5220) **Legacy Code:** 102633
In this subject students will gain knowledge and understanding about how texts convey meaning through choices in language (written) and images (visual). It introduces students to analytical tools to talk about both written and visual texts by focusing on the meaning making resources used in constructing the texts. The subject explores texts as cultural artefacts, theories of visual literacy and how image and text combine to create meaning. It develops students' critical media literacy and understandings of text design and production.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1035 Advanced Standing for English Teaching Specialisation 110 (10 Credit Points)
Subject Details (p. 5220) **Legacy Code:** 102726
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1036 Advanced Standing for English Teaching Specialisation 120 (20 Credit Points)
Subject Details (p. 5220) **Legacy Code:** 102727
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1037 Exploring Patterns and Relationships in Mathematics (10 Credit Points)
Subject Details (p. 5220) **Legacy Code:** 102795
This subject supports pre-service teachers in the understanding of mathematical processes and content. Pre-service teachers will develop competence and confidence in the content areas of Number and Algebra, Measurement and Geometry; Probability and Statistics. They will be able to solve problems related to these areas and communicate their solution methods, using processes from the Working Mathematically strand.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1038 Literacy and Numeracy for Educators (10 Credit Points)
Subject Details (p. 5221) **Legacy Code:** 102794
The primary purpose of this subject is to equip first-year students with personal literacy and numeracy skills necessary for their academic success. This subject aims to develop students' personal literacy and numeracy skills necessary for participating in academic and professional contexts. It also supports pre-service teachers as literate and numerate citizens to strengthen positive attitudes, skills, and knowledge about literacy and numeracy roles in everyday contexts. Students will have opportunities to develop their interpersonal, verbal and non-verbal communication skills. These skills are integral to the inherent requirements of a graduate teacher who are required to undertake the national literacy and numeracy test mandated by the Australian Government. Pre-service teachers will develop confidence and competence in their understanding of the roles of literacy and numeracy in society, with particular emphasis on problem-solving and effective communication in practical situations. Students will be provided with opportunities to develop critical self-awareness, self-regulation and the ability to organise oneself as a self-directed learner. Essential elements of academic scholarship, including information media literacy, understanding assessment, and academic integrity, will be developed.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1039 Scientist, Artist, Teacher (10 Credit Points)
Subject Details (p. 5222) **Legacy Code:** 102821
This subject is designed to develop pre-service teachers' efficacy and identities in the content area of science and the arts. Building on the concepts of teaching-artists and scientist-as-teacher this subject gives future teachers agency to create innovative and transformative learning experiences for the primary classroom. In this subject students build on their content knowledge in science and the arts, as developed in the subjects Science and Technology in the Primary Years, and Creative Arts Education. They will develop science, performing arts (dance, drama and music), visual arts and media arts skills which can enhance their repertoire for the classroom. This subject will additionally explore the intersection of science and the arts, developing knowledge of creativity, aesthetics, innovation, artistic and scientific processes. It has been designed to give all students the opportunity to develop their knowledge, understanding, skills, confidence and competence in the science and the arts in discrete and integrated forms.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1040 Mathematical Patterns and Relationships (Block) (10 Credit Points)
Subject Details (p. 5223) **Legacy Code:** 500072
Students will use a variety of investigative techniques to highlight the evidence of patterns and relationships in mathematics. The inherent structure of mathematics will be approached through the examination of various mathematical systems. In addition, students will examine the nature of mathematical thought including inductive and deductive reasoning. This subject contributes directly to the achievement of a sound foundation in mathematics.
Level: Undergraduate Level 1 subject
Equivalent Subjects: LGYA 2716 - Mathematics 1 Patterns and Relationships LGYB 2441 - Mathematics for K-6 Teachers TEAC 1025 - Mathematical Patterns and Relationships (WSTC) TEAC 2041 - Mathematical Patterns and Relationships TEAC 1024 - Mathematical Patterns and Relationships
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1041 The Developing Child (Block) (10 Credit Points)
Subject Details (p. 5225) **Legacy Code:** 500071
An in-depth knowledge of child development is essential for educators to plan and provide culturally and developmentally appropriate practices for children in the early years. In this context, this subject aims to explore the diverse nature, processes and aspects of children's development from conception to 12 years of age. The subject investigates the physical, socio-emotional, cognitive, language, moral, creative, spiritual and academic domains of development. Students will gather an understanding of the evolving methods used to develop theory about child development – from traditional case study approaches to contemporary brain research. The role of family, community, and other sociocultural influences will also be considered in relation to understanding the holistic nature of children's development. Students will apply their knowledge of theories and methods of child study in the development of a Child Portfolio. Students will apply their knowledge of theories and methods of child study in the development of a Child Portfolio. Students will complete Working with Children Check (WWCC) (or the equivalent in their home state), the NSW Department of Education's online Child Protection Awareness Training and Annual update as part of the subject.
Level: Undergraduate Level 1 subject
Equivalent Subjects: TEAC 1032 - The Developing Child TEAC 1033 - The Developing Child

TEAC 2001 Active and Healthy Childhoods (10 Credit Points)
Subject Details (p. 5226) **Legacy Code:** 102669
Early childhood educators are responsible for promoting the health, safety and wellbeing of young children from birth to five years including children from vulnerable backgrounds. This includes children from migrant, low SES, refugee and Aboriginal and Torres Strait Islander backgrounds. This subject focuses on developing students' understandings of holistic health, safety, nutrition, and wellbeing of young children. It also assists students to recognise the factors that impact on children's socio-emotional wellbeing and promote resilience. This subject promotes students' ability to identify, source, and apply relevant policies and resources to respond to children's emerging health and wellbeing issues in collaboration with various stakeholders and by taking into consideration the children's and families' rights, needs, values and cultural practices.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (p. 5227) **Legacy Code:** 102469
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2003 Advanced Standing for Learning in Context 2 (220) (20 Credit Points)
Subject Details (p. 5227) **Legacy Code:** 102472
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2004 Being a Teacher (10 Credit Points)
Subject Details (p. 5227) **Legacy Code:** 102637
Theory and the practice of teaching are explored in depth in this subject. This subject explores the necessary teaching and interpersonal skills required to build positive relationships with students and manage the classroom. Students will develop skills in planning, implementing and evaluating the students' learning which are designed to meet primary school students' curriculum needs. It introduces students to a range of teaching strategies and assists with helping to identify when and why to use them. It explores how educational theories and practitioner research underpin and inform curriculum development and pedagogical practice. Integrated in the learning will be the use of information technologies. This subject will also facilitate students in developing a critical understanding of their individual progress towards satisfying the Australian Professional Standards for Teachers at the Graduate level. The knowledge and skills developed in the other subjects of study in the course can be applied in this and the Professional Experience subjects.
Level: Undergraduate Level 2 subject
Co-requisite(s): TEAC 2048
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2005 Learning Through Play (10 Credit Points)
Subject Details (p. 5228) **Legacy Code:** 102670
This subject focuses on analysing the changing nature, contexts and multiple perspectives on children's play. Drawing upon classical and contemporary theories, it examines how educators can facilitate young children's development, authentic learning and wellbeing in prior-to-school contexts as they play. Students will apply their knowledge of theories of play pedagogy and the principles of The Early Years Learning Framework to consolidate their understandings of the importance of play for children birth to 5 years. Students will further develop skills in observing and analysing children's play and plan play experiences for young children.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2008 Connecting Schools and Communities (10 Credit Points)
Subject Details (p. 5229) **Legacy Code:** 102127
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This subject is a service learning subject that focuses on the link between the school and the community. It incorporates a 5 day placement in a local school to enable students to develop their understanding of the value of community involvement for a school. Students will negotiate a project in the school that links the school with their community. They will build a research base in the areas of community engagement and service learning with an emphasis on the benefits to both student, the community, the school, the teachers and the school children. They will learn how to plan, negotiate, implement and use reflective practices to evaluate their project.
Level: Undergraduate Level 2 subject
Equivalent Subjects: TEAC 2007 - Connecting Schools and Communities
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2009 Contemporary Childhoods (10 Credit Points)
Subject Details (p. 5230) **Legacy Code:** 102048
In this subject students will engage in an exploration of what it means to be a child in a postmodern world and how different theoretical approaches influence ways of understanding children's lives. Alongside questions of how gender, sexuality, ethnicity, 'race', language, class, ability and religion are constituted through a child's identity, students will explore the notion of a child's subjectivity. A child's subjectivity is the conscious and unconscious thoughts and emotions of the child, their sense of self, their body and their way of understanding their relationship to the world. Building on this knowledge, students will also explore the four key child-environment identities of the physical child, the social child, the learning child and the natural child and by analysing a variety of scholarly and non-scholarly texts around childhood, children's bodies and behaviour will reflect on a child's individuality and emerging identity.
Level: Undergraduate Level 2 subject
Equivalent Subjects: TEAC 2012 - Contemporary Perspectives of Childhoods TEAC 2010 Contemporary Childhoods (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2010 Contemporary Childhoods (WSTC) (10 Credit Points)
Subject Details (p. 5231) **Legacy Code:** 700289

TEAC 2011 Contemporary Issues in Aboriginal Education (10 Credit Points)
Subject Details (p. 5233) **Legacy Code:** 102121
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This subject is designed to meet the needs of teachers entering the profession who require in depth knowledge of the field which frames Australia's Aboriginal identity. It investigates both Aboriginal historical perspectives and interactions with educational institutions and the policies which frame the delivery of Aboriginal content and resources to all students. The subject provides a contextualised framework on which many Key learning area's perspectives and background knowledge delivery is based. The subject specifically relates to working successfully with Aboriginal children, families and communities in educational and social settings. It will examine relationships between Aboriginal and non-Aboriginal societies, social indicators and also critique the impacts of current policy changes in areas such as self-determination, representation, mutual obligation and perspectives for positive, respectful educational outcomes for future generations of students.
Level: Undergraduate Level 2 subject
Equivalent Subjects: EDUC 1006 - Issues in Aboriginal Education
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2013 Creative Arts (10 Credit Points)
Subject Details (p. 5234) **Legacy Code:** 102125
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This subject introduces students to theoretical models and sound pedagogical practices of using Music, Media Arts and Visual Arts in the primary classroom. Collaborative, experiential and blended learning as well as reflective practices are the key operating principles of the subject. Students will explore the theory and practice of the arts in the education process of children through practical and professional experiences. The subject provides an understanding of the importance of the art forms, both as powerful teaching and learning strategies across the primary curriculum and as creative arts in their own right in the K-2 classroom.
Level: Undergraduate Level 2 subject
Equivalent Subjects: EDUC 2008 - Creative Arts 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2014 Cultural Diversity, Society and Learning (10 Credit Points)
Subject Details (p. 5235) **Legacy Code:** 102120
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. Teachers are required to understand the diverse cultural make up of schools and how to teach a diverse range of children. Using sociological and cultural theory, the subject examines conservative, liberal and radical approaches to cultural diversity in education. This cultural diversity includes dimensions of gender, religion, ethnicity, race, class, language and sexuality. The subject develops cultural literacy through the application of various theories such as Marxist and feminist-post structuralist analysis of these social relations to cultural diversity; pedagogy and cyberspace. Within this framework it is also essential that teachers engage with and understand the diversity and fluidity of individuals and the broader Australian community in order to promote equitable practices in schooling and to facilitate educational and professional transformation. Developing understandings of society, culture and the formation of subjectivities will promote an enhanced awareness of equity issues as well as crucial analytical and critical tools to address the needs of diverse students, their families, teachers, and the broader school community.
Level: Undergraduate Level 2 subject
Equivalent Subjects: EDUC 1001 - Cultural Diversity Society and Learning
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2015 Diversity and Difference (10 Credit Points)
Subject Details (p. 5236) **Legacy Code:** 101112
This subject introduces students to a range of contemporary theoretical frameworks that will develop their understandings about the social construction of difference, identity and subjectivity within social, historical and political contexts. A critical awareness of the intersections between language, knowledge, power and discourse provides students with the practical and theoretical tools necessary for reflecting, analyzing and deconstructing inequalities and subjectivity in personal and professional contexts.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYA 0317 - Diversity and Difference 2 Understanding the 'Self' in Socio-Cultural Contexts
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2017 Education and Transformation (10 Credit Points)
Subject Details (p. 5237) **Legacy Code:** 101263
This subject provides opportunities for students to examine theories and practices associated with Transformative Learning in relation to their personal development as educators. Transformative Learning is learning that is empowering, deep and life changing. It and similar ways of approaching learning - the holistic, ecological and systemic - share a reflective base. All are inquiries into the relationships that make learning work. Students investigate these as theoretical and practical approaches to learning in real world settings: as powerful educational feedback systems. This subject combines the design and practical enactment of theoretically grounded approaches to socially relevant and personally meaningful learning.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2018 Education for Sustainability (10 Credit Points)
Subject Details (p. 5237) **Legacy Code:** 101663
Increasingly, the need to develop sustainable ways of living that can reduce our ecological footprint and conserve precious natural resources for future generations is recognised as a critical concern of education at all levels. Developing 'sustainability literacy' requires new ways of thinking and learning that enable us to recognise the connections between environmental concerns, social patterns and individual actions. This subject approaches key issues in sustainability education with a learner-centred approach that builds skills for inquiry, analysis and creative action and involves a three-hour field trip. It promotes personal and social change, develops civic values and empowers learners to be leaders for a sustainable future.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2020 Educational Psychology for Teaching Children (10 Credit Points)
Subject Details (p. 5238) **Legacy Code:** 102126
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. Responsive teaching engages students holistically in learning that is tailored to meet their physical, cognitive, social, emotional and developmental needs. This subject will consider the learning needs and styles of primary children, including Indigenous children. It will introduce key approaches to instruction based on theories and research in educational psychology. A particular focus will be the development of children's sense of self and the ways that children's school experiences interact with cultural and familial influences to shape identity, motivation and engagement throughout the primary years. Particular emphasis is given to developing responsive teaching practices which promote social and emotional wellbeing of children and are underpinned by high-quality relationships which extend to include the valuing of families and the wider community.
Level: Undergraduate Level 2 subject
Equivalent Subjects: EDUC 2002 - Educational Psychology for Primary Teaching
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2021 Early Childhood Curriculum and Pedagogy (10 Credit Points)
Subject Details (p. 5239) **Legacy Code:** 102674
This subject supports a developing understanding of the principles and practices of early childhood curriculum and pedagogy. A range of approaches to curriculum and pedagogy will also be examined. Students will learn about approaches to observing and documenting children's learning in ways that celebrate children's competencies and build connections between children, families and educators while also identifying any areas where children's experiences may be extended. Students will develop strategies for planning and connecting curriculum to children's social worlds which facilitate children's in-depth investigations and critical thinking in ways that cater for diverse interests.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2023 Engaging in Early Childhood Education (10 Credit Points)
Subject Details (p. 5240) **Legacy Code:** 102673
This subject incorporates 20 days of professional experience in an early childhood setting. Prior to external practicum work, students engage in preparatory coursework. The fieldwork introduces students to work in early childhood contexts while the coursework prompts students to reflect on the nature of early childhood teaching, their role as teachers in teaching and learning, the frameworks that guide practice and contemporary issues related to teaching young children. Students also apply skills in observation-based assessment of children's interests, development, dispositions and learning, explore curriculum decision making based on their assessments of learning and development and other strategies to facilitate children's engagement, learning and development. Students will immerse themselves in the setting and demonstrate capacity to work effectively with children Birth – 5 years.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2024 Engaging with Children, Families, Colleagues and Communities (10 Credit Points)
Subject Details (p. 5241) **Legacy Code:** 102645
This subject explores the importance of engaging with children, families, colleagues and communities of diverse backgrounds to foster a child's learning, health and well-being. Preservice educators will reflect on complex interrelationships between theories, research, policies and practices and the importance of positive relationships and partnerships with children, families, colleagues, and communities. Students will explore discourses associated with disadvantage through the analysis of children's life experiences and contexts. In this way, preservice educators will gain an understanding of the nuances of working collaboratively and in partnership with children, families, colleagues, and communities, including strategies to work ethically, sensitively and confidentially.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2025 English Language Analysis (10 Credit Points)
Subject Details (p. 5242) **Legacy Code:** 102439
In this subject, students will develop a thorough understanding of the structure of English and the use of English across contexts. Students will study the workings of the English language, including its sounds, grammar, syntax and textual forms, through the analysis of diverse texts. The skills developed through the analysis of real-world texts throughout the subject will prepare students for effective participation in a range of personal and professional contexts, enhancing their capacity for study and for employment.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2026 Ethical Practice (10 Credit Points)
Subject Details (p. 5243) **Legacy Code:** 102668
Professionals working with children, young people and families must base all action on sound ethical and legal foundations. In this subject students are introduced to the concept of professionalism and oriented to the ethical aspects of the teaching profession, the policy, guidelines and codes that apply to teachers. In particular students are introduced to the Early Childhood Australia Code of Ethics. Contemporary and global approaches to ethics and critiques of traditional western approaches are introduced. The subject is also designed to build leadership capacity through an understanding of contemporary issues in educational policy and practice and an exploration of the concepts of social justice and advocacy.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2029 Fundamentals for Working Mathematically (10 Credit Points)
Subject Details (p. 5243) **Legacy Code:** 102208
In this subject students will acquire a variety of problem solving, investigation and mathematical modelling techniques that incorporate the application of algebra and highlight the importance of understanding probability, data and graphical representations in real life. Students will apply mathematics in real contexts; evaluate data gathered in real time and identify patterns while engaging with the concepts of number, probability, measurement, problem solving, linear and exponential representations. Engagement with this subject contributes directly to the achievement of a sound understanding and application of mathematical concepts and develops mathematical thinking.
Level: Undergraduate Level 2 subject
Equivalent Subjects: TEAC 2042 - Mathematics Principles and Applications
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2030 Health and Physical Education (10 Credit Points)
Subject Details (p. 5244) **Legacy Code:** 102124
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. Students will work on developing their knowledge and understanding of Health and Physical Education (HPE). This subject is designed to introduce the NSW Syllabus for the Australian Curriculum: Personal Development, Health and Physical Education K-10 (incorporating Health and Physical Education K-6). Through an examination of the syllabus, modules and support documents, students will develop the necessary skills to design an effective scope and sequence for K-6 Health and Physical Education (HPE) and develop a program of work suitable for a specific stage of learner K-2. Assessment and evaluation will be addressed and the need to develop descriptive student profiles relating to student achievement of outcomes will be highlighted.
Level: Undergraduate Level 2 subject
Equivalent Subjects: EDUC 2005 - Personal Development Health and Physical Education 1 (AREP)
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2031 History, Geography, Civics and Citizenship (10 Credit Points)
Subject Details (p. 5245) **Legacy Code:** 102122
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This subject provides opportunities for students to develop knowledge of the outcomes, subject matter, pedagogies and experiences that define the key learning area of History, Geography, Civics and Citizenship (HSIE). Key concepts of change in family history, local history, and Australia's history and understanding Australia as a Nation are explored. In Geography, concepts that develop a sense of curiosity about environments, peoples, cultures and place, in both Australia and the world, are a priority. In Civics and Citizenship, the focus is on relationships between the individual and the state, and the values and mutual responsibilities and obligations for civil, political and social participation in Australian society. It enables students to develop their own content knowledge and understandings, skills and dispositions necessary for planning, programming and teaching HSIE K-6. It promotes teaching strategies that prepare primary children for informed and effective citizenship, contributing to the quality of their society and environments.
Level: Undergraduate Level 2 subject
Equivalent Subjects: EDUC 2003 - Human Society and Its Environment (AREP)
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2032 Inclusive Education Practices (10 Credit Points)
Subject Details (p. 5246) **Legacy Code:** 102130
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. Teacher education students develop understanding and skills that enable them to understand and assess the intellectual, emotional, social and physical needs of all children in the classroom. This subject assists teacher education students to develop appropriate skills, attitudes and methodologies to enable them to plan, implement and evaluate programs which meet the educational needs of individual children with disabilities, learning difficulties and/or behaviour disorders as well as those who are gifted and talented. This subject also explores strategies and theoretical approaches which promote and enable inclusion and effective learning within the context of National and State policy and legislation.
Level: Undergraduate Level 2 subject
Equivalent Subjects: EDUC 2011 - Inclusive Education Practices - AREP
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2033 Indigenous Landscapes and Sustainability (10 Credit Points)
Subject Details (p. 5247) **Legacy Code:** 102133
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. The subject explores how Aboriginal ways of knowing country, and how tacit Aboriginal cultural knowledge embeds many of the principles of sustainability. Country defines First Nations people's identity and spirituality globally. The subject provides opportunity of the exploration and development of self and identity in terms of traditional stewardship practices that underpin the practice and principles related to the maintenance of place/country, language, spirituality. The subject builds awareness and understanding about Aboriginal 'ways of knowing' and 'caring' for Country. The subject provides community engagement opportunities for the exploration of oral traditions, language, writings about nurturing, visiting, talking, singing and feeling 'sorry' for Country. It will design a framework whereby as future educators they will be able to use an ecological approach to their teaching of significant global issues such as: sustainable land and energy use, the impact of human society on land and land management, global warming, the concept of self-sustaining systems and valuing sustainable patterns of living. The subject requires students to undertake visits to Environmental Field Studies Centres, the UWS Sustainability Subject and local cultural learning centres to work with Elders.
Level: Undergraduate Level 2 subject
Equivalent Subjects: EDUC 2010 - Human Society and Its Environment 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2034 Language Assessment and Testing (10 Credit Points)
Subject Details (p. 5248) **Legacy Code:** 102475
This subject introduces students to fields of language assessment and testing in teaching English as a foreign/second language. It provides students with some insight into the key language components for assessment, assessment design and development. It also equips students with updated knowledge about different assessment approaches which impact on the teaching and learning of English as a foreign/second language in local and global contexts.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2036 Learning Futures and Curriculum Integration (10 Credit Points)
Subject Details (p. 5249) **Legacy Code:** 102132
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This subject is designed to consolidate and extend knowledge and skills gained in previous curriculum subjects. Integration opportunities between different curriculum areas will be explored and developed. The focus is on developing students' content knowledge about learning for the future as well as their understandings, skills and dispositions necessary for: planning, programming and teaching across different curriculum areas. Various approaches to planning, teaching and assessing curriculum to meet the needs of diverse learners are explored
Level: Undergraduate Level 2 subject
Co-requisite(s): TEAC 2033
Equivalent Subjects: EDUC 2014 - Science and Technology 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2037 Learning and Creativity (10 Credit Points)
Subject Details (p. 5250) **Legacy Code:** 101259
This subject examines the inter-related processes of learning and creativity and the application and practice of these in all aspects of life. Learning and Creativity is contextual. This context is personal, social, cultural and environmental. The subject content is critically positioned within diverse theories, with an emphasis on experiential learning and ongoing critical reflection. The subject promotes understanding of feeling and experience as much as concepts and ideas. It emphasises the tools and skills of learning, the everyday nature of creativity and enables students to develop and apply their creativity. It is designed for students interested in personal, community and cultural development, in the context of far reaching change.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2038 Learning in Community Contexts (10 Credit Points)
Subject Details (p. 5251) **Legacy Code:** 102642
This subject focuses on the role of the educator within a diverse, complex and changing society, including effective communication and professional collaborative relationships with children, families, practitioners and/or other professionals. It seeks to promote the importance of reciprocal and reflexive learning by positioning learning and effective teaching as highly dependent on the development of trust, rapport and critical understandings between individuals. In particular, the subject explores through an agency placement experience, social justice issues within educational contexts that may influence educational outcomes. It also provides a space to critically explore the nuances and subtleties of teaching and learning through individual and group interactions. This subject includes a placement requiring a minimum of 26 hours of work integrated learning and engagement in a community agency or educational setting. Mandatory requirements for this subject include Working with Children Check, anaphylaxis certification and Child Protection Awareness Training.
Level: Undergraduate Level 2 subject
Pre-requisite(s): TEAC 1023
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2043 Numeracy and Mathematics in the Early Years (10 Credit Points)
Subject Details (p. 5251) **Legacy Code:** 102641
The subject will develop students' understandings of children's construction of mathematical and numeracy concepts during the years from Kindergarten to Year 3. Students will develop their ability to assess young children's mathematical understandings and numeracy development, and to provide learning experiences for a diversity of learners, including investigation and the use of digital technologies, to enhance the growth of children's mathematical thinking. The subject will study the NSW K-10 Syllabus in all of its strands, with a particular emphasis on the Working Mathematically strand.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2044 Outdoor Learning and Sustainability in the Primary Years (10 Credit Points)
Subject Details (p. 5252) **Legacy Code:** 102640
This subject critically examines the cross-curriculum priority area of Sustainability. It develops students' understanding of the key theoretical and pedagogical underpinnings of ecological principles that can be applied across the K-6 curriculum. It gives future educators knowledge and skills to teach civic engagement and ethical actions in order to sustain and improve natural and social environments. The subject examines the interrelatedness of individual, social, and environmental wellbeing within the context of education for sustainability in school settings. Students will gain a deeper understanding of place-based outdoor learning as an approach to teach across the primary school curriculum, support student wellbeing and engagement, and create meaningful learning experiences with nature.
Level: Undergraduate Level 2 subject
Pre-requisite(s): TEAC 1031 AND
TEAC 1006 AND
TEAC 1023 AND
TEAC 1015 AND
TEAC 1034 AND
TEAC 1027 AND
TEAC 1016 AND
TEAC 1011
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2046 Pedagogy and Praxis in Aboriginal and Torres Strait Islander Education (10 Credit Points)
Subject Details (p. 5253) **Legacy Code:** 102643
This subject is designed to meet the needs of students learning how to apply the theories of Aboriginal and Torres Strait Islander pedagogy in an engaging and practical way. It investigates the current knowledge base for teaching Aboriginal and Torres Strait Islander children in primary school settings and informs students how they can apply these theories to develop their own practice. This subject provides a basis to understanding the background of historical Aboriginal and Torres Strait Islander teaching and learning strategies and how these relate to contemporary teaching and learning in schools. The subject specifically relates the protocols of successfully working with Aboriginal children, families and communities in educational settings to maximise learning outcomes for Aboriginal and Torres Strait Islander students.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2048 Primary Professional Experience 1: Working in Classrooms (10 Credit Points)
Subject Details (p. 5253) **Legacy Code:** 102639
This subject is designed to introduce students to the practical and pedagogical perspectives of becoming a teacher in the primary school context. As Pre-service Teachers, students will engage in the culture of schools to gain an understanding of how schools and classrooms operate. This professional experience provides opportunities for students to observe and engage in classroom organisation, classroom management strategies, lesson planning and delivery, and student/teacher interactions. Primary Professional Experience 1: Working in Classrooms has a two week (15 day) placement component.
Level: Undergraduate Level 2 subject
Co-requisite(s): TEAC 2004
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2049 Professional Experience 2: School-based Learning (10 Credit Points)
Subject Details (p. 5255) **Legacy Code:** 102128
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. Students will have 20 days placement in schools. During these days students will work in partnership with classroom teachers to further develop and begin to put into practice their knowledge of curriculum and pedagogy. Students will observe classrooms, assist individuals and groups of students with their learning, and begin to teach lessons. By the end of the subject students will have taught lessons in all of the Key Learning Areas, assessed student learning and evaluated their teaching.
Level: Undergraduate Level 2 subject
Equivalent Subjects: EDUC 2007 - Professional Experience 2 School-based learning (AREP)
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2052 Science and Technology (10 Credit Points)
Subject Details (p. 5256) **Legacy Code:** 102123
This subject is designed to introduce the NSW Syllabus for the Australian Curriculum: Science K-10 (incorporating Science and Technology K-6), with a focus on K-2. The significance of children's views is emphasised in the selection, design and sequencing of activities for primary students in the development of science and technology experiences. Scientific concepts are considered in the context of distinct but related science and technology areas of built environments, information and communications, living things, natural phenomena, products and services, and Earth and its surroundings. Relevant science and technology content, together with strategies useful in developing primary science and technology knowledge, understandings, skills, processes, values and attitudes will be explored. The tutorials and assignments are designed to place student teachers in situations where they can focus on themselves as learners and to reflect on the implications of their learning and the learning of others in their future professional practice.
Level: Undergraduate Level 2 subject
Equivalent Subjects: EDUC 2006 - Science and Technology 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2053 Science and Technology in the Primary Years (10 Credit Points)
Subject Details (p. 5257) **Legacy Code:** 102644
This subject introduces students to the NSW Syllabus for the Australian Curriculum: Science and Technology K-6. It focuses on developing students' pedagogical content knowledge appropriate for teaching science and technology to learners in the primary years. This subject demonstrates how scientific and technological learning experiences can be developed to cater for the needs of the diverse groups of learners in primary schools, including English as an Additional Language or Dialect (EAL/D), Aboriginal and Torres Strait Islander and low socioeconomic status (SES) learners. Students will also focus on themselves as learners and reflect on the implications of their learning and the learning of others in their future professional practice.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2054 Scientific Discovery and Invention (10 Credit Points)
Subject Details (p. 5258) **Legacy Code:** 102209
Scientific discovery and inventions have made a significant impact on contemporary society. Science is a dynamic, futures oriented, collaborative human endeavour arising from curiosity and interest. In this subject students explore science as a distinctive way of thinking about and explaining events and phenomena. This subject aims to develop students' understanding of the creativity of science and technology concepts and investigative and innovative processes. As the subject also aims to investigate the impact of scientific discoveries and inventions on society, students will examine how various perspectives, such as cultural (including Australian Aboriginal and Torres Strait Islander) perspectives, explain natural phenomena. This subject will benefit students interested in teaching as a career to design authentic learning programs that explore how scientific discovery and invention are applied in everyday life.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2055 TESOL Teaching Methodology (10 Credit Points)
Subject Details (p. 5259) **Legacy Code:** 102474
This subject focuses on the process of teaching English as a foreign/second language. It aims to give students in the field of TESOL knowledge, skills and strategies in teaching such as choosing teaching approaches, selecting and sequencing language content, managing classrooms, evaluating and designing teaching and learning resources for a wide range of learner levels and types. The subject also aims to develop skills of critical reflection, action research and evaluation of their own practice for potential teachers.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2056 Teaching Art in the Early Years (10 Credit Points)
Subject Details (p. 5260) **Legacy Code:** 102671
This subject continues students' exploration of the creative arts and focuses on pedagogies to support the creative child. The role of the teacher and environment as art educators will be explored in detail, specifically the role of the pedagogical leader in facilitating meaningful, sustained and inclusive art experiences for the young child. Students will explore the relevance of the arts in the development of children's play and will engage with appropriate information and communication technologies for learning in the arts. Students will also draw from theory and research literature to critically analyse traditional and contemporary approaches to teaching the arts and the role of the teacher in supporting children's ability to make meaning from and express their social and cultural worlds.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2057 Teaching English as an Additional Language in Primary Schools (10 Credit Points)
Subject Details (p. 5261) **Legacy Code:** 102131
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. One in four children in Australia grows up in bilingual or multilingual households. Many of these children need support to develop their English. This subject aims to contribute to the overall course aims by preparing teacher education students to evaluate and critique strategies for the teaching of English as an Additional Language (EAL) or Dialect. Whilst the emphasis will be on developing an understanding of appropriate classroom strategies for learners of English as a second language within a mainstream cross-curricula program, particular emphasis will be given to the learning needs of and appropriate pedagogies for Aboriginal and Torres Strait Islander students learning English as an Additional Language/ Dialect.
Level: Undergraduate Level 2 subject
Equivalent Subjects: TEAC 3045 - Teaching English as a Second Language in K-6 Mainstream Classes – AREP
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2058 Wellbeing and Promoting Positive Learning Environments (10 Credit Points)
Subject Details (p. 5262) **Legacy Code:** 102129
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. The purpose of this subject is for prospective teachers to develop an understanding of the individual and contextual factors which influence children's behaviour and to apply this knowledge to building and maintaining positive learning environments. The subject focuses on proactive and preventative measures through the establishment of a healthy learning ecology. It draws upon professional experiences to apply sound theoretical foundations to base approaches to responding to a range of student behaviours while simultaneously promoting student mental health, wellbeing and resilience. The subject provides support for the development of an integrated management plan that reflects the diverse nature of children's behaviour and is informed by both theory and a critical evaluation of personal and professional dispositions.
Level: Undergraduate Level 2 subject
Equivalent Subjects: EDUC 2013 - Personal Development Health and Physical Education 2 (AREP)
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2060 Developing Aboriginal Languages K-6 (10 Credit Points)
Subject Details (p. 5263) **Legacy Code:** 102747
This subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander education program. This subject introduces teacher education students to the developing and planning processes required to develop Aboriginal and Torres Strait Islander languages and LOTE opportunities across K-6. Students will engage with the complexities in teaching Aboriginal languages. As they engage with a diverse array of themes, debates and contested issues in Australia's Aboriginal language revitalisation programs they develop understanding about protocols and consultations that are required to deliver programs in schools. Students will learn to create culturally-responsive learning experiences for primary classrooms that embrace Aboriginal and Torres Strait Islander histories and cultures and develop skills and knowledge in teaching Aboriginal languages.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2061 Teaching K-6: Pedagogies, Priorities and Capabilities (10 Credit Points)
Subject Details (p. 5264) **Legacy Code:** 102749
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. The subject will develop students' knowledge and skills for planning and teaching in K-6 classrooms using both the Cross-Curriculum Priority Areas (CPPA) through the incorporation of the seven General Capabilities (GC). The subject enables the delivery of learning area content focusing on key learning areas, HSIE and English at the same time as developing knowledge, understanding and skills relating to Aboriginal and Torres Strait Islander histories and cultures, Asia and Australia's engagement with Asia and/or Sustainability. The subject will explore how Literacy, Numeracy, ICT capability and Critical and creative thinking are fundamental in students becoming successful lifelong learners whilst the areas of Personal and social capability, Ethical understanding, and Intercultural understanding focus on ways of being, behaving and learning to live with others, and taught through the HSIE and English learning areas.
Level: Undergraduate Level 2 subject
Equivalent Subjects: TEAC 1021 - Learning Teaching and Technologies
Incompatible Subjects: TEAC 2036 - Learning Futures and Curriculum Integration
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2062 Teachers as Change Makers (10 Credit Points)
Subject Details (p. 5264) **Legacy Code:** 102796
Through engaged learning, Teachers as Change Makers builds professional teaching skills by enhancing pre-service teachers' understandings of the clientele with whom they will be professionally involved as teachers. This subject includes a practical component requiring a minimum of 25 hours of engaged learning in primary schools that provide support to children from a range of diverse backgrounds and experiences. Through practical experience such as learning support programs, the subject explores the criticality of ethical understandings and teaching practices that may influence the educational outcomes of children. In particular, this subject focuses on promoting the importance of reciprocal and reflexive teaching approaches for providing inclusive settings that make a difference to children's educational experiences and provides a space to critically explore how teaching practices can empower students and communities.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2063 History, Geography, Civics and Citizenship in the Primary Years (10 Credit Points)
Subject Details (p. 5266) **Legacy Code:** 102820
This subject provides opportunities for students to develop knowledge of the outcomes, subject matter, pedagogies and experiences that define the key learning area of History, Geography, Civics and Citizenship in primary (Kindergarten to Year 6) classrooms. Key concepts of change in family history, local history, and Australia's history and understanding Australia as a Nation are explored.
In Geography, concepts that develop a sense of curiosity about environments, peoples, cultures and place, are a priority. In Civics and Citizenship, the focus is on relationships between the individual and the state.? The values and mutual responsibilities and obligations for civil, political and social participation in Australian society are also explored. These areas enable students to develop their own content knowledge and understandings, skills and dispositions necessary for planning, programming and teaching. This subject promotes teaching strategies that prepare primary children to be informed and effective change agents.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2064 Contemporary Childhoods (Block) (10 Credit Points)
Subject Details (p. 5267) **Legacy Code:** 500073
In this subject students will engage in an exploration of what it means to be a child in a postmodern world and how different theoretical approaches influence ways of understanding children's lives. Alongside questions of how gender, sexuality, ethnicity, 'race', language, class, ability and religion are constituted through a child's identity, students will explore the notion of a child's subjectivity. A child's subjectivity is the conscious and unconscious thoughts and emotions of the child, their sense of self, their body and their way of understanding their relationship to the world. Building on this knowledge, students will also explore the four key child-environment identities of the physical child, the social child, the learning child and the natural child and by analysing a variety of scholarly and non-scholarly texts around childhood, children's bodies and behaviour will reflect on a child's individuality and emerging identity.
Level: Undergraduate Level 2 subject
Equivalent Subjects: TEAC 2009 - Contemporary Childhoods TEAC 2010 - Contemporary Childhoods
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2065 Digital Childhoods (10 Credit Points)
Subject Details (p. 5268)
This subject aims to develop students' understanding of children and adolescents' engagement in a digital environment, and how their experiences contribute to their understanding of their world and their role within it. Students will critically explore multiple aspects of digital engagement. This will include the various ways that children and adolescents use technology; the educational, economic, social, cultural and political factors that mediate their experiences; and the implications of their digital engagement for play, learning, social engagements, and identity. Students will examine the social impact of technologies on children and adolescents, and identify strategies to deliver and effect ethical change.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3002 Classroom Inquiry and improving professional practice (10 Credit Points)
Subject Details (p. 5269) **Legacy Code:** 102138
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. Teachers are continually seeking new ways of understanding and improving their practices in the classroom. A range of applied evidence-based research methods provides valuable tools to aid this process. This subject will introduce students to educational research methods in general and action research in particular. The subject will assist students to become reflective practitioners who are capable of making informed improvements to the way they apply teaching strategies in their professional practice as teachers. Students will apply their evolving understandings of evidence-based practice and focus on how they use ICT supported learning across a range of educational contexts.
Level: Undergraduate Level 3 subject
Co-requisite(s): TEAC 3022
Equivalent Subjects: LGYA 1484 - ICT and Research in Education
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3003 Community Responsive Pedagogies and Leadership (10 Credit Points)
Subject Details (p. 5269) **Legacy Code:** 102139
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This subject is designed to build on students' sociological understandings of primary schooling and how it impacts on First Nation peoples.. The subject builds on experiential, theoretical and curriculum knowledge developed in the course. Schools have a long tradition of working with communities at the 'chalkface' of social change. Such relationships are complex, evolving and spatially/temporally different because of a local/global sense of place and the socio-political context. Possibilities for promoting socially just practices for different communities are therefore contingent upon a range of strategies for inclusion. This subject examines theoretical frameworks that can assist in understanding the complexities of these processes and will incorporate a 5 day community engagement activity involving First Nation peoples.
Level: Undergraduate Level 3 subject
Equivalent Subjects: EDUC 3001 - Communities and Primary Schools
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3004 Creative Arts Education (10 Credit Points)
Subject Details (p. 5271) **Legacy Code:** 102647
This subject explores the importance of the creative arts in the primary classroom, addressing the content and pedagogies appropriate to dance, drama, music and visual arts. This subject has been designed to give students the opportunity to develop their knowledge, understanding, skills, confidence and competence in the five art forms of creative arts. It also provides students with the opportunity to develop their planning and teaching skills in the creative arts, through exploring pedagogies for the teaching of practical arts classes. This subject develops students as teachers who demonstrate creativity when teaching, empathy with diverse groups of student learners, a commitment to socially just schools and classrooms and who understand artistic processes. It aims to give students an understanding of the role of aesthetics, imagination and play in learning. An independent learning program also encourages learners to develop their own arts skills in three strands.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3005 Critical Literacies (10 Credit Points)
Subject Details (p. 5271) **Legacy Code:** 102678
This subject increases students' understanding of literacy as a dynamic, social and cultural practice. It explores the changing nature of literacy by globalisation, new technologies and the diversity of language/language dialects. Students will explore the importance of valuing children's culture, home language/dialect as an integral component to identity, particularly for bilingual and Aboriginal and Torres Strait Islander children. Issues of power and language are considered through social, cultural and critical theories surrounding diversity and difference, and how this shapes the decisions of educators to build the literacy capacities of all children. Students will learn about contemporary frameworks of literacy and language and draw on this knowledge to extend children's literacy learning.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3006 Education in a Cosmopolitan Society (10 Credit Points)
Subject Details (p. 5272) **Legacy Code:** 101661
This subject responds to the question of what it might mean to educate "world teachers" for a cosmopolitan age where classrooms and schools are being shaped by the increasing mobility of ideas, people, technology, media and finance. For some time, multicultural education, as policy and practice, has dominated schooling in Australia. While this was an important period in Australia, times have changed. The globalisation of teaching is one dimension of this change as supranational bodies more and more shape what teachers do. Set against these global agendas are the mobilities that teachers must respond to at the local level. This subject examines cosmopolitan social and education theory as a means to understand these dynamics, framing teachers as agents of change.
Level: Undergraduate Level 3 subject

TEAC 3008 English Language Linguistics (10 Credit Points)
Subject Details (p. 5273) **Legacy Code:** 102476
In 2021, this subject replaced by 102813 - English Talk. This subject offers students a formal study of the workings of the English language as it is used around the world. Using real-world examples, this subject builds on the content and skills which students have developed in the unit: English as an International Language. It prepares students with a thorough knowledge of variations in English across the globe, introducing them to the ways in which English varies at phonological, grammatical and register levels across contexts. This subject is essential for a student's development of more formal skills in the English language, developing their English knowledge and skill into a professional and personal asset.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LANG 3099 - English Talk
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3009 Ethical Futures (10 Credit Points)
Subject Details (p. 5273) **Legacy Code:** 101623
This subject is designed to build the leadership capacity of educators through exploring, understanding and expressing the values and ethics embedded in policy, practice and educational change. The subject also addresses the importance of ethically informed advocacy and its role in educational futures and democratic processes.
Level: Undergraduate Level 3 subject
Equivalent Subjects: TEAC 2047 - Policy Politics and Educational Futures
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3010 Health and Physical Education in the Primary Years (10 Credit Points)
Subject Details (p. 5274) **Legacy Code:** 102652
This subject is designed to explore the content and pedagogies of Health and Physical Education (HPE) in the PDHPE NSW K-6 curriculum. Students will develop an understanding of effective pedagogies of HPE. The knowledge and skills developed in this subject can be applied in the other subjects of study in the course and Professional Experience subjects. This subject aims to develop teachers who demonstrate empathy with diverse groups of student learners and commitment to socially just schools and classrooms.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3012 Global and Community Citizenship in Early Childhood (10 Credit Points)
Subject Details (p. 5275) **Legacy Code:** 102675
This subject explores the key concepts of learning and teaching in the areas of history, geography, civics and citizenship, and incorporates place studies, sustainability and environmental education. Aboriginal and Torres Strait Islander studies in birth to 5 years early childhood settings are a focus in this subject. The subject will explore a broad, complex and engaging field of study which reflects people as social beings who interact together and with the environment through and over time. Perspectives including those of Aboriginal and Torres Strait Islander peoples, socio-cultural influences and place-based pedagogies will be investigated. Students will be encouraged to explore their own place in Australian society and the way in which this contributes to their professional identity and teaching practice.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3013 Inclusive Practices (10 Credit Points)
Subject Details (p. 5276) **Legacy Code:** 102654
Effective and inclusive teaching requires knowledge of how students learn as well as proficiency in applying appropriately tailored teaching strategies to cater to needs of all students. The subject provides a foundation of knowledge and practice that facilitates development of appropriate and inclusive attitudes and skills for teaching learners with diverse needs in the regular classroom. It will address professional skills, approaches and relevant legislation in the implementation of the principles of inclusive education practices in primary school settings. In particular, the capacity to structure individualised education programs will be developed drawing on practical experiences and a broad familiarity with the field.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3014 Language and Literacy 2 (10 Credit Points)
Subject Details (p. 5277) **Legacy Code:** 102134
This subject will continue the development of students' understandings about language and literacy in a K-6 context. The subject will focus of the area of writing, including literary, factual, media and multi-media texts. Students will develop their theoretical knowledge about the teaching and learning of writing and the relationship between writing, reading, talking and listening.
Level: Undergraduate Level 3 subject
Equivalent Subjects: EDUC 2012 - Language and Literacy 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3015 Language and Literacy in Years 3-6 (10 Credit Points)
Subject Details (p. 5277) **Legacy Code:** 102650
The subject extends understandings of English content based on the strands of language, literature and literacy and the NSW Syllabus for the Australian Curriculum: English K-10 with a focus on years 3-6. Students will draw on contemporary theories of literacy learning and teaching, and will examine a repertoire of teaching and assessment strategies for deconstructing and constructing a range of texts in classrooms. By investigating a range of written and multimodal genres, their textual structures and grammar, students will develop their meta-semiotic awareness. This awareness is crucial when they plan to teach primary school students literacy skills related to various learning areas of the Australian Curriculum. In this subject, students' technological, pedagogical and content knowledge is progressively enhanced to prepare them to teach innovatively with digital media with simultaneous infusion of emergent language and literacy practices.
Level: Undergraduate Level 3 subject
Pre-requisite(s): TEAC 3016 Language and Literacy in the Early Years or TEAC 1020 Language and Literacy 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3016 Language and Literacy in the Early Years (10 Credit Points)
Subject Details (p. 5278) **Legacy Code:** 102646
The subject examines ways of understanding English content based on the strands of language, literature and literacy in the Australia Curriculum: English and the NSW K-6 English Syllabus. Students will understand how language skills are acquired and introduced to theories related to language and literacy learning, particularly from a sociocultural perspective. Students will explore the relationships between language, literacy and literature across a range of contexts with the focus on children in the early years, aged five to eight. Students will also develop an understanding of current theoretical and pedagogical approaches for English language teaching and learning with a focus on culturally and linguistically diverse learners. Students will determine young children's speaking, listening, reading, phonological and graphological awareness, and writing strengths and needs and develop strategies for teaching students in the early years.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3017 Learning Environments (10 Credit Points)
Subject Details (p. 5279) **Legacy Code:** 102679
This subject engages students in exploring the role of physical environments that support children's learning in early childhood and community settings. Theoretical perspectives, including Aboriginal and Torres Strait Islander perspectives, sociocultural influences and place-based pedagogies will be investigated. Relevant policy and regulation documents around risk, play and pedagogy will be examined. Through field visits to early childhood and community settings, students will have the opportunity to plan and design indoor and outdoor learning environments that encourage investigation and discovery using natural and open-ended materials. The overall focus of this subject is for students to develop an understanding and appreciation for learning environments that promote a connection to place and sustainability.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3019 Numeracy and Mathematics in Years 3-6 (10 Credit Points)
Subject Details (p. 5280) **Legacy Code:** 102649
This subject explores pedagogy specifically relating to the teaching and learning of primary mathematics in years 3 - 6. This subject is one of 16 subjects that provide opportunities for students as Pre-service Teachers to prepare for their future employment as a teacher and to engage with the key elements of the New South Wales Education Standards Authority (NESA). Students will develop skills in pedagogy and practice within the area of primary mathematics. The knowledge and skills developed in the other subjects of study in the course can be applied in this subject and the knowledge and skills developed in this subject can be applied in other subjects in the course.
Level: Undergraduate Level 3 subject
Pre-requisite(s): TEAC 2043 Numeracy and Mathematics in the Early Years or
TEAC 1010 Early Primary Mathematics
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3020 Primary Professional Experience 2: Working with Assessment Data for Instruction (10 Credit Points)
Subject Details (p. 5281) **Legacy Code:** 102648
This subject focuses on student data and assessment in relation to Pre-service Teachers' curriculum specialisation. As Pre-service Teachers, students will develop the capacity to interpret student assessment data to inform their teaching as well as develop knowledge of formal and informal assessment strategies. The subject has a two week (15 day) placement component, which provides opportunities to examine and interpret student data to inform planning and teaching. It also has one day on campus. Students will employ formal and informal assessment strategies to support student learning and inform teaching. Students are required to analyse their own learning in relation to the Graduate Teacher Standards as a review of the progress of their Learning Portfolio is undertaken in this subject.
Level: Undergraduate Level 3 subject
Pre-requisite(s): TEAC 2048
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3021 Primary Professional Experience 3: Engaging with Diverse Students and Communities (10 Credit Points)
Subject Details (p. 5282) **Legacy Code:** 102656
This subject provides students with the opportunity to participate in a 20-day professional experience set in the context of their future profession and under the supervision of qualified teachers. As Pre-service Teachers, students will develop an understanding of diverse learners within specific school and classroom contexts. Individual student's strengths, needs and learning styles will be identified to support the design and delivery of teaching experiences that will enhance engagement and learning. The subject also gives students an opportunity to reflect on the processes involved in the teaching cycle, and refine their competencies as beginning teachers. Students are required to analyse their own learning in relation to the Graduate Teacher Standards as a review of the progress of their Learning Portfolio.
Level: Undergraduate Level 3 subject
Pre-requisite(s): TEAC 3020
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3023 Professional Experience 4: Teaching in Country (10 Credit Points)
Subject Details (p. 5283) **Legacy Code:** 102141
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This subject will build on previous Professional Experience in the program. Students will be placed for 30 days in one of the partner local/regional/rural schools with a high Aboriginal and Torres Strait Islander student population. Students are required to develop skills related to effective planning, programming, evaluating and teaching in a teaching context, which will be assessed against the Graduate Teacher Standards and as part of their Teaching Performance Assessment (TPA). Students will experience how school and classroom curricula and policy are influenced by the nature of the school's community.
Level: Undergraduate Level 3 subject
Pre-requisite(s): TEAC 1029 AND
TEAC 2049 AND
TEAC 3040
Equivalent Subjects: LGYA 1486 - Professional Experience 3 Teaching in Context - AREP
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3025 Researching Practice (10 Credit Points)
Subject Details (p. 5285) **Legacy Code:** 102681
This subject develops students' capacity to engage with the tenets of research as they investigate and reflect on their teaching practice, pedagogy and professional identity as a practitioner. Students are introduced to research through action research. The students use the Principles and Practices sections from the Early Years Learning Framework to reflect on their pedagogy, which requires them to consider the strength of their practice and the subsequent areas for improvement to develop their teaching practice. Through this process, students develop an understanding of critical reflective practice and improvement cycles. The action research model requires students to explore research processes of data collection, analysis techniques, literature review and using this information to develop a new cycle of investigation.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3026 Responsive Pedagogies (10 Credit Points)
Subject Details (p. 5285) **Legacy Code:** 102676
Responsive, respectful and reciprocal relationships with children are a basic tenet of early childhood education and lead to quality outcomes for children. Interactions among children, adults and environments are key to children's learning. Responsive pedagogies use a relationship-based approach to nurture children and families' unique dispositions, cultural and social strengths. This subject promotes respectful interactions that are associated with social justice, equity, inclusivity and ethical practice. Responsive interactions require teachers to be engaged, to connect and use diverse, nuanced knowledge of curriculum and content to extend children's learning and thinking.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3028 Fostering Positive Behaviour in the Early Years (10 Credit Points)
Subject Details (p. 5286) **Legacy Code:** 102682
Educators have a key responsibility for guiding and facilitating young children's positive behaviours, their sense of belonging, and wellbeing. This subject provides students with an opportunity to analyse a range of theoretical approaches and various developmental and socio-cultural contextual factors that influence children's behaviours, learning and social interactions. Specifically, students will develop knowledge about diverse approaches to guiding children positively in partnership with families that are responsive to the children's needs, family's aspirations and expectations. Students will apply the legislative and ethical protocols in designing a guidance plan to support the development of positive behaviours and socio-emotional wellbeing in an early childhood setting. Students will also critically evaluate their personal and professional dispositions relating to guiding young children's positive learning and behaviours.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3029 TESOL Curriculum Design (10 Credit Points)
Subject Details (p. 5287) **Legacy Code:** 102477
This subject explores issues, approaches and stages in the TESOL curriculum design process within a range of contexts. It assists students to identify and implement effective strategies for planning, designing and evaluating language learning programs relevant to the needs of the learners and the contexts of learning.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3030 TESOL Placement (20 Credit Points)
Subject Details (p. 5288) **Legacy Code:** 102478
This subject provides students an opportunity to undertake a professional practice subject which consists of an internship in an English language teaching organisation for students of TESOL. It involves participation in the various aspects of the work of the teaching organisation, including classroom observation, service learning, supervised English language teaching practice component, and volunteer tutoring either in Australia or overseas. In-context placement experience assists TESOL students' career development.
Level: Undergraduate Level 3 subject
Pre-requisite(s): TEAC 2055
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3031 The Brain and Learning (10 Credit Points)
Subject Details (p. 5288) **Legacy Code:** 102207
Interest in the relationship between the brain and how people learn is at an all-time high. Surprisingly, most theories of teaching and learning say little about the brain. In an age where 'brain-based' educational products are a multimillion-dollar industry, there is a need for students, parents, and anybody with an interest in education to have some basic knowledge of the brain. This subject is designed to provide students with a straightforward introduction into the limitations and possibilities of brain function, especially with respect to memory and learning. In addition, this subject also examines motivation, exceptional learners, and challenging groups.
Level: Undergraduate Level 3 subject
Equivalent Subjects: TEAC 3034 - Young People Their Futures and Education
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3032 Understanding and Teaching in Context (10 Credit Points)
Subject Details (p. 5289) **Legacy Code:** 102136
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. The subject aims to directly challenge students to inquire into, reflect upon, collect classroom data, analyse and respond to the data and subsequently begin to develop a repertoire of pedagogies that cater to the needs of learners within contexts which reflect the diversity of today's educational settings. The subject aims to develop skills related to effective planning, programming, evaluating and teaching in a wide variety of teaching contexts in Primary classrooms.
Level: Undergraduate Level 3 subject
Co-requisite(s): TEAC 3040
Equivalent Subjects: LGYA 1494 - Understanding and Teaching in Context - AREP
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3033 Working and Teaching with Diverse Communities (10 Credit Points)
Subject Details (p. 5290) **Legacy Code:** 102655
This subject focuses on equity and social justice issues in diverse communities and educational settings. It explores a range of contemporary theoretical frameworks and pedagogical approaches that will develop students' understandings about the social construction of difference, identity and subjectivity within social, historical and political contexts. A critical awareness of the intersections between language, knowledge, power and discourse provides students with theoretical knowledge and practical analytical tools. Students will analyse and deconstruct inequalities and subjectivity in personal and professional contexts. They will apply this critical understanding to interrogate educational policies, programs, and services, and develop effective teaching and learning strategies for diverse and multilingual learners, including English as an Additional Language/Dialect and Aboriginal and Torres Strait Islander learners.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3036 Data and Assessment in the Primary classroom (10 Credit Points)
Subject Details (p. 5290) **Legacy Code:** 102754
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This subject investigates the functions and roles of assessment in K-6 classrooms. It considers ways in which assessment can provide positive support that enhances students' progression within the school context. Teacher education students will review, refine and develop their knowledge and skills connected with being an assessment-literate teacher in their own classrooms. The subject will explore both national and international data sets and how these inform policy, classroom practices and professional roles into the future.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3037 Engaging in the Profession (10 Credit Points)
Subject Details (p. 5291) **Legacy Code:** 102755
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. Students need to have a variety of experiences that are set in the context of their future profession. Through these experiences they need to draw together, as a capstone, all the previous subjects in the course, integrating them through a well-balanced program that allows the students to refine their skills as beginning teachers. This gives them opportunity to reflect on the processes involved, identify their competencies and assist the school by recognising potential issues and assisting in implementation of the resulting praxis. This subject includes all areas of foundations and curriculum complementing a final practicum experience that will show the interrelationship between theory and practice. It also addresses issues that assist in the development of the individual student toward their transition into teaching. Students will produce a professional learning portfolio in this subject to demonstrate achievement of the Graduate Teacher Standards. The learning portfolio will enable students to reflect deeply on their emerging skills and understanding, towards development of a critical perspective of their practice as a teacher.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 1496 - Engaging the Profession - (AREP)
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3038 Health and Physical Education 2 (10 Credit Points)
Subject Details (p. 5292) **Legacy Code:** 102752
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This subject further builds students' knowledge and understandings of the NSW Syllabus for the Australian Curriculum: Health and Physical Education K-10 (incorporating Health and Physical Education K-6) with a focus on the personal development and health components. Through an examination of the syllabus, modules and support documents, students will develop the necessary skills to design an effective scope and sequence for K-6 Health and Physical Education (HPE) and develop a program of work suitable for a Year 5 - 6 learner. Assessment and evaluation will be addressed and the need to develop descriptive student profiles relating to student achievement of outcomes will be highlighted.
Level: Undergraduate Level 3 subject
Pre-requisite(s): TEAC 2030 AND
TEAC 2058
Equivalent Subjects: EDUC 2005 - Personal Development Health Physical Education 1 (AREP)
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3039 Mathematics 1: Geometry, Number and Algebra Years K-6 (10 Credit Points)
Subject Details (p. 5293) **Legacy Code:** 102751
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This subject is designed to enhance teacher education students' understanding of the NSW Syllabus for the Australian Curriculum: Mathematics K-10. The subject provides greater understanding of the content areas of measurement, number, geometry, algebra and statistics in the K-6 classroom focusing on years 5 and 6 and into the secondary school mathematics curriculum. The subject makes clear links to secondary school (year 7) mathematics and will develop the students' conceptual understanding of mathematics and numeracy learning progression from primary to secondary school.
Level: Undergraduate Level 3 subject
Pre-requisite(s): TEAC 1028 AND
TEAC 1010
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3040 Professional Experience 3 (10 Credit Points)
Subject Details (p. 5294) **Legacy Code:** 102750
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This subject is a 10 credit point subject. The subject is designed to enable students to have direct experience of teaching in schools, building towards a final professional experience. The Professional Experience stream integrates with the curriculum content and pedagogy delivered in other course subjects. The rationale behind this Professional Experience subject is to give students the opportunity to synthesise and apply their knowledge and skills from all previous subjects for a total of 20 days. The teaching block will enable students to build or cement relationships with a school community. Teacher Education students will be able to consolidate their teaching through the integration of theory and practice as their final preparation as beginning teachers.
Level: Undergraduate Level 3 subject
Pre-requisite(s): TEAC 1029 AND
TEAC 2049
Incompatible Subjects: TEAC 3022 - Professional Experience 3 Engaging with the Profession
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3041 Science and Technology 2 (10 Credit Points)
Subject Details (p. 5295) **Legacy Code:** 102753
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This subject is designed to enhance prior work in the science and technology areas with a particular focus on the primary years: 3 – 6. The significance of children's views is emphasised in the selection, design and sequencing of activities for primary students in science and technology experiences through the four content areas: Biological sciences, Chemical sciences, Earth and Space sciences and the Physical sciences. Emphasis will be given to Aboriginal and Torres Strait Islander science elaborations and to develop authentic locally driven, land based teaching of content and classroom resources.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3043 Reading Children's Literature and Digital Texts (10 Credit Points)
Subject Details (p. 5296) **Legacy Code:** 102798
In this subject students will gain knowledge and understanding about using children's literature and digital texts to teach reading, critical literacy, comprehension, media literacy and how texts convey meaning through choices in language (written) and images (visual). It will explore how children's literature and digital contexts can be used in a K-6 classroom for the teaching of the mechanics of reading, information literacy, comprehension skills (literal, implied, inferential), text design and the social construction of texts. It will develop students deeper understanding of the four resources model of reading and viewing: text decoder, text participant, text user and text analyst. This subject will examine literature experiences and practices in digital environments and the principles of interactivity, connectivity and access that now characterise the reading experience in the digital age. Through the subject, students will be introduced to a language to talk about both written and visual texts by focusing on the meaning making resources used in constructing the texts.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3044 STEM Principles and Practices in the Primary Years (10 Credit Points)
Subject Details (p. 5297) **Legacy Code:** 102797
The purpose of this subject is for students to gain exposure to authentic contexts for integrating science, technology, engineering and mathematics (STEM) and to develop knowledge and skills with designing and implementing STEM learning experiences. Students will have the opportunity to complete authentic interdisciplinary STEM tasks, and draw upon this experience to design and implement interdisciplinary STEM learning activities aligned to syllabus outcomes. This subject will allow students to simulate and evaluate the teaching practices associated with high-quality interdisciplinary STEM lessons.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3046 Engaging Pedagogies (10 Credit Points)
Subject Details (p. 5298) **Legacy Code:** 102819
This subject is designed to prepare students for their role as active, thoughtful leaders of learning environments for children in the primary years. It challenges students to inquire and reflect upon contemporary issues that affect learning and teaching in classrooms, including working with students from low socio-economic backgrounds, culturally and linguistically diverse (CALD) students, students who have English as an additional language or dialect (EAL/D), Aboriginal and Torres Strait Islander learners, and students from diverse religious backgrounds. It enables students to investigate and consider a range of contemporary pedagogical approaches to facilitate substantive student engagement, and relate these to educational philosophy and contemporary learning theories.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3047 Pedagogical Leadership (10 Credit Points)
Subject Details (p. 5298) **Legacy Code:** 102822
Early childhood teachers have a significant role in providing the pedagogical leadership required to deliver quality early childhood services for children and families. This subject introduces key concepts of pedagogical leadership which are then applied in other subjects in the course. In this subject students examine a range of theoretical perspectives and approaches to curriculum and analyse the ways different theories and approaches shape pedagogical practices. Students will have opportunities to research contemporary theories of early childhood education, reflect on their own beliefs and values, refine their personal philosophy of teaching and learning, and consider the implications for their future role as pedagogical and educational leaders in early childhood settings.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3048 Creative Arts 2 (10 Credit Points)
Subject Details (p. 5299) **Legacy Code:** 102851
This subject examines theoretical models and pedagogical practices for using Dance, Drama and Media Arts in primary classrooms and builds on the subject 102125 Creative Arts. Students will develop a range of skills required in the teaching of the arts that support young learner's self-efficacy and awareness. Aboriginal media and performing arts form the basis for strong cultural identity formations for all students. The subject focuses on positive media representations, personal histories and experiences that shape and influence Aboriginal and Torres Strait Islander peoples and their community life.
Level: Undergraduate Level 3 subject
Pre-requisite(s): TEAC 2013
Incompatible Subjects: TEAC 2059 - Creative Arts 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3049 Mathematics in Early Childhood (10 Credit Points)
Subject Details (p. 5300)
This subject explores the powerful mathematical and numeracy ideas that shape children's lives from birth to five years. Students will develop the ability to identify, assess and plan for young children's diverse mathematical and numeracy understandings, whilst using current curriculum frameworks and theoretical underpinnings to guide them. This subject will support students to make connections to mathematics and numeracy in everyday life, develop knowledge of effective pedagogical practices, and develop positive dispositions towards being a teacher of mathematics in the early years.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3050 Professional Practice Birth - 3 Years (10 Credit Points)
Subject Details (p. 5301)
This subject includes intensive on-campus workshops, as students complete a 10-day placement with children under the age of two years and a second 15-day placement with children two – three years of age. There is a strong focus on building relationships with children, staff and families as well as adhering to work health and safety and the Australian Children's Education and Care Quality Authority's (ACECQA) National Quality Standards. Students will assess children's learning and socio-cultural context and use this knowledge to plan innovative and engaging play-based learning experiences.
Level: Undergraduate Level 3 subject
Pre-requisite(s): TEAC 2023 Engaging in Early Childhood
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3051 Creativity and Cultural Wellbeing for Communities (10 Credit Points)
Subject Details (p. 5302)
Creativity and cultural wellbeing explore how art making can foster individual, community wellbeing and global citizenship. Cultural wellbeing is broadly understood as the vitality of relationships between people, place and the freedom to participate in recreation, creative and cultural activities. In the practice-based modules students will experiment with art genres and reflect on how creative processes can facilitate embodiment, belonging, safe spaces for cultural expression, intergenerational wellbeing, relationship to place, creative agency and adaptability. Students will identify a social issue that is important to them or their community and apply design strategies to lead a creative community project.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 4001 Connecting to the Profession (10 Credit Points)
Subject Details (p. 5303) **Legacy Code:** 102658
This subject will assist students in the transition from a Pre-Service Teacher into a practising teacher. Students will develop their professional identity and teaching philosophy. The subject is designed to inform students of the importance of continued professional learning, the relationship between professional and community organisations in supporting educators, and how these influence student outcomes. It will build awareness of skills and practices that will help facilitate students' personal wellbeing and resilience in their teaching career.
Level: Undergraduate Level 4 subject
Pre-requisite(s): TEAC 1031 AND
TEAC 1006 AND
TEAC 1023 AND
TEAC 1015 AND
TEAC 1034 AND
TEAC 1027 AND
TEAC 1016 AND
TEAC 1011 AND
TEAC 3021
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 4002 Developing Primary Mathematics (10 Credit Points)
Subject Details (p. 5303) **Legacy Code:** 102135
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This subject is designed to extend the development of mathematical concepts, skills and understandings for children from years 3 to 6 based on the Australian curriculum and the NSW Educational Standards Authority (NESA) requirements. An awareness of relevant research and curriculum documents, combined with the practical knowledge of teaching, learning and assessment strategies, will assist teachers to program and implement a series of investigative experiences that will enhance the conceptual knowledge of their students.
Level: Undergraduate Level 4 subject
Equivalent Subjects: EDUC 2009 - Developing Primary Mathematics (AREP)
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 4003 Early Literacies (10 Credit Points)
Subject Details (p. 5304) **Legacy Code:** 102684
This subject explores the history of literacy in the early years from different theoretical perspectives and the tensions between theory, expectations and practice. It breaks down language development for diverse learners and develops students' understanding of strategies to scaffold children's language learning and development when working in diverse community contexts. The subject builds on the previous subject of Critical Literacies and focuses the changing nature of literacy and the diverse literacy pathways individuals take up. Students will investigate the processes children go through when speaking, listening, reading and writing in the early years, and the interrelatedness of these processes to make meaning. Students will develop play-based, literacy-enriched experiences underpinned by contemporary literacy perspectives.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 4004 Leadership in Practice Leadership, Research and Practice (10 Credit Points)
Subject Details (p. 5305) **Legacy Code:** 102687
This subject explores the complexity of leadership in the early childhood context. Students will analyse leadership theories and consider how the leadership role can and does influence the quality of practitioners' practices and Early Childhood Education and Care (ECEC) service provision. Students will reflect on their professional identity, values, experiences, knowledge and practices to develop a personal perspective of how effective leadership is enacted to lead staff teams, partner with families and strengthen relationships with the local community. A critical analysis of how leadership influences pedagogy, relationships, collaboration, and change will provide a basis for developing a professional portfolio.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 4006 Primary Professional Experience 4a: Transition into the Profession 1 (10 Credit Points)
Subject Details (p. 5306) **Legacy Code:** 102659
Students will participate in a 30-day professional experience set in the context of their future profession and under the supervision of qualified teachers. This is the final professional experience subject in your degree. The completion of this Professional Experience recognises you as a conditionally qualified teacher. This subject aims to recognise your shift from pre-service teacher to beginning teacher. Students will be prepared by exploring issues involved in understanding the needs of learners within specific school and classroom contexts, and will design and teach experiences in ways that will enhance student engagement and student learning outcomes. The subject is designed to develop your professional identity and the importance of continued professional learning, the relationship between professional and community organisations in supporting educators, and how these influence student outcomes. It will build awareness of skills and practices that will help facilitate preservice teacher's personal wellbeing and resilience in their teaching career. The subject links theory and practice and enables students to construct new knowledge and new ways of practice as part of their transition into the teaching profession. In line with primary teaching specialisation requirements, your professional experience may focus on teaching, evaluating and assessing in the subject area of Science and Technology. Students are required to analyse their own learning in relation to the Graduate Teacher Standards through the completion of a Learning Portfolio and the TPA (Teaching Performance Assessment).
Level: Undergraduate Level 4 subject
Pre-requisite(s): TEAC 3021
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 4007 Primary Professional Experience 4b: Transition into the Profession 2 (10 Credit Points)
Subject Details (p. 5307) **Legacy Code:** 102660
This subject is an Internship and as such is an intensive period of in-school experience that will induct students into the nature, structure and organisation of schools and the work, roles and responsibilities of teachers. The internship is a valuable opportunity for further professional learning guided by an experienced mentor teacher. To allow a strong focus on quality of preparation, reflection and deep evaluation, the expectation is that each intern will teach 60 per cent of a full teaching load. Interns do not have to be supervised in the same way as a Pre-Service Teacher on previous professional experience subjects. Interns may be left unsupervised to take responsibility for groups of students. It is expected that Principals and Mentor Teachers will assign duties and responsibilities to Interns at a level appropriate for an early career teacher. The NSW Education Standards Authority (NESA) requires all Pre-Service Teachers entering an internship to have been assessed within the preceding supervised Professional Experience as achieving all the requirements of the Professional Standards for Graduate Teachers. As such the internship provides not only an opportunity for consolidation of these standards but also preparation towards standards appropriate for full accreditation at Professional Competence level in early teaching years.

TEAC 4009 Professional Practice 3-5 years (10 Credit Points)
Subject Details (p. 5307) **Legacy Code:** 102686
This subject begins with a series of tutorials. The subject is the final professional experience subject in the Bachelor of Education (Early Childhood), comprising of a 35-day placement with children aged 3-5 years. It has a strong focus on pedagogical leadership, initiating and sustaining collaborative partnerships with staff, children and families, and implementation of integrated curriculum through effective programming and planning. The subject facilitates in-depth investigation and critical thinking, preparing students to connect to children's social worlds and provide innovative, inclusive and meaningful learning environments. This subject requires students to apply the principles, practices and outcomes of Belonging, Being and Becoming: The Early Years Learning Framework for Australia.
Level: Undergraduate Level 4 subject
Pre-requisite(s): TEAC 3050 Professional Practice Birth – 3 years
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 4010 Researching Professional Practice (10 Credit Points)
Subject Details (p. 5309) **Legacy Code:** 102657
The subject is designed to develop students' skills and expertise in investigating their own teaching in Science and Technology. The subject facilitates a researcherly disposition towards their own professional practice. Students will focus on a specific aspect of their teaching practice related to the concept of engagement and critically reflect upon their own evolving professional identity, philosophy and practice. The subject draws upon key principles and methods of participatory action research to facilitate students' skills and expertise as teacher-researchers. Students will plan an action research proposal that could be implemented in their future practice.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 4011 Inclusion in the Early years (10 Credit Points)
Subject Details (p. 5309) **Legacy Code:** 102685
Inclusion is both a right and an expectation for all children. Its effectiveness, however, depends upon teachers having the competencies, dispositions and skills to advocate for equity of access, participation and inclusion for children with a broad range of abilities within early childhood settings. In this subject, students reflect on the social construction of disability, policy and research in relation to the identification of additional needs, intervention and inclusion. Students will learn to assess curriculum and environments for learning, and to design, evaluate and communicate inclusive plans. The subject will focus on enhancing quality inclusive early childhood education through responsive adaptation and modification of the environment, curriculum and teaching practices. The importance of forming genuine partnerships with families and collaborating with the team around the child are advocated as essential for effective inclusion.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 4012 Teaching EAL/D Students in the Primary Years (10 Credit Points)
Subject Details (p. 5310) **Legacy Code:** 102799
The 2016 ABS Census reveals that Australia is a 'fast changing, ever expanding culturally diverse nation'. One in four Australian children come from language backgrounds other than English including children born in Australia and immigrants, refugees and asylum seekers arriving in Australia each year. Many of these students will require English language learning support in the classroom. This support will vary depending on learner needs and language proficiency. The focus of this subject is to provide initial education teachers with a foundation of theoretical principles related to teaching and learning English. The emphasis will be on developing an understanding of appropriate classroom strategies within a mainstream, cross-curricula program, for learners of English as a second language including appropriate pedagogies for Aboriginal and Torres Strait Islander students.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 4018 Management and Administration in Early Childhood Settings (10 Credit Points)
Subject Details (p. 5311)
Early childhood teachers work in complex and dynamic environments that are influenced by historical, social, cultural and political contexts. As advocates for quality children and family services that embrace social justice, inclusivity and equity, early childhood teachers must enact their ethical, legal and professional responsibilities. Early Childhood Education and Care (ECEC) services are similar to small businesses, requiring teachers to be knowledgeable about systems, strategies and processes to meet organisation goals and mandatory regulatory and licensing requirements. This subject builds students foundational skills in strategic planning, policy development, staff management, conflict resolution and team building. Students will investigate effective management and administration dimensions, including human resources, marketing, financial accountability, governance and compliance processes.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5001 Aboriginal Studies Curriculum 1 (10 Credit Points)
Subject Details (p. 5312) **Legacy Code:** 102873
The subject will examine and model effective contemporary classroom practice in teaching Aboriginal Studies in Stages 4 and 5. The subject will provide opportunities to engage with the inquiry pedagogy. The specifics of the relevant NSW Education Standards Authority Years 7-10 Syllabuses and links with the K-6 curriculum will be analysed and critiqued as will current Australian and NSW educational/curriculum policies and priorities. Emphasis will be placed on principles underlying Aboriginal Studies teaching to develop innovative lesson and subject planning, choose relevant and creative texts and how to create authentic assessment tasks and apply consistent feedback for student learning. Opportunities for investigation and discussion of current research particularly related to the development of inquiry, concepts and skills will be presented.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7027 AND
TEAC 7004 AND
TEAC 7032
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5002 Aboriginal and Society Studies Curriculum 2 (10 Credit Points)
Subject Details (p. 5313) **Legacy Code:** 102874
The subject will build on Aboriginal Studies Curriculum 1 and examine and model effective innovative classroom practice in teaching senior Aboriginal Studies and Society Studies in Stage 6. The subject will provide opportunities to engage with the inquiry pedagogy and social science thinking. The specifics of the relevant NSW Education Standards Authority Years stage 6 Syllabuses will be analysed and critiqued as will current Australian and NSW educational/curriculum policies and priorities. Emphasis will be placed on principles underlying sociological and Indigenous studies teaching to develop innovative lesson and subject planning, choose relevant sources, and how to create authentic assessment tasks and apply consistent feedback for student learning. Opportunities for investigation and discussion of current research particularly related to the development of senior inquiry project, and subject specific concepts will be presented.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7027 AND
TEAC 7004 AND
TEAC 7032
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5003 Business Studies/Commerce Curriculum 1 (10 Credit Points)
Subject Details (p. 5314) **Legacy Code:** 102875
The subject will examine and model effective contemporary classroom practice in teaching Commerce in Stages 4 and 5. The subject will provide opportunities to engage with the inquiry pedagogy. The specifics of the relevant NSW Education Standards Authority Years 7-10 Syllabuses and links with the K-6 curriculum will be analysed and critiqued as will current Australian and NSW educational/curriculum policies and priorities. Emphasis will be placed on principles underlying Commerce teaching to develop innovative lesson and subject planning, choose relevant and creative texts and how to create authentic assessment tasks and apply consistent feedback for student learning. Opportunities for investigation and discussion of current research particularly related to the development of inquiry, concepts and skills will be presented.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7027 AND
TEAC 7004 AND
TEAC 7032
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5004 Business Studies/Legal Studies/Economics Curriculum 2 (10 Credit Points)
Subject Details (p. 5315) **Legacy Code:** 102876
The subject will build on Commerce/Business Studies Curriculum 1 and examine and model effective innovative classroom practice in teaching senior Business Studies, Legal Studies and Economics in Stage 6. The subject will provide opportunities to engage with the inquiry pedagogy and historical thinking. The specifics of the relevant NSW Education Standards Authority Years stage 6 Syllabuses will be analysed and critiqued as will current Australian and NSW educational/curriculum policies and priorities. Emphasis will be placed on principles underlying Business, Economics and Legal Studies teaching to develop innovative lesson and subject planning, choose relevant sources, and how to create authentic assessment tasks and apply consistent feedback for student learning. Opportunities for investigation and discussion of current research particularly related to the development of senior inquiry, and subject specific concepts will be presented.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7027 AND
TEAC 7004 AND
TEAC 7032
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5005 English Curriculum 1 (10 Credit Points)
Subject Details (p. 5317) **Legacy Code:** 102863
The subject will examine and model effective contemporary classroom practice to develop students' pedagogical content knowledge in the teaching of English. The subject will provide opportunities to engage with English teaching in all textual forms including spoken, written and visual forms to build meaning. The specifics of the relevant NSW Education Standards Authority Years 7-10 Syllabus and links with the K-6 curriculum will be analysed and critiqued as will current Australian and NSW educational/curriculum policies and priorities. Emphasis will be placed on principles underlying English teaching to develop innovative lesson and subject planning, choose relevant and creative texts to create authentic assessment tasks and apply consistent feedback for student learning. Opportunities for investigation and discussion of current research into the teaching of English and different approaches to the study of texts will be important.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7027 AND
TEAC 7004 AND
TEAC 7032
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5006 English Curriculum 2 (10 Credit Points)
Subject Details (p. 5318) **Legacy Code:** 102864
This subject extends pedagogical content knowledge about the teaching of English provided in English Curriculum 1. Responses to texts and composing meaning for communication, knowledge, enjoyment and agency for senior students is presented in this subject. Opportunities for quality literature of past and contemporary societies and engage with the literature and literary heritage of Aboriginal and Torres Strait Islander Peoples is provided. The design, selection and application of pedagogical choices for senior students in lesson sequences, text selections, subject planning and assessment is the focus of the subject. Professional learning and the critical discussion of educational research in teaching English is explored.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7027 AND
TEAC 7004 AND
TEAC 7032
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5007 English Curriculum 3 (10 Credit Points)
Subject Details (p. 5319) **Legacy Code:** 102865
The subject will examine and model effective contemporary classroom practice in teaching adolescent reading within the discipline of English. The subject will provide opportunities to engage with adolescent literature. The specifics of the relevant NSW Education Standards Authority Years 7-10 Syllabus and links with the K-6 curriculum will be analysed and critiqued as will current Australian and NSW educational/curriculum policies and priorities. Emphasis will be placed on principles underlying English teaching to develop innovative lesson and subject planning, choose relevant and creative texts and how to create authentic assessment tasks and apply consistent feedback for student learning. Opportunities for investigation and discussion of current research particularly related to the development of cultural capacity using critical and imaginative English teaching will be presented.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7027 AND
TEAC 7004 AND
TEAC 7032
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5008 English Curriculum 4 (10 Credit Points)
Subject Details (p. 5320) **Legacy Code:** 102866
The subject will examine and model effective contemporary classroom practice in teaching adolescent writing within the discipline of English. The subject will provide opportunities to engage with the craft of writing. The specifics of the relevant NSW Education Standards Authority Years 7-12 Syllabuses and links with the K-6 curriculum will be analysed and critiqued as will current Australian and NSW educational/curriculum policies and priorities. Emphasis will be placed on principles underlying English teaching to develop innovative lesson and subject planning, choose relevant and creative texts and how to create authentic assessment tasks and apply consistent feedback for student learning. Opportunities for investigation and discussion of current research particularly related to the development of cultural capacity using critical and imaginative writing will be presented.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7027 AND
TEAC 7004 AND
TEAC 7032
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5009 Geography Curriculum 1 (10 Credit Points)
Subject Details (p. 5321) **Legacy Code:** 102871
The subject will examine and model effective contemporary classroom practice in teaching Geography in Stages 4 and 5. The subject will provide opportunities to engage with the inquiry pedagogy. The specifics of the relevant NSW Education Standards Authority Years 7-10 Syllabuses and links with the K-6 curriculum will be analysed and critiqued as will current Australian and NSW educational/curriculum policies and priorities. Emphasis will be placed on the principles underlying Geography teaching to develop innovative lesson and subject planning, choose relevant geographical tools, create authentic assessment tasks, and apply consistent feedback for student learning. Opportunities for investigation and discussion of current research particularly related to the development of geographical inquiry, concepts and skills will be presented.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7027 AND
TEAC 7004 AND
TEAC 7032
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5010 Geography Curriculum 2 (10 Credit Points)
Subject Details (p. 5322) **Legacy Code:** 102872
The subject will build on Geography Curriculum 1 and examine and model effective innovative classroom practice in teaching senior Geography in Stage 6. The subject will provide opportunities to engage with the inquiry pedagogy and historical thinking. The specifics of the relevant NSW Education Standards Authority Years stage 6 Syllabuses will be analysed and critiqued as will current Australian and NSW educational/curriculum policies and priorities. Emphasis will be placed on the principles underlying Geography teaching to develop innovative lessons and subject planning, choose relevant geographical tools, create authentic assessment tasks and apply consistent feedback for student learning. Opportunities for investigation and discussion of current research particularly related to the development of senior geographical inquiry, and subject specific concepts will be presented.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7027 AND
TEAC 7004 AND
TEAC 7032
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5011 HSIE Curriculum 3 (10 Credit Points)
Subject Details (p. 5323) **Legacy Code:** 102869
The subject build upon curriculum subjects in Human Society and its Environment (HSIE) for teaching in Stages 4 and 5. The subject will provide deeper opportunities to engage with the inquiry pedagogy. The specifics of the relevant HSIE NSW Education Standards Authority Years 7-10 Syllabuses and links with the K-6 curriculum will be analysed and critiqued as will current Australian and NSW educational/curriculum policies and priorities. Emphasis will be placed on principles underlying HSIE such as Aboriginal and Torres Strait Islander perspectives, Civics and Citizenship, sustainability and heritage. Opportunities to engage in site and field studies within HSIE will be a strong focus within the subject. The subject will comprise critical exploration of current research particularly related to the development of pedagogical inquiry and concepts.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7027 AND
TEAC 7004 AND
TEAC 7032
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5012 HSIE Curriculum 4 (10 Credit Points)
Subject Details (p. 5324) **Legacy Code:** 102870
The subject build upon curriculum subjects in Human Society and its Environment (HSIE) for teaching in Stage 6. The subject will provide deeper opportunities to engage with the critical inquiry pedagogy. The specifics of the relevant HSIE NSW Education Standards Authority Stage 6 Syllabuses will be explored. Emphasis will be placed on principles underlying HSIE such as Aboriginal and Torres Strait Islander perspectives, Civics and Citizenship, sustainability and heritage for senior students in relevant humanities and social science disciplines. Opportunities to engage in project based inquiry to support senior curriculum in HSIE will be a strong focus within the subject. The subject will comprise critical exploration of current research particularly related to the development of pedagogical inquiry and concepts for senior students.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7027 AND
TEAC 7004 AND
TEAC 7032
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5013 History Curriculum 1 (10 Credit Points)
Subject Details (p. 5325) **Legacy Code:** 102867
The subject will examine and model effective contemporary classroom practice in teaching History in Stages 4 and 5. The subject will provide opportunities to engage with the inquiry pedagogy. The specifics of the relevant NSW Education Standards Authority Years 7-10 Syllabuses and links with the K-6 curriculum will be analysed and critiqued as will current Australian and NSW educational/curriculum policies and priorities. Emphasis will be placed on principles underlying History teaching to develop innovative lesson and subject planning, choose relevant and creative texts and how to create authentic assessment tasks and apply consistent feedback for student learning. Opportunities for investigation and discussion of current research particularly related to the development of historical inquiry, concepts and skills will be presented.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7027 AND
TEAC 7004 AND
TEAC 7032
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5014 History Curriculum 2 (10 Credit Points)
Subject Details (p. 5326) **Legacy Code:** 102868
The subject will build on History Curriculum 1 and examine and model effective innovative classroom practice in teaching senior History in Stage 6. The subject will provide opportunities to engage with the inquiry pedagogy and historical thinking. The specifics of the relevant NSW Education Standards Authority Years Stage 6 Syllabuses will be analysed and critiqued as will current Australian and NSW educational/curriculum policies and priorities. Emphasis will be placed on principles underlying Modern and Ancient History teaching to develop innovative lesson and subject planning, choose relevant sources, and how to create authentic assessment tasks and apply consistent feedback for student learning. Opportunities for investigation and discussion of current research particularly related to the development of senior historical inquiry, historiography, and subject specific concepts will be presented.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7027 AND
TEAC 7004 AND
TEAC 7032
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5015 Languages Curriculum 1 (10 Credit Points)
Subject Details (p. 5328) **Legacy Code:** 102889
This subject explores contemporary and differentiated approaches to teaching Languages in secondary contexts. Students will use relevant syllabus documents to develop innovative and engaging lesson plans. Students will apply a range of effective teaching strategies designed to engage a diversity of learners in a supportive classroom environment. Digital and other aural/oral resources to assess and improve learning in the discipline to develop language acquisition and cultural understanding will be explored. Opportunities for investigation and discussion of current research particularly related to the development of cultural capacity in Languages teaching will be presented.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7027 AND
TEAC 7004 AND
TEAC 7032
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5016 Languages Curriculum 2 (10 Credit Points)
Subject Details (p. 5329) **Legacy Code:** 102890
This subject explores contemporary and differentiated approaches to teaching Languages in senior secondary contexts and builds on Languages Curriculum 1. Students will use relevant syllabus documents to develop innovative and engaging lesson plans that cater for a range of HSC language courses and levels. Students will apply a range of effective teaching strategies designed to engage a diversity of learners in a supportive, rich and culturally responsive classroom environment. Digital and other aural/oral resources to assess and improve learning in the senior years in the discipline to develop language acquisition and cultural understanding will be explored. Opportunities for investigation and discussion of current research particularly related to the development of cultural capacity in Languages teaching will be presented.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7027 AND
TEAC 7004 AND
TEAC 7032
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5017 Languages Curriculum 3 (10 Credit Points)
Subject Details (p. 5330) **Legacy Code:** 102891
In this subject, the place of Languages in secondary curriculum will be further explored using evidence-based approaches for curriculum development and alignment and to plan for effective teaching and learning, including formative and summative assessment. Pre-service teachers will learn approaches for teaching a range of Languages using inquiry pedagogy. They will a focus on assessment design for range of levels in Language teaching and the importance of culturally situated learning. The subject will demonstrate approaches for engaging diverse secondary learners from native speakers to beginners. Pre-service teachers will develop subject and assessment plans and demonstrate a knowledge of curriculum, learning and assessment theory. The subject requires students to develop original portfolio of teaching artefacts that demonstrate capacity to create and critique resources for effective teaching and learning in Languages.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7027 AND
TEAC 7004 AND
TEAC 7032
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5018 Languages Curriculum 4 (10 Credit Points)
Subject Details (p. 5331) **Legacy Code:** 102892
This subject provides pedagogical and curriculum enrichment to the teaching of Languages and builds on methods and concepts from earlier Languages Curriculum subjects. It explores approaches to language teaching; designing and implementing classroom language learning activities; developing the skills and knowledge to teach the language macro-skills of reading, writing, listening and speaking; classroom management; materials evaluation and selection; technological aids to language teaching/learning; reflecting on and evaluating teaching. Pre-service teachers will develop subject and assessment plans and demonstrate a knowledge of curriculum, learning and assessment theory. The subject requires students to develop critique resources and practices for effective teaching and learning in Languages.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7027 AND
TEAC 7004 AND
TEAC 7032
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5019 Mathematics Curriculum 1 (10 Credit Points)
Subject Details (p. 5332) **Legacy Code:** 102893
The subject will examine and model effective contemporary classroom practice to develop students' pedagogical content knowledge in the teaching of Mathematics. The subject will provide opportunities to engage with teaching Mathematics across strands and courses in years 7-10. The specifics of the relevant NSW Education Standards Authority Years 7-10 Syllabus and links with the K-6 curriculum will be analysed and critiqued as will current Australian and NSW educational/curriculum policies and priorities. Emphasis will be placed on principles underlying Mathematics teaching to develop innovative lesson and subject planning, choose relevant data and contexts to create authentic assessment tasks and apply consistent feedback for student learning. Opportunities for investigation and discussion of current research particularly related to the development of applied and inquiry based Mathematics learning will be presented.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7027 AND
TEAC 7004 AND
TEAC 7032
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5020 Mathematics Curriculum 2 (10 Credit Points)
Subject Details (p. 5333) **Legacy Code:** 102894
All students seeking a first secondary teaching area qualification must complete Years 11-12 Mathematics teaching methodology subject. The subject will examine and model effective contemporary classroom practice to develop students' pedagogical content knowledge. The specifics of the relevant Board of Studies NSW Years 11-12 Syllabus and links with the Years 7-10 curriculum will be analysed and critiqued as will current Australian and NSW educational/curriculum policies and priorities. Emphasis will be placed on principles underlying engaged inquiry teaching within the specific secondary subject, on creativity and quality teaching outcomes, on innovative program, subject and lesson planning and on the role of student data in authentic and appropriate assessment practices. Students will have opportunities for investigation and discussion of current research particularly related to sustainability and diversity in the teaching of the specific subject area.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7027 AND
TEAC 7004 AND
TEAC 7032
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5021 Mathematics Curriculum 3 (10 Credit Points)
Subject Details (p. 5334) **Legacy Code:** 102895
This subject enables students to extend their knowledge of Mathematics education with a particular focus on STEM in years 7-10. Students will explore their role in implementing the general capabilities of numeracy, both within the mathematics curriculum and in supporting the capable and confident use of mathematics across other learning areas at school and in society. A range of informed approaches to catering for the diverse needs of students to the middle years of schooling including intervention and appropriate challenge will be addressed. Issues in education such as Mathematics teaching for productive disposition will be explored with further professional and applied research into Mathematics education.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7027 AND
TEAC 7004 AND
TEAC 7032
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5022 Mathematics Curriculum 4 (10 Credit Points)
Subject Details (p. 5335) **Legacy Code:** 102896
This subject enables students to extend their knowledge of Mathematics education with a particular focus on differentiated and applied syllabuses in years 11-12. Students will explore their role in implementing the general capabilities of numeracy, both within the mathematics curriculum and in supporting the capable and confident use of mathematics across society and future work. A range of informed and evidence based approaches to cater for the diverse needs and challenges of students in the senior years of schooling will be addressed. Issues in education such as Mathematics self-efficacy, critical and creative thinking will be explored with further professional and applied research into Mathematics education for senior students.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7027 AND
TEAC 7004 AND
TEAC 7032
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5023 Mental Health in Educational Contexts (10 Credit Points)
Subject Details (p. 5336) **Legacy Code:** 102912
This subject is designed to promote the application and integration of current psychological and educational pedagogy, theory, evidence and best practice in supporting students who may be experiencing mental health challenges in educational settings. A problem-based approach to learning and teaching is used, employing case-based vignettes depicting various specific mental health presentations. Students are required to determine how they will develop student, classroom and curriculum level interventions to promote the wellbeing and learning of young people in educational settings. This occurs through small group work and self-directed research in which students are encouraged to utilise their prior knowledge in the topic area and identify the gaps in their knowledge as they attempt to solve the problem whilst being supported by their tutor and peers.
Level: Postgraduate Coursework Level 5 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5024 Music Curriculum 1 (10 Credit Points)
Subject Details (p. 5337) **Legacy Code:** 102877
The subject will examine and model effective contemporary classroom practice in teaching Music in Stages 4 and 5. The subject will provide opportunities to engage with the performance, production and composition principles related to the discipline of Music. The specifics of the relevant NSW Education Standards Authority Years 7-10 Syllabuses and links with the K-6 curriculum will be analysed and critiqued as will current Australian and NSW educational/curriculum policies and priorities. Emphasis will be placed on pedagogical content knowledge underlying Music teaching to develop innovative lesson and subject planning, choose relevant and creative texts, create authentic assessment tasks and apply consistent feedback for student learning. Opportunities for investigation and discussion of current research particularly related to the development of Music education.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7027 AND
TEAC 7004 AND
TEAC 7032
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5025 Music Curriculum 2 (10 Credit Points)
Subject Details (p. 5338) **Legacy Code:** 102878
The subject will build on Music Curriculum 1 and examines and models effective innovative classroom practice in teaching senior Music in Stage 6. The subject will provide opportunities to engage with inquiry pedagogy and historical thinking. The specifics of the relevant NSW Education Standards Authority Stage 6 Syllabuses will be analysed and critiqued as will current Australian and NSW educational/curriculum policies and priorities. Emphasis will be placed on principles underlying Music teaching to develop innovative lessons and subject planning, choose relevant tools, create authentic assessment tasks and apply consistent feedback for student learning. Opportunities for investigation and discussion of current research particularly related to the development of senior music performance, composition and production will be presented.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7027 AND
TEAC 7004 AND
TEAC 7032
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5026 Music Curriculum 3 (10 Credit Points)
Subject Details (p. 5339) **Legacy Code:** 102879
This subject in Music curriculum, explores in greater depth pedagogical content knowledge established in Music Curriculum 1, including general capabilities, cross-curriculum priorities and other allied materials. They will critique their prior knowledge and experience in the field and how these connect with the scope of the curriculum, identifying opportunities, challenges and responsibilities of Music teaching. Pre-service teachers will explore extended theoretical frameworks associated with teaching and learning in Music education. They will learn evidence-based approaches to plan for effective teaching and learning, including embedded literacy and numeracy, and the use of digital technologies. They will learn approaches for engaging learners and to meet the learning needs of diverse students. They will learn to compose good questions, arrange music compositions and analyse music forms and concepts.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7027 AND
TEAC 7004 AND
TEAC 7032
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5027 Music Curriculum 4 (10 Credit Points)
Subject Details (p. 5340) **Legacy Code:** 102880
This subject will explore the discipline of Music education in contemporary Australian society, and the senior secondary Music extension curriculum. The subject will investigate current evidence-based approaches for curriculum development for quality teaching and learning, including formative and summative assessment. Pre-service teachers will learn approaches for building knowledge and praxis of Music. They will learn approaches for engaging adolescent learners and differentiate the curriculum in the senior secondary years. They will further develop skills to shape the dialogic talk of the classroom. Pre-service teachers will formulate subject and assessment plans in order to demonstrate a knowledge of curriculum, learning and assessment theory. They will develop teaching resources for effective teaching and learning and to link with curriculum. They will critique curriculum implementation in current socio-cultural school contexts.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7027 AND
TEAC 7004 AND
TEAC 7032
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5028 PDHPE Curriculum 1 (10 Credit Points)
Subject Details (p. 5341) **Legacy Code:** 102885
The subject will examine and model effective contemporary classroom practice to develop students' pedagogical content knowledge in the teaching of Personal Development, Health and Physical Education (PDHPE). The subject will provide opportunities to engage with teaching PDHPE across health and practical skills strands in years 7-10. The specifics of the relevant NSW Education Standards Authority Years 7-10 Syllabus and links with the K-6 curriculum will be analysed and critiqued as will current Australian and NSW educational/curriculum policies and priorities. Emphasis will be placed on principles such as games-sense theory that inform PDHPE teaching. This subject will develop current and applied skills in innovative lesson and subject planning, choose relevant data and contexts to create authentic assessment tasks and apply consistent feedback for student learning. Opportunities for investigation and discussion of current research particularly related to the development of applied and health based learning will be presented.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7027 AND
TEAC 7004 AND
TEAC 7032
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5029 PDHPE Curriculum 2 (10 Credit Points)
Subject Details (p. 5343) **Legacy Code:** 102886
This subject explores contemporary and differentiated approaches to teaching Personal Development, Health and Physical Education (PDHPE) in senior secondary contexts and builds on PDHPE Curriculum 1. Students will use relevant syllabus documents to develop innovative and engaging lesson plans that cater for a range of senior learners. Students will apply a range of effective teaching strategies designed to engage a diversity of learners in a supportive, safe and culturally responsive classroom environment. Digital and practical resources to assess and improve learning in the senior years in the discipline will be developed. Opportunities for investigation and discussion of current research particularly related to the development of Health Education will be explored.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7027 AND
TEAC 7004 AND
TEAC 7032
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5030 PDHPE Curriculum 3 (10 Credit Points)
Subject Details (p. 5344) **Legacy Code:** 102887
In this subject, pre-service teachers will consider the place of Health education in contemporary Australian society and explore programs in Physical Activity and Sports Studies (PASS). They will explore a range of evidence-based approaches for curriculum development and alignment in PASS and to plan for effective teaching and learning, including formative and summative assessment. Pre-service teachers will learn approaches for building knowledge of Health education and how to provide constructive feedback and reporting. This subject will require students to engage in teaching practical skills in areas such as sport, recreational, combat games, physical fitness activities and physical activity for remediation and therapy.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7027 AND
TEAC 7004 AND
TEAC 7032
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5031 PDHPE Curriculum 4 (10 Credit Points)
Subject Details (p. 5345) **Legacy Code:** 102888
In this subject, pre-service teachers will consider the place of Health education in contemporary Australian society and explore senior programs in Community and Family Studies (CAFS) and Sport Lifestyle and Recreation Studies (CEC). They will explore a range of evidence-based approaches for curriculum development and alignment in CAFS and CEC and to plan for effective teaching and learning, including formative and summative assessment. Pre-service teachers will learn approaches for building knowledge of Health education and how to provide constructive feedback and reporting. This subject will require students to engage in teaching wellbeing, positive relationships, responsible care and appreciation for diversity and interdependence in community contexts.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7027 AND
TEAC 7004 AND
TEAC 7032
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5032 Science Curriculum 1 (10 Credit Points)
Subject Details (p. 5346) **Legacy Code:** 102897
The subject will examine and model effective contemporary classroom practice to develop students' pedagogical content knowledge in the teaching of Science. The subject will provide opportunities to engage with teaching Science across strands and programs in years 7-10. The specifics of the relevant NSW Education Standards Authority Years 7-10 Syllabus and links with the K-6 curriculum will be analysed and critiqued as will current Australian and NSW educational/curriculum policies and priorities. Emphasis will be placed on principles underlying Science teaching to develop innovative lesson and subject planning, choosing relevant data and contexts to create authentic assessment tasks and applying consistent feedback for student learning. There will be a focus on the development of laboratory skills and techniques including aspects of general and mandatory safety requirements. Opportunities for investigation and discussion of current research particularly related to the development of applied and inquiry-based Science learning will be presented.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7027 AND
TEAC 7004 AND
TEAC 7032
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5033 Science Curriculum 2 (10 Credit Points)
Subject Details (p. 5347) **Legacy Code:** 102898
The subject will explore senior Science curriculum to develop pre-service teachers' pedagogical content knowledge in the teaching of Science across Biology, Chemistry, Earth and Environment and Physics. The subject will provide opportunities to engage with teaching Science across a range of programs in years 11-12. The specifics of the relevant NSW Education Standards Authority Stage 6 Science Syllabus will be analysed and critiqued as will current Australian and NSW educational/curriculum policies and priorities. Emphasis will be placed on principles underlying Science teaching to develop innovative lesson and subject planning, choose relevant data and contexts to create authentic assessment tasks and apply consistent feedback for student learning. There will be a focus on the development of laboratory skills and techniques including aspects of general and mandatory safety requirements. Opportunities for investigation and discussion of current research particularly related to the development of applied and inquiry-based Science learning will be presented.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7027 AND
TEAC 7004 AND
TEAC 7032
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5034 Science Curriculum 3 (10 Credit Points)
Subject Details (p. 5348) **Legacy Code:** 102899
The subject will examine and model effective contemporary classroom practice to develop students' pedagogical content knowledge in the teaching of Science related to STEM. The subject will provide opportunities to engage with teaching STEM projects connected to Science across strands and programs in years 7-10. The specifics of the relevant NSW Education Standards Authority Years 7-10 Syllabus, STEM Syllabus and links with the K-6 curriculum will be analysed and critiqued as will current Australian and NSW educational/curriculum policies and priorities. Emphasis will be placed on principles underlying Science and STEM teaching to develop innovative lesson and subject planning, choose relevant data and contexts to create authentic assessment tasks and apply consistent feedback for student learning. There will be a focus on the development of laboratory skills and techniques including aspects of general and mandatory safety requirements. Opportunities for investigation and discussion of current research particularly related to the development of applied and inquiry-based Science learning will be presented.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7027 AND
TEAC 7004 AND
TEAC 7032
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5035 Science Curriculum 4 (10 Credit Points)
Subject Details (p. 5349) **Legacy Code:** 102900
The subject will explore senior Science curriculum to develop pre-service teachers' pedagogical content knowledge in the teaching of Investigating Science and Science Extension. The subject will provide opportunities to engage with teaching interdisciplinary Science. Emphasis will be placed on principles underlying Investigating Science and Science Extension teaching to develop innovative lesson and subject planning, choose relevant data and contexts to create authentic inquiry project based assessment tasks and apply consistent feedback for student learning. There will be a focus on the development of laboratory skills within the context of Investigating Science and techniques including aspects of general and mandatory safety requirements. Opportunities for investigation and discussion of current research particularly related to the development of applied and inquiry-based Science learning in Science Extension will be explored in depth.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7027 AND
TEAC 7004 AND
TEAC 7032
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5036 Technology Curriculum 1 (10 Credit Points)
Subject Details (p. 5350) **Legacy Code:** 102881
The subject will examine and model effective contemporary classroom practice to develop students' pedagogical content knowledge. The specifics of the relevant Technology Syllabus and links with the K-6 curriculum will be analysed and critiqued as will current Australian and NSW educational/curriculum policies and priorities. Emphasis will be placed on principles underlying engaged inquiry teaching within the specific secondary subject, on creativity and quality teaching outcomes, on innovative program, subject and lesson planning and on the role of data in authentic and appropriate assessment practices. Students will investigate and discuss current research particularly related to sustainability and diversity in the teaching of specific technology areas.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7027 AND
TEAC 7004 AND
TEAC 7032
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5037 Technology Curriculum 2 (10 Credit Points)
Subject Details (p. 5352) **Legacy Code:** 102882
The subject will examine and model effective contemporary classroom practice to develop students' pedagogical content knowledge. The specifics of the relevant Board of Studies NSW Years 11-12 Syllabuses in Technology Key Learning Area and links with the Years 7-10 curriculum will be analysed and critiqued as will current Australian and NSW educational/curriculum policies and priorities. Emphasis will be placed on principles underlying engaged inquiry teaching within the specific secondary subject, on creativity and quality teaching outcomes, on innovative program, subject and lesson planning and on the role of student data in authentic and appropriate assessment practices. Students will have opportunities for investigation and discussion of current research particularly related to sustainability and diversity in the teaching of the specific subject area.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7027 AND
TEAC 7004 AND
TEAC 7032
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5038 Technology Curriculum 3 (10 Credit Points)
Subject Details (p. 5353) **Legacy Code:** 102883
In this subject, the place of Technology and applied STEM in secondary curriculum will be further explored using evidence-based approaches for curriculum development and alignment and to plan for effective teaching and learning, including formative and summative assessment. Pre-service teachers will learn approaches for teaching a range of Technologies using STEM pedagogy. They will focus on assessment design for project and problem-based learning. The subject will demonstrate approaches for engaging diverse senior secondary learners. Pre-service teachers will develop subject and assessment plans and demonstrate a knowledge of curriculum, learning and assessment theory. The subject requires students to develop original portfolio of teaching artefacts that demonstrate capacity to create and critique resources for effective teaching and learning in Technology.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7027 AND
TEAC 7004 AND
TEAC 7032
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5039 Technology Curriculum 4 (10 Credit Points)
Subject Details (p. 5354) **Legacy Code:** 102884
In this subject, the place of Technology Curricula in senior secondary will be further explored using evidence-based approaches for curriculum development and alignment and to plan for effective teaching and learning, including formative and summative assessment. Pre-service teachers will learn approaches for teaching a range of Technologies and how to provide constructive feedback and reporting connected to project and problem-based learning. The subject will demonstrate approaches for engaging diverse senior secondary learners. Pre-service teachers will develop subject and assessment plans and demonstrate a knowledge of curriculum, learning and assessment theory. The subject requires students to develop original portfolio of teaching artefacts that demonstrate capacity to create and critique resources for effective teaching and learning in Technology.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7027 AND
TEAC 7004 AND
TEAC 7032
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5040 Digital Literacies in Education (10 Credit Points)
Subject Details (p. 5355)
This subject will introduce, develop and apply innovative digital literacy skills needed to be successful in the teaching profession. The subject will address digital literacy as a multidimensional skill-set covering domains related to: i) searching, accessing, analysing, and critically evaluating information; ii) communicating and sharing information; iii) creating digital products; iv) safety, and v) problem-solving. The subject will focus on the digital learner, instructional design in digital contexts, e-safety, social media, intellectual property and legal implications for teachers. The subject will assess the critical analysis, creation and application of digital literacy skills for teachers as determined by the Australian Professional Teaching Standards.
Level: Postgraduate Coursework Level 5 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5041 Career Education Practice (10 Credit Points)
Subject Details (p. 5356)
This subject introduces students to core knowledge and skills necessary to prepare others to follow their career/work aspirations. By examining labour market information, identifying relevant support organisations and services students will be able to apply career development theories, concepts, research, and associated models and frameworks to provide career planning that is sensitive and respectful of an individual's capabilities and barriers to work. This subject also introduces students to methods to evaluate the advice and services which they provide.
Level: Postgraduate Coursework Level 5 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5042 Supporting Career and Education Aspirations (10 Credit Points)
Subject Details (p. 5356)
This subject introduces students to the core knowledge and skills necessary to support career and education aspirations through professional practice as a career advisor. The subject examines theoretical perspectives on career aspirations, empirical research into the development of aspirations, strategies to support the aspirations of specific populations, and skills to identify the strengths, values, and interests of those participating in career education.
Level: Postgraduate Coursework Level 5 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7001 Aboriginal & Culturally Responsive Pedagogies (10 Credit Points)
Subject Details (p. 5357) **Legacy Code:** 102085
In this subject students will be introduced to research, perspectives and practices associated with successful and culturally appropriate curriculum and pedagogy for teaching Aboriginal and Torres Strait Islander adolescent students. The subject is informed by current research practices, policy developments and curriculum deliverables that require culturally appropriate, responsive, respectful and informed teaching and learning practices that will benefit all education participants. Students will gain knowledge, insight, skills and appreciation of the importance and implications of consultation, negotiation and two-way partnerships with local Aboriginal communities and schools. It will also focus on empowering students to effectively reflect on all aspects of inquiry-based teaching with respect to Aboriginal perspectives and the delivery of lessons and effective support to all secondary students.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): TEAC 7004 Adolescent Development and Teaching and
TEAC 7032 Diversity Social Justice and Learning and
TEAC 7027 Designing Teaching and Learning
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7002 Addressing Diversity in Mathematics Teaching and Learning (10 Credit Points)
Subject Details (p. 5358) **Legacy Code:** 102322
In this subject students will apply their knowledge of curriculum and pedagogy to address diversity within the primary mathematics classroom. Students will explore strategies to address a broad range of learning needs incorporating gifted and talented students, students from diverse cultural backgrounds including Aboriginal students and students with additional needs including dyscalculia. Other issues such as gender and mathematics for English as an Additional Language Learners (EALD) will be investigated.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7003 Addressing Diversity in Science Teaching and Learning (10 Credit Points)
Subject Details (p. 5359) **Legacy Code:** 102486
The purpose of this subject is for students to develop knowledge of science teaching for primary aged children of science with additional needs and diverse linguistic and cultural backgrounds. Students will explore a range of needs, including gender issues with science learning, EAL/D backgrounds, learning difficulties, and gifted and talented abilities, and identify strategies to respond to those needs with specific instructional plans. In addition, students will learn to implement culturally relevant and context-based pedagogies in primary science education.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7004 Adolescent Development and Teaching (10 Credit Points)
Subject Details (p. 5360) **Legacy Code:** 102081
This subject examines research and contemporary classroom practice relevant to the cognitive, physiological, and social/affective needs of adolescents to highlight the reciprocal effects that teaching has on adolescence and how in turn adolescence affects teaching practice. Emphasis is placed on the use of evidenced-based literature in examining adolescent-centred challenges to teaching and learning. Topics addressed include definitions of adolescence past, present and future, biological and cognitive milestones of adolescence, adolescents at-risk, secondary schooling fostering educational and general resilience in adolescents, and helping adolescents thrive.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7005 Advanced Academic English Skills (10 Credit Points)
Subject Details (p. 5361) **Legacy Code:** 102325
This is a language-analysis intensive subject with practical application for real situational English language teaching. It offers students theoretical overviews of language analysis, from the sentential-clausal-lexical-grammatical level to highly contextualised discourse study. It requires students to engage with a variety of real-life instances of language use while also investigating the potentialities of extensive linguistic repertoires. By exposing students to both the realities of actual language use and the possibilities inherent in varieties of English, students are better prepared for the demands of English (second and foreign) language teaching across multiple contexts.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7007 Advanced Standing for TESOL 740 (PG) (40 Credit Points)
Subject Details (p. 5362) **Legacy Code:** 102624
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7008 Advanced Standing for TESOL 760 (PG) (60 Credit Points)
Subject Details (p. 5362) **Legacy Code:** 102569
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7010 Assessing to Support Learning (10 Credit Points)
Subject Details (p. 5362) **Legacy Code:** 102147
Professionals' knowledge and skill in assessment supports the identification, planning, monitoring and evaluation of their work with individuals with additional needs. Assessment not only applies to assessing the needs of the individual, but extends to identifying the needs of the family and the educational setting. This subject explores various models of assessment (and their underlying theory and implications for practice). Various approaches are investigated that are utilised to elucidate a range of educational needs across the lifespan by a range of professionals (e.g. functional, standardised, diagnostic, strengths-based, curriculum-based). Students apply problem-based learning by selecting and critiquing assessment strategies to inform the goals, educational instruction and adjustments, and progress for an individual, their family and educational setting. Students also develop skills in communicating with colleagues and families regarding issues around assessment.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7011 Assessment and Intervention for Mathematics and Numeracy Learning (10 Credit Points)
Subject Details (p. 5363) **Legacy Code:** 102324
A significant aspect of teachers' work is focused on assessment and mathematics classrooms are renowned for their traditional reliance on pen and paper testing. In this subject students will investigate contemporary formative and summative assessment practices of and for learning mathematics. Students will investigate how to use results from assessments including NAPLAN to plan teaching and learning, and provide intervention where appropriate. A range of intervention programs used in Australian schools will be explored and compared.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7012 Assessment and Intervention for Science Learning (10 Credit Points)
Subject Details (p. 5364) **Legacy Code:** 102488
The purpose of this subject is for students to be informed of different types of diagnostic, formative, and summative assessment strategies used in primary science contexts. Examination of assessment methods and resources will help teachers develop a comprehensive philosophy of assessment in primary science. Students will develop skills in adapting instructional subjects to incorporate a research-based assessment system, become familiar with strategies to analyse assessment data, and design interventions in response to assessment data.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7013 At the cultural interface - learning two ways (10 Credit Points)
Subject Details (p. 5365) **Legacy Code:** 102165
From 2020 students should note that core units are now taught in semesters rather than half yearly sessions. History, politics and ignorance make the cultural interface between Aboriginal and non-Aboriginal Australians contested and fraught. In turn, cultural misunderstanding contributes to inequities in educational attainment, employment and social disadvantage. Students apply a critical perspective to the discourses surrounding Aboriginal disadvantage and white privilege. They develop processes to engage respectfully with local Aboriginal and Islander communities in order to learn and share in a two-way exchange of knowledge. They listen deeply and intersubjectively in their exploration of Aboriginal worldviews, and they reflect on what it means to decolonise their own thinking so as to build partnerships based on mutuality and reciprocity.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7015 Children, Families, Communities (10 Credit Points)
Subject Details (p. 5366) **Legacy Code:** 102102
From 2020 students should note that core units are now taught in semesters rather than half yearly sessions. The subject examines the implications of cross-disciplinary research into children's early life experiences for creating innovative services and service models that both foster children's early learning and encourage and strengthen families and carers' capacity to support their children's early development and wellbeing. In this way, students will gain an understanding of the complex field of early intervention and prevention, consider national and international innovations in policy and service delivery, examine new tools and frameworks for community intervention, analyse discourses associated with family and social disadvantage and consider how communities can best support young children. Studying this subject will provide an opportunity to consider the nexus between early childhood education and child and family services, how these might interact and work together seamlessly and the implications for the kind of knowledge and skills required to work in these innovative contexts. Students will reflect on the complex interrelationship between collaboration, research and practice to identify their role as community leaders enhancing families' and carers' capacities and children's development, learning, health and wellbeing.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: TEAC 7036 - Early Intervention and Prevention in Early Childhood Contexts
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7018 Computational Thinking across the STEM Curriculum (10 Credit Points)
Subject Details (p. 5367) **Legacy Code:** 102509
This subject will enable students to develop knowledge of computational thinking as it can be applied across the STEM curriculum in schools. Students will learn about the nature of computational thinking as a problem solving approach which can be applied to produce digital solutions. The subject will allow students to undertake a critical examination of innovative, interdisciplinary approaches to the development of computational thinking and relevant pedagogical strategies to maximise student learning and engagement with STEM disciplines.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7020 Contemporary Teacher Leadership (10 Credit Points)
Subject Details (p. 5367) **Legacy Code:** 102098
This multidisciplinary subject seeks to redefine and inform practice about what it means to be part of teacher-led development in the 21st century. Students will need to develop unique skills and understanding necessary for creating, sustaining and expanding communities of practice within and beyond classrooms. Through an examination of relevant literature connected with local and global networks, students will build, an understanding of cultural assets; professional leadership capacity; and what is required to effect change, leadership and innovation in school culture through teaching and learning innovations and program evaluation. Learning outcomes are based on learning about leadership within an established community of practice.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): -
Co-requisite(s): -
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7022 Creative Teaching and Learning (10 Credit Points)
Subject Details (p. 5369) **Legacy Code:** 102105
From 2020 students should note that core subjects are now taught in semesters rather than half yearly sessions. This subject focuses on processes of creative thinking and creative expression in children and introduces students to the theory and practices of using drama, music, dance, media arts and visual arts in prior to school and school contexts. Arts-based pedagogies, collaborative learning, multiple modes of learning and reflective practices are the key operating principles of the subject. The subject will encompass creativity both as it relates to the arts as well as its critical role in fostering creative thinking and teaching and learning practices. Students will explore the relevance of the arts in the development of children's play and will engage with appropriate information and communication technologies for learning in the arts. The subject provides an understanding of the importance of the art forms both as pedagogical approaches across the early childhood and primary years and as creative arts in their own right.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: TEAC 7045 - Fostering Creativity in Children's Learning
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7023 Culture, Subjectivities and Schooling (10 Credit Points)
Subject Details (p. 5370) **Legacy Code:** 102071
From 2020 students should note that core subjects are now taught in semesters rather than half yearly sessions. This subject focuses on the socio-political, economic and cultural milieu that shapes teacher and student subjectivities. Teachers are required to understand the variety of, and changing nature of, discourses and ideologies that both constitute and are constituted in society, schooling, teaching, and learning, in an increasingly multifaceted, globalized and cosmopolitan environment. Within this framework it is also essential that teachers engage with and understand the diversity and fluidity of individuals and the broader Australian community in order to promote equitable practices in schooling and to facilitate educational and professional transformation. Aboriginal and Torres Strait Islander peoples and their relationship to schooling will also be explored in this subject, providing pre-service teachers with deeper understandings of Australia's first nations people. Developing understandings of society, culture and the formation of subjectivities will promote an enhanced awareness of equity issues as well as crucial analytical and critical tools to address the needs of diverse students, their families, teachers, and the broader school community.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: TEAC 7039 - Education Knowledge Society and Change
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7025 Curriculum for Under Threes (10 Credit Points)
Subject Details (p. 5372) **Legacy Code:** 101098
This subject examines the role of families and communities in children's learning and emphasizes the essential role of partnerships in the provision of meaningful curriculum for young children. It also examines approaches to observing and documenting children's learning in ways that celebrate children's competencies and build connections between children, families and educators while also identifying any areas where children may require additional assistance. Curriculum for under threes also includes the role of interactions, play experiences and culturally responsive routines in the provision of learning environments for under threes.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7026 Designing Curriculum Futures (10 Credit Points)
Subject Details (p. 5372) **Legacy Code:** 102159
This subject considers the research and theoretical basis of curriculum futures, with a focus on design for learning and learning design, and critically examines contextual factors and their implications for learning design in a range of settings. The subject provides a critical overview of perspectives on curriculum, curriculum design and examines authentic learning and assessment. Examples of curriculum futures will be negotiated and explicated. The overall focus is on curriculum decision-making and planning for improved learning outcomes.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: TEAC 7024 - Curriculum Futures
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7027 Designing Teaching and Learning (10 Credit Points)
Subject Details (p. 5373) **Legacy Code:** 102086
In this unit, students will explore a range of contemporary issues impacting upon adolescent learning in the 21st century and how those issues may be addressed through the thoughtful re-design of teaching and learning. In a future characterised by rapid change and re-conceptualisations of compulsory schooling, attention will be given to the role of the secondary school teacher in assisting their students to develop new ways to think and new ways to work, as well as acquiring new tools and skills for living and working in the 21st century. Students will be encouraged to articulate their own vision for sustainable and engaged secondary education appropriate to the first half of the 21st century. In particular, it is critical that students possess the capacity to develop secondary students' abilities to engage in real world problem solving and collaborate meaningfully through emerging technologies. Students will collect evidence in an e-portfolio to demonstrate they meet the Australian Professional Standards for Teachers at the graduate level. Students begin their e-portfolio in 102086 Designing Teaching and Learning and continue to collect evidence throughout their Master of Teaching (Secondary) course.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: TEAC 7081 - Pedagogies in Practice TEAC 7080 - Pedagogies for Learning CART 1003 - Literacies for Learning
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7029 Disability in Context (10 Credit Points)
Subject Details (p. 5375) **Legacy Code:** 102156
The developmental trajectory and quality of life of individuals with additional needs is affected not only by the nature and level of the disability itself but also by the ways in which that disability interacts with the contexts in which they live their lives. In turn, the impact of the disability will affect the individual's family and those working with them. This subject adopts both a developmental and ecological perspective to enable analysis of the specific impact of disability on an individual, their family, the professionals working with them and the contexts in which they do so. In so doing, it evaluates the efficacy of theoretical models and frameworks available to assist in ensuring best outcomes for the individual and those around them.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: HUMN 7046 - Transformative Leadership
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7030 Diverse Literacies (10 Credit Points)
Subject Details (p. 5376) **Legacy Code:** 102101
From 2020 students should note that core subjects are now taught in semesters rather than half yearly sessions. This subject increases students' understandings of the impact of globalisation, new technologies and the diversity of Australian languages and dialects on children's literacy practices. It provides opportunities for students to develop insights into the importance of languages and cultures in children's identity formation, particularly in relation to the importance of the home language and dialect for bilingual and Aboriginal and Torres Strait Islander children. Contemporary social theories of diversity and difference and frameworks of literacy and languages learning will be introduced to students and the links between theory and practice will be applied. Students will have the opportunity to investigate the literacy practices in diverse family and community contexts and apply literacy-enriched play and pedagogies to extend languages learning and literacy for all children.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: TEAC 7046 - Global Literacies TEAC 1026 - Multiliteracies
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7032 Diversity, Social Justice and Learning (10 Credit Points)
Subject Details (p. 5377) **Legacy Code:** 102083
The subject explores diversity, social justice, equity and learning through the multi-layered operation of social power and privilege. It advances students' understanding of how social and cultural difference in Australia has shaped contemporary education, schooling and cross-cultural relationships. In particular, the subject examines diversity as a social construct that has promoted the differential treatment of particular social and cultural groups and served as the basis for response to subsequent social and cultural inequities by these groups. The subject engages students in critical analysis essential for professional pedagogical practice in education for diversity and social justice in Australia and beyond.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: TEAC 7031 Diversity Social Justice and Equity TEAC 7033 Diversity Social Justice and Schooling
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7037 Early Learning Environments (10 Credit Points)
Subject Details (p. 5378) **Legacy Code:** 102622
This subject will support students to develop their philosophy, approach to and practice of teaching within the context of a rapidly changing and dynamic human global culture that has important cultural, social, historical and environmental dimensions. The subject explores theoretical perspectives and approaches, including indigenous perspectives, human/nature theories, socio-cultural considerations, inclusivity and place-based pedagogies that support learning and teaching in the curriculum areas of history, geography, civics and citizenship and sustainability for children in early childhood and primary school settings. Drawing on their understanding of theory students will examine key local and international policies and frameworks around risk, play and pedagogy. Through field and / or virtual visits to early childhood and community settings, students will have an opportunity to evaluate the relationship between physical environments and children's experience of place and everyday learning. Students will also design, plan and rationalise learning experiences that support children's investigation, discovery, problem solving and meaning making using man made and natural materials. A strong focus of this subject is for students to develop an understanding and appreciation for learning environments that promote a connection to place and sustainability.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7038 Early Mathematics and Numeracy (10 Credit Points)
Subject Details (p. 5380) **Legacy Code:** 102603
From 2020 students should note that core units are now taught in semesters rather than half yearly sessions. This subject aims to develop students' critical understandings of how numeracy and powerful mathematical ideas shape young children's lives during their first eight years. Students will develop their ability to provide rich learning experiences that enhance and assess the growth of children's numeracy and foundational mathematical concepts. The subject will foster positive dispositions towards teaching and applying mathematics and numeracy in diverse settings for children aged birth to eight years, using the current Early Years Learning Framework and the NSW Mathematics K-10 Syllabus curriculum document.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 1111 - Mathematics Science Technology 0-8 TEAC 7060 - Investigating with Mathematics Science and Technology
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7041 Effective Working Relationships (10 Credit Points)
Subject Details (p. 5381) **Legacy Code:** 102146
From 2020 students should note that core subjects are now taught in semesters rather than half yearly sessions. This subject supports the development of students' knowledge and skills by analysing a range of consultation models; examining the perspectives and needs of families as well as professionals from different discipline backgrounds; and developing effective interpersonal communication skills, collaborative problem solving, dispute resolution, teamwork and teambuilding. In addition, professionals with advanced knowledge of inclusive education and disability studies may serve as agents of change within their professional setting. The subject explores this role and encourages students to reflect upon how they may enact this ability to advocate inclusive education and facilitate the capacity of others.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7043 Engaging Communities (10 Credit Points)
Subject Details (p. 5381) **Legacy Code:** 102148
From 2020 students should note that core subjects are now taught in semesters rather than half yearly sessions. Community engagement is variously seen as a strategy for improving educational outcomes, increasing community ownership and/or empowering citizens to take collective action. Although appeals to 'community' often assume a homogeneous ideal, active community engagement needs to respond to a diversity of needs and experiences. This subject begins by exploring the notion of community, its uses and meanings in different discursive and professional contexts. Students will be introduced to theory and praxis aimed at identifying community needs, partnering across diversity and working effectively and inclusively to build community strengths and engagement. The subject's applied learning focus requires students to develop and implement a community engagement strategy for a selected setting.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7044 English Linguistics for TESOL (10 Credit Points)
Subject Details (p. 5382) **Legacy Code:** 101825
This subject provides students with a linguistics background, including English grammar, necessary to excel in English language teaching and assessment. Encompassing the areas of syntax, semantics, morphology, phonology and phonetics, the subject equips students with the technical vocabulary of linguistics and pedagogical grammar as well as the analytical skills necessary to identify and describe both the English language and patterns of performance by second and bilingual language learners. These foundational skills prepare students for success in language teaching, assessment and second language research.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7051 Inclusive Environments (10 Credit Points)
Subject Details (p. 5383) **Legacy Code:** 102149
Significant reform has occurred over the last three decades with regard to educating individuals with additional needs. This subject explores the history and current position on disability as well as philosophy, policy, legislation, and practice around educating individuals with additional needs internationally. The research literature examining the benefits and barriers to inclusive education will be analysed. Students will develop skills of critical review required to evaluate the research in the field. Lastly, the subject addresses the ways in which educational settings can be designed to be more responsive to learners with additional needs and how students can promote inclusion through organisational change.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7057 Introduction to Pedagogical Leadership (10 Credit Points)
Subject Details (p. 5384) **Legacy Code:** 101899
From 2020 students should note that core units are now taught in semesters rather than half yearly sessions. Early childhood educators have a significant role in providing the pedagogical leadership required to deliver quality early childhood services for children and families. This subject introduces the concept of pedagogical leadership which is then explored further in other subjects in this program. In this subject students examine a range of theoretical perspectives and approaches to curriculum and analyse the ways different theories and approaches shape pedagogical practices. Students will have opportunities to research contemporary theories of early childhood education, reflect on their own beliefs and values, refine their personal philosophy of teaching and learning, and consider the implications for their future role as pedagogical leaders.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7061 Leadership and Management (10 Credit Points)
Subject Details (p. 5385) **Legacy Code:** 102108
From 2020 students should note that core subjects are now taught in semesters rather than half yearly sessions. In this subject students critically review the ethical, legal and professional accountabilities of early childhood teaching within a complex socio-political context. The conceptual frames of pedagogical and community leadership afford the opportunity to interrogate discourses associated with advocacy, leadership and management across a range of settings. Students will explore dimensions of effective leadership and management practices and consider the efficacy of new and emerging policies and resources in the field.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: TEAC 7073 Managing Child and Family Services
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7063 Leadership, Mentoring and Professional Growth (10 Credit Points)
Subject Details (p. 5386) **Legacy Code:** 100701
Becoming a professional is a complex and intricate process. Beyond adequate initial training (both theoretical and the implementation of theory into practice) it takes a commitment and undertaking to career-long learning and professional development. Such commitment and undertaking need not be an isolated process. Educational leaders are available to assist in the promotion of professional development. This subject provides leaders with the understandings and strategies for implementing mentoring and professional development programs.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7065 Leading Mathematics in the Primary School (10 Credit Points)
Subject Details (p. 5387) **Legacy Code:** 102323
This subject provides an in-depth exploration of the required mathematics knowledge for primary teaching and for leading other teachers in their professional learning. Students will explore and further develop their pedagogical content knowledge, applying it to the primary mathematics curriculum. They will develop a deep understanding of specific mathematical content, the ways in which children learn that content and appropriate, research based pedagogies.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7067 Leading Science in the Primary School (10 Credit Points)
Subject Details (p. 5388) **Legacy Code:** 102487
The purpose of this subject is for students to engage in leadership practices and theory associated with an expert primary science teacher. Students will evaluate curriculum resources and consider strategies for integrating science with other disciplines in primary teaching contexts. Students will develop their capacity for leading science professional learning experiences and innovation to other educators.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7068 Learning and Teaching in Challenging Contexts (10 Credit Points)
Subject Details (p. 5389) **Legacy Code:** 102158
This subject involves the study of pedagogy in contexts regarded as 'challenging'. The main focus will usually be on the contexts of school and early childhood, but alternative sites of education will also be studied as appropriate. The definition of a challenging context will be considered with an emphasis on contexts of poverty. Students will undertake a critical analysis of policies and practices that impact and respond to challenging contexts. The subject is structured around the investigation of dilemmas and specific provocations, and explores engaging pedagogies for education.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7071 Literacy in the Early Years (10 Credit Points)
Subject Details (p. 5389) **Legacy Code:** 101803
From 2020 students should note that core subjects are now taught in semesters rather than half yearly sessions. In this subject students investigate processes of speaking, listening, reading, writing, viewing and representing and creative and critical thinking across the prior to school and primary school years. The subject includes a focus on strategies for supporting emergent literacy and for teaching beginning readers, including strategies for working with children who are learning Standard Australian English as an additional language or dialect. There is a strong focus on the role of the educator in assessing children's language and literacy learning and planning experiences and lessons that extend learning.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): TEAC 7030
Equivalent Subjects: LGYA 1112 - Literacy 0-8
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7072 Managing Challenging and Diverse Behaviour (10 Credit Points)
Subject Details (p. 5391) **Legacy Code:** 102151
This subject provides professionals with the skills to successfully and systemically manage challenging behaviours exhibited by individuals in classrooms, early childhood, or other educational settings. This subject will focus on managing critical features of the environment to encourage positive behaviours and prevent challenging behaviours from occurring. Intervention strategies are also developed to address significant negative behavioural challenges when preventative measures are ineffective. Professionals will develop competencies in identifying and analysing problem behaviours and designing suitable management plans. Such skills will be helpful to either professionals working directly with individuals with additional needs, or as consultants supporting those who provide direct support to individuals with challenging and diverse behaviours.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: TEAC 7014 - Behaviour Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7074 Mathematics for Contemporary Learners (10 Credit Points)
Subject Details (p. 5392) **Legacy Code:** 102321
In this subject students will explore issues relating to the teaching and learning of mathematics in the contemporary primary classroom. These issues will include promoting positive dispositions of learners, engaging pedagogies and developing creative and critical thinking for critical numeracy. Students will explore theory relating to the integration of information and communication technologies in the mathematics classroom including the development of teachers' Technological Pedagogical Content Knowledge (TPACK).
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7076 Multicultural Nonverbal Communication (10 Credit Points)
Subject Details (p. 5392) **Legacy Code:** 102283
This subject introduces students to the interdisciplinary fields of linguistics, communication and cultural semiotics. It builds links between these areas of studies and beyond, which provide students with knowledge of how human beings use nonverbal communication systems and channels to achieve effective communication in intercultural and multicultural contexts. This subject covers three key perspectives, including paralinguistics, proxemics and kinesics. Authentic audio and visual materials are used to facilitate students' awareness of the multidimensional process in which people communicate verbally and nonverbally simultaneously. It also helps enhance their sensitivity when they interact with people from diverse linguistic and cultural backgrounds.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7082 Pedagogy for Positive Learning Environments (10 Credit Points)
Subject Details (p. 5393) **Legacy Code:** 102082
From 2020 students should note that core units are now taught in semesters rather than half yearly sessions. This subject is designed to promote the application and integration of current psychological and educational theory, evidence and best practice in creating positive learning environments for the purposes of learning, behaviour and wellbeing. A problem-based approach to learning and teaching is used employing case-based vignettes depicting various specific school-based behaviour management challenges. The subject is delivered by providing students with an unfamiliar problem, situation or task related to promoting students learning, positive behaviour and wellbeing. Students are required to determine for themselves how they will go about solving the problem. This occurs through small group work and self-directed research in which students are encouraged to utilise their prior knowledge in the topic area and identify the gaps in their knowledge as they attempt to solve the problem whilst being supported by their tutor and peers.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): TEAC 7004
Equivalent Subjects: TEAC 7086 - Positive Learning Environments TEAC 7113 - Psychology for Teaching
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7083 People, Place and Pedagogy (10 Credit Points)
Subject Details (p. 5395) **Legacy Code:** 102106
From 2020 students should note that core subjects are now taught in semesters rather than half yearly sessions. This subject will provide students with the opportunity to explore key concepts of learning and teaching in the curriculum areas of social studies, history, geography, place studies, civics and citizenship, economics, sustainability and environmental education and Aboriginal and Torres Strait Islander studies in early childhood and primary education. The subject will encourage pre-service educators to develop their philosophy and practice of teaching and learning, particularly within the contexts of a rapidly changing and dynamic human global culture that has significant cultural, historical, social and environmental dimensions. The subject will cover a broad, complex and engaging field of study reflecting that people are social beings who interact with one another and with the natural and social environments through and over time. Aboriginal and Torres Strait Islander perspectives, socio-cultural influences and place-based pedagogies will be investigated, and relevant policy and regulation documents around risk, play and pedagogy will be examined.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7084 Person-Centred Practice (10 Credit Points)
Subject Details (p. 5395) **Legacy Code:** 102166
The shift in educational policy and legislation to one of inclusion has been accompanied by a move to models of service delivery which are person- and family-centred and which also recognise the need for tiers in intervention. Whilst the range of service delivery models currently operating across educational and community settings for varied levels of need and developmental stages will be explored and evaluated, emphasis will be given to person-centred practice. Through an analysis of the literature encompassing both evidence-based practice and practice-based evidence students will evaluate the implications of the model for individuals, families, teachers, other professionals, schools, services, their own practice and for systems practice.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7087 Practising Pedagogical Leadership (10 Credit Points)
Subject Details (p. 5396) **Legacy Code:** 102107
Practising Pedagogical Leadership is a capstone subject for students in the Master of Teaching (Birth – 5 Years) and is undertaken in the same semester as Professional Experience 3-5 Years. In this subject students apply the principles, practices and outcomes of Belonging, Being and Becoming: The Early Years Learning Framework for Australia and understandings of curriculum and pedagogy from other Master of Teaching subjects to design and implement interest-based projects and integrated curriculum. The focus is on curriculum that connects to children's social worlds and facilitates children's in-depth investigations, creativity and critical thinking. Students will also develop their research skills by engaging in research into their own teaching practices.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): TEAC 7103
Equivalent Subjects: TEAC 7042 - Engaging Children in Curriculum
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7088 Primary Creative Arts (10 Credit Points)
Subject Details (p. 5398) **Legacy Code:** 101585
From 2020 students should note that core subjects are now taught in semesters rather than half yearly sessions. This subject introduces students to pedagogical theory and practices in the four diverse art forms of Dance, Drama, Music, and Visual Arts in the primary classroom. The subject provides practical knowledge, skills and understandings of the importance of all four art forms both as powerful teaching and learning strategies across the primary curriculum and as the creative arts in their own right for pre-service teachers. This subject builds students' capabilities to demonstrate creativity when teaching, empathy with diverse groups of student learners, a commitment to socially just schools and classrooms and an understanding of artistic processes. This subject will give students an understanding of the role of aesthetics, imagination and play in learning.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7089 Primary English and Literacy 1 (10 Credit Points)
Subject Details (p. 5399) **Legacy Code:** 101579
From 2020 students should note that core subjects are now taught in semesters rather than half yearly sessions. This subject is designed to explore key concepts associated with the teaching of the English Key Learning Area in the K-6 years, set in the broader context of a contemporary new literacies environment. It will examine the processes involved in the teaching of oracy and reading with a focus on traditional print-based literacies and multiliteracies. Students will investigate the teaching and learning of oracy and reading of a range of factual and literary texts, involving every day and specialised knowledge for a range of readers/viewers. Students will be introduced to the use of children's literature and authentic texts for the development of students' reading skills and abilities. Students will develop skills in pedagogy and practice within the area of K-6 English.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7090 Primary English and Literacy 2 (10 Credit Points)
Subject Details (p. 5401) **Legacy Code:** 101586
From 2020 students should note that core subjects are now taught in semesters rather than half yearly sessions. This subject is designed to provide a comprehensive account of the teaching of spoken, written and multimodal texts in the primary years of schooling. Students gain an understanding of different theories related to producing texts in a range of modes for different purposes. They investigate a range of written and multimodal genres, their textual structures and grammar and learn to apply these in planning and teaching in mainstream, English as an Additional Language or Dialect (EAL/D) and Aboriginal and Torres Strait Islander contexts, gaining a critical awareness of varying pedagogic approaches. Students will develop skills in pedagogy and practice, including next practice, within English & Literacy for K-6 students . The knowledge and skills developed in the other subjects of study in the course can be applied in this subject and Professional Practice subjects.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7091 Primary Health and Physical Education (10 Credit Points)
Subject Details (p. 5402) **Legacy Code:** 102072
From 2020 students should note that core subjects are now taught in semesters rather than half yearly sessions. This subject is designed to explore the content and pedagogies of Health and Physical Education (HPE) in the NSW primary curriculum. Students will develop an experiential understanding of the pedagogy of HPE. The knowledge and skills developed in the other subjects of study in the course can be applied in this subject and Professional Experience subjects. In this subject students will also continue to develop their research skills. This subject aims to develop teachers who demonstrate empathy with diverse groups of student learners and commitment to socially just schools and classrooms.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: TEAC 7095 - Primary Personal Development Health and Physical Education
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7092 Primary Human Society and its Environment (10 Credit Points)
Subject Details (p. 5404) **Legacy Code:** 101582
From 2020 students should note that core subjects are now taught in semesters rather than half yearly sessions. Human Society and Its Environment focuses on History, Geography and three cross-curriculum priority areas in: Aboriginal and Torres Strait Islander histories and cultures; Asia and Australia's engagement with Asia; and Sustainability. As a key learning area in the K-6 curriculum HSIE provides opportunities for students to develop knowledge, understanding and skills in the subject matter, as well as proficiency in teaching inquiry learning approaches. In History, key concepts of changes in family history and local history are explored and Australia's history and understanding Australia as a Nation are explored through the relationships between the individual and the state, and the values and mutual responsibilities, and obligations for civil, political and social participation in Australian society. In Geography, concepts that develop a sense of curiosity about environments, peoples, cultures and place, in both Australia and the world are a priority. The subject emphasises pedagogy and lesson design for high possibility classrooms that specifically address the literacy and technology general capabilities. The subject also focuses on inquiry, place and project based learning which engages diverse groups of learners, develops their understanding about local and global communities, and prepares them to become informed and active citizens who contribute to the quality of Australian society.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7093 Primary Mathematics and Numeracy 1 (10 Credit Points)
Subject Details (p. 5405) **Legacy Code:** 101580
The subject will develop students' understandings of children's construction of mathematical and numeracy concepts during the years from Kindergarten to Year 3. Students will develop their ability to assess young children's mathematical understandings and numeracy development, and to provide learning experiences for a diversity of learners, including investigation and the use of digital technologies, to enhance the growth of children's mathematical thinking. The subject will study the NSW K-10 Syllabus in all of its strands, with a particular emphasis on the Working Mathematically strand.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7094 Primary Mathematics and Numeracy 2 (10 Credit Points)
Subject Details (p. 5407) **Legacy Code:** 101584
From 2020 students should note that core subjects are now taught in semesters rather than half yearly sessions. This subject builds on the subject Primary Mathematics and Numeracy 1 with a focus on learners from Year 3 to Year 6, and assumes students have gained familiarity with the knowledge, skills and understandings children require across all strands of the NSW K-10 Syllabus, including the Working Mathematically components. In this subject students develop their understanding of primary mathematics in the mid to upper primary years, with a strong emphasis on aspects of teaching such as student engagement, assessment, differentiation for diversity and the integration of technology. By engaging with this subject, students will have the opportunity to experience, plan and assess a broad range of practices to enhance student learning outcomes and improve student engagement with mathematics.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): Students enrolled in program 1781 and 1663 Master of Teaching (Primary) must have completed the pre-requisite subject TEAC 7093 - Primary Mathematics before enrolling in this subject Students enrolled in program 1783 and 1691 Master of Teaching (Birth – 5Birth – 12 Years) must have completed the pre-requisite subject TEAC 7038 - Early Mathematics and Numeracy before enrolling in this subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7099 Primary Science & Technology (10 Credit Points)
Subject Details (p. 5408) **Legacy Code:** 101583
From 2020 students should note that core subjects are now taught in semesters rather than half yearly sessions. This subject will focus on developing scientific and technological pedagogical content knowledge appropriate for teaching science and technology for students in the K-6 years. It models appropriate pedagogical and pedagogical content knowledge. Students use collaborative social learning situations to develop content knowledge, along with interpersonal and communication skills. The pedagogies modelled will be inclusive and demonstrate how scientific and technological learning experiences can be developed to cater for the needs of the diverse groups of student learners in primary schools. Students learn about engaging science and technology activities that empower primary school students and create futures for students where the capacity to engage with and critically evaluate scientific and technological activity will become increasingly necessary. Students focus on themselves as learners and reflect on the implications of their learning and the learning of others in their future professional practice.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7100 Principles and Practices of Evaluation (10 Credit Points)
Subject Details (p. 5410) **Legacy Code:** 102168
This subject provides opportunities to examine and apply evaluation strategies to assess and evaluate learning, educational and social programs and policies. Theories drawn from evaluation will be used to assist students to develop evaluative frameworks and approaches to critically evaluating programs.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 1545 - Evaluating Learning Programs
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7101 Professional Experience (Additional Needs) (10 Credit Points)
Subject Details (p. 5410) **Legacy Code:** 102153
This subject provides students with an opportunity to apply the knowledge and skills about teaching students with additional needs to a real-life classroom. In turn, this authentic learning experience enriches their future professional growth and capacity to support individuals with additional needs. Students complete a practicum and, where appropriate, a series of field visits and observations, within an educational setting, that supports individuals with additional needs. The placement will be completed in the student's area of specialisation in an early childhood, primary, secondary or other relevant setting. Students are able to demonstrate a range of skills in planning, implementing and evaluating educational programs for students with additional needs that optimise learning outcomes and inclusion.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 1090 - Professional Practice in Context
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7103 Professional Experience 3 - 5 Years (10 Credit Points)
Subject Details (p. 5411) **Legacy Code:** 102110
In this subject students engage in critical reflection as they apply knowledge of and develop skills in pedagogical leadership during a 25 day placement with children aged 3 - 5 years. The placement includes 5 observation days where students orient themselves to the setting, gain informed consent to work with focus children and undertake detailed observation of the children. Students will work collaboratively with setting staff and families to implement an integrated curriculum that engages children, facilitates in-depth investigation and critical thinking, and connects to children's social worlds. The subject requires students to apply the principles, practices and outcomes of Belonging, Being and Becoming: The Early Years Learning Framework for Australia to design, implement and evaluate innovative, inclusive and meaningful learning environments. Students must have satisfactorily completed Professional Experience Birth – 2 Years, the School of Education Academic Literacy Assessment Task, child protection awareness training and Working with Children check, and obtained anaphylaxis certification before enrolling in this subject. Students must also meet the Inherent Requirements for the Master of Teaching (Birth – 5 Years / Birth – 12 Years), details of which are available at http://www.uws.edu.au/ir/inherent_requirements/inherent_requirements_for_teaching_courses_postgraduate/master_of_teaching_birth_to_5_yearsbirth_to_12_years . The subject Practising Pedagogical Leadership must be completed in the same semester as Professional Experience 3-5 Years.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): TEAC 7104
Co-requisite(s): TEAC 7087
Equivalent Subjects: TEAC 7035 - Early Childhood Professional Experience 2 TEAC 2051 - Professional Portfolio
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7104 Professional Experience Birth - 2 Years (10 Credit Points)
Subject Details (p. 5413) **Legacy Code:** 102109
This subject has a strong focus on supporting children's health and wellbeing through the building of relationships with children, staff, and children's families. Students apply their knowledge of work health and safety and the Australian Children's Education and Care Quality Authority's National Quality Standard as they complete 25 days of placement with children under the age of 3. Students will complete a minimum of 10 days working with children under the age of 2 years and a minimum of 10 days working with children aged 2- 3 years. The placement includes 5 observation days that allow students to orient themselves to the setting and the groups of children with whom they will work. Students have the opportunity to document and assess children's learning and to apply knowledge of curriculum and pedagogy to plan innovative and engaging learning experiences that respond to children's family and community experiences and funds of knowledge. Students must satisfactorily complete Child Protection Awareness Training and Working with Children check and obtain anaphylaxis certification prior to undertaking visits to the early childhood setting and also meet the Inherent Requirements of the Master of Teaching (Birth – 5 Years / Birth – 12 Years), details of which are available at: http://www.uws.edu.au/ir/inherent_requirements/inherent_requirements_for_teaching_courses_postgraduate/master_of_teaching_birth_to_5_yearsbirth_to_12_years
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): TEAC 7147
Equivalent Subjects: TEAC 7034 - Early Childhood Professional Experience 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7106 Professional Experience K - 6 (10 Credit Points)
Subject Details (p. 5415) **Legacy Code:** 102111
This subject provides students with a professional experience in a primary school, building on their prior experience in early childhood and community-based settings. The professional experience component of this subject consists of 30 days. Students will link theory and practice while exploring issues involved in understanding the needs of learners within specific school and classroom contexts. Students will design and teach experiences, lessons and units of work in ways that enhance student engagement and learning outcomes, and make relevant links with NSW Education Standards Authority syllabus documents that align with the Australian Curriculum. This professional experience subject supports students to meet the Australian Professional Standards for graduate teachers by focusing on developing professional knowledge, practice and engagement in the primary school context. The subject also gives students opportunities to reflect on their own teaching and learning, and to develop professional goals.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): TEAC 7103
Equivalent Subjects: TEAC 7096 - Primary Professional Experience
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7108 Professional Practice Community Engagement (10 Credit Points)
Subject Details (p. 5417) **Legacy Code:** 102605
Professional Practice Community Engagement is a Professional Experience subject of the Master of Teaching (Secondary), incorporating a five-day or 30 hours academic service learning placement and is designed to develop sustainable practical knowledge and skills that supplement those developed in the other Professional Experience subjects. This subject will expand Teacher Education students' understandings of the contemporary issues confronting the wider education community. As such, a diverse range of educational settings including secondary school contexts are utilised to provide a deeper perspective for future secondary teachers beyond curriculum matters, and to facilitate engagement with holistic schooling practices. Teacher Education students choose from the available educational contexts to suit their needs, interests, expertise and communities.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: EDUC 7002 - Professional Experience 3 TEAC 7139 - Secondary Professional Practice 3
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7111 Professional Project (10 Credit Points)
Subject Details (p. 5418) **Legacy Code:** 102163
Professional project enables students to engage in an intensive study of an aspect of work related learning in order to develop, implement or improve some aspect of current professional or personal practice. It provides opportunities for students to use research skills and related theory directly as they implement a practice-based research-informed project within their own areas of specialisation. Students will be required to consult, present 'work in progress' and prepare a final report for a suitable audience.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): TEAC 7115
Equivalent Subjects: TEAC 7055 - Independent Studies – Practice in Context
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7112 Prosocial Learning Environments (10 Credit Points)
Subject Details (p. 5419) **Legacy Code:** 101105
From 2020 students should note that core units are now taught in semesters rather than half yearly sessions. Educators have a key responsibility for guiding and leading children in the development of self-discipline, moral autonomy, and a sense of social belonging and wellbeing while acknowledging developmental needs, pluralistic community values, expectations, standards, norms and rules. Despite increased knowledge of child development and children's social and cultural contexts, the guidance and management of children's behaviour remains a contentious area for educators, parents and children. This subject will provide students with the opportunity to focus in depth on a range of approaches to behaviour, social interactions and guidance, to reflect on the impact of these approaches on children's development and learning, and to critically evaluate their personal and professional dispositions regarding behaviour and guidance. The subject also focuses on the design of learning environments that promote engaged learning and a positive physical and socio-emotional climate.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7114 Research and Professional Practice (10 Credit Points)
Subject Details (p. 5420) **Legacy Code:** 102100
From 2020 students should note that core subjects are now taught in semesters rather than half yearly sessions. This subject aims to develop students' capacity to reflect on and develop their teaching practice and professional identity as practitioner researchers. Vital to this process is the capacity to use research to interpret current educational contexts and the implications for their role as teachers. Students will explore research processes including data collection, analysis techniques and the processes that experienced researchers take in order to ensure their research is valid, reliable, ethical, useful and socially responsible. Contemporary theories as well as social, cultural, economic and political structures important to the role and work of teachers will also be critically reviewed. In this subject students will challenge established, historical conceptualisations of 'teacher' to develop their own understanding of this role in contemporary, early childhood and primary education contexts.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7115 Researching Practice (10 Credit Points)
Subject Details (p. 5421) **Legacy Code:** 101656
This subject enables students to engage in research practice in their area of professional interest or specialisation. Students will develop deep insight into the application of research in practice contexts and diverse research methodologies appropriate to practitioner research. They will develop skills in analysing, critiquing, and synthesising the literature in a relevant research area. Evaluation of research literature will be the basis for planning a self-directed professional project that employs identifiable research methods and tools to address a question of personal and/ or professional relevance.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7116 Researching STEM Education for Future Leadership (10 Credit Points)
Subject Details (p. 5422) **Legacy Code:** 102512
From 2020 students should note that core subjects are now taught in semesters rather than half yearly sessions. This subject seeks to redefine and inform practice about what it means to be a contemporary STEM teacher by engaging with literature on a specific research topic in STEM education and designing and implementing a research project in a team on that area of STEM education. The focus is also on the role of teacher/practitioner-research as central to professional learning in contemporary education. The central role of practitioner research in the practice of future STEM educational leaders is emphasised. Students will also be required to complete evidence-gathering in an e-portfolio to demonstrate they meet the Australian Professional Standards for Teachers at: http://www.aitsl.edu.au/australian-professional-standards-for-teachers/standards/list.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): TEAC 7121
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7119 Researching and Developing Engaging Pedagogies (10 Credit Points)
Subject Details (p. 5423) **Legacy Code:** 102075
This subject builds on the interplay between research and practice. It extends students' understanding of the processes and uses of participatory action research, also known in this context as teacher-based inquiry. It reviews theories on engaging practices in diverse professional contexts, with a focus on working with students from low socio-economic backgrounds, Aboriginal and Torres Strait Island learners and students who have English as an additional language or dialect (EAL/D). It also reviews pedagogic approaches linked to 21st century education. It challenges students to inquire into and reflect upon their professional practice and develop engaging classroom pedagogies and assessment practices in the area of their primary teaching specialisation (English, Mathematics or Science and Technology). The subject expands students' research skills through the critical review and application of various approaches to document, measure and evaluate student engagement. In line with NESA primary teaching specialisation requirements, students must apply these research skills and understandings to their school, classroom context and selected curriculum area specialisation.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): TEAC 7154 - Professional Experience 1 and TEAC 7141 - Teaching and Learning in Classrooms
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7120 STEM Pedagogies in Practice (10 Credit Points)
Subject Details (p. 5424) **Legacy Code:** 102511
The purpose of this subject is for students to gain exposure to authentic contexts for integrating science, technology, engineering and mathematics and to develop knowledge and skills with designing and implementing STEM learning experiences. Students will have the opportunity to complete an authentic interdisciplinary STEM task, and draw upon this experience to design and implement interdisciplinary STEM learning activities aligned to syllabus outcomes. This subject will allow students to simulate and evaluate the teaching practices associated with high-quality interdisciplinary STEM lessons, and collaborate with peers who have expertise in different STEM disciplines.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): TEAC 7121 STEM Foundations (This prerequisite applies to students enrolled in program 1848 only)
Co-requisite(s): TEAC 7154
This corequisite applies to students enrolled in program 1848 only
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7121 STEM foundations (10 Credit Points)
Subject Details (p. 5425) **Legacy Code:** 102508
This subject will enable students to engage with knowledge of research-based integrated approaches to the teaching of science, technology, engineering and mathematics in schools. Students will learn about interdisciplinary methods for STEM learning, including project based learning and design thinking. The subject will allow students to undertake a critical examination of innovative, interdisciplinary approaches to curriculum development and relevant pedagogical strategies to maximise student learning and engagement with STEM disciplines.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7122 Science for Contemporary Learners (10 Credit Points)
Subject Details (p. 5426) **Legacy Code:** 102485
The purpose of this subject is for students to investigate how primary-age children think scientifically and develop knowledge of the natural world, and explore constructivist strategies for teaching primary science aligned to current reform efforts. An emphasis will be placed on understanding the essential features of inquiry-based pedagogies, scientific practices, and the role of creativity, coding, and technology in teaching and learning science. Students will apply their understandings of learning and constructivist pedagogies to the design of a series of primary science lessons.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7140 TESOL Methodology and Curricula (20 Credit Points)
Subject Details (p. 5427) **Legacy Code:** 101697
Focusing on the process of teaching English as a second or other language, the subject provides students with knowledge about approaches to teaching necessary to plan, design and evaluate curricula most appropriate to the needs of different learners. Students will develop skills in action research to facilitate critical evaluation of their teaching practices as independent professionals.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: LGYA 0753 - TESOL Methodology LGYA 0746 - TESOL Curriculum Development
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7141 Teaching and Learning in Classrooms (10 Credit Points)
Subject Details (p. 5428) **Legacy Code:** 102076
From 2020 students should note that core subjects are now taught in semesters rather than half yearly sessions. This subject is designed to prepare students for their role as active, thoughtful leaders of learning environments for primary students. Students will come to an understanding of their trajectory as professional learners as they develop a deeper understanding of who they are as teachers. The portfolio that they begin in this subject will be a vehicle for them to reflect deeply on their emerging skills and understandings and will be part of their development of a critical perspective of their practice as a teacher. Building on previous understanding about how children learn the students will plan lesson sequences using a range of teaching strategies. The subject will familiarise students with the processes needed to implement the mandated national and state curriculums in their unique classrooms with the diversity of students with whom they are working. A study of techniques to create safe and well managed learning environments where school students feel a sense of ownership of their learning will aid successful completion of the associated practicum subject. The practice of continuous assessment, planning, implementation and reflection that is the curriculum cycle will provide an organising principle around which the understandings gained in the curriculum units can be built.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): TEAC 7154 Professional Experience 1
Equivalent Subjects: TEAC 7069 - Learning for Teaching
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7142 Teaching and Learning with Adults (10 Credit Points)
Subject Details (p. 5429) **Legacy Code:** 102155
This subject explores the pedagogical issues which shape the ways in which teaching and learning for adults might be organised in a variety of contexts. It is suitable for leaders, teachers, tutors, trainers and other staff working in schools, organisations, workplaces and communities. The subject will draw upon a range of theoretical perspectives including approaches to learning, knowledge and assessment, the relationship between organisational context, teaching and learning, and the role of the adult educator as a 'practical theorist'.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7144 Technology Assisting Learning (10 Credit Points)
Subject Details (p. 5430) **Legacy Code:** 102154
Assistive technologies have the potential to meet a range of simple to complex needs for individuals with additional needs, and boost an individual's participation, communication, learning outcomes and quality of life. As such, professionals must develop both knowledge and skill in identifying and embedding appropriate technology into the assessment, goal-setting, teaching and evaluation cycle. Emphasis will be placed on demonstrating deep knowledge of the literature and demonstrating skills in assessment and instructional practices employing technology to support learning, communication, curricular, and instructional access either in a learning or natural setting. Students will be expected to critically examine the educational function and efficacy of communication technology, assistive technology, digital and multimedia text, or educational software.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: TEAC 7077 - Multiliteracies and additional needs
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7147 Theorising Play (10 Credit Points)
Subject Details (p. 5431) **Legacy Code:** 102104
Play provides a foundation for children's development, learning and wellbeing in the early years. An integral part of this subject will be the focus on inquiry, emphasising a critical approach to play and its pedagogical potential to facilitate children's development and wellbeing. Various theoretical orientations will be considered in the study of play. Further, the subject provides guidelines to educators for implementing play based curriculum, an integral component of The Early Years Learning Framework as well as the Health and Physical Education curriculum in the school years. Students will apply their knowledge of theory and research to undertake a case study of a child and make recommendations for practice.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: TEAC 7085 Play development and learning
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7148 Transformative Learning (10 Credit Points)
Subject Details (p. 5432) **Legacy Code:** 101658
This subject provides opportunities to examine and apply theories drawn from critical pedagogy, transformative learning and ecological thinking. It challenges students to critically examine the relationships through which personal and social knowledge is constructed and their efficacy in the construction of learning for the future. Inherent in such thinking are questions about the processes of change in education systems that lead through equity, inclusiveness, wellbeing, social justice and ecological sustainability.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7149 Understanding and Teaching Children (10 Credit Points)
Subject Details (p. 5433) **Legacy Code:** 102077
From 2020 students should note that core subjects are now taught in semesters rather than half yearly sessions. This subject is designed to facilitate prospective teachers to develop the dispositions and critical skills to create learning communities that are academically challenging, developmentally responsive, socially equitable and promote social and emotional wellbeing. The subject highlights the interacting contributions of biology and environment to the development of children and explores how teachers' knowledge of this process informs their instructional strategies. Specifically, this subject examines a body of classic, as well as current theories, research and practice relating to the cognitive, physiological, and social/affective needs of children and focuses on the relevance of these for classroom practice. Particular emphasis is given to developing responsive teaching practices which promote social and emotional wellbeing of children and are underpinned by high-quality relationships which extend to include the valuing of families and the wider community.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: TEAC 7040 - Educational Psychology for Primary Teaching
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7150 Universal Design for Learning (10 Credit Points)
Subject Details (p. 5435) **Legacy Code:** 102150
Developing the ability to meet the needs of a diverse group of learners within a flexible learning situation is critical to promote inclusion. This subject reviews multiple approaches and strategies employed (e.g. accommodation, adjustment, differentiation) and advocates for Universal Design for Learning to achieve this goal. Strategies are critiqued based on their capacity to enhance learning outcomes for individuals with additional needs and to advance inclusion. These analyses are then used to develop strategies and methods which can facilitate the learning and inclusion of individuals with a range of abilities, skills and needs. Students evaluate strategies, plan and reflect on a learning experience based on Universal Design for Learning.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: TEAC 7048 - Inclusion in Practice
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7151 Applied Mathematics and Science in Secondary STEM Education (10 Credit Points)
Subject Details (p. 5436) **Legacy Code:** 102764
This subject develops in-service teachers' knowledge and skills in the application of mathematics and science in the STEM (science, technology, engineering and mathematics) disciplines. The subject content and assessments are designed to (1) build teachers' foundational skills in science/mathematics, and (2) build teachers' professional skills in the implementation of science/mathematics in their classrooms. A particular focus of the subject is how science/mathematics can be used to authentically integrate curriculum content from across the different STEM disciplines through inquiry- and problem-based learning, with the ultimate aim of enhancing student engagement and achievement in the STEM disciplines.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7152 Applied Robotics and Programming in Secondary STEM Education (10 Credit Points)
Subject Details (p. 5437) **Legacy Code:** 102763
This subject develops in-service teachers' knowledge and skills in the application of robotics and coding in the STEM (science, technology, engineering and mathematics) disciplines. The subject content and assessments are designed to firstly build teachers' foundational skills in robotics/coding, and secondly, build teachers' professional skills in the implementation of robotics/coding in their classrooms. A particular focus of the subject is how robotics/coding can be used to authentically integrate curriculum content from and across the different STEM disciplines through inquiry- and problem-based learning, with the ultimate aim of enhancing student engagement and achievement in the STEM disciplines.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7153 Inclusive Education: Principles and Practices (10 Credit Points)
Subject Details (p. 5437) **Legacy Code:** 102746
This subject examines the theoretical, legislative, ethical and policy frameworks that inform inclusive practices in early childhood and school settings. Inclusive principles and evidence-based practices will be critically analysed to identify best practice for assessment for learning, effective planning, teaching, monitoring, and evaluating learning when working with children and young people with a range of abilities and disabilities. The importance of establishing collaborative partnerships with families, educational professionals and community support services will be examined and the role of such partnerships in promoting social inclusion and enhanced learning outcomes, health and wellbeing for all children and young people determined.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: TEAC 7052 - Inclusive Practices TEAC 7053 - Inclusive Teaching for Effective Learning TEAC 7049 - Inclusive Education –Theory Policy and Practice
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7154 Professional Experience 1 (10 Credit Points)
Subject Details (p. 5439) **Legacy Code:** 102792
This subject is the first Professional Experience subject of the Master of Teaching (Primary) and Master of Teaching (Secondary) programs. This subject incorporates a 30-day placement in a NSW school. It is designed to introduce all students to the philosophical, ethical, practical and pedagogical perspectives of becoming a teacher in diverse, contemporary educational settings. The aim of this subject is to enable you to proactively engage in real-life educational settings to learn and enhance your professional development as a future teacher. This subject gives you the opportunity to explore the relationship between practical and theoretical knowledge of teaching. This subject will provide you with an opportunity to explore a range of learning activities that occur inside and outside the classrooms, and the roles of the teaching and non-teaching staff within the school. Through ongoing observation, supervised teaching and contribution in the wider school community, the subject ensures you work towards the achievement of the national standards for a graduate teacher.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): Students enrolled in 1848 - Master of Teaching (Secondary) STEM must have successfully completed TEAC 7004 Adolescent Development and Teaching TEAC 7032 Diversity Social Justice and Learning TEAC 7027 Designing Teaching and Learning and TEAC 7121 STEM foundations before enrolling in this subject
Students enrolled in 1714 - Master of Teaching (Secondary) must have successfully completed TEAC 7004 Adolescent Development and Teaching TEAC 7032 Diversity Social Justice and Learning and TEAC 7027 Designing Teaching and Learning before enrolling in this subject
Students enrolled in 1714 must have successfully completed 40 credit points to enrol in this subject
Students enrolled in 1781 must have successfully completed 40 credit points to enrol in this subject
Co-requisite(s): Students enrolled in 1714 - Master of Teaching (Secondary) must have successfully completed or be enrolled in TEAC 7082 Pedagogy for Positive learning Environments
Students enrolled in 1781 - Master of Teaching (Primary) must have successfully completed or be enrolled in TEAC 7141 Teaching and Learning in Classrooms
Equivalent Subjects: TEAC 7097 - Primary Professional Practice 1 TEAC 7135 - Secondary Professional Practice I TEAC 7109 - Professional Practice 1 TEAC 7102 - Professional Experience 1 TEAC 7136 - Secondary Professional Practice 1 STEM
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7155 Professional Experience 2 (10 Credit Points)
Subject Details (p. 5442) **Legacy Code:** 102793
Professional Experience 2 is a final capstone subject in your Master of Teaching course. The aim of this subject is to enable education students to proactively engage in real-life educational settings to learn and enhance their professional development as a future teacher. This second professional experience subject provides 30 of the 60 required professional experience days. This provides you with an opportunity to explore ranges of learning activities that occurs inside and outside the classrooms and the roles of the teaching and non-teaching staff within the school. You will also have opportunity to reflect on the teaching and learning cycle and refine your competencies as a beginning teacher under the supervision of qualified educators. This subject includes the TPA (Teaching Performance Assessment) which is designed to assess Teacher Education Students teaching as measured by the Australian Professional Standards for Teachers at the Graduate level.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): TEAC 7154
Co-requisite(s): -
Equivalent Subjects: TEAC 7110 Professional Practice II TEAC 7098 Primary Professional Practice 2 TEAC 7105 Professional Experience II TEAC 7137 Secondary Professional Practice 2 TEAC 7138 Secondary Professional Practice 2 - STEM
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7156 Aboriginal Education: Past, Present and Future (10 Credit Points)
Subject Details (p. 5444) **Legacy Code:** 102810
This subject builds the capacity of students to work in culturally competent and sensitive ways in relation to Aboriginal and Torres Strait Islander education in primary schools. It allows for the development of understandings of the similarities and/or diversities of local Aboriginal and Torres Strait Islander groups including culture, histories, languages and identity. It examines the social and cultural contexts that influence engagement by Aboriginal and Torres Strait Islander children, families and communities in schooling. It explores ways of improving engagement through effective school culture, curriculum and community approaches. The subject explores the protocols for successfully working with Aboriginal children, families and communities in education settings to maximise learning outcomes for Aboriginal and Torres Strait Islander students. By investigating current approaches for teaching Aboriginal and Torres Strait Islander children and integrating Aboriginal knowledges, perspectives and culturally sensitive pedagogies into schooling, the students develop their own practices in providing an inclusive learning environment for all children. The subject explores the protocols for successfully working with Aboriginal children, families and communities in education settings to maximise learning outcomes for Aboriginal and Torres Strait Islander students.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: TEAC 7016 - Classrooms without Borders
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7157 Action Research in Teaching (10 Credit Points)
Subject Details (p. 5445) **Legacy Code:** 102811
This subject provides an opportunity for students to engage with literature on a particular aspect of a research topic and design a research project in a team. Students will: locate and select relevant research literature to investigate a particular research question; analyse key ideas, assumptions and domains of knowledge in the literature around that question; identify appropriate research methods and designs for answering it; critically apply appropriate forms of data collection and data analysis to that research design, and develop research findings into an informed discussion linking to broader academic conversations around the field being researched.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: TEAC 7117 - Researching Teaching Learning 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7158 Researching Teaching and Learning (10 Credit Points)
Subject Details (p. 5446) **Legacy Code:** 102852
This subject builds on the premise that, in contemporary education environments, teachers continue to develop their professional knowledge and practice through their engagement in reflective inquiry. The capacity to read and make sense of research is an important professional attribute for teachers interested in sustainable practices, engaged inquiry learning by adolescents, and diversity, social justice and equity. The subject provides pre-service teachers with a starting point and practical insights into the day-to-day decision making of educators. The content will follow the order and logic that experienced researchers take in order to ensure quality in their research, and also to ensure that it is valid, reliable, ethical, useful and socially responsible. Given the professional skills required by teachers, the subject pays particular attention to the elements involved in action research.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: TEAC 7118 - Researching Teaching and Learning 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 9001 Higher Degree Research Thesis - Teacher Education: Early Childhood (10,20 Credit Points)
Subject Details (p. 5447) **Legacy Code:** 800011
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 9002 Higher Degree Research Thesis - Teacher Education: Primary (10,20 Credit Points)
Subject Details (p. 5449) **Legacy Code:** 800013
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 9003 Higher Degree Research Thesis - Teacher Education: Secondary (10,20 Credit Points)
Subject Details (p. 5450) **Legacy Code:** 800015
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

Tourism (TOUR)

TOUR 1002 Tourism and Global Trends (10 Credit Points)
Subject Details (p. 5451) **Legacy Code:** 101901
In 2023, this subject replaced by TOUR 1003 - Global Trends in Tourism and Events. This subject introduces students to the foundational knowledge and skills required for tourism study at UWS and professional practice in a range of tourism related careers. This subject provides students with opportunities to familiarise themselves with the core concepts and basic theory of tourism management studies. It aims to equip students with an understanding of sustainable tourism, the tourism system, and mega trends of tourism. It covers the global complexity of the tourism industry; of the social, environmental, and political realities; and the role of governments - federal, state and local together with private enterprise in the development of tourism experience, industry practice, and destinations.
Level: Undergraduate Level 1 subject
Equivalent Subjects: TOUR 1001 - Tourism Sustainability and Global Trends
Incompatible Subjects: LGYA 1263 - Sustainable Tourism in Practice LGYA 1262 - Managing Tourism
Restrictions: Please see the Subject Details page for any restrictions for this subject

TOUR 1003 Global Trends in Tourism and Events (10 Credit Points)
Subject Details (p. 5452)
This subject introduces students to the foundational knowledge and skills required for tourism, event and heritage studies at WSU and professional practice in a range of related careers. The subject provides students with opportunities to familiarise themselves with the core concepts and basic theory of tourism, event, and heritage studies. It aims to equip students with an understanding of sustainable industry and community, the tourism system, and mega trends in tourism and event management. It covers the global complexity of tourism and event management; of the social, environmental, and political realities; and the role of governments – federal, state and local together with private enterprise in the development of experience, industry practice, and destinations.
Level: Undergraduate Level 1 subject
Equivalent Subjects: TOUR 1002 - Tourism and Global Trends
Restrictions: Please see the Subject Details page for any restrictions for this subject

TOUR 2001 Issues in Contemporary Heritage (10 Credit Points)
Subject Details (p. 5453) **Legacy Code:** 101601
In 2023 this subject is replaced by HUMN 2073 Issues in Contemporary Heritage. The aim of this subject is to get students thinking critically about heritage. To do so, it examines two main questions: "What is heritage?" and "Why does it matter?". While the answers to both may appear fairly straightforward, this subject is designed to make students question and problematise their own assumptions, rethink what is and is not heritage, and consider why, in fact, we even care at all.
The subject will introduce concepts such as national identity, ethics, memorialisation, belonging, nostalgia, heritage values, status, control and repatriation. It will also introduce and examine heritage legislation, theory and practice.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TOUR 2002 Tourism Industry Experience (0 Credit Points)
Subject Details (p. 5453) **Legacy Code:** 101607
This subject provides students with opportunities to work with private industry, government or non-government organisations, or commercial establishments, and be able to relate this experience with their professional and academic interests. It is a non fee paying but compulsory component of tourism management degree at Western Sydney University. Students will seek to learn about the many aspects of industry related work including environmental, social, cultural, and business matters.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYB 8194 - Tourism Industry Experience
Restrictions: Please see the Subject Details page for any restrictions for this subject

TOUR 2003 Managing Sustainable Places (10 Credit Points)
Subject Details (p. 5454)
Managing Sustainable Places provides students with a fundamental understanding of current debates in tourism and sustainable place management. The complex relationships and interactions among the diverse stakeholders involved in managing sustainable places and tourism are explored. The subject encourages a systems approach, focusing on managing visitor experiences alongside destination attributes and community development. The subject assists students to analyse the role of tourism, events, and heritage in sustainable places through applying a wide range of case studies.
Level: Undergraduate Level 2 subject
Equivalent Subjects: SPRT 2011 Sustainability Tourism and Place
Restrictions: Please see the Subject Details page for any restrictions for this subject

TOUR 2004 Tourism and Festivals in Society (10 Credit Points)
Subject Details (p. 5454)
In this subject student's approach tourism and festivals as cultural and social phenomena. Tourism and festival related industries, visitor behaviour, visitor experience and the impacts of these are examined through a socio-cultural lens. Considering tourism as an agent of social change, and festivals as a key driving force within this, the subject is framed within the interplay between tourism, mobility and globalisation, tourism and development, and tourism and world events. The subject will also unpack some of the common motivations for leisure travel, explore the role of tourism in everyday life, and examine the interconnections between the media, consumer culture, visual culture and the tourist and festival experience.
Level: Undergraduate Level 2 subject
Equivalent Subjects: HUMN 2057 - Tourism in Society
Restrictions: Please see the Subject Details page for any restrictions for this subject

TOUR 3001 Tourism, Events and Technology (10 Credit Points)
Subject Details (p. 5455)
This subject explores the ways in which digital technologies are reshaping travel, including travellers' experiences, and planning and management of the travel industry. Students will learn how digital technologies are being utilised, and the opportunities and challenges these technologies present. The subject will provide opportunities to engage with travel apps, virtual/augmented reality technologies, smart attractions and transport technologies. Students will also learn how to conceptualise and pitch their own digital travel products. Upon completion of the subject, students will be well placed to develop and manage innovative, socially responsible travel and mobility technologies.
Level: Undergraduate Level 3 subject
Equivalent Subjects: BUSM 3079 - Travel in the Digital Age
Restrictions: Please see the Subject Details page for any restrictions for this subject

TOUR 3002 Cultural Tourism and Events (10 Credit Points)
Subject Details (p. 5456)
This subject examines the relationship between culture, heritage, tourism and events. It firstly provides an introduction to contemporary issues in heritage, tourism and event management. Secondly, it investigates the phenomenon of cultural tourism – its nature (including places and events), the market, visitors, the issues in planning and management – in the context of heritage and sustainable tourism praxis in Australia (and globally) as well as in the context of local communities.
Level: Undergraduate Level 3 subject
Equivalent Subjects: CULT 3015 - Heritage and Tourism
Restrictions: Please see the Subject Details page for any restrictions for this subject

TOUR 3003 Visitor Economy Professional Placement (20 Credit Points)
Subject Details (p. 5457)
Visitor Economy Professional Placement (VEPP) provides students with understanding and experience of tourism, events, heritage and related industry workplaces. Students work in a voluntary capacity with an industry host to gain work-ready skills and undertake professionally appropriate tasks. Students complete a Professional Placement Proposal and Professional Placement Report.
Level: Undergraduate Level 3 subject
Equivalent Subjects: BUSM 3072 - Tourism Industry Professional Placement
Restrictions: Please see the Subject Details page for any restrictions for this subject

TOUR 3004 Destination Management (10 Credit Points)
Subject Details (p. 5457)
Destination Management provides students with a fundamental understanding of the concepts associated with managing places as destinations. The subject develops analytical skills that include the coordination of a destination through tourism industry's sectors, their relationship with each other and the opportunities and challenges they face in the predictable future. An appreciation of the importance of a destination's unique cultural, natural and economic attributes is developed from the viewpoint of sustainability and through the prism of a destination audit. The nature of competition and gaining competitive advantage is addressed throughout the content.
Level: Undergraduate Level 3 subject
Equivalent Subjects: BUSM 3007 - Destination Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

TOUR 3005 Tourism Policy and Planning (10 Credit Points)
Subject Details (p. 5458)
This subject provides students with a general understanding of planning theory as it relates to sustainable tourism policy and practice. Students will hear directly from practitioners about the ways in which policy and planning is being deployed to address contemporary tourism issues. The subject will explore various planning techniques, tourism policies, scenario mapping strategies and consider conflict resolution practices. The major assessment develops students' abilities to identify deficiencies in current policy and to propose policy recommendations.
Level: Undergraduate Level 3 subject
Equivalent Subjects: BUSM 3073 - Tourism Policy and Planning
Restrictions: Please see the Subject Details page for any restrictions for this subject

TOUR 3006 Festivals and Events (10 Credit Points)
Subject Details (p. 5459)
This subject explores the complexities of planning and managing major festivals and events. Students will gain an appreciation of the benefits festivals and events can provide for communities and visitor economies, as well as the challenges and risks they present. The subject will also cover a variety of other aspects, including: marketing, branding, sustainability, place-making, access, equity and security/ policing. Students will be encouraged to attend events and festivals over the course of the semester, and experts will be invited to provide 'real-world' case-studies. The major assessment allows students to draw on the knowledge and skills they are developing to propose their own major festival/event.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TOUR 5001 Sustainable Tourism and Heritage (10 Credit Points)
Subject Details (p. 5459)
This subject explores heritage and tourism through the lens of sustainability. It examines how heritage and tourism are impacted by sustainability challenges as well as how heritage and tourism can be undertaken in more sustainable ways. The subject contextualises how heritage and tourism have been used in social, economic and urban development and revitalisation strategies across the globe. It critically investigates how heritage and tourism are unfolding in the Global South, Indigenising and decolonising approaches and contemporary movements towards activism and justice (social, cultural, environmental, restorative). The subject also considers threats to these sectors' sustainability, including impacts of the Anthropocene.
Level: Postgraduate Coursework Level 5 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TOUR 5002 Frontiers in Sustainable Tourism Practice and Places (10 Credit Points)
Subject Details (p. 5460)
Tourism is a practice that both reflects and creates the changing, global world. International tourism is a key driver of the human experience of globalisation including the development of global citizenry, the opportunities and obligations that accompany this and the challenges, limitations and sometimes unintended effects of seemingly inconsequential travel choices. The tourism industry is concerned with the ongoing production of novel ways of experiencing the world and draws upon innovation in science and technology as well as imaginaries to accomplish this. This subject will examine how tourism creates and responds to futures in the realms of space, economy, culture and knowledge and how we can assess, evaluate and predict the effects of these.
Level: Postgraduate Coursework Level 5 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TOUR 6001 Tourism, Heritage and Events Policy and Governance (10 Credit Points)
Subject Details (p. 5461)
This subject explores policy and governance in the tourism, heritage and events sectors. Students will explore current policies, and learn how to critically analyse them, especially in the context of sustainable development. The subject will also explore different governance structures in these sectors, and their influence on policy development and sustainability outcomes. After completing this subject, students will be well placed to take on governance, planning and policy roles to reshape the tourism, heritage and events sectors, both in Australia and internationally.
Level: Postgraduate Coursework Level 6 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TOUR 6002 Critical Issues for Heritage and Tourism Futures: Assessed Seminars (10 Credit Points)
Subject Details (p. 5461)
The world in which we live is undergoing rapid change – socially, environmentally, and politically. Responding to such change requires the constant renewal of our knowledge and skills. This subject explores a range of issues currently facing professionals and researchers working in heritage and tourism management, nationally and internationally. Students who complete this subject are provided an opportunity to deepen their understanding of a chosen issue by preparing and presenting a seminar.
Level: Postgraduate Coursework Level 6 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TOUR 6003 Sustainable Visitor Economies (10 Credit Points)
Subject Details (p. 5462)
While the intersecting industries and mobilities that comprise the 'visitor economy' (e.g. tourism, events, international education, business travel, hospitality, accommodation, transport, etc.) have traditionally been observed individually, there is a growing recognition of the need for holistic approach to planning and managing these diverse sectors. This is especially important for accomplishing sustainability outcomes. In this subject, students will learn about principles and strategies for managing sustainable visitor economies. Industry and government stakeholders will share case-studies detailing their experiences managing visitor economies.
Level: Postgraduate Coursework Level 6 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TOUR 6004 Data Capture and Creative Communication (10 Credit Points)
Subject Details (p. 5462)
This subject provides students with the knowledge and skills to creatively address a range of operational and engagement challenges in the tourism, heritage and visitor economy sectors. Through practical application and class-based theory, students will have the opportunity to learn a variety of data-capture and creative communication techniques, including: safe drone operation, high quality audio-visual recording, video editing, digital mapping, and graphic design for marketing, interpretation and public engagement.
Level: Postgraduate Coursework Level 6 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TOUR 9001 Higher Degree Research Thesis - Tourism (10,20 Credit Points)
Subject Details (p. 5463) **Legacy Code:** 800069
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

Visual Arts and Crafts (VISU)

VISU 2003 From Ochre to Acrylics to New Technologies (10 Credit Points)
Subject Details (p. 5465) **Legacy Code:** 101755
This subject examines the emergence of the Indigenous Australian visual arts movement. It will provide students with a body of knowledge which explores the transition of art-making as it emerged from an historical cultural practice: from ochre to acrylics to new technologies. In examining the Indigenous visual arts movement beginning with the Papunya Tula artists, students will gain an insight into the significant contribution urban and regional Indigenous artists make to the Australian economy and culture. Students will have the exciting opportunity to participate in site visits and engage with a number of Indigenous visual artists. This subject is available to all Undergraduate students who have open electives.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

VISU 2007 Animation and Visual Effects (WSTC) (10 Credit Points)
Subject Details (p. 5466) **Legacy Code:** 700328
Explore the art and technology of animation and visual effects as applied to digital screen media production. In this unit, you will be introduced to the principles of animation and compositing and learn how to create effective motion sequences integrated with sound. Working with commercial software, you will explore the unique possibilities of animation and visual effects production and experiment with alternative, creative, narrative storytelling approaches. Develop critical, conceptual and practical skills within the context of animation and visual effects which will then enable you to deliver powerful and compelling visual stories on multiple media platforms.
Level: Undergraduate Level 2 subject
Co-requisite(s): Students enrolled in the combined DiplomaBachelor courses listed below must pass all College Preparatory units listed in the course structure before progressing to the Year Two units
Equivalent Subjects: COMM 2031 - Principles of Non-Linear Editing COMM 2008 - Animation and Visual Effects COMM 2042 - Visual Effects COMM 2051 - Animation and Visual Effects COMM 2054 - Animation and Visual Effects (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

VISU 3002 Photomedia: Fashion and Identity (10 Credit Points)
Subject Details (p. 5466) **Legacy Code:** 100941
This subject explores issues of identity through photographic practice as used in Fashion Photography. Fashion is a universal form of self-expression, making it the communication strategy most employed to express identity based on material and non-material cultures. The role of photography in the creation of iconic and culturally referential images in both commercial and editorial work will be researched, analysed and interpreted in order to place the student's work in context. It provides students with capacity building through an advanced experience with studio lighting, digital effects for fashion based image making and experience with location and studio photography and of professional photography as it is used in fashion publications.
Level: Undergraduate Level 3 subject
Pre-requisite(s): DESN 2013
Equivalent Subjects: LGYA 0822 - Fashion Style and Identity LGYA 2433 - Photomedia 2 Fabrication
Restrictions: Please see the Subject Details page for any restrictions for this subject

ACCT 0002 Accounting Fundamentals (WSTC)

Credit Points 5

Legacy Code 900010

Coordinator Abdullah Al Aabed (https://directory.westernsydney.edu.au/search/name/Abdullah Al Aabed/)

Description Accounting is the practice of recording, classifying, summarising, analysing and interpreting information, of a commercial nature for the purpose of helping people make decisions. In the world of business, the role of accounting is to support management in providing timely and accurate financial information about the business so that informed decisions can be made. This subject examines the basic principles underpinning accounting and connects the accounting process to financial decision making for a business.

School Western Sydney The College

Discipline Accounting

Student Contribution Band HECS Band 4 5cp

Check your HECS Band contribution amount via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 0 Preparatory subject

Equivalent Subjects ACCT 0001 - Accounting Fundamentals (WSTC Prep)

Restrictions

Students must be enrolled in a Western Sydney University The College Foundation Studies program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the role of Accounting in business
2. Explain basic Accounting principles and standards.
3. Complete Analysis Charts and record transaction details
4. Construct basic financial statements.
5. Demonstrate simple budgeting and CVP analysis skills.
6. Apply accounting knowledge in basic financial decision-making

Subject Content

Topic 1 What is Accounting?
Forms of ownership
The nature, purpose, role and main principles of accounting
The accounting equation
Topic 2 Recording transactions
Transaction analysis
Organisation of accounting information through the double entry system
Topic 3 Preparation of Financial Statements
The main financial summaries used by accountants
Topic 4 Management Accounting
Budgeting
Basic cost behavior and CVP analysis
Topic 5 Accounting for financial decision-making
The financial environment of business
Interpretation of financial statements
Impact of decisions based on interpretation of financial statements

Assessment

Type	Length	Percent	Threshold	Individual/ Group Task
Intra-session Exam	1 hr	10	N	Individual
Intra-session Exam	1 hr	20	N	Individual
Participation	Weekly	10	N	Individual
Case Study	1.5 hrs	20	N	Individual
Final Exam	2 hrs	40	N	Individual

Teaching Periods

ACCT 0003 Fundamentals of Finance and Accounting

Credit Points 10

Legacy Code 201034

Coordinator Mark Thomas (https://directory.westernsydney.edu.au/search/name/Mark Thomas/)

Description In this unit, students will be introduced to the fundamentals of finance and accounting for business. Students will learn to apply numerical skills within the areas of finance and accounting in preparation for post-graduate study. Financial information will be analysed and interpreted for the purpose of decision-making in a range of corporate contexts. Students will be required to demonstrate an understanding of ethical conduct and best practice reporting in undertaking financial and accounting processes.

Teaching Periods

ACCT 1005 Accounting in Context

Credit Points 10

Legacy Code 200972

Coordinator Helen Black (https://directory.westernsydney.edu.au/search/name/Helen Black/)

Description Accounting in Context is the first core subject required in the accredited accounting program, but can be included as an elective in other programs. It is designed to provide an overarching context about the purpose and usefulness of accounting information and explain a range of definitions and terms used in accounting and business. Accounting in Context will introduce accounting reports and their interpretation, and explore the impact of policy and measurement methods on accounting information and business decisions. Successful completion of the subject will equip participants with an understanding of the importance of accounting to society and allow them to engage with the next core accounting subject; Financial Accounting Applications.

School Business

Discipline Accounting

Student Contribution Band HECS Band 4 10cp

Check your HECS Band contribution amount via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Equivalent Subjects ACCT 1006 - Accounting in Context (WSTC) ACCT 1004 - Accounting Reports and Decisions

Incompatible Subjects ACCT 1001 - Accounting Information for Managers ACCT 1003 - Accounting Information for Managers (WSTC)

Restrictions

This subject is not available to students enrolled in programs 2607 Bachelor of Construction Management, 2769 Bachelor of Construction Management Studies/Bachelor of Laws, 3692 Bachelor of Construction Technology, 3727 Bachelor of Building Design Management. Students enrolled in these programs must complete subject ACCT 1001 - Accounting Information for Managers.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine the usefulness of accounting for decision making.
2. Analyse the ethical, regulatory and sustainability dimensions of accounting.
3. Demonstrate through real-world examples how accounting concepts apply to businesses in the 21st century.
4. Analyse how different accounting techniques impact on accounting information.
5. Demonstrate skills in research and communication.

Subject Content

1. What is accounting and its purpose?
2. Who uses accounting information and how is it used for decision making?
3. What does accounting information look like for different business structures?
4. The regulatory, ethical and sustainability dimensions of accounting.
5. Accounting terms, principles and concepts.
6. Applying the definition and recognition of balance sheet items (assets, liabilities and equity) to a business case study.
7. Applying the definition and recognition of income statement items (income and expenses) to a business case study.
8. Business transactions ? recognising, classifying and recording.
9. Exploring the accounting equation.
10. Accounting Techniques: the impact of policies and measurement methods on accounting information and business decisions.
11. Interpreting financial statements.

ACCT 1006 Accounting in Context (WSTC)

Credit Points 10

Legacy Code 700274

Coordinator Abdullah Al Aabed (https://directory.westernsydney.edu.au/search/name/Abdullah Al Aabed/)

Description Accounting in Context is the first core subject required in the accredited accounting program, but can be included as an elective in other courses. It is designed to provide an overarching context about the purpose and usefulness of accounting information and explain a range of definitions and terms used in accounting and business. Accounting in Context will introduce accounting reports and their interpretation, and explore the impact of policy and measurement methods on accounting information and business decisions. Successful completion of the subject will equip participants with an understanding of the importance of accounting to society and allow them to engage with the next core accounting subject; Financial Accounting Applications.

School Business

Discipline Accounting

Student Contribution Band HECS Band 4 10cp

Check your HECS Band contribution amount via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Pre-requisite(s) Students in programs 7102 or 7177 must have successfully completed BUSM 0029 Decision Making for Business (WSTC Prep) before enrolling in this subject

Equivalent Subjects ACCT 1005 - Accounting in Context ACCT 1002 - Accounting Information for Managers (Creative Industries)

Incompatible Subjects ACCT 1001 - Accounting Information for Managers ACCT 1003 - Accounting Information for Managers (WSTC)

Restrictions

Students must be enrolled at Western Sydney University, The College in one of the following programs: 7177 Diploma in Business, 7100 Diploma in Business Fast Track, 7102 Diploma in Business Extended, 6037 Diploma in Business/Bachelor of Business.
Students enrolled in 7102 - Diploma in Business Extended must have passed 40 credit points of the preparatory subjects in their program in order to enrol in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate the usefulness of accounting for decision making.
2. Analyse the ethical, regulatory and sustainability dimensions of accounting.
3. Demonstrate through real-world examples how accounting concepts apply to businesses in the 21st century.
4. Analyse how different accounting techniques impact on accounting information.
5. Demonstrate skills in research and communication.

Subject Content

1. What is accounting and its purpose?
2. Who uses accounting information and how is it used for decision making?
3. What does accounting information look like for different business structures?
4. The regulatory, ethical and sustainability dimensions of accounting.
5. Accounting terms, principles and concepts.
6. Applying the definition and recognition of balance sheet items (assets, liabilities and equity) to a business case study.
7. Applying the definition and recognition of income statement items (income and expenses) to a business case study.
8. Business transactions ? recognising, classifying and recording.
9. Exploring the accounting equation.
10. Accounting Techniques: the impact of policies and measurement methods on accounting information and business decisions.
11. Interpreting financial statements.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Portfolio	2,500 words	30	N	Individual
Intra-session Exam	1 hour	10	N	Individual
Intra-session Exam	1 hour	10	N	Individual
End-of-session Exam	2 hours	50	Y	Individual

ACCT 1007 Financial Accounting Applications

Credit Points 10

Legacy Code 200111

Coordinator Mamun Billah (https://directory.westernsydney.edu.au/search/name/Mamun Billah/)

Description This subject gives students the practical skills necessary to analyse the accounting transactions of an entity, and then be able to measure and record these transactions in a systematic manner for the preparation of simple financial statements. Students learn key accounting concepts such as assets, liabilities, revenues and expenses used in financial reporting. Students produce for example profit and loss statements and balance sheets. Knowledge and skills developed in the subject are foundational to higher level financial and management accounting subjects.

School Business

Discipline Accounting

Student Contribution Band HECS Band 4 10cp

Check your HECS Band contribution amount via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Pre-requisite(s) ACCT 1005 - Accounting in Context

Equivalent Subjects ACCT 1008 - Financial Accounting Applications (WSTC)

Learning Outcomes

1. Explain the role and purpose of accounting, accounting processes and systems.
2. Apply the accounting elements (assets, liabilities, equity, revenues and expenses) and the underlying principles and relationships of the elements for the purpose of periodic financial reporting.
3. Identify components of the accounting cycle.
4. Prepare journalising and posting transactions to general and subsidiary ledgers and complete a trial balance.
5. Prepare financial statements for simple business structures using manual based and computerised accounting software.
6. Outline the conceptual framework and accounting standards to account for different types of transactions.

Subject Content

1. Revision of key prior knowledge
2. Extension of the accounting cycle and accounting processes
3. Double entry accounting
4. Accounting for GST
5. Transferring information from journal to the ledger
6. Recording of inventory (perpetual and periodic systems), valuation methods, and depreciation of non-current assets
7. Trial balance
8. Bank Reconciliation
9. Preparation of simple financial statements
10. Partnership formation

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Portfolio	Equivalent to 1,500 words	15	N	Individual
Quiz	60 minutes (per quiz)	20	N	Individual
Practical	Equivalent to 1,000 words	15	N	Individual
Final Exam	2 hours	50	Y	Individual

ACCT 1010 Management Accounting Fundamentals

Credit Points 10

Coordinator Neelam Goela (https://directory.westernsydney.edu.au/search/name/Neelam Goela/)

Description This subject provides an introduction to management accounting in an e-commerce environment. Students examine the interrelations of management accounting to other functional areas, to suppliers, to customers, and to other sources of external information relevant to planning and control. Through a range of activities, students learn the development and logic of routine and non-routine analysis performed to support management decision making.

School Business

Discipline Accounting

Student Contribution Band HECS Band 4 10cp

Check your HECS Band contribution amount via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Pre-requisite(s) ACCT 1007

Equivalent Subjects FINC 1001

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Develop costing techniques outlining their strengths and weaknesses.
2. Apply different decision models in the evaluation of product costing, product pricing and sales forecasting.
3. Prepare a master budget with all of the required supplementary schedules.
4. Assess what is relevant and irrelevant information in non-routine decision-making.
5. Explain ethical issues in management accounting.
6. Describe management accounting in an electronic environment.
7. Appraise basic concepts of control, and the behavioural impacts of control systems.

Subject Content

1. Introduction to management accounting
2. Basic cost management concepts and cost behaviour
3. Cost volume profit analysis
4. Product and service costing: job-order system
5. Product and service costing: A process systems approach
6. Relevant decision making
7. Budgeting for planning and control
8. Flexible budgeting, Standard costing and variance analysis
9. Allocating costs of support departments and joint products

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Practical	Weekly (marked automatically by the system)	15	Y	Individual
Professional Task	1000 words	15	N	Individual
Intra-session Exam	1.5 hours	20	N	Individual
Final Exam	2 hours	50	Y	Individual

ACCT 2001 Contemporary Management Accounting

Credit Points 10

Legacy Code 200108

Coordinator Neelam Goela (https://directory.westernsydney.edu.au/search/name/Neelam Goela/)

Description This subject examines the role of contemporary management accounting systems and techniques as well as the factors that influence the design of these systems. Students learn about appropriate choices of the different management accounting techniques and the importance of strategy in the contemporary business environment. Students expand their knowledge by applying techniques through real-life scenarios, and analysing and make recommendations that take into account the constraints and opportunities each present. Through the design of performance measurement systems, students demonstrate skills in critical thinking and decision making valued in the accounting organisations.

School Business

Discipline Accounting

Student Contribution Band HECS Band 4 10cp

Check your HECS Band contribution amount via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) FINC 1001 or ACCT 1010

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the role of management accounting systems in supporting business strategy and the limitations of traditional management accounting techniques
2. Communicate solutions in a clear, concise and ethical manner supported by analysis to assist management in decision making, resource management and value creation
3. Identify the factors that influence the design of management accounting systems and choice of contemporary management accounting techniques
4. Design a strategic performance measurement system using the balanced scorecard to incorporate non-financial performance measures
5. Apply contemporary management accounting techniques to real life scenarios
6. Collaborate with diverse team members to plan and complete a group project dealing with management accounting concepts and recommendations

Subject Content

1. Balanced score card, key performance indicators, performance benchmarking.

2. Profitability analysis.
3. Product life cycle and target costing.
4. Pricing and product mix decisions.
5. Business process re-engineering.
6. Inventory management techniques.
7. Quality management: measurement and control, and cost of quality reports.
8. Productivity: measurement and control, productivity analysis, value added, non-value added.
9. Value chain analysis.
10. Strategic management accounting.
11. Behavioural issues, performance related remuneration.
12. Sustainability and environmental management accounting

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Practical	Weekly	10	N	Individual
Quiz	5 times throughout teaching term	10	N	Individual
Case Study	2000 words	20	N	Group
Final Exam	2 hours	60	Y	Individual

ACCT 2003 Financial Statement Analysis (UG)

Credit Points 10

Legacy Code 200582

Coordinator Nicole Ibbett (https://directory.westernsydney.edu.au/search/name/Nicole Ibbett/)

Description This subject provides a substantial grounding in the theories and practices of financial statement analysis so as to enable the student to make knowledgeable decisions relating to the financial analysis of firms. Topics covered include an overview of financial reporting, income vs cash flows, overview of financial statement analysis, data issues in analysing financial statements, GAAP and income recognition and asset valuation, GAAP and liability recognition and related expenses, GAAP. inter-corporate entities, profitability analysis, risk analysis, pro forma financial statements, valuation using cash flows and valuation using earnings.

School Business

Discipline Accounting

Student Contribution Band HECS Band 4 10cp

Check your HECS Band contribution amount via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Equivalent Subjects ACCT 2002 - Financial Statement Analysis

Assumed Knowledge

Successful completion of principles of accounting, finance and business statistics subjects at university level.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and understand the impact of the prevailing economic and business environment and their effect on a companyðfs performance.
2. Analyse financial reporting objectives, processes and outcomes.
3. Analyse financing, investing, and operating activities.
4. Apply financial analysis to assess liquidity, solvency, performance, financial direction and valuation (historical and prospective).
5. Have a critical knowledge of the literature relevant to financial statement analysis.
6. Relate the financial statement analysis literature to real world situations.

Subject Content

This subject begins with a discussion of the role of accounting information and intermediaries in the economy, and how financial analysis can create value in well-functioning markets. Four key components of effective financial statement analysis are identified:
- business strategy analysis
- accounting analysis
- financial analysis
- Prospective analysis

Teaching Periods

ACCT 2004 Intermediate Financial Accounting

Credit Points 10

Legacy Code 200536

Coordinator Michael Wilson (https://directory.westernsydney.edu.au/search/name/Michael Wilson/)

Description This subject extends the knowledge and understanding of financial accounting through the application of problem solving to selected entities drawing upon accounting theory and critical analysis.

School Business

Discipline Accounting

Student Contribution Band HECS Band 4 10cp

Check your HECS Band contribution amount via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) ACCT 1007

Equivalent Subjects ACCT 3008 - Financial Accounting Issues LGYA 9763 - The Anatomy of Financial Accounting

Incompatible Subjects LGYB 3531 - Advanced Financial Accounting LGYB 8985 - Financial Accounting 3

Assumed Knowledge

Sufficient grasp of introductory accounting to competently prepare external financial statements.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Recall the nature of, analyse and apply basic accounting theory;
2. Recall the elements of the international accounting conceptual framework;
3. Apply the conceptual framework and accounting standards to account for different types of transactions;
4. Appraise the usefulness of information in accounting reports for decision making purposes.

Subject Content

- An introduction to accounting theory and Critical analysis
- development and evaluation of accounting Standards and conceptual frameworks
- Critical analysis of The historical cost accounting system

- Accounting for assets, liabilities and owners' equity and presentation in financial statements
- accounting for revenues and expenses and presentation in financial statements
- construction of A statement of comprehensive income

Teaching Periods

ACCT 2005 Techniques in Financial Accounting

Credit Points 10

Legacy Code 200973

Coordinator Stanley James (https://directory.westernsydney.edu.au/search/name/Stanley James/)

Description Techniques in Financial Accounting is the third subject in the financial accounting stream and builds upon Financial Accounting Applications as part of the accredited accounting program. It introduces a company as a business structure and the accounting requirements for their formation and operations. Students develop skills in using tools required for accurate record keeping leading to compilation of financial statements, as well as how to account for receivables and payables, the disposal of non-current assets, and preparation of cash flow statements. Successful completion of the subject will equip participants with a practical and theoretical understanding of usefulness of general purpose financial reports.

School Business

Discipline Accounting

Student Contribution Band HECS Band 4 10cp

Check your HECS Band contribution amount via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) ACCT 1007

Incompatible Subjects ACCT 2004 Intermediate Financial Accounting

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Indicate the purpose and outcomes of the accounting cycle in relation to reporting entities.
2. Prepare financial statements for a company business structure using a manual based accounting system.
3. Prepare general purpose financial reports for reporting entities by application of accounting principles.
4. Analyse basic accounting theory and how it is applied.

Subject Content

1. Revision of debit and credits and introducing company structure.
2. Companies: formation and operations.
3. Reconstruction of accounts and error correction.
4. End of period adjustments. Depreciation and amortisation.
5. Closing and reversing entries.
6. Ten column worksheet and financial statement compilation.
7. Accounting for receivables and payables.
8. Non-current asset disposal.
9. Preparation of cash flows.
10. Accounting theories.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

ACCT 3001 Accounting Information Systems

Credit Points 10

Legacy Code 200534

Coordinator Neelam Goela (https://directory.westernsydney.edu.au/search/name/Neelam Goela/)

Description This subject considers the design and implementation of accounting information systems as a data model for resource

allocation and management of an organisation. Students are involved in a range of activities to build the knowledge and skills in this growing area including identifying current trends in information management and the changing regulatory requirements. Students learn to use a range of tools for the presentation of data and conceptual models, and articulate the value of information, business intelligence, and information security.

School Business

Discipline Accounting

Student Contribution Band HECS Band 4 10cp

Check your HECS Band contribution amount via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) FINC 1001 or ACCT 1010

Equivalent Subjects ACCT 3010 Issues in Accounting Information Systems

Assumed Knowledge

Basic financial and management accounting fundamentals, including use of spreadsheets in accounting and the use of a computerised accounting package.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the design of accounting information systems, enterprise resource planning systems, and business processes.
2. Identify organisational risk and internal control issues, cyber security issues and requirements for monitoring and auditing accounting information systems.
3. Develop conceptual models of organisational relationships demonstrating knowledge of business processes and information flows in an organisation.
4. Use a range of tools for data analysis, presentation and to implement the conceptual models of information systems
5. Examine the potential impact of new and emerging technologies on accounting information systems
6. Apply professional ethics, problem solving, and communication skills involved in working with accounting information systems

Subject Content

1. Introduction to accounting information systems and enterprise resource planning systems
2. Accounting database and database theory
3. Internal control and enterprise risk management
4. Information security and computer fraud
5. Business process modelling and Intelligence decision making model
6. Accounting systems development and documentation
7. Business value of information and intelligent business reporting (XBRL)
8. Emerging technologies: Blockchain, artificial Intelligence
9. Big data and data analytics

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Participation	1 hour per week	10	N	Individual
Quiz	1 hour	20	N	Individual
Professional Task	Computer assignment (on MS Access) using Pearson's ITLab, should be completed during the practical term	20	N	Individual
Final Exam	2 hours	50	Y	Individual

ACCT 3003 Accounting Standards and Governance

Credit Points 10

Legacy Code 200974

Coordinator Krishan Prasad (https://directory.westernsydney.edu.au/search/name/Krishan Prasad/)

Description This subject builds on the first and second year accounting subjects, exploring financial reporting issues in greater depth and challenging students to question the foundations of financial reporting. Topics are on the International Financial Reporting Standards (IFRS) and the Australian Accounting Standards Board equivalents (AASB). The subject develops graduate capabilities centred upon critical thinking skills, technical skills and professional judgement and their application for solving practical financial reporting and environmental social governance issues.

School Business

Discipline Accounting

Student Contribution Band HECS Band 4 10cp

Check your HECS Band contribution amount via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) ACCT 2005

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the need for financial accounting regulation by employing appropriate theories.
2. Apply the rules of International Financial Reporting Standards/ International Accounting Standards (IFRS/IAS) and their Australian equivalents (AASB) to selected financial transactions and events.
3. Analyse financial transactions and events in order to prepare a complete set of financial statements based on accrual accounting.
4. Analyse financial statements.
5. Demonstrate business communication skills through written assignments and seminar presentations.
6. Apply environmental social governance (ESG) in analysis of financial statements.

Subject Content

1. Accounting regulation, conceptual framework and accounting for liabilities revenue, expenses, equity and intangibles.
2. Applying accounting standards and accounting theory.

3. Accounting for property plant and equipment: revaluations.
4. Accounting for impairment: intangibles.
5. Accounting for financial instruments.
6. Accounting for revenues.
7. Accounting for employee benefits.
8. Accounting for leasing.
9. Accounting for different types of business structures: equity and share capital.
10. Financial statement analysis.
11. Corporate social responsibility (CSR) and environmental social governance (ESG).

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Portfolio	Semester long - equivalent to 2,000 words	10	N	Individual
Professional Task	Part A: 2,000 words (10%) and Part B: 20 minutes (10%)	20	N	Group
Quiz	2 quizzes, 1 hour per quiz	20	N	Individual
Final Exam	2 hours	50	Y	Individual

ACCT 3004 Advanced Accounting

Credit Points 10

Legacy Code 200267

Coordinator Krishan Prasad (https://directory.westernsydney.edu.au/search/name/Krishan Prasad/)

Description This subject addresses the advanced aspects of accounting. Accounting theories are discussed in terms of how they assist us in understanding current accounting practice and accounting standards. In addition, theoretical concepts are applied to current news and real world events.

School Business

Discipline Accounting

Student Contribution Band HECS Band 4 10cp

Check your HECS Band contribution amount via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) ACCT 3007

Equivalent Subjects ACCT 3002 - Accounting Philosophies and Theories
LGYB 3531 - Advanced Financial Accounting (V1)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically evaluate accounting theories;
2. Interpret practice and rules through appropriate theoretical analysis;
3. Analyse and understand the current implications and impacts of financial reporting practices;
4. Demonstrate critical thought through communicating good arguments both orally and in writing;
5. Work in a team environment and negotiate possible explanations or solutions which lead to successful outcomes;
6. Explain the notion of power and control in corporate structures.

Subject Content

- The nature of accounting theories and their justification
- applications of those theories through practical exercises and linkages to current practice and real World events, to reinforce previously learnt accounting skills
- Critical evaluation of theories of accounting and theories related to The development and regulation of accounting
- Examination and application of selected topical and complex accounting Standards for Examination in depth

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

Teaching Periods

ACCT 3006 Auditing and Assurance Services

Credit Points 10

Legacy Code 200535

Coordinator Ildiko Volcz (https://directory.westernsydney.edu.au/search/name/Ildiko Volcz/)

Description The role of the auditor is significant in providing financial information about an organisation and the performance of management. Shareholders and other stakeholders require this information to make investment and other decisions. An auditor provides assurance or a conclusion about a company's financial situation which is intended to give confidence to stakeholders. In this subject, students examine the roles and responsibilities of the auditor, auditing principles and standards and the application of those standards, particularly in an electronic environment.

School Business

ACCT 3007 Corporate Accounting Systems

Credit Points 10

Legacy Code 200109

Coordinator Neelam Goela (https://directory.westernsydney.edu.au/search/name/Neelam Goela/)

Description This subject builds on the fundamental knowledge of accounting procedures gained in prerequisite subjects. It involves the comprehensive study of aspects of corporate accounting and reporting which are regulated by legislation, accounting standards, Australian Securities and Investment Commission and Stock Exchange requirements. This subject is designed to provide students with grounding in the regulation and practice of corporate reporting in Australia. The major orientation is towards the theoretical and practical aspects of corporate reporting, whilst at the same time exploring the reasons for regulatory disclosures.

ACCT 3009 Incubator 4: Commercial and Financial Setting of Entrepreneurship

Credit Points 10

Legacy Code 301169

Coordinator Anton Bogdanovych (https://directory.westernsydney.edu.au/search/name/Anton Bogdanovych/)

Description Operating a start-up is not just about being creative and innovative; it is also about having the necessary management and operational skills, understanding the commercial and financial setting within which the organisation needs to operate it. This subject aims to provide vital details that set the background to run your organisation whether your customer base is local, national or even international. This objective is driven through a number of topics such as: setting up a business entity, accounting fundamentals, taxation fundamentals. The subject will be delivered through a number of modules. As a vital part of the subject, students are expected to engage and work in "start-up co-working space" on a regular basis. At the successful completion of this subject, students would set up as a business entity for their start-up organisation.

School Computer, Data & Math Sciences

Discipline Accounting

Student Contribution Band HECS Band 4 10cp

Check your HECS Band contribution amount via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and apply the process involved in setting up a business entity
2. Identify business accounting needs and chose appropriate accounting structure
3. Investigate how the Australian and international taxation structures applies to start-ups
4. Demonstrate an understanding of interpreting accounting documents that are commonly used in a business setting
5. Apply individualðfs skills and knowledge in a collaborative and effective manner in achieving a common goal in a group setting
6. Demonstrate effective verbal and written communication skills that appeal to a wide audience

Subject Content

1) Setting up a business entity in Australia
2) Understanding various accounting statements, such as, Income statements, Statement of Cash flow, Balance Sheet, Profit and Loss accounts
3) Banking structure and setting up business accounts
4) Taxation structure and how it affects start-ups

Assessment

ACCT 3011 The Accountant as a Consultant

Credit Points 10

Legacy Code 200118

Coordinator Sharne Simmons (https://directory.westernsydney.edu.au/search/name/Sharne Simmons/)

Description This subject aims to provide students with a 'hands on' flexible and practical work integrated learning (WIL) experience in the Accounting degree. This is mainly done through working in groups on projects as accountants would do when they engage with clients and entrepreneurs as professional consultants. Students come to understand the role of an accountant in the effective management of the business to sustain, grow and expand the business to higher levels consulting problems involving a wide range of business related issues. This subject is designed to give students an opportunity to apply the theoretical knowledge gained in other subjects in their degree program thus enabling them to bring knowledge to life. On successful completion of this subject students will be able to appreciate the relevance of their business subjects in real business situations and to become business consultants.

Level Undergraduate Level 3 subject

Pre-requisite(s) ACCT 2001

Equivalent Subjects LGYB 8986 - The Accountant as a Management Consultant

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Appreciate the kinds of problems encountered by local businesses/organisations and the symptoms that will be apparent in their accounts;
2. Analyse and solve various business problems using case study approaches;
3. Develop skills in financial and strategic planning for small business;
4. Enhance report writing and verbal communication skills;
5. Demonstrate a foundation of ethical thinking in commercial engagements;
6. Demonstrate an understanding of the role an accountant as a consultant provides to business.
7. Analyse a business problem encountered by any for- profit, a not-for profit, or a government organisation, and its impact on stakeholders;
8. Apply appropriate accounting research methods and tools to solve problems;
9. Use appropriate communication methods, verbal and written, to convey information;
10. Work productively, in a group of consultants, to solve and report on a business problem;
11. Develop a project tender which includes appropriate curriculum vitae;
12. Present project findings to an audience of peers or industry professionals.

Subject Content

- strategic thinking and strategic accounting
- financial and management accounting
- Regulatory Issues
- client management Issues
- financial management
- business or professional ethics
- Entrepreneurship ? Background on The role of The entrepreneurial profile
- Marketing of businesses including pricing of products and services
- business and succession planning
- Internal control
- Project tenders including curriculum Vitae

ACCT 7002 Accounting Professional Engagement

Credit Points 10

Legacy Code 200693

Coordinator Dorothea Bowyer (https://directory.westernsydney.edu.au/search/name/Dorothea Bowyer/)

Description This subject aims to provide students with a 'hands on' flexible and practical work integrated learning experience in the Accounting degree. This subject focuses on the role that accountants play in the effective management of businesses. Appropriate accounting research methods are used to investigate and report on problems and "real" case studies involving a wide range of business related issues. This is mainly done through working as groups on projects as accountants do when they engage with clients and entrepreneurs as professional consultants.

School Business

Discipline Accounting

Student Contribution Band HECS Band 4 10cp

Check your HECS Band contribution amount via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) ACCT 7005

Restrictions

Students must be enrolled in a postgraduate Business program. Students wishing to take this subject as an elective need approval from the program Advisor.

Assumed Knowledge

Knowledge of accounting principles, practices and relevant theoretical background.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Outline the kinds of problems encountered by local businesses/organisations (for example, small and medium enterprises (SMEs), government or not for profit organisations) and the symptoms that will be apparent in their accounts;
2. Analyse and solve various business problems using appropriate accounting research methods and case study approaches;
3. Develop financial and strategic plans for small business;
4. Extend report writing and verbal communication skills;
5. Develop a foundation of ethical thinking in commercial engagements;
6. Demonstrate an understanding of the responsibilities accountants as consultants have in business;
7. Develop a comprehensive business plan or analyse a takeover, change management proposal, or the implementation of a new business process or system.
8. Analyse a business problem encountered by businesses/organisations government or not for profit organisation, and its impact on stakeholders;
9. Apply appropriate accounting research methods and tools to solve problems;
10. Use appropriate communication methods, verbal and written, to convey information;
11. Work productively in groups (in the role of a consultant) to solve and report on a business problem;
12. Tender for a project and construct curriculum vitae appropriate to a project tender;
13. Present project findings to an audience of peers or industry professionals.

Subject Content

- strategic thinking and strategic accounting
- financial and management accounting
- Regulatory Issues
- client management Issues
- financial management
- business or professional ethics
- Entrepreneurship ? back ground on The role of The entrepreneurial profile
- Marketing of businesses including pricing of products and services
- succession planning
- Internal control
- accounting research methods
- professional behaviour
- Entrepreneurship

ACCT 7005 Accounting Theory and Applications

Credit Points 10

Legacy Code 200401

Coordinator Qingliang Tang (https://directory.westernsydney.edu.au/search/name/Qingliang Tang/)

Description Basic questions of the role accounting performs in society are considered from economic, social and environmental perspectives. The nature of the statements advanced to give accounting legitimacy, together with their philosophical underpinnings, are examined. Selected accounting theories and philosophies will be examined and advanced applications in alternative accounting models considered. Accounting research and appropriate methodologies are introduced.

School Business

Discipline Accounting

Student Contribution Band HECS Band 4 10cp

Check your HECS Band contribution amount via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) ACCT 7010

Restrictions

Students must be enrolled in a postgraduate Business program or in programs 8083 Bachelor of Research Studies, 8084 Master of Research (HC) and 8085 Master of Research (LC). The prerequisite requirement noted above does not apply to students enrolled in programs 8083 Bachelor of Research Studies, 8084 Master of Research (HC) and 8085 Master of Research (LC). Students wishing to take this subject as an elective need approval from the program Advisor.

Assumed Knowledge

Basic knowledge of accounting principles.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Articulate the role of accounting in society;
2. Demonstrate an awareness of the differing perspectives from which accounting may be assessed;
3. Critically analyse a selection of accounting theories and present those ideas to a group;
4. Demonstrate an ability to work in small groups;
5. Critique contemporary issues in accounting;
6. Demonstrate an ability to utilise research methods applicable to applied accounting research.

Subject Content

1. Role of accounting in society
2. Introduction to methodology for knowledge recognition, reasoning, critical thinking.
3. What accounting research currently involves and how to conduct useful accounting research.
4. Role of Accounting in Environmental, Social and Governance
5. Different types of theories, including critical accounting theory.
6. Different models for measurement of profit and of wealth, including lease accounting.
7. Human behaviour, particularly in organisations and is relevance for accounting theory.

Assessment

ACCT 7010 Company Accounting

Credit Points 10

Legacy Code 200400

Coordinator Yongqing Li (https://directory.westernsydney.edu.au/search/name/Yongqing Li/)

Description Company accounting introduces and develops a student's understanding of the Australian reporting requirements and practices relating to corporations. The subject builds upon the fundamental accounting skills gained in Introductory Accounting to develop a student's knowledge of technical methods and theoretical underpinnings of corporate accounting. Students will learn how to prepare consolidated financial statements, with associated disclosures, to ensure compliance with accounting standards, corporations'

legislation and Australian Stock Exchange (ASX) requirements. Through a range of practical individual and collaborative means students will explore corporate accountability and the reasons for regulatory disclosure.

School Business

Discipline Accounting

Student Contribution Band HECS Band 4 10cp

Check your HECS Band contribution amount via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) ACCT 7018

Restrictions

Students must be enrolled in a postgraduate Business program. Students wishing to take this subject as an elective need approval from the program Advisor.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Prepare Financial Statements in accordance with applicable accounting standards.
2. Critically evaluate financial statements demonstrating professional judgement and communication.
3. Discuss corporate accountability within the AASB Framework, the Financial Reporting Conceptual Framework and sustainability frameworks.

Subject Content

1. Accounting standards (standard settlers, regulation and application).
2. Cash flow statements.
3. Tax effect accounting.
4. Accounting for non-current assets including impairment and revaluations, including changes in accounting estimates and errors, and events after reporting period.
5. Consolidations for wholly owned entities.
6. Accounting for Financial instruments and relevant disclosures.
7. Introduction to accounting for foreign currency translations.

ACCT 7013 Financial Decision Making

Credit Points 10

Legacy Code 200784

Coordinator Nicole Ibbett (https://directory.westernsydney.edu.au/search/name/Nicole Ibbett/)

Description Students will gain financial literacy through practical understanding of the information contained in financial reports. Appreciating the variety of uses of accounting information for planning and controlling enhances the ability to extract relevant data. This subject emphasises the function of both financial and management accounting in measuring, processing and communicating information useful for decision making.

School Business

Discipline Accounting

Student Contribution Band HECS Band 4 10cp

Check your HECS Band contribution amount via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects ACCT 7001 - Accounting Perspectives for Managers

Incompatible Subjects ACCT 7018 -Introductory Accounting ACCT 7007 - Accounting A Business Perspective

Restrictions

Students must be enrolled in 2755 Master of Business Administration, 2756 Graduate Diploma in Business Administration (Exit Only), 2757 Graduate Certificate in Business Administration, 2762 Executive Master of Business Administration.

Assumed Knowledge

A knowledge of basic mathematics is assumed.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Interpret the basic terms and concepts of both financial accounting and management accounting enabling interpretation of information in financial reports;
2. Identify the role and limitations of general purpose financial statements in providing information for decision making;
3. Use financial analysis tools to evaluate external financial reports for performance, position and working capital requirements;
4. Apply cost behaviour concepts and various costing systems to decision making;
5. Demonstrate an understanding of the significance of budgets for planning and control;
6. Analyse internal accounting reports for performance evaluation.

Subject Content

- Usefulness of accounting information for decision making
- structure and use of financial accounting reports
- analysis of financial accounting reports
- structure and use of management accounting information, including cost behaviour and budgets
- analysis of management accounting information

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Intra-session Exam	90 minutes	30	N	Individual
Case Study	2000 words	20	N	Group
Final Exam	2 hours	50	Y	Individual

ACCT 7016 Information Systems for Accountants

Credit Points 10

Legacy Code 200399

Coordinator Daniel Yeung (https://directory.westernsydney.edu.au/search/name/Daniel Yeung/)

Description The aim of this subject is to examine the theory and application of information technology on the accounting discipline. This subject covers principles of systems analysis, design and database management relating to accounting information systems. The functions, control, data and processes of accounting information systems are discussed in the context of businesses. Students learn about the communication of accounting information through the internet and explore further the development of integrated systems using a blended learning design approach.

School Business

Discipline Accounting

Student Contribution Band HECS Band 4 10cp

Check your HECS Band contribution amount via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) ACCT 7018

Restrictions

Students wishing to enrol in this subject as an elective must gain approval from an Academic program Advisor (Accounting) and must be enrolled in a postgraduate Business program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Document and evaluate an existing accounting information system;
2. Describe and explain the design and control of computerised accounting systems;
3. Demonstrate experience with discipline appropriate software packages;
4. Communicate effectively with systems professionals;
5. Evaluate current developments in accounting information system design.

Subject Content

Documenting Accounting Information Systems
Systems Development Activities
Database Management Systems and relational data model
Controlling Accounting Information Systems
Accounting Information Systems applications
Electronic commerce
Technology and future development of Accounting Information Systems

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	Weekly – A minimum of 5 out of 7 must be submitted (the best 5 will be counted toward the final mark).	10	N	Individual
Practical	1 hour over one week	10	N	Individual
Practical	1 hour over one week	15	N	Individual
Intra-session Exam	90 minutes (in-class)	25	N	Individual
Final Exam	2 hours	40	Y	Individual

ACCT 7018 Introductory Accounting

Credit Points 10

Legacy Code 200396

Coordinator Yongqing Li (https://directory.westernsydney.edu.au/search/name/Yongqing Li/)

Description The aim of this subject is to provide a comprehensive introduction to contemporary financial accounting. This is an essential component in the understanding of the production and use of accounting information in business. This subject applies accounting concepts, standards and principles enabling students to be competent in the technical skills in accounting which is a fundamental tool for making economic decisions and for analysing and solving business problems. Students learn to apply such concepts, standards and principles through a range of individual and collaborative means using a blended learning design that draws on current and future trends in the broad international context.

School Business

Discipline Accounting

Student Contribution Band HECS Band 4 10cp

Check your HECS Band contribution amount via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects ACCT 7007 - Accounting A Business Perspective (PG) ACCT 7015 - Financial Reports for Decision Making

Restrictions

Students must be enrolled in a postgraduate Business program. Students wishing to take this subject as an elective need approval from the program Advisor.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Design an appropriately principled financial accounting information system.
2. Use accounting concepts and techniques to analyse, record, process and prepare financial statements.
3. Apply accounting principles to account for current and non-current assets and liabilities and critically evaluate different accounting policies.
4. Apply recognition rules to recognise common revenue transactions.
5. Assess profitability and financial strength of an organisation (sole trader, partnership and company) using accounting information.
6. Appraise the accounting environment, the role of accounting and importance of ethics to the accounting profession.

Subject Content

1. The accounting environment and basics of financial reporting
2. The recording system: recording transactions, journal entries, posting to ledgers and trial balances
3. The recording system: end of period adjustments, worksheet, and finalising accounts
4. Accounting cycle – closing and reversing entries and the accounting system
5. Reporting and measuring assets
6. Measuring and reporting inventories
7. Cash flows and bank reconciliations
8. Revenue recognition
9. Accounting for liabilities
10. Financial statement analysis

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

ACCT 7019 Management Accounting

Credit Points 10

Legacy Code 200494

Coordinator Mamun Billah (https://directory.westernsydney.edu.au/search/name/Mamun Billah/)

Description The fundamental purpose of any management accounting system in an organisation is to provide appropriate information for (i) costing of products and services; (ii) support functions such as planning, controlling, evaluation, continuous improvement and decision making; and (iii) competitive support. This provides financial and non-financial services to the management team to enhance an organisation's competitiveness. The subject is designed to provide an understanding of these areas of information through applying concepts, theories and models in a range of individual and collaborative activities.

School Business

Discipline Accounting

Student Contribution Band HECS Band 4 10cp

Check your HECS Band contribution amount via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) ACCT 7018

Restrictions

Students wishing to enrol in this subject as an elective must seek approval of an Academic program Advisor (Accounting) and be enrolled in a postgraduate Business program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply a range of costing analyses and techniques for reporting purposes.
2. Evaluate professional or enterprise practice in relation to culture and diversity in management accounting contexts (including first peoples/global) to make recommendations, including contingencies, alternatives and future implication.
3. Critically analyse quality cost information and its uses.
4. Apply management accounting information to evaluate organisational strategy.
5. Recommend appropriate economic, environmental, and social costs and benefits for organisational sustainability reporting.
6. Prepare forecasts and budgets for planning, control and reporting.

Subject Content

1. Basic cost concepts.
2. Statistics for management accounting incorporating simple linear regression and correlation.
3. Job order and process costing.
4. Support department cost allocations.
5. Activity-based costing.
6. Standard costing.
7. Budgeting.
8. Cost volume profit analysis and tactical decision making.
9. Responsibility accounting and performance evaluation in a decentralised firm.
10. Inventory management.
11. Balanced Scorecard.
12. Environmental cost management and Sustainability Reporting.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

ACCT 7026 Behavioural Finance (PG)

Credit Points 10

Legacy Code 201038

Coordinator Kelly Liu (https://directory.westernsydney.edu.au/search/name/Kelly Liu/)

Description Cognitive biases and emotional influences have the potential to influence the decision-making of advisors, managers and investors. This subject provides students with the skills to advise clients such that their investment decisions are soundly based. Various biases and influences are introduced to students to demonstrate how they undermine rational investment decision-making. Students are then taught how to apply methods that advisers can use to overcome and correct these biases. Ensuring clients are fully educated about investment decisions is integral to the investment process, and necessary to ensure advisers meet the best interest duty of their profession. This subject is available as a stand-alone bridging subject which is accredited by the Financial Adviser Standards and Ethics Authority (FASEA) having met the FASEA curriculum and standards requirements.

School Business

Discipline Accounting

Student Contribution Band HECS Band 4 10cp

Check your HECS Band contribution amount via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program or students who are currently registered on the national Financial Adviser Register (FAR) may take this subject as a non-award stand-alone subject in order to meet new education requirements as outlined by the Financial Adviser Standards and Ethics Authority (FASEA).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the different types of behavioural biases that client(s) exhibit;
2. Articulate the different approaches in decision-making client(s) may prefer;
3. Assess the linkages between behavioural biases and decision-making and implications for investment decisions made by client(s);
4. Explain the interactions between individuals and their financial capital;
5. Evaluate the role of behavioural finance in client engagement and the professional client relationship;
6. Critically assess investment strategies that are in the best interest of the client.

Subject Content

- introduction to Behavioural finance
- The types of biases influence client investment decisions
- ways of influencing client decisions to avoid cognitive and emotional biases
- how advisers can increase their own Understanding of client?fs needs and wants to guide their investment decisions
- Informing clients about The Risk and Reward trade-off
- Efficient markets and more realistic interpretations of markets
- theories of utility for client portfolio construction

Assessment

AGEN 1001 Water Quality Assessment and Management

Credit Points 10

Legacy Code 300814

Coordinator Jack Isherwood (https://directory.westernsydney.edu.au/search/name/Jack Isherwood/)

Description Water is essential for all life on earth. This subject will equip students with skills in biological, chemical and physical water quality assessment for a sustainable water future. The subject introduces students to healthy natural waterways and contrasting degraded waters impacted by disturbance from human activities. A broad range of pollutants, their sources and the consequences for human health and the ecology of water ways will be investigated. Management strategies will also be examined based on the sound scientific assessment of water quality. Students in this subject will cover water quality legislation, regulation, policy, guidelines and develop competencies in water monitoring, regulation, treatment and management.

School Science

Discipline Agriculture, Environmental and Related Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your HECS Band contribution amount via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Equivalent Subjects AGEN 2002 - Water Quality Assessment and Management

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe and select the physical, chemical and biological components as indicators of water quality.
2. Identify using physical, chemical and biological indicators when water is polluted and describe these pollutants including metals, polycyclic aromatic hydrocarbons, petrochemical (e.g. petrol, oils, greases), nitrates, phosphates, human and faecal waste.
3. Identify, describe and predict the origins, nature and impact of where water quality degradation may occur from industrial, commercial, residential, agricultural contamination at local, regional and national context. For example Stormwater runoff, leaking sewers in Sydney, dioxin release from the old Union Carbide site into Port Jackson and diffuse animal faecal pollution in areas such as Warragamba dam.
4. Design and plan field auditing protocols for pollution study.
5. Identify approaches put in place by the water authorities in terms of catchment management; water and sewage treatment; trade-waste management; stormwater management and treatment; land application (to minimise phytonutrients entering receiving waters); monitoring by health and water authorities.
6. Describe the basis of the legal framework used for water quality management, with particular reference to the Australian Drinking Water guidelines, and Australian and New Zealand Guidelines for Fresh and Marine Water Quality.
7. Interpret the results of water quality audits in the context of legal, regulatory compliance and scientific guidelines in water management issues and community accountability.
8. Explore the special issues of World and local water scarcity (with climate change implications), maintaining sustainable environmental flows, water recycling, stormwater harvesting, water-related health emergencies (boil-water alerts, Norovirus transmission), special ecological impacts (such as EDCs and hermaphrodism; biodiversity reduction) and important pollution case histories (eg: Minamata disaster).
9. Collect water samples aseptically and safely for a range of chemical and bacteriological analyses, specify tests required and the correct transportation medium and containers to ensure chain-or control during transportation with necessary documentation.
10. Gather, analyse and describe a variety of appropriate information sources.

Subject Content

Strategies for the identification and management of water, in the maintenance of water quality for recreational, domestic, industrial and agricultural uses, and for the protection of natural ecosystems.
Water pollution and water management, identification of specific water pollution threats associated with operations in the built environment. These will be placed in the context of water use and availability patterns as pertaining to Australia in general and to NSW in particular.
Assessment of indicators in the auditing of simple impacts on water quality in terms of domestic, recreational, agricultural and industrial uses, and ecosystem management needs.
Legislation and the interpretation of the legal framework used for water quality including drinking water management.
Field visit to sample water in various locations and/or waste water treatment and management sites.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

Teaching Periods

AGEN 3001 Animal Behaviour

Credit Points 10

Legacy Code 300878

Coordinator John Hunt (https://directory.westernsydney.edu.au/search/name/John Hunt/)

Description Focusing on a variety of wildlife and domestic animal species, the subject addresses how classic ecological and evolutionary principles shape animal behaviour by weighing the experimental and observational evidence for each idea. We illustrate concepts with examples from a wide range of taxonomic groups of animals in diverse ecosystems. Students will conduct experimental field and laboratory procedures, as well as observe and work with groups of animals on the UWS Hawkesbury campus.

School Science

Check your HECS Band contribution amount via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Equivalent Subjects AGEN 3002 - Animal Behaviour

Restrictions

Successful completion of 120 credit points in the Bachelor of Science or Bachelor of Natural Sciences.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Integrate basic evolutionary theory and genetics principles to determine how/why animal behaviour is both related to and shaped by evolution/genetics.
2. Determine how cost/benefit/risk can be identified in the context of optimality and game theories to formulate and test ultimate and proximate hypotheses for behaviours.
3. Describe the evolution of different reproductive strategies and mating patterns and strategies, and how tools such as phylogenetics and experimentation can be used to study it.
4. Determine how the evolution of animal behaviour is used to understand aspects of human behaviour.
5. Explain why understanding the ethology of companion animals and domestic stock is important in our interactions with them.
6. Conduct field investigations safely and ethically in the field and laboratory, using sampling methodology correctly to obtain valid data.
7. Use spreadsheets and statistical tools in analytical programs to enter, analyse and graph data and to draw appropriate conclusions from data.
8. Communicate findings correctly in oral or in written form using an appropriate style, accessing the scientific literature to place the findings in context.

Subject Content

1. The proximate control, organisation, and development of animal behaviour
2. The ecological and evolutionary mechanisms underlying animal behaviour
3. Foundational and contemporary theories of animal behaviour, as well as the application of animal behaviour
4. General scientific and specific behavioural methodologies to test hypotheses and effectively communicate research using a range of scientific modes

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

AGEN 4001 Researching our Changing Environment

Credit Points 10

Legacy Code 800195

Coordinator David Ellsworth (https://directory.westernsydney.edu.au/search/name/David Ellsworth/)

Description This subject focuses on learning to critically evaluate current research in topics under study at the Hawkesbury Institute for the Environment and how advanced scholarship in your field of study is conducted. The Hawkesbury Institute for the Environment spans a broad set of fields from soil microbial genomics and microbial ecology to the biogeochemistry, ecology and physiology of plants and microbes, animal ecology and evolution, to ecosystems, landscapes and Australia-wide processes. Teaching sessions are designed around a thematic cross-section of research within HIE, representing many of these areas. The subject also involves enhancing skill in evaluating appropriate research methodologies for asking questions and testing hypotheses, including an introduction to some of the large-scale research facilities within HIE that students may be involved with.

Level Undergraduate Level 4 subject

Restrictions

Students must be enrolled in program 8083 Bachelor of Research Studies/Master of Research

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate knowledge of the various research fields within the Institute in which the student is based.
2. Align the student’s statement of intent with a proposed research project relating to the research environment and expertise within the Hawkesbury Institute.
3. Critically analyse theoretical knowledge that will inform key perspectives in the student’s research area.
4. Demonstrate understanding of techniques and methods involved in collecting, displaying and interpreting scientific data.
5. Understand how a literature review and a synthesis of data/information are carried out.

Subject Content

- This unit is designed for the Master of Research program, involving first-year Bachelor of Research/ Master of Research students. It exposes students to the research environment within the Hawkesbury Institute for the Environment, the various sub-disciplines within this area of study, and the high-level research approaches taken within each of them.
- The unit will enable students to gain fluency in the various research fields within the Hawkesbury Institute and the literature and methods associated with them by:
- Analysing the research literature in the sub-disciplines encompassed by the Hawkesbury Institute for the Environment and understanding what makes a good journal and a good research manuscript.
- Understanding the advantages and shortcomings of key papers in the literature, and being able to write a critique of others?f published research.
- Spending time in discussion and in reading to be able to understand techniques and methods in the field, and critically evaluate them.
- Gaining an understanding of the motivation and research that is conducted within climate change facilities at the Hawkesbury Institute for the Environment.
- Gaining fluency in the literature by practice, and learning the skill of good

AGEN 7001 Bushfire Behaviour

Credit Points 10

Legacy Code 200457

Coordinator Grahame Douglas (https://directory.westernsydney.edu.au/search/name/Grahame Douglas/)

Description This subject describes the factors affecting bushfire behaviour and the models which are used to predict bushfire behaviour, the principles of fire ecology, and the assessment of bushfire hazards on property and the environment. Topics include the measurement of fuel, rates of spread and flame length equations, fire danger indices and landscape issues, topographical influences on fire behaviour, the importance of fire regimes and fire thresholds on flora and fauna, habitat and fire impacts on environmental services such as soils and water catchments. The role of fire behaviour in determining impacts on structures is also described.

School Eng, Design & Built Env

Discipline Agriculture, Environmental and Related Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your HECS Band contribution amount via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

This subject assumes that the student has undertaken undergraduate study in building surveying, planning or related areas or has gained the equivalent building construction knowledge by working in the construction industry in an appropriate capacity for at least four years.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and explain the factors affecting bushfire behaviour;
2. Classify vegetation types and associated fuel structures;
3. Discuss the role of fire weather in developing fire indices;
4. Describe the impacts of bushfire on species and communities of environmental significance and their fire thresholds;
5. Describe the impacts of fire on the environment and environmental services and management strategies to protect these values;
6. Predict the intensity and flame characteristics of a bushfire; and
7. Apply available models to describe bushfire behaviour and its impact on structures.

Subject Content

Factors affecting various aspects of bushfire behaviour;
Initiation of bushfires;
Bushfire spread including spotting behaviour;
Comparative behaviour of bushfires in different vegetation types;
Ecological impacts of bushfires;
Models to describe bushfire behaviour;
Prediction of bushfire behaviour in terms of intensity and spread;
Prediction of bushfire behaviour on property.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Short Answer	1000w. Students must achieve at least 40% in this task to achieve an overall pass for the unit	20	N	Individual
Essay	2000w. Students must achieve at least 40% in this task to achieve an overall pass for the unit	25	N	Individual
Report	3000w. Students must achieve at least 40% in this task to achieve an overall pass for the unit	35	N	Individual
Essay	1,000 words	20	Y	Individual

AGEN 7002 Ecosystems in a Changing World

Credit Points 10

Legacy Code 800170

Coordinator Yolima Carrillo Espanol (https://directory.westernsydney.edu.au/search/name/Yolima Carrillo Espanol/)

Description Natural and managed ecosystems on our planet are experiencing a rapidly changing environment as a consequence of changing patterns of land and resource use, loss of biodiversity, altered atmospheric composition and anthropogenic climate change. This subject will introduce students to ecosystem concepts in the context of ecological and evolutionary responses to global change. Students will obtain practical experience in quantitative analysis of carbon, nutrient, water and energy budgets, and explore the consequences of global change for ecosystem services and biodiversity over a range of spatial and temporal scales. Teaching will be led by HIE staff with expertise in ecosystem responses to environmental change, soil microbial contributions to ecosystem function and the impacts of environmental change on plants, animals and their interactions.

School Graduate Research School

Discipline Agriculture, Environmental and Related Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your HECS Band contribution amount via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Assumed Knowledge

A Bachelor of Science in Biology, Environmental Science, or Agricultural Science, with some background in plant science and ecology.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Quantitatively describe fundamental ecosystem functions
2. Solve problems mathematically on paper and in spreadsheets
3. Construct and interpret graphical representations of data
4. Apply systems approach to complex environmental issues
5. Critically discuss primary research articles on ecosystem responses to environmental change
6. Write critical evaluation of a primary research article

Subject Content

Ecosystem concepts, introduction to global change
Geology and soils
Water and energy balance
Primary production and allocation
Carbon cycling
Nutrient cycling
Microbial ecology and ecosystem processes
Trophic dynamics; food webs and plant-animal interactions
Biodiversity and ecosystem function
Temporal dynamics: Disturbance, succession
Scaling from plots to the globe; landscape processes
Global change and ecosystems
Ecosystem management in a changing world

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Short Answer	5 sets	50	N	Individual
Essay	4 x 250 words	20	N	Individual
Quiz	3 x 30 minutes	30	N	Individual

Prescribed Texts

- Chapin, FS, Matson, PA & Vitousek, PM, 2012, Principles of terrestrial ecosystem ecology, 2nd edn, Springer, New York.

AGEN 7004 Perspectives of Sustainable Development

Credit Points 10

Legacy Code 300397

Coordinator Richard Thomas (https://directory.westernsydney.edu.au/search/name/Richard Thomas/)

Description This subject explores the philosophy, policies and practice of sustainable development. In exploring environmental philosophy the subject provides students with an understanding of the nature and emergence of both modern and post-modern paradigms that influence the direction and nature of current development policy. The nature of environmental policy is examined by developing an understanding of how values and attitudes shape a governing ethic about environmental management. The social, political, economic and ecological elements of sustainable development are unfolded to aid students understanding of what needs to be managed. Particular attention is given to those issues confronting developing countries as they move to become industrialised nations yet have high levels of poverty. Finally, the subject introduces the practice of environmental impact assessment as one management tool used in the management process.

School Science

Discipline Other Agriculture, Environmental And Related Studies

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYB 8266 - Environmental Management Core Studies 1 LGYB 8275 - Environmental Management

Restrictions

Students must be enrolled in the following programs: 3602 - Master of Environmental Management, 3605 - Master of Occupational Safety, Health and Environmental Management, 3606 - Graduate Diploma in Occupational Safety, Health and Environmental Management, 3607 - Graduate Certificate in Occupational Safety, Health and Environmental Management

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Understand the philosophy influencing current environmental management policy and practice.
2. Acquire knowledge of environmental values and ﷿eworldviews﷿f and how they influence the policy development process.
3. Understand the political, social and ecological components of environmental management and their interaction in environmental management.

Subject Content

Definition of 'environment', 'management' and 'environmental management', ?esustainable development?f and understanding of the need for effective management to address environmental issues.
The history of environmental philosophy and the significance of epistemology in shaping policy.
The way ?eparadigms?f and ?evalues?f influence people's reaction to environmental issues.
Contemporary concepts in environmental management (Ecologically Sustainable Development, environmental health, precautionary principle, stewardship, social capital and environmental justice).
The Social, Economic and Ecological Issues associated with Sustainable Development.

Teaching Periods

AGEN 7005 Research Protocol Design and Practice

Credit Points 10

Legacy Code 401080

Coordinator John Bidewell (https://directory.westernsydney.edu.au/search/name/John Bidewell/)

Description In this subject postgraduate students develop a proposal for a research study in an area of interest, drawing upon their knowledge and experiences from other subjects in their program of study. Students learn how to apply research methods to a variety of research situations and questions; to understand how research questions are developed and answered empirically through suitable choice of research methodology, design and method; and how research findings are validated and communicated.

School Health Sciences

Discipline Health, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your HECS Band contribution amount via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) All Students must do PUBH 7016
HLTH 7008 for students in 4702
HLTH 7025 for students in 4698
CMPL 7012 for students in 4716

Equivalent Subjects AGEN 7003 - Methods of Researching

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Develop research objectives in a chosen area of interest based on a systematic assessment and synthesis of recent and relevant literature.
2. Devise a research plan to address research objectives, including selection of an appropriate study design, data source or data collection plan, sample, analytic strategy, and consideration of ethical implications of the research.
3. Construct a coherent and potentially fundable research protocol.

Subject Content

In this subject, students will be asked to re-visit content from previous units in their program of study and engage with various research paradigms in order to develop a research protocol based on their own research interest area. Unit content will include:
1. The research process
2. Formulating research objectives
3. Research design and causal inference
4. Data collection methods
5. Analytic strategy
6. Ethical issues in research

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Proposal	500 words	25	N	Individual
Proposal	1,500 words	50	N	Individual
Multiple Choice	50 minutes	25	N	Individual

AGRI 1003 Animal Science

Credit Points 10

Legacy Code 300801

Coordinator Adrian Renshaw (https://directory.westernsydney.edu.au/search/name/Adrian Renshaw/)

Description This subject will provide students with an understanding of comparative physiological and anatomical concepts of a range of mammalian and avian species. Students will develop the skills to apply these concepts in practical situations through the use of field observations and the relationship of these to functional anatomy and physiology of production animals. In addition students will develop many of the principles and concepts employed in animal production. Concepts discussed in lectures are reinforced by practical classes held in the laboratory and in the outdoor laboratories.

School Science

Discipline Animal Husbandry

Student Contribution Band HECS Band 1 10cp

Check your HECS Band contribution amount via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Equivalent Subjects AGRI 1002 - Animal Science

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Define key terms and concepts associated with mammalian and avian production animal anatomy and physiology.
2. Compare anatomy and physiology of mammalian and avian production animals.
3. Evaluate animal production systems.
4. Handle production animal species; record observations and reflect on the behaviour of production animal species.

Subject Content

Physiology, anatomy and behavior of a range of animal species
Functional anatomy and physiology in practical context

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	up to 30 minutes in length	35	N	Individual
Presentation	3 minutes	15	N	Individual
Quiz	30 minutes	25	N	Individual
Report	2,000 words	25	N	Individual

AGRI 1004 Feeding the Planet

Credit Points 10

Legacy Code 300804

Coordinator Priti Krishna (https://directory.westernsydney.edu.au/search/name/Priti Krishna/)

Description This subject will explore the concepts driving current food production science (population growth, urbanization, emerging affluence, resource constraints, and underlying biological limits) in terms of their universal life cycles, constraints to production and societal issues. Throughout the subject, key questions will be addressed: What are the major health benefits and potential concerns regarding the intensification of production and consumption of food? How does agricultural production affect the efficient use of resources and impact our environment? Can costs of production be reduced to meet the growing demand for food products around the globe while maintaining health and safety for consumers? What are the different types of food production systems? Myths and misconceptions surrounding the food systems will be discussed and analysed. The subject is geared towards learners who seek a greater understanding of food systems and have a desire to learn more about issues surrounding sustainability.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Numerical Problem Solving	Exercise equivalent to 30 minutes of problem solving	10	N	Individual

Report on sustainability of farm enterprise	2000 word report	20	N	Individual
Practical report	1500 words	30	N	Individual
In-class quizzes	4 quizzes of equal weighting (5%) held in class sessions = 30 minutes	20	N	Individual
Presentation : Poster presentation on sustainability of a farm enterprise	15 minute presentation	20	N	Individual

Teaching Periods

AGRI 1005 Human Animal Interactions

Credit Points 10

Legacy Code 300807

Coordinator Sebastian Holmes (https://directory.westernsydney.edu.au/search/name/Sebastian Holmes/)

Description This subject introduces students to the varying relationships between humans and animals including domestication, the role of animals for companionship, as workers, the traditional role of animals in agriculture, wildlife and zoo animals and their increasingly recognised aesthetic and therapeutic roles. Students will work with a variety of domesticated animals, captive native mammals, and reptiles on-campus, and in a variety of animal industries off campus, including wildlife parks and zoos. The subject includes a balance of theoretical and practical work in the areas of behaviour and handling, basic husbandry, health care, and ethical management.

School Science

Discipline Animal Husbandry

Student Contribution Band HECS Band 1 10cp

Check your HECS Band contribution amount via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Incompatible Subjects AGRI 1006 - Introduction to Animal Science AGRI 1007 - Human Animal Interactions

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the importance of animals and their uses in society in a global context.
2. Define concepts, terminology and definitions in animal science.
3. Describe the history of human-animal interactions.
4. Discuss animal domestication as a basis for many of the forms of human-animal contact through the role of animals in food and fibre production, nutrient recycling, research (biomedical, production, behaviour and other forms) and for pleasure, companionship and service).
5. Define the principles and ethics of animal exhibitions and public perceptions of animal use.
6. Demonstrate and describe safe handling of a range of animal species including domestic and non-domestic animals.
7. Observe basic animal behaviour, and interpret this behaviour in the context of production, recreation and service.
8. Report research findings using academic written and oral communication and develop intellectual autonomy.

Subject Content

1. Historical Perspectives: Animal attributes exploited by humans; Animal products and human nutrition; Animals and human development
2. Historical Perspectives: Hunter gatherers; Neolithic Revolution; Animals in religion, culture and mythology
3. Positive Interactions: Domestic agricultural animals
4. Positive Interactions: Working and entertainment
5. Positive Interactions: Companion animals
