On successful completion of this subject, students should be able to:

1. Identify the morphological and physiological characteristics that define vertebrate animals
2. Understand the processes and explain patterns in the phylogenetic (evolutionary) history and current diversity of vertebrate animals
3. Compare and contrast the structure and function of major body systems in vertebrate animals to understand their evolution in response to different environmental challenges
4. Critically interpret the ecological function of variation in morphological, physiological and behavioural traits among vertebrate animals in relation to their environment, especially from an Australian perspective
5. Review broad patterns in the diversity of vertebrate animal species and evaluate how human-induced environmental changes threaten the viability of their populations
6. Apply the scientific method and work collaboratively to design, conduct and analyse a research project addressing the environmental factors that determine the diversity and abundance of vertebrate animal species

Subject Content

1. Structure and function of major vertebrate animal groups
2. Evolutionary relationships among vertebrate animal groups
3. Diversity of vertebrates, around the world and in Australia
4. Functional ecology of vertebrates in Australian ecosystems
5. Application of scientific method to study vertebrates in relation to their environment

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

BIOS 3026 Evolution and Genetics

Credit Points 10

Legacy Code 301253

Coordinator John Hunt (https://directory.westernsydney.edu.au/search/name/John Hunt/)

Description This subject will ensure students are able to understand the core concepts in modern evolutionary theory and the central position that evolution plays in unifying all sub-disciplines of biology. It will also enable students to distinguish the major genetic mechanisms that underpin these theories and critically assess the general importance of genetics in the evolutionary process. In particular, students will gain an in depth knowledge on speciation and population divergence, origin of genetic variation, genetic drift and founder effects, natural and sexual selection, migration, mutation and coevolution, with a major emphasis on genetic mechanisms and the analytical techniques used to assess them. Students may be required to travel to a different campus to undertake this subject.

Level Undergraduate Level 3 subject

Incompatible Subjects BIOS 2034 Principles of Evolution

Restrictions

Successful completion of 60 credit points

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Define evolution and provide supporting evidence for this process;
2. Evaluate the concepts of natural and sexual selection and how they contribute to biological adaptation and speciation;
3. Assess the relative importance of neutral and selective processes to evolutionary change;
4. Critically assess the importance of genes to the evolutionary process and be able to differentiate between the different evolutionary mechanisms;
5. Combine information on genes and selection to predict the direction and strength of phenotypic evolution;
6. Describe the ways in which gene interactions can alter the evolution and coevolution of phenotypic traits;
7. Critically assess and interpret scientific literature, and advances in the field of evolutionary research;
8. Design, execute, analyse and interpret scientific experiments on genetics and evolution;
9. Communicate the findings of investigations and experiments in oral and written form;
10. Analyse the application of evolutionary theory to many modern scientific issues, including (but not limited to) human disease, agricultural breeding, and genetic engineering.

Subject Content

-An Overview of evolution and The scope of evolutionary biology
-The role of genes in The evolutionary process
-Mendelian Genetics and The inheritance of genes of major effect
-population Genetics and The processes that can alter allele Frequencies in The population
-Assessing allele Frequencies in natural populations and testing for deviation from Hardy-Weinberg Equilibrium
-quantitative Genetics and The evolution of phenotypic traits
-using laboratory breeding designs and molecular techniques in natural populations to estimate key quantitative Genetic parameters, including heritability and Genetic Correlation
-Quantifying The strength and form of selection in laboratory and natural populations
-predicting The rate and direction of phenotypic evolution
-using current molecular approaches (including QTL, hitchhiking Mapping, GWAS, RNAseq) to understand The genomic basis of complex traits
-understand Core phylogenetic principles and how this informs macroevolution
-An overview of the key macroevolutionary processes (e.g. speciation, co-evolution, symbiosis and extinction)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	1 hour (open book and done in own time, over a 1 week period)	25	N	Individual
Short Answer	1 hour (open book and done in own time	10	N	Individual
Presentation	15 minutes	15	N	Group
Report	2,000 words	20	N	Individual
Final Exam	2 hours	30	N	Individual

BIOS 3027 Molecular Biology of the Cell

Credit Points 10

Legacy Code 301251

Coordinator Liza Cubeddu (https://directory.westernsydney.edu.au/search/name/Liza Cubeddu/)

Description Molecular biology is central to many fields of the biomedical and natural sciences, and includes genetics, immunology, cell biology, biochemistry, and forensics. Through comparative studies of different organisms, this subject will explain fundamental concepts and methods in the study of DNA and RNA, extending to the application of molecular biology in more advanced fields such as genomics. Subjects will include DNA replication; transcriptional, post-transcriptional and epigenetic regulation of gene expression; microarrays, and an introduction to bioinformatics. Practical work will provide opportunities to become familiar with the methods of molecular biology, with an emphasis on the development of problem solving and analytical skills.Students may be required to travel to a different campus to undertake this subject.

Level Undergraduate Level 3 subject

Incompatible Subjects BIOS 3015 Human Molecular Biology

Restrictions

Successful completion of 60 credit points

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Recall common terms and definitions of molecular biology
2. Explain how genomes are organised and how this relates to the control of gene expression.
3. Describe mechanisms of transcriptional and post-transcriptional gene regulation
4. Compare and contrast common approaches to analyse DNA and RNA at the level of a single gene and of a whole genome.
5. Plan, complete and become proficient in conducting experiments in molecular biology.
6. Communicate and problem solve experiments as part of a laboratory group.
7. Demonstrate skills in critical thinking and analysis.

Subject Content

Theme 1: Working with DNA and RNA
-The structure and organisation of DNA and RNA: relating form to function
-What is a gene? Locating genes within a genome and in different organisms
-The organisation of genome
-The theory and practice of cloning
Theme 2: Synthesis of DNA, RNA and Protein
-DNA Synthesis (Replication) and DNA replication- Termination of replication and role of telomerase
-RNA Synthesis (Transcription)
-RNA processing
-The genetic code
-Protein synthesis (Translation)
Theme 3: Controlling the genome ? DNA repair and the regulation of transcription
-The regulation of gene expression: Nucleosome modification and Chromatin remodelling
-Types of mutations
-DNA repair pathways
-Homologous recombination and its importance in DNA repair and meiosis

BIOS 3028 Pathological Basis of Human Disease

Credit Points 10

Legacy Code 301260

Coordinator Garry Niedermayer (https://directory.westernsydney.edu.au/search/name/Garry Niedermayer/)

Description Pathology is the study of disease. Students will gain an understanding of human pathogenesis, general and systems pathological processes, and the scientific basis of diagnostic and treatment options. The subject builds upon the students' fundamental knowledge of physiological processes and knowledge of normal human tissue and organ histology, and examines histopathological changes evident in disease states. Students may be required to travel to another campus to undertake this subject.

BIOS 3029 Biotic interactions

Credit Points 10

Legacy Code 301266

Coordinator Ben Moore (https://directory.westernsydney.edu.au/search/name/Ben Moore/)

Description This subject will introduce the diversity of biotic interactions observed in nature, with an emphasis on their significant roles in maintaining ecosystem function and regulating biological diversity. Major themes will include the role of microbes in plant and animal health and nutrient acquisition via the soil and gastrointestinal microbiomes, the chemical ecology of interactions between plants, and herbivores and pollinators, and interactions between predators and prey. The consequences of biotic interactions for participants can vary from mutual benefit to benefit for one participant and harm for the other, however these outcomes can often change through time and space. Students will be guided to an understanding of how ecological circumstances determine the consequences of biotic interactions.

BIOS 3032 Plant Science

Credit Points 10

Legacy Code 301272

Coordinator Oula Ghannoum (https://directory.westernsydney.edu.au/search/name/Oula Ghannoum/)

Description Plants are the primary producers of terrestrial ecosystems and moderators of climate change. This subject introduces students to how plants grow and interact with their environment. Students will learn how leaves turn sunlight energy into sugars; stems transport water, solutes and organic compounds; roots acquire water and mineral nutrients by themselves or in association with soil microbes; and hormones regulate plant development and responses to the environment. This knowledge set is crucial for managing our Century's key challenges of food security and climate change. Students will be required to travel to the Hawkesbury campus where the practicals take place.

BIOS 3033 Applied Bioinformatics

Credit Points 10

Legacy Code 301406

Coordinator Thomas Jeffries (https://directory.westernsydney.edu.au/search/name/Thomas Jeffries/)

Description The ability to perform computational experiments and analyse data is a key component for a successful career in the biological sciences. This subject focuses on how biology has been enhanced through advances in technology, genomics, transcriptomics, proteomics and metabolomics in the development of cell phenotype. Using model systems, this subject shows how research biologists use computational cell biology to form hypotheses, mine data, analyse experiments, and synthesise information. Students will apply bioinformatics and engage with next-generation DNA sequencing data. Students will apply web-based bioinformatics toolkits to construct and compare model genomes, transcriptome, proteome and metabolome information to profile cell genotype and phenotype. Students will undertake a project that interprets and communicates research findings in the context of real world applications, legal and ethical frameworks.

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 120 credit points

Assumed Knowledge

A basic understanding of microbial, animal and plant cell core concepts is desirable.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Utilise genomics, transcriptomics, proteomics and metabolomics in profiling cell processes and phenotype.
2. Explain how technological advances enable connectivity of omic databases and advances in computational cell modelling.
3. Compare and contrast ﷺ features of plant, animal and microbial cells.
4. Describe and annotate genomes, model transcriptomic responses in the context of cellular processes.
5. Develop cellular models through extracting information, managing and organising data
6. Establish the role of in-silico studies underpinning genetic engineering and biotechnology and its application industry and the research sectors.
7. Communicate the findings of investigations within existing legal and ethical frameworks

Subject Content

1. Profiling genomic, transcriptomic, proteomic and metabolomics data in the process of establishing workflow to develop model cell systems.
2. Technologies that enable sequencing of macromolecules, processes and computational resources.
3. Features of genomes, transcriptomes, proteomes and metabolomes, their linkage in the context of computational modelling.
4. Application of bioinformatic tools within an online environment and visual interfaces to acquire, judge, and synthesise biological information.
5. Interrogation of functional pathways and demonstration of in-silico genetic engineering approaches.
6. Professional presentation skills for industry, government, and academia.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

BIOS 3034 Molecular Biotechnology

Credit Points 10

Legacy Code 301405

Coordinator Mark Jones (https://directory.westernsydney.edu.au/search/name/Mark Jones/)

Description Molecular techniques in cell biology are rapidly developing and offer new solutions to disease mitigation, as well as sustainable solutions to environmental and industrial imperatives. The fundamental cellular processes along with stem cell development, transformation, transfection, cell engineering and re-programming are some of the advanced applications covered in this unit. Students will conduct guided projects investigating the action of hormones, growth factors, morphogens and bio-actives; their receptors and signalling pathways and the cellular responses they trigger. Molecular Biotechnology covers modern techniques in cell screening, cell culture, advanced characterization and experimental approaches enabling dynamic understanding of live microbial, animal and plant cells.

Level Undergraduate Level 3 subject

Equivalent Subjects BIOS 3001 - Advanced Cell Biology

Restrictions

Successful completion of 120 credit points

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse and statistically evaluate biological data from a range sources.
2. Evaluate biological mechanisms by articulating the principle intra-cellular components controlling microbial, animal and plant cell form and function.
3. Analyse the molecular mechanisms and rate by which cells can be induced to respond to variable stimuli.
4. Apply technical and interpretive skills to modify microbial, plant and animal cell for biotechnology applications.
5. Ethically design and evaluate computational experiments in animal, plant or microbial biology.
6. Propose sustainable molecular biotechnology strategies following cultural, ethical and legal frameworks.

Subject Content

1. Molecular mechanisms controlling microbial, animal and plant cell components, including membranes, organelles, cytoskeleton and the intracellular compartmentalization of molecules and their transport.
2. The interrelationship and responsiveness of cells with their immediate environment including molecular modifications to respond to variable stimuli and rapid change.
3. Cell communication through: receptor-ligand binding and bio-active molecule interactions, molecular modifications and reporter systems of cell signalling molecules and bio-remediation.
4. Cell division and differentiation, adaptation and modification through molecular re-programming, induction of pluripotent stem cells, regulation of cell cycle as well as cell death.
5. Application of advanced cell biology techniques, including skills relevant to microbial, animal and plant cell culture methods.
6. Cell characterisation with techniques including real-time Polymerase Chain Reaction (PCR), hyperspectral and fluorescence characterization and image analysis techniques.
7. Development of professional molecular strategies to modify cells for sustainable environmental and industrial applications and disease control, in the context of cultural, ethical and legal frameworks.

BIOS 3035 Sustainable Environments

Credit Points 10

Legacy Code 301409

Coordinator Jeff Powell (https://directory.westernsydney.edu.au/search/name/Jeff Powell/)

Description As a student in Sustainable Environments you will synthesize and apply your knowledge about how ecological systems are responding to human impacts in the Anthropocene and how adaptation and mitigation can moderate these impacts. You will demonstrate knowledge of the role of biological and physical processes in provision of ecosystem services. You will apply analytical skills to identify sustainable solutions in social-ecological systems. You will incorporate social and cultural contexts, including relevant Aboriginal perspectives, in communicating science-based knowledge related to the United Nations sustainable development goals in an independent, problem-based sustainability project.

School Science

Discipline Ecology and Evolution

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) BIOS 2008

Restrictions

Successful completion of 120 credit points

Assumed Knowledge

Students will be expected to apply previous knowledge in ecology and environmental assessment.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain how social, biological and physical processes interact to maintain sustainable ecological systems.
2. Apply frameworks of sustainability and ecosystem services to an ecological system.
3. Identify risks and opportunities for sustainability in an ecological system.
4. Using evidence, effectively communicate the social and ecological contexts of an environmental problem and sustainable solutions.

Subject Content

Sustainability in a changing world
- sustainability frameworks
- Ecosystem services and valuation
Guided case studies (anchored in the United Nations Sustainable Development Goals)
- climate action
- Clean water
- sustainable cities and communities
- life on land
Sustainability project design and application
- modelling and analysis
- team-based sustainability Project

BIOS 3036 Agricultural Biosecurity

Credit Points 10

Legacy Code 301450

Coordinator Jonathan Plett (https://directory.westernsydney.edu.au/search/name/Jonathan Plett/)

Description Students will be exposed to current and emerging biosecurity issues world food production systems are expected to comply with and develop to ensure sustainable and safe animal and plant products. This subject will enable you to recognise, monitor and control animal and plant pests (invertebrates, microorganisms and weeds) and their impact on human society and food security. Major areas of study include strategies and procedures to identify, record and assess damage to animal and plant products. Included in this subject are key issues related to legislative, physical, biological, genetic and chemical control methods, along their benefits and limitations. Theory and practice of integrated pest and disease management systems and issues associated with quarantine and biosecurity are contextually embedded in subject content and activity.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the biology of, and symptoms and losses caused by, the major groups of invertebrate pests, animal and plant pathogens as well as weeds.
2. Explain interactions between pests, diseases, their hosts and the environment.
3. Critically analyse strategies for protecting animals and plants from pest and disease damage, their benefits and limitations.
4. Propose practical methods for control of plant invertebrate pests, pathogens and weeds.
5. Identify the systems and implications for quarantine, plant biosecurity and trade.
6. Integrate a range of strategies in developing integrated pest and disease management programs, and biosecurity.

Subject Content

1. Processes and procedures to identify symptomatology of animal and plant pathogens
2. Physical and mechanical control of vertebrate and invertebrate pests, pathogens and weeds
3. Sustainable management strategies of animal and plant pests and diseases.
4. Animal and plant breeding methodologies for resistance to pathogens and pests.
5. Chemical control and legislative requirements for invertebrate pests and pathogens.
6. Quarantine and biosecurity for sustainable food security and ecosystems

BIOS 3038 Metabolism

Credit Points 10

Coordinator Ming Wu (https://directory.westernsydney.edu.au/search/name/Ming Wu/)

Description Humans ingest amino acids, carbohydrates, fats, vitamins, and minerals to generate cells and tissue for growth, maintenance and defence, along with energy. This subject will cover topics including: bioenergetics; the structures of key molecules; metabolic pathways in health and disease along with disease remediation by contextualising glycolysis, gluconeogenesis, glycogen synthesis and breakdown; fatty acid oxidation and synthesis; amino acid catabolism; urea synthesis; citric acid cycle, oxidative phosphorylation with the role of vitamins and minerals in metabolic pathways. Emphasis will be on the regulation and integration of these pathways, including their responses to hormonal regulation. The effects of metabolic disease altered dietary and hormonal status on metabolic pathways and their consequences will be addressed in the context of clinical case studies.

Must have successfully completed 60 credit points

Learning Outcomes

After successful completion of this Subject, students will be able to:

1. Articulate the molecular mechanisms by which dietary macromolecules (carbohydrates, lipids, proteins) are metabolised in humans.
2. Analyse the different roles of the major tissues in energy metabolism in relation to the general structural types and functional classifications of regulatory molecules such as hormones, growth factors, cytokines, neurotransmitters
3. Examine the ways disorders in metabolic pathways affect homeostasis and how detection and treatment can be implemented.
4. Acquire and interpret biochemical data in the research, diagnostic, treatment and policy sectors using standard biochemical techniques, graphical skills, biochemical calculations and professional databases.
5. Organise, present and interpret experimental observations, within the context of team/leadership roles, in timely, clear, concise written and oral form.

Subject Content

1. Amino Acid, Carbohydrate and Lipid metabolism, including pathways of glycolysis, gluconeogenesis, glycogen metabolism; their metabolic and hormonal regulation including the role of major micronutrients.
2. The citric acid cycle and oxidative phosphorylation, their role in energy metabolism and their regulation.
3. Integration of vitamins and minerals in carbohydrate, fat and amino acid metabolism; the different roles of individual tissues in metabolism along with their regulation in response to dietary and disease states.
4. Identifcation of the nature of specificity, sensitivity and reproducibility when selecting and using biochemical assays to diagnose metabolic disorders.
5. Interpretation of professional literature, including metabolic databases to diagnose and mitigate disease in the context of time management, organisation and communication through team/leadership responsibilities.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Report	1,500 words maximum	30	N	Group/ Individual
Quiz	5x20min	25	N	Individual
Case Study	2,000 words	45	N	Individual

BIOS 3039 Ecology

Credit Points 10

Coordinator Uffe Nielsen (https://directory.westernsydney.edu.au/search/name/Uffe Nielsen/)

Description Humans have long been fascinated by Earth's astounding diversity of species and ecosystems. Ecology is the science that study the distribution of these species, the controls on population dynamics, and what structures communities and ecosystems. The resulting knowledge is critical to inform land management and policy decision-making to conserve biodiversity, sustainably manage ecosystems, while supporting a growing human population through provision of ecosystem services including food production and adaptation to climate change. In this subject, you will learn current ecological theory from the scale of individual organisms, through populations, to communities and ecosystems; how to conduct ecological research; and, how to apply ecological knowledge to solve real world problems.

Level Undergraduate Level 3 subject

Equivalent Subjects BIOS2007
EY210A
EY201A
BIOS2008

Restrictions

Must have successfully completed 100 credit points

Learning Outcomes

After successful completion of this Subject, students will be able to:

1. Define and apply key ecological concepts relevant at the scale of populations, species, communities, and ecosystems.
2. Critically analyse how ecological knowledge is gained and how it can be applied.
3. Contextualise knowledge gaps and design robust research programs to address these.
4. Communicate ecological knowledge verbally and in writing using scientific literature to support key statements.
5. Work effectively and responsibly in a team.

Subject Content

1. Describe ecology as a science, how ecological knowledge is gained, and how ecological knowledge, including Indigenous understanding, and theory informs management and policy decision-making.
2. Historical and contemporary drivers of the distribution of species.
3. Population biology and population dynamics, particularly in reference to managing threatened species.
4. The role of biotic interactions, with a focus on herbivory, predation, competition, and beneficial associations.
5. Community ecology, particularly how communities change through time and space.
6. Ecosystem ecology, with a focus on primary productivity, biogeochemical cycling and sustainable land use in the face of global change.
7. Approaches to, and consequences of, traditional and current management, including Indigenous land use, on species and ecosystems.

Special Requirements

Essential equipment

Covered footwear for practicals in laboratory and field excursions; safety goggles and lab coat for practicals in laboratory

BIOS 4001 Science, Technology and Environment Honours Project

Credit Points 60

Legacy Code 300412

Coordinator Janice Aldrich-Wright (https://directory.westernsydney.edu.au/search/name/Janice Aldrich-Wright/)

Description This is a 60 credit point year-long subject taken over two terms (30 credit points in each term).The aim of this subject is to further develop the student's research and problem solving skills. The student is required to implement a research plan, complete

a substantive piece of research in a relevant field within Science, Technology and the Environment and to communicate the results of that work to an interested and technically literate audience. Students will present their research as a thesis with a substantial chapter detailing research objectives, methodology and research outcomes. The thesis topic and structure will vary according to the area of interest of the student and the expertise of the supervisor. The project is meant to be a significant undertaking and to incorporate some element of innovation. Throughout this subject regular planned consultations between the student and supervisor(s) will occur and students will be required to attend seminar series or regular research meetings; these may be formal components of other subjects within the Bachelor (Honours) program. Students are expected to work to a schedule devised in consultation with their supervisor. The schedule will include dates set for progress reports and the presentation of draft chapters for review by the supervisor. The subject builds upon the skills developed in the undergraduate program, extending students' competencies in a range of practical techniques and processes of critical thinking. Students who successfully complete the Honours program will have achieved the appropriate background to enable them to pursue further postgraduate research and/or coursework in the sciences or pursue a career in industry or profession.

School Science

Discipline Biological Sciences

Student Contribution Band HECS Band 2 30cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 4 subject

Restrictions Students must be enrolled in a postgraduate or honours program.

Assumed Knowledge

Successful completion of a Bachelors degree in a science discipline. Normally the student will have achieved a grade point average of greater than 5.0 in Level 2 and 3 subjects.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. conduct a postgraduate research project;
2. demonstrate a capacity for critical and independent thought, self-motivation and initiative;
3. collate and critically evaluate relevant research literature;
4. formulate research questions;
5. prepare a formal research proposal on their project;
6. (where appropriate) obtain Ethics Approval for the project from the Western Sydney University Human Ethics Review Committee or Animal Care and Ethics Committee;
7. demonstrate competencies in appropriate research methodologies;
8. devise and implement experimental protocols relevant to their research objectives;
9. gather, analyse and evaluate experimental or other relevant data;
10. demonstrate oral and written skills appropriate for the presentation of experimental results, including the ability to write a cogent thesis;
11. develop a framework for understanding and implementing good laboratory management strategies and occupational health and safety procedures.

Subject Content

The content is flexible, depending on the nature of the research project, and a plan is developed contractually between the student and supervisor(s) to meet the needs of the particular research topic.
This may include the preparation of up to three progress reports, as agreed with the supervisor(s).
In addition to the submission of a thesis, students are also required to complete the following compulsory elements of the Honours program:
- prepare a formal research proposal on the Honours project within the first Session of Honours study, for evaluation by the student?fs supervisor(s). Note: This requirement may be satisfied separately in the units Research Methodology and Experimental D
- where appropriate, obtain ethics Approval for The Honours Project from The Western Sydney university human ethics Review Committee or Animal care and ethics Committee.

BIOS 7001 Emerging Technologies for Biological Science

Credit Points 10

Legacy Code 800186

Coordinator Chris Cazzonelli (https://directory.westernsydney.edu.au/search/name/Chris Cazzonelli/)

Description This subject serves to enhance the technological education and training for students undertaking research in biological, agricultural and medical sciences. The subject will teach current and emerging technologies utilised in biological investigations with a focus on model species of animals, plants, insects and microorganisms. The subject is structured around emerging technologies in research fields of: 1) whole organism physiology, 2) cell molecular biology and biochemistry, and 3) genomic and epigenomic processes encoded by the nucleus. Students will be exposed to a systems approach in order to investigate complex interactions with a view towards understanding the impacts of the environment on biological interactions. Teaching will be undertaken by Western Sydney University-HIE staff who are world leaders in their respective research fields.

School Graduate Research School

Discipline Biological Sciences

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in the Bachelor of Research Studies/ Master of Research.

Assumed Knowledge

Students should have an undergraduate degree in Biology, Environmental Science, Medical Science, or Agricultural Science, with a background in biological sciences, including some knowledge of molecular biology, genetics, biochemistry and/or physiology.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically discuss research articles and describe technologies using in biological research investigations.

2. Utilise an interdisciplinary systems approach to investigate biological processes.
3. Describe core technologies used in physiology, biochemistry or molecular biology.
4. Apply new technologies in practical biological research investigations.
5. Interpret and analyse data obtained from ﬠeomics technologies using commercial software.
6. Conduct investigations safely and ethically in a laboratory using experimental methodology.
7. Use spreadsheets, statistical and analytical programs to enter, analyse and graph data as well as draw appropriate conclusions from data.
8. Communicate findings correctly in oral or in written form using an appropriate style, as well as access the scientific literature to place research findings in a publication context.

Subject Content

Tools for Phenotyping and Studying Physiological Processes
1. Whole organism imaging, confocal microscopy and microelectrode techniques
2. Principles of fluorescence, gas exchange and stable isotopes analysis
3. Techniques for measuring carbon budgets
Molecular and Biochemical Methods
4. Methods to quantify gene expression and protein abundance or activity
5. Metabolomics: tools to quantify and identify primary and secondary metabolites
6. Genetic engineering, genome editing and modification of organism traits
High Throughput Genetic and Epigenetic Technologies
7. Next generation sequencing and genomic applications
8. Genotype by sequencing and gene capture techniques
9. Deciphering the epigenome: DNA methylation, chromatin modification and RNA silencing

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	60 minutes per quiz - 20 questions	30	Y	Individual
Report	2500 words including figures and tables (excluding references)	40	Y	Individual
Final exam	2 hours	30	Y	Individual

BLDG 0001 Academic Skills for Construction Management (WSTC Prep)

Credit Points 10

Legacy Code 700200

Coordinator Robert Paluzzano (https://directory.westernsydney.edu.au/search/name/Robert Paluzzano/)

Description This subject is designed to assist students to become successful independent and reflective learners. It introduces students to a range of theories and concepts to facilitate the development of practical skills and personal attitudes necessary for success in tertiary study. The subject also develops basic competencies in using computers and application software for the Building Design Management and Construction Management industries. The subject covers the use of word-processing software and spreadsheets. Students are also introduced to project management and design software.

School Western Sydney The College

Discipline Building Science and Technology

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 0 Preparatory subject

Restrictions

Students must be enrolled at Western Sydney University, The College.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Use both independent and collaborative learning strategies to advance the knowledge of the individual and that of their peers.
2. Communicate effectively through the development of critical reading, listening, speaking and writing skills in context.
3. Locate and use information technology systems and educational technologies to support learning and assessment.
4. Apply the process of reflection to learning experiences, in order to assess their own learning styles and 'learn how to learn'.
5. Identify and describe the basic computer concepts and us

Subject Content

Topic 1: Introduction to tertiary study
Topic 2: Blended learning
Topic 3: Advanced tertiary skills
Topic 4: Research methods for construction studies;
- Introduction to scientific methods
- Report writing
- Data handling
- Critical reading
- Research and referencing (journal articles)
- Project report

Topic 5: Introduction to information systems and technology as they relate to the building and construction industry.
Topic 6: Introduction to the basics of proposing, designing, estimating and scheduling of a construction project

BLDG 1006 Building 2 (WSTC)

Credit Points 10

Legacy Code 700071

Coordinator Robert Paluzzano (https://directory.westernsydney.edu.au/search/name/Robert Paluzzano/)

Description This subject has been replaced by equivalanet subject 700305 from Term 3, 2021. The aim of this subject is to provide students with an overview of the design, classification, applicable Australian Standards, structural systems, construction techniques, materials handling systems, building services, fit-out and finishes for larger scale buildings.

Major Assignment		50	N	Group
Endof-session Exam (online)	2hrs and 20 mins	50	N	Individual

BLDG 1007 Construction Work Safety

Credit Points 10

Legacy Code 301061

Coordinator Qinjun Liu (https://directory.westernsydney.edu.au/search/name/Qinjun Liu/)

Description This introductory subject describes the context of safety management in the Australian construction industry. The topics covered include: The poor long-term record in the construction industry on Workplace Health and Safety (WHS); Strategies for improving the industry performance; Introduction to hazard identification and risk management; and Individual safety awareness and personal responsibility.

School Eng, Design & Built Env

Discipline Construction Engineering

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Equivalent Subjects BLDG 1008 - Construction Work Safety (WSTC)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Recognise the importance of workplace health and safety in the construction industry
2. Recognise the WHS responsibilities and legal framework
3. Understand the costs and causes of workplace injuries and accidents
4. Conduct WHS risk assessment and management for construction projects
5. Apply WHS principles and theories to systematically design and evaluate WHS strategies and interventions for construction projects

Subject Content

Workplace safety responsibilities
Causes of accidents
Risk management
WHS hazards and control
WHS legal framework
Accident investigation
Economics and ethics of construction safety
Promoting safety: principles and strategies

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	40 minutes	20	N	Individual
Report	2500 words (excluding graphs and reference list)	35	N	Individual
Final Exam	2 hours	45	N	Individual

BLDG 1009 Environmental Building Design

Credit Points 10

Legacy Code 301062

Coordinator Laura Melo C E De Almeida (https://directory.westernsydney.edu.au/search/name/Laura Melo C E De Almeida/)

Description This subject explores the important parameters that are used to facilitate sustainable change in the built environment. Building

design is a tool to minimise the use of scarce resources and reduce the impact on the natural Australian landscape. Improving the standard of liveability in urban and peri-urban communities is addressed through the development of holistic building design solutions.

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Equivalent Subjects BLDG 1010 - Environmental Building Design (WSTC)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Recognise the importance of energy and water efficiency to the sustainability of our built environment
2. Review the available strategies that can be used to improve the life cycle performance of buildings
3. Identify the major common weaknesses in current residential building design
4. Prioritise environmental parameters for a specific building project
5. Integrate their knowledge of environmental design in the context of a medium density housing development

Subject Content

Sustainable building design
Environmentally friendly building materials and systems
Green rating schemes for buildings
Energy, water and waste management in buildings

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	1 hour	20	N	Individual
Report	Technical report with an overall of 1,000 words	30	N	Individual

BLDG 1011 Property Building

Credit Points 10

Legacy Code 301157

Coordinator Keivan Bamdad Masouleh (https://directory.westernsydney.edu.au/search/name/Keivan Bamdad Masouleh/)

Description This subject provides students with an overview of regulations and construction techniques with an emphasis on low-rise residential buildings in the Australian context. It covers general process; building regulations; environmental issues; surveying techniques; structural elements (footings, framing and bracing); envelope; services; fit-out and finishes.

School Eng, Design & Built Env

Discipline Construction Engineering

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Incompatible Subjects BLDG 1001 Building 1 BLDG 1003 Building 1 (WSTC)

Restrictions

Students must be enrolled in the Property Major in the Bachelor of Business.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse and describe construction techniques required for low rise residential buildings including design of slab-on-ground and timber framing
2. Select materials and appropriate construction techniques based on regulatory, safety and environmental analyses and communicate these via technical documentation
3. Interpret building regulations pertinent to low rise residential buildings
4. Apply simple land and building surveying techniques
5. Analyse basic building services requirements for low rise residential buildings
6. Recognise environmental and social connections with the built forms
7. Identify typical low rise residential building defects and propose acceptable solutions
8. Identify the problems associated with building low rise residential in hazardous locations

Subject Content

Environmental impact of building
Housing styles
Design, documentation, tendering
Regulations
Surveying
Civil works and soil mechanics
Footing systems
Concrete slabs
Timber framing
Cladding
Services
Fit-out
Finishes
Building in hazardous locations
Alternative construction
Defects and faults

BLDG 1012 Property Development Controls

Credit Points 10

Legacy Code 200435

Coordinator Za Manaf (https://directory.westernsydney.edu.au/search/name/Za Manaf/)

Description Property Development Controls provides students with an understanding of the property planning process from both a State government and Local government perspective. The subject will cover the areas of planning instruments, planning process, property development control issues and planning applications. The subject will also address the areas of the valuation and development impact of planning and environment regulations, with specific reference to the regulatory framework that regulates planning and development in NSW and the impact on the property industry in Australia.

School Business

Discipline Building Construction Management

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Incompatible Subjects ARCH 2003 - Development Control

Restrictions

External offerings for this subject are only available to students who are enrolled in a Property program or Major.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the role and function of State and Local government authorities in the property development process;
2. Explain the development application process for the main property types and the impact of development controls on property;
3. Explain the roles of State and Local government in the planning process;
4. Evaluate how environmental regulations influence the use and management of property.

Subject Content

Land use
Planning instruments
Essentials of environmental planning
Development controls
Land ownership
Heritage protection
Environmental regulations
Pollution control
Development application process

Prescribed Texts

- Farrier, D and Stein, P. 2011 (5th edition) The Environmental Law Handbook: Planning and Land Use in NSW. Thomson Reuters. Sydney.

BLDG 1013 Building Science

Credit Points 10

Legacy Code 301219

Coordinator Alan Todhunter (https://directory.westernsydney.edu.au/search/name/Alan Todhunter/)

Description This subject provides students with an introductory overview of the way in which scientific principles impact on the structure, fabric and performance of the built environment. Areas covered will include the concepts of force, energy and work in building structures; properties of common building materials; and significant aspects of heat, light and sound in buildings. All the theoretical content will be contextualised within examples drawn from the construction industry. Students will be able to recognise the critical data required for practical decision-making in the area of building technology.

School Eng, Design & Built Env

Discipline Building Science and Technology

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the ways that forces act on building structures
2. Compare and contrast the properties of common building materials
3. Explain the causes of deterioration in building materials over time and suggest remedies for this deterioration
4. Distinguish the concepts of embodied energy and embodied carbon as they relate to buildings
5. Correlate the concepts of heat, light and sound transmission through building elements with decision making on materials for buildings

Subject Content

1.Introduction to scientific concepts as they impact on buildings
2.Energy, mass, force, velocity and acceleration in building structures
3.Properties of timber, steel, concrete and other common building materials
4.Durability and deterioration in building materials
5.Embodied energy and embodied carbon in building materials and systems
6.Management and control of heat, light and sound in buildings

Assessment

BLDG 1014 Non-Residential Building

Credit Points 10

Legacy Code 301227

Coordinator Anthony Butera (https://directory.westernsydney.edu.au/search/name/Anthony Butera/)

Description The aim of this subject is to provide students with an introduction to the design, classification, applicable Australian Standards, structural systems, construction techniques, materials handling systems, building services, fit-out and finishes for larger scale buildings. The subject focusses on non-residential building projects such as shopping centres, factories, warehouses, office buildings and associated facilities.

School Eng, Design & Built Env

Discipline Building Science and Technology

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Equivalent Subjects BLDG 1004 Building 2
BLDG 1006 Building 2 (WSTC)
BLDG 1005 Building 2
BLDG 1017 Non Residential Building (WSTC)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Interpret pertinent building regulations;
2. Analyse and describe construction techniques;
3. Analyse and describe materials handling requirements;
4. Assess preliminary cost and scheduling requirements for a project;
5. Use scale models to describe project solutions.

Subject Content

-Players in the construction process
-Construction as a system
-Regulations
-Site investigation
-Preliminaries

-Demolition
-Civil works
-Substructure
-Reinforced concrete construction
-Steel construction
-Materials handling
-Cladding systems
-Portal framing and tilt-slab
-Examination of the design
-Fit-out and finishes for larger scale buildings
-Services coordination

BLDG 1017 Non-Residential Building (WSTC)

Credit Points 10

Legacy Code 700305

Coordinator Robert Paluzzano (https://directory.westernsydney.edu.au/search/name/Robert Paluzzano/)

Description This subject provides students with an introduction to the design, classification, applicable Australian Standards, structural systems, construction techniques, materials handling systems, building services, fit-out and finishes for larger scale buildings. The subject focusses on non-residential building projects such as shopping centres, factories, warehouses, office buildings and associated facilities.

Discipline Building Science and Technology

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Equivalent Subjects BLDG 1004 - Building 2 BLDG 1006 - Building 2 (WSTC) BLDG 1005 - Building 2 BLDG 1014 - Non-Residential Building

Restrictions

Students must be enrolled at The College. Students in Extended Diploma programs must pass 30 CPs of preparatory subjects in order to enrol in this subject. Students in Integrated Diploma programs must pass or be enrolled in the preparatory subjects in order to enrol in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. interpret pertinent building regulations;
2. analyse and describe construction techniques;
3. analyse and describe materials handling requirements;
4. assess preliminary cost and scheduling requirements for a project;
5. use scale models to describe project solutions.

Subject Content

Players in the construction process
Construction as a system
Regulations
Site investigation
Preliminaries
Demolition
Civil works
Substructure
Reinforced concrete construction
Steel construction
Materials handling
Cladding systems
Portal framing and tilt-slab
Examination of the design
Fit-out and finishes for larger scale buildings
Services coordination

Restrictions

Students must be enrolled at The College to enrol in this subject. Students enrolled in Extended Diploma programs must have passed 30 credit points of preparatory subjects in order to enrol in this subject. Students enrolled in Integrated programs need to have passed or be enrolled in the preparatory subjects in their program in order to enrol in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse and describe construction techniques required for low rise residential buildings including design of slab-on-ground and timber framing
2. Select materials and appropriate construction techniques based on regulatory, safety and environmental analyses and communicate these via technical documentation
3. Interpret building regulations pertinent to low rise residential buildings
4. Apply simple land and building surveying techniques
5. Analyse basic building services requirements for low rise residential buildings
6. Recognise environmental and social connections with the built forms
7. Identify typical low rise residential building defects and propose acceptable solutions
8. Identify the problems associated with building low rise residential in hazardous locations

Subject Content

Environmental impact of building
Housing styles
Design, documentation, tendering
Regulations
Surveying
Civil works and soil mechanics
Footing systems
Concrete slabs
Timber framing
Cladding
Services
Fit-out
Finishes
Building in hazardous locations
Alternative construction
Defects and faults

BLDG 1019 Construction Site Administration (WSTC)

Credit Points 10

Description This subject delves into the roles and challenges confronting professionals in construction site management and administration. Through the lens of real-world case studies and project scenarios, students gain an introductory understanding of the diverse responsibilities involved in construction management and site administration. The subject features a specialised task focused on research and problem-solving, targeting sustainability challenges in the construction industry. Alongside developing fundamental research and communication skills, the subject places a strong emphasis on academic and business literacy. Skills in project management and teamwork are also cultivated, preparing students for future academic pursuits and professional engagements in construction site administration and beyond.

School Eng, Design & Built Env

Student Contribution Band

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Restrictions

Students must be enrolled in an existing Destination College Diploma program listed below:

- 7188 Diploma in Culture, Society and Justice
- 7189 Diploma in Health Science
- 7190 Diploma in Business
- 7191 Diploma in Information and Communication Technologies
- 7192 Diploma in Building Design and Construction
- 7193 Diploma in Engineering Studies
- 7194 Diploma in Creative Industries and Communications
- 7195 Diploma in Arts
- 7196 Diploma in Science
- 7197 Diploma in Education Studies

Learning Outcomes

1. Identify and reflect on the diverse roles and responsibilities inherent in construction site management and administration.
2. Employ information literacy skills to investigate and evaluate construction issues, considering alternative approaches.
3. Advocate for innovative and sustainable solutions to real-world construction problems based on sound reasoning and evidence.
4. Demonstrate proficiency in academic business literacy skills, as well as effectively communicate research outcomes clearly and professionally in visual and verbal presentations.
5. Plan, manage, and actively participate in team-based project, focusing on effective collaboration and project management.

Subject Content

- Communication skills: written, visual and verbal presentations AND academic and business literacy and research skills
- Roles and responsibilities of construction professionals AND industry case studies
- Problem solving, AND critical thinking AND sustainable innovative approaches
- Time management and project management

BLDG 1020 Domestic Construction (WSTC)

Credit Points 10

Description This subject provides students with an overview of domestic construction regulations and techniques with an emphasis on low-rise residential buildings in the Australian context. It covers general processes, building regulations, environmental issues, surveying techniques, structural elements (footings, framing and bracing), envelopes, services, fit-outs, and finishes.

School Eng, Design & Built Env

Student Contribution Band

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Restrictions

Students must be enrolled in an existing Destination College Diploma program listed below:

- 7188 Diploma in Culture, Society and Justice
- 7189 Diploma in Health Science
- 7190 Diploma in Business
- 7191 Diploma in Information and Communication Technologies
- 7192 Diploma in Building Design and Construction
- 7193 Diploma in Engineering Studies
- 7194 Diploma in Creative Industries and Communications
- 7195 Diploma in Arts
- 7196 Diploma in Science
- 7197 Diploma in Education Studies

Learning Outcomes

1. Understand and apply building codes and environmental considerations specifically for low-rise residential buildings.
2. Appropriately select materials based on safety and regulatory factors.
3. Evaluate and describe construction techniques, including slab-on-ground and timber framing.
4. Analyse the requirements for basic building services and identify common building defects, proposing solutions where appropriate.
5. Understand the impact of low-rise residential buildings on social and environmental contexts, including building in hazardous locations.

Subject Content

- Introduction to Residential Building; Why do we build; The environmental impact of building design, and house styles, civil works and soil mechanics.
- Standards Footing systems, concrete slabs and associated works; Design, documentation, tendering; and Regulations; Titles, BCA, BASIX
- Timber framing 1; Wall frames, Timber framing 2; Roof frames, and Cladding: Brickwork, roof tiling, other claddings
- Fit-out: walls, ceilings and floors; wet area construction, services; Finishes: internal, external and landscaping, and Building in hazardous locations; alternative construction; defects and faults

BLDG 1021 Commercial Construction (WSTC)

Credit Points 10

Description This subject provides students with an introduction to the design, classification, applicable Australian Standards, structural systems, construction techniques, materials handling systems, building services, fit-out and finishes for larger scale buildings. The subject focusses on commercial construction projects such as shopping centres, factories, warehouses, office buildings and associated facilities.

School Eng, Design & Built Env

Student Contribution Band

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Restrictions

Students must be enrolled in an existing Destination College Diploma program listed below:

- 7188 Diploma in Culture, Society and Justice
- 7189 Diploma in Health Science
- 7190 Diploma in Business
- 7191 Diploma in Information and Communication Technologies
- 7192 Diploma in Building Design and Construction
- 7193 Diploma in Engineering Studies
- 7194 Diploma in Creative Industries and Communications
- 7195 Diploma in Arts
- 7196 Diploma in Science
- 7197 Diploma in Education Studies

Learning Outcomes

1. Understand and interpret pertinent Australian Standards and building regulations applicable to commercial construction.
2. Evaluate construction methods and techniques for larger scale buildings.
3. Examine materials handling systems and their requirements in commercial construction projects.
4. Evaluate preliminary cost estimates and project scheduling requirements for a project.
5. Apply scale modelling techniques to communicate and solve design challenges in commercial construction projects.

Subject Content

- Introduction to 'Non-Residential Building' and overview of the assessments and Building Regulations; Site Investigations; Preliminaries; Demolition.
- Civil works and Substructure, Industrial: Portal Frames and Flooring Systems, and Industrial: Tilt-up Slab; Wall and Roof Claddings
- High rise: Reinforces Concrete Construction, Structural Steel Construction, Materials handling Systems, and cladding systems.
- General: Fit out and Finishes used, High rise Services 1: Energy, Communication, Hydraulics and High rise Services 2: Mechanical, Fire Protection, Vertical Transportation

BLDG 1022 Construction Site Safety (WSTC)

Credit Points 10

Description This subject describes the context of safety management within the Australian construction industry. Covering a range of topics, the subject addresses the sector's historically subpar performance in Workplace Health and Safety (WHS) while exploring avenues for improvement. The subject extends beyond basic hazard identification and risk management to encompass an in-depth look at workplace safety responsibilities, causes of accidents, WHS legal frameworks, and individual accountability. It also covers the specific hazards and controls related to WHS, techniques for thorough accident investigation, and the economic and ethical considerations affecting construction safety. Finally, the subject outlines effective principles and strategies for promoting a culture of safety within the industry.

School Eng, Design & Built Env

Student Contribution Band

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Restrictions

Students must be enrolled in an existing Destination College Diploma program listed below:

- 7188 Diploma in Culture, Society and Justice
- 7189 Diploma in Health Science
- 7190 Diploma in Business
- 7191 Diploma in Information and Communication Technologies
- 7192 Diploma in Building Design and Construction
- 7193 Diploma in Engineering Studies
- 7194 Diploma in Creative Industries and Communications
- 7195 Diploma in Arts
- 7196 Diploma in Science
- 7197 Diploma in Education Studies

Learning Outcomes

1. Understand and articulate the importance or Workplace Health and Safety (WHS) within the Australian construction industry.
2. Recognise the legal and ethical responsibilities related to WHS in construction, including regulatory frameworks.
3. Examine the economic implications and root causes of workplace injuries and accidents in the construction sector.
4. Perform comprehensive risk assessment and implement effective WHS management strategies in construction projects.

5. Utilise WHS theories and principles to systematically develop and assess safety interventions and strategies in construction.

Subject Content

- Workplace Safety responsibilities and WHS legal framework
- Causes of accidents, WHS hazards and controls, and safe design
- Risk management and accident investigation
- Economics and ethics of construction safety and promoting safety: principles and strategies.

BLDG 2001 Building Estimates and Tendering

Credit Points 10

Legacy Code 301207

Coordinator Sepani Senaratne (https://directory.westernsydney.edu.au/search/name/Sepani Senaratne/)

Description This subject will provide students with an understanding of the principles of design economics and the factors that affect the cost of buildings. Students will learn cost planning process and will be introduced to a range of estimating techniques that could be used at various stages of a building project. A particular focus would be to understand the tendering process and how to prepare detailed estimates using unit rate method.

School Eng, Design & Built Env

Discipline Building Surveying

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Equivalent Subjects BLDG 2010 - Estimating 1

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss various factors that affect building costs and estimating accuracy.
2. Prepare preliminary estimates at early stages of a building project
3. Evaluate elemental cost plans and approximate quantities.
4. Prepare detailed building estimates for tender submission using pricing principles.
5. Use standard computer programs for estimating.

Subject Content

Factors affecting building costs and estimating accuracy.
Cost planning process
Preliminary estimating techniques
Elemental cost planning
Approximate quantities and Detailed Estimates
From an estimate to tender
Tendering process
Pricing principles: all-in rates, unit rate pricing and pricing preliminaries

Computer estimating software

Assessment

BLDG 2002 Building Measurement

Credit Points 10

Legacy Code 301208

Coordinator Krisanthi Seneviratne (https://directory.westernsydney.edu.au/search/name/Krisanthi Seneviratne/)

Description This subject is designed to develop the techniques required to measure, quantify and prepare bills of quantities for residential construction using standard method of building measurements. It will help students to appreciate basic role of a quantity surveyor.

School Eng, Design & Built Env

Discipline Construction Engineering

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Equivalent Subjects GEOM 2001 - Quantity Surveying 1

Assumed Knowledge

Building construction including residential, light industrial and small commercial.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the role of a quantity surveyor and the bills of quantities
2. Recognise the use of the ASMM in measuring and preparing Bills of Quantities.
3. Measure quantities of simple structures in accordance with the Australian Standard Method of Measurement of Building works (ASMM).
4. Utilise commercially available software for the production of Bills of Quantities.

Subject Content

1. Role of a Quantity Surveyor
2. Use the ASMM to prepre Bills of Quantities
3. Introduction to the Australian Standard Method of Measurement of Building Works (ASMM)
4. Measurement of common building trades such as groundworks, concrete, formwork, reinforcement, finishes, masonry and woodwork.
5. Preparation of bills of quantities for simple structures

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	30 minutes	20	N	Individual
Professional Task	Approximately 7 pages	40	N	Individual
Final Exam	2 hours	40	N	Individual

BLDG 2003 Building Regulations Studies

Credit Points 10

Legacy Code 300885

Coordinator Payam Rahnamayiezekavat (https://directory.westernsydney.edu.au/search/name/Payam Rahnamayiezekavat/)

Description This subject develops an awareness of the regulations used to control risk in buildings. Major sources of risk, such as fire and public health, are identified and controlled. Building regulations of high risk regions, such as cyclonic, seismic and bushfire-prone areas, are also discussed. The subject emphasises the safety of vulnerable occupants, such as young children, disabled people and the elderly. The subject also explores recent developments in the National Construction Code (NCC: formerly BCA) concerning energy efficiency.

BLDG 2004 Built Heritage

Credit Points 10

Legacy Code 301085

Coordinator Mary Hardie (https://directory.westernsydney.edu.au/search/name/Mary Hardie/)

Description This subject explores the history of building design in Australia and applies this contextual knowledge to the design of additions to existing buildings, as well as, to infill development in heritage areas. Built form, scale, materials, finishes and streetscape are considered so that new structures complement rather than detract from existing heritage buildings. The appropriateness of preservation, restoration, renovation, retrofit and adaptation strategies for older buildings is examined in the context of market and regulatory constraints on built heritage.

School Eng, Design & Built Env

Discipline Building

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the features of the historic styles that have characterised building in Australia over the last 250 years
2. Identify the problems most commonly encountered when working on design in heritage buildings or heritage precincts
3. Prioritise the preservation of essential elements of heritage structures
4. Construct an argument for emphasising the difference between old and new work rather than imitating historical styles
5. Apply knowledge of heritage practice in the design of an appropriate major addition to a heritage structure

Subject Content

Historic building styles
Heritage preservation
Additions and alterations to heritage buildings
Infill development in heritage areas

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify key project parties, their role and project life cycle, key procurement approaches and payment contracts
2. Recognise the principles of contract law, standard forms of construction contracts and key contract documents
3. Appraise construction bonds and insurances
4. Review progress claims and contractual procedure
5. Appraise subcontract arrangements

Subject Content

1. Construction project parties and project life cycle
2. Key procurement approaches and types of payment contracts
3. Standard forms of construction contracts, AS4000 – 1997 and Contract Documents
4. Construction bonds and insurances
5. Key content of a progress claim and progress claim procedure

6. Introduction to variations and loss and expense claims.
7. Subcontract arrangements and contractual procedure

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	30 minutes	20	N	Individual
Case Study	2,500 words	40	N	Individual
Report	2,500 words	40	N	Individual

Type	Length	Percent	Threshold	Individual/ Group Task
Proposal	1000 words	20	N	Individual
Presentations	15minutes (each)	20	N	Individual
Report	3000 words plus an agreed deliverable	30	N	Individual
Applied Project	2 pages	30	N	Individual

BLDG 2014 Work-Integrated Learning in Sustainable Construction

Credit Points 10

Legacy Code 301429

Coordinator Keivan Bamdad Masouleh (https://directory.westernsydney.edu.au/search/name/Keivan Bamdad Masouleh/)

Description In this subject, students will engage in project-based learning related to Sustainable Construction to practice sustainable approaches in real construction projects. Students will select a project with an agreed industry partner, which will involve sustainable construction practices, for example: sustainability assessments, managing green building projects, carbon emission assessments, cost-benefit analysis and the circular economy. This subject contributes towards the skills required for a work-ready graduate and allows the student to plan, undertake and report on a specific aspect of practice in the context of work.

School Eng, Design & Built Env

Discipline Building Construction Management

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Restrictions

Students must be enrolled in 3782 Bachelor of Construction Management Advanced (Honours) AND have applied and selected by a partner organisation before enrolling in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Manage various aspects of a project related to Sustainable Construction, including planning and implementation, to produce agreed deliverables that align with feedback
2. Conduct research on the theoretical basis on the selected sustainable construction project demonstrating ethical, digital and information literacy
3. Reflect on the learning and professional development achievements related to the selected sustainable construction project
4. Apply communication and collaboration skills through the selected sustainable construction project and the workplace
5. Integrate appropriate sustainability principles skills into the construction management context

Subject Content

Students will learn any of the following sustainable construction practices along with relevant theoretical knowledge through research:
-sustainability assessments,
-managing green building projects,
-carbon emission assessments,
-cost-benefit analysis,
-circular economy.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

BLDG 2015 Leading Teams in Construction

Credit Points 10

Coordinator Robert Osei-Kyei (https://directory.westernsydney.edu.au/search/name/Robert Osei-Kyei/)

Description This subject provides students with the fundamental knowledge for project leadership and team management. Through the application of their developing skill sets to real-world, industry based scenarios, students will develop their capabilities for managing different teams and stakeholders in construction projects to achieve positive project outcomes. Students will explore complex construction project environments and recognise the role of emotional intelligence and project leadership in successful construction project delivery across a diverse range of career paths in the construction and building industries.

School Eng, Design & Built Env

Discipline Building Construction Management

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Learning Outcomes

1. Apply theoretical understanding of different project management leadership styles in different project contexts
2. Appraise emotional intelligence and construction workers behaviours and motivations and evaluate their impact on project management leadership styles
3. Implement approach for creating effective teamwork and stakeholder collaboration in project environments

4. Communicate effectively as a project leader in a diverse team and project contexts

Subject Content

1. Understanding project management leadership styles and models
2. Leadership competencies models
3. Role of Emotional intelligence in project management leadership
4. Principles of organizational culture and their influence and relations to project leadership
5. Construction workers behaviours and motivation in different project contexts
6. Change management in organization
7. Understanding project teams and their roles
8. Managing project stakeholders
9. Communication in different project contexts

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Case Study	1500 words	25	N	Individual
Professional Task	600 words (per student) 3000 words (per group of 5) and 5 minutes (per student) 25 minutes (per group of 5)	45	N	Group
Reflection	1500 words	30	N	Individual

BLDG 3001 Building Design Process

Credit Points 10

Legacy Code 301087

Coordinator Marini Samaratunga (https://directory.westernsydney.edu.au/search/name/Marini Samaratunga/)

Description Building design is an iterative process. In this subject students will gain experience in generating design proposals and responding to simulated client and stakeholder feedback. Holistic designsolutions that address economic, environmental and social issues (triple bottom line assessment) will be generated for realistic building projects.

School Eng, Design & Built Env

Discipline Building

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) BLDG 3007

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Respond to a design brief for a building project in western Sydney with a series of potential building design solutions.
2. Evaluate the appropriateness of several different solutions to the building design problem especially relating to current building regulations.
3. Recommend a particular preferred solution arguing its benefits in terms of cost, quality and safety.
4. Reflect on feedback relating to the proposed design and make suitable changes in response.
5. Illustrate the building design through a fully rendered 3D CAD model.

Subject Content

1. Mixed commercial building project design
2. National Construction Code (NCC) compliance
3. Design solution evaluation with respect to Australian Standards and Planning regulations
4. Iterative response to stakeholder feedback

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Applied Project	3D CAD model	30	N	Individual
Report	1,500 words	20	N	Individual
Applied Project	3D CAD model and 2D drawings	50	N	Individual

BLDG 3004 Construction Information Systems

Credit Points 10

Legacy Code 200503

Coordinator Samudaya Nanayakkarawasam (https://directory.westernsydney.edu.au/search/name/Samudaya Nanayakkarawasam/)

Description This subject is designed to provide skills and knowledge for information management technology and practice as it relates to the building industry. The subject gives and overview of information management, data collection and storage, information classification systems, communications, specialist computer applications and artificial intelligence.

School Eng, Design & Built Env

Discipline Building Construction Management

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Assumed Knowledge

Students must be familiar with spreadsheet and database software. Students should also have a basic understanding of contract administration.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss information management requirements in general and specifically as they relate to the building industry.
2. Explain the essential components of an integrated information management system for all stages of building procurement.
3. Discuss technology advances in hardware and software in information management including data collection, storage, retrieval, analysis and communication.

4. Demonstrate the ability to effectively use spreadsheet and database management software for complex building related applications.
5. Discuss specialist computer applications for building including expert systems.
6. Develop computer applications using spreadsheet and database software, for project management processes

Subject Content

- introduction to information management
- information characteristics
- information systems
- information management in The Building industry
- Classification systems and integration between different Building procurement phases
- data collection from construction site
- data storage systems
- data analysis and Reporting in construction
- advanced Technology - Hardware for construction industry
- advanced Technology - software used in construction industry
- communication Technology used in construction industry
- expert systems used in construction industry such as NATHERS, FIRECAL, BCAIDER
- future directions in Building information systems

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Report	2000 words	25	N	Individual
Applied Project	Develop a spreadsheet-based construction information system incorporating three project-related datasets	25	N	Individual
Report	2000 words	20	N	Individual
Applied Project	Develop an integrated information system utilising at least three software applications and incorporating a minimum of three project-related datasets.	30	N	Individual

Prescribed Texts

- Suitable computer equipment and software (Excel, Access, Buildsoft, MS Project, and Archi CAD). Software is available at the Blacktown Campus computer labs. Students can purchase their own software and practice outside the class time.
- Lecture and Tutorial Notes are updated every year and posted on the elearning site.
- A Book of reading will be provided via vUWS;

Coordinator Don Mason (https://directory.westernsydney.edu.au/search/name/Don Mason/)

Student Contribution Band

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Assumed Knowledge

Local Government planning requirements, residential construction details, quantity surveying, contract documentation, site planning.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Report	Five fortnightly group meetings of twenty minutes duration as scheduled - group	30	N	Group
Applied Project	2000 word report	20	N	Individual
Applied Project	Written and graphics - full project documentation with specified individual contributions	30	N	Individual

Final project presentation (seminar style)	30 min group presentation, individually marked	20	N	Individual

BLDG 3007 Design Brief Formulation

Credit Points 10

Legacy Code 301086

Coordinator Marini Samaratunga (https://directory.westernsydney.edu.au/search/name/Marini Samaratunga/)

Description This subject explores the process of formulating the quantitative and qualitative requirements for a complex construction project. Students will analyse and evaluate competing parameters for a specific building project which contains residential, commercial and community facilities.

School Eng, Design & Built Env

Discipline Building Construction Economics

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) ARCH 1001 OR
ARCH 1004 OR
ARCH 1004

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Recognise the importance of a multi-factorial approach to design decision making in the construction industry
2. Review and evaluate the economic, environmental and social impacts of major building proposals
3. Identify potential areas of conflict between developer and community interests
4. Prioritise competing parameters in the establishment of a complex building project
5. Integrate knowledge of economic, environmental, regulatory and social constraints in the preparation of the brief for a major construction project

Subject Content

Design problem description
Constraint identification
Formulating the project budget
Identifying wants versus needs
Risks and benefits of the proposal
Triple bottom line assessment of building projects

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	30 minutes	20	N	Individual
Report	1000 words and 5 minute presentation	30	N	Individual
Applied Project	2500 words	50	N	Individual

BLDG 3008 Negotiation in the Built Environment

Credit Points 10

Legacy Code 301105

Coordinator Anthony Butera (https://directory.westernsydney.edu.au/search/name/Anthony Butera/)

Description Construction and Property development is the most complex activity in the Australian economy. There are many professional groups involved in the sector. This subject will train students in the negotiation skills required to successfully complete projects from the perspective of a construction manager, building surveyor, planner, civil engineer, construction lawyer and property developer.

School Eng, Design & Built Env

Discipline Building, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Equivalent Subjects BLDG 2009 - Decision Making for Construction Professionals

Learning Outcomes

On successful completion of this subject, students should be able to:

1. appreciate the importance of negotiation in the built environment
2. identify common problems that frustrate a successful negotiation outcome
3. explore the common negotiation styles of stakeholders
4. investigate the alternatives to direct negotiation
5. understand the deficiencies of distributive bargaining; eg. "Split-the-difference"
6. apply integrative negotiation strategies

Subject Content

1. The value of negotiation

2. Negotiation flaws
3. Negotiation styles
4. Mediation
5. Distributive agreements
6. Integrative agreements

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Reflection	1,000 words	15	N	Individual
Case Study	1,500 words	20	N	Individual
Presentation	16 minutes	25	N	Group
Report	3,000 words	40	N	Individual

Prescribed Texts

- Fisher, R, Ury, W & Patton, B 2012, Getting to Yes; Negotiating an agreement without giving in, 3rd edn, Arrow Business Books, London.
- Voss, C & Raz T 2016, Never Split the Difference: Negotiating as if Your Life Depended on it, Harper Business, New York.

BLDG 3009 Quality and Value Management

Credit Points 10

Legacy Code 300748

Coordinator Ali Al-Ashwal (https://directory.westernsydney.edu.au/search/name/Ali Al-Ashwal/)

Description Introduces students to the concepts of quality systems value management techniques and their application to the built environment. Students will gain knowledge of quality assurance and value management theories, techniques and principles so that they can apply as they enter into their professional careers.

School Eng, Design & Built Env

Discipline Construction Engineering

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Equivalent Subjects LGYA 4735 - Quality and Value Management

Learning Outcomes

On successful completion of this subject, students should be able to:

1. apply value management and life cycle costing techniques in construction projects.
2. write a Quality Manual and Plan for the company and project.
3. apply statistical quality control techniques for analysis of data gathered on quality characteristics from medium to large complex building projects

Subject Content

- introduction to value management, value Engineering and value management procedures.
- function analysis.
- introduction to The meaning and evolution of quality in construction.
- quality procedures used in construction.
- quality systems related to construction including Australian and international standards.
- quality tools including cause and effect diagrams, flow charts, check sheets and Pareto diagrams.
- statistical quality control in construction.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

BLDG 3010 Building Cost Studies

Credit Points 10

Legacy Code 301234

Coordinator Jun Wang (https://directory.westernsydney.edu.au/search/name/Jun Wang/)

Description This Subject provides students with advanced quantity surveying techniques for the evaluation of construction costs in the construction management and built environment context. Students learn to perform various cost studies, consider sustainability issues and make whole life cost choices that contribute to cost effective construction projects. The tools and techniques students learn are essential in dealing with increasing complexity in the industry.

School Eng, Design & Built Env

Discipline Building Construction Economics

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Assumed Knowledge

Building construction including residential, light industrial and small commercial, basic building measurement and estimating.

Learning Outcomes

1. Evaluate cost management and control process
2. Examine various cost modelling techniques
3. Analyse cost information and perform cost analysis
4. Analyse feasibility of project
5. Make informed decisions based on whole-life cost and sustainable considerations

Subject Content

1. Overview of cost management and control process
2. Feasibility studies
3. Cost benefit analysis
4. Cost modelling
5. Cost information and cost analysis
6. Whole-life costing
7. Economics of sustainability

Assessment

BLDG 3011 Construction Business Management

Credit Points 10

Legacy Code 301427

Coordinator Matt Stevens (https://directory.westernsydney.edu.au/search/name/Matt Stevens/)

Description This subject is centred around the dynamics of managing a construction contracting enterprise. Student groups act as a Board of Directors to plan, communicate, execute, and adjust strategy as they pursue to optimise their firm's outcomes in an online competitive game. Knowledge areas of staffing, finance, labour management, risk management and tendering are challenged. Each week, student groups are scored objectively and given feedback. This shows the team the strengths and weaknesses of the prior week's decision making. Academic staff will work with each student group to refine and improve understanding of the complex dynamics involved. Assessments will be based on decision-making improvement and mastery of strategic and operational principles.

School Eng, Design & Built Env

Discipline Building Construction Management

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions Students must have passed 80 credit points to enrol in this subject.

Assumed Knowledge

Basic knowledge of the building construction industry and management principles.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the strategic and operational issues of a construction enterprise
2. Apply iterative problem solving approach to optimise the firmðfs outcomes
3. Apply principles of effective management to a construction firm
4. Analyse situational factors

5. Evaluate strategic and operational results
6. Create a competitive strategic and operational plan

Subject Content

Strategic planning
Operational planning
Human resource management
Tendering and procurement
Marketing
Financial strategies

Discipline Building Construction Management

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Students must be enrolled in 3782 Bachelor of Construction Management Advanced (Honours) AND have applied and selected by a partner organisation before enrolling in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Manage various aspects of a project related to Global Construction, including planning and implementation, to produce agreed deliverables that align with feedback
2. Conduct research on the theoretical basis on the selected global construction project demonstrating ethical, digital and information literacy
3. Reflect on the learning and professional development achievements related to the selected global construction project
4. Apply communication and collaboration skills through the selected global construction project and the workplace
5. Analyse specific knowledge and skills for work/projects in complex, mega, global construction or management contexts

Subject Content

Students will learn construction and management of mega projects/ global projects/ complex projects and the like along with relevant theoretical knowledge through research. Topics may include:
-Productivity
-Product compliance and quality assurance
-Modern construction methods
-Stakeholder management and communication

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

BLDG 3014 Introduction to Building Fire Safety

Credit Points 10

Coordinator Md Kamrul Hassan (https://directory.westernsydney.edu.au/search/name/Md Kamrul Hassan/)

Description This subject provides the foundations in fire safety engineering principles and the techniques and tools used in building fire safety design. Students learn the key principles of fire and heat transfer, building material and cladding systems' behaviours in fire, fire testing methods, fire-damage assessment methods, and concepts of performance-based building fire safety design. Using examples of fire engineering briefs and reports, students expand their knowledge and skills in real-world contexts. It also builds the skills required for a work-ready graduate and allows the student to plan, undertake and report on a specific aspect of practice in the context of their work.

Level Undergraduate Level 3 subject

Assumed Knowledge

Basic mathematics and Physics as taught at HSC level is required.

Learning Outcomes

1. Demonstrate understanding of the basic principles of fire dynamics and fire safety design in building.
2. Analyse fire properties of building materials.
3. Apply regulations, standards and fire safety principles to different building structures and materials.
4. Assess active and passive fire protection systems to reduce fire hazards in a building.
5. Interpret fire engineering briefs and reports.

Subject Content

- Fire safety for buildings
- Fires and heat
- Heat transfer to the structure
- Structural fire design principles
- Fire behaviour of building materials
- Cladding of multi-storey buildings in fire
- Fire testing methods and standards
- Assessment of fire-damaged building
- Passive fire protection systems
- Active fire protection systems
- Fire systems design for extinguishers, hose reels and hydrants
- Fire engineering brief and report

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	3 x Online Quizzes, 30 minutes (per Quiz)	30	N	Individual
Case Study	1500 words equivalent	30	N	Individual
Report	3000 words equivalent	40	N	Group

Teaching Periods

BLDG 3015 Contract Management

Credit Points 10

Coordinator Wenchi Shou (https://directory.westernsydney.edu.au/search/name/Wenchi Shou/)

Description This subject provides students with the knowledge and skills to manage building contracts, expanding on knowledge gained in the first year core subject Contract Administration. Students learn the professional practice skills for quantity surveying and contract administration services during construction. Knowledge gained in this subject will benefit students aspiring to careers such as Contract Managers and Quantity Surveyors.

School Eng, Design & Built Env

Discipline Building Construction Management

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Incompatible Subjects GEOM 2002 Quantity Surveying 2

Restrictions

Must be enrolled in the following construction programs:

6031 Diploma in Building Design Management/Bachelor of Building Design Management

6032 Diploma in Construction Technology/ Bachelor of Construction Technology

6045 Diploma in Construction Technology/ Bachelor of Construction Technology

3727 Bachelor of Building Design Management

3692 Bachelor of Construction Technology

3762 Bachelor of Construction Management (Honours)

Assumed Knowledge

Basic knowledge of contract administration and the related concepts

Learning Outcomes

1. Analyse different standard forms of contracts and documents and the role of digital procurement
2. Prepare progress valuations and cost reports for a construction project
3. Prepare cash flow forecasts for a construction project
4. Evaluate contractual claims and its management process in real project scenarios
5. Present findings and recommendations in a clear, structured and professional manner
6. Work independently and collaboratively in an ethical and responsible manner with awareness of diversity

Subject Content

- Standard forms of contracts
- Digital procurement
- Progress valuation and cost reporting
- Valuation of change orders
- Cash flow forecast and financial statements
- Extension of time claims
- Loss and expenses claims

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	30 minutes	20	N	Individual
Report	2000 words	40	N	Individual

BLDG 3016 Work-Integrated Learning in Advanced Digital Construction

Credit Points 20

Coordinator Wei Zhou (https://directory.westernsydney.edu.au/search/name/Wei Zhou/)

Description As increased digitalisation drives the construction industry, this unit engages students in industry project-based learning related to Advanced Digital Construction. Students will select a project with an agreed industry partner, which involves or anticipates involvement in any of the following advanced digital construction applications: BIM, e-procurement and tendering, smart contracts, robotics, drones, artificial intelligence, virtual reality, IoT, additive manufacturing (3D) and digital twins. This subject contributes towards the skills required for a work-ready graduate and allows the student to plan, undertake and report on a specific aspect of practice in the context of work.

School Eng, Design & Built Env

Discipline Building Construction Management

Student Contribution Band HECS Band 2 20cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Students must be enrolled in 3782 Bachelor of Construction Management Advanced (Honours) AND have applied and selected by a partner organisation before enrolling in this subject.

Learning Outcomes

1. Manage various aspects of a project related to Advanced Digital Construction, including planning and implementation, to produce agreed deliverables that align with feedback
2. Conduct research on the theoretical basis of the selected advanced digital construction project demonstrating ethical, digital and information literacy
3. Reflect on the learning and professional development achievements related to the selected advanced digital construction project
4. Apply communication and collaboration skills through the selected advanced digital construction project and the workplace

5. Demonstrate application of advanced technical and digital tools for project management
6. Adapt to change, uncertainty and challenges with innovative and justifiable solutions for the industry

Subject Content

Students will learn how to manage a project on any of the following advanced digital construction practices, along with relevant theoretical knowledge through research:

- BIM,
- e-procurement/ tendering,
- smart contracts,
- robotics,
- drones,
- artificial intelligence,
- virtual reality,
- IoT,
- 3D printing,
- digital twins.

Work integrated learning

In the WIL Subjects in the 3782 course, each student has an academic supervisor and an industry supervisor to undertake a negotiated WIL activity that aligns with the given WIL theme within a workplace. Students will be recruited by agreed industry partners to their organisation through a selection process after their first year to undertake these WIL units with an agreement to co-design and co-deliver the units with quality assurance in place.

Special Requirements

Essential equipment

Students are required to meet the WHS requirements of the worksite

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Proposal	1000 words	20	N	Individual
Presentation	15minutes (each)	20	N	Individual
Report	3000 words plus an agreed deliverable	30	N	Individual
Applied Project	2 pages	30	N	Individual

BLDG 3017 Building Certification Ethics

Credit Points 10

Coordinator Payam Rahnamayiezekavat (https://directory.westernsydney.edu.au/search/name/Payam Rahnamayiezekavat/)

Description The subject provides an overview of the ideal ethical standards for construction services incorporating the concept of trustworthiness as the only reliable indicator of ethical building and design practices. The concept of an ethical construction industry that causes no harm to end-user, client, the public or environment is explained. Students explore ethical challenges in the quality assurance mechanisms for building materials and components and reflect on their professional practice that contributes to the protection of end-users through trustworthy buildings.

School Eng, Design & Built Env

Discipline Building Construction Management

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Only students enrolled in an undergraduate construction management course can enrol in this subject.

Assumed Knowledge

Building design processes and construction methods

Learning Outcomes

1. Formulate an ethical paradigm to fulfil regulatory obligations as a certifier
2. Develop solutions to defend conduct as a building assurance practitioner
3. Manage professional relationships with other stakeholders to assure trustworthy building
4. Facilitate resolution of non-compliance incidents in an efficient way
5. Reflect on existing material certification schemes and construction Standards
6. Lead others in demonstrating ethical conduct in accordance with reasonable industry norms expected in design and construction

Subject Content

1. Understanding ethics
2. Construction ethics
3. Certification and assurance services
4. Notion of trustworthy buildings
5. Ethical traps in certification works
6. Professional code of conduct
7. Legal framework enforcing ethical practices
8. Material certification
9. Building Standards and manuals
10. Dispute avoidance and resolution
11. Legal case study
12. Technology and enhanced certification

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Essay	2000 words	30	N	Group
Poster	Equivalent to 1500 words	20	N	Group
Report	3000 words	40	N	Group
Reflection	500 words	10	N	Group

BLDG 4001 Building Design Project 1

Credit Points 20

Legacy Code 301099

Coordinator Don Mason (https://directory.westernsydney.edu.au/search/name/Don Mason/)

Description In this subject students will source a suitable design project to complete as a capstone work which illustrates the skills they have developed throughout their study program. The project will contain a level of complexity exceeding that of previous building designs produced in the program. Diverse stakeholder input on the projects impact will be gathered and assessed.

School Eng, Design & Built Env

Discipline Construction Engineering

Student Contribution Band HECS Band 2 20cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 4 subject

Pre-requisite(s) BLDG 3001

Incompatible Subjects CIVL 4018 Building Design Project 1 (Honours)

Restrictions

Students must be enrolled in Bachelor of Building Design Management or Diploma in Building Design Management/Bachelor of Building Design Management. Students must have successfully completed 220 credit points.

Assumed Knowledge

Students should be familiar with the content from the first three years of the Building Design Management degree, including expertise in CAD, iterative design process and construction technology.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Generate a design brief for a building project with sufficient detail to make a preliminary judgement on project feasibility
2. Construct a performance specification for a building design based on careful analysis of site conditions
3. Provide justification for particular design decisions which would result in making appropriate design choices
4. Reflect on feedback relating to the proposed sketch design and make responsive changes on the issues raised
5. Illustrate the building design through a fully rendered 3D CAD model

Subject Content

Planning approval requirements
Complex and high-rise building projects
Buildings incorporating multiple usages

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Report	1500 words	20	N	Individual
Applied Project	3D CAD model and 500 word explanation	30	N	Individual
Applied Project	3D CAD model and 2D drawings	50	N	Individual

Incompatible Subjects CIVL 4019 Building Project 2 (Honours)

Restrictions

Students must be enrolled in Bachelor of Building Design Management or Diploma in Building Design Management/Bachelor of Building Design Management.

Assumed Knowledge

Students should be familiar with the content from the first three years of the Building Design Management degree, including expertise in CAD, iterative design process and construction technology.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Recommend the appropriate construction systems for the building project.
2. Specify materials, finishes and performance standards expected in the completed building.
3. Resolve the details of footings/floor/wall and floor/roof junctions and illustrate these with detailed drawings.
4. Construct a fully detailed 3D CAD model with sufficient information for accurate pricing and technical assessment.
5. Present design management choices in 2D views drawn from a 3D CAD model.

Subject Content

Construction Certificate approval
Complex and high-rise development
Services integration

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Level Undergraduate Level 4 subject

Co-requisite(s) BLDG 4012 Industry Based Learning for students in 2607 Bachelor of Construction Management

Assumed Knowledge

Building construction including residential, light industrial and small commercial as covered in the subjects Building 1 and Building 2 and building measurement as covered in quantity surveying 1 and Estimating as covered in Estimating 1.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Contextualise the role of the Australian construction industry in the local and international economy
2. Explain the supply and demand of goods and services in the general economy and in the context of the Australian construction industry
3. Discuss the relationship between prices and output in a general economic system
4. Summarise the national economic policy including fiscal and monetary policy
5. Develop a business plan for an Australian construction firm
6. Examine the effect of globalisation on the local economy

7. Explain competencies required for successful business development using theories and principles of economics

Subject Content

Construction economics
Construction Project finance
Fiscal policy. Monetary policy
The supply and demand for goods and services
The Structure of the Construction Industry
Economic Policies and the Building Industry
Business Planning for construction firms
Prices and output
National economic policy
International economics
Globalisation
Current economic issues and future directions

Level Undergraduate Level 4 subject

Pre-requisite(s) Successful completion of 200 credit points for students in 2607 Bachelor of Construction Management and 3697 Bachelor of Construction Management Studies (exit only) Successful completion of 130 credit points for students enrolled in Bachelor of Construction Management StudiesBachelor of Laws

Equivalent Subjects LGYB 5398 - Major Project 1

Restrictions Successful completion of 200 credit points.

Assumed Knowledge

This is a research subject designed to be taken during the final year of the Bachelor of Construction Management standard program. Students should have a comprehensive knowledge of problem solving research in the construction industry.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Justify the role of research and strategic planning in the construction industry.
2. Plan and implement a practical research project in construction.
3. Critically analyse the existing body of knowledge in a defined area of this discipline.
4. Communicate their research ideas and plans through written forms of presentation.

Subject Content

Specific content will vary depending on the nature of the project and the research methodology adopted. However, some generic content may include:
- research topic selection and definition,
- literature review,
- critique,
- summarising,
- research methodology,
- research planning,
- research and analytical techniques, and
- technical/professional writing.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Proposal	1 page	15	N	Individual
Report	1,000 words	25	N	Individual
Report	5,000 words	60	N	Individual

BLDG 4006 Modern Construction Enterprises

Credit Points 10

Legacy Code 301158

Coordinator Samudaya Nanayakkarawasam (https://directory.westernsydney.edu.au/search/name/Samudaya Nanayakkarawasam/)

Description In this subject the pace of change in the construction industry will be addressed. Particular emphasis is placed on the ways in which construction businesses need to adapt their practices to deal with increased digitisation, industrialisation and globalisation. The impact of disruptive innovation on 'back of house' operations in construction enterprises will be studied and trends identified.

School Eng, Design & Built Env

Discipline Building Construction Economics

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 4 subject

Assumed Knowledge

An understanding of the construction industry context and familiarity with organisational structures common in construction businesses.

Learning Outcomes

On successful completion of this subject, students should be able to:
1. Analyse the opportunities presented by the changing global environment in construction
2. Compare and contrast the trajectories of attempts at innovation in the construction industry
3. Predict major trends in construction modernisation
4. Hypothesise on the factors that contribute to successful modern construction enterprises
5. Make an original case for the adoption of changes to the way construction businesses are structured
6. Re-imagine construction enterprise models for the Indo-Pacific region
7. Analyse the opportunities presented by the changing global environment in construction
8. Predict major trends in construction modernisation
9. Hypothesise on the factors that contribute to successful modern construction enterprises
10. Make an original case for the adoption of changes to the way construction businesses are structured
11. Re-imagine construction enterprise models for the Indo-Pacific region

Subject Content

1. Increasing digitisation of construction industry processes
2. Industrialisation of construction methodology and culture
3. Off-site and off-shore production
4. Globalisation in construction
5. Implications of Free Trade Agreements for construction productivity
6. Insurance and risk in a global market
7. Construction enterprises and entrepreneurship
8. Impact of the collaborative economy

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	60 minutes	30	N	Individual
Presentation	15 mins	20	N	Individual

BLDG 4007 Modern Construction Projects

Credit Points 10

Legacy Code 301159

Coordinator Matt Stevens (https://directory.westernsydney.edu.au/search/name/Matt Stevens/)

Description In this unit, accelerating changes in the way construction projects are procured and delivered will be studied. Innovations relating to pre-site construction and to productivity measurement will be evaluated. Quality assurance and risk management will be considered in the light of new project delivery systems. Ways to improve end user satisfaction with construction project delivery will be addressed.

School Eng, Design & Built Env

Discipline Construction Engineering

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 4 subject

Assumed Knowledge

An understanding of standard building processes and familiarity with how they impact on project delivery.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the available indices that are used to measure construction productivity
2. Construct a case for improving project efficiency by means of industrialising construction projects
3. Examine ways to address quality assurance in a globalised construction market
4. Review the impact of the need for buildings to be adaptable over their useful lifetime
5. Theorise about the way to ensure that end users receive economic, environmental and social value from their buildings

Subject Content

Measuring construction productivity
Pre-construction effectiveness indicators
Fabrication versus assembly
Quality assurance in globalised construction
Evidence-based decision making
Durability, adaptability and sustainability
Maintaining public confidence in construction project delivery

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

BLDG 4008 Digital Construction

Credit Points 10

Legacy Code 301225

Coordinator Srinath Perera (https://directory.westernsydney.edu.au/search/name/Srinath Perera/)

Description This subject offers knowledge and skills essential for a successful application of Building Information Modelling (BIM) in the context of built environment. Building Information Modelling (BIM) has the potential to improve integration between design and construction processes, reduce design discrepancies and rework, optimise project time and cost performance, and manage risks. Students will develop an understanding of the generation, reviewing and application of 3D, 4D and 5D BIM models in building projects. Virtual and augmented reality, spatial information capture and performance management systems will also be introduced. This subject will be taught through intensive practice-based workshops and computing labs, enabling students to build skills in virtual design and construction processes.

School Eng, Design & Built Env

Discipline Building Science and Technology

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 4 subject

Assumed Knowledge

Building construction including residential, light industrial and small commercial, basic building measurement and estimating.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply the principles and application of various digital technologies in the context of built environment
2. Apply knowledge in the review and development of 3D BIM models for design, fabrication and construction
3. Interpret digital documentation used within development approvals and building certification, tendering and construction
4. Apply BIM technologies to effectively manage the interface between design and construction processes, cost estimating, scheduling and control of construction projects

Subject Content

1. Overview of information technology in the built environment
2. Create 3D BIM models
3. Construction scheduling using BIM
4. Cost estimating using BIM
5. Design coordination using BIM
6. Introduction to other digital technologies
7. Digital document management

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

BLDG 4010 Construction Research Methods

Credit Points 20

Legacy Code 301243

Coordinator Samudaya Nanayakkarawasam (https://directory.westernsydney.edu.au/search/name/Samudaya Nanayakkarawasam/)

Description This subject introduces students to various research methods that are applicable for research in the Built Environment and also guides students on how to carry out a literature review leading to identifying a clear research question. Students will be required to submit a research proposal for an identified research problem within a chosen research topic, under the supervision of an assigned research academic.

BLDG 4011 Construction Thesis

Credit Points 20

Legacy Code 301244

Coordinator Peng Zhang (https://directory.westernsydney.edu.au/search/name/Peng Zhang/)

Description In this subject, students continue their research based on the literature review and research design submitted as part of the Construction Research Methods, under the close guidance of the same research supervisor. The research will be extended using appropriate research methods to perform data collection, data analysis and research conclusions. The students will submit an original thesis report on a research endeavour (continued from the research report in subject Construction Research Methods). In addition to the specialist knowledge on the chosen research topic, students will learn a range of skills including academic writing, project management, critical thinking and analytical skills.

BLDG 4012 Industry Based Learning

Credit Points 0

Legacy Code 300724

Coordinator Mary Hardie (https://directory.westernsydney.edu.au/search/name/Mary Hardie/)

Description Students are required to undertake 1200 hours of industry based experience as required by course and professional accreditation bodies.

School Eng, Design & Built Env

Discipline Building Science and Technology

Student Contribution Band

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 4 subject

Equivalent Subjects LGYB 5394 - Industry Based Learning

Restrictions

Students must be enrolled in Bachelor of Construction Management, Bachelor of Construction Management Advanced (Honours), Bachelor of Building Design Management or Diploma in Building Design Management/Bachelor of Building Design Management.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Students will gain relevant industry experience in a range of categories in the building industry

Subject Content

1. Design: Design, drafting, documentation, specification writing and preparing tender packages
2. Construction: Working as builders labourers, tradesmen, foremen supervisors and quality controllers
3. Commercial Management: Contract administration, businesses administration, sales, marketing and cost control
4. Estimating: Quantity surveying, estimating, tendering, preparing quotations, feasibility studies and pricing variations.
5. Project Management: Construction planning, project management, property development, progress reporting and works scheduling
6. Building Materials: Sales, purchasing, stores and stock control
7. Miscellaneous related activities: Material testing, research local government building departments, tutoring, client or third party inspection and supervision

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

BLDG 4013 Work-Integrated Learning in Construction Leadership

Credit Points 10

Legacy Code 301433

Coordinator Linna Geng (https://directory.westernsydney.edu.au/search/name/Linna Geng/)

Description In this subject, students will engage in project-based learning related to Construction Leadership within an industry framework. Students will select a project with an agreed industry partner to develop any of the following managerial and leadership skills in construction settings: organisation management and applications, strategic management, change management, corporate social responsibility, human resource management, knowledge management and organisational resilience. This subject contributes towards the skills required for a work-ready graduate and allows the student to plan, undertake and report on a specific aspect of practice in the context of work.

School Eng, Design & Built Env

Discipline Building Construction Management

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 4 subject

Restrictions

Students must be enrolled in 3782 Bachelor of Construction Management Advanced (Honours) AND have applied and selected by a partner organisation before enrolling in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Manage various aspects of a project related to Construction Leadership, including planning and implementation, to produce agreed deliverables that align with feedback
2. Conduct research on the theoretical basis of the selected construction leadership project demonstrating ethical, digital and information literacy
3. Reflect on the learning and professional development achievements related to the selected construction leadership project
4. Apply communication and collaboration skills through the selected construction leadership project and the workplace
5. Adapt to change, uncertainty and challenges with innovative and justifiable solutions for the industry
6. Demonstrate leadership capability and professional development in carrying out the WIL based project

Subject Content

Students will learn any of the following construction leadership practices along with relevant theoretical knowledge through research:
-organisation management and applications,
-strategic management,
-change management,
-corporate social responsibility,
-human resource management,
-knowledge management,
-organisational resilience

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

BLDG 4014 Building Design Project 1 (Honours)

Credit Points 20

Coordinator Mary Hardie (https://directory.westernsydney.edu.au/search/name/Mary Hardie/)

Description This is a capstone subject, where students will source a suitable design project at their own initiative to illustrate the skills they have developed throughout their program. The project will contain a high level of complexity exceeding that of previous building designs produced in the program. Both the complexity level and the number of design constraints will distinguish this project from the ones undertaken in the non-honours stream subjects. Diverse stakeholder input on the project's impact will be gathered and assessed. The design solution generated will show mastery of resolving complex design problems which integrate technical knowledge with economic and social responsibility. These skills are highly sought after by employers in the building design industry.

School Eng, Design & Built Env

Discipline Building

Student Contribution Band HECS Band 2 20cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 4 subject

Pre-requisite(s) BLDG3001 - Building Design Process

Equivalent Subjects CIVL 4018

Incompatible Subjects BLDG4001 - Building Design Project 1 (non-honours stream)

Restrictions

Students must be enrolled in Bachelor of Building Design Management or Diploma in Building Design Management/Bachelor of Building Design Management. Students must have successfully completed 220

credit points and must have a GPA of 5 or higher and obtain permission from the subject coordinator.

Assumed Knowledge

Students should be familiar with the content from the first three years of the Building Design Management degree, including expertise in CAD, iterative design process and construction technology.

Learning Outcomes

1. Generate a design brief for a building project with sufficient detail to make a preliminary judgement on project feasibility.
2. Develop a performance specification for a building design to a professional standard based on careful analysis of site conditions.
3. Provide justification for particular design decisions, which would result in making appropriate design choices.
4. Reflect on feedback relating to the proposed sketch design and make responsive changes towards stakeholder conflict resolution.
5. Illustrate the building design through a fully rendered 3D CAD model to a professional standard and in a manner that can be clearly understood by members of the general public.
6. Argue persuasively for a design solution that you have generated.

Subject Content

Planning approval requirements
Complex and high-rise building projects
Buildings incorporating multiple usages
Design under constrained conditions
Multiple stakeholder interest groups
Conflict resolution

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Report	1500 words	20	N	Individual
Applied Project	3D CAD model and 500 word explanation	30	N	Individual
Applied Project	3D CAD model and 2D drawings	40	N	Individual
Reflection	1000 words	10	N	Individual

BLDG 4015 Building Design Project 2 (Honours)

Credit Points 20

Coordinator Mary Hardie (https://directory.westernsydney.edu.au/search/name/Mary Hardie/)

Description In this subject, students will continue to develop the design solution they created in Building Design Project 1 (Honours) into a fully resolved CAD model suitable for costing, scheduling and contracting. Students apply technical and critical thinking skills to address the project constraints, and present project documentation (site plans, floor plans, elevations, sections, details and specifications) of a quality suitable to apply for a Construction Certificate. Complex constraints relating to buildability and efficient project delivery will be resolved. Strict budgetary constraints will be imposed and students will be expected to demonstrate a capacity to use lateral thinking and generate creative solutions in response to problematic situations which arise during project delivery but which were unknown at project commencement. Knowledge gained in this subject will benefit students aspiring to roles in the integrated building design industry and the delivery of building design solutions.

Level Undergraduate Level 4 subject

Co-requisite(s) BLDG 4014 - Building Design Project 1 (Honours)
OR
CIVL 4018 - Building Design Project 1 (Honours)

Equivalent Subjects CIVL 4019

Incompatible Subjects BLDG4002 - Building Design Project 2 (non-honours stream)

Restrictions

Students must be enrolled in Bachelor of Building Design Management or Diploma in Building Design Management/Bachelor of Building Design Management. Students must have successfully completed 220 credit points and must have a GPA of 5 or higher.

Assumed Knowledge

Students should be familiar with the content from the first three years of the Building Design Management degree, including expertise in CAD, iterative design process and construction technology

Learning Outcomes

1. Recommend the appropriate construction systems for the building project.
2. Specify materials, finishes and performance standards expected in the completed building.
3. Resolve the details of footings/floor/wall and floor/roof junctions and illustrate these with detail drawings to a professional standard.
4. Construct a fully detailed 3D CAD model with sufficient information for accurate pricing and technical assessment.
5. Present design management choices in 2D views drawn from a 3D CAD model of professional standard.

6. Resolve budgetary conflicts, construction safety issues and environmental impacts of construction using innovative design management solutions.
7. Reflect on feedback relating to a building design arguing persuasively for a design solution..

Subject Content

1. Construction Certificate approval
2. Complex and high-rise development Complex services integration and clash detection
3. Proactive response to stakeholder feedback
4. Conflict resolution

Assessment

BLDG 4016 Work-Integrated Learning in Construction Procurement Management

Credit Points 20

Coordinator Linna Geng (https://directory.westernsydney.edu.au/search/name/Linna Geng/)

Description In this subject, students will engage in project-based learning related to Construction Procurement to gain practical skills in managing complex and dynamic construction industry procurement practices. Students will select a project with an agreed industry partner on any of the following suggested topics: new procurement systems, commercial and business management implementations, ethics and trust-based relationships, risk management, sustainable and lean construction. This subject contributes towards the skills required for a work-ready graduate and allows the student to plan, undertake and report on a specific aspect of practice in the context of work.

School Eng, Design & Built Env

Discipline Building Construction Management

Student Contribution Band HECS Band 2 20cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 4 subject

Restrictions

Students must be enrolled in 3782 Bachelor of Construction Management Advanced (Honours) AND have applied and selected by a partner organisation before enrolling in this subject.

Learning Outcomes

1. Manage various aspects of a project related to Construction Procurement, including planning and implementation, to produce agreed deliverables that align with feedback
2. Conduct research on the theoretical basis of the selected construction procurement project demonstrating ethical, digital and information literacy
3. Reflect on the learning and professional development achievements related to the selected construction procurement project
4. Apply communication and collaboration skills through the selected construction procurement project and the workplace
5. Examine ethics and risk management processes for appropriate decision making within construction procurement context
6. Adapt to change, uncertainty and challenges with innovative and justifiable solutions for the industry

Subject Content

Students will learn any of the following construction procurement practices along with relevant theoretical knowledge through research:

- new construction procurement systems,
- construction business and commercial management,
- ethics and trust-based relationships in construction,
- risk management in construction procurement,
- innovations and future constructions,
- lean construction

Work integrated learning

In the WIL subjects in the 3782 course, each student has an academic supervisor and an industry supervisor to undertake a negotiated WIL activity that aligns with the given WIL theme within a workplace. Students will be recruited by agreed industry partners to their organisation through a selection process after their first year to undertake these WIL units with an agreement to co-design and co-deliver the units with quality assurance in place.

Special Requirements

Essential equipment

Students are required to meet the WHS requirements of the worksite

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Proposal	1000 words	20	N	Individual
Presentation	15minutes (each)	20	N	Individual
Report	3000 words plus an agreed deliverable	30	N	Individual
Applied Project	2 pages	30	N	Individual

BLDG 5001 Construction Claims

Credit Points 10

Coordinator Krisanthi Seneviratne (https://directory.westernsydney.edu.au/search/name/Krisanthi Seneviratne/)

Description This subject introduces contractual procedures and legal principles relating to construction claims. Students develop cognitive and technical skills to construct and assess construction claims through practical and real world activities. In addition, students examine delay analysis and quantum determination in extension of time (EoT) claims with real work examples. An important component of this subject is understanding the role and responsibility of an expert witness, managing expert appointments effectively, acquiring skills when compiling comprehensive expert reports and delivering expert evidence to tribunals. Students will have opportunities to expand their skills through professional practice tasks.

School Eng, Design & Built Env

Discipline Building Construction Management

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 5 subject

Restrictions

Students must be enrolled in the following programs:

3795 Master of Construction Law

3752 Master of Project Management

Learning Outcomes

1. Integrate legal principles and knowledge in relation to Claims and in solving practical problem cases
2. Assess different types of Claims in the industry and their underlining principles
3. Critically evaluate different tools used to analyse Construction Claims from both time and cost perspectives
4. Articulate specialised legal and technical skills in writing comprehensive professional reports
5. Appraise the roles and responsibilities of the expert witness and procedural requirements in providing expert evidence
6. Communicate in an effective and convincing manner in delivering expert evidence to tribunals and other legal contexts

Subject Content

1. Contractual Procedures relating to Claims
2. Basic Principles in Claims
3. Extension of Time Claims
4. Delay Analysis Methods
5. Quantum
6. Claims Presentation
7. Disruption Claims and Global Claims
8. Other Claims
9. Expert Witness

Special Requirements

Essential equipment

Access to MS Project Software

Assessment

BLDG 7001 Advanced Contract Management

Credit Points 10

Legacy Code 301188

Coordinator Linna Geng (https://directory.westernsydney.edu.au/search/name/Linna Geng/)

Description This subject introduces various contract types and risks involved in construction project management. The subject extends to examining contractual claims management and procedures together with alternative dispute resolution methods. The subject will further help students to understand change management process and develop a change management plan.

School Eng, Design & Built Env

Discipline Building Construction Economics

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Basic knowledge of construction management.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Compare various forms of contracts and their risks distribution among construction parties
2. Analyse project documentations and records associated with project contracts
3. Develop a change management plan for a construction project
4. Evaluate contractual claims and their management process within construction projects
5. Recommend an alternative dispute resolution method in case of a construction dispute

Subject Content

Construction contracts and risks distribution
Project documentation and records
Managing changes in construction
Claims management
Alternative Dispute Resolution

Assessment

BLDG 7002 Building Regulations

Credit Points 10

Legacy Code 300947

Coordinator Payam Rahnamayiezekavat (https://directory.westernsydney.edu.au/search/name/Payam Rahnamayiezekavat/)

Description This subject introduces the role and functions of the building surveyor and the National Construction Code of Australia (NCCA). The topics include building legislation, NCCA general provisions, structure and philosophy. Students are required to understand the objectives, the function statements and the performance requirements of various sections of Volume One of NCCA. The concept of performance based approach is discussed and compared with the prescriptive approach. The content covers the relationship between research in the development of building codes and the role played by approval/certifying authorities in building assessment and approval. Legal obligations of building surveyors, their tasks of assessment, enforcement and documentation are also explained.

School Eng, Design & Built Env

Discipline Building Surveying

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects BLDG 7010 - Fire and Building Regulations

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

This subject assumes that the student has undertaken study in building construction, building surveying, engineering, architecture or a related area or has the relevant AQF qualification and gained basic building regulation knowledge by working in the construction industry in an appropriate capacity for at least four years.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Interpret and apply building and building related legislations
2. Explain the fundamental concepts and intent of the NCCA
3. Explain various assessment methods contained in the NCCA
4. Discuss the provisions of the NCCA for various building classes.
5. Identify disparities between designs and building code provisions
6. Assess building designs according to their NCCA compliance and explain how performance requirements can be met
7. Describe the involvement of relevant stakeholders in the decision making process

Subject Content

Introduction to the National Construction Code of Australia
Structure and format of NCCA Volume One
General provisions of NCCA Volume One
Performance based regulations and verification methods
Fire resisting construction
Access and egress
Essential fire safety measures
Health, amenity and energy efficiency
NCCA and the related standards and guidelines
Working with performance requirements of the NCCA
Building Surveying practice

Role and functions of building surveyors and Building Acts and Regulations.
Building surveying practice, legal obligations, enforcement and accreditation

Assessment

BLDG 7003 Building Studies

Credit Points 10

Legacy Code 300716

Coordinator Sameera Wijesiri Pathirana (https://directory.westernsydney.edu.au/search/name/Sameera Wijesiri Pathirana/)

Description This subject describes and analyses the technological, socio-economic and sustainability factors that influence the building industry. The topics include advances in contemporary issues affecting sustainability and energy conservation, access and adaptable housing, safety in special areas and building design in accordance with the relevant legislative requirements. Use of assessment tools for sustainability is covered. Discussions are also made on development management, the roles and the relationship between building owners / occupiers, developers and building surveyors.

School Eng, Design & Built Env

Discipline Building

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYB 5426 - Building Studies

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

This subject assumes that the student has undertaken undergraduate study in building surveying, planning or related areas or has gained the equivalent building construction knowledge by working in the construction industry in an appropriate capacity for at least four years.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe current research and advances in building industry, including access, energy efficiency and safety.
2. Describe the impact and effect of the regulatory system on contemporary building issues such as access, energy efficiency and safety provisions.
3. Critically analyse and generate complex building solutions against the requirements for sustainability, access and safety.
4. Explain the roles and the relationship between building owners/occupiers, developers and building surveyors in the operation and maintenance of buildings.

Subject Content

The impact and effect of regulatory bodies on occupant health and amenity in the building industry.
Philosophy, cultural significance and cost-effectiveness of energy conservation and its application to building construction.
Sustainable design processes and typical features of sustainable design and construction.
Housing design, sustainability and energy efficiency assessment tools, such as BASIX.
Sustainability and NCC requirements for Class 2 to 9 - overview of Section J.
NCC requirements for thermal insulation and lighting in building systems
Current research and advances in building systems relating to energy efficiency and sustainability
Access and arrangements for disability and adaptability for older persons.
Accessibility requirements for car parking and pools.
Facilitation of access and movement in buildings.
Principles and practice for pool safety and heating/pumping provisions.
The roles and the relationship between building owners/occupiers, developers and building surveyors in the operation and maintenance of buildings.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

BLDG 7004 Building in Bushfire Prone Areas

Credit Points 10

Legacy Code 200458

Coordinator Sameera Wijesiri Pathirana (https://directory.westernsydney.edu.au/search/name/Sameera Wijesiri Pathirana/)

Description This subject describes the basis for the design and construction of buildings to withstand bushfire attack, the measures that can be incorporated into building design to achieve this and the legislative building requirements affecting bushfire environments. The subject examines the mechanisms of bushfire attack on structures, the role of landscaping on building survival and how materials perform in the presence of a bushfire event. The subject describes the role of the Building Code of Australia (BCA) and Australian Standards in the construction of various building types and the legislative and regulatory environment in which this operates.

School Eng, Design & Built Env

Discipline Building Construction Management

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and explain the building legislation for various buildings in bushfire prone areas;
2. Discuss the relationship between bushfire attack and building performance;
3. Describe the role of landscaping in propagating bushfire in the urban interface environment;
4. Describe the various design options available to improve building survivability during a bushfire; and
5. Review the options available for construction of buildings so as to comply with building legislation, particularly with respect to the role of Australian Standards.

Subject Content

Overview of architectural issues for the building envelope;
Ignition of buildings in bushfires - the mechanisms operating (bushfire attack);
Design options for improved building performance;
Upgrading existing buildings;
Building Code of Australia deemed to satisfy and performance requirements;
Australian Standard for construction in bushfire prone areas - AS 3959;

Maintenance of building envelope for bushfire performance
Landscaping for bushfire prone areas

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Short Answer	1000w - short essay questions. Students must achieve at least 40% in this task to achieve an overall pass for the unit	20	N	Individual
Essay	2000w - essay. Students must achieve at least 40% in this task to achieve an overall pass for the unit	25	N	Individual
Report	3000w - major report. Students must achieve at least 40% in this task to achieve an overall pass for the unit	35	N	Individual
Critical Review	1,500 words	20	N	Individual

BLDG 7005 Egress and Risk Assessment

Credit Points 10

Legacy Code 300717

Coordinator Won Hee Kang (https://directory.westernsydney.edu.au/search/name/Won Hee Kang/)

Description This subject introduces the concept of risk assessment for fire safety systems relevant to life safety and property protection. The subject helps students develop an understanding of building occupant characteristics and human behaviour during fire emergencies. Parameters, methods and criteria for risk and economic assessments are covered in this subject.

School Eng, Design & Built Env

Discipline Building Construction Management

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYB 5424 - Fire Safety Systems 1 (Property)

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

This subject assumes that the student has undertaken study in building construction, building surveying, engineering, science, architecture or a related area or has gained the equivalent knowledge by working in the construction industry in an appropriate capacity for at least four years.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. explain the concept of qualitative and quantitative risk in terms of life safety and property protection;
2. categorise risk parameters and establish risk assessment criteria
3. characterise human behaviour in fire emergencies and its implications in egress analysis and fire safety engineering assessment
4. apply the knowledge and skills to solve specific problems and to conduct quantitative risk assessment and develop risk management strategies.

Subject Content

Introduction to risk concepts
Risk audits and inspections
Reliability in fire safety engineering
Fire Risk Ranking
Risk analysis
Occupants and detection of fires
Human Behaviour in fires
Occupant movement and egress
Occupants and untenability
Cost benefit analysis
Treatment of risks and risk management

Assessment

BLDG 7006 Financing Cities in the Global Economy

Credit Points 10

Legacy Code 101315

Coordinator Khandakar Farid Uddin (https://directory.westernsydney.edu.au/search/name/Khandakar Farid Uddin/)

Description Financing infrastructure to keep cities running and growing at a time when governments face new financial constraints is a key challenge for urban managers. In order to be able to contribute to the debate about financing cities it is important for future urban managers to develop a basic financial literacy, understand and draw on the options for financing essential urban functions in Australia cities and elsewhere, and assess the tensions involved in public and private financing pathways. This subject addresses these needs through both theoretical and practical approaches to the city as a set of flows within a wider urban network of relations. Students develop their understanding via interactive lectures, case studies, fieldwork exercises and assignments.

School Social Sciences

Discipline Urban Design and Regional Planning

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate financial literacy including knowledge of the makeup of public sector accounts at the scale of the city.
2. Examine the basic elements of infrastructure funding in the context of a city as a set of flows.
3. Synthesise analyses of infrastructure, economic functions and flows, employing relevant technical tools for data collection, analysis and mapping.
4. Critically evaluate and assess financial management of cities using efficiency, effectiveness and equity criteria.
5. Use efficiency, effectiveness and equity criteria to devise resolutions to the tensions in public and private options for the operation and control of urban functions.

Subject Content

The city as a set of flows
The city as a set of financial flows
Financing options in Australia and overseas
Models for evaluating financing options
The nature of public and private involvement in urban services and their financing
The construction of integrated models for financing cities

Assessment

BLDG 7007 Interpreting Building Regulations (Residential Buildings)

Credit Points 10

Legacy Code 301103

Coordinator Payam Rahnamayiezekavat (https://directory.westernsydney.edu.au/search/name/Payam Rahnamayiezekavat/)

Description The basis of this subject is to ensure students become accustomed to reading and interpreting laws that specifically relate to building legislation. The subject provides students with an introduction to and sound working knowledge of the prescriptive provisions of the National Construction Code (BCA) Volume 1 & 2, associated Standards, codes and statutory interpretation as it applies to residential buildings. This subject will develop a sound knowledge of the National Construction Code (BCA) - Volume 2 and an introduction to rise in storeys, types of construction and the fire requirement for building elements in the National Construction Code (BCA) Vol. 1, Building Profession Act 2005 and other associated legislation. Residential building work includes work under the Home Building Act 1989, which involves the construction of a dwelling, and alterations or additions to a dwelling. It also will relate to repairing, renovating, decorating or applying protective treatment to a dwelling. The subject applies to residential buildings and associated structures and includes the evaluation and interpretation of performance requirements, classification of buildings according to National Construction Code (BCA) criteria, limitations of the referenced documents (National Construction Code (BCA) - Volume 2) and strategies for compliance. Students will need to relate the objectives of the National Construction Code (BCA) and the purpose of its respective provisions in relation to construction of residential buildings and the evaluation of associated documentation.

School Eng, Design & Built Env

Discipline Building Surveying

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in the Master of Building Surveying, Graduate Diploma in Building Surveying, Graduate Certificate in Building Surveying, Master of Bushfire Protection, Graduate Diploma in Bushfire Protection, Graduate Certificate in Bushfire Protection, Master of Project Management, Graduate Diploma in Project Management or Master of Architecture (Urban Transformation), Master of Construction Law.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Define the rules of interpretation as they apply to residential buildings.
2. Identify and apply ﷿edeemed to satisfy﷿f (DTS) provisions in the National Construction Code (BCA) applicable to residential buildings.
3. Determine and define classification of buildings and the interpretation for multiple classifications within a building.
4. Analyse building solutions to ensure compliance with performance requirements and DTS provisions of National Construction Code (BCA).
5. Interpret relevant Standards adopted by building regulation and the limitations of their interpretation..
6. Interpret construction methods to comply with the intent of the National Construction Code (BCA).

Subject Content

Interpretation to residential buildings
National Construction Code (BCA) objectives and deemed to satisfy (DTS) provisions
Alternative National Construction Code (BCA) solutions
Regulative requirements to residential buildings

Alternative performance solutions or DTS provisions of National Construction Code (BCA)
Australian Standards and legislation
Compliance with the National Construction Code (BCA) and associated Australian Standards

Assessment

BLDG 7008 Professional Practice and Building Law

Credit Points 10

Legacy Code 301104

Coordinator Payam Rahnamayiezekavat (https://directory.westernsydney.edu.au/search/name/Payam Rahnamayiezekavat/)

Description The basis of this subject is to ensure students become accustomed to reading and interpreting building and related laws. The subject provides students with background knowledge of the negligence, administrative law, life safety, proportional liability, contracts and statutory interpretation as it applies to architecture, building surveying, fire engineering and bushfire protection. The subject studies the codes of professional conduct, ethics, conflict of interest and the rules of evidence within the legal constraints when acting as certifiers and or experts. The jurisdictional requirements for certification are considered and assessed. These professions can act as expert witnesses and consequently need to understand codes of professional conduct, ethics, conflict of interest and the rules of providing expert evidence. In doing so, they are potentially required to brief solicitors or other legal professionals and will ultimately have a duty to the court or tribunal.

Restrictions

Students must be enrolled in program 3752- Master of Project Management and must have successfully completed 80 credit points

Assumed Knowledge

Foundational knowledge of project management.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Clearly justify your role and responsibilities in the workplace for a minimum of 500 hours in both Work-Integrated Learning units based on recognised world standards in project management and workplace health and safety requirements.
2. Holistically examine and reflect on how the project management knowledge is applied in the workplace, through your own observations and implementation.
3. Successfully develop project management competencies in line with recognised world standard in project management.
4. Constructively contribute to the project management-related work of the workplace.
5. Explain in detail how the work placement has contributed towards your career planning and job readiness in the project management sector.

Subject Content

1. 250 hours work placement at an approved organisation within an industry relevant to students?f individual specialisation under the guidance of an approved workplace supervisor and an academic supervisor of WSU
2. Integration of project management knowledge and skills with real world applications in line with recognised world standard in project management.
3. Reflection on project management knowledge and skills in line with recognised world standard in project management.
4. Achievement of project management competencies identified in recognised world standard in project management.

Special Requirements

Legislative pre-requisites

All students will be required to conduct Work Health and Safety Risk Assessment for the tasks they may carry out in their workplace. Depending on the nature of the organisation in which they are doing their placement there may be special legislative requirements. These must be identified by the students before commencement of placement. The placement will not proceed if the student does not have the correct requirements at the time the placement is due to begin.

BLDG 7014 Construction Industry Practice A

Credit Points 20

Coordinator Md Kamrul Hassan (https://directory.westernsydney.edu.au/search/name/Md Kamrul Hassan/)

Description In this subject, students are placed with relevant employers to work on a variety of industry related tasks. Placements are structured for student engagement in professional work in their relevant field of study. Placement agencies ensure students are supervised by experienced practitioners, are mentored through site visits and work on projects in a professional capacity. Agreements with supervisors and clear communication lines are set to clarify student engagement and their involvement in meaningful professional tasks that contribute to an authentic learning experience. This subject aims to promote greater engagement with career planning and progression and hence improve job readiness.

School Eng, Design & Built Env

Discipline Fire Technology

Student Contribution Band HECS Band 2 20cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) Students must be enrolled in courses 3705 Master of Fire Safety Engineering 3703 Master of Building Surveying or 3708 Master of Bushfire Protection and have completed a minimum of 40 credit points before enrolling in this unit

Restrictions

Students must be enrolled in programs 3791 Graduate Diploma of Fire Safety Engineering, 3793 Graduate Diploma of Bushfire Protection, 3789 Graduate Diploma of Building Surveying, 3705 Master of Fire Safety Engineering, 3703 Master of Building Surveying, or 3708 Master of Bushfire Protection and have completed a minimum of 40 credit points before enrolling in this subject.

Learning Outcomes

1. Clearly justify your role and responsibilities in the workplace based on recognised national standards in fire safety engineering, building surveying or bushfire protection.
2. Apply workplace health and safety requirements to work sites.
3. Critically reflect on the practical application of your specialised expertise within the work environment, drawing from your personal observations.
4. Successfully develop competencies in line with recognised national standards in fire safety engineering, building surveying or bushfire protection.
5. Positively contribute to the tasks and projects within the workplace.
6. Communicate professionally on the impact of your work placement in shaping your career planning and preparedness for roles within the construction sector, as a fire safety engineer, building surveyor, or bushfire practitioner.

Subject Content

- 240 hours work placement at an approved organisation within an industry relevant to students' individual specialisation under the guidance of an approved workplace supervisor and an academic supervisor of WSU
- Integration of relevant knowledge and skills with real world applications in line with recognised world standard in project management.
- Reflection on specialisation knowledge and skills in line with recognised national (and State) standards in fire safety engineering, building surveying or bushfire protection.
- Achievement of national competencies identified in recognised national standards in fire safety engineering, building surveying or bushfire protection.

Special Requirements

Legislative pre-requisites

Students will be required to undertake a Workplace Health and Safety Induction Course prior to accessing any construction sites and to provide a workplace health and safety risk assessment for a workplace inspection/investigation as part of the portfolio of activities at the conclusion of the subject. Bushfire protection students can obtain a basic firefighting qualification from a fire service as an alternative.

In addition, a Workplace First-Aid is a requirement for those in the sector.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

BLDG 7015 Construction Industry Practice B

Credit Points 20

Coordinator Md Kamrul Hassan (https://directory.westernsydney.edu.au/search/name/Md Kamrul Hassan/)

Description In this subject students are placed with relevant employers to work on a variety of industry related tasks. Placements are structured for student engagement in professional work in their relevant field of study. Placement agencies ensure students are supervised by experienced practitioners, are mentored through site visits and work on projects in a professional capacity. Agreements with supervisors and clear communication lines are set to clarify student engagement and their involvement in meaningful professional tasks that contribute to an authentic learning experience. This subject aims to promote greater engagement with career planning and progression and hence improve job readiness.

School Eng, Design & Built Env

Discipline Fire Technology

Student Contribution Band HECS Band 2 20cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) BLDG 7014

Restrictions

Students must be enrolled in programs 3791 Graduate Diploma of Fire Safety Engineering, 3793 Graduate Diploma of Bushfire Protection, 3789 Graduate Diploma of Building Surveying, 3705 Master of Fire Safety Engineering, 3703 Master of Building Surveying, and 3708 Master of Bushfire Protection and have completed a minimum of 40 credit points before enrolling in this subject.

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Clearly justify your role and responsibilities in the workplace based on recognised national standards in fire safety engineering, building surveying or bushfire protection.
2. Apply workplace first-aid requirements to work sites.
3. Critically reflect on the practical application of your specialised expertise within the work environment, drawing from your personal observations.
4. Successfully develop national competencies in line with recognised national standards in fire safety engineering, building surveying or bushfire protection.
5. Positively contribute to the tasks and projects within the workplace.
6. Communicate professionally on the impact of your work placement in shaping your career planning and preparedness for roles within the construction sector, as a fire safety engineer, building surveyor, or bushfire practitioner.

Subject Content

- 250 hours work placement at an approved organisation within an industry relevant to students' individual specialisation under the guidance of an approved workplace supervisor and an academic supervisor of WSU
- Integration of relevant knowledge and skills with real world applications in line with recognised world standard in project management.
- Reflection on specialisation knowledge and skills in line with recognised national (and State) standards in fire safety engineering, building surveying or bushfire protection.
- Achievement of national competencies identified in recognised national standards in fire safety engineering, building surveying or bushfire protection.

Special Requirements

Legislative pre-requisites

Students will be required to undertake a Workplace Health and Safety Induction Course prior to accessing any construction sites and to provide a workplace health and safety risk assessment for a workplace inspection/investigation as part of the portfolio of activities at the conclusion of the subject. Bushfire protection students can obtain a basic firefighting qualification from a fire service as an alternative.

In addition, a Workplace First-Aid is a requirement for those in the sector.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Proposal	1000 words	20	N	Individual
Report	15 - 20 minutes presentation	20	N	Individual
Portfolio	20 – 30 minutes each week to complete the Portfolio of Activities. 2500 words	40	Y	Individual
Professional Placement Performance	20 - 30 minutes Evaluation / Interview with Workplace Supervisors	20	N	Individual

BUSM 0004 Business Ethics (WSTC Prep)

Credit Points 5

Legacy Code 700215

Coordinator Vlad Krajsic (https://directory.westernsydney.edu.au/search/name/Vlad Krajsic/)

Description Business Ethics seeks to give students an understanding of the concept of ethics in general, the role ethical thinking and behaviour

plays in the contemporary business environment and the importance of critical and analytical thinking. Through an examination of the historical development of ethics and the most recognised ethical approaches, students will develop skills in responding to ethical questions and the use of applied ethics. Students will also be given the opportunity to develop skills in relation to selecting and evaluating sources and materials when preparing tasks and critical and analytical thinking.

Report	1,250 words	40	N	Individual

BUSM 0013 Corporate Social Responsibility, Sustainability and Ethics (WSTC Prep)

Credit Points 5

Legacy Code 700261

Coordinator Bader Unnisa Mehdi (https://directory.westernsydney.edu.au/search/name/Bader Unnisa Mehdi/)

Description This subject focuses on the topics of business ethics, corporate social responsibility and sustainability. Students will be introduced to the conceptual understandings required to identify the ethical dimension of business activities with reference to different functions of business and stakeholders. They will also develop an understanding of how and why social issues are now a key part of managing the business enterprise. Students will be given the opportunity to develop skills in selecting and evaluating sources and materials when preparing tasks, with an emphasis on reflective practice.

BUSM 0027 Management Fundamentals

Credit Points 10

Legacy Code 201032

Coordinator Nelson D'Souza (https://directory.westernsydney.edu.au/search/name/Nelson DSouza/)

Description This subject introduces students to the fundamentals of management that are an essential component of preparing students for postgraduate studies in all business areas. Students will learn to identify operational systems and structures that underpin organisational design, decision-making and change within a variety of contexts. The subject will also address the multicultural dimensions of business management and how leadership styles and social pressures influence human resource management both in Australia and in a global environment. A consideration of contemporary issues such as sustainability and social responsibility will enable students to build their skills in organisational analysis and corporate problem-solving.

BUSM 0029 Decision Making for Business (WSTC Prep)

Credit Points 10

Legacy Code 700322

Coordinator Abdullah Al Aabed (https://directory.westernsydney.edu.au/search/name/Abdullah Al Aabed/)

Description The world of business is a complex one, where decisions can have a major impact on a firm's success or failure. So how do you make a good business decision? In this subject students will explore the value of numerical data as a tool to help businesspeople make informed decisions using sound evidence. We start with the basics of quantitative data - statistics - as a way of calculating the probable outcomes of particular decisions. We then explore how another crucial set of numbers for a firm - the financials - can also empower businesspeople to make smart decisions.

BUSM 1006 Enterprise Innovation and Markets

Credit Points 10

Legacy Code 200911

Coordinator Neeru Sharma (https://directory.westernsydney.edu.au/search/name/Neeru Sharma/)

Description Enterprise Innovation and Markets introduces students to key concepts, business models and issues surrounding contemporary business. Students will develop an understanding of the private enterprise system and business ownership, the implications of marketing and economics on market structure together with managing innovation. Building on the foundation knowledge of the key principles of markets, students will be able to transfer this knowledge into their subsequent study of specialist areas. The subject also aims to develop students' communication skills by working in teams to enhance their literacy proficiency and enhance their critical thinking in preparation for the more advanced subjects of the degree.

BUSM 1007 Enterprise Innovation and Markets (WSTC)

Credit Points 10

Legacy Code 700251

Coordinator Bader Unnisa Mehdi (https://directory.westernsydney.edu.au/search/name/Bader Unnisa Mehdi/)

Description This subject introduces students to key concepts, business models and issues surrounding contemporary business. Students will develop an understanding of the private enterprise system, competing on a global platform, business ethics and social responsibility, business ownership, market structure and innovation. Building on the foundation knowledge of the key principles of markets and public policy students will be able to transfer this knowledge into their subsequent study of specialist areas. The subject also aims to develop students' communication skills to enhance their literacy proficiency in preparation for the more advanced subjects of the degree.

BUSM 1008 Enterprise Leadership

Credit Points 10

Legacy Code 200912

Coordinator Pauline Ross (https://directory.westernsydney.edu.au/search/name/Pauline Ross/)

Description Enterprise Leadership begins the development of the understanding of the role and function of business management and enterprise leadership concepts. Enterprise leaders need to balance a range of stakeholder perspectives in dynamic internal and external environments at local and global levels. Students are introduced to people, managerial and organisational processes designed to achieve enterprise leadership. Problem solving scenarios and experiential learning provide students with a foundation to develop personal and professional skills required to effectively manage their careers.

School Business

BUSM 1012 Foundations of Entrepreneurship

Credit Points 10

Legacy Code 200979

Coordinator Claire Lewin (https://directory.westernsydney.edu.au/search/name/Claire Lewin/)

Description This subject introduces students to the necessary foundations for starting a business and entrepreneurship. Students will be introduced to the Australian business environment and key principles for setting up an entrepreneurial and competitive Business within that environment. Students will be exposed to theories and frameworks on entrepreneurship, entrepreneurial processes, and new and emerging entrepreneurship issues. Students will apply knowledge gained through completing a Business Model Canvass (BMC) case study of a real start-up company or completing a BMC of their own entrepreneurial venture (for students already undertaking an entrepreneurial project).

School Business

Discipline Business and Management, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify key requirements for setting up a small business in the Australian business environment;
2. Identify key processes for setting up a small business;
3. Apply knowledge on entrepreneurship frameworks and processes through analysing a real-life start-up company;
4. Demonstrate ability to write succinctly and clearly in a manner that appeals to a wide audience;
5. Demonstrate ability to verbally communicate clearly and effectively to a wide audience.

Subject Content

The 21st century entrepreneur in an Australian business environment
Entrepreneurship: Introduction to theory and practice
Entrepreneurship in practice: Creativity and innovation
Entrepreneurial opportunities, Innovation and the draft business plan
Entrepreneurial financing
Managing entrepreneurial functions
Legal and ethical aspects of entrepreneurship
Entrepreneurship, small business management and developing the business
Entrepreneurship in society: Corporate, social, indigenous and family

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Case Study	1,750 words	40	N	Individual
Quiz	40 min	40	N	Individual
Presentation	10 minutes	20	N	Individual
Reflection	20 minutes	S/U	N	Individual

BUSM 1015 Introduction to International Business

Credit Points 10

Legacy Code 200591

Coordinator Sabreena Amin (https://directory.westernsydney.edu.au/search/name/Sabreena Amin/)

Description This subject introduces students to the nature of international business operations in the world economy. The first part focuses on the basic concepts and theories of international trade, investment, and foreign exchange which form the foundation of a firm's international business activities. The second part is devoted to the economic, cultural, political and ethical environments and their effects on a firm's international business operations. The third and last part provides an overview of how the functional areas of business i.e. Marketing, production, human resource and finance are conducted in and affected by the multifaceted environment of an internationally oriented firm.

School Business

Discipline International Business

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Equivalent Subjects LGYA 9780 - International Business and Asian Environment

BUSM 1019 Management Foundations

Credit Points 10

Legacy Code MG102A

Coordinator Ian Caddy (https://directory.westernsydney.edu.au/search/name/Ian Caddy/)

Description Management Foundations' provides an opportunity for students to understand the linkage between organisational processes and managerial practices. The aim of the subject is to identify the dynamic nature of managerial practice in changing social, economic, technological and global environments. The subject investigates management theory, roles, and managerial skills and addresses the ongoing needs of decision making, quality management and worksite safety management. This subject is offered specifically to the School of Computing, Engineering and Mathematics and the School of Social Sciences and Psychology.

School Business

Discipline Business Management

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Incompatible Subjects BUSM 1038 - Management Dynamics

Restrictions

Students must be enrolled in the degrees offered by the Schools of: Computing, Engineering and Mathematics; Social Sciences and Psychology; Humanities and Communication Arts; and Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine the complex nature of organisations and management.
2. Analyse the environments of organisations by identifying the dynamic nature of managerial practice in changing social, economic, technological and global environments.
3. Assess the relationship of organisations with their stakeholders in the context of social responsibility and managerial ethics.
4. Evaluate decision-making models and processes and the effect of risk on decision making.
5. Evaluate planning processes and systems and how organisational planning is affected by environmental uncertainty.
6. Examine the integrative organisational role of management in the context of strategic leadership.
7. Examine professional standards of workplace behaviour and communication.

Subject Content

Introduction to the dynamic nature of management as a contingent and complex endeavour.
Environmental analysis of organisations and managerial practice in sustainable social, economic and technological environments and in the global context.
Organisations and managerial practice from the stakeholder perspective: social responsibility and managerial ethics.Decision-making and risk.
Quality management.
Work Health and Safety.
Organisational planning and environmental uncertainty.
Strategic organisational leadership: leadership capability.
Strategic organisational leadership: groups and teams.
Strategic organisational leadership: communications and interpersonal skills.
Professional standards in workplace behaviour and communications.

BUSM 1023 Managing People at Work

Credit Points 10

Legacy Code 200300

Coordinator Sheree Gregory (https://directory.westernsydney.edu.au/search/name/Sheree Gregory/)

Description Managing People at Work' provides an introductory framework for the study of employment relations. The subject is approached from a stakeholder perspective, emphasising the way that management, labour and the State, along with other key stakeholders, act, both separately and together, to structure the employment relationship. In doing so, the subject integrates industrial relations and human resource management theory and practice, illustrating the links between the two disciplines. The content of the subject is structured so as to provide an initial introduction to the disciplines of industrial relations, human resource management, and employment relations, and to the key stakeholders in the employment relationship. Building on this framework, a theoretical and empirical analysis of employment relations processes is provided, with particular emphasis given to recent changes in the role and perspectives of stakeholders.

School Business

- Managing People at Work (UWSC) LGYB 0478 - Managing People at Work (Creative Industries)

Restrictions

Note that only students enrolled at WSU Online may register in the WSU Online subjects offered at that location.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the different approaches to the study and practice of employment relations;
2. Demonstrate recognition of the dynamics of industrial relations and human resource management both in the academic literature and in professional practice;
3. Identify internal and external stakeholders in the employment relationship and the goals and objectives of these stakeholders;
4. Analyse the way that these stakeholders act, together and separately, to shape employment relations processes;
5. Assess the complexity and dimensions of people management.

Subject Content

- Exploring The Complexity of managing people at work
- Work, organisation and stakeholders
- Determining, attracting and selecting human resources
- Developing and rewarding human resources
- Managing human resources
- Human resources in A changing World
- Building relationships at work

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

BUSM 1030 The Business of Hospitality

Credit Points 10

Legacy Code 200988

Coordinator Tim Hall (https://directory.westernsydney.edu.au/search/name/Tim Hall/)

Description The Business of Hospitality employs a case study approach to examine successful hospitality operations and develop an understanding of what is required to plan, design, deliver and manage engaging hospitality experience as the foundation of prosperous hospitality operation. In considering the broader context of the hospitality industry, students will be given the opportunity to explore where they may fit within a hospitality context.

School Business

Discipline Hospitality Management

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Incompatible Subjects BUSM 3047 - Managing Service and Experience

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Distinguish between the various sectors of the hospitality industry and state the operational differences between these sectors;
2. Explain the difference in providing a customer experience as opposed to providing customer service;
3. Describe the relationship of hospitality to a broader societal context;
4. Define the issues and trends that face the hospitality industry today.

Subject Content

- Starting out in The hospitality industry
- delivering Customer experiences
- quality and control within hospitality
- innovation in hospitality
- social good through hospitality
- hospitality in A broader context
- You in hospitality

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Report	1,500 words	30	N	Individual
Case Study	3,000 words	30	N	Individual
Final Exam	2 hours	40	N	Individual

BUSM 1031 The World of Sport Business

Credit Points 10

Legacy Code 201000

Coordinator Michelle O'Shea (https://directory.westernsydney.edu.au/search/name/Michelle OShea/)

Description The World of Sport Business provides students with an entry to sport and its professional organisation and management. Sport organisations are uniquely situated within fluid and emergent social, cultural and political environments and necessitate unique/different managerial approaches which students begin to critically explore. Students will engage with key issues shaping the domestic and international sport management field including, but not limited to, sport professionalisation and commodification, globalisation and sport for development. Students will be introduced to sport governance and leadership theories, sport and its management as a context for ethical analysis, and approaches to sport marketing and promotions in the contemporary sport business context.

Level Undergraduate Level 1 subject

Equivalent Subjects BUSM 1032 - The World of Sport Management

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Understand the unique/special features of sport and its contemporary management.
2. Identify the three sectors of sport (public, non-profit and professional)
3. Explain sport and sport organisations in broader social, cultural, and political contexts (domestic and international).
4. Recognise management and leadership competencies
5. Identify and deconstruct the developments shaping sport managerial futures

Subject Content

1. Australian sport history and early cultural influences/intersections with the contemporary context
2. What is sport management and why it is a unique managerial context
3. Challenges and developments shaping contemporary sport managerial policy and practice [societal, cultural and political]
4. Governmental sport funding and policy
5. Professional/commercial sport-ownership structures, finance, outcomes and effects
6. Sport managerial leadership theories and practice in contemporary sport contexts
7. Change management complexities, processes, and practices
8. Diversity, equity and inclusion in sport organisations and allied contexts

BUSM 1037 Health Administration and Management

Credit Points 10

Legacy Code 401388

Coordinator Richard Thomas (https://directory.westernsydney.edu.au/search/name/Richard Thomas/)

Description The health workplace is a complex and sophisticated environment that can be understood in many different ways and mean different things to different members of an organisation. Assumptions about organisational structure and action are based on conceptualisations and beliefs about the nature and goals of an organisation. This subject aims to develop an introductory understanding of health administration and management practice and business skills required in an evolving health landscape in concordance with the international competency framework for health administrators and managers.

School Health Sciences

Discipline Public and Health Care Administration

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Incompatible Subjects BUSM 2020 - Health Services Management

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the fundamentals of organising, organisational design and culture in health care services;
2. Describe monitoring and control mechanisms for human and capital resources, risk management and safety;
3. Distinguish and use the fundamentals of leading and group dynamics in health care;
4. Apply management decision making practices used to ensure quality outcomes for both patients and staff in health services;
5. Analyse the strategic planning, strategic management, performance management and decision-making processes in the health care system.

Subject Content

1. Introduction to the profession of health administration and management
2. Introduction to the health and healthcare management environment
3. Introduction to business management skills (financial and resource management, human resource management, information management, organisational governance, planning and marketing, risk management and clinical governance, quality and safety, project and supply chain management)
4. Introduction to healthcare leadership

Special Requirements

Legislative pre-requisites

Special Requirements - NSW Health Legislative Prerequisites ~~Pre-requisites~~

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and compete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- http://training.gov.au (http://training.gov.au/)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://

www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

BUSM 1040 Enterprise Leadership (Block)

Credit Points 10

Legacy Code 500077

Coordinator Mia Hatzistergos (https://directory.westernsydney.edu.au/search/name/Mia Hatzistergos/)

Description Enterprise Leadership begins the development of the understanding of the role and function of business management and enterprise leadership concepts. Enterprise leaders need to balance a range of stakeholder perspectives in dynamic internal and external environments at local and global levels. Students are introduced to people, managerial and organisational processes designed to achieve enterprise leadership. Problem solving scenarios and experiential learning provide students with a foundation to develop personal and professional skills required to effectively manage their careers.

Restrictions

Students must be enrolled in program 7180 - Undergraduate Certificate in Business Management

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate skills in verbal and written communication appropriate for multicultural and diverse business and reporting;
2. Identify enterprise design, formation and the business-life cycle using an integrated perspective;
3. Outline the key leadership issues involved in the start-up, growth and reinvigoration of a business;
4. Evaluate key stakeholder roles in enterprise decision-making and the role of leadership in change management;
5. Choose and justify appropriate people and managerial processes and systems for different enterprise problem scenarios.

Subject Content

1. Skills for effective business and enterprise communications including multicultural communication
2. Approaches to understanding enterprise leadership in a variety of contexts
3. Key strategic, managerial and organisational processes
4. Innovation and entrepreneurial business processes
5. Managing and leading groups and teams in multicultural contexts
6. Managing people processes and systems in high-performing organisations

BUSM 1042 Introduction to Business Analytics

Credit Points 10

Legacy Code 201090

Coordinator Abdul Babar (https://directory.westernsydney.edu.au/search/name/Abdul Babar/)

Description The subject will introduce, explore and analyse key concepts and methodologies related to business analytics, analytics development and tools/techniques in broader business and organisational contexts. The ability to identify, collect, extract, analyse and visualise data is vital to organisations for developing strategies and making strategic/operational decisions. Business analytics uses a variety of tools and techniques using several systems/platforms to process and transform data into useful information and knowledge that can be used for evidence-based decision making at strategic, tactical and operational levels.

School Business

Discipline Business and Management, Not Elsewhere Classified.

BUSM 1043 Managing People at Work (Block)

Credit Points 10

Legacy Code 500080

Coordinator Mia Hatzistergos (https://directory.westernsydney.edu.au/search/name/Mia Hatzistergos/)

Description Managing People at Work' provides an introductory framework for the study of employment relations. The subject is approached from a stakeholder perspective, emphasising the way that management, labour and the State, along with other key stakeholders, act, both separately and together, to structure the employment relationship. In doing so, the subject integrates industrial relations and human resource management theory and practice, illustrating the links between the two disciplines. The content of the subject is structured so as to provide an initial introduction to the disciplines of industrial relations, human resource management, and employment relations, and to the key stakeholders in the employment relationship. Building on this framework, a theoretical and empirical analysis of employment relations processes is provided, with particular emphasis given to recent changes in the role and perspectives of stakeholders.

School Business

Discipline Human Resource Management

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Equivalent Subjects BUSM 1024 - Managing People at Work (UWSC) LGYB 0478 - Managing People at Work (Creative Industries)

Restrictions

Students must be enrolled in program 7180 - Undergraduate Certificate in Business Management

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the different approaches to the study and practice of employment relations.
2. Demonstrate recognition of the dynamics of industrial relations and human resource management both in the academic literature and in professional practice.
3. Identify internal and external stakeholders in the employment relationship and the goals and objectives of these stakeholders.
4. Analyse the way that these stakeholders act, together and separately, to shape employment relations processes.
5. Assess the complexity and dimensions of people management.

Subject Content

Exploring the complexity of managing people at work.
Work, organisation and stakeholders.
Determining, attracting and selecting human resources.
Developing and rewarding human resources.
Managing human resources.
Human resources in a changing world.
Building relationships at work.

BUSM 1044 Leadership in Complexity

Credit Points 10

Legacy Code 800239

Coordinator Robert Salama (https://directory.westernsydney.edu.au/search/name/Robert Salama/)

Description This subject is designed for high-achieving students enrolled in the Bachelor of Creative Leadership or Advanced Degrees. The subject focuses on theories and traits of different leadership styles in cross-disciplinary environments and their application in various contexts. Leadership is examined through multidisciplinary lenses thereby broadening students' perspectives of leadership and encouraging interdisciplinary thinking and action as emergent creative leaders. Students are challenged to lead in complexity and prepare for unknown futures and skill sets necessary to drive change through innovation.

School Social Sciences

Discipline Business Management

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects BUSM 1016 - Leadership in a Complex World

Incompatible Subjects Students cannot take BUSM 1044 if they have already taken BUSM 1036

Restrictions

Students must have successfully completed 40 credit points of study in their course with a minimum GPA of 5.0 to enrol in this unit. Students who are enrolled in the Bachelor of Creative Leadership (BCL) must enrol in the unit under the BCL. Enrolment in the unit for students enrolled in the BCL is at the discretion of the Academy or the Director of Academic Program.

Learning Outcomes

1. Analyse different leadership theories and styles in cross disciplinary contexts.
2. Discuss the interdisciplinary nature of leadership
3. Develop a personal leadership style by applying leadership approaches and dimensions (ethics, entrepreneurship, and creativity) to effectively lead in complexity.
4. Examine the role of leadership in social and institutional change.
5. Analyse leadership journeys of Indigenous Leaders.

Subject Content

1. Application of theories and concepts of leadership in cross disciplinary environments.
2. Leadership in context (including relational and distributive leadership).
3. Leadership and power: ethics, responsibility and why leadership matters.
4. Leadership and social change: diversity and ethical practice in leadership.
5. Leadership, change and innovation (creativity and design).
6. Leadership in complexity – creative leadership - Indigenous Leadership.

BUSM 2004 Business, Society and Policy

Credit Points 10

Legacy Code 200158

Coordinator Qiuyan Fan (https://directory.westernsydney.edu.au/search/name/Qiuyan Fan/)

Description Business organisations influence and evolve through ongoing social, political and technological change. Taking the perspective that businesses both affect and are affected by government and society, the subject examines the complexities of interactions between three sectors: business, society and government. The subject emphasises the social responsibility of business. The different ideologies used to legitimise the actions of business, the responses from society and the role of government (local, transnational and global) in regulating interactions, are critically evaluated.

School Business

Discipline Business Management

BUSM 2014 Enterprise Industrial Relations

Credit Points 10

Legacy Code 200614

Coordinator Terri Mylett (https://directory.westernsydney.edu.au/search/name/Terri Mylett/)

Description Enterprise Industrial Relations builds participants' analytical and research abilities, developing capacity to identify, diagnose and engage with industrial relations challenges from different stakeholder perspectives. Participants work with real-world industrial relations, looking at individual employees' workplace and labour market experiences; the goals and activities of managers; and the role and practices of tribunals, enforcement agencies, employer associations and trade unions. This is done through activities that require working collaboratively on problems using online research to investigate contemporary practice, such as the drivers behind enterprise agreements and the implications of institutional arrangements and

trade unions for productivity, equity and human resource utilisation. It is a core subject for the human resource management undergraduate program.

School Business

Discipline Industrial Relations

Student Contribution Band HECS Band 4 10cp

BUSM 2016 Entrepreneurial Management and Innovation

Credit Points 10

Legacy Code 200154

Coordinator Dilupa Nakandala (https://directory.westernsydney.edu.au/search/name/Dilupa Nakandala/)

Description This subject examines the theory, practice and nature of entrepreneurship, as a virtual but often neglected and misunderstood mode of management. A basic premise underlying this subject is that all business entities require enterprising management to enhance their survival ability. This proposition is relevant to new and older, small and large organisations. Additionally, contemporary management practice requires the modern manager to be creative in a learning context and the ways in which these creative environments are reached through entrepreneurship are explored.

School Business

Discipline Business Management

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Co-requisite(s) Students enrolled in 3711 Bachelor of Information and Communications Technology (Health Information Management) must have completed or be enrolled in INFS 3010 Healthcare Data Environments

Equivalent Subjects BUSM 2021 - Health Services Management (WSTC)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the fundamentals of organising, organisational design and culture in health care services.
2. Articulate basic health management skills in monitoring and controlling human and capital resources, risk management and work safety.
3. Distinguish and use the fundamentals of leading and group dynamics in health care.
4. Apply management decision making practices used to ensure quality outcomes for both patients and staff in health services.
5. Analyse the strategic planning, strategic management, performance management and decision-making processes of the health system in the current climate of reform.

Subject Content

1. Introduction to the profession of health management, historical perspectives, current competencies and employability skills.
2. The environment of management comparing public and private sector, managing diversity and change, quality management, ethics and social responsibility.
3. Fundamentals of organising and provision of services ? what and for whom are we managing?
4. Data used by managers.
5. Organisational design and culture.
6. Work design.
7. Introduction to human resource management and workforce planning.
8. Managerial decision making.
9. Fundamentals of planning and strategic management.
10. Risk management and workplace safety.
11. Fundamentals of controlling and leadership.
12. Current issues and concerns in health management.

Special Requirements

Legislative pre-requisites

Special Requirements - NSW Health Legislative Prerequisites ~~Pre-requisites~~

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and compete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- http://training.gov.au (http://training.gov.au/)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://

www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

BUSM 2022 Human Resource Development

Credit Points 10

Legacy Code 200859

Coordinator Jayne Bye (https://directory.westernsydney.edu.au/search/name/Jayne Bye/)

Description Human Resource Development' (HRD) looks at how the development of people and their skills is essential to the 21st century workplace. By examining the key processes of employee learning, development and career management, participants will understand HRD's impacts on workers' employability and careers, organisational effectiveness and economic sustainability. The subject introduces concepts of workplace learning and engages participants in case study discussion and research into current HRD trends in Australian and international workplaces. The goal of Human Resource Development is to support participants to ask questions about current practice and to encourage critical understanding of the field.

BUSM 2041 Working in Professions

Credit Points 10

Legacy Code 200914

Coordinator Krishan Prasad (https://directory.westernsydney.edu.au/search/name/Krishan Prasad/)

Description Working in Professions focuses on developing career understandings and appreciating the personal attributes required for employability in the 'real world' of accounting, banking, economics, finance and property. This is a professional subject in the Bachelor of Business, but is also open to participants with an interest in examining and developing their knowledge of employability in these career areas. The subject involves examination of the evolving nature of work in a dynamic globalised context; applied labour market and industry structure analysis; and an exploration of employability attributes, capacities and opportunities across a range of career paths. Successful completion of the subject allows participants to gauge employer expectations, and to identify and reflect on career opportunities in their chosen fields.

Level Undergraduate Level 2 subject

Co-requisite(s) BUSM 1037

Incompatible Subjects BUSM 3015 - Health Services Management Practice BUSM 3014 - Health Services Financial Management

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Develop knowledge of Value-based healthcare and competencies required to manage and lead health services effectively;
2. Analyse a range of external environmental and community factors as well as internal factors that influence policy and the management of health services;
3. Develop an understanding of Quality and Safety, Risk and Governance of health care systems;
4. Critically examine policy, standards and practice guidelines being used as a basis for performance measurement and management in health services;
5. Analyse current financial management, resource allocation and resource management practices within health services management;
6. Develop professional and social responsibility by influencing and leading collaborative discourse and effective teamwork in response to a health services management problem and the process of developing a solution;
7. Analyse pertinent case studies through material covered in classes, student placements and deeply reflect this experience to the development of health service management competencies.

Subject Content

- proactive management and strategic planning
- value-based healthcare, leadership and Employability skills and required to manage and lead health services effectively
- organisational Governance, change and Conflict management
- Managerial decision making
- health system performance
- work health safety and Risk management
- resource management
- human resource management
- Communications and relationship management

Special Requirements

Legislative pre-requisites

Special Requirements - NSW Health Legislative Prerequisites

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and compete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- http://training.gov.au (http://training.gov.au/)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

BUSM 2045 Sport and Society

Credit Points 10

Legacy Code 201079

Coordinator Jess Richards (https://directory.westernsydney.edu.au/search/name/Jess Richards/)

Description Sport plays a prominent role in the lives of many people across Australia and globally. It provides an opportunity for pleasure and a sense of freedom which may be missing in modern society. However, sport is a contested concept and can be a domain which both reinforces and challenges notions such as gender, ethnicity, and nation. This subject explores sport from a sociological perspective, examining the relationship between sport and society, and encourages students to challenge accepted norms and ideologies.

School Business

Discipline Business and Management, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

BUSM 2047 Venture Makers Foundations

Credit Points 10

Coordinator Inu Rana (https://directory.westernsydney.edu.au/search/name/Inu Rana/)

Description The world we inhabit is ever changing - and so is the way that we will work in the future. Technology continues to evolve and impact the way consumers, business and government interact. Graduates today encounter an increasingly complex working environment and need to be equipped with the mindset, skills-set and tools to navigate uncertainty and complexity, whilst having the capacity to identify and act on emerging opportunities presented by changing environments. The Venture Makers Foundations subject is a highly innovative, unique transdisciplinary entrepreneurship training and development experience. This subject provides students with an entrepreneurial perspective and the skills that are needed to thrive and navigate disruption. The subject is delivered in partnership with innovative Industry partners and is authentic, immersive, and relevant, enabling students to develop real professional industry networks locally, nationally, and internationally. Students will develop core entrepreneurial skills and enhance their work readiness as they create and design solutions for solving complex, real-world challenges with potentially significant global impact. The subject is available to all bachelor degree students as an elective.

Portfolio	Portfolio (option 1) 10 minutes or Venture Innovation Challenge - Applied Project (option 2) 7 minute video	40	N	Individual
Presentation	10 minutes	40	N	Group

BUSM 2048 Sports Marketing

Credit Points 10

Coordinator Jess Richards (https://directory.westernsydney.edu.au/search/name/Jess Richards/)

Description Sports marketing refers to promoting goods and services through sporting events and the endorsement of athletes and sports teams. For any sports organisation, it is imperative to have an effective sports marketing strategy in place to build brand awareness, enhance customer loyalty and generate revenue. Companies in sports use marketing strategies to fulfil their goals, such as attracting more junior players, involving parents, increasing the company's public profile, entertaining spectators, acquiring sponsorships, and securing broadcasting rights deals. Students in this subject will learn general marketing knowledge and theories relevant to the sports industry, such as sponsorship, endorsements, customer experience, pricing and operations.

BUSM 3004 Contemporary Management Issues

Credit Points 10

Legacy Code 200568

Coordinator Pauline Ross (https://directory.westernsydney.edu.au/search/name/Pauline Ross/)

Description This is an engaged subject that requires students to undertake real-world projects to support selected industry or community partners. The subject blends in-class and online activities as well as individual and group work, with self-directed problem-based learning. The focus of students' learning is on sustainable business, including the economic, social and environmental dimensions of business. The in-class workshops support students to conduct the required engagement activities with industry or community partners. As a third-year subject, attention is given to students' application of the knowledge and skills already acquired in their degree programs, and on the practice of business management skills.

BUSM 3006 Design Thinking for Creativity

Credit Points 10

Legacy Code 200918

Coordinator Tendai Chikweche (https://directory.westernsydney.edu.au/search/name/Tendai Chikweche/)

Description Innovation and creative thinking are important skills in strategy development. Part of this process is the ability to solve problems and discover new opportunities; or in other words, the notion of "design thinking". This subject introduces students to concepts and frameworks to create innovative products, services and systems for a range of enterprises, industries and markets. Students will explore and analyse business and social networks, clusters and ecosystems via practice based projects. Design thinking principles will be applied to

systematically develop ideas into innovative solutions as a way to drive business growth.

School Business

Discipline Business and Management, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions Successful completion of 80 credit points.

Assumed Knowledge

Students should have a foundation knowledge of business markets and innovation theory.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse innovation in different enterprise or social contexts.
2. Evaluate the practice and protocols of professional and social networks.
3. Use creativity and innovation to solve strategic business markets problems.
4. Demonstrate the process of creative thinking.

Subject Content

1. The innovation cycle including ideation, creativity and innovation.
2. Business and social enterprise innovation.
3. Innovation networks, clusters and ecosystems, identification, standards and protocols.
4. Innovation within a marketing context.
5. Creativity principles, frameworks and methods.
6. Introduction to design thinking principles and frameworks.
7. Developing ideation into innovative products, services, processes, and enterprises.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

BUSM 3007 Destination Management

Credit Points 10

Legacy Code 101270

Coordinator Felicity Picken (https://directory.westernsydney.edu.au/search/name/Felicity Picken/)

Description In 2023 this subject is replaced by TOUR 3004 - Destination Management. Destination Management provides students with a fundamental understanding of the concepts in destination management. This includes coordination of the destination in terms of the tourism industry's sectors, their relationship with each other and the challenges they face. An appreciation of the importance of a destination's unique cultural, natural and economic attributes is developed from the viewpoint of the visitor and industry representatives. The implications of organising urban spaces for the visitor experience and its influence on sustainability and competitiveness are explored.

School Social Sciences

Discipline Tourism Management

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse structure, roles and interrelationships of Destination Management Organisations (DMO) at various levels of operation.
2. Evaluate factors influencing destination management and marketing.
3. Undertake a destination resource analysis (Audit).
4. Evaluate destination marketing strategies based upon destination management objectives.
5. Critique destination management implementation.
6. Identify and describe opportunities, challenges and constraints affecting DMOs in formulating strategies.

Subject Content

Destination characteristics and destination profiling (critical review). Coordination structures and principle players in the coordination of destination management (Government, Industry, NGO and Community). Strategic and sustainable destination management (policy, practices and issues). Destination marketing.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

BUSM 3008 Developing Sport Professionals

Credit Points 10

Legacy Code 200997

Coordinator Michelle O'Shea (https://directory.westernsydney.edu.au/search/name/Michelle OShea/)

Description The Sport Management Internship subject provides students with an opportunity to engage with the sport industry through a 120 hour [minimum] industry placement. Students are provided with a unique opportunity to observe sport management practitioners in action and learn in a practical "hands-on" setting. Experience in the field of study is an essential ingredient in preparing an individual for employment either during the period of study or after graduation. Students have the opportunity to apply theoretical concepts, knowledge and skills acquired in lectures and workshops in professional sport, recreation and aligned settings.

Students are expected to have gained an introductory level of knowledge in operations and supply chain management.

BUSM 3014 Health Services Financial Management

Credit Points 10

Legacy Code 400279

Coordinator Andrey Zheluk (https://directory.westernsydney.edu.au/search/name/Andrey Zheluk/)

Description The Australian health care system must account for use of resources, and ensure their equitable and efficient use. Increasingly devolution of management function to cost centre level in health care organisations is occurring. Managers must consider the financial implications of clinical decisions, understand and act on accounting information. They are held responsible for the financial outcomes of their activities. This subject develops a basic knowledge of accounting principles, health services funding arrangements, government reforms, financial reporting, preparation of budgets, business cases and economic appraisals. There are 140 hours of placement in the field working with health managers on financial issues.

School Health Sciences

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) BUSM 3015

Restrictions

Students must be enrolled in 4545 or 4656 Bachelor of Health Science or 6000 Diploma in Health Science/Bachelor of Health Science

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Articulate health funding arrangements between the Commonwealth and the States, cost shifting and the need for reform.
2. Examine the mechanisms used by NSW Health to distribute funds to areas and regions.
3. Explain accounting concepts and terms, how financial events are recorded and reported in health services accounting systems.
4. Critically interpret the various reports produced by the accounting information systems in health services.
5. Critically interpret a health cost centre report and plan ways to come in on budget.
6. Develop a budget and business case for a project.
7. Articulate financial management issues such as capital charging, accounting for capital assets, costing of contracted services, etc., as it relates to health services.

Subject Content

- placement requirements.
- Commonwealth fiscal responsibilities, funding arrangements and health role.
- The accounting cycle: Commonwealth and state budget.
- state health role and episode funding.
- policy Initiatives and opportunities for reform.
- health accounting information systems.
- Basic accounting concepts and terms.
- general purpose and SP&t accounts.
- financial accounting in health.
- health financial Reporting including annual reports.
- management accounting and how financial events are reported in health services.
- key performance indicators and cost centre report interpretation.
- budget and health business case preparation.
- how to Evaluate financial position with performance ratios eg Contract services or purchase, profit, loss and return on investments.
- accounting for capital Assets eg The PFI and capital charging.
- how to conduct An economic appraisal of A new development.

BUSM 3016 Health Services Quality Management

Credit Points 10

Legacy Code 400284

Coordinator Margaret Skropeta (https://directory.westernsydney.edu.au/search/name/Margaret Skropeta/)

Description The need to improve quality while reducing expenditure has forced health services to re-evaluate their strategies. For these reasons many have embraced the philosophies of Total Quality Management (TQM). Central to its practice is a focus on flexible, consultative management, with the needs of the customer seen as vital to guiding a continuous process of improvement. TQM is a whole system concept, which recognizes the need to manage sets of interacting technical, cultural and political issues. This subject explores the various aspects of TQM and in particular its application within the health services.

Coordinator Paul Preobrajensky (https://directory.westernsydney.edu.au/search/name/Paul Preobrajensky/)

Description NOTE: This subject is no longer on offer from Spring 2022. Students should enrol in BUSM 3080 Health Care Systems and Organisation Culture instead. This is a flexible learning unit looking at human resource management (HRM) as a strategic activity of health organisations especially as workforce shortages pose significant challenges to the health and aged care sectors. The workforce, with appropriate knowledge and expertise, is essential to the efficient and effective delivery of quality health services. Successful organisations shape the workforce to anticipate current and future directions and goals. Workforce planning is a crucial element of this approach and its success.

BUSM 3024 Human Resource and Industrial Relations Strategy

Credit Points 10

Legacy Code 200740

Coordinator Terri Mylett (https://directory.westernsydney.edu.au/search/name/Terri Mylett/)

Description Students in 'Human Resource and Industrial Relations Strategy' analyse the human resource and industrial relations strategies of the major employment relations stakeholders. While the principal focus is on the organisational level of analysis and on the strategic interventions introduced by management, the subject also analyses the strategic roles of government, trade unions, and employer associations. Through a range of learning activities, students examine the relationship between business strategies and HR/IR strategies, strategic HR/IR interventions, the concept of strategic choice as it concerns stakeholders and the evaluation of strategy. Students also engage with the development of human resource management and industrial relations as a professional field and consider ethics and professional standards.

School Business

Discipline Industrial Relations

Student Contribution Band HECS Band 4 10cp

BUSM 3030 International Business Project

Credit Points 10

Legacy Code 200590

Coordinator Sabreena Amin (https://directory.westernsydney.edu.au/search/name/Sabreena Amin/)

Description This is a capstone subject in International Business. The aim of the subject is to give students a real-life action learning project in which they undertake an international business strategic planning and analysis exercise for a client organisation. This project usually involves students working in small teams for a client organisation under the direct supervision of the lecturer.

School Business

Discipline International Business

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) BUSM 1015

Equivalent Subjects LGYA 9777 - International Business Project 1

Assumed Knowledge

This is a capstone International Business subject. It is assumed that students have basic international business knowledge and research skills.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply a broad range of international business theories and concepts to a real organization&#65533;fs international business problem;
2. Collect and inter-relate relevant information to formulate an international business plan;
3. Evaluate alternative international business strategies using appropriate financial, numerical and evaluative tools;
4. Work effectively in groups through collaboration based on diversity of views and cultural backgrounds, using new and emerging collaborative technologies;
5. Engage effectively with the management of an organisation during all phases of the strategic planning process.

Subject Content

1. Student teams will work on an international business project on behalf of a specific organisation.
2. The aim is to produce a detailed international business plan that can be assessed by the client organisation for its viability, appropriateness, forecasted financial cost and payback and if so decided by the client, actually implemented
3. Contact with client companies will be between nominated team members and senior company executives.
4. The student teams will work under the direction of the lecturer.

Student teams will work on an international business project on behalf of a specific organisation. The aim is to produce a detailed international business plan that can be assessed by the client organisation for its viability, appropriateness, forecasted financial cost and payback and if so decided by the client, actually implemented. Contact with client companies will be between nominated team members and senior company executives. The student teams will work under the direction of the lecturer.

BUSM 3031 International Business Strategy

Credit Points 10

Legacy Code 200626

Coordinator Shveta Sharma (https://directory.westernsydney.edu.au/search/name/Shveta Sharma/)

Description In an environment where operating internationally is becoming the norm rather than the exception, firms are faced with ever increasing complexity when formulating their business strategy. This requires an understanding of how firms become and remain international, the basic modes of international involvement, the practice of multinational management and how firms can establish a balance between the sometimes conflicting demands of headquarters, the subsidiary and the governments of all the countries where the multinational enterprise operates. This subject will cover these issues and will deal with both large and small companies that must be global to survive.

Equivalent Subjects LGYA 9771 - International Business Strategy

Restrictions

Note that only students enrolled at Sydney City Campus may register in the Sydney City Campus subjects offered at that location.

Assumed Knowledge

An understanding of the basic principles of marketing and international business.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate and apply international trade theories in analysing inter and intra industry trade between/among countries;
2. Formulate effective internationalisation and multinational business management strategies;
3. Develop appropriate strategies for managing a company's global value chain, international government relations, global workforce and international business ethics;
4. Appraise knowledge and skills required of global leaders and ways of acquiring them.

Subject Content

- The Internationalisation process
- international trade theories
- The Global business environment
- Export Operations
- Global sourcing strategy
- Licensing
- international joint ventures
- international business strategy formulation
- globalisation and organisation
- The Global business manager
- Global leadership
- government intervention and international business strategy
- international business ethics

BUSM 3032 International Human Resource Management

Credit Points 10

Legacy Code 200621

Coordinator Youqing Fan (https://directory.westernsydney.edu.au/search/name/Youqing Fan/)

Description 'International Human Resource Management' examines the implications for human resource management that arise from the internationalisation of organisations. Through portfolio reports and case studies, students analyse a range of comparative systems and structures of employment relations and the strategic management of global organisations. This analysis includes a focus on key human resource functions including recruitment, training, reward and evaluation of the impact of society, politics, economics and culture of host countries on human resource strategies. Students examine also the role of global stakeholders and assess the implications for human rights that arise from globalisation.

School Business

Discipline Human Resource Management

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) BUSM 1023

Equivalent Subjects BUSM 2026 - International Human Resource Management

Restrictions

Students must be enrolled in 2773 Bachelor of Business Administration to enrol in the online offering. All other students must obtain DAP approval.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Assess the influence of context on the definition and conduct of human resource management;
2. Appreciate the role of ethics and the management of risk by Multi-National Corporations (MNCs);
3. Compare and contrast HRM models and practices in selected countries and/or regions in order to analyse the implications for the management of people in multi-national corporations;
4. Review developments in local and international industrial relations with reference to the activities of MNCs;
5. Produce assessment material consistent with the core attributes of knowledge capability, including logic and critical analysis, information literacy and social interaction skills, including working effectively with contextual knowledge and cultural sensitivity.

Subject Content

- distinction between Domestic human resource management and international human resource management
- Contextual Models of human resource management
- international human resource in organisational context
- approaches to staffing in Multinational context
- international employees and teams
- performance management of international employees
- Reward for international employees
- Repatriation of international employees
- key Issues in international labour relations
- ethics and key responsibilities of international companies

Special Requirements

Legislative pre-requisites

For students engaging in the international study tour - Student will have to obtain an appropriate visa for travel.

Assessment

BUSM 3033 International Management

Credit Points 10

Legacy Code 200623

Coordinator Louise Kippist (https://directory.westernsydney.edu.au/search/name/Louise Kippist/)

Description International Management provides an overview of issues confronting managers working in a complex globalised environment. Areas such as global and regional integration, the role of ethics and social responsibility, as well as the changing political, legal and technological environment require consideration by management in multinational organisations. The role of culture and human resource management is another significant area of failure by global managers. Finally global strategic issues such as managing political risk and government relations will be analysed to allow a deeper level of understanding of the complexities of managing in an internationally competitive marketplace.

School Business

BUSM 3042 Managing Diversity

Credit Points 10

Legacy Code 200150

Coordinator Louise Ingersoll (https://directory.westernsydney.edu.au/search/name/Louise Ingersoll/)

Description This subject explores the complexities and challenges of managing diverse workforces in contemporary organisations.

Using applied learning approaches, students are required to formulate corporate policies relating to diversity and then evaluate the implications for implementing these policies in a real world setting. As a key component of human resource management, students are expected to appreciate both the theoretical and practical elements of managing diversity and are required to reflect on their own learning process throughout the subject.

School Business

BUSM 3045 Managing Operations

Credit Points 10

Legacy Code 200865

Coordinator Shailen Muneshwar (https://directory.westernsydney.edu.au/search/name/Shailen Muneshwar/)

Description Managing Operations is a comprehensive subject that focuses on the importance of operations in creating competitiveness and dynamic capabilities for individual organisations and organisations connected through supply chains and logistics processes within a global context. The subject is designed for students interested in enhancing their knowledge and skills in designing and improving critical operational processes used by organisations to provide products and services to customers. It encompasses internal and external operations for manufacturing and service organisations; their strategic choices; and tactical and operational decision-making processes for the management of critical and extended resources. The latest qualitative and quantitative tools and techniques, online business simulations and international case studies are used to practise problem solving processes to address challenges of a global nature in the business world.

BUSM 3048 Negotiation, Bargaining and Advocacy

Credit Points 10

Legacy Code 200613

Coordinator Michael Lyons (https://directory.westernsydney.edu.au/search/name/Michael Lyons/)

Description In 'Negotiation, Bargaining and Advocacy' students identify and assess contrasting approaches to negotiation and identify the importance of strategy and judgement in negotiation. Students develop their skills through a team-based online negotiation and a critique of the experience of this negotiation. Through case studies, students examine conciliation, mediation and arbitration with a particular focus on advocacy practice in industrial tribunals. An important theme in the subject is the assessment of the contextual and regulatory factors that shape negotiation, bargaining and advocacy practice. This aspect draws on contemporary debates in these spheres most notably concerning the Australian context.

School Business

Discipline Industrial Relations

Student Contribution Band HECS Band 4 10cp

BUSM 3054 People, Work and Society

Credit Points 10

Legacy Code 200860

Coordinator Brandon Gordon (https://directory.westernsydney.edu.au/search/name/Brandon Gordon/)

Description 'People, Work and Society' draws on psychology and sociology to deepen participants' practical human resource management (HRM) expertise. Designed for those aiming at careers as HRM professionals, participants will use HRM knowledge to develop policy and procedure that takes account of the psychology of individuals and groups as well as rising expectations for socially-responsible management. The complexities and rewards around managing diverse workforces receive particular attention. Through the challenge of real-world activities, participants are introduced to the difficult judgements that confront HRM professionals around people at work.

BUSM 3058 Practice Management for Health Professionals

Credit Points 10

Legacy Code 400156

Coordinator Diana Messum (https://directory.westernsydney.edu.au/search/name/Diana Messum/)

Description From 2017 students should take 401149 - Exercise Physiology Across the Lifespan. This subject is aimed to introduce the student to the management issues in establishing and working in a clinical practice. While the subject will cover issues related to health professionals and public sector management, the focus of the subject will be on issues in private practice. The aim of the subject is to introduce the student to a wide range of topics, including an over view of health care funding in Australia, private and public health system, developing a business plan, different business structures, financial management, managing staff and occupational health and safety issues.

School Health Sciences

Discipline Business Management

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Compare and contrast the global components of the health care system within Australia, with particular emphasis on funding arrangements for private and public sector funding.
2. Identify the key elements of a successful business plan, extrapolating these into a small business in a health care profession.
3. Outline the essential elements in establishing a small business, including business viability and raising capital.
4. Discuss the key issues in financial planning of a small business, with particular emphasis on taxation, insurance and related issues.
5. Manage a budget, with consideration to the income and types of expenditure required.
6. Delineate different business structures and employment arrangements, including partnerships, associates and affiliates.
7. Discuss the issues associated with the employment of staff, including employer and employee obligations.
8. Explore concepts and roles of leadership and management styles.
9. Identify the occupational health and safety issues within a small business and formulate ways in which a practice can be managed according to these guidelines.

Subject Content

1. Overview of the Australian health care system
- private Vs public sectors
- funding Models for health care in Australia
- Medicare
- health Insurance
2. Setting up a small business
- Raising capital
- developing A business plan
- developing A Marketing plan
- Risk analysis
- financial analysis
3. Financial Planning and Evaluation
- managing budgets
- capital Expenditure
- Recurrent expenses
- taxation and related Issues
- investment and finance
- funding, Loans and financial resources
- investment and capital growth programs
4. Business Structures
- company, Trusts etc.
- registering A company
5. Types of employee contracts
- rights and obligations of employers and employees
- Workcover and compensation
- Insurance Issues
- employee Vs affiliate Vs partner
6. Managing Staff
- management and competencies
- management styles and leadership
- employee relations
- staff Recruitment and selection
- staff retention
- performance management
7. Occupational Health and Safety Issues

BUSM 3059 Processes and Evaluation in Employment Relations

Credit Points 10

Legacy Code 200575

Coordinator Louise Ingersoll (https://directory.westernsydney.edu.au/search/name/Louise Ingersoll/)

Description This subject applies theory and skills developed throughout the discipline in Human Resource Management to real-world organisational and policy challenges and opportunities. Students will develop and use employment relations concepts and "metrics" to design implementation plans and to evaluate policies, practices and change initiatives. Students' skills in communication and problem solving will be assured in this subject.

School Business

Discipline Human Resource Management

Student Contribution Band HECS Band 4 10cp

BUSM 3063 Reward and Performance Management

Credit Points 10

Legacy Code 200739

Coordinator Brandon Gordon (https://directory.westernsydney.edu.au/search/name/Brandon Gordon/)

Description 'Reward and Performance Management' introduces students to critical perspectives in reward management. Through case studies students consider the wider context in which reward strategies are devised and the strategic decisions that arise if reward is to meet regulatory requirements, organisation objectives and the expectations of the workforce. Students examine the component parts of contemporary reward and critically assess the relationship between performance and reward. Through engagement with different types of performance management systems, students identify and assess contrasting approaches to performance management.

School Business

Discipline Human Resource Management

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) BUSM 1023

Incompatible Subjects BUSM 3040 - Management of Employee Performance LGYA 4822 - Remuneration Theory and Practice

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Accurately use the language of reward and performance management in verbal and written argument.
2. Critically assess reward and performance management principles and practices in terms of the competing interests of employers and employer associations, employees and trade unions, and governments and tribunals.
3. Critically assess contrasting approaches to reward.
4. Identify contrasting approaches to the management of organisational and employee performance.
5. Critically assess models of performance management and the processes through which organisations and systems develop, enhance and reward employee performance.

Subject Content

1. Models of reward and the labour market.
2. Differing approaches to equity and the grounds for regulatory intervention.
3. The shape of reward in Australia.
4. Contemporary developments in approaches to reward.
5. Choice and flexibility in reward management design.
6. Performance management as a system to align employee performance with organisational objectives.
7. Models of performance management as systems to develop, enhance and reward employee performance.
8. The management and appraisal of employee performance.
9. Challenges in performance management.
10. Economic, social and environmental sustainability and reward and performance management.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Case Study	1,000 words	20	N	Individual

BUSM 3064 Service Industry Analytics

Credit Points 10

Legacy Code 200991

Coordinator Daniel Townsend (https://directory.westernsydney.edu.au/search/name/Daniel Townsend/)

Description Service Industry Analytics is designed to provide a working knowledge of how to analyse and report information required in planning and operating a services business. It explores the methods, uses and limitations of contemporary research in the sport and hospitality industries. Students will gain experience with the planning and implementation of research and assessment of service research

problems, utilising the collection and analysis of both quantitative and qualitative data.

School Business

Discipline Business and Management, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Equivalent Subjects BUSM 2036 - Service Industry Studies
LGYA 4814 - Sport Management Research Methods
LGYA 4799 - Hospitality Business Research Methods
LGYA 4863 - Services Research Methods
MKTG 2011 - Customer Insights

Restrictions Only students enrolled in the MT2035 Hospitality Management or MT2036 Sport Management can enrol in this subject.

Assumed Knowledge

Basic knowledge of the service and experience economies is assumed.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the scope and function of services research;
2. Evaluate the different types of information to decision making within the sport and hospitality industries;
3. Identify and apply the key stages involved in conducting a services research project;
4. Apply data analysis techniques in services management research;
5. Demonstrate ability to present, write, implement and evaluate proposals and report results.

Subject Content

- research methodologies and Sampling techniques used in service industries
- planning and designing Projects across sport and hospitality industries
- primary and secondary data sources
- Qualitative research collection and analysis methods within A service context
- quantitative research collection and analysis methods within A service context
- publishing and disseminating research results

Assessment

BUSM 3069 Strategic Management

Credit Points 10

Legacy Code 200587

Coordinator Marion Cornish (https://directory.westernsydney.edu.au/search/name/Marion Cornish/)

Description This subject explores the nature and essence of strategy and how this is created in various organisational, industry and economic contexts. The complexity of the strategy process, content and context means that there is not one clear position on strategy. The impact of this complexity on managers seeking to develop a strategic thinking capability is examined. The paradoxes and debates in the field of strategy are explored in an effort to understand the concept of sustainable competitive advantage. Students will utilise the theoretical knowledge presented in a dialectical enquiry framework to undertake strategic analysis, and develop a selection of strategic options, for case study scenarios and in a team strategy simulation.

School Business

Discipline Organisation Management

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) BUSM 1038 OR
BUSM 1008 OR
BUSM 1019

Equivalent Subjects LGYC 0040 - Strategic Management

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the impact of key elements of leadership, people and organisational culture in the formulation and implementation of strategy;
2. Apply contrasting theoretical approaches to strategic management;
3. Reflect on the strengths and weaknesses of various approaches to strategic development;
4. Utilise the theoretical knowledge presented to undertake strategic analysis, and develop a selection of strategic planning options, for case study scenarios and a strategy simulation;
5. Formulate strategic planning implementation strategies based on an understanding of sustainable competitive advantage linked to key industry, environmental and organisational constraints.

Subject Content

- strategy process, content and context linked to sustainable competitive advantage
- strategic thinking capability
- strategic formulation and The setting of patterns for action
- strategic change and organisational fit
- The industry context and business level strategy
- organisational context and purpose
- corporate level strategy
- Network level strategy
- strategy in The international context

BUSM 3070 Strategic Sport Leadership

Credit Points 10

Legacy Code 200998

Coordinator Michelle O'Shea (https://directory.westernsydney.edu.au/search/name/Michelle OShea/)

Description In contemporary sport organisations and contexts, sport practitioners require an in-depth understanding of strategic leadership processes and practices. To respond to sport's ongoing professionalisation, globalisation, demographic changes and emerging consumer expectations, sport managers and government policy makers require knowledge and skills which will allow them to navigate and successfully manage these changes. Students will develop knowledge and skills in areas such as policy development and implementation, sport governance, strategic planning, executive leadership and change management processes and practices. Learning will be applied across diverse sport contexts including high performance and community sport with a focus on sport for development. Students' leadership knowledge and skills will be showcased through a sport leadership, governance and integrity portfolio.

BUSM 3072 Tourism Industry Professional Placement

Credit Points 20

Legacy Code 102385

Coordinator Garth Lean (https://directory.westernsydney.edu.au/search/name/Garth Lean/)

Description In 2023 this subject is replaced by TOUR 3003 - Visitor Economy Professional Placement. Tourism Industry Professional Placement (TIPP) provides students with understanding and experience of the tourism or related industry workplace. Students work in a voluntary capacity with an industry host to gain work-ready skills and undertake professionally appropriate tasks. Students complete a Professional Placement Proposal and Professional Placement Report.

School Social Sciences

Discipline Tourism Management

Student Contribution Band HECS Band 4 20cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Students must be enrolled in 1664 Bachelor of Tourism Management or 6030 Diploma in Social Science/Bachelor of Tourism Management, where this is an alternate core subject. Students enrolled in the 1667 Bachelor of Social Science (Heritage and Tourism Major) may include this subject as an elective. Students must have successfully completed 160 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate practical employability skills that can be useful for professional career development;
2. Apply problem-solving skills and plan for situation improvement;
3. Demonstrate capacity to work effectively in team environments;
4. Design and manage a program of professional development;
5. Evaluate and report on a professional development/situation improvement program.

Subject Content

Introduction to work-based learning - pre-placement orientation and planning
Professional development goal-setting and planning
Project and progress management
Professional development evaluation and reporting
Completion of a situation improvement project/task

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

BUSM 3073 Tourism Policy and Planning

Credit Points 10

Legacy Code 101904

Coordinator Garth Lean (https://directory.westernsydney.edu.au/search/name/Garth Lean/)

Description In 2023 this subject is replaced by TOUR 3005 - Tourism Policy and Planning. This subject gives students a general understanding of planning theory as it relates to sustainable tourism policy and practice. Students will apply this knowledge to tourism sites, facilities and activities in Sydney with a major assignment focusing on Sydney Olympic Park. A self-guided field trip enables students to apply and understand various planning techniques, tourism policies, scenario mapping strategies and consider conflict resolution practices. Students will present their ideas by integrating quantitative and qualitative data, both in teams and individually. At the conclusion of this subject students will have the skills to apply planning theory to an analysis of tourism policies, sites, facilities and activities in a global city such as Sydney.

Incompatible Subjects LGYB 8930 - Tourism Policy and Planning LGYA 6103 - Recreational Planning towards Sustainable Tourism LGYB 8197 - Sustainable Tourism and Recreational Planning

Restrictions

Successful completion of 80 credit points

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of planning theory as it relates to sustainable tourism;
2. Analyse various planning techniques, tourism policies, scenario mapping strategies and conflict resolution practices;
3. Work individually and in teams to present their ideas orally and in written forms;
4. Integrate quantitative and qualitative tourism data to formulate policies and procedures; and
5. Apply planning theory to an analysis of tourism policies, sites, facilities and activities.

Subject Content

Understanding tourism policy and planning
Applying sustainable tourism concepts and indicators to case studies
Assessing tourism experiences and opportunities using qualitative and quantitative data
Examining stakeholder conflicts and impact assessments
Planning for destination management
Conducting scenario planning
Conducting site visits and field work
Preparing professional presentations
Evaluating planning frameworks

BUSM 3074 Work Employment and the Labour Market

Credit Points 10

Legacy Code 200243

Coordinator Louise Ingersoll (https://directory.westernsydney.edu.au/search/name/Louise Ingersoll/)

Description This subject provides an in-depth study of the links between work, employment and wider labour market issues. An introductory framework will be provided emphasizing the historical perspectives of work and the key theories and concepts involved in industrial sociology. Current and future issues and trends in work organization and practice and their relationships to society will also be considered. The subject will then examine the relationship between labour markets, employment and government policy in both macro and micro settings. Particular emphasis will be placed upon the interaction of regional labour markets, policies and outcomes for key labour market segments.

BUSM 3078 Business Report

Credit Points 20

Legacy Code 201043

Coordinator Dorothea Bowyer (https://directory.westernsydney.edu.au/search/name/Dorothea Bowyer/)

Description This subject is designed to bring to life the knowledge gained during the students' study whilst applying it practically to diverse business contexts through a work integrated learning research project. The project will build on the comprehensive, coherent and connected knowledge gained in business specialisations to allow the student to explore and develop attributes required to be successful in contributing to outcomes in a business environment. Students will have an opportunity to work under the supervision of an academic on a research project. Assessment of the subject will include a formal research presentation to academics and/or industry. Entry to this subject is on a competitive basis. Contact the subject coordinator for details.

School Business

Restrictions

Students must have permission from the subject Coordinator and must have completed a minimum of 160 credit points (or equivalent) prior to undertaking this subject and must have 20 credit points of subjects available, within program allowances, to take this subject. The availability of supervision of projects, a student's ability to meet any special, safety, or identified persons requirements of a project site, the student's academic record and any record of misconduct, will also be considered.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Plan, organise and manage a business-related research project to completion;

2. Identify and use research literature relevant to a specific business issue or project;
3. Select and employ appropriate data collection methods;
4. Synthesise theoretical knowledge and context specific information in relation to a specific business issue or project;
5. Produce an analytical report including recommendations;
6. Present in a formal environment to peers and academics.

Subject Content

- Planning and organisational skills
- Time management
- Project management
- Business research
- Report writing
- Presentation skills
- Data collection including field research

BUSM 3079 Travel in the Digital Age

Credit Points 10

Legacy Code 102779

Coordinator Garth Lean (https://directory.westernsydney.edu.au/search/name/Garth Lean/)

Description In 2023 this subject replaced by TOUR 3001 - Tourism, Events and Technology. This subject explores the ways in which digital technologies are reshaping travel, including travellers' experiences, and planning and management of the travel industry. Students will learn how digital technologies are being utilised, and the opportunities and challenges these technologies present. The subject will provide opportunities to engage with travel apps, virtual/augmented reality technologies, smart attractions and transport technologies. Students will also learn how to conceptualise and pitch their own digital travel products. Upon completion of the subject, students will be well placed to develop and manage innovative, socially responsible travel and mobility technologies.

School Social Sciences

Discipline Tourism Management

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 80 credit points of study.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate opportunities for the use of digital technologies in travel and tourism;
2. Evaluate potential challenges, threats and social-inequalities created by social technologies;
3. Critically review digital travel and tourism technologies;
4. Ascertain technology gaps in the travel and tourism industries;
5. Devise new travel and tourism technologies;
6. Propose digital technologies to an expert audience.

Subject Content

The digital disruption of tourism and travel;
Rethinking tourism communities and stakeholders in relation to the digital futures of work and society;
Opportunities, benefits, challenges and risks of digital technologies in travel and tourism;
Travel/tourism smartphone applications and their design and development;
Digitally enhanced attractions and destinations (including digital interpretation, and the use of augmented and virtual reality);
Digital travel experiences and destinations;
The future of transport and transit (including autonomous cars/buses/trains/planes, windowless planes, digital airports/hotels); and
Opportunities for understanding tourist markets with digital technology (including tourist/traveller tracking and ethical/privacy implications).

BUSM 3083 Global Sports Management

Credit Points 10

Coordinator Jess Richards (https://directory.westernsydney.edu.au/search/name/Jess Richards/)

Description Sport is a complex, multi-billion-dollar industry that attracts widespread global attention. However, the international nature of the sports industry presents many management challenges and opportunities for sports organisations. This subject explores the global nature of the sports industry and offers students insights into sports governance, tourism and marketing in an international context. Students will learn how governments and other organisations mobilise sport to achieve various social, cultural and financial outcomes that benefit both the business and the wider community.

School Business

Discipline Business and Management, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Learning Outcomes

1. Assess the strategy and performance of sports businesses and organisations in an international sporting market.
2. Critique the management of international sports for development and sports diplomacy projects.
3. Analyse the role of the international sporting federations responsible for managing sport integrity in a global context.
4. Evaluate strategies and current trends in sports tourism and mega-event management, drawing on international contexts and examples.

Subject Content

1. Governance, Corporate Social Responsibility (CSR) and diversity in global sports management
2. Role of international federations in managing sport
3. Socio-economic impacts of sports mega-events and tourism management
4. Social media, fan engagement and the marketing of global sport
5. Global sport for development programs and initiatives
6. Sport and international diplomacy
7. Current trends and future challenges in global sport management

BUSM 4001 Business Analysis Seminars

Credit Points 10

Legacy Code 200896

Coordinator Aila Khan (https://directory.westernsydney.edu.au/search/name/Aila Khan/)

Description This subject introduces students to exemplary research in selected contemporary issues in business practice and policy. Presented through a series of seminars by leading business academics, selected issues will be examined in terms of the competing definitions of the problem, the methods of analysis to be used to address the problem, components of the problems and relationships to other contemporary issues. As business research is inherently inter-disciplinary and involves multiple stakeholders, relevant and competing theoretical perspectives explaining selected issues will be examined. Different methods of investigation and analysis of issues will be evaluated.

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 4 subject

Restrictions

Students must be enrolled in program 8083 Bachelor of Research Studies/Master of Research.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Synthesise and critically evaluate contemporary business theories and practices
2. Demonstrate an advanced understanding of a range of theoretical approaches in business
3. Describe the inter-disciplinary nature of business research
4. Describe in detail and apply a minimum of two advanced quantitative analysis techniques
5. Communicate advanced knowledge of a research program to a general audience
6. Identify differing stakeholder groups and outline their engagement with contemporary business research
7. Critique academic debates in specific business research areas, outlining the different methods of investigation employed

Subject Content

This subject draws upon the varied discipline expertise of leading School of Business academics to present candidates with an overview of a variety of methods and methodologies employed in business research. Using contemporary research projects as case studies in research practice, candidates will first be introduced to the context in which the research is undertaken. This will be followed by an introduction to the theoretical framework the research is approached from and how this determined the data collection, analysis and interpretation that was undertaken. Methods of analysis that will be featured in this seminar series will include ANOVA, common factor analysis; correlation analysis; forecasting; linear, nonlinear and multiple regression; logit analysis; principal components analysis; structured equation modelling; time series analysis among others.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Presentation	3 minutes, 1 PPT slide	20	N	Individual
Essay	2000 words equivalent	50	N	Individual
Report	4 x 500 words (2000 words)	30	N	Individual

Prescribed Texts

- There is no set text for this subject ? a list of readings relating to the presented seminars will be presented on vUWS

BUSM 4002 Seminal Papers in Business

Credit Points 10

Legacy Code 200898

Coordinator Edward Mariyani-Squire (https://directory.westernsydney.edu.au/search/name/Edward Mariyani-Squire/)

Description The aim of this subject is to develop skills in applying rigorous analysis and critical assessment to research-debates in business disciplines through an examination of seminal literature in particular business fields which often embrace conflicting theoretical approaches. This will provide candidates with the advanced skills needed to critically analyse debates in a business discipline, while also enabling them to gain more familiarity with theories, issues, and problems in a particular research area. Seminal business papers will be analysed through a balanced and constructive critique of their strengths and weaknesses, providing suggestions for how the work might be extended or improved. From this subject, students will be able to apply the rigorous analytical skills to their own work.

Level Undergraduate Level 4 subject

Restrictions

Students must be enrolled in program 8083 Bachelor of Research Studies/Master of Research.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Present an overview of the main theories related to their planned research topic from scholarly journals and texts
2. Examine these authors’ perspectives on their topic and the arguments that they present
3. Critically analyse the style, structure, and content of the literature and debate and defend their critical analysis
4. Identify and critically analyse the philosophical, theoretical and methodological approaches of the research outlined in the literature
5. Identify and discuss gaps in the literature as it pertains to their research area
6. Employ scholarly conventions used in identifying and accessing information sources, summarising and analysing literature, compiling research reports and articles and in dissertation construction

Subject Content

Seminal debates in business theory will be presented by senior academics from the range of disciplines represented in the School of Business and by visiting scholars. Each seminar will outline the context of the original research contribution and then describe the ensuing debate, drawing also on contemporary work that is based on the developments of, or has arisen from original research. Each seminar will be followed by a workshop session discussing the presentation. The uniting strand of this subject will be a comparison of the debates from the different business disciplines with emphasis on how this knowledge should shape a critical review of the theories informing the candidate?fs planned research.

BUSM 7001 Advanced Research Skills

Credit Points 20

Legacy Code 200745

Coordinator Terry Sloan (https://directory.westernsydney.edu.au/search/name/Terry Sloan/)

Description Advanced Research Skills is designed for students who are undertaking Doctoral studies. This subject aims to equip participants with sound knowledge of research methods in business, their criteria for use, their basis of selection, their underlying assumptions and limitations, and their computational implications and processes.
The subject will introduce candidates to different methodologies in management research and will also provide in-depth study of particular methods that candidates are expected to use in their thesis, e.g. case studies, surveys, questionnaire design, conducting interviews and focus groups as well as qualitative and quantitative data analysis.

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Choose the appropriate methodology to investigate a research problem.
2. Develop data collection instruments that yield needed information
3. Set up data collection processes that yield acceptable participation and response rates.
4. Select appropriate analytical and statistical tools.
5. Interpret data analyses.

Subject Content

Scientific approach and method
Quantitative and qualitative research process
Reasoning with statistics
Survey questionnaire analysis
Experimental design
Developing and Analysis of Questionnaire data
Populations
Missing values
Distributions and Assumptions
Sampling procedures
Multiple comparisons
Grounded theory and Social Science fieldwork
Phenomenology
Post modernism
Feminist studies
Ethnography
Content and textual analysis
Triangulation
Multi method data collection
Multi method analysis

BUSM 7003 Applied Business Project

Credit Points 10

Legacy Code 200798

Coordinator Mahesh Enjeti (https://directory.westernsydney.edu.au/search/name/Mahesh Enjeti/)

Description This is a subject in which students will have individual responsibility for the timely completion of a significant project under the guidance of a member of the University's academic staff. Students will be required to take a real business issue or problem and apply the relevant theories, frameworks and/or concepts learned throughout the MBA. Projects should focus on issues that would be addressed by senior management within an organisation, and should apply a consultancy perspective. This is the capstone subject. Students should take it as their last subject of study.

BUSM 7004 Applied Project (Human Resources and Management)

Credit Points 10

Legacy Code 200954

Coordinator George Lafferty (https://directory.westernsydney.edu.au/search/name/George Lafferty/)

Description Applied Project (Human Resources and Management) is an integrated capstone subject that brings together the skills and understandings HRM and management students have developed during their course of study. The subject encourages HRM and management students to demonstrate their ability to solve multidisciplinary problems in relation to current and future issues that affect the application of human resource and management functions in contemporary workplace and industry contexts. The subject will also allow students to critically evaluate issues critical to these professional domains to determine and assess effective solutions. The topics are determined from year to year by discussions between the individual student, the subject coordinator and the student's chosen supervisor.

BUSM 7007 Business Communication Skills

Credit Points 10

Legacy Code 200817

Coordinator Huntley Evans (https://directory.westernsydney.edu.au/search/name/Huntley Evans/)

Description This subject is designed to assist students to enhance their ability to make written and oral reports suitable for presentation to employers and stakeholders in a modern business environment. More specifically, this foundation subject assists students to evaluate academic literature in various business contexts, to communicate effectively as an individual or within groups and to apply ethical practices in different business contexts. These traits can be applied in the workplace and any contemporary business environment.

School Business

Discipline Business And Management

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate Business program or 3693 Master of Engineering. The online offerings for this subject are only available to students enrolled in program 2770 Master of Commerce (Financial Planning), 2793 Master of Financial Planning and 2795 Graduate Certificate in Financial Planning.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Select appropriate sources from the library database;
2. Demonstrate the various types of written communication used in business and the different styles of communication required;
3. Demonstrate critical use of academic literature in business and economics having regard to both explicit and implicit assumptions, the logic of the arguments, and the appropriateness of the conclusions;
4. Effectively work individually or within groups to prepare business communications and essays;
5. Demonstrate knowledge of the pitfalls which can arise in business operations that span different cultures and different countries;
6. Identify cultural issues in academic and business contexts and make recommendations for improving practice.

Subject Content

1. Introduction to Business Communication
2. Business Writing: process, thinking, and techniques
3. Business messages, reports and proposals
4. Personality in communication: enablers and barriers
5. Group communication, teamwork, and leadership
6. Developing business presentations
7. Professionalism and speaking skills
8. Business communication ethics & culture
9. Employment communication & Interviewing skills
10. Group Presentations: Applications in Business

BUSM 7008 Business Internship

Credit Points 10

Legacy Code 200769

Coordinator Laurel Jackson (https://directory.westernsydney.edu.au/search/name/Laurel Jackson/)

Description The Business Internship is designed for students who want to gain industry experience and further their studies through a 10-week business internship. This Business Internship subject is based on a project style subject which requires students to undertake a research project in their chosen field whilst attending an industry based internship.

School Business

Discipline Business And Management

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects BUSM 7070 - Masters Project

Restrictions

Students must be enrolled in a postgraduate Business program and must have successfully completed 50% of subjects in their approved program of study. Permission of the Director of Academic Program is required before undertaking this subject.

Assumed Knowledge

Understanding of the business environment and organisational structures, business communications skills, business strategy, as well as substantial knowledge in the major discipline area.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate the links between theory and practical work environments by using appropriate theoretical frameworks to analyse novel workplace situations;
2. Develop your personal and professional communication and presentation skills;
3. Gain an understanding of workplace culture and identify behavioural characteristics necessary for working in a collegial work environment.

Subject Content

Students will work in conjunction with the subject Coordinator and an academic supervisor who is an academic expert in their area of specialisation. All internships must be approved by the subject Coordinator prior to commencing. The internship will involve a literature review, application of theory and techniques, methodological investigation and recommendations. Internships will be industry based and directly relevant to the student?fs area of interest. Students will meet with their Supervisor regularly throughout the study period and with the subject Coordinator, in a class environment, as defined by the subject guidelines.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

BUSM 7011 Business Operations and Logistics

Credit Points 10

Legacy Code 200838

Coordinator Muhammad Salman Asif (https://directory.westernsydney.edu.au/search/name/Muhammad Salman Asif/)

Description This subject introduces students to operations and logistics management theory and practice. Operations and logistics management is an important element of business strategy and it is integral to both service and manufacturing industries. Students will develop an appreciation of the latest trends in business operations and logistics management and the applications currently adopted in organisations and industries. They will also learn to apply quantitative techniques for formulating/analysing problems and providing recommended solutions. This subject provides an excellent foundation for further specialisation in logistics and supply chain management but also works well for students in general business operations programs.

School Business

Discipline Business Management

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects BUSM 7010 - Business Operations Management

Restrictions

Students must be enrolled in a postgraduate Business program, 3693 Master of Engineering, 3749 Master of Science, 3772 Graduate Diploma in Protected Cropping or 3773 Graduate Certificate in Protected Cropping

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the critical role of operations/logistics management plays in business organisations;
2. Explain the interactions between operations/logistics management and other aspects of a business enterprise with a view of managing competitive priorities and dynamic capabilities for the long term competitiveness;
3. Evaluate the characteristics of various operations and logistics environments and assess their impact on business;
4. Identify and apply a variety of latest quantitative/ qualitative techniques to tackle operations/logistics management problems and interpret the results from a business management perspective;
5. Apply the skills needed to design, develop and improve operations and logistics systems;
6. Identify and analyse business situations and feel confident making and implementing decisions based on quantitative/qualitative analysis, marketing considerations, behavioural, political factors and financial considerations;
7. Analyse the key features of global operations and logistics and discuss the relevance, managerial considerations, advantages and limitations in depth.

Subject Content

- introduction to Operations and Logistics processes analysis
- new Product and service design
- inventory management
- Supply chain management
- Forecasting and demand management
- capacity planning, constrain management and scheduling
- quality management, control and improvement
- Logistics Network design and information system management
- A Balance of manufacturing and service management
- Project management

1. Introduction to operations and logistics processes analysis

BUSM 7012 Business Project

Credit Points 20

Legacy Code 200829

Coordinator Peter Kavalamthara (https://directory.westernsydney.edu.au/search/name/Peter Kavalamthara/)

Description This is a 20 credit point subject over two Quarters, 20 weeks in total, 10 credit points in each Quarter. Business Project equips professionals to address contemporary challenges through research and applying knowledge developed in earlier units of study. This student-centred subject provides close supervision of research and analytical practices to enhance skill development and capacity to engage with problems confronting organisations, taking account of contexts and multiple stakeholders. Students will have scope to focus

on issues that are of particular concern to organisations or interest for their careers. As an integrating subject, it demands participants bring together their knowledge and curiosity to develop recommendations in a format that can showcase their achievements. In order to complete this subject, students must have studied this subject over two teaching periods.

School Business

Discipline Business Management

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate Business program or in program 3748 Master of Information Governance. Students in the following program must have successfully completed 60 credit points before undertaking this unit: 2764 Master of Commerce (Human Resource Management). Students in the following programs must have successfully completed 40 credit points before undertaking this unit: 2624 Master of Business (Operations Management) and 2725 Master of Commerce (Property Investment and Development). Students in program 2761 Master of Business Administration must have completed all core subjects plus 40 credit points of major subjects (i.e. a total of 80 credit points) and must obtain permission of the Director of Academic Program.

Assumed Knowledge

Understanding of the business environment and organisational structures, business communications skills, business strategy, as well as substantial knowledge in the major discipline area.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Develop a project proposal outlining a business plan for an in-depth investigation of a contemporary organisational challenge;
2. Analyse and interpret secondary data gathered from a range of sources, to assist in defining and refining the contemporary issue;
3. Apply theories, concepts and tools to the challenge faced by the organisation or industry;
4. Develop strategies based on the results of analysis of data considering stakeholder objectives and constraints, such as competitive pressures and regulation that demonstrate respect for ethics and diversity;
5. Develop insights into theory, research practice and challenges of leadership by assessing the significance of recommendations relative to the dynamic and complex nature of organisations in uncertain environments.

Subject Content

Students will work in conjunction with the subject Coordinator and an academic supervisor who is an academic expert in their area of specialisation. All projects must be approved by the subject Coordinator prior to commencing. Each project will involve literature survey, application of theory and techniques, methodological investigation and recommendations. Wherever possible projects should be industry based and directly relevant to the student?fs area of interest. Students will meet with their Supervisor regularly throughout the study period and with the subject Coordinator, in a class environment, as defined by the subject guidelines.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Proposal	1,500 words	30	N	Individual
Report	1,000 words	10	N	Individual
Report	4,000 words and 10 minute presentation	60	N	Individual

BUSM 7014 Compliance Management

Credit Points 10

Legacy Code 200776

Coordinator Premaratne Samaranayake (https://directory.westernsydney.edu.au/search/name/Premaratne Samaranayake/)

Description This subject comprises three modules that focus on quality management, risk management, and performance measurement and benchmarking. The quality systems module explores quality management principles, systems, and frameworks, and the role that quality management plays in creating customer value, improving competitiveness and enhancing organisational effectiveness. The risk management module examines the important risks that need to be managed by businesses, especially in a global business setting, and introduces common frameworks that can be used to develop risk management strategies. The performance measurement and benchmarking module elaborates upon the evolution of performance measurement frameworks and introduces approaches that can be used by businesses to assess the status of their business processes and enhance performance through benchmarking. It will draw upon the concepts and theories covered in the quality and risk management modules. All three modules incorporate aspects related to economic, social and environmental responsibility. Students are required to study all three modules.

BUSM 7016 Contemporary Organisation Behaviour

Credit Points 10

Legacy Code 200788

Coordinator Ataus Samad (https://directory.westernsydney.edu.au/search/name/Ataus Samad/)

Description Contemporary Organisation Behaviour has been designed to offer you tools which can help you manage people in an increasingly complex organisational climate. Therefore, the objectives of the subject focus on critically evaluating how organisations, groups and teams, and individual behaviour, can affect work performance and productivity. You will explore in depth a range of Organisational Behaviour variables using theory as the foundation for evaluation and/or research while developing skills in professional practice for communicating, collaborating and critically reflecting. You will have opportunities to relate and apply concepts to your work experience and context learning what might be most relevant to your future plans in management.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 8690 - Governance and Ethics

Incompatible Subjects LAWS 7009 - Commercial Law

Restrictions

Students must be enrolled in 2755 Master of Business Administration, 2762 Executive Master of Business Administration.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse corporate governance models and frameworks linked to responsible, accountable and transparent decision-making in organisations;
2. Evaluate different international models of corporate governance, and appreciate how different socio-political ideologies, corporate structures, legislation, policies and relationships support those models;
3. Argue the links between corporate governance, corporate social responsibility, ethics and sustainability;
4. Articulate understanding of Australian legal institutions, and recommend processes for compliance with corporations law;
5. Analyse corporations law from a comparative, i.e., international perspective, and recommend processes for compliance with international corporations law.

Subject Content

Corporate Governance, social responsibility and sustainability:
- Models of corporate governance, including strategic, monitoring and regulatory characteristics;
- Influence of socio-political ideologies on global corporate governance models;
- Corporate social responsibility and ethics frameworks in the global environment;
- Global economic contexts for sustainability.

Corporate Governance legal systems- Corporations law in Australia:
- International legal systems;
- Comparative Corporations law;
- Corporate governance and compliance;
- Corporate governance and due diligence.

BUSM 7023 Developing Business Expertise

Credit Points 10

Legacy Code 200790

Coordinator Laurel Jackson (https://directory.westernsydney.edu.au/search/name/Laurel Jackson/)

Description This subject addresses one of the key internal issues facing business today: understanding and using a range of business information to make strategic decisions. Students will use the knowledge gained from prior subjects to solve business problems, deal with unique situations or plan and manage changing circumstances. A multi-disciplinary approach to analyse business situations will be applied to enable students to recognise this inter-related nature of business disciplines. A simulated practice in the application of knowledge to complex situations will be applied to provide an experiential learning environment.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 2755 Master of Business Administration, 2757 Graduate Certificate in Business Administration, 2762 Executive Master of Business Administration.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of the basic methods of designing and managing internal business processes;
2. Demonstrate independent and interdependent learning in preparation for professional roles in management;
3. Apply aspects of process management to plan and manage changing circumstances;
4. Apply project management skills to achieve organisational objectives;
5. Critically evaluate the importance of introducing and maintaining quality standards from a multi-disciplinary approach.

Subject Content

- process analysis and design
- introduction to Project management
- Understanding Operations, capacity, costs and customers
- implementing and maintaining quality Issues
- business strategy
- value Proposition
- Integrate the relevant theories from prior units studied to identify organisational objectives (business, government, and/or not for profit) within changing circumstances

BUSM 7024 Developing Human Capital and Organisational Capability

Credit Points 10

Legacy Code 200827

Coordinator Louise Ingersoll (https://directory.westernsydney.edu.au/search/name/Louise Ingersoll/)

Description The subject equips students to lead human resource development initiatives by developing specialist knowledge and skills. Contemporary human resource development is studied within the context of strategic employment relations, challenges around talent management, the evolution of training and development in firms and in public institutions, and with some consideration of organisational learning. By working through stakeholder differences and labour market segments, students argue as they apply knowledge to different contexts. Through argument and application comes insight into critical perspectives on building human capability, career management and development, and current and future trends in human resource development in a number of countries.

BUSM 7025 Diversity, Labour Markets and Workforce Planning

Credit Points 10

Legacy Code 200828

Coordinator Michael Lyons (https://directory.westernsydney.edu.au/search/name/Michael Lyons/)

Description Demographic change, economic cycles and labour force participation patterns influence the manner in which HRM functions are conducted. This subject focuses on the way an organisation's external environment impacts on both strategic and workforce maintenance planning. The subject is designed to enable employment relations professionals and managers to plan for organisational sustainability, managing workforce-related risk, and growth. The emphasis on labour markets, workforce diversity and planning allows for accommodation of demographic changes, human capital shortages and economic cycles when planning for labour supply and labour demand requirements. While the aim is to identify gaps between the present and future human capital needs - and implementing solutions so the organisation can accomplish its mission, goals, and objectives - the difficulty of this systematic and proactive process increases with the complexity of an organisation and the longer the time horizon used in the planning.

School Business

Discipline Human Resource Management

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 8596 - Work and Society LGYA 4899 - Work Society and Labour Markets LGYA 4901 - Workforce Planning

Restrictions

Students must be enrolled in a postgraduate program or program 8083 Bachelor of Research.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe and explain the relationship between labour markets and HRM functions;
2. Analyse the implications of key demographic and economic changes impacting on the labour supply for workforce planning and workplace diversity;
3. Evaluate the merits of workplace diversity strategies to advance organisational and social objectives;
4. Develop workforce plans and HRM strategies that align with organisational goals;
5. Assess developments and innovations in management approaches to workplace diversity and workforce planning.

Subject Content

- labour markets: concepts, dimensions and diversity
- The Australian labour market: Trends, patterns and cycles
- international, Regional and industry labour markets

- labour market Disadvantage: causes and consequences
- labour market and workplace diversity
- workplace diversity strategies: from compliance to Integrating workplace diversity principles with HRM practices
- Workforce planning concepts: Alignment with HRM processes
- Workforce planning contexts: Demography, educational infrastructure and The economy
- strategic Workforce planning: Forecasting and planning labour demand and labour Supply

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

BUSM 7034 Foundations of Management

Credit Points 10

Legacy Code 200785

Coordinator Louise Kippist (https://directory.westernsydney.edu.au/search/name/Louise Kippist/)

Description Developing one's own professional skills, being able to assess and develop the skills of others, and astutely reading the environment, are core to high-achieving executives. Foundations of Management introduces new managers to the fundamentals of management. It takes an holistic view of the elements related to optimal performance of managers, drawing from and reflecting upon participants' experiences. The elements consist of the awareness of ones self as a manager, identifying and developing own management skills required for now and the future needed when working within a dynamic organisational environment. The focus is developing one's own management skills through the application of theory to management practice.

School Business

BUSM 7040 Governance, Ethics and Social Entrepreneurship

Credit Points 10

Legacy Code 200848

Coordinator Ayda Succarie (https://directory.westernsydney.edu.au/search/name/Ayda Succarie/)

Description There is a growing need for communities and not-for-profit organisations to maintain a degree of organisational and social sustainability, without recourse to philanthropy, government, or other sources of aid. This subject adopts business and entrepreneurial principles to identify and explain the management of a social venture, with a view to ensuring organisational and social sustainability. The subject provides an understanding of governance and ethical practice to support social outcomes.

School Business

Discipline Business and Management, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate Business or Information and Communications Technology program or in program 1870 Master of Chinese Cultural Relations, 1871 Graduate Certificate in Chinese Cultural Relations or 1872 Graduate Diploma in Chinese Cultural Relations.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe business structures and governance frameworks;
2. Compare models of governance in the context of business ethics and corporate social responsibility;
3. Critically reflect on the role of social innovation and the fourth sector to contribute to social entrepreneurship;
4. Evaluate the impact of social innovation and entrepreneurship in addressing social problems;
5. Identify the key elements required to lead, scale and grow a social enterprise.

Subject Content

1. Business and organisational governance frameworks
2. Models of corporate governance
3. Business ethics and corporate social responsibility
4. Business and society stakeholders and stakeholder management
5. Dimensions and scope of social innovation
6. Innovation and entrepreneurship to address social problems
7. Sustainability of business and leading for social sustainability
8. Planning, implementing and evaluating a social enterprise

Assessment

BUSM 7046 Innovation for New Markets

Credit Points 10

Legacy Code 200851

Coordinator Tendai Chikweche (https://directory.westernsydney.edu.au/search/name/Tendai Chikweche/)

Description Entrepreneurship, innovation and new markets are pertinent activities that have collectively become cornerstones of how firms grow and interact with society. This subject introduces students to issues, principles and frameworks associated with exploring opportunities and challenges that relate to these three activities. Emerging and new markets are examples of markets that represent opportunities and challenges for innovation and entrepreneurial activities. Through selected readings that emphasise key themes and issues, students will be exposed to an understanding of what constitutes entrepreneurship, innovation, new markets and market development, how they are influenced by the ever-changing business environment, an examination of opportunities that emerge as a result of changing technology and consumer expectations taking place in emerging and new markets. Emerging markets have become a key source of innovation in products, services and business processes which calls for an examination as to whether these can be extended to developed markets. The subject provides students with an opportunity for continuous practical experiential learning through collaboration with industry Launch Pad partners.

School Business

Discipline Business And Management

Student Contribution Band HECS Band 4 10cp

BUSM 7047 Innovation, Creativity and Entrepreneurship

Credit Points 10

Legacy Code 200792

Coordinator Hugh Pattinson (https://directory.westernsydney.edu.au/search/name/Hugh Pattinson/)

Description The aim of this subject is to provide students with the necessary skills to understand, execute and manage entrepreneurial innovation processes in firms/organisations, and be more prepared to succeed within an increasingly complex, global and highly competitive entrepreneurial environment. Firms/organisations of various sizes, including small and medium enterprises (SMEs) that are innovative and entrepreneurial provide vision, nurture creativity and idea management as part of their everyday activities and in seeking long-term sustainability.

School Business

Discipline Business Management

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 8997 - Innovation and Entrepreneurship

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Illustrate the importance of innovation and entrepreneurship in an applied enterprise and organisational (firm/organisation) context;
2. Examine management approaches that foster innovativeness and entrepreneurship in a firm/ organisation, both from a large and small (SME) perspective;
3. Engage in the process of identifying entrepreneurial opportunities, particularly those based on innovation;
4. Undertake a feasibility study and develop a new venture plan for the commercialisation of new research ideas, whereby both innovation and entrepreneurship are referred to and adopted as the core aspects of the study;
5. Evaluate the impact of contemporary and emerging themes related to innovation and entrepreneurship, in particular themes that underline the long-term sustainability of a firm/organisation.

Subject Content

The innovation process:
- the mindset of the entrepreneur;
- new venture planning/creation;
- business feasibility planning; and
- emerging Issues that directly and indirectly impact innovation and entrepreneurial processes.
Some of the emerging issues include: the (increasingly) stronger links between entrepreneurship and sustainability in its various forms, such as business/financial, social and environmental; the emergence of new technologies that help support innovation/ entrepreneurship, new business concepts, and changes in legislation.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Essay based on case study	1,000 words max.	30	N	Individual
Proposal "presented to a panel" format	2,000 words equivalent	30	N	Group
Feasibility study	2,000 words	40	N	Individual

- A collation of readings will be provided

BUSM 7048 Innovation, Creativity and Foresight

Credit Points 10

Legacy Code 200852

Coordinator Daniel Townsend (https://directory.westernsydney.edu.au/search/name/Daniel Townsend/)

Description Creativity is a systematic, logical process mixing imaginative and creative thinking. Ideation is a process for forming and relating ideas derived through creativity. Innovation seeks to take ideas through invention and entrepreneurial processes to create new economic and social value. Students will be exposed to a variety of brainstorming, creativity and foresight methods and tools, with emphasis on scenario planning methods. Students will be introduced to workshop development, moderation and management approaches and methods. Selected key themes on economic, social, technological, and sustainable development for Australia over the next 10-30 years will be analysed and developed through a scenario planning workshop process, with outputs mapped to business and social innovation and entrepreneurship thinking, and platforms. Students will also be exposed to creativity and foresight methods used by the Western Sydney University Launch Pad Business Technology Incubator.

School Business

Discipline Business and Management, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

BUSM 7053 International Finance

Credit Points 10

Legacy Code 51211

Coordinator Anil Mishra (https://directory.westernsydney.edu.au/search/name/Anil Mishra/)

Description This subject provides a comprehensive analysis and coverage of contemporary international finance by describing the international financial system, institutions and market practices; international finance theorems and their application; Euromarkets; international borrowing, lending and capital sourcing; measurement of foreign exchange risk; managing foreign exchange exposure; foreign currency derivatives, international investment; and globalisation and the MNC.

School Business

Discipline Business And Management

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate Business program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse and evaluate the benefits and disadvantages of the various exchange rate systems;
2. Evaluate the extent to which the theories of exchange rate determination explain exchange rate movements in today's globalised economy;
3. Apply the various tools and approaches for firms in hedging transaction exchange exposure, and recommend the most appropriate approach to hedging in a variety of economic and firm-specific circumstances;
4. Analyse the extent to which firms are exposed to economic or operating exchange risk, evaluate their systems in place to manage it, and recommend alternative approaches;
5. Analyse the issues and choices that arise with international investment;
6. Apply critical thinking, problem solving and presentation skills to individual and/or group activities dealing with international finance issues.

Subject Content

International Monetary System
Parity Conditions in International Markets
The Foreign Exchange Market

Foreign Currency Derivatives and Exposure
The Balance of Payments
International lending, borrowing and sourcing of Capital
International Investment
Risk management techniques
Globalisation and the multinational enterprise
Exchange rate Exposure

BUSM 7055 Internship

Credit Points 20

Legacy Code 200830

Coordinator Laurel Jackson (https://directory.westernsydney.edu.au/search/name/Laurel Jackson/)

Description This is a 20 credit point subject over two Quarters, 20 weeks in total, 10 credit points in each Quarter. Internship is designed for students who want to gain industry experience and further their studies through a 20-credit point business internship, conducted over two consecutive teaching sessions. This Internship subject is based on a 'project style' subject which requires students to undertake a research project in their chosen field whilst attending an industry-based internship. These highly sought after internships will be filled on a competitive basis.

School Business

Discipline Business Management

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate Business program. The online offerings for this subject are only available to students enrolled in programs 2770 Master of Commerce (Financial Planning) and 2793 Master of Financial Planning. Students in the following programs must have completed 60 credit points before undertaking this unit: 2793 Master of Financial Planning; 2770 Master of Commerce (Financial Planning); 2624 Master of Business (Operations Management) and 2764 Master of Commerce (Human Resource Management). Students in program 2761 Master of Business Administration must have completed all core subjects plus 40 credit points of major subjects (i.e. a total of 80 credit points) and must obtain permission of the Director of Academic Program before undertaking this subject.

Assumed Knowledge

Understanding of the business environment and organisational structures, business communications skills, business strategy, as well as substantial knowledge in the major discipline area.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Investigate a real business issue within a specific organisation/business.
2. Analyse and interpret secondary data gathered from a range of sources, to assist in defining the business issue.
3. Demonstrate the links between theory and practical work environments by using appropriate theoretic frameworks to analyse novel workplace situations.
4. Apply and apprise appropriate skills and knowledge to work productively in a relevant discipline-related business workplace.

Subject Content

The internship must be approved by the subject Coordinator prior to students commencing in it. Each internship will involve a literature survey, application of theory and techniques to an industry based problem, methodological investigation, reporting and recommendations. Internships will be industry- based and directly relevant to the student?fs area of interest. Students will work in conjunction with the subject Coordinator and an academic supervisor who is an academic expert in their area of specialization. Students will meet with their Supervisor regularly throughout the study period and with the subject Coordinator, in a class environment, as defined by the subject guidelines.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

BUSM 7059 Logistics Processes in Enterprise Resource Planning

Credit Points 10

Legacy Code 200836

Coordinator Premaratne Samaranayake (https://directory.westernsydney.edu.au/search/name/Premaratne Samaranayake/)

Description This subject introduces key logistics processes supported by modern ERP (Enterprise Resource Planning) systems, using an integrated process perspective of the firm. Each process within broader logistics processes provides the basis for executing logistics operations in a range of organisations across manufacturing, service and government sectors. Logistics processes are introduced through key process cycles including manufacturing, planning and control (MPC) in production planning, procurement cycle in purchasing, sales order processing in sales and distribution, and logistics execution. Cross-integration of these process cycles is also illustrated using various integrations among the procurement, fulfilment, production and warehouse management processes. Logistics processes are demonstrated using data, application and technical integration within an ERP system environment.

School Business

Discipline Business And Management

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate Business program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate understanding of key functional areas of logistics processes in manufacturing and service organisations;

2. Explain master data, organisational structures and functions within key functional areas of organisation for effective logistics operations;
3. Perform various planning, control and execution functions within broader logistics processes using an ERP system, based on several planning/execution strategies;
4. Describe how data, application and technical integration works across key functional modules of ERP system, using functional applications and information systems;
5. Apply concepts and principles of logistics processes when implementing re-engineered processes in broader supply chain practices across various industry sectors.

Subject Content

- introduction to business processes
- The procurement process
- The fulfilment process
- sales and Operations planning and demand management processes
- The material planning process
- The production process
- inventory and warehouse management processes
- process integration
- Logistics execution ? selected Topics

1. Introduction to business processes
2. The procurement process
3. The fulfilment process
4. Sales and operations planning and demand management processes
5. The material planning process

BUSM 7061 Managerial Economics

Credit Points 10

Legacy Code 200793

Coordinator Vivienne Saverimuttu (https://directory.westernsydney.edu.au/search/name/Vivienne Saverimuttu/)

Description This subject introduces students to the application of basic economic concepts to managerial decision-making and their use in a range of business environments. Students will learn how to apply microeconomic tools to common problems facing business managers, such as maximising profit, setting prices, creating efficient incentive structures, and selecting competitive strategies. Case studies are also used to demonstrate the value of microeconomic tools in making business decisions, and to foster the student's application of their learning to their own business environment.

BUSM 7070 Masters Project

Credit Points 10

Legacy Code 200280

Coordinator Hugh Pattinson (https://directory.westernsydney.edu.au/search/name/Hugh Pattinson/)

Description Masters Project is an integrated capstone subject that brings together the skills and understanding marketing students have developed during their course of study. The subject encourages students to demonstrate their ability to solve problems in relation to current and future issues within a marketing context in contemporary business. The subject allows students to critically evaluate issues relevant to their topic and assess effective solutions. The topics are determined by discussions between the individual student, the subject coordinator and the student's chosen supervisor.

BUSM 7071 Negotiation and Conflict Resolution Management

Credit Points 10

Legacy Code 200796

Coordinator Laurel Jackson (https://directory.westernsydney.edu.au/search/name/Laurel Jackson/)

Description Negotiation has become a strategic necessity for many firms wishing to survive and grow in today's increasingly competitive globalised economy. Negotiation and conflict resolution errors can be costly to direct and indirect stakeholders. As such, Negotiation and Conflict Resolution Management will provide theoretical frameworks for students to develop the practical skills needed to manage the negotiation and conflict resolution needs of any organisation. Through the use of role play and simulations, students will be required to analyse corporate data and apply strategies to create a negotiated agreement. It examines negotiation in different contexts including multiparty negotiations. Emphasis is also placed on causes of conflict and how to identify potential indicators, leading to an analysis of the different conflict modes and patterns.

School Business

Discipline Business Management

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 8695 - Negotiation for Managers LGYA 8696 - Conflict Resolution

Restrictions

Students must be enrolled in 5502 Graduate Certificate in Business Administration, 2755 Master of Business Administration, 2757 Graduate Certificate in Business Administration, 2762 Executive Master of Business Administration.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply negotiation and conflict resolution theories, including from an employment relations perspective;
2. Analyse and evaluate how local and international contexts inform negotiation and conflict resolution strategies;
3. Evaluate and apply conflict resolution strategies in the negotiation process;
4. Evaluate the role of ethics in the negotiation and conflict resolution process and outcomes;
5. Identify and assess the risks and potential outcomes of negotiated decisions;
6. Analyse corporate data and apply negotiation and conflict resolution strategies to create a negotiated agreement.

Subject Content

Negotiation and conflict resolution theory and strategy
Perception and communication
Fundamentals of Industrial Relations
Power and ethics
Relationships
Constituents
Coalitions and teams
Diversity management

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Reflective journal Individual - Engage in and critically reflect on process and outcomes of minor negotiation exercises	Maximum 1,000 words	35	N	Individual
Written Essay Group - Case Analysis – Analyse negotiations using theoretical frames	Maximum 1,500 words	30	N	Group
Practical/ engaged exercise/ role play - Major Negotiation Exercise- Individual plan and group negotiation	500 word plan and 30 minute role play	35	N	Both (Individual & Group)

Prescribed Texts

- Lewicki, RJ, Barry, B. and Saunders, DM. (2010) Negotiation, 6th ed McGraw Hill, New York.
- Fisher, R. and Ury W (2011) Getting to yes: negotiating agreement without giving in, 3rd ed, Penguin, New York.

BUSM 7072 New Venture Finance

Credit Points 10

Legacy Code 200849

Coordinator Kelly Liu (https://directory.westernsydney.edu.au/search/name/Kelly Liu/)

Description New Venture Finance introduces students to essential theories, frameworks, principles and requirements for understanding and seeking funding for new ventures, with a focus on investor philosophy. A dynamic approach to seeking initial and subsequent funding for developing innovations and entrepreneurship is emphasised in this subject, recognizing that most new ventures are not fully funded as they launch. The subject also explores approaches related to new ventures at the stage at which they are maturing into defined businesses. Students will be introduced to commercialisation and strategies for the development of business plans designed to seek funding and support.

School Business

Discipline Banking and Finance

Student Contribution Band HECS Band 4 10cp

BUSM 7073 One Hundred Days

Credit Points 10

Legacy Code 200797

Coordinator Sheree Gregory (https://directory.westernsydney.edu.au/search/name/Sheree Gregory/)

Description This integrative subject focuses on the first one hundred days of a business executive who has commenced in a new management role. Students will gain insights into the challenges facing managers today and develop the skills in leadership and management expertise that were introduced in earlier subjects. The premise of this subject is that regardless of their level of experience, all managers undertaking new responsibilities need to understand who the key stakeholders are and what the business' personnel practices, financial objectives and marketing strategies are. Students will be given scenarios covering a range of business environments and are

expected to problem solve these using the skills and knowledge learned in previous subjects.

School Business

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the characteristics of doctoral study and scholarly research;
2. Reflect on, explain and share the philosophical and practical differences of major research paradigms;
3. Critically assess what constitutes a theoretical contribution;
4. Critically assess the different methodological approaches in business research;
5. Demonstrate knowledge and skill to produce their own significant contribution to professional business practice and theory.

Subject Content

Aims, objectives and characteristics of doctoral study;
Philosophy of scholarly research in business
Epistemological and ontological differences of major research paradigms;
Differences in methodological approaches in business research;

BUSM 7076 Practice Management for Health Professionals (PG)

Credit Points 10

Legacy Code 400736

Coordinator Diana Messum (https://directory.westernsydney.edu.au/search/name/Diana Messum/)

Description This subject is aimed to introduce the student to the management issues in establishing and working in a clinical practice. While the subject will cover issues related to health professionals and public sector management, the focus of the subject will be on issues in private practice. The aim of the subject is to introduce the student to a wide range of topics, including an over view of health care funding in Australia, private and public health system, developing a business plan, different business structures, financial management, managing staff and occupational health and safety issues.

School Health Sciences

Discipline Business Management

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Compare and contrast the global components of the health care system within Australia, with particular emphasis on funding arrangements for private and public sector funding.
2. Identify the key elements of a successful business plan, extrapolating these into a small business in a health care profession.
3. Outline the essential elements in establishing a small business, including business viability and raising capital.
4. Discuss the key issues in financial planning of a small business, with particular emphasis on taxation, insurance and related issues.
5. Manage a budget, with consideration to the income and types of expenditure required.
6. Delineate different business structures and employment arrangements, including partnerships, associates and affiliates.
7. Discuss the issues associated with the employment of staff, including employer and employee obligations.
8. Explore concepts and roles of leadership and management styles.
9. Identify the occupational health and safety issues within a small business and formulate ways in which a practice can be managed according to these guidelines.
10. Formulate methods of monitoring successful practice including the development and implementation of policies and procedures.

Subject Content

1. Overview of the Australian health care system
- private Vs public sectors
- funding Models for health care in Australia
- Medicare
- health Insurance
2. Setting up a small business
- Raising capital
- developing A business plan
- developing A Marketing plan
- Risk analysis
- financial analysis
3. Financial Planning and Evaluation
- managing budgets
- capital Expenditure
- Recurrent expenses
- taxation and related Issues
- investment and finance
- funding, Loans and financial resources
- investment and capital growth programs
4. Business Structures
- company, Trusts etc.
- registering A company
5. Types of employee contracts
- rights and obligations of employers and employees
- Workcover and compensation
- Insurance Issues
- employee Vs affiliate Vs partner
6. Managing Staff
- management and competencies
- management styles and leadership
- employee relations
- staff Recruitment and selection
- staff retention
- performance management
7. Occupational Health and Safety Issues

BUSM 7078 Project Management

Credit Points 10

Legacy Code 51240

Coordinator Dilupa Nakandala (https://directory.westernsydney.edu.au/search/name/Dilupa Nakandala/)

Description This subject introduces students to the philosophy, tools and techniques for effectively managing projects in an organisation. Participants will be required to apply lessons learned to real-world situations and cases, developing their professional expertise in project management in ways that are relevant to their careers. Topics include organisational strategy and project selection; project definition and criteria of merit; tools and techniques; team leadership and management; development of project plans; estimation of time and resources; risk analysis and management; scheduling and control; resource allocation; project tracking; project closure and review. Participants will be expected to use MS Project as a project management tool.

BUSM 7083 Security Analysis and Portfolio Theory

Credit Points 10

Legacy Code 51212

Coordinator Heath Spong (https://directory.westernsydney.edu.au/search/name/Heath Spong/)

Description This subject examines the valuation of assets, firms and securities. The focus is on the attempt by active investors to identify mispriced securities through projection of a firm's future cash flows based on pro forma financial statements, translating those projections to values and dividing the firm value among the different security holders of the firm. Students develop their understanding of accounting, finance and economic concepts in this applied unit by building models of a firm and conducting analyses of the equity valuation.

BUSM 7086 Strategic Business Management

Credit Points 10

Legacy Code 200841

Coordinator Wade Azmy (https://directory.westernsydney.edu.au/search/name/Wade Azmy/)

Description This subject critically examines strategic management processes in various business, industry and economic contexts. Students actively participate in experiential learning focussing on strategic leadership, visioning, situation analysis, objective setting and evaluation. Students apply current strategy models and theories to solving industry-specific problems and scenarios. The teaching methods are application-oriented using a variety of engaging technologies and media which simulate real-world strategic problem-solving.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate Business or Information and Communications Technology program or be enrolled in program 3748 Master of Information Governance, 3772 Graduate Diploma in Protected Cropping or 3773 Graduate Certificate in Protected Cropping

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate the impact of the key elements of strategic leadership, ethics and corporate social responsibility in the formation of strategy;
2. Critically reflect on the strengths and weaknesses of various approaches to the strategic management process;

3. Synthesise theoretical knowledge in undertaking strategic analysis;
4. Create strategies using models and theories of sustainable competitive advantage.

Subject Content

1. Introduction to theoretical approaches to strategic management processes that contribute to competitive advantage
2. Strategic thinking and analysis
3. Strategic formation and The setting of patterns for action
4. Measures of business performance
5. The industry context
6. Business level strategy
7. Growth strategies in A multi-business context
8. Introduction to theoretical approaches to strategic management processes that contribute to competitive advantage
9. Strategic thinking and analysis
10. Strategic formation and the setting of patterns for action
11. Measures of business performance
12. The industry context
13. Business level strategy
14. Network level strategy
15. Growth strategies in a multi-business context

BUSM 7087 Strategic Employment Relations

Credit Points 10

Legacy Code 200722

Coordinator George Lafferty (https://directory.westernsydney.edu.au/search/name/George Lafferty/)

Description This capstone subject aims for students to acquire the skills, knowledge and understanding of the challenges of managing people strategically in complex and turbulent environments. The subject examines theories on business strategy, strategic management, human resource strategy and industrial relations strategy. The use of knowledge of Human Resource Management and Industrial Relations in strategic analysis and evaluation for transforming the people management function is explained. Management practice is considered through examining ways of acting strategically relative to tendencies for the human resource function to become mired in tactical responses. The tools and techniques for analysing, implementing and evaluating strategy are emphasised.

School Business

Discipline Human Resource Management

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects LGYA 8573 - Employment Relations Strategy and Change

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Knowledge of human resource management and industrial relations from studying at least 40 credit points at the postgraduate level.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain approaches to theories of organisational strategy and structure through contrasting a range of influential models;
2. Design strategies in relation to stakeholders and context using case examples;
3. Critically analyse various employment relations theories and models that seek to explain the processes of strategy formation;
4. Relate management, union and government policies to the wider strategic concerns of the organisation with special consideration of how strategic decisions are made and implemented;
5. Analyse the development and implementation of employment relations strategy within the environment of business planning and in relation to a specific organisation for organisational transformation;
6. Apply tools for strategy implementation and evaluation.

Subject Content

- strategic management
- human resource management strategy
- industrial relations strategy
- human resource Transformation
- human resource management, industrial relations and organisational change
- Practising strategy
- strategy evaluation: Balance Scorecard, human resource Metrics

1. Strategic Management
2. Human Resource Management Strategy
3. Industrial Relations Strategy
4. Human Resource Transformation
5. Human Resource Management, Industrial Relations and Organisational Change
6. Practising Strategy
7. Strategy Evaluation: Balance Scorecard, Human Resource Metrics

BUSM 7088 Strategic Management

Credit Points 10

Legacy Code 200794

Coordinator Mahesh Enjeti (https://directory.westernsydney.edu.au/search/name/Mahesh Enjeti/)

Description Strategic Management integrates business functional knowledge. The practical approach provides opportunities to use a range of strategic analysis tools and to engage in problem-solving (individually and collaboratively). Simulated strategic decision-making that includes data interpretation and generating options requires exercise of communication, research, and information literacy capabilities. This subject will allow MBA graduates to interpret data, generate strategic options and contribute to strategic decision-making in a number of organisational contexts.

School Business

Discipline Business Management

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects BUSM 7104 - Strategic Analysis and Decision Making

Restrictions

This is an integrated studies subject. Students must have successfully completed 70 credit points. Students must be enrolled in 2755 Master of Business Administration, 2757 Graduate Certificate in Business Administration, 2762 Executive Master of Business Administration.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Outline the development of strategy theory and practice;
2. Practice the skill of situational analysis using the insights gained from applying different theoretical lenses;
3. Apply knowledge from a range of functional disciplines in the interpretation of scenarios and the identification of options thus relating learning from other units in the MBA degree;

4. Develop an appreciation of the dynamic and contested nature of strategic management processes in organisational and industry contexts;
5. Critique the limitations of frequently cited theoretical explanations for organisation success and failure;
6. Analyse contemporary developments and practice in the field of strategy in the form of self-directed research (such as sustainability, governance, risk, ethics and innovation);
7. Critically reflect on strategic management as a process given the iterative and complex relationships between strategy, culture, ethics, structure, resources and environment.

Subject Content

- introduction to strategy
- strategic analysis (case method and tools of analysis)
- Theories of the firm [Industrial Organisation (I/O), Process Perspectives (OS), Resources Based Views (RBV)]
- contemporary Developments including knowledge based views (KBV) and integrated Models
- content of strategy (corporate, business, Network, international)
- contexts of strategy (organisational, international, industry)
- purpose (strategic reasoning, social responsibility, corporate mission and sustainability)
- Introduction to Strategy
- Strategic Analysis (Case Method and tools of analysis)
- Theories of the firm [Industrial Organisation (I/O), Process Perspectives (OS), Resources Based Views (RBV)]
- Contemporary developments including knowledge based views (KBV) and integrated models
- Content of Strategy (Corporate, Business, Network, International)
- Contexts of Strategy (Organisational, International, Industry)
- Purpose (Strategic Reasoning, Social Responsibility, Corporate Mission and Sustainability)

Assessment

BUSM 7090 Strategic Project Management

Credit Points 10

Legacy Code 301193

Coordinator Robert Osei-Kyei (https://directory.westernsydney.edu.au/search/name/Robert Osei-Kyei/)

Description This subject teaches students the importance of aligning projects with the business strategy. Strategic alignment is a two-way process. Overall business strategy guides project planning, and, in turn, project success drives enterprise strategy. Students understand the bigger-picture goals, how to identify what is being accomplished and why, and how to achieve goals. Other topics include measuring project success and portfolio and program management.

School Eng, Design & Built Env

Discipline Project Management

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in program 3752 Master of Project Management.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate theoretical understanding of organisational strategy and the principles of competitive advantage and align these to project management
2. Analyse a companyðfs mission, goals, and objectives, and develop a plan to ensure that project outcomes reflect an appropriate strategy
3. Evaluate critical success factors, use the principles of project portfolio management (PPM) to evaluate potential projects, and justify the selection of an appropriate portfolio that reflects company goals and objectives
4. Critically evaluate how project success can be quantified and measured, and construct a plan to allocate appropriate resources to the portfolio
5. Critically analyse project management and procurement strategies and critical success factors in the global business environment
6. Communicate effectively as a professional and function as an effective leader or member of a diverse team

Subject Content

Business strategy and its relation to projects
Mission, goals, objectives and processes to bring an organization?fs intended strategy to reality
Strategic choices and strategic management practices
Methods of aligning projects with strategy
Strategic evaluation and selection of projects to create a well-balanced portfolio
Critical success factors, financial evaluation criteria, and measuring project success
Procurement strategies
Strategic portfolio and program management

Managing projects in global context

BUSM 7092 Supply Chain Management

Credit Points 10

Legacy Code 200329

Coordinator Muhammad Salman Asif (https://directory.westernsydney.edu.au/search/name/Muhammad Salman Asif/)

Description With a rapid increase in global trade and increasing customer expectations, firms are under considerable competitive pressure to find cost-effective and creative ways of delivering value to customers. Since the creation of customer value needs to be viewed holistically - from raw material movement from suppliers through to transformation in the factory and then on to distributors and customers - the effective management of the supply chain and related business networks is critical to achieving competitive advantage. Through formal lectures, case study discussions, and assignments, this subject provides the foundational knowledge, tools, and techniques needed to participate in the design, implementation, and management of an effective supply chain.

School Business

Discipline Purchasing, Warehousing and Distribution

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate Business program, the Master of Research, 3752 Master of Project Management, 3693 Master of Engineering or 3749 Master of Science.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe supply chain and logistics processes and explain the underlying principles that support their effective management;
2. Elaborate on the role and importance of customer relationship management and its importance in developing an effective and efficient supply chain;
3. Identify the various elements of supply chain and logistics management processes and critically evaluate their role and interdependence in effective supply chain management;
4. Interpret, from a strategic perspective, the role and importance of supply chain management in enhancing competitive advantage;
5. Define and evaluate the networks and relationships present within supply chains;
6. Apply important tools and techniques for designing, operating and evaluating the performance of an effective supply chain management system.

Subject Content

1. 21st century supply chains and logistics management
2. Customer relationship management
3. Procurement and manufacturing
4. Integrated operations planning
5. Inventory management
6. Transportation, warehousing and packaging
7. Global supply chains
8. Network design and operations analysis
9. Collaboration and performance management
10. Risk and sustainability

BUSM 7105 Business Analytics in Practice

Credit Points 10

Legacy Code 201019

Coordinator Abdul Babar (https://directory.westernsydney.edu.au/search/name/Abdul Babar/)

Description This subject will explore and analyse ideas and concepts related to business intelligence and advanced analytics in business and broader economic contexts. The ability to identify, gather, extract, and analyse data is vital to organisations. Business analytics uses a variety of software applications to transform such data into useful information that can then be used for constructive decision making, improving operational effectiveness and efficiencies and identifying new business opportunities.

School Business

Discipline Business and Management, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects MKTG 7002 - Applied Marketing Solutions

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify which business problems require decision support from business analytics.
2. Determine reliability and validity of data and the business analytics methods used to address a business problem.
3. Recommend decision support systems while taking privacy, security and cultural issues into consideration.
4. Critically evaluate the tools and techniques used in developing business projections and performance reports.

Subject Content

1. Overview of business intelligence, analytics and decision support systems, focussing on broader functional applications.
2. Business intelligence, business reporting and business performance management.
3. Descriptive analytics.
4. Prescriptive analytics.
5. Introduction to advanced analytics techniques.
6. Business intelligence and analytics tools.
7. Data mining, text mining and web data analysis
8. Future directions for business analytics.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Report	2,000 words	35	N	Individual
Applied Project	1,500 words	35	N	Group
Presentation	15 minutes	30	N	Group

BUSM 7106 Ethics and Professionalism in Financial Services

Credit Points 10

Legacy Code 201037

Coordinator Sharon Taylor (https://directory.westernsydney.edu.au/search/name/Sharon Taylor/)

Description This subject will address the ways in which ethics play a pivotal role in professional behaviour. The process of professionalism is an integral part of management and is responsible for effective decision making. This subject considers the challenges in the financial services environment that require strong ethical values and professional judgement. Ethical decision making is a fundamental requirement of good business practice. This subject will consider the importance of ethics, the FASEA Code of Ethics, how to apply different ethical frameworks for decision making and the meaning of being a professional in financial services. This subject is available as a standalone bridging subject which is accredited by the Financial Adviser Standards and Ethics Authority (FASEA) having met the FASEA curriculum and standards requirements.

School Business

Discipline Business And Management

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program or students who have practical experience working in the financial planning industry and are currently registered on the national Financial Adviser Register (FAR) may take this subject as a non-award stand-alone subject in order to meet new education requirements as outlined by the Financial Adviser Standards and Ethics Authority (FASEA).

Assumed Knowledge

Students are expected to have practical experience working in the financial planning industry and be on the Financial Adviser Register.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of ethics, ethical behaviour and the importance of a code of ethics;
2. Critically review a variety of ethical frameworks and the ways in which they are used to apply professional standards;
3. Evaluate the fundamental principles of professional conduct and their role in a code of professional ethics;
4. Apply ethical frameworks to solve dilemmas that are encountered by advisers;
5. Demonstrate an understanding of professionalism and best practice;
6. Identify the importance of a financial adviserðfs duty to act in the best interest of the client;
7. Discuss the need for due diligence and the maintenance and storage of appropriate client records.

BUSM 7109 Environmental Management: A Business Perspective

Credit Points 10

Legacy Code 201081

Coordinator Muhammad Salman Asif (https://directory.westernsydney.edu.au/search/name/Muhammad Salman Asif/)

Description In this project oriented unit, students apply environmental management concepts within a business context. Students explore a range of practices and strategies to a sustainable business operation, learning why environmental sustainability is the world's most challenging and complex issue. As part of group work projects, students investigate methods and tools to analyse environmental management practices, determine environmental risks, and develop associated mitigation strategies. Additionally environmental management systems and relevant international standards are used to evaluate business environmental performance in real-world cases and emerging environmental management initiatives, such as the circular economy, natural capital accounting, and environmental and social profit and loss.

School Business

Discipline Business And Management

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

A basic understanding of core competencies of a business operation and literature review skills is desirable.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate current environmental challenges impacting business operations along with the methodologies and tools that may be effective in addressing these challenges to provide business competitive advantage.
2. Design appropriate environmental management, risk management and mitigation strategies for enterprises that highlight effective methods to minimise environmental impacts.
3. Apply systems & strategic thinking in addressing enterprise financial profit and loss scenarios and integrating the concept of the circular economy.
4. Collaborate with others on a real work project justifying analyses and recommendations.
5. Present a compelling business case in a range of formats to diverse audiences that demonstrates critical thinking, scholarship and integrity.

Subject Content

1. Overview and the current situation in environmental management
2. Challenges and opportunities of environmental management (UN sustainable development goals 2030)
3. Environmental Strategies, Theories, and Practices
4. Environmental management tools
5. Business environmental accounting
6. Green supply chain management
7. Life cycle assessment and carbon footprint labelling
8. Circular economy
9. Moving forward: natural capital accounting, environmental and social profit & loss, and ESG

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Report	2,500 words	30	N	Individual
Applied Project	4,500 words	30	N	Group

BUSM 7113 Leading for Social Impact

Credit Points 10

Description This subject provides students with an opportunity to explore the rising importance of leaders' impact on improving social outcomes through strategic decisions affecting various stakeholders. Specifically, this subject examines the social economy and social impact, models of leadership that can be used to maximise social impact, trends and drivers redefining the complexities of social impact, and strategies leaders can use to intervene more effectively to achieve social outcomes. Students will acquire critical leadership capabilities that equip them with knowledge and practical skills to achieve outcomes that enhance inclusive, responsible and equitable practices.

School Business

Student Contribution Band

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects BUSM 7051

Restrictions

Students must be in a postgraduate program to enrol in this subject.

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Critically discuss the contexts, complexities, and opportunities of leading for social outcomes in the for-profit, not-for-profit, and government sectors.
2. Apply advanced knowledge of social economy concepts and theories and their influence on responsible leadership practices.
3. Critically evaluate and apply relevant ethical and responsible social impact strategies that maximise positive organisational social outcomes.
4. Engage in leadership practice that respects and values Indigenous Australian peoples and communities, and their ways of knowing, being and doing.

Subject Content

- Leadership models
- Leadership and strategic planning.
- Social economy
- Leadership in the social economy
- UN Sustainable Development Goals
- Social impact practices and tools
- Social innovation
- Sustainability led innovation
- Social impact in the digital age

BUSM 7115 Environmental, Social and Governance Reporting

Credit Points 10

Description Environmental, Social and Governance reporting is not only an improved way for organisations to report on their performance to investors and other key stakeholders. It provides an internal framework for improved decision-making and has been developed to ensure more sustainable value creation in business operations. In this subject, students will work individually in syndicate groups to learn how to best utilise diverse Reporting Frameworks and integrate ESG considerations

into organisations governance and strategy. This will enable them to deliver responsible business decision-making and transparent reporting on Enterprise Value creation for the short, medium, and long term.

BUSM 7116 Business Project A

Credit Points 10

Description Business Project A is the first of two integrative capstone subjects. The capstone equips professionals to address contemporary challenges through research and applying knowledge developed in earlier subjects of study. This student-centred subject provides close supervision of research and analytical practices to enhance skill development and capacity to engage with problems confronting organisations, taking account of contexts and multiple stakeholders. Students will have scope to focus on issues that are of particular concern to organisations or interest for their careers. As an integrating subject, it demands participants bring together their knowledge and curiosity to develop recommendations in a format that can showcase their achievements. In Business Project A students develop a project proposal that is completed in Business Project B.

School Business

Student Contribution Band

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects BUSM 7012
BUSM 7055

Restrictions

Students must be enrolled in a postgraduate Business program.

Students in program 2761 Master of Business Administration must have completed 80 credit point and must obtain permission from the Director of Academic Program before undertaking this subject.

Students in program 2624 Master of Business (Operations Management) must have completed 40 credit points before undertaking this subject.

Assumed Knowledge

Understanding of the business environment and organisational structures, business communications skills, business strategy, as well as substantial knowledge in the major discipline area.

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Develop a project proposal outlining a business plan for an in-depth investigation of a contemporary organisational challenge.
2. Present complex ideas in a discipline-relevant or business context using professional communication skills.
3. Analyse and interpret secondary data gathered from a range of sources, to assist in defining and refining the contemporary issue.
4. Review theories, concepts and tools relevant to solving the challenge faced by the organisation or industry.

Subject Content

Students will work in conjunction with the Subject Coordinator and an academic supervisor who is an academic expert in their area of specialisation. All projects must be approved by the Subject Coordinator prior to commencing. Each project will involve literature survey, application of theory and techniques, methodological investigation and recommendations. Wherever possible projects should be industry based and directly relevant to the student's area of interest. Students will meet with their Supervisor regularly throughout the study period and with the Subject Coordinator, in a class environment, as defined by the subject guidelines.

BUSM 7117 Business Project B

Credit Points 10

Description Business Project B is the second of two integrative capstone subjects. The capstone equips professionals to address contemporary challenges through research and applying knowledge developed in earlier subjects of study. This student-centred subject provides close supervision of research and analytical practices to enhance skill development and capacity to engage with problems confronting organisations, taking account of contexts and multiple stakeholders. Students will have scope to focus on issues that are of particular concern to organisations or interest for their careers. As an integrating subject, it demands participants bring together their knowledge and curiosity to develop recommendations in a format that can showcase their achievements. In Business Project B students complete and report the project proposed in Business Project A.

CART 3001 Modernism

Credit Points 10

Legacy Code 101033

Coordinator Lorraine Sim (https://directory.westernsydney.edu.au/search/name/Lorraine Sim/)

Description This subject aims to introduce students to important works of literature from the earlier part of the 20th century. Throughout the course we will be concentrating on literature but will make reference to other art forms (in particular the visual arts) to provide the intellectual context necessary to understanding the ideas of the period. There will be a close study of a small number of important novels or works of poetry from the period, with a close consideration of techniques of writing and the way these techniques contribute to an understanding of the themes in the works.

School Humanities & Comm Arts

Discipline Creative Arts, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. demonstrate an understanding of Modernism and place it in intellectual, historical and artistic contexts;
2. demonstrate an understanding of certain key concepts and techniques important to the period; and
3. evaluate the importance of Modernist ideas and works in contemporary literature.

Subject Content

Nineteenth century influence on early 20th century practice: symbolism, realism
Ideas of artistic production
The impact of the visual arts on literature
Modernist Poetry
Modernist fiction: stream of consciousness
Modernist fiction: experimentation and tradition

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Short Answer	500 words	20	N	Individual
Essay	1,000 words	30	N	Individual
Essay	2,500 words	50	N	Individual

Prescribed Texts

- A book of primary readings prepared by the subject coordinator.

CART 6001 Writers at Work

Credit Points 10

Coordinator Tegan Daylight (https://directory.westernsydney.edu.au/search/name/Tegan Daylight/)

Description This subject introduces students to Australian writers currently at work in the industry. How do Australian writers juggle the business and creative aspects of writing? Where do they publish, what forms do their creative practices take, and how do they survive financially? The classes will be a mixture of guest lectures and interviews in which writers, editors and agents share their experience of writing industries. Students will be encouraged to actively engage with industry professionals, and to engage critically with the work of significant Australian writers.

School Humanities & Comm Arts

Discipline Creative Arts, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 6 subject

Equivalent Subjects CART 7020 - Writing Form

Restrictions

Students must be enrolled in 1831 - Master of Arts in Literature and Creative Writing or 8083 - Bachelor of Research Studies.

Learning Outcomes

1. Critique the ways in which different cultural contexts can shape and influence creative writing
2. Critically analyse the relationship between authors, publishers, editors and readers
3. Appraise the relationship between the economics of writing and publishing and writers' work
4. Conduct independent research and analysis on Australian writers and their texts, and critique their approaches to style and content

5. Demonstrate familiarity with different approaches to the practice of being an Australian writer

Subject Content

1. A close reading of the work of at least three significant Australian writers
2. The opportunity to meet and engage with at least three significant Australian writers
3. An overview of the writer's place in creative industries
4. The practice of being a creative writer
5. The economics of being a writer

Assessment

CART 6002 Reading and Writing Australia

Credit Points 10

Coordinator George Haddad (https://directory.westernsydney.edu.au/search/name/George Haddad/)

Description This subject will be a course of reading, taking in a variety of Australian narratives across the country's long cultural history. Students will look at art, oral storytelling, film, fiction, poetry and non-fiction, and use these texts as a jumping-off point or inspiration for their own work, simultaneously finding themselves in and creating new spaces in Australian narrative. The subject will consider Indigenous storying, urban and regional literatures, colonial legacies and how these shape aesthetics and narratives of belonging. Does Australia have a national literature, and if so, what does it mean to writers and readers in the 21st century?

CART 6003 Research Methods in the Creative Arts

Credit Points 10

Coordinator John Encarnacao (https://directory.westernsydney.edu.au/search/name/John Encarnacao/)

Description This subject investigates conceptual, theoretical and practice-based models used in Creative Arts Research. It introduces students to a variety of important methodologies, including empiricism, experimentation, practice-based research, performativity-as-method, and narrative inquiry. It also focuses on writing as a creative praxis that has an important relationship to all the creative arts. Methodologies will be explored through the analysis of various theoretical and conceptual models that are produced through and applied in creative work. The subject will include the production of a creative work, and a variety of strategies for analysing and documenting this and other creative work, including observation, participation, reflection, contextualisation and representation. The subject also examines the relationships between theory and practice, and it will look at the conditions under which creative arts research is produced, exploring its meanings, effects and affects. The subject is suitable for academic research students who intend to include some non-traditional research outcomes in their work.

School Humanities & Comm Arts

Discipline Creative Arts, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 6 subject

Assumed Knowledge

Successful completion of undergraduate degree and formal acceptance into the Master of Arts (Creative Arts).

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Produce a creative work that reflects their creative aesthetic
2. Identify practice-based, conceptual and theoretical models used in creative arts practice research
3. Evaluate creative arts practice as research
4. Interpret the objects of art in creative arts research
5. Explain the methods used by practitioners, theorists and empiricists in creative arts research
6. Produce a piece of exegetical writing as a draft for elements of the Masters project.

Subject Content

Students will produce a creative work that reflects their identified and chosen medium, choose methodologies and creative aesthetic, and read and discuss topics that include:

- practice-led research and non-traditional research outcomes (NTO)
- experimental aesthetics and speculative ontologies
- creative approaches to ethnography and auto-ethnography
- ficto-criticism
- writing and creative practice
- visual analysis
- critical and ontological design
- empirical musicology and music analysis
- theories of affect, attention and listening
- perspectives in digital arts research
- the roles of the virtual and the actual in the practice and reception of creative work
- performativity-as-method
- Indigenous perspectives in the creative arts

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Presentation	15 minutes	30	N	Individual
Professional Task	a) 3-6 minutes or 750-1,000 words, or equivalent, 15% b) 6-12 minutes or 1,500-2,000 words or equivalent, 25%	40	N	Individual
Essay	2,500 words	30	N	Individual

CART 6004 Creative Writing Practice

Credit Points 20

Coordinator Fiona Wright (https://directory.westernsydney.edu.au/search/name/Fiona Wright/)

Description This subject consolidates the student's journey towards producing an extended creative work in Year 2 for the Masters Project. Students are guided in responding to writing exercises set by their tutor and are given feedback on their writing practice. They explore and experiment within different forms and genres, including genres of fiction (such as the short story, the novel, YA fiction and auto-fiction), non-fiction (including the personal essay, environmental writing, memoir and the art of criticism) and poetry (including experimental narrative). This subject progresses towards writing and workshopping a lengthier creative piece, which will form part of the student's final assessment.

Level Postgraduate Coursework Level 6 subject

Equivalent Subjects CART 7002 Applied Practice in Literary Studies and Creative Writing

Restrictions

Students must be enrolled in 1831 Master of Arts in Literature and Creative Writing.

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Identify narrative conventions in a range of texts.
2. Write at a high level in a range of critical and creative forms.
3. Analyse ways that writers use language and form to generate meaning.
4. Generate a sustained creative work.
5. Critically reflect on your own work and the work of others through analysis, revision and editing.

Subject Content

1. Writing in response to focused creative exercises set by the tutor
2. The opportunity to experiment within a range of creative writing genres
3. The opportunity to share creative work with an experienced tutor and fellow students
4. The practice of critical reflection on one's own and others' work
5. Pathways to publishing – the opportunity to submit work to Australian journals and publishers

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Applied Project	2 x 500 words (or equiv.)	20	N	Individual
Applied Project	2,000 words of creative writing (or equiv., for poetry) AND 1,000 words of literary analysis of a literary text that resonates with your creative writing OR b. 3,000 words of literary analysis of a literary text of your choice	60	N	Individual
Peer Review	250 words AND verbal feedback to peers	20	N	Individual

CART 6005 Creative Methods in Research

Credit Points 20

Coordinator George Haddad (https://directory.westernsydney.edu.au/search/name/George Haddad/)

Description What is practice-led research, and how do its methods differ from more traditional research approaches? This subject familiarises students with methods of pursuing and presenting practice-led research across the disciplines of literary studies and creative writing. Working with experienced authors and researchers, students will have the opportunity to explore these methods in their own research or creative practice. The subject includes specific writing exercises that cover a range of practice-led research skills, such as using research databases, critical writing, and building research arguments using creative texts. Students will be guided to develop the skills needed to undertake their extended Masters Project.

School Humanities & Comm Arts

Discipline Creative Arts, Not Elsewhere Classified.

Level Postgraduate Coursework Level 6 subject

Equivalent Subjects CART 7001 - Applied Methods in Literary Studies and Creative Writing

Restrictions

Students must be enrolled in 1831 Master of Arts in Literature and Creative Writing.

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Write at a high level in a range of critical and creative forms.
2. Locate, assess and use appropriate critical resources.
3. Critically analyse and reflect on the significance of literary texts in imagining and interpreting the world, and in generating new knowledges.
4. Construct coherent, evidence-based arguments of literary scholarship.
5. Critique the range of methods used to produce good quality work of creative writing.
6. Engage critically with the writing practice of peers.

Subject Content

This subject will offer an overview of:

1. Methods of research and practice particular to literary studies;
2. Methods of research and practice particular to creative writing;
3. How scholarly research can direct the practice of writing;
4. How the practice of writing can inform scholarly research;
5. How engaging with techniques and writing exercises can develop both critical and creative practice

6. How examining the works of particular writers can open up an understanding of writing practice;
7. An understanding of the value of literature and writing and their role in society.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

CART 6006 Creative Non-Fiction

Credit Points 10

Coordinator Tegan Daylight (https://directory.westernsydney.edu.au/search/name/Tegan Daylight/)

Description This subject engages with the diverse and growing field of creative non-fiction. Students will read and analyse a wide range of non-fiction forms and subjects such as the personal essay, memoir, criticism, true crime, nature and travel. They will discuss various ethical complexities of telling true stories or representing 'truth', and address why creative non-fiction has become one of the most visible and rapidly growing genres in Australian and international publishing. Students will consider voice, form and point-of-view and produce a creative assessment with a view to pitching for publication in an Australian journal.

School Humanities & Comm Arts

Discipline Creative Arts, Not Elsewhere Classified.

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 6 subject

Equivalent Subjects CART 7019 - Writing Process

Restrictions

Students must be enrolled in 1831 Master of Arts in Literature and Creative Writing or 8083 Bachelor of Research Studies.

Assumed Knowledge

Students will be expected to have postgraduate level reading and writing skills.

Learning Outcomes

1. Write short creative works in the non-fiction genre.
2. Use drafting and editing processes to write effectively.
3. Critique the ways in which different cultural contexts can shape and influence creative non-fiction.
4. Analyse the effects of voice, form and point-of-view in creative non-fiction.
5. Critique the practice of 'truth-telling' in creative non-fiction.

Subject Content

1. Close reading of a variety of creative non-fiction texts.
2. Writing as a form of 'truth-telling'.
3. Exploring the ethical complexities and limits of creative non-fiction.
4. Understanding form, voice and point-of-view.
5. Writing creatively in response to prompts and exercises set by the tutor.
6. The opportunity to share creative work with an experienced tutor and fellow students.

Assessment

CART 6007 Writing and Genre

Credit Points 10

Coordinator Mette Jakobsen (https://directory.westernsydney.edu.au/search/name/Mette Jakobsen/)

Description In this subject, students engage with the conventions of genre writing, including (but not limited to) crime, fantasy, romance, historical and/or speculative fiction. Students will study a range of genre texts as a jumping-off point for their own work, gaining experience in the conventions of different genres as a pathway to producing a longer work in a chosen genre and form. The class includes collective workshopping and discussion with peers about drafts of written work. Students' work for final assessments will demonstrate

both an understanding of the conventions of a chosen genre and a willingness to challenge and extend them.

CART 7004 Art Therapy: Approaches and Applications

Credit Points 20

Legacy Code 102354

Coordinator Patricia Parish (https://directory.westernsydney.edu.au/search/name/Patricia Parish/)

Description This subject introduces the spectrum and variety of contemporary art therapy approaches, as they are taken up with and regarded by diverse participants in a range of community and clinical contexts. Students will critically consider how art therapy is applied and adapted to assist people with particular problems and categories of distress. The emergence and problematisation of clinical populations and client groups will be examined, with a view to developing an art therapy practice informed by critical psychological and social perspectives. An experiential component will provide practical experience in exploring art therapy processes and techniques by working in group situations led by experienced art therapists.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) CART 7005

Equivalent Subjects CART 7003 - Art Therapy Application to Client Groups

Restrictions

Students must be enrolled in 4595 Master of Art Therapy or 1770 Master of Social Science (Studies in Art Therapy)

Assumed Knowledge

Foundations of art therapy.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply understanding of the spectrum of contemporary art therapy theories and practices;
2. Appropriately adapt art therapy for diverse issues and clients in a variety of practice contexts;
3. Conduct immanent critique of art therapy professional practice, with particular regard to the positioning of clients and feedback from communities of concern such as client advocacy groups;
4. Develop observational, reflexive and facilitation skills needed to practice art therapy in a group context;
5. Reflect constructively on the art therapist's use of the self and art within the therapeutic relationship.

Subject Content

Consideration of a range of contemporary art therapy approaches, in relation to a variety of presenting issues, the diversity of clients, and the range of contexts for practice
Critical analysis of the relationships between theory & practice in a range of contemporary art therapy approaches
Critical psychological and sociological perspectives upon art therapy practice
Client perspectives on experiences of art therapy
Exploration of different art therapy processes and techniques in a group experiential learning context

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Proposal	500 words	10	N	Individual
Literature Review	2,500 words	40	N	Individual
Reflection	3,000 words	50	Y	Individual

CART 7005 Art Therapy: Histories, Theories, Groups

Credit Points 20

Legacy Code 101303

Coordinator Patricia Parish (https://directory.westernsydney.edu.au/search/name/Patricia Parish/)

Description This subject explores theories and practical experiences relevant to art therapy. Consideration is given to the major theoretical frameworks of art therapy, its historical development and group processes. There is a major experiential component which provides practical experience in exploring the process of art therapy by working in a group situation led by an experienced art therapist/s. The process will be explored and examined in relation to the self, to the self as artist and to therapeutic practice.

School Social Sciences

Discipline Creative Arts, Not Elsewhere Classified.

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects LGYA 7428 - Art Therapy Theory and Practice 1 LGYA 9676 - Art Therapy Theory and Practice 2

Restrictions

Students must be enrolled in 4595 Master of Art Therapy or 4617 Master of Social Science. Refer to the subject Outline for attendance requirements for experiential group sessions.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine the histories and practices of art therapy and its development as a profession, with particular critical attention to the postcolonial Australian context.
2. Describe and compare the major theoretical frameworks of art therapy.
3. Explore and analyse the connections between theory and practice in art therapy
4. Practice art making skills and techniques and reflectively analyse the centrality of, and demonstrate an understanding of their significance within art therapy.
5. Show awareness of the self in one's own art making and reflectively analyse the centrality of this to the practice of art psychotherapy.
6. Recognise and investigate the processes in art therapy in groups.
7. Practice and reflect on interpersonal sensitivity and self-awareness in the experiential training group.

Subject Content

1. Historical overview of the development of art Therapy in Australia, Europe & North America
2. The history of art therapy and its relationship to psychiatry, education and the visual arts
3. Analysis of art therapy in a neocolonial context
4. Consideration of art therapy as clinical practice
5. The relationship between theory and practice
6. Exploration of the relationship between art practice & art therapy
7. Exploration of art therapy group process
8. Art making practice within a group experiential learning context

Assessment

CART 7007 Creativity: Theory and Practice

Credit Points 20

Legacy Code 102376

Coordinator Sally Macarthur (https://directory.westernsydney.edu.au/search/name/Sally Macarthur/)

Description Research in communication arts utilises a range of investigative procedures appropriate to the theory and practice of each creative arts discipline. This subject will introduce fundamental research languages, methods, and outcomes relevant to the creative arts disciplines, and encourage students to develop approaches best suited to their theory and practice. Students will write and defend a research proposal and paper for a research program: the subject will enable students to apply a rigorous research framework to their work. Students will engage with a range of significant and critical texts which address the broad implications of practices and theories in creative arts disciplines.

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1827 Master of Arts (Creative Arts) or the Master of Research.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe and evaluate social, cultural and theoretical contexts for creative and analytic work.
2. Develop and apply appropriate writing skills for research papers.
3. Develop and demonstrate appropriate analytic and research skills through collegial discussion.
4. Develop and demonstrate skills in self-directed, arts-based research, and independent thinking.
5. Identify the relationship between creativity and theoretical work.
6. Critique the creative models used in creative arts practice.

Subject Content

Approaches to creative practice and research
Theories of culture and communication
Visibility and knowledge
Novelty and mimicry
Interfaces and affect

Contemporary aesthetics

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

CART 7010 Integrating Arts and Therapy

Credit Points 20

Legacy Code 102527

Coordinator Patricia Parish (https://directory.westernsydney.edu.au/search/name/Patricia Parish/)

Description This subject introduces art therapy students to an understanding of art psychotherapy theory through the lens of contemporary art and the translation of foundational psychotherapy knowledge and skills into art therapy practice. This subject builds on the micro skills of counselling and psychotherapy learned in Counselling Skills for the Allied Professions, through the scaffolded introduction and practice of art therapy clinical skills during intensive group work supported by staff. The subject also offers an opportunity for students to demonstrate their emerging understandings of art therapy by producing and exhibiting an artwork on a chosen aspect of the relationship between art and psychotherapy.

WELF 7032 AND
WELF 7029

Equivalent Subjects WELF 7005 - Counselling 2

Incompatible Subjects WELF 7010 - Foundations of Psychotherapy and Counselling 2 CART 7011 - Integrating Arts and Therapy

Restrictions

Students must be enrolled in 4595 Master of Art Therapy.

Assumed Knowledge

Concurrent or previous study of foundational subjects in counselling and art therapy.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Practice beginning skills in art therapy effectively with a range of client groups and issues.
2. Demonstrate art therapy skills in practice sessions in ways that will enhance the therapeutic relationship and the progress of therapy
3. Reflect constructively on their art therapy practice from multiple positions
4. Analyse significant critical connections between the theoretical frameworks of contemporary art and art psychotherapy
5. Analyse the significance of studio art practice for the practicing art therapist
6. Curate own or client artwork around a therapeutic issue or theme

Subject Content

1. In-class practice of art therapy clinical skills to address a range of client issues.
2. Reflection on the experience of art therapy practice from the positions of trainee practitioner, participant and observer, including close analysis of video recordings of practice sessions.
3. Exploration of the connections and tensions between the theories and practices of art psychotherapy and those of contemporary art.
4. Planning, documenting progress toward and exhibiting an artwork that researches an aspect of the relationship between art and psychotherapy.
5. Critical consideration of the role of the exhibition in art therapy, including the intersections of art therapy with arts-based mental health recovery and the ?earts in health?f movement.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Report	50 minute video recording plus 2,000 words (not including transcript)	50	Y	Individual
Portfolio	1,000 words plus 8 digital images	20	N	Individual
Applied Project	500 words + ongoing	30	N	Individual

CART 7013 Masters Project

Credit Points 40

Legacy Code 102255

Coordinator Kate Fagan (https://directory.westernsydney.edu.au/search/name/Kate Fagan/)

Description The Masters Project is the culmination of the Master of Arts in Literature and Creative Writing. Students will build up to being able to complete a long written project. For many students this will be a creative project (creative writing, or related media including music). This involves both the creative work (normally 11,000 words) along with an 'exegesis' that offers a critical overview of the ideas within it (4,000 words). Other students might choose to write a long critical essay in literary studies (15,000 words). There is no class work; rather, students work individually with a supervisor with significant expertise in the area in researching and writing their Project.

School Humanities & Comm Arts

Discipline Creative Arts, Not Elsewhere Classified.

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects LGYA 1660 - Masters Project

Restrictions

Students must have successfully completed 80 credit points in the MA in Literature and Creative Writing or submit equivalent approved academic credit.

Assumed Knowledge

Students are expected to have foundational knowledge of marketing theory and practice.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically read and review research literature in the field of their research
2. Compile a literature review of the field of their research
3. Organise and evaluate research material relevant to their project
4. Compose and present research thesis or creative project with research component.

Subject Content

- design A Critical or Creative Project with exegesis
- Compose long research essay or Creative Project with exegesis

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Thesis	15,000 maximum. In the case of creative work, the word length might vary depending on the creative form used with an exegesis of at a maximum of 4,000 words	100	N	Individual

CART 7014 Research Methods in the Creative Arts

Credit Points 20

Legacy Code 102375

Coordinator John Encarnacao (https://directory.westernsydney.edu.au/search/name/John Encarnacao/)

Description In Spring 2023, this subject is replaced by CART 6003 - Research Methods in the Creative Arts.This subject investigates conceptual and theoretical models used in Creative Arts Research. It introduces students to a variety of important methodologies, including

empiricism, experimentation, practice-based research, performativity-as-method, and narrative inquiry. It will also focus on writing as a creative praxis that has an important relationship to all the creative arts. Methodologies will be explored through the analysis of various theoretical and conceptual models that are applied in and produced through creative work. The subject will include a variety of strategies for analysing and documenting creative work, including observation, participation, reflection and representation. It will also examine the divisions between theory and practice, asking whether theory is in itself a practice that empiricism describes. It will look at the conditions under which creative arts research is produced, exploring its meanings, effects and affects.

School Humanities & Comm Arts

Discipline Creative Arts, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 20cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Assumed Knowledge

Successful completion of undergraduate degree and formal acceptance into the Master of Arts (Creative Arts).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify conceptual and theoretical models used in creative arts practice research
2. Evaluate creative arts practice as research
3. Formulate a practice of writing which describes creative arts research
4. Interpret the objects of art in creative arts research.
5. Explain the methods used by practitioners, theorists and empiricists in creative arts research.

Subject Content

Students will work on topics that include:
- experimental aesthetics and speculative ontologies
- collaborative arts practices
- writing and creative practice
- visual analysis
- critical and ontological design
- empiricism
- Intercultural research
- perspectives in digital arts research
- Understanding the visual
- performativity-as-method
- practice-led research
- Improvisation and research
- The multi-modal thesis
- Multi-disciplinary arts practices

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Presentation	1,000 words / 15 minutes	30	N	Individual
Professional Task	(a) 3-6 minutes / 750-1000 words or equivalent. (b) 6-12 minutes / 1,500-2,000 words or equivalent.	40	N	Individual
Essay	2,500 words	30	N	Individual

CART 7018 Writing Practice and Tradition

Credit Points 10

Legacy Code 102498

Coordinator Peter Boyle (https://directory.westernsydney.edu.au/search/name/Peter Boyle/)

Description This subject will consider the nature of writing in terms of both writing and editorial practice. It will involve the analysis of major works by writers (both of fiction and non-fiction) within particular traditions and communities and reflect on the themes of these works and the processes through which they emerge. It will explore the power of the word to shape our understanding of the world. This reflection will be both theoretical and practical.

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects CART 7016 - Word (Literary Traditions)

Restrictions

Students must be enrolled in 1831 Master of Arts in Literature and Creative Writing or 8083 Bachelor of Research Studies

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Theorise the expressive potentials of fiction or non-fiction writing
2. Characterise the role of the writer in editing and critiquing their own work
3. Characterise the role of external editors and publishers in the production of finished works
4. Analyse those elements within works which create engagement with audiences

5. Examine the processes of communication that occur in events that look to promote finished works
6. Apply ideas developed in the subject to the writing process

Subject Content

- Expressive form: its limits and potentials
- The editorial process: writing and re-writing
- writing to engage: creating connections
- The World beyond The page: publication process
- The idea of An audience
- engaging with The public

CART 7019 Writing Process

Credit Points 10

Legacy Code 102499

Coordinator George Haddad (https://directory.westernsydney.edu.au/search/name/George Haddad/)

Description In Quarter 4 2023, this subject is replaced by CART 6006 - Creative Non-Fiction. This subject will consider elements of the physical world around us: the phenomena we inhabit which form our sense of self. Focusing on literature and how meaning is created in literary form the subject will consider the interaction between the created world and the real world. It will focus on method and process in writing. In doing this it will engage with ideas from a number of areas, including science, philosophy, and literary theory in considering particular aspects of both our interaction with world, and how it shapes us, and the manner in which art shapes and forces itself upon the world. A specific theme related to the process of creation in art will be addressed.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects CART 7017 - World (Art and Nature)

Restrictions

Students must be enrolled in 1831 Master of Arts in Literature and Creative Writing or 8083 Bachelor of Research Studies

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply phenomological methods to the analysis of everyday experience
2. Characterise how conceptual approaches from the sciences might be integrated with artistic or cultural expression
3. Reflect upon the nature of the interaction between ideas and bodies
4. Generate a creative or criticial piece of writing that considers the nature of the interaction between the natural world and the worlds expressed in imaginative forms
5. Analyse the different and complimentary potentials of thinking in sicence and thinking in the arts
6. Contrast the descriptions of the world possible through art and science.

Subject Content

- physical phenomena and how we engage with them
- The interaction between science and The Arts
- The representation of embodied thought
- The idea of The World and its reflection in Creative forms
- Understanding through art, Understanding through science
- The feeling of ideas.

Assessment

CART 7020 Writing and Form

Credit Points 10

Legacy Code 102500

Coordinator Christopher Conti (https://directory.westernsydney.edu.au/search/name/Christopher Conti/)

Description In Quarter 2, 2023 this subject replaced by CART 6001 - Writers at Work. Literature has always involved playing with language and shaping words into specific forms. The European avant-gardes of the 1910s, 20s and 30s swept aside traditional forms and valued kinds of playing that many cultural institutions and aesthetic authorities of the times regarded as childish. This unit will examine the interactions of play and form in experimental writing. Taking the manifesto as a means for outlining the scope and parameters of experimentation, it will explore a variety of calls-to-action regarding writing and form, and reactions to these in a range of literary forms including short fiction, poetry, and the essay.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects CART 7015 - Search (Translation)
CART 6001 - Writers at Work

Restrictions

Students must be enrolled in 1831 Master of Arts in Literature and Creative Writing or 8083 Bachelor of Research Studies

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply theories of translation to the analysis of work from different cultures
2. Apply theories of translation to the analysis of different cultural forms
3. Theorise the role of creative expression in the projection of national identity
4. Reflect on the importance of translation to the Australian context
5. Use archival material (or material uncovered through research) to analyse how different cultural forms project national and cross-national identity
6. Examine the importance of searching or the quest to processes of cross-cultural communication.

Subject Content

1. Use and critically reflect on key elements of literary form studied on this subject.
2. Apply concepts of literary form to selected primary texts.
3. Examine the formal and narrative structures of select literary and critical texts.
4. Recognise the dynamic historical relationship between tradition and innovation.
5. Articulate the historical and cultural evolution of key literary forms, concepts and devices.
6. Demonstrate understanding of various interpretive approaches arising from literary criticism and theory.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Applied Project	3000 words (or equivalent) creative work and 1000-word essay, OR 4000-word essay	100	N	Individual

CART 7021 Writing and Ideas

Credit Points 10

Legacy Code 102497

Coordinator Charles Barbour (https://directory.westernsydney.edu.au/search/name/Charles Barbour/)

Description From Autumn 2024, this subject is replaced by CART 6007 - Writing and Genre. This subject will focus on a particular idea or concept that is of major importance to the diverse cultural, artistic and philosophical understandings we have of ourselves. It will then look to explore how the idea operates through these differing understandings and the problems it poses for representation. The theoretical and creative texts examined will focus both on the nature of the idea and how it might be better understood or made use of in creative practice.

CEDS 3001 Bridging the Gap: Re-engaging Indigenous Learners

Credit Points 10

Legacy Code 101756

Coordinator Madison Shakespeare (https://directory.westernsydney.edu.au/search/name/Madison Shakespeare/)

Description This subject is available to all undergraduate students who have open electives. Bridging the Gap: Re-engaging Indigenous Australian Learners will provide students with knowledge and skills to develop teaching strategies that will bridge the education gaps existing for many Indigenous Australian (Indigenous) learners. Students will gain knowledge of quality teaching frameworks to engage all learners and in particular Indigenous learners. The subject will also increase students' awareness of the complexities of the cultural inter-relationships between many Indigenous and non-Indigenous learners. The subject focuses on empowering students to effectively teach: Indigenous Australians; Indigenous studies in consultation with Indigenous communities; and assess as well as evaluate resources for use in teaching Indigenous studies.

School Humanities & Comm Arts

Discipline Education Studies

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Equivalent Subjects TEAC 1019 - Issues in Aboriginal Education

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. identify teaching strategies that will assist Indigenous Australians learners to improve their overall educational attainments;
2. use appropriate teaching and learning pedagogy and methodologies to engage Indigenous students;
3. interpret and explain the cultural differences between Indigenous and non-Indigenous learners;
4. explain the importance of teaching Indigenous Australian Studies and perspectives;
5. assess and evaluate resources and pedagogy for use in teaching Indigenous Australian Studies

Subject Content

- what are The historical and Critical education Issues for indigenous Australian learners
- indigenous Australian studies
- Critical education for indigenous Australians
- Indigenous Education Policy ? National; State; Indigenous Education Reports
- Pedagogical issues ? Indigenous perspectives in curriculum and building on what students bring to the education experience; differing models and strategies
- Teaching and learning methodologies / strategies to engage indigenous Australians
- communication ? both-ways / cross cultural communication, Integrating The Teaching of culture and The socio cultural aspects of Teaching
- Motivational strategies

- Assessing and Evaluating learning resources / materials for design / development of appropriate curriculum materials
- cross cultural partnerships for teachers and learners
- Educating The child ? Educating The whole community
- social inclusion for socially transformative Teaching - international comparative studies

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Presentation	1,200 words	30	N	Individual
Report	1,200 words (for the written part) and 10 minutes presentation (per student)	30	N	Individual
Essay	2,000 words	40	N	Individual

CEDS 7001 Education Policy, Practice and Global Knowledge Co-construction

Credit Points 10

Legacy Code 102160

Coordinator Michael Singh (https://directory.westernsydney.edu.au/search/name/Michael Singh/)

Description From 2020 students should note that core subjects are now taught in semesters rather than half yearly sessions. This subject explores the relationship between education and knowledge through reference to questions about the links between education policy practices and global knowledge production. The conceptual framework which provides the focus for this subject explores the dynamic, cyclical relations between the following: conditions of possibility for linking education policy practices and global knowledge production; contexts of negotiation/distance that affect this relationship; the modes of reception and rejection of the impact of linking of the two, and the mechanisms of connection that make this possible. These core concepts provide a focus for exploring questions about the relationship between 'education policy practices' and 'global knowledge production' in students' everyday work-life.

School Education

Discipline Education Studies

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically review concepts that explain what students know and do through their everyday professional practice that links 'education policy practices' and 'global knowledge production'.
2. Evaluate core and contributory concepts that address questions concerning the relationship between 'education policy practices' and 'global knowledge production'.
3. Investigate through active-learning and research, understandings and actions that relate education and knowledge, policy and production.

Subject Content

1. Overarching concepts: education policy practice and global knowledge construction
2. Core concepts: conditions of (im)possibility; contexts of negotiation/distance; modes of reception/rejection; mechanisms of (dis)connection
3. Contributory concepts: receptive leaders ; knowledge brokers; shared knowledge interests; reduced perception of distance; bridging perceived distance; connected histories; disciplinary boundaries; institutional boundaries; structural hierarchies; intellectual dependency/captive minds; rejection of difference; acknowledgement; positive affirmation; critical, creative and productive adaptation; mobility, person-to-person encounters, knowledge networks; shared communicational language; multilingual frame of reference

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Report: An evidence-driven analysis of key conceptual tools	2,500	50	N	Individual
Essay: A critique of concepts relating to education and knowledge production	2,500	50	N	Individual

CEDS 7002 So, You Want to Be an Academic?

Credit Points 10

Legacy Code 800210

Coordinator Anna Denejkina (https://directory.westernsydney.edu.au/search/name/Anna Denejkina/)

Description The knowledge labour market is tightening as more academics compete for the limited number of permanent and temporary positions available globally. Early career researchers must quickly adapt to established systems, increased workloads and sometimes stressful and changing work environments. They may be concerned about job security. The purpose of this subject is to introduce students to the world of academia, to assist them in developing the knowledge and skills required to thrive as early career researchers, and to establish networks that they can leverage in order to gain employment and be successful in their careers. Through an innovative model built on online activities and workshops, students will develop an understanding of the nature of academic work in Australia and around the world in the 21st century. Each student will partner with a mentor to develop time, project and people management skills, as well as mapping out networks to pursue near to and upon completion of the student's Doctoral (HDR) candidature.

School Graduate Research School

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) HUMN 7038 AND
HUMN 7005 AND
HUMN 7026 AND
HUMN 7037

Restrictions

Students must be enrolled in a Doctoral (HDR) program and 8111 - Graduate Certificate in Researcher Engagement, Development and Impact.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Plan for research and development as early career researchers;
2. Develop short and longer-term mentoring plans;
3. Explain their philosophy linking teaching and learning in higher education, with reference to academic literature;
4. Identify and apply for appropriate employment opportunities within academia;
5. Demonstrate skills required to self-manage research projects as early career researchers;
6. Reflect on own performance and identify own development needs.

Subject Content

- Identifying and developing mentoring relationships
- Developing a post-doctoral research plan
- Identifying employment opportunities within academia
- The role of the modern professional academic
- Project management in academia
- Time management and work life balance
- Teaching and learning in higher education
- Collaboration and teamwork in academia

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Reflection	1,500 words (2 entries x 750 words each)	S/U	Y	Individual
Report	2,000 words	S/U	Y	Individual
Portfolio	A - Research Plan (500 words) B - Mentoring Plan (500 words) C - CV (1,000 words).	S/U	Y	Individual

CEDS 7003 Research Methods in Education

Credit Points 10

Legacy Code 102824

Coordinator Erin Mackenzie (https://directory.westernsydney.edu.au/search/name/Erin Mackenzie/)

Description Research Methods in Education provides students with an introduction to educational research methods and data analysis. It enables students to develop their understanding of how research evidence can be used to improve educational practice and policy, and the challenges associated with the use of research evidence in education. The subject will develop students' knowledge and skills to design research instruments and analyse research data. This subject is designed to provide students with foundational research skills for their application to research and professional projects.

School Education

Discipline Education Studies

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Must be enrolled in 1726 Master of Education (Leadership), 1888 Master of Education (Leadership & Management), 1720 Master of Inclusive Education, 1723 Master of Education (Social Ecology), 1847 Master of Education (STEM)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse the role of research evidence in improving practice and policy in educational contexts.
2. Appraise theoretical paradigms and their influence on research design and methods.
3. Explain how a range of research designs (qualitative, quantitative and/ or mixed methods) can be applied to address educational research questions.
4. Explore qualitative and quantitative approaches to analyse educational data.
5. Explore the design of research instruments that are used to collect data in an educational context.
6. Evaluate the ethical frameworks impacting on research in education.

Subject Content

- how can research evidence be used to improve educational practice and policy?
- how are theoretical paradigms related to research design and methods?
- what are The characteristics of different research designs, and how can they be enacted in educational contexts?
- how can research data be collected and analysed?
- what are The Ethical Issues that need to be considered when conducting research in educational contexts?

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

CHEM 0001 Chemistry (WSTC Prep)

Credit Points 10

Legacy Code 700043

Coordinator Grant Boyd (https://directory.westernsydney.edu.au/search/name/Grant Boyd/)

Description This subject is a platform to introduce Chemistry to students. It introduces students to the basic concepts required to satisfy the needs of most first year university science subjects in both skill and content areas. It is intended that students will gain a greater understanding of the theoretical concepts covered in the subject by completing the practical component of the subject. Students will also be introduced to professional pathways in science.

School Western Sydney The College

Discipline Chemical Sciences, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 0 Preparatory subject

Equivalent Subjects CHEM 0002 - Chemistry (UWSC)

Restrictions

Students must be enrolled at Western Sydney University, The College.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and describe professional pathways in science.
2. Use the periodic table to make predictions about the physical and chemical properties of elements and the compounds they form.
3. Use equations to calculate relative quantities of reactants and products.
4. Describe the factors that influence the type and rate of chemical reactions.
5. Apply simple stoichiometric relationships.
6. Gather and analyse first and second hand data from scientific investigations and draw conclusions. This can be demonstrated by second hand data analysis in the intra session exams and final exam and by gathering first hand data in the practicals and writing up the practical reports.
7. Use appropriate terminology and reporting styles to communicate information and understanding

Subject Content

1.Introduction to the science learning community.
2.Professional pathways in science and the importance of a knowledge of the key concepts in chemistry and the development of practical skills to all Science majors.
3.Redox ? Electron transfer, oxidation states, half-equations, balanced redox equations, reduction potentials.
4.Periodic Table ? Arrangement of elements, electronic configuration, physical and chemical properties, groups 1,2,7 and 8, metals/non-metals, solids, liquids and gasses, trends in periodic properties.
5.Chemical Bonding - forces between molecules.
6.Chemical Reactions ? Why substances react, the rate of reaction, chemical equations.
7.Quantities in Chemical Reactions ? Reacting quantities, the mole concept, and solids, gasses and solutions.
8.Acids and Bases ? properties and reactions of acids, pH, volumetric analysis, Lowry-Bronsted theory, weak acids and bases.
9.Equilibrium ? Dynamic equilibrium, equilibrium constant ? position and effect of temperature, Ka, pH and K.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Poster	200 words including graphics	10	N	Individual
Short Answer	60 minutes	25	N	Individual
Practical Exam	3 x 2 hour practicals with 1 online submission	25	N	Individual

CHEM 1003 Essential Chemistry 1

Credit Points 10

Legacy Code 300800

Coordinator Janice Aldrich-Wright (https://directory.westernsydney.edu.au/search/name/Janice Aldrich-Wright/)

Description This subject provides an introduction to some of the essential knowledge, concepts and skills of chemistry, to serve the needs of students majoring in chemistry and those requiring a working knowledge of chemistry. Observable chemical facts and phenomena including structure, dynamics, and energetics, are explained in terms of current mathematical and visual models and further developed in Essential Chemistry 2. Evidence for chemical understanding is provided using IR spectroscopy, mass spectrometry, and computer molecular modelling. Laboratory skills relate theory to practice through the development of practical skills required to determine the concentration of an analyte using volumetric and spectrophotometric analysis.

School Science

Discipline Organic Chemistry

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Equivalent Subjects CHEM 1001 - Chemistry 1 CHEM 1011 - Principles of Chemistry CHEM 1004 Essential Chemistry 1

Assumed Knowledge

HSC Chemistry (2 unit) or HSC Multi-strand Science (3 or 4 unit) or equivalent. General Mathematics bands 5 and 6 or Mathematics band 4 or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain chemistry concepts accurately, clearly, and concisely, using an appropriate combination of everyday language with correct spelling and grammar; specialist chemical terms and notation; mathematics (equations, graphs); molecular-level representations; and labelled diagrams
2. Demonstrate competence in the manipulative laboratory skills and deductive skills involved in volumetric, spectrophotometric, and qualitative analysis
3. Calculate quantities using mathematical formulas, and expressing them with the appropriate number of significant figures, and in some cases, uncertainty
4. Describe an atom's chemical personality of by relating its position in the Periodic Table to its electron configuration, and ratio of effective nuclear charge Zeff, to average distance r of the valence electrons from the nucleus
5. Predict the physical properties of a substance based on its classification as a metal, ionic compound, molecular substance, or network substance and the types of intra- and intermolecular bonding involved.
6. Explain how IR spectra and data from mass spectrometry provide experimental evidence for the composition, connectivity (which atoms are bonded together), and formula for a compound.
7. Identify a reaction as an example of a Lewis acid-base reaction (complexation or proton exchange) or a redox reaction (electron exchange), identify the donors and acceptors, express the extent of reaction quantitatively in terms of the reaction quotient, Q, and predict the direction of reaction from the difference between Q and t

Subject Content

Atomic structure and periodicity
Pure substances - physical properties, structure and bonding
Lewis acid-base reactions (dissolving, precipitation, complexation, proton exchange) and redox reactions in aqueous systems
Introduction to chemical thermodynamics
Structure, shape and bonding within and between molecules
Colligative properties of solutions
Chemical systems at equilibrium, and open ?eliving?f systems
Chemical speciation and buffering in aqueous solution as a result of competitive equilibria
Stoichiometric concepts in volumetric and spectrophotometric analysis

Restrictions Students must be enrolled at Western Sydney University, The College. Students enrolled in Extended Diplomas must pass 40 credit points from the preparatory subjects listed in the program structure prior to enrolling in this University level subject. Students enrolled in the combined Diploma/Bachelor programs listed below must pass all College Preparatory subjects listed in the program structure before progressing to the Year 2 subjects.

Assumed Knowledge

HSC Chemistry (2 unit) or HSC Multi-strand Science (3 or 4 unit) or equivalent. General Mathematics bands 5 and 6 or Mathematics band 4 or equivalent. WSTC Prep chemistry.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain chemistry concepts accurately, clearly, and concisely, using an appropriate combination of everyday language with correct spelling and grammar; specialist chemical terms and notation; mathematics (equations, graphs); molecular-level representations; and labelled diagrams.
2. Demonstrate competence in the manipulative laboratory skills and deductive skills involved in volumetric, spectrophotometric, and qualitative analysis.
3. Calculate quantities using mathematical formulas, and expressing them with the appropriate number of significant figures, and in some cases, uncertainty.
4. Describe an atom's chemical ﷿epersonality﷿f by relating its position in the Periodic Table to its electron configuration, and ratio of effective nuclear charge Zeff, to average distance r of the valence electrons from the nucleus.
5. Predict the physical properties of a substance based on its classification as a metal, ionic compound, molecular substance, or network substance and the types of intra- and intermolecular bonding involved.
6. Explain how IR spectra and data from mass spectrometry provide experimental evidence for the composition, connectivity (which atoms are bonded together), and formula for a compound.
7. Identify a reaction as an example of a Lewis acid-base reaction (complexation or proton exchange) or a redox reaction (electron exchange), identify the donors and acceptors, express the extent of reaction quantitatively in terms of the reaction quotient, Q, and predict the direction of reaction from the difference between Q and the

Subject Content

1. Atomic structure and periodicity.
2. Pure substances - physical properties, structure and bonding.
3. Lewis acid-base reactions (dissolving, precipitation, complexation, proton exchange) and redox reactions in aqueous systems.
4. Introduction to chemical thermodynamics.
5. Structure, shape and bonding within and between molecules.
6. Colligative properties of solutions.
7. Chemical systems at equilibrium, and open 'living' systems.
8. Chemical speciation and buffering in aqueous solution as a result of competitive equilibria.
9. Stoichiometric concepts in volumetric and spectrophotometric analysis.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Practical Log/ Workbook	3 hours/week x 5 weeks	20	Y	Individual
Intra-session Exams x 5	30 minutes x 5	20	N	Individual
Intra-session Exam (Mid-term)	1.5 hours	20	N	Individual
Final Exam	2 hours	40	Y	Individual

CHEM 1005 Essential Chemistry 2

Credit Points 10

Legacy Code 300803

Coordinator Mark Williams (https://directory.westernsydney.edu.au/search/name/Mark Williams/)

Description This subject introduces an investigation of the reactivity of covalent molecules, in particular, of carbon-based compounds. Focusing on introductory chemical dynamics and thermodynamics, students will develop an in-depth understanding of the structure, nomenclature and reactivity of the principal organic functional groups, extending their basic principles of chemistry. They will also understand how molecules are synthesised and the ways they react being important in the function and role of chemistry in biological systems in our domestic and industrial worlds.

Level Undergraduate Level 1 subject

Equivalent Subjects CHEM 1002 - Chemistry 2 CHEM 1010 - Medicinal Chemistry CHEM 1006 - Essential Chemistry 2 (WSTC)

Incompatible Subjects LGYB 6352 - Biological Chemistry 12D

Assumed Knowledge

An understanding and competence with basic chemical principles including SI units, chemical symbols, formulas and equations, nomenclature, stoichiometry, the mole concept, bonding, molecular shape and polarity, states and properties of matter, thermodynamics, equilibria, acids and bases, pH and electrochemistry. General Mathematics bands 5 and 6 or Mathematics band 4 or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the structure and function relationship between organic molecules and their physical and chemical properties
2. Recognise and predict the product of the following organic reactions: a) Elimination reaction of alcohols and alkyl halides, b) Addition reactions of alkenes, alkynes, aldehydes and ketones, c) Substitution reactions of alcohols, alkyl halides and carboxylic acid derivatives, d) Redox reactions of alcohols, aldehydes, ketones, carboxylic acids and esters
3. Use experimental data to find the rate law and propose a mechanism for a chemical reaction
4. Explain the basic thermodynamic principles that govern chemical systems
5. Demonstrate competence in the manipulative laboratory skills and deductive skills involved in organic synthesis, thermodynamics and reaction kinetics
6. Record the results of their investigations demonstrating awareness of the conventions of scientific writing and graphical presentations
7. Apply and transfer chemical principles to other contexts such as biological systems

Subject Content

Introduction to Chemical Dynamics: reactions kinetics - 1st order chemical reactions; rate law and mechanisms of reaction
Introduction to Chemical Thermodynamics; Spontaneity of reaction; Entropy; Enthalpy; Hess?f Law
Organic chemistry: structure of principal organic functional groups, nomenclature, physical properties and structure; reaction types - addition, substitution, elimination, redox
Scientific method(s)
Setup and performance of a chemical synthesis, including setup and conducting a reflux, and distillation, use of separating funnel and recrystallisation, measurement of melting point, refractive index Measurement, graphing and analysis of data

Assessment

CHEM 1008 Introductory Chemistry

Credit Points 10

Legacy Code 300808

Coordinator Richard Thomas (https://directory.westernsydney.edu.au/search/name/Richard Thomas/)

Description The chemical sciences underpin our understanding in the environmental, forensic, health, medical, biological and physical sciences. This subject familiarises students with the fundamental principles of chemistry and how chemistry shapes the world around us. Students will be introduced to the concepts of atomic structure, the reactivity of substances, the Periodic Table, stoichiometry, and will learn about the structure and reactivity of substances and mixtures in different chemical environments, and exposed to different forms of electromagnetic radiation. Students will explore real world problems and apply the fundamental principles of chemistry to better understand how we may shape our own future.

Level Undergraduate Level 1 subject

Incompatible Subjects CHEM 1003 Essential Chemistry 1

Restrictions

NOTE: Only External students can enrol in a composite offering for this subject.

Assumed Knowledge

General Mathematics or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify key principles and concepts of general, inorganic, physical and electro chemistry.
2. Apply key principles and concepts of chemistry to identify, explain and examine the relationships between micro and macro chemical processes and observations in a number of scientific disciplines.
3. Conduct experiments and examine results to illustrate selected key principles and concepts of chemistry.
4. Safely handle and dispose chemical substances in lab environments.
5. Collaborate effectively in groups on experiments.
6. Communicate chemistry and chemical experiments to a range of audiences using scientific language, chemistry symbols, three - dimensional structures of compounds and conventions of general chemical nomenclature correctly.

Subject Content

1. Acquisition of Knowledge: demonstrating a knowledge of, and applying the principles and concepts of chemistry
2. Applications of knowledge: recognising that chemistry plays an essential role in society and underpins many industrial, technological and medical advances. Understanding and being able to articulate aspects of the place and importance of chemistry in the local and global community
3. Communication: presenting information, articulating arguments and conclusions, in a variety of modes, to diverse audiences, and for a range of purposes
4. Skills and applications of skills: synthesising and evaluating information from a range of sources, including traditional and emerging information technologies and methods; conducting experiments to illustrate key principles and concepts; incorporating qualitative and quantitative evidence into scientifically defensible arguments
5. Personal and Professional attributes: recognising the creative endeavour involved in acquiring knowledge, and the testable and contestable nature of the principles of chemistry; Demonstrating a capacity for self-directed learning; working collaboratively in teams.

CHEM 2001 Analytical Chemistry

Credit Points 10

Legacy Code 300832

Coordinator Andrew Shalliker (https://directory.westernsydney.edu.au/search/name/Andrew Shalliker/)

Description This subject provides insight into both classical methods of analytical analysis and an introduction to modern instrumental methods of analysis. Specifically, the classical methods of analysis include volumetric and gravimetric methods, while the modern instrumental methods include separation techniques and spectroscopy. The role of spreadsheets in data analysis and presentation is discussed and applied in the laboratory program.

School Science

Discipline Chemical Sciences, Not Elsewhere Classified.

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) CHEM 1008 Introductory Chemistry

Restrictions

Successful completion of 60 credit points

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain how analysis is both qualitative and quantitative.
2. Explain the importance of the correct use of analytical tools in quantitative analysis.
3. Apply appropriate numerical skills and use spreadsheets in order to improve the analysis of chemical information, to present the data in a table, graph etc. appropriate for scientific literature.
4. Perform experimental tasks on volumetric methods of analysis with attention to Occupational Health and Safety and risk assessments and to undertake the appropriate calculations to determine content.
5. Perform gravimetric methods of analysis and appropriate calculations to determine the concentration of chemical species present in a sample.

6. Explain the principles of separation and spectroscopic processes and its applications in the field of analytical chemistry.

Subject Content

1. An introduction to the objectives of analysis in analytical chemistry.
2. Sampling techniques, sample handling and preparation.
3. Understanding spreadsheet functions and screen interfaces of data analysis programs
4. Volumetric analysis and solution preparation including stoichiometric calculations.
5. Gravimetric methods of analysis and stoichiometric calculations
6. Separations, including HPLC, GC and CE.
7. Spectroscopy, including IR, UV, AAS and AES.
8. Challenges in the analysis of real samples

Assessment

CHEM 2006 Inorganic Chemistry

Credit Points 10

Legacy Code 300899

Coordinator Feng Li (https://directory.westernsydney.edu.au/search/name/Feng Li/)

Description This subject introduces students to a thorough study of coordination chemistry (discussing complexes, ligands, structure, isomerism, stability, reaction mechanisms, oxidation states, elements in the first transition series, coordination chemistry in biological systems). The subject then moves on to areas of fundamental inorganic chemistry, including bonding, and solid state chemistry. Advanced Modules cover the following topics: spectroscopy in coordination complexes, physiology and inorganic chemistry, and medicinal inorganic chemistry. This subject also introduces many of the laboratory techniques and equipment that are used in synthetic procedures in coordination chemistry.

School Science

Discipline Inorganic Chemistry

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) CHEM 1008 Introductory Chemistry

Restrictions

Successful completion of 60 credit points

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the properties and features of coordination compounds (coordination number and geometry; types of ligands; isomerism in coordination compounds; nomenclature; variable oxidation states; nomenclature; spectroscopy) and apply these concepts to other coordination complexes.
2. Differentiate the varied roles of metals in biochemical systems.
3. Recognise the strengths and weaknesses of various bonding theories in coordination chemistry and apply them appropriately (ligand field theory, molecular orbital theory, valence bond theory).
4. Apply a knowledge of solvent properties and evaluate their effect on chemical systems.
5. Describe the structures and properties of ionic and non-ionic solids.
6. Apply the fundamental principles of inorganic chemistry to advanced areas through the Advanced Modules.
7. Research the literature of coordination chemistry and relate this to experimental results within an experimental Report.
8. Demonstrate laboratory techniques and conduct experiments in the coordination chemistry laboratory, acquire experimental data, analyse and communicate in written format as result sheets or reports(s).
9. Identify, interpret and comply with safety requirements in relation to the use of chemical reagents and laboratory equipment.

Subject Content

1. Structure and Isomerism in Inorganic Chemistry
- Structures of inorganic and coordination compounds; coordination number and geometry; types of ligands; isomerism in coordination compounds; nomenclature.
2. Properties of Coordination Complexes
- Variable oxidation states; formation of complexes in solution; the chelate effect; hard and soft acids and bases; the first transition series.
3. Bonding in Inorganic Chemistry
- Introduction to bonding in inorganic and coordination complexes; ligand field theory; magnetic properties; electronic spectra; ligand field stabilisation energy; molecular orbital theory.
4. Bioinorganic Chemistry
- Introduction to bioinorganic chemistry; heme in hemoglobin, myoglobin and cytochromes; zinc enzymes; iron-sulfur proteins; bioinorganic chemistry of molybdenum; model compounds.

5. Solvent Properties
- Comparison between water and non-aqueous solvents; concepts of acid-base behaviour.
6. Inorganic Solids
- The structure of ionic solids; lattice energy calculations; the Born-Haber cycle; imperfection and conductivity in ionic solids; the structure of non-ionic solids.
7. Advanced Modules - Several Advanced Module topics will be used to review and analyse the principles covered in the six topics, and their applications in various areas of science.
- Spectroscopic Characterisation of Coordination Complexes - Characterisation using electronic spectra; infrared spectra; nuclear magnetic resonance spectra.
- Medicinal Inorganic Chemistry - Anti-cancer drugs; chelate therapy; diagnostic and therapeutic radiopharmaceuticals, medical imaging and coordination chemistry

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Practical	Report - approximately six pages long, including calculations and diagrams.	30	N	Individual
Quiz	20 minutes each	20	N	Individual
Final Exam	2 hours	50	N	Individual

CHEM 2008 Organic Chemistry

Credit Points 10

Legacy Code 300876

Coordinator Christopher Gordon (https://directory.westernsydney.edu.au/search/name/Christopher Gordon/)

Description Organic molecules are at the heart of the chemistry of life and industry. This subject builds on the fundamental chemical principles, exploring reaction mechanisms and the concept of reactivity and stereo- and regio-selectivity of many of the central reactions that form the basis of living processes, modern research, and contemporary industrial transformations. The subject contains a problem-based module on the application of spectroscopic methods to organic structure elucidation, focusing on spectroscopic data and a practical section on organic synthesis. The subject will focus on complex organic molecules including biologically relevant molecules, and examples from chemical industries, medicinal and pharmaceutical industries.

School Science

Discipline Organic Chemistry

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) CHEM 1012 Essential Chemistry

Restrictions

Successful completion of 60 credit points

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate how the bonding and electronic structure in organic molecules relates to some of the calculated physical and chemical properties
2. Recognise and predict the product of organic reactions outlined in the subject content based on theoretical concepts and examples of sustainable practical approaches by industry
3. Integrate scientific knowledge on the mechanism, regio- and stereo-specific organic reactions with experimental outcomes across the discipline to analyse and solve problems
4. Predict the mechanism involved in addition, elimination, and substitution reactions, based on the factors of kinetics and thermodynamics which influence these pathways
5. Analyse qualitatively and quantitatively the spectroscopic data (Infrared, UV and 1H Nuclear Magnetic Resonance (NMR) spectroscopy), particularly in the elucidation of organic structures
6. Describe enolate chemistry and its involvement in biochemical pathways like Citric Acid cycle
7. Conduct basic chemical investigations on synthetic techniques for organic compounds, individually and/or a member of a team, quantitative analysis of yield, determination of product purity using scientific instrumentation, identifying accuracy and reliability, carrying out risk assessments and conforming to safe laboratory practices
8. Communicate experimental data correctly in a Lab Report and/or record of the results of their investigations demonstrating analysis of data, awareness of the conventions of scientific writing with chemical mechanisms

Subject Content

1. Reactivity of organic compounds as a function of chemical structure, particularly electron distribution
2. Mechanisms of major organic reaction types including
- Addition reactions of alkenes, alkynes, aldehydes and ketones
- Substitution reactions of alcohols, alkyl halides and carboxylic acid derivatives
- elimination reaction of alcohols and alkyl halides
- Aromatic compounds and its resonance stability and effect on electrophilic Substitution reactions
- Redox reactions of alcohols, aldehydes, ketones, carboxylic acids and esters
and the factors of kinetics and thermodynamics which influence these pathways, formation of carbocations and carbanions and their stability.

3. Stereochemistry of organic molecules: enantiomers and diastereomers and reactions including
- Addition reactions (Halogenation, hydrogenation, hydrohalogenation)
- SN1 and SN2 reactions
- E1 and E2 reactions
- electrophilic Aromatic substitutions
4. Factors involved in substitution, addition, elimination and redox reactions of the major functional groups
5. Aromatic compounds, its resonance stability and the effect on electrophilic aromatic substitution reactions
6. Selection of specific reagents and manipulation of functional groups in controlled synthesis of important organic compounds
7. Structure elucidation of organic molecules using spectroscopy - UV, IR, 1H NMR
- Infrared (IR) spectroscopy will be used to identify The bond vibrations in common Functional groups, conjugation via UV spectroscopy and Basic concept of Nuclear Magnetic resonance (NMR) spectroscopy, structure elucidation using Chemical shifts and spin coupling.
8. Introduction to enolate chemistry and its involvement in biochemical pathways like Citric acid cycle

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Practical	100 words and chemical structures per Practical (x6); 200 words (x2) and chemical structures and mechanisms	30	N	Individual
Report	Mostly chemical structures and Part 2 - up to 1,000 words	15	N	Individual
Quiz	1.5 hours	15	Y	Individual
Final Exam	2 hours	40	Y	Individual

CHEM 2010 Physical Chemistry

Credit Points 10

Legacy Code 300849

Coordinator Gang Zheng (https://directory.westernsydney.edu.au/search/name/Gang Zheng/)

Description Physical Chemistry describes the fundamentals of energy changes in chemical systems (thermodynamics), the rates and mechanisms of chemical reactions (kinetics), and electrochemistry and/or ion and electron transport. These concepts will be applied to a range of chemical and/or biochemical processes. A major focus of the subject will be to develop the ability to study quantitative chemical/biochemical problems, and develop useful physical chemistry experimental and data-analysis skills.

School Science

Discipline Chemical Sciences, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) CHEM 1008 Introductory Chemistry

Restrictions

Successful completion of 60 credit points

Assumed Knowledge

This subject requires a knowledge of introductory concepts in differential and integral calculus.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply the First Law of thermodynamics to a system and its surroundings.
2. Explain the Second Law of thermodynamics and relate it to the physical meaning of entropy of a system.

3. Gather data, synthesise and calculate changes in state functions such as enthalpy, entropy, and Gibbs free energy.
4. Relate thermodynamic quantities to the potential of an electrochemical cell.
5. Determine rate laws from kinetic data and relate these to mechanisms and the determination of theoretical rate equations.
6. Conduct basic chemistry experiments, individually or as a member of a team, showing familiarity with scientific instrumentation, identifying accuracy and reliability, and carrying out risk assessments.
7. Analyse and communicate experimental data correctly in a Lab Report and/or record of the results of investigations, using the conventions of scientific writing.

Subject Content

1. The First Law of Thermodynamics and transfer of energy as work and/or heat due to some simple physical and biological processes
2. The difference between thermodynamically reversible and irreversible processes
3. Heat capacities, and the relationships between heat and enthalpy change
4. The Second Law of Thermodynamics, its applications, and the calculation of entropy of the system, and surroundings
5. Calculation of Gibbs free energy and their effect on (1) the direction of chemical change; (2) the equilibrium constant of a chemical reaction; and (3) the reversible potential of an electrochemical cell and/or ion transport across a biological membrane
6. Calculation of equilibrium constants using thermodynamic quantities, with applications to a range of chemical/biological processes, and how chemical equilibria are affected by changed reaction conditions and/or inter- and intramolecular interactions
7. Use of van't Hoff plots for calculating enthalpy and entropy changes
8. The relationship between thermodynamic quantities and the equilibrium potential of an electrochemical cell, and/or ion and electron transport in biological systems (for example, ion channels and ion pumps)
9. Thermodynamic nonideality and its modelling using activities and activity coefficients
10. Rate equations, reaction orders and rate constants and determination of simple rate laws from experimental kinetic data using integrated rate equations and initial rate methods
11. The relationships between reaction mechanisms and rate equations, and the effects of temperature on reaction rates
12. Use of the steady-state and pre-equilibrium approximations in a range of kinetic calculations; and/or enzyme catalysis and inhibition as illustrated by Michaelis-Menten model
13. Laboratory skills and techniques in the physical chemistry laboratory, including safety requirements
14. Simulation skills in physical chemistry

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Intra-session Exam	1.5 hours	20	N	Individual
Practical	Lab report about 200 words each (x5)	40	N	Individual
Final Exam	2 hours	40	N	Individual

CHEM 3001 Advanced Analytical Chemistry

Credit Points 10

Legacy Code 300925

Coordinator Andrew Shalliker (https://directory.westernsydney.edu.au/search/name/Andrew Shalliker/)

Description This subject builds on Analytical Chemistry 2 and focuses more on instrumental analysis, isolation and cleanup techniques and aspects of quality control and quality assurance in an analytical laboratory and in manufacturing are discussed. The instrumental methods covered include atomic spectroscopy (for example, atomic absorption and emission, x-ray fluorescence), molecular spectroscopy (for example, UV-Vis, IR, fluorometry, mass spectrometry), chromatography, electrochemistry, thermal methods and automated methods. The theory of the instrumental methods, their construction, operation and applications are covered. The theory and application of isolation and cleanup techniques in inorganic and organic residue analysis are given.

School Science

Discipline Chemical Sciences, Not Elsewhere Classified.

Level Undergraduate Level 3 subject

Pre-requisite(s) CHEM 2001

Equivalent Subjects CHEM 3006 - Analytical Chemistry 3 CHEM 3002 - Advanced Chemical Analysis

Restrictions

Successful completion of 120 credit points

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the role of analytical chemistry, classification of quantitative analytical methods, measurement of mass and volume, laboratory safety, laboratory notebook keeping, and the application of concentration units.
2. Explain the theory, instrumentation and application of: Atomic spectroscopy ? examples may be selected from flame and non flame atomic absorption spectroscopy, inductively coupled plasma (ICP) optical emission spectroscopy, ICP-mass spectroscopy, arc/spark emission spectroscopy, x-ray fluorescence. Molecular spectroscopy ? examples selected from UV-Vis spectroscopy, IR spectroscopy, molecular fluorescence. Potentiometric and coulometric methods - examples may be selected from voltametry and polarography, ion selective electrodes and biosensors. Overview of automatic instruments and instrumentation, flow injection analysis.
3. Explain the theory, instrumentation and application of chromatographic analysis focusing on liquid and gas chromatography. Other branches of chromatography may also be discussed.
4. Explain the theory, instrumentation and application of thermal methods which may be include examples from: Thermogravimetric methods, differential thermal analysis, differential scanning calorimetry, thermometric titrations.
5. Demonstrate understanding and explain selected topics covered from: the analysis of air, gases, water, soil, geological materials, ceramics, biological materials, metals and alloys, forensic toxicology and pesticide residues.
6. Explain the application of quality assurance and good manufacturing practice in industry and quality control in a registered laboratory. Application of analytical method development and validation as part of quality control. Implications of some analytical results reported.

Subject Content

1. Fundamental Aspects of Analytical Chemistry
- role of analytical Chemistry, Classification of quantitative analytical methods, measurement of Mass and volume, laboratory safety, laboratory notebook, Revision of concentration units.
2. Spectrochemical Analysis
3. Chromatographic Analysis
- theory, instrumentation and application of chromatographic analysis focusing on liquid and gas chromatography. other branches of chromatography may also be discussed.
4. Automated Methods of Analysis
- Overview of automatic instruments and instrumentation, flow injection analysis.
5. Specialised Methods of Analysis
- A more detailed Discussion of Topics which may be selected from The analysis of Air, gases, water, soil, geological materials, ceramics, Biological materials, metals and alloys, forensic toxicology and pesticide residues.
6. Aspects of Quality Assurance
- application of quality assurance and good manufacturing practice in industry and quality control in A registered laboratory. application of analytical method development and validation as part of quality control.

Assessment

CHEM 3003 Advanced Inorganic Chemistry

Credit Points 10

Legacy Code 300907

Coordinator Feng Li (https://directory.westernsydney.edu.au/search/name/Feng Li/)

Description Building on the foundations laid in Inorganic Chemistry, this subject focuses on structure and bonding in inorganic chemistry, and the stereochemistry of coordination complexes. Spectroscopic and magnetic properties of inorganic compounds are evaluated as a consequence of structure and bonding, and an introduction to X-ray methods for structure determination is given. Kinetics and mechanism of inorganic reactions are examined, and the area of bioinorganic chemistry is developed. Unique structures and reactions of organotransition metal chemistry are explored. Advanced Modules cover aqueous chemistry of cations and oxyanions, inorganic materials, molecular orbital theory in coordination complexes, group theory; lanthanides and actinides.

School Science

Discipline Inorganic Chemistry

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) CHEM 2004 OR
CHEM 2007 OR
CHEM 2006

Equivalent Subjects LGYB 9729 - Inorganic Chemistry 3 CHEM 3011 - Inorganic Chemistry 3 LGYA 6134 - Advanced Inorganic Chemistry

Restrictions

Successful completion of 120 credit points

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically contrast the bonding theories in coordination complexes (valence bond theory, ligand field theory, molecular orbital theory) and assess their strengths
2. Apply an understanding of kinetics and mechanism to reactions of coordination complexes
3. Contrast the various functions of metals in bioinorganic chemistry through a study of selected elements
4. Analyse the impact of stereochemistry of the varied roles of metals in inorganic compounds
5. Describe the structure and bonding of organo-transition metal complexes and apply this to their role in homogeneous catalytic cycles
6. Apply the fundamental principles of inorganic chemistry to advanced areas through the Advanced Modules
7. Research the literature of inorganic chemistry, including chemical databases such as SciFinder
8. Demonstrate laboratory techniques and conduct advanced experiments, integrating theory with practice, in the inorganic chemistry laboratory
9. Identify, critique and apply safety requirements in relation to the use of chemical reagents and laboratory equipment

Subject Content

1. Structure and Bonding in Inorganic Chemistry
- The nature of structure and bonding in Coordination and organometallic complexes.
2. Stereochemistry
- The range of stereochemistries adopted by Coordination and organometallic complexes.
3. Kinetics, Mechanism and Redox
- The use of kinetic measurements and other methods in deducing inorganic reaction mechanisms; the mechanism of substitution reactions in complex molecules; the way in which redox reactions may occur.
4. Bioinorganic Chemistry
- The role of transition metals and other main group elements in Biological systems.
5. Characterisation of Inorganic Compounds
- The use of spectroscopic, Magnetic and X-ray methods in characterising inorganic compounds.
6. Organotransition Metal Chemistry
- introduction to organotransition metal Chemistry, homogeneous organotransition metal catalysis, introduction to heterogeneous organotransition metal catalysis
7. Students also select one of Advanced Module A or Advanced Module B.
A) Advanced Module A
i) Aqueous Chemistry of Cations and Metallic Oxyanions
- Lewis acid behaviour of metal ions and the structures of hydrolysed species in solution; speciation
ii) Inorganic Materials Chemistry
- The Synthesis, structure and properties of A range of advanced inorganic materials
B) Advanced Module B
i) Molecular Orbital Theory in Coordination Complexes
- Introduction to Group Theory; the application of MO Theory to coordination complexes
ii) Lanthanides and Actinides
- Structures with high coordination numbers; chemistry of the lanthanides and actinides; applications of lanthanides and actinides

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Practical	Report is approximately six pages long including calculations and diagrams	30	N	Individual
Short Answer	10 x questions	10	N	Individual
Final Exam	2 hours	60	N	Individual

CHEM 3004 Advanced Organic Chemistry

Credit Points 10

Legacy Code 300906

Coordinator Kamali Kannangara (https://directory.westernsydney.edu.au/search/name/Kamali Kannangara/)

Description This subject builds on the reactions learnt in the subject Organic Chemistry, extending the range of C-C bond forming reactions to include the most significant in modern synthesis. In the second stage students learn to develop multistep synthetic strategies to produce target molecules using their level 2 organic chemistry and the reactions above. Structural analysis by mass spectroscopy and more advanced NMR techniques is also investigated. The students use this chemistry in a lab course designed to highlight a number of these concepts (including the synthesis of 2 pharmaceutical compounds and a team experiment) and to extend their range of practical skills.

School Science

Discipline Organic Chemistry

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) CHEM 2008

Equivalent Subjects LGYA 6141 - Drug Design and Synthesis CHEM 3013 - Organic Chemistry 3

Restrictions

Successful completion of 60 credit points

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply relevant knowledge to major carbon-carbon bond forming reactions in organic chemistry
2. Analyse information on a range of chemical reactions and the reagents, solvent and conditions to predict the structure of reaction major product and by-products
3. Analyse and apply scientific knowledge to solve problems on the mechanism, regio- and stereo-specific organic reactions with experimental outcomes across the discipline
4. Explain reactions of simple heterocyclic systems
5. Analyse and interpret qualitatively and quantitatively the spectroscopic data (Infrared, UV and 1H,13C Nuclear Magnetic Resonance (NMR) spectroscopy and mass spectral data) to elucidate the organic molecular structures
6. Successfully plan and conduct basic chemical investigations on synthetic techniques for organic compounds carrying out the risk assessments and conforming to safe laboratory practices, either individually or a member of a team
7. Generate a formal Lab report and/or record of the experimental data, by interpreting data with an awareness of the conventions of scientific writing with chemical mechanisms, critiquing the methodology, accuracy and reliability of data and proposing strategies to improve

Subject Content

1. Nucleophilic C-C bond forming reactions
2. C-C bond formation via palladium coupling and ring closing metathesis
3. C-C bond formation via orbital symmetry controlled reactions
4. Introductory heterocyclic chemistry
5. Spectroscopy (IR, UV, Mass & 1H and 13C NMR)
6. Synthetic design
7. Total organic synthesis

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Practical	300 words in total for the lab report (10%); Lab report on multi-step synthesis up to 1,000 words including chemical structures (15%); A 3-minute oral presentation of a single PPT slide relevant to organic synthesis (5%).	30	Y	Individual
Short Answer	Up to 100 words and chemical structures	5	N	Individual
Short Answer	1 hour, an individual assignment under supervision during week 11, to be scheduled during the lecture time	10	N	Individual
Intra-session Exam	1 hour	15	Y	Individual
Final Exam	2 hours	40	Y	Individual

CHEM 3005 Advanced Physical Chemistry

Credit Points 10

Legacy Code 300926

Coordinator Allan Torres (https://directory.westernsydney.edu.au/search/name/Allan Torres/)

Description Advanced Physical Chemistry builds on the fundamental principals of energy changes in systems (thermodynamics), and the rates and mechanisms of reactions (kinetics) learnt in Physical Chemistry and extends this so that students gain an understanding of more advanced topics in this field of chemistry such as polymers, colloids, surfaces, quantum principles and spectroscopy. This subject also will strengthen student's problem solving skills in quantitative chemical analysis, develop experimental techniques and advanced data-analysis skills.

School Science

Discipline Chemical Sciences, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) CHEM 2010

Equivalent Subjects CHEM 3015 - Physical Chemistry 3

Restrictions

Successful completion of 120 credit points

Assumed Knowledge

An understanding of and competence with the basic principles of physical chemistry including states and properties of matter, thermodynamics, chemical equilibria, kinetics and electrochemistry.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse numerical problems in physical chemistry and explain various physical chemistry principles.
2. Demonstrate the use of mathematical models for a range of applications in physical chemistry.
3. Demonstrate enhanced laboratory skills, with a particular emphasis on occupational health and safety, risk assessments and the careful and systematic collection of numerical data.
4. Apply the theory of synthetic, mechanistic, thermodynamic, kinetic and material properties to polymer and surface chemistries in research and industry.
5. Apply the theory of physical chemistry to practical applications in other disciplines or subdisciplines; for example, analytical, industrial and environmental chemistry, geochemistry, nanotechnology, biochemistry.

Subject Content

1. Polymer chemistry: three dimensional structure, molecular weight and distributions, polymerisation processes and polymer characterisation.
2. Colloidal systems: classification, preparation, purification, and characterization, electric double layer, zeta-potential and stabilization.
3. Surface chemistry: surface tension, contact angles, capillary condensation and rise, Gibbs surface free energy, and surface excess, micelle formation, thermodynamic behaviour of bubbles, droplets, and crystallites. Applications of surface chemistry in industry and the environment.
4. Interfacial properties: adhesion, and spreading, adsorption (chemisorption and physisorption) models for adsorption.
5. Quantum Principles: Wave nature of matter and Schrodinger model of atoms, atomic and molecular orbitals.
6. Spectroscopy: Connection to quantum principles, interactions of electromagnetic waves and matter and various analytical methods for probing structure such as uv/vis, infrared and nuclear magnetic resonance (NMR) and magnetic resonance imaging (MRI),

Special Requirements

Essential equipment

Students are required to have laboratory coat, appropriate shoes and eye protection.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Report	Up to 1,000 words	30	N	Individual

CHEM 3008 Biodevices

Credit Points 10

Legacy Code 300890

Coordinator Bill Price (https://directory.westernsydney.edu.au/search/name/Bill Price/)

Description This subject replaces 300414 - Biodevices from Autumn 2014. The subject will investigate nature's nanomachines; lipids, DNA and proteins. The students will learn how only a few basic building blocks can self-assemble into more complex structures, which in turn self-assemble into more complex hierarchical structures from which one can build biodevices. These fascinating self-organising supramolecular structures generally involve some kind of non-covalent binding. Particular emphasis is placed on the underlying principles that govern the functioning of such machines and some coverage of the modelling of such processes using techniques such as statistical thermodynamics is given. Biological computing is also covered.

School Science

Discipline Chemical Sciences, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Equivalent Subjects LGYA 6025 - Biodevices

Restrictions

Successful completion of 60 credit points at Level 1 or 2.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explicate many of the biodevices provided by Nature
2. Summarise the various biomolecules that biodevices are constituted from.
3. Understand self-organisation and supramolecular structures in nature.
4. Interpret and model some of the underlying processes that control biodevices using statistical thermodynamics and the lattice model.
5. Describe and explain biological computing.

Subject Content

1. Nature's nanomachines.
2. Understanding of structure and functions of lipid, DNA and proteins with respect to biodevices.
3. Supramolecular chemistry and how it translates to everyday concepts.
4. How does nature form self-organising supramolecular structures?
5. How ion channels work.
6. Applications of ion channels as biological sensors.
7. How to make a biological computer and its advantages over silicon-based super computers.
8. The future of biodevices and their limitations.
9. What thermodynamics and modelling can tell us with regard to the design of biodevices.

CHEM 3010 Forensic Chemistry

Credit Points 10

Legacy Code 300868

Coordinator Val Spikmans (https://directory.westernsydney.edu.au/search/name/Val Spikmans/)

Description This subject extends the student's knowledge and understanding of chemical topics that are relevant to forensic investigations, and provides a deeper understanding of the underlying chemical and physical principles. Topics are taught in the context of the correct principles and procedures for collecting and conserving evidence, and the safe handling of chemical substances. Topics include an extended range of modern chemical instrumentation; the chemistry and analysis of various classes of drugs; clandestine drug laboratories; fire, arson and accelerants; explosions and explosives; and various forms of trace evidence (including textile fibres, glass and paint).

School Science

Discipline Forensic Science

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) NATS 2019 Forensic and Environmental Analysis

Restrictions

Successful completion of 60 credit points

Assumed Knowledge

Knowledge of general and analytical chemistry equivalent to satisfactory completion of Chemistry 1, Chemistry 2, Essentials of Chemistry 1, Essentials of Chemistry 2 and a second year analytical chemistry subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply advanced knowledge of a range of chemical topics that are relevant to forensic investigations, and give evidence of an understanding of the underlying chemical and physical principles.
2. Use modern chemical instrumentation for analysing forensic samples, and explain the underlying chemistry and physical principles of the analytical methods.
3. Collect and analyse chemical data, demonstrating appropriate laboratory skills, and incorporating relevant Quality Assurance and Work Health and Safety principles.
4. Handle chemical substances safely, and critically evaluate the risks associated with forensic casework, in the context of Work Health and Safety practices and legislation.
5. Write scientific laboratory reports and critically evaluate the relevance of forensic chemistry to professional forensic practice.
6. Understand the role of a forensic chemist in the investigation of criminal and terrorist incidents.

Subject Content

- advanced instrumental methods for Analysing forensic samples.
- applications of Chemical instrumentation in real-time policing.
- Chemistry and analysis of illicit drugs.
- trace evidence such as textile fibres, glass and paint.
- Fire, arson and accelerants.
- Explosions and explosives.
- application of forensic Chemistry for The investigation of criminal and terrorist incidents.
- principles and practice of work health and safety and quality assurance in The recovery and analysis of Chemical residues.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Case Study	No set length	30	N	Group
Report	2,000 words	30	N	Individual

Quiz	Assessment 1 (10%) Assessment 2 (15%) Assessment 3 (15%) 1 hours for each assessment	40	Y	Individual

CHEM 3012 Nanochemistry

Credit Points 10

Legacy Code 300895

Coordinator Robert Kaziro (https://directory.westernsydney.edu.au/search/name/Robert Kaziro/)

Description The subject covers basic theory of surface chemistry, latest technologies of surface depositions and industrial and commercial applications of nanomaterials and nanopowders. Upon successful completion, the students will achieve an in-depth understanding of techniques of preparation of nanomaterials and nanopowders that includes plasma arching, chemical vapour deposition, electrodeposition, sol-gel synthesis, ball milling and the use of natural particles. Technical aspects of process control on the microstructure and properties of coatings will be discussed. Case studies of applications of nanopowders and nanomaterials such as biomedical implants, insulators, high power magnets, molecular sieves, supercomputers, jet engines and other industrial applications will be pursued.

Level Undergraduate Level 3 subject

Pre-requisite(s) CHEM 1003

Equivalent Subjects LGYA 6162 - Nanochemistry LGYA 6030 - Nanopowders and Nanomaterials

Assumed Knowledge

An understanding of the content of the subjects Nanotechnology 1 and Nanotechnology 2 or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the theory of surface chemistry, latest technologies of surface depositions and industrial and commercial applications of nanomaterials and nanopowders.
2. Explain the techniques of preparation of nanomaterials and nanopowders that includes plasma arching, chemical vapour deposition, electrodeposition, sol-gel synthesis, ball milling and the use of natural particles.
3. Conduct case studies of applications of nanopowders and nanomaterials such as biomedical implants, insulators, high power magnets, molecular sieves, supercomputers, jet engines and other industrial applications.
4. Synthesize nanoparticles by electrodeposition of gold and/or zinc oxide nanoparticles and analyse products by atomic force microscope.

Subject Content

1. Basics of nanomaterials and nanopowders and their attributes and characteristics
2. Theory of surface and bulk and characteristics of nanomaterials and nanopowders
3. Different techniques of preparation, their advantages and disadvantages
4. Biomimetic processes for nanomaterials and nanopowders
5. Feasibility of development of synthetic nanomaterials and nanopowders and their uses

CHEM 3014 Pharmacological Chemistry

Credit Points 10

Legacy Code 300920

Coordinator Krishant Deo (https://directory.westernsydney.edu.au/search/name/Krishant Deo/)

Description This subject is aimed at undergraduates with grounding in chemistry and biochemistry who have an interest in a career related to medicinal chemistry. Because it concerns the manner in which foreign molecules can interact with the body's mechanisms it is of direct relevance not only to the pharmaceutical industry but also to the food, agricultural, cosmetic (etc) industries. It conveys the fascination of designing chemical structures for particular uses within biological systems and which overlap the disciplines of chemistry, biochemistry, cell biology and pharmacology. Emphasis is placed upon design of the chemical structure itself rather than an investigation of the specific chemical structure of its site of action in the body. This is reflected in the laboratory work which traces the historical development of drug design, essentially through a process of a series of inorganic syntheses, relevant to a range of common drugs.

School Science

Discipline Pharmacology

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Equivalent Subjects LGYA 5935 - Pharmacological Chemistry

Assumed Knowledge

This subject is aimed at undergraduates with a grounding in chemistry and biochemistry.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Obtain an understanding of the classification of drugs by chemical structure, by pharmacological effect, by target, and by site of action
2. Identify the type of physicochemical and chemical forces that govern the interaction of a drug with its target
3. Obtain an understanding of the stereochemical and conformational requirements of drug-target interactions
4. Obtain an appreciation of the design of drug analogues based upon knowledge of targets and drug structure using quantitative structure-activity relationships (QSAR) methodologies
5. Relate modern methods used to synthesise, purify and analyse drugs in the drug design process and demonstrate this by undertaking experiments which explore structure and biological response
6. Synthesise, characterise, and measure the biological activity of a that compound
7. Research and present lecture and written report on an assigned major group of drugs
8. Record the results of and the outcomes of their laboratory investigations demonstrating awareness of the conventions of scientific writing and graphical presentations to produce a formatted manuscript

Subject Content

1. Introduction to Pharmacological chemistry laboratory to patient
2. Peptide and Protein Structure
3. Nucleic acids
4. An Overview of the Major Drug Classes
5. Enzymes
6. Drug Action at Receptors
7. Introduction to Structure-Activity Relationships
8. Quantitative Structure-Activity Relationships (QSAR)
9. Student topic seminars on major group(s) of drugs: that may include Non Steroidal Anti-Inflammatory Agents, Steroidal Anti-Inflammatory Agents, Adrenocortical Steroids, Local Anaesthetics, General Anaesthetics, Androgens/Anabolic Steroids, Estrogens and Progestins, Cardiovascular Vasodilators, Hypoglycemic Agents, Anti-Depressants, Narcotic Analgesics, Hypnotics/Minor Tranquillizers, Antihistamines, Prostaglandins, Antimicrobial agents such as Penicillin, Tetracycline and Streptomycin, Anticoagulants, Antimalarial Agents, Anticancer Drugs, Antiviral agents, Radio Therapy

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Report		30	N	Individual
Report	15 pages, in Times New Roman font, 12 point and 1.5 spaced (including figures and references)	45	N	Individual
Final Exam	over weekend	25	N	Individual

CIVL 1001 Surveying for Engineers

Credit Points 10

Legacy Code 300738

Coordinator Won Hee Kang (https://directory.westernsydney.edu.au/search/name/Won Hee Kang/)

Description This is a core subject which provides students with basic skills that are required to carry-out Surveying. After the completion of this subject, students will be able to carry-out required preliminary surveying for most of the civil and construction engineering projects. This subject will also serve as a foundation for most of the subjects that follow in the course.

School Eng, Design & Built Env

Discipline Surveying

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Pre-requisite(s) MATH 1016

Equivalent Subjects CIVL 1002 - Surveying for Engineering CIVL 1003 - Surveying for Engineers (WSTC AssocD)

Assumed Knowledge

Students need a good knowledge of Geometry and Trigonometry.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the terminology, instruments, datum, maps and coordinate systems; operate, record and reduce observations made using current industry standard surveying equipment.
2. Develop contour and building site maps.
3. Operate, record and adjust angular observations made with current industry standard surveying equipment; use a tape to measure slope distances and to reduce linear observations to the horizontal; to adjust a combination of these angular and linear observations to provide coordinates of the traverse points used.
4. Estimate errors in engineering surveying and apply necessary adjustments.

5. Compute cross-sectional areas and volumes for channels and embankments; prepare mass-haul diagrams
6. Prepare diagrams and compute parameters for the setting out the centrelines of roads or railways where horizontal circular and transition curves are to be placed, or where a vertical curve is to be placed.
7. Describe the relationship between global positioning system (GPS), spatial information systems (SIS) and surveying
8. Work cooperatively in a team to complete field work, data reduction and analysis and report writing.

Subject Content

1. Errors and accuracies to desired tolerances.
2. Levelling traverses and height datums.
3. Angle and distance traversing, including closures and adjustment of errors in closed traverses.
4. Feature surveys, including coordinate systems and map projections.
5. Computations of cross-sectional areas and basic volumes for cuttings or embankments for roads or railways.
6. Calculation and presentation of mass-haul diagrams.
7. The design and setting out parameters for the centrelines of horizontal/circular, transition and vertical curves for roads and railways.

8. Accuracies required for the building set-out and equipment tolerances.
9. Introduction to Geographic/Spatial Information Systems (GIS/SIS) including satellite positioning sources (GNSS) and their use in many Engineering contexts.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	N/A	10	N	Individual
Report	Five reports (6% each), each report about 10 pages long	30	N	Group
Final Exam	2 hours (closed book)	60	N	Individual

CIVL 1003 Surveying for Engineers (WSTC AssocD)

Credit Points 10

Legacy Code 700120

Coordinator Abbas Ranjbar (https://directory.westernsydney.edu.au/search/name/Abbas Ranjbar/)

Description This subject provides students with basic skills that are required to carry out surveying. After the completion of this subject, students will be able to carry out required preliminary surveying for most of the civil and construction engineering projects. Offerings of alternate subjects are dependent on there being sufficient student enrolment numbers. If enrolments are low, the College may cancel delivery of the alternate subject.0

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Equivalent Subjects CIVL 1001 - Surveying for Engineers

Restrictions

Students must be enrolled in 7022 Associate Degree in Engineering

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the terminology, instruments, datum, maps and coordinate systems; operate, record and reduce observations made using current industry standard surveying equipment.
2. Develop contour and building site maps.
3. Operate, record and adjust angular observations made with current industry standard surveying equipment; use a tape to measure slope distances and to reduce linear observations to the horizontal; to adjust a combination of these angular and linear observations to provide coordinates of the traverse points used.
4. Estimate errors in engineering surveying and apply necessary adjustments.
5. Compute cross-sectional areas and volumes for channels and embankments; prepare mass-haul diagrams.
6. Prepare diagrams and compute parameters for the setting out of the centrelines of roads or railways where horizontal circular and transition curves are to be placed or where a vertical curve is to be placed.

7. Describe the relationship between global positioning system (GPS), spatial information systems (SIS) and surveying.
8. Work cooperatively in a team to complete field work, data reduction and analysis and for report writing.

Subject Content

1. Errors and accuracies to millimetre tolerances
2. Levelling traverses and height datums
3. Angle and distance traversing, including closures and adjustment of errors in closed traverses
4. Feature surveys, including coordinate systems and map projections
5. Computations of cross-sectional areas and basic volumes for cuttings or embankments for roads or railways
6. Calculation and presentation of mass-haul diagrams
7. The design and setting out parameters for the centrelines of horizontal circular and transition curves and for vertical curves for roads and railways
8. Accuracies required for the building set-out and equipment tolerances
9. Introduction to Geographic/Spatial Information Systems (GIS/SIS) including satellite positioning sources (GNSS) and their use in many engineering contexts

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	5 x 20minutes =100 minutes	30	N	Individual
Practical	20 pages (team)\n6 hours	20	N	Group
End-of-session Exam	Part 1: 2 hours + 30 min for online submission \nPart 2: 20 minutes per student	50	Y	Individual

CIVL 2002 Environmental Engineering

Credit Points 10

Legacy Code 300737

Coordinator Mariam Darestani (https://directory.westernsydney.edu.au/search/name/Mariam Darestani/)

Description This subject teaches the fundamental theory and methods of environmental engineering required for students studying civil engineering and other disciplines. Students will explore a wide range of issues including water quality and treatment, waste management, and air and noise pollution in order to solve environmental issues in a sustainable manner. To provide experience in real world professional applications of their learning students will generate a portfolio in addition to participating in a group project, labs and a field trip.

School Eng, Design & Built Env

Discipline Water and Sanitary Engineering

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Equivalent Subjects CIVL 4006 - Environmental Engineering

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply appropriate drinking water and wastewater treatment techniques.
2. Explain climate change issues and its implication.
3. Examine basic air and noise pollution control techniques.
4. Examine basic solid and hazardous waste management techniques in urban and rural environments.
5. Examine basic environmental impact assessment and life cycle assessment methods.
6. Propose and communicate effectively a solution for an environmental problem as a team.

Subject Content

1. Introduction and general principal of ecologically sustainable development
2. Climate change and Emerging environmental issues
3. Water chemistry
4. Drinking water treatment
5. Water quality management
6. Wastewater treatment
7. Emerging water and water treatment and desalination technologies
8. Solid and hazardous waste management
9. Air and noise pollution
10. Life cycle assessment
11. Environmental planning and environmental impact assessment

CIVL 2003 Fluid Mechanics

Credit Points 10

Legacy Code 300762

Coordinator Ataur Rahman (https://directory.westernsydney.edu.au/search/name/Ataur Rahman/)

Description This subject provides a basic understanding of fluid mechanics principles. Fluid mechanics is the study of the properties and movements of fluids, and key to understanding many of our engineering systems involving fluids, such as power generation, lubrication, irrigation and navigation. While the main focus is on incompressible fluids, effects of compressible fluids are also discussed. The theories learned in classes are reinforced in laboratory sessions. Students analyse fluid systems and apply principles in designing basic pipes and open-channels.

ENGR 1028

Equivalent Subjects CIVL 2015 - Water Engineering CIVL 2004 - Fluid Mechanics (WSTC Assoc Deg)

Assumed Knowledge

200238 - Mathematics for Engineers 2.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply concepts of statics, kinematics and dynamics of fluids to solve fluid related engineering problems
2. Estimate flow through basic pipes and open channels
3. Analyse and design basic pipes and open-channels

Subject Content

Fluid properties
Fluid statics
Fluid kinematics
Types of flow
Continuity, momentum and energy principles
Dimensional analysis
Flow measurements, such as using plate orifices, venturi meters, semi-venturi meters
Surface resistance
Form resistance
Basic pipe flow
Basic open channel flow principles

CIVL 2007 Introduction to Structural Engineering

Credit Points 10

Legacy Code 300733

Coordinator Won Hee Kang (https://directory.westernsydney.edu.au/search/name/Won Hee Kang/)

Description This subject covers the basic concepts in analysing and designing simple structural members. It consists of the fundamentals of structural analysis, concrete structures and steel structures

School Eng, Design & Built Env

Discipline Structural Engineering

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) MECH 2003

Equivalent Subjects CIVL 2006 - Introduction to Structural Engineering CIVL 2008 - Introduction to Structural Engineering (WSTC Assoc Deg)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the reactions and internal forces in statically determinate structures under a variety of loading conditions.
2. Determine the influence lines for statically determinate beams.
3. Determine the deflections of statically determinate beams, trusses and frames.
4. Use force methods to analyse statically indeterminate beams.
5. Recognize the effect of material properties on the behaviour of simple steel and concrete structures.
6. Apply structural analysis in the design process.
7. Identify what the appropriate materials are used, and design simple steel and reinforced concrete flexural elements.

Subject Content

Analysis of statically determinate beams and frames.
Analysis of statically determinate trusses.
Influence lines for beams and trusses.
Deflections of trusses, beams and frames.
Force method for statically indeterminate structures.
Determination of dead and live loads on steel and concrete structures.
Determination of sizes for simple steel beams under load.
Determination of dimensions and reinforcement for reinforced concrete beams under load.

Level Undergraduate Level 2 subject

Pre-requisite(s) MATH 1016

Equivalent Subjects CIVL 2011 - Soil Engineering CIVL 2013 - Soil Mechanics (WSTC AssocD)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the concepts of soil mechanics
2. Apply soil mechanics concepts to soil engineering problems
3. Analyse the response of soil and the water in it when subjected to loading
4. Apply basic laboratory tests to measure the engineering properties of soils
5. Solve simple design problems in soil engineering

Subject Content

soil formation
clay mineralogy
soil classification
soil compaction

effective stress in soils
flow of water in soils
flow nets and the engineering effects of water movements
consolidation and settlement
stress increases in soils
shear strength in soils
lateral stresses in soils

CIVL 2016 Civil and Substructure

Credit Points 10

Legacy Code 301220

Coordinator Mark Crowley (https://directory.westernsydney.edu.au/search/name/Mark Crowley/)

Description This subject provides an overview of civil construction and associated sub-structure works comprising footings, pilings and slabs and the high costs associated with these elements. Through site surveys, site assessments and design proposals students will apply their developing understanding of bulk excavation, site drainage, service mains (electricity, gas, water, sewerage, data), roads and retaining walls to real world examples. Students will also examine public infrastructure such as ports, tunnels, bridges and highways to deepen their knowledge base. Additionally, in order to further understand the high costs involved in sub structure works, students will learn to identify problems faced on sites including rock, chemically-aggressive soils and water-logged sites.

School Eng, Design & Built Env

Discipline Construction Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) BLDG 1017 OR
BLDG 1014

Co-requisite(s) BLDG 1018 OR
BLDG 1015

Equivalent Subjects CIVL 2001 Construction Technology 1 (Civil)

BLDG 2007 Construction Technology 2 (Sub-structure)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Undertake preliminary surveys of a project site
2. Conduct assessments of site conditions relating to foundation condition, gradient and drainage
3. Design the road pavement requirements, site drainage and services installation for a proposed building project
4. Select appropriate footing and substructure systems for different construction sites

Subject Content

1.Properties of rock and soil
2.Site establishment (construction sheds and storage, signage, hoardings and barricades, traffic control)
3.Understanding the principles of subdivision siteworks (surveying, bulk excavation and fill, site drainage and stormwater detention, retaining walls)
4.Road construction
5.Service mains (stormwater, potable & grey water, sewerage, electricity, gas & data)
6.Conventional sub-structures (shallow footings, slabs, piling)
7.Specialised sub-structures (basements, tunnels, marine and riverine sub-structures)

Assessment

CIVL 2017 Sustainable Construction Materials

Credit Points 10

Legacy Code 301399

Coordinator Alan Todhunter (https://directory.westernsydney.edu.au/search/name/Alan Todhunter/)

Description This subject focusses on the suitability for purpose (performance, durability, sustainability and standards and regulatory compliance) of building and construction materials. Students investigate the physical properties and behaviour of various timbers, metals, concretes, polymers, new materials and composite systems, and their durability within Australia's diverse environments. Students also consider sustainable and eco-friendly construction materials in life-cycle assessment of construction systems and materials selection at the design stage.

School Eng, Design & Built Env

Assumed Knowledge

Content covered in Residential Building.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Characterise properties of different building materials and their application in building construction.
2. Analyse how and why materials degrade in the built environment.
3. Assess the environmental impacts associated with materials selection for construction.
4. Assess the suitability of materials in building components used in buildings.
5. Apply Australian standards and regulations relating to eco-friendly and durable buildings.

Subject Content

1. Properties of construction materials.
2. Application of various materials in construction.
3. Durability of construction materials and components.
4. Sustainable and eco-friendly construction materials.
5. Selection of materials in construction.
6. Life-cycle assessment of construction systems.
7. Compliance with Australian standards and regulations.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Report	1200 words	30	N	Individual
Case Study	2000 words	40	N	Individual
Quiz	x3 (10% each) 45 minutes per Quiz.	30	N	Individual

CIVL 2018 Water Supply Systems Design

Credit Points 10

Legacy Code 301424

Coordinator Sathaa Arumugam Sathasivan (https://directory.westernsydney.edu.au/search/name/Sathaa Arumugam Sathasivan/)

Description In this subject students will examine the quality of water and the standards to be met for the supply of water that is fit for its intended use. The design of treatment processes to meet these standards as well as principles underlying the hydraulic design of the treatment systems are examined in the context of both urban and remote rural communities. Students will also explore alternative supply systems and their merits and demerits, including economic viability, in order to gain design and analysis skills with respect to various water supply systems.

School Eng, Design & Built Env

Discipline Water and Sanitary Engineering

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) CIVL 2002 OR
ENGR 1050 AND
CIVL 2003

Co-requisite(s) CIVL 3011

Equivalent Subjects CIVL 4014 Water and Wastewater Treatment

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse alternate sources of water that can be used to supply water for its intended use.
2. Design unit processes and their sequence to produce water that is fit for its intended use for both urban and remote rural communities.
3. Design associated infrastructure for supplying water for its intended use.

4. Evaluate the sustainability of reuse, recycle and disposal options for the waste generated from treatment processes.
5. Demonstrate communication and collaboration skills in working with others in an ethical and respectful manner to produce professional analyses and reports in designing and evaluating sustainable water supply systems.

Subject Content

1. Sources of water and its quality
2. Fit for the purpose water quality guidelines/ standards
3. Alternative sources of water including, surface water, groundwater, stormwater and recycled water.
4. Conventional Water Treatment Processes
5. Transmission and distribution of water
6. Advanced water treatment processes
7. Impact of changing climate on water sources and water availability
8. Reuse/ recycle/ disposal of water treatment plant sludge/ waste.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Log/ Workbook	In-class submissions	20	N	Individual
Report	5000 words including figures, tables and pictures	25	N	Group
Report	1000 words including tables, figures and pictures	5	N	Group
Final Exam	3 hours	50	N	Individual

CIVL 3002 Concrete Structures (UG)

Credit Points 10

Legacy Code 300736

Coordinator Ee Loon Tan (https://directory.westernsydney.edu.au/search/name/Ee Loon Tan/)

Description This subject covers the basic elements of structural behaviour and design with reinforced and pre-stressed concrete. Students will learn to analyse the section capacity of reinforced concrete beams, slabs, and columns, and design simple suspended structures. The subject places a strong emphasis on the process of structural design.

School Eng, Design & Built Env

Discipline Structural Engineering

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) CIVL 2007

Co-requisite(s) CIVL 3014

Equivalent Subjects CIVL 3001 - Concrete Structures (UG)

Assumed Knowledge

Knowledge of engineering mechanics and statics.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss the properties of fresh and hardened concrete
2. Apply limit state design concepts to concrete elements and whole structures
3. Determine design actions for and analyse concrete structures to obtain internal design action effects
4. Design concrete elements based on evaluated design action effects
5. Apply relevant Australian Standards for concrete structures and loading in the designing of concrete structural elements
6. Analyse and interpret the behaviour of concrete structural elements subjected to appropriate design loads

Subject Content

Materials, the design process, Standards
Beams: flexural strength analysis, flexural behaviour, shear, deflections and cracking.
Basic pre-stressed design.
Columns: ultimate strength, slenderness effects.
Slabs: simplified design, simple analysis for deflections.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Report	approx. 20 pages	30	N	Group
Intra-session Exam	1 hr - Closed book	20	N	Individual

Final Exam	2 hrs - Closed Book	50	N	Individual

CIVL 3003 Construction Planning

Credit Points 10

Legacy Code 300728

Coordinator Yingbin Feng (https://directory.westernsydney.edu.au/search/name/Yingbin Feng/)

Description This subject is intended to provide students with the ability to organise the resources required for a major construction project; to plan the sequence and timing of construction operations; and to assess the risk inherent in achieving a construction schedule.

School Eng, Design & Built Env

Discipline Construction Engineering

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) BLDG 1005 OR
GEOM 2001 OR
BLDG 2002

Equivalent Subjects BLDG 3005 - Construction Planning

Assumed Knowledge

A basic understanding of the construction process of residential and commercial buildings and estimating principles.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Plan a project using basic principles of logic planning
2. Apply the concepts of ecritical path f and efloat f
3. Calculate resources, determine resource constraints on construction operations, and develop solutions that will minimise the impact of these constraints
4. Assess the probability of achieving a project completion date
5. Use a generic computer programme such as MS Project, to develop and graphically represent construction logic

Subject Content

Bar/Gantt Charts
Critical Path Method - Arrow diagrams
Critical Path Method - Precedence diagrams
Overlapping network models
Resources management - limits, resource aggregation and levelling
Project control
Scheduling using MS Project
Chain scheduling, multiple activity and line of balance
Work study
Risk and scheduling
Program evaluation and review technique (PERT)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	30 minutes	20	N	Individual
Quiz	20 minutes	10	N	Individual

Coordinator John Zhang (https://directory.westernsydney.edu.au/search/name/John Zhang/)

Student Contribution Band

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Assumed Knowledge

Students undertaking this subject should have prior knowledge of construction techniques associated with residential and non-residential building and a basic understanding of structural systems.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Project Assignment - Steel Construction	5,000 words approximately	30	N	Group
Online quizzes (3 x 10%)	30 minutes (per Quiz)	30	N	Individual
Final online exam-non-proctored	2 hours online exam via vUWS	40	N	Individual

CIVL 3007 Engineering Geomechanics

Credit Points 10

Legacy Code 301001

Coordinator Samanthika Liyanapathirana (https://directory.westernsydney.edu.au/search/name/Samanthika Liyanapathirana/)

Description This subject will present the application of principles of soil mechanics to the solution of foundation and geotechnical problems including the evaluation of allowable bearing capacity of shallow and pile foundations, the stability of earth retaining structures and the stability of slopes.

School Eng, Design & Built Env

Discipline Geotechnical Engineering

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) CIVL 3014 AND
CIVL 2012 OR
CIVL 2011

Equivalent Subjects CIVL 3008 - Foundation Engineering

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply soil mechanics principles to analyse foundation problems
2. Apply a systematic engineering approach to designing foundations
3. Interpret soil properties and soil test data for use in foundation analysis and design
4. Apply engineering software as a tool in foundation analysis and design
5. Interpret and apply Australian Standards when designing foundations
6. Prepare a geotechnical design report on a foundation design problem

Subject Content

1. Site investigation
2. Design of earth retaining structures
3. Shallow foundations
4. Slope stability
5. Deep foundations

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Report	20 pages	15	N	Individual
Report	20 pages	15	N	Individual

CIVL 3010 Highway Infrastructure

Credit Points 10

Legacy Code 300988

Coordinator Chin Leo (https://directory.westernsydney.edu.au/search/name/Chin Leo/)

Description This subject focuses on two key aspects of highway infrastructure design, namely, the bridge superstructure design and the foundation soil preparation prior to construction of the highway pavement. It aims to provide students with specialised knowledge in bridge loading and structural design, methods to deal with soft and weak grounds, and building of earth embankments to support the highway pavement. These aspects will be discussed in relation to Australian design codes.

School Eng, Design & Built Env

Discipline Transport Engineering

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) CIVL 2007 AND
CIVL 2012

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply soil and structural mechanics principles in highway infrastructure design
2. Interpret soil properties and soil test data for use in geotechnical analysis and design
3. Apply engineering software as a tool for use in geotechnical analysis and design
4. Interpret and apply Australian Standards when designing highway infrastructures
5. Analyse and propose cost effective design highway infrastructures

Subject Content

Bridge Superstructure Module
1. Types of bridges
2. Bridge substructures and superstructures
3. Bridge loading and design loads
4. Design of superstructures
Highway Embankment and Foundation Module
1. Soft soil remediation
2. Soil stabilisation and improvement
3. Earth fills and retaining structures

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Participation	2 Hours	10	N	
Applied Project	15-20 pages each (include calculations and diagrams)	50	N	
Numerical Problem Solving	1 hour each	40	N	

CIVL 3011 Hydraulics

Credit Points 10

Legacy Code 300765

Coordinator Kejun Dong (https://directory.westernsydney.edu.au/search/name/Kejun Dong/)

Description The subject covers the principles of open channel hydraulics, pipe hydraulics and culvert hydraulics. Specific topics in open channel hydraulics include uniform flow, resistance equations, specific energy principle, flow types, gradually varied flow and rapidly varied flow. The purpose is to enable design of efficient open channels to meet engineering requirements. In addition, principles of pipe and culvert hydraulics are introduced, enabling analysis and design of pipe networks and culverts.

School Eng, Design & Built Env

Discipline Water and Sanitary Engineering

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) CIVL 2003

Equivalent Subjects -

Assumed Knowledge

Mathematical knowledge equivalent to the content within 200238 Mathematics for Engineers 2.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. analyse existing channels using hydraulic principles
2. apply basic hydraulic principles to design open channels of different configurations
3. critically analyse existing small hydraulic structures
4. design appropriate hydraulic structures to control and measure flow through open channels
5. analyse and design pipe networks using pressurised flow principles
6. evaluate the adequacy of existing culverts
7. design appropriate culverts using culvert hydraulic principles

Subject Content

Open channel hydraulics: Basic principles - continuity, momentum and energy principles
Open channel hydraulics: Channel design - use of uniform flow principles
Open channel hydraulics: Best hydraulic sections
Open channel hydraulics: Specific energy principle
Open channel hydraulics: Rapidly varied flow - hydraulic jump
Open channel hydraulics: Gradually varied flow - water surface profiles
Open channel hydraulics: Flow measurements - weirs, spillways, gates and flumes
Pipe hydraulics: Laminar and turbulent flow in pipes
Pipe hydraulics: Major and minor losses in pipes
Pipe hydraulics: Pipes in series
Pipe hydraulics: Pipes in parallel
Pipe hydraulics: Pipe network analysis
Pipe hydraulics: Turbomachinery - pumps and pump selection
Culvert hydraulics: Basic principles - gravity and pressurised flows
Culvert hydraulics: Culvert flow classification
Culvert hydraulics: Design of culverts

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

CIVL 3012 Steel Structures

Credit Points 10

Legacy Code 300730

Coordinator Fidelis Mashiri (https://directory.westernsydney.edu.au/search/name/Fidelis Mashiri/)

Description This subject covers the basic behaviour of steel members and structures, the appropriate methods to analyse them and the design criteria and methods used to proportion them.

School Eng, Design & Built Env

Discipline Structural Engineering

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) CIVL 2007

Co-requisite(s) CIVL 3014

Equivalent Subjects CIVL 3013 - Steel Structures

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Recognise different steel grades
2. Apply limit state design concepts to structural steel elements
3. Determine design actions for and analyse steel structures to obtain internal design action effects
4. Design structural steel elements based on evaluated design action effects
5. Apply relevant Australian Standards for steel structures and loading in the designing of structural steel elements
6. Analyse and interpret the behaviour of structural steel elements subjected to a variety of design loads
7. Use engineering software to determine internal design action effects
8. Work effectively as a team member to analyse and report on a structural steel design problem

Subject Content

Plastic Analysis
Biaxial Bending
Shear and bearing beam webs
Bolted and Welded Connections
Frames

CIVL 3014 Structural Analysis

Credit Points 10

Legacy Code 300732

Coordinator Haiping Zhu (https://directory.westernsydney.edu.au/search/name/Haiping Zhu/)

Description This subject introduces students to the aspects of structural analysis of trusses, beams and frames. It covers the first-order elastic analysis of statically determinate and indeterminate structures. This course aims to teach students to master basic skills in structural analysis as well as skills in using computer software to analyse complex structures.

School Eng, Design & Built Env

Discipline Structural Engineering

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) CIVL 2007

Equivalent Subjects CIVL 3015 - Structural Analysis

Learning Outcomes

On successful completion of this subject, students should be able to:

1. analyse statically indeterminate structures using force and displacement methods (including slope deflection and moment distribution methods)
2. analyse trusses, beams and frames to obtain internal forces and displacements using the matrix method
3. operate current structural analysis software packages

Subject Content

Slope-deflection method for beam and frame analysis
Moment distribution method for beam and frame analysis
Matrix method for truss analysis
Matrix method for beam analysis
Matrix method for frame analysis
Introduction to second-order analysis of structures

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

CIVL 3016 Building Superstructure

Credit Points 10

Legacy Code 301221

Coordinator Brendan Kirkland (https://directory.westernsydney.edu.au/search/name/Brendan Kirkland/)

Description The aim of this subject is to provide students with an understanding of the factors that contribute to the design and construction of a building superstructure. Students will be introduced to relevant Australian Standards for common construction materials and practices. The subject also aims to develop the ability of construction students to communicate professionally with other building professionals including structural engineers. Emphasis will be given to the strength, behaviour and failure of structural members, connections and frames.

School Eng, Design & Built Env

Discipline Structural Engineering

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) BLDG 1017 or
BLDG 1014

Co-requisite(s) CIVL2016

Equivalent Subjects CIVL3004
CIVL3005

Assumed Knowledge

Basic knowledge of building construction both residential and non-residential.

Learning Outcomes

1. Identify common structural members, components and systems
2. Analyse the different effects and actions caused by various loads on structures
3. Discuss the factors which contribute to the structural design of a large building
4. Assess the strength, behaviour and failure modes of common structural members, components and systems
5. Apply Australian Standards related to the construction of large buildings and ensure National Construction Code compliance
6. Work independently and collaboratively to meet project milestones in an ethical and responsible manner

Subject Content

1. Common structural members, components and systems
2. Loads on structures and their evaluation
3. Structural member actions
4. Behaviour, strength and failure of members, connections and frames

Special Requirements

Legislative pre-requisites

This subject involves extensive practical exercises. In order to undertake the practicals, each student must have the appropriate PPE (Personal Protection Equipment):
Laboratory coat
Safety glasses
Safety shoes (steel capped)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are

regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	3 x Quizzes (30 minutes each)	30	N	Individual
Report	2,000 words	30	N	Individual
Report	3,000 words	40	Y	Individual

CIVL 3017 Construction Scheduling

Credit Points 10

Legacy Code 301230

Coordinator Linna Geng (https://directory.westernsydney.edu.au/search/name/Linna Geng/)

Description This subject is intended to provide students with the skills and ability to organise the resources required for a major construction project, to plan the sequence and timing of construction operations, and to assess the risk inherent in achieving a construction schedule.

School Eng, Design & Built Env

Discipline Construction Engineering

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) BLDG 1005 OR
BLDG 1014 OR
GEOM 2001 OR
BLDG 2002

Equivalent Subjects BLDG 3005 Construction Planning
CIVL 3003 Construction Planning

Assumed Knowledge

A basic understanding of the construction process of residential and commercial buildings and estimating principles.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	30 minutes	20	N	Individual
Quiz	20 minutes	10	N	Individual
Professional Task	4,000 words	30	N	Group/ Individual
End-of-session Exam	1 day from time that exam is released	40	N	Individual

CIVL 3018 Hydrogeology

Credit Points 10

Legacy Code 301397

Coordinator Ataur Rahman (https://directory.westernsydney.edu.au/search/name/Ataur Rahman/)

Description This subject covers principles of hydrogeology. It contains concepts related to occurrence of groundwater, groundwater movement, groundwater hydraulics, water wells, quality of groundwater, groundwater modelling and groundwater management. The objectives of this subject are to enable students to learn the concept of groundwater and apply the learnt concepts in solving groundwater problems in engineering practice.

School Eng, Design & Built Env

Discipline Water and Sanitary Engineering

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) CIVL 2003

Equivalent Subjects EART 3004 - Hydrogeology

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply fundamental knowledge of groundwater movement, groundwater hydraulics and water wells to solve hydrogeological problems
2. Apply groundwater quality modelling techniques
3. Evaluate groundwater pollution and management problems
4. Analyse groundwater modelling and exploration techniques
5. Evaluate current Australian codes and software to solve groundwater problems
6. Critically evaluate current literature to benchmark recent problems and developments in groundwater engineering practice
7. Design sustainable groundwater engineering projects

Subject Content

1. Occurrence of groundwater
2. Groundwater movement
3. Groundwater and well hydraulics
4. Water wells
5. Groundwater levels and environmental influences
6. Quality of groundwater
7. Pollution of groundwater
8. Management of groundwater
9. Groundwater modelling
10. Groundwater investigation

Assessment

CIVL 3019 Wastewater Systems Design

Credit Points 10

Legacy Code 301426

Coordinator Sathaa Arumugam Sathasivan (https://directory.westernsydney.edu.au/search/name/Sathaa Arumugam Sathasivan/)

Description Providing clean water and sanitation is one of the United Nations Sustainable Development Goals. Students will gain knowledge and skills in designing and proposing modifications to current wastewater and sanitation practices. Students will examine conventional processes and explore how they should be modified to address emerging issues (contaminants, climate variability) and how the potential of wastewater as a resource can be realised. Students will also identify various ways smart technologies can be adopted in addressing the challenges facing wastewater disposal/resource recovery.

School Eng, Design & Built Env

Discipline Water and Sanitary Engineering

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) CIVL 2003 AND
CIVL 2002 OR
ENGR 1050 OR
PROC 1006

Equivalent Subjects CIVL 4014 - Water and Wastewater Treatment

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Assess risk from key waterborne pathogens and propose engineering control.
2. Demonstrate the ability to set up mass balance equation for different scenario.
3. Design conventional wastewater treatment processes.
4. Measure water quality variation in a pilot/full-scale wastewater system and explain how processes could be modified, to achieve a desired outcome.
5. Assess the risks of wastewater effluent disposal to water bodies including that from climate change/extreme events.
6. Evaluate the environmental impact of wastewater collection, treatment and disposal methods and propose solution in line with Circular Economy concept.
7. Design resource recovery options and explain emerging wastewater treatment options.

Subject Content

1.Water quality parameters relevant for wastewater
2.Wastewater microbiology and epidemiology
3.Wastewater collection systems
4.Modelling wastewater treatment processes
5.Wastewater and sludge treatment processes
6.Resource recovery

Assessment

CIVL 3020 Sustainable Waste Engineering

Credit Points 10

Legacy Code 301422

Coordinator Dharma Hagare (https://directory.westernsydney.edu.au/search/name/Dharma Hagare/)

Description Sustainable waste management is an important consideration for any student who is training to become an engineer, as waste is produced in all engineering fields. In this subject students will identify and characterise sources of solid and hazardous waste generated in the community. The application of circular economy and zero waste principles are examined alongside real-world case studies to focus on sustainable management of waste incorporating minimisation, recycle, recovery and disposable options.

School Eng, Design & Built Env

Discipline Water and Sanitary Engineering

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Equivalent Subjects CIVL 4011 Waste Management

Restrictions

Successful completion of 120 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse classification, transportation, storage and disposal of solid and hazardous waste.
2. Apply risk assessment principles to manage hazardous waste in a sustainable way.
3. Design landfill sites for both urban and rural areas using sound engineering principles.
4. Use life cycle analysis to determine appropriate options for waste disposal, and recovery and recycling of materials.
5. Determine appropriate circular economy and zero waste approaches to minimise waste generation.
6. Demonstrate communication and collaboration skills in working with others in an ethical and respectful manner to produce professional analyses and reports in sustainable waste engineering.

Subject Content

1. Solid and hazardous waste classification, transportation and processing.
2. Treatment, reuse/ recovery and disposal options for solid and hazardous waste.
3. Risk assessment and management as applied to hazardous waste.
4. Landfill site location and design, and its sustainable management.
5. Contaminant transport and accumulation.
6. Application of life cycle analysis for evaluating waste disposal options, and recovery and recycling of materials.
7. Circular economy and its application in waste management.
8. Zero waste opportunities and technologies.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Tutorial submissions	In-class submissions	20	N	Individual
Project Report	5000 words including figures, tables and pictures	25	N	Individual

Practical Report	1000 words including tables, figures and pictures	5	N	Individual
Final Exam	3 hours	50	N	Individual

CIVL 3021 Bridge Engineering Design

Credit Points 10

Coordinator Olivia Mirza (https://directory.westernsydney.edu.au/search/name/Olivia Mirza/)

Description This subject focuses on one key aspect of bridge engineering design, namely, the bridge superstructure design. It aims to provide students with specialised knowledge in bridge loading, the types of possible loads, calculation of ultimate load combinations and investigate the different sizes for the beams (girders) of simple bridge design and structural design. These aspects will be discussed in relation to Australian design codes to prepare students for roles such as design engineer or analyst. Furthermore, this subject will involve industry guest speakers, with state of the art engineering design, who will be able to review and contribute to the assessment tasks.

School Eng, Design & Built Env

Discipline Construction Engineering

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) CIVL 3002 Concrete Structures (UG)
CIVL 3012 Steel Structures

Assumed Knowledge

Structural Analysis, Concrete and Steel Design

Learning Outcomes

1. Apply structural mechanics principles in bridge design
2. Use engineering software in structural analysis and design
3. Integrate relevant Australian Standards in the design of bridge structures
4. Recommend cost effective and suitably designed bridge structures aligned with sustainability principles and stakeholder requirements
5. Communicate concepts, bridge designs and rationales to diverse audiences and in multiple formats following ethical guidelines
6. Collaborate with team members and others in a respectful and responsible manner being accountable for contributions

Subject Content

- Introduction of types of bridges
- Bridge substructures and superstructures
- Bridge loading and design loads
- Method of loading analyses
- Design of superstructures (Deck and Girder)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Numerical Problem Solving	2 hours (per practical)	30	Y	Individual
Numerical Problem Solving	1 hour (per Quiz)	30	N	Individual
Numerical Problem Solving	Report,15-20 pages (including calculations and diagrams) Presentation, 2 minutes (per student)	40	N	Group

CIVL 3022 Bridge Embankment Design

Credit Points 10

Coordinator Chin Leo (https://directory.westernsydney.edu.au/search/name/Chin Leo/)

Description This subject focuses on the design of a real-world highway bridge approach embankment on soft ground. It aims to provide students with specialised knowledge covering ground improvement to support the approach embankment, characterisation of the foundation soil based on real site investigation data, loading combinations, settlement and stability considerations. The design will be taught with reference to relevant Australian and international design codes adopted by Australian industry. Industry speakers will be invited to provide industry perspective and insights of embankment design. The knowledge and skills developed in this subject will prepare students for roles as geotechnical design engineers.

School Eng, Design & Built Env

Discipline Geotechnical Engineering

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) CIVL 2012 Soil Mechanics
AND
ENGR 2016 Pavement Materials and Design

Restrictions

Students must complete 160 credit points before enrolling into this subject.

Learning Outcomes

1. Apply soil mechanics and geotechnical engineering principles in bridge approach embankment design.

2. Interpret soil properties and soil test data for use in geotechnical analysis and design.
3. Use engineering software in geotechnical analysis, simulation and design.
4. Integrate relevant Australian and international standards in the design of approach embankment.
5. Collaborate with team members and others in a respectful and responsible manner, each being accountable for their individual contributions.

Subject Content

1. Introduction of bridge approach embankment
2. Characterisation of foundation soil
3. Ground improvement techniques
4. Stability analysis
5. Settlement analysis
6. Design criteria and standards

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Practical	2 hours (per practical)	10	N	Individual
Quiz	1.5 hours	30	N	Individual
Report	25-30 pages (including calculations and diagrams)	60	N	Group

CIVL 4001 Applied Mechanics

Credit Points 10

Legacy Code 300986

Coordinator Baolin Wang (https://directory.westernsydney.edu.au/search/name/Baolin Wang/)

Description Applied mechanics deals with the mechanical responses of structural components under various loading and support conditions. This subject will introduce the theoretical foundations and solution methods for the stability and dynamic responses of beams, columns and plates and their associated applications in engineering practices.

School Eng, Design & Built Env

Discipline Structural Engineering

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 4 subject

Pre-requisite(s) CIVL 3014

Assumed Knowledge

Student should have prior knowledge of strain, stress and deflection analysis of simple structures.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the buckling and vibration behaviours of structural components;
2. Derive the governing equations for the buckling and vibration of structural components;
3. Solve the governing equations analytically for buckling and vibration of beams, columns and plates;
4. Solve the governing equations numerically for buckling and vibration of beams, columns and plates;
5. Apply the buckling and vibration analysis to solve practical engineering problems.

Subject Content

1. Introduction to the buckling behaviour of structures; Governing equations for the buckling of columns;
2. Analytical solutions for simple column buckling cases;
3. Applications of buckling analysis of columns in structural design;
4. Introduction to the vibration behaviour of structures; Governing equations for the free vibration of beams;
5. Analytical solutions for simple beam free vibration cases;
6. Applications of vibration analysis of beams in engineering practices;

7. Introduction to the thin plate theory; Governing equations for the buckling of plates;
8. Analytical solutions for simple plate buckling cases;
9. Governing equations for the vibration of plates; analytical solutions for simple plate vibration cases;
10. Applications of buckling and vibration analysis of plates in engineering practices;
11. Numerical methods for buckling and vibration analysis of structures;
12. Analysis of complex buckling and vibration cases for beams, columns and plates by numerical methods.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

CIVL 4002 Composite Structures

Credit Points 10

Legacy Code 300987

Coordinator Fidelis Mashiri (https://directory.westernsydney.edu.au/search/name/Fidelis Mashiri/)

Description This subject builds on knowledge gained in steel and concrete structures, especially the design of structural members using either steel or concrete. Students will learn the design of composite beams, floors, columns and connections based on Australian and International standards as well as mechanics of materials.

School Eng, Design & Built Env

Discipline Structural Engineering

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 4 subject

Pre-requisite(s) CIVL 3012 AND
CIVL 3002

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and discuss various structural systems used in composite construction
2. Apply limit state design concepts to composite structural elements and structures
3. Analyse and determine design loads for composite structures
4. Design composite structural elements based on service loads

Subject Content

1. Composite Beams
2. Composite Floors
3. Composite Columns
4. Composite Connections

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Professional Task	20 Pages (in total)	20	N	Individual
Intra-session Exam	2 Hours	20	N	Individual
Final Exam	2 Hours	60	N	Individual

CIVL 4003 Construction Technology 5 (Envelope)

Credit Points 10

Legacy Code 200471

Coordinator Mohammad Reza Razavi (https://directory.westernsydney.edu.au/search/name/Mohammad Reza Razavi/)

Description After undertaking this unit, you should understand the way internal spaces are designed and constructed to optimise thermal, visual and acoustic comfort and for energy efficiency.

School Eng, Design & Built Env

Discipline Building Services Engineering

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 4 subject

Co-requisite(s) Students in 2607 Bachelor of Construction Management must enrol in BLDG 4012 Industry Based Learning before enrolling in this unit

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Relate people's sight, hearing and thermal comfort to the lighting, acoustics and thermal control of buildings.
2. Evaluate how heat is transmitted through and stored within the building envelope.
3. Explain the construction methods used for thermal insulation and thermal storage in a building.
4. Analyse how wind, rain and condensation is excluded from a building envelope.
5. Determine the basic parameters of lighting using practical measurements and mathematical models.
6. Synthesise artificial lighting strategies in simple room configurations.

7. Relate how the intensity and movement of the sun affects daylighting and apply strategies to improve the natural lighting of buildings.
8. Describe the characteristics of sound in a structure and in the air.
9. Determine sound transmission by practical measurements and mathematical calculations.
10. Develop construction techniques to improve the acoustic resistance of partitions.
11. Explain how noise and reverberation can be attenuated within a building.
12. Evaluate a building in terms of energy efficient design.
13. Investigate the relationship between built form and climate.
14. Actively contribute to team research and communication project.

Subject Content

Fundamentals of Vision
Artificial Light
Daylight
Thermal Comfort
Steady State Heat Flow
Periodic Heat Flow
Fire Resistance
Fundamentals of Human Hearing
Noise Control
Room Acoustics
Effect of Climate on Buildings & Weatherproofing

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Short Answer	3 hours	40	N	Individual
Report	1500 words as the individual component of a group project	20	N	Group
Multiple Choice	2 hours	40	N	Individual

CIVL 4004 Construction Technology 6 (Services)

Credit Points 10

Legacy Code 300725

Coordinator Baolin Wang (https://directory.westernsydney.edu.au/search/name/Baolin Wang/)

Description To provide students with a vehicle to develop knowledge and skills needed to comprehend the design of services in major buildings, and in so doing engender a life-long interpretation of the intricacies of physical installation and their critical sequence in the construction process.

School Eng, Design & Built Env

Discipline Building Services Engineering

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 4 subject

Equivalent Subjects LGYB 5400 Construction Technology 6 (Services)

Restrictions

Students must be enrolled in Bachelor of Construction Management, Bachelor of Engineering, Bachelor of Engineering Advanced (Honours), Bachelor of Building Design Management, Bachelor of Engineering (Honours) or Diploma in Building Design Management/Bachelor of Building Design Management.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Interpret and apply pragmatic decision making as it applies to the role of a construction professional in the design, installation and management of major building services
2. Differentiate between the concept of building services coordination and building services integration

Subject Content

This subject provides students with an introduction to design, installation and management of these services:
1. Mechanical (heating, ventilation and air conditioning)
2. Electrical (transformation, reticulation and safety devices)
3. Hydraulic (water supply, storage and distribution, sanitary plumbing and fittings)
4. Active fire systems (sprinklers and detectors)
5. Communication and security systems
6. Vertical transportation services (elevators and escalators)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Report	2,000 words	50	N	Individual
Multiple Choice	1 hour	25	N	Individual
Multiple Choice	1 hour	25	N	Individual

CIVL 4005 Construction in Practice 3

Legacy Code 200484

Coordinator John Smolders (https://directory.westernsydney.edu.au/search/name/John Smolders/)

Student Contribution Band

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Restrictions

Successful completion of 200 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate the acquisition and synthesis of a wide range of skills and knowledge from their previous years of study in the undertaking of a complex building project, including (but not limited to): a. feasibility studies and site utilisation b. Impact assessment issues c. analysis of market influences with regard to leasing/sale of buildings d. planning and building control legislation including heritage requirements and conservation issues e. cost & contract planning f. project management and contract administration g. the role of consultants and other members of the construction team h. specification writing, and i. tendering procedures
2. Plan, manage and report on a complex team-based construction project,
3. Reflect upon their team performance.

Subject Content

- feasibility studies and site utilisation,
- impact assessment Issues
- analysis of market influences with regard to leasing/sale of buildings,
- planning and Building control Legislation including heritage requirements and conservation Issues
- cost & contract planning,
- project management and contract administration,
- The role of consultants and other members of The construction team
- specification writing, and
- tendering procedures

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

CIVL 4008 Pile Foundations

Credit Points 10

Legacy Code 300990

Coordinator Samanthika Liyanapathirana (https://directory.westernsydney.edu.au/search/name/Samanthika Liyanapathirana/)

Description This subject covers analysis and design criteria for pile foundations subjected to axial, lateral and dynamic loading based on the Australian Standards. Computer software necessary to carry out analysis and design will be introduced. Also field testing methods available for pile integrity testing will be discussed.

School Eng, Design & Built Env

Discipline Geotechnical Engineering

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 4 subject

Pre-requisite(s) CIVL 3007 OR
CIVL 3008

Learning Outcomes

On successful completion of this subject, students should be able to:

1. evaluate settlement and bearing capacity of single piles and pile groups
2. compute the lateral load carrying capacity of piles
3. design piled raft foundations
4. interpret and apply Australian standards for design of deep foundations
5. explain the different pile integrity testing methods and their suitability for different conditions

Subject Content

1. Single piles and pile groups subjected to vertical loads
2. Laterally loaded piles
3. Piled raft foundations
4. Application of Australian standards in design of pile foundations
5. Design of piles subjected to dynamic loading
6. Pile integrity testing

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Equivalent Subjects LGYB 1031 - Timber Structures (UG)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the properties of timber that influence its strength as a construction material.
2. Apply limit state design concepts for timber elements and whole structures
3. Determine design loads and analyse timber structures to evaluate internal design action effects
4. Design timber elements based on evaluated design action effects

Subject Content

Characteristics, grading and use of timber for structural design
Design of tension members
Design of Compression members
Design of members in flexure
Design of members under combined action
Design of connections

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Professional Task	Submission of tutorial solutions (every fortnight from week 3)	10	N	Individual
Intra-session Exam	2 hours	15	N	Individual
Report	Approximately 40 pages	25	N	Group
Final Exam	2 hours	50	N	Individual

CIVL 4010 Transportation Engineering

Credit Points 10

Legacy Code 300982

Coordinator Dharma Hagare (https://directory.westernsydney.edu.au/search/name/Dharma Hagare/)

Description This subject provides students with the course material that will assist them with the execution of Civil Engineering Construction and Urban Development / Town Planning projects. The subject mainly focuses on the planning, design and construction of transportation facilities for urban and rural areas. Students will have an opportunity to implement the skills learnt using a case of a subdivision development.

School Eng, Design & Built Env

Discipline Transport Engineering

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 4 subject

Pre-requisite(s) CIVL 1001 AND
ENGR 2016 AND
EART 4001

Incompatible Subjects CIVL 2005 - Infrastructure Engineering

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply principles involved in the design, construction and maintenance of both small and large transportation networks comprising of both roadways and railway tracks.
2. Analyse and design transportation hubs and intersections for allowing efficient traffic flow.
3. Analyse sustainable transport systems and facilities for both rural and urban areas.
4. Apply available design tools and guidelines for transportation network design.
5. Create and contribute to productive and efficient teams for designing and evaluating efficient transportation systems.

Subject Content

1. Transportation planning and major networks design.
2. Traffic theory and intersections design.
3. Road network design for residential area.
4. Estimation of design traffic loads.
5. Design of carriageways, pavements and associated drainage facilities.
6. Application of design principles for the design of a subdivision.
7. Design and maintenance of railway tracks.
8. Sustainability of transportation systems and facilities, and their evaluation.
9. Use of relevant design and drawing software.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Tutorial and quiz participation.	Weekly	10	N	Individual
Major Project (2 reports)	15,000 words equivalent for the entire group of 4 members. The report will include drawings, calculation sheets, tables and figures. Actual write-up can be about 25%.	30	N	Group
Final exam	3 hours	60	N	Individual

CIVL 4011 Waste Management

Credit Points 10

Legacy Code 300994

Coordinator Dharma Hagare (https://directory.westernsydney.edu.au/search/name/Dharma Hagare/)

Description Sustainable waste management, to reduce climate impact, is an important consideration for any student who is getting trained as an engineer. In this subject students will identify and characterise sources of atmospheric, solid and hazardous waste generated from the community. Students will then focus on sustainable management of waste incorporating minimisation, recycle, recovery and disposable options as well as greenhouse gases and their impact on climate change.

School Eng, Design & Built Env

Discipline Water and Sanitary Engineering

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 4 subject

Pre-requisite(s) CIVL 2002

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the major atmospheric pollutants and the technologies available for their control.
2. Examine the drivers for climate change and discuss their impact at global level.
3. Classify the solid and hazardous waste produced and analyse its transportation and disposal options.
4. Apply risk assessment principles to manage hazardous waste in a sustainable way.
5. Use sound engineering principles to locate and design landfill sites for both urban and rural areas.
6. Assess waste disposal options, and recovery and recycling of materials in terms of triple bottom line objectives.

Subject Content

1. Solid and hazardous waste classification, transportation and processing.

2. Treatment, reuse/ recovery and disposal options for solid and hazardous waste.
3. Risk assessment and management as applied to hazardous waste.
4. Landfill site location and design, and its sustainable management.
5. Contaminant transport and accumulation.
6. Waste disposal options and recovery and recycling of materials, and their assessment against triple bottom line criteria.
7. Atmospheric pollutants and their control.
8. Climate change and its mitigation.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Participation	1 hour per quiz	15	N	Individual
Report	5,000 words including figures, tables and pictures	30	N	Group
Report	1,000 words including tables, figures and pictures	5	N	Group
Final Exam	3 hours	50	N	Individual

CIVL 4012 Water Resource Engineering

Credit Points 10

Legacy Code 300993

Coordinator Surendra Shrestha (https://directory.westernsydney.edu.au/search/name/Surendra Shrestha/)

Description This subject introduces optimisation theories applicable to water resources projects. The subject applies different optimisation models to select the best option available. Engineering economic theories specifically applicable to water resources projects are also discussed.

School Eng, Design & Built Env

Discipline Water and Sanitary Engineering

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 4 subject

Pre-requisite(s) CIVL 3011

Learning Outcomes

On successful completion of this subject, students should be able to:

1. differentiate between linear and non-linear programming principles
2. formulate water resources problems using linear, non-linear and dynamic programming techniques
3. employ appropriate optimisation techniques to water resource development projects
4. propose the best water resources project alternative among the available options
5. apply engineering economic principles to water resources projects
6. develop a decision support system as a team

Subject Content

1. Linear Programming
2. Non-linear Programming
3. Dynamic Programming
4. Water Resources Economics
5. Water Allocation Models

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

CIVL 4015 Complex Building Project

Credit Points 10

Legacy Code 301232

Coordinator John Smolders (https://directory.westernsydney.edu.au/search/name/John Smolders/)

Description This subject enables students to integrate and develop knowledge gained earlier in the course allowing them to simulate industry practice. Students are given a brief to undertake large and complex construction projects (eg. high rise buildings, airport construction, or sports stadium construction). They then take account of regulatory control, financial limitations, and stakeholder impacts whilst managing a team and being flexible and responsive to changing demands.

CIVL 4016 Envelope and Services

Credit Points 10

Legacy Code 301222

Coordinator Keivan Bamdad Masouleh (https://directory.westernsydney.edu.au/search/name/Keivan Bamdad Masouleh/)

Description The building envelope and its inter-relationship with building services are critical to the successful functioning of our modern built environment. In this subject students will learn how to minimise operational energy requirements by making good choices in terms of materials and systems which focus on end-user needs. Measurement of building performance and continuous improvement is addressed alongside compliance with building codes and relevant Australian standards.

CIVL 4017 Surface Water Hydrology

Credit Points 10

Legacy Code 301329

Coordinator Surendra Shrestha (https://directory.westernsydney.edu.au/search/name/Surendra Shrestha/)

Description Surface water hydrology covers the principles of hydrology as it pertains to surface water component of the hydrologic cycle. The principal focus is on the relationship between rainfall and surface runoff. The extent of flooding resulting from storm events will be evaluated through floodplain delineation process. Successful completion of this subject provides the competencies required to propose sustainable engineering solutions to potential adverse impacts of land-use changes. This subject builds on the hydraulic concepts acquired from the subjects completed earlier.

School Eng, Design & Built Env

Discipline Water and Sanitary Engineering

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 4 subject

Pre-requisite(s) CIVL 3011

Equivalent Subjects CIVL 4007 - Hydrology EART 4001 - Surface Water Hydrology

Assumed Knowledge

Students need working knowledge of spreadsheet software, for example Microsoft Excel.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify all components of the hydrologic cycle
2. Perform hydrologic analysis of catchments
3. Design retention and detention basins incorporating appropriate hydraulic structures and evaluate their effectiveness
4. Apply statistical techniques to forecast future hydrologic events
5. Formulate and execute surface water hydrology software packages to simulate catchment response
6. Delineate extent of flooding using appropriate hydraulic software packages
7. Propose sustainable solutions to address adverse impacts of land development
8. Effectively work in a team environment

Subject Content

Hydrologic principles
Hydrologic analysis
Frequency analysis
Flood routing
Hydrologic simulation models
Urban hydrology
Floodplain hydraulics
Design applications in hydrology

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Report	500 word per student	10	N	Group
Intra-session Exam	1 hour	20	N	Individual
Report	approx. 1000 words per student (includes improvements to 500 words per student from Progress Report 1)	10	N	Group
Applied Project	1,500 words per student (approx)	20	N	Group
Final Exam	2 hours	40	Y	Individual

CIVL 4018 Building Design Project 1 (Honours)

Credit Points 20

Legacy Code 301101

Coordinator Mary Hardie (https://directory.westernsydney.edu.au/search/name/Mary Hardie/)

Description In this subject, students who have a record of superior performance in the Building Design Management program, will source a suitable design project at their own initiative, to complete as a capstone work which illustrates the skills they have developed throughout their study program. The project will contain a high level of complexity exceeding that of previous building designs produced in the program. Both the complexity level and the number of design constraints will distinguish the project undertaken for this subject from the non-honours stream subject. Diverse stakeholder input on the project's impact will be gathered and assessed. The design solution generated will show mastery of complex design problems which integrate technical knowledge with economic and social responsibility. Superior skill in resolving design conflicts will be demonstrated.

School Eng, Design & Built Env

Discipline Construction Engineering

Student Contribution Band HECS Band 2 20cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 4 subject

Pre-requisite(s) BLDG 3001

Incompatible Subjects BLDG 4001 Building Design Project 1

Restrictions Students must be enrolled in 3727 Bachelor of Building Design Management.

Assumed Knowledge

Students should be familiar with the content from the first three years of the Building Design Management degree, including expertise in CAD, iterative design process and construction technology.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Generate a design brief for a building project with sufficient detail to make a preliminary judgement on project feasibility.
2. Analyse the site conditions and construct a performance specification for a building design to a professional standard.
3. Make the case for particular design decisions which have the effect of limiting some design choices.
4. Reflect on feedback relating to the proposed sketch design and make responsive changes to demonstrate resolution of stakeholder conflicts.
5. Illustrate the building design through a fully rendered 3D CAD model which is of professional standard and can be understood by members of the general public.
6. Argue persuasively for a design solution that you have generated.

Subject Content

Planning approval requirements
Complex and high-rise building projects
Buildings incorporating multiple usages
Design under constrained conditions
Multiple stakeholder interest groups
Conflict resolution

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Report	1,500 words	20	N	Individual
Applied Project	3D CAD model and 500 word explanation	30	N	Individual
Applied Project	3D CAD model and 2D drawings	40	N	Individual
Reflection	1,000 words	10	N	Individual

CIVL 4019 Building Design Project 2 (Honours)

Credit Points 20

Legacy Code 301102

Coordinator Mary Hardie (https://directory.westernsydney.edu.au/search/name/Mary Hardie/)

Description In this subject, students who have a record of superior performance in the program will continue to develop the design solution they created in Building Design Project 1 (Honours) into a fully resolved CAD model suitable for costing, scheduling and contracting. Construction Certificate documentation of professional standard will be generated. Both the complexity level and the number of design constraints will distinguish the project undertaken for this subject from the non-honours stream subject. Diverse stakeholder input on the projects impact will be gathered and assessed. Complex constraints relating to buildability and efficient project delivery will be resolved. Strict budgetary constraints will be imposed and students will be expected to demonstrate a capacity to use lateral thinking and generate creative solutions in response to problematic situations which arise during project delivery but which were unknown at project commencement.

Incompatible Subjects BLDG 4002 Building Design Project 2

Restrictions Students must be enrolled in 3727 Bachelor of Building Design Management.

Assumed Knowledge

Students should be familiar with the content from the first three years of the Building Design Management degree, including expertise in CAD, iterative design process and construction technology.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Select the appropriate construction systems for the building project.
2. Specify materials, finishes and performance standards expected in the completed building.
3. Resolve the details of footings/floor/wall and floor/roof junctions and illustrate these with detail drawings to a professional standard.
4. Construct a fully detailed 3D CAD model with sufficient information for accurate pricing and technical assessment.
5. Illustrate and present their design management choices in 2D views drawn from a 3D CAD model of professional standard.
6. Resolve budgetary conflicts, construction safety issues and environmental impacts of construction using innovative design management solutions.
7. Reflect on feedback relating to a building design and argue persuasively for a design solution that you have generated.

Subject Content

Construction Certificate approval
Complex and high-rise development
Complex services integration and clash detection
Proactive response to stakeholder feedback
Conflict resolution

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Specification of a critical trade section for the project	2000 words	20	N	Individual
Detailed drawings of critical construction junctions	3D CAD model and large scale 2D drawings	30	N	Individual
Fully developed building design suitable for Construction Certificate Application	3D CAD model and 2D drawings	40	N	Individual
Reflective Report	1000 words	10	N	Individual

CIVL 4020 Construction Research Project

Credit Points 20

Legacy Code 301223

Coordinator Peng Zhang (https://directory.westernsydney.edu.au/search/name/Peng Zhang/)

Description In this subject, students will undertake practical research into identified technical, managerial or economic problems in the construction industry. Students are required to undertake these industry-based research projects and produce an individual final report plus a 15 minute presentation.

School Eng, Design & Built Env

Discipline Construction Engineering

Student Contribution Band HECS Band 2 20cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 4 subject

Pre-requisite(s) BLDG 4010

Learning Outcomes

1. Conduct independent industry research by using appropriate research methods under guidance.
2. Prepare a project proposal identifying an industry problem and expected outcomes.
3. Conduct industry research using appropriate research methods.
4. Produce valuable outcomes to address the identified industry problem.

5. Communicate research results at a professional level through academic writing and an oral presentation

Subject Content

1. Industry-based research into specific topics relevant to the discipline
2. Discipline-specific content assigned by the supervisor(s)
3. Project research processes
4. Industry partner consultations

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

CIVL 4021 Sustainable Waste Engineering

Description This subject explores the application of circular economy and zero waste principles alongside real-world case studies to focus on sustainable management of waste. Through a real-world design challenge students will apply learning to propose sustainable solutions that incorporate minimisation, recycling, recovery and disposable options. The skills and knowledge acquired in this subject can be applied to many career pathways including Engineering, Built Environment, and Science related disciplines.

School Eng, Design & Built Env

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 4 subject

Equivalent Subjects CIVL 4011

CIVL 3020

Assumed Knowledge

It is assumed that the students have a good understanding of chemistry and engineering processes.

Learning Outcomes

After successful completion of this Subject, students will be able to:

1. Analyse classification, transportation, storage and disposal of solid and hazardous waste.
2. Apply risk assessment principles to manage solid and hazardous waste in a sustainable way.
3. Design landfill sites for both urban and rural areas using sound engineering principles.
4. Use life cycle analysis to determine appropriate options for waste disposal, and recovery and recycling of materials.
5. Determine appropriate circular economy and zero waste approaches/ technologies to minimise waste generation.
6. Demonstrate communication and collaboration skills in working with others in an ethical and respectful manner to produce professional analyses and reports in sustainable waste engineering.
7. Identify waste management challenges in the context of local, national and international regulations/ guidelines.
8. Develop a business case incorporating economic, technical, environmental and social aspects for managing the waste.

Subject Content

- Solid and hazardous waste production and its classification.
- Regulatory environment and the current technology in terms of reduction, reuse, recycling and disposal.
- Markets/ fate of recovered resources and its economic analysis.
- Evaluation of disposal options in terms environmental, economic and social aspects.
- License to operate waste management facilities.
- Risk assessment and management.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Practical	2000 words	20	N	Group
Report	5000 words including figures, tables and pictures And 3 minutes video	30	N	Group
Reflection	1000 words	20	N	Individual
Final Exam	3 hours	30	N	Individual

CIVL 5001 Building Engineering

Credit Points 10

Coordinator Brendan Kirkland (https://directory.westernsydney.edu.au/search/name/Brendan Kirkland/)

Description This subject provides students with an understanding of the factors that contribute to decisions in building design, particularly compliance with the National Construction Code and related standards. Students apply their learning to real world contexts as they integrate the construction codes, standards and engineering structural principles to building engineering. Students build their skillset to assess the structural performance acceptability of buildings.

School Eng, Design & Built Env

Discipline Building Services Engineering

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 5 subject

Equivalent Subjects CIVL 7011 - Building Engineering

Restrictions

Students enrolled in the 3693 Master of Engineering (Civil Engineering) cannot enrol in this subject.

Learning Outcomes

1. Analyse the underlying concepts of building engineering.
2. Interpret soil classification and its implication on footing systems.
3. Determine structural design actions and strength of various structural members through simple performance evaluation.
4. Interpret the performance requirements of the structural provisions of the National Construction Code as they relate to all classes of buildings.
5. Apply various standards and codes of practice related to structural engineering.
6. Evaluate existing structures in terms of the acceptability of their performance.

Subject Content

1. Structural provisions of the National Construction Code (Volumes 1 and 2)
2. Structural design actions: dead and live load, wind effect
3. Load combinations and Limit State Design
4. Soil classification and footing systems
5. Structural engineering concepts
6. Behaviour of structural materials
7. Reinforced concrete members and prestressed concrete
8. Structural timber members and connections
9. Structural steel members: beams, columns, and tension members
10. Steel connections, frames, and composite members

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

CIVL 7001 Advanced Applied Mechanics

Credit Points 10

Legacy Code 301010

Coordinator Baolin Wang (https://directory.westernsydney.edu.au/search/name/Baolin Wang/)

Description Applied mechanics deals with the mechanical responses of structural components under various loading and support conditions. This subject will introduce the theory of elasticity and study the bending, buckling and vibration behaviours of beams, plates and shells and their associated applications in engineering practices.

School Eng, Design & Built Env

Discipline Structural Engineering

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program

Assumed Knowledge

Students should have prior knowledge of strain, stress and deflection analysis of simple structures as well as knowledge of energy principle for structural analysis.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the bending, buckling and vibration behaviours of structural components;
2. Derive the governing equations for the bending, buckling and vibration of structural components;
3. Solve the governing equations for simple bending, buckling and vibration cases of beams, plates and shells;
4. Use finite element package to solve the governing equations numerically for complex cases;
5. Apply the buckling and vibration analysis to solve practical engineering problems.

Subject Content

1. Introduction to theory of elasticity; bending of beams;

2 Introduction to buckling of structures; analytical solutions for simple column buckling cases;
3. Introduction to vibration of structures; analytical solutions for simple beam free vibration cases;
4. Introduction to thin plate theory; Governing equations for the bending, buckling and vibration of plates;
5. Analytical solutions for simple plate bending, buckling and vibration cases;
6. Analysis of buckling and vibration of composite plates;
7. Introduction to thin shell theories;
8. Analytical solutions for simple shell bending, buckling and vibration cases;
9. Introduction to numerical methods for bending, buckling and vibration analysis of structures;
10. Applications of numerical methods to solve complex buckling and vibration cases for beams, columns and plates.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	1 hour each	40	N	Individual
Final Exam	2 hours	55	N	Individual
Numerical Problem Solving	2 pages each	5	N	Individual

CIVL 7002 Advanced Composite Structures

Credit Points 10

Legacy Code 301008

Coordinator Fidelis Mashiri (https://directory.westernsydney.edu.au/search/name/Fidelis Mashiri/)

Description This subject enables students to gain an in-depth knowledge into composite structures based on Australian Standards and International Standards. Recent advances in the design of composite beams, slabs, columns and connections will be introduced.

School Eng, Design & Built Env

Discipline Civil Engineering

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Classify various structural systems used in composite construction including recent developments
2. Apply limit state design concepts to composite structural elements and structures
3. Analyse and determine design loads for composite structures
4. Design composite structural elements based on service loads

Subject Content

1. Composite Beams
2. Composite Floors
3. Composite Columns
4. Composite Connections

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Professional Task	10 pages per assignment, total of 2, each worth 10%.	20	N	Individual
Intra-session Exam	2hrs	20	N	Individual
Final Exam	2hrs	60	N	Individual

CIVL 7003 Advanced Geotechnical Engineering

Credit Points 10

Legacy Code 300604

Coordinator Samanthika Liyanapathirana (https://directory.westernsydney.edu.au/search/name/Samanthika Liyanapathirana/)

Description This subject will provide an overview of soil mechanics concepts required for the solution of practical geotechnical engineering problems. Students will be taught soil and foundation analysis including design techniques. The topics will cover shallow foundations, pile foundations, the stability of earth retaining structures, excavations, soft soils, groundwater flow and stability of slopes. Practical engineering cases will be emphasized.

School Eng, Design & Built Env

Discipline Geotechnical Engineering

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 6113 - Foundation Engineering (PG)

Restrictions

Students must be enrolled in a postgraduate program

Assumed Knowledge

Fundamental knowledge of soil mechanics.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply soil mechanics principles to analyse foundation problems
2. Apply a systematic engineering approach to designing foundations
3. Interpret soil properties and soil test data for use in foundation analysis and design
4. Apply engineering software as a tool in foundation analysis and design
5. Interpret and apply Australian Standards when designing foundations

Subject Content

Introduction to foundation engineering
Site investigations
Shallow foundation design
Mat foundations
Lateral earth pressure
Retaining structures
Slope stability
Soft soils

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Applied Project	Equivalent 25 pages	30	N	Group
Applied Project	Equivalent 25 pages	30	N	Individual
Final Exam	2 hours	40	N	Individual

CIVL 7004 Advanced Highway Infrastructure

Credit Points 10

Legacy Code 301011

Coordinator Chin Leo (https://directory.westernsydney.edu.au/search/name/Chin Leo/)

Description This subject teaches pavement and ground engineering design as part of highway construction. Students will develop advanced knowledge and skills in designing pavement structures and ground improvement techniques dealing with soft and weak grounds related to the construction of highway pavements and embankments. Students will apply their knowledge and skills in accordance with Australian standards and practices. The knowledge and skills developed in this subject will provide students with opportunities in careers such as in ground engineering including those involving design, construction and maintenance of highway infrastructures.

School Eng, Design & Built Env

Discipline Geotechnical Engineering

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Soil mechanics at undergraduate level.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply principles of mechanics in pavement design.
2. Analyse soil principles for ground engineering and embankment design.
3. Evaluate soil properties and soil test data in geotechnical analysis and design.
4. Design highway infrastructures integrating relevant engineering principles using engineering software and Australian practices.
5. Collaborate with people from diverse backgrounds, both specialist and non-specialist, to achieve objectives of tasks.
6. Communicate analyses and recommendations in a formal report using appropriate technical and diagrammatic specifications.

Subject Content

Pavement Design Module:
1. Asphalt mix design
2. Flexible pavement design
3. Rigid pavement design
Highway Embankment and ground improvement Module:
1. Soft soil remediation
2. Ground improvement techniques
3. Earth fills and retaining structures

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Participation	2 hours (each week)	10	N	Individual
Report	25 pages	30	N	Group
Report	15 pages	20	N	Individual
Quiz	1 hour (per quiz)	40	N	Individual

CIVL 7005 Advanced Numerical Methods in Engineering

Credit Points 10

Legacy Code 301024

Coordinator Chin Leo (https://directory.westernsydney.edu.au/search/name/Chin Leo/)

Description The finite element method is an essential tool for the analysis and design of machine parts and civil engineering structures. The objective of this subject is to introduce the principles of finite element method and the applications of one, two and three dimensional elements in solving various engineering problems.

School Eng, Design & Built Env

Discipline Structural Engineering

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program

Assumed Knowledge

Students should have prior knowledge of strain, stress and deflection analysis of simple structures as well as knowledge of energy principle for structural analysis.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply the principles of finite element theory to analyse the mechanical behaviours of 1D, 2D and 3D structural components;
2. Formulate finite element algebraic equations for elasticity;
3. Determine the element stiffness matrices for 1D, 2D and 3D elements;
4. Evaluate the workings and limitations of commercial finite element packages;
5. Solve practical engineering problems by using finite element method.

Subject Content

1. Constitutive stress-strain relationships in elasticity;
2. Strain-displacement relationship;
3. Potential energy in elastic body;
4. Principle of minimum potential energy;
5. Finite element method for 1D analysis;
6. Shape functions;
7. 2D plane stress analysis including triangular elements, quadrilateral elements;
8. Finite elements for plates and shells;
9. 3D solid elements;
10. Constraints and pressure loadings;
11. Stress and strain results.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	1 hour each	40	N	Individual
Participation	2 pages each	5	N	Individual
Final Exam	2 hours	55	N	Individual

CIVL 7006 Advanced Structural Analysis

Credit Points 10

Legacy Code 300594

Coordinator Haiping Zhu (https://directory.westernsydney.edu.au/search/name/Haiping Zhu/)

Description This subject will introduce students at postgraduate level to structural analysis of trusses, beams, frames and plates. It covers the slope defection method and matrix method for analysis of beams, trusses and frames, and the bending and buckling analysis of beams and plates under various loading conditions. The theories learned in classes will be reinforced in practical sessions by using computer software packages.

School Eng, Design & Built Env

Discipline Civil Engineering

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects LGYA 5845 - Linear and Nonlinear Analysis of Structures LGYA 5976 - Advanced Structural Engineering LGYA 5837 - Numerical and Finite Element Methods

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Students must have knowledge in engineering mathematics, engineering mechanics at intermediate level and structural analysis at fundamental level.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. improve the skills to analyse beams and frames using the slope deflection method
2. enhance the ability to use the matrix method to analyse complex structures
3. analyse bending and buckling of beams and plates
4. use software packages to analyse structures

Subject Content

Slope deflection method for beams and frames
Matrix method for statically indeterminate structures
Bending of beams and plates
Buckling of beams and plates

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Final Exam	2 hours	55	N	Individual
Intra-session Exam	1.5 hours	25	N	Individual
Quiz	1 hour	10	N	Individual
Numerical Problem Solving	Tutorial question solutions	10	N	Individual

CIVL 7007 Advanced Timber Structures

Credit Points 10

Legacy Code 301009

Coordinator Fidelis Mashiri (https://directory.westernsydney.edu.au/search/name/Fidelis Mashiri/)

Description This subject enables students to gain an in-depth knowledge into timber structures based on Australian Standards. Design of timber beams, floors, columns and connections will be introduced with a focus on the use of plywood, round timbers, glue-laminated timber and structural laminated veneer lumber.

School Eng, Design & Built Env

Discipline Civil Engineering

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Interpret the properties of sawn timber and manufactured wood products that influence their strength as a construction materials.
2. Apply limit state design concepts for timber elements and whole structures
3. Determine design loads and analyse timber structures to evaluate internal design action effects
4. Design timber elements based on evaluated design action effects

Subject Content

1. Characteristics, grading and use of timber for structural design
2. Design of tension members
3. Design of Compression members
4. Design of members in flexure
5. Design of members under combined action
6. Design of connections

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Professional Task	10 pages per assignment	20	N	Individual
Intra-session Exam	2 hours	20	N	Individual
Final Exam	2 hours	60	N	Individual

CIVL 7008 Advanced Waste Management

Credit Points 10

Legacy Code 301017

Coordinator Zuhaib Siddiqui (https://directory.westernsydney.edu.au/search/name/Zuhaib Siddiqui/)

Description This subject covers sources, identification and characterisation of solid and hazardous waste generated from the community. Sustainable management of waste incorporating minimisation, recycle, recovery and disposable options is discussed. Also, atmospheric pollutants and their control, greenhouse gases and their impact on climate change are examined.

School Eng, Design & Built Env

Discipline Water and Sanitary Engineering

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate the technologies available for controlling the major atmospheric pollutants.
2. Systematically evaluate the drivers for climate change and discuss their impact at global level.
3. Classify the solid and hazardous waste produced and analyse its transportation and disposal options.
4. Apply risk assessment principles to manage hazardous waste in a sustainable way.
5. Apply advanced tools such as, life cycle analysis, to locate and design landfill sites for both urban and rural areas.
6. Assess waste disposal options, and recovery and recycling of materials in terms of triple bottom line objectives.

Subject Content

1. Solid and hazardous waste classification, transportation and processing.
2. Treatment and disposal options for solid and hazardous waste.
3. Risk assessment and management as applied to hazardous waste.
4. Landfill site location and design, and its sustainable management.
5. Contaminant transport and accumulation.
6. Waste disposal options and recovery and recycling of materials, and their assessment against triple bottom line criteria.
7. Atmospheric pollutants and their control.
8. Climate change and its mitigation.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Participation	1 hour per quiz	15	N	Individual
Report	4,000 words including tables, figures and pictures	30	N	Group
Report	2,000 words including figures, tables and pictures	5	N	Group
Final Exam	3 hours	50	N	Individual

CIVL 7009 Advanced Water Engineering

Credit Points 10

Legacy Code 300595

Coordinator Surendra Shrestha (https://directory.westernsydney.edu.au/search/name/Surendra Shrestha/)

Description This subject introduces advanced principles of engineering hydrology as it pertains to the surface water component of the hydrologic cycle. Students are exposed to floodplain analysis techniques. The focus is on practical engineering solutions to issues originating from catchment development. Students are exposed to commonly used hydraulic and hydrologic software packages to delineate flooded areas resulting from such developments.

School Eng, Design & Built Env

Discipline Water and Sanitary Engineering

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects CIVL 4007 Hydrology EART 4001 Surface Water Hydrology

Restrictions

This is a specialised subject in a specialist discipline in Master of Engineering program. Students must be enrolled in a postgraduate engineering program undertaking a Civil Engineering major or in the Master of Research.

Assumed Knowledge

Exposure to basic hydraulics and engineering hydrologic principles.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Simulate catchment response using hydrologic principles
2. Verify catchment response using commonly used hydraulic and hydrologic software packages
3. Design on-site detention structures to meet regulatory requirements
4. Identify areas flooded from storms of specified frequencies and durations
5. Communicate effectively with peers and wider professional communities

Subject Content

1. Components of a hydrologic cycle
2. Rainfall-runoff relationships
3. On-site detention systems
4. Commonly used hydraulic & hydrologic software packages

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Applied Project	2500 words per student + appendices	85	N	Group
Presentation	30 minute oral presentation	15	N	Individual

CIVL 7011 Building Engineering

Credit Points 10

Legacy Code 300713

Coordinator Brendan Kirkland (https://directory.westernsydney.edu.au/search/name/Brendan Kirkland/)

Description The aim of this subject is to provide students with an understanding of the factors that contribute to decisions in building design in respect of compliance with building regulations and standards. Topics include soil classification for construction, footing systems, loadings and their evaluation, structural materials and systems, structural behaviour and strength, and failure and rectification.

School Eng, Design & Built Env

Discipline Building Services Engineering

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects CUVL5001 - Building Engineering
LGYB 8310 - Building Engineering

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. describe the underlying concepts of building engineering
2. explain the soil classification and its implication on footing systems
3. discuss loading and structural behaviour of various structural members and perform simple performance evaluation
4. carry out rudimentary review of designs for NCCA compliance
5. assess existing structures in terms of the acceptability of their performance.
6. apply various codes of practice related to structural engineering in assessing a design solution.

Subject Content

1. Structural design actions: dead and live load, wind effect
2. Load combinations and Limit State Design
3. Soil classification and footing systems
4. Structural engineering concepts
5. Behaviour of structural materials
6. Reinforced concrete members and prestressed concrete
7. Structural timber members and connections
8. Structural steel members: beams, columns and tension members
9. Steel connections, frames and composite members

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	3 x 30 minutes	30	N	Individual

Final Exam	2 hours	30	N	Individual

CIVL 7012 Building Fire Services

Credit Points 10

Legacy Code 300711

Coordinator Sameera Wijesiri Pathirana (https://directory.westernsydney.edu.au/search/name/Sameera Wijesiri Pathirana/)

Description This subject describes the various types and application of building services and fire safety systems. It introduces appropriate standards for building fire service system design and the methods of applying recommendations of fire engineering assessments with respect to building services and fire safety systems.

School Eng, Design & Built Env

Discipline Building Services Engineering

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYC 0661 - Building Fire Services

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Building surveying, fire safety engineering and related disciplines.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. explain the operation of building fire services
2. identify and apply the relevant standards for building fire services
3. describe the relationship between fire brigade intervention and fire safety design
4. assess the adequacy of building fire safety system designs

Subject Content

Building Fire Safety Systems
Smoke Hazard Management
Automatic Fire Detection
Fire Hydrants
Hose Reels and Extinguishers
Fire Sprinklers
Special Hazard Extinguishment
Warning, communication signage and lighting
Emergency Planning and Response
Environment in which Fire Brigade Intervention Model operates
The Fire Brigade Intervention Model
Fire Brigade Operations
Fire System Reliability
Fire awareness
Hazard reduction & performance based designs and servicing, maintenance and certification.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	Short quiz with 10 multiple choice questions.	10	N	Individual
Essay	1500 words	20	N	Individual
Quiz	Short quiz with 10 multiple choice questions.	10	N	Individual
Essay	3000 words.	40	N	Individual

CIVL 7013 Deep Foundations

Credit Points 10

Legacy Code 301015

Coordinator Samanthika Liyanapathirana (https://directory.westernsydney.edu.au/search/name/Samanthika Liyanapathirana/)

Description This subject covers advanced analysis and design criteria for deep foundations. Both statically and dynamically loaded deep foundations are covered including the site investigation methods and field testing methods adopted in practice for determining integrity and load carrying capacity. Appropriate computer software will be introduced to carry out the deep foundation design according to the Australian Standards.

School Eng, Design & Built Env

Discipline Geotechnical Engineering

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Design piled raft foundations
2. Interpret and apply Australian standards for design of deep foundations
3. Identify pile load and integrity testing methods suitable for different conditions
4. Describe site investigation methods appropriate for different site conditions
5. Evaluate settlement, lateral deformation and load carrying capacity of deep foundations

Subject Content

1. Site investigation
2. Analysis and design of deep foundations subjected to axial and lateral loading, according to Australian Standards.
3. Piled raft foundations
4. Design of deep foundations for seismically active regions
5. Pile load and integrity testing methods for Deep foundations

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz (Online)	1 hour	20	N	Individual
Design Project (Individual)	40 pages	30	Y	Individual
Final exam	2 hour	50	Y	Individual

CIVL 7014 Sustainable Systems

Credit Points 10

Legacy Code 301003

Coordinator Sathaa Arumugam Sathasivan (https://directory.westernsydney.edu.au/search/name/Sathaa Arumugam Sathasivan/)

Description This subject teaches students the essential tools available to achieve environmental sustainability in various engineering/ construction/industrial design professional settings. The focus of the subject is on the selection and application of methods and processes to achieve sustainable development goals (SDGs) in Australian and global context. The skills gained in this subject will help the student to work in professions such as an environmental engineer, an environmental manager, a sustainability advisor or a sustainability engineer.

School Eng, Design & Built Env

Discipline Water and Sanitary Engineering

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically evaluate and select appropriate approaches for achieving sustainable development goals
2. Conduct Environmental/Social/Economic Impact Assessment by taking into social, cultural, environmental, and global considerations.
3. Critically analyse materials and/or energy flow in a chosen project/ process/setting and identify improvement options taking into consideration of latest literature.
4. Conduct Life Cycle Assessment to support decision-making.
5. Succinctly and effectively communicate assessment outcomes to a range of audience.
6. Apply Australian environmental regulations correctly to different facts and in different contexts.

Subject Content

1. Introduction to sustainable development.
2. Material and energy flow in the environment and processes.
3. Ecosystems, Ecology.
4. Social aspects of environment and Environmental ethics.
5. Sustainability development goals (SDGs).
6. Food-water-energy nexus
7. Tools applied in achieving sustainability and case studies -

a. Environmental/Economic and Social Impact Assessment,
b. Environmental auditing
c. Life Cycle Assessment
d. Social Impact Assessment
e. Regulatory, Economic, and Policy tools

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Report	2000 to 3000 words	35	N	Individual

CIVL 7015 Water Resources Systems Analysis

Credit Points 10

Legacy Code 301012

Coordinator Surendra Shrestha (https://directory.westernsydney.edu.au/search/name/Surendra Shrestha/)

Description Water resources projects are large infrastructure projects requiring huge capital expenditure. In addition, multiple options are usually available to meet the project goals but at different costs and under varying constraints. This subject presents the application of optimisation techniques to select the best project from a list of competing projects. Applications of these techniques to optimally allocate available water resources are discussed. These are presented within the context of maximising the return of investment.

School Eng, Design & Built Env

Discipline Water and Sanitary Engineering

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate Engineering program undertaking a Civil Engineering major.

Assumed Knowledge

Discounting techniques, time value of money, equivalence analysis, present worth analysis, annual worth analysis, benefit-cost analysis, net benefit analysis, rate of return. Fluid properties, hydrostatics, open channel flow analysis, pipe network analysis, analysis and design of hydraulic structures, exposure to surface water hydrology and its components, water quality analysis.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. formulate and solve optimisation problems with specific application to water resources projects
2. use linear and non-linear programming techniques in the decision making process (water resources projects)
3. propose the best water resource project alternative from among various available options
4. develop and implement decision support systems in selection of available water resources
5. select and apply the most appropriate model from among commonly available water allocation models
6. communicate effectively with peers and wider professional communities

Subject Content

1. Linear Programming principles
2. Non-linear Programming techniques
3. Engineering Economic theory
4. Water Allocation Models
5. Commonly used optimisation packages

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Project Report x 1	2500 words (plus appendices) (est.)	85	N	Individual
Oral Presentation	30-min oral presentation	15	N	Individual

CIVL 7017 Wastewater Treatment and Recycling

Credit Points 10

Legacy Code 301278

Coordinator Sathaa Arumugam Sathasivan (https://directory.westernsydney.edu.au/search/name/Sathaa Arumugam Sathasivan/)

Description This subject teaches students the fundamental science and hydraulic engineering principles necessary to design, operate and troubleshoot wastewater systems consisting of collection, treatment and recycling and resource recovery. Students will be exposed to emerging wastewater treatment processes and its applications through research and practical work.

School Eng, Design & Built Env

Discipline Water and Sanitary Engineering

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Apply the principles of wastewater treatment processes.
2. Design the elements of the wastewater treatment units in more detail with appropriate dimensions.
3. Conceptually design wastewater treatment processes for different applications.
4. Explain the emerging treatment processes through a research project.
5. Design the sludge treatment and management process.
6. Apply the principles and process of resources recovery.

Subject Content

1. Sources and quality of wastewater including storm water sources
2. Principles of wastewater treatment process
3. Conventional wastewater treatment process design
4. Treatment and disposal of wastewater sludge
5. Emerging and advanced wastewater treatment processes for recycled water production
6. Resources recovery from wastewater and sludge

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Report	15-20 pages	25	N	Individual
Report	3,000 words	25	N	Group
Quiz	15 min long each x 12 weeks	15	N	Individual
Final Exam	2 hours	35	Y	Individual

CMPL 1001 Traditional Chinese Medicine 1

Credit Points 10

Legacy Code 400346

Coordinator Xiaoshu Zhu (https://directory.westernsydney.edu.au/search/name/Xiaoshu Zhu/)

Description This subject provides a comprehensive introduction to traditional Chinese medicine (TCM). Students are introduced to basic TCM theory, and the physiological principles of the diagnostic system that forms the basis of TCM practice. The history and philosophy of Chinese medicine is introduced and discussed in the light of contemporary clinical practice.

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss the philosophical context of TCM in preparation for future clinical practice;
2. Compare the main differences between traditional Chinese medical science and contemporary Western medical science;
3. Explain the professional practice of TCM within the context of health care in Australia, and the development of the profession internationally;
4. Describe physiological functions and attributes of the fundamental concepts including yin/yang, wu xing, vital substances, and bodily organs (zang-fu) and their interrelationships in TCM;
5. Determine the principles of aetiology and pathogenesis in TCM, including the causes of disease;
6. Discuss the interrelationship of the causes of disease, the mechanisms by which they disrupt health and the relationship of lifestyle patterns to health and prevention of disease;
7. Summarise the historical development of TCM.

Subject Content

1. Introduction to TCM:
- The Definition of TCM
- contemporary TCM practice (methods, clinical scope, integration)
- The main distinguishing features of TCM philosophy and theoretical principles
- difficulties in the study of TCM for contemporary Western students; contemporary TCM terminology in English, TCM concepts that do not exist in Western culture, TCM wholistic paradigm vs. WSM analytical approach
- An historical context
2. Basic TCM theory:
- yin/yang theory
- wu xing theory and The concordances
3. TCM physiology:

- Physiology of the internal organs (zang-fu)
- Origins, actions and functions of QI, blood, body fluids, jing and shen
- introduction to channels (Jingluo)
- food and fluid metabolism
4. Aetiology & pathogenesis in TCM:
- TCM view of disease
- health and disease concepts and definitions
- etiology & pathogenesis of disease in TCM
- The causes of disease in Traditional Chinese medicine
- The relationship between The body and pathogenic Factors

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	20 minutes	20	N	Individual
Essay	1,500 words	40	N	Individual
Final Exam	2 hours	40	N	Individual

CMPL 1002 Traditional Chinese Medicine 2

Credit Points 10

Legacy Code 400348

Coordinator Xiaoshu Zhu (https://directory.westernsydney.edu.au/search/name/Xiaoshu Zhu/)

Description This subject provides learning experiences that enable students to expand upon their understanding of TCM philosophy and principles, with particular reference to developing diagnostic skills in TCM. Students acquire basic skills in case history taking, interpretation of relevant signs and symptoms, arriving at a TCM diagnosis, and devising suitable treatment strategies. The subject also covers basic Chinese language including Pin Yin and Romanisation to enable students to apply TCM terminology as part of clinical practice.

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Pre-requisite(s) CMPL 1001

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Command knowledge of the physiological functions and attributes of the Zang-fu organs and their interrelationships
2. Articulate a critical understanding of the four methods of TCM diagnosis, including pulse, tongue and abdominal diagnosis
3. Complete case studies from interrogation and collection of clinical data through to basic diagnosis and treatment principles
4. Analyse clinical cases with the four methods of diagnosis
5. Demonstrate essential verbal and non-verbal communication skills in the interaction with individual clients, patients, and others
6. Use the Pin Yin system and simple Chinese characters in the practice of Chinese medicine

Subject Content

1. The four methods of diagnosis in TCM:
- Inspection (including inspection of the tongue & other key features)
- Inquiry (including the ten traditional questions, additional questions for women, modern approaches).
- listening & smelling
- palpation (including palpation of the radial pulse and abdomen)
- essential verbal and nonverbal communication skills in the interaction with individual clients, patients and others
2. Practice of Chinese language in Chinese medicine practice - Pin Yin system of Romanisation - Simple Chinese characters used in practice

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	40 mins	15	N	Individual

CMPL 2002 Channels and Points 1

Credit Points 10

Legacy Code 400874

Coordinator Isabella Leung (https://directory.westernsydney.edu.au/search/name/Isabella Leung/)

Description Acupuncture is one of the principal therapeutic interventions in Traditional Chinese Medicine (TCM). This subject introduces students to acupuncture theory and practice, and provides opportunity to develop practical skills. It covers the theory of channels and points, channel pathway, point location and indications of the conception and governor vessels, and the first 6 channels in the meridian cycle. This subject also expands upon the student's understanding of TCM theory and practice principles. This subject includes a minimum of 20 practicum hours at UniClinic.

School Health Sciences

Discipline Acupuncture

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) CMPL 1002

Co-requisite(s) CMPL 2006

Equivalent Subjects LGYA 7238 - Acupuncture 1

Restrictions

Students must be enrolled in 4660 Bachelor of Health Science-Master of Traditional Chinese Medicine or 4710 Bachelor of Traditional Chinese Medicine.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Differentiate between the distribution and local anatomy of the channels covered in this unit;
2. Point out and explain the location, functions and indications of commonly used points on the channels, and of the extra points.
3. Distinguish high-risk related acupuncture points and apply appropriate needling strategies.

Subject Content

1. The channel system
- Classification and nomenclature of The channels
- yin yang relationships within The channel system
- general functions of The channels
- general principles of QI flow and channel Distribution
- The external and Internal pathways of The twelve Regular channels
- theory, pathways, points and Connecting points of The eight extra channels
- pathways of The divergent, luo, and musculo-tendino channels
2. Acupuncture points
- general introduction
- classes of points
- methods of locating points
- nomenclature of The points
- therapeutic properties of The points (functions and Indications)
3. Specific point categories
- wu Shu points
- Yuan points
- luo points
- Xi points
- back Shu points
- front mu points
- Confluent points
- influential points
- Crossing points
- Lower He points
4. Surface anatomical features in relation to acupuncture points
a. Anatomical position and movement
b. Anatomy and clinical assessment including visual and palpation examination association with acupuncture points
- head
- Neck
- Thorax
- abdomen and pelvis
- back
- Upper limb
- Lower limb
5. Locations, functions, indications and application (needling/moxibustion methods and precautions/contraindications) of the points of:
- Governing Vessel (Dumai)
- Conception Vessel (Renmai)
- Lung Channel of Hand Taiyin
- Large Intestine Channel of Hand Yangming
- Stomach Channel of Foot Yangming
- Spleen Channel of Foot Taiyin
- Heart Channel of Hand Shaoyin
- Small Intestine Channel of Hand Taiyang
Note: surface anatomy relevant to identifying individual acupuncture point location covered in this subject and relevant safe administration of needling will be covered.
6. Clinical skills
- Point location and application of The main acupuncture points
- identification of High-Risk related acupuncture points
- Sterilisation procedures & maintaining asepsis
- occupational health and safety procedures
- acupuncture contraindications and adverse reactions
- clinical accidents and their management
- introduction to filiform needling, correct direction and length
- codes and guidelines required by The Chinese medicine Board of Australia, including Code of conduct, infection prevention and control guidelines for acupuncture practice
- needling practice

Special Requirements

Legislative pre-requisites

•To be able to enroll in this subject, all students must comply with School Requirements indicated below:

STUDENT COMPLIANCE INFORMATION FOR ALL HEALTH-RELATED PLACEMENTS:

Students must meet Western Sydney University course requirements as well as any special, legislated, or policy-mandated requirements.

There are Western Special Requirements that you may need to meet to enroll into your program of study or subject.

International students have additional requirements: check the booklet for these additional requirements.

School Requirements
Contact your School for further details regarding your School's requirements, if any, such as:
•If you live outside of NSW or Australia or need to meet a state, territory or country's compliance requirements
•NSW Working with Children Check (WWCC) or another state equivalent, valid for your entire course.
•Current approved first aid certificate valid for your entire course - approved course providers can be found at: http://training.gov.au
•Other non-health related requirements.

Refer to the Special Requirements website for more information. Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Practical Exam	2 occasions, 25 minutes per student	40	Y	Individual
Quiz	1 hour	10	N	Individual
Final Exam	2 hours	50	N	Individual
Log/ Workbook	Total 20 hours internal hours	S/U	Y	Individual

CMPL 2003 Channels and Points 2

Credit Points 10

Legacy Code 400875

Coordinator Isabella Leung (https://directory.westernsydney.edu.au/search/name/Isabella Leung/)

Description Acupuncture is one of the principal therapeutic interventions in Traditional Chinese Medicine (TCM). This subject completes the study of the system of channels and points, which forms the basis of clinical application of acupuncture. It covers the channel pathway, point location and indications of the last 6 channels of the meridian cycle and the extra points. It also reinforces the student's ability to identify and palpate surface anatomy relevant to identifying the acupuncture point locations covered in this subject and relevant safe administration of needling. This subject expands the student's understanding of TCM theory and practice principles. This subject includes mandatory clinical placement. As an indication, this subject includes a minimum of 20 practicum hours at UniClinic, and 24 practicum hours at an external clinic.

School Health Sciences

Discipline Acupuncture

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) CMPL 2006 AND
CMPL 2002

Equivalent Subjects LGYA 7238 - Acupuncture 1

Restrictions

Students must be enrolled in 4660 Bachelor of Health Science-Master of Traditional Chinese Medicine or 4710 Bachelor of Traditional Chinese Medicine to enrol in this subject.

Assumed Knowledge

Knowledge in Chinese Medicine Theory and basic meridian theoretical knowledge and competency in first six channels of the meridian system.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Differentiate between the distribution and local anatomy of the channels covered in this unit;
2. Identify location, functions and indications of commonly used points on the channels, and of the extra points;
3. Identify high-risk related acupuncture points and apply appropriate needling strategies.

Subject Content

1. The three yang channels of foot and points
- pathway and Indications of The channels
- Locations and Indications of The points
2. Du, Ren and other extra-ordinary channels and points
3. The extra points
Note: surface anatomy relevant to identifying individual acupuncture point location covered in this subject and relevant safe administration of needling will be taught.
Clinical skills
- Point location of The main acupuncture points
- identification of High-Risk related acupuncture points

Special Requirements

Legislative pre-requisites

Students must meet Western Sydney University course requirements **as well as** any special, legislated, or policy-mandated requirements. There are Western Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/) that you may need to meet to enrol

into your program of study or subject. There are **mandatory NSW Health student placement policy requirements** you are responsible to meet to undertake any placement in any NSW Health facility. You must be assessed in the first year of your enrolment regardless of when you expect to go on your first placement.
Access and read the NSW Student Compliance Information Booklet (https://www.westernsydney.edu.au/__data/assets/pdf_file/0007/1647655/2022_NSWH_Student_Compliance_Information_Booklet.pdf), ensure that you gather documentary evidence of your vaccination history, complete all relevant NSW Health forms relevant to your campus enrolment requirements, and follow booklet instructions on how to have your compliance documents assessed by NSW Health. International students have additional requirements: check the booklet for these additional requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as:

- If you live outside of NSW or Australia or need to meet a state, territory or country's compliance requirements
- NSW Working with Children Check (WWCC) or another state equivalent, valid for your entire course.
- Current approved first aid certificate valid for your entire course - approved course providers can be found at: http://training.gov.au (http://training.gov.au/)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only): https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance. (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

CMPL 2004 Chinese Materia Medica 1

Credit Points 10

Legacy Code 400876

Coordinator Yu-Ting Sun (https://directory.westernsydney.edu.au/search/name/Yu-Ting Sun/)

Description Herbal medicine is one of the principal therapeutic interventions in Traditional Chinese Medicine. This subject introduces students to the therapeutic and reference organisation of Chinese medicinal herbs, and enables students to commence using the materia medica. It covers the commonly used herbs in each of the six categories of the Chinese materia medica, including the herbal properties, actions, indications, contraindications, combined usage as well as herbal dispensing. This subject also expands upon the student's understanding of TCM theory and practice principles. This subject includes a minimum of 20 practicum hours at UniClinic.

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) CMPL 1002

Co-requisite(s) CMPL 2006

Equivalent Subjects LGYA 7239 - Chinese Herbal Medicine 1

Assumed Knowledge

Assumed knowledge equivalent to Traditional Chinese Medicine 1

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply the basic traditional Chinese herbal medicine theory and practice.
2. Compare the properties, functions, indications, contraindications and safety profiles of each of the major individual herbs in the six herb categories.
3. Evaluate the interactions of herbs including synergism,and antagonisms in the context of Chinese medicine theory in an evidence-based approach.
4. Classify the range of commonly used Chinese herbs in each category.

Subject Content

1. Introduction to Chinese materia medica
2. Herbal properties
- four natures
- Five flavours
- four tendencies
- Attributive meridians
- combination of The herbs
- contraindications of The herbs
3. Naming and classification of Chinese herbs

4. Individual herbs (including commonly used combinations)
- herbs for relieving The exterior
- herbs for clearing heat
- herbs for removing dampness
- herbs for regulating QI
- herbs for moving blood
- Tonifying herbs

Special Requirements

CMPL 2005 Chinese Materia Medica 2

Credit Points 10

Legacy Code 400877

Coordinator Yu-Ting Sun (https://directory.westernsydney.edu.au/search/name/Yu-Ting Sun/)

Description This subject completes the study of Chinese medicinal herbs, which forms the basis for Chinese herbal medicine. It covers the commonly used herbs in each of the twelve categories of the Chinese materia medica, including the herbal properties, actions, indications, contraindications and combined usage. It also introduces the basic knowledge of herbal pharmacognosy. This subject also expands upon the student's understanding of Traditional Chinese Medicine theory and practice principles. As an indication, this subject includes a minimum of 20 practicum hours at UniClinic, and 24 practicum hours at an external clinic.

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) CMPL 1002 AND
CMPL 2004

Equivalent Subjects LGYA 7240 - Chinese Herbal Medicine 2

Assumed Knowledge

Basic knowledge on Traditional Chinese Medicine and Materia Medica or successful completion of CMPL1002 Traditional Chinese Medicine 2, and CMPL 2004 Chinese Materia Medica 1 or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply basic herbal theory and practice;
2. Identify the major individual herbs in each of the twelve herb categories utilising visual recognition, tasting, smelling and hand examination;
3. Describe the major individual herbs in each of the twelve herb categories, in terms of properties, functions and contraindications;
4. Explain known herb interactions for the herbs in each category;
5. Apply the concept of synergy in Chinese herbal medicine, specifically in reference to the herbs covered in this unit;
6. Compare and contrast the range of commonly used Chinese herbs in each of the twelve categories.

Subject Content

1. Individual herbs (including commonly used combinations):
- herbs for warming The interior
- Astringent herbs
- herbs for dispelling Wind-dampness
- phlegm resolving, antitussive & antiasthmatic herbs
- herbs for relieving food stagnation
- herbs for purgation
- herbs for arresting bleeding
- herbs for calming The shen
- herbs for extinguishing The liver Wind
- Aromatic substances for Opening The orifices
- herbs for expelling parasites
- herbs for external application
2. Introduction to herbal pharmacognosy
- Plant physiology, Morphology and taxonomy
- major Chemical groups of Plant constituents

Special Requirements

Legislative pre-requisites

Students must meet Western Sydney University course requirements **as well as** any special, legislated, or policy-mandated requirements.

There are Western Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/) that you may need to meet to enrol into your program of study or subject. There are **mandatory NSW Health student placement policy requirements** you are responsible to meet to undertake any placement in any NSW Health facility. You must be assessed in the first year of your enrolment regardless of when you expect to go on your first placement.

Access and read the NSW Student Compliance Information Booklet (https://www.westernsydney.edu.au/__data/assets/pdf_file/0007/1647655/2022_NSWH_Student_Compliance_Information_Booklet.pdf) ensure that you gather documentary evidence of your vaccination history, complete all relevant NSW Health forms relevant to your campus enrolment requirements, and follow booklet instructions on how to have your compliance documents assessed by NSW Health.

International students have additional requirements: check the booklet for these additional requirements.

School Requirements
Contact your School for further details regarding your School's requirements, if any, such as:

- If you live outside of NSW or Australia or need to meet a state, territory or country's compliance requirements
- NSW Working with Children Check (WWCC) or another state equivalent, valid for your entire course.
- Current approved first aid certificate valid for your entire course - approved course providers can be found at: http://training.gov.au (http://training.gov.au/)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only): https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance. (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Essential equipment

Clinical uniform is required.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Practical Exam	40 minutes	25	Y	Individual
Case Study	1,500 words	25	N	Individual
Final Exam	2 hours	50	N	Individual
Log/ Workbook	20 hours at UniClinic	Pass/Fail	Y	Individual

CMPL 2006 Traditional Chinese Medicine 3

Credit Points 10

Legacy Code 400352

Coordinator Xiaoshu Zhu (https://directory.westernsydney.edu.au/search/name/Xiaoshu Zhu/)

Description This subject enables students to develop a sound understanding of causes of disease in TCM with a particular focus on TCM disease pattern differentiation. Students will be able to identify the clinical manifestations relating to specific patterns and develop the appropriate TCM treatment principles. This is complemented by the reinforcement of skills in case history taking and TCM diagnostics.

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) CMPL 1002

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Differentiate TCM disease patterns according to the Eight Principles, zang-fu organs; Qi, Blood and body fluid; and the aetiology
2. Explain the progression of disease
3. Compare and contrast the mechanisms of aetiology and pathogenesis in TCM.
4. Articulate the treatment principles in TCM

Subject Content

1. TCM pathophysiology:
- organ (zang fu) pathophysiology
- qi, blood, body fluid pathophysiology
- channel pathophysiology
- latent diseases
2. Pattern differentiation in TCM:
- according to pathogen (heat, damp, dry, cold, wind, phlegm, food and blood stassis)
- according to the Eight Principle patterns of disease
- according to the zang fu organs
- according to qi, blood and body fluid
- Symptoms as a result of conflict between pathogenic and antipathogenic qi
- Root and symptoms (ben and biao) - Disease progression and the transformation of disease states (six divisions, four stages, 3 levels (jiao))
3. Treatment principles in TCM

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Case Study	1,500 words	20	N	Individual
Essay	2,000 words	40	N	Individual

CMPL 3001 Acupuncture Techniques

Credit Points 10

Legacy Code 400873

Coordinator Isabella Leung (https://directory.westernsydney.edu.au/search/name/Isabella Leung/)

Description This subject consolidates and extends students' knowledge of acupuncture theory and practice, and provides further opportunity to develop practical skills. Students are introduced to the theory of point combinations and the development of acupuncture prescriptions and treatment plans. Practical sessions include obtaining Qi (De Qi), promoting Qi techniques, tonifying and reducing needling techniques, moxibustion, cupping, Gua Sha, Tuina, intradermal/cutaneous needling, scalp acupuncture, auricular acupuncture, wrist/ankle acupuncture, electroacupuncture and laser acupuncture. This subject also expands upon the student's understanding of the theory and practice principles of traditional Chinese medicine.

School Health Sciences

Discipline Acupuncture

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) CMPL 2003 AND
CMPL 2006

Equivalent Subjects CMPL 2001 - Acupuncture 2

Restrictions

Students must be enrolled in 4660 Bachelor of Health Science-Master of Traditional Chinese Medicine or 4710 Bachelor of Traditional Chinese Medicine.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Formulate acupuncture prescriptions for specific indications.
2. Competently apply knowledge and safe practice of manipulation techniques of acupuncture, moxibustion, cupping and related other techniques/adjunct therapies.

Subject Content

1. Basic therapeutics of acupuncture
- introduction to acupuncture techniques
- managing shen and retaining QI
2. Practical skills of acupuncture
- QI sensation
- Safe insertion of filiform needles to different directions and depths with relevance to function (including needling difficult points, different gauges and lengths, Connecting points)
- Basic needle manipulations
- Reinforcing and reducing methods
3. Moxibustion, cupping and Gua Sha
- functions and Indications of moxibustion, cupping and Gua Sha
- contraindications and cautions of moxibustion, cupping and Gua Sha
- management of accidents Resulting from moxibustion, cupping and Gua Sha
- clinical skills for practicing moxibustion, cupping and Gua Sha
4. Acupuncture prescription
- principles of Point selection and combination
- methods of Point selection and combination
5. Intrademal/cutaneous needling and bloodletting
6. Scalp acupuncture
7. Auricular acupuncture

8. Wrist/ankle acupuncture
9. Electroacupuncture
10. Laser acupuncture
11. Introduction to Tuina

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement. Students must also hold a valid and current First Aid Certificate from a Registered Training Organisation. Refer to the Special Requirements website for more information.

CMPL 3002 Chinese Medicinal Formulas

Credit Points 10

Legacy Code 400878

Coordinator Yu-Ting Sun (https://directory.westernsydney.edu.au/search/name/Yu-Ting Sun/)

Description Herbal medicine is the principal therapeutic intervention in Traditional Chinese Medicine (TCM). This subject follows from Chinese Materia Medica 1 & 2, and begins the study of major Chinese herbal formulas, which form the basis for clinical prescribing in Chinese herbal medicine. The focus of this subject is to compare and contrast the main formulas in specified categories, and to analyse the specific actions of the herbs that make up the formula. Students will be required to formulate, assemble and prepare complex prescriptions. This subject expands upon the student's knowledge of the Chinese Materia Medica, as well as the understanding of TCM theory and practice principles.

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) CMPL 2006 AND
CMPL 2005

Equivalent Subjects LGYA 7240 - Chinese Herbal Medicine 3

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate the construction of Chinese herbal formulas;
2. Articulate herb interactions and apply this knowledge in the construction of formulas;
3. Compare and contrast the main formulas in the categories covered, including the herbs that make up the formula, their action and indications for usage of the formula;
4. Formulate and modify herbal prescriptions to suit individual clinical presentations.

Subject Content

1. Introduction to Chinese herbal formulas
- therapeutic methods and herbal formulas
- composition of herbal formula
- action to take in The event of An unexpected reaction
2. Major herbal formulas
- exterior dispersing formulas
- heat clearing formulas
- Laxative and purgative formulas
- Dryness dispelling formulas
- Wind eliminating formulas
- dampness dispelling formulas
- phlegm dispelling formulas
- food stagnation reducing formulas
- QI regulating formulas
- blood regulating formulas
- Tonifying formulas
- interior warming formulas
- Astringent formulas
- shen calming formulas
- Harmonizing formulas

Co-requisite(s) CMPL 3001 AND
CMPL 3002

Restrictions

Students must be enrolled in 4660 Bachelor of Health Science-Master of Traditional Chinese Medicine or 4710 Bachelor of Traditional Chinese Medicine.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Conduct basic aspects of clinic and patient management
2. Conduct Chinese medicine consultations and maintain case records according to
3. Formulate Chines medicine diagnoses and treatment plans in a clinical setting
4. Apply acupuncture theories and techniques in the treatment of commonly seen conditions
5. Explain Chinese medicine diagnosis and treatments to patient in lay terms
6. Prepare herbal decoction
7. Dispense raw, granule, patent Chinese herbal medication according to accreditation standards
8. Apply reflective practice to support clinical learning.

Subject Content

1. Basic clinical management and facilitation
- managing patients and patient records
- assisting in equipment used in treatment
- room preparation
2. Conducting a Chinese medicine consultation and forming diagnosis and treatment
3. Explaining Chinese medicine to the patient
4. Preparing of herbal decoctions
5. Dispensing Chinese medicinal prescriptions, labelling and recording requirements, administration advice and precautions
6. Acupuncture prescription formulation for common conditions

Restrictions

Students must be enrolled in 4660 Bachelor of Health Science-Master of Traditional Chinese Medicine or 4710 Bachelor of Traditional Chinese Medicine.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Participate in all basic aspects of clinic and patient management;
2. Engage in patient management in a clinical context;
3. Apply the practice of specific acupuncture techniques;
4. Employ the basic herbal processing, prescribing and dispensing skills;
5. Assist in the formulation of herbal and acupuncture prescriptions.
6. Execute foundation skills in the use of the Pin Yin system and simple Chinese characters used in the practice of Chinese medicine.

Subject Content

1. Practice of acupuncture techniques introduced in TCM Practice 1 and classical techniques including:
- Cooling The night sky
- Fire on The mountain
- Waving The dragon?fs tail
2. Basic preparation of medical substances and formulae
3. Processing of crude herbs
4. Practice of Chinese language in Chinese medicine practice
- Pin yin system of Romanisation
- simple Chinese characters used in practice
5.Clinical management and facilitation of practice:
- managing equipment
- Assessing A patient, gathering clinical information and clinical decision-making (assistance)
- consulting patients and providing treatment (assistance)

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement. CMPL 4001 Block Clinical Practicum

Credit Points 10

Legacy Code 401104

Coordinator Xiaoshu Zhu (https://directory.westernsydney.edu.au/search/name/Xiaoshu Zhu/)

Description This subject provides the student with intensive, supervised clinical practice experience. Arrangements are usualy made for students to complete this stage in China. Due to the travel restriction as a result of COVID-19 pandemic, this subject in 2020 is wholly offered in Australia. The subject represents the final clinical practicum stage with an opportunity in develoing clinical skills. Students will be expected to demonstrate competence in handling patients in a clinical context, and manage their integrated care using Traditional Chinese Medicine.

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 4 subject

Incompatible Subjects CMPL 7002 - Block Clinical Practicum (PG) AND LGYA 7257 - Block Clinical Practicum

Restrictions Students must be enrolled in a Traditional Chinese Medicine program.

Assumed Knowledge

It is assumed the student will have a thorough knowledge of TCM theory, acupuncture and Chinese herbal medicine and have completed all (or close to all) clinical hours under supervision. As a core competency in registered TCM practice this is not a suitable subject for other health disciplines.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Synthesise knowledge and competency in the practice of all TCM clinical areas;
2. Demonstrate competence in the design and formulation of care of patients in a clinical context;
3. Correctly diagnose, prescribe and administer treatment;
4. Examine issues related to the care of patients in a multidisciplinary environment;
5. Understand the importance of culture and diversity in professional settings.

Subject Content

The following skills should be mastered in a high turnover clinical environment (preferably in a Chinese hospital environment):
- detailed Examination of patients, including, Analysing investigative reports
- advanced techniques of acupuncture
- advanced Chinese herb prescription writing
- intensive pulse and tongue Diagnosis
Competently managing the integration of Chinese and Western medicine

Special Requirements

Legislative pre-requisites

Special Requirements - NSW Health Legislative Prerequisites ~~Pre-requisites~~

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and compete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- http://training.gov.au (http://training.gov.au/)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://

www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

CMPL 4002 Chinese Internal Medicine 1

Credit Points 10

Legacy Code 401098

Coordinator Yu-Ting Sun (https://directory.westernsydney.edu.au/search/name/Yu-Ting Sun/)

Description The study of internal medicine forms the basis of clinical practice in Traditional Chinese Medicine (TCM). This subject begins to bridge the gap between theory and practice. It enables the health professional to analyse, diagnose and treat common internal diseases with both acupuncture and herbal medicine and using a TCM approach. The focus of this subject is on the analysis of major presenting symptoms.

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 4 subject

Pre-requisite(s) CMPL 2006 AND
CMPL 3001 AND
CMPL 3002

Incompatible Subjects 400918 - Chinese Internal Medicine 1 (PG) LGYA 7251 - Chinese Internal Medicine 1

Restrictions

Students must be enrolled in program 4710 - Bachelor of Traditional Chinese Medicine.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse and explain the connections between the causes and pathophysiological mechanisms of common internal diseases with their clinical manifestations.
2. Employ the skills of inspection, auscultation and olfaction, interrogation and palpation in to accurately diagnose specific internal diseases.
3. Analyse the signs and symptoms of common internal medicine diseases to arrive at a TCM differential diagnosis.
4. Design treatment principles and write prescriptions (acupuncture and herbs) for common diseases of internal medicine.
5. Practice protocols in TCM compared to orthodox management.

Subject Content

1. Diseases and syndromes of the Lung system (TCM)
- common Cold & influenza
- Cough (bronchitis, bronchiectasis)
- Dyspnea syndrome (asthmatic bronchitis, asthmatic emphysema)
- Lung abscess (pneumonia, pulmonary abscess)
- Lung atony (pulmonary fibrosis, atelectasis)
2. Diseases and syndromes of Spleen system (TCM)
- Hiccup (some diseases with phrenospasm)
- Vomiting (gastritis, pylorospasm)
- Dysphagia (esophagitis, cardiospasm)
- Stomach-ache (gastritis, peptic ulcer)
- Abdominal pain (intestinal spasm, dyspepsia)
- Diarrhoea (enteritis, irritable bowel syndrome)
- Dysenteric disease (dysentery, ulcerative Colitis)
- Constipation (some diseases with Constipation)
3. Diseases and syndromes of Heart system (TCM)
- chest Blockage syndrome (coronary heart disease, myocarditis)
- Palpitation (arrhythmia, cardiac decompensation)
- Insomnia (neurosis, anaemia, cerebral arteriosclerosis)
- Manic psychosis (active phase of schizophrenia, Manic phase of bipolar Disorder)
- Depressive psychosis (Depressive phase of schizophrenia, Depressive phase of bipolar Disorder)

- Depression syndrome (neurosis, major Depression)
- Epilepsy
- Syncope (fainting Due to emotional stress, vagal stimulation, A sudden change in environmental temperature or body position)
4. Review of acupuncture points, prescriptions, individual herbs and formulas relevant to the above topics.

CMPL 4003 Chinese Internal Medicine 2

Credit Points 10

Legacy Code 401102

Coordinator Xiaoshu Zhu (https://directory.westernsydney.edu.au/search/name/Xiaoshu Zhu/)

Description This subject builds on Chinese Medicine 1 and extends the student's ability to analyse, diagnose and treat common and difficult diseases in internal medicine with both acupuncture and herbal medicine and using a TCM approach. Students will develop an understanding of the causes and pathophysiological mechanisms of a wide range of diseases.

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 4 subject

Pre-requisite(s) CMPL 2006 AND
CMPL 3001 AND
CMPL 3002

Incompatible Subjects CMPL 7004 - Chinese Internal Medicine 2 (PG) AND LGYA 7251 - Chinese Internal Medicine 2

Restrictions

Students must be enrolled in program 4710 - Bachelor of Traditional Chinese Medicine or continuing program 4660 Bachelor of Chinese Medicine.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the causes, pathophysiological mechanisms and clinical manifestations of Liver, Kidney, Blood and Body Fluid and Haemorrhagic diseases and syndromes.
2. Conduct a clinical examination including inspection, auscultation and olfaction, interrogation, and palpation in order to arrive at accurate diagnoses of specific diseases.
3. Analyse symptoms and signs, and apply pattern differentiation to arrive at a TCM diagnosis.
4. Design and prescribe appropriate treatment, including acupuncture and/or herbs and/or dietary/lifestyle change, for a range of common diseases covered in this Unit.
5. Analyse and examine practice protocols in TCM compared to orthodox medicine correspondence to Liver, Kidney, Blood and Body Fluid and Haemorrhagic diseases and syndromes.

Subject Content

1. Diseases and syndromes of Liver system (TCM)
- Dizziness (Meniere's disease, cerebral arteriosclerosis, hypertensive encephalopathy, anaemia)
- Hypochondriac pain (disorders of The liver and gallbladder, intercostal neuralgia)
- Jaundice (hepatitis, hepatocirrhosis, pancreatitis, cholecystitis)
- Abdominal distension (ascites, tumours of The Abdominal cavity, tuberculous peritonitis)
2. Diseases and syndromes of Kidney system (TCM)
- Stranguria syndrome (Urinary tract infections, Urinary stones, prostatitis, chyluria)
- Oliguria and anuria (contraction of bladder sphincter, prostatic hyperplasia, kidney failure)
- Seminal emission (neurasthenia, prostatitis, Seminal vesiculitis)
- Impotence (sexual disorders, sexual neurasthenia)
- Oedema (cardiogenic Oedema, renalgenic Oedema, hypoproteinemia, severe anaemia)
3. Diseases and syndromes of Qi, Blood and Body Fluid (TCM)
- Endogenous fever (Functional low fever, hematopathy, desmosis, endocrinopathy, some chronic infectious diseases)
- Sweating syndrome (vegetative nerves Functional disturbance, tuberculosis, rheumatic fever, hyperthyroidism)
- Wasting and thirsting syndrome (diabetes mellitus, diabetes insipidus)
- stagnation and Accumulation (Abdominal tumours, enlargement of The liver and spleen, Functional gastrointestinal disturbances)
- Deficient debility (various chronic and consumptive diseases)
4. Blood, Body Fluid and Hemorrhagic diseases and syndromes (TCM)
- Epistaxis (rhinitis, influenza, nasal carcinoma)
- Hemoptysis (bronchiectasis, bronchitis, pneumonia, Lung cancer)
- Hematemesis (haemorrhage of Upper Digestive tract, esophagitis)
- Hemafecia (peptic ulcer, hepatocirrhosis, Stomach cancer, colon cancer)
- Hematuria (nephritis, renal tuberculosis, Urinary cancer, some cases of Urinary stones and infection)
- Review of acupuncture points, prescriptions, individual herbs and formulas relevant to The above topics.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are

regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

CMPL 4004 Classical Texts in Chinese Medicine

Credit Points 10

Legacy Code 401100

Coordinator Shengxi (George) Zhang (https://directory.westernsydney.edu.au/search/name/Shengxi (George) Zhang/)

Description This subject provides further learning experiences that enable the students to explore the original theories on physiology, pathology, diagnosis, differentiation and treatment of diseases through select periods of Chinese history. Many theoretical concepts, diagnostic systems and therapeutic methods of Traditional Chinese Medicine (TCM) are still in current usage, and will be covered through the study of important classical texts and academic schools of TCM thought. This subject expands upon the student's understanding of TCM theories and practice principles through studies of the classical literature.

Level Undergraduate Level 4 subject

Pre-requisite(s) CMPL 2006 AND
CMPL 3002

Incompatible Subjects CMPL 7006 - Classical Texts in Chinese Medicine (PG)

Restrictions

Students must be enrolled in program 4710 - Bachelor of Traditional Chinese Medicine.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate the academic thoughts and achievements of the major schools and classical texts that helped form the basis of contemporary TCM practice.
2. Analyse the approaches to the pathogenesis, development, differentiation and treatment of the Cold-injured Diseases, Warm Diseases and chronic diseases covered in the classical texts used in this unit.
3. Define the strategy and methodology employed in the Shang Han Lun and Wenbing Xue texts.

Subject Content

1. Introduction to the key classical texts in TCM including Huang Di Nei Jing (Inner Classic of Yellow Emperor), Nanjing (The Classic on Difficulties), Shang Han Za Bing Lun (Treatise on Cold-injured and Miscellaneous Diseases) and Wen Bing Xue (The Study of Warm Diseases).
2. Introduction to the historical development and the characteristics of the major academic schools of TCM.
3. Theoretical overview of Shang Han Lun (Treatise on Cold-injured and Miscellaneous Diseases) and Wen Bing Xue (The Study of Warm Diseases) including diagnostic differentiation and treatment principles.

2. Explain the causes and patho

Subject Content

1. Introduction to Orthopaedics (including Traumatology & Rheumatology)
- physical Examination
- principles of treatment and therapies
- methods of management
2. Injury of muscle, tendon and bone
- Stiff Neck/Cervical soft tissue sprain
- Cervical spondylopathy
- scapulohumeral periarthritis
- carpal tunnel syndrome
- Acute lumber muscle sprain
- prolapse of lumbar intervertebral disc
- Sciatica
- post surgical management, scar treatment
3. Sport medicine
- injury treatment and management (injuries to ligaments, tendons, muscle and bone ? knee, elbow, shoulder, wrist, thigh, calf, ankle, Neck, low back)
- performance enhancement
4. Introduction to gynaecology
- special features of women?fs physiology (TCM & WM)
- aetiology, Diagnosis and therapeutic methods
- A synopsis of gynaecological pathology
5. Disorders of menstruation
- early menstruation
- delayed menstruation
- irregular menstruation
- amenorrhoea
- abnormal Functional uterine bleeding
- premenstrual syndrome
- menopausal syndrome
6. Disorders of the female genitalia
- abno

Restrictions

Students must be enrolled in 4710 Bachelor of Traditional Chinese Medicine or continuing program 4660 Bachelor of Health Science-Master of Traditional Chinese Medicine.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the causes and pathophysiological mechanisms of a range of common paediatric, dermatological, ear, nose and throat (ENT) and eye diseases.
2. Differentiate the clinical manifestations of paediatric conditions in relation to the various stages of children's growth and development.
3. Evaluate signs and symptoms and apply relevant skills of inspection, auscultation and olfaction, interrogation, palpation, and pattern differentiation to arrive at a TCM diagnosis for common paediatric, dermatological, ear, nose, throat and eye diseases.
4. Design and prescribe appropriate treatment, including acupuncture and/or herbs and/or dietary/lifestyle change, for a range of paediatric, dermatological, ear, nose, throat and eye diseases.
5. Distinguish between practice protocols in TCM and orthodox management.

Subject Content

A). Paediatrics
1. General Introduction
- physiology and pathophysiology of children
- feeding and health care
- Basic skills of Examination of children
- diagnostic and treatment principles in pediatrics
- acupuncture in pediatrics
- Chinese herbal medicine in pediatrics
2. Lung System Disorders
- common Cold
- Cough
- Asthma in children
3. Spleen System Disorders
- Infantile Diarrhoea
- Abdominal pain
- Anorexia
- food Stagnancy
4. Kidney System Disorders
- Acute nephritis
- Nephritic syndrome
- Enuresis
5. Infectious Diseases
- Measles
- Rubella
- Varicella (chickenpox)
- Mumps
- Pertussis (Whooping Cough)
6. Miscellaneous Diseases
- attention Deficit Disorder (add)
- Sweating syndrome
B). Dermatology
- aetiology and pathogenesis of Dermatosis
- key points of differentiation for The skin Lesions
- external applications with Chinese herbs and acupuncture
2. Viral Dermatitis
- Herpes zoster (She Chuan Chuang)
- common Wart (Xun Chang You)
- Flat Wart (Bian Ping You)
- Genital Wart (Jian Rui Shi You)
3. Fungal and other Infectious Dermatitis
- Tinea capitis (Tou Xuan)
- Tinea Corporis (Ti Xuan)
- Tinea Manuum (Shou Xuan)
- Tinea pedis (Zu Xuan)
- Tinea Unguium (Jia Xuan)
- Impetigo (Nong Pao Chuang)
- Scabies (Jie Chuang)
4. Allergic Dermatitis
- Eczema (Shi Chuang)
- Urticaria (Hives) (yin Zhen)
- contact dermatitis
5. Disorders of Sebaceous Glands and Hair Follicles
- Acne (Fen Ci)
- Seborrheic dermatitis (Bai Xie Feng)
- Alopecia Areata (You Feng)
6. Other Dermatitis
- Neurodermatitis (Niu Pi Xuan)
- Psoriasis (Bai Bi)
- Vitiligo (Bai Dian Feng)
- systemic Lupus Erythematosus (SLE) (Hong Hu Die Chuang)
7. Ear, Nose and Throat (ENT) and Eyes
- rhinitis (allergic, chronic)
- sinusitis
- tinnitus and deafness
- suppurative otitis media (Acute and chronic)
- pharyngitis & laryngitis
- tonsillitis
- conjunctivitis (Acute, chronic, spring)
- hordeolum
- Review of herbal formulas, individual herbs, and acupuncture points as they are covered in The above

Incompatible Subjects CMPL 7024 - TCM Practice 4 (PG) AND LGYA 7255 - TCM Practice 4

Restrictions

Students must be enrolled in 4660 Bachelor of Health Science-Master of Traditional Chinese Medicine or 4710 Bachelor of Traditional Chinese Medicine.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate complex clinical cases and competently design and formulate care of patients in a clinical context.
2. Analyse issues related to complex cases and the care of patients in a multidisciplinary environment;
3. Form and execute a range of competencies within specialty TCM areas;
4. Justify the principles of the professional code of ethics and act accordingly.
5. Evaluate the key elements in developing a small business such as a private Chinese medicine clinic.

Subject Content

1. Advanced skills in all aspects of clinical management and practice appropriate to TCM practice including:
- intra/inter-professional referrals
- Working in multi-disciplinary environment
- occupational health and safety matters
- Ethical Marketing and promotion
- Enhanced advance needle techniques including comprehensive manipulations and various types of acupuncture including dental acupuncture, acupuncture analgesia
2. Comprehensive clinical skills related to acupuncture and Chinese herbal practice, including identifying and analysing clinical information, diagnosis, formation of treatment plans, performance of interventions and follow-up.
3. Professional ethics and privacy management in health ethics
4. Introduction to small business development

Special Requirements

Legislative pre-requisites

Special Requirements - NSW Health Legislative Prerequisites ~~Pre-requisites~~

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and compete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- http://training.gov.au (http://training.gov.au/)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects LGYA 7246 - Chinese Internal Medicine

Assumed Knowledge

Traditional Chinese Medicine 3, Acupuncture Techniques, Chinese Medicinal Formulas.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply an understanding of causes and pathophysiological mechanisms of common internal diseases, by demonstrating an understanding of the significance of clinical manifestations.
2. Apply relevant skills of inspection, auscultation and olfaction, interrogation, and palpation in order to arrive at accurate diagnoses of specific internal diseases.
3. Analyse symptoms and signs, and apply pattern differentiation to arrive at a TCM differential diagnosis.
4. Design treatment principles, and write prescriptions (acupuncture and herbs) for common diseases of internal medicine. This is inclusive of required dietary or lifestyle changes.
5. Analyse and critically examine practice protocols in TCM compared to orthodox management.

Subject Content

1. Diseases and syndromes of the Lung system (TCM)
- common Cold & influenza
- Cough (bronchitis, bronchiectasis)
- Dyspnea syndrome (asthmatic bronchitis, asthmatic emphysema)
- Lung abscess (pneumonia, pulmonary abscess)
- Lung atony (pulmonary fibrosis, atelectasis)
2. Diseases and syndromes of Spleen system (TCM)
- Hiccup (some diseases with phrenospasm)
- Vomiting (gastritis, pylorospasm)
- Dysphagia (esophagitis, cardiospasm)
- Stomach-ache (gastritis, peptic ulcer)
- Abdominal pain (intestinal spasm, dyspepsia)
- Diarrhoea (enteritis, irritable bowel syndrome)
- Dysenteric disease (dysentery, ulcerative Colitis)
- Constipation (some diseases with Constipation)
3. Diseases and syndromes of Heart system (TCM)
- chest Blockage syndrome (coronary heart disease, myocarditis)
- Palpitation (arrhythmia, cardiac decompensation)
- Insomnia (neurosis, anaemia, cerebral arteriosclerosis)
- Manic psychosis (active phase of schizophrenia, Manic phase of bipolar Disorder)
- Depressive psychosis (Depressive phase of schizophrenia, Depressive phase of bipolar Disorder)
- Depression syndrome (neurosis, major Depression)
- Epilepsy (Epilepsy)
- Syncope (fainting Due to emotional stress, vagal stimulation, A sudden change in environmental temperature or body position)
4. Review of acupuncture points, prescriptions, individual herbs and formulas relevant to the above topics.

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects LGYA 7251 - Chinese Internal Medicine 2

Assumed Knowledge

Traditional Chinese Medicine 3, Acupuncture Techniques, Chinese Medicinal Formulas.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the causes, pathophysiological mechanisms and clinical manifestations of common diseases,.covered in this unit
2. Conduct a clinical examination including inspections, auscultation and olfaction, interrogation, and palpation in order to arrive at accurate diagnoses of specific diseases
3. Analyse symptoms and signs, and apply pattern differentiation to arrive at a TCM diagnosis
4. Design treatment principles, and write prescriptions (acupuncture and herbs) for common diseases of internal medicine. This is inclusive of required dietary or lifestyle changes
5. Analyse and critically examine practice protocols in TCM compared to orthodox management

Subject Content

1. Diseases and syndromes of Liver system (TCM)
- Dizziness (Meniere's disease, cerebral arteriosclerosis, hypertensive encephalopathy, anaemia)
- Hypochondriac pain (disorders of The liver and gallbladder, intercostal neuralgia)
- Jaundice (hepatitis, hepatocirrhosis, pancreatitis, cholecystitis)

- Abdominal distension (ascites, tumours of The Abdominal cavity, tuberculous peritonitis)
2. Diseases and syndromes of Kidney system (TCM)
- Stranguria syndrome (Urinary tract infections, Urinary stones, prostatitis, chyluria)
- Oliguria and anuria (contraction of bladder sphincter, prostatic hyperplasia, kidney failure)
- Seminal emission (neurasthenia, prostatitis, Seminal vesiculitis)
- Impotence (sexual disorders, sexual neurasthenia)
- Oedema (cardiogenic Oedema, renalgenic Oedema, hypoproteinemia, severe anaemia)
3. Diseases and syndromes of Qi, Blood and Body Fluid (TCM)
- Endogenous fever (Functional low fever, hematopathy, desmosis, endocrinopathy, some chronic infectious diseases)
- Sweating syndrome (vegetative nerves Functional disturbance, tuberculosis, rheumatic fever, hyperthyroidism)
- Wasting and thirsting syndrome (diabetes mellitus, diabetes insipidus)
- stagnation and Accumulation (Abdominal tumours, enlargement of The liver and spleen, Functional gastrointestinal disturbances)
- Deficient debility (various chronic and consumptive diseases)
4. Hemorrhagic diseases and syndromes (TCM)
- Epistaxis (rhinitis, influenza, nasal carcinoma)
- Hemoptysis (bronchiectasis, bronchitis, pneumonia, Lung cancer)
- Hematemesis (haemorrhage of Upper Digestive tract, esophagitis)
- Hemafecia (peptic ulcer, hepatocirrhosis, Stomach cancer, colon cancer)
- Hematuria (nephritis, renal tuberculosis, Urinary cancer, some cases of Urinary stones and infection)
5. Review of acupuncture points, prescriptions, individual herbs and formulas relevant to the above topics.

CMPL 7005 Chronic and Complex Disorders in Chinese Medicine

Credit Points 10

Legacy Code 401137

Coordinator Shengxi (George) Zhang (https://directory.westernsydney.edu.au/search/name/Shengxi (George) Zhang/)

Description This subject will enable practitioners to extend their clinical reasoning skills to chronic and complex conditions seen in contemporary Chinese Medicine clinical practice. The subject will analyse specific cases and conditions which present a range of complex and contradictory signs and symptoms making diagnosis and treatment challenging. Senior practitioners of both acupuncture and Chinese herbal medicine will present their own clinical experience and assist students to understand their diagnostic and treatment processes.

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects NATS 7005 - Chinese Medicine Specialties AND CMPL 7011 - Dermatology in Chinese Medicine

Restrictions

Students must be enrolled in 4716 Master of Chinese Medicine (or Master of Health Science (Traditional Chinese Medicine) and/or Master of Health Science (Acupuncture)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the clinical reasoning processes central to Chinese medicine practice.
2. Evaluate the uses and relative efficacy of different TCM theories used to guide Chinese medicine diagnosis in practice.
3. Apply the use of different treatment strategies/principles for approaching complex cases.
4. Apply Chinese medicine clinical reasoning to a range of complex disorders.
5. Assess the strengths and weaknesses of Chinese medicine practice and research in relation to complex and chronic disorders.
6. Able to construct acupuncture and herbal prescriptions to apply in modern clinical conditions.

Subject Content

1. Introduction to clinical reasoning
2. Examination of ?ecomplex cases?f from Chinese Medicine (CM) history
3. Case histories drawn from actual contemporary practice which focus on:
- The impact of pharmaceutical drugs on The body
- long term Progression of disease
- multiple diseases coexisting
- The role of biomedical investigative tests to assist CM Diagnosis
- interaction of biomedical & CM treatments
4. Cases drawn from a range of specialties:
- Dermatology
- gastrointestinal disease
- Autoimmune disease
- Paediatrics
- liver disease
- Respiratory illness
- cardiovascular disease

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Case study	2,000 words	35	N	Individual
Essay	2,500 words	35	N	Individual
Online participation		10	N	Individual
Class tests	20 minutes on each workshop	20	N	Individual

CMPL 7006 Classical Texts in Chinese Medicine (PG)

Credit Points 10

Legacy Code 400969

Coordinator Henry Liang (https://directory.westernsydney.edu.au/search/name/Henry Liang/)

Description This subject provides further learning experiences that enable the students to explore the original theories on physiology, pathology, diagnosis, differentiation and treatment of diseases through select periods of Chinese history. Many theoretical concepts, diagnostic systems and therapeutic methods of Traditional Chinese Medicine (TCM) are still in current usage, and will be covered through the study of important classical texts and academic schools of TCM thought. This subject expands upon the students understanding of TCM theories and practice principles through studies of the classical literature.

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects LGYA 7244 - Classical Texts in Chinese Medicine

Assumed Knowledge

Traditional Chinese Medicine 3, Chinese Medicinal Formulas.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain and critically evaluate the academic thoughts and achievements of the major schools and classical texts that helped form the basis of contemporary TCM practice.
2. Analyse the approaches to the pathogenesis, development, differentiation and treatment of the Cold-injured Diseases, Warm Diseases and chronic diseases covered in the classical texts used in this unit.
3. Develop a working knowledge of the Shang Han Lun and Wenbing Xue texts.

Subject Content

1. Introduction to the key classical texts in TCM
- Huangdi Neijing (Inner Canon of Yellow Emperor)
- Nan jing (The Classic on difficulties)
- Shennong Bencao jing (Shennong?fs Canon of Materia Medica)
- Shanghan Zabing Lun (Treatise on Cold-injured and Miscellaneous Diseases)
- Wenbing Xue (The science of warm diseases)
2. Introduction to the major academic schools in TCM
- school of Cold-cool therapy (Hejian)
- school of eliminating Pathogens (Dongxie)
- school of Internal injury (Yishui)
- school of yin Nourishing therapy (Danxi)
- school of spleen-Stomach
- school of warming-Reinforcing therapy
3. Shang Han Lun
- introduction to Cold-injured diseases
- differentiation and treatment of Taiyang, Yangming, Shaoyang, Taiyin, Shaoyin and Jueyin diseases
4. Wen Bing Xue
- introduction to warm diseases
- differentiation and treatment of warm diseases according to Wei-QI-Ying-Xue, and San-jiao diagnostic systems

CMPL 7007 Clinical Application of Classical Chinese Herbal Medicine

Credit Points 10

Legacy Code 401130

Coordinator Yu-Ting Sun (https://directory.westernsydney.edu.au/search/name/Yu-Ting Sun/)

Description This subject presents the origin, development and features of classical Chinese herbal medicine (Jing Fang), and reveals their pharmacological and clinical outcomes based on the latest clinical observation and research. This subject will appeal to practitioners seeking to extend and deepen their knowledge and clinical skills with Chinese herbs and to students embarking on research in this area. The classical texts contain deep insights on Chinese herbs and formulae for a range of conditions. Selective herbal formulae from the Treatise on Cold Pathogenic Diseases (Shanghan Lun) and the Synopsis of Golden Chamber (Jingui Yaolue) are explored in depth to demonstrate the clinical applications.

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 4716 Master of Chinese Medicine or 4675 Master of Health Science (Traditional Chinese Medicine) and/or 4678 Master of Health Science (Acupuncture).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss the origin and development of classic Chinese herbal medicine (CCHM)
2. Critically analyse the principal features and strategic approaches of CCHM
3. Demonstrate comprehensive skills in applying commonly-used CCHM in contemporary practice
4. Relate the pharmacology and toxicology of CCHM to its clinical outcomes
5. Identify and critically evaluate the strengths and limitations of CCHM

Subject Content

1. Origin and development of Classics of Chinese medicine
a. Treatise on Cold Pathogenic Diseases (Shanghan Lun)
b. Synopsis of Golden Chamber (Jingui Yaolue)
c. Major academic schools of Chinese medicine
2. Feature and methodology of Classic Chinese herbal medicine (CCHM)
a. The herbal formula design and strategy
b. CCHM and pattern diagnosis
c. CCHM modifications
d. Dosage and administration of CCHM
3. Review of pharmacological and toxicological research of CCHM
4. Clinical applications of the selected formulae from the Classics
a. The exterior expelling formulae

b. Heat clearing formulae
c. Purgative formulae
d. Harmonising formulae
e. Qi and blood moving formulae
f. Damp and phlegm eliminating formulae
g. Internal warming formulae
h. Tonic formulae
i. Others
5. Strengths and limitations of CCHM

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Essay	2,000 words	30	N	Individual
Essay	2,500 words	30	N	Individual
Peer Review	Minimum of 6 online posts with substantial content to fellow students in relation to online discussion topics	20	N	Individual
Short Answer	20 minutes at each workshop	20	N	Individual

CMPL 7008 Clinical Applications of Classical Acupuncture

Credit Points 10

Legacy Code 401131

Coordinator Julia Xiao (https://directory.westernsydney.edu.au/search/name/Julia Xiao/)

Description This subject presents the origin, development and features of classical acupuncture and reveals the clinical outcomes based on the latest clinical observation and research. This subject will appeal to practitioners seeking to extend and deepen their knowledge and clinical skills with traditional acupuncture and to practitioners embarking on research in this area. Ancient acupuncture theories and techniques will be taught with a focus on their application to contemporary practice based on latest research and on the different theoretical approaches in the design of acupuncture point prescriptions.

School Health Sciences

Discipline Acupuncture

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects CMPL 7001 - Advanced Acupuncture

Restrictions

Students must be enrolled in 4716 Master of Chinese Medicine.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse the development of acupuncture practice as documented in TCM classical texts
2. Discuss the uses and relative efficacy of different TCM theories used to guide acupuncture practice
3. Analyse the use of different ancient points compared with common points in the treatment of various diseases
4. Demonstrate ancient acupuncture techniques including qi flow methods, Yang Ji Zhou (12 techniques), egreen dragon wags its ta

Subject Content

1. Examination of source texts for acupuncture theories and techniques

2. Advanced/ancient acupuncture techniques and their uses, such as Qi flow methods, Green dragon wags its tail, Scarlet phoenix meets the source, Green turtle searches for the point, White tiger shakes its head, Yang Ji Zhou (12 techniques)
3. Channel and point palpation techniques
4. Timing in acupuncture ? zi wu liu zhu
5. Application of eight extraordinary vessels
6. Application of Luo, divergent and sinew channels
7. Application of the 5 transport/shu points
8. Strategies in designing acupuncture prescriptions
9. The connection of current acupuncture theories and techniques to classical theories
10. The developing evidence base for traditional theories and techniques

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

CMPL 7009 Clinical Oncology and Chinese Medicine

Credit Points 10

Legacy Code 401136

Coordinator Isabella Leung (https://directory.westernsydney.edu.au/search/name/Isabella Leung/)

Description This subject is focused on the clinical application of Chinese herbal medicine (CHM) and acupuncture in the management of cancer. Today, cancer is one of the leading causes of death and disease burden. Survival rates for many types of cancer have improved in recent years and long-term survival challenges accepted practices in cancer care and management. This subject explores application of Chinese medicine to the management of cancer, through the ancient wisdom in the classic literature recourses and contemporary clinical practice and research. The subject addresses the commonly used strategies, approaches and roles of Chinese medicine at different stages of cancer as well as the use of Chinese medicine as a supplementary therapy for common types of cancer.

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 4716 Master of Chinese Medicine or 4795 Master of Chinese Medicine(or 4675 Master of Health Science (Traditional Chinese Medicine) and/or 4678 Master of Health Science (Acupuncture).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss the concept, aetiology and pathogenesis of cancer.
2. Describe basic assessments of cancer and compare an contrast conventional treatments and commonly-used interventions for cancer management using acupuncture and Chinese herbal medicine
3. Critically analyse the theory and practice of CM for relieving symptoms induced by cancer treatment
4. Critically analyse the theory and practice of CM as supportive care for common cancers
5. Identify and critically evaluate the strengths and limitations of CM for cancer

Subject Content

1. Overview of oncology
a. Introduction to cancer: concept, causes and classification
b. Cancer assessments: grade, staging and cancer markers
c. Conventional treatment for cancer
- surgery
- Radiotherapy
- chemotherapy
- other therapies
2. Overview of CM in relation to cancer
a. Historical perspective
b. Aetiology and pathogenesis in CM
c. Diagnostic approaches in CM
d. Major research progress of CM for cancer
3. Strategies and principles of CHM and acupuncture management for cancer
a. Timing of engagement and relevant approaches
b. Treatment principles
c. Commonly-used CHM for cancer
d. Commonly-used acupuncture for cancer
e. Potential anticancer mechanisms of CHM
f. Cautions and safety
4. CM for relieving induced signs and symptoms associated with conventional therapies
a. Digestive symptoms
b. Bone marrow suppression
c. Fatigue
d. Hot flashes
e. Mucositis
f. Others
5. CM as supportive care for common cancers
a. Breast cancer
b. Prostate cancer
c. Colorectal cancer
d. Lung cancer
e. Melanoma
f. Lymphoma
g. Leukaemia
6. Strengths and limitations of acupuncture and Chinese herbal medicine (CHM)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

CMPL 7010 Clinical Placement

Credit Points 20

Legacy Code 401133

Coordinator Julia Xiao (https://directory.westernsydney.edu.au/search/name/Julia Xiao/)

Description This subject provides four weeks of full-time (or part-time equivalent) clinical placement with a choice of clinical training in the defined specialty areas (women's health, musculoskeletal health, mental and neurological disorders, oncology, or chronic and complex diseases). The clinical placement is with experienced specialist practitioners provided in conjunction with the Beijing University of Chinese Medicine in China or by an approved alternative arrangement with the student and limited by available opportunities.

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 20cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) CMPL 7025 OR
CMPL 7016 OR
CMPL 7009 OR
CMPL 7005

Restrictions

Students must be enrolled in 4716 Master of Chinese Medicine.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Synthesise knowledge and competency in the practice of specialty TCM clinical areas;
2. Demonstrate competence in the design and formulation of care of patients in a specialist clinical context;
3. Correctly diagnose, prescribe and administer treatment;
4. Critically examine issues related to the care of patients in a multidisciplinary environment
5. Employ recognised standards of culture and diversity in professional settings

Subject Content

Clinical experience of 4 weeks full-time (or part-time equivalent) with a choice of clinical training in the defined specialty areas (women?fs health, musculoskeletal health, mental and neurological disorders, oncology in Chinese Medicine , or chronic and complex diseases) with experienced specialist practitioners provided in conjunction with the Beijing University of Chinese Medicine within China or an alternative by arrangement with the student and limited by available opportunities in high turnover specialist clinical settings.

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject, students must have a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Students must also hold a valid and current First Aid Certificate from a Registered Training Organisation. Use the link to the Special Requirements webpage below for more information.

CMPL 7011 Dermatology in Chinese Medicine 1

Credit Points 10

Legacy Code 400572

Coordinator Xiaoshu Zhu (https://directory.westernsydney.edu.au/search/name/Xiaoshu Zhu/)

Description This subject along with Dermatology in Chinese Medicine 2 will enable practitioners to develop an in-depth understanding of Traditional Chinese Medicine (TCM) diagnosis and management of a wide range of skin diseases using acupuncture and Chinese herbal medicine. This subject includes orthodox medical diagnosis and management of common skin disorders and the integration of this with TCM theory, diagnosis and management. Dermatology in Chinese Medicine 1 and 2 together provide a strong specialist clinical focus on the management of skin disorders with Chinese medicine.

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in Master of Health Science (Traditional Chinese Medicine) or Master of Health Science (Acupuncture).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse and compare the TCM diagnosis and management with the orthodox diagnosis and management of a range of common skin disorders including dermatoses caused by viruses, bacteria and fungi, inflammatory dermatoses, physically induced dermatoses, acne, rosacea and psoriasis
2. Identify the clinical manifestations of a range of skin disorders and describe the significance of these
3. Apply the appropriate TCM management of a range of skin diseases including lifestyle and dietary advice, and write individualised prescriptions for acupuncture and/or internal and externally applied herbal formulae
4. Explain the potential adverse effects of a range of western pharmaceuticals used to treat skin disorders, their potential interactions with Chinese herbs and the implications of treatment of skin disorders with Chinese herbal medicine for patients concurrently using western pharmaceutical treatment
5. Evaluate and conclude when special caution or contraindication needs to be considered in treatment of skin disorders with acupuncture and Chinese herbal medicine (specific disorders, particular patients, concurrent Western medication)
6. Explain the mode of action of externally applied Chinese herbal medicines and their indications and method of application and prepare prescriptions for externally applied herbal formulae in a variety of forms including powders, washes, tinctures, pastes, ointments, plasters
7. Analyse the evidence for the efficacy of treatment of skin disorders with acupuncture and Chinese herbal medicine
8. Explain requirements for storing, labelling and dispensing of external herbal medicines

Subject Content

Clinical manifestations, TCM diagnosis and management (including dietary and lifestyle advice, herbal medicine and/or acupuncture prescription) and orthodox diagnosis and management of:
1. Dermatoses caused by viruses
- Verruca vulgaris and Verruca plana
- Condyloma acumnata
- Herpes simplex
- Herpes zoster
2. Dermatoses caused by bacteria
- Folliculitis
- Erysipelas
- Impetigo
3. Dermatoses caused by fungi
- Tinea pedis/capitis/corporalis
- Candida albicans
4. Inflammatory dermatoses
- Eczema
- contact dermatitis
5. Scaly skin diseases
- Psoriasis
6. Acne
7. Rosacea
8. Integrating TCM and Western medicine in diagnosis and management of skin disorders
- potential adverse reaction to TCM treatment
- potential interaction between Western pharmaceuticals and herbal medicines
- special cautions/contraindications in The TCM treatment of skin disorders
- relative efficacy of treatment of skin disorders with acupuncture and Chinese herbal medicine
9. Evidence base of TCM in dermatology
10. Externally applied Chinese herbal medicines
- mode of action
- Indications
- application
- preparation methods and mode application
- written and verbal instructions
- storage, dispensing and labelling of herbal medicines

CMPL 7012 Evidence Based Practice in Chinese Medicine

Credit Points 10

Legacy Code 401129

Coordinator Isabella Leung (https://directory.westernsydney.edu.au/search/name/Isabella Leung/)

Description This subject will introduce and develop the concepts and principles of evidence-based practice as applied to Traditional Chinese Medicine (TCM) and explore specific aspects of research development. Furthermore, this subject will focus on the clinical applications of such research- based evidence and highlight integrative methods combining TCM and biomedical diagnostics and disease management. Students will gain an understanding of the complexities, practicality, and applied methodologies used in research to establish the validity and reliability of TCM theories, diagnostics and interventional techniques in addition to the appropriateness of various outcome measures for research and clinical practice. This subject will provide students with a practical skillset designed to facilitate location, evaluation, integration, and application of scientific research evidence in clinical practice whilst also preparing students for development of research proposals in subsequent subjects such as Research Protocol Design & Practice.

School Health Sciences

Discipline Traditional Chinese Medicine

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects CMPL 7013 - Evidence Based Practice in Chinese Medicine 1 CMPL 7014 - Evidence Based Practice in Chinese Medicine 2

Restrictions

Students must be enrolled in 4716 - Master of Chinese Medicine, 4675 - Master of Health Science (Traditional Chinese Medicine) or 4678 - Master of Health Science (Acupuncture)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Integrate knowledge from both biomedicine and TCM in the diagnosis and treatment of different diseases.
2. Describe the attempts and uses of modern technology and scientific research methods to establish the validity and/or reliability of TCM theory, diagnosis and treatments.
3. Identify research designs and data analysis techniques that can be used in TCM research.
4. Analyse the complexities associated with the application of scientific research methods to TCM.
5. Identify and select outcome measures that can be used in TCM research and clinical practice.
6. Outline a research proposal that is suitable for submission for university ethics approval committee.
7. Outline key issues in developing an evidence base for TCM.
8. Identify key issues in applying TCM evidence to clinical practice.

Subject Content

1. The historical and contemporary evidence bases of TCM and their influence on TCM practice.
2. Integration of biomedicine (including diagnostics and disease management) and TCM.
3. Epidemiological research methods applied to TCM.
4. Quantitative and qualitative research methods in TCM research.
- Overview of Critical Appraisal.
- Overview of Basic biostatistics
- application in TCM clinical practice.
5. Relevant computer skills.
- database searching.
- Compiling literature database.
6. Integrating and prioritising clinical information in TCM.
7. Progression and current state of TCM Research.
- Theory.
- diagnostic techniques.
- experimental/laboratory.
- clinical intervention.
8. Outcome measures for use in TCM research and clinical practice.
9. Future directions of TCM research.
- emergence of new paradigms in relation to TCM research
- Developments in TCM research methodology and techniques
- integration of technological advancements into TCM research
10. Guidelines for preparation of a research proposal adequate for ethics submission.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

CMPL 7013 Evidence Based Practice in Chinese Medicine 1

Credit Points 10

Legacy Code 400567

Coordinator Alan Yeung (https://directory.westernsydney.edu.au/search/name/Alan Yeung/)

Description This subject will provide the student with the opportunity to develop the skills necessary to search, understand and critically appraise scientific literature related to Chinese medicine. Basic research methods will be introduced sufficient to support the student through this subject. This subject will introduce and develop concepts and principles of evidence-based practice applied to Chinese medicine and explore specific research developments in Chinese medicine.

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Assumed Knowledge

Equivalent to undergraduate training in Traditional Chinese Medicine or acupuncture.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically appraise Western and Chinese medicine research in terms of appropriateness and validity of research methodology used and conclusions reached
2. Conduct relevant literature searches on Chinese medicine
3. Describe formalised systems of critical appraisal (eg. CASP, Mc Master)
4. Describe different types and levels of research and their application in Chinese medicine and western medicine
5. Interpret basic biostatistics used in scientific research
6. Describe the complexities and limitations of the application of scientific research methodology to Chinese medicine
7. Describe the evidence-base of acupuncture and Chinese herbal medicine in the treatment of a variety of disorders
8. Implement change management strategies to incorporate evidence-based practice (i.e. into clinical practice)

Subject Content

1. Foundations of clinical research
2. Concepts of measurement (validity, reliability)
3. Designs in clinical research
4. Basic data analysis in clinical research
5. Relevant computer skills
- database Searching
- Compiling A literature database
6. Evidence-based practice
- how to become ?eevidence-based?f
- The 5-step EBP process
- writing A focussed clinical question prior to doing A search
- levels of evidence
- RCTs: The gold Standard
- other levels and types of evidence, their strengths, biases and limitations, including Qualitative research
- systematic reviews
- skills required for EBP
- Searching: sites and sources of evidence: Cochrane, DARE
- Critical appraisal: checklists to formalise appraisal process (CASP, McMaster)
- change management and strategies to help implement EBP
- Ethical and professional responsibilities in TCM

Credit Points 10

Legacy Code 400568

Coordinator Suzanne Grant (https://directory.westernsydney.edu.au/search/name/Suzanne Grant/)

Description This subject will focus on the integration of Traditional Chinese Medicine (TCM) and Western medicine in the diagnosis and management of disease. A significant focus of this subject will be on the interpretation and integration of medical diagnostic tests with TCM diagnosis, and will include an examination of the research that attempts to validate TCM theory and diagnostic techniques. Students will learn how to integrate and prioritise clinical information and undertake the development of a research proposal.

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Assumed Knowledge

Equivalent to undergraduate training in Traditional Chinese Medicine or acupuncture.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Interpret and integrate information from specific western laboratory tes1s in terms of Chinese medicine diagnostic categories (syndromes).
2. Analyse from a TCM perspective side effects of Western pharmaceuticals.
3. Integrate knowledge from both western medicine and TCM in the diagnosis and treatment of different diseases.
4. Describe the attempts and uses of modern technology and scientific research methods to establish the validity and/or reliability of TCM theory, diagnosis and treatments.
5. Identify research designs and data analysis techniques that can be used in TCM research.
6. Understand and demonstrate the complexities associated with the application of scientific research methods to TCM.
7. Identify and select outcome measures that can be used in TCM research and clinical practice.
8. Prepare a research proposal that is suitable for submission to a university ethics approval committee.

Subject Content

- interpretation and integration of medical diagnostic pathology reports and TCM Diagnosis including: liver function test, hormone levels, full blood Count, blood rheology and urine analysis.
- analysis of side effects of pharmaceutical drugs in relation to TCM diagnostic categories.
- integration of Western medicine (including diagnostics) and TCM.
- TCM differential Diagnosis of common modern diseases.
- Epidemiological research methods.

- Integrating and prioritising clinical information.
- reliability & validation studies of TCM diagnostic techniques and Theory.
- outcome measures for use in research and practice.
- developing guidelines for TCM practice.
- how to prepare A research proposal adequate for ethics submission.

CMPL 7015 Mental and Neurological Disorders and Chinese Medicine

Credit Points 10

Legacy Code 401135

Coordinator Isabella Leung (https://directory.westernsydney.edu.au/search/name/Isabella Leung/)

Description This subject will enable practitioners to extend their understanding of Chinese Medicine management of a range of mental health conditions and neurological disorders. The clinical focus is on the Chinese Medicine diagnosis and management of these disorders and integration with the orthodox biomedical approaches to disorders that are common in the community. Chinese Medicine treatment will focus on acupuncture and Chinese herbal medicine treatments. Students will learn to apply Chinese Medicine's unique understanding and contribution to the rehabilitation of those who have suffered from disabling psychological/psychiatric and neurological diseases.

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects NATS 7036 - Mental Health in Chinese Medicine NATS 7038 - Neurological Disorders in Chinese Medicine

Restrictions

Students must be enrolled in 4716 Master of Chinese Medicine, 4717 Graduate Diploma of Chinese Medicine, 4675 Masters of Health Science (Traditional Chinese Medicine), or 4678 Master of Health Science (Acupuncture)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate the strengths and weaknesses of Chinese medicine practice approaches to mental health and neurological disorders
2. Evaluate the application and relative efficacy of different TCM theories used to guide Chinese medicine diagnosis and practice for mental health and neurological disorders
3. Apply the use of different acupuncture and herbal strategies for approaching mental health & neurological cases
4. Analyse the evidence and research from Chinese medicine practice in relation to mental health and neurological disorders
5. Formulate acupuncture and herbal prescriptions for application in mental health and neurological conditions

Subject Content

1. Chinese Medicine understandings of mental health and neurological disorders
2. Strengths and limitations of acupuncture, Chinese herbal medicine and other TCM treatments for mental health and neurological conditions
3. Psychiatric and psychological: approaches to mental health conditions and the place of Chinese medicine interventions in this field
4. Neurological assessments
5. Effects and side effects of common western medications used to treat neurological and mental health conditions
6. Classical TCM thinking about psychology and emotions: the concept of Shen and role of the Heart and other zang-fu organs, blood and qi
7. Chinese medicine and biomedical/ psychological nosology, epidemiology, aetiology, diagnosis and management of common mental health & neurological conditions:
- Depression: mild Depression, clinical Depression, Bi-polar Depression
- anxiety
- mood disorders, including attention Deficit hyperactivity Disorder (ADHD) and post-Traumatic stress Disorder (PTSD)
- drug and alcohol dependence
- sleep disorders
- dementia
- peripheral facial Paralysis (Bell?fs palsy)
- Headache and migraine
- Epilepsy
- Cerebrovascular accidents and post-Stroke sequelae
- Trigeminal neuralgia
- Meniere?fs disease
- Parkinson?fs disease
- motor Neuron disease
- multiple Sclerosis

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	20 minutes	15	N	Individual
Case Study	2000 words	35	N	Individual
Essay	2000 words	35	N	Individual
Participation	Minimum of 6 online posts with substantial content to fellow students in relation to online discussion topics	15	N	Individual

CMPL 7016 Musculoskeletal Health in Chinese Medicine

Credit Points 10

Legacy Code 401134

Coordinator Julia Xiao (https://directory.westernsydney.edu.au/search/name/Julia Xiao/)

Description This subject will enable practitioners to develop an in-depth understanding of the diagnosis and management of musculoskeletal

conditions with acupuncture and Chinese herbal medicine. This subject presents a systematic approach to the assessment of musculoskeletal disorders using Traditional Chinese Medicine (TCM), the application of specific medical tests and includes a focus on common musculoskeletal disorders, sports injuries and rehabilitation. Musculoskeletal Health in Chinese Medicine provides a strong specialist clinical focus on the management of musculoskeletal health disorders with acupuncture and Chinese herbal medicine.

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects CMPL 7017 - Musculoskeletal Health in Chinese Medicine 1 CMPL 7018 - Musculoskeletal Health in Chinese Medicine 2

Restrictions

Students must be enrolled in 4716 Master of Chinese Medicine or 4795 Master of Chinese Medicine(or 4675 Master of Health Science (Traditional Chinese Medicine) and/or 4678 Master of Health Science (Acupuncture).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Articulate the stages of injury in terms of TCM understanding of pathogenesis, diagnosis and corresponding TCM treatment principles
2. Apply a range of diagnostic skills and critically review the value of these in the assessment of common musculoskeletal disorders
3. Analyse signs and symptoms and apply TCM pattern differentiation to diagnose musculoskeletal disorders according to TCM theory, and assess their efficacy in practice
4. Formulate treatment principles and apply various therapeutic techniques including rehabilitation exercises for a range of musculoskeletal disorders and assess their efficacy in practice
5. Critically analyse and integrate TCM diagnosis and management protocols and orthodox diagnosis management
6. Evaluate the strengths and limitations of Chinese medicine treatment of certain musculoskeletal disorders
7. Explore appropriate liaison mechanisms with biomedicine practitioners and other allied health professionals

Subject Content

1.Overview and extension to foundation teaching on TCM in relation to musculoskeletal disorders
2.Physical examination and biomedical diagnostic tests
3.TCM analysis and therapeutic techniques including acupuncture, Chinese herbal medicine, and rehabilitation exercises
a.Sports injury: diagnosis and TCM management (excluding dislocations)
b.Clinical orthopaedic and neurological syndromes:
i.Syndromes of the lumbar spine (including biomechanical dysfunction, disc pathology, chronic back pain, coccydynia)
ii.Syndromes of the thoracic spine (including biomechanical dysfunction, Scheuermann?fs disease, ankylosing spondylitis, costo-chondritis)
iii.Syndromes of the cervical spine (including acute torticollis, chronic neck pain, cervicogenic headache, myofascial trigger points, biomechanical dysfunction, acute cervical disc lesion)
iv.Muscle syndromes (including piriformis syndrome)
v.Syndromes of the

CMPL 7019 Pharmacology of Chinese Medicines

Credit Points 10

Legacy Code 400569

Coordinator Dilip Ghosh (https://directory.westernsydney.edu.au/search/name/Dilip Ghosh/)

Description This subject will introduce the student to the pharmacology and toxicology of Chinese herbal medicine. The subject will cover the pharmacological principles of Chinese herbal medicines and identify basic active constituents that contribute to the actions of Chinese herbal medicines. This subject will also introduce safety and toxicology of herbal medicines including mechanisms and measurement of toxicity, known potential adverse reactions of commonly used Chinese herbs, known potential interactions with Western pharmaceuticals and management of adverse events.

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Assumed Knowledge

Equivalent to undergraduate training in Traditional Chinese Medicine.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the principles and mechanisms of pharmacokinetics, pharmacodynamics and the pharmacological actions of Chinese herbs and key constituents
2. Critically analyse the relationship between classes of drugs, Traditional Chinese Medicine (TCM) theories and classification of Chinese herbs
3. Describe how toxicity of herbal medicine is understood, mechanisms of toxicity, and how toxicity is tested for and measured; and explain the toxicity (including toxic components), dosage ranges, specific preparation requirements, cautions and contraindications associated with a variety of Chinese herbs and herbal medicinal formulae
4. Identify known potential adverse reactions to specific Chinese herbs and known potential interactions between specific Chinese herbs and Western pharmaceuticals
5. Justify Chinese herbal medicine prescribing considerations that need to be taken into account for patients taking western pharmaceuticals
6. Explain the management of adverse reactions
7. Prepare a report on an adverse event according to the adverse event reporting protocol used in western medicine

Subject Content

1. Principles of drug disposition
- absorption
- Distribution
- metabolism
- Excretion
2. Principles of pharmacokinetics
3. Principles of pharmacodynamics: mechanisms of drug action
4. Mechanisms of drug interactions
- Pharmacokinetic interactions
- Pharmacodynamic drug interactions
5. Classes of pharmaceutical drugs
6. Pharmacological actions of classes of Chinese herbs and commonly used herbs
7. Relationship between classes of drugs, TCM theories and classification of herbs
8. Chinese herbal medicine toxicity and adverse reactions
9. Concept of toxicity
10. Mechanisms of toxicity
11. Toxicity testing and measurement
12. Toxic Chinese herbs and components: identification, dosage, specific preparation requirements, cautions/contraindications
13. Known potential adverse reactions to specific Chinese herbs
14. Concurrent use of Chinese herbs and western pharmaceuticals: prescribing considerations, known potential interactions
15. Management and reporting of adverse reactions

CMPL 7020 Research Project and Thesis

Credit Points 60

Legacy Code 401138

Coordinator Sean Walsh (https://directory.westernsydney.edu.au/search/name/Sean Walsh/)

Description This is a 60 credit point year-long subject taken over two terms (30 credit points in each term). This subject requires students to complete a substantial piece of independent research in Chinese Medicine including research planning, study design, data collection, analysis and interpretation. Dissertation projects are developed in consultation with staff who possess similar research interests and relevant research experience. Students may wish to submit their work for examination in a form suitable for publication in the peer-reviewed literature (with supplementary material as appropriate).

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 30cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) CMPL 7012 AND
PUBH 7016 OR
HLTH 7008

Co-requisite(s) AGEN 7005

Restrictions

Students must be enrolled in a postgraduate program and have a GPA of 5.0 or greater. Students transferring from the current teaching-out program 4675 Master of Health Science (Traditional Chinese Medicine) and 4678 Master of Health Science (Acupuncture) may be eligible to entry into the subject with 401080 Research Protocol Design and Practice as corequisite subject to individual assessments.

Assumed Knowledge

It is assumed that the student would have completed core (or foundational) subjects associated with their Masters program, ideally in relevant research design and practice related disciplines.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Develop a research proposal in consultation with SSH supervisor(s)
2. Conduct research independently under the direction of SSH supervisor(s)
3. Complete research to an expected disciplinary standard
4. Develop skills in presenting scientific reports

Subject Content

Research proposal development related to Chinese Medicine in consultation with SSH supervisor(s)
Data collection, collation, and analysis
Interpretation and dissemination of research findings

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) CMPL 7003

Incompatible Subjects LGYA 7248 - Specialities in Traditional Chinese Medicine

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss the unique features of women’s physiology and pathology in relation to the pathogenesis and diagnosis of gynaecological diseases.
2. Explain the causes and patho-physiological mechanisms of common gynaecological

Subject Content

1. Introduction to Orthopaedics (including Traumatology & Rheumatology)
- physical Examination
- principles of treatment and therapies
- methods of management
2. Injury of muscle, tendon and bone
- Stiff Neck/Cervical soft tissue sprain
- Cervical spondylopathy
- scapulohumeral periarthritis
- carpal tunnel syndrome
- Acute lumber muscle sprain
- prolapse of lumbar intervertebral disc
- Sciatica
- post surgical management, scar treatment
3. Sport medicine
- injury treatment and management (injuries to ligaments, tendons, muscle and bone ? knee, elbow, shoulder, wrist, thigh, calf, ankle, Neck, low back)
- performance enhancement
4. Introduction to gynaecology
- special features of women?fs physiology (TCM & WM)
- aetiology, Diagnosis and therapeutic methods
- A synopsis of gynaecological pathology
5. Disorders of menstruation
- early menstruation
- delayed menstruation
- irregular menstruation
- amenorrhoea
- abnormal Functional uterine bleeding
- premenstrual syndrome
- menopausal syndrome
6. Disorders of the female genitalia
- abnormal vaginal discharge
- breast lumps: Fibrocystic diseases, fibroadenoma, nodules, mastitis
7. Di

CMPL 7022 Specialities in Traditional Chinese Medicine 2 (PG)

Credit Points 10

Legacy Code 400923

Coordinator Amy Tan (https://directory.westernsydney.edu.au/search/name/Amy Tan/)

Description The specialties of pediatrics, dermatology, ear, nose, throat (ENT) and eye diseases, are important divisions of TCM activity. This subject enables students to develop an understanding of the aetiology and pathophysiology of common paediatric, dermatological, ENT and eye disorders, and to analyze, diagnose and treat these conditions using acupuncture and Chinese herbal medicine.

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) CMPL 7003

Incompatible Subjects LGYA 7259 - Specialities in Traditional Chinese Medicine 2

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the causes and pathophysiological mechanisms of a range of common paediatric, dermatological, ENT and eye diseases, by demonstrating an understanding of the significance of clinical manifestations
2. Evaluate the relevance of characteristics of children&#65533;fs age, normal growth and development fo

Subject Content

1. Paediatrics
a). General Introduction
- physiology and pathophysiology of children
- feeding and health care
- Basic skills of Examination of children
- diagnostic and treatment principles in pediatrics
- acupuncture in pediatrics
- Chinese herbal medicine in pediatrics
b). Lung System Disorders
- common Cold
- Cough
- Asthma in children
c). Spleen System Disorders
- Infantile Diarrhoea
- Abdominal pain
- Anorexia
- food Stagnancy
d). Kidney System Disorders
- Acute nephritis
- Nephritic syndrome
- Enuresis
e). Infectious Diseases
- Measles
- Rubella
- Varicella (chickenpox)
- Mumps
- Pertussis (Whooping Cough)
f). Miscellaneous Diseases
- attention Deficit Disorder (add)
- Sweating syndrome
2. Dermatology
- aetiology and pathogenesis of Dermatosis
- key points of differentiation for The skin Lesions
- external applications with Chinese herbs and acupuncture
b). Viral Dermatitis
- Herpes zoster (She Chuan Chuang)
- common Wart (Xun Chang You)
- Flat Wart (Bian Ping You)
- Genital Wart (Jian Rui Shi You)
c). Fungal and other Infectious Dermatitis
- Tinea capitis (Tou Xuan)
- Tinea Corporis (Ti Xuan)
- Tinea Manuum (Shou Xuan)
- Tinea pedis (Zu Xuan)
- Tinea Unguium (Jia Xuan)
- Impetigo (Nong Pao Chuang)
- Scabies (Jie Chuang)
d). Allergic Dermatitis
- Eczema (Shi Chuang)
- Urticaria (Hives) (yin Zhen)
- contact dermatitis
e). Disorders of Sebaceous Glands and Hair Follicles
- Acne (Fen Ci)
- Seborrheic dermatitis (Bai Xie Feng)
- Alopecia Areata (You Feng)
f). Other Dermatitis
- Neurodermatitis (Niu Pi Xuan)
- Psoriasis (Bai Bi)
- Vitiligo (Bai Dian Feng)
- systemic Lupus Erythematosus (SLE) (Hong Hu Die Chuang)
3. ENT & Eyes
- rhinitis (allergic, chronic)
- sinusitis
- tinnitus and deafness
- suppurative otitis media (Acute and chronic)
- pharyngitis & laryngitis
- tonsillitis
- conjunctivitis (Acute, chronic, spring)
- hordeolum
4. Review of herbal formulas, individual herbs, and acupuncture points as they are covered in the above topics

CMPL 7023 Traditional Chinese Medicine Practice 3 (PG)

Credit Points 10

Legacy Code 400920

Coordinator Xiaoshu Zhu (https://directory.westernsydney.edu.au/search/name/Xiaoshu Zhu/)

Description This subject represents a continuation of the clinical practicum and development of clinical skills. Students will also be able to apply their knowledge of professional theory, practice, research and evaluation skills to the investigation of Traditional Chinese Medicine (TCM) problems. Students will be expected to demonstrate competence in handling patients in a clinical context, synthesise knowledge from their studies of specialities in TCM and critically examine the practical aspects of acupuncture and Chinese herbal medicine research. Students will also learn basic knowledge of health preservation and enhancement including lifestyle, diet and physical exercise.

School Health Sciences

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects LGYA 7249 - Traditional Chinese Medicine Practice (Research Project)

Assumed Knowledge

It is assumed the students will have a thorough knowledge of TCM theory, acupuncture and Chinese herbal medicine as a foundation for this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Competently manage patients in a clinical context;
2. Apply concepts and skills covered so far in Chinese Internal Medicine 1 and Specialities in TCM 1 in a clinical context;
3. Critically examine practical aspects of acupuncture and Chinese herbal medicine research;
4. Practice preserving and enhancing health and wellbeing by implementing knowledge and skills in prescribing lifestyle, diet and physical exercise modifications.

Subject Content

1. All aspects of clinical management and practice appropriate to the private practice of TCM in Australia:
- appointment taking
- case history taking and evaluation
- Diagnosis, treatment Principle and prescriptions
- patient management and liaison
- treatment ? acupuncture, Chinese herbs, moxa and cupping
- account management
- intra/inter-professional referrals
2. Satisfactory competence in all skills related to acupuncture and Chinese herbal practice, including diagnosis, formation of treatment plans, performance of interventions and follow-up
3. Synthesis of practical aspects of acupuncture and Chinese herbal medicine research, including critical review and analysis of clinical trials and relevant experimental research
4. Health Preservation and Enhancement
- health preservation
- methods of health preservation
- Cultivation of mind
- dietary regulation
- Balance between work & rest
- physical Exercise
- Chinese medicine dietary therapy
- Dietetic treatment for common disorders
- Dietetic materials
- Cereals
- Fruit
- vegetables
- Nuts
- Condiments
- Meats
- Fish
- commonly used herbs

Special Requirements

Legislative pre-requisites

First Aid Certificate.

CMPL 7024 Traditional Chinese Medicine Practice 4 (PG)

Credit Points 10

Legacy Code 400924

Coordinator Henry Liang (https://directory.westernsydney.edu.au/search/name/Henry Liang/)

Description This subject represents a continuation of the clinical practicum and development of clinical skills. Students will be able to integrate their theoretical knowledge, practice skills and research base to the investigation, diagnosis and supervised treatment of patients in a clinical context. Students will be able to synthesise knowledge and competency in the practice of clinical areas of focus taught in Chinese Medicine I and II, and Specialties in TCM I and II. Students will be expected to demonstrate professional competence in handling patients in a clinical context, diagnosing more complex cases and devising and managing the integrated care of patients using TCM.

Incompatible Subjects LGYA 7255 - Traditional Chinese Medicine Practice 4

Assumed Knowledge

Traditional Chinese Medicine 3 (PG).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Competently manage all aspects of TCM clinical practice;
2. Design and formulate the care of patients in a clinical context;
3. Critically examine issues related to complex cases and the care of patients in a multidisciplinary environment;
4. Synthesise knowledge and demonstrate competence in the practice of a range of the specialty TCM areas;
5. Articulate and apply a high standard of professional ethics.

Subject Content

1. Practice of acupuncture and related techniques including:
- appointment taking
- case history taking and evaluation
- Diagnosis, treatment Principle and prescriptions
- patient management and liaison
- treatment ? acupuncture, Chinese herbs, and associated techniques
- account management
- intra/inter-professional referrals
- Working in A multidisciplinary environment
- Ethical Marketing and promotion
2. Satisfactory competence in all skills related to acupuncture and Chinese herbal practice, including diagnosis, formation of treatment plans, performance of interventions and follow-up.
3. Professional ethics and privacy management in health

CMPL 7025 Women's Health in Chinese Medicine

Credit Points 10

Legacy Code 401132

Coordinator Yu-Ting Sun (https://directory.westernsydney.edu.au/search/name/Yu-Ting Sun/)

Description This subject will enable practitioners to extend their understanding of Chinese Medicine management of a range of women's health conditions. The clinical focus of this subject is on the integration of Chinese Medicine and conventional therapies in the treatment of disorders of the menstrual cycle, obstetric disorders, fertility, menopause and breast disease.

School Health Sciences

Discipline Traditional Chinese Medicine

Restrictions

Students must be enrolled in 4716 Master of Chinese Medicine or 4795 Master of Chinese Medicine(or 4675 Master of Health Science (Traditional Chinese Medicine) and/or 4678 Master of Health Science (Acupuncture).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe symptoms and signs of and diagnose a range of specific gynaecological and obstetric diseases and syndromes
2. Be familiar with the range of medical diagnostic tests commonly used in western medicine investigations of gynaecological and obstetric disorders
3. Apply skills in application of integrating TCM and orthodox medicine in the diagnosis and where appropriate, management of gynaecological and obstetric disorders
4. Analyse and critically examine practice protocols in TCM compared to orthodox management
5. Articulate the strengths and limitations of acupuncture and Chinese herbal medicine in the treatment of particular gynaecological and obstetric diseases
6. Articulate when to refer for medical advice/treatment and indicate appropriate liaison with gynaecologists, obstetricians and other relevant medical personnel

Subject Content

1. Signs & symptoms of gynaecology
2. Signs & symptoms of obstetrics
3. Strengths & limitations of TCM management in gynaecology & obstetrics
4. Referring to Western medicine practitioners: who, when, how, why
5. Commonly used western medical diagnostic tests - hormone tests, laparoscopy, ultrasound, and sperm tests relevant to women?fs conditions
6. Integration of TCM and orthodox medicine in diagnosis and management of specific gynaecological and obstetric disorders including:
- menstrual-related disorders
- menopausal disorders
- breast disorders
- obstetric-related conditions and applications - Prenatal support, birth assistance, Postnatal care
- Infertility (both female and Male Infertility)
7. Impact of lifestyle and social role on women?fs health

Equivalent Subjects CMPL 7026 - Women's Health in Chinese Medicine 1

Assumed Knowledge

Assumed knowledge equivalent to undergraduate training in Traditional Chinese Medicine. Students must have completed a minimum of two

years training in raw Chinese herbal medicine prescribing as part of their overall undergraduate training.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse symptoms and signs and diagnose the disease and syndrome for a range of specific gynaecological and obstetric diseases
2. Understand the significance of signs and symptoms specific to gynaecology and obstetrics
3. Interpret the range of medical diagnostic tests commonly used in western medicine investigation of gynaecological and obstetric disorders
4. Integrate TCM and orthodox medicine in the diagnosis and where appropriate, management of gynaecological and obstetric disorders
5. Analyse and critically examine practice protocols in acupuncture compared to orthodox management
6. Articulate the strengths and limitations of acupuncture in the treatment of particular gynaecological and obstetric diseases
7. Articulate when to refer for medical advice/treatment and how to liaise with gynaecologists, obstetricians and other relevant medical personnel

Subject Content

1. Signs & symptoms in gynaecology
2. Signs & symptoms in obstetrics
3. Strengths & limitations of TCM management in gynaecology & obstetrics
4. Referring to Western medicine practitioners: who, when, how, why
5. Commonly used western medical diagnostic tests
- hormone tests
- Laparoscopy
- Ultrasound
- Sperm tests
6. Integration of TCM and orthodox medicine in diagnosis and management (with an emphasis on acupuncture treatment) of specific gynaecological and obstetric disorders including:
i) Menstrual-related disorders
- Disordered menstrual cycle
- Dysmenorrhoea
- signs & Symptoms associated with menstruation, esp. PMS
ii) Menopausal disorders
iii) Breast disorders
iv) Pelvic disorders & discharges
v) Obstetric-related disorders
- Infertility
- Morning sickness

CMPL 7027 Women's Health in Chinese Medicine 2

Credit Points 10

Legacy Code 400571

Coordinator Suzanne Cochrane (https://directory.westernsydney.edu.au/search/name/Suzanne Cochrane/)

Description This subject enables practitioners to extend their understanding of a range of gynaecological and obstetric disorders and to diagnose and treat these primarily using Chinese herbal medicine. The clinical focus of this subject is on the integration of Traditional Chinese Medicine (TCM) in the treatment of complex disorders of the menstrual cycle, infertility, obstetric disorders, menopause, pelvic and breast disease.

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects CMPL 7027 - Women's Health in Chinese Medicine 2

Assumed Knowledge

Assumed knowledge equivalent to undergraduate training in Traditional Chinese Medicine. Students must have completed a minimum of two years training in raw Chinese herbal medicine prescribing as part of their overall undergraduate training.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse symptoms and signs and diagnose the disease and syndrome for a range of complex gynaecological and obstetric diseases, including infertility
2. Interpret the range of medical diagnostic tests commonly used in western medicine investigation of complex gynaecological and obstetric disorders and infertility
3. Integrate TCM and orthodox medicine in the diagnosis and where appropriate, management of complex gynaecological and obstetric disorders and fertility
4. Analyse and critically examine practice protocols in TCM compared to orthodox management
5. Articulate the strengths and limitations of Chinese herbal medicine in the treatment of complex gynaecological and obstetric diseases

Subject Content

Integration of TCM and orthodox medicine in diagnosis and management (with an emphasis on Chinese herbal treatment) of complex gynaecological and obstetric disorders including:
1. Menstrual-related disorders
- Disordered menstrual cycle
- Dysmenorrhoea
- signs & Symptoms associated with menstruation
- dysfunctional uterine bleeding
- Endometriosis/adenomyosis
2. Menopausal disorders
3. Breast disorders
- Fibrocystic breast disease
- breast cancer
4. Pelvic disorders & discharges
- Inflammatory conditions
- Ovarian cysts
- Polycystic ovaries
- uterine fibroids
- Cervical dysplasia
- Pelvic Inflammatory disease
- Leukorrhoea
- Thrush

5. Infertility
- commonly used Western medical diagnostic tests
- Western medical management of Infertility
- female Factors
- Male Factors
- Diagnosis & treatment
- TCM role in art
6. Obstetric-related disorders
- Threatened miscarriage
- Intrauterine growth retardation
- Pregnancy-induced hypertension
- Incomplete abortion
- Postnatal Depression
- Lactation disorders
7. Fu Ke Classic literature
8. Strengths & limitations of TCM management in gynaecology & obstetrics
9. Referring to Western medicine practitioners: who, when, how, why

COMM 0011 Texts and Communication (WSTC Prep)

Credit Points 10

Legacy Code 700192

Coordinator Chantal Rozairo (https://directory.westernsydney.edu.au/search/name/Chantal Rozairo/)

Description This subject assists students to develop skills in reading and textual analysis. It introduces students to the basic principles of reader response theory and general strategies to improve reading resilience. Textual analysis skills are built through engagement with a diverse range of texts on a variety of themes, which are relevant both to the contemporary world and to later studies at both the Foundation and University level. By the end of this subject, students will be able to read, discuss, analyse and write about texts in ways appropriate to academic levels of study.

Coordinator Chantal Rozairo (https://directory.westernsydney.edu.au/search/name/Chantal Rozairo/)

Description What does it mean to be a communication professional in the digital age? In this subject students will explore the various study and career options available to them in communication industries. They will engage with a range of skills and practices to boost their success in later subjects and to start thinking and working like a communication professional. Engaging in a case study of an Australian media professional and developing a professional profile of their own ensures that students can identify and develop their own strengths relevant to their communication journey.

Coordinator James Gourley (https://directory.westernsydney.edu.au/search/name/James Gourley/)

Description Why do we read books? Reading literary texts is crucial to our ways of understanding the world and ourselves. In this subject students learn that reading resilience, close reading skills and the ability to identify specific literary techniques are foundational to studying literature. Students will read a range of Australian texts including fiction, poetry, short stories, drama and criticism. They will analyse how meanings in those texts are shaped by diverse cultural and international contexts. This subject builds reading capacity while engaging students in key debates about literature today: what it means, how it works, and why it matters.

Level Undergraduate Level 1 subject

Equivalent Subjects LGYB 0130 - Approaches to Text COMM 1005 - Aproaches to Text (WSTC)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse literary texts to identify and interpret a range of key literary techniques.
2. Apply techniques in academic and critical writing, and respond to feedback to improve writing skills.
3. Summarise and evaluate critical arguments.
4. Work effectively with other students on team tasks.
5. Give effective oral presentations supported by digital-visual presentation tools.
6. Discuss ways in which different cultural and international contexts influence the reading and writing of Australian literary texts.

Subject Content

Students will

1) read and analyse a range of literary texts with the purpose of becoming both more resilient and more careful readers.
2) develop the ability to identify and interpret key literary devices.
3) read a range of Australian texts - prose, poetry and drama - including works by Indigenous Australian authors.
4) analyse ways in which different cultural contexts influence the reading and writing of Australian literary texts.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Short Answer	750 words	35	N	Individual
Portfolio	Tutorial participation (10%) plus 2 x multiple choice online quizzes (10%)	20	N	Individual
Essay	1,000 words	45	N	Individual

COMM 1007 Communication in Health

Credit Points 10

Legacy Code 400732

Coordinator Elizabeth Atteya (https://directory.westernsydney.edu.au/search/name/Elizabeth Atteya/)

Description Good communication within the health care setting is associated with improved health outcomes. This subject introduces students to foundation knowledge and skills required for effective communication with various stakeholders in varied and complex health situations. The subject is skills-based and uses case studies to create scenarios to which students learn to respond. There is a focus on the client interview and various questioning techniques designed to facilitate a therapeutic relationship as a means of developing rapport and trust. Strategies to promote communication within, between and across health professional disciplines, teams and government agencies is also explored. Written forms of documentation as well as communication skills required to communicate health information to clients, groups and the wider community are also presented. The subject uses a 'student capital' framework to facilitate reflection on current communication skills and those required for success at university and in future practice.

Level Undergraduate Level 1 subject

Equivalent Subjects LGYA 7034 - Communication for the Helping Professions COMM 1008 - Communication in Health (WSTC)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Reflect on their personal attitudes, beliefs and values on communication
2. Demonstrate essential verbal and non-verbal communication skills in the interaction with individual clients, patients, significant others, colleagues, managers and other health stakeholders
3. Describe strategies to adapt communication processes to meet the varying health literacy or special needs of clients, their family and significant others
4. Describe teamwork skills relevant to working in health care settings
5. Describe higher level communication techniques which are useful in complex situations
6. Review and critique written forms of communication
7. Critically analyse and evaluate the characteristics of health professional relationships with clients, colleagues, and the wider community
8. Reflect on their personal attitudes, beliefs, values, on communication
9. Apply essential verbal and written communication skills in the interaction with individual clients, patients, significant others, colleagues and other health stakeholders
10. Analyse and apply strategies to adapt communication processes to meet the varying health literacy or special needs of clients, family and significant others
11. Employ team work skills relevant to working in health care settings.

Subject Content

1.Student Capital framework to promote reflection on communication capacity needs
2.Theoretical frameworks and processes for effective communication
3.Communicating with various stakeholders ? the client, family and carers, professional colleagues, health care team, managers and agencies
4.Modes of communication in health
5.Developing sound relationships using empathy, rapport and active listening
6.Verbal and non-verbal communication techniques
7.Interview skills and motivational interviewing
8.Communication in difficult situations ? conflict, aggression, assertiveness, sad news
9.Documentation and presentations in the health
10.Influential communication and advocacy
11.Professional communication using social media
12.Working with people who have different communication needs
13.Protocols in using interpreters
1. Theoretical frameworks and processes in effective communication
2. Skills for effective communication with clients, colleagues and the community
3. Self-awareness in professional communication
4. The nature of effective helping as a health care professional
5. Communicating in teams
6. Working with people who have different communication needs
7. Professional written and presentation communication skills

COMM 1008 Communication in Health (WSTC)

Credit Points 10

Legacy Code 700062

Coordinator Charlise Bennett (https://directory.westernsydney.edu.au/search/name/Charlise Bennett/)

Description Communication is integral to professional relationships, whether working individually with a client, educating community members on health matters, or working with other professionals as part of a multidisciplinary team. This subject aims to develop communication skills in preparation for work within the health professions across these areas. Communication skills will include those needed to form therapeutic relationships with individual clients and groups, as well as those required to communicate health information to clients, groups and the wider community. Students will develop skills to establish appropriate working relationships with professional colleagues.

COMM 1009 Creative Writing: Practical Skills and Knowledge

Credit Points 10

Legacy Code 102437

Coordinator Luke Carman (https://directory.westernsydney.edu.au/search/name/Luke Carman/)

Description This is the second of two Level 1 foundation subjects in the Creative Writing Major. The subject focuses on developing students into writers by giving them the practical skills and theoretical knowledge needed to become published writers. Students will develop a body of original creative work while reflecting critically upon writing practice. The subject is built around participation in writing workshops, which emphasise improving your work via practical feedback from tutors and peers. Themes covered include writing the personal, writing about place, experimentation, specificity, originality, voice and starting a career in writing. No previous creative writing experience is necessary.

School Humanities & Comm Arts

Discipline Written Communication

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Understand writing forms and identify hose concepts most important to the kinds of writing they would like to produce;
2. Write short creative works (or series of works) using a range of techniques, styles and/or forms;
3. Use drafting and editing processes to write more effective creative works;
4. Write and read critically about key creative writing concepts;
5. Recognise ways in which different cultural contexts can shape and influence creative writing;
6. Understand and make use of the benefits of workshopping their writing.

Subject Content

Students will be required to work with the kinds of practical and theoretical knowledge essential to developing effective creative writing, working towards publication. Students will begin to work more intensively in a workshop mode, which involves sharing the work developed through exercises and assignments with the group, to better understand how effectively their writing manages to engage with and communicate with an audience. The workshops will be overseen by a team experienced published writers and focus on the contexts of the contemporary publishing industry. subject material may include:
Writing the personal;
Writing about place;
Making best use of techniques, including experimental techniques;
Understanding the forms of writing and ways they can affect or speak to readers;
Developing a specific understanding of your themes, and working out how to say what you want to say;
Understanding voice and originality;
Developing an ability to read works critically and apply these critiques to an understanding of how to write well;
Reading, writing and re-writing for publication.

COMM 1010 Creative Writing: The Imaginative Life

Credit Points 10

Legacy Code 102436

Coordinator George Haddad (https://directory.westernsydney.edu.au/search/name/George Haddad/)

Description What is an imaginative life, and how do we bring it into the practice of creative writing? This is the first of two Level 1 foundation subjects in the Creative Writing Major, in which students can find the

right place to begin their own writing journey. They will learn how storytelling in all its forms shapes our imaginative life, and begin to acquire practical skills to develop their writing. The subject involves two-hour workshops taught by experienced and widely published writers from the Writing and Society Research Centre and the school of HCA. No previous creative writing experience is necessary.

School Humanities & Comm Arts

Discipline Written Communication

Level Undergraduate Level 1 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate and use key techniques of creative writing;
2. Write short creative works (or series of works) using a range of techniques, styles and/or forms;
3. Use drafting and editing processes to write more effective creative works;
4. Write and read critically about key creative writing concepts;
5. Recognise ways in which different cultural contexts can shape and influence creative writing.

Subject Content

Students will be introduced to a range of creative writing materials, concepts and techniques. These will be studied via examples of writing drawn from diverse cultural and historical contexts. They will be put into practice by students via a series of guided writing exercises overseen by experienced creative writing practitioners and critics.
1.Writing as a mode of imaginative thinking and creative response;
2.How to get started as a writer and how to keep going;
3.Applying storytelling as a mode of 'knowing' the world;
4.Key tools of effective creative writing - including sentences, description, plot and form, scene construction, point of view, drama and dialogue (where appropriate);
5.Developing a more effective approach to creative writing - including using drafting and editing processes to write more effectively and sharing work with others;
6.Exploring links between reading and writing, critical thinking and writing practice;
7.Key debates in contemporary creative writing and literary practice, including in the critical literature.

COMM 1011 Data, Mediation and Power (WSTC)

Credit Points 10

Legacy Code 700269

Coordinator Ariadna Kiehn (https://directory.westernsydney.edu.au/search/name/Ariadna Kiehn/)

Description Data, Mediation and Power investigates the operation of power in contemporary digital media cultures and economy. The subject examines the primary role played by data in determining how we live in the world. This includes how we interact with the world, its people and digital artefacts, in terms of communication and meaning. The subject focuses on technologies of control and governance related to algorithmic architectures and data economies. Who benefits from data and mediation and what are the limits and possibilities of data? Ultimately, this kind of critical analysis invites us to think about what constitutes a just, democratic society and what constitutes an ethical media life.

Students must be enrolled at Western Sydney University, The College. Students enrolled in extended diplomas must pass 40 credit points

from the preparatory subjects listed in the program structure prior to enrolling in this University level subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify how data both mediates and governs society and daily life in ways often connected to commercial interests.
2. Understand the ways in which data informs the production of meaning (eg assessment of performance, analysis of texts, policy making informed by demographic modelling.
3. Develop a critical capacity with regard to the limits and possibilities of data and its relation to the operation of power.

Subject Content

1. Identify and critique the key features of network cultures, including an historical overview of the miniaturisation of technology.
2. Examination of cultural contexts and mobile media and assessment of the interrelation between mobile media, privacy and public culture.
3. Overview of policy and the impact upon the availability of mobile media commodities and access to content (eg the rise of ?enational webs?f).
4. Assessment of the impact of network cultures as emergent institutional forms that challenge more traditional, modern institutional forms (state, firm, union, university).
5. Critical investigation of concepts of freedom and the extent to which mobile media facilitate and/or restrict forms of social and cultural mobility.
6. Identification of the limits of mobility, media and geo-cultural settings.

Assessment

COMM 1015 Foundations of Media Arts and Production

Credit Points 10

Legacy Code 101927

Coordinator Ming Diao (https://directory.westernsydney.edu.au/search/name/Ming Diao/)

Description In 2021, this subject replaced by subject 102825 - Introduction to Screen Media. This subject explores creative and independent media arts practices across moving image, audio and participatory forms, and introduces students to fundamental principles of sound and screen production. The subject maps theoretical and practical connections between the creation and study of images and sound across media formats through an integrated theory/practice programme focused on the processes through which media artefacts are created. Students learn how to analyse and critically evaluate screen media and also to plan and make simple short works of their own. It introduces students to relevant media arts histories and contexts (with a focus on cinema) in addition to a range of technologies, media practices and production techniques.

School Humanities & Comm Arts

Level Undergraduate Level 1 subject

Equivalent Subjects LGYB 0161 - Image Sound Text COMM 1028 - Screen MediaCOMM 1039 - Introduction to Screen Media COMM 1016 - Foundations of Media Arts and Production (WSTC)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an awareness of the processes and practices of screen media arts production and the interdisciplinary and multi-platform nature of screen media arts production
2. Apply creative strategies and technical skills of screen media production in an environment that link them to theories and histories of screen media
3. Demonstrate an ability to critically review a screen media work
4. Make a simple screen media work in small groups work using accessible mobile and online tools
5. Adequately assess the risk involved in professional production projects.

Subject Content

- Visual language and Creative camera coverage. this Topic will introduce mise-en-scene: how A scene is staged for The camera. It will include explorations into camera angles, shot sizes, camera movement, focus, depth of field, speed, lighting, colour, subjective and objective camera, composition and production design. students will learn how to Create storyboards and Create shot lists.
- editing in screen media Production. this Topic will explore The role of editing in screen media Production. It will analyse The strategies of editing from The Two Schools of editing: Continuity editing and Montage.
- sound in screen media Production. this Topic will explore The relationship between sound and screen media. It would explore how sound is recorded and mixed. It will analyse different components of sound in screen media such as atmospheric sounds and music.
- screen media narrative structure, genres and diverse production models. this Topic will explore A range of contexts for screen narrative structure, genres and production Models, comparing and contrasting Hollywood Models with World cinema movements and examples. It will reference how screen media has been critically analysed via theory & post-theory approaches.

It will consider production case studies and The processes of developing A Project from concept through stages of production to finished work.
- Australian screen media: history and industry frameworks. this Topic will introduce Australian screen history and provide An introduction to Australian film & television industry frameworks.It will explore The short film form and its significant role within screen production history more generally as well as its role in The career development of key Australian film-makers.
- Innovative storytelling for the screen, past present and future.
This topic will explore a range of forms including animation; history, contexts, diverse origins and subject matter. It will explore larger themes such as the political image through innov

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Scene and Shot Analysis Storyboard	500 words	30	N	Individual
Discussion Board	1500 words	30	N	Individual
Practical exercises - screen media work	1500 words equivalent plus visual work (maximum of 3 minutes)	40	N	Both (Individual & Group)

COMM 1018 News and Media Today

Credit Points 10

Legacy Code 100556

Coordinator Asha Chand (https://directory.westernsydney.edu.au/search/name/Asha Chand/)

Description Built on the ideas that we must tell a story about all that we are, and do, this subject introduces students to the fields of news, journalism, and media for a deeper understanding on the impacts of news, where it comes from, and how to spot key elements for compelling stories. Students learn to identify news, research, and write copy for local audiences while understanding the power of the media to reach global audiences. Highlights of the subject include pitching ideas, writing news with speed, accuracy, and to industry standards, for publishing and broadcasting to identified audiences. Ethical research, editing, and the importance of sources form an integral part of learning. Understanding the media landscape, the demand and importance of journalistic skills and inquiry across a variety of communication industries, corporate and government sectors allow students to critically consider career choices through the relevance of what they learn about storytelling.

Level Undergraduate Level 1 subject

Equivalent Subjects LGYB 0049 - Journalism News Reporting COMM 1019 - Introduction to Journalism (WSTC)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the importance of news and journalism in the modern world.
2. Understand the importance of audiences and medias when choosing news.
3. Explain the flow of information in creating news and applying storytelling techniques.
4. Ask questions, conduct interviews and research in a professional context.

5. Engage with the news and news environments for published outcomes.
6. Apply skills gained for intellectual and professional insights.

Subject Content

1. Understanding the power of news and journalism
2. Applying skills learned to find local news, research, and write/edit with speed for published outcomes
3. Learn about the media landscape, ownership, and history.
4. Tailor learning to become effective communicators using news and journalism skills.
5. Create a portfolio of work as an add-on to students' academic qualifications.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Professional Task	400 words with one primary and one secondary source	30	N	Individual
Professional Task	600 words, including photos, video, voice with at least two secondary sources for publishing in a relevant chosen media	40	N	Individual
Portfolio	To include all weekly homework, including 150 word chapter answers, class writing exercises, 500 word report	30	N	Individual

COMM 1019 Introduction to Journalism (WSTC)

Credit Points 10

Legacy Code 700182

Coordinator Ariadna Kiehn (https://directory.westernsydney.edu.au/search/name/Ariadna Kiehn/)

Description This subject introduces students to the fields of journalism and new media, covering the concepts of news values and news research for target audiences. It looks at the role of the journalist and the professional skills of news gathering and news writing. The subject also considers the legal and ethical obstacles and obligations faced by journalists operating in an environment of fast paced communication. The methodologies underlying professional practice as well as delivering news with speed for multimedia platforms are central to this subject.

COMM 1020 Media Cultures and Industries

Credit Points 10

Legacy Code 101926

Coordinator Milissa Deitz (https://directory.westernsydney.edu.au/search/name/Milissa Deitz/)

Description This subject introduces students to the concept of media in terms of how it has changed, how it works and its impact on our lives and society. It builds the necessary foundation for further theoretical and practical study and understanding of the media in future years. Its approach brings practice-based research together with experiential learning and theoretical reflection. At the conclusion of this subject students will be able to demonstrate a fundamental critical understanding of the media. In addition, students will have developed their digital literacy through the creation of digital creative works.

COMM 1032 Writing Ecologies

Credit Points 10

Legacy Code 101920

Coordinator Milissa Deitz (https://directory.westernsydney.edu.au/search/name/Milissa Deitz/)

Description In Autumn 2024, this subject is replaced by COMM 1044 Professional Communication. This subject introduces students to a set of theories and strategies for exploring storytelling in networked environments and the way social and cultural experiences continue to shape and inform the way we read, write and communicate. Grounded in contexts key to Communication Arts practice, the subject explores what it means to be digitally literate, the difference between newer and older storytelling environments, and the way networked technologies have re-shaped contemporary reading/writing practices. Students will complete a range of analytical and creative tasks that aim to build understanding of the dynamic nature of communication while further developing academic research and writing skills.

COMM 1036 Introduction to the Creative Industries

Credit Points 10

Legacy Code 102836

Coordinator Rachel Morley (https://directory.westernsydney.edu.au/search/name/Rachel Morley/)

Description Careers in the Creative Industries are on the rise. They're innovation-led, mobile, global and adaptable. In the short-term success can be a matter of luck but a long-term career requires tactics, talent, and savvy business acumen. In this hands-on subject we'll introduce you to some of the key opportunities in the Creative Industries in fields as diverse as Communication, Media, Music, Design, Writing and associated aspects of Intellectual Property Law and Entrepreneurship. We'll look at the Creative Industries from historical and contemporary perspectives, and hear from industry contributors

working in the field right now. You'll be introduced to 'future of work' skillsets, including entrepreneurship, leadership, collaboration and communication capabilities, and you'll learn how to situate your own creative knowledge within them. Available to students from all disciplines, this subject will suit you if you're passionate about taking your creative career to the next level.

School Humanities & Comm Arts

Discipline Communication and Media Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Define the Creative Industries using national and international examples.
2. Identify and recognise their field of study within the Creative Industries.
3. Apply research skills to investigate and communicate the career trajectory of a Creative Industries professional.
4. Communicate at an introductory level the relationship between creativity, commerce and law; and the social, economic, technological and workplace practices that typify the Creative Industries.
5. Describe at an introductory level key strategies and methodologies that inform creative research, development, production and circulation in the context of the Creative Industries.

Subject Content

- Module 1 - Creative Industries: An Introduction
  - This module introduces the Creative Industries from national and global perspectives. It examines contexts core to the Creative Industries, canvassing different practices and knowledges; important skillsets; and cultural, social, political, technological and environmental conditions.
- Module 2 - Putting Creativity to Work
  - This module prepares students for the major practicum learning experience - the Innovation Challenge. Students will learn about cross-sector collaborations in evolving workplaces and cultures ; the intersection of hard skills (technical) and soft skills (ideation, leadership, collaboration, communication, entrepreneurship); innovative methodologies and strategies for responding to professional challenges; and about Western Sydney's fast-changing role in creative economies.
- Module 3 - Learning in Action: Innovation Challenge
  - This module provides students with a hands-on learning experience that embeds key learnings. Students will work on an innovation challenge with an industry learning partner to identify and solve complex challenges directly related to Creative Industries futures.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Reflection	3 x 700 words or equivalent (Total: 2,100 words or equivalent)	45	N	Individual
Professional Task	All day participation + 4 minute presentation	20	N	Group
Presentation	4 minutes	10	N	Group
Report	1,200 words or equivalent	25	N	Individual

COMM 1037 Digital Narrative

Credit Points 10

Legacy Code 102827

Coordinator Wendy Chandler (https://directory.westernsydney.edu.au/search/name/Wendy Chandler/)

Description Effective storytelling is at the heart of engaging content. In this unit, you'll learn the basic principles of fictional, narrative storytelling used in screen media. Following on from Screen Media Fundamentals, you'll learn more advanced principles of screen media production, including genre, visual storytelling, camera coverage, lighting, visual style, editing, sound design and performance. You'll also develop an awareness of key narrative concepts such as narrative form, structure, conflict and basic scriptwriting techniques. You'll plan and create a short narrative screen media work, which will demonstrate your enhanced storytelling and production skills.

Level Undergraduate Level 1 subject

Pre-requisite(s) COMM 1041

Incompatible Subjects COMM 2036 - Screen and Sound Practices 2

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Express the key concepts of fictional, narrative storytelling.
2. Establish a sound understanding of the aesthetics and narrative strategies of the short film format.
3. Write a compelling short fiction script in a standard industry format.
4. Showcase effective knowledge and technical skills in camera, sound recording, editing and sound design.
5. Identify the key crew roles in producing a short film: Director, Producer, Cinematographer, Sound Designer, Production Designer, Editor, Writer.
6. Plan and produce a short screen media work.
7. Integrate theoretical and practical knowledge in the analysis and content creation and reflective creative practice.
8. Assess the risk involved in professional production projects.

Subject Content

Concepts and practices in fictional narrative storytelling.
Scriptwriting techniques and conventions.
Advanced production techniques in camera, lighting, editing and sound design.
Directing camera coverage and performance.
Short narrative screen media production.
Online content production and publishing.

COMM 1043 Communication in Health (UG Cert)

Credit Points 10

Legacy Code 500055

Coordinator Mia Hatzistergos (https://directory.westernsydney.edu.au/search/name/Mia Hatzistergos/)

Description Communication is integral to professional relationships, whether working individually with a client, educating community members on health matters, or working with other professionals as part of a multidisciplinary team. This subject aims to develop written and verbal communication skills in preparation for work within the health professions across these areas. Communication skills will include those needed to form therapeutic relationships with individual clients and groups, as well as those required to communicate health information to clients, groups and the wider community. Students will develop skills to establish appropriate working relationships with professional colleagues.

Restrictions

Students need to be enrolled in one of the following programs: 7171 Undergraduate Certificate in Public Health Support, 7172 Undergraduate Certificate in Health Services Management, 7173 Undergraduate Certificate in Aged Care Support, 7176 Undergraduate Certificate in Disability Care Support

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse and evaluate the characteristics of health professional relationships with clients, colleagues, and the wider community.
2. Reflect on the impact of personal attitudes, beliefs and values on communication.
3. Apply essential verbal and written communication skills in the interaction with individual clients, patients, significant others, colleagues and other health stakeholders.
4. Analyse and apply strategies to adapt communication processes to meet the varying health literacy or special needs of clients, family and significant others.
5. Employ teamwork skills relevant to working in health care settings.

Subject Content

1.Theoretical frameworks and processes in effective communication
2.Skills for effective communication with clients, colleagues and the community
3.Self-awareness in professional communication
4.The nature of effective helping as a health care professional
5.Communicating in teams
6.Working with people who have different communication needs
7.Professional written and presentation communication skills.

COMM 1044 Professional Communication

Credit Points 10

Coordinator Myra Gurney (https://directory.westernsydney.edu.au/search/name/Myra Gurney/)

Description Understanding of the complexities of human communication is an important part of professional practice in all

communication and creative industries. In this subject you will explore both theoretical and practical elements of professional communication and how these can be applied to understanding and solving real world communication problems. Subject content provides you with a range of communication contexts necessary for academic work and professional success. It also asks you to learn and practise a variety of professional writing styles and give class presentations with particular attention to how these vary according to the audience, context and medium.

School Humanities & Comm Arts

Discipline Communication and Media Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Equivalent Subjects COMM 1026 COMM 1032 COMM 1033

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Identify the wide range of variables which impact human communication.
2. Demonstrate knowledge of the range of factors which affect both oral and written communication within professional contexts.
3. Describe how language operates to generate meaning.
4. Demonstrate appreciation of cultural impacts on communication.
5. Apply a range of critical perspectives to mediated communication from a written, interpersonal and organisational perspective.
6. Write effectively using a variety of professional formats especially emails, reports and persuasive texts.
7. Demonstrate effective oral presentations.
8. Undertake research including use of library catalogues, databases and the internet.
9. Apply communication skills through participation in workshops and the importance of consideration of a variety of personal views, perspectives and styles.

Subject Content

1. Importance of communication in personal and professional encounters: the notion of interpersonal competence, interpersonal communication, face to face interaction, communication involving reciprocal creation of meaning rather than linear message transmission.
2. Factors influencing human communication: perception, observation, inference, effects of personal experience, cultural experience and context.
3. Language as a factor in the social creation of meaning.
4. Non-verbal communication: proxemics, paralanguage, kinesics, interpreting non-verbal communication, Influence of culture on non-verbal communication, ambiguity of verbal and non-verbal messages.
5. Electronic/mediated communication and the factors which influence its use and impede its effectiveness: writing email, problems of lack of social presence, organisational problems arising from use of electronic media.
6. Principles of effective professional writing style: importance of identifying audience and purpose, elements of plain English style: importance of word choice, ordering, clarity, parallel construction, use of inclusive language, clear sentences, types of paragraphing
7. Common genres of professional writing: email, business reports, reviews, newsletters.
8. Introduction to principles of visual communication including document layout and design which convey meaning.
9. Oral reports and presentations: how to prepare and present effectively, the importance of oral organisational strategies, developing appropriate and readable a/v, consideration of the differences between writing and speaking, the implications of non-verbal aspects to message effectiveness.
10. Principles of effective library research: using the catalogue, databases, internet, and applying appropriate academic referencing conventions.

COMM 1045 Foundations of the Communication Industry

Credit Points 10

Coordinator Adam Daniel (https://directory.westernsydney.edu.au/search/name/Adam Daniel/)

Description In Foundations of the Communication Industry, students will be introduced to some of the key understandings and opportunities across a diverse set of communication disciplines (including Advertising, Journalism, Public Relations, and Screen Media), and how these disciplines intersect, integrate, and relate to each other. This hands-on subject will provide students with a strong understanding of the fundamental principles, theories, and practices that shape the contemporary communication landscape, and what the future holds for this dynamic industry. Students will learn from industry contributors working on the frontlines, and through a combination of theoretical concepts, guest lectures by industry professionals, and practical case studies, they will develop critical thinking, analytical skills, and an appreciation for the ethical considerations behind communication. Available to students from all disciplines, this subject will suit those starting out in their studies of Communication, and those who are seeking to become well-rounded professionals with the capacity to adapt and excel in the current and future contemporary communication landscape.

1. Define the communication industry, using national and international examples.
2. Identify and define the fields of study within the Communication Industry.
3. Apply research skills to investigate and communicate the career trajectory of a communication industry professional.
4. Describe the relationship between Advertising, Journalism, Public Relations, and Screen Media, and how these specialisations integrate to form the communication industry.
5. Understand current communication work practices and what the future of the industry might look like.

Subject Content

1. Introduction to the Communication Industry
2. History of the communication industry, with specific focus on the contribution of Indigenous Australian peoples and communities
3. The advertising industry
4. The journalism industry
5. The public relations industry
6. The screen media industry
7. How the industries intersect, integrate, and relate to each other
8. Communicating with a social and environmental conscience
9. Storytelling: Crafting compelling messages and measuring their impact
10. The impact of AI on the industry
11. Future of the communication industry

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Portfolio	Class Participation is graded across each week of the teaching semester, and the students are given 60 minutes to complete each online quiz	30	N	Individual
Report	1,500 words	30	N	Individual
Case Study	2,000 words	40	N	Individual

COMM 2001 Account and Client Management

Credit Points 10

Legacy Code 101941

Coordinator Kristen Marshall (https://directory.westernsydney.edu.au/search/name/Kristen Marshall/)

Description Effectively managing a client or an 'account' requires a special combination of skills. In this subject, you'll learn the basic principles of account management and how to nurture and foster an environment of trust, respect and partnership. Working on an applied project, you'll explore best practice in 'hard skills': understanding clients' objectives, developing a strategy, managing a project, preparing and holding effective meetings, writing WIPs (work in progress) and contact reports, and working toward specific financial/success metrics. Just as important to your success in client-facing roles are 'soft skills'. You'll learn how to be more proactive, overcome procrastination, manage 'challenging' personalities, develop a network, adapt to cross-cultural differences, and present well. Both hard and soft skills are critical to the success of your project, your role as client liaison, and importantly, your career.

Level Undergraduate Level 2 subject

Pre-requisite(s) -

Equivalent Subjects COMM 2044 - Writing for the Professions

Restrictions

Successful completion of 80 credit points in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse and discuss liaison strategies and collaborative approaches taken with key stakeholders.
2. Articulate the impact of their role and actions on clients' financial returns.
3. Demonstrate flexibility, empathy and adaptability in a rapidly evolving work environment.
4. Apply the blend of skills and knowledge necessary to effectively manage client-based projects.

Subject Content

Through a weekly lecture and tutorial, students will become familiar with issues and approaches in client liaison, and different approaches to optimizing outcomes. Tutorials are largely concerned with role play, critical evaluations, and classroom discussion. The following are explored:

1. Proactive management of clients and other stakeholders
2. Understanding clients' business objectives, and the marketplace
3. Success metrics
4. Client presentations/meetings
5. Best practice communication with different stakeholder groups
6. Strategies in optimising relationships
7. Financial implications of actions

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

COMM 2009 Cinema and Censorship

Credit Points 10

Legacy Code 102192

Coordinator Alex Ling (https://directory.westernsydney.edu.au/search/name/Alex Ling/)

Description Censorship of the arts has long been a contentious issue. This subject examines the cultural contexts and debates surrounding censorship, as well as the institutions, policies, and people that figure prominently in the history of cinema censorship. Censorship discourses reveal shifts in how 'national morality' is constructed, and often display cultural anxieties about changing meanings of gender, sexuality, race, and class. This subject offers an historical survey of film censorship from the 1890s to today, utilising various theoretical approaches (feminist theory, critical race theory, queer theory, and cultural theory), with an emphasis on topics such as obscenity, pornography, violence, and blasphemy.

School Humanities & Comm Arts

Discipline Audio Visual Studies

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Restrictions

Successful completion of 40 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of the historical, cultural and theoretical context of censorship as well as its purpose and function;
2. Appreciate changes and developments in censorship throughout the history of cinema;
3. Demonstrate skills in research and critical reading in the fields of cinema studies and visual culture more broadly;
4. Analyse and critically evaluate a range of texts important to the study of film and culture.

Subject Content

Module 1: Hollywood and the Motion Picture Production Code
Specific topics may include:
- Pre-code Hollywood cinema;
- Joseph Breen and the Motion Picture Production Code;
- From the MPPC to the MPAA;
- cinema and The culture Wars.
Module 2: Censorship in Australia
- History of the Australian Classificatory Board;
- Government v. Industry-regulated censorship;
- Refused Classification (RC) films;
- indigenous cinema and censorship.
Module 3: The Global Context
- Specific topics may include:
- Queer and alternative cinemas;
- The BBFC and the 'Video Nasty' debate;
- Political censorship in Indian cinema;
- Religious censorship in Iranian cinema;
- film Festival and Torrent culture.

Prescribed Texts

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Equivalent Subjects MKTG 2009 - Public Relations Tactics COMM 2007 - Advertising Strategy LGYA 1172 - Public Relations Strategy

Restrictions Successful completion of 80 credit points at Level 1.

Assumed Knowledge

Knowledge gained from Year 1 introductory subjects in Public Relations (PR) or Advertising, competent literacy skills, basic computer skills.

Learning Outcomes

On successful completion of this subject, students should be able to:
1. Explain the importance of strategy in successful communications, and the range of approaches and methodologies used in campaigns
2. Undertake relevant research to develop and leverage strategies for campaigns
3. Consolidate research findings into a strategic presentation and document
4. Develop a brief/pitch with potential to inspire successful campaigns
5. Outline characteristics of a range of mediums and be able to identify relevant alternative communication strategies
6. Establish criteria for evaluation of campaigns.

Subject Content

Through a weekly lecture and tutorial, students will become familiar with principles behind communication strategies and different approaches to developing such strategies.
- strategic planning
- strategy and tactics
- strategic use of research
- media and message strategies
- Integrating evaluation into The strategic plan

COMM 2014 Editing and Publishing

Credit Points 10

Legacy Code 102435

Coordinator Felicity Castagna (https://directory.westernsydney.edu.au/search/name/Felicity Castagna/)

Description What makes a good editor? How do editing and publishing work in Australia and the wider market? This subject provides an introduction to basic skills required when editing texts for publication, and a survey of key issues confronting literary publishing in Australia. Skills in editing and an understanding of Australian publishing are valuable assets for students of creative writing. They are also relevant to industry-based work in a range of related fields such as advertising, public relations and journalism. This subject will focus on three areas: the practice of editing, modes of publishing, and the economics of writing and publishing.

School Humanities & Comm Arts

Discipline Written Communication

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Restrictions

Successful completion of 40 credit points of study in currently enrolled program.

Assumed Knowledge

Students will be expected to have undergraduate first year level reading and writing skills.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply key concepts and techniques of editing for publication ? such as using drafting and editing to improve the quality of written works;
2. Understand the roles and responsibilities of the literary editor;
3. Compare and analyse different modes, genres and processes of publication;
4. Develop a critical understanding of the economics of writing and publishing, and how these operate in diverse reading environments;
5. Recognise and understand changing relationships between authors, publishers and readers;
6. Recognise ways in which different cultural contexts can shape and influence the publishing process.

Subject Content

1. An overview of Australian literary publishing
2. Literary trends, issues and controversies
3. The writer as change maker and literary activist
4. Introduction to three kinds of publishing – commercial, literary and digital
5. The writer and popular culture
6. Economics of writing and publishing
7. The writer in the age of social media
8. Some examples of the relationship between writer and publisher
9. The role of literary magazines, festivals and collectives

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Practical: Editing Task	500 words	20	N	Individual
Essay	1,000 words	30	N	Individual
End-of-session exam: Take home exam	1,500 words (2 x 750 word short answers)	50	N	Individual

COMM 2015 Events Management

Credit Points 10

Legacy Code 101940

Coordinator Vanessa Campbell (https://directory.westernsydney.edu.au/search/name/Vanessa Campbell/)

Description This subject introduces understandings about events as forms of public relations typologies and promotional models. These include strategic public relations and management processes, researching the event promotion environment, infrastructure, organisational and event promotion processes and funding. Students will analyse behaviours of event publics, audiences and participants, matching event opportunities with publics, and conceptualising events as service experiences. Students will develop strategies for developing event partnerships, funding and sponsorship relationships. These include managing the development of the event setting/venue, programming and personnel affecting the on-site event experience, and developing appropriate merchandising strategies for events.

COMM 2016 Experimental Writing and Electronic Publication

Credit Points 10

Legacy Code 100584

Coordinator Anna Gibbs (https://directory.westernsydney.edu.au/search/name/Anna Gibbs/)

Description Experimental Writing and Electronic Publication is a practical and experiential exploration of modernist writing practices.Students will be introduced to a range of innovative writing techniques designed to stimulate creative thinking and assist in the development of a regular writing practice. Areas of study include: exploration of pre-writing processes; experimental writing genres; power of language; evaluative process; and the development of individual and collaborative techniques for planning and executing writing projects. A primary component of this subject includes working on writing exercises both at home and in class. These exercises will be used to develop the end-of-unit major project.

School Humanities & Comm Arts

Discipline Written Communication

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Outline the history of modernist experimental writing and its relevance to contemporary writing practices
2. Analyse some key texts in the history of experimental writing practices
3. Employ strategies and techniques for overcoming 'writer's block'
4. Develop a major writing project based on class exercises
5. Display skills in writing and editing

Subject Content

Writing, games and play
Writing as process
Writing from dreams
Collage techniques
Writing structures
Experimenting with genre and form: history, poetry, auto/biography and hybrid genres
DIY publication
Digital writing

COMM 2017 Feature Writing

Credit Points 10

Legacy Code 102061

Coordinator Asha Chand (https://directory.westernsydney.edu.au/search/name/Asha Chand/)

Description This subject takes students beyond event and reactionary reporting towards an understanding of the proactive process of exploration, interpretation and exposure in journalism. Students learn how to find, filter and file information in a dynamic and constantly changing environment. Given a lot more time to explore issues, students learn to add value to information while keeping the story current, to deadline and in the public sphere, while negotiating with the media industry to get their stories out into the public sphere. Students are encouraged to develop their unique writing styles while also focusing on social issues such as trauma, violence, mental health and wellbeing.

School Humanities & Comm Arts

Discipline Journalism

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) COMM 1018

Equivalent Subjects LGYA 0585 - Journalism Feature Writing COMM 2023 - Magazine Journalism

Assumed Knowledge

News sense. An interest in telling a story. Basic journalism writing skills and keenness to develop an interest in social issues. Broad understanding of the role of journalism in society. Basic computer skills.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Generate original story ideas suitable for developing into feature stories
2. Undertake newsgathering, research, writing and editing applicable to feature stories
3. Apply interviewing and writing skills appropriate to the generation of feature-length stories.
4. Analyse writing feature stories and the mediums for publication.
5. Adapt writing to various styles while writing tight to deadline.
6. Target a specific audience/publication.
7. Market stories to different publications/audiences as this will add value to student learning
8. Apply teamwork skills through the editing process.

Subject Content

1. Looking behind the behind the scenes of issues and events to formulate feature stories
2. Understanding the interview process a principal tool of journalism research and writing;
3. Ways of adding value to a story such as Computer Assisted Reporting (CAR), use of databases, documents and other secondary sources/writing styles
4. The development of a feature article targeting a specific audience/ publication.
5. Editing and critically analysing news in circulation to advance understanding of audience needs
6. Tailoring writing to specific markets to help hone skills (such as marketing your idea/story, revamping the structure) required in a professional setting
7. Reflecting on the processes to build the foundation to an appreciation of the many responsibilities of journalism as a profession.
8. Submitting work for journalism competition to gauge opportunities outside the publishing arena.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Professional Task	1,000 - 1,200 Words	35	N	Individual
Professional Task	300 Words	10	N	Individual
Professional Task	1,200 - 1,500 words plus portfolio	55	N	Individual

COMM 2019 Interactive Design: Games

Credit Points 10

Legacy Code 102272

Coordinator Sarah Waterson (https://directory.westernsydney.edu.au/search/name/Sarah Waterson/)

Description This subject focuses on game design from an interactive design perspective. Approaches utilising current digital technologies for advanced interactive design are explored. Students will design and produce simple games for mobile and/or desktop delivery. The focus of the subject is about the communication and experience design, rather than technical implementation. Interactive game design examples are examined from the context of shifting production languages, convergent technologies and the design professional contexts. This subject includes game development concepts, platforms, goals and genres, player elements, simple story and character development, gameplay, levels, interface, and the game development process. Students will play games, analyse them, and complete a game design with appropriate documentation.

School Humanities & Comm Arts

Discipline Communication and Media Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Equivalent Subjects COMM 2018 - Interactive Design II

Assumed Knowledge

Computer literacy including working in a networked environment on a Macintosh computer; management, transportation and storage of digital information and digital production processes such as scanning, pdf production and file storage. Skills in design principles: layout, colour and typography. Literacy with image manipulation software - e.g. Photoshop.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of significant aspects of interactive design practice by producing a design document for an interactive game.
2. Define and implement strategies and research methodologies for producing interactive games within the project work.
3. Apply an appropriate balance of design, testing, critical reflection and refinement of strategy for interactive design through the production of a simple game.
4. Critique and evaluate game design to promote effective communication, interactivity, and user experiences through the precedent appraisals within the design document, and the final presentation.
5. Identify and control relevant media and techniques (including digital technologies and other media and technologies relevant to the documentation of objectives, user needs and strategy) to the production of an interactive screen-based game.

Subject Content

- interaction design approaches and processes for simple games: planning, user- testing, evaluation, and Revision
- Game genres, goals and player elements
- Basic Gameplay, including: Rules of play, Game theory and challenges

- Basic character and story design for games
- Game development processes
- production processes for designing, developing and delivering interactive media
- interface, level and navigational design for games
- Lynda.com tutorials as appropriate

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Portfolio	1,200 words and design work	20	N	Individual
Proposal	1,500 words and design work	30	N	Individual
Applied Project	900 word report and design work; 5 minute presentation	50	N	Individual

COMM 2020 Introduction to Film Studies

Credit Points 10

Legacy Code 100964

Coordinator Adam Daniel (https://directory.westernsydney.edu.au/search/name/Adam Daniel/)

Description The subject will introduce students to the key theoretical strands of film studies and key concepts in the analysis of film. The subject will explore techniques of narrative, performance, genre, realism and spectatorship, as well as introducing methods to analyse the use of editing, cinematography and sound. A case study of a key historical film movement or genre will introduce students to the study of cinema in its cultural contexts. The subject will also address the transformations in screen cultures as a result of digital technologies and new media.

School Humanities & Comm Arts

Discipline Audio Visual Studies

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Restrictions

Successful completion of 40 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. explain key theoretical concepts in film studies
2. apply key concepts to an active viewing and analysis of film and video
3. demonstrate skills necessary for research and writing on cinema
4. show knowledge of at least one film movement and genre
5. think critically about the screen cultures they encounter in everyday life.

Subject Content

- key concepts in film theory: montage, mise en scene, style, genre, sound, performance, representation, narrative.
- key theoretical strands of screen studies.
- A major film movement or genre.
- Transformations in screen cultures as result of digital technologies and new media.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Critical Review	1,200 words	35	N	Individual

Quiz	30 minutes	20	N	Individual
Essay	1,600 words	45	N	Individual

Prescribed Texts

Pre-requisite(s) COMM 1018

Equivalent Subjects LGYA 0583 - Speciality News Reporting COMM 2021 - Investigative Journalism

Assumed Knowledge

General knowledge of politics, social affairs and economy.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply advanced research techniques in journalistic writing
2. Locate reliable sources of information both online and offline
3. Demonstrate ethical standards in their work, in line with the Australian Journalists' Code of Ethics
4. Work ethically, in line with the Australian Journalists' Code of Ethics

Subject Content

1. Advanced research techniques for writers
2.The historical context of Investigative Journalism
3. Computer & database journalism
4. Using Public Records and historical documents
5.Specialist rounds
6. Journalism ethics

Assessment

COMM 2024 Media Law and Ethics

Credit Points 10

Legacy Code 101928

Coordinator Roger Dawkins (https://directory.westernsydney.edu.au/search/name/Roger Dawkins/)

Description Media Law and Ethics focuses on the media and communication industries of public relations, journalism, advertising and media production, and examines issues including: the legal framework in which these creative communication industries operate, the role of ethics in decision-making in these industries, and the impact of regulation. It considers these issues in relation to their historical and philosophical contexts, and in terms of the contemporary context of digital networked media. This subject provides a foundation for professional practice in the Communication and Creative Industries key programs.

School Humanities & Comm Arts

Discipline Journalism

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Equivalent Subjects COMM 2010 - Communication Law and Ethics

Restrictions

Successful completion of 60 credit points at Level 1 in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. apply a thorough understanding of the legal framework in which the communication industries operate and the ethical context of decision-making in the media professions
2. explain the Australian legal system as it specifically relates to the key fields of professional communication practice
3. articulate historical and philosophical contexts to contemporary practices involving ethical judgments and decision-making
4. explain the impact of regulatory procedures upon the range of communication practice, and industry-specific solutions to legal and ethical concerns within media contexts
5. apply key research skills to legal and ethical issues in a media context

Subject Content

Defamation, contempt and privacy laws
Fairness in research and reporting, including developing an awareness of anti-discrimination laws and other media guidelines as they apply to minority and/or vulnerable groups such as children and indigenous people
An overview of free speech issues, including the Freedom of Information Act
Understanding creators' rights, including copyright laws as they apply to the media professions
Contextualising journalism, advertising, public relations and media production pressures in contemporaneous terms
The legal framework for electronic communication such as the internet and email
Issues in the regulation and control of print, broadcast and electronic media
The professional codes of ethics that apply in all fields of communication practice

Assessment

COMM 2026 New Media Contexts (WSTC)

Credit Points 10

Legacy Code 700084

Coordinator Peta Downes (https://directory.westernsydney.edu.au/search/name/Peta Downes/)

Description The convergences and diversifications in the communications media industries of the past two decades have completely altered the environment within which they operate for producers and consumers alike. Issues about digitalisation, convergence, globalisation, the network society and communications media governance require a complete reconceptualisation of the media in order to be able to understand the impact of these changes upon professional practices and consumer habits. This subject will introduce students to international perspectives on issues in the new media contexts, and an appreciation of some of the social and cultural implications.

School Humanities & Comm Arts

Discipline Communication and Media Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Equivalent Subjects COMM 2025 - New Media Contexts

Restrictions Students must be enrolled at Western Sydney University, The College in 7021 Associate Degree in Creative Industires

Assumed Knowledge

A basic knowledge of media and communications studies.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. After successful completion of this Unit, students will be able to:
2. identify, analyse and contextualise broad patterns of change in communications media;
3. analyse specific new media developments in public, commercial and community communications and media organizations;
4. examine and report on changes in consumer uses of media;
5. apply critical, reflective, and creative skills to make informed decisions in professional or applied communications contexts;
6. identify practices in media that will enhance their careers in the communications and media industries;
7. integrate theoretical and practical knowledge of the media and communications industries to analyse and solve problems;
8. demonstrate proficiency in a range of communication skills, social interaction, information research and assembly to solve problems, and skills in using technologies.

Subject Content

This subject will explore:
The meanings and implications of the ?enew?f in the context of the established and newer media and the emerging globally networked media environment.
Tracking theoretical debates concerning the emerging role of new media industries within more traditional media market structures, and the policy implications of these.
Examination of the patterns of new media developments and operations and the influence on/in the broader social and cultural contexts.
Mediatisation and social change.
The political economy of the media and its relation to globalisation.
Content modules will relate to case studies of changes in particular forms and practices in television, film and video, radio, music and the Internet, and mobile wireless communications.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Level Undergraduate Level 2 subject

Pre-requisite(s) COMM 1018

Equivalent Subjects LGYB 0129 - Online Journalism COMM 2028 - News Reporting for Convergent Media

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Find and select appropriate issues and events for production as news stories for multi-platform delivery.
2. Select interviewees and conduct interviews.
3. Explain how to value add to stories with additional story elements
4. Explain how different delivery platforms, including social media, use different news gathering and production techniques.
5. Critically assess ethical and other issues in print and online-delivered journalism.
6. Explain the changes taking place in news media as a result of media convergence.
7. Apply general knowledge and knowledge of current events appropriate for conduct of basic journalistic tasks
8. Adequately assess the risk involved in professional production projects.

Subject Content

Developing a news sense and gathering information for news.
Journalistic interviewing and research.
Presenting news in various formats with a focus on developing news writing style.
Creating social media platforms, including blogs and website to host news stories.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Professional Task	2 x news stories (300 words each) and mission statement (150 words)	30	N	Individual

COMM 2029 Photo Journalism

Credit Points 10

Legacy Code 100953

Coordinator Ming Diao (https://directory.westernsydney.edu.au/search/name/Ming Diao/)

Description Students studying this subject examine the function of photojournalism in the process of newsgathering and production and examine the relationship between images and text and their communicative potential. The subject involves a variety of approaches to photojournalism using monochrome and colour photography and location lighting for social documentary for ultimate use in a range of published forms.

School Humanities & Comm Arts

Discipline Photography

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Equivalent Subjects LGYA 0636 - Photo Journalism

Restrictions

Successful completion of 80 credit points.

Assumed Knowledge

Students must have a sound understanding of photography principles, and experience in photography processes.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of the communicative potential of the discrete photographic image
2. Explain the legal and ethical issues involved in the use of images of people and property
3. Demonstrate in folio format visual narrative forms as a sequence or series of images in a visual essay
4. Recognize and isolate the necessary key visual elements of a narrative to construct a photo that communicates clearly
5. Prepare photographic images in the context of photojournalism towards publication formatted as both screen and print folios
6. Explain the newsroom structure and processes for negotiation with writers
7. Apply proficiency in monochrome and colour photography, contemporary print and printing systems, basic studio, portable as well as available lighting and digital capture
8. Adequately assess the risk involved in professional production projects.

Subject Content

The construction of meaning through single and sequential images.
The role of the image in telling the story, what makes a good news or feature picture.
The use of the photographic image - subjectivity of the photographer and editor.
Skills in analysis, composition and editing of photographic imagery.
Understanding the role of the photojournalist within an editorial team.
Understanding concepts of constructing and following a brief.
Legal issues (defamation, copyright, privacy) and ethical issues associated with documentary photographic imagery.
The function of research in story development.
The photojournalist as reporter, the feature & investigative story.
The DSLR camera lighting, monochrome and colour photography.
Exposure for and natural and artificial lighting conditions.
Digital capture to publication, file set up for use in print and on-line/screen publication. File sizes and compression.

COMM 2032 Professional Writing and Editing

Credit Points 10

Legacy Code 101929

Coordinator Jacki Montgomery (https://directory.westernsydney.edu.au/search/name/Jacki Montgomery/)

Description Professional communicators require advanced writing and editing skills. This subject explores the nature of writing and preparation of texts for use across different media platforms and in various contexts. In particular, the subject develops skills in editing and re-purposing of writing, and further develops understanding of key writing tools such as voice, emphasis, tone, grammar and

punctuation and Plain English for professional purposes. Through in-class workshops and time-restricted editing tasks, students will demonstrate a range of professional writing skills from corporate communications to advanced editing. Through in class presentations, discussions and short written tasks, students will demonstrate an applied understanding of conceptual and theoretical issues related to writing and editing for diverse audiences and applied to a range of current issues.

School Humanities & Comm Arts

COMM 2035 Screen and Sound Practices 1

Credit Points 10

Legacy Code 102406

Coordinator Vincent Tay (https://directory.westernsydney.edu.au/search/name/Vincent Tay/)

Description This subject introduces students to the principles of screen and sound media production with an emphasis on digital video, new media, and short film drama production. Students develop an awareness of screen language through critical reflection upon classic and contemporary cinemas as well as practical exercises. Through a series of specialised modules and workshops, students develop their knowledge and skills in media production including camera coverage, visual storytelling, genre, narrative, montage, and sound design and editing. The subject is complemented by technical training in camera, sound and editing software.

School Humanities & Comm Arts

Discipline Audio Visual Studies

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Equivalent Subjects COMM 2034 Screen and Sound Practices

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an in-depth knowledge of key media concepts, histories and practices, and their relevance within both Australian screen media industries and in an international context.
2. Examine the multiple ways in which screen media arts are connected with other related fields (design, visual arts, cultural studies and humanities).
3. Critique the short film form: aesthetics, production, narrative, and exhibition, and apply new directions and new technologies in short film production.
4. Demonstrate effective technical skills in camera and sound recording.
5. Differentiate among the key crew roles in producing a short film: Director, Producer, Cinematographer, Sound Designer, Production Designer, Editor, Writer.
6. Demonstrate knowledge of key aspects of Australian and international industries, festivals and markets to prepare students for professional careers in film and media across television, cinema, independent video, and new media.
7. Integrate theoretical and practical knowledge in the analysis and content creation of screen media applying critical, reflective, and creative skills.
8. Adequately assess the risk involved in professional production projects.

Subject Content

- concepts, techniques and practices in screen media production and Creative content production
- Australian screen industries
- short film development in non-fiction and fiction genres

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Production Exercise - Non Fiction	No longer than 3 minutes in total	35	N	Individual
Production Exercise - Drama or Fiction Scene	No longer than 3 minutes in total	35	N	Individual
Perform a Series of Technical Tasks relating to the Camera, Sound, Lighting and Editing Departments	35 tasks, which can be completed in one day	15	N	Individual
Critical Review	500 words or equivalent.	15	N	Individual
Mandatory Attendance at 80% of Classes		S/U	Y	Individual

COMM 2036 Screen and Sound Practices 2

Credit Points 10

Legacy Code 102407

Coordinator Maryella Hatfield (https://directory.westernsydney.edu.au/search/name/Maryella Hatfield/)

Description Following on from Screen and Sound Practices 1, this subject introduces students to more advanced principles of screen and sound media production with an emphasis on digital video, new media, and short film drama production. Students develop a depth of awareness about screen language through critical reflection upon classic and contemporary cinemas as well as practical exercises. Through a series of specialised modules and workshops, students continue to develop their knowledge and skills in media production including camera coverage, visual storytelling, genre, narrative, montage, and sound design and editing. The subject is complemented by further technical training in camera, sound and editing software. Students produce a major creative media project for a video work under 10 minutes duration.

Short film/ video	Less than 10 minutes	40	N	Individual

COMM 2043 Writing Fiction

Credit Points 10

Legacy Code 100896

Coordinator Helen Koukoutsis (https://directory.westernsydney.edu.au/search/name/Helen Koukoutsis/)

Description In this subject students explore, critically examine, and write in a range of fictional and essay forms. They critique a wide variety of published fiction in order to enhance their understanding of approaches, possibilities, and techniques, thereby developing a greater capacity to write and critically evaluate their own work. Students create their own fiction in the form of written exercises and assignments, which they will have the opportunity to workshop and present to peers in a supportive and constructive critical environment.

School Humanities & Comm Arts

Discipline Written Communication

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Equivalent Subjects LGYB 6562 - Creative Writing LGYB 4536 - Writing Fiction

Restrictions

Successful completion of 40 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Compose a range of short and long fictional and critically reflective pieces using numerous techniques explored in class.
2. Critically examine published texts in order to develop an awareness of the approaches and techniques employed in the writing of fiction.
3. Present to peers workshop-led writing and draft compositions for constructive feedback.
4. Evaluate a range of published and peers' fictional compositions.
5. Write and speak clearly and effectively.

Subject Content

1. The critiquing of published texts in order to examine the various approaches and techniques deployed in writing fiction.
2. The use of written exercises in order to give students practical experience of creating fiction using numerous techniques examined in class.
3. The setting of critical and creative assignments that give students the opportunity to demonstrate their awareness, understanding and practical mastery of these techniques and approaches.
4. The use of workshops to develop students' writing and awareness of the drafting process, as well as the implementation of graded activities/participation for the regular presentation and evaluation of original draft compositions in a supportive workshop-based environment.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Portfolio	1,200 words (combined) + weekly in-class activities	40	N	Individual
Reflection	1,000 words	25	N	Individual
Applied Project	1,200 words	35	N	Individual

COMM 2047 Pitch: Podcasting Essentials

Credit Points 10

Legacy Code 102697

Coordinator Roger Dawkins (https://directory.westernsydney.edu.au/search/name/Roger Dawkins/)

Description This subject will teach students the fundamentals of podcasting, giving them the expertise needed to produce their own podcast feature. Working with academics and industry experts students will learn research and communication skills for finding, pitching and developing audio stories (backgrounding, writing, interviewing, presentation, critical review) and basic technical skills in sound and editing. This subject will show students how to get the most out of their software and hardware, and how to maximise their distribution channels to reach target audiences. Students will also learn how to recognise and evaluate key legal and ethical issues in research and recording content for publication. There is no need to know any of these things already, or have a story ready to tell; this subject is for all levels of experience and disciplinary backgrounds.

School Humanities & Comm Arts

Discipline Communication and Media Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Restrictions

Successful completion of 40 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse and evaluate existing podcasts in order to identify key characteristics of the audio genre;
2. Apply research and communication skills for pitching and developing audio stories (backgrounding, writing, interviewing, presentation, reflection);
3. Recognise and evaluate the importance of key legal issues and the role of ethics in research and recording content for publication;
4. Demonstrate technical skills to record, edit and publish an audio feature;
5. Apply collaboration and team work skills.

Subject Content

This subject will be comprised of three topic areas.
Topic 1: Intro to podcasting and storytelling fundamentals
Students will learn the concepts of narrative storytelling; the components of a podcast; how to pitch story ideas; and how to write their own stories about their area(s) of interest.
Topic 2: Understanding audiences, the law and ethics
Students learn basic audience research techniques; relevant legal issues in the context of podcasting (copyright, defamation and privacy) and key ethical issues, including privacy and cultural appropriation.
Topic 3: Production
Students will learn how to record, edit and publish an audio feature, using personal recording devices and their own computers; basic voice presentation techniques; to engage in peer review of others?f work.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Practical	60-90 seconds recorded review	20	N	Individual
Practical	60-90 seconds recorded promo PLUS 1000 words proposal	30	N	Individual
Practical	5-7 minutes audio feature	40	N	Individual
Participation	Weekly production exercises	10	N	Individual

COMM 2048 Communicating for Sustainability

Credit Points 10

Legacy Code 102705

Coordinator Tanya Notley (https://directory.westernsydney.edu.au/search/name/Tanya Notley/)

Description This subject will enable you to become an environmental sustainability leader by building your capacity to be a confident and effective communicator. Environmental sustainability is vital to human wellbeing and planetary health. Effective communication is required to bring about transformation at individual, organisational and societal scales. In this subject you will participate in three modules focused on the key ingredients required for communicating sustainability: strategy, design and storytelling. Weekly learning pods developed by industry and academic leaders are designed to demonstrate what has worked well in practice, across business, government, community and not-for-profit sectors. Assessments provide you with an opportunity to implement the models, concepts and ideas you've learnt during the weekly learning content. This subject is recommended for all students, regardless of discipline.

School Humanities & Comm Arts

Discipline Communication and Media Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Restrictions

Successful completion of 40 credit points. Please note that this subject is recommended for all students, regardless of discipline.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse a sustainability need or problem in relation to the local context.
2. Create a communication strategy based on key insights.
3. Develop a clear sustainability narrative to guide communication and public engagement.
4. Design processes to effectively engage communities in strategies.
5. Present information, ideas and media clearly, convincingly and with confidence.

Subject Content

Module 1: Strategies for Communicating Sustainability
This module focuses on developing a communication strategy: how will your intervention create or contribute to change?
Module 2: Storytelling for Sustainable Futures
This module focuses on storytelling: whose voice is being centred? What kind of genre and format will be most effective for creating change?
Module 3: Designing Sustainable Initiatives
This module focuses on design processes and practices: how do you work collaboratively in an ethical way to design appropriate and effective sustainability-focused initiatives?

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Report	750 - 1,000 words, plus recorded 1-2 minute pitch presentation	30	N	Individual
Applied Project	video (approx 2 minutes duration), visual essay (800 words plus 5 images) OR campaign package (one page media release plus print advertisement or storyboard).	30	N	Group/ Individual
Report	5-minute presentation plus 750-1,000 words, plus visual documentation	40	N	Group

COMM 2050 Multiliteracies

Credit Points 10

Legacy Code 102739

Coordinator Di Dickenson (https://directory.westernsydney.edu.au/search/name/Di Dickenson/)

Description This subject develops students' skills, knowledge and competencies to address a wide range of literacies across multiple technologies, platforms and contexts, including the digital, written, visual, aural, spatial, gestural, and tactile dimensions of meaning production. In any society there are a range of literacies, and contexts in which those literacies might be deployed. Multiliteracies go beyond the traditional textual models of literacy to describe the rich variety of cognitive and cultural tools we use to make sense of the everyday. Multiliteracy is key to our professional and personal effectiveness as well as to our functioning as individuals and citizens in a world characterised by increasing local diversity and global connectedness.

School Humanities & Comm Arts

Discipline Communication and Media Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Equivalent Subjects INFO 2009

Restrictions

Successful completion of 40 credit points in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Engage critically with a range of multimodal texts
2. Develop and employ a repertoire of practices (knowledge, skills and strategies) appropriate for different purposes and audiences and in a range of cultural, social and domain-specific contexts
3. Examine the ways in which social and cultural diversity shapes literate practices by the application of different knowledges, approaches, orientations, attitudes and values
4. Work collaboratively in small groups to develop strategies and/or propose solutions to real-world problems
5. Practice peer and self-assessment to analyse and reflect on content and promote personal and professional development

Subject Content

This subject is modularized, in the following structure
Contextualizing introductory module: Critical multiliteracies
- What is multiliteracy, and why is it essential?
- The active and passive production of meaning across a range of new platforms and contexts
- What critical theory, tools and contextual understandings do we bring to creating? or seeking to understand?multimodal texts and textuality?
Reading and Writing in the 21st century
- Multimodal reading
- Media and mediation
- Social and cultural diversity and the diversity of knowledges
Embodiment and the sensorial literacies: making sense through the senses
- The senses and sense-making; sensory impairment/deprivation and multiliteracies
- Intersectional literacies: what sensory skills (or combination of skills) do we bring to the visual and the digital?
- Non-verbal communication
Digital and technological literacies
- Computer literacy
- Informational literacy for an online world
- Curating identity in personal and professional life

Assessment

COMM 2051 Animation and Visual Effects

Credit Points 10

Legacy Code 102828

Coordinator Wendy Chandler (https://directory.westernsydney.edu.au/search/name/Wendy Chandler/)

Description Explore the art and technology of animation and visual effects as applied to digital screen media production. In this unit, you will be introduced to the principles of animation and compositing and learn how to create effective motion sequences integrated with sound. Working with commercial software, you will explore the unique possibilities of animation and visual effects production and experiment with alternative, creative, narrative storytelling approaches. Develop critical, conceptual and practical skills within the context of animation and visual effects which will then enable you to deliver powerful and compelling visual stories on multiple media platforms.

COMM 2052 Documentary: Factual Screen Media

Credit Points 10

Legacy Code 102830

Coordinator Maryella Hatfield (https://directory.westernsydney.edu.au/search/name/Maryella Hatfield/)

Description Documentary is an evolving area that continues to flux and change. Due to developments in media distribution, technological change and convergence, audiences are increasingly engaging with factual content in new and innovative ways. This subject explores both conceptual and production approaches to documentary in various forms. Students are introduced to key documentary histories and modes and examine a range of traditional and evolving practices including animated, online interactive and transmedia documentary outcomes. Students produce a short documentary project and in doing so develop professional skills and approaches to production roles as well as ethical relationships and responsibilities with participants and topics.

School Humanities & Comm Arts

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) COMM 1041 - Screen Media Fundamentals

Co-requisite(s) -

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss the development of documentary histories, forms, concepts and production techniques.
2. Articulate a range of ways in which evolving forms and directions in documentary production influence current documentary media.
3. Research and write a documentary proposal.
4. Discuss the ways ethical issues related to documentary subjects and topics are reflected in documentary production.
5. Develop and produce a short documentary project.
6. Integrate theoretical and practical knowledge in the reflective analysis of content creation and production roles.

Subject Content

1. Documentary histories and concepts
2. Evolving documentary forms (animated, online interactive, transmedia)
3. Documentary research and proposal writing skills
4. Documentary practice (preproduction to postproduction)
5. Ethical considerations and responsibilities involved with working with subjects and topics
6. Reflective practice

Assessment

COMM 2053 Narrative: Fictional Screen Media

Credit Points 10

Legacy Code 102829

Coordinator Maryella Hatfield (https://directory.westernsydney.edu.au/search/name/Maryella Hatfield/)

Description In the 21st Century the nature of storytelling has evolved. Fictional screen narratives are now delivered across multiple platforms, devices and spaces. At the same time different platforms are strategically used to extend and add new layers to stories while deepening audience interaction and engagement. This subject introduces students to more advanced principles and processes in the production of fictional screen media. Students will learn how to work effectively in collaborative production teams across various key roles in pre-production, production and post-production. Working in teams, students produce a creative cross-platform narrative screen media project.

School Humanities & Comm Arts

Discipline Communication and Media Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) COMM 1037 Digital Narrative

Equivalent Subjects COMM 3020 - Media Arts Project

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply key concepts in cross platform fictional storytelling to project development.
2. Develop and write a proposal and script for a cross platform fictional project
3. Plan and produce a cross platform screen media project which includes a fictional narrative video.
4. Apply reflexive critical thinking to the creative process and to evaluation of their own and others' work.
5. Work independently and collaboratively on a cross platform fictional storytelling project.

Subject Content

1. Advanced fictional scriptwriting concepts and methods.
2. Cross platform and 360 transmedia storytelling.
3. Relevant skills in cross platform fictional screen media production.
4. Professional production practices and creative processes for screen media practitioners working in collaborative teams.
5. Reflective online content production and publishing

Assessment

Coordinator Christopher Conti (https://directory.westernsydney.edu.au/search/name/Christopher Conti/)

Description This subject aims to increase students' knowledge of the scope and variety of Australian writing. It examines a range of Australian texts from a number of contexts, usually organised along historical and/or thematic lines, and considers the role of writing both "high" literature and more popular forms in constructions of Australian culture. Issues of place, gender and race may be foregrounded, and consideration given to how these influence images of Australia. Film and television texts may also be included or emphasised.

School Humanities & Comm Arts

Discipline Written Communication

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Equivalent Subjects LGYB 0186 - Australian Textual Studies LGYB 4976 - Australian Authors Special Study LGYB 4974 - Australian Literature The City and The Bush

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Students will increase their knowledge of the scope and heterogeneity of Australian texts.
2. Students will read and critically examine a range of representative Australian texts from a number of different social and cultural contexts.
3. Students will examine the relationship between Australian texts and ideas and traditions regarding the nature of Australian culture.
4. Students will explore the relationship between Australian literary culture and other cultural forms, such as film, television, journalism and the visual and performing arts.

Subject Content

Text and gender in Australian culture.
Landscape as text: writing Australian places and spaces; the city versus the bush.
Imagining community/ies: the textual construction of the Australian nation and national identity/ies.
Aboriginal texts, from pre 1788 cultural inscriptions to present-day writing.
Ethnic minority writing and questions of multiculturalism.
The concept of an Australian literature, its history and discontents.
Focus study of particular Australian authors.
Writing Australian drama, film and television.
Bastards from the Bush and Sentimental Blokes: Australian literature and popular culture; humour, irony and sentiment.
Australian modernity, Australian modernism.
Australian journalism and literary culture.
Australian literary criticism, its history and some of its major issues (for example, national versus universal culture, "the cultural cringe", radical nationalists versus New Critics, responses to post-structuralism and postcolonialism).
It is necessary to understand/That a poet may not exist (Ern Malley): Australian literary hoaxes.
Australian writing and the visual arts.

COMM 3006 Cinema and Experience

Credit Points 10

Legacy Code 101984

Coordinator Adam Daniel (https://directory.westernsydney.edu.au/search/name/Adam Daniel/)

Description Film Studies and Literary Studies share some common theoretical foundations and analytical methods. However, considered in its cultural contexts, the question of how a film is experienced by spectators becomes critical. Films engage spectators in an embodied and affective way. The subject will argue that we cannot understand how a film takes up thematic and cultural questions without exploring the dynamics of spectatorship. This subject will explore some key approaches to film spectatorship and will look at how cinematic techniques shape narrative, genre, character, and thematic and cultural questions into embodied and affective experience.

School Humanities & Comm Arts

Discipline Graphic and Design Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Equivalent Subjects LGYB 0027 - Film Genre and Affect LGYA 0256 - Film and Affect

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Engage in critical debates about cinema spectatorship
2. Identify diverse historical and cultural approaches to cinematic affect
3. Analyse the relationships between key methodologies in film studies
4. Demonstrate skills in film analysis
5. Critique the relationships between film techniques and cultural and thematic questions.

Subject Content

Concepts of classical narrative and their revision
Comparative methodologies in film studies
Textual analysis of film
Cinema of attractions; cinema and modernity
The role of embodiment in spectatorship
Concepts of affect and mimetic experience
Models of affect in narrative, genre, film sound, mise en scene, cinematography and performance
Case studies of diverse film cultures and movements
Function of fantasy in film production and consumption
Contemporary forms of film production and experience

COMM 3008 Communication Research Project

Credit Points 10

Legacy Code 101930

Coordinator Raymond Archee (https://directory.westernsydney.edu.au/search/name/Raymond Archee/)

Description This final year subject provides a capstone experience as a bridge into professional work or as a precursor to further research studies. The 'open box' approach invites students to develop a concept for a research report or professional project, undertaking preparatory stages of collective and individual research in an area of interest that has emerged as a result of previous studies. Students will generate project options that draw on historical and contemporary research issues and approaches to guide the development of their own research questions and methods specific to their object of research. A range of methodological approaches will be explored, including practice-based methods, industry observation/shadowing, qualitative interviews, and quantitative digital methods. Students will develop their own reading lists, identify appropriate research methods and conduct some pilot testing and evaluation of findings for their project. Students will also learn how to read and consume academic and scholarly research in order to critique problematic issues in published research reports.

School Humanities & Comm Arts

Discipline Written Communication

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Equivalent Subjects COMM 3039 - Visual Thinking COMM 3019 - Media Analysis

Restrictions

Successful completion of 80 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and develop a research question
2. Identify appropriate professional and academic contexts for research, and real world ethical practices
3. Present a rationale for a research project
4. Evaluate and use appropriate methods in your research
5. Articulate a potential research finding appropriate to the selected context
6. Adequately assess the risk involved in professional production projects
7. Be able to critique a research report for reliability, validity and ethical problems

Subject Content

- developing research directions and contexts - The research question and The place of research within academic and professional contexts
- selected research themes linked to Core practices of Advertising, Journalism, public relations and media Arts production majors - case Study examples
- Exemplars of published research reports in need of Issues being identified and critiqued
- The use and Reporting of appropriate research methods and mixed methods research in A pilot research Study
- developing A research evaluation of The pilot Study using selected methods and approaches

COMM 3010 Creative Industries Professional Project or Internship

Credit Points 10

Legacy Code 102433

Coordinator Rachel Morley (https://directory.westernsydney.edu.au/search/name/Rachel Morley/)

Description Creative Industries Professional Project or Internship will allow students to work with Creative Industries practitioners in a 'real world' context. Students will collaborate with an industry partner, applying design thinking to achieve creative solutions within an internship placement or develop their own creative industry project.

School Humanities & Comm Arts

Discipline Communication and Media Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Students must be enrolled in Bachelor of Creative Industries or associated double degrees. Students must have successfully completed 160 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explore the relationship between discipline area and its contribution to creative industries and broader society.
2. Undertake appropriate critical thinking.
3. Use design thinking to solve challenges identified in the workplace and/or community setting.
4. Present a professional profile.
5. Demonstrate integrated disciplinary knowledge and skills in a workplace and/or project context.

Subject Content

Professional profile creation
Applied skills within industry of major/sub-major
Critical and design thinking
Applied problem solving
Creative application
Innovation and collaboration

Assessment

COMM 3013 Creative Writing Project

Credit Points 10

Legacy Code 100859

Coordinator Anna Gibbs (https://directory.westernsydney.edu.au/search/name/Anna Gibbs/)

Description This subject extends students beyond the writing of individual stories and poems into larger areas of creative writing, such as the discontinuous narrative, the novella, and the cycle of related poems and/or stories. It involves students in the process of developing a major project from an initial set of ideas, through the stages of drafting to a "finished" product, using workshop techniques, individual interviews and peer critiquing. It aims to give each student some experience of a relationship with readers (fellow students) and an editor (the tutor).

School Humanities & Comm Arts

Discipline Written Communication

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Assumed Knowledge

It is highly desirable that students should have successfully completed one of the following Level 2 subjects: 100896 -Writing Fiction, 100856 - Creative Non-Fiction or 101011 - Writing Poetry.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically examine a range of published texts drawing upon their awareness of the variety of approaches and techniques employed in extended pieces of creative writing.
2. Write a developing series of drafts leading to the completion of an extended creative work.
3. Employ writing and editing skills through the workshop process.
4. Build capacities for critiquing and evaluating their own work through the development of editorial relationships.
5. Express themselves clearly, forcefully and effectively - to the level of their capacity.

Subject Content

The critiquing of published texts in order to examine the various approaches and techniques deployed in writing an extended piece of creative writing.
The use of workshops to develop students' writing and awareness of the drafting process.
The creation of a series of developing drafts in order to produce an effective creative work that improves with each draft.
The use of an editorial relationship to develop students' understanding of the editing process and their capacity for critical evaluation of their own work.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Writing exercises	1000 words	30	N	Individual
Major writing draft	1250 words	30	N	Individual
Major writing final	2500 words	40	N	Individual

COMM 3014 Digital Communication

Credit Points 20

Legacy Code 102518

Coordinator Vanessa Campbell (https://directory.westernsydney.edu.au/search/name/Vanessa Campbell/)

Description This subject covers the theory and practice of social/digital media (SDM) for marketing and communication in a variety of business, advertising and public relations agency contexts. It provides an introduction to the areas of strategy, creative writing and media planning for SDM. It examines trends and issues surrounding the usage of SDM and application and development of practical and tactical tools. Case studies and examples are used to demonstrate best practices. Students develop a major project where they demonstrate appropriate and professional usage of SDM strategies and tactics in a marketing communication context.

MKTG 1009 AND
COMM 2011

Equivalent Subjects COMM 3016 - Digital and Social Media Communications

Incompatible Subjects LGYA 1699 - Digital and Social Media Communication COMM 3004 - Advertising Digital Media

Restrictions

Successful completion of 80 credit points at Level 1.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate various digital tools, including social media.
2. Develop an informed and theoretically sound digital communication plan/strategy.
3. Apply the concepts and tools required to build and maintain an effective digital communication strategy.
4. Demonstrate the ability to use and analyse digital and social media in the business context.
5. Prepare basic and more complex writing tasks typically required of communication professionals for digital and social media channels.
6. Analyse how digital and social media is used and recommend improvements to real-world issues and problems.
7. Adequately assess the risk involved in developing a digital strategy to address a marketing communication challenge.

Subject Content

Covers the theory and practice of using social/digital media (SDM) for marketing and communication in a variety of business and public agency contexts. Provides an introduction to the areas of strategy, creative writing and media planning for SDM. Examines the trends and issues surrounding the usage of SDM and application and development of practical and tactical tools. Uses case studies and examples to demonstrate best practices. Students develop a major project where they demonstrate appropriate and professional usage of SDM strategies and tactics in a marketing communication context.

COMM 3015 Digital Journalism Production

Credit Points 20

Legacy Code 102057

Coordinator Margot Dunphy (https://directory.westernsydney.edu.au/search/name/Margot Dunphy/)

Description Digital technologies have revolutionised news delivery. Journalists in every area of the profession now require video, audio, online and print skills to work across multiple platforms and contexts. This subject introduces students to multiplatform digital journalism and the ways in which multiple media can be used to tell stories for a range of contexts.Students develop their own blog site, that is populated using digital devices for working with video, audio and text to engage with a range of social media storytelling modes to extend stories across multiple media contexts. Based on an understanding of ethical and informed journalism practices, students are encouraged to develop their own voice as an independent thinker and writer into the public domain of online publishing.

Equivalent Subjects COMM 3036 - Television Journalism COMM 3030 - Radio Journalism

Restrictions

Successful completion of 80 credit points and at least 20 credit points from COMM 2027 News Reporting, COMM 2017 Feature Writing, COMM 2022 Journalism Research & Investigation, COMM 2029 Photo Journalism, PERF 1009 Introduction to Sound Technologies, DESN 2014 Researching the Visual, PERF 1019 Sound Synthesis and the Sound Environment or DESN 1021 Web and Time Based Design.

Assumed Knowledge

Basics of news writing for broadcast media and news gathering. Knowledge of legal issues affecting journalism and Journalism Ethics.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate practical skills in newsgathering, research and production
2. Use digital audio and video devices to record material appropriate for news stories
3. Use desktop editing systems and blog templates to assemble basic audio and video stories
4. Explain the legal and ethical issues relevant to digital journalism
5. Work in teams and individually.
6. Critically analyse multi-media journalism
7. Adequately assess the risk involved in professional production projects.

Subject Content

1. Video and audio news and current affairs
2. Finding stories
3. Scripting, narrating and constructing audio and video news stories
4. Use of digital video and audio capture equipment and desktop editing
5. Online and social media delivery of news material
6. The social role of digital journalism

Assessment

Restrictions

Successful completion of 120 credit points of study in the currently enrolled program and a minimum of 40 credit points from the Advertising, Journalism, Public Relations or Media Arts Production majors. NOTE: These restrictions do not apply to programs 1655 Bachelor of Arts (Dean's Scholars), 1692 Bachelor of Arts (Interpreting and Translation) Dean's Scholars, 1739 Bachelor of International Studies (Dean's Scholars), 1822 Bachelor of Arts (Pathway to Teaching Primary) Dean's Scholars and 1823 Bachelor of Arts (Pathway to Teaching Secondary) Dean's Scholars. Students who have enrolled in the sub-major SM1125 Advertising Studies must have successfully completed all 40 credit points of this sub-major prior to enrolling in this subject. Sydney City Campus students are required to obtain written approval from the program Contact (details below) prior to enrolling in this subject.

Assumed Knowledge

Students are expected to have thorough knowledge of professional skills required in their field of study, commensurate with those required to participate in a workplace.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate and apply integrated discipline (possibly including technical) knowledge across a relevant academic specialisation in a workplace context with depth in one or more core business disciplines
2. Apply technical and technological skills appropriate and effective for communication purposes and contexts
3. Investigate professional issues and situations through the effective analysis, evaluation and synthesis of theory and practice
4. Exercise independent judgment and initiative in adapting and applying knowledge and skills for effective planning, problem solving and decision making in diverse contexts

Subject Content

- The subject is designed for students in their third year of study (or part time equivalent). In addition to the following points, prospective students must apply for entry to their area supervisor.
- It is The responsibility of students to nominate suitable workplaces. students must provide adequate details of The placement they have been able to organise. students will be expected to play An active role in organising their own placement, either directly to workplaces or through The Western Sydney university placement Service. While, on occasion, academic staff may be able to help find A placement through contacts with employers, as well as offers from employers seeking students, students should not rely on anyone but themselves to arrange A suitable work placement.
Students will need to
1. find a suitable placement
2. discuss their choice with the program coordinator (phone or email will be acceptable)
3. complete the workplace agreement form

COMM 3022 Media Memory

Credit Points 10

Legacy Code 101931

Coordinator Adam Daniel (https://directory.westernsydney.edu.au/search/name/Adam Daniel/)

Description Media memory is now a critical field of study in journalism, advertising, visual communication and media. The media builds local, national and transnational identities through the representation of the past. Media industries such as advertising rely upon collective memories to design campaigns in order to reach particular audiences. Journalists increasingly 'assemble' stories from digital archives, recombining similar or related events from the past to build stories and features of the present. Individuals increasingly contribute to news events through their own 'witnessing' of events, capturing and sharing material using mobile and social media. This subject addresses these processes by providing a brief history and overview of approaches to thinking about media and memory, in the context of the significance of media convergence and digital memory within contemporary media ecologies. The subject provides students with a series of case studies that approach the memory of particular events, drawing on examples from advertising, public relations, visual communication, animation, film, broadcasting and journalism. Students develop a media research project that engages with the material presented in the subject.

Level Undergraduate Level 3 subject

Equivalent Subjects COMM 3031 - Researching Media Audiences

Restrictions Successful completion of 80 credit points at Level 1

Assumed Knowledge

Knowledge gained from completion of Bachelor of Communication Years 2 and 3 major subjects.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse and evaluate different conceptualizations of media memory
2. Assess and critique the variety of contexts and frameworks that can be used to understand the complexities of the relationships between media environments and consumers
3. Examine the variety of methods for researching media memory and identify their use in a major project

Subject Content

1. A brief historical overview of approaches to thinking about media and memory
2. The significance of media convergence and digital memory within contemporary media ecologies
3. The complex relationships between media and memory, consumers and audiences generally
4. A series of four themes that engage with media memory to provide a focus for the major project. The major project can be developed in any one of the communication specialisations.

Assessment

COMM 3024 Modernity and Cinema

Credit Points 10

Legacy Code 101001

Coordinator Shane Hersey (https://directory.westernsydney.edu.au/search/name/Shane Hersey/)

Description This subject will engage with the question of how social and aesthetic issues interact in films by examining specific questions which are related to cinema history. Issues of identity will be used to focus upon the ways in which historical contexts interrelate with artistic practice. The subject will consider the process of creating emotions, the consideration of techniques of production and the manipulation of cinema language, the use of narrative or non-narrative form to convey the sense of reality, (or the unreal, the uncertain).

School Humanities & Comm Arts

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Equivalent Subjects LGYC 1620 - Modernity and Cinema

Restrictions

Successful completion of 60 credit points

Learning Outcomes

On successful completion of this subject, students should be able to:

1. engage with social and aesthetic issues in film;
2. identify issues of identity in film, in particular in relation to the historical context;
3. identify areas of affect as an outcome of film making techniques; and
4. analyse methods of production and techniques of filmmaking as a mode of story-telling.

Subject Content

Content will draw from, or elaborate upon, a number of the following topics:
- Introduction to aesthetic questions: film and art

- The relation of (psychological and physical) landscape to modernity in British and American film.
- Arthouse films: cinema of ideas
- The movement from modernity to postmodernity
- Issues of identity.

COMM 3025 News Teams

Credit Points 10

Legacy Code 102063

Coordinator Nadya El Gawley (https://directory.westernsydney.edu.au/search/name/Nadya El Gawley/)

Description This subject introduces students to the concept surrounding the editorial team process and the culture of the newsroom across all news media. It explores the social and organisational context of news production in commercial, public or community news organisations. It draws upon theory from communication, sociology, psychology, and management to provide a broad understanding of the principles and practices of effective and creative news teams. It critically analyses the structures, processes and techniques of news gathering to enable quality team outcomes. The subject encourages collaborative working relationships and develops students' own practice in a team.

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Equivalent Subjects COMM 3026 - News Teams and Newsroom Cultures

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Work in a news team to produce work for a range of media and understand news team processes, structures and management in a critical and experiential way
2. Apply appropriate principles and techniques to the editorial team process in a news production exercise
3. Outline their own ideas about news team management, and being part of a news team
4. Apply a critical perspective to the impact of newsroom organisation on the dominant news values expressed in the news product
5. Construct or model their work (stories) for specific news organisations and understand the organisational context in which news teams operate
6. Negotiate and function effectively as a team member.

Subject Content

1. The subject introduces students to the concepts surrounding the editorial team process and the culture of the newsroom across all news media.
2. It explores the social and organisational context of news production in commercial, public or community news organisations.
3. The subject critically analyses the structures, processes and techniques of newsgathering
4. It will encourage collaborative working relationships and develop the students own practice as team leaders, managers and members.

COMM 3035 TV Production 2

Credit Points 10

Legacy Code 102409

Coordinator Maryella Hatfield (https://directory.westernsydney.edu.au/search/name/Maryella Hatfield/)

Description In 2023, this subject replaced by 102834 - Screen Media: Capstone Production. Television Production 2 is a practical and vocational subject that provides students with a range of advanced skills for working in the television production and broadcast sector. The course encourages multiplatform conceptualisation and distribution

of projects exploring the futures of television in online, mobile and networked environments. Students build on their knowledge and experience from TV Production 1 across a range of roles including project planning, scriptwriting and research, filming, sound recording, video editing, and post production. Working in small teams students develop and produce a TV series with professional production values for broadcast through public media contexts.

School Humanities & Comm Arts

Discipline Audio Visual Studies

Student Contribution Band HECS Band 4 10cp

Co-requisite(s) COMM 2036

Equivalent Subjects COMM 3021 - Media Arts Workshop COMM 3038 - Video Project COMM 3033 - TV Production COMM 3050 - Screen Media Capstone Production

Restrictions Students commencing mid-year may study this subject concurrently with 102407 Screen and Sound Practices 2.

Assumed Knowledge

Knowledge gained from completion of year 1 subject, Foundations of Media Arts and Production.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate a range of skills for working in the television production and broadcast sector.
2. Demonstrate a working knowledge and experience within a range of roles that exist within the sector and gain practical experience in filming, sound recording, video editing, postproduction, planning, scriptwriting and research.
3. Apply skills to produce television projects with professional production values.
4. Work in groups and individually while exploring a wide range of interconnected disciplines.
5. Engage with community partners and events in Greater Western Sydney and make programs with a focus on community building.
6. Adequately assess the risk involved in professional production projects.

Subject Content

Module 1: TV Series Proposal ? Planning, scripting, and producing a television series proposal and treatment for a series targeted to a specific audience.
Module 2: Series Post Production and Distribution ? Post-production and Distribution ? Broadcast requirements and conventions ? Graphics and titles ? Advanced editing and sound mixing ? Distributing television programmes ? Online distribution.
Module 3: Development and Production of a 30 second TV Commercial.

Assessment

Reflective Report (Individual work)	1000 words approx	30	N	Individual

COMM 3037 Transmedia Production

Credit Points 10

Legacy Code 101939

Coordinator Ming Diao (https://directory.westernsydney.edu.au/search/name/Ming Diao/)

Description In 2023, this subject replaced by COMM 3049 - Screen Media: Capstone Development. Video is now delivered across multiple platforms and spaces, both online and offline via mobile networks; through festivals, public spaces and galleries and across social network sites. At the same time video productions are increasingly designed to be Transmedia where different platforms are strategically used to extend and add new layers to stories while deepening audience interaction and engagement. Students will learn about 360 degree storytelling as strategic communications. Students will develop a professional transmedia project proposal for a service, product or system that works across multiple platforms, engaging with audiences through social network sites. Students will explore how content can be meaningfully embedded and linked across multiple platforms to engage target audiences.

COMM 3015 OR
DESN 2010 OR
COMM 2018 OR
COMM 2018 OR

COMM 2034 OR
COMM 2042

Equivalent Subjects COMM 3021 - Media Arts Workshop COMM 3049 - Screen Media Capstone Development

Assumed Knowledge

Knowledge gained from completion of Bachelor of Communication Major year 1 subject (Foundations of Media Arts and Production).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate a sound understanding of Transmedia production processes and techniques including 360 degree storytelling, creating video for the web and engaging with audiences through social network sites.
2. Demonstrate knowledge of a diverse range of Transmedia productions and the ability to analyse why these productions were or were not successful in achieving their goals.
3. Work in a production team to design and implement a Transmedia production.
4. Demonstrate knowledge of digital tools for tracking content flows across platforms as well as tools for audience engagement and experience in using selected tools.
5. Adequately assess the risk involved in professional production projects.

Subject Content

Module 1: Introduction to Transmedia production: explored through historical and current case studies. Here we will examine productions with a social, cultural and commercial focus and we will analyse their goals, aesthetic design, use of platforms, production practices and success. (3 classes)
Module 2: Designing a Transmedia production: working from a series of scenarios or from their own production proposals (these may have been developed prior to this subject), students will design a socially, culturally or commercially orientated Transmedia production. (3 classes)
Module 3: Transmedia production: Training in the use of Transmedia production tools, including web-based video tools and social network sites. Students will receive project-based mentoring from relevant tutors/lecturers. (4 classes)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Transmedia case study analysis	Group presentation 10-12 mins; Written component 250-500 words	20	N	Group
Transmedia production proposal draft - synopsis	Group presentation 10-12 mins; Written proposal - up to 1,000 words	20	N	Group
Transmedia production proposal draft 2 - including Audio-visual Production Plan	Group presentation 10-12 mins; Written proposal - up to 1,000 words	30	N	Group
Transmedia production proposal final. Critique of group project Audio-visual production final	Group class presentation 10-12 mins; Written components - up to 2,000 words; Audio-visual production 1-3 mins	30	N	Group

COMM 3041 Writing For Performance

Credit Points 10

Legacy Code 100895

Coordinator Sabrina Achilles (https://directory.westernsydney.edu.au/search/name/Sabrina Achilles/)

Description In this subject students will consider the history and theory of a selection of performance traditions including Greek tragedy, Elizabethan and Jacobean and modern drama and post-modern performance and write scripts for one or a number of media, including screen (film and television), dramatic theatre, performance poetry and song lyrics and contemporary performance.

School Humanities & Comm Arts

Discipline Written Communication

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Equivalent Subjects LGYB 4928 - Writing for Performance LGYA 0302 - Writing for Screen and Stage

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. critique performance, both experientially and experimentally;
2. demonstrate an understanding of a range of performance genres, styles and traditions

3. create performance texts; and
4. collaborate in and critically explore the process of developing scripts for stage and/or screen and or environment.

Subject Content

Content will draw from, or elaborate upon, a number of the following topics:
- Dramatic styles, including Aristotelian poetics, psychological drama (Bergson), Jacobean theatre (Greenaway), non-bourgeois theatre (Brecht).
- contemporary lyrics, rap, performance poetry.
- Postmodern aesthetics and performance.
- Feminism and The politics of representation.
- The politics of media institutions.
- Theories of the author/auteur (Allen, Luhrmann, Greenaway, Fassbinder).
- Voice and the performance text; writing for radio and video.
- Displacement of the stage as site of performance; text as performer/performing image; audience as performer, life as performance
- Technology in performance and as extended body.
- Theatrical traditions critiqued, including environmental theatre, Living Theatre, Grotowski's Poor Theatre, political theatre, guerilla theatre, ritual.

Prescribed Texts

- A book of primary readings prepared by the subject coordinator.

COMM 3042 Writing Poetry

Credit Points 10

Legacy Code 101011

Coordinator Kate Fagan (https://directory.westernsydney.edu.au/search/name/Kate Fagan/)

Description What does a poem look or sound like today? In this subject students examine poetic forms, styles and techniques from various cultures of the 20th and 21st centuries. Students are taught to analyse and write poetry via a series of guided workshop exercises. They learn that writing poetry also involves becoming a skilled reader of and about poetry. Students enrich their knowledge and love of poems by scrutinising a range of poetic types and methods including imagism, metaphor, free verse, humour, spoken word traditions, song-writing, ecological poetries, and visual and digital poetries. No previous experience in poetry writing is necessary.

School Humanities & Comm Arts

Discipline Written Communication

COMM 3043 Writing Portfolio

Credit Points 10

Legacy Code 100582

Coordinator Mette Jakobsen (https://directory.westernsydney.edu.au/search/name/Mette Jakobsen/)

Description In this level 3 foundation subject of the Creative Writing Major, students are guided by experienced, professional writers in producing an extended portfolio of original creative writing, in a genre (or genres) of their choice. Students will read closely from a wide range of literary texts while completing an intensive program of in-class

writing and workshopping activities. They will gain skills in reading and interpreting texts from different genres, eras and contexts - including culturally diverse settings. Students will develop skills in drafting, editing and polishing their own creative work, and in situating their writing within the Australian literary and publishing industries.

School Humanities & Comm Arts

Discipline Written Communication

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply key techniques and concepts of creative writing.
2. Write short creative works (or series of works) using a range of techniques, styles and/or forms.
3. Develop drafting and editing processes to write more effective creative works.
4. Demonstrate a critical understanding of key creative writing concepts.
5. Identify ways in which different cultural contexts can shape and influence creative writing.

Subject Content

Content will draw from, or elaborate upon, a selection of the following topics:
Close reading of contemporary literary texts from different genres, eras and contexts (including culturally diverse settings)
Close reading of critical literary texts (including book reviews, critical essays, and texts directed towards developing writing skills)
Practical creative writing skills for use across a range of writing genres (including short fiction, the contemporary novel, poetry and creative non-fiction)
Techniques in drafting, editing and polishing one?fs own creative writing
Ways of situating one?fs own creative writing within the broader Australian literary and publishing industries ? and where appropriate, in international and/or online settings

COMM 3045 Advertising: Campaigns

Credit Points 10

Legacy Code 102730

Coordinator John Greig (https://directory.westernsydney.edu.au/search/name/John Greig/)

Description In this capstone subject students will learn to professionalise key aspects of the advertising management process. The subject provides the opportunity to link and apply theoretical understanding with research, writing, planning, creative development and media, and presentation skills in response to a live client brief provided by a multi-national advertising agency. The 'real world' situation allows students to demonstrate their capacity for problem analysis and to develop appropriate and timely solutions. Students will work within an allocated budget and to realistic industry deadlines to produce a campaign they can include in their portfolio. Assessment tasks will enable students to demonstrate emerging professional capacity and prepare themselves for a communication position, either in an advertising agency, media agency or consultancy.

Level Undergraduate Level 3 subject

Pre-requisite(s) COMM 2011 AND
COMM 2006

Equivalent Subjects LGYA 1057 - Advertising Campaigns COMM 3007 - Communication Campaigns

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the importance of strategy and research in successful advertising campaigns across a range of different approaches and methodologies.
2. Critique advertising campaigns and describe best practice.
3. Undertake relevant research to develop and leverage strategies for campaigns and to develop relevant and strategic insights.
4. Create and present an advertising campaign based on a live agency brief for a real world client.
5. Apply a theoretical grounding in campaign development.

Subject Content

(1) Campaign Practice
Components include
- Research
- Formulating objectives
- Identifying and understanding the target audiences
- Planning strategies and tactics
- Creative development
- Writing and design
- Media planning
- Budgeting
- Meeting timelines and evaluation

(2) Campaign Theory
- Reading and research on campaigns
- Role of digital and traditional media
- Examination of best practice
- Reviewing others?f work
- Self-reflection
- Developing a portfolio
- Application of digital and traditional media
- Planning advertising campaigns in a multidisciplinary, multicultural and multimodal context

COMM 3046 Personal Branding Strategies: Build and Manage Your Career Profile

Credit Points 10

Legacy Code 102780

Coordinator Kristen Marshall (https://directory.westernsydney.edu.au/search/name/Kristen Marshall/)

Description A strong personal brand can open doors to career opportunities, promotions and partnerships in all industries. This subject is essential for anyone who wants to propel their career, build a reputation, capitalise on opportunities and stand out to future employers. Using user-centred theories and approaches, we'll teach you how to create a personal brand aligned to your values and goals in a way that engenders confidence, trust and credibility. You'll learn the

skills to network so you can connect with and leverage the influencers who can accelerate your reputation. How to build and showcase your brand, both online and offline, and how to manage it over time. How to craft short talks and presentations (based on the philosophies and techniques of TED), to inspire your audience to action. This subject is recommended for all students, regardless of discipline.

Level Undergraduate Level 3 subject

Incompatible Subjects COMM 2049 - Personal Branding Strategies Build and Manage Your Career Profile

Restrictions

Successful completion of 80 credit points. Please note that this subject is recommended for all students, regardless of discipline.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse and evaluate key characteristics of strong personal brands.
2. Apply research and communication skills to develop an authentic personal brand.
3. Craft a communications plan to present a clear and consistent message, both online and offline.
4. Create the personal brand components which best demonstrate your brand in your field.
5. Learn how to evaluate and evolve a personal brand over time.

Subject Content

Module 1: Introduction to personal branding
This module introduces the concept of personal branding, and explores its importance in the workplace of the future. We examine strong personal brands in a range of industries, and explore the differences in how those individuals achieve impact.
Module 2: Wayfinding
This module encourages students to explore their goals, beliefs and values concerning work, life and career. Students work through a series of exercises to ideate their future, clarifying what makes them feel fulfilled, engaged and empowered. This is an essential stage in working towards creating an authentic personal brand.
Module 3: Prototyping your brand
This module presents students with ways to create a prototype of their personal brand. Prototyping is an integral part of design thinking, and students will be encouraged to gather information and ?etry out?f a version of a potentially interesting future. Students will collaborate with external mentors in this module.
Module 4: Communicating your brand
This module focuses on the most effective online and offline channels in which to develop a visible presence (for example, websites, blogs, podcasts, social networks, events, presentations). Students will l

COMM 3047 Episodic Screen Media

Credit Points 10

Legacy Code 102831

Coordinator Khoa Tran (https://directory.westernsydney.edu.au/search/name/Khoa Tran/)

Description In this subject students will analyse and develop an episodic narrative production proposal using concepts and production strategies for serialised narrative storytelling for online platforms. Students will be introduced to the University's broadcast television studio and operation. Students will build their knowledge and practical skills in the conceptualisation, planning, editing of serialised online web and streamed digital based narratives. This subject will require students' attendance in workshops delivered in blocks and participation in studio recording.

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) COMM 2052 - Documentary Factual Screen Media OR COMM 2053 - Narrative Fictional Screen Media

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse and evaluate short form episodic and serialised digital media content across platforms
2. Analyse current screen production theory and practice in relation to text based episodic storytelling
3. Interpret and apply pre-production strategies to the conceptualisation and development of techniques to develop a pilot for an episodic narratives designed for a specific media platform
4. Apply knowledge of audio and video production theory, tools and techniques to digital media production
5. Edit video and audio in a digital software environment
6. Create and publish media content for online platforms

Subject Content

Module 1: Introduction to short form episodic and serialised digital media content across platforms and genres including: drama, light entertainment, web serials, radio, pod casting and new forms of content distribution ie: tik tok
Module 2: Analysis of screen production theory and practice in relation to text based episodic storytelling. Development of serialised narratives and narrative devices for audience engagement. Analysis of case studies with focus on format, production bibles, licensing and distribution of content
Module 3: Conceptualising and developing pre-production strategies in the development of a pilot for an episodic narratives designed for a specific media platform. Present pitch.
Module 4. Introduction to University broadcast television studio at Parramatta South. Apply knowledge of audio and video production theory, tools and techniques.
Module 5. In groups or individually film selected pilot and edit video and audio in a digital software environment. Finalise project pitch for submission to industry standards.
Module 6. Create and publish media content for online platforms and portfolio.

Assessment

COMM 3048 Immersive Screen Technologies

Credit Points 10

Legacy Code 102832

Coordinator Roger Dawkins (https://directory.westernsydney.edu.au/search/name/Roger Dawkins/)

Description New technology developments have facilitated the integration and design of immersive technologies to more fully engage audiences with narratives and brands. In this subject, students will study user engagement and visual effects theory and analyse the application of these theories and business models on innovative commercial and creative industries case studies. Students will be introduced to using immersive cross platform technologies and 360 filming. Students will develop a scoping and design template for their own project concept. The project proposal will outline the rationale, using visual design elements and compositing requirements, to build a multi-layered digital experience for a venue, project or brand.

School Humanities & Comm Arts

Discipline Computer Graphics

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse and evaluate a range of immersive technologies and their uses in business and creative industries
2. Explain the rationale for, and the range of, business models evolving in the development of trans media content
3. Analyse current user experience and visual design theories applied to case studies
4. Interpret and apply pre-production strategies to the conceptualisation and development of techniques to develop an immersive project
5. Apply creative scoping and project management to the development of audio and video production projects
6. Create and publish media content for online platforms

Subject Content

1. Production design and strategies for audience engagement

2. Immersive Technology tools and formats (immersive, 360, animated, online interactive, transmedia)

3. Case studies of commercial and innovative project design

4. Practice-base workshop in 360 filming and basic compositing

5. Reflecting on practice and publishing to a personal web portfolio

Assessment

COMM 3049 Screen Media: Capstone Development

Credit Points 10

Legacy Code 102833

Coordinator Wendy Chandler (https://directory.westernsydney.edu.au/search/name/Wendy Chandler/)

Description In this subject students develop a major screen media project which will be produced in the subject Screen Media Capstone Production. The nature of the project may vary depending on students' interests and career aspirations. Projects may range from documentary, drama, episodic, animation, immersive, transmedia, interactive and other hybrid forms. Depending on the nature the project, projects maybe developed individually or in interdisciplinary groups. Projects may be original creative ideas or undertaken in collaboration with an industry and/or community partner.

Level Undergraduate Level 3 subject

Pre-requisite(s) COMM 2052 Documentary Factual Screen Media AND COMM 3053 Narrative Fictional Screen Media

Equivalent Subjects -

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Conduct research and analyse material to inform the creation of a screen media project.
2. Create a comprehensive project proposal document for a screen media project.
3. Produce industry standard planning documents relevant to screen media pre-production theory practices.
4. Explain contemporary business models and distribution platforms in the screen media industry.
5. Consolidate skills and knowledge in their preferred area of interest.
6. Reflect on collaborative work practices and methodologies and the work of self and others.

Subject Content

1. The development, writing and presentation of a major screen media project.
2. Industry standard planning and preproduction workflows.
3. Business skills and changes to distribution platforms in the screen media industry.
4. The refinement of skills and knowledge in a particular crew role or roles of interest.
5. Collaborative work practices and methodologies.
6. Critical refection on the pre-production work of self and others.

Assessment

COMM 3050 Screen Media: Capstone Production

Credit Points 10

Legacy Code 102834

Coordinator Wendy Chandler (https://directory.westernsydney.edu.au/search/name/Wendy Chandler/)

Description In this subject students produce projects that were planned and developed in the previous subject, Screen Media: Capstone Development. This subject provides the opportunity for students to consolidate theoretical knowledge and practise-based skills acquired throughout their course to produce a substantial screen media project. Students may choose to take on a leadership role such as producer or director, or students may choose develop their skills targeted to their own area of interest. This may involve a specific production area or crew role which may be undertaken on more than one project. Students will also produce an online portfolio featuring key achievements made throughout the course, for the purpose of enhancing graduate employment prospects.

COMM 3052 Writing for our Digital Lives

Credit Points 10

Coordinator Milissa Deitz (https://directory.westernsydney.edu.au/search/name/Milissa Deitz/)

Description The ability to critically consume and strategically create a range of digital media is vital to the health of a democratic, civic society. Through both the practice of writing, and the study of writing as a 'designed space', you'll learn techniques that will help you find your voice as a communicator so you can inspire, compel and inform audiences. You will be provided with opportunities to experiment with and study a number of media platforms as you consider how the digital sphere and its associated technologies are shaping and informing the way we read, write and communicate.

School Humanities & Comm Arts

Discipline Written Communication

Student Contribution Band

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) COMM 1044

Restrictions

Must have passed 80cp at Level 1

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Demonstrate English language writing and research skills.
2. Apply a range of theories of writing and storytelling in both critical and creative contexts.
3. Employ a variety of genres and forms of writing and storytelling, particularly in networked environments.
4. Engage in a writing research practice in response to a set topic or brief.
5. Identify the workings of culture within networked media writing practices.
6. Demonstrate an applied understanding of media ethics in networked environments.

Subject Content

1. This Level 3 subject will build mainly on the content of the new Level 1 subject Professional Communication by continuing to interrogate the factors influencing human communication and how language informs the social creation of meaning. It will consider the way both tools and cultural are shaping and informing digital communication. We'll look at how we communicate personally and politically, and consciously and subconsciously in networked environments.
2. By showcasing innovations in media platforms that have renegotiated both the means and the tools for telling and engaging with stories, we will explore how writing spaces have changed (and how they are continuing to change) older models of reading, writing and communications practices. We will look at how the affordances of new media environments invite innovative ways of agitating for change, and how the concept of 'community' can be used to generate public interest.
3. Students will be encouraged to demonstrate a conceptual and applied understanding of how knowledge is constructed and circulated in networked environments; the difference between 'truth' and 'opinion'; and theoretical and applied understandings of the way technologies both encourage and inhibit particular writing, reading and communications practice and cultures.
4. By examining the role of digital cultures in contemporary life and identifying the historical, political, ethical and technological forces of communications - written, oral, digital and visual – students will investigate emerging technologies and how they influence contemporary content practices. For example, we will look at ideas of identity in Australian culture in order to locate personal identity with cultural practices; how national identity is represented and promoted in media; and the overall role of media in the development of identity as important cultural category. By considering the difference between self and identity in networked environments, and the way authority and authenticity is constructed in the formation of the 'digital writing self', students will learn how writing tools not only shape expression but also behaviour, leading to environment-specific patterns of engagement and participation.
5. Students will learn how to:
   Combine research methods including discourse and textual analysis to examine written, spoken and visual texts at various stages of production.
   Present complex narratives to general audiences.
   Continue to develop research and evaluation skills for media storytelling practices.
   Relate concepts, themes and case studies to their own emerging professional interests.

COMM 7001 Adaptive Leadership, Management and Team Work

Credit Points 20

Legacy Code 102519

Coordinator Kate Richards (https://directory.westernsydney.edu.au/search/name/Kate Richards/)

Description The Creative Industries provide opportunities for innovative and integrative working styles and methods, particularly in SMEs and multi-disciplinary collaborations. This industry-facing subject provides an understanding and application of specified theories and methods of leadership, management and collaboration, with a creative, technological and/or entrepreneurial focus. You will devise an individual, semester-long professional development challenge in leadership, management or collaboration and apply your learnings to problem-solve a current professional situation. A supplementary collaborative group project allows you to apply and customise industry roles, techniques and processes in a strategic response to a client brief. You will investigate and analyse one model of leadership, management or collaboration that is found in the creative industries.

School Humanities & Comm Arts

Discipline Communication and Media Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 20cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Implement a professional development challenge in leading, managing or collaborating, supported by journaling or meditation, enhanced by self-reflection and applicable to the student�fs own professional context and development.
2. Apply the principles of leadership, management and collaboration in the creative industries.
3. Discern and qualify your own values and attributes in regards to leading, managing and collaborating.
4. Evaluate and apply appropriate leadership, management and collaboration methods to a group project.
5. Investigate a relevant and specified leadership, management or collaborative method, model or technique.

Subject Content

Overview of specified theories and models of leadership relevant to the Creative Industries.
Management and project management methods, techniques and tools to facilitate creative and technical teams?f best potential and to drive innovation.
Methods for effective and inclusive cross-disciplinary collaboration in the ideation, production, distribution cycle.
A semester-long, student-defined professional development challenge in either leading, managing or collaborating.
Tools for supporting professional development and creativity.
Collaborative group project in which students apply and customise industry roles, techniques and processes in a strategic response to a client brief.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Log/ workbook and presentation	10 entries of 200 words each throughout the semester; 10 minute presentation.	20	N	Individual
Devise and present a team structure, set of management methods and workflows for a creative industries project.	7,000 words, plus diagrams, tools as appropriate.	50	N	Group
Report	2,500 words	30	N	Individual

COMM 7002 Convergent Media Internship

Credit Points 10

Legacy Code 101426

Coordinator Anthony Burrett (https://directory.westernsydney.edu.au/search/name/Anthony Burrett/)

Description This professionally oriented subject consists of a work internship placement with a corporate media or community communications division of an organisation. These agencies may include WSU research centres, educational, community and cultural agencies within Sydney and corporate and professional organisations in Australia or off-shore, as agreed. The focus of the internship is to research and contribute to audience/community liaison and development, and/or to contribute to the cross media production and/or marketing plans of the organisation. During the placement students will develop documentation to capture and manage ideas about professional development, industry trends, professional links, case studies and associated documentation. On completion of the placement students will present a comprehensive report.

School Humanities & Comm Arts

Discipline Communication and Media Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in program 1645/1804 Master of Convergent Media, 1805 Graduate Diploma in Convergent Media, 1646/1806 Graduate Certificate in Convergent Media, 1856 Master of Creative Industries, 1857 Graduate Diploma in Creative Industries or 1858 Graduate Certificate in Creative Industries.

Assumed Knowledge

Broad understanding of convergent media forms and processes. Students need extensive knowledge of the convergent media landscape and local industries to successfully research, prepare and undertake their Internships.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and articulate 2 - 3 areas of new learning within the creative industries context, including the student's professional experience and competency, and present this as a written report
2. Outline the conceptual and content planning stages of a media project in the internship progress updates for the organization.
3. Outline the prototype/pilot stages of a media project in the professional setting.
4. Apply advanced skills in self-directed learning
5. Demonstrate competency in industry research skills such as audience analysis and cross media marketing plans; technical and design development pathways; media content.
6. Apply advanced skills in self-directed learning

Subject Content

- research and approach An appropriate industry organisation/company for An internship placement
- Negotiation of individual learning Contract
- Industry placement - 40 hours minimum
- Development and ongoing population of a wiki, orientated towards professional development, new areas of learning and relevance to student's other courses
- Regular meetings with academic supervisor
- presentation of wiki and Overview of internship experience
- Development and ongoing population of experience, including inventory of tasks; roles in organisation; new learnings; self-reflection on the internship, learnings and future directions.
- presentation of The internship and An Overview of internship experience.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Industry Placement Plan - (2-3 new areas of learning, proposed hosts, CV) and 40 hours industry placement	40 hours	50	N	Individual
Short Answers - Creation and applied use of 8 microblog posts	8 x 250 words	20	N	Individual
Report and Presentation - A summary presentation to the class of a maximum 10 PowerPoint slides and submission of a 1,000 word illustrated report to outline and reflect on the Internship experience	10 PowerPoint slides and 1,000 word Illustrated Report	30	N	Individual

COMM 7003 Foundations of Media Arts Production (PG)

Credit Points 10

Legacy Code 102300

Coordinator Maryella Hatfield (https://directory.westernsydney.edu.au/search/name/Maryella Hatfield/)

Description This subject explores creative and independent media arts practices across moving image, audio and participatory forms, and introduces students to fundamental principles of long-form sound and screen production. The subject maps theoretical and practical connections between the creation and study of images and sound across media formats through an integrated theory/practice programme focused on the processes through which long-form media artefacts are created. Students learn how to analyse and critically evaluate screen media and also to plan and make simple short works of their own. It introduces students to relevant media arts histories and contexts (with a focus on cinema) in addition to a range of technologies, media practices and production techniques.

School Humanities & Comm Arts

Discipline Communication And Media Studies

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an awareness of the processes and practices of screen media arts production and the interdisciplinary and multi-platform nature of screen media arts production
2. Apply creative strategies and technical skills of screen media production in an environment that link them to theories and histories of screen media
3. Demonstrate an ability to critically review a screen media work

4. Make a simple screen media work in small groups work using accessible mobile and online tools and plan a distribution stategy for the work.

Subject Content

MODULE 1 - 1.Visual language and creative camera coverage. This topic will study how a scene is staged for the camera. It will include explorations into camera angles, shot sizes, camera movement, focus, depth of field, speed, lighting, colour, subjective and objective camera, composition and production design. Students will learn how to create storyboards and create shot lists.
2. Sound in Screen Media Production. This topic will explore the relationship between sound and screen media. It would explore how sound is recorded and mixed. It will analyse different components of sound in screen media such as atmospheric sounds and music.
3. Editing in Screen Media Production. This topic will explore the role of editing in Screen Media Production. It will analyse the strategies of editing from the two schools of editing: Continuity Editing and Montage.
MODULE 2 - 4. Critical Responses to Screen Media This topic will explore how screen media has been critically analysed. It will look at the principle arguments of the two main schools: Theory & Post-theory.
MODULE 3 - 5. Project development. This topic will explore how projects in Screen Media move from Idea to the Screen. It will study different models from the Hollywood Studio to crowd sourcing/funding. It will cover preparing briefs and concept documents for clients and potential funders.
MODULE 4 - 6. Project Production and Distribution. Stages of Screen Media Production This topic will explore the different stages of screen media production: Preproduction, Production and Postproduction. It will analyse the different roles involved media production with a focus on the director and producer. Legal issues affecting screen media such as licensing and defamation will be covered.
7. Media Distribution This topic will explore one of the most important issues related to screen media production - how media is distribution in offline and online environments. It will analyse concepts and practices such as 'windows' and peer-to-peer sharing.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Group Presentation	Mastery Task: workshop 1 hour; online quiz 1 hour	0	Y	Group
Creative coverage storyboard exercise	500 words equivalent	30	N	Individual
Review, analysis of film/TV program/ game	1500 words	30	N	Individual
Short Media Presentation	1500 words equivalent plus visual work (maximum of 3 minutes)	40	N	Individual

COMM 7004 In the Realms of the Sensory: Ecologies of Word, Sound and Image

Credit Points 10

Legacy Code 102342

Coordinator Peter Mauch (https://directory.westernsydney.edu.au/search/name/Peter Mauch/)

Description This subject develops an awareness of the cultural, aesthetic and sensory contexts in which the communication, design and creative arts are practiced. It examines approaches to creative practice and the role that creativity and experimentation, as well as collaboration and social creativity, play in the research process. Particular attention is paid to visual, aural, and alphabetic technologies, and the form of augmented virtual realities and artefacts they create. Mimicry, novelty and improvisation, critique and speculation, 'handlability' or tacit knowledge are some of the practices and concepts studied. While the subject is designed for students engaged in creative research, it has relevance for those analysing creative works as part of their research.

School Humanities & Comm Arts

Discipline Communication and Media Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify theories of creative practice relevant to creative work
2. Apply, integrate and extend theoretical perspectives on creative work
3. Use creative practice as a method for the production of novel theoretical perspectives
4. Evaluate the cultural, technological and sensory aspects of creative work
5. Originate novel integrations of theory, research and practice.

Subject Content

- approaches to Creative practice and research
- theories of culture and communication
- Interfaces and affect
- Novelty, mimicry, and improvisation as forms of experimentation and research
- Sensory, virtual and augmented Realities

- Ontological design
- reflective practice
- Immanent listening
- Ontologies of music, voice and sound
- research led practice

COMM 7006 Media Project Production

Credit Points 20

Legacy Code 101745

Coordinator Maryella Hatfield (https://directory.westernsydney.edu.au/search/name/Maryella Hatfield/)

Description This subject offers an individual, or group of, student(s) the opportunity to develop, produce and evaluate a Media Project developed in the Media Project Proposal Subject. The project production will cover implementation and evaluation issues relevant to media products. The final product is intended to be a significant new media project prototype. Individual students can negotiate the project of their choice, but this should be based on the Media Project Proposal (or equivalent) developed in the Spring Semester, or first half of semester if you are a full time student. A 5,000 word report forms part of the assessment.

School Humanities & Comm Arts

Discipline Communication and Media Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 20cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) COMM 7007

Equivalent Subjects LGYA 1411 - Media Production

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Broad understanding of convergent media forms and processes; specific knowledge of project development including concept and design development.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Develop an appropriate and detailed project production plan in relation to their proposal brief, including management of content, design and human resource components and applicable timelines.
2. Research and develop stages of the production of their proposal and apply to their project work.
3. Implement the prototype/pilot stage of a significant media project of marketable quality
4. Work as an effective part of a production team to produce a major project.
5. Demonstrate a high level of professional presentation skills through the pitch of the final project.
6. Evaluate a complex product using appropriately identified and applied evaluation techniques.
7. Apply advanced skills in self-directed learning.

Subject Content

- production planning and management
- Project production
- Product evaluation and user testing
- Product Revision
- Project presentation for peer and expert panel Review

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Major Project and Presentation	30 minutes duration and 12 powerpoint slides. Oral presentation of the convergent media prototype or pilot.	60	N	Individual
Written Report	5,000 words	40	N	Individual

COMM 7008 Media Research Project

Credit Points 20

Legacy Code 102521

Coordinator Kate Richards (https://directory.westernsydney.edu.au/search/name/Kate Richards/)

Description This research-focused subject enables students to develop and produce a major work on a convergent media subject and theme, such as: communications and design theories and practices, data visualisation, content creation for convergent media, and digital humanities. The subject will cover methods for designing and implementing an academic or practice-based research project through workshops and exercises. Students may be introduced to techniques for: differentiating appropriate research methodologies; integrating research techniques into the planning and creation of a research project; field research, action research and research-creation; devising a literature review and constructing a logical argument; and critical reading.

School Humanities & Comm Arts

Discipline Communication and Media Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 20cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Use various research methods and processes.
2. Identify the most suitable approach for a given research problem or question in the field of convergent media.
3. Develop a research question and a subsequent research plan.
4. Conduct research based on the research plan and selected methods.
5. Reflect critically upon research findings.
6. Present research findings and outcomes.

Subject Content

Research methods and processes.
Case studies in convergent media research.
The role of research in convergent media professions.
Establishment of an original research question.
Development of a research plan to include either an academic written essay or practice-based outcome.
Conducting research methods and processes as per research plan.
Presentation of final research outcome.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Research Proposal	1,200-1,500 words	15	N	Individual
Literature Review	10,000-12,000 words	25	N	Individual
a. Research Report OR b. Practical Research Report and Exegesis	a. 10,000-12,000 words OR b. Written exegesis 3,000 words plus practical convergent media project to be negotiated with the unit coordinator	60	N	Individual

COMM 7009 Mobile Media

Credit Points 10

Legacy Code 101743

Coordinator Kate Richards (https://directory.westernsydney.edu.au/search/name/Kate Richards/)

Description The proliferation of the mobile device and the evolution of mobile networks has profoundly changed the social and interpersonal sphere and the global media landscape. This subject combines both theory and practice to engage with Mobile Communications and Society: the cultural, family and interpersonal consequences of mobile communication and its effect on every day life, social cohesion, political and economic activities, social development and change, and Mobile Media: current media production and distribution platforms, practices and trends. This subject includes the production of content for distribution via mobile devices.

School Humanities & Comm Arts

Discipline Communication and Media Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the main theoretical issues associated with the adoption and use of mobile communication
2. Critically evaluate the social consequences of mobile communication
3. Independently identify an interesting research question about mobile communication and society and carry out an empirical or theoretical enquiry.
4. Contextualize mobile media production and distribution within the converged media landscape
5. Describe history of mobile media and the methods of mobile media production and distribution
6. Manage the production and delivery of mobile media content
7. Research, plan and pitch a mobile media project

Subject Content

- Mobile media and Communications introduction
- Mobiles and The personal sphere
- Mobiles and The public sphere: politics, Civil society, activism, social movements, social capital, regulation
- digital Divides: Mobiles for development and social mobility
- Mobile as A Mass medium
- characteristics of The Mobile medium
- content Distribution on Mobiles: types, modes and platforms
- content Standards and Formats for Mobile media production and delivery
- Streaming video/Mobile TV
- Walled Garden Vs Mobile internet
- Mobile Advertising
- Mobile media: business Models & Consumption Trends
- Mobile internet best practices

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Research Report: Mobile Communication and Society	1,500 words	40	N	Individual
Mobile Media Production		20	N	Individual
Mobile Media Campaign Pitch/ Presentation	15 minute powerpoint presentation 10-12 slides, and written report of maximum 1,500 words	40	N	Individual

COMM 7010 New Genres in Research Writing

Credit Points 10

Legacy Code 102662

Coordinator Anna Gibbs (https://directory.westernsydney.edu.au/search/name/Anna Gibbs/)

Description This subject focuses on new, innovative, interdisciplinary genres of writing arising after the putative end of critique and with the rise of non-representational thought. These new writing practices mix genres and meld theoretical, critical and creative modes. Focusing on fictocriticism, creative nonfiction, documentary fiction and the multi-media essay, we explore the experimental ethos and affective and new materialist methodologies to which these forms lend themselves. Students will develop a body of original creative-critical work in any genre through a series of seminars and writing workshops.

School Humanities & Comm Arts

Discipline Written Communication

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically reflect on the new interdisciplinary forms of writing across the Humanities.
2. Explain writing as a research practice.
3. Critically evaluate complex information, perspectives, and theories relevant to new scholarly writing practices.
4. Creatively stage or perform theoretical propositions, methodologies and conclusions through analysis through critical-creative writing strategies.
5. Demonstrate creative and technical skills to bring complex concepts to life in a practical project.
6. Design and execute a substantial research-based project with a high level of autonomy and accountability.

Subject Content

Seminars will address the history and practice of new forms of writing arising across the humanities disciplines, with reference to particular examples. Students will also participate in writing workshops to develop their own projects on the basis of a series of individual and collaborative exercises engaging practically and experientially with the concepts addressed in the unit.
1. Writing, subjectivity and corporeality
2. Reflexivity and intertextuality in new research genres
3. The politics of form: genre, gender, race and ethnicity
4. Hybrid writing and generic mixing
5. Questions of address, authority and authorisation
6. After critique: experimental method
7. Affective and new materialist methodologies

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Short Answer - submission of 2 class exercises	1,000 words	35	N	Individual
Applied project - Critical Creative essay (4,000 words) OR Creative - Critical project plus (1,000 word) critical reflection (3,000 words total)	Essay - 4,000 words Creative project plus reflection 3,000 words	65	N	Individual

COMM 7011 Researching Convergent Media

Credit Points 10

Legacy Code 101962

Coordinator Navin Doloswala (https://directory.westernsydney.edu.au/search/name/Navin Doloswala/)

Description The contemporary creative industries landscape is characterised by the breakdown of traditional media silos and the transformation of media production and consumption practices. Media, marketing and creative professionals are now required to understand and connect with their audiences across multiple media platforms and to undertake diverse research deploying many new methodologies. The aim of this subject is to provide students with an historical, geopolitical and theoretical introduction to research in the creative industries. The case studies and topics covered vary from semester to semester and can include data visualisation, digital ethnography,

digital games, community media, digital arts, activist networks, social media and cross platform projects. Using current media theory, design theories, and research methodologies, students will select, analyse and contextualise case studies.

School Humanities & Comm Arts

Discipline Information Systems, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 1632 - Methods and Case Studies in Convergent Media

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. 1. Identify and articulate the key themes associated with creative industries research and contexts.
2. Explain the main theoretical issues associated with the theory and practice of convergent media through participation in the MCM wiki and written work.
3. Outline the precedents and archaeologies of convergent media and discuss them in relation to their research question.
4. Demonstrate competency in critically evaluating a research question and/or case study and the associated theoretical context.
5. Select and apply appropriate research methodologies to their research question in the case study/ paper assignment.
6. Apply advanced skills in self-directed research and writing to independently identify and articulate an appropriate research question for the case study or paper.
7. Identify and articulate the key themes associated with convergent media concepts, research, and contexts.
8. Explain the main theoretical issues associated with the theory and practice of research for the creative industries.
9. Outline the precedents and archaeologies of the creative industries and discuss them in relation to their research question.
10. Select and apply appropriate research methodologies to their research question in the case study/ paper assignment.
11. Apply advanced skills in self-directed research and writing to independently identify and articulate an appropriate research question for the case study or paper.

Subject Content

Module 1: Understanding Convergent Media precedents and archaeologies
Module 2: Researching Convergent Media design and practice
Module 3: Contextualising Convergent Media within current technological, social and political terrains
Topics covered can include: the cultural logic of convergent media; emerging ecologies and genres; affective experience and embodied cognition; the digital divide, economic development and convergent technologies; broadband futures; new media art; locative media; collective intelligence and social networking.
Understanding precedents and archaeologies in research for the creative industries.
Researching design and practice in the creative industries
Contextualising the creative industries within current technological, social and political terrains
Drawing from creative industries research case studies topics covered in this subject can include: emerging ecologies and genres in the creative industries; affective experience and embodied cognition; the digital divide, economic development and convergent technologies; broadband futures; new media art; locative media; collective intelligence and social networking.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Short Answer	500 words per entry	25	N	Individual
Annotated Bibliography	200 words per text source	25	N	Individual
Essay	Essay: 2500 words Practice-led research: Practice work plus 1200 to 1500 words	50	N	Individual

COMM 7012 Strategic Communication

Credit Points 20

Legacy Code 102292

Coordinator Tanya Notley (https://directory.westernsydney.edu.au/search/name/Tanya Notley/)

Description Local and international industry trends show that strategic communication, particularly including agendas of innovation and ethics, are a growing force in the convergent media landscape. This subject introduces students to both the science and art of strategic communication. It is grounded in an advanced understanding of the complexity of human communication processes and driven by a conviction that systematic research and analysis is required to inform strategic communication responses. This subject is based around a series of assessments that require students to address a real-world business challenge or a social issue in ways that take advantage of convergent media environments.

School Humanities & Comm Arts

Discipline Communication and Media Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 20cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects LGYA 1704 - Strategic Communication

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the importance, historical foundations and current application of strategy in successful communication interventions, and be able to identify a diverse range of approaches and methodologies that can be applied to real world needs or problems.
2. Analyse and critique communication strategies embedded within government, corporate, and third sector interventions.
3. Establish criteria for evaluation of strategic convergent media interventions.
4. Undertake relevant research to develop and leverage strategies for 'real world' convergent media interventions; show experience in the use of research to apply theory and modelling to develop effective strategic communication responses.
5. Think critically and creatively to articulate a strategic vision that is based on evidence and driven by theory.
6. Consolidate research findings into a strategic brief/pitch presentation and a final strategic response document.

Subject Content

This subject is delivered in 3 modules:
Module 1: Introduction to strategic thinking and design. This module focuses on the origins and principles of strategic thinking and practice. Through historical case studies (largely from political and commercial domains), students will consider the way that underlying principle informs the formation and development of enlightened strategy. (3 weeks)
Module 2: The science of strategic communication. This module focuses on the gathering and interpretation of empirical and non-empirical data, with an emphasis on data as a key driver of insightful strategy formation. By working with real-life problems students will learn to source and analyse relevant data so as to see and understand a specific environment in ways that inform a strategic response. (4 weeks)
Module 3: The art of strategic communication. By working with the analysis undertaken in Module 2, students will learn to test, critique, and apply relevant models and theories to their analysis in order to design a strategic response to a real-life problem. This application will be used to design a strategic narrative intervention informed by research and driven by theory. (5 weeks).

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Strategic Communication Review. Students analyse and present two strategic communication initiatives	5 minute in class presentation	10	N	Individual
Project Proposal. Students identify a problem or need and propose a research plan and potential models and theories they will investigate to develop a strategic response	5-10 minute in-class presentation and 1,000 word proposal	15	N	Individual
Progress Reports. Students will receive one-on-one mentorship throughout this unit. Students' preparedness for meetings will be assessed	2 x meetings assessed on preparedness and responses	15	N	Individual
Student Response. Students will design a strategic response that is based on their research and analysis	5-10 minute in-class presentation and a 4,000 word proposal OR production of design/ media prototype with a 1,000 word report	60	N	Individual

COMM 7013 Ideate, Develop: Makerspace 1

Credit Points 10

Legacy Code 102717

Coordinator Kate Richards (https://directory.westernsydney.edu.au/search/name/Kate Richards/)

Description Ideation is at the core of creative industries. This practice-led research subject will teach you how to ideate, develop and pitch a major project, which you can then produce in the Makerspace 2 subject. We will show you how to mobilise your own creative interests, how to identify and research a creative or market challenge, and teach you techniques for generating ideas and innovative solutions-based responses. You'll learn systemic methods and tools for creative ideation across multiple platforms and channels, including UX (user experience), UI (user interactivity), design thinking, IA (information architecture) and UCD (user centred design). We'll also teach you how to pitch your project so it captures the imagination and attention of clients and audiences.

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects COMM 7007 - Media Project Proposal

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Broad understanding of convergent media forms and processes.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply design practice and processes through using research methods in creative industries for the development of a creative industries project proposal.
2. Define and implement appropriate research methodologies for the background, technical design and creative processes involved in the ideation and development of a creative industries project proposal.
3. Identify, critique and evaluate precedent creative industries projects that promote effective communication, interaction, and user experiences through precedent appraisals within the project proposal document.
4. Apply a balanced approach for the design, testing and refinement of the strategy in the project proposal document and in planning for the production of a proof of concept or final project.
5. Demonstrate high level of professional presentation skills through pitching the project proposal stages.

Subject Content

1. The roles of ideation and creative development in creative industries projects and business models.
2. Methodologies and methods for identifying and applying ideation and creative developments methods to a core concept.
3. Choosing an appropriate and viable platform/channel.
4.The roles and methodologies of background, precedent and audience research.
5. User centred design strategies for creative and audience development, including branding, UX and IA.
6. Introduction to business models and understanding of their application.
7. Skillset for proposing a creative industries project including structure, writing and illustration.
8. Scoping and planning for pilot/proof of concept, and associated documentation artefacts.
9. Presentation skills for peer, teacher and industry review.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Proposal 1	1000 words	20	N	Individual
Presentation	10 slides and 10 minutes	10	N	Individual
Proposal 2	1000 words	20	N	Individual
Presentation	10 slides and 10 minutes	10	N	Individual
Final Proposal	1500 words	30	N	Individual
Presentation	10 – 15 slides and 15 minutes	10	N	Individual

COMM 7014 Innovate: The Entrepreneurial Mindset

Credit Points 10

Legacy Code 102719

Coordinator Kate Richards (https://directory.westernsydney.edu.au/search/name/Kate Richards/)

Description This subject focuses on current trends and issues in innovation and entrepreneurship in the creative industries with a strong focus on small to media enterprises (SME), ventures within existing business and within government. The subject addresses methodologies for innovation, such as design-thinking and futuring; the role and efficacy of public and private incubators; the forms, foundations, qualities and capacity of entrepreneurship and business development strategies; and the role of networking and industry partnerships, with a focus on the capacities of social media to effect change in markets and partnerships, and business development strategies.. The subject covers existing 'new' business models and emerging trends, such as social entrepreneurship and co-working spaces. The subject builds on previous capstone subjects Ideate, Develop: Makerspace 1 and Produce, Generate: Makerspace 2 in introducing further methods for creative ideation with a focus on technology.

Incompatible Subjects COMM 7005 - Innovation and Entrepreneurship PG

Restrictions

Students must be enrolled in a postgraduate program. Any postgraduate coursework students in the second year of study are encouraged to elect into this unit, for example from ICT, Computer Science, Business Studies, MBA, Advertising etc.

Assumed Knowledge

A general understanding of capitalism as an economic model; general understanding of how creative industries develop original IP into goods and services.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine specified methods for identifying innovation potential and relevant theories of entrepreneurship and entrepreneurialism.
2. Discern and critically evaluate trends and models in an innovation and entrepreneurship case study.
3. Contextualise creative industries projects within models of entrepreneurship.
4. Apply business development skills to a creative industries business plan.
5. Identify and apply the key drivers for fuelling innovation in the entrepreneurial eco-system.

Subject Content

1. Innovation as methodology and method.
2. Current trends such as creative economies, creative precincts and co-working.
3. Complexity theory and design thinking for innovation.
4. The 21st Century relationships between innovation and Entrepreneurship.
5. Theories and models of entrepreneurship.
6. Business development skills: planning, mectrics, B2B, information requirements.
7. Roles of social media and digital marketing in innovation and entrepreneurship.

Innovation as methodology and method.
Current trends such as creative economies, creative precincts and co-working.
Complexity theory and design thinking for innovation.
The 21st Century relationships between innovation and Entrepreneurship.
Theories and models of entrepreneurship.
Business development skills: planning, mectrics, B2B, information requirements.
Roles of social media and digital marketing in innovation and entrepreneurship.

COMM 7015 Key Concepts in Communication and Media Research

Credit Points 10

Coordinator Tanya Notley (https://directory.westernsydney.edu.au/search/name/Tanya Notley/)

Description Mobile and networked media technologies have massively transformed how we work, learn, interact and play. Given this transformation, media and communication is now a vital area of research in every field and discipline. In this subject, you will be introduced to classic and contemporary media and communication technologies, texts and scholars as you explore historical and still unfolding developments and events. In doing so, you will consider how changes to media technologies, industries and practices impact upon – and are influenced by – people, cultures and economies. As you expand your knowledge of existing scholarship, you will learn how to identify and integrate the concepts, theories, methods and ethical frameworks that are most appropriate for your own thesis project.

School Humanities & Comm Arts

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects CULT 7002 Engaging Discursive Fields

Restrictions

Students must be enrolled in a postgraduate degree program.

Learning Outcomes

1. Identify and discuss a broad range of communication and media technologies, industries, cultures and practices and contextualise these within the relevant scholarship;
2. Articulate key concepts, approaches and methods used within the field of media and communication research;
3. Demonstrate an awareness of contemporary communication challenges, debates and developments;
4. Describe current intellectual trends relevant to leading scholars in your field of research; and
5. Apply advanced skills in the execution of research grounded in the identification of literature relevant to your thesis study.

Subject Content

1. Key concepts and theories in communication and media;

2. Contemporary debates in communication and media;

3. Pivotal developments and events that have shaped media and communication practices;

4. Social media, Civic Engagement and Activism and impacts on Social Justice and Human Rights;

5. Media Trust and Democracy and the Challenges to Truth and Fact;

6. Media, Race and Racism;

7. Media Cultures and Representation;

8. Platform Capitalism;

9. Media Ecologies;

10. Communication and Media Technologies and Practices.

COMP 0001 Introductory Programming (WSTC Prep)

Credit Points 10

Legacy Code 700204

Coordinator Zdenka Misanovic (https://directory.westernsydney.edu.au/search/name/Zdenka Misanovic/)

Description The subject introduces students to computer programming as an essential tool for problem-solving and data analysis in engineering and science. The focus is on using an algorithmic approach to problem solving. Students will learn how to analyse and solve problems by designing an algorithm and implementing it in a high-level programming language. This subject includes extensive practical work and problem-solving activities. It prepares students for the first year subject, Engineering Computing, in the Bachelor programs in Engineering. Students will also be able to use their acquired programming skills to perform calculations, analyse data and create graphs for their projects and reports in other subjects.

School Western Sydney The College

Discipline Programming

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 0 Preparatory subject

Equivalent Subjects COMP 0002 - Introductory Programming (UWSC)

Restrictions Students must be enrolled at Western Sydney University, The College.

Assumed Knowledge

The ability to create a mathematical expression for a given problem scenario. This would require knowledge of basic arithmetic, percentages and simple statistical measures.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply basic programming control structures (sequence, selection, iteration)
2. Apply algorithmic approaches to design solutions to simple problems in engineering (using a flowchart or pseudocode)
3. Create simple computer programs based on student fs algorithmic solutions
4. Demonstrate skills in documenting, debugging and testing computer programs
5. Create structured programs and programs for analysis of large data sets

Subject Content

1.Introduction to programming (Weeks 1 & 2)
a.Introduction to problem solving
b.Introduction to programming design
c.Introduction to editing, building and testing.
2.Independent Programming (Weeks 3, 4 and 5)
a.Introduction to modularised algorithmic problem solving and robustness
b.Introduction to modularised algorithmic programming design
c.Intermediate editing, building and robustness testing
3.Engineering Data Analysis (Weeks 6, 7, 8 and 9)
a.Algorithms for acquiring and checking data
b.Algorithms for processing data
c.Algorithms for graphical and statistical analysis
d.Testing and verifying programs for data analysis
4.Advanced Programming design (Week 10 & 11)
a.Factorisation of code
1.Introduction to programming (Weeks 1 & 2)
a.Introduction to problem solving
b.Introduction to programming design
c.Introduction to editing, building and testing.
2.Independent Programming (Weeks 3, 4 and 5)
a.Introduction to modularised algorithmic problem solving and robustness
b.Introduction to modularised algorithmic programming design
c.Intermediate editing, building and robustness testing
3.Engineering Data Analysis (Weeks 6, 7, 8 and 9)
a.Algorithms for acquiring and checking data
b.Algorithms for processing data
c.Algorithms for graphical and statistical analysis
d.Testing and verifying programs for data analysis
4.Advanced Programming design (Week 10 & 11)
a.Factorisation of code

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are

regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Practical	30 Minutes	5	N	Individual
Practical	30 Minutes	10	N	Individual
Practical	Approximately up to 100 lines of code	10	N	Group
Practical	30 Minutes	15	N	Individual
Applied Project	Approx. up to 300 lines of code	20	N	Individual
End-of-session Exam	2 hours	40	N	Individual

Level Undergraduate Level 0 Preparatory subject

Equivalent Subjects LGYB 0451 - Programming Design (UWSCDip) COMP 0004 - Programming Design (UWSC)

Restrictions Students must be enrolled at Western Sydney University, The College.

Assumed Knowledge

The ability to create a mathematical expression for a given problem scenario. This would require knowledge of basic arithmetic, percentages and simple statistical measures.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe what is meant by the terms programming and structured programming.
2. Describe the steps involved in the program development process in solving problems.
3. Illustrate the steps involved in program development using IPO charts.
4. Explain what is meant by the term programming language.
5. Design an algorithm that applies structured programming techniques to solve a given problem.
6. Develop a set of input test data and deskcheck pseudocode.
7. Describe what is meant by modularisation, module cohesion and coupling and parameter passing with different aspects of cohesion and coupling.

8. Design and implement a program solution using an Integrated Development Environment.

Subject Content

1. Introduction to program design
2. Introduction to IPO charts flow charts and pseudocode algorithms
3. Introduction to selection control structures
4. Introduction to repetition control structures
5. Introduction to desk checking the solution algorithm
6. Introduction to modularisation, cohesion and coupling

COMP 1001 3D Modelling Fundamentals

Credit Points 10

Legacy Code 301164

Coordinator Tomas Trescak (https://directory.westernsydney.edu.au/search/name/Tomas Trescak/)

Description This subject will introduce the fundamentals of 3D surface modelling. Students will learn the theory of 3D surface modelling and will gain practical skills in creating 3D assets using a popular software package from Autodesk. They will also learn how to design characters and how to integrate their assets with a purpose of producing complex 3D scenes and animated movies. This subject is aimed at students who have no prior knowledge of 3D modelling and are not familiar with associated software packages.

School Computer, Data & Math Sciences

Discipline Computer Graphics

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Design 3D models
2. Review and implement the key principles of various 3D surface modelling techniques
3. Design, render and animate visual scenes

4. Develop transferable conceptual skills in relation to modelling 3D content and animations.

Subject Content

3D Surface Modelling (LowPoly and HighPoly/ Sculpting)
Texturing and Shading
Rigging and Animation
Simulation and Effects
Lighting and Rendering

Assessment

COMP 1002 Advanced Computer Science Activities 1

Credit Points 0

Legacy Code 300586

Coordinator Yun Bai (https://directory.westernsydney.edu.au/search/name/Yun Bai/)

Description This subject is only for Bachelor of Computer Science (Advanced) students in year one of their studies. Students will participate in industry and research based extension activities (non-assessable). These activities will be identified with the goal of exposing students early in their degree and integrating them into a culture of academic enquiry, problem solving, knowledge generation and scholarship and an awareness of the challenges and current issues confronting the computing/IT industry. The subject will be used to record student activities and a satisfactory/ unsatisfactory grade will be applied at the end of each semester.

Level Undergraduate Level 1 subject

Equivalent Subjects COMP 1004 - Fundamentals of Programming LGYA 5799 - Programming Principles 1 LGYA 4364 - Business Application Development 1 COMP 1006 - Programming Fundamentals (WSTC)

Assumed Knowledge

High school mathematics at Year 10 level.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. With a chosen programming language in mind , analyse a given problem and from a simple problem description, identify desired

inputs, outputs, and the necessary processing operations to convert input into output;
2. Develop an algorithm that applies structured programming techniques that solve the given problem;
3. Choose suitable data types to store relevant data for the given problem;
4. Design and code programs which use standard programming concepts: variables, sequence, loops, decision making constructs, mathematical and boolean operators, as well as functions;
5. Apply top-down modular design principles to programming problems and implement the solution using the chosen programming language.

Subject Content

1. Fundamentals of procedural programming including: a. variables and data types; b. performing calculations; c. sequence; d. compound statements; e. decision making constructs; f. looping constructs; g. problem solving techniques; h. writing and using functions; i. one dimensional arrays
2. Keyboard input
3. Techniques of algorithm development
4. Using variables - selecting variable names and variable scope
5. Functions, function return values and parameter passing
6. Arrays

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	15 minutes	S/U	Y	Individual
Portfolio	2 hours per week	40	Y	Individual
Quiz	60 minutes	20	N	Individual
Applied Project	The solution file is expected to be approximately 500-700 lines of code.	20	N	Individual
Final Exam	2 hours, closed book	20	Y	Individual

WSU Online Trimesters

2.Keyboard input
3.Techniques of algorithm development
4.Using variables ? selecting variable names and variable scope
5.Functions, function return values and parameter passing
6.Arrays

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Portfolio	2 x 400 words	20	N	Individual
Presentation	7-10 Minutes	20	N	Individual
Professional Task	800 words	30	N	Individual
Applied Project	1000 words (equivalent to 300 lines of code)	30	N	Individual

COMP 1013 Analytics Programming

Credit Points 10

Legacy Code 301487

Coordinator Rosalind Wang (https://directory.westernsydney.edu.au/search/name/Rosalind Wang/)

Description This subject covers the use of computers and computer programming for Data Science. After briefly considering spreadsheet systems, the subject will consider programming in the statistical system "R" in depth. Finally, other special purpose languages will be touched briefly (eg. SQL).

School Computer, Data & Math Sciences

Discipline Computer Science

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Assumed Knowledge

Familiarity with computer software programs such as Excel.

Learning Outcomes

1.Familiarity with computer software programs such as Excel.
2.Manage and manipulate data using R and R-Studio; including reading and writing data files
3.Write R programs to conduct Data Science tasks
4.Use basic SQL to manage and manipulate data
5.Apply Simulation techniques to Data Science tasks
6.Write reports using Markdown and R-Markdown

Subject Content

1. Introduction to R and R-Studio
2. Data Types, Variables and Expressions
3. Input and Output
4. Control Structures: Loops and Conditional Expressions
5. Writing Functions
6. Simulation techniques
7. Introduction to SQL
8. Using Markdown for reporting

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	5x 30 min	20	N	Individual
Final Exam	10-15 min oral exam or 1 hour written exam	40	Y	Individual
Applied Project	3 weeks/ approx. 2000 words	40	N	Individual

COMP 1014 Thinking About Data

Credit Points 10

Legacy Code 301488

Coordinator Nasser Ghadiri Modarres (https://directory.westernsydney.edu.au/search/name/Nasser Ghadiri Modarres/)

Description This subject covers basic concepts of data centric thinking. The main areas discussed are; Populations and Samples; Sampling concepts; Types of Data; Descriptive Methods; Estimation and Inference; Modelling. The subject takes a computational and nonparametric approach, before briefly discussing theoretical concepts and distribution theory.

COMP 1015 Programming Fundamentals and Algorithmic Design (WSTC)

Credit Points 10

Description As a first subject in computer programming, this subject covers the basics of developing software with an emphasis on procedural programming. You will learn about basic data structures, the concept of algorithms, fundamental programming constructs, common programming language features and functions, program design and good programming style. The entry into programming is made more accessible by pairing a high-level programming language with a highly visual and interactive framework. On successful completion of this subject, you will be able to develop algorithms, design programs and solve programming problems.

School Computer, Data & Math Sciences

Student Contribution Band

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Restrictions

Students must be enrolled in an existing Destination College Diploma program listed below:

- 7188 Diploma in Culture, Society and Justice
- 7189 Diploma in Health Science
- 7190 Diploma in Business
- 7191 Diploma in Information and Communication Technologies
- 7192 Diploma in Building Design and Construction
- 7193 Diploma in Engineering Studies
- 7194 Diploma in Creative Industries and Communications
- 7195 Diploma in Arts
- 7196 Diploma in Science
- 7197 Diploma in Education Studies

Learning Outcomes

1. Analyse a given problem and from a simple problem description, identify desired inputs, outputs and the necessary processing operations to convert input into output and code it.
2. Develop an algorithm that applies structured programming techniques that solve the given problem.
3. Choose suitable data types to store relevant data for the given problem.
4. Design and code programs which use standard programming concepts, variables, sequence, loops, decision-making constructs, functions, and mathematical operators including Boolean logic.
5. Apply top-down modular design principles to programming problems and implement the solution using the chosen programming language.

Subject Content

- Introduction to programming and structured programming concepts.
- Fundamentals of procedural programming including sequence, selection, and iteration.
- Data types, using variables, selecting variable names, and understanding variable scope.
- Compound statements, decision-making constructs, looping constructs, and associated problem-solving techniques.
- Techniques of algorithm development, writing and using functions, return values, and parameter passing.
- Introduction to arrays.

COMP 2001 Advanced Computer Science Activities 2

Credit Points 0

Legacy Code 300587

Coordinator Yun Bai (https://directory.westernsydney.edu.au/search/name/Yun Bai/)

Description This subject is only for Bachelor of Computer Science (Advanced) students in year two of their studies. Students will participate in industry and research based extension activities (non-assessable). These activities will be identified with the goal of exposing students early in their degree and integrating them into a culture of academic enquiry, problem solving, knowledge generation and scholarship and an awareness of the challenges and current issues confronting the computing/IT industry. The subject will be used to record student activities and a satisfactory/ unsatisfactory grade will be applied at the end of each semester.

Assumed Knowledge

Students should be comfortable with high school level of Mathematics and have passed Mathematics 1A. This is required to carry out more advanced projects in the subject.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quizzes x 3	Quiz 1 & 2: 1 to 2 pages of Mathematica codes (5% each) Quiz 3: 2 to 3 pages of Mathematica codes (10%)	20	N	Individual
Applied Project	Part 1: 3 to 5 pages of Mathematica codes and outputs of the codes (15%) Part 2: 4 to 6 pages of Mathematica codes and outputs of the codes (15%)	30	N	Individual
Practical Examination	2 hours	50	Y	Individual

COMP 2004 Computer Networking

Credit Points 10

Legacy Code 300565

Coordinator Nabil Giweli (https://directory.westernsydney.edu.au/search/name/Nabil Giweli/)

Description Computer Networking is an introductory subject in computer systems networking. It covers basic networking technologies, Ethernet fundamentals, ISO OSI model, routing, switching and subnetting, the Internet architecture, networking protocols including TCP/IP, important OSI layer 2 and 3 networking device fundamentals, basic network management and security issues. This subject is also the first of three units, which will prepare students for industry based networking certification (CCNA).

School Computer, Data & Math Sciences

Discipline Networks and Communications

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Equivalent Subjects COMP 2007 - Computer Networking Fundamentals
LGYA 5739 - Applied Data Communications and Networking
COMP 2006 - Computer Networking (WSTC)

Assumed Knowledge

Fundamentals of computer architecture, binary and hexadecimal numbering systems, and programming principles. They should also have a working knowledge of the World Wide Web.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine the fundamental concepts and protocols for computer networking and internetworking.
2. Investigate and analyse the Internet architecture.
3. Analyse the significance of the OSI and TCP/IP models, protocol stacks and their operation in computer networks.
4. Evaluate modern technologies in computer networking.
5. Investigate the functions of important OSI layer 2 and OSI layer 3 networking devices.
6. Assess the management practices and security requirements of computer networks.
7. Construct, test and troubleshoot a small LAN.
8. Subnet a small business network given design criteria.

Subject Content

- concepts of computer networking and internetworking.
- internet architecture.
- An introduction to The operation of The major protocols used in computer networking.
- The OSI model, TCP/IP Protocol stack and IP addressing.
- Understanding of The TCP/IP Protocol stack and its operation in data networks.
- modern data communication and networking technologies.
- management and security requirements of computer networks.
- identification and Review of networking media.
- introduction to Ethernet technologies and switching.
- Routing fundamentals and subnetting.

- construct and Evaluate Network performance in LANs.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Practical	2 hours per week	20	N	Group

COMP 2008 Computer Organisation

Credit Points 10

Legacy Code 300096

Coordinator Jianhua Yang (https://directory.westernsydney.edu.au/search/name/Jianhua Yang/)

Description This subject is designed for computer science students, particularly those interested in systems programming and hardware development. The students will learn about the interface between the hardware and software of a computer system. This will involve study of some aspects of computer architecture and low level interfacing to gain an insight into central processing unit (CPU) organisation at the assembly language level. After completing this subject students will be able to write procedures in an assembly language, use their understanding of the relationship between the instruction set

architecture and the implementation of high level languages to write efficient programs.

School Computer, Data & Math Sciences

Discipline Programming

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) The following pre-requisite unit applies to course 3771 only
ENGR 1045 Engineering Programming Fundamentals

The following pre-requisites apply to all courses except 3771
COMP 1005 Programming Fundamentals OR
ELEC 1006 Engineering Computing AND
MATH 1006 Discrete Mathematics OR
MATH 1016 Mathematics for Engineers 1

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Consider the Instruction Set Architecture (ISA) in order to carry out assembly programming tasks.
2. Examine the stored program concept and internal representation of different types of data.
3. Examine the memory hierarchy and how this relates to computer system performance.
4. Identify the hardware mechanisms that support interrupt handling and how the latter is used to implement I/O control.
5. Explain the structure of datapath and control as well as the basic instruction level parallelism using pipelining.
6. Critique fundamental issues in evaluating computer system performance.

Subject Content

1. Machine level representation of data including integer and floating point arithmetic, characters, and arrays; arithmetic and logical operations.
2. Assembly level machine organisation and assembly language programming including instruction set architecture, instruction formats, instruction execution cycle, addressing modes, subroutine call and return mechanisms.
3. Memory organisation and architecture including memory hierarchy, main memory, cache memories, virtual memory.
4. Types and characteristics of I/O devices, interfacing and communication within a computer system, physical organisation and performance of magnetic disks.
5. Hardware support for interrupts, programmed and interrupt-driven I/O, interrupt priority levels.
6. Pipelining and instruction level parallelism (ILP), pipeline hazards.
7. The basics of logic circuit design including fundamental building blocks and minimisation of logic expressions.
8. Functional level machine organisation, implementation of datapath and control unit.
9. Computer system performance measurements and benchmarking, Amdahl's law.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

COMP 2009 Data Structures and Algorithms

Credit Points 10

Legacy Code 300103

Coordinator Dongmo Zhang (https://directory.westernsydney.edu.au/search/name/Dongmo Zhang/)

Description This subject introduces students to fundamental data structures and algorithms used in computing. The material covered forms the basis for further studies in programming and software engineering in later subjects and for further training in programming skills. The subject focuses on the ideas of data abstraction and algorithm efficiency. The issues of computational complexity of algorithms are addressed throughout the semester. The topics covered include the fundamental abstract data types (lists, stacks, queues, trees, hash tables, graphs), recursion, complexity of algorithms, sorting and searching algorithms, binary search trees and graphs.

School Computer, Data & Math Sciences

Discipline Data Structures

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) COMP 2014 OR
COMP 2015 OR
COMP 2016 OR
ENGR 1045

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Select appropriate data structures to solve moderately complex programming problems.
2. Discuss time and space tradeoffs among different data structures that could be used to represent specific information.
3. Perform time-complexity analysis against multiple implementations of various abstract data types.
4. Write programs that use the fundamental abstract data types: linked list, stack, queue, hash table, binary search tree, heap, graph.
5. Select efficient sorting and searching algorithms to solve moderately complex programming problems.

Subject Content

- Basic concepts: abstract data types, Big-O concept and Complexity analysis.
- Stacks and queues: ADT specification, implementation strategies and applications.
- variations of linked lists: Doubly linked lists and circular lists.
- recursion: recursive functions and divide-and-conquer approach.
- trees: Binary trees, Binary search trees, AVL trees, and heaps.
- Graphs: Adjacency matrix and Adjacency list implementations, depth-first search, breadth-first search, and minimum spanning tree algorithms.
- Searching: Sequential search, Binary search and hashing.
- Elementary sorting algorithms: insertion sort, selection sort, and bubble sort.
- advanced sorting algorithms: quick sort, heap sort, and shell sort.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Practical	2 hours (each practical)	14	N	Individual
Quiz	30 minutes each	6	N	Individual
Applied Project	Around 600-800 lines of code and up to 4 A4 pages of algorithm description and analysis for each assignment	30	N	Individual
Final Exam	Two-hour	50	N	Individual

COMP 2011 Games Technology

Credit Points 10

Legacy Code 300491

Coordinator Sharon Griffith (https://directory.westernsydney.edu.au/search/name/Sharon Griffith/)

Description This subject provides an introduction to the game industry as well as introducing students to the techniques of game design and construction. Students will be exposed to the history of game development and the key aspects of different genres of computer games.

School Computer, Data & Math Sciences

Discipline Artificial Intelligence

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Equivalent Subjects LGYA 5804 - Client Server Applications

Assumed Knowledge

A basic understanding of the principles of programming equivalent to Programming Principles 1.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the role of games in individual psychological and social development.
2. Identify the role of games in society.
3. Analyze the basic concepts of game design.
4. List the elements of computer game software
5. Classify the basic concepts of the software development process
6. Summarize the history of computer games and the various game genres.
7. Discuss the structure of the computer game industry.
8. Demonstrate the preparation and presentation of game design documents

Subject Content

- fundamentals: introduction to physiology, Psychology and sociology of play, games and computer games.
- Game design: interaction, dramatic elements, Rules and interface design Rules
- Game genres: action, strategy, role-playing, Sports, vehicle and construction & management Simulations, Adventure, Artificial life, Puzzle and online gaming
- Game Technology: elements of computer games, graphics, sounds, animation, Artificial Intelligence, physics and networking
- Game development: structure of The Game industry, software development process, testing & release

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Case Study	2,000 words	20	N	Individual
Report	3,000 words	30	N	Individual
Essay	2 hours	20	N	Individual
Final Exam	2 hours	30	Y	Individual

COMP 2013 LAN Workshop

Credit Points 10

Legacy Code 300138

Coordinator Jiansheng Huang (https://directory.westernsydney.edu.au/search/name/Jiansheng Huang/)

Description This subject provides students with the knowledge and skills necessary to install, test, tune, customise, repair and maintain networking hardware and software necessary to create a Local Area Network (LAN). Students also learn how to administer a LAN by setting up user accounts, access privileges, security procedures and back-up/recovery procedures.

School Computer, Data & Math Sciences

Discipline Networks and Communications

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Equivalent Subjects LGYA 6157 Networking Workshop

Assumed Knowledge

Ability to list, discuss and compare the elements of information coding and signal transmission. List, describe and explain the elements and functional relationships of communications hardware and software. Identify, locate, distinguish and describe the individual hardware components of a personal computer (PC) and explain their purpose, functions and operations. Install PC components, devices and peripherals in accordance with installation procedures and operational standards.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Install and configure network protocols and applications according to client requirements.
2. Plan, organise and provide basic LAN systems administration and security functions.
3. Contribute to the preparation of a disaster recovery plan for a LAN and set up appropriate backup and recovery procedures.
4. Identify, diagnose, and correct network breakdowns, conflicts, errors and problems.
5. Install, connect, configure, monitor, and tune LAN systems comprising wiring, networking hardware, networking operating systems, and presentation layers.
6. Explain telecommunications systems performance measures and ensure adequate performance and reliability for a LAN.
7. Explain, install, and test networking equipement such as modems, multiplexors, ethernet components, bridges, routers, and terminal emulators.
8. Explain telecommunications requirements for transmission of voice, audio, data, still images, motion video, and multimedia.

Subject Content

- Domains, IP Addressing, Directory naming services.
- Network Addressing with subnets and host IDs using gateways, routers, and emulations.

- host machines and workstations, manual and automatic IP allocation.

- client user services and inter-application communications.
- access control and security.
- Disaster recovery planning, backup and recovery procedures.
- Network performance, Monitoring Measuring and tuning.
- Trouble-shooting, error detection, system maintenance and repair.
- Network policies, user accounts and services, Risk analysis.
- Network devices; cards, modems, multiplexors, routers, bridges, and emulators.
- Telecommunications transmission requirements, Standards, and specifications.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Participation	2 hours each class	10	N	Group/ Individual
Quiz	70 minutes	20	N	Individual
Applied Project	4-week subject project	30	N	Individual
Final Exam	2 hours	40	N	Individual

COMP 2014 Object Oriented Programming

Credit Points 10

Legacy Code 300147

Coordinator Vernon Asuncion (https://directory.westernsydney.edu.au/search/name/Vernon Asuncion/)

Description This subject presents the concepts and principles of programming languages with the emphasis on object oriented paradigm. It addresses the importance of the separation of behaviour and implementation as well as effective use of encapsulation, inheritance and polymorphism. The students will gain intensive training in programming skills with supervised laboratory sessions and task oriented assignments.

School Computer, Data & Math Sciences

Discipline Programming

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) COMP 1005 OR
ENGR 1045

Restrictions

Before taking COMP 2014, students must pass either COMP 1005 or ENGR 1045

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the principles of object oriented programming
2. Explain the concepts of abstract data types, encapsulation and information hiding, class inheritance and polymorphism.
3. Write programs to demonstrate understanding of encapsulation, data hiding, compositions and basic data operations.
4. Write program in object oriented style to solve real-world problems using inheritance and polymorphism.

Subject Content

1. Concepts and principles of object oriented programming languages
2. Elements of syntax and semantics of programming languages
3. OOP concepts: encapsulation, information hiding, class inheritance, and polymorphism
4. Abstract classes and interfaces
5. Programming styles, conventions, pitfalls and debugging
6. API: utility classes, arrays, collections
7. OO approach in other programming languages

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Professional Task	10 hour average workload	15	N	Individual
Professional Task	10 hour average workload	15	N	Individual
Practical	2 hours (for 12 weeks)	20	N	Individual
Final Exam	2 hours	50	N	Individual

COMP 2015 Programming Techniques

Credit Points 10

Legacy Code 300581

Coordinator Paul Davies (https://directory.westernsydney.edu.au/search/name/Paul Davies/)

Description This subject is intended as a second subject of study in programming. It builds on a basic understanding of procedural programming as would be developed in a first subject. This subject continues the development of programming skills and methodologies required for professional programming and for further study in later computing subjects. Topics covered include multi-dimensional arrays, file I/O, searching and sorting, and an introduction to object-oriented programming involving classes and inheritance.

School Computer, Data & Math Sciences

Discipline Programming

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) COMP 1005

Equivalent Subjects LGYA 5800
COMP 2017

Incompatible Subjects COMP 2016 - Programming Techniques (Advanced)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. With a chosen programming language in mind, analyse a given problem and: a). Develop an algorithm that applies structured programming techniques such as sequence, selection, iteration and modularisation that solve the given problem; b). Choose suitable data types to store relevant data for the given problem; c). Implement the solution algorithm using the chosen programming language, data types and control structures; d). Test and debug the program code to produce a working computer program.
2. Write and implement programs that use data structures such as arrays to solve problems in programming involving multiple data items.
3. Demonstrate how different searching and sorting methods operate and be able to implement them in working computer programs
4. Store, retrieve and manipulate data programmatically from secondary storage
5. Use object-oriented methodology to analyse relatively simple problems and develop object-oriented computer program solutions

Subject Content

1. Revision and extension of procedural programming structures including: a. Data types b. I/O statements c. Calculations d. Problem solving techniques e. decision making constructs f. repetition structures g. writing and using functions h. one-dimensional arrays
2. Multi-dimensional arrays
3. Character strings and textual data
4. Sorting and searching algorithms: Sequential Search, Binary Search, Selection Sort, Bubble Sort
5. Object-Oriented Programming including: a. Introduction to classes and objects b. Class construction c. Constructors and destructors d. Inheritance e. Polymorphism
6. Data files

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Professional Task	Two Practical Deliverables. 1 to 5 programming tasks per practical deliverable.	30	N	Individual

Applied Project	One deliverable. Typically the solution files will be approximately 800 to 1200 lines of code.	40	N	Individual
Professional Task	90 minutes	30	Y	Individual

COMP 2016 Programming Techniques (Advanced)

Credit Points 10

Legacy Code 300903

Coordinator Paul Davies (https://directory.westernsydney.edu.au/search/name/Paul Davies/)

Description This subject builds on a basic understanding of procedural programming developed in previous subjects. Students continue to develop their programming skills and methodologies required for professional programming and for further study in later computing subjects. Topics covered include multi-dimensional arrays, file I/O, searching and sorting, and an introduction to object-oriented programming involving classes and inheritance. Students in this advanced subject will also investigate and apply advanced concepts such as function overloading and recursion.

School Computer, Data & Math Sciences

Discipline Programming

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) COMP 1005

Incompatible Subjects COMP 2015 - Programming Techniques

Restrictions Students must be enrolled in 3688 Bachelor of Information Systems Advanced or 3684 Bachelor of Information and Communication Technology (Advanced)

Assumed Knowledge

Software development methodologies; Software analysis and design modelling tools and techniques; Programming languages; Implementing databases management systems; Software construction and testing; System documentation; Project Management.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. With a chosen programming language in mind, analyse a given problem and: a). Develop an algorithm that applies structured programming techniques such as sequence, selection, iteration and modularisation that solve the given problem; b). Choose suitable data types to store relevant data for the given problem; c). Implement the solution algorithm using the chosen programming language, data types and control structures; d). COMP 2018 Simulation Fundamentals

Credit Points 10

Legacy Code 301167

Coordinator Ante Prodan (https://directory.westernsydney.edu.au/search/name/Ante Prodan/)

Description In the last couple of decades computer modelling and simulation has evolved into an important discipline used in nearly every aspect of life from computer games to banking. What was once a tool for training pilots is now a capability to better understand human behaviour, enterprise systems, disease proliferation, and much more. This is an introductory, problem-based unit, where students will learn by doing. Students will acquire ability to use different simulation methodologies and tools such as InsightMaker and AnyLogic to build new insights into the world around you and learn how to share these insights effectively with others.

School Computer, Data & Math Sciences

Discipline Computer Science, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the goals of simulations
2. Conclude the benefits and drawbacks of simulations
3. Demonstrate building simulations by using specific tools and techniques
4. Interpret standard simulation methods and practices

Subject Content

Goal of simulation
When simulation is an appropriate tool
When simulation is not appropriate
Examples of simulation techniques
Model thinking
Simulation methods
Modelling dynamic systems using various types of simulation software

Assessment

COMP 2019 Systems Programming 1

Credit Points 10

Legacy Code 300167

Coordinator Chun Ruan (https://directory.westernsydney.edu.au/search/name/Chun Ruan/)

Description This subject provides an introduction to the knowledge and skills required for the design, writing and support of technical software and other such functions normally falling within the role of the systems programmer. It provides for detailed study of a systems programming environment and its application to systems programming tasks.

School Computer, Data & Math Sciences

Discipline Programming

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) COMP 2015 OR
COMP 2016 OR
COMP 2020 OR
COMP 2014 OR
ELEC 1006 AND
ELEC 1001

Restrictions Students in Bachelor of Engineering, Bachelor of Engineering (Advanced) or Bachelor of Engineering Science must be enrolled in one of the Majors attached to the program.

Assumed Knowledge

This subject requires a knowledge base of at least the level of a completed first year in a professional Computing degree. Ability to apply fundamental concepts in data structures, algorithms, programming principles will be assumed.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Exhibit facility with the predominant systems programming language - C.
2. Demonstrate their understanding of the interface to the operating system by applying this knowledge to write and explain programs making system calls.
3. Discuss the nature of a systems program and put into practice the canons of good programming style and of sound software engineering in designing and writing short system utilities.
4. Analyse and maintain longer and more complex programs.
5. Demonstrate further development and reinforcement of their grasp on abstract concepts of data and programming structures by being able to explain how these ideas are realized in a specific programming language and environment.
6. Identify the Central role of concurrency in systems programming.
7. Be able to solve relatively simple problems requiring concurrency.

Subject Content

Nature of 'systems programming', requirements of a system programming language.
Applications of the Concepts of functions, scope, lifetimes and data abstraction in the specific case of C.
Error propagation and handling in C.
File systems, terminal control and signals.
Interface with the operating system: general properties and style of system calls, operating system structures, and how they can be accessed.
Systems administration functions, shell programming.
Event-driven programming: writing a video game.
Concepts and formalisms of concurrent programming, realization via UNIX system calls.
Interprocess communication, synchronous and asynchronous message passing, shared memory, mutual exclusion, interrupts and

signals and application to operating principles of UNIX daemons and of client-server structures in general.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Practical	20 - 25 hours	30	N	Individual
Practical	2 hours each, total 10 hours	20	N	Individual
Final Exam	2 hours	50	Y	Individual

COMP 2020 Technologies for Web Applications

Credit Points 10

Legacy Code 300582

Coordinator Paul Davies (https://directory.westernsydney.edu.au/search/name/Paul Davies/)

Description Building on material covered in Programming Fundamentals this subject introduces students to some of the key technologies for developing interactive and dynamic web applications from both the client and server perspective. The subject covers web site design, web site development, web page accessibility and usability, HTML, CSS, client side and server side scripting, database interaction, web site promotion (Search Engine Optimisation) and web security.

School Computer, Data & Math Sciences

Discipline Computer Science, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) COMP 1005

Equivalent Subjects COMP 2012 - Interactive Web Site Development

Incompatible Subjects LGYA 5748 - Creating and Managing Web Sites

Assumed Knowledge

Basic programming principles and program control structures equivalent to that covered in Programming Fundamentals. Basic file management and PC operation including how to access and search the World Wide Web.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Create simple web pages demonstrating a working knowledge of HTML and Cascading Style Sheets.
2. Create web pages that include appropriate multimedia content to enhance presentation and/or usability.
3. Create web-based forms incorporating client side scripting to validate user input on the browser.
4. Construct simple dynamic web pages with server side database interaction and server side scripting.
5. Create functional and usable web sites using technologies outlined in learning outcomes 1, 3 and 4 and incorporating: basic principles of human-computer interface design; current accessibility principles and standards; current search engine optimisation techniques.
6. Implement appropriate server-side code to provide simple authentication and access control to a web application.

Subject Content

- brief history of The internet & The World wide Web.
- web page design: use of HTML elements in web page layout, Cascading style sheets and Issues of human-computer interface design including current Standards in accessibility. incorporating sound, video, and animations into web pages.
- current techniques of search engine optimisation.
- HTML forms: input devices and their use for capturing client side information.
- client side scripting using A relevant scripting language (for example JavaScript): making use of client side scripts to enable interactivity with The user and to validate user input.
- Server side scripting & data bases: making use of Server side scripts to Create dynamic web applications that interface with online databases. environment Variables, SQL and Server side includes. A relevant scripting language and Server side scripting environment.
- web and internet security: Basic Server and client security, SSL, digital Certificates and enabling security through scripts.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Professional Task	90 minutes	30	Y	Individual
Professional Task	Two sets – 6 to 10 web pages each deliverable	40	N	Individual

Applied Project	Up to 15 interactive and dynamic web pages	30	N	Individual

COMP 2021 Software Engineering Fundamentals

Credit Points 10

Legacy Code 301343

Coordinator Paul Davies (https://directory.westernsydney.edu.au/search/name/Paul Davies/)

Description This subject introduces software engineering principles including basic software lifecycle concepts, modern development methodologies and version control, conceptual modelling and how these activities relate to programming. Students apply this knowledge together with essential team-based project management to design, build and deploy a simple web-based application. The subject provides students with the skills required in software design and development and prepares them to work in a team setting.

Level Undergraduate Level 2 subject

Pre-requisite(s) ENGR 1045
OR
COMP 1005

Incompatible Subjects INFS 1006
INFS 1007
INFS 1015
COMP 2020

Learning Outcomes

1. Analyse functional and non-functional requirements within a problem domain
2. Design a software system using conceptual data modelling based on ER models, object-oriented design principles, best practice design paradigm
3. Implement web-based system architecture and system design on web platforms
4. Test implementation of a designed software system
5. Collaborate with others using a project management framework, version control and continuous integration for agile software practices
6. Communicate in a professional manner in different formats

Subject Content

- Basic software engineering (life-cycle of software system including elicitation, analysis and specification, design, construction, verification and validation, and deployment)
- Software engineering methods
- Agile project management
- Version Control using Git
- Python Programming
- Javascript, HTML, CSS Fundamentals
- Web-based system architecture and development practices

Assessment

COMP 2023 Mathematical Programming

Credit Points 10

Legacy Code 301375

Coordinator Roozbeh Hazrat (https://directory.westernsydney.edu.au/search/name/Roozbeh Hazrat/)

Description This subject will introduce the programming language Python, through which students will explore and investigate practical mathematical problems. Python is one of the most powerful versatile programming languages, and it is increasingly used by engineers and scientists as well as banks and financial institutions to tackle their computational problems. The subject promotes an experimental side of mathematics and will employ Python-based computational tools to gain insight and intuition into problems, to discover mathematical patterns and relationships, and to use visualisation techniques to expose mathematical structures.

School Computer, Data & Math Sciences

Discipline Programming

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Equivalent Subjects COMP 2003 Computer Algebra

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Compute complex numerical expressions by utilising the computational features of Python.
2. Combine different styles of programming (functional, procedural, and list-based) to write powerful code in Python.
3. Analyse, investigate, gain insight and intuition into, and thus solve, practical mathematical problems by using Python.
4. Create complex graphics and solve equations by combining Python graphics capabilities.
5. Communicate computational approaches to mathematical problems effectively in both spoken and written form.

Subject Content

- introduction to Python and Jupyter Notebook
- finding, installing, and loading Python libraries
- working with variables and lists in Python
- writing expressions in Python
- debugging Python code
- handling user input in Python
- control structures (conditionals and loops) in Python
- creating functions in Python
- understanding, creating, and using NumPy/Pandas and data frames
- reading and writing files in Python
- producing basic graphs using Python
- data cleaning, indexing, querying, sorting, aggregating, and merging in Python
- object-oriented programming in Python
- using sets in Python
- list comprehension in Python
- database access in Python
- predictive analysis using Python
- data visualisation using Python
- (mini-projects) investigating practical problems using Python

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

COMP 2024 Computer Networking (UG Cert)

Credit Points 10

Legacy Code 500049

Coordinator Mia Hatzistergos (https://directory.westernsydney.edu.au/search/name/Mia Hatzistergos/)

Description This is an introductory subject in computer systems networking. It covers basic networking technologies, Ethernet fundamentals, ISO OSI model, routing, switching and sub-netting, the internet architecture, networking protocols, including TCP/IP, important OSI layer 2 and 3 networking device fundamentals, basic network management and security issues. This subject is also the first of three subjects which will prepare students for industry-based networking certification (CCNA).

School Computer, Data & Math Sciences

Discipline Networks and Communications

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Equivalent Subjects COMP 2004 Computer Networking COMP 2007 Computer Networking Fundamentals
LGYA 5739 Applied Data Communications and Networking COMP 2006 Computer Networking

Restrictions

Student need to be enrolled in: program 7174 - Undergraduate Certificate in ICT or program 7179 - Undergraduate Certificate in Cybersecurity, Cybercrime and Behaviour

Assumed Knowledge

Fundamentals of computer architecture, binary and hexadecimal numbering systems and programming principles. Students should also have a working knowledge of the World Wide Web.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the basic concepts and protocols of computer networking and internetworking.
2. Describe and define the internet architecture.
3. Explain the significance of the OSI and TCP/IP models, protocol stacks and their operation in computer networks.
4. Identify and describe modern technologies in computer networking.
5. Examine and review the functions of important OSI layer 2 and OSI layer 3 networking devices.
6. Apply and utilise the basic management and security requirements of computer networks.
7. Design, construct and test a simple LAN.
8. Subnet a network given design criteria.

Subject Content

1.Basic concepts of computer networking and internetworking.
2.Internet architecture.
3.An introduction to the operation of the major protocols used in computer networking.
4.The OSI model, TCP/IP protocol stack and IP addressing.
5.Basic understanding of the TCP/IP protocol stack and its operation in data networks.
6.Modern data communication and networking technologies.
7.Basic management and security requirements of computer networks.

8.Identification and review of networking media.
9.Introduction to Ethernet technologies and switching.
10.Basic routing fundamentals and subnetting.
11.Construct and evaluate network performance in simple LANs.

COMP 2025 Introduction to Data Science

Credit Points 10

Legacy Code 301486

Coordinator Liwan Liyanage (https://directory.westernsydney.edu.au/search/name/Liwan Liyanage/)

Description Analysis of data is essential for scientific investigation, modelling processes and predicting future events. Data Science is the investigation of the tools required that allow us to perform this modelling and prediction. The increase in accessible data over the past few decades has promoted the use of Data Science, making it a desired skill in many professions. In this subject we further investigate the methods of regression, clustering and classification that form the basis of a data scientist's toolbox.

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Equivalent Subjects INFO 3001 - Computer Security

Assumed Knowledge

Students are expected to have general understanding on computer systems; computer fundamentals, databases, and web technologies.

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Explain the cyber security theories that are used in implementing a secure network/system in organisations
2. Identify access operations and ownership issues using modern authentication, authorisation and access control mechanisms
3. Explain various cryptographic techniques and algorithms in accomplishing security demonstrating knowledge of key concepts in symmetric and assymetric encryption and cryptography
4. Examine security issues within various networked systems, operating systems and application software and the general causes that lead to system security failures
5. Analyse the security issues specific to databases, and protection of sensitive information and statistical systems within an organisation
6. Identify security threats and risks associated with web and related technologies
7. Use corrective and preventative measures against these threats and risks in organisations
8. Apply the relevant standards and the legal framework related to security and privacy and to security and privacy policies in organisations

Subject Content

1. Complexities of working in the Cyber Security Industry
2. Legal and ethical issues of working in cyber environment
3. Threats, vulnerabilities, and exploits
4. Network architectures and recognise their potential vulnerabilities
5. Reconnaissance methodologies to discover weaknesses in computing environment
6. The differences between vulnerability management policies and vulnerability management maturity models
7. Concepts of exploiting vulnerabilities to hack into a system using common penetration testing tools and frameworks
8. The principles of symmetric and asymmetric cryptography, and public key infrastructure
9. Data classification levels and email marking standards associated with the dissemination of sensitive and classified information
10. Data classification levels and email marking standards associated with the dissemination of sensitive and classified information
11. Threats in social networks via Open Source Intelligence (OSINT) Methodologies and demonstrate the capturing of Personally Identifiable Information (PII) using OSINT
12. Usage of website security assessment tools to identify weaknesses and potential web attack vectors
13. The types of forensic investigations from a cybersecurity perspective, differentiating between software and hardware digital forensic tools
14. The resources required to navigate the cybersecurity landscape as a potential cybersecurity professional

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.
