PUBH 7017 Leadership and the Development of Organisational Capacity

Credit Points 10

Legacy Code 400778

Coordinator Robyn Moroney (https://directory.westernsydney.edu.au/search/name/Robyn Moroney/)

Description This subject examines the concept, form and structure of health care organisations. Organisational theory is explored and used to analyse a range of structures used in nursing and contemporary health care. Factors which influence organisational

design, function and effectiveness are explored and discussed including: organisational behaviour, strategy, culture, power and politics, technology, sustainability and effectiveness. A major focus in the subject is planning for strategic organisational development to meet the challenges of rapid change and the need for performance improvements in patient care delivery. Concepts related to the strategic development of workforce capacity in the health care arena are considered through the application of a range of theories including the learning organisation. Leadership will be examined within the context of the subject with a particular emphasis on change management.

School Nursing & Midwifery

Discipline Public Health

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Understanding of the principles of leadership and management theories and the attributes of effective leadership in a changing health care environment.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of how organisational theory underpins organisational strategy and the design and structure of health care organisations.
2. Identify the factors driving changes in organisational strategy and design within the contemporary health care setting.
3. Analyse the impact of organisational culture and professional subcultures, power, politics and technology on readiness for change in health care organisations.
4. Discuss models and strategies used in effective change leadership and their application to the health care environment.
5. Examine models of workforce development used in organisational capacity building in the health care sector.
6. Explore the relationship between effective change leadership and improving organisational capacity and performance.
7. Outline leadership strategies required to mobilise and engage stakeholders in continuous organisational development and performance improvement in health care.

Subject Content

Module 1 - Introduction to organisational theory, design and structure, and its application to the health care environment
- organisational theory and structure - organisational Structures, function, formal systems of power and authority, how they are affected by The Internal and external environment in The health care sector
- Factors influencing organisational design and function in health care including organisational behaviour, strategy, culture, power and politics, Technology, sustainability and effectiveness
- organisational culture and subcultures in health care
Module 2 - Organisational capacity building, workforce development and change management in the health care environment
- leadership, adaptive organisational cultures and change
- theories and frameworks for organisational capacity Building
- Models and strategies for Workforce development
- managing Conflict, power and politics in health care Organisations
Module 3 - Improving organisational performance
- theories and concepts underpinning organisational performance improvement in health care
- Measuring organisational performance and effectiveness
- leading organisational capacity Building and improving organisational performance in The health care arena
Case study
- Building organisational capacity for Crisis management (SARS, influenza pandemic, natural disasters, Terrorism and multiple casualties)

PUBH 7018 Leadership for Quality and Safety in Health Care

Credit Points 10

Legacy Code 400777

Coordinator Rona Pillay (https://directory.westernsydney.edu.au/search/name/Rona Pillay/)

Description Increasingly clinical leaders, practitioners and health service managers are being held accountable for improving the quality and safety of patient care and for developing a culture of quality improvement within their teams. In this subject students learn about quality, patient safety and governance frameworks and strategies that they can employ within healthcare to improve system performance, patient safety and patient outcomes. The main approaches used to address quality of care and patient safety are examined and their applications critiqued. Students will explore leadership issues for developing systematic, coherent quality improvement frameworks and quality initiatives that can be applied within their own sphere of practice.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects HLTH 7016 - Quality and Safety in Health Care

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Investigate the impact of human factors in healthcare contexts and organisational factors on staff performance to enhance a safety culture

2. Critically analyse the system approach for managing quality and patient safety

3. Critically evaluate the impact of error on safety and risk management culture on healthcare

4. Articulate strategies to improve quality and safety by adopting and applying quality tools and techniques to measure and improve quality and safety

5. Critically evaluate legal and regulatory requirements associated with safety and quality from a leadership perspective

6. Formulate an implementation plan by drawing on human factor framework, with an aim to develop a strategic approach sustain healthcare safety and quality

Subject Content

Module 1
- quality and patient safety - concepts, principles and dimensions
- human error theories
- learning from errors to prevent Harm
- Consumer perspectives

Module 2
- Risk management
- quality management systems
- quality collaboratives
- clinical and corporate Governance
- quality assessment and Accreditation
- safety and Risk management culture

Module 3
- Remedial processes: clinical, service, and Workforce redesign
- quality tools: root cause analysis, fishbone techniques, Analysing error
- information management systems - collecting Reporting and managing data

Module 4
- application of leadership, communication, interpersonal skills and accountability in open Disclosure, cultural Sensitivity, Working in partnership with patient?fs, family and carers, Incident investigation
- legal and Regulatory requirements

Equivalent Subjects LGYB 8273 - Occupational Health Management

Restrictions

Students must be enrolled in 3602 Master of Environmental Management, 3605 Master of Occupational Safety, Health and Environmental Management, 3606 Graduate Diploma in Occupational Safety, Health and Environmental Management, 3607 Graduate Certificate in Occupational Safety, Health and Environmental Management, 3647 Master of Science, 3648 Graduate Diploma in Science (exit only), 3649 Graduate Certificate in Science, 4651 Master of Health Science, 4652 Graduate Diploma in Health Science or 4653 Graduate Certificate in Health Science, 4681 Master of Health (Research Studies)/PhD, 4698 Master of Health Science, 4700 Graduate Diploma in Health Science, 4701 Graduate Certificate in Health Science, 4702 Master of Public Health, 4704 Graduate Diploma in Public Health

Assumed Knowledge

Recognition that WH&S procedures are legislatively required in the workplace and the ability to recognise the need to protect workers from harm in the workplace. Knowledge of the basics of WH&S Legislation as it applies in their country of origin.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically discuss the potential impact of current work health and safety issues or emerging issues on worker health and wellbeing
2. Demonstrate an understanding of the health and science knowledge and practice underpinning occupational health management
3. Determine the needs of a given workplace to provide an environment that is not detrimental to the health of people entering that environment
4. Determine the strategies required to implement improvement in occupational health of an organisation, including health promotion, health surveillance and rehabilitation
5. Monitor and evaluate the effectiveness of occupational health programs in the workplace
6. Demonstrate appropriate postgraduate skills in researching and academic writing

Subject Content

Safety Management
Risk Management
Safe systems of work
WHS Legal and Regulatory context
Safety culture
Safety management systems
International approaches to risk and safety management

Assessment

PUBH 7020 Policy, Power and Politics in Health Care Provision

Credit Points 10

Legacy Code 400238

Coordinator Antoinette Cotton (https://directory.westernsydney.edu.au/search/name/Antoinette Cotton/)

Description Health and healthcare leaders often engage in the development and implementation of national policy. The success of these policies is often viewed through the health outcomes in terms of access and equity of quality care. Therefore, it is critical to understand the political and social constructions that underpin the development of health and healthcare policy. Students will explore and critically analyse issues related to the development, implementation and outcomes of health and health care policies specifically in relation to the impact on culturally diverse and disadvantaged groups in society today.

School Nursing & Midwifery

Discipline Public Health

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) Students enrolled in program 4673 Master of Mental Health Nursing (Nurse Practitioner) must have passed the following three subjects before they can enrol in this subjects - NURS 7018 Contemporary Professional Practice in Mental Health Nursing and NURS 7023 Evidence-based Nursing and NURS 7028 Leadership in Clinical Practice

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critique social ideologies and theories which shape public expenditure on health services.
2. Utilise insight to reveal the relationships between politics and power in the construction of health policies.
3. Critically examine the power and influence of interest groups associated with health policy formulation.
4. Critique the impact of the significant historical, structural, and environmental factors which affect health - policies' development and translation.
5. Evaluate ethical and legal considerations involved in enacting health policies.
6. Critically appraise the impact of health policies on culturally diverse and disadvantaged populations.

Subject Content

Module 1: Introduction to the Foundations of Health Policy
- What is Policy
- The Policy Cycle
- Social Theory and Social Policy
- Ethics and distributive justice in health resourcing
- Legislation

- The New Public Health

Module 2: Policy Analysis in the Context of Social Complexity
- Definitions of Power and policy development
- Approaches to policy analysis
- Critique of macro and micro health policies
- Methods of analysis and evaluation

Module 3: The global economy and the future of health care
- Ageing
- Obesity and wellbeing
- End-of-life and living at home
- Technology
- Global economic variations and health care

Module 4: Politics and Public Opinion in Setting the Health Care Agenda

- Federalism and health
- Role of 'unofficial actors' in the development of policy
- Quality and Safety in health care (adverse events, crisis management

Assessment

PUBH 7021 Primary Health Care and its Applications

Credit Points 10

Legacy Code 400412

Coordinator Kazem Razaghi (https://directory.westernsydney.edu.au/search/name/Kazem Razaghi/)

Description This subject explores the impact and relevance of Primary Health Care in its context as a World Health Organization (WHO) strategy for achieving “Health for All”. It examines ways in which Primary Health Care, along with other significant WHO initiatives, including the ‘Sustainable Development Goals’ provides a framework for just and humane health care systems now and into the future. Opportunity for discussion of the complex factors that impact on the health status of populations is provided. Complex dimensions of health and well-being are explored, enabling students to inform health care practices and planning of programs that can lead to sustainable health within a primary health care framework.

School Nursing & Midwifery

Discipline Health Promotion

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program. The subject is also available as a non-award subject in online mode.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse the principles, strategies and activities of primary health care linked to the World Health Organization’s quest for 'Health for All' within local and global contexts.

2. Critically evaluate the congruence between primary health care principles and practices as they relate to local and national health care policies.

3. Critically explore the relationship between people's health outcomes and the global, cultural, social, and socio-economic determinants of health and wellbeing.

4. Conduct a community needs assessment in the context of primary health care.

5. Devise an implementation plan for facilitating health related changes in organisations and communities within a primary health care framework.

Subject Content

Definitions and meanings of health;
Social determinants of health and wellbeing;
Health policy orientation: welfare and privatised, concepts and values;
Primary Health Care principles and practices;
Health Promotion: issues and strategies for the promotion of health in a globalised context;
Approaches to health promotion including the use of media;
Community needs assessment; capacity building and healthy settings;

Projects for health.

PUBH 7022 Public Health, Policy and Society

Credit Points 10

Legacy Code 400416

Coordinator Evan Atlantis (https://directory.westernsydney.edu.au/search/name/Evan Atlantis/)

Description This subject examines the nature of public health and develops a systemic understanding of various public health policy frameworks and issues. The subject provides the context and history for understanding public health approaches, explores the cultural and social dimensions of health and illness and the economic and political environment in which health policies and strategies are developed and implemented. The subject advocates a view of health that includes an implicit recognition of the physical, social and economic environment, affirms the importance of social justice and equity in health care, and emphasises the importance of inter-sectoral collaboration.

PUBH 7024 Safety and Risk Management

Credit Points 10

Legacy Code 300677

Coordinator John Loxton (https://directory.westernsydney.edu.au/search/name/John Loxton/)

Description This subject provides a critical insight into the theory and practice of managing safety and health at the workplace with a dual focus on risk management and safety management. Students have the opportunity to develop a safety systems approach concentrating on hazard identification, risk assessment and devising control measures incorporating safety management principles. Safety culture and its influence on Occupational Health and Safety (OHS) practice is also detailed. In addition, the subject addresses the legal underpinning of OHS requirements at the workplace. Labour market change and the role of government, unions and employer organisations are also examined. Global perspectives on OHS from various jurisdictions ranging from the USA, Hong Kong and China are also scrutinised.

PUBH 7025 Statistical Methods in Epidemiology

Credit Points 10

Legacy Code 401176

Coordinator Haider Mannan (https://directory.westernsydney.edu.au/search/name/Haider Mannan/)

Description Statistical ideas are integral to the conceptual basis of epidemiology and provide the tools needed to interpret epidemiological information and conduct epidemiological studies. Most professions in the health sciences need to be able to read and interpret statistics relating to individual and population health status and health risks, and to identify appropriate statistical methods to evaluate interventions, health policies and programs. Many public health practitioners are actively involved in surveillance, quantitative research and/or evaluation. This subject aims to support students to reach a level of proficiency in the selection of appropriate statistical methods to address specific research questions with a given dataset, conduct the selected analysis, interpret the results appropriately and draw valid and insightful conclusions about the research question.

School Medicine

Discipline Epidemiology

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) HLTH 7008

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

High school mathematics (arithmetic, formulas and algebra, reading graphs).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe epidemiological data in tabular and graphical format including the calculation and interpretation of measures of disease occurrence
2. Assess a disease-exposure association using appropriate hypothesis tests and calculate confidence intervals for measures of association between exposures and disease
3. Determine whether effect measure modification/or confounding is present in an epidemiological study
4. Explain how the study design determines the method of analysis
5. Select appropriate statistical analyses to address a given research question and carry out the analyses in statistical software
6. Interpret the model output, assess the model fit and test model assumptions
7. Critically appraise published studies by assessing study design and methods of data analysis, as well as interpret study methods, results and conclusions

Subject Content

1. Use of measurement scales and implications for selection of statistical methods
2. Descriptive techniques to summarise public health data
3. Formulate a scientific question about the relationship of a response variable and predictor variable(s)
4. Use statistical software package (e.g. SAS, Stata, R)
5. Methods for analysing case-control studies (linear and logistic regression)
6. Methods for analysing cohort/longitudinal studies (Poisson regression, negative binomial regression)
7. Methods for time-to-event studies (Kaplan-Meier estimator, logrank test, Cox proportional hazards regression)
8. Inferences about model coefficients, tests of hypotheses and determination of whether interaction and/or confounding is present in epidemiological study
9. Evaluate model fits and test model assumptions
10. Interpret regression coefficients and draw appropriate conclusions from epidemiological data

7. Methods for time-to-event studies (Kaplan-Meier estimator, logrank test, Cox proportional hazards regression)
8. Inferences about model coefficients, tests of hypotheses and determination of whether interaction and/or confounding is present in epidemiological study
10. Interpret regression coefficients and draw appropriate conclusions from epidemiological data

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Essay	1,000 words (incl. Summary Figures & Tables)	25	N	Individual
Essay	1,500 words (incl. Summary Figures & Tables)	35	N	Individual
Critical Review	3,000 words (incl. Summary Figures & Tables)	40	N	Individual

PUBH 7026 Supporting Aged Communities

Credit Points 10

Legacy Code 400241

Coordinator Lisa Wong (https://directory.westernsydney.edu.au/search/name/Lisa Wong/)

Description The subject aims to analyse the dynamic systems of aged care services, to challenge orthodox strategies for reform in aged care and to identify ways in which primary health care can be employed as a process of change in aged care services.

School Nursing & Midwifery

Discipline Community Health

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Assumed knowledge of aged care and older people living in communities. A general understanding of aged care including potential challenges and enablers.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critique support systems that are provided to older people in their home or in residential aged care.
2. Critically analyse service provision for older people in rural and remote areas.
3. Succinctly evaluate and effectively communicate systems to various stakeholders to ensure older people receive necessary support.
4. Utilise health care models that support, older people, their families, and carers.
5. Conceptualise ways that aged care could be provided to empower older people and communities to contribute to society.

Subject Content

1. Models and Philosophies of Aged Care:
- United Nations Principles for Older Persons
- Philosophies of Care Support for Older People
- International Models of Care and Support
- Continuum of Care Approaches

2. Frameworks for Analysing Aged Care Support Systems:
- Primary Health Care as Process
- Theoretical Analysis of Dynamic Health Care Systems

3. Social Change and Community Support:
- Social Adjustment and the Ageing Process
- Population Health and Local Community Needs
- Aged Care Assessment Teams and the Assessment Process
- Informal Carers – Needs Analysis and Support Systems
- Community Involvement and Emancipation Processes

4. Creating and Sustaining Process of Exchange:
- Social Agency and Change
- Inter-disciplinary Action Processes
- Networking Across the Continuum of Care
- Strategies for Reform

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

PUBH 7027 Supporting Individuals and Communities in Crisis

Credit Points 10

Legacy Code 400838

Coordinator Lisa Wong (https://directory.westernsydney.edu.au/search/name/Lisa Wong/)

Description The planning, development and implementation of primary health care initiatives rest largely on the capacity of health care workers to develop and engage in partnerships with a diverse range of consumers, health care workers and organisations. In this subject, students will critically examine the complexities inherent in developing and sustaining effective and active partnerships with individuals and groups in primary health care contexts. Students will examine cultural and socio-political issues that shape multidisciplinary and trauma informed communication. Students will also explore how to plan for and respond to crises, emergencies, and disasters at an individual, organisational and community level.

School Nursing & Midwifery

Discipline Public Health

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify models of communication that guide the development of professional interpersonal relationships and partnerships with consumers and organisations in primary health care contexts.
2. Critically examine personal, cultural and organisational factors that influence the nature of interpersonal, interprofessional and organisational relationships in primary health care settings.
3. Identify and analyse specific theories regarding the structure, function and process of therapeutic communication and crisis intervention.
4. Identify the principles that underpin frameworks of disaster/emergency preparedness and response within primary health care contexts.
5. Examine the efficacy of selected frameworks of disaster/emergency preparedness and response in health care contexts.
6. Examine community, multidisciplinary and intersectorial relationships considered essential for effective disaster prevention, mitigation, preparedness and response.

Subject Content

Module 1: Introduction to communication theory and models of partnership
1. Linear theory of communication
2. Circular transactional theoretical model of communication
3. Partnerships in primary health care contexts
- with community groups and health care Organisations
- with Consumers and families
- communication within multidisciplinary teams
- Intersectorial relationships
4. Culture and communication
- self as A cultural being
- Issues of language, gender, ethnicity/race, Age, socioeconomic situation, religion/spirituality
Module 2: Essential elements of therapeutic communication
1. Therapeutic communication models
2. Facilitative conditions of therapeutic communication
3. Characteristics of self concept/ self awareness
4. Crisis theory and primary health care practice
5. Group dynamics and development
Module 3: Essential elements of emergency/disaster mitigation, preparedness and response within primary health care contexts
1. WHO policy on emergency preparedness and risk reduction
- 'All Hazard/Whole Health' approach
2. International, national and local issues related to disaster mitigation, preparedness and response
- government and Legislation
- Vulnerability to emergencies and crises
Module 4: Health sector, intersectorial co-ordination and community involvement
1. Health care sector responsibilities in promoting resilience and effective responses in emergency and disaster situations
- social, economic and human consequences of disasters/emergencies

- Risk reduction, Risk management and emergency preparedness

2. Frameworks for disaster prevention, mitigation, preparedness and response to natural disasters and complex emergencies
- Intersectorial relationships
- strengthening The response capacity of communities at Risk
- promotion of recovery

PUBH 7028 Surveillance and Disaster Planning

Credit Points 10

Legacy Code 400847

Coordinator Richard Thomas (https://directory.westernsydney.edu.au/search/name/Richard Thomas/)

Description As the world responds to climate change and increased globalisation, the human population is becoming increasingly vulnerable to natural and human disasters. This subject equips students with skills in disaster preparedness and public health

surveillance. It addresses the psychosocial and mental health aspects of disaster management, the systems of disaster response and how these aspects are relevant across the all-hazard approach to Prevention, Preparation, Response and Recovery (PPRR). Using current evidence and understanding of this field, students will gain knowledge, skills and experience in leadership and management across the PPRR spectrum and the public health, clinical and other coordination in terms of impact and outcome. Australian requirements and systems in relation to surveillance and disaster planning will be analysed as will international and Australian roles in the region.

School Health Sciences

Discipline Public Health, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse environmental, social, cultural, and animal welfare factors in public health disaster planning.
2. Appraise responses to disasters to provide evidence-based recommendations for surveillance and response improvements.
3. Interpret data to establish the epidemiology of disaster and identify public health needs of communities for disaster planning.
4. Formulate responses to potential or occurring public health emergencies to minimise the impacts to affected communities and build community resilience.

Subject Content

1.Basic concepts and classification of disasters, including terminology
2.Psychosocial aspects of disasters focusing particularly on vulnerable groups
3.Risk and protective factors in disasters and their relevance for prevention and intervention at population and individual level
4.Disaster management frameworks and response systems
5.The mental health effects of disasters
6.Management principles and strategies to support affected individuals and groups during disasters
7.Psychosocial management strategies in disasters
8.Public health and refugee health in disasters
9.The key public health concepts, issues and management in a disaster context
10.Epidemiology and surveillance in disasters

Assessment

PUBH 7029 Digital Health Management

Credit Points 10

Legacy Code 401366

Coordinator Luckman Hlambelo (https://directory.westernsydney.edu.au/search/name/Luckman Hlambelo/)

Description Digital health technologies and services are significant contributors to the transformation of healthcare delivery. Uncertainty, abandonment and lack of organisational willingness to adopt, and failure to manage the realisation of business benefits from health information technology investments lead digital technology projects to fail. This subject provides an overview of capability required to enable health organisations to measure and optimise the value of digital health initiatives. Students will be introduced to various concepts and frameworks used to measure and quantify the benefits of digital health in Australia and elsewhere. Students will have opportunities to participate in industry case studies and analysis.

School Health Sciences

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) For students enrolled in 4778 Graduate Diploma in Digital Health and 4698 Master of Health Science 2-year and 15-year pathways
PUBH 7031 Health Systems and Policy
Note Students in the 1 year pathway will need to complete a rule waiver form to enrol in this unit

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critique and explain the theoretical underpinnings and processes in benefits management and realisation in digital health
2. Apply a structured, effective and consistent approach when directing and managing digital health programs and projects.
3. Evaluate performance to support benefits identification, management and realisation processes and reporting on the value derived from digital health investment.
4. Apply rigorous assurance including quality, gated, investment, technical, security, financial and architecture reviews on digital health programs and projects
5. Critically analyse the role of program management, change and organisational culture in digital health benefits management and realisation

Subject Content

1.Fundamentals and Foundations of Benefits management and realisation
2.Australia?fs National Digital Health Strategy
3.The digital divide in adoption and use of a Personal Health Record
4.Digital health project and program fundamentals
5.Identifying and assessing benefit dependencies and changes
6.Valuing, assessing and optimising the whole investment
7.Benefit tracking and reporting
8.Maximizing cost efficiency
9.Governance, program assurance and gateways
10.The Change/Benefit Realisation Management (BRM) process
11.Embedding Benefit Realisation Management (BRM) of digital health within an organisation

Assessment

PUBH 7030 Health Systems Planning and Evaluation

Credit Points 10

Legacy Code 401364

Coordinator Lei Si (https://directory.westernsydney.edu.au/search/name/Lei Si/)

Description This subject addresses health services planning and evaluation, as well as health economics. This subject aims to provide students with the necessary knowledge and skills to understand and apply the major concepts involved in health services planning and evaluation. Workforce planning and service capability frameworks are addressed as well as planning capital infrastructure for health services. How to evaluate and implement a health services plan is also described. The second module introduces the student to several economic concepts relevant to healthcare management and demonstrates how they are applied to actual situations in the healthcare industry.

PUBH 7031 Health System and Policy

Equivalent Subjects PUBH 7012 Health Economics and Comparative Health Systems

Restrictions

Students must be enrolled in a postgraduate program.

NOTE: Students in the 1 year pathway will need to complete a rule waiver form to enrol in this unit.

Assumed Knowledge

Competent use of Microsoft Excel, and high school mathematics (arithmetic, formulas and algebra, reading graphs).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Relate key economic and health service planning principles to the current health system climate
2. Determine best practice for planning and implementing change in the health service industry
3. Construct innovative solutions to health systems planning to address projected challenges in the health service industry.
4. Engage effectively as a member of a health service management team to design and implement a health service initiative

Subject Content

1. Decision-making in health services management
2. Comparing health systems
3. Principles of economic evaluation
4. Measuring and valuing effects
5. Workforce planning and service capability
6. Planning capital infrastructure for health services
7. Rural health planning
8. Planning for populations
9. Service planning models of care

10.Healthcare forecasting, whole of nation and beyond-hospital-walls planning
11. Stakeholder consultation and engagement within the health services planning environment
12. Demand and supply of services

PUBH 7031 Health Systems and Policy

Credit Points 10

Legacy Code 401363

Coordinator Anannya Singharay (https://directory.westernsydney.edu.au/search/name/Anannya Singharay/)

Description A detailed understanding of the structure and functioning of the health system is essential to effectively work, manage and lead in health services. This subject explores concepts that form the basis for the way health systems are designed and operate. This subject will equip students with the skills to critique challenges and opportunities that can influence how health services are delivered and resourced such as health workforce shortages, digital health innovations, public-private partnerships, and changing demographics. This subject will also examine the crucial role of governance and health policy in determining funding priorities and shaping health systems with a particular focus on the Australian health system, but within an international context. These issues are critiqued with health reform and the drivers for change nationally and internationally.

PUBH 7032 Patient-centred digital healthcare

Credit Points 10

Legacy Code 401367

Coordinator Luckman Hlambelo (https://directory.westernsydney.edu.au/search/name/Luckman Hlambelo/)

Description Patient-Centred Digital Healthcare introduces students to consumer engagement and consumer informatics approaches and many other examples of innovations using data analytics and digital health strategies in clinical, community-based, and home-based settings. Students will learn about the role of Patient-facing Technologies to empower patients and improve safety and the importance of standardisation of the electronic management of healthcare information and the automation of clinical processes in delivering patient-centred care. Central to fulfilling this role is ensuring that care is delivered in a safe and effective manner. Students are encouraged to identify, articulate, reflect upon, and value digital health technologies in their local health services.

School Health Sciences

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) For students enrolled in 4778 Graduate Diploma in Digital Health and 4698 Master of Health Science 2-year and 15-year pathways
PUBH 7031 Health Systems and Policy
Note Students in the 1 year pathway will need to complete a rule waiver form to enroll in this unit

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Appraise the range of patient-facing technologies available in Australia and how these technologies fit within the wider National Digital Health Strategy for Australia
2. Evaluate technical, policy, design, and implementation issues associated with consumer-facing technologies
3. Critically analyse the evidence-base for consumer engagement and consumer informatics approaches
4. Create innovations using data analytics and digital health strategies in clinical, community-based, and home-based settings
5. Illustrate ways in which health systems are using informatics approaches to make a difference both in personal as well as population and community health
6. Examine policy and regulatory issues on value-based purchasing, community health, ethics, open science and data analytics, and how Australia and other countries developed their national digital health strategies.

Subject Content

1.Consumer and Patient Engagement in health and healthcare
2.Using digital health to support patient-centred care
3.The role of social media in the democratisation of healthcare

4.Understanding Usability and Human-Centred Design Principles
5.Accessibility for Health IT
6.Behaviour Change Design
7.Consumer-Centred and Consumer-Generated Information
8.Telemedicine and eHealth
9.Patient Portals and Feedback Loops
10.Policy and regulatory issues in digital healthcare

PUBH 7033 The Social Determinants of Health

Credit Points 10

Legacy Code 401372

Coordinator Nerida Klupp (https://directory.westernsydney.edu.au/search/name/Nerida Klupp/)

Description The social determinants of health recognise that the health and wellbeing of individuals and communities are influenced by a range of social factors such as wealth, education, gender, and ethnicity. Such factors determine access to and use of resources influencing health outcomes and resulting in disparities in health or health inequalities. In this unit, students will use theories and frameworks for the social determinants of health to assess the role of key social factors in affecting the health and illness of individuals and communities. Students will be introduced to the challenges of measuring and addressing the social determinants of health, and critically examine examples of programmatic and policy interventions aimed at reducing health inequalities and addressing the social determinants of health.

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects HLTH 7001 A Global Perspective on the Social Determinants of Health

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically appraise the social factors that determine health and illness across the lifespan.
2. Critically explain the impact of social structure and processes on health inequalities within Australia and internationally.
3. Evaluate the evidence supporting the social determinants thesis and causal pathways offered to describe the link between social factors and inequitable health outcomes.
4. Assess the capacity of the Australian and other national health systems to respond to the challenge of reducing health inequities.
5. Use evidence to investigate, analyse and synthesise the societal determinants of health and disease for effective decision-making

Subject Content

1. Health inequalities and the history of social determinants of health in relation to other key theories and approaches in population health
2. International Commission on the Social Determinants of Health and introduction to major social determinants of health
3. Health and wealth: the role of poverty, employment and education
4. Neighbourhood and the built environment
5. Social capital and community context
6. Discrimination and health
7. Life course approach
8. Indigenous health
9. Methodological challenges involved in measuring social phenomena and making causal inferences about the relationship between social factors and health
10. Policies and interventions that could address the social determinants of health

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Literature Review	1,200 words	25	N	Individual
Professional Task	600 words	35	N	Individual
Professional Task	1,500 words	40	N	Individual

PUBH 7034 Workplace Safety and Risk Management

Credit Points 10

Legacy Code 401373

Coordinator Jinal Parmar (https://directory.westernsydney.edu.au/search/name/Jinal Parmar/)

Description This subject provides a critical insight into the theory and practice of managing health and safety in the workplace. Students have the opportunity to develop a safety systems approach, concentrating on hazard identification, risk assessment and devising control measures incorporating safety management principles to address current and emerging workplace health and safety issues. Students will learn the importance of developing a safety culture in the workplace as a core principle of safe work system management. In addition, the subject addresses the legal underpinning of health and safety requirements at the workplace. Labour market change and the role of government, unions and employer organisations are also examined. Global perspectives on workplace health and safety from various jurisdictions are also scrutinised.

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) PUBH 7031

Equivalent Subjects PUBH 7024 Safety and Risk Management

Restrictions

Students must be enrolled in a postgraduate program

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse the impacts of existing and emerging occupational health and safety issues.
2. Assess hazards and risk to determine appropriate actions and develop risk management strategies.
3. Translate the WHS framework, guidance materials and evidence into practice
4. Design strategies to improve workplace health and safety
5. Examine the role of culture and leadership in workplace safety and risk management.
6. Collaborate with stakeholders to plan and implement work health and safety processes.

Subject Content

1.Workplace safety systems from a global and Australian perspective
2.Identifying Hazards and assessing risk
3.Emerging occupational health issues
4.Conducting a risk assessment and risk mitigation
5.Applying legislation and guidance material to risk management processes
6.Consultation
7.Evaluation in WHS
8.Safety culture and safety leadership
9.Managing Emergencies in the Workplace
10.Worker?fs compensation and return to work processes

Assessment

RADI 5001 Physics for Diagnostic Ultrasound

Credit Points 10

Coordinator Paul Stoodley (https://directory.westernsydney.edu.au/search/name/Paul Stoodley/)

Description This subject introduces students to ultrasound physics, a key area of knowledge for sonographers. They will learn about the essential physical principles that underpin ultrasound imaging, extending from the basic principles of sound waves through to emerging technologies and applications. This subject provides an essential basis for future study in the Graduate Diploma in Sonography (Cardiac or Vascular).

School Medicine

Discipline Radiography

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 5 subject

Assumed Knowledge

Applicants for this program must have successfully completed an undergraduate degree in natural and physical sciences or health.

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Analyse ultrasound production, propagation and interaction with tissue.
2. Explain the Doppler effect and Doppler modes and how it is applied in professional practice.
3. Appraise components of equipment performance and limitations in diagnostic ultrasound.
4. Examine the cause and effect of ultrasound bio-effects and apply this knowledge to the safe use of ultrasound.
5. Identify ultrasound artifacts, their causes and propose solutions to address them.

Subject Content

Ultrasound physics
- Introduction to ultrasound instrumentation
- Pulsed ultrasound
- Doppler principles
- Haemodynamic measurements

- Ultrasound instrumentation and equipment performance
- New ultrasound technologies and contrast agents
- Ultrasound artefacts
- Ultrasound bio-effects and safety

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	30 minutes	20	N	Individual
Quiz	30 minutes	20	N	Individual
Applied Project	15 images with descriptive text	30	Y	Individual
Final Exam	90 minutes	30	N	Individual

RADI 6001 Pathophysiology in Diagnostic Ultrasound

Credit Points 10

Coordinator Paul Stoodley (https://directory.westernsydney.edu.au/search/name/Paul Stoodley/)

Description This subject will develop a student's understanding of the abnormal anatomical features and pathophysiological processes that underpin frequently encountered diseases within both the Australian Indigenous and non-Indigenous populations in ultrasound practice. Common congenital, genetic and acquired diseases, alongside biofeedback mechanisms controlling homeostasis will be explored. Furthermore, the roles of key pharmacological agents for disease management will be examined.

School Medicine

Discipline Radiography

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 6 subject

Pre-requisite(s) RADI 5001 - Physics for Diagnostic Ultrasound

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Common Chronic Disease
General disease
Congenital, genetic and acquired disease
1. Assess abnormal anatomical features and pathophysiological processes that underpin frequently encountered diseases in ultrasound practice.
2. Examine the role of biofeedback mechanisms in homeostasis.

3. Evaluate common congenital, genetic and acquired diseases
4. Justify the benefits of key pharmacological agents and their role in disease management.

5. Analyse healthcare outcomes in Australia between indigenous and non-indigenous populations; urban and rural/remote settings.

Subject Content

Homeostasis
Hypertension
Diabetes & obesity
Pharmacology general

2. Focus Module depending on enrolled program

Module 1. Cardiac Pathophysiology
• Ischaemic Heart Disease
• Cardiomyopathies
• Principles of Heart Valve Disease
• Cardiovascular Pharmacology

Module 2: Vascular Pathophysiology
• Coagulation and clotting pathologies
• Principles of atherosclerotic disease

Module 3: Obstetric and Gynaecological Pathophysiology
• Genetic testing in pregnancy
• Pre-eclampsia in pregnancy
• Factors affecting fertility

Special Requirements

Essential equipment

Students will need a computer and internet access to use the e-learning platform.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz 1	30 minutes	15	N	Individual

RADI 6002 Research Foundations for Sonography

Credit Points 10

Coordinator Paul Stoodley (https://directory.westernsydney.edu.au/search/name/Paul Stoodley/)

Description Research Foundations in Sonography provides sonography students with foundational knowledge and experience in research. The subject is comprised of two modules: 1. Research Foundations. 2. Research Application. Module 1 includes topics such as evidence, research ethics and disseminating research. Module 2 includes quality assurance and research in the clinical context.

School Medicine

Discipline Radiography

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 6 subject

Restrictions

Students must have successfully completed subjects totalling 40 credit points from the following program:

- 4751 Master of Cardiac Sonography
- 4743 Graduate Diploma in Cardiac Sonography
- 4765 Graduate Diploma in Vascular Sonography
- NEW Graduate Diploma in Obstetric and Gynaecological Sonography

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Describe different research approaches and the value of evidence-based medicine

2. Specify means used to help ensure the ethical conduct of research

3. Utilise Research skills to ensure quality sonographic evidence-based practice

4. Apply research skills by sourcing and composing a clinical-based case report

Subject Content

Module 1. Research Foundations

- Evidence based medicine and finding evidence
- Approaches to research
- Research ethics
- Dissemination of research

Module 2. Research Application

- Ensuring quality
- Research in the clinical context

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	30 minutes	20	N	Individual

RADI 7001 Advanced Principles and Practice of Cardiac Sonography

Credit Points 10

Legacy Code 401247

Coordinator Paul Stoodley (https://directory.westernsydney.edu.au/search/name/Paul Stoodley/)

Description This subject is an essential part of the final year of the Masters in Cardiac Sonography. It will build on the student's knowledge and skills gained in prior units, as they select and study a contemporary cardiac ultrasound technology. Students are required to research and write a literature review about their chosen technology, and to evaluate their own use of the technology in clinical practice. In addition, students will have the opportunity to teach first year cardiac sonographers, and write a reflection on their teaching experience.

School Medicine

Discipline Radiography

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) RADI 7009 AND
RADI 7005

Restrictions

Students must be enrolled in the Master of Cardiac Sonography.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate relevant research and compose a literature review utilizing advanced research and academic writing skills
2. Appraise the clinical application of a contemporary cardiac ultrasound technology
3. Reflect on the aspects of adept cardiac sonography practice through teaching student sonographers

Subject Content

Module 1. Contemporary Cardiac Ultrasound Technology
- subject introduction: An Overview of potential research Topics and subject structure
- Journals forum: meetings weeks 2, 3 and 4 to discuss and review relevant grey literature, review articles and original research
- Imaging tutorial: practical lessons on i) the clinical application, and ii) the research utility of the chosen contemporary ultrasound technology (week 7)
- Writing tutorials: meetings weeks 7, 9 and 10 on the essential aspects of writing and editing a literature review
Module 2. Teaching Experience
- Teaching preparation: a tutorial on preparing a teaching plan (aims, outcomes, timetable) and the structure of the teaching sessions (week 4)
- Teaching sessions: two teaching sessions to first year cardiac sonography students (in weeks 5 and 13)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Report	2000 words (excluding references)	50	Y	Individual
Report	1000 words (excluding images and legends)	30	N	Individual
Reflection	650 words total	20	N	Individual
Proposal	300 words	S/U	Y	Individual

Teaching Periods

Autumn (2024)

Campbelltown

Hybrid

Subject Contact Paul Stoodley (https://directory.westernsydney.edu.au/search/name/Paul Stoodley/)

RADI 7002 Practice of Cardiac Sonography 1

Credit Points 10

Legacy Code 401189

Coordinator Paul Stoodley (https://directory.westernsydney.edu.au/search/name/Paul Stoodley/)

Description In this subject, students will learn how to acquire and optimise ultrasound images and to make key measurements. They will learn to draw conclusions about cardiac anatomy and function based on images and measurements and will develop their professional and ethical skills by learning how to plan and implement a cardiac ultrasound scan in a safe and ethical manner. The skills and knowledge

learnt in this subject, which includes a work-integrated learning component, provide foundational skills in cardiac sonography.

School Medicine

Discipline Radiography

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) RADI 5001 - Physics for Diagnostic Ultrasound

Assumed Knowledge

Applicants for this program must have successfully completed an undergraduate degree in natural and physical sciences or health.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Integrate transducer manipulation and machine optimisation to acquire standardised ultrasound images
2. Implement anatomical and physiological measurement techniques to address clinical indications
3. Identify normal and abnormal cardiac ultrasound features to support clinical outcomes
4. Plan examinations and structure workflow to ensure best patient outcomes
5. Apply a legal, ethical and safe work frameworks in professional practice
6. Document clinical experiences and activities to form reflective skills.

Subject Content

Module 1: Sonographic Practice 1
I. Anatomical planes and sonographic nomenclature
II. Ultrasound machine operation

Module 2: Professional & Ethical Practice 1
I. Planning and implementing an ultrasound examination
II. Legal and ethical practice
III. Work health safety & ergonomics
Module 3: Speciality Knowledge & Imaging Skills 1
I. Cardiac anatomy 1
II. The cardiovascular system
III. Electrophysiology 1
IV. Image acquisition & measurement 1
V. Image acquisition & measurement 2
VI. Fundamental machine operation 1
VII. Fundamental machine operation 2

Special Requirements

Legislative pre-requisites

Legislative requirements (such as a criminal record check) are not deemed necessary for students in the course. For students who complete their clinical training in a NSW public hospital, the necessary legislative requirements will be part of their employment conditions. Clinical training for many of the students will be in a private setting, where the necessary requirements (which are likely to differ from public institutions) will be addressed as needed. Training for some students will occur in locations other than NSW (where legislative requirements can be competed if, and when required).

Special Requirements - NSW Health Legislative Prerequisites ~~Pre-requisites~~

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and compete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- http://training.gov.au (http://training.gov.au/)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://

www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Essential equipment

Students will need a computer and internet access to use the e-learning platform.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Case Study	2 cardiac sonography cases with questions and answers	25	N	Individual
Quiz	90 minutes	25	N	Individual
Practical Exam	2 hours	50	Y	Individual
Portfolio	175 scans + Quality & Reflective activities	S/U	Y	Individual

Prescribed Texts

RADI 7003 Practice of Cardiac Sonography 2

Credit Points 10

Legacy Code 401190

Coordinator Paul Stoodley (https://directory.westernsydney.edu.au/search/name/Paul Stoodley/)

Description In this subject, students will develop their image acquisition, optimisation and measurement skills. They will learn to perform more extensive cardiac sonographic scan and will further develop their professional and ethical attributes. This subject, which includes a work-integrated learning component, will ensure the consolidation of foundational skills, knowledge and attributes.

School Medicine

Discipline Radiography

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) RADI 5001 - Physics for Diagnostic Ultrasound
RADI 7002 - Practice of Sonography 1 (Cardiac)

Co-requisite(s) RADI 6001 - Pathophysiology in Diagnostic Ultrasound

Restrictions

Students must be enrolled in 4743 - Graduate Diploma in Cardiac Sonography or 4751 - Master of Cardiac Sonography.

Assumed Knowledge

Basic human anatomy and physiology.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply knowledge of imaging protocols to ensure quality sonographic practice
2. Appraise acquisition, optimisation and measurement techniques to achieve diagnostic sonographic images
3. Differentiate normal from abnormal cardiac ultrasound features to support clinical decisions
4. Investigate communication styles to ensure best patient care and optimal professional relationships
5. Evaluate clinical experiences to enhance reflective practice skills.

Subject Content

Module 1: Sonographic Practice 2
I. (Cardiac) Image acquisition and measurements 3
II. (Cardiac) Image acquisition and measurements 4

Module 2: Professional & Ethical Practice 2
I. Professional Communication
II. Ethical practice
III. Work health safety & ergonomics
IV. Professional development

Module 3: Speciality Imaging Skills II
I. Measuring LV systolic function 1
II. Measuring LV diastolic function 1
III. Evaluating Valve Function 1
IV. Evaluating Cardiomyopathies 1
V. Evaluating Cardiomyopathies 2

Work integrated learning

Each student will have an accredited cardiac sonographer as a clinical supervisor at their training site. The clinical supervisor will be provided with numerous means of support by WSU, including:
- An email at the commencement of the program from the program coordinator to verify support for the student and to ensure the supervisor that they can contact the coordinator at any time.
- Information about subject content each semester via email: 1. Learning Objectives - sent at the start of the semester, and 2. Practical assessment details - sent at the mid-point of the semester.
- A Zoom meeting in week 3 of the first semester where clinical supervisor recommendations are given (along with the opportunity for Q and A).

Special Requirements

Legislative pre-requisites

Legislative requirements (such as a criminal record check) are not deemed necessary for students in the ultrasonography course. For students who complete their clinical training in a NSW public hospital, the necessary legislative requirements will be part of their employment conditions. Clinical training for many of the students will be in a private setting, where the necessary requirements (which are likely to differ from public institutions) will be addressed as needed. Training for some students will occur in locations other than NSW (where legislative requirements can be competed if, and when required).

RADI 7004 Practice of Cardiac Sonography 3

Credit Points 10

Legacy Code 401191

Coordinator Paul Stoodley (https://directory.westernsydney.edu.au/search/name/Paul Stoodley/)

Description This subject aims to further develop students' understanding of the essential aspects of working in a clinical environment and to consolidate their imaging skills. Students will learn to how to image a variety of lesions and diseases, including

common adult congenital heart defects, systemic diseases that affect the heart, pericardial and pulmonary diseases and cardiac masses. Considerable time will be spent in the clinical environment refining imaging techniques, and students will prepare an evaluation of their imaging skills. .

School Medicine

Discipline Radiography

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) RADI 7003

Co-requisite(s) RADI 7008

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Acquire images and execute relevant measurements of specific systemic and common congenital heart lesions
2. Interpret and draw conclusions from acquired images and measurements
3. Communicate findings in a written report
4. Reflect on echocardiography practice and plan for professional development

Subject Content

1. Image acquisition and measurement
- imaging patients with congenital heart disease
- imaging diseases in and outside The heart
- imaging The right side of The heart
2. Communication
- writing reports for patients with congenital heart disease and Reporting uncommon findings
3. Professional practice and development
- reflecting on The Complexity and ethics of echocardiography practice
- Preparing An action plan for professional development

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Case Study	8 pages of Q&A	25	N	Individual
Reflection	16 images with descriptive text.	25	N	Individual
Practical Exam	Full scan with indication and report	50	Y	Individual
Log/ Workbook	400 Cases + Quality and Reflective Activities	S/U	N	Individual

RADI 7005 Practice of Cardiac Sonography 4

Credit Points 10

Legacy Code 401192

Coordinator Paul Stoodley (https://directory.westernsydney.edu.au/search/name/Paul Stoodley/)

Description This subject aims to assure that students have gained adequate knowledge and skills to be able to practice competently, confidently and ethically as cardiac sonographers. Care for and communication with patients and colleagues, continual professional development (CPD) and exposure to advanced and leading edge imaging technologies will be given particular emphasis during this subject. Once more, considerable time will be spent in the clinical environment performing imaging skills and activities independently (as per special requirements).

School Medicine

Discipline Radiography

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) RADI 7004

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and measure left ventricular regional wall motion abnormalities
2. Execute a comprehensive echocardiogram examination that includes images acquired from all four acoustic windows
3. Convey echocardiographic findings in a verbal report
4. Formulate a plan for further professional development

Subject Content

1. Image acquisition and measurement
- Measuring left ventricular Regional wall Motion
- Intermediate valvular function measurements
- introduction to stress echocardiography
2. Communication
- complex echocardiogram interpretation

- analytical written and verbal Reporting
3. Professional practice and development
- keeping A professional logbook
- reflecting on The Complexity and inter-professional dimensions of echocardiography practice
- Articulating and executing An action plan for professional development

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Case Study	2 cases	20	N	Individual
Professional Task	Two cases: ~70 images per case	30	Y	Individual
Practical Exam	90 minutes	50	Y	Individual
Log/ Workbook	Semester long	S/U	Y	Individual

RADI 7006 Principles of Cardiac Sonography 1

Credit Points 10

Legacy Code 401185

Coordinator Paul Stoodley (https://directory.westernsydney.edu.au/search/name/Paul Stoodley/)

Description In Autumn 2024, this subject replaced by RADI 5001 - Physics for Diagnostic Ultrasound. This subject introduces students to two key areas of knowledge for cardiac sonographers: 1) cardiac anatomy and physiology, and 2) ultrasound physics. Students will learn about the normal and abnormal anatomy and physiology of the human heart. They will also learn about the essential physical principles that underpin ultrasound imaging. This subject provides an essential basis for future study in the Graduate Diploma in Cardiac Sonography.

School Medicine

Discipline Radiography

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Assumed Knowledge

Applicants for this program must have successfully completed an undergraduate degree in natural and physical sciences or health.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and explain normal cardiac anatomical structures and physiological processes
2. Explain the central principles of transmission and interaction of ultrasound with human tissue

Subject Content

1. Cardiac anatomy and physiology
- features of The cardiovascular system and its development
- cardiac Anatomy
- Cardiopulmonary circulation
- Essential cardiac electrophysiology
2. Ultrasound physics
- introduction to Ultrasound instrumentation
- Pulsed Ultrasound
- Doppler principles
- Haemodynamic measurements

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Applied Project	20 Images with descriptive text	20	N	Individual
Quiz	30 minutes	20	N	Individual
Quiz	30 minutes	20	N	Individual
Short Answer	90 minutes	40	N	Individual

RADI 7007 Principles of Cardiac Sonography 2

Credit Points 10

Legacy Code 401186

Coordinator Paul Stoodley (https://directory.westernsydney.edu.au/search/name/Paul Stoodley/)

Description This subject will build on the knowledge acquired in Principles of Cardiac Sonography 1, via a blend of theoretical and practical activities. The students' understanding of cardiac anatomy and physiology will be extended, and they will begin studying cardiovascular diseases. Aspects of ultrasound physics studied in this subject include identifying imaging artifacts, recognizing equipment limitations, and bio-effects and safety.

School Medicine

Discipline Radiography

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) RADI 7006

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and explain abnormal anatomical features and physiological processes that underpin a range of acquired cardiovascular diseases
2. Explain the key principles of cardiac pacemakers and common cardio-active agents
3. Review essential operational aspects of established and emerging ultrasound technologies
4. Identify, assess and address limitations in the acquisition of cardiac ultrasound images
5. Examine and apply principles of safe practice in the performance of different types of cardiac sonography

Subject Content

1. Cardiovascular pathophysiology
- Myocardial infarction and dilated cardiomyopathies
- Hypertrophic and restrictive cardiomyopathies
- principles of heart valve disease
- cardiac pacing and Basic cardiovascular Pharmacology
2. Ultrasound physics
- Ultrasound instrumentation and equipment performance
- new Ultrasound technologies and Contrast agents
- Ultrasound artefacts
- Ultrasound bio-effects and safety

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	30 minutes	20	N	Individual
Quiz	30 minutes	20	N	Individual
Applied Project	30 images plus supporting text	20	N	Individual
Short Answer	75 minutes	40	N	Individual

RADI 7008 Principles of Cardiac Sonography 3

Credit Points 10

Legacy Code 401187

Coordinator Paul Stoodley (https://directory.westernsydney.edu.au/search/name/Paul Stoodley/)

Description In 2024, this subject replaced by RADI 6002 - Research Foundations for Sonography. This subject will extend the knowledge students have gained from Principles of Cardiac Sonography 2. Students will utilise their knowledge of normal and abnormal cardiac anatomy and physiology to study congenital and acquired heart lesions. They will examine systemic, pulmonary and pericardial diseases and cardiac masses, analyse data from basic echocardiogram measurements, and learn case study research skills by undertaking a case report. The university library's vast resources will provide an important aid to learning in this subject.

School Medicine

Discipline Radiography

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) RADI 7007

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and explain anatomical features and pathophysiological processes of common congenital and acquired heart lesions
2. Discuss the essential features of systemic, pulmonary and infiltrative diseases that affect cardiac anatomy and function
3. Explain the essential features of pericardial disease and of neoplastic diseases of the heart
4. Develop a worksheet of echocardiographic measurements and perform basic statistical analyses of data
5. Research and compose a case report on an observed congenital heart lesion

Subject Content

1. Cardiovascular pathophysiology
- Essentials of congenital heart disease
- systemic, pulmonary and infiltrative diseases
- Pericardial disease and cardiac masses
2. Case study research skills
- literature Review
- data collection
- statistical analysis of collected data
- case report writing

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	30 minutes	15	N	Individual
Applied Project	Part 1. Two spreadsheets Part 2. 1000 words	40	Y	Individual
Professional Task	1500 words	45	Y	Individual

RADI 7009 Principles of Cardiac Sonography 4

Credit Points 10

Legacy Code 401188

Coordinator Paul Stoodley (https://directory.westernsydney.edu.au/search/name/Paul Stoodley/)

Description In Spring 2025, this subject will be replaced by RADI - 7025 - Applied Cardiac Sonography. This subject aims to assure that students have gained adequate knowledge and skills to be able to practice competently and confidently as cardiac sonographers. Students will learn about more complex heart dis-ease and how to detect them by echocardiography and other imaging modalities. They will further devel-op their research skills and start contributing to the sonographic practice through conducting a case pro-ject and presenting the report to the professional audience. The university library's vast teaching and re-search resources will provide an important means for facilitating learning in this subject.

School Medicine

Discipline Radiography

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) RADI 7008

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the pathophysiology of ischemic heart disease and itðfs detection by echocardiography
2. Identify the causes and sonographic appearance of infective endocarditis and aortic diseases
3. Verify the indications and sonographic appearance of prosthetic heart valves
4. Create a research report on an advanced echocardiographic technique
5. Compare and contrast echocardiography and another cardiac imaging technique

Subject Content

1. Cardiovascular pathophysiology
- Ischaemic heart disease and echocardiography
- Ischaemic heart disease and other imaging modalities
- Prosthetic valves, cardiac interventions and surgery
2. Case study research skills
- literature Review
- data collection
- statistical analysis of collected data
- case report writing

Assessment

RADI 7010 Research Project in Cardiac Sonography

Credit Points 20

Legacy Code 401248

Coordinator Paul Stoodley (https://directory.westernsydney.edu.au/search/name/Paul Stoodley/)

Description In 2021 this subject replaced by 401467 - Medical Research Project (PG). The primary aims of this subject are to: i. Design, and ii. Execute and complete, a research project based on the cardiac ultrasound technology chosen by the student in Advanced Principles and Practice of Cardiac Sonography. Successful completion of the subject results in the composition of a report, and in an oral presentation, which will include details of the aims, methods, results and conclusions of the project.

School Medicine

Discipline Radiography

Student Contribution Band HECS Band 2 20cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) HLTH 7008 AND
RADI 7001

Restrictions

Students must be enrolled in the Master of Cardiac Sonography.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Design a research project utilizing a contemporary cardiac ultrasound technology
2. Employ initiative and responsibility in the execution of a research project
3. Compose a research report utilizing high quality academic writing skills
4. Apply well-developed communication skills in the delivery of an oral presentation
5. Rationalize the key findings of the research project

Subject Content

Module 1. Research Project Design and Performance
- Project design
- data collection and measurement
- data analysis

Module 2. Research Project Report and Presentation
- Essential report writing
- composing A research report
- Preparing A research presentation

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Project Report	4000 (excluding references)	65	Y	Individual
Presentation - Oral presentation (with PowerPoint or equivalent supporting slides)	25 minutes	35	N	Individual

RADI 7011 Practice of Vascular Sonography 1

Credit Points 10

Legacy Code 401293

Coordinator Donna Oomens (https://directory.westernsydney.edu.au/search/name/Donna Oomens/)

Description This subject introduces students to the practice of vascular sonography. Students will learn how to acquire and optimise ultrasound images and to make basic measurements. In addition, they will learn to draw conclusions about vascular anatomy and function based on the images and measurements; and they will develop their professional and ethical skills through learning how to plan for and implement a vascular ultrasound examination in a safe and ethical manner. The skills learnt in this unit, which includes a work-integrated component, provide well-rounded, foundation skills in vascular sonography.

School Medicine

Discipline Radiography

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) RADI 5001

Restrictions

Students must be enrolled in 4765 Graduate Diploma in Vascular Sonography

Assumed Knowledge

Basic human anatomy & physiology and mathematics.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Acquire and appraise standardised ultrasound images using machine optimisation and transducer manipulation.
2. Implement appropriately selected anatomical and physiological measurement techniques in clinical practice.
3. Plan examinations and structure workflow to ensure best patient outcomes.
4. Apply a legal, ethical and safe framework in professional practice.
5. Document initial clinical experiences and professional learning activities.

Subject Content

Module 1: Sonographic practice 1
I. Anatomical planes and sonographic nomenclature
II. Ultrasound machine operation

Module 2: Professional & Ethical practice 1
I. Planning and implementing an ultrasound examination
II. Legal and ethical practice
III. Work Health and Safety & ergonomics
Module 3: Speciality knowledge and imaging skills 1
I. Vascular anatomy - overview
II. Cardiovascular system
III. Electrophysiology
IV. Non-imaging physiological testing 1
V. Image acquisition & measurement 1
VI. Image acquisition & measurement 2
VII. Fundamental machine operation 1
VIII. Fundamental machine operation 2

Special Requirements

Legislative pre-requisites

Special Requirements - NSW Health Legislative

Prerequisites ~~Pre-requisites~~

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and compete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- http://training.gov.au (http://training.gov.au/)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Legislative requirements (such as a criminal record check) are not deemed necessary for students in the vascular ultrasonography course. For students who complete their clinical training in a NSW public hospital, the necessary legislative requirements will be part of their employment conditions. Clinical training for many of the students will be in a private setting, where the necessary requirements (which are likely to differ from public institutions) will be addressed as needed. Training for some students will occur in locations other than NSW (where legislative requirements can be competed if, and when required).

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Applied Project	20 ultrasound & anatomical images with 750 word reflective writing	20	N	Individual
Quiz	90 minutes	30	N	Individual
Practical Exam	2 hours	50	Y	Individual
Portfolio	200 studies with reflective	S/U	Y	Individual

RADI 7012 Practice of Vascular Sonography 2

Credit Points 10

Legacy Code 401295

Coordinator Donna Oomens (https://directory.westernsydney.edu.au/search/name/Donna Oomens/)

Description Content in this subject will be an extension of the knowledge and skills developed in Practice of Sonography 1. Students will learn to perform more extensive vascular examinations and will

develop their professional and ethical attributes. Learning in the subject, which includes a work-integrated learning component, will consolidate foundational vascular skills in vascular sonography.

School Medicine

Discipline Radiography

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) RADI 5001 - Physics for Diagnostic Ultrasound
RADI 7011 - Practice of Vascular Sonography 1

Co-requisite(s) RADI 6001 - Pathophysiology in Diagnostic Ultrasound

Restrictions

Students must be enrolled in 4765 Graduate Diploma in Vascular Sonography

Assumed Knowledge

Basic human anatomy, physiology and mathematics.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Implement imaging protocols in the practice of sonography.
2. Produce and appraise diagnostic images through apt ultrasound machine optimisation and transducer manipulation.
3. Execute accurate measurements based on anatomical and physiological understanding to support diagnostic decisions.
4. Differentiate between normal and abnormal features on ultrasound imaging.
5. Investigate communication styles appropriate to meeting patient needs and supporting healthy and safe professional relationships.
6. Document a range of continuing clinical experiences, integrating lifelong learning skills

Subject Content

Module 1: Sonographic Practice 2
I. Imaging in vascular sonography
II. Measurements in Vascular sonography

Module 2: Professional & Ethical Practice 2
I. Professional Communication
II. Ethical practice
III. Work health and safety & ergonomics
IV. Professional Development

Module 3: Speciality Imaging Skills 2
I. Non-imaging physiological testing 2
II. Basic scanning protocols
III. Emergencies in the practice

Special Requirements

Legislative pre-requisites

Legislative requirements (such as a criminal record check) are not deemed necessary for students in the vascular ultrasonography course. For students who complete their clinical training in a NSW public hospital, the necessary legislative requirements will be part of their employment conditions. Clinical training for many of the students will be in a private setting, where the necessary requirements (which are likely to differ from public institutions) will be addressed as needed. Training for some students will occur in locations other than NSW (where legislative requirements can be competed if, and when required).

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) RADI 7013

Co-requisite(s) RADI 7018

Restrictions

Students must be enrolled in 4765 Graduate Diploma in Vascular Sonography.

Assumed Knowledge

Basic human anatomy & physiology.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. 1. Produce diagnostic quality assessments of abdominal pathology, venous insufficiency, haemodialysis access and transplant surgery (CLO 4)
2. 2. Analyse the conclusions from diagnostic quality assessments of abdominal pathology, venous insufficiency, haemodialysis access and transplant (CLO 1)
3. 3. Create a worksheet and/or written report based on published criteria in relation to vascular sonography (CLO 5)
4. 4. Reflect on personal sonography practice to plan for further professional development (CLO7)

Subject Content

Imaging Acquisition & Measurement IV
1. Abdominal imaging
2. Venous insufficiency imaging
3. Haemodialysis access imaging
4. Transplant imaging
Professional Practice and Development III

Special Requirements

Legislative pre-requisites

For students who complete their clinical training in a NSW public hospital, the necessary legislative requirements will be part of their employment conditions. Where Clinical training be in a private setting, the special requirements differ from public institutions; students will need to comply with requirements identified by their organisation. Training for some students outside of NSW will be as per the state based requirements.

All Students
To be eligible to enrol in a subject and attend a health-related placement in your program, students must meet Western Sydney University course requirements **and** Special Legislative Requirements to be assessed in their first year of study against the following:
1. National Criminal History Check: Students must have a current (expiring 3 years from date of issue) check valid for their entire program. A valid National Criminal history check must be an Australia wide check, include the student's full name matching their Student ID card and date of birth and not have any offences listed. If a student has a criminal history identified on their check, they must provide a Clinical Placement Authority Card (CPAC) or conditional letter from the NSW HealthShare Employment Screening and Review Unit. https://www.health.nsw.gov.au/careers/student_clearance/Documents/appendix-10-student-application.pdf
International students must additionally have a translated International Police Check or statutory declaration.
2. A NSW Working with Children Check (WWCC) clearance letter issued under the category of volunteer valid for their entire program.
3. A current approved first aid certificate valid for their entire program. Approved provider courses can be found at http://training.gov.au.
4. A completed vaccination/immunisation card with all serology results containing expiry dates and currency must be maintained by the student to ensure compliance for their entire program.
5. NSW Undertaking/Declaration form.
6. Completed any additional health forms required (such as NSW Health Code of Conduct, Health Student Undertaking/Declaration and Tuberculosis (TB) Assessment Tool).
7. Relevant Local Health District specific documentation as requested. Contact your School for further details. Resources are also available on the Placement Hub (https://www.westernsydney.edu.au/placements_hub/placements_hub/student_compliance/) website.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Professional Task	1 study & report	20	N	Individual
Practical Exam	90 mins	60	Y	Individual

RADI 7015 Principles of Vascular Sonography 1

Credit Points 10

Legacy Code 401292

Coordinator Donna Oomens (https://directory.westernsydney.edu.au/search/name/Donna Oomens/)

Description In Autumn 2024, this subject replaced by RADI 5001 - Physics in Diagnostic Ultrasound. In this subject, students will study two essential areas of knowledge for vascular sonographers: I. cardiovascular anatomy and physiology and II. ultrasound physics. The normal anatomy and physiology of the cardiovascular system, and the key physics principles utilized in ultrasound imaging will comprise

the majority of the subject content. This subject provides an essential basis for future study in the Graduate Diploma in Vascular Sonography.

School Medicine

Discipline Radiography

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) RADI 7011 - Practice of Vascular Sonography 1

Restrictions

Students must be enrolled in 4765 Graduate Diploma in Vascular Sonography

Assumed Knowledge

Basic human anatomy, physiology and mathematics.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine the normal features of cardiovascular anatomy and its development (CLO 1)
2. Analyse the central principles related to the transmission and interaction of ultrasound with human tissue and how ultrasound images are displayed. (CLO 2)
3. Apply self-directed learning strategies to enhance professional learning in vascular sonography (CLO 5)

Subject Content

- cardiovascular Anatomy and physiology I
1. Features of the cardiovascular system and its development
2. Arterial and venous anatomy of the head, neck and upper limbs
3. Arterial and venous anatomy of the abdomen and lower limbs
- Ultrasound physics I
1. Introduction to ultrasound instrumentation
2. Pulsed Ultrasound
3. Doppler principles
4. Haemodynamics

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	30 minutes	20	N	Individual
Quiz	60 minutes	30	N	Individual

Prescribed Texts

- Gill R. The Physics and Technology of Diagnostic Ultrasound: A Practitioner's Guide. 2nd Ed. Sydney, Australia: High Frequency Publishing; 2020

RADI 7016 Principles of Vascular Sonography 2

Credit Points 10

Legacy Code 401294

Coordinator Donna Oomens (https://directory.westernsydney.edu.au/search/name/Donna Oomens/)

Description This subject builds on the knowledge acquired in Principles of Vascular Sonography 1, via a blend of theoretical and practical activities. Students' knowledge of general pathology principles will be extended, and they will also cover the principles of coagulation and atherosclerotic disease. Aspects of ultrasound physics studies in this subject include identifying imaging artefacts, recognizing equipment limitations and bio-effects and safety. Basic vascular pharmacology is also covered.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) RADI 7015

Co-requisite(s) RADI 7011 - Practice of Vascular Sonography

Restrictions

Students must be enrolled in 4765 Graduate Diploma in Vascular Sonography

Assumed Knowledge

Basic human anatomy, physiology and mathematics.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Distinguish the abnormal anatomical features and pathological processes that contribute to specific vascular diseases (CLO 1)
2. Justify essential operational aspects of established and emerging ultrasound technologies to inform professional practice in vascular sonography (CLO 2)
3. Evaluate limitations in the acquisition of vascular images within the professional workplace to allow best practice in vascular sonography(CLO 3)
4. Apply safe practice principles in the performance of vascular sonography (CLO 6)
5. Analyse the roles and interactions of common cardiovascular medicines. (CLO 1)

Subject Content

- vascular pathophysiology I
1.???? Principles of pathology
2.???? Coagulation and clotting pathologies
3.???? Principles of atherosclerotic disease
4.???? Essential cardiovascular pharmacology
- Ultrasound physics II
1.???? Ultrasound instrumentation and equipment performance
2.???? Ultrasound artefacts

3.???? Bio-effects and safety

Assessment

Co-requisite(s) RADI 7013 - Practice of Vascular Sonography 3

Restrictions

Students must be enrolled in 4765 Graduate Diploma in Vascular Sonography

Assumed Knowledge

Basic human anatomy, & physiology.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Distinguish the anatomical and physiological features of cerebrovascular and peripheral arterial circulations (CLO 1)
2. Examine key features of thrombotic diseases related to vascular sonography practice to compose a case report relating to an ultrasound for a documented thrombotic event (CLO 1)
3. Classify vascular disease in relation to patient outcomes, encountered within a vascular sonography practice (CLO 5)
4. Appraise the literature in vascular sonography theory and practice to inform professional practice(CLO 7)
5. Employ research methods, data collection and analysis in the field of vascular sonography surrounding peripheral vascular disease(CLO 7)

Subject Content

Vascular Pathophysiology II
1.Cerebrovasular disease
2.Thrombotic venous disease
3.Peripheral vascular disease
Case Study & Research Skills 1
1.Literature review
2.Data collection
3.Statistical analysis of collected data
4.Case report writing

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Assess atherosclerosis and aneurysmal development and relate to current treatment strategies (CLO 1)
2. Evaluate the causes and effects of venous disease, including patient outcomes (CLO 1)
3. Differentiate the unique characteristics of arterio-venous fistulae/grafts, and their assessment (CLO 3)
4. Appraise principles of transplant surgery and the role ultrasound plays pre and post-surgery (CLO 4)
5. Produce a report for a wider audience, including peers and other health professionals, based on a self-generated research project on vascular sonography (CLO 7)

Subject Content

Vascular pathophysiology III
1.Abdominal vascular pathology
2.Venous insufficiency
3.Arterio-venous fistulae and grafts
4.Renal & liver transplant
Case Study & Research Skills 2
1.Principles of Research
2.Literature review
3.Statistical analysis of collected data

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	30 minutes	15	N	Individual
Report	1500 words	35	N	Individual
Case Study	1500 words	50	Y	Individual

RADI 7019 Practice of Obstetric and Gynecological (O&G) Sonography 1

Credit Points 10

Coordinator Catherine Robinson (https://directory.westernsydney.edu.au/search/name/Catherine Robinson/)

Description This subject introduces students to the practice of obstetric and gynecological (O&G) sonography. Students will learn how to acquire and optimise transabdominal ultrasound images and make key measurements. They will learn to draw conclusions about fetal and maternal anatomy and function based on images and measurements. In addition, students will develop their professional and ethical skills by learning how to plan and implement O&G ultrasounds in a safe and ethical manner. The skills and knowledge learnt in this subject, which includes work-integrated learning, provide foundational clinical and professional skills in O&G sonography.

School Medicine

Discipline Radiography

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) RADI 5001 - Physics for Diagnostic Ultrasound

Assumed Knowledge

Basic human anatomy, physiology and mathematics

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Integrate transducer manipulation and machine optimisation to acquire standardised transabdominal O&G ultrasound images
2. Implement anatomical and physiological measurement techniques to provide clinical information about the female pelvis
3. Perform biometric measurements in obstetric examinations to aid in determining viability and gestational age
4. Critique performed O&G measurements against established guidelines for ensuring quality control
5. Plan and implement ultrasound examinations to ensure best patient outcomes
6. Apply legal, ethical and safe practice to meet established professional standards
7. Document clinical experiences and activities to form reflective skills

Subject Content

Module 1: Sonographic practice 1
1. Anatomical planes and sonographic terminology
2. Ultrasound machine operation and knobology
3. Image acquisition and optimisation

Module 2: Professional & Ethical practice 1
1. Planning and implementing an ultrasound examination
2. Patient-centred care and communication
3. Ergonomics for sonographers

Module 3: Speciality knowledge and imaging skills 1
1. The female reproductive system and menstrual cycle
2. Assessment of the uterus and endometrium
3. Early human embryology
4. Foundations of first trimester sonography
5. Determining viability and location in early pregnancy
6. Fetal biometric measurements

Special Requirements

Legislative pre-requisites

Legislative requirements (such as a criminal record check) are not deemed necessary for students in the O&G ultrasonography course. For students who complete their clinical training in a NSW public hospital, the necessary legislative requirements will be part of their employment conditions. Clinical training for many of the students will be in a private setting, where the necessary requirements (which are likely to differ from public institutions) will be addressed as needed. Training for some students will occur in states other than NSW (where legislative requirements can be completed if, and when required)

Special Requirements - NSW Health Legislative Prerequisites ~~Pre-requisites~~

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and compete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- http://training.gov.au (http://training.gov.au/)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Essential equipment

Students will need a computer and internet access to use the e-learning platform.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Applied Project	15 ultrasound images and a 500-word reflective critique	25	N	Individual
Quiz	90 minutes	25	N	Individual
Practical Exam	2 hours	50	Y	Individual
Portfolio	200 studies with quality and reflective learning activities	S/U	Y	Individual

RADI 7020 Practice of Obstetric and Gynecological (O&G) Sonography 2

Credit Points 10

Coordinator Catherine Robinson (https://directory.westernsydney.edu.au/search/name/Catherine Robinson/)

Description In this subject, students will continue to develop their image acquisition, optimisation and measurement skills in O&G sonography. They will learn to perform a transvaginal examination to assess the gravid and non-gravid female pelvis. Critique of scanning protocols will allow students to deliver sonographic examinations that address a clinical indication. Students will investigate methods for conveying clinical information and maintaining patient confidentiality and privacy. An applied understanding of medical ethics, workplace health and safety, and reflection frameworks will enhance the provision of high-quality patient care. The subject, which includes a work-integrated learning component, will ensure the consolidation of foundational skills, knowledge and attributes.

School Medicine

Discipline Radiography

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) RADI 7019 - Practice of Obstetric and Gynecological (OG) Sonography 1

Co-requisite(s) RADI 6001 - Pathophysiology in Diagnostic Ultrasound

Restrictions

Students must be enrolled in program 4802 - Graduate Diploma in Obstetric and Gynecological Sonography.

Assumed Knowledge

Basic human anatomy, physiology and mathematics

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Appraise acquisition, optimisation and measurement techniques to achieve diagnostic sonographic images
2. Conduct ultrasound assessment of the female pelvis using transabdominal and transvaginal approaches to provide diagnostic images
3. Utilise appropriate scanning protocols for differentiating normal from abnormal features in O&G examinations, taking into consideration clinical indications and patient needs
4. Demonstrate knowledge of ethical considerations in the provision of patient care, respecting cultural and religious differences
5. Apply workplace health and safety practices in the clinical environment, including the use of personal protective equipment, infection control and safe handling of equipment
6. Utilise a reflective cycle framework to document clinical experiences and develop reflective skills

Subject Content

Module 1: Sonographic Practice 2
1. Transvaginal imaging
2. Imaging the cervix and placenta

Module 2: Professional and Ethical Practice 2
1. Legal and ethical practice I
2. Legal and ethical practice II
3. Sonographer work health and safety responsibilities
4. Feedback and reflection

Module 3: Speciality Knowledge and Imaging Skills 2
1. First trimester fetal anatomy
2. Imaging in second trimester
3. Fetal growth and wellbeing
4. Obstetric Dopplers
5. Variations of the cervix and placenta
6. Assessment of the ovaries and adnexa

Special Requirements

RADI 7021 Practice of Obstetric and Gynecological (O&G) Sonography 3

Coordinator Catherine Robinson (https://directory.westernsydney.edu.au/search/name/Catherine Robinson/)

Description In this subject, students will enhance their skills in image acquisition, optimisation, and measurement. They will learn to identify crucial features of fetal and maternal anatomy and physiology required to perform a comprehensive O&G sonographic assessment. Additionally, students will explore effective communication techniques for delivering adverse findings, managing workplace relationships, and meeting patient expectations. They will collaborate with peers and incorporate feedback to deliver a multimedia presentation to a professional audience with confidence. The subject also includes a work-integrated learning component to promote the development of skills, knowledge, and attributes.

Co-requisite(s) RADI 6002 - Research Foundations for Sonography

Restrictions

Students must be enrolled in the program 4802 - Graduate Diploma in Obstetric and Gynecological Sonography.

Assumed Knowledge

Basic human anatomy, physiology and mathematics.

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Acquire obstetric sonographic images demonstrating key features of maternal anatomy and fetal organ systems
2. Evaluate pathologies of the female pelvis based on sonographic images and findings
3. Investigate communication styles that engender trust and mutual respect to ensure optimal patient care and professional relationships in the clinical setting
4. Implement reflective practice and peer collaboration to identify areas for improvement in professional and clinical performance

Subject Content

Module 1: Professional and Ethical Practice 3
1. Communicating adverse findings
2. Managing workplace relationships and patient expectations
3. Professional learning opportunities
Module 2: Specialty Knowledge and Imaging Skills 3A (Obstetrics)
1. Fetal brain
2. Fetal spine and limbs
3. Fetal face and neck
4. Cardiovascular system
5. Fetal heart and thorax
6. Electrophysiology
7. Fetal abdomen and genitourinary tract
8. Multifetal pregnancies
9. Anomalies of the cervix and placenta
Module 3: Specialty Knowledge and Imaging Skills 3B (Gynecology)
1. Pathologies of the uterus and endometrium
2. Pathologies of the ovaries and adnexa

Work integrated learning

Work Integrated Learning

Western Sydney University seeks to enhance student learning experiences by enabling students to engage in the culture, expectations and practices of their profession or discipline. This program includes a placement or other community-based unpaid practical experience.

Special Requirements

Legislative pre-requisites

Legislative requirements (such as a criminal record check) are not deemed necessary for students in the O&G ultrasonography course. For students who complete their clinical training in a NSW public hospital, the necessary legislative requirements will be part of their employment conditions. Clinical training for many of the students will be in a private setting, where the necessary requirements (which are likely to differ from public institutions) will be addressed as needed. REHA 1001 Introduction to Occupational Therapy

Credit Points 10

Legacy Code 400160

Coordinator Melissa Jammal (https://directory.westernsydney.edu.au/search/name/Melissa Jammal/)

Description This subject introduces students to the profession of occupational therapy, conceptual foundations underpinning the profession, and areas of clinical practice. Students will learn about the important and unique contribution made by occupational therapists in peoples lives to promote health and well-being. The important role of occupation in daily life will be discussed. In particular, this subject presents an overview of how occupational therapy reduces activity limitations people may have, and in doing so enhances the social participation for people of all ages and abilities. The problem solving process used by occupational therapists to assist clients will be introduced.

School Health Sciences

Discipline Occupational Therapy

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Restrictions

Students must be enrolled in 4663 Bachelor of Health Science/Master of Occupational Therapy or 4711 Bachelor of Occupational Therapy.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Define occupational therapy in respect to its purpose, role and national and international contribution to health care
2. Examine the history of occupational therapy professional development in Australia and overseas
3. Explore occupational therapy philosophy and theoretical concepts in relation to their application to clients with occupational challenges
4. Explore the impact of occupation on health and well-being across the lifespan
5. Explore the concepts of roles, activities and skills to understand the occupational nature of human beings
6. Identify international and national policies relevant to occupational therapy practice
7. Describe major occupational therapy practice areas in Australia and overseas
8. Apply the occupational therapy problem solving process to various client groups
9. Explain how occupational therapy promotes social participation for clients

Subject Content

1.Definitions of occupational therapy
2.History and philosophy of occupational therapy
3.Role of occupation in promoting health and well-being
4.International and national policies and legislation relevant to occupational therapy eg. World Health Organisation policies, Australian health and welfare policies, anti-discrimination legislation
5.Occupational therapy practice areas
6.Occupational therapy problem solving process
7.Occupational therapy conceptual models
8.Occupational therapy approaches to improve social participation for specific client groups
9.Career options for occupational therapists

REHA 1002 Introduction to Physiotherapy Practice

Credit Points 10

Legacy Code 400906

Coordinator Daniel Thomson (https://directory.westernsydney.edu.au/search/name/Daniel Thomson/)

Description This subject introduces students to the concept of physiotherapy as a profession, including regulatory, ethical and legal frameworks underpinning practice within the context of the changing health environment. In addition, students will be introduced to fundamental aspects of physiotherapy practice, including gathering, analysing and problem-solving information through a process of clinical reasoning. Students will also develop practical skills in relation to assessment of movement, patient manual handling and transfers, and patient education regarding gait and use of assistive devices.

School Health Sciences

Discipline Physiotherapy

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Restrictions

Students must be enrolled in 4662 Bachelor of Health Science/Master of Physiotherapy.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the regulatory requirements for physiotherapy in Australia
2. Describe physiotherapy with respect to its purpose, role and contribution to health care using the International Classification of Functioning framework
3. Develop sound clinical reasoning commensurate with level of training
4. Apply basic communication skills to effectively communicate with clients, peers and academic staff in physiotherapy contexts
5. Perform introductory physiotherapy skills, including movement analysis, manual handling and patient gait training, in a safe and effective manner
6. Develop critical reflection skills in physiotherapy contexts

Subject Content

1. The scope and practice of physiotherapy, including regulatory, ethical and legal frameworks
2. The International Classification of Functioning and physiotherapy
3. Clinical reasoning
4. Effective communication in physiotherapy
5. Critical reflection in physiotherapy
6. Analysis and assessment of human movement
7. Analysis and assessment of gait
8. Clinical case scenarios relevant to physiotherapy practice

REHA 1003 Introduction to Podiatry

Credit Points 10

Legacy Code 400905

Coordinator Sean Lanting (https://directory.westernsydney.edu.au/search/name/Sean Lanting/)

Description The broad aim of this subject is to introduce the work of podiatrists in health care and explain the important role of podiatric services in the community. Students will gain knowledge of professional and legislative requirements and develop skills in clinical and reflective practice. The focus will primarily be on areas designed to prepare students for incorporating the clinical standards for infection control and general clinical assessment skills in preparation for competent and culturally safe practice in clinical subjects.

School Health Sciences

Discipline Podiatry

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Restrictions

Podiatry specific - students will be participating in podiatry related knowledge and skills that apply to podiatric practice subjects and designed to be an integrated part of the suite of subjects where one subject builds upon the competencies that complement subjects in Year 2, 3 and 4.

Learning Outcomes

On successful completion of this subject, students should be able to:

1.Describe the scope of practice of podiatry and the role of the profession within the health care setting.
2.Describe one's own cultural worldview, values and perceptions of health and the implications of these for health care practice.
3.Describe the presentation and treatment of common skin and nail disorders.
4.Explain and perform basic vascular, neurological and biomechanical assessments of the lower extremity and interpret the results.
5.Discuss and apply the framework of infection control standards in the health care environment.
6.Describe the legal and professional standards associated with documentation and management of patient data in clinical settings.
7.Demonstrate appropriate, and safe professional behaviour consistent with that required in a clinical setting.

Subject Content

1. Infection control, Communication
2. Fundamental lower-limb anatomy and biomechanics
3. Peripheral vascular system and assessment
4. Peripheral neurological system and assessment
5. Skin and nail structure and function
6. Clinical documentation
7. History taking, skin and nail assessment
8. Onychopathies
9. Fungal and viral infections
10. Bacterial infections, Footwear
11. Skin neoplasms, Blistering
12. Skin conditions

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	1 hour	30	N	Individual
Reflection	1 hour	30	N	Individual
Intra-session Exam	1.5 hours	40	N	Individual
Participation	By conclusion of teaching period	S/U	Y	Individual
Professional Task	By end of teaching period	S/U	Y	Individual

REHA 1004 Occupational Therapy Practice 1

Credit Points 10

Legacy Code 400907

Coordinator Kristy Coxon (https://directory.westernsydney.edu.au/search/name/Kristy Coxon/)

Description This subject introduces students to the principles of professional practice. Students will be provided with learning opportunities through a variety of experiential and community engagement activities that will begin to develop their skills and competence. Professional competencies addressed include communication, documentation, reflection and professional and ethical behaviour. A professional practice placement is incorporated in this subject. Students will complete practice hours in accordance with World Federation of Occupational Therapy accreditation guidelines.

School Health Sciences

Discipline Occupational Therapy

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Pre-requisite(s) REHA 2006 People Environments and Occupations
COMM 1007 Communication in Health

Restrictions

Students must be enrolled in 4663 Bachelor of Health Science/Master of Occupational Therapy or 4711 Bachelor of Occupational Therapy. This subject is profession-specific, preparing students to practice as an occupational therapist and not relevant as an elective for non-occupational therapy students.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply the principles of safe work practices to occupational therapy work contexts

2. Educate others on a task appropriate to professional practice
3. Describe the role of the occupational therapist in language suitable for a client
4. Conduct an interview and record findings in a format appropriate for entry into health records
5. Demonstrate professional behaviours and self management in a practice setting
6. Reflect on their practice experience using a structured format

Subject Content

1. Professional attitudes and behaviour
2. Professional roles and relationships
3. Professional communication skills
4. Legislative requirements related to practice
5. Professional ethics
6. Preparation for practice context
7. Safe work practices
8. Equipment used by occupational therapist

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and compete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- http://training.gov.au (http://training.gov.au/)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

REHA 1005 Introduction to Speech Pathology Practice

Credit Points 10

Legacy Code 401300

Coordinator Aarifah Bhatti (https://directory.westernsydney.edu.au/search/name/Aarifah Bhatti/)

Description This subject introduces students to the profession of speech pathology, including the regulatory, ethical and legal frameworks which underpin speech pathology practice within the context of the changing health environment. Students will explore and reflect on their developing professional identity with reference

to the Professional Standards for Speech Pathologists in Australia, including the domains of professional conduct, reflection and lifelong learning, and speech pathology practice. In addition, students will have opportunities to develop core skills in communication and professional interaction, including gathering, analysing and reflecting on information through a process of clinical reasoning. Students will also develop introductory level skills in core speech pathology processes such as safe and effective observation, documentation and therapeutic communication through practical activities with academic staff and other students.

School Health Sciences

Discipline Speech Pathology

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Restrictions

Students must be enrolled in the 4763 Bachelor of Speech Pathology or 4764 Bachelor of Speech Pathology (Honours).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the professional standards, regulatory requirements, and ethical guidelines for speech pathology in Australia.
2. Discuss the role of the speech pathologist, in different service delivery contexts in Australia, in optimising communication, swallowing and mealtime experiences for individuals, families and communities.
3. Discuss the factors that contribute to the development of professional identity as a speech pathologist and health professional.
4. Critically reflect on the professional values and competencies that underpin speech pathology practice.
5. Critically observe and record communication interactions.
6. Apply communication skills to effectively communicate with peers and academic staff
7. Demonstrate introductory speech pathology skills in a safe and effective manner within a peer learning environment

Subject Content

1.The speech pathology profession and regulatory frameworks, including Professional Standards, Code of Ethics and National Code of Conduct
2.Speech Pathologists and their role and contribution to optimising communication and mealtime experiences for individuals, families and communities
3.Foundations of clinical reasoning
4.The current and emerging scope of practice in Speech Pathology
5.Respect and responsivity when collaborating with Aboriginal and Torres Strait Islander peoples
6.Communication, swallowing and mealtime management across the lifespan.
7.Holistic frameworks for working with individuals, families and communities.
8.Professional conduct, reflection and lifelong learning, speech pathology practice standards and elements of practice
9.Introduction to clinical observation, recording, and analysis.
10.Introduction to speech pathology practice requirements.

REHA 1006 Communication and Mealtime Foundations

Credit Points 10

Legacy Code 401416

Coordinator Alison Purcell (https://directory.westernsydney.edu.au/search/name/Alison Purcell/)

Description This subject provides an orientation to the foundational concepts that underpin Speech Pathologists' practice in the areas of communication and mealtimes across the lifespan. The subject will introduce students to core practice areas and explore the role of the Speech Pathologist in working with individuals, families and communities across different clinical contexts. Students will have the opportunity to compare and contrast typical and disordered presentation of speech, language, voice, fluency, multimodal communication and swallowing in both children and adults. Throughout the subject, theoretical approaches to working effectively in partnership with individuals, families and models will be illustrated.

School Health Sciences

Discipline Speech Pathology

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Pre-requisite(s) REHA 1005

Restrictions

Students much be enrolled in the 4763 Bachelor of Speech Pathology

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Outline the typical trajectory of communication (speech, language, voice, fluency and multimodal communication) and swallowing development across the lifespan
2. Explain the features of common communication (speech, language, voice, fluency and multimodal communication) and swallowing disorders experienced by children and adults across the lifespan
3. Discuss the role of the Speech Pathologist in evidence-based assessment and treatment of communication and swallowing disorder across the lifespan
4. Translate evidence-based messages about communication and swallowing disorder into an accessible, multimodal format for a lay audience
5. Apply theoretical models of working with individuals, families, and communities in Speech Pathology contexts
6. Reflect on professional and ethical practices that positively influence communication and swallowing outcomes for individuals, families and communities
7. Propose strategies to optimise collaborative partnerships with Aboriginal and Torres Strait Islander peoples and communities in the context of Speech Pathology assessment and management

Subject Content

1. Neurological, cognitive, perceptual, and motor bases of communication and mealtimes
2. Social and environmental bases of communication and mealtimes
3. Typical development of communication (encompassing speech, language, voice, fluency, multimodal communication) and swallowing across the lifespan
4. Common disorders of communication (encompassing speech, language, voice, fluency, multimodal communication) and swallowing across the lifespan
5. Professional and ethical assessment and treatment of communication and swallowing disorders across the lifespan
6. Evidence-based Practice in transdisciplinary care
7. Theoretical models of working with individuals, families and communities
8. Frameworks of observation, clinical reasoning and reflection
9. Working in partnership with Aboriginal and Torres Strait Islander peoples
10. Accessible communication environments and strategies

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Discipline Rehabilitation Therapies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Define recreational therapy in respect to its purpose, role and contribution to human development and individual and collective wellbeing;
2. Examine the history of recreational therapy professional development in Australia and overseas;
3. Recognise recreational therapy practice settings, models and modalities in relation to their application to clients;
4. Identify international and national policies and guidelines relevant to therapeutic recreation practice;
5. Describe major recreational therapy practice areas in Australia and overseas;
6. Engage in self-analysis to identify personal strengths and weaknesses and their alignment with the recreational therapy profession;
7. Summarise the key aspects of the role of a recreational therapist and their relationship with one's own values.

Subject Content

1. History of recreational therapy
2. Recreation therapy practice settings
3. Recreation therapy models and modalities
4. Recreation therapy standards of practice
5. International and national policies guidelines relevant to recreational therapy
6. Ethical practice in recreational therapy
7. Evaluating personal strengths and weaknesses

REHA 1008 Introduction to Leisure and Recreation Theory

Credit Points 10

Legacy Code 401395

Coordinator Arianne Reis (https://directory.westernsydney.edu.au/search/name/Arianne Reis/)

Description Introduction to Leisure and Recreation Theory introduces students to key concepts in leisure and recreation, particularly as they relate to health and well-being. Students will learn about models and theories that assist them in understanding leisure behaviours and recreation practices from different perspectives. The various disciplinary approaches to leisure studies and practice are reviewed, and the multifaceted nature of leisure is explored. In particular, students are encouraged to identify, articulate, reflect upon, and value leisure in their own lives and the lives of others.

REHA 2001 Core Competencies in Physiotherapy Practice

Credit Points 10

Legacy Code 400982

Coordinator Roy Cheung (https://directory.westernsydney.edu.au/search/name/Roy Cheung/)

Description Students build on their knowledge and skills explored in their first 1.5 years of physiotherapy study. It focuses on the core competencies of physiotherapy professional practice, which will be developed through a variety experiential and community engagement learning activities. Professional competencies addressed in this subject include communication, documentation, and reflection, professional and ethical behaviour. In addition, students will develop skills in client assessment, and interpretation of findings to formulate hypothesized problem lists and goals for patients.

School Health Sciences

Discipline Physiotherapy

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) REHA 1002

Co-requisite(s) NATS 2008

Restrictions

Students must be enrolled in 4662 Bachelor of Health Science/Master of Physiotherapy, 4668 Bachelor of Health Science (Honours)/Master of Physiotherapy, 4706 Bachelor of Physiotherapy, 4707 Bachelor of Physiotherapy (Honours) or 4733 Bachelor of Physiotherapy (Honours). Students must have successfully completed 120 credit points of core subjects.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply elementary clinical assessment skills across different areas of physiotherapy practice including core musculoskeletal, neurological and cardiorespiratory physiotherapy in different healthcare contexts.
2. Perform a case sensitive analyse and interpretation of clinical assessment findings to formulate a client-centred problem list considering impairments, and activity and participation limitations.
3. Identify relevant and detailed information from a range of clinical scenarios using client-centred clinical reasoning, with appreciation of professional conduct, ethics, and safety.
4. Communicate effectively for the purpose of gaining informed consent and engaging a person in a therapeutic alliance for person-centred clinical assessment.
5. Apply safe work practices, professional behaviours and self-management strategies for a clinical context.
6. Critically self-reflect and evaluate the performance of the therapist and client in a clinical context.

Subject Content

1. Safe work practices, understanding risk management
2. Client examination, including a patient interview and physical examination underpinned by development of clinical reasoning and decision making
3. Professional communication skills with clients, carers and colleagues
4. Professional and ethical behaviour
5. Preparation for practice in the context of physiotherapy

Special Requirements

Legislative pre-requisites

PLEASE NOTE: Due to Covid restrictions the First Aid requirement is currently suspended. July 2021.

Special Requirements - NSW Health Legislative Prerequisites ~~Pre-requisites~~

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and compete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.

- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- http://training.gov.au (http://training.gov.au/)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Practical Exam	30 minutes	50	Y	Individual
Essay	1,500 words	30	N	Individual
Professional Task	1,000 words	20	N	Individual
Log/ Workbook		Pass/Fail	Y	Individual

REHA 2002 Introduction to Leisure and Recreation Theory

Credit Points 10

Legacy Code 400244

Coordinator Arianne Reis (https://directory.westernsydney.edu.au/search/name/Arianne Reis/)

Description Introduction to Leisure and Recreation Theory introduces students to key concepts in leisure and recreation, particularly as they relate to health and well-being. Students will learn about models and theories that assist them in understanding leisure behaviours and recreation practices from various perspectives, but with a particular focus on insights from sociology and psychology. In particular, students are encouraged to identify, articulate, reflect upon, and value leisure in their own lives and the lives of others.

School Health Sciences

Discipline Rehabilitation Therapies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain key leisure and recreation theories and how they relate to social inclusion/exclusion and human rights in contemporary society
2. Identify the historical developments of leisure and recreation in Australia and elsewhere
3. Critically analyse the socio-cultural factors that influence leisure and recreation behaviour and experiences in contemporary society
4. Identify the range of leisure services available in Australia and how these services fit within the wider political and social context
5. Argue the importance of leisure and recreation for individual and population health and well being

Subject Content

1. History of Leisure
2. Psychology of Leisure
3. Leisure and Class
4. Sociology of Leisure
5. Leisure Service Delivery Systems
6. Leisure and Well-being
7. Leisure and Human Rights
8. Globalisation of Leisure

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Online Debates	4x 400 words each	40	N	Individual
Quizzes	10 x 10 questions	20	N	Individual
Advocacy paper	1500 words	40	N	Individual

REHA 2003 Musculoskeletal Disorders and Imaging

Credit Points 10

Legacy Code 401180

Coordinator Kym Hennessy (https://directory.westernsydney.edu.au/search/name/Kym Hennessy/)

Description This subject will introduce students to clinical and theoretical foundations of musculoskeletal disorders that can impact on the function of the lower extremity and reduce patient quality of life. Musculoskeletal disorders including rheumatic diseases, inflammatory arthropathies, connective tissue disorders, bone disease and tumours will be covered. Advanced assessment evaluation will be taught with a focus on diagnostic imaging techniques including ultrasound, X-rays, magnetic resonance imaging, computer tomography and bone scans. This will assist in the clinical diagnosis of disease processes that present in podiatric settings

School Health Sciences

Discipline Podiatry

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) REHA 1003 AND
REHA 2005 AND
NATS 1022

Co-requisite(s) REHA 2007

Equivalent Subjects REHA 3032 - Podiatric Techniques 1B

Restrictions The subject is Podiatry specific and restricted only to students enrolled in programs 4708 Bachelor of Podiatric Medicine and 4709 Bachelor of Podiatric Medicine (Honours). The subject will be building on previous clinical skills. It is essential that students have been able to demonstrate baseline competencies in theoretical content, patient management, infection control and safe work practices (i.e completed the preceding prerequisite subjects). Students must meet all inherent requirements for the podiatry program.

Assumed Knowledge

Completion of all core subjects to this semester/year of study.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse and interpret the aetiology, pathophysiology and clinical manifestations of rheumatic diseases, bone disease, and neoplasms of the foot, ankle and lower extremity.
2. Identify and demonstrate and examination techniques (history taking, clinical examination and further investigations) needed to construct a differential diagnoses, obtain appropriate diagnostic criteria and implement a treatment program for a range of musculoskeletal disorders affecting the foot, ankle and lower extremity.
3. Distinguish and compare between the diverse range of treatment strategies (pharmacological, physical, mechanical, surgical, alternative etc.) available to treat rheumatic diseases and other musculoskeletal disorders of the foot, ankle and lower extremity.
4. Differentiate and describe the history, development and functionality of current diagnostic imaging modalities, including radiography, ultrasound, MRI, CT or bone scans, available to interpret different musculoskeletal tissue densities and anatomical structures of the foot, ankle and lower extremity.
5. Distinguish and demonstrate between the most appropriate imaging modalities and views needed for the visualisation of particular foot, ankle and lower extremity anatomical structures and common musculoskeletal disorders and develop referral skills for each of these modalities
6. Integrate diagnostic imaging test results with clinical examinations.
7. Identify and appraise the indications and contraindications of a range of diagnostic modalities used in the foot, ankle and lower extremity including radiography, ultrasound, MRI, CT and bone scans.
8. Analyse and compare the legal, ethical and medical ramifications of utilising different diagnostic imaging modalities to investigate common musculoskeletal disorders of the lower extremity.

Subject Content

1. Rheumatic Diseases/Inflammatory Arthropathies
- Osteoarthritis (OA)
- Rheumatoid Arthritis (RA)
- Spondyloarthropathies (SpA) (i.e. Psoriatic Arthritis, Reactive Arthritis, Ankylosing Spondylitis etc.)
- Connective tissue / auto-immune arthropathies (systemic Lupus Erythematosus, Scleroderma, Sjogrens syndrome etc.)
- Crystal Arthropathies (Gout, chondrocalcinosis/Pseudogout, apatite deposition etc.
- Juvenile Idiopathic Arthritis (Jia)
- other (Septic Arthritis, Neuropathic arthropathies etc.)
- For each of these rheumatic conditions, students will be taught appropriate:
Theories related to the aetiology and pathophysiology
Definitions of each condition from a podiatric perspective including clinical manifestations (lower limb joint, tendon, entheses, bursal & extra articular (i.e. skin, nails, nodules/ganglions) involvement and systemic changes to body tissues and systems) and their investigation processes of clinical examination (i.e. tender, swollen, painful joint/tendon counts) and laboratory tests
Management of patients with pharmacological, physical, surgical, alternative therapies, psychosocial support etc.
2. Bone disease
- theories related to The aetiology and pathophysiology of osteoporosis, Pagets disease, osteomyelitis, osteochondroses (i.e. severs disease, Osgood Schlatters disease, Freiberg?fs infarction, Kohlers disease etc.) etc
- Traumatic syndromes (fractures and soft tissue injury)
3. Other disor

Special Requirements

Legislative pre-requisites

Note: Due to Covid Restrictions, the First Aid Requirement is currently not needed.
Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and have a National Police Check, which is required to be submitted before placement. Students must also have submitted a Working with Children Check Student Declaration. Students must hold a valid and current First Aid Certificate from a Registered Training Organisation.
Refer to the Special Requirements website for more information.

REHA 2004 Occupational Therapy Practice 2

Credit Points 10

Legacy Code 400909

Coordinator Beth Cheal (https://directory.westernsydney.edu.au/search/name/Beth Cheal/)

Description This subject provides opportunities for students to understand the wide-ranging practice areas of relevance to occupational therapy. Students will complete a 90-hour project placement across the semester in partnership with diverse health and community-based service providers. Through a variety of experiential, self-directed, and flexible learning opportunities provided through class practicums and practice placement activities, students will develop critical occupational therapy skills and competence in communication, professional behaviours, ethical practice, critical reflection, quality improvement and project management.

School Health Sciences

Discipline Occupational Therapy

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) REHA 1004

Equivalent Subjects LGYA 7061 - Occupational Therapy Clinical Practice 2

Restrictions

Students must be enrolled in 4711 Bachelor of Occupational Therapy or 4712 Bachelor of Occupational Therapy (honours). This is a specialty subject offered as a compulsory core subject of the occupational therapy program. It is profession specific, preparing students to practice as an occupational therapist and not relevant as an elective for non-occupational therapy students.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate professional communication skills with clients, staff and relevant others
2. Apply ethical principles to professional practice
3. Demonstrate professional behaviours
4. Practice self-directed learning strategies relevant to the project placement
5. Critically reflect on professional experiences during their project placement
6. Demonstrate effective project management skills, including time and risk management skills
7. Develop a project proposal using best available evidence
8. Develop a final project report using best available evidence
9. Demonstrate professional communication skills with clients, staff, supervisors and relevant others
10. Demonstrate professional behaviours and ethical practice
11. Demonstrate effective self-directed learning strategies relevant to the practice project
12. Critically reflect on professional experiences during the project placement
13. Demonstrate effective quality improvement and project management skills
14. Apply time and risk management skills in the context of the placement project
15. Develop project documentation in appropriate formats using best available evidence

Subject Content

1. Professional communication skills with clients, staff and relevant others
2. Professional attitudes and behaviour
3. Professional roles and relationships
4. Professional ethics
5. Project management principles
6. Risk management skills
7. Reflection on placement experiences
1. Diverse and role-emerging practice areas
2. Professional communication with clients, staff, supervisors and relevant others to enable completion and dissemination of practice project deliverables
3. Professional behaviour and ethical practice
4. Quality improvement and project management relevant to practice
5. Self-direction, time and risk management
6. Reflection on placement experiences

REHA 2005 Pathomechanics and Podiatric Medicine

Credit Points 10

Legacy Code 401181

Coordinator Sean Sadler (https://directory.westernsydney.edu.au/search/name/Sean Sadler/)

Description This subject will introduce students to clinical/practical and theoretical foundations of human biomechanics of the foot and lower extremity, and the assessment, diagnosis and treatment of common foot and lower extremity pathologies. The subject consists of co-ordinated lectures and practical components to cover the theory and application of foot and lower extremity biomechanics and gait analysis, relevant physical examinations (bones, joints, soft tissues), diagnosing common foot and lower extremity conditions and related treatment options.

School Health Sciences

Discipline Podiatry

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) NATS 1022 AND
REHA 1003

Co-requisite(s) HLTH 2003

Incompatible Subjects REHA 3031 - Podiatric Techniques 1A

Restrictions The subject is Podiatry specific and restricted only to students enrolled in programs 4708 Bachelor of Podiatric Medicine and 4709 Bachelor of Podiatric Medicine (Honours).

Assumed Knowledge

Completion of all core subjects to this semester/ year of study is assumed knowledge
Anatomy is particularly important for the successful completion of this subject. An understanding of the structure and function of the lower

extremity is needed as the focus of this subject is on pathologies of the foot and lower extremity and subsequent assessment, diagnosis and management.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss lower extremity biomechanics in relation to joint structure and function, structural and functional abnormalities, and muscle interaction in static and dynamic environments.
2. Apply relevant skills required for assessment of bones, joints, and soft tissues.
3. Develop and apply an understanding of the gait cycle including joint movement, muscle involvement, and structural linkage.
4. Determine how to assess the gait cycle through visual analysis and instrumented analysis.
5. Exhibit theoretical and practical knowledge of the aetiology, pathology, and clinical presentation of common pathologies of the foot and lower extremity.
6. Review and demonstrate the evidence-based approach for implementing management strategies for common foot and lower extremity pathologies.
7. Discuss and implement the theories of measuring health outcomes.

Subject Content

1. Biomechanics of the lower extremity
- Anatomy of The Lower extremity
- planes and axis of Motion
- gait analysis ? static and dynamic joint position and muscle activation
- introduction to other gait analysis modalities such as pedar, Force plate data collection and software Analyses
- comparison of walking and running patterns
2. Assessment of structural and functional abnormalities
- clinical evaluation of bones, joints and soft Tissues
- introduction to Basic Examination of The hip, knee, leg, ankle and foot

- intrinsic foot abnormalities ? includes forefoot and rearfoot positions and their effects on function and consequent foot changes
- extrinsic foot abnormalities ? includes Lower limb changes, leg length differences and their effects on function and consequent foot changes
- Review of health outcomes to asses and Monitor The impact and Progress of Musculoskeletal pathology
3. Management for osseous, synovial and soft tissue pathologies
- physiological theories of pain and pain management strategies
- Nerve entrapments
- Osseous and synovial pathologies such as fractures, digital deformities, Coalitions
- soft tissue pathologies such as plantar fasciitis, muscle pathology, tendon pathology
- principles for mechanical treatment ? Indications, contraindications, practical use of orthoses, footwear and electrophysical therapies
- introduction to footwear mechanics and modifications

Assessment

REHA 2006 People, Environment and Occupations

Credit Points 10

Legacy Code 400908

Coordinator Melissa Jammal (https://directory.westernsydney.edu.au/search/name/Melissa Jammal/)

Description Analysing an individual's participation in meaningful occupations is an essential clinical reasoning process to be mastered by occupational therapists. Therapists must be able to analyse three factors to do so: the person's abilities; the demands of the occupation; and the impact of the environmental context on participation.
This subject will facilitate the development of these skills so that students can maximise the person-environment-occupation fit to optimise participation for people with a variety of health challenges or disabilities.

School Health Sciences

Discipline Occupational Therapy

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) REHA 1001

Co-requisite(s) HLTH 1001 OR
HLTH 1012

Equivalent Subjects LGYA 7691 - Functional Analysis

Restrictions

Students must be enrolled in program 4711 Bachelor of Occupational Therapy or 4712 Bachelor of Occupational Therapy Honours) or 4663 - Bachelor of Health Science/Master of Occupational Therapy. This is a specialty subject offered as a compulsory core subject of the

occupational therapy program. It is profession specific, preparing students to practice as an occupational therapist and not relevant as an elective for non-occupational therapy students.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse an individualðfs physical, cognitive and psychological abilities for participation in daily occupations.
2. Analyse an individualðfs chosen occupations in terms of the physical, cognitive and psychological requirements of performance.
3. Analyse the sequential steps required to complete everyday occupations.
4. Grade occupations and their sequential steps in terms of their complexity.
5. Analyse the impact of the environmental context on occupations performed in everyday life.
6. Examine how the analysis of people, their occupations and environments builds a foundation for intervention planning in occupational therapy practice.

Subject Content

1. Application of Person-Environment-Occupation models in occupational therapy practice
2. Methods and approaches to analysis and assessment in occupational therapy
3. Analysis of person factors:
- Analysis of physical aspects of participation eg. biomechanical (muscle strength and range of motion); sensory-motor (co-ordination, motor planning, and balance)
- Analysis of cognitive aspects of participation (memory, planning/ sequencing, perception)
- Analysis of psychological aspects of participation eg intrapersonal (self-esteem, confidence, fearfulness, hopelessness, self-awareness); interpersonal (relationships with others)
4. Analysis of the demands of the occupation:
- Analysing occupations into required Steps
- physical, cognitive, and psychological requirements to Perform The occupation
5. Analysis of the environmental context:
- how The environmental context impacts participation in occupations
- social context of participation eg. perceptions of others, social support, social pressures
- cultural context of participation eg. values, beliefs, customs
- physical context of participation eg. lighting, access, surfaces
6. Maximising best fit between the person, the occupation and their environment:
- Understanding how analysis provides A foundation for intervention planning in occupational therapy
- Grading Steps and demands of occupations to maximise participation in everyday life
- A brief introduction to common occupational therapy interventions to enable participation

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

COMM 1007
PUBH 1006
REHA 2005

Co-requisite(s) REHA 2003

Incompatible Subjects LGYA 7036 - Podiatry Pre-clinical Studies

Restrictions

The subject is Podiatry specific and restricted only to students enrolled in 4708 Bachelor of Podiatric Medicine and 4709 Bachelor of Podiatric Medicine (Honours). Students in this subject undertake4 days of scheduled clinical activity. It is therefore essential students have the required clinical and academic knowledge scaffolded throughout content in program codes 4708 and 4709. Students must meet all inherent requirements for the podiatry program.

Assumed Knowledge

Introduction to Podiatry, Anatomy, Communication skills and Biomechanics.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply the principles of professionalism, infection control and work health and safety (WH&S) in theoretical and clinical settings.

2. Apply and interpret appropriate vascular, neurological, biomechanical and dermatological assessment skills for use in the context of common pathological conditions.

3. Demonstrate safe instrument handling, manual skills application, and skills in manufacture of basic orthotic therapies for management of podiatric conditions.

4. Critique the role of culture and culturally safe practice on foot health outcomes across population groups including Aboriginal and Torres Strait Islander peoples.

5. Analyse the characteristics of effective strength-based communication that facilitates the building of respectful, inclusive, and culturally responsive relationships with patients and their families, carers, and other health professionals.

6. Apply reflective clinical practice principles in health care provision.

Subject Content

Communication Skills
1. Introduction to patient history taking and case presentation skills for use in the UniClinic
2. The role of language in culturally responsive health care
3. Development of strengths-based communication skills

Cultural capability training
1.Culture as a determinant of general health and foot health
2.Cultural safety and responsiveness in health care service delivery
3.Colonialism and white privilege and impacts on health care delivery and health care access in Australia

Professional behaviour
1. Overview of legal and professional requirements
2. UniClinic induction including clinic protocols, procedures and documentation
3. Reflective practice

Clinical skill development:
1. Sterilisation and infection control
2. Instrument handling
3. Basic manual podiatry skills
4. Aseptic no-touch technique
5. Basic padding and strapping
6. Manufacture of chairside devices
7. Clinical placement

Non-cast orthoses fabrication skills
1. Principles of non-cast orthoses as a mechanical therapy
2. Orientation into the orthoses laboratory, including risk assessment and WH&S procedures
3. Development of basic workshop skills to fabricate non-cast orthoses

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and compete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- http://training.gov.au (http://training.gov.au/)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Practical Exam	30 minutes	50	N	Individual
Quiz	90 minutes	50	Y	Individual
Participation	Compulsory attendance at all clinical teaching activities	S/U	Y	Individual
Professional Placement Performance	4 days of supervised clinical activity	S/U	Y	Individual
Professional Task	Evidence of compliance submitted by Week 3	S/U	Y	Individual

REHA 2009 Workplace Learning 1 (Therapeutic Recreation)

Credit Points 10

Legacy Code 400246

Coordinator Nicole Peel (https://directory.westernsydney.edu.au/search/name/Nicole Peel/)

Description This subject provides students with the opportunity to apply theoretical and practical knowledge and skills gained in the course to develop their practice and professional behaviours in a therapeutic recreation workplace setting. The subject develops skills for students in working with individuals in a therapeutic recreation program that include assessment, planning, programming and evaluation.

School Health Sciences

Discipline Rehabilitation Therapies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) PUBH 1008

Restrictions

Students must be enrolled in the Bachelor of Health Science - Therapeutic Recreation program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine the standards of communication, professionalism and ethics required for effective therapeutic recreation practice.
2. Communicate the principles, techniques and effectiveness of Recreation Therapy to colleagues, consumers, and the public.
3. Formulate an individual Recreation Therapy program including assessment, planning, implementation and evaluation.
4. Apply professional and ethical standards of practice during Recreation Therapy practice.
5. Utilise skills in task analysis, behavioural observation and functional performance testing.

Subject Content

1. Reflective learning
2. Client-centred practice
3. Overview of Program Planning (Assessment, Planning, Implementation and Evaluation)
4. Therapeutic Recreation Leadership Skills and Strategies for Growth
5. Documentation
6. Planning Theories

Pre-requisite(s) REHA 1007

Equivalent Subjects REHA 3036 Workplace Learning 2

Restrictions

Students must be enrolled in B Health Science in the Recreational Therapy testamur major. This is a specialty subject offered as a compulsory core subject of Bachelor of Health Science-Therapeutic Recreation program. It is profession-specific, preparing students to practice as a recreation therapist and not relevant or appropriate as an elective for non-recreational therapy students.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Conduct an interview and record findings in a format appropriate for entry into health records

2. Examine and judiciously select and evaluate evidence-based recreational therapy assessment instruments used to determine physical, cognitive, emotional, and social functioning of clients
3. Conduct and interpret individual assessments based on appropriate models of practice and in line with appropriate ethical standards as espoused by the profession
4. Collect and analyse data to monitor progress of goals

Subject Content

1.Assessments
2.Task analysis
3.Documentation
4.Measuring outcomes
5.Teaching and learning principles
6.Communication with clients
7.Risk management
8.Standardised testing

REHA 2016 Hearing, Speech and Swallowing Science

Credit Points 10

Legacy Code 301381

Coordinator Manisha Dayal (https://directory.westernsydney.edu.au/search/name/Manisha Dayal/)

Description Speech Pathologists require a sound knowledge of the relevant structures and functions of the central and peripheral nervous system to be able to understand hearing, language and swallowing processes, and how disease or dysfunction affects them. This subject covers the anatomical and vascular structures of the head and neck, their development and functions, medical imaging and neural plasticity. Topics include the somatosensory systems, motor systems, and the role of the brainstem, cranial nerves, and executive systems in controlling hearing, speech, language and swallowing processes. Common congenital, degenerative and acquired neurological disorders are described. This subject will develop knowledge relevant to other subjects related to speech pathology.

School Science

Discipline Speech Pathology

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) NATS 1009

Co-requisite(s) NATS 1010

Incompatible Subjects NATS 3006 Anatomy of the Head Neck
NATS 3037 Neuroanatomy

Restrictions

Successful completion of 60 credit points. Students must be enrolled in 4763 Bachelor of Speech Pathology or 4764 Bachelor of Speech Pathology (Honours).

Assumed Knowledge

Basic knowledge of anatomical and physiological concepts as introduced in relevant first year anatomy & physiology subjects.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and apply anatomical terminology when describing the anatomy and neuroanatomy of the head and neck regions
2. Describe the blood supply to the head, neck and CNS regions
3. Describe and explain the functional anatomy of the musculoskeletal elements of the skull; face; cervical and thoracic regions of the vertebral column; ear; nasal cavity; oral cavity; pharynx and larynx
4. Review the normal structures and functions of the nervous system and relate them to medical imaging, development and developmental processes
5. Describe and explain the normal functional roles of the brainstem, cranial nerves, and executive systems in controlling speech, hearing, language and swallowing processes, and how these

change in congenital, degenerative or acquired neurological conditions

Subject Content

1. Functional gross anatomy of the head, neck and skull using cadaveric specimens and models with special emphasis on the ear, face, oral cavity, larynx, pharynx, and respiratory system
2. Embryological development of head, neck, brain and brainstem regions
3. Functional neuroanatomy of the brain, brainstem, cranial nerves, their spatial relationships with emphasis on regions associated with hearing, speech production and swallowing using cadaveric specimens, models, diagrams/images
4. Introduction to medical imaging techniques e.g. CT & MRI
5. Common congenital, degenerative and/or acquired neurological disorders that result is associated disorders of hearing, speech, and/or swallowing

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Practical Exam	45 minutes	25	N	Individual
Practical Exam	45 minutes	25	N	Individual
Case Study	1000 words	20	N	Individual
Final Exam	2 hours	30	N	Individual

REHA 2017 Communication Changes Across the Lifespan

Credit Points 10

Legacy Code 401423

Coordinator Dharshini Dharshini (https://directory.westernsydney.edu.au/search/name/Dharshini Dharshini/)

Description This subject discusses communication disorder in children and adults arising from physical, sensory, cognitive, linguistic, psychosocial, functional and environmental changes that occur across the lifespan. The subject focuses on assessment of communication skills, interpretation and reporting of findings, diagnosis, and planning of treatment and management priorities within holistic, person-centred frameworks. Students will have the opportunity to explore disordered presentation of speech, language, voice, and fluency and build on emerging clinical reasoning, critical reflection skills, and strategies for working effectively in partnership with individuals, families and communities.

School Health Sciences

Discipline Speech Pathology

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) REHA 1006

Restrictions Students must be enrolled in the 4763 Bachelor of Speech Pathology or 4764 Bachelor of Speech Pathology (Honours).

Assumed Knowledge

To successfully undertake this subject students are expected to have a sound understanding of the scope of practice and professional activities of a Speech Pathologist.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe communication changes that can occur across the lifespan including possible aetiologies, presentation, prognosis and impact on activity and participation
2. Examine disorders of speech, language, voice and fluency in children and adults using appropriate assessment and diagnostic approache
3. Synthesise, appraise and integrate best available evidence on the principles of early intervention in speech pathology
4. Execute beginning level competency in communication assessment, analysis and interpretation (encompassing speech, language, voice and/or fluency) across the lifespan
5. Critically reflect on emerging clinical skills and their influence on the development of effective therapeutic relationships

Subject Content

1. Assessment and diagnosis of speech sound disorders in children
- Articulatory disorders
- Phonological disorders
- childhood Apraxia of speech
2. Assessment and diagnosis of acquired motor speech disorders in adults
- Dysarthria
- acquired Apraxia of speech
3. Analysis of typical and disordered speech across the lifespan
4. Assessment and diagnosis of language and literacy disorders in children
- Developmental language Disorder
- language disorders secondary to other conditions
- social communication Disorder
- Dyslexia
5. Assessment and diagnosis of acquired language and cognitive communication disorders in adults
- Aphasia
- cognitive communication disorders
6. Analysis of typical and disordered language across the lifespan

7. Assessment and diagnosis of voice disorders in children and adults
- Functional voice disorders
- organic voice disorders
- introduction to cancer of The head and Neck
- Laryngectomy
8. Analysis of typical and disordered voice across the lifespan
9. Assessment and diagnosis of stuttering in children and adults
- preschool stuttering
- school Age stuttering
- adolescent and Adult stuttering
10. Analysis and rating of stuttering severity
11. International Classification of Functioning Disability and Health
12. Person and family- centred practice and models of care
13. Principles of Early Intervention

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

REHA 2018 Elements of Language: Analysis and Application

Credit Points 10

Legacy Code 401434

Coordinator Kate Connelly (https://directory.westernsydney.edu.au/search/name/Kate Connelly/)

Description This subject will introduce core linguistic concepts including the sound structure of language (phonetics), how sounds convey meaning (phonology), the formal structure of words (morphology) and sentences (syntax), and the ways in which each of these differ across languages. Emphasis will be placed on the cultural and linguistic diversity of the Western Sydney region, and this will serve as a lens through which the linguistic concepts covered throughout the course will be taught. Students will learn how to transcribe typical and disordered speech using the International Phonetic Alphabet and will be familiarised with how to analyse language at the phoneme, word, and sentence levels. Knowledge will be applied to the exploration of real-world clinical cases. The knowledge acquired within this subject will lay the foundations for understanding, diagnosing and treating speech and language disorders.

School Health Sciences

Discipline Speech Pathology

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Restrictions Students must be enrolled in the 4763 Bachelor of Speech Pathology or 4764 Bachelor of Speech Pathology (Honours).

Assumed Knowledge

It is assumed that students will have an introductory understanding of the core range of practice areas in Speech Pathology (speech, language, voice, fluency, multimodal communication, and swallowing) and awareness of typical patterns of speech and language development across the lifespan.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the concepts of phonetics, phonology, syntax, morphology, semantics and pragmatics and explore their relevance to the field of linguistics and profession of Speech Pathology
2. Accurately transcribe typical and disordered speech phonemically and phonetically, using the International Phonetic Alphabet (IPA)
3. Grammatically analyse typical and disordered language at word, phrase, sentence and clause level
4. Utilize linguistics to problem-solve clinical and research-based case scenarios exploring linguistic development, difference and disorder

Subject Content

1. Dynamics of language: difference and change in how people speak; key concepts in the language sciences and their relevance to Speech Pathology
2. Patterns and levels of speech and language (phonetics, phonology, morphology, syntax, semantics, pragmatics)
3. Use of International Phonetic Alphabet to describe and analyse speech production
4. Use of key concepts in morphology, syntax, semantics and pragmatics to analyse language production
5. Understanding language: speech perception, receptive vocabulary, semantic and syntactic processing
6. Introduction to current research topics in language sciences, with implications for Speech Pathology

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	20 minutes / 20 questions	10	N	Individual
Case Study	2,000 word (Structured Template)	45	N	Individual
Final Exam	2 hours	45	N	Individual
Log/ Workbook	12 x transcription modules (20 questions each)	S/U	Y	Individual

Prescribed Texts

REHA 2019 Optimising Communication for Adults

Credit Points 10

Legacy Code 401421

Coordinator Belinda Kenny (https://directory.westernsydney.edu.au/search/name/Belinda Kenny/)

Description This subject discusses theoretical and evidence-based intervention approaches that underpin speech pathology practice for adults with communication disorders. The subject explores speech pathology management of speech, language, voice and fluency and multimodal communication through studying communication needs with adult cases. Students will have opportunities to plan evidence-based intervention goals and create management plans for individuals, families and communities in a range of clinical contexts. Students will continue to develop core speech pathology practice skills through demonstration, practice and simulation.

School Health Sciences

Discipline Speech Pathology

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) REHA 2017

Restrictions

Students must be enrolled in program 4763 Bachelor of Speech Pathology or 4764 Bachelor of Speech Pathology (Honours).

Assumed Knowledge

Students are expected to have a sound understanding of speech pathology domains and scope of practice. Students undertaking this subject should also have foundational knowledge and skills in the assessment and diagnosis of communication disorders in adults.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Distinguish core features of speech pathology intervention approaches that optimise communication for adults with disorders of speech, language, voice and/or fluency.
2. Practice the role of the speech pathologist in facilitating communication accessible environments in different care settings for adults
3. Utilise best available evidence to develop and justify collaborative management plans for adults with communication disorder (encompassing speech, language, voice and/or fluency)
4. Plan and implement evidence-based speech pathology interventions for adults with communication disorder (encompassing speech, language, voice and/or fluency) at beginning level competency
5. Apply evidence-based approaches to working effectively with communication partners
6. Demonstrate cultural proficiency by facilitating safe and respectful communication environments with Aboriginal and Torres Strait Islander peoples

Subject Content

1. Applying theoretical frameworks when working with adults with communication disorders
2. Managing communication disorders across the continuum of care with adults, families and communities
3. Evidence-based intervention approaches for speech, language, voice, fluency and multimodal communication with adults
4. Working with adults from Aboriginal and Torres Strait Islander backgrounds
5. Planning intervention for adults with speech, language, voice, fluency disorders
6. Responsive management for adults with clinical, psychosocial and environmental presentations of increasing complexity
7. Ethical issues in service delivery for adults with communication disorders
8. Evaluating the outcomes of communication interventions with adults
9. Innovations in optimising communication with adults

Special Requirements

Legislative pre-requisites

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration and a Current

approved first aid certificate valid for your entire program . Use the link to the Special Requirements webpage below for more information.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and compete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- http://training.gov.au (http://training.gov.au/)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Simulation	1 hour	40	N	Individual
Professional Task	2,000 words	50	N	Individual
Professional Task	8 hours observation and 500 word reflection	10	N	Individual

Level Undergraduate Level 2 subject

Pre-requisite(s) REHA 2017

Restrictions

Students must be enrolled in the 4763 Bachelor of Speech Pathology or 4764 Bachelor of Speech Pathology (Honours).

Assumed Knowledge

To successfully undertake this subject students are expected to have a sound understanding of the scope of practice and professional activities of a Speech Pathologist. Students should also have

foundational knowledge and skills in the assessment and diagnosis of communication disorders in children.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Distinguish the core features of speech pathology intervention approaches that optimise communication for children with disorders of speech, language, voice and/ or fluency.
2. Justify the role of the speech pathologist in prevention, education and advocacy about communication disorders (encompassing speech, language, voice and/or fluency) in children.
3. Employ best available evidence to develop and justify collaborative management plans for children with communication disorder (encompassing speech, language, voice and/or fluency).
4. Plan and implement evidence-based speech pathology interventions that optimise communication for children with disorders of speech, language, voice and/or fluency at beginner level competency.
5. Critically reflect on emerging clinical skills and their influence on the achievement of effective therapeutic outcomes for children.
6. Demonstrate cultural proficiency by facilitating safe and respectful communication environments with Aboriginal and Torres Strait Islander peoples.

Subject Content

1. Management and measurement of speech sound disorders in children
- Articulatory disorders
- Phonological disorders
- childhood Apraxia of speech
2. Management and measurement of language and literacy disorders in children
- Developmental language Disorder
- language disorders secondary to other conditions
- social communication Disorder
- Dyslexia
3. Management and measurement of voice disorders in children
- Functional voice disorders
- organic voice disorders
4. Management and measurement of stuttering in children
- preschool stuttering
- school Age stuttering
5. Person and family- centred practice and models of care
6. Designing collaborative management plans
7. Working collaboratively in partnership with Aboriginal and Torres Strait Islander peoples
8. Ethical issues in service delivery for children with communication disorders, and their families
9. Innovations in optimising communication with children

REHA 3001 Cardiorespiratory Physiotherapy

Credit Points 10

Legacy Code 400984

Coordinator Rocco Cavaleri (https://directory.westernsydney.edu.au/search/name/Rocco Cavaleri/)

Description This subject builds on the knowledge and skills developed in the first 2.5 years of physiotherapy study. This subject focuses on client assessment and evidence based management in acute cardiorespiratory physiotherapy contexts. Students will extend and advance the knowledge, competencies and skills in cardiorespiratory physiotherapy clinical reasoning including assessment, interpretation and prioritisation of findings, synthesis of complex information along with the implementation and evaluation of appropriate treatment strategies. This framework will also be applied to the management of patients in Intensive Care, where students will develop specialist knowledge and skills in cardiorespiratory assessment and treatment of acutely ill unstable patients with cardiorespiratory failure and complex comorbidities. This will require strong communication skills, ethical and professional behaviour and an appreciation of interprofessional care required in acute clinical scenarios including intensive care subjects.

School Health Sciences

Discipline Physiotherapy

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) REHA 3003 AND
REHA 3009

Restrictions

Students must be enrolled in 4662 Bachelor of Health Science/Master of Physiotherapy, 4706 Bachelor of Physiotherapy or 4707, Bachelor of Physiotherapy (Honours) or 4733 Bachelor of Physiotherapy (Honours).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Develop a depth of knowledge and understanding of the interaction of complex cardiorespiratory diseases and medical management (including invasive respiratory, cardiovascular and medical support)
2. Identify patient disability as a result of cardiorespiratory disease and advance medical management
3. Conduct an advanced assessment of history taking and physical examination
4. Synthesise complex assessment information, using clinical reasoning and patient-centred approaches: a) to develop and justify an individualised prioritised problem list and treatment plan; b) to implement and critically evaluate the management plan; c) monitor, modify and progress treatment(s) as indicated for acutely ill, unstable clients with complex presentations and or cardiorespiratory failure with and without multi-system co-morbidities
5. Demonstrate safe work practices
6. Demonstrate effective verbal and written communication skills to effectively communicate with clients, peers and academic staff in physiotherapy contexts

Subject Content

Within an acute complex cardiorespiratory physiotherapy context:
1. Select and interpret findings from history taking and advanced cardiac, cardiovascular and respiratory investigations
2. Interpret and synthesise the findings of objective assessments including acute invasive haemodynamic, neurological and respiratory assessment and monitoring (including CVP, PAP, PAOP, ICP, arterial blood gases, respiratory mechanics and work of breathing measures) and other metabolic parameters
3. Demonstrate advanced clinical reasoning skills of interpretation, synthesis and analysis of findings, prioritisation of patients problems and development of treatment plan for acutely ill unstable patients with cardiorespiratory disorders or failure and complex comorbidities
4. Formulate and justify appropriate evidence-based management techniques to reverse or prevent impairments of decreased O2, CO2, and secretion movement and cardiovascular endurance in these patients (including those with respiratory failure requiring assisted ventilation)
5. Select and justify the monitoring, evaluation and progression of management techniques as appropriate
6. Integration of physiotherapy knowledge with the theory of professionalism, ethics, safe work practices and interprofessional communication (clinical reasoning) to plan management strategies for patients with acute complex presentation.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Practical Exam	30 mins	35	N	Individual

REHA 3002 Child and Adolescent Occupations

Credit Points 10

Legacy Code 400162

Coordinator Caroline Mills (https://directory.westernsydney.edu.au/search/name/Caroline Mills/)

Description Students learn about occupational therapy practice with children and youth in different practice settings. This subject examines child development and explores the occupations of children and youth. The impact of family, social, cultural and political contexts on this period of life is analysed. Occupational therapy models, frames of reference, assessments and interventions are applied to practice scenarios. Family-centred practice is a key focus of this subject.

School Health Sciences

Discipline Occupational Therapy

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) REHA 2006 AND
REHA 2004

Restrictions

Students must be enrolled in program 4663 Bachelor of Health Science/Master of Occupational Therapy or 4711 Bachelor of Occupational Therapy or 4712 Bachelor of Occupational Therapy (Honours).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse important occupations in childhood and adolescence which are of concern in occupational therapy practice
2. Analyse typical and atypical child and adolescent development
3. Apply family centred practice principles used by occupational therapists to practice scenarios
4. Evaluate assessments and their application to occupational therapy practice with children and youth
5. Examine a range of occupational therapy interventions for children and youth
6. Critique and apply evidence to practice for children and youth with a variety of occupational needs
7. Critically analyse the impact of family, social, cultural and political contexts on the lives of children and youth

Subject Content

1. Family-centred practice in occupational therapy
2. Child and adolescent development
3. Occupations of childhood and adolescence, e.g. play, self care, school, leisure
4. Environmental contexts (e.g. relevant policies, family and cultural contexts, school, childcare, transitional environments)
5. Common diagnoses and developmental issues in childhood and adolescence (e.g. learning and intellectual disability, developmental delay, neurological (cerebral palsy & brain injury), physical (Duchene Muscular dystrophy, developmental coordination disorder), psychological and social (ADHD, Autism)
6. Paediatric occupational therapy assessments and outcome measures
7. Paediatric occupational therapy interventions (e.g. play interventions, seating and positioning, assistive technology, handwriting)

REHA 3003 Clinical Education (General)

Credit Points 10

Legacy Code 401197

Coordinator Daniel Thomson (https://directory.westernsydney.edu.au/search/name/Daniel Thomson/)

Description This clinical subject builds on the knowledge and skills developed in first 2 years of physiotherapy study. It focuses on generic aspects of physiotherapy professional practice, which will have been developed through a variety experiential and community engagement learning activities. Professional competencies addressed in this subject include communication, documentation, and reflection, professional and ethical behaviour. In addition, students will develop skills in client assessment, interpretation of findings and education. A professional practice placement is incorporated into this subject. This subject requires physiotherapy students to demonstrate assessment, intervention skills and problem solving skills in a general environment. The focus will be on generic skills such as communication, problem solving, manual handling, gait and basic assessment skills. The placement may include ambulatory care, acute care, rehabilitation or paediatrics.

REHA 3004 Clinical Education A (Acute Care)

Credit Points 10

Legacy Code 400985

Coordinator Rocco Cavaleri (https://directory.westernsydney.edu.au/search/name/Rocco Cavaleri/)

Description This clinical education placement will provide the context for students to apply the theoretical and research knowledge and skills learnt in 400984 Cardiopulmonary Physiotherapy. Students will be required to assess and treat clients in the acute care and intensive care settings. Assessments and treatments will focus on improving or preventing client impairments. These may include decreased mobility and function altered by acute illness or injury, which may be combined with a chronic disease or a disability. These assessment and treatments will tend to have a cardiorespiratory physiotherapy focus, but clients may also present with neurological and musculoskeletal conditions which require intervention. Students will, therefore, be expected to integrate knowledge and skills learnt across all physiotherapy-specific units in their provision of client-centred care as well as draw on more general knowledge and skills from earlier stages of the course.

School Health Sciences

Discipline Physiotherapy

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) REHA 3018 AND
REHA 3001 AND
REHA 3016

Co-requisite(s) REHA 4015

Restrictions

Students must be enrolled in 4662 Bachelor of Health Science/Master of Physiotherapy, 4706 Bachelor of Physiotherapy or 4707, Bachelor of Physiotherapy (Honours) or 4733 Bachelor of Physiotherapy (Honours)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Conduct a comprehensive and advanced subjective and objective assessment
2. Analyse case data and develop a prioritised problem list and treatment plan considering impairments, and activity and participation limitation
3. Implement appropriate, evidence-based and effective management strategies
4. Monitor, evaluate and progress management strategies as indicated
5. Communicate effectively for the purpose of gaining informed consent and engaging a person in a therapeutic alliance for person-centred clinical assessment and treatment
6. Apply and demonstrate safe work practices, professional and ethical behaviours and self-management strategies in a clinical context.

Subject Content

Within acute care physiotherapy contexts:
1.Conduct specialist and advanced subjective and objective examination
2.Interpret and analyse findings, develop a client problem list and a treatment plan considering impairments, activity and participation limitations
3.Implement appropriate evidenced?based management strategies
4.Monitoring, modifying, evaluating and progressing treatments as appropriate
5.Communicate effectively for the purpose of gaining informed consent and engaging a person in a therapeutic alliance for person-centred clinical assessment and treatment
6.Apply and demonstrate safe work practices, professional and ethical behaviours and self-management strategies in a clinical context
Acute care physiotherapy contexts refer to inpatient hospital ward settings including intensive care units and medical, surgical, acute cardiorespiratory, neurological, and orthopaedic wards.

REHA 3005 Clinical Exercise Physiology 1

Credit Points 10

Legacy Code 400887

Coordinator Bobby Cheema (https://directory.westernsydney.edu.au/search/name/Bobby Cheema/)

Description In 2017, this subject is replaced by 401145 - Exercise for Health and Disease Prevention. Clinical Exercise Physiology 1 is primarily concerned with teaching students how to design and implement exercise assessments and exercise prescriptions for clinical populations (high-risk). Emphasis is placed on cardiovascular, metabolic, pulmonary and immunological diseases. Subject content relates to how exercise can be applied to prevent, manage and/or treat chronic diseases, informed by an understanding of the pathophysiology and its impact on health status. Students will be involved in designing exercise programs using an evidence-based approach, which will enable a client to achieve optimum results whilst maintaining a high regard for safety, adherence and motivation. Students will be involved in practical sessions aimed at developing the skills necessary for exercise screening, testing and prescription in clinical populations.

School Health Sciences

Discipline Rehabilitation Therapies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) HLTH 2006 AND
BIOS 2037

Equivalent Subjects REHA 3008 - Exercise Prescription For Special Populations

Restrictions

Students must be enrolled in 4658 Bachelor of Health Science (Sport and Exercise Science).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply pre-exercise screening and testing methods for high-risk populations;
2. Understand the physiological principles of exercise testing and prescription as applied to clinical populations;
3. Understand the aetiology and pathophysiology of specific chronic diseases and their impact on health status and quality of life;
4. Design exercise prescriptions to prevent, manage and/or treat chronic diseases;
5. Understand logistical issues that are likely to be encountered when implementing exercise programs in specific clinical populations;
6. Understand electrocardiography (ECG) theory;
7. Demonstrate practical skills including: (a) placement of ECG electrodes for a 12-lead ECG recording, (b) measurement of blood pressure during exercise, and (c) development and interpretation of exercise stress test protocols, including knowledge of contraindications and termination criteria.

Subject Content

1. Coronary artery disease, stroke, hypertension, dyslipidaemia, diabetes, obesity, chronic obstructive pulmonary diseases, asthma, chronic renal failure, cancera, arthritis, osteoporosis, HIV, neurological diseases, cognitive diseases
2. Incidence and prevalence of diseases, relationship to age, gender and ethnicity; aetiology, pathophysiology and risk factors

3. Effects of disease progression and exercise prescriptions on physiological, psychological and functional health status and quality of life
4. Evidence-base for exercise training for the prevention, management and treatment of chronic diseases
5. National and international guidelines for pre-exercise screening and stress testing
6. Use of metabolic equations for the determination of exercise intensity and caloric expenditure
7. Application and interpretation of 12-lead electrocardiograph (ECG)
8. Pharmacological and other management strategies ? implications for exercise
9. Safety and first aid considerations
10. Methods and strategies for behaviour change
11. Design of safe and effective exercise prescriptions based on the latest scientific research on exercise prescription for special populations
12. Overview of the employment options in clinical exercise physiology
13. The role of exercise in disease prevention

REHA 3006 Ergonomics and Work Occupations

Credit Points 10

Legacy Code 401121

Coordinator Beth Mayland (https://directory.westernsydney.edu.au/search/name/Beth Mayland/)

Description The productivity role is a key aspect of adult life for most people. Occupational therapists play a major role in assisting clients who have had their productivity role affected in some way. This subject explores the importance of productivity for adults, in particular those engaged in paid employment. The focus of this subject is the rehabilitation of the injured worker within the context of the work health and safety legislation and the WorkCover case management system. In addition, this subject will explore vocational counselling and rehabilitation for clients with psychosocial, cognitive and physical disabilities.

School Health Sciences

Discipline Occupational Therapy

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) REHA 2006 AND
NATS 1022

Incompatible Subjects REHA 7006 - Ergonomics and Work Occupations

Restrictions Students must be enrolled in 4711 Bachelor of Occupational Therapy or 4712 Bachelor of Occupational Therapy (Honours).

Assumed Knowledge

Human anatomy, functional anatomy.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss the importance of the productivity role for adults ? paid and unpaid and examine the factors impacting on engagement in work for people with cognitive, psychosocial or work related injuries
2. Apply the principles of ergonomics to workplace assessment to client case scenarios
3. Describe the role of the occupational therapist in occupational health and rehabilitation in the context of work health and safety legislation and the WorkCover NSW system
4. Identify the issues related to vocational rehabilitation and return to work from the consumer perspective
5. Apply published evidence related to case management and occupational rehabilitation to solve occupational therapy problems
6. Discuss the impact of common occupational diseases and injuries
7. Apply the case management process to an injured worker or a client requiring vocational rehabilitation

Subject Content

1. Developmental theory on adult work role
2. Ergonomic principles for workplace assessment
3. Common occupational injuries and diseases
4. Work health and safety legislation
5. Principles of case management based on the WorkCover NSW system
6. Functional assessment for different client groups
7. Design of graded return to work programs and vocational rehabilitation programs

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Report	800-1000 words	30	N	Individual
Presentation	10-15 minutes	30	N	Group
Report	1,000 words	40	N	Individual

REHA 3007 Exercise Prescription II

Credit Points 10

Legacy Code 401144

Coordinator Chloe Taylor (https://directory.westernsydney.edu.au/search/name/Chloe Taylor/)

Description This subject focuses on the role of exercise in the functional rehabilitation of musculoskeletal injuries including work and sporting injuries. It covers injury and re-injury prevention strategies;

mechanisms of injury; patho-physiology of injury and repair process; design and evaluation of rehabilitation exercise programs; how the exercise program functions in concert with other methods of injury treatment and management; important pharmacological, communication, psychosocial and cultural considerations; the role of the exercise physiologist in the rehabilitation team; the effects of nervous system disorders and injury on skeletal muscle control, injury and rehabilitation are also considered.

School Health Sciences

Discipline Rehabilitation Therapies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) HLTH 2005

Equivalent Subjects REHA 3011 - Exercise in Musculoskeletal Injury Rehabilitation REHA 3012 - Exercise in Musculo-Skeletal Rehabilitation

Restrictions

Students must be enrolled in 4658 - Bachelor of Health Science (Exercise and Sport Science).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the scope of practice of an accredited clinical exercise physiologist with respect to musculoskeletal injury rehabilitation.
2. State and utilise methods of reducing injury potential in a variety of sports and exercise programs.
3. Understand the causative mechanisms and pathophysiology of musculoskeletal injury and healing as related to each body region.
4. Develop an awareness of the fundamental approaches and complications associated with treatment of common musculoskeletal injuries, including pharmacological management.
5. Apply principles of functional assessment and exercise rehabilitation in the design and implementation of rehabilitation exercise programs for individuals with musculoskeletal injuries and chronic pain conditions.
6. Modify an exercise program within the context of the biopsychosocial model of rehabilitation.
7. Quantify self report scales for assessment of disability, pain, depression, anxiety, and kinesiophobia.
8. Utilise communication skills regarding exercise prescription technique for effective interpersonal relationships with clients, and other professionals involved in musculoskeletal injury rehabilitation.

Subject Content

1. Acute and chronic responses to injury, repair and remodelling.
- haemostatic and inflammatory responses
- muscle, bone, ligament and tendon
- Affects of injury and functional rehabilitation on the Biomechanical properties of muscle, bone, ligament and tendon
- changes in kinaesthetic sensitivity that accompany soft tissue injuries
2. Acute care for musculoskeletal injuries
3. Pharmacology of key medication for musculoskeletal injury and common coexisting conditions
4. Principles of functional assessment
- Medical clearances
- Common tests of functional ability used in screening for musculoskeletal injury, their uses, strengths and limitations
5. Principles and stages of functional rehabilitation
6. Rehabilitation Techniques
- Hydrotherapy
- Therabands
- Fitball
- Resistance
- Endurance Training
- Flexibility
- Core Stability
- Progression and evaluation
7. Design and implementation of functional rehabilitation exercise programs for individuals with common musculoskeletal injuries
- Head and neck
- Upper limb
- Lower Limb
- Torso and back
8. Functional exercise rehabilitation's relationship to other treatments
9. Risks of injury associated with equipment and exercises used in functional rehabilitation of musculoskeletal injuries
- The biomechanics
- Minimising risk
10. Equipment and environment
11. The exercises and technique
12. Individual client factors
13. Sociocultural and health factors and functional rehabilitation, taking into account
- Age
- Gender
- co-existing conditions
- medications
- sociocultural and lifestyle factors etc
14. Evaluating the efficacy of functional rehabilitation programs
15. The professional responsibilities and limitations of ESSA accredited exercise scientists and exercise physiologists in exercise/sports medicine and injury rehabilitation
16. The psychological impact of injury
- implications for rehabilitation
17. The team approach in sports medicine and musculoskeletal rehabilitation; coach and players, conditioners, assistants, medico, physiotherapist, consultants, the workers compensation team
18. Overuse injuries and functional rehabilitation

Special Requirements

Legislative pre-requisites

To be eligible to enrol in this subject, students must submit and had processed:
1) a valid and current Working with Children Check.
2) a valid and current First Aid Certificate from a Registered Training Organisation.
Use the link to the Special Requirements web page below for more information.
Special requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Final Exam	2 hours	40	N	Individual
Essay	1,500 words	30	N	Individual

REHA 3009 Exercise Rehabilitation

Credit Points 10

Legacy Code 400997

Coordinator Rocco Cavaleri (https://directory.westernsydney.edu.au/search/name/Rocco Cavaleri/)

Description Exercise Rehabilitation focuses on the assessment and management of patients using exercise training. All patient groups are covered but there is an emphasis on cardiorespiratory disorders. Professional competencies addressed in this subject include an understanding of the normal physiological responses to exercise, the implications of pathology and exercise. The subject also includes further development and practice of skills in the patient physical examination, and clinical reasoning such that hypothesized problem lists and goals for patients are developed. The prescription of exercise-based interventions with other physiotherapy modalities is also covered. This subject also facilitates the attainment of professional competencies including effective communication skills, ethical reasoning, professional behaviour, and an appreciation of interprofessional care.

School Health Sciences

Discipline Physiotherapy

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) BIOS 2029 AND
REHA 2001 AND
HLTH 2024

Co-requisite(s) REHA 3017 AND
REHA 3015 AND
AND
REHA 3003

Restrictions Students must be enrolled in 4662 Bachelor of Health Science/Master of Physiotherapy, 4706 Bachelor of Physiotherapy, 4707 Bachelor of Physiotherapy (Honours) or 4733 Bachelor of Physiotherapy (Honours). Students in this program are required to participate fully in practical classes. This involves disrobing to shorts and singlet or swim-suit equivalent in mixed gender classes. Students will practice hands-on physiotherapy examination and treatment techniques on both genders, and will personally experience these techniques which will be performed on them by other students and relevant academic staff.

Assumed Knowledge

Knowledge of Human anatomy, human physiology, pathophysiology.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Interpret common cardiorespiratory disorders and related disabilities in the Australian population
2. Describe normal physiological responses and limitations to exercise in a healthy population across the lifespan
3. Differentiate between the benefits, risks, and limitations of exercise in populations with pathology
4. Apply complex clinical assessment skills including chest x-ray interpretation, lung function testing, auscultation, electrocardiographs interpretation and exercise tolerance of patients with cardiorespiratory disorders
5. Apply principles of safe exercise testing in patients with pathology
6. Perform advanced case sensitive analyses and interpretation of clinical assessment findings to formulate a patient-centred treatment plan
7. Prescribe safe and effective exercise training in patients with pathology
8. Evaluate and progress exercises appropriately in healthy populations and those with pathology
9. Apply professionalism, effective communication and educative skills with exercise therapy

Subject Content

1. Develop a depth of knowledge of common cardiorespiratory diseases in the Australian population
2. Identify patient disability in the context of a disease of the cardiorespiratory system
3. Normal physiological responses to exercise
4. Altered physiological responses to exercise in cardiovascular and respiratory pathology
5. Advance history taking and physical examination including chest x-ray interpretation, lung function testing, auscultation, electrocardiographs interpretation, and exercise tolerance
6. Further develop the clinical reasoning skills of interpretation of findings, prioritisation of patient problems, and development of treatment plan
7. Safe and effective guidelines for exercise testing in healthy populations and those with pathology
8. Safely and effectively prescribe exercise to improve the health outcomes and rehabilitate patients in patients with cardiorespiratory and other specific medical conditions
9. Maximising patient adherence and participation in exercise and rehabilitation programs

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

REHA 3010 Exercise for Health and Disease Prevention

Credit Points 10

Legacy Code 401145

Coordinator Bobby Cheema (https://directory.westernsydney.edu.au/search/name/Bobby Cheema/)

Description This subject emphasises teaching students to design safe and effective exercise programs for optimal health, well-being, and the prevention of major chronic diseases. Holistic recovery strategies, including sleep, nutrition and stress-reduction are also explored. Students will learn about the aetiology of major chronic diseases, including cancers, cardiovascular disease, metabolic diseases, neurological diseases and mental illnesses, and how these conditions can be targeted with exercise. Students will also develop the practical skills necessary for screening and testing populations at-risk and with chronic diseases.

School Health Sciences

Discipline Rehabilitation Therapies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) BIOS 2012 AND
HLTH 2005

Equivalent Subjects REHA 3008 - Exercise Prescription For Special Populations REHA 3005 - Clinical Exercise Physiology 1

Restrictions

Students must be enrolled in 4658 - Bachelor of Health Science (Sport and Exercise Science).

Assumed Knowledge

Basic understanding of physiological responses to acute and chronic exercise and an understanding of exercise prescription principles.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the role of exercise, physical activity and supportive lifestyle practices in the aetiology, prevention and management of major, lifestyle-related chronic diseases and disability;
2. Describe the Australian healthcare system and policies, initiatives and agencies for physical activity promotion and disease/disability prevention
3. Utilise evidence-based guidelines and problem-based learning approaches to design, implement and evaluate safe and effective exercise and physical activity programs for higher-risk populations, including cardiovascular risk factors and disease, metabolic diseases, cancers, neurological diseases and mental health disorders
4. Integrate exercise and physical activity recommendations within a broader, holistic approach to lifestyle (behaviour) modification, including such aspects as sleep, stress reduction, general nutrition and play (social and environmental engagement)
5. Implement exercise pre-screening in higher-risk populations;
6. Explain basic electrocardiography (ECG) theory and interpret the results
7. Explain the purpose and implementation of cardiac stress testing
8. Demonstrate: (a) placement of electrodes for a 12-lead ECG recording, (b) measurement of blood pressure during exercise.

Subject Content

1. Global and Australian perspectives on health and chronic disease
2. The role of exercise, physical activity and lifestyle factors in the aetiology, prevention and management of chronic diseases and disability
3. The Australian healthcare system and policies, initiatives and agencies for physical activity promotion and disease/disability prevention
4. Exercise and physical activity programs for higher-risk populations, including cardiovascular risk and disease, metabolic diseases, cancers, neurological diseases and mental health disorders
5. Incorporating holistic approaches to health and well-being, including sleep, stress reduction, general nutrition and play (social and environmental engagement)
6. Exercise pre-screening in higher-risk populations
7. Electrocardiography (ECG) theory, interpretation and practice
8. Blood pressure assessment during exercise
9. Introduction to cardiac stress testing

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

REHA 3012 Exercise in Musculo-Skeletal Rehabilitation

Credit Points 10

Legacy Code 400902

Coordinator Paul Marshall (https://directory.westernsydney.edu.au/search/name/Paul Marshall/)

Description In 2017, this subject is repalced by 401144 - Exercise Prescription II. This subject focuses on the role of exercise in the functional rehabilitation of musculoskeletal injuries including work and sporting injuries. It covers injury and re-injury prevention strategies; mechanisms of injury; patho-physiology of injury and repair process; design and evaluation of rehabilitation exercise programs; how the exercise program functions in concert with other methods of injury treatment and management; important pharmacological, communication, psychosocial and cultural considerations; the role of the exercise physiologist in the rehabilitation team; the effects of nervous system disorders and injury on skeletal muscle control, injury and rehabilitation are also considered.

School Health Sciences

Discipline Rehabilitation Therapies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) HLTH 2006

Equivalent Subjects REHA 3011 - Exercise in Musculoskeletal Injury Rehabilitation

Restrictions

Students must be enrolled in 4658 - Bachelor of Health Science (Sport and Exercise Science).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the scope of practice of an accredited clinical exercise physiologist with respect to musculoskeletal injury rehabilitation.
2. State and utilise methods of reducing injury potential in a variety of sports and exercise programs.
3. Understand the causative mechanisms and pathophysiology of musculoskeletal injury and healing as related to each body region.
4. Develop an awareness of the fundamental approaches and complications associated with treatment of common musculoskeletal injuries, including pharmacological management.
5. Apply principles of functional assessment and exercise rehabilitation in the design and implementation of rehabilitation exercise programs for individuals with musculoskeletal injuries and chronic pain conditions.
6. Modify an exercise program within the context of the biopsychosocial model of rehabilitation.
7. Quantify self report scales for assessment of disability, pain, depression, anxiety, and kinesiophobia.
8. Utilise communication skills regarding exercise prescription technique for effective interpersonal relationships with clients, and other professionals involved in musculoskeletal injury rehabilitation.

Subject Content

In the parts of this subject which cover injuries the following injuries will be covered
1. Acute and chronic responses to injury, repair and remodelling
- haemostatic and Inflammatory responses
- muscle, bone, ligament and tendon
- affects of injury and Functional rehabilitation on The Biomechanical properties of muscle, bone, ligament and tendon
- changes in kinaesthetic Sensitivity that accompany soft tissue injuries
2. Acute care for musculoskeletal injuries
3. Pharmacology of key medication for musculoskeletal injury and common coexisting conditions
4. Principles of functional assessment
- medical clearances
- common tests of Functional ability used in Screening for Musculoskeletal injury, their uses, strengths and limitations
5. Principles and stages of functional rehabilitation
6. Rehabilitation Techniques
- Hydrotherapy
- Therabands
- Fitball
- resistance
- Endurance training
- flexibility
- Core stability
- Progression and evaluation
7. Design and implementation of functional rehabilitation exercise programs for individuals with common musculoskeletal injuries
- head and Neck
- Upper limb
- Lower limb
- Torso and back
8. Functional exercise rehabilitation?fs relationship to other treatments.
9. Risks of injury associated with equipment and exercises used in functional rehabilitation of musculoskeletal injuries
- The biomechanics
- Minimising risk; Equipment and environment, The exercises and technique, Individual client factors
10. Sociocultural and heal

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject, students must have:

1) submitted a Student Undertaking Form and have applied for a National Police Certificate;
2) submitted Working with Children Check Student Declaration;
3) possess a current WorkCover Authority approved First Aid Certificate.

REHA 3013 Intersections of Health, Leisure and Wellbeing

Credit Points 10

Legacy Code 400789

Coordinator Nicole Peel (https://directory.westernsydney.edu.au/search/name/Nicole Peel/)

Description In this subject students will develop knowledge and skills required to facilitate and critically evaluate leisure education interventions to bring about changes in the leisure behaviour of individuals, particularly those at risk of developing or with a diagnosed mental illness. Students will analyse evidence to plan, implement and evaluate leisure education programs.

School Health Sciences

Discipline Rehabilitation Therapies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and evaluate models of leisure education and related concepts.
2. Analyse issues related to promoting health and well-being through leisure literacy and participation.
3. Create, implement and evaluate an evidence-informed leisure education program for clients with a mental illness.
4. Analyse, apply and evaluate educational techniques used in leisure education to promote wellbeing

Subject Content

- Leisure education concepts
- Leisure education in national and international contexts
- Leisure education theory applied, in particular, to individuals with A mental illness
- designing, planning and delivering Leisure education programs for individuals with A mental illness
- Leisure ability model (not changed)
- lived experiences of Consumers and families with A mental illness (not changed)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

REHA 3014 Musculoskeletal Physiotherapy

Credit Points 10

Legacy Code 400999

Coordinator Daniel Thomson (https://directory.westernsydney.edu.au/search/name/Daniel Thomson/)

Description This subject focuses on client assessment and treatment using manual physiotherapy techniques. An emphasis is placed on diagnostic reasoning and evaluation, understanding the implications of pathology in a physiotherapy context, prioritising problems and integrating manual therapy with other physiotherapy treatments. This requires strong communication skills, ethical and professional behaviour and an appreciation of interprofessional care.

School Health Sciences

Discipline Physiotherapy

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) REHA 3004

Restrictions Students must be enrolled in 4662 Bachelor of Health Science/Master of Physiotherapy, 4667 Master of Physiotherapy, and 4668 Bachelor of Health Science (Honours)/Master of Physiotherapy programs. Students in programs 4662 Bachelor of Health Science/Master of Physiotherapy and 4668 Bachelor of Health Science (Honours)/Master of Physiotherapy are to complete prerequisite subject 400982 - Core Competencies in Physiotherapy Practice. Students in program 4667 Master of Physiotherapy are required to complete prerequisite subject 400987 Neurological Physiotherapy Practice. Students in this program are required to participate fully in practical classes. This involves disrobing to shorts and singlet or

swim-suit equivalent in mixed gender classes. Students will practice hands-on physiotherapy examination and treatment techniques on both genders, and will personally experience these techniques which will be performed on them by other students and relevant academic staff.

Assumed Knowledge

Human anatomy, human physiology, and pathophysiology.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Perform a safe and effective subjective and physical examination for a client with a musculoskeletal pathology, dysfunction or disorder.
2. Develop a problem list and list of differential diagnoses for a client with a musculoskeletal pathology, dysfunction or disorder.
3. Develop short and long-term goals for a client with a musculoskeletal pathology, dysfunction or disorder.
4. Demonstrate and explain the clinical reasoning in the use of appropriate physical examination procedures and manual therapy techniques for the client with a musculoskeletal pathology, dysfunction or disorder.
5. Monitor and evaluate the effects of manual therapy on a client with a disability, dysfunction or disorder.
6. Apply professionalism, ethical behaviour and effective communication skills.
7. Integrate manual therapy with exercise and other physiotherapy modalities in the management of a client with a musculoskeletal pathology, dysfunction or disorder.

Subject Content

1. The focus of this subject is on the physiotherapy assessment and treatment of clients with musculoskeletal disorders.
2. Diagnostic reasoning and manual therapy is a major focus, as is prioritising client problems, and integration of other modalities.
3. Students will learn how to assess and treat clients with spinal and peripheral joint dysfunction, bone and soft tissue injuries and neuromuscular disorders.
4. Manual techniques that will be taught will include passive physiological and accessory mobilisations, soft tissue palpation and testing, special diagnostic tests, neurological testing, muscle length and strength measures.

REHA 3015 Musculoskeletal Physiotherapy A

Credit Points 10

Legacy Code 401199

Coordinator Amitabh Gupta (https://directory.westernsydney.edu.au/search/name/Amitabh Gupta/)

Description This subject builds on the knowledge and skills developed in the first two years of physiotherapy study. It focuses on client assessment and evidence-based management in musculoskeletal physiotherapy contexts. This will require strong communication skills, ethical and professional behaviour and an appreciation of interprofessional care. Professional competencies addressed in this subject include developing skills in musculoskeletal physiotherapy assessment, interpretation and prioritisation of findings along with the implementation and evaluation of appropriate treatment strategies.

School Health Sciences

Discipline Physiotherapy

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) REHA 2001 AND
NATS 2008 AND
HLTH 1010 AND
BEHV 1014 AND
HLTH 2024

Co-requisite(s) REHA 3009 AND
REHA 3017 AND
REHA 3003

Equivalent Subjects REHA 3026 - Orthopaedic Physiotherapy

Restrictions

Students must be enrolled in 4706 Bachelor of Physiotherapy and 4733 Bachelor of Physiotherapy (Hons).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Display effective communication skills, ethics and professionalism
2. Conduct a subjective and objective assessment
3. Develop a prioritised problem list and treatment plan
4. Implement appropriate and effective management strategies, including electrophysical agents
5. Monitor, evaluate and progress treatments as indicated
6. Demonstrate safe work practices

Subject Content

Within a musculoskeletal physiotherapy context the content will include development of:
- subjective and objective components of An assessment
- skills such as observation, palpation, joint range of Motion, muscle length, muscle strength, Balance, Coordination, Functional, neurological Examination and Radiological imaging
- The interpretation of findings, Prioritisation of client problems and development of A Problem list and treatment plan
- implementation of appropriate management techniques including education, Exercise, gait rehabilitation, manual therapy and electrophysical agents
- Monitoring, evaluation and Progression of treatments as appropriate including discharge
- Interprofessional communication, ethics and professionalism
- Safe work practices

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are

regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Practical Exam	20 minutes	40	Y	Individual
Report	1 page	10	N	Individual
Intra-session Exam	2 hours	40	Y	Individual
Practical Exam	20 minutes	10	Y	Individual

REHA 3016 Musculoskeletal Physiotherapy B

Credit Points 10

Legacy Code 401200

Coordinator Daniel Thomson (https://directory.westernsydney.edu.au/search/name/Daniel Thomson/)

Description This subject focuses on client assessment and treatment using manual physiotherapy techniques. An emphasis is placed on diagnostic reasoning and evaluation, understanding the implications of pathology in a physiotherapy context, prioritising problems and integrating manual therapy with other physiotherapy treatments. This requires strong communication skills, ethical and professional behaviour and an appreciation of interprofessional care.

School Health Sciences

Discipline Physiotherapy

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) REHA 3003

Equivalent Subjects REHA 3014 - Musculoskeletal Physiotherapy

Restrictions Students must be enrolled in 4706 - Bachelor of Physiotherapy and 4733 - Bachelor of Physiotherapy (Hons). Students in this program are required to participate fully in practical classes. This involves disrobing to shorts and singlet or swim-suit equivalent in mixed gender classes. Students will practice hands-on physiotherapy examination and treatment techniques on both genders, and will personally experience these techniques which will be performed on them by other students and relevant academic staff.

Assumed Knowledge

Human anatomy, human physiology and pathophysiology equivalent to that covered in 400868 - Human Anatomy and Physiology 1, 400869 - Human Anatomy and Phsyiology 2 and 400138 - Pathophysiology 1.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Perform a safe and effective subjective and physical examination for a client with a musculoskeletal pathology, dysfunction or disorder.
2. Develop a problem list and list of differential diagnoses for a client with a musculoskeletal pathology, dysfunction or disorder.
3. Develop short and long-term goals for a client with a musculoskeletal pathology, dysfunction or disorder.
4. Demonstrate and explain the clinical reasoning in the use of appropriate physical examination procedures, exercise and manual therapy techniques for the client with a musculoskeletal pathology, dysfunction or disorder.
5. Monitor and evaluate the effects of manual therapy on a client with a disability, dysfunction or disorder.
6. Apply professionalism, ethical behaviour and effective communication skills.
7. Integrate manual therapy with exercise and other physiotherapy modalities whilst working alongside other health professionals in the management of a client with a musculoskeletal pathology, dysfunction or disorder.

Subject Content

1. The focus of this subject is on the role of physiotherapy assessment and treatment in an inter-professional setting for clients with musculoskeletal disorders.
2. Diagnostic reasoning and manual therapy is a major focus, as is prioritising client problems, and integration of other modalities including exercise.
3. Students will learn how to assess and treat clients with spinal and peripheral joint dysfunction, bone and soft tissue injuries and neuromuscular disorders.
4. Manual techniques that will be taught will include passive physiological and accessory mobilisations, soft tissue palpation and testing, special diagnostic tests, neurological testing, muscle length and strength measures.
5. Students will learn how to prescribe and evaluate the use of safe and effective exercise in clients with musculoskeletal disorders.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

REHA 3017 Neurological Physiotherapy

Credit Points 10

Legacy Code 400986

Coordinator Reem Rendell (https://directory.westernsydney.edu.au/search/name/Reem Rendell/)

Description This subject builds on the knowledge and skills developed in the first 2 years of physiotherapy study. It focuses on client assessment and evidence-based management in neurological physiotherapy contexts. This will require strong communication skills, ethical and professional behaviour and an appreciation of interprofessional care. Professional competencies addressed in this subject include introductory skills in neurological physiotherapy assessment, interpretation and prioritisation of findings, and formulation of basic interventions.

School Health Sciences

Discipline Physiotherapy

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) REHA 2001 AND
NATS 3037 AND
NATS 2008 AND
HLTH 2021 AND
PUBH 2005 AND
HLTH 2024

Co-requisite(s) REHA 3009 AND
REHA 3015 AND
REHA 3003

Restrictions

Students must be enrolled inenrolled in 4706 Bachelor of Physiotherapy or 4733 Bachelor of Physiotherapy (Honours).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the pathophysiology of a variety of neurological conditions.
2. Formulate an appropriate person-centered and evidence-based assessment on an individual with a common neurological condition.
3. Perform assessments on individuals with common neurological conditions in an effective, ethical and professional manner in accordance with the Australian Physiotherapy Standards.
4. Select and incorporate appropriate standardised and non-standardised outcome measures when conducting an assessment for an individual with a common neurological condition.
5. Interpret assessment findings and generate a prioritised problem list.
6. Safely execute manual handling tasks to ensure safety of the therapeutic environment.
7. Formulate an initial evidence-based treatment plan for adults with a common neurological condition.

Subject Content

1. Subjective assessment, investigations, notes.
2. Objective assessment including observation, basic cognition, range of movement, strength, length, sensation, reflexes, spasticity, coordination, proprioception, function, balance and mobility.
3. Task analysis of abnormal movement across a range of everyday upper and lower limb tasks and standardised and non-standardised assessments.
4. Interpretation of findings, prioritisation of client problems and development of a problem list.
5. Design and implementation of basic management techniques including education, and task-related training.
6. Monitoring and evaluation of effectiveness of interventions.
7. Interprofessional communication, ethics, and professionalism.
8. Safe manual handling and environmental set up.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Short Answer	45 minutes	30	N	Individual
Practical Exam	20 minutes	30	Y	Individual
Final Exam	2 hours	40	Y	Individual
Professional Task	N/A	S/U	Y	Individual

Level Undergraduate Level 3 subject

Pre-requisite(s) REHA 3017 AND
REHA 3003

Co-requisite(s) REHA3001
REHA3016

Restrictions

Students must be enrolled in 4706 Bachelor of Physiotherapy or 4733 Bachelor of Physiotherapy (Honours). Students in this program are required to participate fully in practical classes. This involves disrobing to shorts and singlet or swim-suit equivalent in mixed gender classes. Students will practice hands-on physiotherapy examination and treatment techniques on both genders, and will personally experience these techniques which will be performed on them by other students and relevant academic staff.

Assumed Knowledge

Human anatomy, human physiology, neuroanatomy, and pathophysiology.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply prior knowledge of anatomy, physiology, neuroscience and pathology to inform physiotherapy care for people with complex neurological conditions

2. Formulate an appropriate person-centered and evidence-based assessment on an individual with a complex neurological condition to inform treatment

3. Apply Australian Physiotherapy Standards to perform assessments on individuals with complex neurological conditions in an effective, ethical and professional manner.

4. Formulate, perform, monitor and adapt evidence-based interventions to best meet individual needs.

5. Develop a care plan which integrates the skills of a multidisciplinary team to meet individual needs.

6. Prioritise interventions and workload to meet the needs of individuals by taking into consideration the available resources within a rehabilitation setting

Subject Content

Within an adult neurological rehabilitation context:
1. Theoretical framework for assessment and clinical reasoning
2. Subjective assessment, investigations, notes, bed charts and handover notes
3. Objective assessment including observational movement analysis, objective measures of impairments, activity limitations and participation restrictions
4. Evidence-based treatment approaches and management strategies
5. Evaluating treatment outcomes
6. Working effectively within a multidisciplinary team
7. Patient education and advocacy
8. Discharge planning
9. Prioritisation

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

REHA 3019 Occupation and Ageing

Credit Points 10

Legacy Code 400176

Coordinator Ali Gebhardt (https://directory.westernsydney.edu.au/search/name/Ali Gebhardt/)

Description In this unit, students will examine the ageing process using the biopsychosocial model, and reflect on their own attitudes towards ageing, including how social stereotypes of older people must be challenged to promote a positive view of this stage of life. Students will gain knowledge about how occupational performance may be impacted due to ageing, including common conditions assessed and treated by occupational therapists. Students will use research evidence to prepare

occupational therapy intervention plans that promote quality of life and maximum social participation for clients' and their families.

School Health Sciences

Discipline Occupational Therapy

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) REHA 2004 REHA 3021

Restrictions

This is a specialty subject offered as a compulsory core subject of the occupational therapy program. It is profession specific, preparing students to practice as an occupational therapist and not relevant as an elective for non-occupational therapy students. Students must be enrolled in programs 4663 Bachelor of Health Science/Masters of Occupational Therapy and 4664 Master of Occupational Therapy or 4711 Bachelor of Occupational Therapy or 4712 Bachelor of Occupational Therapy.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically examine the process of ageing using the biopsychosocial model.
2. Reflect on and discuss social and personal values and beliefs that shape images of ageing in western society.
3. Examine the occupational performance areas impacted by the ageing process and discuss the changes older people and their families face in this stage of life.
4. Design an occupational therapy client intervention for older people and their families that promotes social participation using best available evidence.
5. Critically examine the community services and supports available for older people and their families to enhance well-being and quality of life.
6. Examine theories on death and dying and the philosophies of hospice and palliative care and apply these to an occupational therapy approach with clients who have reached the end of life.

Subject Content

1. Ageing, ageism and culture
2. Disability and ageing
3. Healthy ageing and health promotion
4. Occupational performance areas impacted by the ageing process: personal (physical, cognitive, and psychological component skills), social (changes to relationships, sexuality, work roles, retirement, financial) and community (housing, support services, driving)
5. Common diagnoses affecting occupational performance in older adults (including palliative care)
6. Evaluating age-related occupational performance problems (including driving)
7. Occupational therapy intervention for age-related occupational performance problems (including care-giving and pressure care) and how aged care reform agendas shape how services are delivered
8. Effective working relationships with older clients and their families
9. Integrating the above content areas to provide occupational therapy services that promote social participation of older people and their families

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

REHA 3020 Occupation and Mental Health

Credit Points 10

Legacy Code 400169

Coordinator Kristy Coxon (https://directory.westernsydney.edu.au/search/name/Kristy Coxon/)

Description This subject provides an understanding of the impact of major mental illnesses and disorders on occupational participation. These illnesses/disorders are examined from varying perspectives including consumer, recovery, population health and biomedical. Mental health legislation, policies, strategies and standards are examined in relation to clinical practice in this field. Occupational therapy theory, assessments, interventions and outcomes are incorporated together with cross-disciplinary approaches and current evidence to provide a foundation for practice in mental health settings.

School Health Sciences

Discipline Occupational Therapy

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) NATS 3037 AND
BEHV 1014 AND
REHA 2006

Restrictions

Students must be enrolled in 4663 Bachelor of Health Science/Masters of Occupational Therapy or 4711 Bachelor of Occupational Therapy or 4712 Bachelor of Occupational Therapy (Honours).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply recovery principles in occupational therapy practice and therapeutic relationships within mental health settings.
2. Analyse the DSM and its use as a classification system to understand identification and management of a range of common psychiatric diagnoses, drawing on literature from alternate perspectives.
3. Analyse the key principles and elements of the Mental Health Act and their application in mental health practice.
4. Explain and document the key elements of mental health and suicide risk assessment processes.
5. Apply the occupational therapy process, models of practice and clinical reasoning using an integrated evidence-based practice approach in a variety of mental health settings.
6. Analyse various aspects of the National Mental Health Strategy, Policy and Standards and their relationship to occupational therapy practice in mental health.

Subject Content

1. Mental health perspectives and approaches (history, recovery and consumer participation, strengths perspective, trauma-informed practice and the DSM)
2. Understanding diagnosis, assessment, management and consumer experience of major mental illnesses/disorders.
3. Therapeutic relationships and recovery from mental illness/disorder.
4. Mental Health Act.
5. Mental Health Assessment and Suicide Risk Assessment.
6. Occupational therapy intervention and evidence-based practice in acute-care settings.
7. Occupational therapy intervention and evidence-based practice in community-care settings.
8. National policy and strategic context.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

REHA 3021 Occupation and Neurology

Credit Points 10

Legacy Code 400171

Coordinator Beth Cheal (https://directory.westernsydney.edu.au/search/name/Beth Cheal/)

Description This subject prepares occupational therapy students to work in a variety of settings with individuals who have a neurological condition. The impact of common neurological conditions on the person, their environment and their occupations will be examined. Students will be exposed to a variety of assessments, interventions and evaluation tools suitable for this client population.

School Health Sciences

Discipline Occupational Therapy

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) Students enrolled in 4663 Bachelor of Health ScienceMasters of Occupational Therapy or 4711 Bachelor of Occupational Therapy 4 must have completed units NATS 3037 - Neuroanatomy and REHA 2006 - People Environment and Occupations

Restrictions

Students must be enrolled in 4663 Bachelor of Health Science/Masters of Occupational Therapy or 4711 Bachelor of Occupational Therapy or 4712 Bachelor of Occupational Therapy (Honours).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Reflect on, and describe the impact of stroke and traumatic brain injury on a client and their carer.
2. Administer and interpret selected assessments and outcome measures which are appropriate for use in neurological rehabilitation.
3. Analyse the performance of clients with stroke and traumatic brain injury, and suggest possible reasons for observable performance difficulties.
4. Describe, demonstrate, and prioritise occupational therapy interventions, based on analysis of client performance and recent research evidence.
5. Develop specific, measurable, client-centred goals.
6. Identify the strengths, weaknesses, and ﷺclinical bottom lineﷺf of key research studies in neurological rehabilitation.
7. Describe community support services which may help people with neurological conditions, and their carers.

Subject Content

- common neurological conditions
- The lived experience of A variety of neurological conditions
- evidence based assessment, intervention and evaluation of neurological conditions
- Critical appraisal of interventions used by occupational therapists in neurological rehabilitation
- community engagement: interventions to address Productivity, social integration and independent Living skills
- impact of neurological conditions on The Roles, occupations and participation of individuals and carers

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are

regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Presentation	20 mins of in-class presentation including demonstration and peer-led discussion	30	N	Group
Quiz	Up to 40 mins	20	N	Individual
Case Study	2500 words	50	N	Individual

REHA 3022 Occupation and the Environment

Credit Points 10

Legacy Code 400165

Coordinator Beth Mayland (https://directory.westernsydney.edu.au/search/name/Beth Mayland/)

Description In this subject students will understand how the environment not only provides a context for the activities people choose to engage in, but also how well they can complete them. Students will learn how the social, cultural, physical and institutional environments that they live in can influence health and well-being, provide structures for social inclusion or exclusion, and enable or limit people to participate in everyday activities. Using an occupational lens, students will gain skills in analysing environmental barriers to occupational performance and modifying environments to increase participation.

School Health Sciences

Discipline Occupational Therapy

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) REHA 2006

Restrictions

Students must be enrolled in 4663 Bachelor of Health Science/Masters of Occupational Therapy or 4664 Master of Occupational Therapy or 4711 Bachelor of Occupational Therapy.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply an occupational therapy model of practice to evaluate environmental influences on occupational performance.
2. Conduct an analysis of the physical, social, cultural and institutional dimensions of the environment and make recommendations to increase community access and participation.
3. Analyse occupational performance issues in the home and make recommendations regarding environmental modifications, consistent with the building and electrical standards, for a range of client case studies.
4. Design home modification diagrams to industry standard using relevant computer assisted drawing programs.
5. Prepare an occupational therapy home modification report, including scale diagrams, for a client.

Subject Content

1. Assessment of social, cultural, physical and institutional aspects of the environment which influence occupational performance.
2. Occupational performance considerations for people living with a disability which influence environmental access and design.
3. Universal design principles.
4. Anthropometrics.
5. Legislative and funding considerations influencing environmental design and modifications.
6. Environmental modifications for the home environment.
7. Technical drawings of physical environments.
8. Documentation of environmental modifications based on occupational performance.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Applied Project	500 word report and resource (eg 5 minute video, 3 page website, or A5 pamphlet or equivalent)	30	N	Group
Report	1,000 words	30	N	Individual
Report	800 words plus 8-12 diagrams (as required)	40	N	Individual

REHA 3023 Occupational Therapy Clinical Practice 3b

Credit Points 10

Legacy Code 400175

Coordinator Lee Zakrzewski (https://directory.westernsydney.edu.au/search/name/Lee Zakrzewski/)

Description This subject will allow students to consolidate academic knowledge and clinical skills. There will be opportunities to actively participate in assessment, analysis, goal setting, treatment/programme planning and occupational therapy intervention under the supervision of an occupational therapist. The placement will allow students to work for 5 consecutive weeks with occupational therapists in one of the many settings where therapists currently practice.

School Health Sciences

Discipline Occupational Therapy

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) LGYA 7062

Incompatible Subjects LGYB 7771 - Clinical Placement 3

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate professional communication skills in the practice setting
2. Practice self-directed learning strategies through the use of a learning contract
3. Reflect on their practice experience using a structured format
4. Demonstrate professional behaviours and self management in a practice setting
5. Prepare documents in a professional format related to practice
6. Conduct and interpret assessments relevant to the practice area
7. Conduct occupational therapy intervention specific to the practice area

Subject Content

- professional behaviour
- communication skills
- Individually negotiated learning Contract
- documentation skills for practice

Special Requirements

Legislative pre-requisites

To undertake this subject, students must comply with the following special requirements:

- Completion of a Prohibited Employment Declaration;
- Criminal Record Check Clearance;
- Provide evidence of compliance with the occupational screening and immunisation policy of NSW Health;
- Students must possess a current First Aid Certificate approved by the Workcover Authority.

REHA 3024 Occupational Therapy Practice 3

Credit Points 10

Legacy Code 400910

Coordinator Bronwyn Gill (https://directory.westernsydney.edu.au/search/name/Bronwyn Gill/)

Description This subject will enable students to consolidate academic knowledge and practice skills. On campus practicums will focus on occupational therapy skill development to equip students with the skills to provide occupational therapy interventions during off-site professional practice placements. There will be opportunities to actively participate in assessment, analysis, goal setting, intervention and evaluation under the supervision of an occupational therapist. Students will experience full time work with occupational therapists in practice settings. Students will complete practice hours in accordance with World Federation of Occupational Therapy accreditation guidelines.

Discipline Occupational Therapy

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) REHA 2004

Co-requisite(s) REHA 3020 AND
REHA 3021 AND
REHA 3002

Equivalent Subjects LGYA 7071 - Occupational Therapy Clinical Practice 3A

Restrictions

Students must be enrolled in 4663 Bachelor of Health Science/Masters of Occupational Therapy or 4711 Bachelor of Occupational Therapy or 4712 Bachelor of Occupational Therapy (Honours)as this is a specialty subject involving a placement and thus students only from occupational therapy programs are permitted.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Perform professional communication skills in the practice setting
2. Practise self-directed learning strategies through the use of a learning contract
3. Reflect on their practice experience using a structured format

4. Perform professional behaviours and self management in a practice setting with the guidance of an occupational therapy fieldwork supervisor
5. Prepare documents in a professional format related to practice under the guidance of an occupational therapy fieldwork supervisor
6. Conduct and interpret assessments relevant to the practice area under the guidance of an occupational therapy fieldwork supervisor
7. Conduct occupational therapy intervention specific to the practice area in conjunction with an occupational therapy fieldwork superviso
8. Utilise occupational therapy skills and techniques in practice settings

Subject Content

1. Professional practice placements
2. Professional behaviours and self management skills
3. Communication Skills
4. Documentation
5. Assessment / Information Gathering
6. Intervention
7. Evaluation
8. Group Skills
9. Specialist and generalist practice skills (eg splinting, groupwork)

Special Requirements

Legislative pre-requisites

Special Requirements - NSW Health Legislative Prerequisites ~~Pre-requisites~~

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and compete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- http://training.gov.au (http://training.gov.au/)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Viva Voce	10 minutes	30	N	Individual
Presentation	3000 words	30	N	Group
Professional Placement Performance	National OT Practice Placement Evaluation tool used to assess performance completed by placement supervisor and satisfactory completion of a minimum of 225 hours	40	Y	Individual

REHA 3025 Occupational Therapy Process

Credit Points 10

Legacy Code 400912

Coordinator Rosalind Bye (https://directory.westernsydney.edu.au/search/name/Rosalind Bye/)

Description This subject provides students with the knowledge and skills to apply the occupational therapy problem-solving process in an evidence-based way, across a diverse range of practice situations. Students will gain knowledge in the application of each stage of the occupational therapy process, learn skills in the selection and implementation of assessments and outcome measures, and undertake intervention planning to suit clients with different occupational needs and health trajectories. Different occupational therapy approaches will be reviewed and students will gain skills in tailoring intervention approaches to suit client need and practice context.

School Health Sciences

Discipline Occupational Therapy

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Students must be enrolled in 4663 Bachelor of Health Science/Masters of Occupational Therapy or 4664 Master of Occupational Therapy. Pre-requisite for 4663 is 400160 - Introduction to Occupational Therapy. Co-requisite for 4664 is 400911 - Occupational Therapy Theory and Practice

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe in detail the occupational therapy problem-solving process of referral, assessment, goal setting, planning, intervention and evaluation of outcomes as it applies to practice situations
2. Determine the conceptual approach to suit specific practice areas and clients with different health trajectories
3. Investigate and select appropriate assessment and outcome measures for specific client groups
4. Implement and interpret commonly used assessments, interventions and outcome measures used by occupational therapists in a variety of practice contexts
5. Formulate SMART goals and develop therapeutic interventions for individuals or groups
6. Apply knowledge and skills of evidence-based practice to each step of this process

Subject Content

1. The occupational therapy problem-solving process: referral, assessment, goal setting, planning, intervention, and evaluation of outcomes
2. Knowledge and skills of evidence-based practice relevant to each step of this process
3. Skills to analyse, select, implement and interpret appropriate assessments and outcome measures
4. Formulation of SMART goals to guide interventions
5. Models of service provision to guide practice: e.g. individual client-centred therapy, family-centred therapy, group work, case management, consultancy
6. Application of the occupational therapy problem-solving process to suit clients with different health trajectories, e.g. a developmental process for children and young people, a rehabilitative process post injury/stroke, a compensatory process for older people or those with declining health, a palliative process for people who are dying.

REHA 3027 Pharmacology for Podiatrists

Credit Points 10

Legacy Code 401182

Coordinator Sean Sadler (https://directory.westernsydney.edu.au/search/name/Sean Sadler/)

Description This subject will cover the pharmacological foundations and principles of drugs with a particular emphasis on those that may be prescribed by podiatrists upon appropriate qualification, including indications, contraindications, drug-drug interactions and adverse drug reactions. Student knowledge of national legislation relating to the effective and safe use of drugs will be developed, alongside an understanding of the process for obtaining prescribing rights and the attendant responsibilities. Upon successful completion of this subject and registration as a podiatrist, students will be eligible to seek further training to gain endorsement to prescribe.

School Health Sciences

Discipline Podiatry

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) NATS 2008

Co-requisite(s) REHA 3028

Restrictions The subject is Podiatry specific and restricted only to students enrolled in programs 4708 Bachelor of Podiatric Medicine and 4709 Bachelor of Podiatric Medicine (Honours). The subject involves pharmacology in the context of podiatric clinical practice. Students will be building on previous clinical skills and knowledge in the podiatry program.

Assumed Knowledge

Completion of all core subjects to this semester year of study.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate knowledge and understanding of national legislation related to the effective and safe use of medicines and the pathways by which podiatrists can gain prescribing rights and the attendant responsibilities.

2. Discuss and review the restricted S2/3/4 drug formularies assessable to endorsed podiatry prescribers
3. Review the physiology and pathophysiology of the immune system including inflammation, the pain response and the infectious process and relate these to the mechanisms of drug action
4. Identify the pharmaceutical agents that are available for the treatment of allergic reactions or infected nail / skin conditions, including proprietary and generic identifications and constituent ingredients
5. Demonstrate an appreciation of indications, contraindications and possible side effects of the following groups of drugs: anti-infective agents, anti-emetics, analgesics, anti-inflammatory agents, antihistamines, general and local anaesthetics
6. Recognise the possible complications and sequelae of drug therapy including adverse drug reactions
7. Nominate and implement appropriate laboratory testing and monitoring techniques for optimisation of drug use
8. Demonstrate a working knowledge of drugs commonly prescribed: anti-anginal, anti-hypertensives, diuretics, anti-peptic ulcerants, antidiabetic agents and anti-gout agents

Subject Content

1. General Pharmacology
- Pharmokinetics and pharmacodynamics
- prescribing drugs and drug prescription protocols
- Minimising drug Abuse
- management and processes related to adverse drug reactions
- Polypharmacy
2. Anti-infective agents
- general principles and mode of action
- specific drug actions
Indications, actions and contra-indications of commonly prescribed antibiotics, anti-mycotic agents and anti-viral agents
3. Analgesics, anaesthetics and anti-emetics
- general principles and mode of action of general and local anaesthetics
- Indications, actions and contra-Indications of commonly administered anaesthetic agents
4. Complications
- general adverse reactions
- pain management -physiological theories of pain and Subsequent management strategies
5. National Legislation
- quality use of medicines
- national medicines policy
- therapeutic guidelines
- national prescribing pathways for health professionals
6. Prescription of drugs in Podiatry
- theories of prescription rights
- pathways to Endorsement for Scheduled medicines
- S2, S3, S4 and S8 drugs

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	60 minutes	25	N	Individual
Quiz	60 minutes	25	N	Individual
Practical Exam	up to 45 minutes	50	Y	Individual
Professional Task	Attendance and participation at all practical sessions	S/U	Y

REHA 3028 Podiatric Practice 1

Credit Points 10

Legacy Code 400929

Coordinator Zainab Al-Modhefer (https://directory.westernsydney.edu.au/search/name/Zainab Al-Modhefer/)

Description This subject is the first of four podiatry clinical practice subjects. Building on previous core and podiatry specific theory subjects this subject introduces students to basic and general clinical skills, including history taking, patient communication, assessment, diagnosis, management and documentation in the clinical environment of common foot disorders under supervision. The student will also be introduced to basic skills in mechanical therapy as part of the clinical therapies component of the subject. Clinical activities will include UniClinic sessions, Clinical Therapies, Tutorials, and External Clinical Placement.

School Health Sciences

Discipline Podiatry

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) REHA 2007 AND
REHA 2003

Restrictions

The Podiatric Practice subjects have been designed to be an integrated suite of subjects where one subject builds on the clinical competencies of the others. Students participate in patient assessment, diagnosis and management. It is essential that students have been able to demonstrate baseline competencies in theoretical content, patient management, infection control and safe work practices (i.e completed the preceding prerequisite subjects including Podiatry PreClinical). The subject is Podiatry specific and restricted only to students enrolled in 4708 Bachelor of Podiatric Medicine and 4709 Bachelor of Podiatric Medicine (Honours). Students must meet all inherent requirements for the podiatry program.

Assumed Knowledge

Completion of all core subjects to this semester/ year of study.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate and apply principles of professional behaviour in the clinical environment.
2. Demonstrate and apply competencies in infection control procedures for use in a patient consultation.
3. Develop and apply clinical skills in taking, presenting and documenting a patient history using UniClinic assessment forms and SOAPE format in the clinical environment.
4. Develop and clinically apply competencies in undertaking cursory vascular, neurological, dermatological and biomechanical assessment techniques for use in the patient consultation in the clinical environment.
5. Develop and demonstrate skills in clinical reasoning, using consolidation of podiatric theory, for use in goal orientated management plans in the patient consultation.
6. Develop and demonstrate basic clinical competencies in nail cutting, scalpel technique, application of dressings using aseptic technique and undertaking sterilisation procedures.
7. Develop competencies in documenting patient consultations and corresponding with other health professionals using SOAPE format, UniClinic assessment forms, patient's records and referral letters in the clinical environment.
8. Demonstrate ability to self-evaluate and appreciate limits of own competence, including willingness to consult with peers and staff.
9. Develop and clinically apply skills in manual fabrication of basic mechanical therapy techniques including taping techniques, chair-side devices and non-cast orthoses.
10. Demonstrate and distinguish work health and safety (WH&S) competencies in the clinical environment and whilst using machinery in the orthotic therapy laboratories.

Subject Content

This is the first of four clinical practice units, the student will participate in basic and general patient assessment, diagnosis, and management of common foot disorders.
The activities will be divided into four areas:
- Patient Clinic (UniClinic)
- Clinical Therapies
- Clinical Tutorials
- External Clinical Placement

1. Patient Clinics (UniClinic)
- All students must be deemed competent in their safety OSCE prior to commencing patient clinics, where students will be heavily supervised by registered practitioners.

2. Clinical Tutorials
Content includes:
a). General Information
- Compliance with Immunisation, First aid and advanced resuscitation CPR certificates, Criminal record and working with children checks, Bulk compliance checks, Inherent Requirements for UniClinic.
b). Professional Behaviour
- Student Clinical Handbook Procedures
- Dress code
- Professional behaviour
c). Infection control
- Infection Control Handbook Procedures
- Sterilisation room
- Clinical protocols
- Sterilisation procedures
- Preparing a work area
- Applying a dressing using aseptic technique
d). Documentation
- Legalities
- Responsibilities
- UniClinic assessment forms and patient record keeping
- SOAPE format
- Goal Orientated Management Planning
- Clinical Checklists
- Referrals and responses
e). Clinical Protocols
- Principles and procedures of clinic
- Consultation thought processes
- History gathering concepts and skills
f). Assessments and Diagnosis
- Cursory neurological
- Cursory vascular
- Cursory dermatological
- Cursory functional and biomechanical
g). Developing basic clinical skills
- Handling sharps
- Needle-stick injuries
- Scalpel work
- Nail treatments
- Padding and strapping
- Silicon devices
- Braces and supportive devices
- Footwear assessment
- taping techniques
- non-cast orthoses
h). Occupational/Work Health and Safety Practical Issues
- Patient safety
- Practitioner safety
- Managing a changing environment
- Risk assessments
i). External placement
- External placement orientation
- Developing learning objectives for placement
- Professional and ethical issues associated with placement
- Assessment and feedback on placement
3. Clinical Therapies
Content includes:
- Principles of mechanical therapy
- Safety factors within the workshop area and using machinery safely
- Non-cast devices and the introduction to off the shelf devices
- Historical aspects on orthoses
- Review of foot posture, foot function and neutral foot position
- Neutral casting and pouring of casts
- Negative and positive casts
- Fabrication custom-made functional orthoses and simple devices
4. External Clinical Placement
Placements will take place in private practice and public sectors.

Special Requirements

Legislative pre-requisites

Special Requirements - NSW Health Legislative Prerequisites ~~Pre-requisites~~

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western

Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and compete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- http://training.gov.au (http://training.gov.au/)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

REHA 3029 Podiatric Practice 2

Credit Points 10

Legacy Code 400930

Coordinator Zainab Al-Modhefer (https://directory.westernsydney.edu.au/search/name/Zainab Al-Modhefer/)

Description This subject will further develop students assessment skills encouraging the student to make the appropriate selection of techniques (biomechanical assessments) and to introduce the student to the diagnosis and management of a variety of simple foot pathologies. In this subject, the second of the four clinical practice units, students will participate in assessments of patients under supervision and continue with the management of foot pathologies. Clinical activities will be divided into five areas: General Medicine Clinic, Biomechanical Assessment Clinical, Tutorial, Clinical Therapies and External Clinical Placement.

Level Undergraduate Level 3 subject

Pre-requisite(s) REHA 3028
PUBH 2005
REHA 3027
REHA 4021

Equivalent Subjects LGYA 7043 - Podiatric Practice 2

Restrictions

Podiatry specific - students will be participating in patient assessment and management. It is essential that they have been able to

demonstrate baseline competencies in patient assessment and infection control procedures. The podiatric practice subjects have been designed to be an integrated suite of subjects where one subject builds on the clinical competencies of the others.

Assumed Knowledge

Completion of all core subjects to this semester/ year of study.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply safe work practices including infection control and work health and safety in a clinical setting.
2. Complete medical records in accordance with the problem-oriented medical record (POMR) system, in a clinical setting.
3. Communicate in a clinical setting including referrals, letter writing, goal orientated management plans and patient education.
4. Apply theoretical knowledge of vascular, neurological and musculoskeletal systems to common foot pathologies in a clinical setting.
5. Identify and diagnose pathology in the foot and lower extremity including vascular, neurological, biomechanical and gait assessment.
6. Manage treatment of patients with common foot and lower extremity pathology.
7. Manufacture custom made functional orthotic devices using techniques including neutral casting, positive cast manufacture, and grinding in a safe manner.

Subject Content

This is the second of four clinical practice subjectss, the student will participate in patient assessment, diagnosis, and management. The activities will be divided into four areas:
(a) UniClinic
(b) Clinical Therapies
(c) Clinical Tutorial
(d) External Clinical Placement

(a) UniClinic
In these clinics, the student will further develop patient assessment, diagnosis, management, and clinical reasoning skills. The patients who attend these clinics will be new and ongoing patients who have basic foot problems, problems associated with an existing medical condition, and mechanical/functional problems. Appropriate assessments and management strategies will be carried out including manufacture of orthoses. The students will be supervised by registered practitioners.
(b) Clinical Therapies
This subject will continue to develop clinical therapies skills, focusing on the manufacture, clinical decision making and issues associated with cast, functional devices for patients. Students will engage in management and safety of a orthoses workshop.
Content will include:
Review of foot posture and foot function
Review of neutral casting and preparation of the positive cast
Discussion of positive casts
Cast evaluation
Manufacture of clinical devices – intrinsic and extrinsic posting, shell grinding
Introduction to issuing and fitting orthotic devices
Prefab and off the shelf devices
Ethical and professional considerations with orthoses
Assessment of footwear – footwear type, footwear assessment, shoe fitting
(c) Clinical Tutorial
Most clinical information will be presented during these sessions. Basic clinical skills and case presentation skills will be further practiced within the group.
Content includes:
Principles of new and review consultation
Rationale for assessment selection
Goal oriented management plans
Health outcome concepts
Education concepts and skills for general foot pathologies
Footwear education concepts and skills
Referral and response letter writing

(d) External Clinical Placement
There will be a placement for 5 days of clinical activities in an external clinical site. The focus of this placement will be on developing assessment, diagnostic, management, and patient interaction skills in a real world clinical setting.

REHA 3030 Podiatric Surgery

Credit Points 10

Legacy Code 401183

Coordinator Zainab Al-Modhefer (https://directory.westernsydney.edu.au/search/name/Zainab Al-Modhefer/)

Description This subject will introduce students to local anaesthesia, the theory of surgical procedures and the practice of skin and nail surgical techniques. As such, this subject allows students to assess patients' suitability for administration of local anaesthesia; understand procedures involved in obtaining voluntary consent, appreciate, and reasonably predict and describe the possible adverse effects of administering local anaesthesia. Surgery will focus the medico-legal requirements, principles of theatre protocol, peri-operative and post-surgical management of the patient and nail and skin surgery, in preparation for student undertaking surgery during Podiatric Practice 3 and 4.

School Health Sciences

Discipline Podiatry

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) NATS 3037
REHA 3028
REHA 3027

Incompatible Subjects REHA 3033 - Podiatric Techniques 2A

Restrictions

Students must be enrolled in 4708 Bachelor of Podiatric Medicine and 4709 Bachelor of Podiatric Medicine (Honours). For registration, students must be competent in performing partial nail avulsions as an accreditation requirement for state registration to practice as a podiatrist. It is essential that students have been able to demonstrate baseline competencies in theoretical content, patient management, infection control and safe work practices (i.e completed the preceding podiatric practice subject and prerequisite subjects).

Assumed Knowledge

Completion of all core subjects to this semester/ year of study.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe and apply the medico-legal and ethical requirements relevant to all aspects of performing invasive procedures in podiatry.

2. Employ a culturally responsive approach to communication and provision of care related to podiatric surgery across population groups including Aboriginal and Torres Strait Islander Peoples.

3. Utilise safe and effective practice in undertaking surgical procedures within the scope of practice of podiatry including pre-operative evaluations, use of local anaesthesia and other forms of pharmacological management, procedure performance, management of adverse events and emergencies, and provision of perioperative care.

4. Facilitate person-centred interdisciplinary care to support safe surgical practice in podiatry and effective surgical referrals.

5.Apply the techniques and principles of surgical and non-surgical options for conditions of the foot and ankle to support provision of person-centred, evidence-based care.

Subject Content

The content of this subject covers podiatric surgery, including.

1.Professional practice
- Medico-legal requirements for use of anaesthesia and performing surgical procedures within the scope of podiatry practice (informed consent, duty of care and documentation, laws relating to the distribution, supply and use of restricted substances).
- Biological safety (review of definitions and terms, rules governing sterility and operating room protocol).
- Culturally responsive communication and care delivery.
- Clinical sessions

2. Regional Anaesthesia
- Theories related to the aetiology and pathophysiology
- Review of the pharmacology of local anaesthetic agents, including the history, classification, chemical structure, and commercial preparations
- Review the anatomy of the nerve fibre and the conduction of the nerve impulse.
- Review the anatomical considerations of nerve and blood supply to the lower limb.
- Review and explore in greater depth the mechanism of action of local anaesthetics.
- Absorption and disposition of local anaesthetic agents.
- Examine the procedures necessary for the preparation of the patient, including the clinical indications, contraindications and special precautions for the use of local anaesthetics.
- Calculation of safe maximum dosages.
- Toxic and side effects of local anaesthetic agents, including overdose, allergic reactions and psychogenic reactions.
- Recognition and treatment of adverse reactions.
- Medico-legal considerations and implications, including documentation, consent and laws relating to the distribution, supply and use of restricted substances.
- Theory and practice of techniques and sites of administration; dorsal and plantar infiltration, digital block, field block (Mayo) and ankle block.

3. Procedures for surgery
- Pre-operative review (systems review, vascular assessment and diagnosis.
- Phenolisation technique for partial and total nail avulsion and the properties of phenol.
- Complications of phenolisation procedures.
- Incisional techniques for partial and total nail avulsion.
- Indications for incisional techniques.
- Blunt dissection /curettage for verrucae.
- Skin biopsy techniques.
- Use of Laser in foot surgery.

4. Introduction to orthopaedics
- Orthopaedic terminology and equipment.
- Wound and bone healing

5. Other surgery
- Soft tissue (skin plasty, neuroma surgery, tendon lengthening)
- Digital surgery (neuroma sequential release).
- Bunion surgery (aims, mechanisms and mechanical effects of hallux valgus surgery; x-ray evaluation of bunions and procedures - Austin, Keller, closing base, Akin, Reverdin, Green-Waterman).
- Hallux rigidus (application of primary surgical principles, silastic implants and fusion of the first metatarsophalangeal joint).
- Other metatarsal surgery (plantar condylectomy, pan-metatarsal head resection and fifth metatarsal surgery).
- Midfoot procedures (Lisfranc articulation surgery, posterior tibial dysfunction, tarsal coalition and talipes equino varus).
- Common rearfoot procedures (heel surgery, triple arthrodesis, ankle reconstruction.

6. Related topics
- Fracture management.
- Jones compression dressings.
- Below knee casting.
- Post-operative complications, e.g. pain and infection.
- Chronic regional pain syndrome.

Special Requirements

Legislative pre-requisites

NOTE: Due to Covid Restrictions, the First Aid Requirement is currently not needed.
Students must hold a valid and current First Aid Certificate from a Registered Training Organisation. Refer to the Special Requirements website for more information
Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

REHA 3035 Therapeutic Recreation Professional Project

Credit Points 10

Legacy Code 400254

Coordinator Nicole Peel (https://directory.westernsydney.edu.au/search/name/Nicole Peel/)

Description This subject will no longer be offered. Student are advised to enrol into the equivalent subject called REHA3041 Facilitation in Recreational Therapy in Spring 2022. The aim of this subject is for students to explore the facilitation of therapeutic recreation interventions. Students will have opportunities to apply practical professional skills, including working through the treatment process and building rapport with individuals and groups. This subject is a hands on subject where students engage in mock activity interventions.

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) HLTH 1001 AND
REHA 3036

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply theories and principles to develop therapeutic/helping relationships.
2. Utilise the recreation therapy framework in individual and group treatment.
3. Apply evidenced based practice in recreational therapy contexts.
4. Apply skills in developing evidence based treatment plans based on clients strengths and resources
5. Design and adapt recreation therapy activities and treatments to meet individual needs.
6. Facilitate therapeutic recreation treatments.

Subject Content

1. Communication techniques in Therapeutic Recreation
2. Instructional techniques in Therapeutic Recreation
3. Evidenced based practice in Therapeutic Recreation
4. Intervention techniques in Therapeutic Recreation
5. Helping and counselling theories in Therapeutic Recreation
6. Facilitation skills in Therapeutic Recreation

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Presentation	15 minutes	15	N	Group
Applied Project	1,000 words	25	N	Individual
Practical	30 minutes	30	N	Both (Individual & Group)
Literature Review	1,500 words	30	N	Individual

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) REHA 2009

Restrictions

This is a specialty subject offered as a compulsory core subject of Bachelor of Health Science- Therapeutic Recreation program. It is profession specific, preparing students to practice as a recreation therapist and not relevant or appropriate as an elective for non-therapeutic recreation students.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply and adapt skills in individual and group leadership-helping techniques
2. Create, analyse, apply and evaluate skills in facilitating a variety of evidence-based treatment interventions or modalities, such as games, exercise, and community reintegration, to meet client outcomes.
3. Modify treatment interventions as appropriate to adapt to changing conditions in the client treatment environment.
4. Analyse and document clients f response to interventions.
5. Evaluate recreational therapy programs for effectiveness and efficiency
6. Employ professional behaviour strategies with staff clients and others
7. Communicate professionally with staff, clients and others

Subject Content

Client assessment
Comprehensive programming
Standardised assessments
Client documentation
Risk assessment
Activity analysis

Special Requirements

Legislative pre-requisites

Special Requirements - NSW Health Legislative Prerequisites ~~Pre-requisites~~

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and compete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- http://training.gov.au (http://training.gov.au/)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

REHA 3043 Recreational Therapy Internship

Credit Points 20

Legacy Code 401400

Coordinator Arianne Reis (https://directory.westernsydney.edu.au/search/name/Arianne Reis/)

Description This subject allows students to integrate and apply all learning accumulated throughout their Recreational Therapy major. It focuses on preparing students to professional practice by including 560h of internship in recreational therapy services in addition to coursework focusing on professional development. Students will have an opportunity to work on their professionalism, assessment skills, planning and implementation of recreation therapy programs and services, evaluation and documentation of client progress and work on their administration skills. This subject is designed to meet all National Council for Therapeutic Recreation Certification (NCTRC) requirements, leading to potential Certified Therapeutic Recreation Specialist (CTRS) designation. The internship may be in any area of recreation therapy practice that serves students' needs and accreditation requirements.

Level Undergraduate Level 3 subject

Pre-requisite(s) REHA 2014 AND
REHA 2015

Restrictions

To enrol in this unit, students must:

- be enrolled in 4656 Bachelor of Health Science and the Recreation Therapy Major
- have completed 160cp

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply ethical conduct standards to recreation therapy practice
2. Consider the policy structures within which recreation therapy practice is situated as well as the political challenges facing the profession
3. Employ professional behaviours and attitudes in practice settings, including communicating effectively with clients, team members, relevant community groups and industry partners.
4. Utilise a range of assessments to set long- and short-term goals
5. Implement and evaluate recreational therapy interventions in the practice setting.
6. Prepare documents in a professional format
7. Practice self-directed learning strategies and reflect on practice experience to continually improve practice

8. Implement career planning strategies, including the development of professional networks and knowledge and skills for entering the workforce

Subject Content

1.Professional practice placement
2.Professional behaviours and self-management skills
3.Communication skills
4.Documentation skills for practice
5.Assessment of individual and group needs
6.Implementation and evaluation of programs for individuals and groups
7.Career planning, professional networks and preparation for entering the workforce

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement. Students must also hold a valid and current First Aid Certificate from a Registered Training Organisation and have submitted a Working with Children Check Student Declaration. Refer to the Special Requirements website for more information.
Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

ON CAMPUS STUDENTS
To be eligible to enrol in a placement subject and attend a health-related placement in this program, students must meet Western Sydney University program requirements **and** Special Legislative Requirements to be assessed in their first year of study against the following:
1. National Criminal History Check: Students must have a current (expiring 3 years from date of issue) check valid for their entire program. A valid National Criminal history check must be an Australia wide check, include the student's full name matching their Student ID card and date of birth and not have any offences listed. If a student has a criminal history identified on their check, they must provide a Clinical Placement Authority Card (CPAC) or conditional letter from the NSW HealthShare Employment Screening and Review Unit. (https://www.health.nsw.gov.au/careers/student_clearance/Documents/appendix-10-student-application.pdf). (https://www.health.nsw.gov.au/careers/student_clearance/Documents/appendix-10-student-application.pdf)
International students must additionally have a translated International Police Check or statutory declaration.
2. A NSW Working with Children Check (WWCC) clearance letter issued under the category of volunteer valid for their entire program.
3. A current approved first aid certificate valid for their entire program. Approved provider courses can be found at http://training.gov.au. (http://training.gov.au/)
4. A completed vaccination/immunisation card with all serology results containing expiry dates and currency must be maintained by the student to ensure compliance for their entire program.
5. NSW Undertaking/Declaration form.
6. Completed any additional health forms required (such as NSW Health Code of Conduct, Health Student Undertaking/Declaration and Tuberculosis (TB) Assessment Tool).
7. Relevant Local Health District specific documentation as requested. Contact your School for further details. Resources are also available on the Placement Hub (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/) website.
.
ONLINE STUDENTS
To be eligible to enrol in a placement subject and attend a health-related placement in your program, students must meet Western Sydney University program requirements **and** Special Legislative Requirements in your state, to be assessed in their first year of study, against the following:
1. National Criminal History Check: Students must have a current check valid for their entire program. A valid National Criminal history check must be an Australia wide check, include the student's full name matching their Student ID card and date of birth and not have any offences listed. If a student has a criminal history identified on their check, they must provide a clearance or authority document or conditional letter from their relevant authorised state organisation.
International students must additionally have a translated International Police Check or statutory declaration.
2. A Working with Children Check (WWCC) clearance letter or state equivalent, valid for their entire program.
3. A current approved first aid certificate valid for their entire program. Approved provider courses can be found at http://training.gov.au. (http://training.gov.au/)
4. A completed vaccination/immunisation card with all serology results attached - currency must be maintained by the student to ensure compliance for their entire program.
5. Undertaking/Declaration form (or state equivalent documents).
6. Additional forms as required per state related to, but not limited to, Tuberculosis Assessment tool, Hepatitis B statutory declaration form, Signed Code of Conduct, Student Deed Poll and all other state equivalent documents as required. Contact your school for further details. Resources are also available on thePlacement Hub (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)web page.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	20 multiple choice questions	5	N	Individual
Presentation	15 min plus slides	20	N	Individual
Reflection	15min presentation plus 500 word reflection	35	N	Individual
Portfolio	2500 words	40	N	Individual
Professional Placement Performance	17 pages	S/U	Y	Individual

REHA 3044 Shaping the Future of Recreational Therapy

Credit Points 10

Legacy Code 401404

Coordinator Joanne Rodrigues (https://directory.westernsydney.edu.au/search/name/Joanne Rodrigues/)

Description Recreation therapists are frequently tasked with solving very complex problems in their practice. This subject uses project-based learning to provide students with the opportunity to work collaboratively to solve an industry-driven problem, using systematic and evidence-based techniques to do so. Students will be challenged to think broadly to take into account the interrelationships among a full range of causal factors underlying the problem at hand, and will be required to use more collaborative and innovative approaches to solve industry challenges.

School Health Sciences

Discipline Rehabilitation Therapies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) REHA 2014 AND
REHA 2015

Restrictions

This is a capstone subject of study for the Recreational Therapy Testamur major. Therefore, students must have completed 160 credit points of the program prior to enrolling in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply problem-solving skills to an actual health challenge
2. Appraise literature and information sources that are related to an identified problem
3. Employ appropriate methods and evaluation processes to create a solution-based proposal
4. Articulate complex recreation therapy approaches and solutions to different audiences
5. Demonstrate innovative thinking in creating a solution to a recreation therapy challenge

Subject Content

1. Defining goals, purpose and scope of health policy in relation to Recreation Therapy
2. Ideological approaches to health including health care provision
3. Structural interest groups, pressure groups and political processes
4. The role of Advocacy in creating change to public policy for Recreation Therapy
5. Community participation/active Citizenship and empowerment in health

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Critical Review	1,000 words	30	N	Individual
Applied Project	1,000 wordsWritten policy brief 800 words. Slideshow presentation video recording 15 minutes.	40	N	Individual
Applied Project	500 words	30	N	Individual

REHA 3045 Communication Access in Communities

Credit Points 10

Legacy Code 401425

Coordinator Areej Asad (https://directory.westernsydney.edu.au/search/name/Areej Asad/)

Description This subject will introduce the concept of 'Communication access for All' and focus on strategies to create communication accessible environments that promote inclusion of individuals with communication support needs across the lifespan. The scope of the subject will encompass the features of communication accessible environments, multimodal communication methods, assistive technology, and Augmentative and Alternative Communication

(AAC). Students in Speech Pathology will develop competency in the assessment, management, measurement, and support of complex communication in individuals across the lifespan, and will explore how capacity building models and strategies can enhance the activities and participation of individuals, families and communities.

School Health Sciences

Discipline Speech Pathology

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) REHA 2019 AND
REHA 2020

Restrictions

Students must be enrolled in 4763 Bachelor of Speech Pathology, 4764 Bachelor of Speech Pathology (Honours), or 4788 Bachelor of Speech Pathology (Honours).

Assumed Knowledge

In order to successfully undertake this subject students are expected to understand multimodal communication methods and individual, family focused and community-based models of providing services.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Justify the concept of Communication Access by integrating the perspectives and experiences of individuals, families and communities.
2. Design a strategy to promote communication accessible environments within a local context, using a Community Capacity Building framework.
3. Plan and justify areas of Speech Pathology assessment for an individual with complex communication needs
4. Analyse, interpret, and integrate assessment information to diagnose the nature of an individualðfs complex communications needs and develop functional communication goals
5. Formulate and evaluate speech pathology management plans which include evidence-based

Subject Content

- communication access
- communication Accessible environments
- Accessible written information ? plain English, Easy English, patient Friendly
- Models of community capacity Building and Advocacy
- assessment and Diagnosis of complex communication needs / communication support needs
- strategie

Assessment

REHA 3046 Optimising Mealtimes Across the Lifespan

Credit Points 10

Legacy Code 401424

Coordinator Rebecca Smith (https://directory.westernsydney.edu.au/search/name/Rebecca Smith/)

Description This subject discusses theoretical and evidence-based approaches to assessment and management of a diverse range of swallowing disorders in infants, children and adults. Students will have opportunities to interpret and synthesise assessment findings and create management plans to optimise mealtime experiences by exploring cases that address the needs of individuals with swallowing disorders, their families and communities. Students will plan and implement core speech pathology assessment and therapy skills, related to swallowing and mealtime management through observation and practice. Evidence-based, interdisciplinary and holistic approaches to swallowing and mealtime management will be integrated during this subject.

School Health Sciences

Discipline Speech Pathology

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) REHA 1006 AND
REHA 2016

Restrictions

Students must be enrolled in the 4763 Bachelor of Speech Pathology or 4764 Bachelor of Speech Pathology (Honours)

Assumed Knowledge

Students are expected to have acquired introductory knowledge and skills in speech pathology practice before undertaking this subject. Students will be expected to have knowledge of the anatomical, neurological, physiological, cognitive, and perceptual bases of swallowing and mealtimes and understand typical and atypical development and changes in swallowing function across the lifespan.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Integrate knowledge of core anatomical, physiological and neurological factors that impact swallowing development and functioning, with clinical information, to formulate appropriate assessment approaches for infants, children and adults.
2. Synthesise and analyse case information, clinical and instrumental assessment data, to inform swallowing diagnosis and prognosis for individuals presenting with a swallowing disorder
3. Implement principles of Evidence-based Practice (EBP) and knowledge of the International Dysphagia Diet Standardisation Initiative (IDDSI) Framework to develop well-reasoned mealtime management plans with individuals, families and carers
4. Conduct an independent Oral-Motor Assessment,(OMA) within a structured clinical setting, at developing level competency.
5. Employ interdisciplinary communication and model swallowing and management strategies within a structured clinical setting, at developing level of competence
6. Critically reflect on the ethical and legal responsibilities of speech pathologists working with individuals who have swallowing disorders

Subject Content

1. Anatomy, physiology and neurology of swallowing in infants, children and adults
4. Clinical decision making to inform diagnosis, prognosis and management for intervention for infants, children and adults with diverse swallowing disorders
5. Planning evidence-based intervention for children and adults with swallowing disorders including oral hygiene, dentition, saliva management, sensory issues, compensatory and rehabilitation strategies, and non-oral nutrition and hydration
6. Interprofessional team approaches to enhance swallowing and mealtime experiences for children and adults
7. Responsive mealtime management of children and adults with complex clinical, psychosocial and environmental issues
2. Clinical (e.g., protocols, screening) and instrumental (e.g. Video Fluroscopic Swallowing Study, Fiberoptic Endoscopic Evaluation of Swallow) approaches to swallowing assessment
3. Applying theoretical frameworks (e.g., International Classification of Functioning, Disability & Health) and evidence-based approaches to identify and manage issues involving each phase of swallowing to facilitate safe, enjoyable mealtimes

Special Requirements

Legislative pre-requisites

First Aid Certificate.

Assessment

REHA 3047 Speech Pathologists Working with Adults, Families and Communities

Credit Points 10

Legacy Code 401433

Coordinator Belinda Kenny (https://directory.westernsydney.edu.au/search/name/Belinda Kenny/)

Description The subject adopts a problem based learning approach towards speech pathology management of communication, hearing and mealtimes through collaboration with individual adults, families and communities. Students will synthesise their knowledge and skills in adult speech, language, voice, fluency and swallowing and multimodal communication in speech pathology practice to manage complex cases. They will engage with problem based learning experiences that require integration of theoretical and evidence based intervention approaches with collaborative person and family and centred practice. Students will critically evaluate of models of service delivery in response to community needs.

Pre-requisite(s) REHA 2019

Co-requisite(s) REHA 3049

Restrictions

Students must be enrolled in 4763 Bachelor of Speech Pathology, 4764 Bachelor of Speech Pathology (Honours), or 4788 Bachelor of Speech Pathology (Honours).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the clinical utility and effectiveness of individual, targeted and universal assessment and intervention strategies in Speech Pathology Practice
2. Plan and implement an assessment of communication and swallowing for an adult client at developing level competency
3. Integrate, analyse and interpret assessment information to diagnose the nature and severity of a communication and/or swallowing/mealtime disorder
4. Formulate and rationalise intervention plans to address disorders of communication and/or swallowing /mealtimes in adult clients using best available evidence, sound clinical reasoning and cultural responsiveness
5. Implement and evaluate outcomes of speech pathology intervention for disorders of communication and/or swallowing / mealtime with adult clients at developing level competency
6. Create professional, clinical resources to plan and provide quality Speech Pathology services to adult clients, their families and communities

Subject Content

Working with adults in diverse professional contexts, including private practice, hospitals, not for profit organisations, rural settings

1. Exploring person centred and family centred practice with complex cases

Evidence based models of service delivery applied to caseload management with adults.

2. Problem-based based clinical reasoning in response to complex speech pathology practice settings including rural and remote settings, aged care facilities, workplaces, group homes and palliative care
3. Collaborating with communication partners, interdisciplinary professionals, therapy aides and volunteers to optimise individual?fs communication and mealtime experiences.
4. Facilitating transitions between health care services and the community; access and resource issues
5. Working with adults and families for whom English is an additional language or

Level Undergraduate Level 3 subject

Pre-requisite(s) REHA 2020

Co-requisite(s) REHA 3049

Restrictions

Students must be enrolled in the 4763 Bachelor of Speech Pathology or 4764 Bachelor of Speech Pathology (Honours)

Assumed Knowledge

Students undertaking this subject need a sound understanding of assessment and management of paediatric communication disorders.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the clinical utility and effectiveness of individual, targeted and universal assessment and intervention strategies in Speech Pathology Practice

2. Design an assessment of communication and swallowing for a paediatric client
3. Implement an assessment of communication and swallowing for a paediatric client, at developing level competency
4. Integrate, analyse and interpret assessment information to diagnose the nature and severity of a communication and/or swallowing/mealtime disorder
5. Formulate intervention plans to address disorders of communication and/or swallowing /mealtime disorder in paediatric clients using best available evidence
6. Implement and evaluate speech pathology intervention to address disorders of communication and/or swallowing /mealtime in paediatric clients, at developing level competency
7. Create professional, clinical resources to support delivery of Speech Pathology services to paediatric clients, their families and communities.

Subject Content

1. Family centred practice
2. Individual, targeted and universal assessment and intervention strategies in paediatric Speech Pathology practice
3. Community capacity building and advocacy
4. Assessment and diagnosis of communication and swallowing/ mealtime disorder in children
5. Planning and implementation of evidence based intervention for communication and swallowing/mealtime disorder in children
6. Evaluation of evidence based intervention for communication and swallowing/mealtime disorders in children
7. Prevention, advocacy and education about evidence based approaches to optimise communication and swallowing/mealtimes for children
8. Discussions about dosage; Form, Frequency, Intensity, Duration
9. Working with children for whom English is an Additional Language or Dialect (EAL/D)
10. Working with interpreters, translators and communication advocates and supports
11. Understanding childhood onset disability (e.g. Cerebral palsy, Developmental Disability; Autism Spectrum Disorder; Intellectual Disability; Specific Learning Disorder; Genetic and Chromosomal Disorders)
12. Neuroprotection, Neuroplasticity, Motor Learning
13. Craniofacial anomalies
14. Management of paediatric feeding in community contexts
15. Speech Pathology service delivery in schools; local, state and national perspectives and contexts
16. Speech Pathology service delivery in the context of the National Disability Insurance Scheme (NDIS)

REHA 3049 Speech Pathology Practice 1

Credit Points 10

Legacy Code 401426

Coordinator Ellie Sugden (https://directory.westernsydney.edu.au/search/name/Ellie Sugden/)

Description This clinical placement subject will operationalise the knowledge and skills developed in the first three years of speech pathology study, to provide appropriate and holistic care for clients of speech pathology across the lifespan, their families and communities. Students will undertake 21 days of supervised clinical practice in a range of authentic speech pathology contexts including, but not limited to, hospitals, community health settings, schools / preschools / day-care, disability and/or not for profit organisations, private practice or on-campus settings. Professional competencies addressed in this subject include communication, documentation, reflection and professional and ethical behaviour. In addition, students will develop skills in client assessment, interpretation of findings, planning and implementation of speech pathology services, education, advocacy and advice. Students will be working at a near/approaching intermediate level of competency.

School Health Sciences

Discipline Speech Pathology

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) REHA 2019 AND
REHA 2020

Co-requisite(s) REHA 3046

Restrictions Students must be enrolled in 4763 Bachelor of Speech Pathology or 4764 Bachelor of Speech Pathology (Honours).

Assumed Knowledge

Students will need to have sound understanding of development and disorder of communication and swallowing across the lifespan. Students will be expected to independently conduct common speech pathology assessments such as oromusculature and cranial nerve assessment, case history interview, speech and language screening (developmental and acquired) as well as transcribe and analyse speech and language using accepted conventions.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Plan, implement, evaluate and modify speech pathology assessment and management services for clients across the lifespan to a competency level that is ⁄eApproaching Intermediate⁄f as evidenced by the COMPASS? Competency Assessment Tool
2. Employ communication, professionalism, reasoning and lifelong learning at an ⁄eIntermediate Level⁄f as evidenced by the COMPASS? Competency Assessment Tool
3. Apply safe and ethical speech pathology practice across all contexts
4. Critically discuss the assessment, management, progress and prognosis of a selected client in line with ethical and medico-legal expectations of the profession
5. Critically reflect on emerging professional role and competence in the assessment, management, progress and prognosis of a selected client using evidence-based approaches to clinical reasoning and reflection

Subject Content

1. During clinical placements:
- students will have experiences Working with clients in one or more speech pathology range of practice areas, including speech, language, voice, fluency, multimodal communication and swallowing
- developing Competency in planning, implementation, and interpretation of speech pathology assessment, planning, implementation, and Monitoring of speech pathology services, and/or participation in prevention, education, and Advocacy activitie
2. During workshops:
Students will engage in interactive learning experiences that integrate academic and clinical competencies in the following topics
- assessment and methods of communication and swallowing analysis

- goal setting and evidence based service delivery
- documentation and report writing
- Models of consultation and community capacity Building
- outcome measurement and evaluation
- quality improvement and quality assurance
- supervision, lifelong learning and reflection
- professionalism, self-care, and professional portfolio development.

Special Requirements

Legislative pre-requisites

To be eligible to enrol in this subject and attend a health-related placement in your program, students must meet Western Sydney University course requirements **and** Special Legislative Requirements in your state, to be assessed in their first year of study, against the following:

1. National Criminal History Check: Students must have a current check valid for their entire program. A valid National Criminal history check must be an Australia-wide check, include the student's full name matching their Student ID card and date of birth and not have any offences listed. If a student has a criminal history identified on their check, they must provide a clearance or authority document or conditional letter from their relevant authorised state organisation. International students must additionally have a translated International Police Check or statutory declaration.
2. A Working with Children Check (WWCC) clearance letter or state equivalent, valid for their entire program.
3. A current approved first aid certificate valid for their entire program. Approved provider courses can be found at http://training.gov.au.
4. A completed vaccination/immunisation card with all serology results attached - currency must be maintained by the student to ensure compliance for their entire program.
5. Undertaking/Declaration form (or state equivalent documents).
6. Additional forms as required per state related to, but not limited to: Tuberculosis Assessment tool; Hepatitis B statutory declaration form' Signed Code of Conduct; Student Deed Poll and all other state equivalent documents as required. Contact your school for further details. Resources are also available on the Placement Hub web page. https://www.westernsydney.edu.au/placements_hub (https://www.westernsydney.edu.au/placements_hub/)
7. Relevant Local Health District specific documentation as requested. Contact your School for further details. Resources are also available on the Placement Hubwebsite: https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Some external sites may have additional requirements. Students will be advised of any such specified requirements which must be complied with before commencing clinical placements.

On successful completion of this subject, students should be able to:

1. Plan, implement, evaluate and modify speech pathology assessment and management services for clients across the lifespan to a competency level that is eIntermediatef as evidenced by the COMPASS ? Competency Assessment Tool
2. Employ communication, professionalism, reasoning and lifelong learning at an eEntry Levelf competence as evidenced by the COMPASS ? Competency Assessment Tool
3. Practice safe and ethical speech pathology practice across all contexts
4. Critically discuss the assessment, management, progress and prognosis of a selected client in line with ethical and medico-legal expectations of the profession
5. Critically reflect on emerging professional role and competence in the assessment, management, progress and prognosis of a selected client using evidence-based approaches to clinical reasoning and reflecti

Subject Content

1. During clinical placements:
- students will have experiences Working with clients in one or more speech pathology range of practice areas, including speech, language, voice, fluency, multimodal communication and swallowing
- developing Competency in planning, implementation, and interpretation of speech pathology assessment, planning, implementation, and Monitoring of speech pathology services, and/or participation in prevention, education, and Advocacy Activities
2. During workshops:
Students will engage in interactive learning experiences that integrate academic and clinical competencies in the following topics:
- assessment and methods of communication and swallowing analysis

- goal setting and evidence based service delivery
- documentation and report writing
- Models of consultation and community capacity Building
- outcome measurement and evaluation
- quality improvement and quality assurance
- supervision, lifelong learning and reflection

- professionalism, self-care, and professional portfolio development

Special Requirements

Legislative pre-requisites

To be eligible to enrol in and attend a health-related placement in your program, students must meet Western Sydney University course requirements **and** Special Legislative Requirements in your state, to be assessed in their first year of study, against the following:
1. National Criminal History Check: Students must have a current check valid for their entire program. A valid National Criminal history check must be an Australia wide check, include the student's full name matching their Student ID card and date of birth and not have any offences listed. If a student has a criminal history identified on their check, they must provide a clearance or authority document or conditional letter from their relevant authorised state organisation. International students must additionally have a translated International Police Check or statutory declaration.
2. A Working with Children Check (WWCC) clearance letter or state equivalent, valid for their entire program.
3. A current approved first aid certificate valid for their entire program. Approved provider courses can be found at http://training.gov.au.
4. A completed vaccination/immunisation card with all serology results attached - currency must be maintained by the student to ensure compliance for their entire program.
5. Undertaking/Declaration form (or state equivalent documents).
6. Additional forms as required per state related to, but not limited to: Tuberculosis Assessment tool; Hepatitis B statutory declaration form' Signed Code of Conduct; Student Deed Poll and all other state equivalent documents as required. Contact your school for further details. Resources are also available on the Placement Hub web page. https://www.westernsydney.edu.au/placements_hub (https://www.westernsydney.edu.au/placements_hub/)
7. Relevant Local Health District specific documentation as requested. Contact your School for further details. Resources are also available on the Placement Hubwebsite: https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)
Some external sites may have additional requirements. Students will be advised of any such specified requirements which must be complied with before commencing clinical placements.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Professional Placement Performance	21 days of placement (8 hrs per day), and COMPASS task	S/U	Y	Individual
Presentation	15 minutes	S/U	Y	Individual
Portfolio	Collation of written evidence demonstrating range, scope and level of clinical competence achieved by the end of 3rd Year	S/U	Y	Individual

REHA 3051 Leisure Education Programming and Mental Health (UG Cert)

Credit Points 10

Legacy Code 500062

Coordinator Mia Hatzistergos (https://directory.westernsydney.edu.au/search/name/Mia Hatzistergos/)

Description In this subject students will develop knowledge and skills required to facilitate and critically evaluate leisure education interventions to bring about changes in the leisure behaviour of individuals, particularly those at risk of developing or with a diagnosed mental illness. Students will analyse evidence to plan, implement and evaluate leisure education programs.

School Health Sciences

Discipline Rehabilitation Therapies, Not Elsewhere Classified.

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Equivalent Subjects REHA 3013 Leisure Education and Mental Health

Restrictions

Students must be enrolled in 7176 Disability Care Support

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and evaluate models of leisure education and related concepts.
2. Analyse issues related to promoting health and well-being through leisure literacy and participation.
3. Create, implement and evaluate an evidence-informed leisure education program for clients with a mental illness.
4. Analyse, apply and evaluate educational techniques used in leisure education to promote wellbeing

Subject Content

1.Leisure education concepts
2.Leisure education in national and international contexts
3.Leisure education theory applied, in particular, to individuals with a mental illness
4.Designing, planning and delivering leisure education programs for individuals with a mental illness
5.Leisure ability model (not changed)
6.Lived experiences of consumers and families with a mental illness (not changed)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

REHA 4001 Clinical Education B (Rehabilitation)

Credit Points 10

Legacy Code 401110

Coordinator Reem Rendell (https://directory.westernsydney.edu.au/search/name/Reem Rendell/)

Description This clinical education placement will operationalise the theoretical and research knowledge and skills learnt in the first three years of the course. Students will be required to assess and treat clients in rehabilitation settings. Treatments will be focused on improving client mobility and function that is altered by illness, injury, chronic disease or a disability. This will assist in preparation for client discharge home or to an appropriate residential facility, as well as enhance functioning at home or in the community. Assessment and treatments will tend to have a neurological physiotherapy focus, but clients may also present with cardiorespiratory and musculoskeletal conditions which require intervention. Students will, therefore, be expected to integrate knowledge and skills learnt across all physiotherapy-specific units in their provision of client-centred care as well as draw on their more general knowledge from earlier stages of the course.

School Health Sciences

Discipline Physiotherapy

REHA 3016 AND
REHA 3001 AND
LGYA 7023

Co-requisite(s) REHA 4015

Incompatible Subjects REHA 7001 - Clinical Education B (Rehabilitation)

Restrictions

Students must be enrolled in 4706 Bachelor of Physiotherapy or 4707 Bachelor of Physiotherapy (Honours) or 4733 Bachelor of Physiotherapy (Honours)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Display effective communication skills, ethics and professionalism
2. Plan, justify and conduct an appropriate subjective and objective assessment

3. Synthesise assessment information to develop and negotiate a client-specific problem list and treatment plan in consultation with the client and/or family
4. Justify and implement evidence-based and effective management strategies
5. Justify treatment decisions based on theory, research, and the interpretation of outcome measurement
6. Monitor, evaluate, and progress treatments as indicated
7. Demonstrate safe and ethical work practices, respecting the culture and diversity of the client and other health professionals

Subject Content

Theory, research and practice, within a rehabilitative physiotherapy context, to:
1. Conduct a subjective and objective examination
2. Interpret findings and prioritise client problems
3. Develop and negotiate a treatment plan with the client
4. Implement appropriate management techniques
5. Monitor, evaluate and progress treatment as appropriate
6. Demonstrate effective communication skills and professionalism, while respecting culture and diversity
7. Collaborate with other health professionals
8. Ensure safe work practice
9. Undertake discharge planning

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and compete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- http://training.gov.au (http://training.gov.au/)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

REHA 4002 Clinical Education C (Ambulatory Care)

Credit Points 10

Legacy Code 401111

Coordinator Amitabh Gupta (https://directory.westernsydney.edu.au/search/name/Amitabh Gupta/)

Description This clinical education placement will operationalise the theoretical and research knowledge and skills learnt in the first three years of the course. Students will be required to assess and treat clients who present in hospital outpatient departments, community settings and private practices. This involves the assessment of the client's impairments, function and disability within their home and community environment. Interventions may include manual and exercise therapy; use of electrophysical agents, taping and bracing; and education regarding both prevention and management of conditions. Assessment and treatment will tend to have a musculoskeletal physiotherapy focus, however, clients may also present with neurological and cardiorespiratory conditions that require intervention. Students will therefore integrate knowledge and skills learnt across all physiotherapy-specific units in their provision of client-centred care as well as draw on their more general knowledge from earlier stages of the course.

REHA 4003 Clinical Education D (Paediatrics)

Credit Points 10

Legacy Code 401112

Coordinator Genevieve Dwyer (https://directory.westernsydney.edu.au/search/name/Genevieve Dwyer/)

Description This clinical education placement will operationalise the knowledge (theory and research) and skills learnt in Paediatric Physiotherapy. Students will also integrate and apply the knowledge and skills learnt in musculoskeletal, cardiorespiratory and neurological physiotherapy, as well as other health science units to provide appropriate and holistic family-centred care to paediatric clients. Students will be required to assess and treat paediatric clients in acute hospital, rehabilitation or community settings. This approach to management involves the consideration of a child's age, development, and diagnosis during assessment and treatment. Advanced communication skills are required to educate parents and children on the prevention and management of paediatric conditions.

School Health Sciences

REHA 4004 Clinical Education E (Advanced Care)

Credit Points 10

Legacy Code 401113

Coordinator Rocco Cavaleri (https://directory.westernsydney.edu.au/search/name/Rocco Cavaleri/)

Description This clinical subject involves the integration of musculoskeletal, neurological and cardiorespiratory physiotherapy assessment and treatment skills in an advanced physiotherapy care environment. Advanced problem-solving skills will be required to manage complicated client presentations in various clinical environments. Advanced care environments may include speciality areas such as burns, spinal, emergency, intensive care and aged care subjects within a hospital, or private practice and community-based services where the physiotherapist is the primary care practitioner. Student preferences and prior clinical placement experience will be considered in the clinical placement allocation process. This will help to ensure all students are given the opportunity to explore the breadth of practice of physiotherapy in different environments.

School Health Sciences

Discipline Physiotherapy

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 4 subject

Pre-requisite(s) REHA 3009 OR
REHA 3004

Co-requisite(s) REHA 4015 AND
REHA 4001 OR

REHA 4002

Incompatible Subjects REHA 7004 - Clinical Education E (Advanced Care)

Restrictions

Students must be enrolled in 4706 Bachelor of Physiotherapy or 4707 Bachelor of Physiotherapy (Honours).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Display effective communications skills, ethics and professionalism
2. Plan, justify and conduct an appropriate subjective and objective assessment
3. Synthesise assessment information to develop and negotiate a client-specific problem list and treatment plan in consultation with the client
4. Justify and implement evidence-based and effective management strategies
5. Justify treatment decisions based on theory, research and the interpretation of outcome measurements
6. Monitor, evaluate and progress treatments as indicated
7. Demonstrate safe and ethical work practices, respecting the culture and diversity of the client and other health professionals

Subject Content

Theory, research and practice, within an advanced care physiotherapy context, to:
- conduct A subjective and objective Examination
- interpret findings and prioritise client problems
- develop/negotiate A treatment plan
- implement appropriate management techniques
- Monitor, Evaluate and Progress treatment as appropriate
- demonstrate effective communication and professionalism, While Respecting culture and diversity
- collaborate with other health professionals
- Ensures Safe work practice
- undertake discharge planning

Advanced care environments may include speciality areas such as burns, spinal, emergency, intensive care and aged care units within a hospital, or private practice and community-based services where the physiotherapist is the primary care practitioner. Inappropriate clinical placements would be where a student is not required to apply critical thinking and problem-solving in the assessment and treatment of clients with complicated presentations.

Special Requirements

Legislative pre-requisites

To be eligible to enrol in a subject and attend a health-related placement in your program, students must meet Western Sydney University program requirements and Special Legislative Requirements to be assessed in their first year of study against the following.
1. National Criminal History Check: Students must have a current (expiring 3 years from date of issue) check valid for their entire program. A valid National Criminal history check must be an Australia wide check, include the student's full name matching their Student ID card and date of birth and not have any offences listed. If a student has a criminal history identified on their check, they must provide a Clinical Placement Authority Card (CPAC) or conditional letter from the NSW HealthShare Employment Screening and Review Unit https://www.health.nsw.gov.au/careers/student_clearance/Documents/appendix-10-student-application.pdf
International students must additionally have a translated International Police Check or statutory declaration.
2. A NSW Working with Children Check (WWCC) clearance letter issued under the category of volunteer valid for their entire program.
3. A current approved first aid certificate valid for their entire program. Approved provider courses can be found at http://training.gov.au (http://training.gov.au/).
4. A completed vaccination/immunisation card with all serology results containing expiry dates and currency must be maintained by the student to ensure compliance for their entire course.
5. NSW Undertaking/Declaration form.
6. Completed any additional health forms required (such as NSW Health Code of Conduct, Health Student Undertaking/Declaration and Tuberculosis (TB) Assessment Tool).
7. Relevant Local Health District specific documentation as requested.

Pre-requisite(s) REHA 3028 AND
REHA 3029 AND
REHA 4017 AND
REHA 4007 AND
REHA 3030 AND
REHA 4018

Co-requisite(s) REHA 4021

Incompatible Subjects REHA 7020 - Podiatric Clinical Block for Honours
REHA 7023 - Podiatric Professional Practice Studies

Restrictions Students must be enrolled in 4709 Bachelor of Podiatric Medicine (Honours).

Assumed Knowledge

Completion of all core subjects to this semester/year of study is assumed knowledge.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Understand, apply and document principles of business and administrative management, fair trading, contracts of employment, tax legislation, medical records, health and safety, and medicolegal insurance, specifically as it relates to the practice of podiatry.
2. Be cognisant of the rights and responsibilities under law and ethical issues associated with the practice of podiatry.
3. Develop knowledge and skills in specific reporting requirements for the funding of specialist groups, particularly the Department of Veterans Affairs, and relationships with professional associations and bodies to the benefit of the individual and the professional community.
4. Employ professional communication skills and behaviours in clinical settings.
5. Competently implement acquired skills in the practice of podiatry in a variety of clinical settings in an independent manner.
6. Manage caseloads by demonstrating safe skills, efficiencies and competencies necessary in the management of patients with foot pathologies over a short/long term basis.
7. Apply and appraise skills, knowledge and contextual information in the assessment, diagnosis and management within diverse cohorts and the multi-disciplinary team.
8. Conduct effective administrative duties (medical records, referral reports and patient instructions) and management tasks (daily running of the department).
9. Reflect and appraise their clinical and professional experience.

Subject Content

1) Clinical Block Placement Component
In the Clinical Block placement the focus will be on consolidation of appropriate assessment, diagnostic and management skills of the scope of podiatric practice including complex cases, including the high risk foot. The activities will be divided into two areas:
(a) Preparation,presentations and feedback
This will be presented in workshop format to provide:
i) The relevant information to students about their responsibilities and the requirements on external clinical placements covering:
- Pre-clinical documentation requirements
- infection control
- professional behaviour
- communication skills
- needs for different groups and treatment programs
- negotiated learning objectives
ii) Presentations and Feedback at the end of the placement
- case Study presentations
- feedback
(b) External Clinical Placement
The student will participate in 280 hous of external block placement. The placement will be directed at consolidating assessment, diagnosis and management skills in high risk and general patients. The aim of these placements is to increase efficiency and competency in podiatry care in a real-life clinical setting with a diverse cohorts of patients. Of particular importance will be student involvement in a multi-disciplinary approach to patient care.
2) Professional Practice Studies Component
Professional Practice component includes the following topics
(a) Types of Podiatry Practice
- Private practice; Business plans, Employment/Contracting, Taxation, Practice management
- public health practice
- podiatric research
- podiatric surgery
- Working overseas
- podiatry suppliers
(b) Medicolegal Requirements and Responsibilities and Professional Associations
- professional Registration
- Government departments; Department of Veteran Affairs, NSW Podiatry Council
- health and safety - infection control
- Insurance; Professional indemnity, Workcover, Property
- Australian podiatry Association / Australian podiatry Council
? Ethical and Socio-demographic Issues related to Podiatry Practice
- Complaints handling
- socio-Demographic and socio-economic considerations for healthcare
- multi-disciplinary healthcare
- evidence based practice
- interpersonal and inter-professional communication
(d) Job Applications
- cover letters
- Answering selection criteria
- writing resumes
- self-promotion

Special Requirements

Legislative pre-requisites

Special Requirements - NSW Health Legislative Prerequisites ~~Pre-requisites~~

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and compete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- http://training.gov.au (http://training.gov.au/)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Professional Placement Performance	280 hours of supervised external clinical placement + 5 days attendance at professional seminars	S/U	Y	Individual
Reflection	2,000 words	20	N	Individual
Professional Task	Total 7 pages	20	N	Individual
Viva Voce	15 minutes	60	N	Individual

REHA 4006 Complex Cases and Professional Issues

Credit Points 10

Legacy Code 401108

Coordinator Daniel Thomson (https://directory.westernsydney.edu.au/search/name/Daniel Thomson/)

Description In this subject, students will further develop their clinical reasoning with respect to clients with complex presentations in areas such as aged care, women's health, return to work, private practice and culturally and linguistically diverse individuals. Complex information will be synthesized such as the theory, research and skills across the spectrum of physiotherapy care , and theories related to professionalism, ethics, safety and communication. This subject also contains the discussion of a range of recent professional developments in physiotherapy, which are relevant to entry level practitioners. These include registration as a physiotherapist, continuing education, workload control strategies, duty of care responsibilities and quality improvement processes (including critical reflection), employment strategies and career pathways.

School Health Sciences

Discipline Physiotherapy

Level Undergraduate Level 4 subject

Pre-requisite(s) REHA 4015 AND
REHA 4014

Co-requisite(s) REHA 4001 OR
REHA 4002 OR
REHA 4003 OR
REHA 3004 AND
REHA 4008

Incompatible Subjects REHA 7005 - Complex Cases and Professional Issues

Restrictions

Students must be enrolled in program 4706 Bachelor of Physiotherapy

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Synthesise complex assessment information, using clinical reasoning and client-centred approaches to design and critically reflect on a management plan for clients with complex presentations
2. Plan, justify, implement, and evaluate a safe and effective treatment of the impairments and activity limitations in clients with and without multi-system co-morbidities in areas such as women�fs heath, aged care, return to work, private practice and culturally and linguistically diverse populations.
3. Critically reflect on a clinical scenario with respect to professionalism, ethics, safety and communication
4. Synthesise the contributions of physiotherapy study, personal interests and opportunities in physiotherapy to develop a personal, targeted employment strategy
5. Demonstrate effective verbal and written communication skills

Subject Content

1. Integration of physiotherapy knowledge developed from previous university-based and clinically-based physiotherapy with the theory of professionalism, ethics, safety and communication (clinical reasoning) to plan management strategies for clients with complex presentations
2. Integration of Physiotherapy assessment and management skills into areas such as Women?fs health, aged-care, return to work, private-practice and culturally and linguistically diverse populations.
3. Recent professional developments in physiotherapy, such as registration as a physiotherapist continuing education, workload control strategies, quality improvement processes, and career pathways
4. Employment strategies, considering desires and personal attributes as well as attainment of the Western Sydney University Graduate Attributes and the Physiotherapy Practice Thresholds in Australia and Aotearoa New Zealand (2015).
5. Develop interview skills and CV writing in preparation to maximise employment opportunity.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Interview	25 minutes	40	N	Individual
Report	2 pages and 1,000 words	10	N	Individual

REHA 4007 Dermatology and Gerontology

Credit Points 10

Legacy Code 401116

Coordinator Sean Lanting (https://directory.westernsydney.edu.au/search/name/Sean Lanting/)

Description This subject builds on previous clinical and theoretical subjects to develop in-depth knowledge in dermatology and gerontology. Foundations of dermatology including the function and structure of the skin, assessment, differential diagnosis, aetiological factors and the management of disorders of the skin, with particular emphasis on common foot conditions and co-morbidities will be investigated. Population's trends, aging norms, pathology, co-morbidities and attitudes to aging will be explored. Particular focus will be placed on pathophysiology, mechanics, diagnosis and treatment options to maintain normal daily activities.

School Health Sciences

Discipline Podiatry

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 4 subject

Pre-requisite(s) NATS 2008 AND
REHA 3027 AND
REHA 2003

Incompatible Subjects REHA 7024 - Podiatric Techniques 3A and REHA 7025 - Podiatric Techniques 3B

Restrictions Students must be enrolled in 4708 - Bachelor of Podiatric Medicine or 4709 - Bachelor of Podiatric Medicine (Honours).

Assumed Knowledge

All core subjects are assumed knowledge.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate comprehensive knowledge and understanding of the aetiology, pathology, clinical presentation and development of dermatological disorders of particular relevance to podiatric practice.
2. Discuss clinical presentation of dermatological conditions relevant to their possible pathological bases.
3. Differentially diagnose dermatological disorders and discuss the range of treatment options available with an emphasis on those disorders of particular relevance to podiatric practice.
4. Review the pharmaceutical agents that are available for the treatment of skin conditions, including proprietary and generic identifications and constituent ingredients.
5. Evaluate those dermatological conditions which fall outside the scope of podiatry and make referrals to other health care practitioners as necessary.
6. Discuss common medical conditions and co-morbidities in the aged population and their relevance to podiatry and interdisciplinary care.

7. Distinguish between normal age related changes and pathological conditions (physical and psychological) that may occur in the aged population.
8. Review pharmacokinetic and pharmacodynamic variations in different populations, and evaluate the impact on prescription drugs with particular reference to polypharmacy and other related circumstances.
9. Demonstrate podiatric techniques in the management of common podiatric conditions in the aged.

Subject Content

A). Dermatology
1. Dermatitis
- allergic contact
- Photoallergic
- primary contact
- causes and management
2. Eczema
- Discoid
- Venous stasis
- Atopic
3. Disorders of keratinisation
- Pemphigus
- Pemphigoid
- Epidermolysis bullosa; simplex and complex
- Papulosquamous disorders
- Psoriasis
- Pustular, Psoriasis
- Keratoderma
- Lichen planus
- Pityriasis rubra pilaris
- Palmoplantar keratodermas
- Diffuse Palmoplantar Keratoderma
- Punctate Keratoderma
- Progressive Keratoderma
- Striate Keratoderma
- Mal de meleda
- Papillon-LeFevre syndrome
- Icthyosis
4. Neoplasia
- benign and / or Malignant
- differentiation, signs and Symptoms
5. Infections (skin and nail)
- mycotic
- Onychomycosis
- Paronychia
- chronic hyperkeratosis Tinea pedis
- Acute vesicular Tinea pedis
- Intertriginous Tinea pedis
- treatment and management
6. Bacterial
- Aerobic and Anaerobic
- Diagnosis and differentiation
- local management methods
- systemic drug therapy
- Mycobacterium
7. Viral
- human papova virus
- verrucae
- Molluscum contagiosum
- Epidermodysplasia verruciformis
- topical Vs systemic treatment
8. Miscellaneous skin conditions
- Erythroderma
- Uritcaria
- Insect bites
- Herpes
- Scabies
- common infectious diseases of childhood
- manifestations of systemic disorders
B). Gerontology
1. Introduction to gerontology
- definitions, populations Trends, impact on health care resources, funding and policies and relevance for podiatrists
- attitudes to ageing - exploring our own attitudes, preconceptions, identifying and exploring community, societal and ethnological Trends in attitude development and display
2. Theories of ageing, current trends in theoretical development
- molecular, system level and Cellular theories
3. Review an in-depth study of the physiological and pathophysiological understandings of the biology of ageing, including:
- Musculoskeletal system, The skin and its integuments, gastrointestinal, Endocrine, Respiratory, cardiovascular and Nervous system
4. Ageing and human locomotion
- Age related changes
- changes related to common systemic pathologies
- Biomechanical consequences and treatment strategies
5. Common medical problems, including:
- cerebral syndromes, Parkinson?fs disease and Parkinsonian syndromes, bone disease and degeneration, arthropathies, Traumatic events, including fractures, Nutritional disorders and deficits

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

REHA 4008 Integrating Research into Physiotherapy Practice

Credit Points 10

Legacy Code 401109

Coordinator Luke Jenkins (https://directory.westernsydney.edu.au/search/name/Luke Jenkins/)

Description In this unit, students will further develop their evidence based practice skills and knowledge by applying it in practice settings. This will involve applying the academic knowledge and skills from three

prior evidence based practice and research units by synthesising it with their clinical experience and skills. Students will be allocated a topic area from which they will identify a clinical "problem" or health-related issue. Students will then plan and design a robust research project to answer this question. Students will be expected to reflect on the barriers and facilitators of evidence-based practice, and develop strategies and interventions to be used to facilitate the implementation of evidence in practice by clients and health care practitioners.

School Health Sciences

Discipline Physiotherapy

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 4 subject

Pre-requisite(s) HLTH 3005 OR
HLTH 4002 AND
REHA 3004 OR
REHA 4001 OR
REHA 4002 OR
REHA 4003

Incompatible Subjects REHA 7007 - Integrated Research into Physiotherapy Practice

Restrictions

Students must be enrolled in 4706 Bachelor of Physiotherapy or 4707 Bachelor of Physiotherapy (Honours)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify an evidence-practice gap in clinical practice.
2. Generate a structured clinical question about an intervention for a clinical scenario.
3. Plan and design a robust research study for a specific population group ranging from movement control to lifestyle issues, remediation to health promotion.
4. Critically reflect on outcomes of prior research and justify research methodology.
5. Design strategies and interventions to facilitate the implementation of evidence by clients and practitioners.
6. Effectively communicate verbally and in a variety of written formats as required in various contexts e.g. clinical and academic.

Subject Content

Advanced, applied physiotherapy research practice including:
1. Planning an evidence-based research topic investigation
2. Theoretical and practical strategies to execute an evidence-based research investigation in a range of practice areas
3. Theoretical and research-identified facilitators and barriers to evidence based practice in clinical practice
4. Critical reflection on the execution of the evidence-based research investigation and identification of future learning needs
5. Advanced skills in reading and interpreting physiotherapy research evidence
6. Physiotherapy evidence for specific population groups, e.g. arthritis, back pain, occupational injury
7. Verbal and written skills

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Multiple Choice	30 multiple choice questions	20	N	Individual

REHA 4009 Occupational Justice

Credit Points 10

Legacy Code 401123

Coordinator Angus Lam (https://directory.westernsydney.edu.au/search/name/Angus Lam/)

Description This subject critically examines practice in the community with a focus on social inclusion and occupational justice. Life perspectives of people experiencing occupational injustice are explored. Current and historical ideologies which underpin global and national legislation and policies on human rights are examined. The promotion of occupational participation through occupational therapy practice is outlined. This subject challenges popular myths and stereotypes of people with disabilities. Issues such as de-institutionalisation, duty of care, dignity of risk, choice-making, rights and negligence are critiqued against legal, ethical and personal perspectives. This subject assists students develop critical thinking and reflection skills for practice.

School Health Sciences

Discipline Occupational Therapy

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 4 subject

Pre-requisite(s) REHA 3020

Co-requisite(s) REHA 3022

Equivalent Subjects LGYA 7065 - Occupation and Social Participation

Incompatible Subjects REHA 7010 - Occupational Justice

Restrictions Students must be enrolled in 4711 - Bachelor of Occupational Therapy or 4712 Bachelor of Occupational Therapy (Honours). This is a specialty subject offered as a compulsory core subject of the occupational therapy program. It is profession specific, preparing students to practice as an occupational therapist and not relevant as an elective for non-occupational therapy students.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the occupational injustices experienced by individuals and/ or groups and hypothesise the potential impact on community membership and participation.
2. Describe past and present conceptual frameworks and ideologies which influence an individualðfs social and community inclusion
3. Reflect on personal and societal attitudes and beliefs about people who experience occupational injustice (eg disability, homelessness, refugees, Indigenous Australians)
4. Identify community inclusion opportunities and evaluate their potential to facilitate occupational engagement
5. Compare and contrast occupational therapy approaches used to facilitate occupational justice
6. Develop an occupational therapy strategy to enable occupational justice for a marginalised group within their local community or global context

Subject Content

- concepts and principles of occupational justice, community membership and participation
- Global and national Legislation and policies on human rights
- conceptual frameworks and ideologies which underpin service planning
- strategies to manage challenging behaviours to facilitate successful community inclusion
- concept of institutionalisation and its impact on occupational freedom
- approaches used to guide occupational therapy practice in The community
- community inclusion opportunities available in The community
- Issues relating to provision of service; duty of care versus dignity of risk, choice-making, advocacy and abuse and neglect

Special Requirements Legislative Prerequisites

Prior to enrolling in this unit, students must have submitted a Student Undertaking Form. Use the link to the Special Requirements webpage below for more information.
Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)
If students are visiting a NSW Health facility they will need to comply with the occupational screening and immunisation policy of NSW Health.

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and compete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements

4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- http://training.gov.au (http://training.gov.au/)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Professional Placement Performance	8 week full time or equivalent professional practice placement	50	Y	Individual

REHA 4012 Occupational Therapy Project

Credit Points 10

Legacy Code 401122

Coordinator Rosalind Bye (https://directory.westernsydney.edu.au/search/name/Rosalind Bye/)

Description The aim of this subject is for students to critically apply their knowledge of professional theory, practice, research and evaluation skills to the investigation of an occupational therapy professional issue of interest or concern. Students will apply unobtrusive research methods to investigate their chosen topic. Students develop an extensive knowledge of their chosen topic and critically analyse the implications of their findings in terms of theory, policy and contemporary health care practice. Students will synthesise their findings into a scholarly research project report and present their findings at a professional-level capstone student conference.

School Health Sciences

Discipline Occupational Therapy

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 4 subject

Pre-requisite(s) HLTH 3005

Incompatible Subjects REHA 7014 - Occupational Therapy Project

Restrictions Students must be enrolled in program 4711 Bachelor of Occupational Therapy. This is a specialty subject offered as a compulsory core subject of the occupational therapy program. It is profession specific, preparing students to practice as an occupational therapist and not relevant as an elective for non-occupational therapy students.

Assumed Knowledge

Knowledge of issues and concerns relevant to the occupational therapy profession and occupational therapy clients and consumers. This knowledge will ideally have been gained in part by undertaking several fieldwork experiences in preceding years of the program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Formulate a problem to investigate that is relevant to occupational therapy theory, practice or reasoning.
2. Search for and critique a wide range of literature relating to a specific investigative problem.
3. Critically examine a range of unobtrusive research methods which may be suitable for investigating the problem and prepare a plan of the project.
4. Analyse ethical issues associated with the conduct of unobtrusive research.
5. Apply unobtrusive research methods of data collection and analysis appropriate to the project.
6. Synthesise information into an investigative project report that reflects a critical examination of the topic, with recommendations

related to future occupational therapy practice, theory, national and international policy.
7. Present a professional standard conference abstract and presentation.
8. Work collaboratively and in a self-directed manner with other students to complete the above objectives.

Subject Content

1. Contemporary and topical issues relating to occupational therapy practice, theory and professional reasoning.
2. Unobtrusive research methods eg. critical literature review, thematic analysis of public documents, theoretical analysis of case study populations.
3. Ethics of research using unobtrusive methods.
4. Project management skills.
5. Professional Communication skills ? professional and scholarly writing, professional conference presentation skills, abstract writing.
6. Capstone student conference ? preparation and involvement.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

REHA 4013 Occupational Therapy Specialties

Credit Points 10

Legacy Code 401124

Coordinator Ali Gebhardt (https://directory.westernsydney.edu.au/search/name/Ali Gebhardt/)

Description This subject provides occupational therapy students with the opportunity to select from, and undertake advanced study in, a range of occupational therapy clinical specialty areas. Several streams will run concurrently in this subject representing key clinical areas of specialisation in occupational therapy. Students will be able to focus their study, by selecting a combination of clinical specialty streams. Streams will cover relevant clinical content, examining the unique occupational therapy contribution in each specialty area.

School Health Sciences

Discipline Occupational Therapy

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 4 subject

Pre-requisite(s) REHA 3002 AND
REHA 3020 AND
REHA 3019

Incompatible Subjects REHA 7015 - Occupational Therapy Specialities

Restrictions Students must be enrolled in program 4711 Bachelor of Occupational Therapy. This is a specialty subject offered as a compulsory core subject of the occupational therapy program. It is profession specific, preparing students to practice as an occupational therapist and not relevant as an elective for non-occupational therapy students.

Assumed Knowledge

It is assumed that students entering this subject will have completed all previous occupational therapy subjects from the third year of the Bachelor of Health Science/Masters of Occupational Therapy.

Learning Outcomes

On successful completion of this subject, students should be able to:
1. Review and evaluate the unique occupational therapy contribution in clinical specialty areas of interest.
2. Reflect on how occupational therapy practice in specialised areas relates to the theoretical basis of occupational therapy.
3. Identify clinical questions and apply knowledge and skills of evidence-based practice to the investigation of clinical specialty topics.
4. Perform professional competencies relevant to the chosen clinical specialisation areas.

Subject Content

1. The unique occupational therapy contribution in areas of clinical specialisation
2. The use of learning contracts to determine learning needs in areas of clinical specialisation
3. Clinical questions relevant to the development of expertise in chosen clinical specialty areas as negotiated with academic staff
4. Knowledge and skills of evidence-based practice in the investigation of clinical specialty topics
5. Professional competencies relevant to the chosen clinical specialisation areas as negotiated with academic staff

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject, students must have:

1) submitted a Student Undertaking Form and have applied for a National Police Certificate;
2) submitted Working with Children Check Student Declaration;
3) possess a current WorkCover Authority approved First Aid Certificate.

Assessment

REHA 4014 Paediatric Physiotherapy

Credit Points 10

Legacy Code 401106

Coordinator Genevieve Dwyer (https://directory.westernsydney.edu.au/search/name/Genevieve Dwyer/)

Description This subject aims to prepare the student as a competent entry-level practitioner in paediatric physiotherapy. It focuses on understanding the changes which occur from infancy to maturity and the impact of congenital or acquired conditions, or lifestyle diseases causing dysfunction. Clinical and ethical reasoning and family-centred practice are both stressed. The approach will also emphasise the role of physiotherapy within inter-professional teams to prepare for different work settings (acute care, rehabilitation and/or community). The subject integrates prior learning from previous years (especially subjects related to neurology, musculoskeletal, cardiopulmonary physiotherapy and exercise rehabilitation).

School Health Sciences

Discipline Physiotherapy

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 4 subject

Pre-requisite(s) REHA 3003 AND
REHA 3001 AND
HLTH 3005 OR
HLTH 4002

Co-requisite(s) REHA 4015

Incompatible Subjects REHA 7017 - Paediatric Physiotherapy

Restrictions Students must be enrolled in 4706 Bachelor of Physiotherapy, 4733 Bachelor of Physiotherapy (Honours) or 4707 Bachelor of Physiotherapy (Honours).

Assumed Knowledge

A good understanding of approach to assessment and management of impairments arising from disorders of the musculoskeletal system, neurological system and cardiopulmonary system is desirable. In addition approach to physical activity and/or exercise prescription is also desirable. This knowledge should have been acquired in previous physiotherapy-specific subjects run in the Physiotherapy program. Knowledge of EBP is also relevant and desirable.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of typical growth and development from birth to adolescence; and discuss the occurrence of variations in typical development and possible reasons for these.
2. Describe the potential impact of atypical growth and development on the skeletal, respiratory and/or neurological system of a child with congenital or acquired condition.
3. Identify the potential psychosocial impact of a childðfs illness, disease and/or disability on the child, their family and the community.
4. Research and determine relevant methods used to assess and/or monitor the health, development and/or recuperation of infants, children and adolescents as appropriate to their needs.
5. Solve relevant comp

Subject Content

Theory, research and practice, within a paediatric physiotherapy context, for:
- typical growth and development from birth to Adolescence
- The impact of atypical growth and development on A child with A congenital or acquired condition
- The potential psychosocial impact of illness, disease and/or disability on A child, their family and community
- Working across a variety of workplace settings (acute care, rehabilitation and community-based) and within a family-centred practice philosophy and ICF framework
- identifying relevant methods used to assess and/or Monitor infants, children and Adolescence, as appropriate to their needs
- planning case management of complex paediatric clinical problems using sound clinical reasoning and illustrating A professional and Ethical approach to practice

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement and have submitted a Working with Children Check Student Declaration and hold a valid and current First Aid Certificate from a Registered Training Organisation.

Assessment

REHA 4015 Physiotherapy for Chronic Illness and Disease

Credit Points 10

Legacy Code 401107

Coordinator Genevieve Dwyer (https://directory.westernsydney.edu.au/search/name/Genevieve Dwyer/)

Description This subject focuses on the role of physiotherapy in chronic disease management. A case-based learning approach will be undertaken to provide students with the theory, research and practice which underpins the assessment and treatment of people with chronic disease. The role of lifestyle factors in the development of chronic disease will be explored, along with health promotion and preventative strategies. The importance of client-centred care, which respects culture and diversity, and the multidisciplinary team approach will also be investigated in the context of frequently occurring chronic conditions.

REHA 4003 OR
REHA 3004

Incompatible Subjects REHA 7018 - Physiotherapy for Chronic Illness and Disease

Restrictions

Students must be enrolled in 4706 Bachelor of Physiotherapy or 4733 Bachelor of Physiotherapy (Honours) or 4707 Bachelor of Physiotherapy (Honours)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Synthesise evidence to explain how lifestyle and/or psychosocial factors can influence the development and continuation of chronic illness or disease.
2. Justify the role of physiotherapy in the prevention and/or management of chronic illness or disease.
3. Critically reflect on the contributions of a multidisciplinary/interdisciplinary team in the management of individuals with chronic illness or disease.
4. Solve relevant complex clinical problems accessing appropriate resources and using a process of sound clinical reasoning.
5. Research and determine a client-centred approach in the design of a physiotherapy management plan for the management of chronic illness or disease.

Subject Content

1. Prevalence of chronic illness and disease in Australia and internationally and relevance to physiotherapy
2. Role of physical activity in promoting healthy lifestyles and quality of life across the lifespan for those living with chronic disease, illness or disability
3. Living with chronic illness or disease from the perspective of the patient
4. Goal setting and optimising compliance to effect positive behavioural change and/or maximise quality of life
5. Opportunities for physiotherapists to assist in the prevention and management of chronic disease
6. Role of community physiotherapy within a multidisciplinary/interdisciplinary team approach to management of chronic disease
7. Palliative care: supporting patients in the last phase of life
8. Students will cover some key chronic disease areas via seminar topics. The theme of the seminar topics is promoting healthy lifestyles to optimise quality of life throughout the lifespan

REHA 4016 Podiatric Clinical Block

Credit Points 20

Legacy Code 401117

Coordinator Kym Hennessy (https://directory.westernsydney.edu.au/search/name/Kym Hennessy/)

Description This subject is the major clinical placement subject in the 4th year of the program. Students will participate in clinical activities in public and private sector placements. The subject builds on previous clinical and academic knowledge to further develop students' clinical reasoning skills encouraging appropriate selection of assessment techniques to diagnose, treat and provide optimal health outcomes. Students under supervision will manage foot and lower limb pathologies across the scope of practice including treating diverse patient cohorts and complex cases (including the high risk foot) transitioning towards a competent graduate entry podiatrist.

School Health Sciences

Discipline Podiatry

Student Contribution Band HECS Band 2 20cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 4 subject

Pre-requisite(s) REHA 4018
REHA 4007
REHA 4017

Co-requisite(s) REHA 4019

Equivalent Subjects REHA 7019 - Podiatric Clinical Block

Restrictions Must be enrolled in 4708 Bachelor of Podiatric Medicine Podiatry specific - students will be participating in patient assessment and management. It is essential that they have been able to demonstrate competencies in patient assessment, documentation, treatment programs and communication within allied health / community settings. The podiatric practice subjects in combination with the clinical block placement have been designed to be an integrated suite of subjects where one subject builds on the clinical competencies of the others.

Assumed Knowledge

Advanced clinical and theoretical podiatric knowledge is necessary to ensure that students in this subject can undertake appropriate assessment techniques to diagnose, treat and provide short and long term health outcomes. Students are expected to have sufficient knowledge and scope to evaluate and manage complex clinical cases in the areas of surgery, paediatrics, high risk foot and musculoskeletal disorders. Completion of all core subjects prior to undertaking subject 401117 Podiatric Clinical Block will equip students will equip students with this assumed knowledge.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Employ professional communication skills and behaviours in clinical settings.

2. Implement acquired skills in the practice of podiatry in a variety of clinical settings in an independent manner.
3. Manage caseloads by demonstrating safe skills, efficiencies and competencies necessary in the management of patients with foot pathologies over a short/long term basis.
4. Apply and appraise skills, knowledge and contextual information in the assessment, diagnosis and management within diverse cohorts and the multi-disciplinary team.
5. Conduct effective administrative duties (medical records, referral reports and patient instructions) and management tasks (daily running of the department).
6. Reflect and appraise their clinical and professional experience.

Subject Content

In the Clinical Block placement, the focus will be on the consolidation of appropriate assessment, diagnostic and management skills consistent with those expected of newly graduated podiatrists. The activities will be divided into two areas: (A) Preparation and feedback - presented in either lecture or tutorial format to provide: 1. The relevant information to students about their responsibilities and the requirements of external placements (covering professional behaviour review, communication skills, needs of different groups and treatment programs, negotiated learning contract). 2. Feedback from placements at the end of the placement. (B) External Clinical Placement.
(A) This will be presented in either lecture or turorial format to provide:
- negotiated learning Contract
Students will successfully participate in 4 weeks of external placement. The placement will be directed at consolidating assessment, diagnostic and management skills in a diverse range of clinical settings and patient groups. The aim of these placements is to increase efficiency and competency in podiatry care in real-life clinical settings. Of particular importance will be the student's appreciation of the podiatrists role in a multi-disciplinary approach to patient care.
(Note: For the course 4708 B Podiatric Medicine, there is one block placement of 210 hours or as required to meet accreditation standards or 1000 clinical hours. Placements may be arranged at varying outreach clinics as required to meet the total number of clinical hours as per accreditation standards.)

REHA 4017 Podiatric Paediatrics and Sports Medicine

Credit Points 10

Legacy Code 401115

Coordinator Viv Chuter (https://directory.westernsydney.edu.au/search/name/Viv Chuter/)

Description This subject will introduce students to clinical and theoretical foundations of biomechanical alignment, trauma, psychological and behavioural factors leading to pain and restricted function of the foot and lower extremity affecting daily living activities. Particular focus will be placed on the mechanics, diagnosis and treatment options of problems experienced in paediatrics and sports in normal daily activities or the sporting arena. This integration will enhance the previously taught assessment and diagnostic techniques in the development of appropriate management and treatment programs of the lower extremity in different populations.

REHA 3029 AND
REHA 2005

Co-requisite(s) REHA 4018

Incompatible Subjects REHA 7024 - Podiatric Techniques 3A REHA 7025 - Podiatric Techniques 3B

Restrictions Students must be enrolled in 4708 - Bachelor of Podiatric Medicine and 470 - Bachelor of Podiatric Medicine (Honours).

Assumed Knowledge

Completion of all core subjects to this semester/ year of study.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss and anaylse current theories and processes of normal growth from birth to adulthood.
2. Use appropriate knowledge of diseases, musculosketetal injury with skills to accurately examine (physical, historical and psychosocial) the child and the sports patient.
3. Quantify paediatric and sports assessments using pathology/ injury screening tools
4. Explore legal, ethical and resourcing issues in the practice of podiatric medicine in the areas of policy development, appropriate assessment techniques and treatment prgrams provided to the child (management of condition, child protection and care); sporting patients (professional or social environments).
5. Integrate theoretical and practical knowledge of biomechanics and its role in sporting activities and exercise science and understand approaches to determine the aetiology, pathology, clinical presentation in the diagnoses of common injury to the lower extremity.
6. Distinguish between normal age related changes and pathological conditions (physical and psychological) that may occur in paediatric and sports cohorts.
7. Recognise and review age related gait changes and differentiate these from gait changes associated with systemic or orthopaedic disturbances.
8. Examine the role of the podiatrist in a multidisciplinary health care team which includes the paediatric and sports patient (hospital and community settings).
9. Apply the theory of measuring health outcomes, pain and pain management in a clinical setting and identify, assess and implement a treatment plan for soft tissue, osseous and synovial conditions.
10. Demonstrate and evaluate the role of physical therapies, particularly musculoskeletal retraining, neural and orthoses intervention in the ongoing patient management and rehabilitation process.

Subject Content

The content of this subject covers paediatrics and sports medicine.
1) Paediatrics
a. Overview of paediatrics
- The Roles, glossary and teamwork involved in managing paediatric populations
b. The patient, environment and examination
- underpinning assumptions, The first encounter (parental dynamics and rapport) and The Examination process
c. Child protection
- Children (care and protection) Act 1998/Amendments
- Preventing child Abuse and neglect
- Risk Factors, signs and duty of care
d. Legal and Ethical considerations in assessment and treatment
e. Normal muscular, neuro and skeletal development
- Embryology, foetal development, Developmental changes and Lower limb function and postural changes with Age
f. Factors affecting growth and development
- Genetic, neurological, hormonal, racial, environmental and disease
g. Treatment and management
- conditions and principles applying to treatment (Palliative, accommodative and curative treatments)
h. Postural disorders
- osteochondroses, pes calcaneo-valgus, vertical talus, talipes equino-varus, metatarsus adductus, coxa vara ? valga, genu varum ? valgum, tibial varum, transverse Plane deformities and Developmental flatfoot
i. Paediatric Screening
2) Sports Medicine
a. Physical activity across the life span
- physiological and mental health Benefits
- physical Activity guidelines

- barriers and Facilitators for physical Activity participation and The podiatrists role
b. Overview of sport and related injury
- biomechanics, structure and function of The Lower extremity
- common reported injuries and sequelae of Activities
- physiology, pathophysiology and Psychology of pain in Activity
c. History taking and examination
- Activity type, frequency, level of fitness, surface, footwear and other equipment
- injury and treatment history (previous and present)
- assessment and investigative techniques
- injury and Activity Screening
- Prevalence of injury across Sports
- Red alerts (differential Diagnosis)
d. Legal and Ethical considerations in assessment and treatment of sports person
e. Specific injuries
- aetiology, pathology, clinical presentation and treatment of A range of pathologies (ie stress fractures, soft tissue injury, subluxations and related conditions such as fractures, sinus tarsi, compartment, cuboid, and iliotibial syndrome)
f. Treatment strategies and management plans, including
- orthoses, splinting, strapping and Motion restriction devices and techniques
- footwear prescription and modification
- prevention and Musculoskeletal rehabiliatation programs
- designing rehabilitation programs
- Interventions (i.e stretching, activity and training modification, strength and proprioception, muculoskelal techniques- deep tissue massage, neural testing and tension, muscle rehabilitation (stretching and strengthening), mobilisation, myofascial the

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement. Students must also hold a valid and current First Aid Certificate from a Registered Training Organisation. Refer to the Special Requirements website for more information.
Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Practical Exam	40 minutes	50	N	Individual
Intra-session Exam	90 minutes	50	N	Individual
Professional Task	Attendance and participation at all face to face practical sessions	S/U	Y	Individual

REHA 4018 Podiatric Practice 3

Credit Points 10

Legacy Code 401114

Coordinator Kym Hennessy (https://directory.westernsydney.edu.au/search/name/Kym Hennessy/)

Description This subject is the third of four clinical practice subjects. Building on previous clinical subjects and academic knowledge the subject develops student assessment skills encouraging the student to make the appropriate selection of assessment techniques to diagnose, treat and provide short and long term health outcomes. Students will continue to participate in clinical activities under supervision to manage foot pathologies with increased scope to evaluate and manage more complex cases (i.e. surgery, paediatrics, high risk foot). Clinical activities include UniClinic sessions, Clinical Therapies, Tutorials, and External Clinical Placement.

School Health Sciences

Discipline Podiatry

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 4 subject

Pre-requisite(s) REHA 3029 AND
REHA 3030

Incompatible Subjects REHA 7021 - Podiatric Practice 3

Restrictions

Students mut be enrolled in 4708 Bachelor of Podiatric Medicine and 4709 Bachelor of Podiatric Medicine (Honours).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate skills in safe work practices including infection control and work health and safety in a clinical setting.
2. Apply professional communication skills in a clinical setting.
3. Appraise and review assessment, diagnostic and management skills necessary for the development and application of treatment of patients with general foot and lower extremity pathologies.
4. Consolidate specialist diagnostic skills for the assessment of patients from special populations including radiographic interpretation, vascular assessment, neurological assessment, and biomechanical assessment.
5. Develop and apply assessment, diagnosis and management knowledge and skills in the context of complex clinical cases including paediatric, sports and geriatric patients.
6. Develop and demonstrate safe and competent skills in undertaking nail surgery procedures.

7. Develop and refine skills in the manufacture of custom made functional orthotic devices including neutral casting, positive cast manufacture, grinding and safety competencies.
8. Develop and apply soft tissue techniques in the context of management of musculoskelatal pathologies.

Subject Content

This is the third of four clinical practice subjects, the student will participate in patient assessment, diagnosis, and management. Completing this unit, builds on students clinical and academic skills in preparation for becoming a graduate podiatrist.
The activities will be divided into three areas:
(a) UniClinic (including surgery)
(b) Clinical therapies and clinical tutorials
(c) External Clinical Placement

(a) UniClinic (including surgery)
In these clinics, the student will consolidate and further develop patient assessment, diagnosis and management, and clinical reasoning skills. The patients who attend these clinics will be new and ongoing patients who have basic foot problems, problems associated with an existing medical condition, mechanical/functional problems or require minor surgical intervention. Appropriate assessments and management strategies will be carried out including manufacture of orthoses, soft tissue techniques, and minor surgical procedures. The students will be supervised by registered practitioners. Tutorials will support the management and educational needs (including case presentations) to faciliate learning during sessions.

(b) Clinical Therapies and clinical tutorials
This unit will continue to develop clinical skills and academic knowledge in a range of therapies. This unit will build on previous orthoses and surgery unit content taught in the 3rd year of the program. Additional content ('soft tissue techniques') will also be introduced to refine student clinical application and reasoning skills to manage musculoskelatal pathologies. Clinical tutorials will support the management and educational needs (including case presentations) to facilitate learning during UniClinic sessions.
Content will include:
Manufacture of clinical devices, problem solving and ethics
Prefab and off the shelf devices
Soft tissue therapies including trigger point, dry needling and active release techniques
Revision of surgical procedures and protocols
Orthotic scripts
Translation of patient pathology and condition to orthotic script prescription
Translation of biomechanical assessment results to orthotic script prescription

(c) External Clinical Placement
A placement for 20 days of clinical activities in an external clinical site will be undertaken. The focus of this placement will be on developing assessment, diagnostic, management, and patient interaction skills in a real world clinical setting.

Special Requirements

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and compete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- http://training.gov.au (http://training.gov.au/)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Assessment

REHA 4019 Podiatric Practice 4

Credit Points 10

Legacy Code 401118

Coordinator Sean Sadler (https://directory.westernsydney.edu.au/search/name/Sean Sadler/)

Description This subject is the final of four clinical podiatric practice subjects. The subject builds on student clinical reasoning encouraging the student to make the appropriate selection of assessment techniques to diagnose and manage a spectrum of foot and lower limb pathology. Students under supervision will consolidate skills managing diverse patient cohorts and complex cases (including surgery, paediatrics, sports injury and the high risk foot) transitioning towards a competent graduate entry podiatrist. Clinical activities include UniClinic sessions, Clinical Therapies, Clinical tutorials, and Specialist Clinical Activity.

REHA 4007
REHA 4017

Co-requisite(s) REHA 4016 OR
REHA 4036

Incompatible Subjects REHA 7022

Restrictions

The subject is Podiatry specific and restricted to students enrolled in 4708 - Bachelor of Podiatric Medicine and 4709 - Bachelor of Podiatric Medicine (Honours).

Assumed Knowledge

All core subjects to this semester of study are assumed knowledge to facilitate competent clinical practice.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply culturally responsive communication strategies that support inclusive engagement, person-centred therapeutic relationships, and patient self-determination in the delivery of complex care.
2. Apply skills and capabilities necessary in the culturally responsive management of general and complex foot pathologies (including nail surgery) across different clinical settings.
3. Critique and reflect on skills, knowledge and contextual information in the assessment, diagnosis and management of a diverse range of podiatric conditions.
4. Demonstrate knowledge of Aboriginal and Torres Strait Islander Peoples' key concepts of health and wellbeing and the influence of culture, kinship, and connection to Country and how these relate to podiatry practice.
5. Critically appraise relevant literature to develop evidence base management plans for a range of complex podiatric conditions.

Subject Content

This is the final clinical subject in the program and will focus on the consolidiation of appropriate assessment, diagnostic and management skills of general and complex podiatric cases and the delivery of culturally responsive and safe clinical care. The emphasis will continue to be on surgery, high risk patients, patients with multiple co-morbidities, patients from priority populations including Aboriginal and Torres Strait Islander Peoples. Theoretical content will include Aboriginal and Torres Strait Islander Peoples' key concepts of health and wellbeing and the influence of culture, kinship, and connection to Country and how these relate to podiatry practice. Clinical placements with Aboriginal and Torres Strait Islander health services will be undertaken where possible. This subject will include completion of Uni Clinic and Outreach Clinics (up to 105 hrs) and online modules (16 hours).

1. UniClinic
In these clinics, the student will continue development of patient management skills and efficiency attending to ongoing patients of the clinic who have basic foot problems or problems associated with an existing medical condition. Clinics will continue to consolidate all relevant theories taught to assist in the assessment, diagnose and management of patients who attend the clinic with medical, mechanical, functional and surgical problems. As such, it is expected to enhance the student's clinical decision making in the selection of appropriate assessment techniques, additional investigations, rehabilitation, footwear assessment and orthotic and adjunct therapies

in general and diverse populations. Complex cases will be a priority to consolidate problem solving, assessment and clinical decision-making skills in difficult cases.

2. Online modules
This subject will continue to build on previous clinical and academic knowledge. Online teaching modules (up to 16 hours) will improve and consolidate specialist diagnostic, screening, prescription and rehabilitation skills.

Outreach clinics
The student will actively participate in outreach clinics. The activity will be directed at consolidating clinical assessment, deductive reasoning and culturally responsive communication skills and skills in person-centred culturally safe management of podiatric conditions. The aim of these activities is to increase efficiency and competency in podiatry care and allow students to demonstrate their ability to adapt to variable real-world clinical environments. Of particular importance will be student involvement in a multi-disciplinary approach to patient care.

REHA 4020 Podiatric Professional Practice Studies

Credit Points 10

Legacy Code 401119

Coordinator Sean Lanting (https://directory.westernsydney.edu.au/search/name/Sean Lanting/)

Description This subject will introduce students to the principles of professional development and appropriate requirements to function as a registered podiatrist. As podiatrists may work as a primary provider, as part of a multidisciplinary team, in the public or private health care setting, they require extensive knowledge of many aspects of the management of a practice or business. During seminars, students will be introduced to a number of principles specific to professional, ethical and legal issues associated with working as a podiatrist, and practice and workplace administrative policies and procedures.

School Health Sciences

Discipline Podiatry

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 4 subject

Pre-requisite(s) REHA 4018

Incompatible Subjects REHA 7023 - Podiatric Professional Practice Studies

Restrictions

Students must be enrolled in 4708 Bachelor of Podiatric Medicine. The subject is Podiatry specific

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the ethical, legal and socio-demographic issues associated with the practice of podiatry
2. Apply principles of business, employment, taxation, and health and safety relating to health care practice
3. Critically analyse the medicolegal requirements and responsibilities for podiatry practice including the requirements of government departments
4. Communicate professionally within the context of employment and practice as a podiatrist including job applications and resumes
5. Build a relationship with government departments, professional associations and companies related to the practice of podiatry
6. Critically review a specific area of clinical practice focusing on evidence-based practice

Subject Content

1. Types of Podiatry Practice
- Private practice - Business plans; Employment/Contracting; Taxation; Practice management
- public health practice
- podiatric research
- podiatric surgery
- Working overseas
- podiatry suppliers
2. Medicolegal Requirements and Responsibilities and Professional Associations
- professional Registration
- Government departments - Department of Veteran Affairs; NSW Podiatry Council
- health and safety - infection control
- Insurance - Professional indemnity; Workcover; Property
- Australian podiatry Association / Australian podiatry Council
3. Ethical and Socio-demographic Issues related to Podiatry Practice
- Complaints handling
- socio-Demographic and socio-economic considerations for healthcare
- multi-disciplinary healthcare
- evidence based practice
- interpersonal and inter-professional communication
4. Job Applications
- cover letters
- Answering selection criteria
- writing resumes
- self-promotion

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Proposal	1,500 words	50	N	Individual
Proposal	1,500 words	50	N	Individual
Essay	7 pages – Cover letter (1 page), Selection criteria (up to 3 pages), Resume (up to 3 pages)	50	N	Individual

REHA 4021 The High Risk Foot

Credit Points 10

Legacy Code 401184

Coordinator Viv Chuter (https://directory.westernsydney.edu.au/search/name/Viv Chuter/)

Description The subject builds on fundamentals of pathophysiology and podiatry specific subjects to understand and manage the impact of systemic disease on foot health. The subject specifically investigates pathology associated with the 'high risk foot' including lower extremity manifestations associated with vascular, endocrine, neurological pathology and immunosuppression. This subject aims to develop comprehensive, coherent and connected knowledge to assist making informed decisions and contribute to sustainable change and improvements in health care for people with systemic disease, with particularly emphasis on diabetes and wound management.

School Health Sciences

Discipline Podiatry

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 4 subject

Pre-requisite(s) REHA 2003 AND
REHA 2007 AND
NATS 2038

Co-requisite(s) REHA 3028

Incompatible Subjects REHA 7026 - Podiatric Techniques 3C

Restrictions Students must be enrolled in 4708 Bachelor of Podiatric Medicine and 4709 Bachelor of Podiatric Medicine (Honours). This subject builds on previous podiatry specific clinical and theory subjects

Assumed Knowledge

All core subjects are assumed knowledge - 400868 Human Anatomy and Physiology 1, 400869 Human Anatomy and Physiology 2, 300574 Neuroanatomy400981 Clinical Pharmacology, 400138 Pathophysiology 1.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critique the anatomical, physiological and pathophysiological differences of the arterial, venous, lymphatic and microvascular systems and discern between the diseases of these systems and their consequences in the lower extremity.
2. Execute a thorough examination of the lower extremity vasculature, diagnose vascular status, recognise limitations of these examinations during interpretation of results and instigate an appropriate management plan.
3. Appraise the structure and function of specific functional units of the nervous system, demonstrate knowledge of a range of neurological and neuromotor disorders and explore treatment options available with an emphasis on the role of the podiatrist in the interdisciplinary health care team.
4. Describe the physiological mechanisms of wound healing, in the presence or absence of normal physiological response and thorough examination and investigations and ascertain the underlying causes of the wound, and generate and implement appropriate strategies to return the tissues to their most functional levels by addressing both the wound and the underlying causes.
5. Discuss the physiological basis of the clinical manifestations of diabetes mellitus as it affects multiple organ and functional systems by performing appropriate examinations (vascular, neurological, musculoskeletal, dermatological and psychosocial).
6. Diagnose, evaluate and treat the foot conditions presented by the person with diabetes mellitus, in particular dermal ulcers and explain the role of physical therapies, particularly footwear and orthotic therapy in the ongoing patient management, and health education and promotion strategies.
7. Define a range of conditions associated with impaired carbohydrate metabolism, including gestational diabetes, and impaired glucose tolerance; and be familiar with the syndrome Diabetes Insipidus for purposes of client education and communication with the allied health team.
8. Appraise the common causes of immunosuppression affecting the at-risk foot and generate a comprehensive knowledge and understanding of those infectious diseases which are of particular importance in the practice of podiatry.
9. Evaluate possible routes of transmission of infectious diseases with particular emphasis on cross infection and discuss and implement universal precautions in clinical practice settings.
10. Determine the impact of infectious disease on the physical, emotional and psychological wellbeing of the individual.

Subject Content

1.Vascular Pathologies and Wound Healing
a). Arterial pathology
- Review of normal arterial structure and function
- Aetiological and Risk Factors in The development of macrovascular disease
- pathophysiology of Inflammatory and sclerotic changes of macrovascular disease
- clinical manifestations and health outcomes of macrovascular pathology in The leg
- assessment concepts and skills in The identification of macrovascular disease
- limitations in The assessment and interpretation of instrumental macrovascular assessment
- treatment of macrovascular disease, Conservative, pharmaceutical, and surgical
- podiatric case management of The patient with macrovascular disease
- pathophysiology of microvascular disease and dysfunction
b). Venous pathology
- Review of normal structure, function and haemodynamics of The Venous system
- Venous hypertensive syndromes through stasis and obstruction in The Venous system
- consequences of deep Venous hypertension (oedematous syndromes, ulceration, dermatitis and superficial varicosities)
- management of obstructive conditions and deep Venous hypertension (Conservative, pharmaceutical and surgical)
- management of The consequences of deep Venous hypertension, with particular references to ulcerative States
2. Neurology
- Review of The Anatomy of The neurological structure, motor and Sensory tracts and neurotransmitters

- Overview of The assessment of clinical and medical conditions in relation to The Upper and Lower motor neurone disorders and presentations
- Overview of neurological conditions affecting The Lower limb including
- adulthood (hereditary, Freidrichss ataxia, Huntingtons)
- Trauma (CVA /TIA, head injury, tumours)
- management of neurological conditions in patients with diabetes
- Infective (Meningitis)
- Poliomyelitis (Acute and Old), Syphilis (Tabes Dorsalis)
- Degenerative (Parkinsonism, multiple Sclerosis, motor neurone disease, Alzheimers)
- Neuromuscular (Myasthenia Gravis, Muscular dystrophies, Epilepsy grand mal, petit mal, focal / Jacksonian epilepsy, Nutritional, Sub-acute combined degeneration of the cord)

3. Wound healing
- Review The physiology of Wound healing in normal and pathologic States
- Inflammation and The Wound microenvironment
- Diagnosis of wounds according to multifactorial aetiologies
- identifying, and controlling Factors which are detrimental to Wound healing (optimising The Wound healing environment)
- Wound debriding agents, cleansing agents and dressings - The range including Factors in The choice and application of Wound care products
- case management of Wound pathology

4. Diabetes
- Defining diabetes mellitus - Aetiological Factors and The signs and Symptoms in The development of diabetes
- The physiology of carbohydrate metabolism, with particular emphasis on The role of insulin and The Classification of conditions associated with impaired glucose metabolism and The role of advanced glycaemic end products (Age) in The Complications of diabetes mellitus
- Diagnosing The condition, Examination of The vascular and Nervous systems with An emphasis on The peripheral Nervous system and diagnostic skills including investigative procedures and clinical urinalysis
- Complications of diabetes

a). Morbidity and mortality in diabetes mellitus
- macrovascular pathology and microvascular dysfunction in diabetes, neurological pathology, including Neuropathic arthropathy, pathological changes to The Inflammatory response, ulceration, infection and gangrene in The diabetic patient

b). Treatment
- controlling blood sugars in diabetes, insulin, oral hypoglycaemia agents, diet, lifestyle and Exercise
- diabetic emergencies - identification and treatment of hypo and hyperglycaemia
- Podiatric treatment of the patient with diabetes - modifications and precautions during routine primary care management of ulcerations, infections and gangrene, orthotic therapy and footwear modification
- principles of health education and promotion - The role of The podiatrist, and strategies for functioning within A multidisciplinary health care team

c). Other diabetic st

REHA 4023 Clinical Practice 3

Credit Points 10

Legacy Code 401311

Coordinator Leigha Dark (https://directory.westernsydney.edu.au/search/name/Leigha Dark/)

Description This clinical subject will operationalise the knowledge and skills developed in the first three years of speech pathology study to provide appropriate and holistic care for paediatric clients. Students will undertake supervised clinical practice to assess and treat paediatric clients. Clinical experience placements may be in speech pathology subjects in hospital, community health, school or on-campus settings. Professional competencies addressed in this subject include communication, documentation, reflection and professional and ethical behaviour. In addition, students will develop skills in client assessment, interpretation of findings and education.

Special Requirements

Legislative pre-requisites

Special Requirements - NSW Health Legislative Prerequisites Pre-requisites

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go

on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and compete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- http://training.gov.au (http://training.gov.au/)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Level Undergraduate Level 4 subject

Pre-requisite(s) REHA 3050

Co-requisite(s) REHA 4028

Restrictions

Students must be enrolled in 4763 Bachelor of Speech Pathology, 4764 Bachelor of Speech Pathology (Honours) or 4788 Bachelor of Speech Pathology (Honours)

Assumed Knowledge

Students are expected to have a sound knowledge of communication and swallowing development and changes across the lifespan and evidence-based approaches to the assessment and management of communication and mealtimes with individuals, families and communities before undertaking this subject. Students are expected to have developed intermediate level clinical skills (CBOS 2011;17), including sound approaches to clinical reasoning and reflection.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Integrate multiple sources of information to plan, develop and evaluate holistic, evidence-based responses to complex case scenarios and speech pathology service issues
2. Develop and present an innovative service response to an authentic and contemporary challenge or opportunity within the Speech Pathology profession
3. Critically appraise the purpose, design and useability of an assistive technology product/service/system by considering multiple stakeholder perspectives including those of clients, families, clinicians, designers and managers.
4. Communicate and work collaboratively with others to achieve desired outcomes
5. Facilitate culturally safe and responsive settings for learning and practice through integration of knowledge, skills, attitudes and values.

Subject Content

A number of topics will be explored and may include, but not be limited to:
- Medicolegal contexts / Contributions
- Palliative care
- justice health
- mental health
- complex chronic disability with medical sequelae
- Technology / Product design and development
- inter professional Collaborations e.g. education, audiology
- majority World wor
- service access ? rural/Remote Issues, cultural lens
- cultural Issues
- EBP /PBE /research
- Craniofacial
- hearing
- Oncology
- Progressive conditions
- Trauma informed care
- NDIS

Restrictions

Students must be enrolled in 4763 Bachelor of Speech Pathology, 4764 Bachelor of Speech Pathology (Honours) or 4788 Bachelor of Speech Pathology (Honours)

Assumed Knowledge

Students are expected to have a sound knowledge of communication and swallowing development and changes across the lifespan, and evidence based approaches to the assessment and management of communication and mealtimes with individuals, families and communities before undertaking this subject. Students are expected to have developed intermediate level clinical skills (CBOS 2011;17), including sound approaches to clinical reasoning and reflection before attempting Clinical Practice 3.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Assess, analyse, plan, implement and manage speech pathology services for individuals, families and communities during speech pathology professional practice at an eapproaching/near entry levelf of competency as evidenced by the COMPASS? Competency Assessment Tool.
2. Work safely and ethically in all professional contexts at an eentry levelf professional competency as evidenced by the COMPASS? Competency Asses

Subject Content

1. During clinical placements
- students will have experiences Working with clients in one or more speech pathology range of practice areas, including speech, language, voice, fluency, multimodal communication and swallowing
- developing Competency in planning, implementation, and interpretation of speech pathology assessment, planning, implementation, and Monitoring of speech pathology services, and/or participation in prevention, education, and Advocacy Activities

2. During workshops students will engage in interactive learning experiences that integrate academic and clinical competencies in the following topics
- assessment and management in complex clinical contexts
- goal setting, evidence based practice and complex service delivery Issues
- documentation and report writing for diverse professional purposes
- Models of consultation and responsive community capacity Building
- outcome measurement, innovation and evaluation of services
- quality improvement, management and assurance
- supervision and lifelong learning
- professionalism, self-care, and Ethical practice
- professional portfolio development
- work readiness

Special Requirements

Legislative pre-requisites

To be eligible to enrol in this subject and attend a health-related placement in your program, students must meet Western Sydney University course requirements **and** Special Legislative Requirements in your state, to be assessed in their first year of study, against the following:

1. National Criminal History Check: Students must have a current check valid for their entire program. A valid National Criminal history check must be an Australia-wide check, include the student's full name matching their Student ID card and date of birth and not have any offences listed. If a student has a criminal history identified on their check, they must provide a clearance or authority document or conditional letter from their relevant authorised state organisation. International students must additionally have a translated International Police Check or statutory declaration.
2. A Working with Children Check (WWCC) clearance letter or state equivalent, valid for their entire program.
3. A current approved first aid certificate valid for their entire program. Approved provider courses can be found at http://training.gov.au (http://training.gov.au/).
4. A completed vaccination/immunisation card with all serology results attached - currency must be maintained by the student to ensure compliance for their entire program.
5. Undertaking/Declaration form (or state equivalent documents).
6. Additional forms as required per state related to, but not limited to: Tuberculosis Assessment tool; Hepatitis B statutory declaration form' Signed Code of Conduct; Student Deed Poll and all other state equivalent documents as required. Contact your school for further details. Resources are also available on the Placement Hub web page. https://www.westernsydney.edu.au/placements_hub (https://www.westernsydney.edu.au/placements_hub/)
7. Relevant Local Health District specific documentation as requested. Contact your School for further details. Resources are also available on the Placement Hub website: https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)
Some external sites may have additional requirements. Students will be advised of any such specified requirements which must be complied with before commencing clinical placements.

REHA 4030 Speech Pathology Professional Issues

Credit Points 10

Legacy Code 401431

Coordinator Belinda Kenny (https://directory.westernsydney.edu.au/search/name/Belinda Kenny/)

Description This subject will address contemporary professional issues relevant to entry-level and future speech pathology practice, Students will integrate knowledge and skills from the year 3 and 4 academic and clinical subjects to generate evidence-based and ethically sound approaches to managing complex and contemporary professional issues. Students will critically reflect on their roles and responsibilities as future professional practitioners, leaders and advocates for the speech pathology profession. Students will engage in career planning and develop strategies to facilitate their transition to professional practice and fulfilling the roles and responsibilities expected of new graduate speech pathologists.

School Health Sciences

Level Undergraduate Level 4 subject

Pre-requisite(s) REHA 4028

Co-requisite(s) REHA 4029

Restrictions

Students must be enrolled in 4763 Bachelor of Speech Pathology, 4764 Bachelor of Speech Pathology (Honours) or 4788 Bachelor of Speech Pathology (Honours)

Assumed Knowledge

Students will be expected to have comprehensive knowledge and understanding of assessment and management of communication and mealtimes across the lifespan. Students will require the knowledge, clinical reasoning and reflection skills to respond to complex case and service delivery issues in speech pathology practice. Students will draw upon their diverse speech pathology practice experiences to complete learning activities and assessments for this subject. This subject focuses on preparation for recruitment and professional entry and it is assumed that students will have achieved professional competencies approaching entry-level before undertaking the subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically reflect on roles, responsibilities and skills required for leadership and advocacy in the speech pathology profession.
2. Engage with the Speech Pathology Australia (SPA) 2030 aspirational goals for the profession through critical application to the future management of individuals, families and communities.
3. Articulate an integrated professional identity by applying theoretical knowledge, professional experience, reasoning and reflection skills during speech pathology recruitment processes.
4. Appraise self-care needs and create practical strategies for professional resilience in future workplace settings.
5. Model professional, ethical and safe practice in all speech pathology contexts.

Subject Content

1. Becoming a member of the speech pathology profession
2. Speech Pathology Australia (SPA) 2030 aspirational goals
3. Ethical leadership and advocacy
4. Recruitment processes and strategies
5. Working as a new graduate speech pathologist in diverse professional contexts
6. Management and business skills for speech pathologists
7. Self-care strategies
8. Seeking and maintaining professional networks
9. Clinical education and supervisory practices
10. Future directions and career pathways in the speech pathology profession

REHA 4031 Honours Research 1

Credit Points 20

Legacy Code 400945

Coordinator Kristy Coxon (https://directory.westernsydney.edu.au/search/name/Kristy Coxon/)

Description This subject commences the significant research component of the student's honours degree. Students will work on their specific research project in conjunction with their supervisor, engaging in the early stages of the research process related to critical review of the literature, designing their project, considering ethical dimensions of their study, and collecting data. The emphasis of this subject is on the application of research knowledge gained in other subjects to the practical conduct of the individual honours project.

School Health Sciences

Discipline Occupational Therapy

Student Contribution Band HECS Band 2 20cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 4 subject

Pre-requisite(s) HLTH 4002

Restrictions

Students must be enrolled in an embedded honours program in a health science program. This subject is specifically tailored to accommodate the program and progression requirements of such students and is not relevant as a general elective.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically review the literature specific to their study to develop the rationale for their research project.
2. Develop specific research questions, objectives or hypotheses for their honours study.
3. Compare and contrast possible research methods relevant to the conduct of their study.
4. Review ethical dimensions of their study and address the necessary ethical approval requirements relevant to the conduct of their research.
5. Critically select and provide a rationale for the choice of research methods for their study.
6. Design, trial and implement initial stages of data collection and analysis specific to the research project.

Subject Content

1. Skills in literature searching and reviewing.
2. Critical review of the literature specific to their study to identify how the research project meets a gap in the research.
3. Development of a critical research rationale to demonstrate a gap in research knowledge.
4. Construction of research questions, objectives or hypotheses unique to the specific study.
5. Review of research methods suitable for the project.
6. Ethical dimensions of the specific honours study.
7. Practical sessions to address the ethical approval requirements relevant to the conduct of their research.
8. Practical mastery of the research methods through trial/piloting/training.
9. Implementation of the initial stages of data collection.
10. Preliminary analysis specific to the research project.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Literature Review	4000 words	50	N	Individual
Learning Contract	2500 words	30	N	Individual
Presentation	20 mins	20	N	Individual

REHA 4032 Honours Research 2

Credit Points 20

Legacy Code 400946

Coordinator Caroline Mills (https://directory.westernsydney.edu.au/search/name/Caroline Mills/)

Description In this subject students will complete the significant research component of their honours study. They will build upon the skills and knowledge of research, evidence-based practice and scholarly enquiry gained in subjects completed earlier in the program. The emphasis of this subject is the completion of a supervised honours research project. Each student will work individually with their supervisor to complete the stages of data collection and data analysis and will write their results into a format suitable for submission for examination. Students will also present their final at a student conference that is at professional conference level.

School Health Sciences

Discipline Occupational Therapy

Student Contribution Band HECS Band 2 20cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 4 subject

Pre-requisite(s) REHA 4031

Restrictions

Students must be enrolled in a health science program and studying honours as part of an embedded program of study. This subject will be specifically tailored to accommodate the program and progression requirements of such students and is not relevant as a general elective.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Implement data collection plans formulated in the previous unit, Honours Research 1 (Health Sciences)
2. Undertake data analysis suitable for their chosen research topic
3. Formulate and implement data management strategies and data analysis to reach research conclusions
4. Critically discuss and present the project�fs aims, methodology, results, and conclusions in a scholarly manner
5. Critically analyse the impact of research findings in relation to theory, practice, education and public policy
6. Present findings at a professionally run student conference to an audience of peers, staff and professionals

Subject Content

Major content will be determined by the particular research topic being investigated.
Generic content will include:
- research design and practical implementation of research methods in health practice
- Ethical conduct of The research process
- data collection, management and analysis relevant to Project
- Critical Review and analysis of literature in relation to research findings
- implications of results for theory, practice, education, policy and future research
- Scholarly writing of The final Honours results in A format suitable for Examination
- professional conference presentation skills

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Thesis	1. Research thesis (8,000-12,000 words), OR 2. Journal article plus extended literature review (5,000-10,000 words total) suitable for examination	90	N	Individual
Presentation		10	N	Individual

REHA 4033 Honours Research 2 (Podiatric Medicine)

Credit Points 20

Legacy Code 401046

Coordinator Kym Hennessy (https://directory.westernsydney.edu.au/search/name/Kym Hennessy/)

Description This is a 20 credit point year-long subject taken over two terms (10 credit points in each term). In this subject students will complete the significant research component of their honours study as a year-long subject of study (offered as 1H and 2H sessions). They will build upon the skills and knowledge of research, evidence-based practice and scholarly enquiry gained in subjects completed earlier in the program. The emphasis of this subject is the completion of a supervised honours research project. Each student will work individually with their supervisor to complete the stages of data collection and data analysis and will write their results into a format suitable for submission for examination.

REHA 4034 Occupational Therapy Clinical Practice 4

Credit Points 20

Legacy Code 400179

Coordinator Lee Zakrzewski (https://directory.westernsydney.edu.au/search/name/Lee Zakrzewski/)

Description In 2013 this subject replaced by 400914 - Occupational Therapy Practice 4. This subject will allow students to consolidate academic knowledge and clinical skills in preparation for becoming a

competent beginning practitioner. Students will be expected to actively participate in assessment, analysis, goal setting, treatment/programme planning and occupational therapy intervention under the supervision of an occupational therapist.

School Health Sciences

Discipline Occupational Therapy

Student Contribution Band HECS Band 2 20cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 4 subject

Pre-requisite(s) LGYA 7072 AND
REHA 3023

Equivalent Subjects LGYB 7906 - Clinical Placement 4

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Manage case loads in preparation for independent practice.
2. Demonstrate professional behaviours and attitudes in practice settings.
3. Communicate effectively with clients, team members, relevant community groups and industry partners.
4. Utilise a range of assessments to set long and short term goals.
5. Implement and evaluate occupational therapy interventions in the practice setting.
6. Prepare documents in a professional format related to practice.
7. Practice self-directed learning strategies through the use of a learning contract.
8. Reflect on their practice experience using a structured format.

Subject Content

- professional behaviour
- communication skills
- Individually negotiated learning Contract
- documentation skills for practice
- assessment of individual and group needs
- implementation and evaluation of programs for individuals and groups

Special Requirements

Legislative pre-requisites

To undertake this subject, students must comply with the following special requirements:

- Completion of a Prohibited Employment Declaration;
- Criminal Record Check Clearance;
- Provide evidence of compliance with the occupational screening and immunisation policy of NSW Health;
- Students must possess a current First Aid Certificate approved by the Workcover Authority.

REHA 4035 Occupational Therapy Practice 4 (Honours)

Credit Points 20

Legacy Code 401161

Coordinator Bronwyn Gill (https://directory.westernsydney.edu.au/search/name/Bronwyn Gill/)

Description This subject will allow students to consolidate academic knowledge and practice skills in preparation for becoming a competent beginning practitioner. Students will be expected to actively participate in assessment, analysis, goal setting, intervention and evaluation under the supervision of an occupational therapist. Students will complete practice hours in accordance with World Federation of Occupational Therapy accreditation guidelines. Career development workshops will be conducted to prepare students for entry into the profession of occupational therapy. In addition, honours students will examine their role as beginning practitioner researchers during their placement and the role of research in underpinning clinical decisions.

School Health Sciences

Discipline Occupational Therapy

Student Contribution Band HECS Band 2 20cp

Level Undergraduate Level 4 subject

Pre-requisite(s) REHA 3024 AND
REHA 4031

Incompatible Subjects REHA 7012 - Occupational Therapy Practice 4 (Honours)

Restrictions

Students must be enrolled in 4712 Bachelor of Occupational Therapy (Honours). This subject is only relevant to occupational therapy honours students as part of their embedded program of study. This subject will be specifically tailored to accommodate the program and progression requirements of these students, in particular the need to attend fieldwork placements, and therefore would not be relevant as a general elective.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Manage case loads in preparation for independent practice.
2. Display professional behaviours and attitudes in practice settings.
3. Communicate effectively with clients, team members, relevant community groups and industry partners.
4. Utilise a range of assessments to set long and short term goals.
5. Implement and evaluate occupational therapy interventions in the practice setting.
6. Prepare documents in a professional format related to practice.
7. Practice self-directed learning strategies through the use of a learning contract.
8. Reflect on their practice experience using a structured format.
9. Analyse the role of practitioner researchers in the clinical setting.

Subject Content

1. Professional practice placement.
2. Professional behaviours and self management skills.
3. Communication skills.
4. Individually negotiated learning contract.
5. Documentation skills for practice.
6. Assessment of individual and group needs.
7. Implementation and evaluation of programs for individuals and groups.

8. Career planning and the transition to work.
9. The role of honours research training in preparing students to become practitioner researchers.

Special Requirements

Legislative pre-requisites

NOTE: Due to Covid Restrictions, the First Aid Requirement is currently not needed.

Special Requirements - NSW Health Legislative Prerequisites ~~Pre-requisites~~

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and compete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- http://training.gov.au (http://training.gov.au/)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

REHA 7005 Complex Cases and Professional Issues

Credit Points 10

Legacy Code 401049

Coordinator Daniel Thomson (https://directory.westernsydney.edu.au/search/name/Daniel Thomson/)

Description From 2018 students should take 401108 Complex Cases and Professional Issues. In this subject, students will further develop their clinical reasoning with respect to clients with complex presentations. A framework will be presented, which synthesises complex information such as the theory, research and skills in musculoskeletal, cardiorespiratory and neurological physiotherapy across the lifespan, and theories related to professionalism, ethics, safety and communication. This framework will be applied to the area of Intensive Care, where students will develop further knowledge and skills in specific cardiorespiratory techniques such as manual hyperinflation and suctioning. This subject also contains the discussion of a range of recent professional developments in physiotherapy, which are relevant to entry level practitioners. These include registration as a physiotherapist, continuing education, workload control strategies, duty of care responsibilities and quality improvement processes (including critical reflection), employment strategies and career pathways.

School Health Sciences

Discipline Physiotherapy

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) REHA 3001 AND
REHA 3014 AND
REHA 7018 AND
REHA 3004

Co-requisite(s) REHA 7001 OR
REHA 7002 OR
REHA 7003 OR
REHA 7004

Restrictions

Students must be enrolled in 4662 Bachelor of Health Science/Master of Physiotherapy, 4667 Master of Physiotherapy or 4668 Bachelor of Health Science (Honours)/Master of Physiotherapy.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Synthesise complex assessment information, using clinical reasoning and client-centred approaches to design and critically reflect on a management plan for clients with complex presentations
2. Plan, justify, implement, and evaluate a safe and effective treatment of the impairments and activity limitations in clients with respiratory failure with and without multi-system co-morbidities
3. Critically reflect on a clinical scenario with respect to professionalism, ethics, safety and communication
4. Synthesise the contributions of physiotherapy study, personal interests and opportunities in physiotherapy to develop a personal, targeted employment strategy
5. Demonstrate effective verbal and written communication skills

Subject Content

1. Integration of physiotherapy knowledge developed from previous university-based and clinically-based physiotherapy with the theory of professionalism, ethics, safety and communication (clinical reasoning) to plan management strategies for clients with complex presentations
2. Evidence-based management of clients with respiratory failure requiring assisted ventilation
3. Recent professional developments in physiotherapy, such as registration as a physiotherapist continuing education, workload control strategies, quality improvement processes, and career pathways
4. Employment strategies, considering desires and personal attributes as well as attainment of the UWS Physiotherapy Graduate Attributes and the Standards for Physiotherapy (2006)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Group Assignment	1,500 words	25	N	Group
Individual Assignment	2,500 words	45	N	Individual
Skills Test	10 skills	Pass/Fail	Y	Individual
Written Exam – ICU theory and complex case study	2 hours	30	Y	Individual

REHA 7007 Integrating Research into Physiotherapy Practice

Credit Points 10

Legacy Code 401050

Coordinator Clarice Tang (https://directory.westernsydney.edu.au/search/name/Clarice Tang/)

Description From 2018 students should take 401109 Integrating Research into Physiotherapy Practice. In this subject, students will further develop their evidence based practice skills and knowledge by applying it in practice settings. This will involve applying the academic knowledge and skills from three prior evidence based practice and research subjects by synthesising it with their clinical experience and skills. Students will be allocated a topic area from which they will identify a clinical "problem" or health-related issue. Students will then plan and design a robust research project to answer this question. Students will be expected to reflect on the barriers and facilitators of evidence-based practice, and develop strategies and interventions to be used to facilitate the implementation of evidence in practice by clients and health care practitioners. This subject also involves students developing leadership and educator skills by facilitating and participating in a journal club.

School Health Sciences

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) HLTH 3005 OR
HLTH 4002 AND
REHA 7001 OR
REHA 7002 OR

REHA 7003 OR
REHA 7004

Restrictions

Students must be enrolled in 4662 Bachelor of Health Science/Master of Physiotherapy, 4667 Master of Physiotherapy or 4668 Bachelor of Health Science (Honours)/Master of Physiotherapy.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify an evidence-practice gap in clinical practice.
2. Generate a structured clinical question about an intervention for a clinical scenario.
3. Plan and design a robust research study for a specific population group ranging from movement control to lifestyle issues, remediation to health promotion.
4. Critically reflect on outcomes of prior research and justify research methodology.
5. Design strategies and interventions to facilitate the implementation of evidence by clients and practitioners.
6. Effectively communicate verbally and in a variety of written formats as required in various contexts e.g. clinical and academic.

Subject Content

Advanced, applied physiotherapy research practice including:
- planning An evidence-based research Topic investigation
- theoretical and practical strategies to execute An evidence-based research investigation in A range of practice areas
- theoretical and research-identified Facilitators and barriers to evidence based practice in clinical practice
- Critical reflection on The execution of The evidence-based research investigation and identification of future learning needs
- advanced skills in reading and interpreting physiotherapy research evidence
- physiotherapy evidence for specific population groups, e.g. Arthritis, back pain, occupational injury
- leadership skills to effectively facilitate and participate in A group Activities, such as A journal club
- verbal and written skills

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Presentation in Journal Club Format	20 minutes	20	N	Individual
Written Essay	2,500 words	50	N	Individual
Professional Task	1 page or no longer than 5 minutes	30	N	Individual

REHA 7008 Introduction to Podiatry and Clinical Education

Credit Points 10

Legacy Code 400942

Coordinator Stefania Penkala (https://directory.westernsydney.edu.au/search/name/Stefania Penkala/)

Description This is the first subject to introduce Master's entry students to some basic theoretical and practical components related to podiatric practice with an emphasis on clinical competencies in patient communication and management that will be reinforced in the one week clinical placement in either a private practice or public sector setting. In addition, a clinical component will introduce students to skills required to treat basic skin conditions and evaluate the functional anatomy, gait and cursory examination as well as communication skills which are necessary components for the Podiatric Practice clinical subjects. Furthermore, general clinical treatment techniques will be covered such as chair side devices, strapping and removable pads to more complex skills such as the manufacture of non-cast orthotic devices will be covered.

School Health Sciences

Discipline Podiatry

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Podiatry specific

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the role of podiatrists in health care and understand the legal legislation and registration guidelines for the podiatry profession.
2. Demonstrate the ability to evaluate the aetiology and management of common skin and nail disorders in the health setting.
3. Distinguish relevant skills in assessment of dermatology, vascular, neurological and lower extremity biomechanics and gait analysis within the health environment.
4. Analyse the framework of OH&S, infection control standards and protocols in a clinical setting and in the treatment of the high risk foot and nail surgery procedures.
5. Apply analytical skills encompassing communication and correspondence with patients and allied health professionals (interpersonal, written, and professional presentation).
6. Demonstrate the ability to evaluate and manage common podiatric skills such as identifying and handling of instrumentation within the health environment.
7. Develop manual skills for the application of clinical techniques and apply strapping or pads to the leg and foot within the health environment.
8. Demonstrate a basic understanding of appropriate footwear and demonstrate the need for prescription of non cast orthoses.

9. Demonstrate the ability to apply the above theoretical concepts and practical skills during a one week placement in a private practice or public sector setting.

Subject Content

1. General clinical protocols
- Policy for the Uniclinic infection control standards and orthoses fabrication work areas (OH&S issues)
- documentation for patient management at Western Sydney university and learning contracts for external placements
- professional Issues related to clinical procedures (Internal and external), e.g. Immunisation, criminal checks, senior first aid and Dress Code
2. Cursory physical examination
- vascular, neurological and dermatological
- Basic Biomechanical techniques, planes and axes of The Lower extremity and introduction to assessment of gait analysis
- Basic gait analysis
3. Introduction to functional anatomy
- Anatomy of The thigh, leg and foot
- general joint and muscle function assessment
- introduction to postural types (lordosis, kyphosis) and foot types (normal, pronated and supinated)
4. Documentation
- legal and professional requirements
- practical management Issues
- assessment forms from The UniClinic
- prescription writing for orthoses
- correspondence ? letter writing
5. Instrumentation
- introduction to Basic routine instrument pack
- introduction to handling instruments
- Basic nail and Scalpel techniques
6. Manual treatment skills
- principles for mechanical / Fabrication skills
- Basic strapping and Padding techniques
- Basic workshop skills to fabricate non cast orthoses
7. Manual fabrication skills
- introduction to safety Factors in The workshop
8. External Clinical Placement
- one full week placement
- private or public sector
- observation only

REHA 7009 Neurological Physiotherapy Practice

Credit Points 10

Legacy Code 400987

Coordinator Fran Moran (https://directory.westernsydney.edu.au/search/name/Fran Moran/)

Description This subject introduces the scope of physiotherapy practice in Australia and around the world as well as ethical and professional behaviours and communication skills required by physiotherapists. Students will develop skills in conducting simple subjective and objective examinations of posture, range of movement, muscle strength and length and providing gait rehabilitation. These knowledge and skills will be applied to the physiotherapy management of clients with acute neurological disorders. physiotherapy contexts. Neurological competencies addressed in this subject include introductory skills in neurological physiotherapy assessment, interpretation and prioritisation of findings along with the selection and implementation and evaluation of appropriate treatment strategies.

School Health Sciences

Discipline Physiotherapy

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) REHA 3026 AND
REHA 3001 AND
REHA 3004

Restrictions

Students must be enrolled in the 4667 Master of Physiotherapy. Students in this program are required to participate fully in practical classes. This involves disrobing to shorts and singlet or swim-suit equivalent in mixed gender classes. Students will practice hands-on physiotherapy examination and treatment techniques on both genders, and will personally experience these techniques which will be performed on them by other students and relevant academic staff.

Assumed Knowledge

Neuroanatomy and research methods. Knowledge of clinical pharmacology would be an advantage.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Display effective communication skills, ethics and professionalism
2. Conduct a simple subjective and objective assessment
3. Record findings in an appropriate format for entry into health records
4. Analyse assessment findings and develop an appropriate treatment plan
5. Plan appropriate and effective management strategies including transfers and gait rehabilitation
6. Monitor, evaluate and progress treatments as indicated
7. Demonstrate safe work practices

Subject Content

1. Within a generic context:
- introduction to The physiotherapy profession and areas of practice. Ethical principles, professional Standards and registration. Importance and practice of Critical reflection and communication skills. posture and movement assessment, application of Basic massage techniques.
- simple subjective assessment and objective assessment of range of movement, length, strength. Screening for pathology and safety with mobilisation. outcome measures for function and gait. observation of different gait patterns, principles of rehabilitation and use of gait aides. practice facilitating Transfers and gait education.
2. Within an acute, neurological physiotherapy context:
- subjective assessment, investigations, notes, bed charts
- objective assessment including observation, Basic cognition, range of movement, strength, length, sensation, reflexes, tone, Coordination, proprioception, function and mobility
- interpretation of findings, Prioritisation of client problems and development of treatment plan

- design and implementation of appropriate management techniques including education, Exercise, task-related training and gait rehabilitation
- Monitoring, evaluation and Progression of treatments as appropriate
- Interprofessional communication and professionalism
- Safe work practices and discharge planning

REHA 7010 Occupational Justice

Credit Points 10

Legacy Code 400916

Coordinator Katie Hammill (https://directory.westernsydney.edu.au/search/name/Katie Hammill/)

Description This subject critically examines practice in the community with a focus on social inclusion and occupational justice. Life perspectives of people experiencing occupational injustice are explored. Current and historical ideologies which underpin global and national legislation and policies on human rights are examined. The promotion of occupational participation through occupational therapy practice is outlined. This subject challenges popular myths and stereotypes of people with disabilities. Issues such as de-institutionalisation, duty of care, dignity of risk, choice-making, rights and negligence are critiqued against legal, ethical and personal perspectives. This subject assists students to develop critical thinking and reflection skills for practice.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) REHA 3022 AND
REHA 3020

Equivalent Subjects LGYA 7065 - Occupation Social Participation

Restrictions

Students must be enrolled in 4663 Bachelor of Health Science/Masters of Occupational Therapy or 4664 Master of Occupational Therapy or 4712 Bachelor of Occupational Therapy (Honours).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the occupational injustices experienced by individuals and/ or groups and hypothesise the potential impact on community membership and participation.
2. Appraise past and present conceptual frameworks and ideologies which influence an individualðfs social and community inclusion
3. Reflect on personal and societal attitudes and beliefs about people who experience occupational injustice (eg disability, homelessness, refugees, Indigenous Australians)
4. Identify community inclusion opportunities and evaluate their potential to facilitate occupational engagement
5. Critique occupational therapy approaches used to facilitate occupational justice.
6. Develop an occupational therapy strategy to enable occupational justice for a marginalised group within their local community or global context

Subject Content

1. Concepts and principles of occupational justice, community membership and participation
2. Global and national legislation and policies on human rights
3. Conceptual frameworks and ideologies which underpin service planning
4. Strategies to manage challenging behaviours to facilitate successful community inclusion
5. Concept of institutionalisation and its impact on occupational freedom
6. Approaches used to guide occupational therapy practice in the community
7. Community inclusion opportunities available in the community
8. Issues relating to provision of service; duty of care versus dignity of risk, choice-making, advocacy and abuse and neglect

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subjects, students must have submitted a Student Undertaking Form. Use the link to the Special Requirements webpage below for more information.
Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)
If students are visiting a NSW Health facility they will need to comply with the occupational screening and immunisation policy of NSW Health.

REHA 7011 Occupational Therapy Practice 4

Credit Points 20

Legacy Code 400914

Coordinator Bronwyn Gill (https://directory.westernsydney.edu.au/search/name/Bronwyn Gill/)

Description This subject will allow students to consolidate academic knowledge and practice skills in preparation for becoming a competent beginning practitioner. Students will be expected to actively participate in assessment, analysis, goal setting, intervention and evaluation under the supervision of an occupational therapist. Students will complete practice hours in accordance with World Federation of Occupational Therapy accreditation guidelines while undertaking the second of two final year clinical placements. Students will also gain knowledge and skills in relation to career planning, professional networking and workforce entry.

Equivalent Subjects REHA 4034 - Occupational Therapy Clinical Practice 4

Restrictions

Students must be enrolled in 4663 Bachelor of Health Science/Masters of Occupational Therapy or 4664 Master of Occupational Therapy.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Manage case loads in preparation for independent practice.
2. Demonstrate professional behaviours and attitudes in practice settings, including communicating effectively with clients, team members, relevant community groups and industry partners.
3. Utilise a range of assessments to set long and short term goals.
4. Implement and evaluate occupational therapy interventions in the practice setting.
5. Prepare documents in a professional format related to practice.
6. Practice self-directed learning strategies through the use of a learning contract.
7. Reflect on their practice experience using a structured format.
8. Implement career planning strategies, including the development of professional networks and knowledge and skills for entering the workforce.

Subject Content

1. Professional practice placement
2. Professional behaviours and Self Management Skills
3. Communication skills
4. Individually negotiated learning contract
5. Documentation skills for practice
6. Assessment of individual and group needs
7. Implementation and evaluation of programs for individuals and groups
8. Career planning, professional networks and preparation for entering the workforce.

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and compete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- http://training.gov.au (http://training.gov.au/)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

REHA 7014 Occupational Therapy Project

Credit Points 10

Legacy Code 400913

Coordinator Rosalind Bye (https://directory.westernsydney.edu.au/search/name/Rosalind Bye/)

Description The aim of this subject is for students to critically apply their knowledge of professional theory, practice, research and evaluation skills to the investigation of an occupational therapy professional issue of interest or concern. Students will apply unobtrusive research methods to investigate their chosen topic. Students develop an extensive knowledge of their chosen topic and critically analyse the implications of their findings in terms of theory, policy and contemporary health care practice. Students will synthesise their findings into a scholarly research project report and present their findings at a professional-level capstone student conference.

School Health Sciences

Discipline Occupational Therapy

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) REHA 3025 AND
HLTH 3005

Restrictions

Students must be enrolled in 4663 Bachelor of Health Science/Masters of Occupational Therapy or 4664 Master of Occupational Therapy. This is a specialty subject offered as a compulsory core subject of the occupational therapy program. It is profession specific, preparing students to practice as an occupational therapist and not relevant as an elective for non-occupational therapy students.

Assumed Knowledge

Knowledge of issues and concerns relevant to the occupational therapy profession and occupational therapy clients and consumers. This knowledge will ideally have been gained in part by undertaking several fieldwork experiences in preceding years of the program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Formulate a research problem relevant to occupational therapy theory, practice or reasoning.
2. Systematically search for and critique a wide range of literature relating to a specific research problem.
3. Critically examine a range of unobtrusive research methods which may be suitable for investigating the problem and prepare a plan of the project.
4. Critically analyse ethical issues associated with the conduct of unobtrusive research.
5. Execute unobtrusive research methods of data collection and analysis appropriate to the project.
6. Synthesise complex information into an investigative project report that reflects a critical examination of the topic, with recommendations related to future occupational therapy practice, theory, national and international policy.
7. Present a professional standard conference abstract and presentation.
8. Work collaboratively and in a self-directed manner with other students to complete the above objectives.

Subject Content

1. Contemporary and topical issues relating to occupational therapy practice, theory and professional reasoning.
2. Unobtrusive research methods eg. critical literature review, thematic analysis of public documents, theoretical analysis of case study populations.
3. Ethics of research using unobtrusive methods.
4. Project management skills.
5. Professional Communication skills ? professional and scholarly writing, professional conference presentation skills, abstract writing.
6. Capstone student conference ? preparation and involvement.

REHA 7015 Occupational Therapy Specialties

Credit Points 10

Legacy Code 400917

Coordinator Katie Hammill (https://directory.westernsydney.edu.au/search/name/Katie Hammill/)

Description This subject provides occupational therapy students with the opportunity to select from, and undertake advanced study in, a range of occupational therapy clinical specialty areas. Several streams will run concurrently in this subject representing key clinical areas of specialisation in occupational therapy. Students will be able to focus their study, by selecting a combination of clinical specialty streams. Streams will cover relevant clinical content, examining the unique occupational therapy contribution in each specialty area.

School Health Sciences

Discipline Occupational Therapy

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) REHA 3025

Restrictions

Students must be enrolled in 4663 Bachelor of Health Science/Masters of Occupational Therapy or 4664 Master of Occupational Therapy.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the purpose of clinical specialisation within occupational therapy
2. Review and evaluate the unique occupational therapy contribution in clinical specialty areas of interest
3. Investigate clinical questions and apply knowledge and skills of evidence-based practice to the investigation of clinical specialty topics
4. Perform professional competencies relevant to the chosen clinical specialisation areas

Subject Content

1. The unique occupational therapy contribution in areas of clinical specialisation
2. The use of learning contracts to determine learning needs in areas of clinical specialisation
3. Clinical questions relevant to the development of expertise in chosen clinical specialty areas as negotiated with academic staff
4. Knowledge and skills of evidence-based practice in the investigation of clinical specialty topics
5. Professional competencies relevant to the chosen clinical specialisation areas as negotiated with academic staff

REHA 7016 Occupational Therapy Theory and Practice

Credit Points 10

Legacy Code 400911

Coordinator Karen Arblaster (https://directory.westernsydney.edu.au/search/name/Karen Arblaster/)

Description This subject introduces master's entry students to the theory and practice of occupational therapy. Students will explore the unique contribution of occupational therapists in the health care setting, apply theoretical and philosophical principles underpinning the profession to client groups, and learn analytical skills to examine the relationship between a person, their environment and their participation in daily occupations. The occupational therapy problem solving process will be briefly introduced. In addition, students will study clinical and professional competencies related to practice as a health professional. Finally, the above knowledge and skills will be applied during supervised fieldwork experience.

School Health Sciences

Discipline Occupational Therapy

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 4664 Master of Occupational Therapy.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Define occupational therapy and describe the history and development of the profession
2. Summarise the occupational therapy role in the Australian health care context across major practice areas
3. Evaluate the impact of health, disability and illness on occupational participation using the International Classifications of Function
4. Apply occupational therapy philosophical concepts and theoretical practice models to client case studies
5. Describe the occupational therapy problem-solving process of referral, assessment, goal setting, treatment planning, intervention, evaluation of outcomes and the role of evidence-based practice in this process
6. Conduct occupational analysis of client case scenarios using the Person-Environment-Occupation approach
7. Reflect on the role of a health professional, the nature of the helping relationship, and the role of teamwork in the health care context
8. Apply ethical practice principles to health care scenarios
9. Perform key professional competencies related to occupational health and safety, manual handling and health professional

communication (interpersonal, written, and professional presentation) both in class and during fieldwork experiences
10. Apply the above knowledge and skills during fieldwork experiences

Subject Content

1. Definitions of occupational therapy
2. History and development of the profession in Australia and internationally
3. Australian health care context and the role of occupational therapy
4. Major practice areas for occupational therapists
5. International classifications of function and health, conceptual models of disability, and personal narratives related to living with conditions that impact on occupational participation e.g. illness/disability/ageing
6. Occupational therapy philosophical concepts and theoretical practice models
7. Occupational therapy problem-solving process: referral, assessment, goal setting, treatment planning, intervention and evaluation of outcomes
8. The role of evidence-based practice in the problem solving process
9. Occupational analysis of client case scenarios using the Person-Environment-Occupation approach
10. The role of a health professional, rights and responsibilities
11. The nature of the helping relationship and duty of care to clients
12. Teamwork in the health care context and the role of other health professionals
13. Ethical principles relevant to health care professionals
14. Professional practice competencies: occupational health and safety, manual handling and written and verbal health professional communication (interpersonal communication, professional literacy, plagiarism, referencing, presentation skills)
15. Fieldwork experiences to consolidate the above knowledge and skills

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject, students must have:

1) submitted a Student Undertaking Form and have applied for a National Police Certificate;
2) submitted Working with Children Check Student Declaration;
3) provide evidence of compliance with the occupational screening and immunisation policy of NSW Health; and
4) possess a current First Aid Certificate approved by the WorkCover Authority.

REHA 7017 Paediatric Physiotherapy

Credit Points 10

Legacy Code 401047

Coordinator Genevieve Dwyer (https://directory.westernsydney.edu.au/search/name/Genevieve Dwyer/)

Description From 2018 students should take 401106 - Paediatric Physiotherapy. This subject aims to prepare the student as a competent entry-level practitioner in paediatric physiotherapy. It focuses on understanding the changes which occur from infancy to maturity and the impact of congenital or acquired conditions, or lifestyle diseases causing dysfunction. Clinical and ethical reasoning and family-centred practice are both stressed. The approach will also emphasise the role of physiotherapy within inter-professional teams to prepare for different work settings (acute care, rehabilitation and/or community). The subject integrates prior learning from previous years (especially subjects related to neurology musculoskeletal and cardiopulmonary physiotherapy and exercise rehabilitation).

School Health Sciences

Discipline Physiotherapy

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) REHA 3009 AND
REHA 3018

Restrictions

Students must be enrolled in 4662 Bachelor of Health Science/Master of Physiotherapy, 4667 Master of Physiotherapy or 4668 Bachelor of Health Science (Honours)/Master of Physiotherapy

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Outline typical growth and development from birth to adolescence; and discuss the occurrence of variations in typical development and possible reasons for these.
2. Describe the potential impact of atypical growth and development on the skeletal, respiratory and/or neurological system of a child with congenital or acquired condition.
3. Identify the potential psychosocial impact of illness, disease and/or disability on a child, their family and the community contexts.
4. Research and determine relevant methods used to assess and/or monitor infants, children and adolescents as appropriate to their needs.
5. Solve relevant complex paediatric clinical problems accessing appropriate resources and using a process of clinical reasoning.
6. Select physiotherapy interventions based on the best evidence available and identify how the intervention(s)/management would be implemented and evaluated, ensuring safe work practices.
7. Justify a plan of management for a paediatric problem that demonstrates professional and ethical behaviour, and also recognises the potential role of other health practitioners, as indicated.

Subject Content

Theory, research and practice, within a paediatric physiotherapy context, for:
1. Typical growth and development from birth to adolescence
2. The impact of atypical growth and development on a child with a congenital or acquired condition
3. The potential psychosocial impact of illness, disease and/or disability on a child, their family and community
4. Working across a variety of workplace settings (acute care, rehabilitation and community-based) and within a family-centred practice philosophy and ICF framework
5. Identifying relevant methods used to assess and/or monitor infants, children and adolescence, as appropriate to their needs
6. Planning case management of complex paediatric clinical problems using sound clinical reasoning and illustrating physiotherapy practice

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Developmental assessment and self-reflection report	1000 words	20	N	Individual
Case Compilation	3000 words	30	N	Individual
Written examination	2 hours	50	N	Individual

REHA 7018 Physiotherapy for Chronic Illness and Disease

Credit Points 10

Legacy Code 401048

Coordinator Genevieve Dwyer (https://directory.westernsydney.edu.au/search/name/Genevieve Dwyer/)

Description From 2018 students should take 401107 - Physiotherapy for Chronic Illness and Disease. This subject focuses on the role of physiotherapy in chronic disease management. A case-based learning approach will be undertaken to provide students with the theory, research and practice which underpins the assessment and treatment of people with chronic disease. The role of lifestyle factors in the development of chronic disease will be explored, along with health promotion and preventative strategies. The importance of client-centred care, which respects culture and diversity, and the multidisciplinary team approach will also be investigated in the context of frequently occurring chronic conditions.

Discipline Physiotherapy

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) REHA 3009

Co-requisite(s) REHA 7001 OR
REHA 7002 OR
REHA 7003 OR
REHA 7004

Restrictions

Students must be enrolled in 4662 Bachelor of Health Science/Master of Physiotherapy, 4667 Master of Physiotherapy or 4668 Bachelor of Health Science (Honours)/Master of Physiotherapy.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Synthesise evidence to explain how lifestyle and/or psychosocial factors can influence the development and continuation of chronic illness or disease.
2. Justify the role of physiotherapy in the prevention and/or management of chronic illness or disease.
3. Critically reflect on the contributions of a multidisciplinary/ interdisciplinary team in the management of individuals with chronic illness or disease.
4. Solve relevant complex clinical problems accessing appropriate resources and using a process of sound clinical reasoning.
5. Research and determine a client-centred approach in the design of a physiotherapy management plan for the management of chronic illness or disease.

Subject Content

1. Prevalence of chronic illness and disease in Australia and internationally and relevance to physiotherapy
2. Role of physical activity in promoting healthy lifestyles and quality of life across the lifespan for those living with chronic disease, illness or disability
3. Living with chronic illness or disease from the perspective of the patient
4. Goal setting and optimising compliance to effect positive behavioural change and/or maximise quality of life
5. Opportunities for physiotherapists to assist in the prevention and management of chronic disease
6. Role of community physiotherapy within a multidisciplinary/ interdisciplinary team approach to management of chronic disease
7. Palliative care: supporting patients in the last phase of life
8. Students will cover some key chronic disease areas via seminar topics. The theme of the seminar topics is promoting healthy lifestyles to optimise quality of life throughout the lifespan.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Group seminar	25 mins	30	N	Individual
Structured critical analysis and reflection of clinical reasoning related to patient seen during clinical site visit or to case scenario presented in class.	1500 words	30	N	Individual

Chronic disease clinical unit case study reflection workbook	1800 words	40	N	Individual

REHA 7019 Podiatric Clinical Block

Coordinator Jennifer Sonter (https://directory.westernsydney.edu.au/search/name/Jennifer Sonter/)

Student Contribution Band

REHA 7027 Research into Practice: bridging the clinician-researcher divide in applied and creative therapies

Credit Points 10

Legacy Code 102728

Coordinator Alison Short (https://directory.westernsydney.edu.au/search/name/Alison Short/)

Description Evidence Based Research (EBR) can inform excellence in clinical practice in order to best meet the needs of our clients and patients. How we choose and use this research is critical, as is the way that we understand ourselves to be a researcher, beyond our practitioner identity. If you are seeking to translate benchtop research (basic laboratory approaches) into applied research practice, and if you are transitioning towards a new identity as a clinician-researcher, this is the subject for you. Our applied research focus considers broad applications relevant to the creative arts therapies, verbal therapies, allied and other health professions, by looking at research processes which ultimately improve practice in the 'real world'.

School Humanities & Comm Arts

Discipline Rehabilitation Therapies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Distinguish between clinical and research practices and their ethical implications
2. Demonstrate skills in using benchtop research (basic laboratory approaches) to inform applied research contexts
3. Reflect critically and constructively on own development as a clinician-researcher

Subject Content

Content will be drawn from, or elaborate upon, a selection of the following topics:
- How do we know what we know? ? epistemology
- How do we know what works? ? evidence based research and evidence based practice (EBR and EBP)
- The nature of evidence for practice
- Benchtop and basic laboratory approaches
- Approaches to real-world practice-based research
- Harnessing existing research into practice contexts
- Role of the clinician, role of the researcher
- Understand the development of the clinician-researcher
- Translation and impact of applied research into the clinical setting
- The scope and limitations of EBR ? its place in the hierarchy of evidence, and the politics of what counts as knowledge

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Log/ Workbook: Journal reflection, specific questions	2,000 words	30	N	Individual
Online Presentation	10 minutes, plus feedback to other students	25	N	Individual
Research Essay	3,500 words	45	N	Individual

SPRT 1001 Fundamentals of Exercise Science

Credit Points 10

Legacy Code 400880

Coordinator Drew Keys (https://directory.westernsydney.edu.au/search/name/Drew Keys/)

Description This subject is designed to provide fundamental basic science and sport and exercise science content, with the intent to prepare the students for the more advanced scientific applications to the study and research of the sport and exercise sciences. Students will be exposed to computer software applications to aid data processing used in the sport and exercise sciences, with special applications to fields such as biomechanics, exercise physiology, motor learning, skill acquisition and sport psychology.

Equivalent Subjects SPRT 1007 - Professional Practice of Sport Exercise Science SPRT 1002 - Fundamentals of Exercise Science (WSTC)

Restrictions

Students must be enrolled in 4658 Bachelor of Health Science (Sport and Exercise Science) or 4659 Bachelor of Health Science (Personal Development, Health and Physical Education or 4741 Bachelor of Sport Development or 4742 Bachelor of Health Science (Health and Physical Education)-Pathway to Teaching (Secondary) or 4747 Bachelor of Health Science (Health and Physical Education) or 4791 Bachelor of Health and Physical Education (Pathway to Teaching Secondary) or 4792 Bachelor of Health and Physical Education or 3769 Bachelor of Data Science or 4656 Bachelor of Health Science, 6000 Diploma in Health Science/Bachelor of Health Science or 6001 Diploma in Health Science/Bachelor of Health Science (Health and Physical Education).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the scientific background of the sport and exercise sciences and outline career opportunities within this discipline
2. Define and describe each of the main disciplines of the sport and exercise sciences: biomechanics; exercise physiology; motor learning & skill acquisition; and sports & health psychology.
3. Recall and illustrate knowledge of introductory principles within the main disciplines of the sport and exercise sciences.
4. Evaluate measurement techniques and procedures typically undertaken in the sport & exercise sciences.
5. Employ equipment and software applications to either: collect, process and/or present data common to the sport and exercise sciences.
6. Recall knowledge of and execute all practical skills and activities safely in compliance with discipline specific OH&S procedures and systems, and UWS standard operating procedures and laboratory rules.
7. Demonstrate communication, numeracy and social interaction skills, together with information and technology literacy.

Subject Content

1. Overview of the Sport and Exercise Sciences
2. Measurement in Sport and Exercise Science
3. Introduction to Biomechanics
4. Introduction to Exercise Physiology
5. Introduction to Physical Activity
6. Introduction to Motor Learning and Skill Acquisition
7. Introduction to Sport and Exercise Psychology

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	Up to 30 mins	20	N	Individual
Presentation	15-20 mins	30	N	Individual
Presentation	5 mins	10	N	Individual
End-of-session Exam	2 hours	40	Y	Individual

SPRT 1002 Fundamentals of Exercise Science (WSTC)

Credit Points 10

Legacy Code 700073

Coordinator Ryan Sidoti (https://directory.westernsydney.edu.au/search/name/Ryan Sidoti/)

Description This subject is designed to provide fundamental basic science and sport and exercise science content, with the intent to prepare the students for the more advanced scientific applications to the study and research of the sport and exercise sciences. Students will be exposed to computer software applications to aid data processing used in the sport and exercise sciences, with special applications to fields such as biomechanics, exercise physiology, motor learning, skill acquisition and sport psychology.

SPRT 1005 Outdoor Recreation

Credit Points 10

Legacy Code 400808

Coordinator Nicki Taylor (https://directory.westernsydney.edu.au/search/name/Nicki Taylor/)

Description Students will learn about the variety of outdoor recreation and educational pursuits available to individuals, in school or community settings. Through active participation and guided instruction, students will also learn how to supervise specific forms of outdoor recreation and education in activities such as hiking, canoeing and camping. Learning content will reinforce the rationale for the development, administration and delivery of school-based and community outdoor recreation and education programs within Australia.

School Health Sciences

Discipline Sport and Recreation, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Equivalent Subjects SPRT 2005 - Outdoor Recreation 1 SPRT 1006 - Outdoor Recreation (WSTC) TEAC 1014 - Experience based Outdoor Education

Restrictions

Students must be enrolled in 4549 Bachelor of Health Science (Personal Development, Health and Physical Education), 4659 Bachelor of Health Science (Personal Development, Health and Physical Education), 4742 Bachelor of Health Science (Health and Physical Education)-Pathway to Teaching (Secondary), 4747 Bachelor of Health Science (HPE), 4741 Bachelor of Sport Development or 6001 Diploma in Health Science/Bachelor of Health Science (Health and Physical Education).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and apply the theoretical and philosophical underpinnings of Outdoor Recreation/Education.
2. Explain the relationship between people and the environment and the role that nature plays in human development, sustainability, and promoting lifelong physical activity.
3. Implement skills to function effectively, autonomously, and safely in wilderness and other outdoor environments.
4. Assess a variety of learning experiences and reflect upon their importance for developing movement competence and enhancing interpersonal skills in outdoor settings.
5. Differentiate between various leadership styles and justify the place of outdoor education for diverse populations.

Subject Content

The theory of recreation and leisure, as well as active participation in numerous outdoor recreation pursuits will provide:
- Concepts and policy direction in Outdoor Education/Recreation;
- Environmental impacts, conflict resolution and risk analysis in outdoor education/recreation;
- National accreditation scheme in outdoor education/recreation;
- Implication of theories and practice of the conduct of outdoor educational activities in contemporary Australia;
- Risk assessment and legal responsibilities in outdoor recreational pursuits;
- Policies and procedures of Outdoor Education/Recreation Industry groups;
- Policies and procedures of the NPWS of NSW in relation to National Parks facilities, Aboriginal Cultures and Environmental impacts;
- Field work requirements: All students will be required to attend and complete field work activities that span a range of outdoor recreation pursuits, as described next;
- participation in common land-based Outdoor recreation pursuits such as camping, canoeing and hiking.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Essay	1,000 words	40	N	Individual
Portfolio	1,500 words	60	N	Individual
Practical	Bushwalk - 5 hours	S/U	Y	Individual

SPRT 1006 Outdoor Recreation (WSTC)

Credit Points 10

Legacy Code 700063

Coordinator Margaret Smith (https://directory.westernsydney.edu.au/search/name/Margaret Smith/)

Description Students will learn about the variety of outdoor recreational pursuits available to individuals, whether in a school-based or community setting. Through active participation and guided instruction, students will also learn how to supervise specific forms of outdoor recreation. Lecture content will reinforce learning and skill development through the study of the development, administration and delivery of school-based and community public recreation programs, as well as studying the role of recreation within Australia.

School Health Sciences

Discipline Sport and Recreation, Not Elsewhere Classified.

Level Undergraduate Level 1 subject

Equivalent Subjects SPRT 1005 - Outdoor Recreation

Restrictions

Students must be enrolled at Western Sydney, The College.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Understand the concepts that pertain to the discrete areas of Outdoor Recreation in Australia;
2. Explain and discuss policy and procedure documents relating to the Outdoor Recreation in NSW Schools and industry;
3. Demonstrate ability as an effective team member;
4. Demonstrate practical skills and knowledge in the areas of minimal impact, risk analysis and conflict resolution;
5. Demonstrate familiarity and competence in Outdoor Recreation Industry's accreditation processes;
6. Develop an advocacy position for the role of outdoor recreation pursuits within the context of minimal environmental impact, particularly as these pursuits apply to wilderness and special areas;
7. Demonstrate an understanding of the importance of risk analysis in outdoor recreation, including legal responsibilities and the facilitation of a group;
8. Describe aboriginal cultures, legends and the special bond and sense of place these have in caring for the land;
9. Have an understanding of the impact European settlement has had on the environment.
10. Demonstrate practical skills and knowledge of the advantages and disadvantages of a range of equipment required to successfully undertake specific outdoor recreation activities;
11. Use computer based technologies to locate, access, evaluate, manipulate, create, store and retrieve information
12. Complete all field work requirements, that span a range of outdoor recreation pursuits, in own time and at own expense.
13. Demonstrate competence in common land-based outdoor recreation pursuits such as camping, rock climbing and abseiling, hiking, mountain biking, orienteering, golf and tennis.

Subject Content

The theory of recreation and leisure, as well as active participation in numerous outdoor recreation pursuits will provide;
1. Concepts and policy direction in Outdoor Recreation;
2. Environmental impact, conflict resolution and risk analysis in outdoor recreation;

Type	Length	Percent	Threshold	Individual/ Group Task
4 outdoor recreation skill assessments		40	N	Individual
1500 word report detailing the development and delivery of a chosen outdoor recreation pursuit in school and community settings		20	N	Individual
Final Examination – 2 hours		40	N	Individual

SPRT 1008 Sport for Social Development

Credit Points 10

Legacy Code 401243

Coordinator Andrew Grainger (https://directory.westernsydney.edu.au/search/name/Andrew Grainger/)

Description This subject provides an introduction to the concept of Sport for Development. Students will explore the role sports and physical recreation can play in achieving positive social outcomes in communities, both locally and internationally. Students will learn about the multidisciplinary nature of Sport for Development and how the disciplines of health and sports science, sports management and community development come together in the planning, implementation and evaluation of sports and physical recreation projects.

School Health Sciences

Discipline Sport And Recreation

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Assumed Knowledge

A basic understanding of the sports industry, and an appreciation of the diverse communities that exist locally and internationally.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of the multidisciplinary nature of Sport for Development.

2. Examine and discuss the roles sport and physical recreation play in contemporary society.
3. Evaluate the impact of sporting programs as an agent for change to generate positive social outcomes in communities.
4. Compare and contrast the different organisations operating in the Sport for Development field, both locally and internationally.
5. Critically evaluate real-world Sport for Development programs, both locally and internationally.

Subject Content

1. The role of sport in contemporary society
2. Sport as a catalyst for change; the social, health and educational outcomes sought through sport for development
3. The importance of an evidence based approach; planning, implementation and evaluation of sport for development programs
4. Understanding sport for development stakeholders and industry structure
5. Sport for development in an Australian context, including understanding the diverse role sport plays in community wellbeing, and the role of sport in terms of health and social engagement for the Australian community, including indigenous and immigrant communities
6. International sport for development, referring to developing countries and the mechanism by which sport can be used to support community development and improved quality of life

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Presentation	10 minutes	20	N	Group
Applied Project	1,500 words	50	N	Individual
Quiz	30 minutes	30	N	Individual

SPRT 1009 Exercise Performance and Health

Credit Points 10

Coordinator Sarah Kennedy (https://directory.westernsydney.edu.au/search/name/Sarah Kennedy/)

Description Students will learn the functional anatomy, basic exercise physiology, physical fitness, motor development and exercise training content required to practice as competent exercise/sport/health professionals. Students will also administer and undertake laboratory exercises designed to test, design and administer fitness programs for healthy individuals.

School Health Sciences

Discipline Sport and Recreation Activities

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Pre-requisite(s) SPRT 1001

Incompatible Subjects SPRT 3001

Restrictions

Students must be enrolled in 4741 - Bachelor of Sport Development, 4xxx - Bachelor of Health and Physical Education (Pathway to Teaching Education), 4791 Bachelor of Health and Physical Education (Pathway to Teaching Secondary), 4792 Bachelor of Health and Physical Education or 6001 Diploma in Health Science/Bachelor of Health Science (Health and Physical Education), 4656 B Health Science.

Assumed Knowledge

An understanding of basic human biology and fundamental principles in exercise science.

Learning Outcomes

1. Describe cardiorespiratory, neuromuscular, anaerobic and aerobic energy systems and explain their role in fitness and performance
2. Explain muscle physiology and contraction, including neural control
3. Conduct exercise consultations, including suitable administration of exercise testing and to assess various components of physical fitness and performance
4. Develop exercise programs for healthy individuals to achieve desired performance and/or fitness gains
5. Implement an evidence-based approach to exercise/sport/health fitness and performance enhancement
6. Identify the key physiological differences between trained and untrained individuals
7. Discuss the use of ergogenic aids in sport and exercise

Subject Content

1. Neural control of muscle contraction
2. Muscle physiology and contraction
3. Aerobic and anaerobic energy systems
4. Cardiorespiratory physiology
5. Pre-exercise screening and consultation

6. Exercise testing for healthy clients
7. Exercise prescription (cardiorespiratory, resistance training, flexibility)
8. Personal experience of exercise testing and training
9. Physiological differences between trained and untrained individuals
10. Ergogenic aids in sport and exercise

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Applied Project	Maximum 1,000 words	30	N	Individual
Professional Task	20-25 minutes each	30	N	Individual
Case Study	Maximum 1,500 words	40	N	Individual

Level Undergraduate Level 1 subject

Equivalent Subjects SPRT 1008

Restrictions

Students need to be registered in Diploma in Business 7177 at the Sydney Olympic Park campus.

Assumed Knowledge

A basic understanding of the sports industry, and an appreciation of the diverse communities that exist locally and internationally.

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Demonstrate an understanding of the multidisciplinary nature of Sport for Development.
2. Examine and discuss the roles sport and physical recreation play in contemporary society.
3. Evaluate the impact of sporting programs as an agent for change to generate positive social outcomes in communities.
4. Compare and contrast the different organisations operating in the Sport for Development field, both locally and internationally.
5. Critically evaluate real-world Sport for Development programs, both locally and internationally.

Subject Content

- The role of sport in contemporary society
- Sport as a catalyst for change; the social, health and educational outcomes sought through sport for development
- The importance of an evidence based approach; planning, implementation and evaluation of sport for development programs
- Understanding sport for development stakeholders and industry structure
- Sport for development in an Australian context, including understanding the diverse role sport plays in community wellbeing, and the role of sport in terms of health and social engagement for the Australian community, including indigenous and immigrant communities.
- International sport for development, referring to developing countries and the mechanism by which sport can be used to support community development and improved quality of life.

Proposal	5 minutes per student + Proposal	25	N	Group

SPRT 2002 Exercise Testing and Measurement

Credit Points 10

Legacy Code 401150

Coordinator Dean Norris (https://directory.westernsydney.edu.au/search/name/Dean Norris/)

School Health Sciences

Discipline Human Movement

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Co-requisite(s) SPRT 1001

Restrictions

Students must be enrolled in 4658 - Bachelor of Health Science (Sport and Exercise Science).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify or apply the correct test based on demographics, risk assessment, and health guidelines
2. Apply measurement accuracy concepts to exercise testing and measurement
3. Evaluate the feasibility of different tests according to environmental conditions and client characteristics
4. Demonstrate basic data processing and analytical techniques
5. Visualise data with consideration for measurement accuracy
6. Appropriately interpret results with respect to established normative data and measurement considerations
7. Communicate test results and their implications to hypothetical client scenarios

Subject Content

- Concepts of validity, reliability and testing procedures
- Introduction to performance analysis and monitoring
- Pre-testing criteria considerations and influence on test outcomes
- Test administration, professional conduct, ethical behaviour and procedures during testing
- Practical considerations and application of scientific rationale to inform test selection
- Visualisation, analysis and reporting of data
- Evaluation and interpretation of data
- Introduction to a range of physical and physiological assessments with the ESSA scope of practice

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement. Students must also have submitted a Working with Children Check Student Declaration. Students must hold a valid and current First Aid Certificate from a Registered Training Organisation. Refer to the Special Requirements website for more information.

SPRT 2007 PDHPE: Games for Diverse Groups

Credit Points 10

Legacy Code 400798

Coordinator Andrew Bennie (https://directory.westernsydney.edu.au/search/name/Andrew Bennie/)

Description This subject focuses on teaching and coaching young children in a range of Indigenous, striking/fielding, and target sports. The aim is to build on students' knowledge and application of various teaching /coaching styles with a focus on the game sense approach.

In particular, the subject addresses issues of diversity and inclusion in school, sport, and recreation activities. As part of the subject, students will implement a teaching program in a local primary school and complete introductory coaching certificates in a variety of sports.

School Health Sciences

Discipline Sport and Recreation Activities

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Equivalent Subjects SPRT2013

Restrictions

Students must be enrolled in 4659 - Bachelor of Health Science (Health and Physical Education), 4741 - Bachelor of Sport Development, 4742 - Bachelor of Health Science (Health and Physical Education) Pathway to Teaching, 4747 - Bachelor of Health Science (Health and Physical Education) or 6001 Diploma in Health Science/Bachelor of Health Science (Health and Physical Education)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate competency in inclusive teaching practices
2. Apply skill learning phases for diverse groups and demonstrate how these can be enhanced through traditional teaching practices and a games sense approach
3. Design, implement and evaluate teaching programs in a local school for a range of traditional Indigenous, striking and target games
4. Analyse the sociocultural factors that influence teaching, learning and participation in PE

Subject Content

1. Theory that underpins the principles of traditional teaching practices and the game sense approach
2. Inclusive teaching for students with a range of abilities and from diverse backgrounds
3. Planning PE/sport sessions for primary school contexts
4. Sociocultural factors that influence teaching, learning and participation in physical education and sport
5. Indigenous education and participation in sport

Special Requirements

Legislative pre-requisites

Special requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/) relate to enrolment into some Subjects, usually those with placements or external activities (e.g., visiting schools). Both Games for Diverse Groups AND Coaching Sport and Rec have the following three special requirements.

Working With Children Check - Apply for your WWCC here (https://www.service.nsw.gov.au/transaction/apply-working-children-check/). Upload your WWCC here. (https://wsu.service-now.com/student/?id=wsu_cat_item&sys_id=9c8b61a2dbbed8504f58e434059619ed&sysparm_categories=f6444244dbe39c504f58e4340596193e)

Child Protection Course - Students must complete the TWO components of the NSW Department of Education's Child Protection Awareness Training (CPAT) on the NSW Department of Education's MyPL website https://mypl.education.nsw.gov.au/ (https://mypl.education.nsw.gov.au/auth/login/?returnUrl=%2F) The CPAT: Annual Update will need to be renewed and submitted on an annual basis. Further info can be found on vUWS. Upload your certificate here. (https://wsu.service-now.com/student/?id=wsu_cat_item&sys_id=9c8b61a2dbbed8504f58e434059619ed&sysparm_categ

Use the link to the Special Requirements webpage below for more information.

SPRT 2009 Professional Development and Work Experience

Credit Points 10

Legacy Code 400903

Coordinator Chloe Taylor (https://directory.westernsydney.edu.au/search/name/Chloe Taylor/)

Description Experience in the field of study is an essential ingredient in marketing an individual for employment and often for professional memberships. Professional Practice provides students with an opportunity to observe and assist Sport & Exercise Science practitioners in action and to learn in a practical hands on setting. Students will have the opportunity to see how knowledge and skills acquired in lectures and tutorials/laboratories can be applied and also relate theoretical concepts and skills to situations in exercise-related settings. This subject is the first of two subjects which require a work placement which is usually off campus.

Level Undergraduate Level 2 subject

Pre-requisite(s) SPRT 1001

Co-requisite(s) HLTH 2006

Equivalent Subjects SPRT 2010 - Professional Practice in Sport Exercise Science 2

Restrictions

Students must be enrolled in 4658 Bachelor of Health Science (Sport and Exercise Science).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Provide evidence of personal and professional development through observation, experimentation and practice, under the supervision of an experienced practitioner.
2. Deliver exercise related services effectively and safely in compliance with OH&S, standard operating procedures, and the Exercise and Sport Science Australia (ESSA) code of professional conduct and ethical practice.
3. Maintain confidential client records of health status, fitness tests, exercise programming, and valid informed consent.
4. Communicate effectively in written, oral and nonverbal forms.
5. Understand and critically evaluate the structure and function of a sport or exercise related industry.
6. Establish additional personal contacts in the exercise industry.

Subject Content

- Establish contacts within A sport/Exercise - related industry
- preparation of A learning Contract through Negotiation with An agency supervisor
- 60 hours placement within the industry of sport and exercise science at an approved agency under the guidance of an approved supervisor

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement. Students must also hold a valid and current First Aid Certificate from a Registered Training Organisation. Refer to the Special Requirements website for more information.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Log/ Workbook: ESSA logbook to document hours of professional practice	60 hours	S/U	Y	Individual
Contract and Evaluation booklet	14 pages	S/U	Y	Individual
Agency Profile and evaluation	3-4 pages	S/U	Y	Individual
Letter of thanks to supervisor	1 page	S/U	Y	Individual

Prescribed Texts

- There are no textbooks assigned to this subject because the theoretical content is delivered in the co-requisite subject, Exercise Prescription for General Populations (400326).

SPRT 2011 Sustainability, Tourism and Place

Credit Points 10

Legacy Code 102386

Coordinator Julie Wen (https://directory.westernsydney.edu.au/search/name/Julie Wen/)

Description In 2023 this subject is replaced by TOUR 2003 - Managing Sustainable Places. Sustainability, Tourism and Place provides students with a fundamental understanding of the current debates in tourism management and sustainable places. The complex relationship and interaction among diverse stakeholders involved in places and tourism are explored. The subject encourages a systems approach, and focuses on traveller origin places, tourist experience and community development. The subject aims to assist students in the analysis of the role of tourism in sustainable places by applying a wide range of case studies.

School Social Sciences

Discipline Society and Culture, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Equivalent Subjects SPRT 2006 - Outdoor Recreation and Leisure

Assumed Knowledge

Successful completion of 80 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Appraise the scope and complex interactions in places with tourism development;
2. Assess relationships between tourism and places in terms of the social, economic, and environmental vitality;
3. Apply theories to critique destination marketing and the sustainability of places;
4. Evaluate the contribution of tourism to healthy and sustainable places.

Subject Content

1. Key concepts and theory in sustainability, tourism and places
2. Structure, roles and systems in places of tourism
3. Relationship of tourism to place: social, cultural, economic, and environmental impacts and sustainability
4. Contemporary issues in tourism practice and sustainability: recreation and leisure, healthy places, construction of places, the role

of nature in tourism, virtual tourism, urban, rural, marine and other emerging types of tourism
5. Destination marketing and sustainable places.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Intra-session Exam	Two hours during semester, 1,000 words	30	N	Individual
Presentation	15 minutes presentation per group	25	N	Group
Report	2,000 words	45	N	Individual

SPRT 2012 Community Sport Development

Credit Points 10

Legacy Code 401283

Coordinator Hazel Maxwell (https://directory.westernsydney.edu.au/search/name/Hazel Maxwell/)

Description The subject develops students' knowledge and understanding of the concept of community sports development and its role in addressing key issues of social inclusion, diversity, and health promotion. Students explore local and national Australian policies and initiatives, with a focus on monitoring and evaluating and exploring evidence around the social impact of sport. The module facilitates students' knowledge and understanding of community needs within the context of sport and active recreation. Further, students will propose innovative sport development initiatives and programs where students will design and implement a localised sport development initiative in partnership with a local sport organisation.

School Health Sciences

Discipline Sport And Recreation

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) SPRT 1008

Assumed Knowledge

A basic understanding of the sports industry, and an appreciation of the diverse communities that exist locally and internationally.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine local and national Australian community sports development policies and initiatives
2. Apply a critical awareness of community sports development practice and the role of community sports development in addressing a wider social agenda
3. Employ sociological ideas and key concepts to explain relationships between social, economic and cultural factors, and sporting opportunities
4. Develop a community grant proposal for a community sports development project, and deliver a community sports development project in partnership with a local sport organisation/ government organisation.
5. Critically explore the concept of monitoring and evaluation in community sport development, and evaluate their own community sport development project.

Subject Content

- The social impact of sport in contemporary society with A focus on localised communities
- Monitoring and evaluation of community sport and sport development initiatives.
- The importance of an evidence based approach; planning, implementation and evaluation of sport for development programs.
- how to design and implement A community sport development Project, in line with current funding streams in local government and national sport objectives.
- exploring The social impact of sport and localised sport development Initiatives, within The context of current national objectives around diversity, social inclusion, safeguarding and integrity in sport.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Case Study	1500 words	30	N	Individual
Presentation	10 minutes	30	N	Group
Essay	2000 words	40	N	Individual

SPRT 2013 Leading Games and Sports

Credit Points 10

Coordinator Andrew Bennie (https://directory.westernsydney.edu.au/search/name/Andrew Bennie/)

Description This subject focuses on teaching and coaching young people in a range of Indigenous games, non-mainstream sports, and various other inclusive activities. The aim is to build on students knowledge and application of various teaching /coaching styles with a focus on the game sense approach. In particular, the unit addresses

issues of diversity and inclusion in school, sport, and recreation activities. As part of the subject, students will implement a teaching program in a local primary school and complete introductory coaching certificates in a variety of sports.

School Health Sciences

Discipline Sport and Recreation Activities

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) HLTH 1020

Equivalent Subjects SPRT 2007

Restrictions

Students must be enrolled in 4741 - Bachelor of Sport Development, 4791 Bachelor of Health and Physical Education (Pathway to Teaching Secondary), 4792 Bachelor of Health and Physical Education or 6000/6001 Diploma in Health Science/Bachelor of Health Science (Health and Physical Education), 4656 B Health Science, 4747 Bachelor of Health Science (Health and Physical Education) and 4742 Bachelor of Health Science (Health and Physical Education)-Pathway to Teaching (Secondary).

Learning Outcomes

1. Demonstrate competency in inclusive teaching practices.
2. Apply skill learning phases for diverse groups and demonstrate how these can be enhanced through traditional teaching practices and a games sense approach.
3. Design, implement and evaluate teaching programs in a local school for a range of traditional Indigenous, striking and target games.
4. Analyse the sociocultural factors that influence teaching, learning and participation in PE.

Subject Content

1. Theory that underpins the principles of traditional teaching practices and the game sense approach
2. Inclusive teaching for students with a range of abilities and from diverse backgrounds
3. Planning PE/sport sessions for primary school contexts
4. Sociocultural factors that influence teaching, learning and participation in physical education and sport
5. Indigenous education and participation in sport
6. Level 0 coaching accreditation

Special Requirements

Legislative pre-requisites

Students must have completed a:

1. Working with Children Check (volunteer only)
2. Child Protection Course

Legislative pre-requisites

Special requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/) relate to enrolment into some Subjects, usually those with placements or external activities (e.g., visiting schools) and SPRT 2013 Leading Games and Sports has the following special requirements that must be completed prior to being able to enrol.

Working With Children Check - Apply for your WWCC here (https://www.service.nsw.gov.au/transaction/apply-working-children-check/). Upload your WWCC here. (https://wsu.service-now.com/student/?id=wsu_cat_item&sys_id=9c8b61a2dbbed8504f58e434059619ed&sysparm_categ

Child Protection Course - Students must complete the TWO components of the NSW Department of Education's Child Protection Awareness Training (CPAT) on the NSW Department of Education's MyPL website https://mypl.education.nsw.gov.au/ (https://mypl.education.nsw.gov.au/auth/login/?returnUrl=%2F) The CPAT: Annual Update will need to be renewed and submitted on an annual basis. Further info can be found on vUWS. Upload your certificate here. (https://wsu.service-now.com/student/?id=wsu_cat_item&sys_id=9c8b61a2dbbed8504f58e434059619ed&sysparm_categ

SPRT 3001 Applied Exercise Science for Personal Trainers and Coaches

Credit Points 10

Legacy Code 401056

Coordinator Sarah Kennedy (https://directory.westernsydney.edu.au/search/name/Sarah Kennedy/)

Description Students will learn the functional anatomy, exercise physiology, physical fitness, motor development and exercise training content required to function as competent personal trainers and/or sports coaches. Students will also administer and undertake laboratory

exercises designed to test and administer fitness programs for healthy individuals

School Health Sciences

Discipline Sport and Recreation Activities

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) BIOS 1022 AND
SPRT 1001

Equivalent Subjects LGYA 7759 - Personal Training and Coaching

Restrictions

Students must be enrolled in 4659 Bachelor of Health Science (PDHPE), 4742 - Bachelor of Health Science (HPE) - Pathway to Teaching (Secondary), 4747 - Bachelor of Health Science (HPE) or 6001 Diploma in Health Science/Bachelor of Health Science (Health and Physical Education).

Assumed Knowledge

An understanding of human biology and fundamental principles in exercise science.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe cardiorespiratory, neuromuscular, anaerobic and aerobic energy systems and analyse their application to fitness and performance
2. Conduct exercise consultations, select suitable exercise tests and administer them to assess various components of physical fitness and performance
3. Develop exercise programs for healthy individuals to achieve desired performance and/or fitness gains
4. Use and justify an evidence-based approach to personal training and coaching practices
5. Compare and contrast key physiological differences between trained and untrained individuals
6. Analyse the use of ergogenic aids in sport and exercise

Subject Content

1. Neural control of muscle contraction
2. Muscle physiology and contraction
3. Aerobic and anaerobic energy systems
4.Cardiorespiratory physiology
5. Pre-exercise screening and consultation
6. Exercise testing for healthy clients
7. Exercise prescription (cardiorespiratory, resistance training, flexibility)
8. Personal experience of exercise testing and training
9. Physiological differences between trained and untrained individuals
10. Ergogenic aids in sport and exercise

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Applied Project	Maximum 1,000 words & debate	30	N	Group/ Individual

SPRT 3002 Aquatic Sports

Credit Points 10

Legacy Code 400895

Coordinator Emma George (https://directory.westernsydney.edu.au/search/name/Emma George/)

Description From 2016, this subject is replaced by 400866 - Motor Control and Skill. Students will actively engage in a variety of aquatic activities including rowing, canoeing, kayaking, diving, water polo and swimming. Through participation in practical tutorials, students will develop their ability to teach and coach each of the aforementioned aquatic activities in a school or community recreation setting. Students will also train in swimming to improve stroke mechanics and fitness. This will form part of the Bronze Medallion Lifesaving certification, which involves developing competencies in resuscitation, four strokes of swimming, personal survival and rescue skills.

School Health Sciences

Discipline Sport and Recreation Activities

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Students must be enrolled in 4659 Bachelor of Health Science (PDHPE).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Articulate, compare and contrast the skills, tactics and techniques involved in swimming, diving, canoeing, kayaking, water polo and rowing performance.
2. Demonstrate swimming and lifesaving skills to pass the Bronze Medallion Lifesaving certification.
3. Identify and apply teaching techniques and safety principles to a range of aquatic activities.
4. Develop a program for the implementation of aquatic sports in a school and/or community recreation setting.

Subject Content

1. Students will explore fundamental concepts in exercise science as they apply to performance in, and the teaching/coaching of the following aquatic sports:
- Rowing
- canoeing/kayaking
- Diving
- water Polo
- Swimming (4 strokes, as part of Bronze Medallion)
2. Through participation in these aquatic sports, students will develop an in-depth understanding of the key teaching/coaching techniques that underpin these aquatic activities in order to plan high-quality learning experiences.

Special Requirements

Legislative pre-requisites

Students must comply with the following special requirements: possess a current WorkCover Authority approved First Aid Certificate.

SPRT 3003 Coaching Sport and Recreation Activities

Credit Points 10

Legacy Code 401169

Coordinator Andrew Bennie (https://directory.westernsydney.edu.au/search/name/Andrew Bennie/)

Description Coaching Sport and Recreation Activities offers students with a learning experience based on the principles of physical education and sports coaching in variety of sports and recreational activities. This subject builds upon physical activity instruction and teaching games for understanding (game sense) introduced in earlier subjects. You will have the opportunity to plan, implement, and reflect on your own teaching practice during tutorials and within community sport contexts. You will learn to see things from multiple perspectives based on content delivered by university staff, peers, and external sport organisations. The subject incorporates experience in meaningful situations that will help prepare you for work in a dynamic field of education. This subject includes approximately 35 hours of work integrated learning.

School Health Sciences

Discipline Sport and Recreation Activities

Assumed Knowledge

Completion of two introductory coaching certificates.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine various principles of effective coaching, teaching and leadership within sport and recreation settings.
2. Assess the experiences and needs of individuals, groups and communities within a range of different physical activity, sport and recreation contexts.
3. Design and implement practical activities to suit the experiences and needs of individuals, groups and communities within a range of physical activity, sport and recreation contexts.
4. Evaluate the successes and challenges of teaching activities using self-reflection and feedback to identify improvements and action plans for future learning opportunities.
5. Demonstrate teaching and coaching proficiency in various theoretical and practical contexts.

Subject Content

1. Teaching people with a range of interests in recreational activities and competitive sports
2. Planning, implementing and evaluating teaching sessions in university, school, and community contexts
3. Employing reflective practice as a learning process to inform effective design and delivery of sport and recreation activities
4. Factors that influence lifelong participation in sport and recreation activities
5. Participating in a community of practice where learning takes place in a collaborative, meaningful and personal environment

SPRT 3005 Contemporary Youth Health Issues

Credit Points 10

Legacy Code 400894

Coordinator Nicki Taylor (https://directory.westernsydney.edu.au/search/name/Nicki Taylor/)

Description This subject has been replaced by SPRT 3024 Contemporary Youth Health from 2023. The subject explores contemporary health issues related to young people. Students will examine a range of topics from a multidisciplinary approach, which include the social, cultural, political and biological factors that influence and construct young people's lives and health. Students will explore pathogenic and salutogenic approaches to understanding and promoting young people's health. When considering and analysing the influences and contexts, students will be able to gather resources and develop diverse meaningful strategies that will assist young people to promote health practices.

School Health Sciences

Discipline Sport and Recreation, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the health conditions of young people in terms of current trends and targeted populations in Australia.
2. Develop an understanding of the ways social and cultural contexts impact on the lives of young people.
3. Analyse a range of influences that impact young people&#xfffd;fs lives and health.
4. Critically explore matters such as inclusiveness, differences, social class, gender, sexuality and ethnicity in relation to young people&#xfffd;fs health practices.
5. Identify skills and resources that enable young people to promote health.
6. Develop a research report that explores young people&#xfffd;fs health.

Subject Content

1. Population characteristics and trends in young people?fs health
2. Social and cultural influences in young people?fs health
3. Young people?fs health and their bodies
4. Young people?fs health, sport and physical activity from diverse groups
5. Young people?fs gender, sexuality and sexual health
6. Young people?fs health and technology
7. Young people?fs substance, tobacco and alcohol use
8. Young people?fs risk taking behaviours and health

SPRT 3008 Exercise Physiology Across the Lifespan

Credit Points 10

Legacy Code 401149

Coordinator Chloe Taylor (https://directory.westernsydney.edu.au/search/name/Chloe Taylor/)

Description This subject is focused on physiological changes across the human lifespan and their effects on exercise tolerance. There is a particular focus on structural, physiological and motor development changes across the lifespan with emphasis on the control of neuromuscular, cardiovascular, respiratory and thermoregulatory function. Social determinants of health and physiological adaptation to exercise training will be covered, alongside contraindicated exercises and common injuries/conditions that are present at different stages across the lifespan.

School Health Sciences

Discipline Human Movement

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) BIOS 2012

Restrictions

Students must be enrolled in 4658 Bachelor of Health Science (Sport and Exercise Science).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Distinguish the stages of growth and development across the lifespan, from conception through to death (including pregnancy in women).
2. Justify why certain exercises are contraindicated for particular stages of growth and development across the lifespan, and why certain injuries and conditions are commonly present during certain stages of growth and development.
3. Articulate the structural, physiological and motor development changes across the lifespan and the effect of exercise on such changes.
4. Analyse and evaluate the literature and guidelines on growth and development as they relate to exercise.
5. Use an integrated understanding of physiology to explain how sex differences and ageing influence movement and functional capability.
6. Illustrate the social determinants of health that affect growth and development.
7. Integrate knowledge of and skills in growth and development with other areas of exercise science.

Subject Content

1. Problems of normality, scale, and gender.
2. Theories of growth and development
3. Chronological and biological age
4. Structural, physiological and motor development changes throughout the lifespan
5. Common injuries and contraindicated exercises for various stages of growth and development
6. Genetics, training and adaptability of exercise tolerance and physiology at different ages
7. Social determinants of health that affect growth and development
8. Integrated problems.

Special Requirements

Legislative pre-requisites

All students must have:
1. Working with Children Check Student Declaration
2. National Police Check
3. Student Undertaking Form
4. First Aid Certificate

Restrictions

Students must be enrolled in 4741 Bachelor of Sport Development. Students must complete 160 Credit Points of core subjects and electives in 4741.

Assumed Knowledge

A developed level of knowledge in Sport Development.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Integrate academic theory with real world applications in a professional setting.
2. Evaluate the structures and processes employed in the planning, implementation and evaluation of sports development projects at the organisation.
3. Identify and prioritize organisational areas for development and formulate specific, measurable, attainable, realistic and timely goals that support the development of sport at the organisation.
4. Apply acquired academic knowledge and skills to the development of strategies to achieve set goals.
5. Work professionally and effectively in a team environment to achieve set goals.

Subject Content

1. Work Placement: ~ 100 hours of supervised industry experience
2. During their placements students will integrate the acquired academic theory in sport development with real world applications at their hosting organizations.
3. Working with their hosting organisations, students will also lay the foundation for the Sport Development Applied project to follow.

Special Requirements

Legislative pre-requisites

Students must have submitted a Working with Children Check Student Declaration.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Professional Task	2,000 words	50	N	Individual

Reflection	2000 words	50	N	Individual
Professional Placement Performance	100 hours of placement	S/U	Y	Individual

SPRT 3014 Sport Management Applied Project

Credit Points 10

Legacy Code 200751

Coordinator Jess Richards (https://directory.westernsydney.edu.au/search/name/Jess Richards/)

Description This subject provides students a unique opportunity to integrate knowledge gained from operational and theoretical perspectives of sport studies into application in an engaged research project in sport management. Students will engage in comprehensive projects which bring together real world industry problems and sport theory. Students studying Sport Management Applied Project may have the opportunity to undertake an international field trip to experience the sport environment from an international perspective.

Level Undergraduate Level 3 subject

Pre-requisite(s) BUSM 2036

Equivalent Subjects LGYA 4813 - Sport Management Applied Project

Incompatible Subjects BUSM 3019 - Hospitality Management Applied Project

Assumed Knowledge

An introductory level of knowledge in sport management.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Display an ability to integrate action and theory (prior learning) through industry and industry related projects.
2. Develop suggestions and recommendations in response to contemporary industry based problems.
3. Apply a team based approach to real world problem solving within a sport context.
4. Reflect on the process and outcomes of participating with an industry partner (local or international engagement) on a project with industry applicable outcomes.

Subject Content

Experience gained from exercising the learning derived in previous core units of the key program through relevant engaged subject which may be at a local or international level. this subject is an integrative subject that brings together knowledge obtained in prior units.

Special Requirements

Legislative pre-requisites

Some placement agencies require completion of a Prohibited Persons Declaration; Criminal Record Check Clearance and Immunisation.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Essay	1,250 words	25	N	Individual
Applied Project	Up to 4,000 words	50	N	Group
Reflection	1,250 words	25	N	Individual

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) Students in course versions 46581 46582 and 46583 must successfully complete three pre-requisite units - BIOS 2037 Sport and Exercise Physiology REHA 3012 Exercise in Musculo-Skeletal Rehabilitation and SPRT 2009 Professional Development and Work Experience Students in course version 46584 must successfully complete two prerequisite units - BIOS 2012 Exercise Physiology and HLTH 2005 Exercise Prescription 1

Equivalent Subjects SPRT 3015 - Sport and Exercise Science in Practice

Restrictions

Students must be enrolled in 4658 Bachelor of Health Science (Sport and Exercise Science).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Provide evidence of personal and professional development through observation, experimentation and practice, under the supervision of an experienced practitioner.
2. Deliver exercise related services effectively and safely in compliance with OH&S, standard operating procedures, and the Exercise and Sport Science Australia (ESSA) code of professional conduct and ethical practice.
3. Maintain confidential client records of health status, fitness tests, exercise programming, and valid informed consent.
4. Communicate effectively in written, oral and nonverbal forms.
5. Understand and critically evaluate the structure and function of a sport or exercise related industry.
6. Establish additional personal contacts in the exercise industry.

Subject Content

1. Establish contacts within a sport/exercise - related industry
2. Preparation of a learning contract through negotiation with an agency supervisor
3. Course 4658 (versions 1, 2 and 3): 80 hours placement within the industry of sport and exercise science at an approved agency under the guidance of an approved supervisor
4. Course 4658 (version 4): 140 hours placement within the industry of sport and exercise science at an approved agency under the guidance of an approved supervisor

Special Requirements

Legislative pre-requisites

To be eligible to enrol in this subject, students must submit and had processed:
1) a Student Undertaking Form.
2) a valid and current National Police Check,
3) a valid and current Working with Children Check.
4) a valid and current First Aid Certificate from a Registered Training Organisation.
Use the link to the Special Requirements webpage below for more information.

SPRT 3020 Applied Research Project

Credit Points 10

Coordinator Andrew Bennie (https://directory.westernsydney.edu.au/search/name/Andrew Bennie/)

Description This capstone subject requires students to design and conduct a detailed project of independent inquiry in an area of interest. In consultation with subject coordinators and academic staff, students will build on existing evidence synthesis skills by collecting data in a variety of formats to answer key questions related to their field, leading to outcomes and solutions relevant to real-world settings and future employment contexts.

School Health Sciences

Discipline Sport And Recreation

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Equivalent Subjects SPRT 3011 Sport Development Applied Project

Incompatible Subjects SPRT 3014 Sport Management Applied Project 200664 Sport Management Internship

Restrictions

Must have completed 160 Credit Points.

Assumed Knowledge

A developed level of knowledge in Sport, Health and Physical Education.

Learning Outcomes

1. Analyse known, reported or understood elements of professional practice in a relevant field to identify potential gaps in knowledge, skills or behaviours in that field
2. Pose critical and relevant research questions and design a research project able to address those questions.
3. Gather, manage, organise, and critically analyse data to address critical questions
4. Suggest solutions and formulate recommendations that have application to the real-world settings.
5. Work collaboratively and communicate effectively in visual, oral, and written formats

Subject Content

1. Asking the right questions, designing a project, and ethical considerations
2. Sourcing evidence and synthesising ideas
3. Qualitative and quantitative research methods
4. Reporting on findings via creative and diverse media
5. Translation to professional practice

Special Requirements

Legislative pre-requisites

Requirements will vary between hosting organisations and may include a Working with Children Check, Child Protection Course, Criminal Record Check or First Aid Certificate. Specific requirements will be identified and confirmed with students prior to the commencement of the subject. Enrolment and working with industry partners will not proceed if the student does not have the correct requirements at the time the placement is due to begin.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Level Undergraduate Level 3 subject

Incompatible Subjects SPRT 3014
BUSM 3008

Restrictions

Students must be enrolled in 4741 Bachelor of Sport Development. Students must complete 120 Credit Points of core Subjects and electives in 4741.

Assumed Knowledge

A developed level of knowledge in Sport Development

Learning Outcomes

After successful completion of this Subject, students will be able to:

1. Integrate academic theory with real world applications in a professional setting.
2. Evaluate the structures and processes employed in the planning, implementation and evaluation of sports development projects at the organisation.
3. Identify and prioritize organisational areas for development and formulate specific, measurable, attainable, realistic and timely goals that support the development of sport at the organisation.

Subject Content

1. Work Placement: 100 – 160 hours of supervised industry experience
2. During their placements students will integrate the acquired academic theory in sport development with real world applications at their hosting organizations.

Work integrated learning

There is a mandatory work component required for completion of this program. Please contact the Program Advisor listed above for information.

International students should also refer to the link below for more information and a link to the Commonwealth Register of Institutions and Courses for Overseas Students (CRICOS).

Work Integrated Learning (WIL) for international students (https://www.westernsydney.edu.au/currentstudents/current_students/services_and_facilities/international_student_support/working_in_australia/work_integrated_learning/)

Special Requirements

Legislative pre-requisites

Requirements will vary between hosting organisations and may include a Working with Children Check (WWCC), Child Protection Course (CP), Criminal Record Check or First Aid Certificate. Specific requirements will be identified and confirmed with students prior to the commencement of placements. In any case, mandatory special requirements that must be completed before enrolling in this unit include:
1.WWCC
2.CP
Placements will not proceed if the student does not have the correct requirements at the time the placement is due to begin.

SPRT 3022 Outdoor Education, Sustainability and Health

Credit Points 10

Coordinator Nicki Taylor (https://directory.westernsydney.edu.au/search/name/Nicki Taylor/)

Description Students will learn in, through, and about a variety of outdoor recreation experiences available in community and school contexts. Through active participation, guided instruction, and independent exploration, students will learn how to supervise specific forms of outdoor recreation in activities such as bushwalking, canoeing, camping and the 'micro-adventure'. This subject applies an interdisciplinary approach to learning about people, the environment and health. Students will consider how these connections and interactions play an important role in promoting, supporting and sustaining the wellbeing of individuals, the community, and the environment, now and into the future.

School Health Sciences

Discipline Sport and Recreation, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Students must be enrolled in 4742 Bachelor of Health and Physical Education (Pathway to Teaching), 4741 Bachelor of Sport Development or 6000/6001 Diploma in Health Science/Bachelor of Health Science (Health and Physical Education), 4656 Bachelor of Health Science, 4791 Bachelor of Health and Physical Education (Pathway to Teaching Secondary) or 4792 Bachelor of Health and Physical Education

Learning Outcomes

1. Apply the theoretical and philosophical underpinnings of Outdoor Recreation/Education
2. Employ advanced skills to function effectively, autonomously, and safely in wilderness and other outdoor environments
3. Critically evaluate a variety of outdoor learning experiences and reflect upon their importance for developing knowledge of the issues, benefits and outcomes of outdoor recreation
4. Examine the symbiotic relationship between people and the environment, and the role of recreation in natural environments for health and sustainability.
5. Critique the experiences of outdoor recreation for diverse populations and provide a rational for socially just and inclusive programming

Subject Content

The theory of outdoor recreation and education, as well as active participation in numerous outdoor recreation pursuits will cover:

1. Outdoor Recreation in Australia: History and Trends
2. The Outdoors as a Teaching and Learning Tool
3. Risk and Safety in the Outdoors
4. Planning and Preparation: Practicalities of Outdoor Field Trips
5. Meanings of Adventure
6. Human / Nature Connections
7. Gender, Culture, & Nature
8. Healthy People, Healthy Planet and Our Responsibilities
9. Field work requirements: All students will be required to participate in field work activities that span a range of outdoor recreation pursuits

Assessment

SPRT 3023 Advanced HPE and Sport Leadership

Credit Points 10

Coordinator Rhiannon White (https://directory.westernsydney.edu.au/search/name/Rhiannon White/)

Description This subject offers students with a learning experience based on the principles of physical education and sports coaching in variety of sports and recreational activities. It builds upon physical activity instruction and teaching games for understanding (game sense) introduced in earlier subjects. You will have the opportunity to plan, implement, and reflect on your own teaching practice during tutorials and within community sport contexts. You will learn to see things from multiple perspectives based on content delivered by university staff, peers, and external sport organisations. The subject incorporates experience in meaningful situations that will help prepare you for work in a dynamic field of education.

School Health Sciences

Discipline Sport and Recreation Activities

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) HLTH 1020 AND
SPRT 2013

Equivalent Subjects HLTH 3008

Restrictions

Students must be enrolled in 4741 - Bachelor of Sport Development, 4791 Bachelor of Health and Physical Education (Pathway to Teaching Secondary), 4792 Bachelor of Health and Physical Education or 6001 Diploma in Health Science/Bachelor of Health Science (Health and Physical Education), 4656 B Health Science.

Assumed Knowledge

Completion of 400798: Games for Diverse Groups for knowledge about introduction physical education pedagogy as well as completing two (2) introductory coaching certificates.

Learning Outcomes

1. Examine various principles of effective coaching, teaching and leadership within sport and recreation settings.
2. Assess the experiences and needs of individuals, groups and communities within a range of different physical activity, sport and recreation contexts.
3. Design and implement practical activities to suit the experiences and needs of individuals, groups and communities within a range of physical activity, sport and recreation contexts.
4. Evaluate the successes and challenges of teaching activities using self-reflection and feedback to identify improvements and action plans for future learning opportunities.
5. Demonstrate teaching and coaching proficiency in various theoretical and practical contexts.

Subject Content

1. Teaching people with a range of interests in recreational activities and competitive sports
2. Planning, implementing and evaluating teaching sessions in university, school, and community contexts
3. Employing reflective practice as a learning process to inform effective design and delivery of sport and recreation activities
4. Factors that influence lifelong participation in sport and recreation activities
5. Participating in a community of practice where learning takes place in a collaborative, meaningful and personal environment
6. Principles for gaining a sport coaching accreditation

Special Requirements

Legislative pre-requisites

Students must have completed a Child Protection Course and Working with Children Check.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Applied project - Lesson planning for sport activities	3 x 50 minute lesson plans	30	N	Group

Restrictions

Students must be enrolled in 1879 Bachelor of Education (Birth – 5 Years).

Learning Outcomes

1. Engage with media and research literature regarding children's digital worlds.
2. Explain children's uses of technology from a child's perspective, and from an adults' perspective.
3. Identify the factors that influence how a child uses technology at home, in social spaces and in educational settings.
4. Identify key aspects of children's technology use that supports learning.
5. Describe strategies for developing curriculum using technology to support learning in early childhood.

Subject Content

1. How young children use technology
2. Debates surrounding young children's technology use
3. Using literature to identify and analyse the factors that influence young children's uses of technology
4. Safe uses of technology for young children
5. Technology use that supports learning in early childhood
6. The role of the educator in facilitating children's use of technology for learning
7. Critical teaching and learning strategies to support children's learning using technology

Assessment

Report	1,500 words	40	N	Individual

TEAC 1006 Children's Literature and Digital Texts

Credit Points 10

Legacy Code 102630

Coordinator Erin Mackenzie (https://directory.westernsydney.edu.au/search/name/Erin Mackenzie/)

Description This subject introduces key concepts in literature for children and young adults, examining theory and research related to literature; the diversity of literature and multi-literate environments; and the impact of social and cultural influences on literature. Through reading a wide range of literature, including literary classics, popular texts, graphic novels, picture books, in paper-based and electronic forms, students will identify the interrelationships between image and writing and ideological assumptions conveyed through these texts. It will focus on Australian literature, Aboriginal and Torres Strait Islander literature, Asian literature and bilingual texts.

TEAC 1007 Creative Arts for Early Learning

Credit Points 10

Legacy Code 102664

Coordinator Joanne Frost (https://directory.westernsydney.edu.au/search/name/Joanne Frost/)

Description This subject will engage students in developing a critical appreciation for the role of the arts in their own right, in society and in the early years. Students will develop appreciation for the relevance of the arts in children's play and identity formation, and as meaning making and communication tools. Opportunities for creative thinking and creative expression will be explored firsthand through introductory experiences and theory in the areas of drama, music, visual arts, dance and media arts. This subject is included in the Foundation Phase of the Bachelor of Education.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Restrictions

Students must be enrolled in 1926 Bachelor of Education (Early Childhood).

Learning Outcomes

1. Explain the social and cultural place of the arts in contemporary, diverse and inclusive societies.
2. Develop practical skills and knowledge through introductory experience and theory in drama, music, visual arts, dance and media arts.
3. Discuss the role of the creative arts as meaning making tools in individual, family, social and cultural contexts including Aboriginal and Torres Strait Islander peoples and the cultures of the Asia region.
4. Develop an appreciation for the relevance of the arts in children's play and identity formation.
5. Identify a personal philosophy about the role of the arts in society.

Subject Content

1. Theories and structural elements of the main art forms
2. Exploration of practices in the creative art areas including drama, music, visual arts, dance and media arts
3. Resources and materials that are used in art making and creative expression
4. The arts as a vehicle for self-expression, problem solving and critical reflection
5. Meaning making, and the way in which the arts contribute to identity formation in children and support creative communication in socially and culturally diverse contexts particularly for Aboriginal and Torres Strait Islander peoples and the cultures of the Asia region
6. Reflection on personal arts related experiences and understandings of theory to develop a personal philosophy about the role of the arts in society

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Reflection	1,000 words	30	N	Individual
Annotated Bibliography	150 words x 6	30	N	Individual
Portfolio	Artefacts (reflecting 5 hrs engagement in three art forms) and written summaries (300 words each for each of three art forms)	40	N	Individual

TEAC 1008 Curriculum and Aboriginal Perspectives

Credit Points 10

Legacy Code 102115

Coordinator Zara Ruggero (https://directory.westernsydney.edu.au/search/name/Zara Ruggero/)

Description The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This subject is designed to introduce students to the characteristics of classrooms and curriculum implementation. Students will explore the structure of New South Wales/National curricula in all key learning areas, examine the perspectives which influence curriculum and the way in which curriculum is interpreted using Aboriginal and Torres Strait Islander perspectives. The subject provides an understanding of the importance of the art forms and Aboriginal ways of knowing as powerful teaching and learning strategies across the primary curriculum and as creative arts in their own right. This subject is included in the Foundation Phase of the Bachelor of Education.

School Education

Equivalent Subjects EDUC 2001 - Creative Arts 1 - AREP

Restrictions

Students must be enrolled in 1598 - Bachelor of Education (Primary) - AREP mode or 1717 - Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the concept of Aboriginal and Torres Strait Islander ways of knowing
2. Describe the characteristics and elements of classrooms, teaching, learning and curriculum.
3. Identify and plan for Aboriginal perspectives in Primary curricula.

4. Create a short creative resource, presentation or performance, using Aboriginal and Torres Strait Islander perspectives, in at least one curriculum area.
5. Utilise performance and communication mediums in planning teaching and learning.
6. Explain the importance of the inclusion of Aboriginal perspectives across the curriculum for primary students f learning and development.

Subject Content

1. Introduction to regulations, statues and policies related to teacher?fs responsibilities and working with children
2. Overview of Primary (K-6) Curricula identifying where Aboriginal content may explicitly exist or could be developed to include Aboriginal ways of knowing.
3. Planning, implementing and evaluating effective learning experiences for students in different curricula context

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 1010 Early Primary Mathematics

Credit Points 10

Legacy Code 102119

Coordinator John Ley (https://directory.westernsydney.edu.au/search/name/John Ley/)

Description The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This subject is designed to extend the development of mathematical concepts, skills and understandings for children from Kindergarten to Year 3 based on the NSW Syllabus for the Australian curriculum Mathematics K-6. An awareness of relevant research and curriculum documents, combined with the practical knowledge of teaching, learning and assessment strategies, will assist teachers to design and implement a series of experiences that will enhance the conceptual knowledge of their students.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Equivalent Subjects EDUC 1002 - Early Primary Maths (AREP)

Restrictions

Students must be enrolled in 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the central concepts, modes of enquiry and structure of Mathematics.
2. Apply the five interrelated processes of questioning, applying strategies, communicating, reasoning and reflecting up to Stage 2.
3. Describe the three content strands of Number and Algebra, Measurement and Geometry, Statistics and Probability, as well as working mathematically up to Stage 2.
4. Apply concepts of assessment and children's learning within the Primary Mathematics curriculum.
5. Utilise a variety of teaching, behavioural and organisational management strategies to cater for the range of diverse learners in Mathematics K-6.
6. Utilise an array of resources designed to meet the needs of diverse K-6 students.
7. Identify Aboriginal and Torres Strait Islander perspectives embedded in the Australian Mathematics curriculum.
8. Design a sequence of two lessons using developing knowledge of the Australian Mathematics curriculum for Primary- aged children.

Subject Content

1. Nature and role of mathematics in describing and modelling patterns and relationships that can be generalised, and as a means of interpreting the world
2. Familiarity with the NSW syllabus for the Australian curriculum: Mathematics K-6 programming and assessment, such as Count Me In Too
3. Role of concrete materials
4. Working Mathematically through Communicating, Problem Solving, Reasoning, Understanding and Fluency
5. Importance of Language for communicating (Newman's Analysis)
6. Counting strategies in preschool and Kindergarten

7. Place value through grouping in the Hindu-Arabic numeration system
8. Number and Algebra - the four operations, fractions and decimals, patterns
9. Play, games, investigation, problem solving, stories in Mathematics
10. Early measurement and using units (formal and informal) for length, area, volume and capacity, mass and time, and comparing, ordering and estimating size
11. Early geometry - 2 and 3 D shapes, manipulating shapes, part/whole relationships, tessellations, transformations, location
12. Statistics: working with data, including planning, gathering, organising, applying data to solve problems and communicating results through the selection of appropriate representations.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 1011 Educational Psychology

Credit Points 10

Legacy Code 102636

Coordinator Erin Mackenzie (https://directory.westernsydney.edu.au/search/name/Erin Mackenzie/)

Description This subject highlights the interacting contributions of biology and environment to the development of children and explores how teachers' knowledge of this process must inform their pedagogy. Specifically, this subject examines classic and current theories and research evidence-base relating to the biological, cognitive, social, emotional, and moral development of children and the implications of these for learning and classroom practice. It includes theoretical perspectives on the brain and learning including memory formation, retention and models of motivation, attention, and knowledge acquisition. This subject dispels common educational neuromyths and focuses on evidence-informed pedagogical practices that support learning, engagement, motivation, and wellbeing in culturally responsive classrooms. This subject is included in the Foundation Phase of the Bachelor of Education.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Restrictions

Students must be enrolled in the 1876 Bachelor of Education (Primary), 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education or 1939 Bachelor of Education (Secondary).

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Apply an understanding of issues related to biological, cognitive, social, emotional, and moral development across childhood and adolescence.
2. Apply an understanding of cognitive processes to design effective pedagogical practices.
3. Assess the implications of key learning and motivational theories for teaching and learning.
4. Evaluate the developmental research evidence-base for a range of instructional strategies to determine appropriate use depending on educational context.
5. Appraise culturally responsive methods for promoting students' social and emotional wellbeing.

Subject Content

1. Recognition of context in child and adolescent development
2. Biological, cognitive, social, emotional, and moral development across childhood and adolescence
3. Cognitive processes (learning, attention, memory, executive functions), neuromyths, and implications for teaching and learning
4. Learning theories and evidence-based pedagogical practice
5. Motivation theories and implications for teaching and learning
6. Social and emotional wellbeing in culturally responsive classrooms

TEAC 1012 English as an International Language

Credit Points 10

Legacy Code 102438

Coordinator David McInnes (https://directory.westernsydney.edu.au/search/name/David McInnes/)

Description English is the first Global Language and the most important international Lingua Franca today. The teaching of English as a second or foreign language is a huge industry internationally, and a driver of export dollars in the Australian economy. The teaching of English as an International Language (EIL) is a new area of study and it is indispensable for any student seeking to gain a competitive edge in an international career. This subject is a key introductory subject in the International English Major. It is designed to equip graduates with marketable skills across multiple areas, including International Relations, Marketing and Business, Interpreting and Translation, and TESOL.

School Humanities & Comm Arts

Discipline English as a Second Language Teaching

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss, in linguistic, cultural and historical terms, the essentials of an international language.
2. Identify and explain how Englishes differ across the globe.
3. Analyse the ways in which people use English to express notions of identity, culture and pragmatic meaning.
4. Identify the different aspects of miscommunication across Englishes.

Subject Content

The origins, history and spread of the English language
Linguistic concepts as applied to an International Lingua Franca
Semantic and Pragmatic differences and commonalities
Cultural norms and adaptation
Implications of World Englishes: ownership and standardisation
Teaching and learning International English

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 1013 Everyday Childhoods

Credit Points 10

Legacy Code 102665

Coordinator Kerry Staples (https://directory.westernsydney.edu.au/search/name/Kerry Staples/)

Description In this subject students will engage in an exploration of what it means to be a child in a postmodern world and how different theoretical approaches influence ways of understanding children's lives. Alongside questions of how gender, sexuality, ethnicity, 'race', language, class, ability and religion are constituted through a child's identity, students will explore the notion of a child's subjectivity. A child's subjectivity is the conscious and unconscious thoughts and emotions of the child, their sense of self, their body and their way of understanding their relationship to the world. Building on this knowledge, students will also explore the four key child-environment identities of the physical child, the social child, the learning child and the natural child and by analysing a variety of scholarly and non-scholarly texts around the child's body and behaviour will reflect on a child's individuality and emerging identity.

School Education

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Restrictions

Students must be enrolled in 1879 Bachelor of Education (Birth – 5 Years).

Learning Outcomes

1. Investigate diverse texts, images and constructions of what it means to be a child in contemporary society.
2. Describe the social meaning of childhood including the historical, social and political factors and how they have influenced changing views of children and childhood.
3. Describe how different theoretical perspectives have positioned children and childhood as a social construction.
4. Identify the ways in which gender, sexuality, ethnicity, 'race', language, class, ability and religion are constituted through a child's identity and the significance of this on everyday lived experiences.
5. Critically reflect on social and cultural constructions of diversity and difference in relation to children's identities and subjectivities.
6. Examine the ways in which children negotiate and construct their identities in contexts of diversity and difference.
7. Describe how children's rights and responsibilities are enacted by children and adults.
8. Describe how child-environment identity is connected to place, space, location and time.

Subject Content

1. Who is, and what does it mean to be a child in a postmodern world?
2. Critically analysing scholarly and non-scholarly texts, images and constructions 'about' the child
3. Introduction to contemporary national and international theories and philosophies related to the child
4. Significance of gender, sexuality, ethnicity, 'race', language, class, ability and religion and how they are constituted through a child's identity and everyday lived experiences
5. Questions of subjectivity and a child's sense of herself, her body and her relationship to the world
6. Children's negotiation of identity and difference in a globalised world
7. Rights and responsibilities of the child
8. Child-environment identity and connections to place, space, location and time through encounters with tangible social-cultural artefacts such as toys, homes, landscapes, animals, digital technology
9. Reflecting on constructions of diversity and difference in education and community settings

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	20 item multiple choice/short answer	20	N	Individual

Critical Review	1,200 words	40	N	Individual

TEAC 1014 Experience-based Outdoor Education

Credit Points 10

Legacy Code 102206

Coordinator Tonia Gray (https://directory.westernsydney.edu.au/search/name/Tonia Gray/)

Description In this subject students connect with the natural world through outdoor adventure activities. Students learn about themselves, others, and the environment through experiential activities. The subject focuses on self-reliance, resiliency, interdependence, managing personal risks, and the value of life-long outdoor recreation for enjoyment, health and well-being. This subject will involve a full day practical field trip in the outdoors as well as scheduled tutorials. The practical field trip is physically demanding whilst also extending students mentally and socially. Given the nature of the bushwalking field trip, participants require a moderate level of personal fitness.

School Education

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Equivalent Subjects SPRT 1005 - Outdoor Recreation

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Reflect on the impact of outdoor education theory including ecological literacy, nature deficit disorder, positive psychology, risk management and adventure programing;
2. Evaluate the process of experiential learning and its connection to personal growth;
3. Communicate experiential and theoretical connections between humans and their environment;
4. Assess individual and group well-being in outdoor activities;
5. Demonstrate personal and interpersonal capabilities in communication, resilience, self-confidence, teamwork, goal setting, personal autonomy and initiative.
6. Develop a deeper understanding of Indigenous links to the land and their culture

Subject Content

1. Theoretical models of experience-based learning in the outdoors and variations in emphasis developed by key writers in the field;
2. Relationships between experience-based learning in the outdoors and holistic well-being;
3. Participation, reflection and engagement in outdoor adventure education;
4. Sustainability, stewardship and nature deficit disorder;
5. Intra- and interpersonal skill development.
6. Understanding of Indigenous concepts related to connectivity to land

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are

TEAC 1017 Identity and Voice in Multimodal Texts

Credit Points 10

Legacy Code 102114

Coordinator Johanna Einfalt (https://directory.westernsydney.edu.au/search/name/Johanna Einfalt/)

Description The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. Aboriginal and Torres Strait Islander people's identities are depicted in a wide range of texts pertaining to expressions of and about Aboriginality. These various representations form the way Indigenous identities are constructed, projected and reflected in society often through the media. Students will examine how we then set in motion a better understanding of this phenomenon using carefully selected texts, the diverse nature of them and compare the outcomes; particularly the way they affect relationships between Indigenous and non-Indigenous Australians. The subject explores genres, voice, authority, identity, the complexities surrounding these debates and discourses, and how teachers are the advocates for negotiating power, space and voice for communities into the future. The examination of the portrayal of Aboriginal and Torres Strait Islander people in texts in a school context will be deconstructed so students understand the process of producing current and future identities. This subject is included in the Foundation Phase of the Bachelor of Education.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Equivalent Subjects EDUC 1003 - Indigenous Cultural texts in Education

Restrictions

Students must be enrolled in 1717 - Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education. Students enrolled in the Indigenous Studies major can enrol in this subject in Summer if available. Contact the subject coordinator for enrolment details.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the significance of story and narratives in Aboriginal and Torres Strait Islander cultures
2. Identify and describe representations of Aboriginal and Torres Strait Islander Australians in a range of texts produced by both Indigenous and non-Indigenous people composed for different audiences.
3. Identify and explain the ways different cultures, cultural stories and icons, including Australian images and significant Australians, including Aboriginal Australians, are depicted in texts
4. Outline debates around the politics of representation using theoretical frameworks;
5. Explain the role texts play in the construction, expressions and representations of cultural identity for Aboriginal and Torres Strait Islander peoples.
6. Analyse the role of the texts in relation to continuity and change in cultural assumptions.

Subject Content

1. The essence of Aboriginal and Torres Strait Islander story and narratives
2. Texts and their readings; examine how to undertake a textual deconstruction.
3. How do we understand cultural meaning; who constructs it? Examine theory: level of significations; function of the metaphor; genre and inter-texuality; narrative form and the 'realism' effect; grand narratives and ideology; narrator function and audience positioning.
4. Identity and representations the politics of representation - Aboriginal people as ?eOther?f; decolonization; 'colonial gaze'; neo-colonialist texts; postcolonial texts; postcolonial critical practice.
5. Analysis of a variety of primary and secondary sources which depict Aboriginal peoples and identity (children?fs literature; films, television dramas, music videos; advertisements; musical/theatrical productions, photographic works, and other visual art

Assessment

TEAC 1018 Infant and Early Development

Legacy Code 102666

Coordinator Kerry Staples (https://directory.westernsydney.edu.au/search/name/Kerry Staples/)

Student Contribution Band

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Restrictions

Students must be enrolled in the Bachelor of Education (Birth – 5 Years).

Learning Outcomes

1. Analyse contemporary theories of child development and apply these understandings to practice.
2. Explain children's development from conception to five years of age across physical, socio-emotional, cognitive, language, sensory, moral, creative, spiritual and academic domains.
3. Discuss the relative impact on children's development of nature (biological and genetic factors) and nurture (environmental factors).
4. Analyse children's development and learning within socio-cultural contexts and determine the implications for planning for children's learning.
5. Analyse the importance of building positive, professional relationships with young children and families and determine the implications for promoting responsive quality care and education.
6. Use a variety of observational techniques to document, analyse and interpret children's development using relevant theory and research.
7. Critique developmentally and culturally appropriate practices and principles and their implications for care and education that is responsive to the needs of diverse children and their families.

Subject Content

Module 1: The ecology of childhood and child development
The child in the context of family, society, and community
Diversity in family structures and values and socialisation practices.

Module 2: Children's growth and development: theoretical perspectives

Theories of child development
Children's development from pre-natal to the early school years across physical, socio-emotional, cognitive, language, sensory, moral, creative, spiritual and academic domains.

Module 3: Brain development research and its implications for practice

Research on early brain development
The impact of biological and genetic factors
Creating environments which respond to critical and sensitive periods of development

Module 4: Relationships as foundational for children's developments
Positive interactions and communication with children and families
Continuity of care and education
The pedagogy of relationships

Module 5: Application of knowledge of child development into practice
Observe, assess, and guide children's development and learning utilising theories of child development
Critique and apply the principles of developmentally and culturally appropriate practices in designing quality care and learning in early childhood

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject, students must have satisfactorily completed online Child Protection Awareness Training, have a current Working with Children Check, and completed the online course ASCIA Anaphylaxis: Australasian childcare.

Assessment

TEAC 1020 Language and Literacy 1

Credit Points 10

Legacy Code 102118

Coordinator Julie Lennon (https://directory.westernsydney.edu.au/search/name/Julie Lennon/)

Description The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. The subject examines ways of enhancing children's language learning through speaking, listening, reading and writing as they begin to create and understand the oral, written and visual texts of their environment. Current literacy and language theories are examined. The diverse needs of learners are considered and appropriate teaching strategies to develop literacy skills are explored. Students will appreciate children's literature and the way it can be used to promote literacy and language learning in a variety of early learning

contexts K-2. The subject prepares individuals for more advanced subjects involving language and literacy, and primary English teaching specialisation.

Equivalent Subjects EDUC 2004 - Language and Literacy 1 - AREP

Restrictions

Students must be enrolled in 1717 - Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the nature of language acquisition and language development.
2. Describe the strategies that may be used in the teaching of reading K-6.
3. Engage in and utilise practical strategies to support children's literacy learning in a variety of contexts K-2.
4. Assess the impact of social, cultural, technological and political contexts and their effect on literacy learners in classroom contexts.
5. Utilise children's literature to promote literacy and language learning in a variety of learning contexts.
6. Analyse key theories about language learning and apply these to the construction of literacy lesson plans and programs

Subject Content

1. Language acquisition
2. Nature and role of English as a language of communication for participation in society, through reading, writing, listening, speaking, viewing and representing experiences, values and ideas.
3. Mapping oral language onto written language
4. What is literacy? What is reading? How do we learn to read?
5. Broad and critical knowledge and understanding of English as a discipline, including recent theories of reading and the reading process
6. Teaching decoding - phonemic awareness and phonics
7. Strategies for teaching reading: shared reading, guided reading
8. Assessment of reading, running records
9. What makes good children's literature? Practise analysing children's books of varying text types: both fiction and non-fiction, including literature that provides insights into Aboriginal and Torres Strait Islander peoples, multicultural perspectives and children?fs experiences.
10. Linking reading to writing in the early years
11. Multi-literacies and Critical Literacy
12.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Report	800 words	20	N	Individual
Professional Task	1200 words	30	N	Individual
Essay	1200 words	50	N	Individual

TEAC 1021 Learning, Teaching and Technologies

Legacy Code 102116

Coordinator Shirley Gilbert (https://directory.westernsydney.edu.au/search/name/Shirley Gilbert/)

Student Contribution Band

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Restrictions

Students must be enrolled in 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe a range of environments and activities which facilitate learning through recognition of the diverse nature of learners.
2. Explain the roles and responsibilities of teachers in primary schools.
3. Develop, implement, justify and document teaching experiences relating to the NSW Syllabus documents and the needs of individual children in their care.
4. Explain the impact of technologies on teaching and learning.
5. Utilise technologies for their personal productivity and developing professional practice.
6. Apply the principles and practices of classroom pedagogy based on an understanding of how children learn and are motivated.
7. Evaluate their role in the teaching profession and the need to continually improve their professional knowledge and practice.

Subject Content

1. Positive environments for learning and supporting learners - school, home and community
2. Developing a personal understanding of teaching as a profession. Personal philosophy of teaching and learning
3. Teacher as a life-long learner - including reflection in teaching and learning, portfolios, schools as learning communities
4. Introduction to curriculum and the structure of syllabus documents;
5. Planning, implementing and assessing in the teaching and learning cycle
6. Development and use of resources

7. Teaching and learning strategies including roles and uses of information and communication technologies
8. Managing classrooms and learners in classrooms

Special Requirements

Legislative pre-requisites

Students must have: Working with Children Check and Completion of Child Protection Training.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Essay	2,000 words	50	N	Individual
Report and Artefact	2,000 words	50	N	Individual

TEAC 1022 Literacy Skills for Teacher Education

Credit Points 10

Legacy Code 102112

Coordinator Milena Ilisevic (https://directory.westernsydney.edu.au/search/name/Milena Ilisevic/)

Description This subject introduces students to the profession of teaching and examines key priorities that are central to the literacy demands on a teacher-educator. It aims to develop oral and written communication skills, skills in reading for academic purposes, and knowledge, skills and confidence in literacy and academic writing. The subject also provides a general orientation to University life, familiarising students with the language of tertiary institutions and the general requirements for progression and assessment.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Equivalent Subjects COMM 1029 - University Study Skills

Restrictions

Students must be enrolled in 1717 - Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify areas of their own written and oral communication that require development to ensure communication skills are appropriate to support a teacher professional identity in new times. This will include intercultural concepts of teacher education. (Standard 2.5.1).
2. Develop an action plan for enhancing identified areas of their own literacy development. (Standard 1.4.1,2.5.1).
3. Practise and refine the oral and written skills as required in the profession. (Standard 2.5.1).
4. Identify different types of reading, and develop critical thinking skills that are applicable to specific academic situations. (Standard 1.4.1,2.5.1).
5. Apply a working knowledge of the grammatical and structural conventions used in the profession. (Standard 2.5.1).
6. Write a well-structured academic essay. (Standard 2.5.1).
7. Use referencing and citation conventions accurately and appropriately in academic writing. (Standard 2.5.1).

Subject Content

1. Intercultural concepts of teacher education;
2. Reading and writing for academic purposes;
3. Interpreting genres and writing styles;
4. Accessing and using e-learning sites;
5. Assessment and development of skills and knowledge equivalent to Higher School Certificate Band 5 English;
6. Development of identified areas of literacy need;
7. Familiarisation and engagement with teacher research and professional literature (such as AITSL standards, ACARA, and NESA).

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Participation	Various - as allocated	10	N	Individual
Annotated Bibliography	600 words	40	N	Individual
Essay	1,200	50	N	Individual

TEAC 1023 Literacy for Educators

Legacy Code 102631

Coordinator Jaydene Barnes (https://directory.westernsydney.edu.au/search/name/Jaydene Barnes/)

Student Contribution Band

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

TEAC 1024 Mathematical Patterns and Relationships

Credit Points 10

Legacy Code 102249

Coordinator Dorian Stoilescu (https://directory.westernsydney.edu.au/search/name/Dorian Stoilescu/)

Description Students will use a variety of investigative techniques to highlight the evidence of patterns and relationships in mathematics. The inherent structure of mathematics will be approached through the examination of various mathematical systems. In addition, students will examine the nature of mathematical thought including inductive and deductive reasoning. This subject contributes directly to the achievement of a sound foundation in mathematics.

School Education

Discipline Teacher Education

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Equivalent Subjects TEAC 1025 - Mathematical Patterns and Relationships (WSTC)
TEAC 2041 - Mathematical Patterns and Relationships

Restrictions

Students must be enrolled in 1651 Bachelor of Arts (Pathway to Teaching Primary), 1708 Bachelor of Arts (Pathway to Teaching Birth -5/Birth - 12), 1929 Bachelor of Arts (Pathway to Teaching Early Childhood/Primary), 6017 Diploma in Arts/Bachelor of Arts (Pathway to Teaching Birth-5/Birth-12) or 6019 Diploma in Arts/Bachelor of Arts (Pathway to Teaching Primary).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate and apply skills and understandings of number theory and numeration systems.
2. Demonstrate and apply skills and understanding of multiple representations and ways of calculating fractions and decimals.
3. Understand and apply calculations of factors and multiples
4. Use patterns and relationships in number and their application to real life problems.
5. Recount the historical evolution of measurement systems.
6. Explain the basic feature of the metric system and the relationships between the Hindu-Arabic numeration system and the metric system.
7. Explain the mathematical patterns and relationships that can be found in space and geometry.
8. Apply basic geometrical concepts and principles.
9. Explain geometrical patterns and relationships in the environment.
10. Apply knowledge of the metric system to investigations of real-life problems.

Subject Content

1.Patterns and relationships in geometry:
- environmental instances and applications
- Basic concepts, principles and relationships
2.Patterns and relationships in number:
- number patterns in space
- factors, multiples, prime numbers,
- fractions and decimals
- number patterns
- number theory
3.Mathematical systems
- transformational geometry
- numeration systems
- number systems
4.Mathematical reasoning
- historical evolution of mathematical thought
- inductive and deductive reasoning
- The investigation of mathematical ideas
5.Measurement
- Basic features of The metric system
- relationship to The numeration system The investigation of mathematical ideas

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Multiple Choice	50 minutes	20	N	Individual

Co-requisite(s) Students enrolled in the combined DiplomaBachelor programs must have passed or be enrolled in the College Preparatory subjects in order to enrol in this subject

Equivalent Subjects TEAC 1024 - Mathematical Patterns and Relationships
TEAC 1040 - Mathematical Patterns and Relationships (Block)

Restrictions

Students must be enrolled at Western Sydney University, The College. Students enrolled in Extended Diplomas must pass 40 credit points from the preparatory subjects listed in the program structure prior to enrolling in this University level subject.

Assumed Knowledge

A demonstrated knowledge of basic mathematics.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate and apply skills and understandings of number theory and numeration systems.
2. Demonstrate and apply skills and understanding of multiple representations and ways of calculating fractions and decimals.
3. Understand and apply calculations of factors and multiples
4. Use patterns and relationships in number and their application to real life problems.
5. Recount the historical evolution of measurement systems.
6. Explain the basic feature of the metric system and the relationships between the Hindu-Arabic numeration system and the metric system.
7. Explain the mathematical patterns and relationships that can be found in space and geometry.
8. Apply basic geometrical concepts and principles.
9. Explain geometrical patterns and relationships in the environment.
10. Apply knowledge of the metric system to investigations of real-life problems.

Subject Content

1. Patterns and relationships in geometry:
   - environmental instances and applications
   - basic concepts, principles and relationships
2. Patterns and relationships in number:
   - number patterns in space
   - factors, multiples, prime numbers,
   - fractions and decimals
   - number patterns
   - number theory
3. Mathematical systems
   - transformational geometry
   - numeration systems
   - number systems
4. Mathematical reasoning
   - historical evolution of mathematical thought
   - inductive and deductive reasoning
   - the investigation of mathematical ideas
5. Measurement
   - basic features of the metric system
   - relationship to the numeration system the investigation of mathematical ideas

TEAC 1028 Numeracy for Teaching

Credit Points 10

Legacy Code 102113

Coordinator John Ley (https://directory.westernsydney.edu.au/search/name/John Ley/)

Description The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This subject considers beginning teachers' own mathematics skills and knowledge and how they can use them to support their own numeracy. Primary school teacher education students need to feel confident and competent in their understanding of mathematics as well as in mathematics pedagogy. Students will use a variety of investigative techniques to increase their experience of patterns and relationships in mathematics. The inherent structure of mathematics will be approached through the examination of various mathematical systems and their relationship to the current mathematics K-6 syllabus. Mathematics is specifically taught within this subject to develop professional skills required to meet the demands of primary classroom teaching.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Equivalent Subjects EDUC 1007 - Numeracy for Teaching

Restrictions

Students must be enrolled in 1717 - Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the proficiency strands of the Australian Curriculum including communicating, understanding, fluency, problem solving and reasoning. (Standard 2.3.1).
2. Identify the content strands of the Australian Curriculum including Number and Algebra, Measurement and Geometry and Statistics and Probability. (Standard 2.3.1).
3. Identify patterns and relationships in mathematics in the real-world contexts. (Standard 2.1.1).
4. Solve mathematical problems related to factors, multiples, primes and composites. (Standard 2.1.1).
5. Solve mathematical problems related to volume and measurement. (Standard 2.1.1).
6. Solve mathematical problems related to decimals, fractions and percentages. (Standard 2.1.1).
7. Solve mathematical problems related to chance and data. (Standard 2.1.1).
8. Solve mathematical problems related to geometry (2 and 3D shapes). (Standard 2.1.1).

Subject Content

1. Mathematics for teaching, introduction to the mathematics syllabus continuum K- 12 and strands: Number and Algebra, Measurement and Geometry, Statistics and Probability as well as Working Mathematically and its five components: Communicating, Problem Solving, Reasoning, Understanding and Fluency.
2. Language of number.
3. Nature and role of mathematics in describing and modelling patterns and relationships that can be generalised, and as a means of interpreting the world.
4. Number: 4 Operations - Addition, Subtraction, Multiplication and Division and the Order of Operations, Fractions, Decimals and Percentages and their Equivalence, Financial Mathematics, Ratios and Rates, Logarithms, Factors, Multiples, Primes and Composites.
5. Patterns and Algebra: Algebraic Techniques, Indices, Equations, Linear and Non-Linear Relationships, Functions and Other Graphs, Polynomials.
6. Measurement: Length, Area, Volume and Capacity, Mass, Time.
7. Geometry: 3D Space, 2D Space
8. Statistics and Probability: Chance, Data collection and Representation, Single Variable and Bivariate Data Analysis.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Professional Task	1,400 words	25	N	Individual
Professional Task	500 words	25	N	Individual
Professional Task	1/2 to 1 hour per week	S/U	N	Individual
Final Exam	2 hours	50	N	Individual

Prescribed Texts

TEAC 1029 Professional Experience 1: Introduction to Classrooms

Credit Points 10

Legacy Code 102117

Coordinator Jacqueline Humphries (https://directory.westernsydney.edu.au/search/name/Jacqueline Humphries/)

Description The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This subject is designed to introduce students to the characteristics of classrooms and curriculum implementation, Students will explore the structure of teaching, learning and curriculum in all key learning areas, with a particular focus on literacy and numeracy. They will examine the perspectives which influence the curriculum and the way in which curriculum is interpreted in the classroom environment. The subject will assist students in commencing the development of their professional portfolio with a ten day's practicum, focusing on professional experience and the work of teachers in primary classrooms.

School Education

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Equivalent Subjects EDUC 1009 - Professional Experience 1 Introduction to Classrooms

Restrictions

Students must be enrolled in 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the characteristics and elements of classrooms, teaching, learning and curriculum when designing and implementing lessons according to professional teaching standards. (Standards: 1.1.1, 1.4.1)
2. Apply outcomes-based planning in all subject areas. (Standards: 2.1.1, 2.2.1,2.3.1)
3. Implement a range of teaching strategies, spaces and resources (including Information and Communication Technologies) that support inclusive student participation and engage students in their learning. (Standards: 2.1.1, 2.2.1,2.3.1, 2.6.1)
4. Evaluate their placement identifying areas of personal professional knowledge and practice that needs improvement. (Standards: 6.1.1,6.2.1, 6.3.1 and 6.4.1)
5. Use a range of verbal and non-verbal communication and teaching strategies to support student engagement. (Standards: 3.5.1, 4.2.1, 4.3.1)
6. Provide timely and appropriate feedback to students about their learning. (Standards: 5.2.1, 5.5.1)
7. Plan and teach lessons using knowledge of student learning, content and effective teaching strategies (Standards: 1.1.1, 2.1.1, 2.3.1, 2.6.1, 3.2.1)

Subject Content

1. Aboriginal issues in the classroom - addressing the learning styles of different learners
2. Orientation to primary schools - teachers' professional roles and responsibilities in the classroom and the school community
3. Ethics, expectations and protocols in regards to working within schools
4. How professional portfolios can be used to show professional growth and development in teaching - linking with the Australian Professional Standards for Teachers
5. Assessment and evaluation of teaching and learning practices.
6. Lesson plans revisited. Teachers as reflective practitioners

Special Requirements

Legislative pre-requisites

1. Students are required to complete the **two** components of the Working with Children Check (WWCC) process leading to (a) the issuance of a clearance number under the category of volunteer and (b) verification of the clearance number with the NSW Department of Education.

a) Students will need to:
i. Access the Commission for Children and Young People website and complete an online application form to generate an application number.

ii. Present an application number and identification to a Service NSW office who will issue a Working with Children Check number via mail or email.
iii. Submit the letter with a valid Working With Children Check number via WesternNow Student Portal. The document is trimmed and recorded as a Special Requirement on your academic record.
WesternNow Student Portal link (https://wsu.service-now.com/student/?id=sc_cat_item&sys_id=9c8b61a2dbbed8504f58e434059619ed)
b) Students will need to:
i. Access the NSW Department of Education WWCC Verification declaration form https://online.det.nsw.edu.au/jecpc/crc/wwcc.jsf
ii. Carefully read the information about Identity Documents and obtain a copy of the relevant ID documents.
iii. Complete and submit the verification declaration form.
iv. Once your WWCC verification is complete you will receive an email reply from the DoE Probity Unit confirming your WWCC number has been verified.
v. Submit the verification confirmation email via WesternNow Student Portal. The document is trimmed and recorded as a Special Requirement on your academic record.

2. Students must complete the **two** components of the NSW Department of Education's Child Protection Awareness Training (CPAT)
a) Students will need to:
i. Access the NSW Department of Education's MyPL website https://mypl.education.nsw.gov.au/
ii. Complete the online Child Protection Awareness Training: Induction
iii. Save certificate of completion
iv. Submit certificate via WesternNow Student Portal
b) Students will need to:
i. Access the NSW Department of Education's MyPL website https://mypl.education.nsw.gov.au/
ii. Complete the Child Protection Awareness Training (CPAT): Annual Update for the calendar year
iii. Save certificate of completion

iv. Submit certificate via WesternNow Student Portal
Both certificates will be recorded on your student record as Special Requirements with the end date for the Annual CPAT recorded. The CPAT: Annual Update will need to be renewed and submitted on an annual basis.
Students who have not completed both components of the Child Protection Awareness Training will need to withdraw from the subject.

3. Students must complete the ASCIA anaphylaxis e-training and submit their certificate to Submit certificate via WesternNow Student Portal.

4. Students must meet the Inherent Requirements for the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education (p. 299).

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

Professional Placement Performance	n/a	S/U	Y	Individual
Reflection	100 words per diary entry (10)	S/U	N	Individual

TEAC 1030 Science and Engineering in Early Childhood

Credit Points 10

Legacy Code 102667

Coordinator Sheridan Hewson (https://directory.westernsydney.edu.au/search/name/Sheridan Hewson/)

Description This subject will develop students' critical and meaningful understanding of the way in which engineering, science and technology shape our lives and the world we live in. It will extend students' understanding of how engineering, science and technology integrate and impact on each other and how they can be promoted in creative and meaningful ways in the learning environment. This subject will foster a positive disposition in students towards teaching and applying engineering, science and technology in diverse and multi-dimensional educational settings for children aged birth to 5 years. It will focus on investigation, critical thinking and problem solving as they relate to young children's learning processes. The subject will engage with relevant pedagogical approaches and the Early Years Learning Framework principles, practices and learning outcomes. This subject is included in the Foundation Phase of the Bachelor of Education.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Restrictions

Students must be enrolled in the 1926 Bachelor of Education (Early Childhood).

Learning Outcomes

1. Investigate the key concepts of science, technology and engineering in society and in everyday applications.
2. Explain the relationships between science, technology and engineering and the processes of investigation, critical thinking and problem solving.
3. Examine the different theoretical and pedagogical approaches relevant to science, technology, engineering teaching and learning for birth to 5 years.
4. Apply the principles, practices and outcomes of The Early Years Learning Framework for Australia to investigate the relationships between science, technology and engineering and play based pedagogies.
5. Propose learning experiences that integrate science, technology and engineering concepts, processes and language.
6. Discuss issues of diversity and equity in STEM and strategies to support the learning needs of diverse students.

Subject Content

1. Key concepts of science, technology and engineering in society and in everyday applications
2. Science, Technology, Engineering for Birth - 5 years
3. Processes of investigation, exploration and problem solving
4. Theory and approaches for teaching science, technology and engineering for children Birth-5 Years
5. Use of the Early Years Learning Framework principles, practices and learning outcomes to investigate the relationships between science, technology and engineering and play based pedagogies
6. Issues of diversity and equity in STEM – addressing the needs of diverse students

Assessment

TEAC 1031 Sociology for Educators

Credit Points 10

Legacy Code 102629

Coordinator Tania Ferfolja (https://directory.westernsydney.edu.au/search/name/Tania Ferfolja/)

Description This subject includes the study of society, culture, gender, ethnicity, sexuality and social class. It explores sociological understandings of the impact of the social on individuals and how this influences education, knowledge, society and change. The subject addresses the diverse needs of children in complex contexts. It provides students with opportunities to reflect on universal assumptions often imposed on children, families and communities, through applying analytical tools and developing their professional identity as critical reflexive educators. This subject is included in the Foundation Phase of the Bachelor of Education.

Level Undergraduate Level 1 subject

Restrictions

Students must be enrolled in the 1876 Bachelor of Education (Primary) or 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify key sociological theories, range of theoretical approaches and tools for explaining the sociological dimensions of education and care;
2. Analyse the role and impact of political, economic and social aspects of difference and how they have influenced sociological constructions of family, community and schooling;
3. Explain key concepts and theoretical approaches for exploring culture, community, class, identity, subjectivity, diversity, religion, gender, sexuality, ethnicity, power and agency;
4. Examine the social construction of contemporary childhood and its influence on the changing nature of being a child in families, the community and educational settings;
5. Describe how social, historical and cultural practices have impacted on the educational outcomes for Aboriginal and Torres Strait Islander children;
6. Apply critical thinking skills to analyse contemporary teaching and learning based on sociological theories;
7. Construct and evaluate arguments by reference to appropriate sources and theory;
8. Analyse oneðfs own personal, physical, learning and emotional needs to apply appropriate self-directed learning strategies.

Subject Content

- society and community, The political, economic and social aspects of difference and community through historical and contemporary sociological understandings
- concepts of subjectivity and identity as related to consciousness, agency, personhood, Reality and relationship to how individuals are shaped by being in The World
- understandings of culture, agency, power through theories of culture, diversity, postcolonial, Feminism and social Constructivism
- social class, levels of power and wealth
- foundational concepts in The Study of gender: identity, sexuality, family, religion, The body, cultural practices and gender norms in light of contemporary gender theories
- The social construction of childhood and The Importance of Examining contemporary and diverse childhoods and Understanding children?fs role in families, community and education
- sociological perspectives on race, ethnicity and shared cultures: practices, values, and beliefs of A group, cultural characteristics as objects of Collective discrimination
- impact of social and cultural practices on The educational outcomes for Aboriginal and Torres Strait Islander students: their heritage and cultural practices

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Presentation	30 minutes	20	N	Group
Quiz	10 min per quiz	30	N	Individual
Final Exam	2 hours	50	N	Individual

TEAC 1032 The Developing Child

Credit Points 10

Legacy Code 102046

Coordinator Louie Liang (https://directory.westernsydney.edu.au/search/name/Louie Liang/)

Description An in-depth knowledge of child development is essential for educators to plan and provide culturally and developmentally appropriate practices for children in the early years. In this context, this subject aims to explore the diverse nature, processes and aspects of children's development from conception to 12 years of age. The subject investigates the physical, socio-emotional, cognitive, language, moral, creative, spiritual and academic domains of development. Students will gather an understanding of the evolving methods used to develop theory about child development – from traditional

case study approaches to contemporary brain research. The role of family, community, and other sociocultural influences will also be considered in relation to understanding the holistic nature of children's development. Students will apply their knowledge of theories and methods of child study in the compilation of a Child Portfolio. This subject is included in the Foundation Phase of the Bachelor of Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain children's development from conception to 12 years of age across all domains;
2. Analyse the major theories and contemporary research relating to children's development and apply theoretical understandings of child development in their learning;
3. Discuss evolving methods used to develop theory about child development – from traditional case study approaches to contemporary brain research;
4. Demonstrate understanding of the diversity in families, cultures, environments and communities and consider the implications for children's development, health, care and education;
5. Critique developmentally and culturally appropriate practices and principles and their implications for care and education that is responsive to needs of children and their families;
6. Apply knowledge of observational and assessment techniques to the study of children's development;
7. Document and interpret observations using related theory and research and suggest implications for planning for children's developments.

Subject Content

1. An overview of theories of children's development
2. Child development: history, methods and sociocultural perspectives of child development
3. Biological foundations of child development, prenatal development, and birth
4. Child development: physical and motor development; cognitive development; language development; socio-emotional development; moral and spiritual development; creative and academic development.
5. Diversity in families, cultures and communities and importance of working with children, families and communities professionally and ethically.
6. Methods of observation, documentation and analysis of child development.
7. Developmentally and culturally appropriate practices for children in the early years and their application to education contexts.
8. Academic literacy, including analytical and reflective writing and the organisation of a child portfolio.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	2 x 40 minutes	20	N	Individual
Critical Review	1000 words	30	N	Individual

TEAC 1034 Ways with Words and Images

Legacy Code 102633

Coordinator Erin Mackenzie (https://directory.westernsydney.edu.au/search/name/Erin Mackenzie/)

Student Contribution Band

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Restrictions

Students must be enrolled in the Bachelor of Education (Primary).

Learning Outcomes

1. Describe how texts vary according to purpose, audience and situation.
2. Develop a metalanguage for understanding written, visual and multimodal texts.
3. Develop critical media literacies in close study of literary and factual texts.
4. Apply a range of theories to read, view, interpret and analyse a range of texts.
5. Explain how selection of words, phrases, images, structure, composition influences meaning within different subject disciplines.

Subject Content

• Variation of written and visual texts according to their social purpose, audience and situation.
• Grammars and affordances of written, visual and multimodal texts
• Critical media literacy, including fake news, posters, credibility of sources, (ethical) stance, related to choice of language and images,
• Construction of written and visual texts in different disciplines, for example, Science, History, Art

TEAC 1037 Exploring Patterns and Relationships in Mathematics

Credit Points 10

Legacy Code 102795

Coordinator Kate Mulkern (https://directory.westernsydney.edu.au/search/name/Kate Mulkern/)

Description This subject supports pre-service teachers in the understanding of mathematical processes and content. Pre-service teachers will develop competence and confidence in the content areas of Number and Algebra, Measurement and Geometry; Probability and Statistics. They will be able to solve problems related to these areas and communicate their solution methods, using processes from the Working Mathematically strand. This subject is included in the Foundation Phase of the Bachelor of Education.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Restrictions

Students must be enrolled in the 1876 Bachelor of Education (Primary) or 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Understand fundamental concepts of problem solving strategies and mathematical modelling and their application in the solution of open-ended investigations;
2. Apply knowledge of problem solving and the modelling process in variety of mathematical applications;
3. Understand the fundamental concepts of Number and Algebra, Measurement and Geometry; Statistics and Probability;
4. Investigate the connections between Number and Algebra, Measurement and Geometry; Statistics and Probability
5. Use a range of strategies to perform calculations with integers, fractions, decimals, percentages, ratios and rates;
6. Analyse and create patterns with numbers and generalise these patterns into algebraic expressions that can be displayed on the Cartesian Number Plane;
7. Use deductive reasoning to investigate geometrical investigations;

8. Use a range of strategies to perform conversions between measurement units;
9. Analyse data using measures of central tendency and spread;
10. Use appropriate graphical displays of data;
11. Investigate probabilities that result from simple or compound events;
12. Use diagrams, symbols and terminology to communicate and connect mathematical ideas;
13. Use the common conceptual misconceptions in Number and Algebra, Measurement and Geometry; Statistics and Probability to improve understanding.

Subject Content

- skills in The four Operations with integers, fractions and decimals
- patterns and Algebra
- Graphing on The Cartesian number Plane
- Perimeter and area of Plane shapes, quadrilaterals and circles
- parallel lines and angle relationships with transversals
- Volumes of prisms and cylinders
- Operations with ratios and rates
- time and time zones
- financial problems involving The purchase of goods
- data collection, interpretation and display
- mean, mode, median range and Standard deviation
- probability and its?f application to real World problems
- Problem solving strategies
- apply mathematical Problem strategies in real World applications
- positive attitudes about mathematical concepts

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 1038 Literacy and Numeracy for Educators

Credit Points 10

Legacy Code 102794

Coordinator Robert Mcintosh (https://directory.westernsydney.edu.au/search/name/Robert Mcintosh/)

Description The primary purpose of this subject is to equip first-year students with personal literacy and numeracy skills necessary for their academic success. This subject aims to develop students' personal literacy and numeracy skills necessary for participating in academic and professional contexts. It also supports pre-service teachers as literate and numerate citizens to strengthen positive attitudes, skills, and knowledge about literacy and numeracy roles in everyday contexts. Students will have opportunities to develop their interpersonal, verbal and non-verbal communication skills. These skills are integral to the inherent requirements of a graduate teacher who are required to undertake the national literacy and numeracy test mandated by the Australian Government. Pre-service teachers will develop confidence and competence in their understanding of the roles of literacy and numeracy in society, with particular emphasis on problem-solving and effective communication in practical situations. Students will be provided with opportunities to develop critical self-awareness, self-regulation and the ability to organise oneself as a self-directed learner. Essential elements of academic scholarship, including information media literacy, understanding assessment, and academic integrity, will be developed. This subject is included in the Foundation Phase of the Bachelor of Education.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Restrictions

Students must be enrolled in 1876 B Education (Primary), 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education or 1926 Bachelor of Education (Early Childhood).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Develop personal literacy and numeracy skills and attitudes in academic and other contexts;
2. Demonstrate professional digital competence effectively and creatively for learning and assessment purposes;
3. Apply critical reading and writing skills that are appropriate to academic situations;
4. Apply critical numeracy skills to make discerning decisions about how to use mathematical knowledge and skills purposefully;
5. Evaluate and manage resources that are relevant to specific inquiry areas;
6. Use effective communication strategies to interact with individuals and groups for a range of purposes and audiences;
7. Analyse specific assessment requirements and implement effective task and time management strategies;

8. Recognise the importance of integrity to demonstrate respect, responsibility and honesty in academic scholarship.

Subject Content

1. Personal literacy and numeracy skills and attitudes in contemporary contexts
2. Professional digital competence
3. Critical reading and writing
4. Mathematics and critical numeracy skills in solving real-world, practical problems
5. The literate and numerate learner as an effective communicator and problem solver with a focus on creative, intercultural and critical thinking
6. Task and time management
7. Academic Integrity

TEAC 1039 Scientist, Artist, Teacher

Credit Points 10

Legacy Code 102821

Coordinator Karin Louise (https://directory.westernsydney.edu.au/search/name/Karin Louise/)

Description This subject is designed to develop pre-service teachers' efficacy and identities in the content area of science and the arts. Building on the concepts of teaching-artists and scientist-as-teacher this subject gives future teachers agency to create innovative and transformative learning experiences for the primary classroom. In this subject students build on their content knowledge in science and the arts, as developed in the subjects Science and Technology in the Primary Years, and Creative Arts Education. They will develop science, performing arts (dance, drama and music), visual arts and media arts skills which can enhance their repertoire for the classroom. This subject will additionally explore the intersection of science and the arts, developing knowledge of creativity, aesthetics, innovation, artistic and scientific processes. It has been designed to give all students the opportunity to develop their knowledge, understanding, skills, confidence and competence in the science and the arts in discrete and integrated forms. This subject is included in the Foundation Phase of the Bachelor of Education.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Restrictions

Students must be enrolled in 1876 Bachelor of Education (Primary).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of Science and Arts in the context of the Primary classroom, including theories, philosophies and practices that underpin them;
2. Research, reflect on and critically analyse the importance of Science, the Arts and their integration in the holistic development of children and their role in building innovation and skills for the future.
3. Exhibit competencies in a range of skills and knowledge in Science, Performing Arts (Dance, Drama and Music), Visual Arts and Media that can be translated effectively to the primary context.

4. Articulate the ways that scientific and artistic knowledge and skills contribute to teacher identity and efficacy in teaching Science and the Arts.
5. Integrate Science and the Arts, through exploration of collaborative learning processes, experimentation, innovation, imagination, creativity and problem-based learning.
6. Use physical and digital technologies to exhibit practical skills in Science and the Arts.

Subject Content

1. Theory, principles and practices related to Science and Arts education, for example, working scientifically and artistically, using collaborative learning processes, experimentation, innovation, imagination, creativity and problem-based learning;
2. Research the importance of Science and the Arts in the holistic development of primary-aged students and its role in building innovation and skills for the future
3. Development of identities and efficacy of teaching-scientist and teaching-artist;
4. Ways of integrating working scientifically and artistically
5. Using physical and digital technologies to exhibit practical skills in Science and the Arts
6. Concepts pervasive in sciences and the arts, for example colour, shadows, music, rhythmic body movement, landforms, shapes

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 1040 Mathematical Patterns and Relationships (Block)

Credit Points 10

Legacy Code 500072

Coordinator Rachel Renwick (https://directory.westernsydney.edu.au/search/name/Rachel Renwick/)

Description Students will use a variety of investigative techniques to highlight the evidence of patterns and relationships in mathematics. The inherent structure of mathematics will be approached through the examination of various mathematical systems. In addition, students will examine the nature of mathematical thought including inductive and deductive reasoning. This subject contributes directly to the achievement of a sound foundation in mathematics.

Restrictions

Students must be enrolled in 7181 Undergraduate Certificate in Early Childhood Studies

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate and apply skills and understandings of number theory and numeration systems.
2. Demonstrate and apply skills and understanding of multiple representations and ways of calculating fractions and decimals.
3. Understand and apply calculations of factors and multiples.
4. Use patterns and relationships in number and their application to real life problems.
5. Recount the historical evolution of measurement systems.
6. Explain the basic feature of the metric system and the relationships between the Hindu-Arabic numeration system and the metric system.
7. Explain the mathematical patterns and relationships that can be found in space and geometry.
8. Apply basic geometrical concepts and principles.
9. Explain geometrical patterns and relationships in the environment.
10. Apply knowledge of the metric system to investigations of real-life problems.

Subject Content

1. Patterns and relationships in geometry:
   - environmental instances and applications
   - basic concepts, principles and relationships
2. Patterns and relationships in number:
   - number patterns in space
   - factors, multiples, prime numbers,
   - fractions and decimals
   - number patterns
   - number theory
3. Mathematical systems
   - transformational geometry

- numeration systems
- number systems

4. Mathematical reasoning
   - historical evolution of mathematical thought
   - inductive and deductive reasoning
   - the investigation of mathematical ideas
5. Measurement
   - basic features of the metric system
   - relationship to the numeration system the investigation of mathematical ideas

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Presentation	4-5 minutes (500 words)	20	N	Individual
Applied Project	1,000 Words + Calculations/ Working Out	30	N	Individual
Professional Task	Part A: 1,000 Words + Calculations/ Working Out Part B: 300 Words	50	N	Individual

TEAC 1041 The Developing Child (Block)

Credit Points 10

Legacy Code 500071

Coordinator Mia Hatzistergos (https://directory.westernsydney.edu.au/search/name/Mia Hatzistergos/)

Description An in-depth knowledge of child development is essential for educators to plan and provide culturally and developmentally appropriate practices for children in the early years. In this context, this subject aims to explore the diverse nature, processes and aspects of children's development from conception to 12 years of age. The subject investigates the physical, socio-emotional, cognitive, language, moral, creative, spiritual and academic domains of development. Students will gather an understanding of the evolving methods used to develop theory about child development – from traditional case study approaches to contemporary brain research. The role of family, community, and other sociocultural influences will also be considered in relation to understanding the holistic nature of children's development. Students will apply their knowledge of theories and methods of child study in the development of a Child Portfolio. Students will apply their knowledge of theories and methods of child study in the development of a Child Portfolio. Students will complete Working with Children Check (WWCC) (or the equivalent in their home state), the NSW Department of Education's online Child Protection Awareness Training and Annual update as part of the subject.

Students must be enrolled in program 7181 - Undergraduate Certificate in Early Childhood Studies

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain children's development from conception to 12 years of age across all domains;
2. Analyse the major theories and contemporary research relating to children's development and apply theoretical understandings of child development in their learning;
3. Discuss evolving methods used to develop theory about child development – from traditional case study approaches to contemporary brain research;
4. Demonstrate understanding of the diversity in families, cultures, environments and communities and consider the implications for children's development, health, care and education;
5. Critique developmentally and culturally appropriate practices and principles and their implications for care and education that is responsive to needs of children and their families;
6. Apply knowledge of observational and assessment techniques to the development of a child's case study.
7. Document and interpret observations using related theory and research and suggest implications for planning for children's developments.

Subject Content

1. An overview of theories of children's development.
2. Child development: history, methods and sociocultural perspectives of child development
3. Biological foundations of child development, prenatal development, and birth.
4. Child development: physical and motor development; cognitive development; language development; socio-emotional development; moral and spiritual development; creative and academic development.
5. Diversity in families, cultures and communities and importance of working with children, families and communities professionally and ethically.
6. Methods of observation, documentation and analysis of child development.
7. Developmentally and culturally appropriate practices for children in the early years and their application to education contexts.
8. Academic literacy, including analytical and reflective writing and the organisation of a child portfolio.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	20 questions 30 minutes	10	N	Individual
Critical Review	1,000 words	30	N	Individual
Quiz	up to 2 hours	S/U	Y	Individual
Portfolio	450 words	15	N	Individual
Portfolio	1,000 words	35	N	Individual
Peer Review	300 words	10	N	Individual

TEAC 1042 Developing Literacy and Numeracy

Credit Points 10

Coordinator Kay Carroll (https://directory.westernsydney.edu.au/search/name/Kay Carroll/)

Description This subject addresses how children and adolescents develop concepts in literacy and numeracy. The focus is on the effective teaching of literacy and numeracy across the curriculum, including explicit and culturally responsive strategies for linguistically diverse learners, including EAL/D students. There is a specific emphasis on how to teach oral language, phonics, reading, comprehension and writing strategies. Foundational mathematical concepts including number, algebra, geometry, measurement, and statistics are explored. Understanding the development of mathematical proficiency, fluency, problem-solving and reasoning is a key focus.

School Education

Discipline Teacher Education: Secondary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Equivalent Subjects TEAC 1038

Restrictions

Must be enrolled in 1939 Bachelor of Education (Secondary).

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Identify how literacy development occurs in children and adolescents.
2. Applies explicit literacy instruction and scaffolding in curriculum areas.
3. Identify how numeracy is developed in children and adolescents.
4. Applies mathematical strategies to develop student understanding, fluency, problem-solving and reasoning in curriculum areas and tasks.
5. Uses effective pedagogical strategies to meet diverse learners' needs in literacy and numeracy, including the needs of EAL/D students.

Subject Content

- Oral language development in students.
- Phonological awareness and guidelines for instructions in teaching.
- EALD language systems for spoken and written texts.
- Current educational policies and priorities for literacy and numeracy development with Aboriginal and Torres Strait Islander and other EALD students.
- Diagnostic approaches to reading and writing instruction.
- Four roles of a reader.
- Comprehension strategies in making connections, visualising, questioning and summarising.
- Developing student vocabulary in disciplines.
- Fluency approaches in reading.
- Writing development continuum.
- Pre-assessment of writing.
- Conditions that enable quality writing in disciplines.
- Pedagogies for teaching writing.
- Understanding and teaching mathematical concepts in number, algebra, geometry, measurement, statistics and probability.
- Assessing numeracy opportunities in a range of key learning areas.
- Teaching strategies for numeracy in a range of key learning areas.
- Instruction on how to apply proficiencies in numeracy – understanding, fluency, problem-solving and reasoning.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	1 hour	15	N	Individual
Quiz	1 hour	15	N	Individual
Professional Task	800 words	35	N	Individual
Professional Task	800 words	35	N	Individual

TEAC 1043 Information and Communications Technologies for Teaching and Learning

Credit Points 10

Coordinator Nathan Berger (https://directory.westernsydney.edu.au/search/name/Nathan Berger/)

Description This subject will introduce, develop and apply innovative digital literacy skills needed to be successful in the teaching profession. The subject will address digital literacy as a multidimensional skill-set covering domains related to: i) searching, accessing, analysing, and critically evaluating information; ii) communicating and sharing information; iii) creating digital products; iv) safety, and v) problem-solving. The subject will focus on the digital learner, instructional design in digital contexts, e-safety, social media, intellectual property, and legal implications of ICT for teachers. The subject develops the critical digital literacy skills for teachers as determined by the Australian Professional Standards for Teachers.

This subject is included in the Foundation Phase of the Bachelor of Education.

School Education

Discipline Teacher Education, Not Elsewhere Classified.

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Restrictions

Must be enrolled in 1939 Bachelor of Education (Secondary) or 1876 Bachelor of Education (Primary).

Assumed Knowledge

Basic computer proficiency.

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Articulate the relevant issues of a digital and globalised world and effective strategies to support the sustainable, safe, responsible, and ethical use of ICT in learning and teaching.
2. Apply instructional design and multimedia principles to expand curriculum learning opportunities for students.
3. Evaluate, retrieve, manipulate, and manage information from a range of digital sources.
4. Create engaging and accessible digital content for educational contexts.
5. Reflect on digital literacy skills to identify and plan professional learning needs.

Subject Content

1. The Digital Learner
2. The Current Digital Landscape
3. Emerging Digital Technologies
4. Accessibility
5. Instructional Design and Multimedia Principles
6. Creating, curating, and sharing digital content
7. Presenting data effectively to key stakeholders

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Presentation	4 minutes duration	30	N	Group
Reflection	2 minutes duration	20	N	Individual
Professional Task	1,500 words	50	N	Individual

TEAC 2001 Active and Healthy Childhoods

Credit Points 10

Legacy Code 102669

Coordinator Prathyusha Sanagavarapu (https://directory.westernsydney.edu.au/search/name/Prathyusha Sanagavarapu/)

Description Early childhood educators are responsible for promoting the health, safety and wellbeing of young children from birth to five years including children from vulnerable backgrounds. This includes children from migrant, low SES, refugee and Aboriginal and Torres Strait Islander backgrounds. This subject focuses on developing students' understandings of holistic health, safety, nutrition, and wellbeing of young children. It also assists students to recognise the factors that impact on children's socio-emotional wellbeing and promote resilience. This subject promotes students' ability to identify, source, and apply relevant policies and resources to respond to children's emerging health and wellbeing issues in collaboration with various stakeholders and by taking into consideration the children's and families' rights, needs, values and cultural practices. This subject is included in the Development Phase of the Bachelor of Education.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Restrictions

Students must be enrolled in 1926 Bachelor of Education (Early Education) or 1929 Bachelor of Arts (Pathway to Teaching Early Childhood/Primary)

Learning Outcomes

1. Examine the changing health and wellbeing needs of young children.
2. Discuss the essential elements and theories of physical health, safety, nutrition, and holistic wellbeing in early childhood years.
3. Recognise the factors that impact on children's socio-emotional wellbeing and promote resilience.
4. Analyse the importance of promoting physical and fundamental movement skills through areas such as dance, gymnastics, games and sports and a range of physical and outdoor activities.
5. Examine factors supporting healthy relationships and promote these in a professional capacity.
6. Apply policies and guidelines, to engage with childhood health and wellbeing issues and promote safe and healthy early childhood environments.
7. Apply strategies for working in partnership with health professionals, referral agencies and support personnel in promoting holistic health and wellbeing in early childhood settings.

Subject Content

1. **Module 1: Understanding safety, holistic health and wellbeing of children: birth-5 years**
   - Physical health
   - Hygiene
   - Safety and risk
   - Nutrition
   - Socio-emotional wellbeing
   - Physical movement
2. **Module 2: Health and wellbeing issues**
   - Current issues in children's physical health
   - Chronic illnesses
   - Mental health including bullying
3. **Module 3: Positive relationships and communication**
   - Relationships
   - Identity development
   - Positive communication
4. **Module 4: What guides healthy environments in early childhood contexts**
   - Policies
   - National and State Health programmes and initiatives
5. **Module 5: Promoting holistic health and wellbeing in early childhood settings**
   - Preventative health
   - Holistic approach to planning healthy environments in early childhood
   - Applying policies and research in health promotion
   - Developing partnerships and linkages with the wider community.

TEAC 2004 Being a Teacher

Credit Points 10

Legacy Code 102637

Coordinator Kellie Jorda (https://directory.westernsydney.edu.au/search/name/Kellie Jorda/)

Description Theory and the practice of teaching are explored in depth in this subject. This subject explores the necessary teaching and interpersonal skills required to build positive relationships with students and manage the classroom. Students will develop skills in planning, implementing and evaluating the students' learning which are designed to meet school students' curriculum needs. It introduces students to a range of teaching strategies and assists with helping to identify when and why to use them. It explores how educational theories and practitioner research underpin and inform curriculum development and pedagogical practice. Integrated in the learning will be the use of information technologies. This subject will also facilitate students in developing a critical understanding of their individual progress towards satisfying the Australian Professional Standards for Teachers at the Graduate level. The knowledge and skills developed in the other subjects of study in the program can be applied in this and the Professional Experience subjects. This subject is included in the Development Phase of the Bachelor of Education.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Co-requisite(s) TEAC 2048

Restrictions

Students must be enrolled in the 1876 Bachelor of Education (Primary) or 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education and have successfully completed 80 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse a range of teaching and classroom management strategies that promote student learning.
2. Demonstrate knowledge of structured sequential lesson planning and evidence-based assessment.
3. Evaluate a range of explicit teaching, modelling and scaffolding processes to support student learning.
4. Explain ways in which teaching practices can be adapted for varied classrooms settings and for varied curriculum.
5. Apply critical thinking skills to solve teaching and learning challenges in contemporary education.
6. Apply educational research to inform pedagogies and assessment to maximise student outcomes.

Subject Content

- Evidenced based theories and practices of Effective teaching and pedagogy that promotes positive learning behaviours and environments.
- Explicit Pedagogies for learning.
- Effective rules and routines, or cues that are focused on creating learning habits that encourage students to respond quickly to instructions to reduce wasted learning time.
- Creating and maintaining positive learning environments.
- Wellbeing and resilience.
- Lesson planning and curriculum aligned tasks that sequentially build the knowledge, understanding and skills of students.
- Preparation and design of structured lessons and delivery of clear instructions.
- Use of formative and summative assessment to adjust instruction and support learning.
- Development of scaffolds and rubrics in assessment.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 2005 Learning Through Play

Credit Points 10

Legacy Code 102670

Coordinator Jaydene Barnes (https://directory.westernsydney.edu.au/search/name/Jaydene Barnes/)

Description This subject focuses on analysing the changing nature, contexts and multiple perspectives on children's play. Drawing upon classical and contemporary theories, it examines how educators can facilitate young children's development, authentic learning and wellbeing in prior-to-school contexts as they play. Students will apply their knowledge of theories of play pedagogy and the principles of The Early Years Learning Framework to consolidate their understandings of the importance of play for children birth to 5 years. Students will further develop skills in observing and analysing children's play and plan play experiences for young children. This subject is included in the Foundation Phase of the Bachelor of Education.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Learning Outcomes

1. Explain the changing nature of play, including digital play and contemporary perspectives on play.
2. Explore diversity in children's play; its nature, contexts and opportunities, from family perspectives, including community and Aboriginal and Torres Strait Islander values and expectations about play.
3. Investigate the role and value of play in fostering children's development, learning, and wellbeing in early childhood settings.
4. Examine classical and modern theories of play.
5. Analyse children's play based on observations and documentation.
6. Apply knowledge of theories of play in designing developmentally and culturally appropriate play experiences, considering context, safety, resources and inclusivity.

Subject Content

1. Changing nature and perspectives on children's play
2. Categories of play - physical/outdoor, creative, linguistic/heuristic, emotional and creative, digital
3. The value of children's play
4. Children's play in diverse families and communities
5. Play and children with additional needs
6. Theoretical foundations of play
7. Play curriculum and pedagogy
8. The Early Years Learning Framework

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	45 minutes for each quiz	20	N	Individual
Critical Review	1,600 words (400 words for each reading)	40	N	Individual

Coordinator Terrence Wright (https://directory.westernsydney.edu.au/search/name/Terrence Wright/)

Student Contribution Band

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Restrictions

Students must be enrolled in 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the services available to schools from the community.
2. Explain the benefits of community involvement and service learning to schools, themselves and the community.
3. Liaise with their local school, community, community organizations and businesses.
4. Design and implement a small negotiated school-based project related to community involvement.

5. Create a multimodal and written project report with supporting evidence.
6. Identify the principles of self-evaluation and appraisal.
7. Critically evaluate and gauge their own progress and be capable of articulating how and in what ways they have developed.
8. Examine and demonstrate ethical considerations relating to teaching and the practice of research involving individuals from diverse groups.
9. Integrate and apply professional approaches while working in school and community settings including child protection obligations.

Subject Content

1. School - Aboriginal and Torres Strait Islander community links & projects.
2. Communities of practice within school settings that embrace support personnel from the extended community. Community engagement and establishing partnerships.
3. Understandings of agency settings specifically aimed at improving the educational outcomes for disadvantaged learners.
4. Issues faced by learners from diverse groups including those of Aboriginal and Torres Strait Islander backgrounds.
5. Understandings about reflective and reflexive practice.
6. The use of evidence-based strategies for appraising achievement and documenting experiences.
7. Collating and reporting in a professional learning portfolio.
8. Knowledge integration through theory, service learning experience and relevant policy and its application in school settings.
9. Knowledge construction and skill development related to civic engagement and people from a range of backgrounds.
10. Program development, application and evaluation for improving educational outcomes for individuals from diverse groups.
11. Ethics related to service learning, teaching practice and research.
12. Professional conduct and legal obligations in child protection

Special Requirements

Legislative pre-requisites

Students must have: Working with Children Check, Completion of Child Protection Training, Anaphylaxis certification.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

Presentation: Multimodal, oral and written project reflection	10 minute presentation	30	N	Individual
Report: Implementation and evaluation of negotiated community-school project	Plus 500 words reflection	30	N	Individual
Practical: Service Learning	5 days equivalent	S/U	Y	Individual

TEAC 2009 Contemporary Childhoods

Credit Points 10

Legacy Code 102048

Coordinator Katina Dimoulias (https://directory.westernsydney.edu.au/search/name/Katina Dimoulias/)

Description In this subject students will engage in an exploration of what it means to be a child in a postmodern world and how different theoretical approaches influence ways of understanding children's lives. Alongside questions of how gender, sexuality, ethnicity, 'race', language, class, ability and religion are constituted through a child's identity, students will explore the notion of a child's subjectivity. A child's subjectivity is the conscious and unconscious thoughts and emotions of the child, their sense of self, their body and their way of understanding their relationship to the world. Building on this knowledge, students will also explore the four key child-environment identities of the physical child, the social child, the learning child and the natural child and by analysing a variety of scholarly and non-scholarly texts around childhood, children's bodies and behaviour will reflect on a child's individuality and emerging identity. This subject is included in the Foundation Phase of the Bachelor of Education.

Level Undergraduate Level 2 subject

Equivalent Subjects TEAC 2012 - Contemporary Perspectives of Childhoods TEAC 2010 Contemporary Childhoods (WSTC)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Investigate diverse texts, images, practices and constructions of what it means to be a child in contemporary society.
2. Discuss the social meaning of childhood including the historical, social and political factors and how they have influenced changing views of children and childhood.
3. Explain how different theoretical perspectives have positioned children and childhood as a social construction.
4. Identify the ways in which gender, sexuality, ethnicity, 'race', language, class, ability and religion are constituted through a child's identity and the significance of this on everyday lived experiences.

5. Examine how social, institutional and cultural constructions of childhood play a role in shaping children's identities, subjectivities and everyday lives.
6. Examine the ways in which children negotiate and construct their identities in contexts of diversity and difference.
7. Describe how children's rights and responsibilities are enacted by children and adults.
8. Describe how child-environment identity is connected to place, space, location and time.

Subject Content

1. Who is, and what does it mean to be a child in a postmodern world?
2. Analysis of texts, images and constructions about 'the child'.
3. Introduction to contemporary national and international theories and philosophies related to the child.
4. Significance of gender, sexuality, ethnicity, 'race', language, class, ability and religion and how they are constituted through a child's identity and everyday lived experiences.
5. Questions of subjectivity and a child's sense of self, body, and relationship to the world.
6. Children's negotiation of identity and difference in a globalised world.
7. Rights and responsibilities of the child.
8. Child-environment identity and connections to place, space, location and time through encounters with tangible social-cultural artefacts such as toys, homes, landscapes, animals, digital technology.
9. Constructions of diversity and difference in education and community settings.

Assessment

TEAC 2011 Contemporary Issues in Aboriginal Education

Credit Points 10

Legacy Code 102121

Coordinator Zara Ruggero (https://directory.westernsydney.edu.au/search/name/Zara Ruggero/)

Description The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This subject is designed to meet the needs of teachers entering the profession who require in depth knowledge of the field which frames Australia's Aboriginal identity. It investigates both Aboriginal historical perspectives and interactions with educational institutions and the policies which frame the delivery of Aboriginal content and resources to all students. The subject provides a contextualised framework on which many Key learning area's perspectives and background knowledge delivery is based. The subject specifically relates to working successfully with Aboriginal children, families and communities in educational and social settings. It will examine relationships between Aboriginal and non-Aboriginal societies, social indicators and also critique the impacts of current policy changes in areas such as self-determination, representation, mutual obligation and perspectives for positive, respectful educational outcomes for future generations of students. This subject is included in the Foundation Phase of the Bachelor of Education.

Level Undergraduate Level 2 subject

Equivalent Subjects EDUC 1006 - Issues in Aboriginal Education

Restrictions

Students must be enrolled in 1717 - Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the origins, history and contemporary issues and initiatives of Aboriginal and Torres Strait Islander people.
2. Show respect for present and past Aboriginal and Torres Strait Islander cultures.
3. Describe Australia's history of 'settlement', colonisation, invasion and the development of sustainable futures for Aboriginal peoples.
4. Explain the importance of teaching Aboriginal Studies and cross curriculum perspectives in the context of Australia as a contributing nation to developing a global society.
5. Create appropriate Aboriginal Studies teaching and learning activities for HSIE and other curriculum areas in classrooms.
6. Evaluate appropriate Aboriginal and Torres Strait Islander Studies teaching resources and the importance of consultation with Indigenous communities.

Subject Content

1. Social systems and kinship; significance of country, language, cultural continuum
2. What are the historical understandings required in order to deliver strong Aboriginal perspectives in HSIE classrooms (Topics Pre-invasion' – kinship and social systems, significance of land, language, 'Post Invasion' –war, segregation, assimilation, self-determination, reconciliation, Stolen Generations, Aboriginal health, wellbeing and esteem issues, closing the GAP, Origin theories, Native Title, Mabo, Wik, Mutual Obligation, sovereignty)
3. Mutual Obligation, aspirations, sovereignty and future directions as evidence through the UN Declaration on the Rights of Indigenous people
4. What are Aboriginal people's relationship with the History of Aboriginal education in NSW and Aboriginal Education Policies
5. What are the currently available on-line resources to support curriculum delivery to Aboriginal students and Aboriginal communities
6. What are the models and programs to promote social inclusion for Aboriginal students and Aboriginal families

Assessment

TEAC 2013 Creative Arts

Credit Points 10

Legacy Code 102125

Coordinator Sarah Pacey (https://directory.westernsydney.edu.au/search/name/Sarah Pacey/)

Description The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This subject introduces students to theoretical models and sound pedagogical practices of using Music, Media Arts and Visual Arts in the primary classroom. Collaborative, experiential and blended learning as well as reflective practices are the key operating principles of the subject. Students will explore the theory and practice of the arts in the education process of children through practical and professional experiences. The subject provides an understanding of the importance of the art forms, both as powerful teaching and learning strategies across the primary curriculum and as creative arts in their own right in the K-2 classroom.

School Education

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Equivalent Subjects EDUC 2008 - Creative Arts 2

Restrictions

Students must be enrolled in 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Design, implement and evaluate lessons, in each art form, based on the Creative Arts syllabus and the relevant documents.
2. Explain the principles and practices of teaching, learning and assessing, Music, and the Visual Arts.
3. Exhibit practical skills, and broad, critical knowledge in the discrete forms of Dance, Drama, Music, Visual and Media Arts.
4. Apply different models of pedagogy for teaching and assessing Music, and Visual Arts.
5. Apply critical reflection to their own learning and practice within each of the art forms of Music, and Visual Arts.
6. Explain the nature and role of the creative arts in relation to current and emerging concepts and philosophies.
7. Identify and plan for Aboriginal perspectives embedded in the new NSW Creative Arts syllabus for the Australian Curriculum.

Subject Content

1. Broad and critical knowledge and understandings of the theory, principles and practices related to Dance, Drama, Music, Media Arts and Visual Arts and in the integration of these art forms.
2. Curriculum concepts, strategies and content in Dance (performing and composing), Music (singing, playing and moving, and organising sound), and Visual Arts (2D, 3D/4D, and art history), and in the integration of these subjects across the arts and across the curriculum, including Literacy and Aboriginal and Torres Strait Islander perspectives.
3. Designing, making and appreciating in each of the art forms, based on the NSW Creative Arts K-6 syllabus/Australian Arts Curriculum with a focus on K-2.
4. Effective classroom management and teaching strategies for teaching and learning in the Creative Arts.
5. Planning an integrated creative arts program to include all five art forms, based on relevant literature and pedagogies within a primary classroom.
6. Range of strategies for teaching, reflecting on and assessing in the Creative Arts.
7. Workstations in the primary Creative Arts program

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are

TEAC 2014 Cultural Diversity, Society and Learning

Credit Points 10

Legacy Code 102120

Coordinator Sarah Pacey (https://directory.westernsydney.edu.au/search/name/Sarah Pacey/)

Description The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. Teachers are required to understand the diverse cultural make up of schools and how to teach a diverse range of children. Using sociological and cultural theory, the subject examines conservative, liberal and radical approaches to cultural diversity in education. This cultural diversity includes dimensions of gender, religion, ethnicity, race, class, language and sexuality. The subject develops cultural literacy through the application of various theories such as Marxist and feminist-post structuralist analysis of these social relations to cultural diversity; pedagogy and cyberspace. Within this framework it is also essential that teachers engage with and understand the diversity and fluidity of individuals and the broader Australian community in order to promote equitable practices in schooling and to facilitate educational and professional transformation. Developing understandings of society, culture and the formation of subjectivities will promote an enhanced awareness of equity issues as well as crucial analytical and critical tools to address the needs of diverse students, their families, teachers, and the broader school community.

Level Undergraduate Level 2 subject

Equivalent Subjects EDUC 1001 - Cultural Diversity Society and Learning

Restrictions

Students must be enrolled in 1717 - Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explore the relationships between Social Identities, institutional power and discourses in a variety of political contexts through sociological frameworks;
2. Examine the historical, social and political circumstances which have shaped postcolonial Australian identities;
3. Evaluate different ways that individual subjectivities are socially constructed within sociocultural and educational contexts;
4. Examine the changing nature and role of family and family diversity and how educators can help sustain the capacity of families, communities and the school to engage all students.
5. Identify complexities within the construction of conformity and non-conformity in school sociocultural contexts related to age, gender, sexuality, 'race', class, ethnicity, ability, language and religion;
6. Examine relevant policies and legislative requirements related to rights and responsibilities of students, parents, other community members and teachers in relation to cultures of schools and the effects on learning.
7. Evaluate key representations of identities and cultural groups in popular culture, with a particular focus on the popular media, e.g. television, games, internet sites, using different theoretical lenses.

Subject Content

1. Key sociological concepts and their relationship to education including but not limited to: culture; 'Whiteness'; White privilege; subjectivity; discourse; power; knowledge; discipline; embodiment; surveillance; silence; normalisation; punishment; habitus; capital; field.
2. Policy and legislation pertaining to school-based issues regarding access and equity.
3. Discrimination, prejudice and privilege; bullying, cyber bullying, violence and its manifestation in educational contexts.
4. Social construction of childhood and family. Political, economic and social policy perspectives. Contemporary debates.
5. Theories of diversity and difference.
6. Understanding culture as constituted in class, ethnicity, racialization, gender and sexualities.
7. Aboriginal and Torres Strait Islander heritage and cultural practices and their links to the educational outcomes of Aboriginal and Torres Strait Islander learners.
8. Site of analysis – cultural diversity, pedagogy and cyberspace
9. Critical reading of academic texts and oral presentation skills.

Level Undergraduate Level 2 subject

Equivalent Subjects LGYA 0317 - Diversity and Difference 2 Understanding the 'Self' in Socio-Cultural Contexts

Learning Outcomes

After successful completion of this Unit, students will be able to:

1. Understand the social construction of gender, sexuality, ‘race’, ethnicity, language, age, ability, religion and class;
2. Critique processes of power in sociocultural, historical and political contexts through feminist poststructuralism, critical, cultural and post-colonial frameworks;
3. Recognise the historical, social and political circumstances which have shaped postcolonial Australian identities;
4. Explain how subjectivity, identity, knowledge, and power operate in contexts of equity, diversity and difference;
5. Analyse the different ways that individual subjectivities are socially constructed within socio-cultural and educational contexts;
6. Articulate the relationships and intersections between social identities, institutional power and discourses;
7. Analyse the construction of ‘difference’ and ‘deviance’ and processes of ‘othering and marginalisation in sociocultural contexts related to age, gender, sexuality, ‘race’, class, ethnicity, ability, language and religion;
8. Identify the implications of equity and social justice issues for children, families and staff in early childhood settings and schools from minority communities.

Subject Content

1. Feminist poststructuralism, cultural, critical and queer theory, concepts of nomalisation and post-colonial perspectives
2. Cultural capital and relations of power in macro and micro contexts
3. Discourse
4. Language, knowledge and discourse
5. Subjectivity and identity
6. Agency and subjectivity
7. Relationships and intersections between social identities, institutional power and discourses
8. The construction of difference, deviance and innocence in the construction of social identities
9. Processes of othering and marginalization in discursive and institutional contexts
10. Equity and social justice for children, families and staff from minority communities

Assessment

TEAC 2017 Education and Transformation

Credit Points 10

Legacy Code 101263

Coordinator Michele Simons (https://directory.westernsydney.edu.au/search/name/Michele Simons/)

Description This subject provides opportunities for students to examine theories and practices associated with Transformative Learning in relation to their personal development as educators. Transformative Learning is learning that is empowering, deep and life changing. It and similar ways of approaching learning - the holistic, ecological and systemic - share a reflective base. All are inquiries into the relationships that make learning work. Students investigate these as theoretical and practical approaches to learning in real world settings: as powerful educational feedback systems. This subject combines the design and practical enactment of theoretically grounded approaches to socially relevant and personally meaningful learning.

School Education

Discipline Teacher Education

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain transformative learning theory through reference to key writers in the field;
2. Analyse transformative learning theory through reference to personal learning experiences;
3. Apply transformative learning principles to the design of teaching and learning activities;
4. Articulate an understanding of the relationship between transformative, holistic, ecological and systemic perspectives;
5. Evaluate personal participation, reflection and vulnerability in transformative learning systems;
6. Synthesise the process and outcomes of a transformative learning initiative in the university class context.

Subject Content

1. Theoretical models of transformative learning and variations in emphasis developed by key writers in the field;
2. Relationships between transformative learning and holistic, ecological, systemic models and critiques;
3. The transformative perspective in teaching and learning: transmission, transaction and transformation in educational practice;
4. Transformative Learning and vulnerability: emotion and sensitivity in learning about and designing educational futures;
5. Participation, reflection, transformation and the systemic perspective in progressive social change and cultural development;
6. Case studies of transformative, holistic and ecological initiatives in education and social change.

TEAC 2018 Education for Sustainability

Credit Points 10

Legacy Code 101663

Coordinator Annette Sartor (https://directory.westernsydney.edu.au/search/name/Annette Sartor/)

Description Increasingly, the need to develop sustainable ways of living that can reduce our ecological footprint and conserve precious natural resources for future generations is recognised as a critical concern of education at all levels. Developing 'sustainability literacy' requires new ways of thinking and learning that enable us to recognise the connections between environmental concerns, social patterns and individual actions. This subject approaches key issues in sustainability education with a learner-centred approach that builds skills for inquiry, analysis and creative action and involves a three-hour field trip. It promotes personal and social change, develops civic values and empowers learners to be leaders for a sustainable future. This subject is included in the Foundation Phase of the Bachelor of Education.

School Education

Discipline Teacher Education

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Articulate a critical understanding of the concept of sustainability
2. Describe the ways that living systems exist and interact
3. Identify major sustainability concerns, what contributes to them and ways to address them
4. Analyse the production-consumption-disposal cycle of a selected consumable and associated sustainability impacts
5. Identify actions required for promoting sustainability at the personal, local, national and global levels
6. Evaluate the role of values, action, creativity and collaboration in education for sustainability
7. Design, conduct and evaluate a sustainability education initiative.

Subject Content

1. Sustainability as a concept and a value system
2. Transformative education for promoting sustainability
3. Systems thinking and systems mapping

4. Ecological footprints - resources, consumption and carrying capacity
5. Environmental impacts - climate, biodiversity, social justice
6. Getting active - personal and community action for sustainability
7. Sustainability, economics and geopolitics
8. The Sustainable Development Goals

TEAC 2020 Educational Psychology for Teaching Children

Credit Points 10

Legacy Code 102126

Coordinator Milena Ilisevic (https://directory.westernsydney.edu.au/search/name/Milena Ilisevic/)

Description The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. Responsive teaching engages students holistically in learning that is tailored to meet their physical, cognitive, social, emotional and developmental needs. This subject will consider the learning needs and styles of primary children, including Indigenous children. It will introduce key approaches to instruction based on theories and research in educational psychology. A particular focus will be the development of children's sense of self and the ways that children's school experiences interact with cultural and familial influences to shape identity, motivation and engagement throughout the primary years. Particular emphasis is given to developing responsive teaching practices which promote social and emotional wellbeing of children and are underpinned by high-quality relationships which extend to include the valuing of families and the wider community.

School Education

Discipline Teacher Education: Primary

Level Undergraduate Level 2 subject

Equivalent Subjects EDUC 2002 - Educational Psychology for Primary Teaching

Restrictions

Students must be enrolled in 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe children's physical, cognitive, social and emotional development and ways that teachers can respond to different learning styles and needs.
2. Apply theoretical understandings from educational psychology to constructing responsive learning environments for primary children, including Indigenous children.
3. Explain how children's sense of self develops in the context of socio-cultural, familial and school influences, with particular attention to the impacts on school motivation and engagement.
4. Apply cooperative group learning structures to address teaching and learning goals.
5. Apply appropriate and effective practices to promote positive behaviour and student wellbeing.
6. Utilise strategies for building rapport with primary students & responding to a range of student wellbeing needs including communication with parents, guardians and caregivers.

Subject Content

1. Development in context: Bronfenbrenner's ecological model
2. Learning, cognition and memory: Learning as a constructive process
   - Information processing theories
   - Metacognition and self-regulation
3. Learning in context: Theories of learning and their implications for instruction and constructing learning environments

- Behaviourism
- Social cognitive theory
- Constructivism
- Humanism
- Instructional strategies applied to learning in context
- Motivation and affect
- Learning and teaching preferences for Aboriginal and Torres Strait Islander peoples

4. Children's development and related needs in context:
   - Cognitive, physiological, and social/affective development
   - Moral and prosocial development
   - Identity development and dispositions
   - Sense of self and peer relations
   - Aboriginal and Torres Strait Islander development in context
5. Positive learning environments and supporting children's wellbeing
   - Sociocultural factors influencing mental health and wellbeing of children
   - Risk and resilience
   - Belonging and inclusion
   - Cultivating high-quality respectful relationships
   - Initiatives and resources for promoting positive development
6. Issues and prevalence of mental health for Aboriginal and Torres Strait Islander peoples

TEAC 2021 Early Childhood Curriculum and Pedagogy

Credit Points 10

Legacy Code 102674

Coordinator Denise Fraser (https://directory.westernsydney.edu.au/search/name/Denise Fraser/)

Description This subject supports a developing understanding of the principles and practices of early childhood curriculum and pedagogy. A range of approaches to curriculum and pedagogy will also be examined. Students will learn about approaches to observing and documenting children's learning in ways that celebrate children's competencies and build connections between children, families and educators while also identifying any areas where children's experiences may be extended. Students will develop strategies for planning and connecting curriculum to children's social worlds which facilitate children's in-depth investigations and critical thinking in ways that cater for diverse interests. This subject is included in the Development Phase of the Bachelor of Education.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Restrictions

Students must be enrolled in 1926 Bachelor of Education (Early Childhood) and have completed 80 credit points to enrol in this subject.

Learning Outcomes

1. Explain the theoretical bases of learning, development and play.
2. Critically analyse a range of curriculum approaches and pedagogies.
3. Discuss the influence of different contexts on curriculum and pedagogies.
4. Observe, document and assess children's interests, funds of knowledge, learning, development and play.
5. Create learning experiences that engage children and support investigation, critical thinking and problem solving.
6. Critique strategies for engaging children from diverse communities, including Aboriginal and Torres Strait Islander backgrounds, as competent and capable learners.

Subject Content

1. Theoretical underpinnings of early childhood curriculum - theories of learning, development, and motivation, play based pedagogy
2. Approaches to Curriculum: Child centred curriculum - Inquiry Based Learning, Emergent Curriculum, Project approach, Reggio approach
3. Observation, documentation, assessment and planning
4. Strategies to engage diverse learners; investigating, inquiry learning, questioning, facilitating, sustained shared thinking, deep thinking, sensory play with children aged 0-2
5. Using questioning to facilitate thinking across the curriculum (mathematical thinking, scientific thinking, critical thinking, creative thinking, problem solving, cooperative thinking)
6. Reflective thinking on engaging children

Assessment

TEAC 2023 Engaging in Early Childhood Education

Credit Points 10

Legacy Code 102673

Coordinator Jane Athota (https://directory.westernsydney.edu.au/search/name/Jane Athota/)

Description This subject incorporates 20 days of professional experience in an early childhood setting. Prior to external practicum work, students engage in intensive on campus coursework. The fieldwork introduces students to work in early childhood contexts while the coursework prompts students to reflect on the nature of early childhood teaching, their role as teachers in teaching and learning, the frameworks that guide practice and contemporary issues related to teaching young children. Students also apply skills in observation-based assessment of children's interests, development, dispositions and learning, explore curriculum decision making based on their assessments of learning and development and other strategies to facilitate children's engagement, learning and development. Students will immerse themselves in the setting and demonstrate capacity to work effectively with children Birth – 5 years. This subject is included in the Development Phase of the Bachelor of Education.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Restrictions

Students must be enrolled in 1926 Bachelor of Education (Early Childhood),1929 Bachelor of Arts (Pathway to Teaching Early Childhood/Primary) or 6048 Diploma in Arts/Bachelor of Arts (Pathway to Teaching Early Childhood/Primary). Students must have completed 80 credit points to enrol in this subject.

Learning Outcomes

1. Describe the relationships between elements of the National Quality Framework.
2. Articulate the implications of positioning children as active social agents for teaching and learning.
3. Interact with children in ways that support children's sense of identity and wellbeing , build relationships and extend learning
4. Apply understanding of health, safety and nutrition practices in work with children
5. Assess and document children's interests, development, dispositions and learning using a range of techniques consistent with the outcomes of the Early Years Learning Framework.
6. Design learning experiences that promote engagement and reflect children's interests, development and funds of knowledge.
7. Demonstrate initiative, responsibility, professional communication skills and ethical practice, as an educator.

Subject Content

Module 1

- Policy frameworks guiding the work of teachers
- Children's rights as learners

Module 2

- Curriculum decision making
- Teaching for learning through play

Module 3

- Partnering with families
- Education, care, safety and wellbeing

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject:

1. Students are required to complete the Working with Children Check (WWCC) process leading to the issuance of a clearance number under the category of volunteer.
a) Students will need to:
i. Access the Commission for Children and Young People website and complete an online application form to generate an application number.

ii. Present an application number and identification to a Service NSW office who will issue a Working with Children Check number via mail or email.
iii. Submit the letter with a valid Working With Children Check number via WesternNow Student Portal. The document is trimmed and recorded as a Special Requirement on your academic record.
WesternNow Student Portal link

2. Students must complete the two components of the NSW Department of Education's Child Protection Awareness Training (CPAT)
a) Students will need to:
i. Access the NSW Department of Education's MyPL website https://mypl.education.nsw.gov.au/
ii. Complete the online Child Protection Awareness Training: Induction
iii. Save certificate of completion
iv. Submit certificate via WesternNow Student Portal
b) Students will need to:
i. Access the NSW Department of Education's MyPL website https://mypl.education.nsw.gov.au/
ii. Complete the Child Protection Awareness Training (CPAT): Annual Update for the calendar year
iii. Save certificate of completion
iv. Submit certificate via WesternNow Student Portal
Both certificates will be recorded on your student record as Special Requirements with the end date for the Annual CPAT recorded. The CPAT: Annual Update will need to be renewed and submitted on an annual basis.
Students who have not completed both components of the Child Protection Awareness Training will need to withdraw from the subject.

3. Students must complete the ASCIA anaphylaxis e-training and submit their certificate to Submit certificate via WesternNow Student Portal.

4. Students must meet the Inherent Requirements for the Master of Teaching (Birth – 5 Years / Birth -12 Years)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Professional Task	1,000 words	20	N	Individual
Professional Task	1,200 words	40	Y	Individual
Presentation	18 slides	40	N	Individual

TEAC 2024 Engaging with Children, Families, Colleagues and Communities

Credit Points 10

Legacy Code 102645

Coordinator Deborah Bennetts (https://directory.westernsydney.edu.au/search/name/Deborah Bennetts/)

Description This subject explores the importance of engaging with children, families, colleagues and communities of diverse backgrounds to foster a child's learning, health and well-being. Preservice educators will reflect on complex interrelationships between theories, research, policies and practices and the importance of positive relationships and partnerships with children, families, colleagues, and communities. Students will explore discourses associated with disadvantage through the analysis of children's life experiences and contexts.
In this way, preservice educators will gain an understanding of the nuances of working collaboratively and in partnership with children, families, colleagues, and communities, including strategies to work ethically, sensitively and confidentially. This subject is included in the Development Phase of the Bachelor of Education.

School Education

Discipline Teacher Education, Not Elsewhere Classified.

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Restrictions

Students must be enrolled in 1876 B Education (Primary) or 1926 Bachelor of Education (Early Childhood) and have successfully completed 40 credit points to enrol in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate understanding of children and families within an ecological context and the influence on learning, health and well-being;
2. Discuss the complex interrelationships between learning, children, family, community contexts and policies;
3. Reflect on theoretical principles and current research on changing practices of collaborating with children, families, colleagues and communities, and specialist professionals, including community liaison officers;
4. Evaluate the application of a broad a range of strategies to effectively partner with children, families, colleagues and community in learning contexts;
5. Reflect on ethical, sensitive and confidential approaches to working collaboratively;
6. Analyse contemporary approaches to strengthen engaging with children, families, colleagues and community;
7. Work collaboratively to design a responsive community program that enhances outcomes for children, families and communities.

Subject Content

- Theories, principles, practices and Philosophical frameworks that inform partnerships with children, families of diverse backgrounds and communities
- Role of teachers in developing strategies for strengthening relationships with children, family, colleagues and community
- Aboriginal and Torres Strait Islander and culturally and Linguistically diverse backgrounds
- Ecological contexts and their influence on learning, health and well-being
- Polices and frameworks relevant to children, family, colleagues and community engagement
- Strategies and Ethical approaches to effectively collaborate with children, family, colleagues and community
- Engagement with children, family, colleagues and community

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Annotated Bibliography	400 words	10	N	Individual
Case Study	1000 words	40	N	Individual
Report	1600 words	50	N	Individual

TEAC 2025 English Language Analysis

Credit Points 10

Legacy Code 102439

Coordinator David McInnes (https://directory.westernsydney.edu.au/search/name/David McInnes/)

Description In this subject, students will develop a thorough understanding of the structure of English and the use of English across contexts. Students will study the workings of the English language, including its sounds, grammar, syntax and textual forms, through the analysis of diverse texts. The skills developed through the analysis of real-world texts throughout the subject will prepare students for effective participation in a range of personal and professional contexts, enhancing their capacity for study and for employment.

School Humanities & Comm Arts

Discipline English as a Second Language Teaching

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the grammatical structures of English at the word, phrase, clause and sentence level.
2. Apply grammatical analyses to real world contexts.
3. Explain how context impacts the use of English.
4. Prepare and write a report on the analysis of extended textual samples.
5. Critically consider the role language plays in effective communication.

Subject Content

English sounds, words and grammar.
The analysis of phrases, clauses, sentences and texts.
Semantics and pragmatics.
Cohesion and coherence.
Texts and genres in context.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Discourse Analysis	40 minutes each	60	N	Individual
Short Answer	100 words each	40	N	Individual

TEAC 2026 Ethical Practice

Legacy Code 102668

Coordinator Denise Fraser (https://directory.westernsydney.edu.au/search/name/Denise Fraser/)

Student Contribution Band

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Restrictions

Students must be enrolled in 1879 Bachelor of Education (Birth – 5 Years).

Learning Outcomes

1. Explain what it means to be a professional.
2. Reflect on the interrelationship between personal and professional values.

3. Examine the application and implications of traditional and contemporary ethical frameworks and tools that support wise professional practice.
4. Apply policy, legislation, codes of practice and ethics in professional contexts.
5. Analyse the embedded ethical and political dimensions of contemporary issues in early childhood policy and practice.
6. Discuss processes for promoting ethically informed advocacy, activism, transformation and change.

Subject Content

1. Professions and Professionalism
2. Morals, values and ethics
3. Contemporary and traditional ethical frameworks
4. Decision making tools and theories
5. Policy, legislation, codes of conduct and ethics, particularly the Early Childhood Australia's Code of Ethics
6. Agency, citizenship and democracy
7. Advocacy and activism

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Reflective Essay	1,200 words	40	N	Individual
Presentation	8 minutes with a maximum of 10 slides	40	N	Individual
Debate	Ongoing over the trimester	20	N	Individual

TEAC 2029 Fundamentals for Working Mathematically

Credit Points 10

Legacy Code 102208

Coordinator John Ley (https://directory.westernsydney.edu.au/search/name/John Ley/)

Description In this subject students will acquire a variety of problem solving, investigation and mathematical modelling techniques that incorporate the application of algebra and highlight the importance of understanding probability, data and graphical representations in real life. Students will apply mathematics in real contexts; evaluate data gathered in real time and identify patterns while engaging with the concepts of number, probability, measurement, problem solving, linear and exponential representations. Engagement with this subject contributes directly to the achievement of a sound understanding and application of mathematical concepts and develops mathematical thinking.

School Education

Discipline Teacher Education

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Equivalent Subjects TEAC 2042 - Mathematics Principles and Applications

Restrictions

Successful completion of 40 credit points at Level 1.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the occurrence of algebraic patterns and relationships in real life contexts;
2. Use deductive reasoning to justify and support conclusions that are appropriate to the context;
3. Analyse the relationships between data and graphical representations and evaluate their validity;
4. Demonstrate research strategies as part of the investigation process and apply them in an appropriate manner to real life data;
5. Demonstrate the development of mathematical thinking by identifying ways to extend mathematical concepts;
6. Demonstrate the relationships between functions and graphical representations;
7. Apply fundamental concepts of problem solving and mathematical modelling;
8. Apply knowledge of problem solving and the modelling process in variety of mathematical applications.

Subject Content

1. Algebraic reasoning and application (Reasoning, Communication Fluency, Problem Solving)
- Basic concepts, principles and relationships
- application of algebraic techniques in Problem solving
- links between graphical representation and linear and exponential functions
2. Statistical representations (Communication, Reasoning, Fluency)
- patterns and relationships in real life data including proportional representation
- analysis of graphical representations including misrepresentations
- Basic concepts and principles of graphical representations
3. Mathematical Problem Solving and Modelling (Problem Solving, Communicating, Reasoning, Understanding, Fluency)
- Basic concepts and principles of Problem solving and investigations
- mathematical modelling as structured Problem solving
- Working mathematically through communication of reasoning
4. Mathematical Applications including modelling techniques (Understanding, Fluency, Reasoning)
- common everyday applications including financial literacy
- use of Technology for mathematical modelling
- Investigate The principles of probability and their applications

TEAC 2030 Health and Physical Education

Credit Points 10

Legacy Code 102124

Coordinator Zara Ruggero (https://directory.westernsydney.edu.au/search/name/Zara Ruggero/)

Description The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. Students will work on developing their knowledge and understanding of Health and Physical Education (HPE). This subject is designed to introduce the NSW Syllabus for the Australian Curriculum: Personal Development, Health and Physical Education K-10 (incorporating Health and Physical Education K-6). Through an examination of the syllabus, modules and support documents, students will develop the necessary skills to design an effective scope and sequence for K-6 Health and Physical Education (HPE) and develop a program of work suitable for a specific stage of learner K-2. Assessment and evaluation will be addressed and the need to develop descriptive student profiles relating to student achievement of outcomes will be highlighted.

School Education

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Equivalent Subjects EDUC 2005 - Personal Development Health and Physical Education 1 (AREP)

Restrictions

Students must be enrolled in 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the central concepts, modes of enquiry and structure of H and PE, including recent theory and practice, and Aboriginal content embedded in H and PE Syllabus.
2. Explain the nature and role of H and PE as a discipline for supporting the development of health and wellbeing.
3. Demonstrate competence in fundamental movement skills through areas such as dance, gymnastics, games and sports and a range of physical activities.
4. Apply understandings of assessment and children's learning within the H and PE K-6 key learning area with a focus on K-2.
5. Utilise a variety of teaching, behaviour and organisational management strategies to cater for the range of diverse learners.
6. Design and implement programs, lessons and scope and sequence, using knowledge of the NSW syllabuses or other curriculum requirements
7. Explain the role and value of H and PE in the broader school curriculum.
8. Select and utilise an array of resources designed to meet the needs of diverse K-2 students in the H and PE K-6 including Aboriginal and Torres Strait Islander content and catering for students with special needs.

Subject Content

1. Active Lifestyle - Ways to be physically active, class games, forming groups, instructing, demonstrating, correcting technique, providing feedback, competition & cooperation, teaching & coaching, safety, learning types, etc. Obstacle courses, Ball games, Circuits / Tabloids, Partner Activities, Effects of physical activity.
2. Games and Sports - Fundamental Movement Skills & motor development, learning stages, Invasion Games, Game Sense, Primary Schools sports program– Striking games, Net/Wall/Court games, modified games.
3. Safe Living: Strategies for keeping safe, including Road Safety Unit.
4. Programming and Planning in Primary Classrooms
5. Assessment - assessing students' health and well-being; assessment tools; assessing risk, and risk management practices in the Health and Physical Education (H and PE) space.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

TEAC 2031 History, Geography, Civics and Citizenship

Credit Points 10

Legacy Code 102122

Coordinator Suzanne Kenney (https://directory.westernsydney.edu.au/search/name/Suzanne Kenney/)

Description The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This subject provides opportunities for students to develop knowledge of the outcomes, subject matter, pedagogies and experiences that define the key learning area of History, Geography, Civics and Citizenship (HSIE). Key concepts of change in family history, local history, and Australia's history and understanding Australia as a Nation are explored. In Geography, concepts that develop a sense of curiosity about environments, peoples, cultures and place, in both Australia and the world, are a priority. In Civics and Citizenship, the focus is on relationships between the individual and the state, and the values and mutual responsibilities and obligations for civil, political and social participation in Australian society. It enables students to develop their own content knowledge and understandings, skills and dispositions necessary for planning, programming and teaching HSIE K-6. It promotes teaching strategies that prepare primary children for informed and effective citizenship, contributing to the quality of their society and environments.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects EDUC 2003 - Human Society and Its Environment (AREP)

Restrictions

Students must be enrolled in 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply knowledge of the disciplines, theories and pedagogies that underpin the learning area of HSIE K-6 to learning design.
2. Explain the aim, outcomes, stage statements, subject matter, skills, attitudes and values, perspectives and experiences defined in the NSW HSIE K-6 syllabus, and History, Geography and Civics and Citizenship syllabus documents in designing learning experiences for diverse learners in primary classrooms.
3. Design HSIE lesson sequences, programs, scope and sequence and assessment items using knowledge syllabuses and other curriculum requirements.
4. Identify and apply to lessons Aboriginal perspectives embedded in the HSIE K-6 syllabus.
5. Use assessment strategies to assess children's learning within the HSIE K-6 key learning area.
6. Explain the role and value of HSIE K-6 in the broader school curriculum and the relationship between HSIE K-6, and the general capabilities.
7. Select and utilise an array of resources that cater to the needs of diverse K-6 students in HSIE K-6 including students with special needs.

Subject Content

1. The discipline, epistemological and pedagogical theories that underpin HSIE in terms of History, Geography and Civics and Citizenship K-6.
2. Nature and role of human society and its environment in relation to current and emerging concepts of change and continuity, cultures, environments, social systems and structures
3. History with a focus on Australia?fs history and understanding Australia as a nation, incorporating personal, local, national and global concepts, integration

TEAC 2032 Inclusive Education Practices

Credit Points 10

Legacy Code 102130

Coordinator Maree Skillen (https://directory.westernsydney.edu.au/search/name/Maree Skillen/)

Description The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. Teacher education students develop understanding and skills that enable them to understand and assess the intellectual, emotional, social and physical needs of all children in the classroom. This subject assists teacher education students to develop appropriate skills, attitudes and methodologies to enable them to plan, implement and evaluate programs which meet the educational needs of individual children with disabilities, learning difficulties and/or behaviour disorders as well as those who are gifted and talented. This subject also explores strategies and theoretical approaches which promote and enable inclusion and effective learning within the context of National and State policy and legislation.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Equivalent Subjects EDUC 2011 - Inclusive Education Practices - AREP

Restrictions

Students must be enrolled in 1717 - Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply theoretical understandings in special education and behaviour management to the construction of supportive and inclusive learning environments.
2. Design and implement individualised programs for learning and intervention based on sound understanding of theory and research-based strategies.
3. Apply theories of development, learning and behaviour to construct educational programs that meet the diverse needs of students with disabilities, learning difficulties and those who are gifted and talented.
4. Plan effectively for a diverse range of learners and use a variety of learning and teaching strategies to engage learners and maximise their potential.
5. Demonstrate appropriate and sensitive attitudes and practices in interactions with students with special education needs.
6. Plan programs and approaches which, whilst meeting the student's learning needs also acknowledge their culture and background.
7. Utilise practical approaches for promoting positive behaviour and supporting student engagement whilst maintaining effective both ways dialogues with parents and caregivers.

Subject Content

1. Policy and legislation to support inclusion, such as the Disability Standards for Education (2005) and the Disability Discrimination Act.
2. Systems and services to effectively support students with diverse learning needs.
3. Theory, research and practice in relation to the establishment and maintenance of inclusive classrooms to meet the diverse psychological, emotional and cognitive needs of learners.
4. Identification and documentation of individual behaviour and academic needs incorporating curriculumbased assessment for learning.
5. Design and implementation of individualised educational and behaviour management programs to meet specific individual and special needs.
6. Working in collaboration with families and multidisciplinary teams.
7. Diversity within and between families respecting family values and beliefs; and structured behaviour management strategies and processes for inclusion.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 2033 Indigenous Landscapes and Sustainability

Credit Points 10

Legacy Code 102133

Coordinator Zara Ruggero (https://directory.westernsydney.edu.au/search/name/Zara Ruggero/)

Description The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. The subject explores how Aboriginal ways of knowing country, and how tacit Aboriginal cultural knowledge embeds many of the principles of sustainability. Country defines First Nations people's identity and spirituality globally. The subject provides opportunity of the exploration and development of self and identity in terms of traditional stewardship practices that underpin the practice and principles related to the maintenance of place/country, language, spirituality. The subject builds awareness and understanding about Aboriginal 'ways of knowing' and 'caring' for Country. The subject provides community engagement opportunities for the exploration of oral traditions, language, writings about nurturing, visiting, talking, singing and feeling 'sorry' for Country. It will design a framework whereby as future educators they will be able to use an ecological

approach to their teaching of significant global issues such as: sustainable land and energy use, the impact of human society on land and land management, global warming, the concept of self-sustaining systems and valuing sustainable patterns of living. The subject requires students to undertake visits to Environmental Field Studies Centres, the UWS Sustainability Subject and local cultural learning centres to work with Elders. This subject is included in the Development Phase of the Bachelor of Education.

School Education

Discipline Teacher Education: Primary

Level Undergraduate Level 2 subject

Equivalent Subjects EDUC 2010 - Human Society and Its Environment 2

Restrictions

Students must be enrolled in 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and outline the features of 'knowing country', culture and place for Aboriginal and Torres Strait Islanders and the traditional of stewardship in communities
2. Describe Aboriginal people's stewardship models in the broader understandings required to support more sustainable patterns of living (consideration of environmental, social, cultural and economic systems and their interdependence).
3. Demonstrate knowledge and understanding of sustainability in the developing world and the responses to the challenges of living in them
4. Assess and develop knowledge of appropriate resources, information and communication technologies, from a range of field and sites visits.
5. Analyse the impact of politics and economics of environmental sustainability on Indigenous people at the global level.

Subject Content

1. Spiritualities and the concept of Country, locally and globally using case studies of First Nations Communities
2. Indigenous people's stewardship models
3. The concept of sustainability
4. The integration of Indigenous landscapes and sustainability as expressed through community, global and political forums
5. Inquiry approaches to learning, development of cultural knowledge systems related to nature and the environment.
6. The politics and economics of environment and Indigenous people's sustainability
7. Environmental field study centres, cultural centres, museums, galleries and other learning centres.
8. Knowledge- who owns 'Aboriginal knowledge'? Keeping knowledge safe, intellectual cultural property, policies and international law.

Assessment

Discipline English as a Second Language Teaching

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. demonstrate understanding of key terms in language assessment and testing
2. identify and discuss various issues in language skills assessment and testing
3. use different and appropriate techniques and methods in language assessment and testing
4. design and develop valid and reliable language skills tests
5. demonstrate understanding of language assessment feedback and improve testing methods
6. apply language assessment and skills testing in specific educational contexts

Subject Content

Purposes of language assessment and testing
Properties of language assessment (validity and reliability)
Current second language proficiency assessment and issues
Methods for language assessment and skills testing with reference to learner profiling and curriculum design
Language assessment and test design and development with consideration of diverse education systems
Development of valid and reliable international standardised tests
Language assessment feedback and analysis for improving teaching and learning outcomes

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Critical Review	2000 words	40	N	Individual
Report	2500 words	40	N	Individual
Presentation	10 minutes	20	N	Both (Individual & Group)

Coordinator Shirley Gilbert (https://directory.westernsydney.edu.au/search/name/Shirley Gilbert/)

Student Contribution Band

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Restrictions

Students must be enrolled in 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply knowledge and skills of advanced pedagogies in curricula and reflect on and critique these in practice;
2. Describe the content of different curricula and appreciate ways in which content links can enhance children's depth of learning;
3. Plan appropriately for Indigenous and

Subject Content

1. Learning Futures and critiquing pedagogies in curricula.
2. Investigation of the subject matter across a range of curriculum areas with focus on environment and life sciences.
3. Ethical and citizenship dimensions of teaching and learning.
4. Practising and critiquing pedagogies in different curricula including Science, HSIE, English, etc. -relationships between curricula, literacy and numeracy.
5. Integrated programming and whole school planning, including emphasis on outcomes approaches and Science, Technology and Society approaches.
6. COGS units, story path units and other ways of integrating History and Geography with other curricula.
7. Contexts and resources for teaching and learning, including Indigenous education, field site visits, and the use of ICTs.
8. Whole school events and programs that enhance student learning in a range of curriculum areas.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Report: Investigation Report and Presentation	1,500 words Plus 10-15 minute presentation	50	N	Individual
Report: Curriculum Integration Unit	2,000 words	50	N	Individual

TEAC 2037 Learning and Creativity

Credit Points 10

Legacy Code 101259

Coordinator Karin Louise (https://directory.westernsydney.edu.au/search/name/Karin Louise/)

Description This subject examines the inter-related processes of learning and creativity and the application and practice of these in all aspects of life. Learning and Creativity is contextual. This context is personal, social, cultural and environmental. The subject content is critically positioned within diverse theories, with an emphasis on experiential learning and ongoing critical reflection. The subject promotes understanding of feeling and experience as much as concepts and ideas. It emphasises the tools and skills of learning, the everyday nature of creativity and enables students to develop and apply their creativity. It is designed for students interested in personal, community and cultural development, in the context of far reaching change.

School Education

Discipline Teacher Education

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and discuss the multiplicity of personal and social factors that contribute to learning and creativity using social ecology understandings;
2. Examine theory and examples from personal experience to the construction of learning and creativity and the contextual factors that determine this;
3. Apply key aspects of the creative process to learning styles and pedagogy;
4. Critically analyse the relationship between learning and creativity;
5. Document learning contained in works of personal creative expression;
6. Communicate understanding of the learning processes using creative arts;
7. Critically analyse the learning contained in creative representations

Subject Content

1. Personal and community stories of learning and creating,
2. Power and learning: discourses, language and learning;
3. Learning, creativity and emotion;
4. Learning and power: resisting discourses; creativity in the margins
5. Learning, creativity and movement: the body as a learning system;
6. Learning, creativity and change with reference to performance theories;
7. Learning and ecological processes: ecology as a way of meaning making
8. Multiple epistemologies: learning through nature

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Applied Project	2 hours participation at event/3 min individual summary	40	N	Group/ Individual
Reflection	1000 words	20	N	Individual
Essay	1500 words	40	N	Individual

Coordinator Annette Sartor (https://directory.westernsydney.edu.au/search/name/Annette Sartor/)

Student Contribution Band

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject:

1. Students are required to complete a Working with Children Check leading to the issuance of a clearance number under the category of volunteer.

Students will need to:
i. Access the Commission for Children and Young People website and complete an online application form to generate an application number.
ii. Present an application number and identification to a NSW Motor Registry or Government Access Centre prior to issuance by mail a Working with Children Check number.
iii. Submit the letter with a valid Working With Children Check number to Student Central where the document is trimmed and recorded in Banner as a Special Requirement.

2. Students must have completed Child Protection Awareness Training (Online) prior to undertaking any visits/placements.

3. Students must have completed the ASCIA anaphylaxis e-training and registered their certificates with Student Central.

TEAC 2043 Numeracy and Mathematics in the Early Years

Credit Points 10

Legacy Code 102641

Coordinator Grant Jones (https://directory.westernsydney.edu.au/search/name/Grant Jones/)

Description The subject will develop students' understandings of children's construction of mathematical and numeracy concepts during the years from Kindergarten to Year 3. Students will develop their ability to assess young children's mathematical understandings and numeracy development, and to provide learning experiences for a diversity of learners, including investigation and the use of digital technologies, to enhance the growth of children's mathematical thinking. The subject will study the NSW K-10 Syllabus in all of its strands, with a particular emphasis on the Working Mathematically strand. This subject is included in the Development Phase of the Bachelor of Education.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Restrictions

Students must be enrolled in the 1876 Bachelor of Education (Primary) or 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine ways the beliefs, attitudes, and values held by themselves and their students affect their mathematical learning and teaching;
2. Apply the concepts, skills and processes of mathematics related to the teaching of space, measurement, data, patterns and algebra and number for 5 to 9 year olds in accordance with the current NSW Syllabus for the Australian Curriculum: Mathematics K-10, Support Documents and ACARA Numeracy Progressions;
3. Apply a range of pedagogies for teaching and learning mathematics, including problem solving and investigation based approaches;
4. Explain the importance of Working Mathematically for primary school mathematics learners and teachers, and the relationship to literacy;
5. Identify appropriate assessment strategies to inform the planning of teaching/learning activities that cater for the diverse needs of individual students with an emphasis on programs such as Count Me In Too, Count Me In Too (Indigenous), Targeted Early Numeracy (TEN) and Taking off with Numeracy (TOWN);
6. Apply understandings of the role of mathematics within the broader school curriculum, including the relationship between mathematics, numeracy and literacy;
7. Examine the mathematical learning needs of students from diverse backgrounds, such as Aboriginal and Torres Strait Islander, English as and Additional Language/ Dialect, culturally diverse.

Subject Content

- The development and construction of mathematical ideas during The early years of schooling
- Recognition of early mathematical thinking that children can bring to school
- Early understanding of whole number relationships
- Numerical thinking strategies
- Early spatial thinking
- The development of measurement concepts
- Use of problem solving and investigation as An effective pedagogy in The mathematics Classroom
- Programming and planning for mathematics in The early years
- Assessment strategies for The mathematics Classroom
- Pedagogies that address diversity within the mathematic classroom
- Integration of mathematics with other key learning areas
- Using programs such as Count Me in Too, TENS, and The ACARA Numeracy Progressions for Numeracy Teaching and learning
- Children's literature, concrete manipulatives, and digital tools for Teaching mathematics and Numeracy

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 2046 Pedagogy and Praxis in Aboriginal and Torres Strait Islander Education

Credit Points 10

Legacy Code 102643

Coordinator Michelle Locke (https://directory.westernsydney.edu.au/search/name/Michelle Locke/)

Description This subject is designed to meet the needs of early childhood, primary and secondary teachers who are required to develop their pedagogical approaches in order to become culturally responsive educators that meet the specific needs of Aboriginal and Torres Strait Islander learners. Preservice teachers examine current research which supports the teaching of Aboriginal and Torres Strait Islander learners their particular educational settings. Through their development as teacher professionals the subject will provide opportunities for future teacher professionals to demonstrate their application of these pedagogical approaches and explain how this shapes their future classroom practice. This subject provides foundational experiences to engage with Aboriginal and Torres Strait Islander history, culture and education educational experiences in NSW. It provides opportunities for preservice teachers to explore praxis which is underpinned by research. The subject requires educators to apply appropriate application of cultural protocols which enables future teachers to successfully work with Aboriginal children, families and communities in ways that maximise learning outcomes for Aboriginal learners in a range of educational settings. This subject is included in the Development Phase of the Bachelor of Education.

School Education

Discipline Teacher Education, Not Elsewhere Classified.

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Restrictions

Students must be enrolled in 1876 Bachelor of Education (Primary), 1939 Bachelor of Education (Secondary) or 1926 Bachelor of Education (Early Childhood).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an introductory understanding of Indigenous Australian knowledges, histories and cultures, including an understanding of the diversity of Aboriginal and Torres Strait Islander cultural expressions, cultural values and worldviews.
2. Explain how to action appropriate community consultation, cultural protocols, ethical interactions and ways with Elders, families and caregivers, knowledge holders, Aboriginal workers and external cultural experts.
3. Examine the relationship between educational theory, practice and worldviews in relation to Aboriginal and Torres Strait Islander pedagogy and how it is applied in educational settings.
4. Design pedagogically appropriate Aboriginal and Torres Strait Islander teaching and learning opportunities or activities for future classrooms.
5. Develop positive culturally responsive pedagogies that develop strong identity and cultural expressions in your future praxis with Aboriginal children entering western education sites of learning.

Subject Content

1. The importance of 'play', 'hands on' Land Based Education (LBE) tasks to engage Aboriginal and Torres Strait Islander learning.
2. Assessing resources for Aboriginal and Torres Strait Islander students for suitability in the classroom.
3. Aboriginal workers in the classroom as a resource.
4. Engaging Aboriginal and Torres Strait Islander students.
5. Pedagogical frameworks for teaching Aboriginal and Torres Strait Islander students.
6. The importance of building relationships when working with Aboriginal and Torres Strait Islander students.
7. Protocols of working with Aboriginal and Torres Strait Islander parents, families, carers and communities.
8. Learning from Aboriginal and Torres Strait Islander parents and students.
9. Aboriginal and Torres Strait Islander concepts of STEM (Science, Technology, Engineering, Mathematics).

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 2048 Professional Experience 1: Working in Classrooms

Credit Points 10

Legacy Code 102639

Coordinator Kellie Jorda (https://directory.westernsydney.edu.au/search/name/Kellie Jorda/)

Description This subject is designed to introduce students to the practical and pedagogical perspectives of becoming a teacher in the primary school context. As Pre-service Teachers, students will engage in the culture of schools to gain an understanding of how schools and classrooms operate. This professional experience provides opportunities for students to observe and engage in classroom organisation, classroom management strategies, lesson planning and delivery, and student/teacher interactions. Primary Professional Experience 1: Working in Classrooms has a two week (15 day) placement component. This subject is included in the Development Phase of the Bachelor of Education.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) TEAC 2062

Co-requisite(s) TEAC 2004

Restrictions

Students must be enrolled in the 1876 Bachelor of Education (Primary) or 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education and have successfully completed 80 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Interact ethically and professionally with educators, colleagues, students and the broader school community.
2. Explore how schools and classrooms are organised and managed.
3. Analyse planning and teaching lessons to a group of students.
4. Effectively use educational research to inform ethical professional practice to maximise student outcomes.
5. Apply teaching and learning strategies that support student engagement in the classroom context.
6. Outline relevant legislative, administrative and organisational policies and processes.
7. Reflect on own learning and feedback from school-based and university-based teacher educators.

Subject Content

- Organisation of professional experience ? placement Schools, planning and Teaching requirements, Understanding Expectations
- Lesson planning and Structuring A Lesson
- Teaching, learning and Classroom management strategies
- Legislative, administrative and organisational policies
- Critical self-reflection with reference to The Australian professional Standards for graduate teachers

Special Requirements

Legislative pre-requisites

1. Students are required to complete the two components of the Working with Children Check (WWCC) process leading to (a) the issuance of a clearance number under the category of volunteer and (b) verification of the clearance number with the NSW Department of Education.

a) Students will need to:
i. Access the Commission for Children and Young People website and complete an online application form to generate an application number.
ii. Present an application number and identification to a Service NSW office who will issue a Working with Children Check number via mail or email.
iii. Submit the letter with a valid Working With Children Check number via WesternNow Student Portal. The document is trimmed and recorded as a Special Requirement on your academic record. WesternNow Student Portal link (https://wsu.service-now.com/student/?id=sc_cat_item&sys_id=9c8b61a2dbbed8504f58e434059619ed)

b) Students will need to:
i. Access the NSW Department of Education WWCC Verification declaration form https://online.education.nsw.gov.au/jecpc/crc/wwcc.jsf
ii. Carefully read the information about Identity Documents and obtain a copy of the relevant ID documents.
iii. Complete and submit the verification declaration form.
iv. Once your WWCC verification is complete you will receive an email reply from the DoE Probity Unit confirming your WWCC number has been verified.
v. Submit the verification confirmation email via WesternNow Student Portal. The document is trimmed and recorded as a Special Requirement on your academic record.

2. Students must complete the two components of the NSW Department of Education's Child Protection Awareness Training (CPAT)

a) Students will need to:
i. Access the NSW Department of Education's MyPL website https://mypl.education.nsw.gov.au/
ii. Complete the online Child Protection Awareness Training: Induction
iii. Save certificate of completion
iv. Submit certificate via WesternNow Student Portal

b) Students will need to:
i. Access the NSW Department of Education's MyPL website https://mypl.education.nsw.gov.au/
ii. Complete the Child Protection Awareness Training (CPAT): Annual Update for the calendar year
iii. Save certificate of completion
iv. Submit certificate via WesternNow Student Portal

Both certificates will be recorded on your student record as Special Requirements with the end date for the Annual CPAT recorded. The CPAT: Annual Update will need to be renewed and submitted on an annual basis.

Students who have not completed both components of the Child Protection Awareness Training will need to withdraw from the subject.

3. Students must complete the ASCIA anaphylaxis e-training and submit their certificate to Submit certificate via WesternNow Student Portal.

4. Students must meet the Inherent Requirements for the Master of Teaching (Primary) (https://hbook.westernsydney.edu.au/programs/master-teaching-primary/).

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 2049 Professional Experience 2: School-based Learning

Credit Points 10

Legacy Code 102128

Coordinator Jacqueline Humphries (https://directory.westernsydney.edu.au/search/name/Jacqueline Humphries/)

Description The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. Students will have 20 days placement in schools. During these days students will work in partnership with classroom teachers to further develop and begin to put into practice their knowledge of curriculum and pedagogy. Students will observe classrooms, assist individuals and groups of students with their learning, and begin to teach lessons. By the end of the subject students will have taught lessons in all of the Key Learning Areas, assessed student learning and evaluated their teaching.

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Equivalent Subjects EDUC 2007 - Professional Experience 2 School-based learning (AREP)

Restrictions

Students must be enrolled in 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Select relevant syllabus content in relation to the planning of lessons for teaching individuals, groups and whole classes.
2. Design and teach effective learning sequences and lesson plans based on curriculum, assessment and reporting knowledge that cater to students of varying abilities and characteristics.
3. Identify different curriculum and implementation decisions made by schools.
4. Assess and interpret student learning using a range of strategies, including formal and informal, diagnostic, formative and summative approaches.
5. Utilise a range of teaching strategies, spaces and resources (including ICT) that support inclusive student participation and engage students in their learning.
6. Utilise a range of verbal and non-verbal communication strategies to support student engagement.
7. Provide timely and appropriate feedback to students about their learning.
8. Complete Professional Experience placement with demonstrated ability to manage classroom behaviour and to teach across all KLAs.

Subject Content

1. Teachers' Professional roles and responsibilities in the classroom and the school community.
2. Technology in the classroom - teaching and learning supported by ICT - introduction of the 'Weebly' or another web platform.
3. 5 days in residential 1 at a school close to WSU Bankstown.
4. Professional Portfolios - Using portfolios to show professional growth and development in teaching, and linking with the Australian Professional Graduate Teaching Standards.
5. 10 days in residential 2 at same schools as residential 1.
6. Presentation of portfolios to show professional growth and development in teaching - linking with the Australian Professional Graduate Teaching Standards.

Special Requirements

Legislative pre-requisites

1. Students are required to complete the **two** components of the Working with Children Check (WWCC) process leading to (a) the issuance of a clearance number under the category of volunteer and (b) verification of the clearance number with the NSW Department of Education.

a) Students will need to:
i. Access the Commission for Children and Young People website and complete an online application form to generate an application number.

ii. Present an application number and identification to a Service NSW office who will issue a Working with Children Check number via mail or email.
iii. Submit the letter with a valid Working With Children Check number via WesternNow Student Portal. The document is trimmed and recorded as a Special Requirement on your academic record.

TEAC 2052 Science and Technology

Credit Points 10

Legacy Code 102123

Coordinator Les Vozzo (https://directory.westernsydney.edu.au/search/name/Les Vozzo/)

Description This subject is designed to introduce the NSW Syllabus for the Australian Curriculum: Science K-10 (incorporating Science and Technology K-6), with a focus on K-2. The significance of children's views is emphasised in the selection, design and sequencing of activities for primary students in the development of science and technology experiences. Scientific concepts are considered in the context of distinct but related science and technology areas of built environments, information and communications, living things, natural phenomena, products and services, and Earth and its surroundings. Relevant science and technology content, together with strategies useful in developing primary science and technology knowledge, understandings, skills, processes, values and attitudes will be explored. The tutorials and assignments are designed to place student teachers in situations where they can focus on themselves as learners and to reflect on the implications of their learning and the learning of others in their future professional practice.

Level Undergraduate Level 2 subject

Equivalent Subjects EDUC 2006 - Science and Technology 1

Restrictions

Students must be enrolled in 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain central concepts in science and technology and understandings of the processes of investigating, designing and making and using technology K-2.
2. Demonstrate research-based knowledge of the pedagogies appropriate for science and technology education in primary schools.
3. Apply appropriate strategies to create a positive environment supporting student effort and learning and to engage students as well as address student needs when implementing learning experiences in science and technology.

4. Design and implement leaning experiences that demonstrate an in-depth knowledge of the NSW Syllabus for the Australian Curriculum: Science K-10 (incorporating Science and Technology K-6) and focussing on K-2.
5. Identify and articulate clear learning goals in preparing learning experiences for science and technology education that are appropriate for the cognitive, social and language abilities of students in primary schools.
6. Plan and implement coherent lessons, lesson sequences, scope and sequences that are designed to engage students and improve learning outcomes in science and technology K-2.
7. Utilise knowledge of a range of resources appropriate to science and technology education.
8. Engage in teamwork for the purposes of an investigation, the production of a designed and made artefact and, the presentation of a discussion about the process.

Subject Content

1. The nature of science and technology as ?edisciplines and the strategies of investigating, designing and making and using technology?f K-2
2. The nature of Science and Technology K-6 (NSW Syllabus for the Australian Curriculum), Its outcomes for Skills: (Working Scientifically, Working Technologically), Knowledge and Understanding Strands (Natural Environment, Made Environment), Knowledge and Understanding Substrands (Physical World, Earth and Space, Living World, Material World, Built Environments, Information, and, Products).
3. Affective issues in science and techn

TEAC 2053 Science and Technology in the Primary Years

Credit Points 10

Legacy Code 102644

Coordinator Lesley Gough (https://directory.westernsydney.edu.au/search/name/Lesley Gough/)

Description This subject introduces students to the NSW Syllabus for the Australian Curriculum: Science and Technology K-6. It focuses on developing students' pedagogical content knowledge appropriate for teaching science and technology to learners in the primary years. This subject demonstrates how scientific and technological learning experiences can be developed to cater for the needs of the diverse groups of learners in primary schools, including English as an Additional Language or Dialect (EAL/D), Aboriginal and Torres Strait Islander and low socioeconomic status (SES) learners. Students will also focus on themselves as learners and reflect on the implications of their learning and the learning of others in their future professional practice. This subject is included in the Development Phase of the Bachelor of Education.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Restrictions

Students must be enrolled in the 1876 Bachelor of Education (Primary) or 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain central concepts in science and technology and understandings of the processes of investigating, designing, making and using technology;
2. Examine principles and practices of teaching and learning Science & Technology in primary classrooms;
3. Utilise knowledge of a range of resources appropriate to science and technology education in primary classrooms, including Digital Technologies;
4. Design learning experiences that demonstrate in-depth knowledge of the NSW Science & Technology K-6 Syllabus and use a range of pedagogies appropriate for science and technology education in primary schools;
5. Apply appropriate strategies to create a positive, engaging learning environment to support student effort and learning outcomes;
6. Examine the literacy and numeracy demands of Science and Technology; and demonstrate effective ways of integrating with classroom teaching;
7. Identify and articulate specific learning goals in preparing learning experiences for science and technology education that are appropriate for the cognitive, social and language abilities of students in primary schools;
8. Plan and implement coherent lessons and lesson sequences that are designed to engage students from English as an Additional Language or Dialect (EAL/D), Aboriginal and Torres Strait Islander and low socioeconomic status (SES) backgrounds and improve their learning outcomes in science and technology.

Subject Content

- The role and value of science and Technology in The broader school curriculum
- The components of the NSW Science & Technology K-6 Syllabus, including structure, aims and objectives, outcomes and content
- Problem solving, investigating, designing and making in science and Technology
- developing positive attitudes and motivation to learn more about scientific fields

- Understanding of concepts and concept development and strategies for developing sound conceptual understandings and skills
- designing Teaching and learning experiences and programming for effective science and Technology education
- The role of ICTs in science and Technology education: Integrating science and Technology in other curriculum areas and for Integrating other curriculum areas into science and Technology

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Essay	700 - 900 words	20	N	Individual
Applied Project	3 Digital images of the model + 1200 words	40	N	Individual

TEAC 2054 Scientific Discovery and Invention

Credit Points 10

Legacy Code 102209

Coordinator Les Vozzo (https://directory.westernsydney.edu.au/search/name/Les Vozzo/)

Description Scientific discovery and inventions have made a significant impact on contemporary society. Science is a dynamic, futures oriented, collaborative human endeavour arising from curiosity and interest. In this subject students explore science as a distinctive way of thinking about and explaining events and phenomena. This subject aims to develop students' understanding of the creativity of science and technology concepts and investigative and innovative processes. As the subject also aims to investigate the impact of scientific discoveries and inventions on society, students will examine how various perspectives, such as cultural (including Australian Aboriginal and Torres Strait Islander) perspectives, explain natural phenomena. This subject will benefit students interested in teaching as a career to design authentic learning programs that explore how scientific discovery and invention are applied in everyday life. This subject is included in the Foundation Phase of the Bachelor of Education.

School Education

Level Undergraduate Level 2 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain concepts which form the basis of knowledge associated with various scientific discoveries and inventions that have arisen from physics, chemistry, earth science, biology and astronomy;
2. Compare and contrast natural phenomena through cultural (including Australian Aboriginal and Torres Strait Islander) and scientific frameworks;
3. Assess the impact of scientific discoveries and inventions on contemporary society through experimentation and research;
4. Analyse a wide range of science fiction (films and novels) to illustrate a wide variety of multi-discipline scientific concepts;
5. Apply a variety of ICT tools for scientific discoveries and inventions in the context of science and technology education;
6. Articulate clear learning goals in preparing learning experiences for science and technology education that are appropriate for the cognitive, social and language abilities of young people.

Subject Content

1. Science, technology and innovation concepts associated with the physics, chemistry, earth science, biology and astronomy and other contributing disciplines;
2. Scientific processes of investigation and communication;
3. Cultural perspectives of examining natural phenomena;
4. Learning about scientific discoveries and inventions from science fiction stories;
5. Students?f own experiences with innovative science and technologies;
6. Attitudes and values regarding the core role of science and technology in today?fs society;
7. Scientific and technological research, processes and creative applications to everyday life;
8. Social and educational impact of variances of understandings of science and technology;
9. Information and communication technologies as a means of investigating ideas, creative problem solving and representing understandings.

Assessment

Discipline English as a Second Language Teaching

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. demonstrate understanding of the theory and practice of effective English language teaching
2. understand the language learning process in classroom and self-access settings
3. analyse and adapt language teaching resources for use in a range of settings
4. develop skills in designing, implementing and evaluating effective learning opportunities for a range of learner types
5. identify ways to reflect upon and develop their own teaching skills
6. analyse language teaching principles including cognitive, socio-affective and linguistic principles
7. demonstrate capacity to apply teaching approaches and use materials with cultural awareness

Subject Content

- Acquire knowledge about various English language Teaching theories, principles, and methods
- discuss how to teach The macro-skills of listening, speaking, reading, and writing effectively in EFL and ESL/settings
- learn to plan, sequence and Evaluate language learning event
- Debate on how to manage The language learning Classroom
- discuss how to manage Issues in The language learning Classroom such as cultural diversity, mixed levels and abilities, differing needs and scarcity of resources
- role play to experience how to manage The physical environment-seating arrangements, Teaching resources and AIDS, grouping learners
- understand The teacher?fs role, Timing, facilitation and instruction Roles, and variety, interest, flexibility and learning
- develop language Teaching resources
- Evaluate commercial resources for use in language learning setting
-

TEAC 2056 Teaching Art in the Early Years

Credit Points 10

Legacy Code 102671

Coordinator Joanne Frost (https://directory.westernsydney.edu.au/search/name/Joanne Frost/)

Description This subject continues students' exploration of the creative arts and focuses on pedagogies to support the creative child. The role of the teacher and environment as art educators will be explored in detail, specifically the role of the pedagogical leader in facilitating meaningful, sustained and inclusive art experiences for the young child. Students will explore the relevance of the arts in the development of children's play and will engage with appropriate information and communication technologies for learning in the arts. Students will also draw from theory and research literature to critically analyse traditional and contemporary approaches to teaching the arts and the role of the teacher in supporting children's ability to make meaning from and express their social and cultural worlds. This subject is included in the Development Phase of the Bachelor of Education.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Restrictions

Students must be enrolled in 1926 Bachelor of Education (Early Childhood) and have completed 80 credit points.

Learning Outcomes

1. Explain the role of the creative arts in the play, development and learning of birth – 5 year olds.
2. Advocate for learning in the arts in the early childhood curriculum.
3. Apply art elements and concepts as they relate to cultural diversity, in particular Aboriginal and Torres Strait Islander peoples and the cultures of the Asia region in the development of creative arts experiences.
4. Apply pedagogies and resources that encourage divergent thinking, creative expression and meaning making that assist children to communicate their ideas through creative arts experiences.
5. Use theoretical knowledge of drama, music, dance, visual arts and media arts in the development of creative arts experiences.
6. Develop sequential learning experiences in the creative arts that are consistent with the Early Years Learning framework.

Subject Content

1. **The Arts:**
   - Key elements of drama, music, visual arts, dance and media arts
   - Creative arts pedagogies for children birth to 5 years
   - The creative arts and the Early Years Learning Framework
2. **The Child:**
   - The physical, social, creative and intellectual capabilities of birth to 5 year olds as they relate to learning and development in the creative arts
   - The role of the creative arts in contemporary childhoods, including those of Aboriginal and
   - Torres Strait Islander peoples and those from the Asian region.
   - Technology and contemporary arts in early childhoods
   - The arts as a social and cultural lens for meaning making and collaboration and agency
3. **The Teacher:**
   - Exploration of arts pedagogies, including multiple intelligences, for teaching in the creative arts
   - The role of the arts educator, contemporary and traditional approaches and arts pedagogies
   - Creative arts curriculum and Intentional teaching strategies
   - Environments and resources that support accessibility, time frames and collaborative decision making in art making processes

TEAC 2057 Teaching English as an Additional Language in Primary Schools

Legacy Code 102131

Coordinator Shirley Gilbert (https://directory.westernsydney.edu.au/search/name/Shirley Gilbert/)

Student Contribution Band

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Restrictions

Students must be enrolled in 1717 - Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and explain elements and principles of Aboriginal English.
2. Explain the role of the home language in second language learning, socio-cultural and intellectual development.
3. Explain the need for English as an Additional Language teaching at the primary level and the nature of the individual second language needs of learners.
4. Describe the different theoretical frameworks for teaching English as an Additional Language.
5. Examine recent research in additional language acquisition and be able to synthesise and reflect upon some of the major findings.
6. Use principles and develop strategies for teaching English as an Additional Language across the curriculum.
7. Evaluate and apply teaching classroom resources to cater for learners from a diverse range of backgrounds including refugees, new migrants, Aboriginal and Torres Strait Islanders.
8. Apply appropriate methods of assessing second language and literacy learning;
9. Plan, refine and reflect upon teaching and learning activities designed to meet the needs of English as Second Language learners.

Subject Content

1. Elements and principles of Aboriginal English
2. Second language and literacy development:
- The factors influencing second language development:
- First language proficiency, age, prior educational and life experiences, cultural and linguistic background;
- context and environment of second language learning in mainstream classes and whole school organisation.
3. Parent/Teacher communication:
- Reasons for parent/teacher involvement;
- Using an interpreter;
- Collaborating with bilingual families and other strategies
4. Assessment and evaluation:
- identifying L2 language proficiency: English as second language (ESL) Scales
- Planning and programming;
- class and whole school evaluation framework.
5. Pedagogy focusing on English as an Additional Language learners:
- Communicative teaching and learning principles;
- language and literacy strategies across The curriculum.
6. Teaching and learning resources for second language development in the primary classroom;
- Select and critically evaluate culturally inclusive materials;
- use, analyse and Evaluate online software, human and paper resources to match The specific language learning purpose.

Assessment

TEAC 2058 Wellbeing and Promoting Positive Learning Environments

Credit Points 10

Legacy Code 102129

Coordinator Erin Mackenzie (https://directory.westernsydney.edu.au/search/name/Erin Mackenzie/)

Description The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. The purpose of this subject is for prospective teachers to develop an understanding of the individual and contextual factors which influence children's behaviour and to apply this knowledge to building and maintaining positive learning environments. The subject focuses on proactive and preventative measures through the establishment of a healthy learning ecology. It draws upon professional experiences to apply sound theoretical foundations to base approaches to responding to a range of student behaviours while simultaneously promoting student mental health, wellbeing and resilience. The subject provides support for the development of an integrated management plan that reflects the diverse nature of children's behaviour and is informed by both theory and a critical evaluation of personal and professional dispositions.

Level Undergraduate Level 2 subject

Equivalent Subjects EDUC 2013 - Personal Development Health and Physical Education 2 (AREP)

Restrictions

Students must be enrolled in 1717 - Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe children’s development, cultural and socio-cultural factors influencing students' learning and behaviour.
2. Explain the nature and causes for children's behaviour.
3. Implement a repertoire of preventative and proactive strategies to promote positive learning environments and minimise disruptive behaviour.
4. Evaluate a range of theoretical approaches to student discipline.

5. Analyse the influence of teacher behaviour and discipline practices on the behaviour and wellbeing of students from diverse backgrounds.
6. Implement a range of management and well-being strategies used across teaching and learning contexts and apply effective techniques for intervening in challenging behaviours.
7. Critically evaluate personal and professional dispositions and their effectiveness for preventing and appropriateness for responding to children's behaviour.
8. Establish supportive learning environments where students feel safe to fully participate.

Subject Content

1. Influences on children's behaviour. Ecological systems theory and implications.
2. Healthy learning ecology: a proactive and preventative approach.
- Understanding children's development and their diverse needs.
- promoting positive learning environments.
- establishing positive relationships.
3. Theoretical foundations.
- theoretical bases and related discipline models.
- developing A personal philosophy and integrated model of discipline.
4. Teacher and student mental health, wellbeing and resilience: Implications for behavior.
5. Policies, legislation and support services for promoting positive behavior and the mental health and wellbeing needs of students and teachers.
6. Deeping of knowledge and skills to meet the specific needs of Aboriginal and Torres Strait Islander young people.

TEAC 2060 Developing Aboriginal Languages K-6

Credit Points 10

Legacy Code 102747

Coordinator Maree Skillen (https://directory.westernsydney.edu.au/search/name/Maree Skillen/)

Description This subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander education program. This subject introduces teacher education students to the developing and planning processes required to develop Aboriginal and Torres Strait Islander languages and LOTE opportunities across K-6. Students will engage with the complexities in teaching Aboriginal languages. As they engage with a diverse array of themes, debates and contested issues in Australia's Aboriginal language revitalisation programs they develop understanding about protocols and consultations that are required to deliver programs in schools. Students will learn to create culturally-responsive learning experiences for primary classrooms that embrace Aboriginal and Torres Strait Islander histories and cultures and develop skills and knowledge in teaching Aboriginal languages. This subject is included in the Transition Phase of the Bachelor of Education.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Restrictions

Students must be enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the role of the home language in second language learning, socio-cultural and intellectual development. (Standards 1.1.1; 3.3.1) [CLO 1; 2; 3]
2. Describe the different theoretical frameworks for teaching English as an Additional Language. (Standards 2.2.1) [CLO 1; 2]
3. Synthesise broad and critical knowledge about the history, complexities, protocols and challenges involved in teaching Aboriginal and Torres Strait Islander languages in K-6 schools (Standards 1.4.1, 2.1.1, 2.2.1, 2.4.1; CLO1,2,3,4,7)
4. Incorporate locally driven aspects of Aboriginal history and culture into learning experiences about language learning (Standards 1.4.1, 2.1.1, 2.4.1; CLO 1,2,3,4,5,6,7,8)
5. Design experiences which recognise and celebrate connections between Aboriginal culture, language, land and a sense of peoples' identities (Standards 1.4.1, 2.1.1, 2.3.1, 2.4.1; CLO 1,2,3,4,5,6,7,8)
6. Plan for learning experiences, lessons and lesson sequences that provide opportunities to identify and respond to key words, phrases and simple sentences in context in written Aboriginal languages (using local texts including ICTs)(Standards 1.4.1, 2.4.1; CLO 1,2,3,4,7)
7. Design engaging and culturally-responsive lessons, support materials and programs that embrace Aboriginal Languages K-6 (Standards 1.4.1, 2.1.1, 2.2.1, 2.3.1, 2.4.1, 3.1.1, 3.2.1, 3.3.1, 3.4.1; CLO 1,2,3,4,5,6,7,8)

Subject Content

1. Teaching strategies, approaches and program requirements to teach Aboriginal LOTE languages in the Primary classroom.
2. The design and implementation of culturally-responsive language learning experiences that recognise the complexities of Aboriginal history, Aboriginal English, EAL/D learner diversity to support and embrace Aboriginal language achievements.
3. The development of the Aboriginal Languages K–10 Syllabus, historical themes and debates, and contested languages histories.
4. The state-wide Aboriginal languages policy and associated policy documents at state, national and global levels (including NESA, NSW DET, OCHRE and UNESCO).

5. The development of a language culture nest program, including staffing, community consultation, protocols and delivery.
6. Recognition of the connections between Aboriginal culture, language, land and a sense of identity, and the importance of Aboriginal languages to cultural maintenance.

TEAC 2061 Teaching K-6: Pedagogies, Priorities and Capabilities

Credit Points 10

Legacy Code 102749

Coordinator Paul Rooney (https://directory.westernsydney.edu.au/search/name/Paul Rooney/)

Description The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. The subject will develop students' knowledge and skills for planning and teaching in K-6 classrooms using both the Cross-Curriculum Priority Areas (CPPA) through the incorporation of the seven General Capabilities (GC). The subject enables the delivery of learning area content focusing on key learning areas, HSIE and English at the same time as developing knowledge, understanding and skills relating to Aboriginal and Torres Strait Islander histories and cultures, Asia and Australia's engagement with Asia and/or Sustainability. The subject will explore how Literacy, Numeracy, ICT capability and Critical and creative thinking are fundamental in students becoming successful lifelong learners whilst the areas of Personal and social capability, Ethical understanding, and Intercultural understanding focus on ways of being, behaving and learning to live with others, and taught through the HSIE and English learning areas.

Level Undergraduate Level 2 subject

Equivalent Subjects TEAC 1021 - Learning Teaching and Technologies

Incompatible Subjects TEAC 2036 - Learning Futures and Curriculum Integration

Restrictions

Students must be enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate understanding of the three CCPA's: developing opportunities for inclusive narratives from Aboriginal and Torres Strait Islander cultures, Asia and Australia;s engagement with Aisia, and Sustainability . (Standard 2.4.1) [CLO 1; 2; 3]
2. Identify and explain the ways different cultures, cultural stories and icons, are depicted in a range of multimodal texts to support teaching of CCPA's in K-6 classrooms using HSIE and English. (Standard 1.4.1; 2.4.1) [CLO 1; 2; 3]
3. Design resources for lessons, programs and school events to support students' personal and social capability, ethical understanding, and intercultural understandings.
4. Evaluate social debates around the politics of representation presented in the CCPA's. (Standards 1.4.1; 2.4.1) [CLO 1; 2; 3]
5. Examine the use of technology for teaching the General Capabilities. (Standard 2.6.1, 3.4.1, 3.5.1) [CLO 1; 2; 3]
6. Collaborate with colleagues in disciplinary and cross-disciplinary groupings in order to support personal learning about the role of the CCPA's and General Capabilities.

Subject Content

1. Aboriginal and Torres Strait Islander histories and cultures, Asia and Australia's engagement with Asia and/or Sustainability in K-6 classrooms
2. Classroom technologies to support the teaching and learning linked to the cross curriculum priority areas (CCPAs)
3. Embedding CCPAs in the teaching and learning of English and/or Human Society & its Environments.
4. Culturally-responsive curriculum
5. Theoretical and pedagogical understandings linked to the General Capabilities of Literacy, Numeracy, ICT capability, and Critical and creative thinking
6. Ethical thinking in classrooms
7. Social and intercultural capacities
8. Critical numeracy and literacy skills related to media

Assessment

TEAC 2062 Teachers as Change Makers

Credit Points 10

Legacy Code 102796

Coordinator Annette Sartor (https://directory.westernsydney.edu.au/search/name/Annette Sartor/)

Description Through engaged learning, Teachers as Change Makers builds professional teaching skills by enhancing pre-service teachers' understandings of the clientele with whom they will be professionally involved as teachers. This subject includes a practical component requiring a minimum of 25 hours of engaged learning in primary schools that provide support to children from a range of diverse backgrounds and experiences. Through practical experience such as learning support programs, the subject explores the criticality of ethical understandings and teaching practices that may influence the educational outcomes of children. In particular, this subject focuses on promoting the importance of reciprocal and reflexive teaching approaches for providing inclusive settings that make a difference to children's educational experiences and provides a space to critically explore how teaching practices can empower students and communities. This subject is included in the Foundation Phase of the Bachelor of Education.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Restrictions

Students must have completed 40 credit points to enrol in this subject (this restriction excludes students enrolled in 1876 Bachelor of Education (Primary)).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Using the sociological theory of reflexivity, outline existing personal perceptions of the role of a teacher.
2. Analyse issues faced by children with diverse needs and from diverse backgrounds, and how issues impact on educational achievement (APST 1.3, 1.4, 1.6).
3. Undertake an engaged learning placement through facilitating programs (e.g. reading, numeracy, special needs), specifically aimed at improving outcomes for children with diverse learning needs.
4. Using a flipped classroom approach, apply Freire's theory of praxis to examine the responsibilities and practices of teachers who work with children with diverse needs and from diverse backgrounds (APST 1.3, 1.5, 1.6, 4.1, 4.4).
5. Explain how ethical and professional decisions, understandings and practices lead to positive educational outcomes for children. (APST 1.3, 1.5, 1.6, 4.1, 4.4, 7.1).
6. Critically reflect on the effectiveness of teaching practices, for empowering learners with diverse needs and from diverse backgrounds. (APST 1.1, 1.3, 1.4, 1.5, 1.6, 4.1, 4.4).
7. Explore the changing roles of teachers with reference to providing inclusive settings, working with parents and communities, and preparing children for the changing landscape of work. (APST 7.3).
8. Using theory, examine how teachers can act as agents of change.
9. Apply professional approaches during placement in school settings including child protection obligations. (APSTs 7.2, 7.4).

Subject Content

1. Responsibilities and practices in the profession of teaching
2. The changing roles of teachers in the social and cultural institution of education
3. Knowledge integration through sociological theory, engaged and work integrated learning and its application for 'work' in school settings
4. Knowledge and skills for working with diverse children
5. Reflective and reflexive practice
6. Ethical and professional responsibilities for working with diverse groups of children

Special Requirements

Legislative pre-requisites

1. Students are required to complete the **two** components of the Working with Children Check (WWCC) process leading to (a) the issuance of a clearance number under the category of volunteer and (b) verification of the clearance number with the NSW Department of Education.

a) Students will need to:
i. Access the Commission for Children and Young People website and complete an online application form to generate an application number.

ii. Present an application number and identification to a Service NSW office who will issue a Working with Children Check number via mail or email.
iii. Submit the letter with a valid Working With Children Check number via WesternNow Student Portal. The document is trimmed and recorded as a Special Requirement on your academic record.
WesternNow Student Portal link (https://wsu.service-now.com/student/?id=sc_cat_item&sys_id=9c8b61a2dbbed8504f58e434059619ed)
b) Students will need to:
i. Access the NSW Department of Education WWCC Verification declaration form https://online.education.nsw.gov.au/jecpc/crc/wwcc.jsf
ii. Carefully read the information about Identity Documents and obtain a copy of the relevant ID documents.
iii. Complete and submit the verification declaration form.
iv. Once your WWCC verification is complete you will receive an email reply from the DoE Probity Unit confirming your WWCC number has been verified.
v. Submit the verification confirmation email via WesternNow Student Portal. The document is trimmed and recorded as a Special Requirement on your academic record.

2. Students must complete the **two** components of the NSW Department of Education's Child Protection Awareness Training (CPAT)
a) Students will need to:

i. Access the NSW Department of Education's MyPL website https://mypl.education.nsw.gov.au/
ii. Complete the online Child Protection Awareness Training: Induction
iii. Save certificate of completion
iv. Submit certificate via WesternNow Student Portal
b) Students will need to:
i. Access the NSW Department of Education's MyPL website https://mypl.education.nsw.gov.au/
ii. Complete the Child Protection Awareness Training (CPAT): Annual Update for the calendar year
iii. Save certificate of completion
iv. Submit certificate via WesternNow Student Portal
Both certificates will be recorded on your student record as Special Requirements with the end date for the Annual CPAT recorded. The CPAT: Annual Update will need to be renewed and submitted on an annual basis.
Students who have not completed both components of the Child Protection Awareness Training will need to withdraw from the subject.

3. Students must complete the ASCIA anaphylaxis e-training and submit their certificate to Submit certificate via WesternNow Student Portal.

4. Students must meet the Inherent Requirements for the Master of Teaching (Primary) (p. 1199).

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 2063 History, Geography, Civics and Citizenship in the Primary Years

Credit Points 10

Legacy Code 102820

Coordinator Kay Carroll (https://directory.westernsydney.edu.au/search/name/Kay Carroll/)

Description This subject provides opportunities for students to develop knowledge of the outcomes, subject matter, pedagogies and experiences that define the key learning area of History, Geography, Civics and Citizenship in primary (Kindergarten to Year 6) classrooms. Key concepts of change in family history, local history, and Australia's history and understanding Australia as a Nation are explored.
In Geography, concepts that develop a sense of curiosity about environments, peoples, cultures and place, are a priority. In Civics and Citizenship, the focus is on relationships between the individual and the state.? The values and mutual responsibilities and obligations for civil, political and social participation in Australian society are also explored. These areas enable students to develop their own content knowledge and understandings, skills and dispositions necessary for planning, programming and teaching. This subject promotes teaching strategies that prepare primary children to be informed and effective change agents. This subject is included in the Development Phase of the Bachelor of Education.

School Education

Restrictions

Students must be enrolled in the 1876 Bachelor of Education (Primary) or 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explore the disciplines, theories, pedagogies and Cross-Curriculum-Priorities that underpin the learning area of History, Geography, Civics and Citizenship in learning design.
2. Apply the learning principles and cross-curriculum-priorities that underlie teaching History, Geography, Civics and Citizenship in the primary years.
3. Design a sequence of learning and detailed lesson plans using knowledge of the NSW HSIE and other curriculum areas.
4. Identify Aboriginal perspectives embedded in the History, Geography, Civics and Citizenship for teaching the NSW HSIE key learning area.
5. Reflect on personal exploration of History, Geography, Civics and Citizenship K-6 and practices in relation to place-based and project-based learning in History, Geography, Civics and Citizenship K-6.
6. Apply ICT, literacy demands and engaging pedagogical approaches in design of lessons.

Subject Content

1. The NSW History K-10 syllabus and Geography K-10 syllabus with a focus on Kindergarten (1st year of schooling) ? Year 6
2. Inquiry process, outdoor learning, place-based and project-based learning
3. Historical and Geographical skills including ethnographic reports and cartographic mapping
4. Cross-Curriculum Priorities with a focus on Aboriginal and Torres Strait Islander Peoples and Histories
5. Literacy and Information Communication Technology demands for teaching History, Geography, Civics and Citizenship.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 2064 Contemporary Childhoods (Block)

Credit Points 10

Legacy Code 500073

Coordinator Rachel Renwick (https://directory.westernsydney.edu.au/search/name/Rachel Renwick/)

Description In this subject students will engage in an exploration of what it means to be a child in a postmodern world and how different theoretical approaches influence ways of understanding children's lives. Alongside questions of how gender, sexuality, ethnicity, 'race', language, class, ability and religion are constituted through a child's identity, students will explore the notion of a child's subjectivity. A child's subjectivity is the conscious and unconscious thoughts and emotions of the child, their sense of self, their body and their way of understanding their relationship to the world. Building on this knowledge, students will also explore the four key child-environment identities of the physical child, the social child, the learning child and the natural child and by analysing a variety of scholarly and non-scholarly texts around childhood, children's bodies and behaviour will reflect on a child's individuality and emerging identity.

School Education

Discipline Teacher Education: Early Childhood

Level Undergraduate Level 2 subject

Equivalent Subjects TEAC 2009 - Contemporary Childhoods TEAC 2010 - Contemporary Childhoods

Restrictions

Students must be enrolled in program 7181 ? Undergraduate Certificate in Early Childhood Studies.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Investigate diverse texts, images, practices and constructions of what it means to be a child in contemporary society.
2. Discuss the social meaning of childhood including the historical, social and political factors and how they have influenced changing views of children and childhood.
3. Explain how different theoretical perspectives have positioned children and childhood as a social construction.
4. Identify the ways in which gender, sexuality, ethnicity, 'race', language, class, ability and religion are constituted through a child's identity and the significance of this on everyday lived experiences.
5. Examine how social, institutional and cultural constructions of childhood play a role in shaping children's identities, subjectivities and everyday lives.
6. Examine the ways in which children negotiate and construct their identities in contexts of diversity and difference.
7. Describe how children's rights and responsibilities are enacted by children and adults.
8. Describe how child-environment identity is connected to place, space, location and time.

Subject Content

1. Who is, and what does it mean to be a child in a postmodern world?
2. Analysis of texts, images and constructions about 'the child'.
3. Introduction to contemporary national and international theories and philosophies related to the child.
4. Significance of gender, sexuality, ethnicity, 'race', language, class, ability and religion and how they are constituted through a child's identity and everyday lived experiences.
5. Questions of subjectivity and a child's sense of self, body, and relationship to the world.
6. Children's negotiation of identity and difference in a globalised world.
7. Rights and responsibilities of the child.
8. Child-environment identity and connections to place, space, location and time through encounters with tangible social-cultural artefacts such as toys, homes, landscapes, animals, digital technology.
9. Constructions of diversity and difference in education and community settings.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

TEAC 2065 Digital Childhoods

Credit Points 10

Coordinator Joanne Orlando (https://directory.westernsydney.edu.au/search/name/Joanne Orlando/)

Description This subject aims to develop students' understanding of children and adolescents' engagement in a digital environment, and how their experiences contribute to their understanding of their world and their role within it. Students will critically explore multiple aspects of digital engagement. This will include the various ways that children and adolescents use technology; the educational, economic, social, cultural and political factors that mediate their experiences; and the implications of their digital engagement for play, learning, social engagements, and identity. Students will examine the social impact of technologies on children and adolescents, and identify strategies to deliver and effect ethical change. This subject is included in the Foundation Phase of the Bachelor of Education.

School Education

Discipline Teacher Education, Not Elsewhere Classified.

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Learning Outcomes

After successful completion of this Unit, students will be able to:

1. Engage critically with media and research literature regarding the digital worlds of children and adolescents.
2. Analyse the key understandings and discourses regarding children's and adolescents' use of technology.
3. Identify the factors that influence how a child or adolescent uses technology.
4. Identify how the use of technology impacts on the educational and social engagement of children and adolescents.
5. Analyse strategies for delivering and effecting ethical change arising from digital engagement.
6. Examine the ways in which childhood, adolescence and adulthood are constituted through education, technology and relations of power.

Subject Content

1. How children and adolescents use technology.
2. Debates surrounding children's and adolescents' technology use.
3. Factors that influence children's and adolescents' use of technology and the implications of their engagement.
4. How childhood and adolescence are constituted in relations of technology and power.
5. Safe, age-appropriate use of technology, in terms of diversity and difference, including gender/race/class/sexuality/geographical location.
6. The social impact of engagement with technology by children and adolescents, and what adults can learn from this.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Student Contribution Band

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Restrictions

Students must be enrolled in 1717 - Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe a range of practitioner research methods and classroom inquiry skills.
2. Identify KLAs where ICTs may be utilised for teaching and learning.
3. Locate, analyse and synthesise literature relevant to educational theories, curriculum topics and pedagogical issues.
4. Investigate and evaluate the role of ICT supported learning strategies across the primary curriculum.
5. Investigate and articulate their theories about learning with reference to the use of ICTs in educational contexts.
6. Design, plan and evaluate learning experiences based on the application of ICT related resources in a school setting

Subject Content

1. What is the action research model? In what ways are teachers also researchers?
2. Reflect on the first school visit. Choose an area of teaching interest and write research questions and sub-questions.
3. What ICT teaching opportunities, action research opportunities and logistical requirements are available?
4. Writing a lit review APA referencing and avoiding plagiarism. Literature searching, plagiarism and referencing.
5. Plan the second school visit. What needs to be negotiated? Going in with a plan and negotiate teaching opportunities based on what ICTs are available.
6. What ways can common ICT resources be integrated into your teaching plans and research agendas?
7. Data collection and analysis methods. Ethical issues to be considered.
8. Planning for assessment and evaluation.
9. Organise teaching, data collection, analysis and interpretation of findings. Plan ahead for data collection analysis and writing of journal article.

TEAC 3003 Community Responsive Pedagogies and Leadership

Credit Points 10

Legacy Code 102139

Coordinator Zara Ruggero (https://directory.westernsydney.edu.au/search/name/Zara Ruggero/)

Description The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This subject is designed to build on students' sociological understandings of primary schooling and how it impacts on First Nation peoples.. The subject builds on experiential, theoretical and curriculum knowledge developed in the course. Schools have a long tradition of working with communities at the 'chalkface' of social change. Such relationships are complex, evolving and spatially/temporally different because of a local/global sense of place and the socio-political context. Possibilities for promoting socially just practices for different communities are therefore contingent upon a range of strategies for inclusion. This subject examines theoretical frameworks that can assist in understanding the complexities of these processes and will incorporate a 5 day community engagement activity involving First Nation peoples. This subject is included in the Transition Phase of the Bachelor of Education.

School Education

Discipline Teacher Education: Primary

Level Undergraduate Level 3 subject

Equivalent Subjects EDUC 3001 - Communities and Primary Schools

Restrictions

Students must be enrolled in 1717 - Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the multiple dimensions of community; (Standards:1.3.1, 1.4.1, 2.4.1, 7.3.1)
2. Describe the relationship between place, identities and communities as they relate to schools and institutions; (Standards:1.3.1, 1.4.1, 2.4.1, 7.2.1, 7.3.1)
3. Critically analyse representations of school in community environments; (Standards:1.3.1, 1.4.1, 2.4.1, 7.2.1, 7.3.1)
4. Demonstrate knowledge of and respect for the diverse social, cultural, ethnic and religious backgrounds of students, including gender and sexuality and the effects of these factors on learning. (Standards: 1.1.1, 1.2.1, 1.3.1, 1.4.1, 2.4.1, 7.2.1, 7.3.1)
5. Examine the ways in which primary schools and Institutions can engage in capacity building of communities. (Standards: 7.2.1, 7.3.1)
6. Explain Aboriginal and Torres Strait Islander history, the impact of culture, cultural identity and diversity in rural, remote and urban schooling. (Standards: 1.1.1, 1.2.1, 1.3.1, 1.4.1, 2.4.1, 7.2.1, 7.3.1)
7. Identify specific learning needs of Aboriginal and Torres Strait Islander students in rural, remote and urban settings and contrast with other First Nation peoples. (Standards: 1.4.1, 2.4.1,4.1.1, 4.4.1, 7.2.1, 7.3.1)
8. Examine the roles and responsibilities of Aboriginal and Torres Strait Islander support personnel within systems and at school, and their contribution to education and community in improving educational outcomes for Aboriginal and Torres Strait Islander students. (Standards: 1.4.1, 2.4.1, 7.2.1, 7.3.1)
9. Assess and reflect upon International, National and State educational priorities and policies which impact on Aboriginal and Torres Strait Islander education compared to other First Nation peoples. (Standards: 1.4.1, 2.4.1, 7.2.1, 7.3.1)
10. Evaluate the role teachers, staff and schools play in the promotion of communication strategies which will enhance community consultation and the establishment of partnerships with Aboriginal and Torres Strait Islander parents and communities compared to other First Nation peoples. (Standards: 1.1.1, 1.2.1, 1.3.1, 1.4.1, 2.4.1, 7.2.1, 7.3.1)

Subject Content

1. What is a community? Rural, Isolated, inner and outer urban. How does the community affect subjects taught in schools?
2. Place and identity - role of visual narratives in school and community social life
3. Whiteness, power and the politics of advantage/outcomes
4. School/community relations and the education of Indigenous and non-Indigenous children;
5. Spatial dynamics of school buildings, playgrounds and structures/cultures of feelings in school-community contexts

6. The socio-political and socio-cultural dynamics of educational inequalities in school communities
7. Social justice theories, invitational thinking, multicultural perspectives, Social capital theory ? bonding, bridging and linking
8. What is leadership ? being an agent of change, being an advocate and different models of leadership
9. Transforming school cultures and engaging the community, long-term and short term strategies and tactics
10. Multiple ways of communicating to enhance school-community partnerships with First Nation peoples

TEAC 3004 Creative Arts Education

Credit Points 10

Legacy Code 102647

Coordinator Kelly Pecina (https://directory.westernsydney.edu.au/search/name/Kelly Pecina/)

Description This subject explores the importance of the creative arts in the primary classroom, addressing the content and pedagogies appropriate to dance, drama, music and visual arts. This subject has been designed to give students the opportunity to develop their knowledge, understanding, skills, confidence and competence in the five art forms of creative arts. It also provides students with the opportunity to develop their planning and teaching skills in the creative arts, through exploring pedagogies for the teaching of practical arts classes. This subject develops students as teachers who demonstrate creativity when teaching, empathy with diverse groups of student learners, a commitment to socially just schools and classrooms and who understand artistic processes. It aims to give students an understanding of the role of aesthetics, imagination and play in learning. An independent learning program also encourages learners to develop their own arts skills in three strands. This subject is included in the Development Phase of the Bachelor of Education.

School Education

Discipline Teacher Education: Primary

Restrictions

Students must be enrolled in the 1876 Bachelor of Education (Primary) or 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of arts education in the context of the Primary classroom, including theories, philosophies and practices of creativity, aesthetic learning and play;
2. Critically analyse research on the importance of arts education in the holistic development of children and its role in building positive school and community cultures;
3. Demonstrate an understanding of the content and central concepts of arts syllabus documents in a range of contexts, including Aboriginal and Torres Strait Islander perspectives;
4. Design and create learning experiences that value the distinct knowledge and skills associated with Dance, Drama, Music and Visual Arts education, along with an understanding of integrated approaches;
5. Plan and implement arts education experiences that use a range of pedagogical approaches, with a working knowledge of management strategies, assessment tools and resources appropriate for arts education;
6. Exhibit practical skills in the instruction of Dance, Drama, Music and Visual Arts, with a working knowledge of the literacy and numeracy demands of the Creative Arts.

Subject Content

- theory, principles and practices related to Arts education, including creativity, Aesthetic learning and play
- research on The role of Arts education in The holistic development of children and its contribution to positive school and community cultures

- Attributes, elements and The cognitive processes embedded in Dance, drama, music and Visual Arts
- curriculum concepts and content specific to Dance, drama, music and Visual Arts education including Aboriginal and Torres Strait Islander perspectives
- strategies to integrate art forms and integrate The Arts across The curriculum
- effective pedagogical approaches for Arts education, including management strategies, assessment tools and resources appropriate for Arts education
- practical skills in The instruction of Dance, drama, music, Visual Arts
- Critical reflection on students?f emerging skills and practices in Arts education

TEAC 3005 Critical Literacies

Credit Points 10

Legacy Code 102678

Coordinator Jaydene Barnes (https://directory.westernsydney.edu.au/search/name/Jaydene Barnes/)

Description This subject increases students' understanding of literacy as a dynamic, social and cultural practice. It explores the changing nature of literacy by globalisation, new technologies and the diversity of language/language dialects. Students will explore the importance of valuing children's culture, home language/dialect as an integral component to identity, particularly for bilingual and Aboriginal and Torres Strait Islander children. Issues of power and language are considered through social, cultural and critical theories surrounding diversity and difference, and how this shapes the decisions of educators to build the literacy capacities of all children. Students will learn about contemporary frameworks of literacy and language and draw on this knowledge to extend children's literacy learning. This subject is included in the Development Phase of the Bachelor of Education.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Students must be enrolled in the 1926 Bachelor of Education (Early Childhood) and have successfully completed 80 credit points to enrol in this subject.

Learning Outcomes

1. Examine contemporary views of literacy, literacy learning, and literacy as a social practice.
2. Analyse issues of language, culture and identity and the power of language to privilege/marginalise.
3. Discuss the diversity of literacies, languages and dialects in Australia and different approaches to the revival and retention of Aboriginal and Torres Strait Islander and community languages.
4. Apply respect for diverse literacies and understandings of issues of gender, class and language through a critical literacies approach.
5. Analyse family literacy practices and children's literacy funds of knowledge.
6. Plan literacy-enriched play that builds on children's family literacies and scaffolds children's literacy learning.

Subject Content

1. Literacy as a social practice
2. Multi-literacies; multimodality, diverse texts and literacy practices, diverse languages/dialects including Aboriginal languages and community languages, globalisation and new technologies
3. Bilingualism and Multilingualism
4. Language and power; linguistic and cultural capital
5. Diverse dialects including Aboriginal English; language loss, language maintenance & language revival
6. Children's funds of knowledge
7. The role of play-based pedagogies in literacy learning
8. Selecting and sharing children's literature

TEAC 3006 Education in a Cosmopolitan Society

Credit Points 10

Legacy Code 101661

Coordinator Zainab Mourad (https://directory.westernsydney.edu.au/search/name/Zainab Mourad/)

Description This subject responds to the question of what it might mean to educate "world teachers" for a cosmopolitan age where classrooms and schools are being shaped by the increasing mobility of ideas, people, technology, media and finance. For some time, multicultural education, as policy and practice, has dominated schooling in Australia. While this was an important period in Australia, times have changed. The globalisation of teaching is one dimension of this change as supranational bodies more and more shape what teachers do. Set against these global agendas are the mobilities that teachers must respond to at the local level. This subject examines cosmopolitan social and education theory as a means to understand these dynamics, framing teachers as agents of change.

School Education

Discipline Teacher Education

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the key ideas associated with the concept and the theories of 'cosmopolitanism';
2. Use theoretical explorations of cosmopolitanism to investigate contemporary ideas about Australian schooling;
3. Critically analyse the relationship between multiculturalism and cosmopolitanism;
4. Analyse the process of constructing educational disadvantage;
5. Critically analyse NSW Department of Education and Communities curriculum documents in the light of the above;
6. Explain cosmopolitanism through the analysis of multimedia texts;
7. Apply understanding of concepts in using multimedia.

Subject Content

1. Multiculturalism and the 'cosmopolitan turn'
2. Cosmopolitan scapes
3. Cosmopolitan imagination
4. Cosmopolitan learning

TEAC 3008 English Language Linguistics

Credit Points 10

Legacy Code 102476

Coordinator David McInnes (https://directory.westernsydney.edu.au/search/name/David McInnes/)

Description In 2021, this subject replaced by 102813 - English Talk. This subject offers students a formal study of the workings of the English language as it is used around the world. Using real-world examples, this subject builds on the content and skills which students have developed in the unit: English as an International Language. It prepares students with a thorough knowledge of variations in English across the globe, introducing them to the ways in which English varies at phonological, grammatical and register levels across contexts. This subject is essential for a student's development of more formal skills in the English language, developing their English knowledge and skill into a professional and personal asset.

School Humanities & Comm Arts

Discipline English as a Second Language Teaching

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Equivalent Subjects LANG 3099 - English Talk

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate a foundational knowledge of working grammar and linguistic concepts
2. Apply theoretical ideas to real-world practice of variant Englishes
3. Analyse power structures by contrasting theory and actual practices of language
4. Demonstrate applications of grammaticality to an analysis of textual examples of World Englishes.
5. Reflect on and explain miscommunication between Englishes, by proposing solutions at the grammatical and sociolinguistic levels.
6. Demonstrate knowledge of English grammar and linguistic concepts
7. Demonstrate applications of grammatical analysis to textual examples of World Englishes.
8. Reflect on and explain miscommunication between Englishes.

Subject Content

The essentials of the English language: grammar, punctuation, prosody, morphology, non-verbals, phonology, paralinguistics.
The concept of World Englishes and real differences in meaning and practice.
Communication styles: idiolects, familiolects, sociolects, language varieties and dialects.
Languages in contact and pidginisation.
The global context: lingua franca, language death and imperialism.
Sociolinguistics and power structures
Standardisation and non-standards: prescriptivism and descriptivism
Variation in the English language: grammar, punctuation, prosody, morphology, non-verbals, phonology, paralinguistics.
The details of World Englishes and real-world differences in meaning and practice.
Sociolinguistics and power structures.
Standardisation and non-standards.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Discourse analysis x 2	40 mins each	40	N	Individual
Short answer x 4	300 words each	60	N	Individual

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Equivalent Subjects TEAC 2047 - Policy Politics and Educational Futures

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss the political, ethical and contested nature of educational provision;
2. Articulate the relationship between agency, citizenship and democracy;
3. Define what it means to be a professional and the interrelationship between personal and professional values;
4. Explain the application and implications of traditional and contemporary frameworks and tools that support wise professional practice;
5. Analyse the embedded ethical and political dimensions of contemporary issues in early childhood policy and practice;

Subject Content

1. Module 1 Citizenship, Ethics and the Creation of Wellbeing
   - Values, citizenship and work as a professional
   - Ethics principles and frameworks
   - Wise professional practice: models and tools
2. Module 2: Educational Policy: Contents and Discontents
   - Exploration of contested values that underpin policy and pedagogical practice
   - Policy studies
   - The business of policy making
   - Contemporary issues and debates in educational policy
   - Institutions as sites for ethical encounters
3. Module 3: Ethically Informed Advocacy and Activism
   - Democratic processes for change
   - Ethical entrepreneurship
   - Futures, futures thinking and scenario planning

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Participation	900 - 1000 words (3 X 300 word discussions)	15	N	Individual

TEAC 3010 Health and Physical Education in the Primary Years

Credit Points 10

Legacy Code 102652

Coordinator Yasmen Kurtulmus (https://directory.westernsydney.edu.au/search/name/Yasmen Kurtulmus/)

Description This subject is designed to explore the content and pedagogies of Health and Physical Education (HPE) in the PDHPE NSW K-6 curriculum. Students will develop an understanding of effective pedagogies of HPE. The knowledge and skills developed in this subject can be applied in the other subjects of study in the course and Professional Experience subjects. This subject aims to develop teachers who demonstrate empathy with diverse groups of student learners and commitment to socially just schools and classrooms.

This subject is included in the Development Phase of the Bachelor of Education.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Students must be enrolled in the 1876 Bachelor of Education (Primary) or 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply the content and central concepts of the NSW K-10 PDHPE Syllabus and support documents within primary educational settings.
2. Create programs of integrated learning experiences covering all Health and Physical Education subject matters using a range of relevant pedagogies, assessment and teaching strategies.
3. Apply teaching strategies that are responsive to a diversity of student needs and backgrounds, including Aboriginal and Torres Strait Islander students, English as Additional Language students and students with additional needs.
4. Identify the role of Health and Physical Education within the broader school curriculum, including the relationship between Health and Physical Education contents and other Key Learning Areas of the curriculum and cross curriculum perspectives of literacy and numeracy.
5. Identify and critically analyse appropriate teaching and learning resources that can be used to enhance students f understandings of health concepts.
6. Apply appropriate Health and Physical Education pedagogies to improve learning.
7. Analyse the value of PDHPE as a lifelong learning experience through critically reflecting upon personal experiences with movement, and values and attitudes around health and physical activity.
8. Examine the Wellbeing framework and the relationship between wellbeing and students f learning engagement and educational outcomes.

Subject Content

1. Health and Physical Education syllabus content and pedagogical knowledge.
2. Quality teaching pedagogies and engaging learning experiences that achieve the aims and outcomes of the NESA Personal Development, Health and Physical Education syllabus documents.
3. Organisational management strategies for teaching and learning in Health and Physical Education.
4. Planning and writing effective learning experiences for Health and Physical Education.
5. Student assessment in the key learning area of Health and Physical Education.
6. Using information and communication technologies to design, deliver and evaluate learning experiences and improve their own professional skills.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 3012 Global and Community Citizenship in Early Childhood

Credit Points 10

Legacy Code 102675

Coordinator Katina Dimoulias (https://directory.westernsydney.edu.au/search/name/Katina Dimoulias/)

Description This subject explores the key concepts of learning and teaching in the areas of history, geography, civics and citizenship, and incorporates place studies, sustainability and environmental education. Aboriginal and Torres Strait Islander studies in birth to 5 years early childhood settings are a focus in this subject. The subject will explore a broad, complex and engaging field of study which reflects people as social beings who interact together and with the environment through and over time. Perspectives including those of Aboriginal and Torres Strait Islander peoples, socio-cultural influences and place-based pedagogies will be investigated. Students will be encouraged to explore their own place in Australian society and the way in which this contributes to their professional identity and teaching practice. This subject is included in the Development Phase of the Bachelor of Education.

School Education

Level Undergraduate Level 3 subject

Restrictions

Students must be enrolled in 1926 Bachelor of Education (Early Childhood) and have completed 160 credit points to enrol in this subject.

Learning Outcomes

1. Investigate local and global policies that respect cultural identity, rights and sustainability of marginal groups within society.
2. Explain the central concepts and a range of strategies for teaching history, geography, civics and citizenship, social and environment education and their relevance for early childhood settings.
3. Design curriculum and assessment, that incorporates family and community contexts and theories of place and place pedagogies, Aboriginal and Torres Strait Islander histories and contemporary perspectives on culture, diversity and inclusion.
4. Recommend appropriate community and educational resources to support children's deep engagement with society.
5. Identify appropriate resources to assist children to express their understandings of society, place and culture.
6. Describe the critical role of research in broadening their own professional knowledge and the knowledge of their students.

Subject Content

1. Theory related to teaching history, geography, civics and citizenship, social and environmental education
2. Contemporary Aboriginal and Torres Strait Islander perspectives
3. Cultural Identity and social policy
4. History, geography, civics and citizenship in the early childhood curriculum
5. Sustainability education and nature play in childhood
6. The role of professional research in understanding history, geography, civics and citizenship and curriculum development

TEAC 3013 Inclusive Practices

Credit Points 10

Legacy Code 102654

Coordinator Sarah Mcnabb (https://directory.westernsydney.edu.au/search/name/Sarah Mcnabb/)

Description Effective and inclusive teaching requires knowledge of how students learn as well as proficiency in applying appropriately tailored teaching strategies to cater to needs of all students. The subject provides a foundation of knowledge and practice that facilitates development of appropriate and inclusive attitudes and skills for teaching learners with diverse needs in the regular classroom. It will address professional skills, approaches and relevant legislation in the implementation of the principles of inclusive education practices in primary school settings. In particular, the capacity to structure individualised education programs will be developed drawing on practical experiences and a broad familiarity with the field. This subject is included in the Transition Phase of the Bachelor of Education.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Restrictions

Students must be enrolled in the 1876 Bachelor of Education (Primary) or 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply theoretical, policy and legislative understandings to the construction of supportive and inclusive learning environments;
2. Develop an appropriate attitude towards diversity and the approaches to inclusion within schooling systems;
3. Design individualised programs for learning and intervention based on sound understanding of theory and evidence-based strategies;
4. Apply development, learning and behaviour theories to construct educational programs that meet the diverse needs of learners;
5. Plan effectively for a diverse range of learners and use a variety of learning and teaching strategies and assistive technologies to engage learners to maximise their potential;
6. Apply appropriate and sensitive attitudes and practices in interactions with students with differing education needs;
7. Utilise practical approaches for promoting positive behaviour and supporting learner engagement;
8. Discuss theories of collaboration and the role of families, educators, colleagues, and professionals in supporting students with disabilities.

Subject Content

- Legislation and policy frameworks governing inclusion
- appropriate and sensitive attitudes towards diversity and inclusion
- theoretical understandings to The construction of supportive and inclusive learning environments

- identification and documentation of individual needs incorporating curriculum-based planning and assessment for learning
- design of individualised educational programs to meet The needs of learners with diverse needs
- structured Teaching strategies and processes for inclusion

TEAC 3015 Language and Literacy in Years 3-6

Credit Points 10

Legacy Code 102650

Coordinator Johanna Einfalt (https://directory.westernsydney.edu.au/search/name/Johanna Einfalt/)

Description The subject extends understandings of English content based on the strands of language, literature and literacy and the NSW Syllabus for the Australian Curriculum: English K-10 with a focus on

years 3-6. Students will draw on contemporary theories of literacy learning and teaching, and will examine a repertoire of teaching and assessment strategies for deconstructing and constructing a range of texts in classrooms. By investigating a range of written and multimodal genres, their textual structures and grammar, students will develop their meta-semiotic awareness. This awareness is crucial when they plan to teach primary school students literacy skills related to various learning areas of the Australian Curriculum. In this subject, students' technological, pedagogical and content knowledge is progressively enhanced to prepare them to teach innovatively with digital media with simultaneous infusion of emergent language and literacy practices. This subject is included in the Development Phase of the Bachelor of Education.

Level Undergraduate Level 3 subject

Pre-requisite(s) TEAC 3016 Language and Literacy in the Early Years or TEAC 1020 Language and Literacy 1

Restrictions

Students must be enrolled in the 1876 Bachelor of Education (Primary) or 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse formal and informal literacy events to identify how they promote children's literacies in the digital age.

2. Examine strategies for teaching language and literacy skills to students based on the Australian Curriculum: English and NSW English K-10 syllabus.

3. Evaluate assessment tasks and their accompanying marking criteria for monitoring students' progress in meeting language and literacy learning outcomes.

4. Distinguish the purpose, structure and grammar of informative, persuasive and imaginative texts.

5. Plan lesson sequences that use resources, including ICT, to support diverse learners (including EAL/D, Aboriginal and Torres Strait Islander students) in responding critically to multimodal texts and composing digital texts.

Subject Content

1. Children's literacies in the digital age.
2. Content and accompanying strategies for teaching language and literacy skills based on the Australian Curriculum: English and NSW English K-10 syllabus.
3. Assessment of language and literacy skills: principles, practices and strategies.
4. The purpose, structure and grammar of informative, persuasive and imaginative texts.
5. The language of meaning-making resources in various learning areas of the Australian Curriculum and NSW syllabuses.
6. Planning to teach multimodal literacies and authoring with a unit of work.
7. Digital media for language and literacy learning and teaching.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 3016 Language and Literacy in the Early Years

Credit Points 10

Legacy Code 102646

Coordinator Johanna Einfalt (https://directory.westernsydney.edu.au/search/name/Johanna Einfalt/)

Description The subject examines ways of understanding English content based on the strands of language, literature and literacy in the Australia Curriculum: English and the NSW K-6 English Syllabus. Students will understand how language skills are acquired and introduced to theories related to language and literacy learning, particularly from a sociocultural perspective. Students will explore the relationships between language, literacy and literature across a range of contexts with the focus on children in the early years, aged five to eight. Students will also develop an understanding of current theoretical and pedagogical approaches for English language teaching and learning with a focus on culturally and linguistically diverse learners. Students will determine young children's speaking, listening, reading, phonological and graphological awareness, and writing strengths and needs and develop strategies for teaching students in the early years. This subject is included in the Development Phase of the Bachelor of Education.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Students must be enrolled in the 1876 Bachelor of Education (Primary) or 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the nature of language acquisition, language and literacy development.
2. Examine strategies for teaching language skills based on the Australian Curriculum: English and the NSW Syllabus for the Australian Curriculum: English K-10 syllabus, in the early years i.e. 1st year of schooling (Kindergarten) to year 3.
3. Identify and evaluate strategies for teaching and assessing the strengths, needs and knowledge of a range of diverse learners in K-3 classrooms, particularly EAL/), Aboriginal and Torres Strait Islander learners and learners from low SES backgrounds.
4. Analyse and critique student assessment data, and apply assessment moderation principles to monitor progress towards meeting learning outcomes.
5. Apply understandings of pedagogy and curriculum design to plan engaging lesson sequences that use a range of resources, for example, high quality children's literature, and information and communications technology (ICT).
6. Synthesize opportunities for English language and literacy learning across the curriculum.

Subject Content

1. Overview of language and literacy acquisition and learning theories
2. Content and accompanying strategies for teaching language skills (talking & listening, reading, phonological and graphological awareness, viewing and writing based on the Australian Curriculum: English and the NSW K-6 English syllabus
3. Language and literacy teaching and learning for diverse learners including Aboriginal and Torres Strait Islander learners, EAL/D, Special Needs and Low SES Learners
4. Assessment of speaking, listening, reading, writing and viewing skills in the early years
5. Programming lesson sequences for language and literacy learning using a variety of texts
6. Planning and implementing English language learning across the curriculum

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject:

1. Students are required to complete a Working with Children Check leading to the issuance of a clearance number under the category of volunteer.

Students will need to:
i. Access the Commission for Children and Young People website and complete an online application form to generate an application number.
ii. Present an application number and identification to a NSW Motor Registry or Government Access Centre prior to issuance by mail a Working with Children Check number.
iii. Submit the letter with a valid Working With Children Check number to Student Central where the document is trimmed and recorded in Banner as a Special Requirement.

2. Students must have completed Child Protection Awareness Training (Online) prior to undertaking any visits/placements.

3. Students must have completed the ASCIA anaphylaxis e-training and registered their certificates with Student Central.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 3017 Learning Environments

Credit Points 10

Legacy Code 102679

Coordinator Michelle Gardner (https://directory.westernsydney.edu.au/search/name/Michelle Gardner/)

Description This subject engages students in exploring the role of physical environments that support children's learning in early childhood and community settings. Theoretical perspectives, including Aboriginal and Torres Strait Islander perspectives, sociocultural influences and place-based pedagogies will be investigated. Relevant policy and regulation documents around risk, play and pedagogy will be examined. Through field visits to early childhood and community settings, students will have the opportunity to plan and design indoor and outdoor learning environments that encourage investigation and discovery using natural and open-ended materials. The overall focus of this subject is for students to develop an understanding and appreciation for learning environments that promote a connection to

place and sustainability. This subject is included in the Development Phase of the Bachelor of Education.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Students must be enrolled in the 1926 Bachelor of Education (Early Childhood) and have successfully completed 120 credit points to enrol in this subject.

Learning Outcomes

1. Evaluate children's engagement and interaction with environments.
2. Analyse the role and impact of stimulating and engaging physical environments for the development of the child.
3. Apply key policy and regulatory documents to the planning and design of children's physical learning spaces.
4. Apply contemporary theoretical and philosophical perspectives related to the child nature relationship and sustainability education to inside and outside learning spaces.
5. Design a space for children incorporating space, place and time on the lived experience and identity of individual children.

Subject Content

1. Theories that integrate concepts of children, nature and play
2. Significance of space, place, time and silence as lived experience and its influence on everyday practice
3. Contemporary national and international theories and philosophies related to the child-nature relationship and sustainability education, including Aboriginal and Torres Strait Islander perspectives, socio-cultural influences and place-based pedagogies
4. Key policies and regulations for outdoor learning, play and inclusive physical environments
5. Documenting and implementing learning programs that support place-based pedagogies and sustainability learning
6. Researching inside and outside learning environments for and with children
7. The relationship between physical environments and children's experiences of place
8. The design of children's physical learning spaces

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject, pre-service teachers must have satisfactorily completed online Child Protection Awareness Training, have a current Working with Children Check, and the online course ASCIA Anaphylaxis: Australasian childcare.

TEAC 3019 Numeracy and Mathematics in Years 3-6

Credit Points 10

Legacy Code 102649

Coordinator Danielle Pearson (https://directory.westernsydney.edu.au/search/name/Danielle Pearson/)

Description This subject explores pedagogy specifically relating to the teaching and learning of primary mathematics in years 3 - 6. This subject is one of 16 subjects that provide opportunities for students as Pre-service Teachers to prepare for their future employment as a teacher and to engage with the key elements of the New South Wales Education Standards Authority (NESA). Students will develop skills in pedagogy and practice within the area of primary mathematics. The knowledge and skills developed in the other subjects of study in the course can be applied in this subject and the knowledge and skills developed in this subject can be applied in other subjects in the course. This subject is included in the Development Phase of the Bachelor of Education.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) TEAC 2043 Numeracy and Mathematics in the Early Years or
TEAC 1010 Early Primary Mathematics

Restrictions

Students must be enrolled in the 1876 Bachelor of Education (Primary) or 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the development of the concepts, skills and processes of mathematics related to the teaching of number and algebra, measurement and geometry, and statistics and probability for 8 to 12 year olds in accordance with the NSW K-10 Syllabus for the Australian Curriculum: Mathematics K-10 syllabus (for K-6), and the ACARA Numeracy Progressions;
2. Explain the importance of the Working Mathematically processes for primary school mathematics learners and teachers;
3. Plan effective and engaging teaching and learning experiences for mid to upper primary learners that include the use of a range of digital resources to enhance student outcomes;
4. Apply knowledge and understanding of a range of engaging pedagogies for teaching and learning mathematics, including cooperative learning, problem solving and investigation based approaches;
5. Evaluate student learning against curriculum requirements by interpreting student work samples, practising consistent and comparable judgements, and explain the importance of timely and appropriate feedback for student learning;
6. Apply teaching and assessment strategies for differentiating teaching and learning experiences in mathematics to meet the specific needs of students across the full range of abilities.

Subject Content

- Theories of engagement, Numeracy development and learning in mathematics for students in The primary years
- Implementation of the NSW K-10 Mathematics syllabus across all strands, with particular focus on the Working Mathematically strand
- Incorporation of Problem solving and investigation-based pedagogies in primary mathematics and Numeracy
- Strategies to address Affective Issues relating to The Teaching and learning of primary mathematics
- Effective use of digital technologies to enhance The Teaching and learning of mathematics and improve student engagement
- Catering to learners from diverse backgrounds (e.g. cultural and linguistic)
- Differentiation to address A range of abilities (including special needs and gifted and talented)
- Investigation of rich tasks to promote Critical Numeracy
- Effective assessment of mathematics and Numeracy
- Investigation of The requirements of The ACARA Numeracy Progressions

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject:

1. Students are required to complete a Working with Children Check leading to the issuance of a clearance number under the category of volunteer.

Students will need to:
i. Access the Commission for Children and Young People website and complete an online application form to generate an application number.
ii. Present an application number and identification to a NSW Motor Registry or Government Access Centre prior to issuance by mail a Working with Children Check number.
iii. Submit the letter with a valid Working With Children Check number to Student Central where the document is trimmed and recorded in Banner as a Special Requirement.

2. Students must have completed Child Protection Awareness Training (Online) prior to undertaking any visits/placements.

3. Students must have completed the ASCIA anaphylaxis e-training and registered their certificates with Student Central.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Critical Review	500 words	10	N	Individual
Professional Task	2000 words	40	N	Individual
Report	2000 words	50	N	Individual

TEAC 3020 Professional Experience 2: Working with Assessment Data for Instruction

Credit Points 10

Legacy Code 102648

Coordinator Kellie Jorda (https://directory.westernsydney.edu.au/search/name/Kellie Jorda/)

Description This subject focuses on student data and assessment in relation to Pre-service Teachers' curriculum specialisation. Students will develop the capacity to interpret student assessment data to inform their teaching as well as develop knowledge of formal and informal assessment strategies. The subject has a three-week (15 day) placement component, which provides opportunities to examine and interpret student data to inform planning and teaching. It also has one day on campus. Students will employ formal and informal assessment strategies to support student learning and inform teaching. Students

are required to analyse their own learning in relation to the Graduate Teacher Standards as a review of the progress of their Learning Portfolio is undertaken in this subject. This subject is included in the Development Phase of the Bachelor of Education.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) TEAC 2048

Restrictions

Students must be enrolled in the 1876 Bachelor of Education (Primary) or 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education and have successfully completed 160 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Interpret student English/Literacy or Mathematics/Numeracy data.
2. Explain how English/Literacy or Mathematics/Numeracy assessment data has been applied to their planning and teaching practice.
3. Apply assessment strategies, including informal and formal, diagnostic, formative and summative approaches to monitor and assess student learning.
4. Use informal and formal assessment strategies of student learning to inform teaching.
5. Interact ethically and professionally with staff, students and the broader school community.
6. Reflect on own learning, teaching and feedback from school-based and university-based teacher educators in relation to the Australian Professional Standards for Graduate Teachers.

Subject Content

- Informal and formal assessment strategies (including, diagnostic, formative and summative approaches to assess student learning).
- Student learning and assessment data
- Observing and recording student learning
- Planning cycle- using data and assessment to inform lesson planning
- Critical self-reflection with reference to the Australian Professional Standards for Graduate Teachers

Special Requirements

Legislative pre-requisites

1. Students are required to complete the two components of the Working with Children Check (WWCC) process leading to (a) the issuance of a clearance number under the category of volunteer and (b) verification of the clearance number with the NSW Department of Education.

a) Students will need to:

i. Access the Commission for Children and Young People website and complete an online application form to generate an application number.

ii. Present an application number and identification to a Service NSW office who will issue a Working with Children Check number via mail or email.

iii. Submit the letter with a valid Working With Children Check number via WesternNow Student Portal. The document is trimmed and recorded as a Special Requirement on your academic record. WesternNow Student Portal link (https://wsu.service-now.com/student/?id=sc_cat_item&sys_id=9c8b61a2dbbed8504f58e434059619ed)

b) Students will need to:

i. Access the NSW Department of Education WWCC Verification declaration form https://online.education.nsw.gov.au/jecpc/crc/wwcc.jsf

ii. Carefully read the information about Identity Documents and obtain a copy of the relevant ID documents.

iii. Complete and submit the verification declaration form.

iv. Once your WWCC verification is complete you will receive an email reply from the DoE Probity Unit confirming your WWCC number has been verified.

v. Submit the verification confirmation email via WesternNow Student Portal. The document is trimmed and recorded as a Special Requirement on your academic record.

2. Students must complete the two components of the NSW Department of Education's Child Protection Awareness Training (CPAT)

a) Students will need to:

i. Access the NSW Department of Education's MyPL website https://mypl.education.nsw.gov.au/

ii. Complete the online Child Protection Awareness Training: Induction

iii. Save certificate of completion

iv. Submit certificate via WesternNow Student Portal

b) Students will need to:

i. Access the NSW Department of Education's MyPL website https://mypl.education.nsw.gov.au/

ii. Complete the Child Protection Awareness Training (CPAT): Annual Update for the calendar year

iii. Save certificate of completion

iv. Submit certificate via WesternNow Student Portal

Both certificates will be recorded on your student record as Special Requirements with the end date for the Annual CPAT recorded. The CPAT: Annual Update will need to be renewed and submitted on an annual basis.

Students who have not completed both components of the Child Protection Awareness Training will need to withdraw from the subject.

3. Students must complete the ASCIA anaphylaxis e-training and submit their certificate to Submit certificate via WesternNow Student Portal.

4. Students must meet the Inherent Requirements for the Master of Teaching (Primary) (https://hbook.westernsydney.edu.au/programs/master-teaching-primary/).

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Report	800 words	S/U	Y	Individual
Professional Placement Performance	15 days	S/U	Y	Individual
Professional Placement Performance	15 days	S/U	Y	Individual
Portfolio	Update of portfolio begun in subject TEAC 2004 Being a Teacher	S/U	Y	Individual

TEAC 3021 Professional Experience 3: Engaging with Diverse Students and Communities

Credit Points 10

Legacy Code 102656

Coordinator Kellie Jorda (https://directory.westernsydney.edu.au/search/name/Kellie Jorda/)

Description This subject provides students with the opportunity to participate in a 20-day professional experience set in the context of their future profession and under the supervision of qualified teachers. As Pre-service Teachers, students will develop an understanding of diverse learners within specific school and classroom contexts. Individual students' strengths, needs and learning styles will be identified to support the design and delivery of teaching experiences that will enhance engagement and learning. The subject also gives students an opportunity to reflect on the processes involved in the teaching cycle, and refine their competencies as beginning teachers. Students are required to analyse their own learning in relation to the Graduate Teacher Standards as a review of the progress of their Learning Portfolio. This subject is included in the Transition Phase of the Bachelor of Education.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) TEAC 3020

Restrictions

Students must be enrolled in the 1876 Bachelor of Education (Primary) or 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education and have successfully completed 240 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply knowledge of research on how students' skills, interests and prior achievements affect learning and use this information to inform teaching strategies;
2. Implement lesson plans detailing objectives and outcomes, specifying content and pedagogy assessment, in consultation with the supervising teacher;
3. Evaluate students' specific strengths, needs and learning styles;
4. Design teaching and learning programs and/or lesson plans with differentiated tasks to meet the learning needs of individual students and that promote student engagement;
5. Use a variety of resources to support the learning style and needs of diverse students;
6. Execute an enthusiastic and positive attitude towards students as individuals and learners;
7. Design a respectful and collegial classroom environment where all students are valued and supported.

Subject Content

- Connecting research with practice to inform planning and Teaching
- Student diversity and how It affects Teaching and learning
- Identifying students' strengths, needs and learning styles
- Planning lessons and programming
- Differentiated learning tasks
- Resources to support students' needs
- The Professional Teacher - Planning, teaching; effective communication, professional interactions and ethical and professional conduct

Special Requirements

Legislative pre-requisites

1. Students are required to complete the **two** components of the Working with Children Check (WWCC) process leading to (a) the issuance of a clearance number under the category of volunteer and (b) verification of the clearance number with the NSW Department of Education.

a) Students will need to:

i. Access the Commission for Children and Young People website and complete an online application form to generate an application number.

ii. Present an application number and identification to a Service NSW office who will issue a Working with Children Check number via mail or email.

iii. Submit the letter with a valid Working With Children Check number via WesternNow Student Portal. The document is trimmed and recorded as a Special Requirement on your academic record.

TEAC 3023 Professional Experience 4: Teaching in Country

Credit Points 10

Legacy Code 102141

Coordinator Kellie Jorda (https://directory.westernsydney.edu.au/search/name/Kellie Jorda/)

Description The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This subject will build on previous Professional Experience in the program. Students will be placed for 30 days in one of the partner local/regional/rural schools with a high Aboriginal and Torres Strait Islander student population. Students are required to develop skills related to effective planning, programming, evaluating and teaching in a teaching context, which will be assessed against the Graduate Teacher Standards and as part of their Teaching Performance Assessment (TPA). Students will experience how school and classroom curricula and policy are influenced by the nature of the school's community.

Pre-requisite(s) TEAC 1029 AND
TEAC 2049 AND
TEAC 3040

Equivalent Subjects LGYA 1486 - Professional Experience 3 Teaching in Context - AREP

Restrictions

Students must be enrolled in 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify NSW syllabus documents, stage and outcome learning goals, plan lessons with a clear understanding of the research that will inform short and long term student progression
2. Plan a cycle of teaching, learning and assessment events involving individuals, small groups and whole classes activities across all KLAs.
3. Set a series of learning goals for a variety of learners exhibiting varying abilities and capabilities across a learning continuum using a range of teaching strategies.
4. Assess classroom data and make informed adjustments in the delivery of lessons over time which foster student's well-being and engagement.
5. Identify individual and group learning needs of the class, plan for 3 teaching episodes, that include the principles of assessment provisions for the delivery of appropriate timely e feedback and support to selected students about their learning.
6. Make informed judgements through a series of professions conversations with colleagues about how schools and teachers make different curriculum decisions depending on their understanding of the community context.
7. Assess their own individual learning needs through the application of self-reflective/reflexive engagements with National Professional Standards in the self-identification of their professional learning needs
8. Demonstrate graduate outcome achievement levels in the preparation of their professional portfolio

Subject Content

1. Professional Standards for Graduate teachers
2. Evidence-based practice and reflection– observing, analysing, reflecting and evaluating personal professional practice
3. Classroom management
4. Community contexts
5. Lesson planning, implementation and assessment for effective learning
6. Individual, group and whole class teaching
7. Undertake professional conversations regarding the collection and revision of classroom data with a supervising teacher/mentor/s.

Special Requirements

Legislative pre-requisites

1. Students are required to complete the **two** components of the Working with Children Check (WWCC) process leading to (a) the issuance of a clearance number under the category of volunteer and (b) verification of the clearance number with the NSW Department of Education.

a) Students will need to:

TEAC 3025 Researching Practice

Legacy Code 102681

Coordinator Denise Fraser (https://directory.westernsydney.edu.au/search/name/Denise Fraser/)

Student Contribution Band

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Restrictions

Students must be enrolled in 1879 Bachelor of Education (Birth – 5 Years) and have completed 160cp in that program.

Learning Outcomes

1. Analyse the key ideas and assumptions underlying aspects of research and education research debates.
2. Explore research processes and the role of each step of the action process for quality research.
3. Examine key factors influencing the practice and identities of teachers in contemporary education contexts.
4. Reflect critically on their own teaching and learning philosophy, ethical practice and pedagogical leadership.
5. Critique field experience and plan strategies for enhancing practice.
6. Apply the outcomes of the research process to support professional learning, reflection and continuous improvement.

Subject Content

1. The value of engaging with educational research
2. The use of research literature to identify and analyse the social, cultural, economic and political structures important to the role and identity of teachers
3. Research processes: research design, data analysis and ethical issues
4. Research on key factors of contemporary teaching and learning, professional practice and professional identities
5. The role and work of teachers as defined by the research literature
6. Action research and practitioner research principles and practices

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Reflection	1200 words	25%	N	Individual
Critical Review	1500 words	35%	N	Individual
Applied Project	1800 words	40%	N	Individual

TEAC 3026 Responsive Pedagogies

Credit Points 10

Legacy Code 102676

Coordinator Azadeh Motevali Zadeh Ardakani (https://directory.westernsydney.edu.au/search/name/Azadeh Motevali Zadeh Ardakani/)

Description Responsive, respectful and reciprocal relationships with children are a basic tenet of early childhood education and lead to quality outcomes for children. Interactions among children, adults and environments are key to children's learning. Responsive pedagogies use a relationship-based approach to nurture children and families' unique dispositions, cultural and social strengths. This subject promotes respectful interactions that are associated with social justice, equity, inclusivity and ethical practice. Responsive interactions require teachers to be engaged, to connect and use diverse, nuanced knowledge of curriculum and content to extend children's learning and thinking. This subject is included in the Development Phase of the Bachelor of Education.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Students must be enrolled in the 1926 Bachelor of Education (Early Childhood) and have successfully completed 160 credit points to enrol in this subject.

Learning Outcomes

1. Examine the connections between responsive pedagogies, the provision of quality early childhood education and care, and outcomes for children.
2. Identify the unique ways in which socially and culturally diverse families and communities enhance relationships and interactions between children and teachers.
3. Apply knowledge of child development and theories of learning to analyse childrens' dispositions, ways of communication and interactions.
4. Apply pedagogical principles for enhancing reciprocal interactions and positive relationships between children, and between children and adults/teachers.
5. Develop evidence-based strategies to connect, engage and build trusting relationships with children that enhance play, learning and well-being.

6. Critique responsive pedagogies for engaging in sustained shared conversations with children that extend children's interests, play and learning.

Subject Content

1. Relationship between quality outcomes for children's learning and responsive pedagogies
2. Children's language and communication development
3. Factors influencing children's interactions, development and learning
4. Socio-cultural approaches to analysing interactions and relationships
5. Responsive teaching strategies that scaffold and enhance children's learning
6. Responsive pedagogies that support participation and inclusion of children from diverse backgrounds.
7. Socially and culturally inclusive community and family approaches, (including Aboriginal and Torres Strait Islander families and communities) for nurturing relationships with children.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 3028 Fostering Positive Behaviour in the Early Years

Credit Points 10

Legacy Code 102682

Coordinator Kerry Staples (https://directory.westernsydney.edu.au/search/name/Kerry Staples/)

Description Educators have a key responsibility for guiding and facilitating young children's positive behaviours, their sense of belonging, and wellbeing. This subject provides students with an opportunity to analyse a range of theoretical approaches and various developmental and socio-cultural contextual factors that influence children's behaviours, learning and social interactions. Specifically, students will develop knowledge about diverse approaches to guiding children positively in partnership with families that are responsive to the children's needs, family's aspirations and expectations. Students will apply the legislative and ethical protocols in designing a guidance plan to support the development of positive behaviours and socio-emotional wellbeing in an early childhood setting. Students will also critically evaluate their personal and professional dispositions relating to guiding young children's positive learning and behaviours. This subject is included in the Transition Phase of the Bachelor of Education.

School Education

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Co-requisite(s) -

Restrictions

Students must be enrolled in 1926 Bachelor of Education (Early Childhood) (p. 290) and have completed 120 credit points to enrol in this subject.

Learning Outcomes

1. Analyse theoretical approaches and socio-cultural factors associated with children's learning, development, and behaviours.
2. Explore strategies for accommodating diversity in children's characteristics, learning and behavioural styles in relation to their social interactions.
3. Explain the importance of mental health and sense of wellbeing for children's overall development and learning.
4. Critique the importance of children's understandings of themselves and others and their capacity for agency and self-regulation
5. Examine guidance strategies and techniques for promoting children's positive learning and wellbeing in partnerships with families and other professionals.
6. Evaluate the impact of environmental factors on individual and group behaviour in educational settings and organise learning environments in ways that promote positive behaviours.
7. Apply knowledge of theories and guidance policies to plan, implement and evaluate a selected guidance approach to promote children's positive behaviours.
8. Reflect on personal dispositions and professional approaches in relation to learning and teaching, with a particular emphasis on monitoring and guiding children's behaviour.

Subject Content

1. Traditional and contemporary approaches to guiding children's behaviour, social-emotional development and social interactions
2. Theories of developmental, contextual, ecological factors that influence children's behaviour and learning
3. Educators', families', and communities' beliefs, values and attitudes about children's behaviours
4. Partnering with educators, families and other professionals to support children's prosocial behaviour, social-emotional health and well-being
5. Methods of documenting and analysing behaviour, interactions and social-emotional development
6. Approaches to understanding and responding to children's challenging behaviour
7. Planning positive learning environments that promote responsive interactions and relationships with children

8. Planning, implementing and monitoring prevention and intervention strategies with consideration of legislative, policy and philosophical frameworks

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Presnetation	5 minutes	20	N	Individual
Case Study	1,200 words	30	N	Individual
Essay	1,600 words	50	N	Individual

TEAC 3029 TESOL Curriculum Design

Credit Points 10

Legacy Code 102477

Coordinator Milena Ilisevic (https://directory.westernsydney.edu.au/search/name/Milena Ilisevic/)

Description This subject explores issues, approaches and stages in the TESOL curriculum design process within a range of contexts. It assists students to identify and implement effective strategies for planning, designing and evaluating language learning programs relevant to the needs of the learners and the contexts of learning.

School Humanities & Comm Arts

Discipline English as a Second Language Teaching

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Assumed Knowledge

Sufficient knowledge about teaching international English and English language teaching methodology.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Understand concepts and issues relating to the development of English as a foreign/second language curriculum;
2. Explore English language curriculum design in current Australian and international contexts;
3. Critically analyse approaches to curriculum design;
4. Analyse a range of language learning contexts and the implications for planning, programming and evaluating learning;
5. Analyse the equity issues in developing and evaluating programs;
6. Examine and critique various needs analysis approaches;
7. Develop skills in designing English language teaching syllabi;
8. Develop skills in planning, designing, evaluating programs for diverse groups of learners;
9. Develop skills in developing teacher skills and knowledge for planning and managing the materials design process; and
10. Enhance intercultural awareness in selecting teaching materials and teaching international English.

Subject Content

1. Explore the concept of curriculum in language learning settings-the historical background, underlying assumptions, current issues in adult learning and teaching and constraints
2. Understand contexts of language curriculum design in Australia and internationally
3. Discuss and model the curriculum design process, including
   - needs analysis
   - situation analysis
   - planning goals and learning outcomes
   - course planning and syllabus design
   - selecting, sequencing and organising content
   - selecting teaching and learning strategies
   - role and design of instructional materials
   - methods of student assessment
   - evaluating programs
4. Understand key Issues in curriculum design
   - Approaches to analysing needs
   - Ideology, objectives, language and non-language outcomes
   - Effective teaching- the institution, the teacher, the teaching and learning process
   - Intercultural awareness in selecting and using resources and materials
   - Managing resources and material development
   - Approaches to curriculum evaluation

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Critical Review	2,000 words	30	N	Individual
Applied Project	2,500 words	50	N	Individual
Presentation	10 minutes	20	N	Individual

TEAC 3030 TESOL Placement

Credit Points 20

Legacy Code 102478

Coordinator Ping Yang (https://directory.westernsydney.edu.au/search/name/Ping Yang/)

Description This subject provides students an opportunity to undertake a professional practice subject which consists of an internship in an English language teaching organisation for students of TESOL. It involves participation in the various aspects of the work of the teaching organisation, including classroom observation, service learning, supervised English language teaching practice component, and volunteer tutoring either in Australia or overseas. In-context placement experience assists TESOL students' career development.

School Humanities & Comm Arts

Discipline English as a Second Language Teaching

Student Contribution Band HECS Band 1 20cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) TEAC 2055

Learning Outcomes

On successful completion of this subject, students should be able to:

1. identify through observation various TESOL approaches in different teaching situations
2. demonstrate an understanding of successful TESOL teaching through observation of teaching and consultation with experienced teachers regarding their practice
3. analyse and meet students' learning materials and resources
4. adapt for use a variety of TESOL teaching materials and resources
5. plan, deliver and evaluate TESOL teaching and learning activities; and
6. demonstrate understanding of important non-teaching elements in language teaching and learning settings such as planning, classroom management, teacher collaboration, reflection of teaching materials design.

Subject Content

The placement builds on the knowledge and skills students gain in TESOL Teaching Methodology by situating it in differing TESOL settings such as ELICOS, AMEP, SEE, English for Specific Purposes, and general English skills. It involves in context experience with either teaching ESL in Australia or EFL overseas. The main components of the placement are:
1. Attending on-campus information sessions, meetings, group discussions, and presentations
2. Observation of classes in a range of English language teaching settings, consultation with teaching staff, team-teaching, and teaching of small withdrawal groups as appropriate in English language teaching organisations, and participation in all aspects of work in these organisations
3. Examination of commercial and teacher-produced teaching resources and materials, including computer assisted language learning resources, current curriculum approaches, and language assessment materials in the range of TESOL settings
4. Supervised practice teaching in the centre in which they are undertaking their internship or through an English language centre
5. Tutoring adult learners on a volunteer basis based on their learning needs
6. Practicum may be undertaken in the partner universities overseas depending on funding and placement availability

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Portfolio	2,000 words	30	N	Individual
Report	2,500 words	40	N	Individual

TEAC 3031 The Brain and Learning

Credit Points 10

Legacy Code 102207

Coordinator Jaydene Barnes (https://directory.westernsydney.edu.au/search/name/Jaydene Barnes/)

Description Interest in the relationship between the brain and how people learn is at an all-time high. Surprisingly, most theories of teaching and learning say little about the brain. In an age where 'brain-based' educational products are a multimillion-dollar industry, there is a need for students, parents, and anybody with an interest in education to have some basic knowledge of the brain. This subject is designed to provide students with a straightforward introduction into the limitations and possibilities of brain function, especially with respect to memory and learning. In addition, this subject also examines motivation, exceptional learners, and challenging groups.

School Education

Discipline Teacher Education

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Equivalent Subjects TEAC 3034 - Young People Their Futures and Education

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss aspects of the brain that underlie human cognition, problem-solving, motivation, and exceptional learners
2. Critique current theories of learning and teaching based on current knowledge of the human brain.
3. Apply current knowledge of the human brain to a range of teaching and learning scenarios.
4. Examine how deficiencies in brain development and social-contextual factors contribute to anti-social grouping of children and young people.

Subject Content

1. The brain, evolution and culture. The intricacies of brain function particularly in relation to human memory and implications for teaching and learning. Comparisons between knowledge that humans have evolved to acquire (biologically primary knowledge) and knowledge that is the product of cultural advancements from the last few millennia (biologically secondary knowledge).
2. Motivation and learning. The study of human motivation of Freudian, behaviourist, social-cognitive, and neuroscience perspectives.
3. Exceptional learners. The cognitive and social-affective characteristics of exceptional learners, particularly school students identified as gifted and talented.
4. Group relationships and challenging groups. The ?esocial?f brain, in particular the importance that school-aged adolescents place on their peer-networks as they engage in complex inter-group relationships.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 3032 Understanding and Teaching in Context

Credit Points 10

Legacy Code 102136

Coordinator Paul Rooney (https://directory.westernsydney.edu.au/search/name/Paul Rooney/)

Description The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. The subject aims to directly challenge students to inquire into, reflect upon, collect classroom data, analyse and respond to the data and subsequently begin to develop a repertoire of pedagogies that cater to the needs of learners within contexts which reflect the diversity of today's educational settings. The subject aims to develop skills related to effective planning, programming, evaluating and teaching in a wide variety of teaching contexts in Primary classrooms.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Co-requisite(s) TEAC 3040

Equivalent Subjects LGYA 1494 - Understanding and Teaching in Context - AREP

Restrictions Students must be enrolled in 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Assumed Knowledge

This subject draws upon, consolidates and synthesises previous knowledge form a range of subjects in years 1-3 as they relate to a classroom learner.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate literature related to school practices, school contexts, curriculum and teaching practices. (Standard 6.2.1)
2. Consolidate syllabus and pedagogical knowledge taught in previous units. (Standards 2.1.1, 2.3.1, 2.5.1, 2.6.1)
3. Critically examine significant equity issues for their impact on teaching and learning. (Standards 1.3.1 2.4.1, 4.4.1, 6.4.1)
4. Critically examine the theory and practice surrounding the pursuit of equality and equity. (Standard 1.3.1, 2.4.1)
5. Critically evaluate the features of planning, programming, assessing and evaluation strategies, in terms of their appropriateness for diverse learning contexts. (Standards 1.1.1, 1.3.1, 1.5.1, 2.4.1)
6. Plan, program, assess and evaluate for a group of learners in a specific learning context by translating personal philosophies, sound educational theory and system/school requirements into effective classroom practices. (Standards 2.1.1, 2.2.1, 2.3.1, 3.1.1, 3.6.1, 5.1.1, 5.5.1)

Subject Content

Understanding learner diversity.
The nature of learning: Implications for curriculum design
The curriculum and the learning environment.
Teaching in new times, the use and impact of technology
Fair Go project- and related literature
Assessment and the MeE assessment cycle
Programming for student engagement

Annotation of student work samples to demonstrate outcomes achieved
Presentation of MeE assessment & professional conversations

Assessment

TEAC 3036 Data and Assessment in the Primary classroom

Credit Points 10

Legacy Code 102754

Coordinator Paul Rooney (https://directory.westernsydney.edu.au/search/name/Paul Rooney/)

Description The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This subject investigates the functions and roles of assessment in K-6 classrooms. It considers ways in which assessment can provide positive support that enhances students' progression within the school context. Teacher education students will review, refine and develop their knowledge and skills connected with being an assessment-literate teacher in their own classrooms. The subject will explore both national and international data sets and how these inform policy, classroom practices and professional roles into the future.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Students must be enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine how assessment data are used to inform classroom and policy in national and International discourses;
2. Make judgements of students' assessment tasks to practice consistent and comparable judgements, including moderation;
3. Critically reflect on the purposes and roles of diverse assessment strategies and their impacts on student learning processes;
4. Explore strategies to record, represent and analyse students' assessment data;
5. Design assessment items that relate to student outcomes in a range of K-6 curriculum areas.

Subject Content

- data and assessment in primary classrooms
- keeping records, observational notes, anecdotal data and Numerical data
- Assessing students using standardised data: NAPLAN, and other school based literacy and Numeracy programs
- Data representation and interpretations used in the profession, including a range of data displays: ? Side by side column graphs ? Two categorical variables ? Digital media representations of data ? Statistics and probability: Baffling box plots
- using assessment data to improve student learning and outcomes
- formative assessment strategies that build visibility around student learning
- consistency of teacher judgement related to student assessment data

Assessment

TEAC 3037 Engaging in the Profession

Credit Points 10

Legacy Code 102755

Coordinator Paul Rooney (https://directory.westernsydney.edu.au/search/name/Paul Rooney/)

Description The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. Students need to have a variety of experiences that are set in the context of their future profession. Through these experiences they need to draw together, as a capstone, all the previous subjects in the course, integrating them through a well-balanced program that allows the students to refine their skills as beginning teachers. This gives them opportunity to reflect on the processes involved, identify their competencies and assist the school by recognising potential issues and assisting in implementation of the resulting praxis. This subject includes all areas of foundations and curriculum complementing a final practicum experience that will show the interrelationship between theory and practice. It also addresses issues that assist in the development of the individual student toward their transition into teaching. Students will produce a professional learning portfolio in this subject to demonstrate achievement of the Graduate Teacher Standards. The learning portfolio will enable students to reflect deeply on their emerging skills and understanding, towards development of a critical perspective of their practice as a teacher.

Level Undergraduate Level 3 subject

Equivalent Subjects LGYA 1496 - Engaging the Profession - (AREP)

Restrictions

Students must be enrolled in the 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the importance of and implement evidence-based practice in their teaching;
2. Investigate classroom and school environments;
3. Design an integrated three-week unit of work;
4. Select appropriate resources, including ICTs, when designing curriculum and learning experiences;
5. Reflect on their school-based experiences with a view to enhancing their teaching practice and understanding of the relationship between theory and practice;
6. Develop a teaching portfolio that demonstrates their teaching philosophy, professional learning, experience and achievement of the Graduate Teacher Standards;
7. Utilise ICT skills in the preparation of assessment tasks.

Subject Content

- Preparing for Teaching - Standards and Expectations
- Classroom management, school policies and learning environments
- programming and development of curriculum programs and units of work
- assessment across The key learning areas
- ICTs in learning and Teaching
- portfolios, and demonstrating achievement of The graduate teacher Standards
- beginning teachers: Teaching philosophy, being A reflective practitioner
- The professional teacher: evidence-based practice

TEAC 3038 Health and Physical Education 2

Credit Points 10

Legacy Code 102752

Coordinator Zara Ruggero (https://directory.westernsydney.edu.au/search/name/Zara Ruggero/)

Description The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This subject further builds students' knowledge and understandings of the NSW Syllabus for the Australian Curriculum: Health and Physical Education K-10 (incorporating Health and Physical Education K-6) with a focus on the personal development and health components. Through an examination of the syllabus, modules and support documents, students will develop the necessary skills to design an effective scope and sequence for K-6 Health and Physical Education (HPE) and develop a program of work suitable for a Year 5 - 6 learner. Assessment and evaluation will be addressed and the need to develop descriptive student profiles relating to student achievement of outcomes will be highlighted.

School Education

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) TEAC 2030 AND
TEAC 2058

Equivalent Subjects EDUC 2005 - Personal Development Health Physical Education 1 (AREP)

Restrictions

Students must be enrolled in the 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the central concepts, modes of enquiry and structure of H and PE, including recent theory and practice as relating to key topics of drug education; health education, road safety; and personal development. (Standards 2.1.1, 7.1.1, 7.2.1)
2. Evaluate the cultural, socio-economic and geographical factors of the health and personal development components of the H and PE syllabus with a specific focus on Aboriginal content. (Standards: 2.1.1, 2.4.1)
3. Explain the nature and role of H and PE as a discipline for supporting the development of health and wellbeing. (Standards 4.1.1, 4.4.1)
4. Apply understandings of assessment and students' learning in Years 5 – 6 within the H and PE key learning area.(Standards 1.5.1, 5.1.1.)
5. Design a variety of teaching, classroom behaviour and organisational management strategies to cater for a range of diverse learners. (Standards 4.1.1, 4.2.1, 4.3.1, 4.4.1)
6. Design learning experiences, lessons and lesson sequences, (Standards 1.1.1, 2.1.1, 2.5.1)
7. Undertake risk assessments using knowledge of the NSW syllabuses or other curriculum support documentation requirements. (Standards 7.1.1 7.2.1)
8. Explain the role and value of H and PE in the broader school curriculum, including literacy and. Numeracy in H and PE. (Standards 2.5.1, 3.5.1, 3.6.1)

Subject Content

1. Personal identity and how it impacts on our health.
2. Factors of resilience.
3. Concepts of health, safety (including road safety) and wellbeing.
4. Interpersonal skills that enable students to interact effectively and respectfully with others, build and maintain respectful relationships.
5. Cultural and socio-economic and geographical factors of health including Aboriginal and Torres Strait Islander specific content.
6. Drug education and lifestyle choices.
7. Syllabus delivery and classroom practices that meet Years 5-6 requirements for Health and Physical Education (H and PE).
8. Assessment practices for H and PE

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 3039 Mathematics 1: Geometry, Number and Algebra Years K-6

Credit Points 10

Legacy Code 102751

Coordinator John Ley (https://directory.westernsydney.edu.au/search/name/John Ley/)

Description The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This subject is designed to enhance teacher education students' understanding of the NSW Syllabus for the Australian Curriculum: Mathematics K-10. The subject provides greater understanding of the content areas of measurement, number, geometry, algebra and statistics in the K-6 classroom focusing on years 5 and 6 and into the secondary school mathematics curriculum. The subject makes clear links to secondary school (year 7) mathematics and will develop the students' conceptual understanding of mathematics and numeracy learning progression from primary to secondary school.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) TEAC 1028 AND
TEAC 1010

Restrictions

Students must be enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Design learning experiences and lessons with a focus on years 5 and 6;
2. Provide classroom opportunities to use continuous scales in measurement linked to an understanding of the number system, particularly of decimals;
3. Use appropriate measurement units based on the degree of accuracy required for a range of mathematical tasks;
4. Explore relationships within existing data sets and explore these data sets, using a variety of representations;
5. Use deductive reasoning to justify and support conclusions that are appropriate to the context;
6. Demonstrate the development of geometrical concepts and apply them in an appropriate manner to real world classroom teaching including ICT;
7. Demonstrate the relationship between patterns and algebra;
8. Selects and apply appropriate problem-solving strategies in undertaking mathematical investigations.

Subject Content

- Identifies, draws, and classifies 2 dimensional shapes and 3 dimensional objects and their properties
- Measure, construct and calculate angles. Geometry: 3D Space, 2D Space, Angles and Angle Relationships, Position, Properties of Geometrical Figures, Right-Angled Triangles, Trigonometry and Pythagoras?f Theorem
- Circle geometry
- explore relationships between number and algebraic representations of number sentences

- use Problem solving skills to complete modelling Activities
- Planning mathematics lessons and learning experiences for students in years 5 and 6

Assessment

Professional Task	1200 words	30	N	Individual

TEAC 3040 Professional Experience 3

Credit Points 10

Legacy Code 102750

Coordinator Jacqueline Humphries (https://directory.westernsydney.edu.au/search/name/Jacqueline Humphries/)

Description The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This subject is a 10 credit point subject. The subject is designed to enable students to have direct experience of teaching in schools, building towards a final professional experience. The Professional Experience stream integrates with the curriculum content and pedagogy delivered in other course subjects. The rationale behind this Professional Experience subject is to give students the opportunity to synthesise and apply their knowledge and skills from all previous subjects for a total of 20 days. The teaching block will enable students to build or cement relationships with a school community. Teacher Education students will be able to consolidate their teaching through the integration of theory and practice as their final preparation as beginning teachers.

School Education

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) TEAC 1029 AND
TEAC 2049

Incompatible Subjects TEAC 3022 - Professional Experience 3 Engaging with the Profession

Restrictions

Students must be enrolled in the 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the characteristics and elements of classrooms, teaching, learning and curriculum responding to the learning strengths and needs of students from diverse linguistic, cultural, religious and socioeconomic backgrounds;
2. Utilise outcomes-based planning in all subject areas and demonstrate aspects of professional teaching standards;
3. Communicate effectively with students in classrooms;
4. Implement and reflect upon various teaching approaches;
5. Implement and reflect upon various assessment and classroom management strategies;
6. Initiate and guide learning by using specific teaching strategies;
7. Apply and demonstrate their continuing understanding of curriculum through appropriate professional experience;
8. Demonstrate a reflexive understanding of their role in the teaching profession and the need to continually improve their professional knowledge and practice;
9. Demonstrate an understanding of how to develop strategies for the establishment of partnerships with parents and the community.

Subject Content

- Professional Standards for graduate teachers
- Evidence-based practice and reflection? observing, Analysing, reflecting and Evaluating personal professional practice
- Classroom management
- Community contexts
- Lesson planning, implementation and assessment for effective learning
- Programming and Teaching A unit of work
- Individual, group and whole class Teaching
- Looking at Classroom data and assessment

Special Requirements

Legislative pre-requisites

1. Students are required to complete the **two** components of the Working with Children Check (WWCC) process leading to (a) the issuance of a clearance number under the category of volunteer and (b) verification of the clearance number with the NSW Department of Education.

a) Students will need to:
i. Access the Commission for Children and Young People website and complete an online application form to generate an application number.

ii. Present an application number and identification to a Service NSW office who will issue a Working with Children Check number via mail or email.
iii. Submit the letter with a valid Working With Children Check number via WesternNow Student Portal. The document is trimmed and recorded as a Special Requirement on your academic record.
WesternNow Student Portal link (https://wsu.service-now.com/student/?id=sc_cat_item&sys_id=9c8b61a2dbbed8504f58e434059619ed)
b) Students will need to:
i. Access the NSW Department of Education WWCC Verification declaration form https://online.education.nsw.gov.au/jecpc/crc/wwcc.jsf
ii. Carefully read the information about Identity Documents and obtain a copy of the relevant ID documents.
iii. Complete and submit the verification declaration form.
iv. Once your WWCC verification is complete you will receive an email reply from the DoE Probity Unit confirming your WWCC number has been verified.

v. Submit the verification confirmation email via WesternNow Student Portal. The document is trimmed and recorded as a Special Requirement on your academic record.

2. Students must complete the **two** components of the NSW Department of Education's Child Protection Awareness Training (CPAT)
a) Students will need to:
i. Access the NSW Department of Education's MyPL website https://mypl.education.nsw.gov.au/
ii. Complete the online Child Protection Awareness Training: Induction
iii. Save certificate of completion
iv. Submit certificate via WesternNow Student Portal
b) Students will need to:
i. Access the NSW Department of Education's MyPL website https://mypl.education.nsw.gov.au/
ii. Complete the Child Protection Awareness Training (CPAT): Annual Update for the calendar year
iii. Save certificate of completion
iv. Submit certificate via WesternNow Student Portal
Both certificates will be recorded on your student record as Special Requirements with the end date for the Annual CPAT recorded. The CPAT: Annual Update will need to be renewed and submitted on an annual basis.
Students who have not completed both components of the Child Protection Awareness Training will need to withdraw from the subject.

3. Students must complete the ASCIA anaphylaxis e-training and submit their certificate to Submit certificate via WesternNow Student Portal.

4. Students must meet the Inherent Requirements for the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education (p. 299).

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Professional Placement Performance	20 days	S/U	Y	Individual
Professional Placement Performance	20 days	S/U	Y	Individual
Portfolio	12 pages	S/U	Y	Individual

TEAC 3041 Science and Technology 2

Credit Points 10

Legacy Code 102753

Coordinator Kay Carroll (https://directory.westernsydney.edu.au/search/name/Kay Carroll/)

Description The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This subject is designed to enhance prior work in the science and technology areas with a particular focus on the primary years: 3 – 6. The significance of children's views is emphasised in the selection, design and sequencing of activities for primary students in science and technology experiences through the four content areas: Biological sciences, Chemical sciences, Earth and Space sciences and the Physical sciences. Emphasis will be given to Aboriginal and Torres Strait Islander science elaborations and to develop authentic locally driven, land based teaching of content and classroom resources.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Students must be enrolled in 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate key Aboriginal land based content knowledge in the areas of Biological sciences, Chemical sciences, Earth and space sciences and the Physical sciences (Standard 2.1.1, 2.4.1) [CLO 1, 2, 3].
2. Plan lessons, lesson sequences and assessment items that engage and motivate students in science and technology. (Standard 2.2.1, 2.3.1, 3.1.1, 3.2.1, 3.6.1, 5.4.1) [CLO 1,2,3,4,5,7].
3. Articulate clear learning goals in preparing learning experiences for science and technology education that are appropriate for the cognitive, social and language abilities of students in years 3 – 6. (Standard 1.3.1, 1.4.1, 1.5.1, 5.1.1) [CLO 1,2,4,5,7].
4. Demonstrate proficiency with the content knowledge, pedagogical content knowledge and legislation appropriate to support learning in primary classrooms (years 3-6) (Standard 1.2.1, 1.6.1, 2.1.1, 2.5.1, 3.1.1, 3.6.1, 7.2.1).
5. Design learning experiences, lessons and lesson sequences that integrate the Australian curriculum's general capabilities into science and technology. (Standard 1.5.1, 2.5.1, 2.6.1, 4.1.1, 4.2.1) [CLO 1,2,3,4,5,6,8]

Subject Content

1. Knowledge, skills, values and attitudes necessary to cultivate interest and positive, informed ethical values, attitudes, and student self-efficacy in the sciences for students in Years 3 – 6.
2. The distinctive nature of scientific inquiry as it relates to the Aboriginal and Torres Strait Islander science elaborations.
3. Local knowledge sources and how they underpin pedagogies of teaching and learning science, and teaching and learning technology (design and digital).
4. Strategies for teaching and assessing Primary Science and Technology with a focus on the development of skills for practical problem and project-based learning that is student driven and /or student directed for students in Years 3 – 6.
5. Knowledge and understanding of the use and selection of digital technologies to support teaching and learning in Primary Science and Technology;
6. Supporting students with disabilities to access the Primary Science and Technology curriculum and demonstrate achievement;
7. Content requirements for the teaching of Biological sciences, Chemical sciences, Earth and Space sciences and the Physical sciences, for students in Years 3 – 6.

8. Knowledge and understanding of the Australian Curriculum's general capabilities.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Professional Task	1,500 words	40	N	Individual
Portfolio	2,000 words	60	N	Individual

TEAC 3043 Reading Children's Literature and Digital Texts

Credit Points 10

Legacy Code 102798

Coordinator Johanna Einfalt (https://directory.westernsydney.edu.au/search/name/Johanna Einfalt/)

Description In this subject students will gain knowledge and understanding about using children's literature and digital texts to teach reading, critical literacy, comprehension, media literacy and how texts convey meaning through choices in language (written) and images (visual). It will explore how children's literature and digital contexts can be used in a K-6 classroom for the teaching of the mechanics of reading, information literacy, comprehension skills (literal, implied, inferential), text design and the social construction of texts. It will develop students deeper understanding of the four resources model of reading and viewing: text decoder, text participant, text user and text analyst. This subject will examine literature experiences and practices in digital environments and the principles of interactivity, connectivity and access that now characterise the reading experience in the digital age. Through the subject, students will be introduced to a language to talk about both written and visual texts by focusing on the meaning making resources used in constructing the texts. This subject is included in the Transition Phase of the Bachelor of Education.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Restrictions

Students must be enrolled in one of the following programs;

- 1876 Bachelor of Education (Primary)
- 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education
- 1706 Bachelor of Arts
- 1655 Bachelor of Arts (Dean's Scholars)
- 1929 Bachelor of Arts (Pathway to Teaching Early Childhood/ Primary)
- 1651 Bachelor of Arts (Pathway to Teaching Primary)
- 1822 Bachelor of Arts (Pathway to Teaching Primary) Dean's Scholars
- 1818 Bachelor of Arts/Bachelor of Business
- 1842 Bachelor of Arts/Bachelor of Creative Industries
- 2537 Bachelor of Arts/Bachelor of Laws
- 2830 Bachelor of Arts/Bachelor of Laws (Honours)
- 1808 Bachelor of Arts/Bachelor of Social Science
- 3654 Bachelor of Information and Communications Technology/ Bachelor of Arts
- 3763 Bachelor of Science/Bachelor of Arts
- 6019 Diploma in Arts/Bachelor of Arts (Pathway to Teaching Primary)
- 6005 Diploma in Arts/Bachelor of Arts
- 6048 Diploma in Arts/Bachelor of Arts (Pathway to Teaching Early Childhood/Primary)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe how texts vary according to purpose, audience and situation;
2. Develop a metalanguage for understanding written, visual and multimodal texts;
3. Develop critical media literacies in close study of children's literature and digital texts;
4. Read, view, interpret and analyse a range of texts;
5. Demonstrate an awareness of how the selection of words, phrases, images, structure, composition influences meaning within different subject disciplines;
6. Apply understanding of texts to the teaching of reading.

Subject Content

1. Early reading and learning the mechanics of reading using children? fs literature and digital texts
2. Four resources model or roles of the reader: text decoder, text participant, text user and text analyst
3. Variation of written and visual texts according to their social purpose, audience and situation
4. Grammars and affordances of written, visual and multimodal texts
5. Critical media literacy, including fake news, posters, credibility of sources, (ethical) stance, related to choice of language and images
6. Representations of identity/identities and stereotypes in children's literature
7. Comprehending written and visual texts in different disciplines, for example, Science, History, Art, and in digital formats
8. Aboriginal and Torres Strait Islander literature, Asian literature and bilingual texts

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are

regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Poster	Moving or still image in e-form	20	N	Individual
Professional Task	2 x 750 word blog entries using book review scaffold	40	N	Individual
Professional Task	1,500 words	40	N	Individual

TEAC 3044 STEM Principles and Practices in the Primary Years

Credit Points 10

Legacy Code 102797

Coordinator Grant Jones (https://directory.westernsydney.edu.au/search/name/Grant Jones/)

Description The purpose of this subject is for students to gain exposure to authentic contexts for integrating science, technology, engineering and mathematics (STEM) and to develop knowledge and skills with designing and implementing STEM learning experiences. Students will have the opportunity to complete authentic interdisciplinary STEM tasks, and draw upon this experience to design and implement interdisciplinary STEM learning activities aligned to syllabus outcomes. This subject will allow students to simulate and evaluate the teaching practices associated with high-quality interdisciplinary STEM lessons. This subject is included in the Development Phase of the Bachelor of Education.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions Students must be enrolled in and have successfully completed 160 credit points in the Bachelor of Education (Primary).

Assumed Knowledge

1. Mathematics K-10 Syllabus (2012).
2. Science & Technology K-6 Syllabus (2017).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate a critical understanding of theoretical constructs underlying STEM curriculum development as it relates to classroom teaching practice and student learning;
2. Demonstrate a critical understanding of computational and algorithmic thinking;
3. Apply knowledge of the K-6 syllabus documents in developing authentic STEM learning experiences;
4. Incorporate design thinking into STEM curriculum integration and development;
5. Create and evaluate interdisciplinary STEM units which integrate STEM principles in meaningful ways across traditional subject boundaries.

Subject Content

1. What is STEM and where does it fit in today?fs educational climate?
2. Applying interdisciplinary STEM pedagogies in the classroom (K-6)
3. Authentic STEM tasks and what do they look like in the classroom
4. Designing interdisciplinary STEM learning experiences (K-6)
5. Computational Thinking through robotics and coding in the classroom
6. Design making with a STEM approach

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Simulation	500 words	15	N	Individual

TEAC 3046 Engaging Pedagogies

Credit Points 10

Legacy Code 102819

Coordinator Mary Southall (https://directory.westernsydney.edu.au/search/name/Mary Southall/)

Description This subject focuses on the evidence basis and critical practice of effective pedagogy. It considers coherent and deliberate planning and sequencing of tasks and lessons including curriculum-aligned learning outcomes, assessment and feedback to support student engagement and mastery. It critically explores the use of responsive pedagogies for teaching, including explicit teaching,

modelling and scaffolding. It evaluates the application of digital technologies and strategies for effective teaching. It challenges students to inquire and reflect upon contemporary issues that affect learning and teaching in classrooms, including working with students from low socio-economic backgrounds, culturally and linguistically diverse (CALD) students, students who have English as an additional language or dialect (EALD), Aboriginal and Torres Strait Islander learners, and students from diverse religious backgrounds. It enables students to investigate and consider a range of contemporary pedagogical approaches to facilitate substantive student engagement, and relate these to educational philosophy and contemporary learning theories. There are opportunities to consider the Quality Teaching Model and the Fair Go pedagogical model as frameworks that support student retention of information, engagement and connection to learning. This subject is included in the Development Phase of the Bachelor of Education.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Students must be enrolled in the 1876 Bachelor of Education (Primary) or 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education and have successfully completed 160 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate effective planning and sequencing of tasks to become increasingly challenging for students to support mastery.
2. Demonstrate understanding of explicit teaching, modelling and scaffolding practices that support student learning.
3. Apply evidence-based assessment and feedback practices to promote student learning.
4. Uses digital technologies and strategies for effective teaching.
5. Critically evaluate the effectiveness of responsive pedagogies in promoting student engagement and learning.
6. Critically reflects on how effective pedagogical models such as Quality Teaching Model and Fair Go Pedagogical frameworks supports student learning, inclusion and engagement

Subject Content

- The key features of coherent and deliberate planning and sequencing of tasks and lessons including curriculum-aligned learning outcomes, clear descriptions of how students will show evidence of mastery, the common progression of learning in a subject area and the critical curriculum knowledge needed for students to progress.
- The theory and application of explicit teaching, modelling and scaffolding practices for learning.
- The development and delivery of challenging learning practice to promote learning retention.
- Use of responsive pedagogies for teaching.
- Use of formative assessment and feedback in learning.
- Effective pedagogical models, such as Quality Teaching Model and Fair Go Pedagogical frameworks and how to apply this evidence-based framework to the critical analysis and improvement of classroom pedagogy
- Pedagogies that promote student engagement and mastery of learning.
- Use of digital technologies for effective teaching

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Presentation	3-4 minutes	30	N	Individual
Professional Task	800 words + original and revised lesson plans attached	30	N	Individual
Reflection	1,500 words	40	N	Individual

TEAC 3047 Pedagogical Leadership

Credit Points 10

Legacy Code 102822

Coordinator Kumara Ward (https://directory.westernsydney.edu.au/search/name/Kumara Ward/)

Description Early childhood teachers have a significant role in providing the pedagogical leadership required to deliver quality early childhood services for children and families. This subject introduces key concepts of pedagogical leadership which are then applied in other subjects in the course. In this subject students examine a range of theoretical perspectives and approaches to curriculum and analyse the ways different theories and approaches shape pedagogical practices. Students will have opportunities to research contemporary theories of early childhood education, reflect on their own beliefs and values, refine their personal philosophy of teaching and learning, and consider the implications for their future role as pedagogical and educational leaders in early childhood settings. This subject is included in the Development Phase of the Bachelor of Education.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Students must be enrolled in the 1926 Bachelor of Education (Early Childhood).

Learning Outcomes

After successful completion of this subject, students will be able to

1. Examine and theorise the role of the pedagogical leader in the provision of quality early childhood programs.
2. Synthesise a range of theoretical perspectives on early childhood education.
3. Explain the theoretical underpinnings of current Australian legislative frameworks and policy in early childhood education.
4. Critique the influence of different contexts on curriculum, curriculum approaches and pedagogies.
5. Examine personal values and beliefs in relation to professional and ethical practice.
6. Create a personal philosophy of learning and teaching that draws on contemporary theories and research.
7. Critique a range of perspectives on school readiness and approaches to transition to school and their implications for programs for children aged four and five years.
8. Explain the continuum of children's learning from home and prior to school settings and the early years of school including the implications for practice.

Subject Content

- Theoretical perspectives including historical and comparative perspectives on early childhood education - e.g. behaviourism, developmentalism, ecological theory, sociocultural theory, postmodernism, poststructuralism, sociology of childhood, reconceptualising early childhood and nature pedagogies
- Current research on approaches to curriculum and pedagogy - e.g. play-based learning and pedagogy, intentional teaching, sustained shared thinking, reflective practice, pedagogical documentation, collaborative partnerships with families and other educators, funds of knowledge and implications for practice
- Legislative frameworks and policies, e.g. DEEWR National Quality Standards, Early Years Learning Framework, and the role of the early childhood educator as a pedagogical leader.
- Processes of evaluation and critical reflection, tools for reflection, reflective practice
- Developing a philosophy of education that draws on critical reading, research and reflection
- Continuity of learning and transitions for children

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Critical Review	1,200 words	30	N	Individual
Reflection	1,200 words	30	N	Individual

TEAC 3048 Creative Arts 2

Credit Points 10

Legacy Code 102851

Coordinator Sarah Pacey (https://directory.westernsydney.edu.au/search/name/Sarah Pacey/)

Description This subject examines theoretical models and pedagogical practices for using Dance, Drama and Media Arts in primary classrooms and builds on the subject 102125 Creative Arts. Students will develop a range of skills required in the teaching of the arts that support young learner's self-efficacy and awareness. Aboriginal media and performing arts form the basis for strong cultural identity formations for all students. The subject focuses on positive media representations, personal histories and experiences that shape and influence Aboriginal and Torres Strait Islander peoples and their community life.

School Education

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) TEAC 2013

Incompatible Subjects TEAC 2059 - Creative Arts 2

Restrictions

Students must be enrolled in the 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explore the principles, practices and pedagogies related to the teaching, learning and assessment of Dance, Drama, and Media Arts
2. Demonstrate a range of practical skills, critical knowledge in the discrete forms required for the teaching of Dance, Drama, and Media Arts

3. Apply critical reflection to their own learning and practice within each of the art forms of Dance, Drama, and Media Arts
4. Identify and plan for Aboriginal perspectives embedded in the new NSW Creative Arts syllabus for the Australian Curriculum
5. Design programs, resources, assessments and learning sequences for inclusive creative arts education in the primary classrooms.

Subject Content

Media
- Two-dimensional media areas- drawing, painting, printmaking and photography
- Three- and four-dimensional areas such as sculputre and object design
- artists and art appreciation linked to media including Aboriginal media artists
Dance
- Risk and Safe Dance practice
- Dance techniques/s in The performance of dances including Aboriginal Dance forms
- Processess: exploratikon; improvisation, and responses to a variety of stimuli
- Choreographic forms: particularly narrative forms from A range of cultural groups.
- developing Dance appreciation
Drama
- making drama in A collaborative drama and theatre environment
- performing drama using A variety of performance techniques
- developing appreciation of drama and theatre

Assessment

TEAC 3049 Mathematics in Early Childhood

Credit Points 10

Coordinator Jana Kovtun (https://directory.westernsydney.edu.au/search/name/Jana Kovtun/)

Description This subject explores the powerful mathematical and numeracy ideas that shape children's lives from birth to five years. Students will develop the ability to identify, assess and plan for young children's diverse mathematical and numeracy understandings, whilst using current curriculum frameworks and theoretical underpinnings to guide them. This subject will support students to make connections to mathematics and numeracy in everyday life, develop knowledge of effective pedagogical practices, and develop positive dispositions towards being a teacher of mathematics in the early years. This subject is included in the Development Phase of the Bachelor of Education.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Students must be enrolled in 1926 Bachelor of Education (Early Childhood) (p. 290).

Learning Outcomes

1. Apply deep understanding of numeracy and mathematical concepts, skills and processes relevant to young children aged birth-5 years.
2. Examine effective pedagogical practices that contribute to maximising children's understanding of mathematics and numeracy.
3. Apply principles and learning outcomes of the Early Years Learning Framework for Australia and the Mathematics K-2 Syllabus to plan rich mathematics experiences.
4. Appraise young children's early mathematical thinking skills, diverse abilities, and needs, to plan creative, engaging mathematics experiences.
5. Examine the role of mathematics and numeracy in everyday contexts such as home, educational settings and community.
6. Evaluate theoretical approaches and current mathematics education literature and ICTs in supporting children's mathematics and numeracy development.
7. Discuss the importance of developing a positive disposition towards mathematics and numeracy.

Subject Content

1. The innate presence of mathematical and numerate thinking in young children from birth-5 years, including the role of language and real-life experiences
2. Teaching strategies including questioning and assessment to promote mathematical understanding
3. The role of concrete materials, technology, stories, investigation, problem solving and play in maximising learning opportunities
4. Implementing current curriculum (NSW Mathematics K-2 Syllabus) and curriculum frameworks (EYLF) for children birth-5 years
5. Early understanding of number, measurement, statistics and probability concepts.
6. Catering for diverse learners, skills and needs
7. The relevance of theory and research in supporting mathematics and numeracy development
8. Instilling positive attitudes and values to become confident teachers of mathematics

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	20 questions	20	N	Individual
Case Study	1800 words	40	N	Individual

TEAC 3050 Professional Practice Birth - 3 Years

Credit Points 10

Coordinator Jaydene Barnes (https://directory.westernsydney.edu.au/search/name/Jaydene Barnes/)

Description Students will complete a 30 day professional experience placement which includes a 10-day placement with children under the age of two years and a 20-day placement with children two – three years of age. Prior to the placement, students will engage in a series of workshops focused on developing their knowledge, skills and pedagogy. In this subject, there is a strong focus on building relationships with children, families and staff as well as adhering to work health and safety and the Australian Children's Education and Care Quality Authority's (ACECQA) National Quality Standard. Students will observe and assess children's play and learning within the socio-cultural context. They will use this knowledge to create and facilitate responsive and engaging play-based experiences that extend and enrich young children's learning. This subject requires students to apply the principles, practices and outcomes of Belonging, Being and Becoming: The Early Years Learning Framework for Australia (V2.0). This subject is included in the Development Phase of the Bachelor of Education.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) TEAC 2023 Engaging in Early Childhood

Restrictions

Students must be enrolled in 1926 Bachelor of Education (Early Education) and have completed 160 credit points before enrolling in this subject

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Apply professional and ethical practice, including appropriate communication skills, to working with other educators.
2. Reflect on personal learning and practice, feedback from field-based and university-based supervising teachers and the Australian Professional Standards for Teachers to establish professional goals that will improve practice.
3. Provide culturally responsive curriculum and pedagogies to ensure continuity of care for children.
4. Analyse children's play, learning, relationships and dispositions to identify children's capabilities and emerging understandings to enhance connections between home, community and education contexts.
5. Evaluate play-based experiences that have been designed and implemented, and that extend children's capabilities, interests and funds of knowledge.
6. Apply the Belonging, Being and Becoming: The Early Years Learning Framework for Australia (V2.0) principles, practices and learning outcomes in documentation, assessment and planning.
7. Interact with children in ways that support children's sense of identity and wellbeing, build relationships, guide behaviour and extend learning.
8. Implement practices that promote children's health, safety and wellbeing in environments that reflect legal requirements and current recommendations in the areas of health and safety.

Subject Content

1. Professional and Ethical Practice
   - Introduction to Australian Professional Standards for Graduate Teachers
   - The National Quality Standard for Early Childhood Education Care
   - Legislation and recommendations for children's health, safety and wellbeing
   - Work health and safety protocols in early childhood services
   - Working with the ECA Code of Ethics
   - Reflective practice – including goal setting
   - Communication and developing partnerships
   - Creating a portfolio of work
2. Documentation and Assessment of Children's learning
   - Documenting family and community experiences and funds of knowledge
   - Documenting and analysing children's play, learning, dispositions and relationships
   - Using Belonging, Being and Becoming: The Early Years Learning Framework for Australia (V2.0).as an integral part of the planning cycle
   - Developing strategies and pedagogies that build relationships, extend learning and guide positive behaviour
3. Meaningful Curriculum
   - Culturally responsive curriculum: connecting to children's family, community experiences and funds of knowledge that demonstrates respect for diversity, inclusivity and Aboriginal and Torres Strait Islander perspectives
   - Dispositions

- Learning Processes
- Play-Based pedagogie

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject:

1. Students are required to complete the Working with Children Check (WWCC) process leading to the issuance of a clearance number under the category of volunteer. Students will need to:
i. Access the Commission for Children and Young People website and complete an online application form to generate an application number.
ii. Present an application number and identification to a Service NSW office who will issue a Working with Children Check number via mail or email.
iii. Submit the letter with a valid Working With Children Check number via WesternNow Student Portal. The document is recorded as a Special Requirement on your academic record. WesternNow Student Portal link

2. Students must complete the two components of the NSW Department of Education's Child Protection Awareness Training (CPAT).

a) Students will need to:
i. Access the NSW Department of Education's MyPL website https://mypl.education.nsw.gov.au/
ii. Complete the online Child Protection Awareness Training: Induction
iii. Save certificate of completion
iv. Submit certificate via WesternNow Student Portal
b) Students will need to:
i. Access the NSW Department of Education's MyPL website https://mypl.education.nsw.gov.au/
ii. Complete the Child Protection Awareness Training (CPAT): Annual Update for the calendar year
iii. Save certificate of completion
iv. Submit certificate via WesternNow Student Portal
Both certificates will be recorded on your student record as Special Requirements with the end date for the Annual CPAT recorded.
The CPAT: Annual Update will need to be renewed and submitted on an annual basis. Students who have not completed both components of the Child Protection Awareness Training will need to withdraw from the subject.

3. Students must complete the ASCIA anaphylaxis e-training and submit their certificate to Submit certificate via WesternNow Student Portal.

4. Students must meet the Inherent Requirements for the Master of Teaching (Birth – 5 Years / Birth -12 Years)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Professional Placement Performance	30 days comprised of 10 days supervised placement 1 (under 2 years); 20 days supervised placement 2 (2-3 years).	S/U	Y	Individual
Professional Placement Performance	As above	S/U	Y	Individual

TEAC 3051 Creativity and Cultural Wellbeing for Communities

Credit Points 10

Coordinator Karin Louise (https://directory.westernsydney.edu.au/search/name/Karin Louise/)

Description Creativity and cultural wellbeing explore how art making can foster individual, community wellbeing and global citizenship. Cultural wellbeing is broadly understood as the vitality of relationships between people, place and the freedom to participate in recreation, creative and cultural activities. In the practice-based modules students will experiment with art genres and reflect on how creative processes can facilitate embodiment, belonging, safe spaces for cultural expression, intergenerational wellbeing, relationship to place, creative agency and adaptability. Students will identify a social issue that is important to them or their community and apply design strategies to lead a creative community project.

School Education

Discipline Teacher Education, Not Elsewhere Classified.

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Learning Outcomes

1. Articulate how art making and creative practice are important in cultural meaning making using a First Nations perspective.
2. Integrate theoretical perspectives on arts and culture through investigating the practice of creativity and wellbeing.
3. Critically analyse the role creative cultural practices play in contemporary society.
4. Reflect on personal experience and intergenerational perspectives that influence life sustaining practices for cultural wellbeing.
5. Create and exhibit artefacts that respond to the cultural histories of individual and/or community wellbeing.
6. Document and critically review personal experiences of learning through creative processes such as digital and other technologies.

Subject Content

1. Cultural meaning making in place. Story and Art in First Nations and diverse cultures
2. Safe spaces for creative expression: Boundaries, Ethics, Mindfulness

3. Cultural Creative practices: Creativity as an expression of being and belonging
4. The Cultural Wellbeing Framework and the role of intergenerational wellbeing
5. Cultural histories and creative agency: power, autonomy and voice in creative practice
6. Ecologies of wellbeing; Creative process and sustainable practices
7. Making Community: Curating experiences for community engagement
8. Art and Activism as responses to planetary wellbeing

Special Requirements

Essential equipment

Computer, smart mobile phone with camera, apron.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Essay	1800 words	40	N	Individual
Applied Project	15 minutes	40	N	Individual
Reflection	3 minute video + 1000 words	20	N	Individual

TEAC 3052 Connecting with Regional, Rural and Remote Communities and Schools

Credit Points 10

Coordinator Maree Skillen (https://directory.westernsydney.edu.au/search/name/Maree Skillen/)

Description This subject provides an opportunity to engage with rural, remote and regional schools and communities. The subject explores the context of regional, rural and remote schools and considers how localised communities can respond to learner needs to address equity and opportunities for further academic success. The subject focuses on how teachers can create a classroom of explicit teaching pedagogy and high expectations in these diverse settings. The subject explores how technology and pedagogy can be maximised to support remote learning. Teacher resilience and career planning in these contexts is explored as part of a continuous cycle of learning, teaching and leading. There is the opportunity for a short immersion and case study in a regional context in this subject.

School Education

Discipline Teacher Education, Not Elsewhere Classified.

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Learning Outcomes

1. Demonstrates understanding of the contextual factors of regional, rural and remote communities and schools.
2. Critically reflects on the challenges and opportunities for learning in regional, rural and remote schools.
3. Analyses the needs and goals of schools in regional, rural and remote communities.
4. Applies theories about evidence-based practices for regional, rural and remote communities.
5. Evaluates explicit pedagogies and strategies for differentiation that support student engagement and quality learning.

Subject Content

• Context of regional, rural and remote schools and understanding communities and schooling.

• Creating a classroom of explicit teaching pedagogy and high expectations.
• Understanding equity and diversity in schools across regional, rural and remote schools.
• Engaging the school community with education.
• Responding to learner needs in regional, remote and rural schools.
• Understand support networks for early career teacher in regional, rural and remote schools.
• Understanding curriculum and teaching across multiple stages.
• Engaging with technologies for learning in regional, rural and remote areas.
• Understanding the learning, teaching, leading cycle for professional growth.
• Learning about curriculum collaborations with communities and schools.

Special Requirements

Legislative pre-requisites

Prior to enrolling in subject:

1. Students are required to complete the TWO components of the Working with Children Check (WWCC) process leading to (a) the issuance of a WWCC number by the Office of the Children's Guardian under the category of volunteer, AND (b) verification of the WWCC number with the NSW Department of Education.

2. Students must have completed Child Protection Awareness Training (Online) and the Child Protection Update (for the current year) prior to undertaking any visits/placements.

3. Students must have completed the ASCIA anaphylaxis e-training

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

TEAC 4002 Developing Primary Mathematics

Credit Points 10

Legacy Code 102135

Coordinator John Ley (https://directory.westernsydney.edu.au/search/name/John Ley/)

Description The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This subject is designed to extend the development of mathematical concepts, skills and understandings for children from years 3 to 6 based on the Australian curriculum and the NSW Educational Standards Authority (NESA) requirements. An awareness of relevant research and curriculum documents, combined with the practical knowledge of teaching, learning and assessment strategies, will assist teachers to program and implement a series of investigative experiences that will enhance the conceptual knowledge of their students.

School Education

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 4 subject

Equivalent Subjects EDUC 2009 - Developing Primary Mathematics (AREP)

Restrictions

Students must be enrolled in 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the central concepts, modes of enquiry and structure of Mathematics.
2. Design and implement lesson sequences using developing knowledge of the NSW Syllabus For The Australian Curriculum: Mathematics K-10 Syllabus (K-6 Section).and recent Mathematics' theory and practice.
3. Apply the five interrelated processes of questioning, applying strategies, communicating, reasoning, reflecting when working mathematically.
4. Describe the five content strands of Number, Patterns and Algebra, Data, Measurement and Space and Geometry up to stage 4.
5. Apply concepts of assessment and children's learning within the Mathematics K-6 Learning Area and up to Stage 4.
6. Design and implement lesson sequences using knowledge of the NSW Syllabus For The Australian Curriculum: Mathematics K-10 Syllabus (K-6 Section) or other curriculum requirements.
7. Explain the role and value of Mathematics in the broader school curriculum and the relationship between numeracy and literacy.

8. Utilise a range of resources to meet the needs of diverse K-6 students in Mathematics K-6 including an Indigenous Australian perspective and catering to students with special needs.

Subject Content

1. The nature of mathematics learning and current trends in the teaching/learning of mathematics as a way to interpret the world, stages 2-4.
2. The place of communicating and problem solving, reasoning, understanding and fluency in working mathematically.
3. The development of number concepts and the number operations - addition and subtraction, multiplication and division, fractions and decimals.
4. The development of understanding patterns and algebra.
5. The development of measurement (length, area, volume and capacity, mass, time) and geometry concepts (3D, 2D space, angles and position)
6. The development of rational number concepts and data collection, including planning, gathering, organising, applying data to solve problems and communicating results through the selection of appropriate representations.
7. The development of chance concepts
8. Student assessment strategies

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 4003 Early Literacies

Credit Points 10

Legacy Code 102684

Coordinator Jaydene Barnes (https://directory.westernsydney.edu.au/search/name/Jaydene Barnes/)

Description This subject explores the history of literacy in the early years from different theoretical perspectives and the tensions between theory, expectations and practice. It breaks down language development for diverse learners and develops students' understanding of strategies to scaffold children's language learning and development when working in diverse community contexts. The subject builds on the previous subject of Critical Literacies and focuses the changing nature of literacy and the diverse literacy pathways individuals take up. Students will investigate the processes children go through when speaking, listening, reading and writing in the early years, and the interrelatedness of these processes to make meaning. Students will develop play-based, literacy-enriched experiences underpinned by contemporary literacy perspectives. This subject is included in the Transition Phase of the Bachelor of Education.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 4 subject

Restrictions

Students must be enrolled in the 1926 Bachelor of Education (Early Childhood) and have successfully completed 160 credit points to enrol in this subject.

Learning Outcomes

1. Examine the history of literacy in the early years within the Australian context and the impact of policy and theoretical perspectives on practice.
2. Explore language development as it occurs from birth, with consideration of cultural, developmental and linguistic differences.
3. Discuss new literacies, multiliteracies and the role of ICTs in children's literacy development.
4. Explore the processes of children as code breakers, meaning-makers, text participants, text users and text critics in early childhood contexts through a multiliteracies approach.
5. Analyse the tensions between theory, expectations and practice when supporting children's literacy capabilities in prior to school settings.
6. Apply a contemporary, multi-literacies approach when planning play-based learning experiences to extend children's literacy.

Subject Content

1. Historical and contemporary literacy perspectives
2. Language development, including bilingual/multilingual children, supporting Aboriginal Dialects/Aboriginal English and supporting children with additional speech, communication and language needs
3. Young children as code breakers, meaning makers, text participants, text users and text critics.
4. Multi-literacies
5. Literacy learning through play
6. Transition to school and literacy learning

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Essay	1,000 words	20	N	Individual
Critical Review	1,200 words	30	N	Individual
Professional Task	2,000 words	50	N	Individual

TEAC 4004 Leadership, Research and Practice

Credit Points 10

Legacy Code 102687

Coordinator Kerry Staples (https://directory.westernsydney.edu.au/search/name/Kerry Staples/)

Description In this subject the complexity of leadership in early childhood contexts is explored. Students will analyse leadership theories and consider how the leadership role can and does influence the quality of practitioners' practices and Early Childhood Education and Care (ECEC) service provision. Students will reflect on their professional identity, values, experiences, knowledge and practices to develop a personal perspective of how effective leadership is enacted to lead staff teams and strengthen relationships. Students will also engage with the tenets of research as they investigate their own pedagogy and practice as emerging leaders of early education settings. Using an action research model to explore the processes of data collection, analysis techniques and literature review, students will have the opportunity to develop a portfolio in which they critically analyse their own practices and consider strategies to build their leadership capability and pedagogical practice. This subject is included in the Transition Phase of the Bachelor of Education.

School Education

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 4 subject

Co-requisite(s) TEAC 4009 - Professional Practice 3-5 Years

Restrictions

Students must be enrolled in 1926 Bachelor of Education (Early Childhood) and have completed 240 credit points to enrol in this subject.

Learning Outcomes

1. Evaluate leadership theories and their application in the ECEC context.
2. Analyse a range of effective leadership strategies, processes and skills that are enacted to lead in the ECEC setting.
3. Analyse the complexity and diversity of the leadership roles including activism, advocacy and capacity building in ECEC and the wider community.
4. Examine how leadership styles and characteristics influence quality ECEC service provision.
5. Apply Action Research to improve professional practice.
6. Create a digital professional portfolio that reflects individual professional identity and leadership style and demonstrates capacity to meet the Australian Professional Teaching standards.

Subject Content

1. Leadership theory
2. Leadership styles and characteristics
3. Leadership in ECEC - complexity, diversity and professional identity
4. Influencing quality, relationships, pedagogy and change
5. Reflecting on professional identity and leadership
6. Action Research to improve professional practice
7. Developing and refining a professional portfolio

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

TEAC 4006 Professional Experience 4: Transition into the Profession

Credit Points 10

Legacy Code 102659

Coordinator Kellie Jorda (https://directory.westernsydney.edu.au/search/name/Kellie Jorda/)

Description Students will participate in a 30-day professional experience set in the context of their future profession and under the supervision of qualified teachers. This is the final professional experience subject in your degree. The completion of this Professional Experience recognises you as a conditionally qualified teacher. This subject aims to recognise your shift from pre-service teacher to beginning teacher. Students will be prepared by exploring issues involved in understanding the needs of learners within specific school and classroom contexts, and will design and teach experiences in ways that will enhance student engagement and student learning outcomes. The subject is designed to develop your professional identity and the importance of continued professional learning, the relationship between professional and community organisations in supporting educators, and how these influence student outcomes. It will build awareness of skills and practices that will help facilitate preservice teacher's personal wellbeing and resilience in their teaching career. The subject links theory and practice and enables students to construct new knowledge and new ways of practice as part of their transition into the teaching profession. In line with primary teaching specialisation requirements, your professional experience may focus on teaching, evaluating and assessing in the subject area of Science and Technology. Students are required to analyse their own learning in relation to the Graduate Teacher Standards through the completion of a Learning Portfolio and the TPA (Teaching Performance Assessment). This subject is included in the Transition Phase of the Bachelor of Education.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 4 subject

Pre-requisite(s) TEAC 3021

Restrictions

Students must be enrolled in the 1876 Bachelor of Education (Primary) or 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education and have successfully completed 240 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply knowledge of current research to competently plan, deliver, assess and evaluate lesson sequences and units of work across all Learning Areas;
2. Demonstrate the capacity to create and maintain supportive and safe learning environments;
3. Identifies personal learning goals in relation to the Australian Professional Standards for Teachers;
4. Effectively participates in the specific roles and responsibilities of a primary school teacher and contributes positively to the school community beyond the classroom;
5. Refine skills and knowledge related to being a teaching professional, including classroom management; relationships with families, community and other professionals; student wellbeing;
6. Understand professional and ethical practice related to NSW Education policy frameworks;
7. Identify a range of appropriate professional associations and how they can contribute to professional learning and improve teaching practices to support student learning;
8. Compile a range of strategies to build and maintain teacher wellbeing and resilience.

Subject Content

1. Teaching and planning cycle- using data and assessment evidence about students to inform Lesson planning, assessment and The provision of feedback to students
2. Critical self-reflection with reference to The Australian professional Standards for graduate teachers
3. Connecting research with practice to inform planning and Teaching
4. Pedagogical knowledge to support Teaching and learning decision making
5. Professional and Ethical practices of The Teaching profession
6. Differing Roles and responsibilities of teachers
7. Essential skills and knowledge as A Teaching professional including, professional identity, registering as A teacher, professional associations and professional learning
8. Teacher wellbeing and resilience

Special Requirements

Legislative pre-requisites

1. Students are required to complete the **two** components of the Working with Children Check (WWCC) process leading to (a) the issuance of a clearance number under the category of volunteer and (b) verification of the clearance number with the NSW Department of Education.

a) Students will need to:

i. Access the Commission for Children and Young People website and complete an online application form to generate an application number.

ii. Present an application number and identification to a Service NSW office who will issue a Working with Children Check number via mail or email.

iii. Submit the letter with a valid Working With Children Check number via WesternNow Student Portal. The document is trimmed and recorded as a Special Requirement on your academic record. WesternNow Student Portal link (https://wsu.service-now.com/student/?id=sc_cat_item&sys_id=9c8b61a2dbbed8504f58e434059619ed)

b) Students will need to:

i. Access the NSW Department of Education WWCC Verification declaration form https://online.education.nsw.gov.au/jecpc/crc/wwcc.jsf

ii. Carefully read the information about Identity Documents and obtain a copy of the relevant ID documents.

iii. Complete and submit the verification declaration form.

iv. Once your WWCC verification is complete you will receive an email reply from the DoE Probity Unit confirming your WWCC number has been verified.

v. Submit the verification confirmation email via WesternNow Student Portal. The document is trimmed and recorded as a Special Requirement on your academic record.

2. Students must complete the **two** components of the NSW Department of Education's Child Protection Awareness Training (CPAT)

a) Students will need to:

i. Access the NSW Department of Education's MyPL website https://mypl.education.nsw.gov.au/

ii. Complete the online Child Protection Awareness Training: Induction

iii. Save certificate of completion

iv. Submit certificate via WesternNow Student Portal

b) Students will need to:

i. Access the NSW Department of Education's MyPL website https://mypl.education.nsw.gov.au/

ii. Complete the Child Protection Awareness Training (CPAT): Annual Update for the calendar year

iii. Save certificate of completion

iv. Submit certificate via WesternNow Student Portal

Both certificates will be recorded on your student record as Special Requirements with the end date for the Annual CPAT recorded. The CPAT: Annual Update will need to be renewed and submitted on an annual basis.

Students who have not completed both components of the Child Protection Awareness Training will need to withdraw from the subject.

Assessment

1. Students are required to complete a Working with Children Check leading to the issuance of a clearance number under the category of volunteer.

Students will need to:
i. Access the Commission for Children and Young People website and complete an online application form to generate an application number.
ii. Present an application number and identification to a NSW Motor Registry or Government Access Centre prior to issuance by mail a Working with Children Check number.
iii. Submit the letter with a valid Working With Children Check number to Student Central where the document is trimmed and recorded in Banner as a Special Requirement.

2. Students must have completed Child Protection Awareness Training (Online) prior to undertaking any visits/placements.

3. Students must have completed the ASCIA anaphylaxis e-training and registered their certificates with Student Central.

4. Students must satisfactorily complete the National Literacy and Numeracy TEST (NSW Education Standards Authority).

TEAC 4009 Professional Practice 3-5 years

Credit Points 10

Legacy Code 102686

Coordinator Denise Fraser (https://directory.westernsydney.edu.au/search/name/Denise Fraser/)

Description The subject is the final professional experience subject in the Bachelor of Education (Early Childhood), comprising a 30-day placement with children aged 3-5 years. It has a strong focus on pedagogical leadership, initiating and sustaining collaborative partnerships with staff, children and families, and implementation of integrated curriculum through effective programming and planning. The subject facilitates in-depth investigation and critical thinking, preparing students to connect to children's social worlds and provide innovative, inclusive and meaningful learning environments. This subject requires students to apply the principles, practices and outcomes of Belonging, Being and Becoming: The Early Years Learning Framework for Australia (V2.0). This subject is included in the Transition Phase of the Bachelor of Education.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) TEAC 3050 Professional Practice Birth – 3 years

Restrictions

Students must be enrolled in 1926 Bachelor of Education (Early Childhood) and have completed 240 credit points to enrol in this subject.

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Critically reflect on personal learning and practice, feedback from field-based and university-based supervising teachers and the Australian Professional Standards for Teachers to evaluate the impact of teaching and leadership.
2. Evaluate children's play, learning, dispositions and relationships, using theories of early childhood development and learning, and use this information to inform planning and practice
3. Apply curriculum approaches and pedagogies that are contextually responsive and promote children's investigation, problem solving, critical thinking and the development of deep knowledge
4. Plan for resources that encourage children to use a range of media and technologies to investigate their ideas and values and represent their thinking
5. Implement innovative teaching and learning cycles, providing experiences and project opportunities that extend on children's strengths and interests
6. Apply pedagogical leadership, social and administrative skills relative to the professional experience setting
7. Apply the principles, practices and learning outcomes of Belonging, Being and Becoming: The Early Years Learning Framework for Australia (V2.0), drawing on content knowledge in the areas of science and technology, mathematics, human society, physical education health and wellbeing, creative arts, English and literacy to engage in interactions with children that extend their learning.

Subject Content

1. Development of a professional portfolio, including a situational analysis of the professional experience setting, critically reflective professional learning goals, planning, documentation, observations, and philosophy of practice
2. Pedagogy and practices to support learners from diverse backgrounds including children from Aboriginal & Torres Strait Islander backgrounds, children from culturally and linguistically diverse backgrounds and children with diverse learning needs, including those with disabilities.
3. Integrated play-based curriculum across key concept areas that is responsive to children's funds of knowledge, dispositions and interests.
4. Pedagogical leadership skills: supporting reflective thinking and inquiry, collaborative planning, implementing and evaluating an inclusive and engaging total learning environment, and nurturing dispositions
5. Grouping strategies for promoting positive interactions and pro-social guidance, extending learning and strengthening relationships
6. Pedagogies for learning: play, projects, small groups, learning centres, integrated curriculum
7. Efficient practices for observations, assessment of and for learning, planning, and documentation.
8. Intentional teaching strategies and techniques that facilitate children's investigation, problem-solving and critical thinking; planning, implementing and evaluating the total learning environment.
9. The Belonging, Being and Becoming: The Early Years Learning Framework for Australia (V2.0) principles, practices and learning outcomes to document, assess and plan, implement and evaluate for learning.

TEAC 4010 Researching Professional Practice

Credit Points 10

Legacy Code 102657

Coordinator Mary Southall (https://directory.westernsydney.edu.au/search/name/Mary Southall/)

Description The subject is designed to develop students' skills and expertise in investigating their own teaching in Science and Technology. The subject facilitates a researcherly disposition towards their own professional practice. Students will focus on a specific aspect of their teaching practice related to the concept of engagement and critically reflect upon their own evolving professional identity, philosophy and practice. The subject draws upon key principles and methods of participatory action research to facilitate students' skills and expertise as teacher-researchers. Students will plan an action research proposal that could be implemented in their future practice. This subject is included in the Transition Phase of the Bachelor of Education.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 4 subject

Restrictions

Students must be enrolled in the 1876 Bachelor of Education (Primary) or 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education and have successfully completed 240 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Understand contemporary approaches to teaching and learning, with a specific focus on issues and practices surrounding student engagement and quality teaching;
2. Apply these contemporary approaches through the analysis and critique of professional teaching practice;
3. Apply technological, curriculum content and pedagogical knowledge and skills learnt in previous units to inform investigations of their own teaching practices and research process;
4. Demonstrate an understanding of principles and methods of action research to inform teaching plans and evaluation of teaching;
5. Design an action research project utilising principles of participatory action research and self-reflective practice, focusing on own self as pre-service teacher;
6. Demonstrate an appreciation of research as part of professional practice.

Subject Content

1. Critical self-reflective practice and analytical skills
2. Principles and methods of participatory action research and the research cycle
3. Relationship between researcher and practitioner
4. Fair Go Pedagogies: The MeE Framework of substantive student engagement
- engaging discourses (links with other units challenging dominant discourses)
- individual Motivational strategies

TEAC 4011 Inclusion in the Early years

Credit Points 10

Legacy Code 102685

Coordinator Kerry Staples (https://directory.westernsydney.edu.au/search/name/Kerry Staples/)

Description Inclusion is both a right and an expectation for all children. Its effectiveness, however, depends upon teachers having the competencies, dispositions and skills to advocate for equity of access, participation and inclusion for children with a broad range of abilities within early childhood settings. In this subject, students reflect on the social construction of disability, policy and research in relation to the identification of additional needs, intervention and inclusion. Students will learn to assess curriculum and environments for learning, and to design, evaluate and communicate inclusive plans. The subject will focus on enhancing quality inclusive early childhood education through responsive adaptation and modification of the environment, curriculum and teaching practices. The importance of forming genuine partnerships with families and collaborating with the team around the child are advocated as essential for effective inclusion. This subject is included in the Transition Phase of the Bachelor of Education.

School Education

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 4 subject

Restrictions

Students must be enrolled in the 1926 Bachelor of Education (Early Childhood) and have successfully completed 160 credit points to enrol in this subject.

Learning Outcomes

1. Analyse the theoretical, ethical, philosophical, legislative and policy frameworks supporting inclusion in the early years.
2. Critique perceptions, attitudes and beliefs about disability and inclusion.
3. Apply knowledge of development, learning dispositions and learning theories to identify children with additional needs and make appropriate recommendations for referral to relevant community and educational support services.
4. Assess early childhood curricula to ensure it appropriately recognises the impact of specific disabilities and has an underlying basis for promoting engaged learning for all children.
5. Develop responsive inclusion plans that reflect the family's priorities for their child and facilitate learning.

6. Evaluate the learning spaces, resources, curriculum and pedagogies and modify them to provide quality inclusive learning environments.
7. Create strategies to support access, participation and learning.
8. Describe practices that support collaboration and shared decision making between families, early childhood environments and service systems.

Subject Content

1. Assumptions and contradictions of inclusion
2. Legislative policies and philosophical frameworks that guide inclusive practice
3. Assessment for learning
4. Identification and referral
5. Family-centred practices and relationships
6. Collaboration and working with other professionals
7. Planning for inclusion: adapting and modifying learning environments, pedagogical practices, embedding learning, monitoring and evaluating implementation
8. Supporting school transitions

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Critical Review	1,000 words	20	N	Individual
Case Study	1,500 words	35	N	Individual
Professional Task	2,000 words	45	N	Individual

TEAC 4012 Teaching EAL/D Students in the Primary Years

Credit Points 10

Legacy Code 102799

Coordinator Pegah Marandi (https://directory.westernsydney.edu.au/search/name/Pegah Marandi/)

Description The 2016 ABS Census reveals that Australia is a 'fast changing, ever expanding culturally diverse nation'. One in four Australian children come from language backgrounds other than English including children born in Australia and immigrants, refugees and asylum seekers arriving in Australia each year. Many of these students will require English language learning support in the classroom. This support will vary depending on learner needs and language proficiency. The focus of this subject is to provide initial education teachers with a foundation of theoretical principles related to teaching and learning English. The emphasis will be on developing an understanding of appropriate classroom strategies within a mainstream, cross-curricula program, for learners of English as a second language including appropriate pedagogies for Aboriginal and Torres Strait Islander students. This subject is included in the Transition Phase of the Bachelor of Education.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 4 subject

Restrictions

Must be enrolled in the 1876 Bachelor of Education (Primary) and have successfully completed 80 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the importance and role of the home language in second language learning development including Aboriginal and Torres Strait Islander dialects;
2. Demonstrate understanding of research based pedagogies for teaching EAL/D students;
3. Create and assess resources, including ICT, that engage EAL/D students in their learning;
4. Use research based pedagogies and develop strategies for teaching English as an Additional Language across the curriculum;
5. Apply knowledge of quality teaching resources to cater for learners from a diverse range of backgrounds including refugee, migrant, Aboriginal and Torres Strait Island students;
6. Apply appropriate methods of assessing second language learning;
7. Plan, refine and reflect upon teaching and learning activities designed to meet the needs of English as Second Language learners.

Subject Content

1. Multicultural Education
Setting the context: immigration and multicultural policies and practices in Australia
- history of migration
- current policies?migration and education
Theoretical concepts of the nature, scope and meaning of culture
- elements of culture ? cultural inclusivity
- effects of change and time on culture
- culturally and linguistically diverse communities
- Aboriginal and Torres Strait Islander cultural factors
Multicultural Education: curriculum, policy and perspectives
- examination, analysis and evaluation of various policy and support materials
- advocacy for EAL/D students
- Australian Professional Teaching Standards - relevant Standard Descriptors
2. Teaching of English as a second language
Language and language learning
- similarities and differences between language one and language two learning
- importance of bilingualism/multilingualism (maintaining first language)
Factors influencing second language development
- first language proficiency, age, prior educational and life experiences, cultural and linguistic background

- context and environment of second language learning in mainstream classes
- whole school organisation and timetable arrangements for EAL/D and mainstream teachers
- Quality Teaching CESE - High Expectations, Explicit Teaching, Effective Feedback, Use of Data, Classroom Management, Wellbeing, Collaboration (https://www.cese.nsw.gov.au//images/stories/PDF/What_Works_Best_Reflection_Guide_202016_AA.pdf)
- Quality Teaching Framework ? Intellectual Quality, Quality learning environment, Significance (https://theelements.schools.nsw.gov.au/introduction-to-the-elements/policy-reforms-and-focus-areas/quality-teaching-framework.html)

3. Assessment and evaluation
- identifying English language proficiency: ACARA EAL/D Learning Progression
- planning and programming for language learning support based on data
- collecting student assessment data
- EAL/D school evaluation framework

4. English language learning pedagogy
- language and literacy across all Key Learning Areas (Curriculum Documents)
- Mode Continuum ? moving from ?espoken like?f to written like?f
- teaching and learning in the four modes; speaking, listening, reading and writing
- communicative teaching and learning principles

5. Teaching and learning resources for second language development in the Primary classroom
- culturally laden/anti bias materials
- online, software, human and paper resources to support teaching/learning programs
- Deadly Ways to Learn (http://www.whatworks.edu.au/dbAction.do?cmd'displaySitePage1&subcmd'select&id'154)

6. Parent-teacher communication
- using an interpreter
- communicating without an interpreter
- reporting student progress to parents using the ACARA EAL/D Learning Progression
- engaging culturally and linguistically diverse communities

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Report	1,500 words	30	N	Individual
Applied Project	800 words, 10 minutes presentation	30	N	Group
Professional Task	2,000 words	40	N	Individual

TEAC 4018 Management and Administration in Early Childhood Settings

Credit Points 10

Description Early childhood teachers work in complex and dynamic environments that are influenced by historical, social, cultural and political contexts. As advocates for quality children and family services that embrace social justice, inclusivity and equity, early childhood teachers must enact their ethical, legal and professional responsibilities. Early Childhood Education and Care (ECEC) services are similar to small businesses, requiring teachers to be knowledgeable about systems, strategies and processes to meet organisation goals and mandatory regulatory and licensing requirements. This subject builds students' foundational skills in strategic planning, policy development, staff management, conflict resolution and team building. Students will investigate effective management and administration dimensions, including human resources, marketing, financial accountability, governance and compliance processes. This subject is included in the Transition Phase of the Bachelor of Education.

School Education

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 4 subject

Restrictions

Students must be enrolled in 1926 Bachelor of Education (Early Childhood) (p. 290) and have completed 80 credit points to enrol in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Historical, social, cultural and political contexts influencing Early Childhood Education and Care (ECEC) service provision
2. Dimensions of quality ECEC services
3. Legislation influencing ECEC services
4. ECEC licensing and compliance
5. Professional responsibilities
6. Organisational management
7. Ethics and legal responsibilities
8. Theories of management and administration
9. Administration and financial responsibilities
10. Marketing
11. Team building, conflict resolution, communication

Subject Content

1. Examine the historical, social, cultural and political contexts influencing early childhood education and care (ECEC) service provision.
2. Analyse the factors influencing quality service provision in ECEC services.
3. Appraise the ethical, legal, legislative and regulatory responsibilities of ECEC services and teachers.
4. Critique theories of management and their application to ECEC services.
5. Evaluate strategies to support the development of partnerships with families and communities.
6. Determine the role of advocacy for managers and administrators in ECEC services.
7. Generate strategies for the development and maintenance of effective administration, team work, staff management and development in ECEC contexts.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	20 questions	20	N	Individual
Applied Project	1200 words	30	N	Group
Essay	2000 words	50	N	Individual

TEAC 5001 Aboriginal Studies Curriculum 1

Credit Points 10

Legacy Code 102873

Coordinator Shirley Gilbert (https://directory.westernsydney.edu.au/search/name/Shirley Gilbert/)

Description The subject will examine and model effective contemporary classroom practice in teaching Aboriginal Studies in Stages 4 and 5. The subject will provide opportunities to engage with the inquiry pedagogy. The specifics of the relevant NSW Education Standards Authority Years 7-10 Syllabuses and links with the K-6 curriculum will be analysed and critiqued as will current Australian and NSW educational/curriculum policies and priorities. Emphasis will be placed on principles underlying Aboriginal Studies teaching to develop innovative lesson and subject planning, choose relevant and creative texts and how to create authentic assessment tasks and apply consistent feedback for student learning. Opportunities for investigation and discussion of current research particularly related to the development of inquiry, concepts and skills will be presented. This subject is included in the Development Phase of the Master of Teaching program.

School Education

Discipline Teacher Education: Secondary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 5 subject

Pre-requisite(s) TEAC 7004 OR TEAC 7161 AND
TEAC 7032 AND
TEAC 7027 OR TEAC 7160

Restrictions

Students in program 1714 or 1914 must have Aboriginal Studies or Society and Culture or Studies of Religion Curriculum Area applied to their student record before they can enrol in this subject. Students can view their Curriculum Areas on DegreeWorks in MySR.

Learning Outcomes

1. Demonstrate understanding of NSW Education Standards Authority Stage 4 and 5 syllabuses and the effect upon syllabus implementation of current NSW and Australian educational policies and priorities.
2. Demonstrate an appreciation of Aboriginal identity and experiences, which are interconnected with Country, culture and community and apply teaching and learning pedagogies that promote inclusiveness and enables more respectful and reciprocal engagement with Aboriginal Peoples and communities.
3. Present well-constructed, innovative and coherent student-centred lessons that include literacy (including key metalanguage) and numeracy, enhance thinking and ICT skills and which take into account the full range of students' abilities and school-based and system data.
4. Prepare a suitable range of assessment instruments that use valid, reliable and consistent judgements of student learning.
5. Design and select innovative teaching resources that apply a critically reflective approach to teaching Aboriginal Studies and include opportunities to develop students' inquiry skills.
6. Use a variety of teaching and learning strategies and resources, including ICT and a range of sources in teaching lessons and programs.
7. Reflect and research professional learning to develop the discipline of Aboriginal Studies teaching and culturally responsive pedagogies.

Subject Content

1. What is the nature of the subject in the early and middle years of secondary education? How is the subject linked to what is taught in primary school and in the senior years of secondary education?
2. How are current educational policies and priorities with particular reference to Aboriginal and Torres Strait Islander education, literacy and numeracy and ICT, addressed in the teaching of the subject?
3. How do we recognise of individual Aboriginal student identity, cultural knowledge, language learning, community connection and/or responsibilities?
4. How do we teach and learn knowledge of local Aboriginal Languages, cultural practices and communities, and the interests of Aboriginal students?
5. How can we develop knowledge, valuing and inclusion of culturally responsive pedagogies?
6. How are lessons planned, units written and learning scoped and sequenced in the subject?

7. Why is it necessary to differentiate teaching in the subject? How do teachers go about differentiation?
8. How do teachers keep students safe during teaching in the subject?
9. How may the incorporation of visionary and innovative uses of ICT, critical and creative thinking and problem solving support the achievement of quality learning outcomes in the subject?
10. How can assessment of learning, assessment for learning and assessment as learning be reconciled in teaching the subject?
11. What records do teachers keep? How are those records used in reporting student performance and in particular used towards awarding the Record of Student Achievement (ROSA)?
12. In what ways has educational research contributed to the teaching and student learning of the subject?
13. What options are open to pre-service teachers to continue to learn about the Aboriginal Studies?

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Students in program 1714 or 1914 must have Business Studies or Commerce or Economics or Legal Studies Curriculum Area applied to their student record before they can enrol in this subject. Students can view their Curriculum Areas on DegreeWorks in MySR.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate understanding of NSW Education Standards Authority Stage 6 Business Studies, Economics and Legal Studies syllabuses and the effect upon syllabus implementation of current NSW and Australian educational policies and priorities.

2. Demonstrate understanding of socio-cultural perspectives and pedagogical theories and approaches used in teaching senior Business Studies, Economics and Legal Studies.
3. Present well-constructed, innovative and coherent student-centred lessons that include literacy (including key metalanguage) and numeracy, enhance thinking and ICT skills and which take into account the full range of students' abilities and school-based and system data.
4. Prepare a suitable range of senior assessment instruments that use valid, reliable and consistent judgements of student learning.
5. Design and select innovative teaching resources that apply a critically reflective approach to teaching senior Business Studies, Economics and Legal Studies and include opportunities to develop students' inquiry skills.
6. Use a variety of teaching and learning strategies and resources, including ICT and a range of sources in teaching lessons and programs.
7. Reflect and research professional learning to develop the discipline of Business Studies, Economics and Legal Studies teaching.

Subject Content

1. What is the nature of Business Studies/Economics and Legal Studies in the senior years of secondary education?
2. How are current educational policies and priorities addressed with particular reference to Aboriginal and Torres Strait Islander education, literacy and numeracy and ICT, in the teaching of the subject?
3. In what ways do active and engaging, student-centred teaching practices characterise the subject? Why is an understanding of socio-cultural and pedagogical theories and approaches important to quality teaching in Business Studies/Economics and Legal Studies?
4. What is the relationship between business principles and functions, economic interdependence, the place of legal rights and responsibilities, equity, social justice, and democracy?
5. How are lessons planned, units written and learning scoped and sequenced in the subject?
6. Why is it necessary to continue to differentiate teaching in the subject in the senior years of secondary education? How do teachers go about differentiation?
7. How do teachers keep students safe during teaching in the subject?
8. How may the incorporation of visionary and innovative uses of ICT, critical and creative thinking and problem solving support the achievement of quality learning outcomes in Business Studies/ Economics and Legal Studies?
9. How can assessment of learning, assessment for learning and assessment as learning be reconciled in teaching Business Studies/Economics and Legal Studies?
10. What records do teachers keep? How are those records used in reporting student performance at the HSC and for awarding the Record of Student Achievement (ROSA)?
11. In what ways has educational research contributed to the teaching and student learning of Business Studies/Economics and Legal Studies ?
12. What options are open to pre-service teachers to continue to learn about Business Studies/Economics and Legal Studies?

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 5005 English Curriculum 1

Credit Points 10

Legacy Code 102863

Coordinator Kay Carroll (https://directory.westernsydney.edu.au/search/name/Kay Carroll/)

Description The subject will examine and model effective contemporary classroom practice to develop students' pedagogical content knowledge in the teaching of English. The subject will provide opportunities to engage with English teaching in all textual forms including spoken, written and visual forms to build meaning. The specifics of the relevant NSW Education Standards Authority Years 7-10 Syllabus and links with the K-6 curriculum will be analysed and critiqued as will current Australian and NSW educational/curriculum policies and priorities. Emphasis will be placed on principles underlying English teaching to develop innovative lesson and subject planning, choose relevant and creative texts to create authentic assessment tasks and apply consistent feedback for student learning. Opportunities for investigation and discussion of current research into the teaching of English and different approaches to the study of texts will be important. This subject is included in the Development Phase of the Master of Teaching program.

School Education

Discipline Teacher Education: Secondary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 5 subject

Pre-requisite(s) TEAC 7004 OR TEAC 7161 AND

TEAC 7032 AND
TEAC 7027 OR TEAC 7160

Restrictions

Students in program 1714 or 1914 must have the English Curriculum Area applied to their student record before they can enrol in this subject. Students can view their Curriculum Areas on DegreeWorks in MySR.

Learning Outcomes

1. Demonstrate a comprehensive understanding of NSW English curriculum in Stage 4 and 5 combined with an understanding of the broader role of subject English culturally and historically, as well as in the growth of students as users of the language.
2. Apply socio-cultural perspectives and pedagogical theories and approaches used in the English curriculum area.
3. Engage with texts that include widely acknowledged quality literature of past and contemporary societies and engage with the literature and literary heritage of Aboriginal and Torres Strait Islander peoples.
4. Present well-constructed, innovative and coherent student-centred lessons that include literacy (including key metalanguage) and numeracy, enhance thinking and ICT skills and which take into account the full range of students' abilities and school-based and system data.
5. Prepare a suitable range of assessment instruments that use valid, reliable and consistent judgements of student learning.
6. Design creative and innovative teaching programs that apply a critically reflective approach to teaching English and include opportunities to develop students' reading, listening, speaking, representing, viewing and writing skills.
7. Use a variety of teaching and learning strategies and resources, including ICT and a range of texts in teaching lessons and programs.
8. Reflect and research professional learning to develop the discipline of English.

Subject Content

1. What is the nature of English in the junior years of secondary education? How is writing linked to what is taught in the junior and middle years of secondary education?
2. How are current educational policies and priorities addressed with particular reference to Aboriginal and Torres Strait Islander education, literacy and numeracy and ICT, in the teaching of the writing in English?
3. In what ways do active and engaging, student-centred teaching practices characterise the teaching of English? Why is an understanding of socio-cultural and pedagogical theories and approaches important to quality teaching in English?
4. How is writing, reading, listening, speaking and representation scoped and sequenced in the subject?
5. Why is it necessary to continue to differentiate in the teaching of English in secondary education? How do teachers go about differentiation?
6. How may the incorporation of multi-modal and representation texts support the achievement of quality writing, reading, speaking, listening and viewing?
7. How can we effectively assess and develop writing, reading, speaking, listening and viewing?
8. What records do teachers keep? How are those records used in reporting student performance at the HSC and for awarding the Record of Student Achievement (ROSA)?
9. What are key models of the subject – current and historical? How do notions of English-as-Literacy; English-as-Language and English-as-Literature relate to these?
10. What options are open to pre-service teachers to continue to learn about the role of the English teacher?

TEAC 5007 EALD Curriculum 1

Credit Points 10

Legacy Code 102865

Coordinator Pegah Marandi (https://directory.westernsydney.edu.au/search/name/Pegah Marandi/)

Description The subject will examine theories and model effective pedagogies for teaching and assessing English as an Additional Language Dialect (EALD) students in diverse classrooms. The subject will provide opportunities to engage with strategies for teaching language proficiencies in spoken and written texts. Students will learn how to teach for meaning and understanding in language forms using syntax and semantic structures such as grammar and vocabulary. The specifics of the relevant NSW and Australian English Syllabus and curriculum documents will be analysed and critiqued. Emphasis will be placed on principles underlying EALD pedagogy to develop an understanding of the cultural and language barriers faced by EALD students. This subject is included in the Development Phase of the Master of Teaching program.

Level Postgraduate Coursework Level 5 subject

Pre-requisite(s) -

Restrictions

Students in program 1714 must have the English Curriculum Area applied to their student record before they can enrol in this subject. Students can view their Curriculum Areas on DegreeWorks in MySR.

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Demonstrate a comprehensive understanding EALD learners in Stage 6.
2. Apply socio-cultural perspectives and pedagogical theories and approaches in EALD teaching.
3. Engage with narrative, discursive, imaginative and informative texts for EALD learners.
4. Construct well-constructed, innovative and coherent student-centred lessons that include literacy (including key metalanguage) and numeracy, enhance thinking and ICT skills and which consider the full range of EALD students' abilities and school-based and system data.
5. Design a suitable range of assessment instruments that use valid, reliable and consistent judgements of EALD senior student learning in relation to writing, reading, speaking and listening.
6. Apply innovative teaching resources that apply a critically reflective approach to teaching senior students in EALD
7. Apply technology to effectively teach senior EALD students to use multimodal texts.

Subject Content

- Who is an EALD student?
  - Aboriginal and Torres Strait Islander students
  - immigrants to Australia and temporary visa holders from non-English speaking countries
  - students with a refugee background
  - children born in Australia of migrant heritage where English is not spoken at home
  - English-speaking students returning to Australia after extended periods in non-English speaking settings
  - children of deaf adults who use Auslan as their first language
  - international students from non-English speaking countries.
- What are the diverse cultural and linguistic needs of EALD students?
- What are the policies and legislative requirements that are relevant to teaching EALD students?
- How do we differentiate learning and pedagogy for EALD students?
- What are EALD students' experiences, understandings and expectations?
- What specific support do EALD students require to learn and build on English language skills to access the general curriculum, in addition to learning area-specific language structures and vocabulary?
- How do we cater to EALD students who may have different levels of language proficiency across the modes of listening, speaking, reading and writing?
- Why is it important to maintain the home language of EALD students?
- How do we build EALD students' English language learning while preserving and developing their cultural identities and family relationships?

TEAC 5011 HSIE Curriculum 1

Credit Points 10

Legacy Code 102869

Coordinator Katherine Hadley (https://directory.westernsydney.edu.au/search/name/Katherine Hadley/)

Description The subject explores the key concepts and approaches in Human Society and its Environment (HSIE) education. The subject will provide deeper opportunities to engage with inquiry pedagogy. The specifics of the relevant HSIE NSW and Australian syllabus and curriculum documents will be analysed and critiqued. Emphasis will be placed on principles underlying HSIE such as Aboriginal and Torres Strait Islander perspectives, Civics and Citizenship, sustainability and heritage. Opportunities to engage in site and field studies within HSIE will be a strong focus within the subject. The subject will comprise critical exploration of current research particularly related to the development of pedagogical inquiry and concepts. This subject is included in the Development Phase of the Master of Teaching program.

School Education

Discipline Teacher Education: Secondary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 5 subject

Pre-requisite(s) -

Restrictions

Students in program 1714 must have a relevant HSIE Curriculum Area applied to their student record before they can enrol in this subject. Students can view their Curriculum Areas on DegreeWorks in MySR.

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Demonstrate understanding of HSIE syllabuses and the effect upon implementation of current NSW and Australian educational policies and priorities.
2. Demonstrate understanding of socio-cultural perspectives and pedagogical theories and approaches used in teaching HSIE including strategies that recognise, promote knowledge and develop cultural awareness of community connection, heritage and diversity of Aboriginal and Torres Strait Islander peoples.
3. Present well-constructed, innovative and coherent student-centred lessons that include literacy (including key metalanguage) and numeracy, enhance thinking and ICT skills and which take into account the full range of students' abilities and school-based and system data.
4. Prepare a suitable range of assessment instruments that use valid, reliable and consistent judgements of student learning in HSIE.
5. Design innovative teaching resources including site and field studies that apply a critically reflective approach to teaching HSIE and include opportunities to develop students' inquiry skills.
6. Use a variety of teaching and learning strategies and resources, including ICT and a range of sources in teaching lessons and programs.

Subject Content

1. What is the nature of the HSIE in the early and middle years of secondary education? How are Civics and Citizenship and sustainability practices part of HSIE?
2. How are current educational policies and priorities with particular reference to Aboriginal and Torres Strait Islander education, literacy and numeracy and ICT, addressed in the teaching of the subject?
3. How can the Key Learning Area of HSIE recognise, promote knowledge and develop cultural awareness of community connection, heritage and diversity of Aboriginal and Torres Strait Islander peoples?
4. In what ways do active and engaging, student-centred teaching practices characterise the subject? Why is an understanding of socio-cultural and pedagogical theories and approaches important to quality teaching in the subject?
5. How are lessons planned, units written and learning scoped and sequenced in HSIE?
6. Why is it necessary to differentiate teaching in the subject? How do teachers go about differentiation?
7. How do teachers keep students safe during teaching in the HSIE when conducting site or field studies?
8. How may the incorporation of visionary and innovative uses of ICT, critical and creative thinking and problem solving support the achievement of quality learning outcomes in the subject?
9. How can assessment of learning, assessment for learning and assessment as learning be reconciled in teaching the subject?
10. What records do teachers keep? How are those records used in reporting student performance and in particular used towards awarding the Record of Student Achievement (ROSA)?
11. In what ways has educational research contributed to the teaching and student learning of HSIE?
12. What options are open to pre-service teachers to continue to learn about HSIE?

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 5012 HSIE Curriculum 2

Credit Points 10

Legacy Code 102870

Coordinator Shea Rigney (https://directory.westernsydney.edu.au/search/name/Shea Rigney/)

Description The subject build upon curriculum subjects in Human Society and its Environment (HSIE) for teaching in Stage 6. The subject will provide deeper opportunities to engage with the critical inquiry pedagogy. The specifics of the relevant HSIE NSW Education Standards Authority Stage 6 Syllabuses will be explored. Emphasis will be placed on principles underlying HSIE such as Aboriginal and Torres Strait Islander perspectives, Civics and Citizenship, sustainability and heritage for senior students in relevant humanities and social science disciplines. Opportunities to engage in project based inquiry to support senior curriculum in HSIE will be a strong focus within the subject. The subject will comprise critical exploration of current research particularly related to the development of pedagogical inquiry and concepts for senior students. This subject is included in the Development Phase of the Master of Teaching program.

Pre-requisite(s) -

Restrictions

Students in program 1714 must have a relevant HSIE Curriculum Area applied to their student record before they can enrol in this subject. Students can view their Curriculum Areas on DegreeWorks in MySR.

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Demonstrate understanding of the discipline and intent of the range of syllabuses in HSIE with relation to Australian educational policies and priorities.
2. Analyse inquiry pedagogical theories and approaches used in teaching HSIE such as Civics and Citizenship, Aboriginal and Torres Strait islander perspectives and cultural capacity.
3. Create well-constructed, innovative and coherent student-centred lessons that include literacy (including key metalanguage) and numeracy, enhance thinking and ICT skills and which consider the full range of students' abilities and school-based and system data.
4. Design a relevant and range of assessment instruments that use appropriate and meaningful contexts for learning.
5. Design innovative real world teaching resources including site and field studies that apply a critically reflective approach to teaching HSIE and include opportunities to develop students' inquiry skills.
6. Apply a variety of teaching and learning strategies and resources, including ICT and a range of sources in teaching lessons and programs.

Subject Content

1. What is the nature of the HSIE in the senior years of education?
2. How are current educational policies and priorities with particular reference to Aboriginal and Torres Strait Islander education, literacy and numeracy and ICT, addressed in the teaching of the subject?
3. In what ways do active and engaging, student-centred teaching practices characterise the subject? Why is an understanding of socio-cultural and pedagogical theories and approaches important to quality teaching in the subject?
4. How are inquiry and critical lessons planned, units written and learning scoped and sequenced in HSIE?
5. Why is it necessary to differentiate teaching in the subject? How do teachers go about differentiation?
6. How do teachers keep students safe during teaching of HSIE during field and site studies?
7. How may the incorporation of visionary and innovative uses of ICT, critical and creative thinking and problem solving support the achievement of quality learning outcomes in the subject?
8. How can assessment of learning, assessment for learning and assessment as learning be reconciled in teaching the subject?
9. What records do teachers keep? How are those records used in reporting student performance and in particular used towards awarding the Record of Student Achievement (ROSA)?

TEAC 5017 Languages Curriculum 3

Credit Points 10

Legacy Code 102891

Coordinator Mark Richards (https://directory.westernsydney.edu.au/search/name/Mark Richards/)

Description In this subject, the place of Languages in secondary curriculum will be further explored using evidence-based approaches for curriculum development and alignment and to plan for effective teaching and learning, including formative and summative assessment. Pre-service teachers will learn approaches for teaching a range of Languages using inquiry pedagogy. They will a focus on assessment design for range of levels in Language teaching and the importance of culturally situated learning. The subject will demonstrate approaches for engaging diverse secondary learners from native speakers to beginners. Pre-service teachers will develop subject and assessment plans and demonstrate a knowledge of curriculum, learning and assessment theory. The subject requires students to develop original portfolio of teaching artefacts that demonstrate capacity to create and critique resources for effective teaching and learning in Languages.

Level Postgraduate Coursework Level 5 subject

Pre-requisite(s) TEAC 7027 AND
TEAC 7004 AND
TEAC 7032

Restrictions

Students in program 1714 must have a relevant Language Curriculum Area applied to their student record before they can enrol in this subject. Students can view their Curriculum Areas on DegreeWorks in MySR.

Learning Outcomes

1. Generate and critically evaluate Languages curriculum program for students which synthesises a variety of pedagogical approaches and resources appropriate to these year levels, assessment tasks and curriculum content.
2. Critically analyse and develop a variety of research-informed classroom strategies which cater for individual differences in student learning in the classroom.
3. Evaluate the relationship between learning task design, student learning and expertise, higher order thinking, assessment, feedback and reporting strategies and evaluation in Languages Education.
4. Present well-constructed, innovative and coherent student-centred lessons that include literacy (including key metalanguage) and numeracy, enhance thinking and ICT skills and which take into account the full range of students' abilities and school-based and system data.
5. Prepare a suitable range of language assessment instruments for writing, speaking and listening that use valid, reliable and consistent judgements of student learning.
6. Design and select innovative resources that apply a critically reflective approach to teaching arrange of Languages and develop students critical and creative capabilities.
7. Reflect and research professional learning to develop the discipline of Languages teaching.

Subject Content

1. What is the nature of the subject in the secondary education including the concepts, substance and structure of Languages teaching?
2. How are current educational policies and priorities with particular reference to Aboriginal and Torres Strait Islander education, literacy and numeracy and ICT, addressed in the teaching of the subject?
3. In what ways do active and engaging, student-centred teaching practices characterise the subject? Why is an understanding of socio-cultural and pedagogical theories and approaches important to quality teaching in the subject?
4. How are lessons planned, units written and learning scoped and sequenced in the subject?
5. Why is it necessary to differentiate teaching in the subject? How do teachers go about differentiation?
6. How do teachers keep students safe during teaching in the subject?
7. How may the incorporation of visionary and innovative uses of ICT, critical and creative thinking and problem solving support the achievement of quality learning outcomes in the subject?
8. How can assessment of learning, assessment for learning and assessment as learning be reconciled in teaching the subject?
9. What records do teachers keep? How are those records used in reporting student performance and in particular used towards awarding the Record of Student Achievement (ROSA)?
10. In what ways has educational research contributed to the teaching and student learning of the subject?
11. What options are open to pre-service teachers to continue to learn about the subject?

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Professional Task	2000 Words	50	N	Individual
Portfolio	2000 Words (Portfolio)	50	N	Individual

Prescribed Texts

TEAC 5018 Languages Curriculum 4

Credit Points 10

Legacy Code 102892

Coordinator Mark Richards (https://directory.westernsydney.edu.au/search/name/Mark Richards/)

Description This subject provides pedagogical and curriculum enrichment to the teaching of Languages and builds on methods and concepts from earlier Languages Curriculum subjects. It explores approaches to language teaching; designing and implementing classroom language learning activities; developing the skills and knowledge to teach the language macro-skills of reading, writing, listening and speaking; classroom management; materials evaluation and selection; technological aids to language teaching/learning; reflecting on and evaluating teaching. Pre-service teachers will develop subject and assessment plans and demonstrate a knowledge of curriculum, learning and assessment theory. The subject requires students to develop critique resources and practices for effective teaching and learning in Languages.

School Education

Discipline Teacher Education: Secondary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 5 subject

Pre-requisite(s) TEAC 7027 AND
TEAC 7004 AND
TEAC 7032

Restrictions

Students in program 1714 must have a relevant Language Curriculum Area applied to their student record before they can enrol in this

subject. Students can view their Curriculum Areas on DegreeWorks in MySR.

Learning Outcomes

1. Demonstrate an understanding of contemporary theory and practice of language teaching to the design of language learning tasks and activities for a range of language learners.
2. Understand and respond to diverse language learners to support them in exploring out language learning tasks.
3. Modify, and create innovative language teaching and learning materials for a specific learner group using digital and multimodal forms.
4. Apply in teaching artefacts evidence-based practices in teaching the language macro-skills (reading, writing, speaking, listening) to groups of language learners
5. Reflect on principles of reflective and quality practice for language teaching to a range of assessment tasks to identify areas for improvement and refinement.
6. Design and select innovative teaching resources that apply a critically reflective approach to teaching students to become culturally responsive.
7. Understand and contribute to the discipline of language teaching.

Subject Content

1. What is the pedagogical and curricular approaches to teaching Languages across the curriculum from K-10?
2. How are current educational policies and priorities addressed with particular reference to Aboriginal and Torres Strait Islander education, literacy and numeracy and ICT, in the teaching of the subject?
3. In what ways do active and engaging, student-centred teaching practices characterise the subject? Why is an understanding of socio-cultural and pedagogical theories and approaches important to quality teaching in the subject?
4. How are lessons planned, units written and learning scoped and sequenced in the subject?
5. Why is it necessary to continue to differentiate teaching in the subject in the senior years of secondary education? How do teachers go about differentiation?
6. How do teachers keep students safe during teaching in the subject?
7. How may the incorporation of visionary and innovative uses of ICT, critical and creative thinking and problem solving support the achievement of quality learning outcomes in the subject?
8. How can assessment of learning, assessment for learning and assessment as learning be reconciled in teaching the subject?
9. What records do teachers keep? How are those records used in reporting student performance at the HSC and for awarding the Record of Student Achievement (ROSA)?
10. In what ways has educational research contributed to the teaching and student learning of the subject?
11. What options are open to pre-service teachers to engage in professional learning networks to support Languages Education?

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 5019 Mathematics Curriculum 1

Credit Points 10

Legacy Code 102893

Coordinator John Ley (https://directory.westernsydney.edu.au/search/name/John Ley/)

Description The subject will examine and model effective contemporary classroom practice to develop students' pedagogical content knowledge in the teaching of Mathematics. The subject will provide opportunities to engage with teaching Mathematics across strands and courses in years 7-10. The specifics of the relevant NSW Education Standards Authority Years 7-10 Syllabus and links with the K-6 curriculum will be analysed and critiqued as will current Australian and NSW educational/curriculum policies and priorities. Emphasis will be placed on principles underlying Mathematics teaching to develop innovative lesson and subject planning, choose relevant data and contexts to create authentic assessment tasks and apply consistent feedback for student learning. Opportunities for investigation and discussion of current research particularly related to the development of applied and inquiry based Mathematics learning will be presented. This subject is included in the Development Phase of the Master of Teaching program.

Level Postgraduate Coursework Level 5 subject

Pre-requisite(s) TEAC 7004 OR TEAC 7161 AND
TEAC 7032 AND
TEAC 7027 OR TEAC 7160

Restrictions

Students in program 1714, 1848 or 1914 must have Mathematics Curriculum Area applied to their student record before they can enrol in this subject. Students can view their Curriculum Areas on DegreeWorks in MySR.

Learning Outcomes

1. Demonstrate a comprehensive understanding of NSW Mathematics curriculum in Stages 4 and 5.
2. Apply socio-cultural perspectives and pedagogical inquiry theories and approaches used in the Mathematics curriculum area,

including those from culturally and linguistically diverse and Aboriginal and Torres Strait Islander backgrounds.
3. Present well-constructed, innovative and coherent student-centred lessons that include literacy (including key metalanguage) and numeracy, enhance thinking and ICT skills and which take into account the full range of students' abilities and school-based and system data.
4. Prepare a suitable range of assessment instruments that use valid, reliable and consistent judgements of student learning.
5. Design creative and innovative teaching programs that apply a critically reflective approach to teaching Mathematics and include opportunities to develop students' number, spatial, data analysis, problem-solving and algebraic skills and understanding.
6. Use a variety of teaching and learning strategies and resources, including ICT and a range of data and relevant contexts in teaching lessons and programs, including STEM and applied Mathematics.
7. Reflect and research professional learning to develop the discipline of Mathematics.

Subject Content

1. What is the nature of the Mathematics in the early and middle years of secondary education? How is the subject linked to what is taught in primary school and in the senior years of secondary education?
2. How are current educational policies and priorities with particular reference to Aboriginal and Torres Strait Islander education, literacy and numeracy and ICT, addressed in the teaching of the subject?
3. In what ways do active and engaging, student-centred teaching practices characterise the subject? Why is an understanding of socio-cultural and pedagogical theories and approaches important to quality teaching in the subject?
4. How are lessons planned, units written, differentiated and learning scoped and sequenced in the teaching of Mathematics?
5. Why is it necessary to differentiate teaching in Mathematics? How do teachers go about differentiation?
6. How may the incorporation of visionary and innovative uses of ICT, critical and creative thinking and problem solving support the achievement of quality learning outcomes in Mathematics?
7. How can assessment of learning, assessment for learning and assessment as learning be reconciled in teaching of Mathematics?
8. What records do teachers keep? How are those records used in reporting student performance and in particular used towards awarding the Record of Student Achievement (ROSA)?
9. In what ways has educational research contributed to the teaching and student learning of Mathematics?

Level Postgraduate Coursework Level 5 subject

Pre-requisite(s) TEAC 7004 OR TEAC 7161 AND
TEAC 7032 AND
TEAC 7027 OR TEAC 7160

Restrictions

Students in program 1714, 1848 or 1914 must have Mathematics Curriculum Area applied to their student record before they can enrol in this subject. Students can view their Curriculum Areas on DegreeWorks in MySR.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate a comprehensive understanding of Mathematics curricula in Stage 6.
2. Apply socio-cultural perspectives and pedagogical theories and approaches used in the Mathematics curriculum area for senior students.
3. Present well-constructed, innovative and coherent senior student-centred lessons that extend students' literacy (including key metalanguage) and numeracy, enhance thinking and ICT skills and which take into account the full range of students' abilities and school-based and system data.
4. Prepare a suitable range of senior assessment instruments that use valid, reliable and consistent judgements of student learning.
5. Design relevant, innovative and authentic teaching programs that apply a critically reflective approach to teaching Mathematics in stage 6 and include opportunities to develop students' understanding of key concepts.
6. Use a variety of teaching and learning strategies and resources, including ICT and a range of sources in teaching senior lessons and programs.
7. Critically reflect on research and pedagogy in teaching Mathematics.

Subject Content

1. What is the nature of Mathematics in the senior years of secondary education? How is the subject linked to what is taught in the junior and middle years of secondary education?
2. How are current educational policies and priorities addressed with particular reference to Aboriginal and Torres Strait Islander education, literacy and numeracy and ICT, in the teaching of Mathematics?
3. In what ways do active and engaging, student-centred teaching practices characterise the subject? Why is an understanding of socio-cultural and pedagogical theories and approaches important to quality teaching in Mathematics?
4. How are lessons planned, units written and learning scoped and sequenced in Mathematics?
5. Why is it necessary to continue to differentiate teaching in the subject in the senior years of secondary education? How do teachers go about differentiation?
6. How do teachers keep students safe during teaching in Mathematics?
7. How may the incorporation of visionary and innovative uses of ICT, critical and creative thinking and problem solving support the achievement of quality learning outcomes in the subject?
8. How can assessment of learning, assessment for learning and assessment as learning be reconciled in teaching Mathematics?
9. What records do teachers keep? How are those records used in reporting student performance at the HSC and for the awarding the Record of Student Achievement (ROSA)?
10. In what ways has educational research contributed to the teaching and student learning of Mathematics?
11. What options are open to pre-service teachers to continue to learn about Mathematics?

TEAC 7032

Restrictions

Students in program 1714 or 1848 must have Mathematics Curriculum Area applied to their student record before they can enrol in this subject. Students can view their Curriculum Areas on DegreeWorks in MySR.

Learning Outcomes

1. Generate and critically evaluate Mathematics curriculum program for students which synthesises a variety of pedagogical approaches and resources appropriate to these year levels, assessment tasks and curriculum content.
2. Critically analyse and develop a variety of research-informed classroom strategies which cater for individual differences in student learning in the classroom, including culturally and linguistically diverse and Aboriginal and Torres Strait Islander students.
3. Evaluate the relationship between learning task design, student learning and expertise, higher order thinking, assessment, feedback and reporting strategies and evaluation in Mathematics Education.
4. Present well-constructed, innovative and coherent STEM based student-centred lessons that include literacy (including key metalanguage) and numeracy, enhance thinking and ICT skills and which take into account the full range of students' abilities and school-based and system data.
5. Prepare a suitable range of assessment instruments that use valid, reliable and consistent judgements of student learning.
6. Design and select innovative STEM and problem-based teaching resources that apply a critically reflective approach to teaching arrange of Mathematics curricula and develop students critical and creative capabilities.
7. Reflect and research professional learning to develop the discipline of Mathematics teaching.

Subject Content

1. What is the relevant and contemporary Mathematics teaching in the early and middle years of secondary education?
2. How are current educational policies and priorities with particular reference to Aboriginal and Torres Strait Islander education, literacy and numeracy and ICT, addressed in the teaching of Mathematics?
3. In what ways do active and engaging, student-centred teaching practices characterise Mathematics teaching. Why is an understanding of socio-cultural and pedagogical theories and approaches important to quality teaching in the subject?
4. How are high order, creative and critical Mathematics lessons planned, units written and learning scoped and sequenced in the subject?
5. Why is it necessary to differentiate teaching in Mathematics? How do teachers go about differentiation?
6. How may the incorporation of creative, innovative uses of ICT, critical and creative thinking and problem solving support the achievement of quality learning outcomes in the subject?
7. How can assessment of learning, assessment for learning and assessment as learning be reconciled in teaching Mathematics?
8. What records do teachers keep? How are those records used in reporting student performance and in particular used towards awarding the Record of Student Achievement (ROSA)?
9. In what ways has educational research contributed to the teaching and student learning of Mathematics t?
10. What are the future directions of Mathematics education nationally and internationally?

Assessment

TEAC 5023 Mental Health in Educational Contexts

Credit Points 10

Legacy Code 102912

Coordinator Roberto Parada (https://directory.westernsydney.edu.au/search/name/Roberto Parada/)

Description This subject is designed to promote the application and integration of current psychological and educational pedagogy, theory, evidence and best practice in supporting students who may be experiencing mental health challenges in educational settings. A problem-based approach to learning and teaching is used, employing case-based vignettes depicting various specific mental health presentations. Students are required to determine how they will develop student, classroom and curriculum level interventions to promote the wellbeing and learning of young people in educational settings. This occurs through small group work and self-directed research in which students are encouraged to utilise their prior knowledge in the topic area and identify the gaps in their knowledge as they attempt to solve the problem whilst being supported by their tutor and peers.

School Education

Level Postgraduate Coursework Level 5 subject

Restrictions

Must be enrolled in 1911 Master of Education, 1914 Graduate Certificate in Secondary Teaching or 1714 Master of Teaching (Secondary).

Learning Outcomes

1. Analyse the implications for learning and behaviour for a range of common mental health difficulties in educational settings
2. Implement a range of pedagogical interventions to foster positive mental health and engagement with learning activities
3. Develop and implement a range of teaching strategies informed by evidence-based principles to meet the diverse mental health needs of students
4. Articulate a range of supportive responses to mental health emergencies in educational settings
5. Communicate effectively with key stakeholders to promote positive mental health for students and initiate change in educational settings

Subject Content

1. What is mental health?
2. Understanding mental health and socioemotional wellbeing across the life span and communities, including Aboriginal and Torres Strait Islander Peoples and Culturally and Linguistically Diverse Groups
3. Mental health and self-harm/suicide prevention in Learning Communities

4. Understanding risk and protective factors in mental health
5. Implications of internalising, anxiety, depressive, externalising, and psychotic disorders and ADHD for learning and behaviour
6. Pedagogical adaptations/interventions for anxiety disorders, depressive disorders, ADHD and externalising disorders, and for young people recovering from psychotic disorders
7. Implications of trauma for learning and behaviour and trauma informed pedagogy
8. Preparation for critical incidents

Level Postgraduate Coursework Level 5 subject

Pre-requisite(s) TEAC 7004 OR TEAC 7161 AND
TEAC 7032 AND
TEAC 7027 OR TEAC 7160

Restrictions

Students in program 1714 or 1914 must have Music Curriculum Area applied to their student record before they can enrol in this subject. Students can view their Curriculum Areas on DegreeWorks in MySR.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate understanding of NSW Education Standards Authority Stage 6 Music syllabuses and the effect upon syllabus implementation of current NSW and Australian educational policies and priorities.
2. Demonstrate understanding of socio-cultural perspectives, including Aboriginal and Torres Strait Islander perspectives where relevant, and pedagogical theories and approaches used in teaching senior Music.
3. Present well-constructed, innovative and coherent student-centred lessons that include literacy (including key metalanguage) and numeracy, enhance thinking and ICT skills and which take into account the full range of students' abilities and school-based and system data.
4. Prepare a suitable range of senior assessment instruments that use valid, reliable and consistent judgements of student learning.
5. Design and select innovative teaching resources that apply a critically reflective approach to teaching senior Music and include opportunities to develop students' inquiry skills.
6. Use a variety of teaching and learning strategies and resources, including ICT and a range of sources in teaching lessons and programs.
7. Reflect and research professional learning to develop the discipline of Music teaching.

Subject Content

1. What is the nature of the Music in the senior years of secondary education?
2. How are current educational policies and priorities addressed with particular reference to Aboriginal and Torres Strait Islander education, literacy and numeracy and ICT, in the teaching of the subject?
3. In what ways do active and engaging, student-centred teaching practices characterise the subject? Why is an understanding of socio-cultural and pedagogical theories and approaches important to quality teaching in the subject?
4. How are lessons planned, units written and learning scoped and sequenced in the subject?
5. Why is it necessary to continue to differentiate teaching in the subject in the senior years of secondary education? How do teachers go about differentiation?
6. How do teachers keep students safe during teaching in the subject?
7. How may the incorporation of visionary and innovative uses of ICT, critical and creative thinking and problem solving support the achievement of quality learning outcomes in the subject?

8. How can assessment of learning, assessment for learning and assessment as learning be reconciled in teaching the subject?
9. What records do teachers keep? How are those records used in reporting student performance at the HSC and for awarding the Record of Student Achievement (ROSA)?
10. In what ways has educational research contributed to the teaching and student learning of the subject?
11. What options are open to pre-service teachers to continue to learn about Music education?

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Professional Task	2000 words	50	N	Individual
Portfolio	2000 words	50	N	Individual

TEAC 5026 Music Curriculum 3

Credit Points 10

Legacy Code 102879

Coordinator Peter Calvert (https://directory.westernsydney.edu.au/search/name/Peter Calvert/)

Description This subject in Music curriculum, explores in greater depth pedagogical content knowledge established in Music Curriculum 1, including general capabilities, cross-curriculum priorities and other allied materials. They will critique their prior knowledge and experience in the field and how these connect with the scope of the curriculum, identifying opportunities, challenges and responsibilities of Music teaching. Pre-service teachers will explore extended theoretical frameworks associated with teaching and learning in Music education. They will learn evidence-based approaches to plan for effective teaching and learning, including embedded literacy and numeracy, and the use of digital technologies. They will learn approaches for engaging learners and to meet the learning needs of diverse students. They will learn to compose good questions, arrange music compositions and analyse music forms and concepts.

School Education

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 5 subject

Pre-requisite(s) TEAC 7027 AND
TEAC 7004 AND
TEAC 7032

Restrictions

Students in program 1714 must have Music Curriculum Area applied to their student record before they can enrol in this subject. Students can view their Curriculum Areas on DegreeWorks in MySR.

Learning Outcomes

1. Evaluate a Music Education curriculum program for senior students that incorporates music solo and ensemble performance, composition, musicology, music history and aural training and music theory in a range of genre and styles.
2. Analyse a variety of research-informed classroom strategies which cater for individual differences in student learning in the Music Education classroom (e.g. differences informed by cognitive, physical, socio-economic, cultural, linguistic and religious diversity) and integrate general capabilities and cross curriculum priorities, including Aboriginal and Torres Strait Islander perspectives.
3. Analyse the relationships between learning task design, student learning and expertise, higher order thinking, assessment, feedback and reporting strategies and evaluation in Music Education, and apply to the development of own teaching practice
4. Apply assessment strategies, to promote student learning and moderate and interpret student assessment data.
5. Design and implement aural training programs, music style analyses and music performance and composition activities for senior secondary schools.
6. Reflect on future professional learning in Music Education.

Subject Content

1. What is the nature of the Music in the early and middle years of secondary education?
2. How are current educational policies and priorities with particular reference to Aboriginal and Torres Strait Islander education, literacy and numeracy and ICT, addressed in the teaching of the subject?
3. In what ways do active and engaging, student-centred teaching practices characterise the subject? Why is an understanding of socio-cultural and pedagogical theories and approaches important to quality teaching in the subject?
4. How are lessons planned, units written and learning scoped and sequenced in the subject?
5. Why is it necessary to differentiate teaching in the subject? How do teachers go about differentiation?
6. How may the incorporation of visionary and innovative uses of ICT, critical and creative thinking and problem solving support the achievement of quality learning outcomes in the subject?
7. How can assessment of learning, assessment for learning and assessment as learning be reconciled in teaching the subject?
8. What records do teachers keep? How are those records used in reporting student performance and in particular used towards awarding the Record of Student Achievement (ROSA)?
9. In what ways has educational research contributed to the teaching and student learning of the subject?

10. What options are open to pre-service teachers to continue to learn about the subject?

TEAC 5027 Music Curriculum 4

Credit Points 10

Legacy Code 102880

Coordinator Peter Calvert (https://directory.westernsydney.edu.au/search/name/Peter Calvert/)

Description This subject will explore the discipline of Music education in contemporary Australian society, and the senior secondary Music extension curriculum. The subject will investigate current evidence-based approaches for curriculum development for quality teaching and learning, including formative and summative assessment. Pre-service teachers will learn approaches for building knowledge and praxis of Music. They will learn approaches for engaging adolescent learners and differentiate the curriculum in the senior secondary years. They will further develop skills to shape the dialogic talk of the classroom. Pre-service teachers will formulate subject and assessment plans in order to demonstrate a knowledge of curriculum, learning and assessment theory. They will develop teaching resources for effective teaching and learning and to link with curriculum. They will critique curriculum implementation in current socio-cultural school contexts.

TEAC 5028 PDHPE Curriculum 1

Credit Points 10

Legacy Code 102885

Coordinator Christopher Lazarou (https://directory.westernsydney.edu.au/search/name/Christopher Lazarou/)

Description The subject will examine and model effective contemporary classroom practice to develop students' pedagogical content knowledge in the teaching of Personal Development, Health and Physical Education (PDHPE). The subject will provide opportunities to engage with teaching PDHPE across health and practical skills strands in years 7-10. The specifics of the relevant NSW Education Standards Authority Years 7-10 Syllabus and links with the K-6 curriculum will be analysed and critiqued as will current Australian and NSW educational/curriculum policies and priorities. Emphasis will be placed on principles such as games-sense theory that inform PDHPE teaching. This subject will develop current and applied skills in innovative lesson and subject planning, choose relevant data and contexts to create authentic assessment tasks and apply consistent feedback for student learning. Opportunities for investigation and discussion of current research particularly related to the development of applied and health based learning will be presented. This subject is included in the Development Phase of the Master of Teaching program.

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 5 subject

Pre-requisite(s) TEAC 7004 OR TEAC 7161 AND
TEAC 7032 AND
TEAC 7027 OR TEAC 7160

Restrictions

Students in program 1714 or 1914 must have PDHPE Curriculum Area applied to their student record before they can enrol in this subject. Students can view their Curriculum Areas on DegreeWorks in MySR.

Learning Outcomes

1. Demonstrate a comprehensive understanding of NSW PDHPE curriculum in Stage 4 and 5.
2. Apply socio-cultural perspectives and pedagogical inquiry theories and approaches used in the PDHPE curriculum area.
3. Demonstrate intercultural understanding through engaging with Aboriginal and Torres Strait Islander sense of connection to place and kinship groups, participation in physical activity, traditional and contemporary games, and health initiatives
4. Present well-constructed, innovative and coherent student-centred lessons that include literacy (including key metalanguage) and numeracy, enhance thinking and ICT skills and which take into account the full range of students' abilities and school-based and system data.
5. Prepare a suitable range of assessment instruments that use valid, reliable and consistent judgements of student learning.
6. Design creative and innovative teaching programs that apply a games-sense approach to teaching Physical Education and include opportunities to develop students' movement skill and performance, problem-solving, decision-making, tactical understanding and skills.
7. Use a variety of teaching and learning strategies and resources, including ICT and a range of data and relevant contexts in teaching lessons and programs.
8. Reflect and research professional learning to develop the discipline of Health and Physical Education.

Subject Content

1. What is the nature of PDHPE in the early and middle years of secondary education? How is the subject linked to what is taught in primary school and in the senior years of secondary education?
2. How are current educational policies and priorities with particular reference to Aboriginal and Torres Strait Islander education, literacy and numeracy and ICT, addressed in the teaching of the subject?
3. What is the significance of kinship in relationships and does how a sense of connection to Country/Place for Aboriginal and Torres Strait Islander People enhances health and wellbeing?
4. In what ways do active and engaging, student-centred teaching practices characterise the subject? Why is an understanding of socio-cultural and pedagogical theories and approaches important to quality teaching in the subject?5
5. How are lessons planned, units written and learning scoped and sequenced in the subject?
6. Why is it necessary to differentiate teaching in the subject? How do teachers go about differentiation?

Coordinator Gail Walker (https://directory.westernsydney.edu.au/search/name/Gail Walker/)

Description The subject will examine and model effective contemporary classroom practice to develop students' pedagogical content knowledge in the teaching of Science. The subject will provide opportunities to engage with teaching Science across strands and programs in years 7-10. The specifics of the relevant NSW Education Standards Authority Years 7-10 Syllabus and links with the K-6 curriculum will be analysed and critiqued as will current Australian and NSW educational/curriculum policies and priorities. Emphasis will be placed on principles underlying Science teaching to develop innovative lesson and subject planning, choosing relevant data and contexts to create authentic assessment tasks and applying consistent feedback for student learning. There will be a focus on the development of laboratory skills and techniques including aspects of general and mandatory safety requirements. Opportunities for investigation and discussion of current research particularly related to the development of applied and inquiry-based Science learning will be presented. This subject is included in the Development Phase of the Master of Teaching program.

School Education

Discipline Teacher Education: Secondary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 5 subject

Pre-requisite(s) TEAC 7004 OR TEAC 7161 AND
TEAC 7032 AND
TEAC 7027 OR TEAC 7160

Restrictions

Students in program 1714, 1848 or 1914 must have a relevant Science Curriculum Area applied to their student record before they can enrol in this subject. Students can view their Curriculum Areas on DegreeWorks in MySR.

Learning Outcomes

1. Demonstrate a comprehensive understanding of NSW Science curriculum in Stages 4 and 5.
2. Apply socio-cultural perspectives and pedagogical inquiry theories and approaches used in the Science curriculum area.
3. Demonstrate an understanding of the scientific principles used by Aboriginal and Torres Strait Islander peoples in developing technologies, using materials, cultivating plants and sustainably managing natural resources.
4. Present well-constructed, innovative and coherent student-centred lessons that include literacy (including key metalanguage) and numeracy, enhance thinking and ICT skills and which take into account the full range of students' abilities and school-based and system data.
5. Prepare a suitable range of assessment instruments that use valid, reliable and consistent judgements of student learning.
6. Design creative and innovative teaching programs that apply a critically reflective approach to teaching Science and include opportunities to develop students' number, spatial, data analysis, problem-solving and algebraic skills and understanding.
7. Use a variety of teaching and learning strategies and apply a variety of laboratory skills and techniques including aspects of general and mandatory safety requirements in the laboratory.
8. Reflect and research professional learning to develop the discipline of Science.

Subject Content

1. What are the main concepts and approaches to Science in the early and middle years of secondary education? How is the subject linked to what is taught in primary school and in the senior years of secondary education?
2. How are current educational policies and priorities with particular reference to Aboriginal and Torres Strait Islander education, literacy and numeracy and ICT, addressed in the teaching of the subject?
3. What are the scientific principles used by Aboriginal and Torres Strait Islander peoples in developing technologies, using materials, cultivating plants and sustainably managing natural resources?
4. In what ways do active and engaging, student-centred teaching practices characterise the subject? Why is an understanding of socio-cultural and pedagogical theories and approaches important to quality teaching in the subject?
5. How are lessons planned, units written and learning scoped and sequenced in the subject?
6. Why is it necessary to differentiate teaching in the subject? How do teachers go about differentiation?
7. How do teachers keep students safe during teaching in Science?
8. How may the incorporation of visionary and innovative uses of ICT, critical and creative thinking and problem solving support the achievement of quality learning outcomes in the subject?
9. How can assessment of learning, assessment for learning and assessment as learning be reconciled in teaching the subject?
10. What records do teachers keep? How are those records used in reporting student performance and in particular used towards awarding the Record of Student Achievement (ROSA)?
11. In what ways has educational research contributed to the teaching and student learning of the subject?
12. What options are open to pre-service teachers to continue to learn about Science teaching?

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Professional Task	2000 Words	50	N	Individual
Portfolio	2000 Words (Portfolio)	50	N	Individual

Restrictions

Students in program 1714, 1848 or must have a relevant Science Curriculum Area applied to their student record before they can enrol in this subject. Students can view their Curriculum Areas on DegreeWorks in MySR.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate a comprehensive understanding of Science curricula in Stage 6.
2. Apply socio-cultural perspectives and pedagogical theories and approaches used in the Science curriculum area for senior students, including Aboriginal and Torres Strait Islander perspectives where relevant.
3. Present well-constructed, innovative and coherent senior student-centred lessons that extend students' literacy (including key metalanguage) and numeracy, enhance thinking and ICT skills and which take into account the full range of students' abilities and school-based and system data.
4. Prepare a suitable range of senior assessment instruments that use valid, reliable and consistent judgements of student learning.
5. Design relevant, innovative and authentic teaching programs that apply a critically reflective approach to teaching Science in Stage 6 and include opportunities to develop students' understanding of science concepts.
6. Use a variety of teaching and learning strategies and resources, including ICT and a range of sources in teaching senior lessons and programs.
7. Critically reflect on Science Education and demonstrate capacity to practically manage laboratory protocols and experiments including safe handling and storage of chemicals, specimens and equipment, risk assessments and mandatory safety requirements.

Subject Content

1. What is the range and depth of science in senior years of secondary education? How is the subject linked to what is taught in the junior and middle years of secondary education?
2. How are current educational policies and priorities addressed with particular reference to Aboriginal and Torres Strait Islander education, literacy and numeracy and ICT, in the teaching of the subject?
3. In what ways do active and engaging, student-centred teaching practices characterise the subject? Why is an understanding of socio-cultural and pedagogical theories and approaches important to quality teaching in the subject?
4. How are lessons planned, units written and learning scoped and sequenced in the subject?
5. Why is it necessary to continue to differentiate teaching in the subject in the senior years of secondary education? How do teachers go about differentiation?
6. How do teachers keep students safe during teaching in the subject?
7. How may the incorporation of visionary and innovative uses of ICT, critical and creative thinking and problem solving support the achievement of quality learning outcomes in the subject?
8. How can assessment of learning, assessment for learning and assessment as learning be reconciled in teaching the subject?
9. What records do teachers keep? How are those records used in reporting student performance at the HSC and for awarding the Record of Student Achievement (ROSA)?
10. In what ways has educational research contributed to the teaching and student learning of the subject?

11. What options are open to pre-service teachers to continue to learn about Science as a discipline?

Assessment

TEAC 5038 Technology Curriculum 3

Credit Points 10

Legacy Code 102883

Coordinator Dorian Stoilescu (https://directory.westernsydney.edu.au/search/name/Dorian Stoilescu/)

Description In this subject, the place of Technology and applied STEM in secondary curriculum will be further explored using evidence-based approaches for curriculum development and alignment and to plan for effective teaching and learning, including formative and summative assessment. Pre-service teachers will learn approaches for teaching a range of Technologies using STEM pedagogy. They will focus on assessment design for project and problem-based learning. The subject will demonstrate approaches for engaging diverse senior secondary learners. Pre-service teachers will develop subject and assessment plans and demonstrate a knowledge of curriculum, learning and assessment theory. The subject requires students to develop original portfolio of teaching artefacts that demonstrate capacity to create and critique resources for effective teaching and learning in Technology.

School Education

Discipline Teacher Education: Secondary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 5 subject

Pre-requisite(s) TEAC 7027 AND
TEAC 7004 AND
TEAC 7032

Restrictions

Students in program 1714 or 1848 must have a relevant Technology Curriculum Area applied to their student record before they can enrol in this subject. Students can view their Curriculum Areas on DegreeWorks in MySR.

Learning Outcomes

1. Generate and critically evaluate Technologies curriculum program for students which synthesises a variety of pedagogical approaches and resources appropriate to these year levels, assessment tasks and curriculum content.
2. Critically analyse and develop a variety of research-informed classroom strategies which cater for individual differences in student learning in the classroom.
3. Demonstrate understanding of Aboriginal and/or Torres Strait Islander design solutions in Technology and the impact of historical and contemporary design solutions surrounding Indigenous cultural and intellectual property.
4. Evaluate the relationship between learning task design, student learning and expertise, higher order thinking, assessment, feedback and reporting strategies and evaluation in Technology Education.
5. Present well-constructed, innovative, and coherent Technology and STEM based student-centred lessons that include literacy (including key metalanguage) and numeracy, enhance thinking and ICT skills and which take into account the full range of students' abilities and school-based and system data.
6. Prepare a suitable range of senior assessment instruments that use valid, reliable, and consistent judgements of student learning.
7. Design and select innovative problem-based teaching resources that apply a critically reflective approach to teaching arrange of Technologies and develop students critical and creative capabilities.
8. Reflect and research professional learning to develop the discipline of Technology teaching.

Subject Content

1. What is the nature of the subject in the secondary education including the concepts, substance, and structure of STEM curriculum content in Technology?
2. How are current educational policies and priorities addressed with particular reference to Aboriginal and Torres Strait Islander education, literacy and numeracy and ICT, in the teaching of the subject?
3. How can we explore Aboriginal and/or Torres Strait Islander design solutions in Technology?
4. How can we investigate the impact of historical and contemporary design solutions and understand ethical responsibilities surrounding Indigenous cultural and intellectual property?
5. In what ways do active and engaging, student-centred teaching practices inform the pedagogy for problem and project based learning?

6. Why is it necessary to continue to differentiate teaching in the subject in the secondary education? How do teachers go about differentiation?
7. Specific professional practices and key pedagogical approaches related to teaching and learning in Design and Technologies, and their theoretical underpinnings (eg. OHS, safe practices).
8. Alignment and coherence in content, learning outcomes, pedagogy in curriculum programming in Technologies.
9. Pedagogical strategies to facilitate creativity, promote problem solving and foster critical thinking in Technologies.
10. How may the incorporation of visionary and innovative uses of ICT, critical and creative thinking and problem solving support the achievement of quality learning outcomes in the subject?
11. How can assessment of learning, assessment for learning and assessment as learning be reconciled in teaching the subject?
12. In what ways has educational research contributed to the teaching and student learning of the subject?
13. What options are open to pre-service teachers to continue to learn about the subject?

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Professional Task	2000 Words	50	N	Individual
Portfolio	2000 Words (Portfolio)	50	N	Individual

Prescribed Texts

New South Wales Standards Authority [NESA]. (2013) Technology Stage 6 Syllabuses. (https://educationstandards.nsw.edu.au/wps/portal/nesa/11-12/stage-6-learning-areas/technologies/)

TEAC 5039 Technology Curriculum 4

Credit Points 10

Legacy Code 102884

Coordinator Adam Watson (https://directory.westernsydney.edu.au/search/name/Adam Watson/)

Description In this subject, the place of Technology Curricula in senior secondary will be further explored using evidence-based approaches for curriculum development and alignment and to plan for effective teaching and learning, including formative and summative assessment. Pre-service teachers will learn approaches for teaching a range of Technologies and how to provide constructive feedback and reporting connected to project and problem-based learning. The subject will demonstrate approaches for engaging diverse senior secondary learners. Pre-service teachers will develop subject and assessment plans and demonstrate a knowledge of curriculum, learning and assessment theory. The subject requires students to develop original portfolio of teaching artefacts that demonstrate capacity to create and critique resources for effective teaching and learning in Technology.

School Education

Discipline Teacher Education: Secondary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 5 subject

Pre-requisite(s) TEAC 7027 AND
TEAC 7004 AND
TEAC 7032

Restrictions

Students in program 1714 or 1848 must have a relevant Technology Curriculum Area applied to their student record before they can enrol in this subject. Students can view their Curriculum Areas on DegreeWorks in MySR.

Learning Outcomes

1. Generate and critically evaluate a Technologies curriculum program for senior students which synthesises a variety of pedagogical approaches and resources appropriate to these year levels, assessment tasks and curriculum content.
2. Critically analyse and develop a variety of research-informed classroom strategies which cater for individual differences in student learning in the classroom.
3. Demonstrate understanding of Aboriginal and/or Torres Strait Islander design solutions in Technology and the impact of historical and contemporary design solutions surrounding Indigenous cultural and intellectual property.
4. Evaluate the relationship between learning task design, student learning and expertise, higher order thinking, assessment, feedback and reporting strategies and evaluation in Technology Education.
5. Present well-constructed, innovative and coherent Stage 6 STEM based student-centred lessons that include literacy (including key metalanguage) and numeracy, enhance thinking and ICT skills and which take into account the full range of students' abilities and school-based and system data.
6. Prepare a suitable range of senior assessment instruments that use valid, reliable and consistent judgements of student learning.
7. Design and select innovative STEM and problem based teaching resources that apply a critically reflective approach to teaching arrange of Technologies and develop students critical and creative capabilities in the senior years of schooling.
8. Reflect and research professional learning to develop the discipline of Technology teaching.

Subject Content

1. What is the nature of Technology in the senior years of secondary education? How is the subject linked to what is taught in the junior and middle years of secondary education?
2. How are current educational policies and priorities addressed with particular reference to Aboriginal and Torres Strait Islander education, literacy and numeracy and ICT, in the teaching of the subject?
3. How can we explore Aboriginal and/or Torres Strait Islander design solutions in Technology?
4. How can we investigate the impact of historical and contemporary design solutions and understand ethical responsibilities surrounding Indigenous cultural and intellectual property?
5. In what ways do active and engaging, student-centred teaching practices characterise the subject?
6. Why is an understanding of socio-cultural and pedagogical theories and approaches important to quality teaching in the subject?

7. How are lessons planned, units written and learning scoped and sequenced in the subject?
8. Why is it necessary to continue to differentiate teaching in the subject in the senior years of secondary education? How do teachers go about differentiation?
9. How do teachers keep students safe during teaching in the subject?
10. How may the incorporation of visionary and innovative uses of ICT, critical and creative thinking and problem solving support the achievement of quality learning outcomes in the subject?
11. How can assessment of learning, assessment for learning and assessment as learning be reconciled in teaching Technologies?
12. What records do teachers keep? How are those records used in reporting student performance at the HSC and for awarding the Record of Student Achievement (ROSA)?
13. In what ways has educational research contributed to the teaching and student learning of the Technology?

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 5040 Digital Literacies in Education

Credit Points 10

Coordinator Jose Hanham (https://directory.westernsydney.edu.au/search/name/Jose Hanham/)

Description This subject will introduce, develop and apply innovative digital literacy skills needed to be successful in the teaching profession. The subject will address digital literacy as a multidimensional skill-set covering domains related to: i) searching, accessing, analysing, and critically evaluating information; ii) communicating and sharing information; iii) creating digital products; iv) safety, and v) problem-solving. The subject will focus on the digital learner, instructional design in digital contexts, e-safety, social media, intellectual property and legal implications for teachers. The subject will assess the critical analysis, creation and application of digital literacy skills for teachers as determined by the Australian Professional Teaching Standards. This subject is included in the Development Phase of the Master of Teaching program.

School Education

Discipline Teacher Education, Not Elsewhere Classified.

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 5 subject

Restrictions

Students must be enrolled in program 1714 Master of Teaching (Secondary) or 1848 Master of Teaching (Secondary) STEM.

Learning Outcomes

1. Articulate the relevant issues of a digital and globalised world and effective strategies to support the sustainable, safe, responsible, and ethical use of ICT in learning and teaching.
2. Apply instructional design and multimedia principles to expand curriculum learning opportunities for students.
3. Critically evaluate, retrieve, manipulate, and manage information from a range of digital sources.
4. Create engaging and accessible digital content for educational contexts
5. Reflect on digital literacy to identify and plan professional learning needs.

Subject Content

Topic 1 - The Digital Learner
Topic 2 - The Current Digital Landscape
Topic 3 - Emerging Digital Technologies
Topic 4 - Accessibility
Topic 5 - Instructional Design and Multimedia Principles
Topic 6 - Creating, curating, and sharing digital content
Topic 7 - Presenting data effectively to key stakeholders

Assessment

TEAC 5041 Career Education Practice

Credit Points 10

Coordinator Roberto Parada (https://directory.westernsydney.edu.au/search/name/Roberto Parada/)

Description This subject introduces students to core knowledge and skills necessary to prepare others to follow their career/work aspirations. By examining labour market information, identifying relevant support organisations and services students will be able to apply career development theories, concepts, research, and associated models and frameworks to provide career planning that is sensitive and respectful of an individual's capabilities and barriers to work. This subject also introduces students to methods to evaluate the advice and services which they provide.

School Education

Discipline Teacher Education, Not Elsewhere Classified.

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 5 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Apply career development theories, concepts, research, and associated models and frameworks to practice
2. Use effective verbal and written communication skills to develop and maintain rapport
3. Collect, analyse, and use information for the purpose of career education
4. Use motivational interviewing for career education
5. Articulate a strength-based approach with diverse advisees
6. Apply methods and techniques to evaluate service provision

Subject Content

1. Preparation for work/career
2. Developing and researching career prospects
3. Preparation of career texts and communications in a connected world
4. Personal communication strategies and concepts for career education
5. Motivation and career education theories
6. The strength-based approach in career education
7. Evaluating the benefits of career education

Assessment

TEAC 5042 Supporting Career and Education Aspirations

Credit Points 10

Coordinator Nathan Berger (https://directory.westernsydney.edu.au/search/name/Nathan Berger/)

Description This subject introduces students to the core knowledge and skills necessary to support career and education aspirations through professional practice as a career advisor. The subject examines theoretical perspectives on career aspirations, empirical research into the development of aspirations, strategies to support the aspirations of specific populations, and skills to identify the strengths, values, and interests of those participating in career education.

School Education

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 5 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Describe major career development theories and frameworks
2. Evaluate contemporary research into the development of career and education aspirations
3. Engage in inclusive career education practice by recognising and respecting diversity
4. Demonstrate commitment to professionalism and lifelong learning in career education
5. Apply theories, frameworks, research, and labour market information to the practice of career education

Subject Content

1. Career development concepts and theories
2. Contemporary research into career and education aspirations
3. Labour market information for career pathway planning
4. Diversity and social justice in career education
5. Strengths, values, and interests of participants in career education

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 7001 Aboriginal & Culturally Responsive Pedagogies

Credit Points 10

Legacy Code 102085

Coordinator Shirley Gilbert (https://directory.westernsydney.edu.au/search/name/Shirley Gilbert/)

Description In this subject students will be introduced to research, perspectives and practices associated with successful and culturally appropriate curriculum and pedagogy for teaching Aboriginal and Torres Strait Islander adolescent students. The subject is informed by current research practices, policy developments and curriculum deliverables that require culturally appropriate, responsive, respectful and informed teaching and learning practices that will benefit all education participants. Students will gain knowledge, insight, skills and appreciation of the importance and implications of consultation, negotiation and two-way partnerships with local Aboriginal communities and schools. It will also focus on empowering students to effectively reflect on all aspects of inquiry-based teaching with respect to Aboriginal perspectives and the delivery of lessons and effective support to all secondary students. This subject is included in the Development Phase of the Master of Teaching program.

School Education

Discipline Teacher Education: Secondary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) TEAC 7004 OR TEAC 7161 AND
TEAC 7032 AND
TEAC 7027 OR TEAC 7160

Restrictions

Students must be enrolled in 1714 Master of Teaching (Secondary) or 1848 Master of Teaching (Secondary) STEM and have successfully completed 40 credit points before enrolling in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain Aboriginal and Torres Strait Islander histories, the impact of culture, cultural identity and diversity, and languages in rural, remote and urban schooling.
2. Identify specific learning needs of Aboriginal and Torres Strait Islander adolescent students in rural, remote and urban settings.
3. Examine the roles and responsibilities of Aboriginal and Torres Strait Islander support personnel within systems and at school, and their contribution to education and community in improving educational outcomes for Aboriginal and Torres Strait Islander adolescent students.
4. Apply evidence-based principles when selecting specific literacy and numeracy strategies and developing resources that address the cultural and Aboriginal English and language learning needs of Aboriginal and Torres Strait Islander adolescent students.
5. Assess Australian and NSW government educational priorities and policies which impact on Aboriginal and Torres Strait Islander education.
6. Evaluate the role teachers, staff and schools play in the promotion of communication strategies which will enhance community consultation and the establishment of partnerships with Aboriginal and Torres Strait Islander parents and communities.

Subject Content

1. What does it mean to be Aboriginal or Torres Strait Islander person?
2. What role does Aboriginal history play in the understanding of Australia and its national and international identity? Why is developing an understanding of Aboriginal history and cultures important in teacher education? Why are perspectives and deep knowledge of Aboriginal history; key government policies, legislation and legal decisions in relation to land and water rights, and heritage and identity important to the life of an effective teacher? How will teachers use this knowledge in their own teaching areas to provide engagement, authenticity and respect in the delivery of content to students of Aboriginal and Torres Strait Islander backgrounds?
3. What do current attendance, retention, literacy, numeracy and suspension data tell us about the status of Aboriginal and Torres Strait Islander education in Australia? How representative are these data of Australian community expectations? What can be done to improve the life outcomes of Aboriginal and Torres Strait Islander students?
4. What are current Aboriginal and Torres Strait Islander educational policies? How are Aboriginal and Torres Strait Islander perspectives and delivery requirements embedded in the curriculum? What does research tell us about Aboriginal and Torres Strait Islander education
   a. Brief history of Aboriginal education and policy
   b. Definitions and complexities of Aboriginal identities
   c. Demographics and schooling: what are the links? My School, NAPLAN, Australian Curriculum
   d. Distribution of power and power relationships in schools
   e. School is for me (2006) / Teachers for a Fair Go (2012)
   f. Review of Aboriginal education (2005)
   g. For example Yunkaporta (2009) and Sarra (2007)
5. How can teachers and schools enhance community consultation and the establishment of partnerships with Aboriginal and Torres Strait Islander parents and communities? How do teachers and schools work with community to develop and sustain resource networks, classroom materials, strategies and partnerships that are appropriate for our teaching?
   a. Working with schools developing a whole school plan
   b. Aboriginal Education Policy 2010
   c. Working with community, Aboriginal Education Consultative Groups, Aboriginal workers and professional associations parents and caregivers, and school support staff
   d. Aboriginal mental health and wellbeing in schools
   e. Behaviour and Shame
6. How might research and community relationships develop stronger cultural expressions and identity for students in schools?
7. What is best practice pedagogy for Aboriginal and Torres Strait Islander students? How is best practice reported in the research literature? How do we develop / locate / work with community to

develop materials and partnerships for our teaching that is appropriate?

8. How can reflective practice shift teachers' images of 'self' / pedagogies / settings to ensure equity to all students?
a. What is an Aboriginal Pedagogy?
b. What is quality teaching using Aboriginal approaches?
c. How do teachers make themselves more effective in classrooms with high diversity?
d. How do teachers become 'deadly' teachers?

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 7002 Addressing Diversity in Mathematics Teaching and Learning

Credit Points 10

Legacy Code 102322

Coordinator Peter Mcdonald (https://directory.westernsydney.edu.au/search/name/Peter Mcdonald/)

Description In this subject students will apply their knowledge of curriculum and pedagogy to address diversity within the primary mathematics classroom. Students will explore strategies to address a broad range of learning needs incorporating gifted and talented students, students from diverse cultural backgrounds including Aboriginal students and students with additional needs including dyscalculia. Other issues such as gender and mathematics for English as an Additional Language Learners (EALD) will be investigated.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1682 Master of Special Education; 1720 Master of Inclusive Education; 1830 Graduate Certificate in Primary Mathematics Education; 1847 Master of Education (STEM) or 1911 Master of Education.

Assumed Knowledge

Students must have either completed all core mathematics subjects of the 1781 Master of Teaching (Primary) program at Western Sydney University, or be an accredited primary teacher, or enrolled in the Master of Inclusive Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain how concepts located within the primary mathematics curriculum are inter-connected
2. Apply contemporary research relating to students considered mathematically gifted and talented to primary mathematics pedagogy
3. Summarise issues relating to Aboriginal children and the teaching and learning of mathematics
4. Demonstrate an understanding of pedagogies that promote differentiation in the primary mathematics classroom
5. Identify the implications of specific issues relating to diversity for primary mathematics teaching and learning
6. Design a range of inclusive mathematical tasks/activities

Subject Content

1. Identifying the big ideas within the primary mathematics curriculum
2. Teaching mathematics to children who are gifted and talented
3. Teaching mathematics to a variety of cultures including Aboriginal students
4. Gender issues in primary mathematics education
5. Primary mathematics and English language learners (ELL)
6. Differentiation in mathematics
7. Problem solving for differentiation
8. Programming and planning for students with additional needs in relation to mathematics and numeracy

Assessment

TEAC 7003 Addressing Diversity in Science Teaching and Learning

Credit Points 10

Legacy Code 102486

Coordinator Karina Mckoy (https://directory.westernsydney.edu.au/search/name/Karina Mckoy/)

Description The purpose of this subject is for students to develop knowledge of science teaching for primary aged children of science with additional needs and diverse linguistic and cultural backgrounds. Students will explore a range of needs, including gender issues with science learning, EAL/D backgrounds, learning difficulties, and gifted and talented abilities, and identify strategies to respond to those needs with specific instructional plans. In addition, students will learn to implement culturally relevant and context-based pedagogies in primary science education.

School Education

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1845 Graduate Certificate in Primary Science Education.

Assumed Knowledge

A basic understanding of differentiated instruction, features of positive classroom environments, and outcomes of the primary science syllabus is desirable.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate the role of academic, social, economic, cultural, and linguistic considerations for teaching primary science
2. Critique the relationships among teachersðf worldview of diversity and disability, studentsðf experiences and backgrounds, and the learning context to generate implications for future practice
3. Differentiate plans for primary science instruction based on primary studentsðf learning needs
4. Design culturally relevant pedagogies into primary science instruction
5. Apply appropriate context-based pedagogies into primary science instruction

Subject Content

1. Constructing knowledge of academic, social, economic, cultural, and linguistic considerations for teaching primary science
2. Critiquing the relationships among teachers?f worldviews of diversity and disability, children?fs experiences and backgrounds, and the learning context to generate implications for future practice
3. Differentiating primary science instruction based on students?f needs
4. Culturally relevant science pedagogy
5. Context-based pedagogies in primary science

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Literature Review – Evaluate current research on teaching primary science in diverse and inclusive contests	2,000 words	50	N	Individual
Professional Task – Differentiate a primary science unit to respond to students' learning needs	2,000 words	50	N	Individual

TEAC 7004 Adolescent Development and Teaching

Credit Points 10

Legacy Code 102081

Coordinator Pegah Marandi (https://directory.westernsydney.edu.au/search/name/Pegah Marandi/)

Description From 2024, this subject is replaced by TEAC 7161 - Educational Psychology for Learning and Teaching. This subject examines research and contemporary classroom practice relevant to the cognitive, physiological, and social/affective needs of adolescents to highlight the reciprocal effects that teaching has on adolescence and how in turn adolescence affects teaching practice. Emphasis is placed on the use of evidenced-based literature in examining adolescent-centred challenges to teaching and learning. Topics addressed include definitions of adolescence past, present and future, biological and cognitive milestones of adolescence, adolescents at-risk, secondary schooling fostering educational and general resilience in adolescents, and helping adolescents thrive.

School Education

Discipline Teacher Education: Secondary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in course 1714 Master of Teaching (Secondary), 1848 Master of Teaching (Secondary) STEM, 1652 Bachelor of Arts (Pathway to Teaching Secondary), 1823 Bachelor of Arts (Pathway to Teaching Secondary) Dean's Scholars, 2804 Bachelor of Business (Pathway to Teaching Secondary), 1843 Bachelor of Graphic Design (Pathway to Teaching Secondary), 4742 Bachelor of Health Science (Health and Physical Education)-Pathway to Teaching (Secondary), 6013 Diploma in Design/Bachelor of Graphic Design (Pathway to Teaching Secondary), 6021 Diploma in Arts/Bachelor of Arts (Pathway to Teaching Secondary) or 3756 Bachelor of Science (Pathway to Teaching Primary/Secondary).

In addition, students enrolled in 1652 Bachelor of Arts (Pathway to Teaching Secondary), 1823 Bachelor of Arts (Pathway to Teaching Secondary) Dean's Scholars, 2804 Bachelor of Business (Pathway to Teaching Secondary), 1843 Bachelor of Graphic Design (Pathway to Teaching Secondary) or 4742 Bachelor of Health Science (Health and Physical Education)-Pathway to Teaching (Secondary) must have passed 160 credit points to enrol in this subject.
Students enrolled in 6021 Diploma in Arts/Bachelor of Arts (Pathway to Teaching Secondary) must have passed 190 credit points (160 at Level 1 or higher) to enrol in this subject.
Students enrolled in 6013 Diploma in Design/Bachelor of Graphic Design (Pathway to Teaching Secondary) must have passed 180 credit points (150 at Level 1 or higher) to enrol in this subject.

Students enrolled in 3756 Bachelor of Science (Pathway to Teaching Primary/Secondary) must have passed 120 credit points to enrol in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Integrate knowledge about issues relating to pre-teen and adolescent development in a diverse community.
2. Appraise how legislation, policy resources, school-based processes and system supports impact upon adolescent development.
3. Apply creative and critical insight into the processes and skills required to teach adolescents through the application of evidence-based principles.
4. Analyse the influence of teacher practices and the wider community on the behaviour, well-being and development of adolescents.
5. Assess and reflect upon ethical and legislative responsibilities for responding to adolescent development and propose classroom and school-wide strategies that promote well-being and resilience in adolescence.
6. Explain the role of teachers and schools in the promotion, prevention and early identification of at-risk and marginalised adolescents.
7. Demonstrate a critically informed approach to solving complex real-world problems in relation to teaching adolescents.
8. Demonstrate teaching strategies informed by evidence based principles to meet the diverse needs of adolescents.

Subject Content

1. What is Adolescence?
2. Biological Foundations of Adolescence
3. Cognitive Foundations of Adolescence
4. Adolescents at-risk
5. Social-Emotional Foundations of Adolescence
6. Adolescence and Schooling
7. Building a Learning Portfolio for teaching adolescents
8. Helping adolescents thrive

Assessment

TEAC 7005 Advanced Academic English Skills

Credit Points 10

Legacy Code 102325

Coordinator Dariush Izadi (https://directory.westernsydney.edu.au/search/name/Dariush Izadi/)

Description This is a language-analysis intensive subject with practical application for real situational English language teaching. It offers students theoretical overviews of language analysis, from the sentential-clausal-lexical-grammatical level to highly contextualised discourse study. It requires students to engage with a variety of real-life instances of language use while also investigating the potentialities of extensive linguistic repertoires. By exposing students to both the realities of actual language use and the possibilities inherent in varieties of English, students are better prepared for the demands of English (second and foreign) language teaching across multiple contexts.

School Humanities & Comm Arts

Discipline English as a Second Language Teaching

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in programs 1800 Master of Arts in TESOL, 1801 Graduate Diploma in TESOL, 1816 Master of Translation and TESOL, 1777 Master of Interpreting and Translation, 1780 Master of Arts Translation and Interpreting Studies or 8083 Bachelor of Research Studies. The subject may also be undertaken as a non-award subject.

Assumed Knowledge

English language proficiency equivalent to an overall IELTS score of 7.0.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically read and synthesise practical-theoretical frames from research literature in linguistics, discourse analysis and academic English
2. Discuss, in linguistic terms, key aspects of language interaction
3. Demonstrate an understanding of the differences between written and spoken discourse

4. Use systematic diagramming techniques for the analysis of English grammar in real-life textual examples
5. Demonstrate theoretical understandings through practical analysis of textual examples.

Subject Content

- The history of English and its lessons for modern speakers: Etymology and historical linguistics
- The Essentials of language: linguistics Overview
- Standard and non-Standards: codification, prescriptive and Descriptive grammars, dictionaries, Grammar Teaching and lexicology
- The sound of English: prosody, phonics and Phonology
- The shapes of words: Morphology, The lexical item and lexical im/possibilities
- The Essentials of language: Grammar, parsing and trees/boxes
- World Englishes: sounds, shapes and sentences around The World
- Semantics and pragmatics: sociolinguistics and speech community and personal style
- discourse analysis: Overview
- Discourse Analysis from the ground up: Conversational Analysis; Systemic Functional Analysis; Ethnography of Communication; Transcription
- Discourse Analysis from the top down: Critical Discourse Analysis; Narrative Theory; Interactional Sociolinguistics
- real-life communication: analysis and learning and adaptation

Assessment

TEAC 7010 Assessing to Support Learning

Credit Points 10

Legacy Code 102147

Coordinator William Nketsia (https://directory.westernsydney.edu.au/search/name/William Nketsia/)

Description Professionals' knowledge and skill in assessment supports the identification, planning, monitoring and evaluation of their work with individuals with additional needs. Assessment not only applies to assessing the needs of the individual, but extends to identifying the needs of the family and the educational setting. This subject explores various models of assessment (and their underlying theory and implications for practice). Various approaches are investigated that are utilised to elucidate a range of educational needs across the lifespan by a range of professionals (e.g. functional, standardised, diagnostic, strengths-based, curriculum-based). Students apply problem-based learning by selecting and critiquing assessment strategies to inform the goals, educational instruction and adjustments, and progress for an individual, their family and educational setting. Students also develop skills in communicating with colleagues and families regarding issues around assessment.

School Education

Discipline Teacher Education: Special Education

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1682 Master of Special Education; 1720 Master of Inclusive Education; 1721 Graduate Certificate in Inclusive Education or 1911 Master of Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply an understanding of the role that assessment plays in the learning and teaching cycle.
2. Evaluate the impact of adopting various assessment strategies.
3. Critique models, objectives and tools of assessment that are utilised for individuals with additional needs.

4. Design an assessment strategy to identify the needs of an individual, their family and their educational setting.
5. Analyse how assessment can be used to inform educational practice and instruction, and monitor progress.
6. Judge the limitations of assessment and the impact of ethical issues.
7. Utilise appropriate and effective communication skills when discussing assessment issues with all relevant stakeholders.

Subject Content

1. The role of assessment in educational contexts;
2. Using assessment to clarify needs of the individual, family and educational setting;
3. The diverse range of assessment approaches (e.g. functional, standardised, diagnostic, strengths-based, curriculum-based) and their implications;
4. Strategies and tools to assess the needs of the individual (e.g. social, emotional, adaptive behaviour, intelligence, academic), and the needs of the family and the educational setting;
5. Current practices used by school systems to assess the needs of students;
6. Assessing need across the lifespan (e.g. special consideration of pre-schoolers);
7. Ethical and legal considerations, limitations and the impact of assessment;
8. Issues of reliability and validity (e.g. cultural and linguistic considerations);
9. Assessment and decision making;
10. Making instructional decisions (e.g. identifying adjustments);
11. Collaborative team decision making;
12. Developing skills in communicating in a written and oral form to both colleagues and families regarding various stages of the assessment cycle.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 7011 Assessment and Intervention for Mathematics and Numeracy Learning

Credit Points 10

Legacy Code 102324

Coordinator Peter Mcdonald (https://directory.westernsydney.edu.au/search/name/Peter Mcdonald/)

Description A significant aspect of teachers' work is focused on assessment and mathematics classrooms are renowned for their traditional reliance on pen and paper testing. In this subject students will investigate contemporary formative and summative assessment practices of and for learning mathematics. Students will investigate how to use results from assessments including NAPLAN to plan teaching and learning, and provide intervention where appropriate. A range of intervention programs used in Australian schools will be explored and compared.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1682 Master of Special Education; 1720 Master of Inclusive Education; 1830 Graduate Certificate in Primary Math Education; 1847 Master of Education (STEM) or 1911 Master of Education.

Assumed Knowledge

Students must be either within their final semester of the Master of Teaching (Primary) program; Master of Teach (Birth to 12) or enrolled in the Master of Inclusive Education or a qualified primary teacher.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify a range of high quality assessment tasks that are aligned to the Australian Curriculum: Mathematics
2. Select formative and summative assessment tasks that address specific content in the primary mathematics curriculum
3. Analyse assessment data to assist in addressing student needs
4. Propose learning interventions based on assessment data
5. Justify the use of specific intervention programs used in Australian primary mathematics classrooms
6. Compare intervention programs in relation to their effectiveness and feasibility in Australian primary mathematics classrooms

Subject Content

1. Formative and summative assessment practices for the contemporary primary mathematics classroom
2. Assessment practices to promote positive engagement, growth mindset and positive mathematics identities
3. Laying Foundations for Assessment
4. Evidence-based practice

5. Dealing with high-stakes mathematics assessment
6. Which intervention?
7. Interventions and mathematics

Assessment

TEAC 7012 Assessment and Intervention for Science Learning

Credit Points 10

Legacy Code 102488

Coordinator Karina Mckoy (https://directory.westernsydney.edu.au/search/name/Karina Mckoy/)

Description The purpose of this subject is for students to be informed of different types of diagnostic, formative, and summative assessment strategies used in primary science contexts. Examination of assessment methods and resources will help teachers develop a comprehensive philosophy of assessment in primary science. Students will develop skills in adapting instructional subjects to incorporate a research-based assessment system, become familiar with strategies to analyse assessment data, and design interventions in response to assessment data.

School Education

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1845 Graduate Certificate in Primary Science Education; 1847 Master of Education (STEM); 1887 Graduate Certificate in Primary STEM Education or 1911 Master of Education.

Assumed Knowledge

A basic understanding of classroom assessment practices, features of positive classroom environments, and outcomes of the primary science syllabus is desirable.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify contemporary, research-based diagnostic, formative, and summative assessment strategies specific to science education
2. Adapt a unit in primary science to incorporate appropriate diagnostic, formative, and summative assessment strategies
3. Develop assessment strategies for an integrated unit using a scientific context in the primary science curriculum
4. Explain research-based strategies for utilising assessment data to inform future teaching in primary science
5. Synthesize information from a set of assessment data and articulate how to respond with future interventions

Subject Content

1. Diagnostic assessment strategies in primary science education
2. Formative assessment strategies in primary science education
3. Summative assessment strategies in primary science education
4. Analysis of assessment data in primary science
5. Pedagogical interventions based on assessment data in primary science

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

Simulation	2,000 words	50	N	Individual

TEAC 7013 At the cultural interface - learning two ways

Credit Points 10

Legacy Code 102165

Coordinator Erin Mackenzie (https://directory.westernsydney.edu.au/search/name/Erin Mackenzie/)

Description From 2020 students should note that core units are now taught in semesters rather than half yearly sessions. History, politics and ignorance make the cultural interface between Aboriginal and non-Aboriginal Australians contested and fraught. In turn, cultural misunderstanding contributes to inequities in educational attainment, employment and social disadvantage. Students apply a critical perspective to the discourses surrounding Aboriginal disadvantage and white privilege. They develop processes to engage respectfully with local Aboriginal and Islander communities in order to learn and share in a two-way exchange of knowledge. They listen deeply and intersubjectively in their exploration of Aboriginal worldviews, and they reflect on what it means to decolonise their own thinking so as to build partnerships based on mutuality and reciprocity.

School Education

Discipline Teacher Education

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically evaluate the issues that impact on social disadvantage in Aboriginal and Torres Strait Islander communities
2. Apply critical race perspectives to analyse white privilege and dominant knowledge systems
3. Advocate for Aboriginal and Torres Strait Islander cultures, worldviews and languages and identify ways to support them to flourish
4. Reflect critically on the process of decolonisation in terms of personal insights and contributions
5. Communicate ethically and respectfully with local Aboriginal and Torres Strait Islander people Engage effectively with the diversity of circumstances and needs experienced within Aboriginal and Torres Strait Islander communities
6. Develop ethical and constructive professional and research partnerships with Aboriginal and Torres Strait Islander individuals and communities

Subject Content

1. Rights and wrongs: traversing the contact zone in black and white Australia
2. Deep listening: stories of life, land, dispossession and remembering
3. The cultural interface - no neutral place to be
4. Whose knowledge matters? The need for unlearning
5. Intersubjectivity and decolonising practices
6. Being in place, sharing in country
7. Research politics; decolonising methodologies
8. Closing the gap? Deinstitutionalising whiteness

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 7015 Children, Families, Communities

Credit Points 10

Legacy Code 102102

Coordinator Deborah Bennetts (https://directory.westernsydney.edu.au/search/name/Deborah Bennetts/)

Description The subject examines the implications of children's early life experiences on their development, learning, health and wellbeing. Students will analyse cross-disciplinary research, policy and discourses associated with children and families living in communities experiencing disadvantage and the impact of adverse and positive childhood experiences on children's life trajectories. An opportunity to learn from professionals working in community programs will be invaluable when students in groups design and present programs that strengthens communities' and families' capacities to provide nurturant environments for children. Students will reflect on the complex interrelationship between collaboration, research and practice to identify their role as community leaders working in and with communities. This subject is included in the Foundation Phase of the Master of Teaching program.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects TEAC 7036 - Early Intervention and Prevention in Early Childhood Contexts

Restrictions

Students must be enrolled in one of the following programs: 1708 Bachelor of Arts (Pathway to Teaching Birth-5/Birth-12) or 6017 Diploma in Arts/Bachelor of Arts (Pathway to Teaching Birth-5/Birth-12) or 1929 Bachelor of Arts (Pathway to Teaching Early Childhood/Primary) or 1783 Master of Teaching (Birth-5 Years/Birth-12 Years) or 1784 Master of Teaching (Birth-12 Years) or 6048 Diploma in Arts/Bachelor of Arts (Pathway to Teaching Early Childhood/Primary).

Students enrolled in 1708 Bachelor of Arts (Pathway to Teaching Birth-5/Birth-12) or 1929 Bachelor of Arts (Pathway to Teaching Early Childhood/Primary) must have successfully completed 160 credit points before enrolling in this subject.

Students enrolled in 6017 Diploma in Arts/Bachelor of Arts (Pathway to Teaching Birth-5/Birth-12) or 6048 Diploma in Arts/Bachelor of Arts (Pathway to Teaching Early Childhood/Primary) must have successfully completed 190 credit points (160 at Level 1 or higher) before enrolling in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse international and national research, policy and theoretical perspectives about the efficacy of early childhood, family and community support programs, and their relationship to children's development, learning health and wellbeing outcomes.
2. Critique the discourses associated with social inequity and perceptions of children, families and communities experiencing disadvantage and adversity.
3. Discuss the factors influencing adverse and positive childhood experiences, the impact on children's learning and life trajectories, and implications for the kind of knowledge and skills required to work in challenging contexts.
4. Critically analyse the strengths and limitations of child, family and community programs so as to identify approaches that will enhance families' and communities' capacities to provide nurturant environments for children in the early years.
5. Recommend community-based approaches and pedagogical practices that will promote positive childhood experiences, for

children who are living in communities experiencing adversity or disadvantage.

6. Work collaboratively to design and present a place-based program, that seeks to enhance outcomes for children, families and communities, within an early childhood context, demonstrating respect for socially and culturally diverse communities including Aboriginal and Torres Strait Islander families and communities.
7. Critically reflect on the role of teachers, specialising in early childhood education, as community leaders and the implications for engaging with families and communities to support children's development, learning, health and wellbeing.
8. Use effective research skills to analyse child and family support programs and practices using current research to substantiate claims.

Subject Content

1. **Theoretical perspectives and research** that informs early childhood and family policy, service design and implementation; socio-cultural influences on children's development, learning health and wellbeing including the influence of Australian government policy; Social determinants of health; Global influences including UN SDGs
2. **Social Inequities and Social Justice** Barriers to participation for children and families living in communities experiencing disadvantage; Deconstruction of discourses of risk and protective factors, exclusion and marginalisation, adversity, vulnerability, and disadvantage; Impacts on learning and education
3. **Children** Neuroscience and early life experiences; the impact of adverse and positive childhood experiences on child outcomes and life trajectories;
4. **Families** Acknowledging the multifaceted characteristics and changing nature of Australian families, their strengths and capabilities; factors that influence families' capacities to provide nurturant environments for their children; engagement with families to achieve mutually responsive partnerships
5. **Communities and neighbourhoods** influence on children's experiences; unpacking expectations, bias, reality and resource distribution; statistics and measures such as Australian Early Development Census (AEDC); Local Government Area (LGA) social plans;
6. **Implications for practice** – the importance of safe, equitable and stable environments, relationships with others, social and civic engagement to develop connectedness and belonging, play and responsive interactions with others to build emotional growth; creating opportunities for positive early childhood experiences and helping children grow into healthy, resilient adults; Building relationships with families and connecting with communities including Aboriginal and Torres Strait Islander families and communities
7. **Designing programs for change** substantiate design decisions using research and practice based evidence; developing outcomes and monitoring methods, consider the range and continuum of universal to specialised services supporting families and children
8. **Working Together** Place-based approaches - conceptualisation of responsive communities, capacity building and collective impact. Collaboration and communication strategies; Cross-disciplinary practices and partnerships with and within teams
9. **Critical Reflection** the role of the teacher as community leaders; working across community and educational contexts and crossing professional boundaries; Implications of research and evidence-based practice on future practice when working with families and children who have experienced adversity or disadvantage.
10. **Research Skills** locating international and national research, analysing literature, policy, frameworks and practice. Interview techniques.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 7018 Computational Thinking across the STEM Curriculum

Credit Points 10

Legacy Code 102509

Coordinator Adam Watson (https://directory.westernsydney.edu.au/search/name/Adam Watson/)

Description This subject will enable students to develop knowledge of computational thinking as it can be applied across the STEM curriculum in schools. Students will learn about the nature of computational thinking as a problem solving approach which can be applied to produce digital solutions. The subject will allow students to undertake a critical examination of innovative, interdisciplinary approaches to the development of computational thinking and relevant pedagogical strategies to maximise student learning and engagement with STEM disciplines.

School Education

Discipline Teacher Education, Not Elsewhere Classified.

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

An understanding of at least one STEM (science, technology, engineering or mathematics) school syllabus.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate a critical understanding of computational and algorithmic thinking
2. Apply knowledge of the K-10 Australian curriculum: Digital Technologies in developing STEM units.
3. Create and evaluate interdisciplinary STEM units which integrate computational thinking in meaningful ways across traditional subject boundaries.
4. Apply an understanding of data management, organisation and representation for analytical problem solving.

Subject Content

1. The nature of computational thinking
2. The Australian Curriculum: Digital Technologies
3. Algorithmic thinking
4. Working with data across the curriculum
5. Computational thinking across the curriculum

TEAC 7020 Contemporary Teacher Leadership

Credit Points 10

Legacy Code 102098

Coordinator Paul Rooney (https://directory.westernsydney.edu.au/search/name/Paul Rooney/)

Description This multidisciplinary subject seeks to redefine and inform practice about what it means to be part of teacher-led development in the 21st century. Students will need to develop unique skills and understanding necessary for creating, sustaining and expanding communities of practice within and beyond classrooms. Through an examination of relevant literature connected with local and global networks, students will build, an understanding of cultural assets; professional leadership capacity; and what is required to effect change, leadership and innovation in school culture through teaching and learning innovations and program evaluation. Learning outcomes are based on learning about leadership within an established community of practice.

School Education

Discipline Teacher Education: Secondary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) -

Co-requisite(s) -

Restrictions

Must be enrolled in the 1714 Master of Teaching (Secondary) or 1914 Graduate Certificate in Secondary Teaching

Learning Outcomes

1. Apply knowledge and skills necessary to create, sustain and expand communities of practice within and beyond their classrooms, faculties and schools
2. Explain the role of relevant and appropriate professional learning to ensure effective on-going leadership and 21st century change in schools
3. Evaluate current, future and virtual use of various digital technologies and innovations in schools and how pre-service teachers collaborate with others to effect positive change of themselves as part of 21st century teaching team
4. Critically analyse the roles, responsibilities, cultural assets and personal/professional attributes required of leaders in understanding what is required to effect change and innovation in teaching
5. Examine the political and social changes impacting education at global, regional and local levels
6. Critically analyse research and pre-service teachers' individual practices to identify and address leadership needs and skills which are required to make them 21st century educational change agents

Subject Content

1. What does teacher leadership look like in the 21st Century?
2. How transformational are contemporary models of educational leadership?
3. What is authentic leadership? How is authentic leadership ethical?
4. How does contemporary leadership work in cross-cultural contexts at local and global levels?
5. How does leadership provide sustainable solutions to increasing educational complexity?
6. What evidence-based research informs actions / responsibilities / dimensions that characterise leadership for learning? How can I apply leadership for changing learning practices in schools?
7. What are communities of practice and how do they contribute to successful curriculum transformation in teaching and learning?
8. How can cultural assets that recognise Aboriginal and Torres Strait Islander knowledge and learning be applied in school curriculum change?

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 7022 Creative Teaching and Learning

Credit Points 10

Legacy Code 102105

Coordinator Joanne Frost (https://directory.westernsydney.edu.au/search/name/Joanne Frost/)

Description This subject focuses on processes of creative thinking and creative expression in children and introduces students to the theory and practices of using drama, music, dance, media arts and visual arts in prior to school and school contexts. Arts-based pedagogies, collaborative learning, multiple modes of learning and reflective practices are the key operating principles of the subject. The subject will encompass creativity both as it relates to the arts as well as its critical role in fostering creative thinking and teaching and learning practices. Students will explore the relevance of the arts in the development of children's play and will engage with appropriate information and communication technologies for learning in the arts. The subject provides an understanding of the importance of the art forms both as pedagogical approaches across the early childhood and primary years and as creative arts in their own right. This subject is included in the Development Phase of the Master of Teaching program.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects TEAC 7045 - Fostering Creativity in Children's Learning

Restrictions

Students must be enrolled in 1783 Master of Teaching (Birth-5 Years/Birth-12 Years), 1929 Bachelor of Art (Pathway to Teaching Early Childhood/Primary) or 6048 Diploma in Arts/Bachelor of Arts (Pathway to Teaching Early Childhood/Primary).

Students enrolled in 1929 Bachelor of Arts (Pathway to Teaching Early Childhood/Primary) must have successfully completed 160 credit points before enrolling in this subject. Students enrolled in 6048 Diploma in Arts/Bachelor of Arts (Pathway to Teaching Early Childhood/Primary) must have successfully completed 190 credit points (160 at Level 1 or higher) before enrolling in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the physical, social, creative and intellectual capabilities of birth -12 year olds as they relate to drama, music, dance, visual arts and media arts education.
2. Reflect the importance of creative teaching and learning across the curriculum in the design of creative sequential learning experiences consistent with the Early Years Learning Framework and the NSW K ? 6 Creative Arts Syllabus and related support documents.
3. Apply arts concepts and elements as they relate to cultural diversity and in particular Aboriginal and Torres Strait Islander peoples and the cultures of the Asia region.
4. Develop pedagogies, resources, experiences and projects that encourage divergent thinking, creative expression and meaning making and that assist children to communicate their ideas.
5. Display practical skills and knowledge in the areas of drama, music, dance, visual and media arts.
6. Explain the socio-cultural and multicultural place of the arts in contemporary society in a manner that incorporates an understanding of diversity and appreciation of difference.
7. Demonstrate commitment to and advocacy for arts learning across early childhood and primary educational contexts.

Subject Content

1. The physical, social, creative and intellectual capabilities of birth -12 year olds as they relate to creativity in the areas of drama, music, dance, visual arts and media arts.
2. Creative teaching and learning pedagogies consistent with the Early Years Learning Framework and the NSW K - 6 Creative Arts Syllabus and related support documents
3. Arts concepts and elements as they relate to cultural diversity and in particular Aboriginal and Torres Strait Islander and cultures of the Asia region.
4. Pedagogies, resources, experiences and projects that encourage divergent thinking, creative expression and meaning making and that assist children to communicate their ideas.
5. Practice of skills and knowledge in the areas of drama, music, dance, visual and media arts.

6. The socio-cultural place of the arts in contemporary society that incorporates diversity and appreciation of difference and the educator's role as an advocate.

TEAC 7023 Culture, Subjectivities and Schooling

Credit Points 10

Legacy Code 102071

Coordinator Mohamed Moustakim (https://directory.westernsydney.edu.au/search/name/Mohamed Moustakim/)

Description From 2024, this subject is replaced by TEAC 7032 Diversity, Social Justice and Schooling. This subject focuses on the socio-political, economic and cultural milieu that shapes teacher and student subjectivities. Teachers are required to understand the variety of, and changing nature of, discourses and ideologies that both constitute and are constituted in society, schooling, teaching, and learning, in an increasingly multifaceted, globalized and cosmopolitan environment. Within this framework it is also essential that teachers engage with and understand the diversity and fluidity of individuals and the broader Australian community in order to promote equitable practices in schooling and to facilitate educational and professional transformation. Aboriginal and Torres Strait Islander peoples and their relationship to schooling will also be explored in this subject, providing pre-service teachers with deeper understandings of Australia's first nations people. Developing understandings of society, culture and the formation of subjectivities will promote an enhanced awareness of equity issues as well as crucial analytical and critical tools to address the needs of diverse students, their families, teachers, and the broader school community.

Restrictions

Note that only students enrolled at WSU Online may register in the WSU Online subjects offered at that location.

Students must be enrolled in 1781 Master of Teaching (Primary), 1651 Bachelor of Arts (Pathway to Primary Teaching), 1822 Bachelor of Arts (Pathway to Teaching Primary) Dean's Scholars, 3756 Bachelor of Science (Pathway to Teaching Primary/Secondary) or 6019 Diploma in Arts/Bachelor of Arts (Pathway to Teaching Primary).

Students enrolled in 6019 Diploma in Arts/Bachelor of Arts (Pathway to Teaching Primary, must have completed 190 credit points (160 at Level 1 or higher).

Students enrolled in 1651 Bachelor of Arts (Pathway to Teaching Primary) or 1822 Bachelor of Arts (Pathway to Teaching Primary) Dean's Scholars must have completed 160 credit points.

Students enrolled in 3756 Bachelor of Science (Pathway to Teaching Primary/Secondary) must have completed 120 Credit Points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the role and impact of broader socio-political, economic, historical and/or cultural dimensions on the formation of teacher and student subjectivities, pedagogy and education more broadly.
2. Describe Aboriginal and Torres Strait Islander social and kinship systems, significance of country, language and culture with a view to understanding Aboriginal and Torres Strait Islander learners and communities. Students will be able to articulate approaches to redress discrimination and inequity.
3. Explain how subjectivities are socially constructed and describe how culture/cultures of schooling can perpetuate and position particular understandings of diversity, with a focus on Aboriginal and Torres Strait Islander communities, gender, sexualities, ethnicities, 'race', religion and class and their intersections.
4. Explain the new sociology of childhood including how childhood is socially constructed and the implications for learning, teaching and young people.
5. Discuss the changing nature and role of family and family diversity and how educators can help sustain the capacity of families, communities and the school to engage all students.
6. Evaluate relevant policies and legislative requirements related to rights and responsibilities of students, parents, other community members and teachers and apply appropriate theoretical tools to critically analyse these in relation to cultures of schools and the effects on learning.
7. Describe how supportive learning environments might be developed where students feel safe to risk

Subject Content

1. Sociology in the curriculum. Merit/competition. Hidden and manifest curriculum. Knowledge and governmentality.
2. Social construction of childhood and family. Political, economic and social policy perspectives. Contemporary debates.
3. Theories of diversity and difference. Understanding culture as constituted in class, ethnicity, racialization, religion gender and sexualities.
4. Aboriginal and Torres Strait Islander heritage and cultural practices. Impacts of colonisation and racism and their relationship to the educational outcomes of Aboriginal and Torres Strait Islander learners. Strategies to redress these outcomes in schooling contexts.
5. Key sociological concepts and their relationship to education including but not limited to: culture; 'Whiteness'; White privilege; subjectivity; discourse; power; knowledge; discipline; embodiment; surveillance; silence; normalisation; punishment; habitus; capital; field.
6. Policy and legislation pertaining to school-based issues regarding access and equity, multiculturalism, religion, migration, citizenship, anti-discrimination and human rights.
7. Discrimination, prejudice and privilege; bullying, cyber bullying, violence and its manifestation in educational contexts.
8. Literature review in relation to social justice and/or equity issue considering critical and analytical approaches.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Presentation	30 minutes	30	N	Group
Quiz	6 quizzes; 10 minutes per quiz	30	N	Individual
Essay	2000 Words	40	N	Individual

TEAC 7025 Curriculum for Under Threes

Legacy Code 101098

Coordinator Prathyusha Sanagavarapu (https://directory.westernsydney.edu.au/search/name/Prathyusha Sanagavarapu/)

Student Contribution Band

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Restrictions

Students must be enrolled in programs 1625 Master of Teaching (Early Childhood), 1631 Graduate Diploma in Educational Studies (Early Childhood), 1673 Master of Teaching (Birth-12 years), 1672 Master of Teaching (Birth-5years) or 1691 Master of Teaching (Birth-5years/Birth-12years). This subject relies heavily on professional knowledge acquired across the range of other core subjects and professional experiences within the Master of Teaching (Early Childhood) programme.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Appreciate the role of families and communities in childrenðfs learning and the diversity of child-rearing practices, expectations and values families hold for their children;
2. Apply a range of strategies for strengthening partnerships between educators, children and families;
3. Understand strategies for providing a culturally responsive curriculum and continuity of care for young children;
4. Document childrenðfs learning in ways that encourage connections between children, families, educators and communities and that celebrate childrenðfs competencies;
5. Initiate interactions and relationships and implement teaching strategies that support young childrenðfs relationships and learning;
6. Implement planned and spontaneous experiences and learning centres that encourage young childrenðfs exploration and creativity

Subject Content

- Socio-cultural contexts for learning;
- Partnerships between educators, children and families;
- Connecting early childhood curriculum to children?fs family and community experiences;
- The importance of relationships and interactions for children?fs learning;
- Teaching and learning strategies for under threes eg scaffolding, peer guidance and play;
- children?fs learning portfolios
- socio-cultural and pedagogical documentation
- Planned and spontaneous play experiences that extend children?fs interests, friendships and strengths.

Special Requirements

Legislative pre-requisites

Students must have completed Child Protection training.

Prescribed Texts

TEAC 7026 Designing Curriculum Futures

Credit Points 10

Legacy Code 102159

Coordinator Katherine Hadley (https://directory.westernsydney.edu.au/search/name/Katherine Hadley/)

Description This subject considers the research and theoretical basis of curriculum futures, with a focus on design for learning and learning design, and critically examines contextual factors and their implications for learning design in a range of settings. The subject provides a critical overview of perspectives on curriculum, curriculum design and examines authentic learning and assessment. Examples of curriculum futures will be negotiated and explicated. The overall focus is on curriculum decision-making and planning for improved learning outcomes.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects TEAC 7024 - Curriculum Futures

Restrictions

Students must be enrolled in a postgraduate program or 8083 Bachelor of Research Studies

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Investigate the theoretical basis of curriculum and design for learning
2. Critically evaluate contextual factors which have implications for curriculum
3. Strengthen individual teaching philosophy and application of learning and teaching
4. Develop learning design responding to curriculum issues, towards planning for improved learning outcomes

Subject Content

1. Theoretical basis of curriculum
- curriculum futures
- design for learning
- learning design
2. Critical review of factors that have implications for curriculum: e.g. digital learning; citizenship; and globalisation
3. Critical overview of perspectives on curriculum, followed by a focused examination of connected learning and assessment
4. Action research and collaborative decision making
5. Examination of topical curriculum issues
6. Focus on curriculum decision-making and planning for improved learning outcomes

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

TEAC 7027 Designing Teaching and Learning

Credit Points 10

Legacy Code 102086

Coordinator Kay Carroll (https://directory.westernsydney.edu.au/search/name/Kay Carroll/)

Description In this unit, students will explore a range of contemporary issues impacting upon adolescent learning in the 21st century and how those issues may be addressed through the thoughtful re-design of teaching and learning. In a future characterised by rapid change and re-conceptualisations of compulsory schooling, attention will be given to the role of the secondary school teacher in assisting their students to develop new ways to think and new ways to work, as well as acquiring new tools and skills for living and working in the 21st century. Students will be encouraged to articulate their own vision for sustainable and engaged secondary education appropriate to the first half of the 21st century. In particular, it is critical that students possess the capacity to develop secondary students' abilities to engage in real world problem solving and collaborate meaningfully through emerging technologies. Students will collect evidence in an e-portfolio to demonstrate they meet the Australian Professional Standards for Teachers at the graduate level. Students begin their e-portfolio in 102086 Designing

Teaching and Learning and continue to collect evidence throughout their Master of Teaching (Secondary) course.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects TEAC 7081 - Pedagogies in Practice TEAC 7080 - Pedagogies for Learning CART 1003 - Literacies for Learning

Restrictions

Students must be enrolled in program 1714, 1848, 1652, 1823, 2804, 1843, 4791, 6013 or 6021.

Students enrolled in 1652, 1823, 2804, 1843 or 4791 must have achieved 160 credit points to enrol in this subject.

Students enrolled in 6021 must have achieved 190 credit points (160 at Level 1 or higher) to enrol in this subject.

Students enrolled in 6013 must have achieved 180 credit points (150 at Level 1 or higher) to enrol in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate the interrelationship between learning outcomes, literacy and numeracy strategies, the interpretation and reporting of assessment data and content selection using the National Professional Standards for Teachers to inform lesson sequencing and planning.
2. Analyse through research applications, actions and solutions for preventing and intervening in classroom management events that acknowledge Work, Health and Safety and risk management legislation.
3. Apply ICT tools in meaningful learning and appropriately integrate the safe and ethical use of Technological Pedagogical and Content Knowledge (TPACK) into teaching.
4. Organise lesson content, resources and activities based on contemporary syllabus requirements and student learning needs.
5. Analyse the models of pedagogy for the designing of learning goals and activities for the full range of student abilities, including gifted and talented students, and for addressing the literacy needs of Aboriginal and Torres Strait Islander and English as an Additional Language or Dialect (EALD) students.
6. Use resources to evaluate how safe, ethical and responsible use of technology and student differences can impact on how students learn.
7. Use the National Professional Standards for Teachers to deconstruct a lesson plan and justify how the standards have been achieved.
8. Analyse key issues underlying research debate to increase own confidence as narrators on the educational research landscape.

Subject Content

1.???? How can teachers evaluate the interrelationship between learning outcomes, assessment and literacy strategies to inform lesson sequencing and planning?
2.???? In what ways can analysis of case applications suggest actions and solutions for preventing and intervening in classroom management events?
3.???? How can teachers emphasise the safe, ethical and responsible use of ICT when integrating ICT tools in meaningful learning experiences? How does an understanding of Technological Pedagogical and Content Knowledge (TPACK) inform teaching ?
4.???? How do different learning theories such as the constructivist approach, co-construction of learning, personalised learning contribute to learning in the 21st century?
5.???? How does analysing models of pedagogy and assessment assist in designing learning activities and providing student feedback on learning?
6.???? How can teachers identify ways in which technology and student differences impact on students' learning?
7.???? How can teachers create 21st century learning using teacher standards for the profession?
8.???? In what ways is the self-evaluation of teacher performance significant alongside student achievement of outcomes according to stages of adolescent development?
9.???? In what ways can a global perspective of teaching and learning be acquired in order to develop a personal construction of sustainable practices in the teaching environment?

Assessment

TEAC 7029 Disability in Context

Credit Points 10

Legacy Code 102156

Coordinator Michelle Rose (https://directory.westernsydney.edu.au/search/name/Michelle Rose/)

Description The developmental trajectory and quality of life of individuals with additional needs is affected not only by the nature and level of the disability itself but also by the ways in which that disability interacts with the contexts in which they live their lives. In turn, the impact of the disability will affect the individual's family and those working with them. This subject adopts both a developmental and ecological perspective to enable analysis of the specific impact of disability on an individual, their family, the professionals working with them and the contexts in which they do so. In so doing, it evaluates the efficacy of theoretical models and frameworks available to assist in ensuring best outcomes for the individual and those around them.

School Education

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) Students enrolled in 1939 Bachelor of Education (Secondary) or 1876 Bachelor of Education (Primary) must successfully complete TEAC 3013 before enrolling in this subject

Equivalent Subjects HUMN 7046 - Transformative Leadership

Restrictions

Students must be enrolled in 8083 Bachelor of Research Studies; 1721 Graduate Certificate in Inclusive Education; 4700 Graduate Diploma in Health Science, 4698 Master of Health Science; 1911 Master of Education; 1720 Master of Inclusive Education; 1781 Master of Teaching (Primary); 1714 Master of Teaching (Secondary); 1847 Master of Education (STEM); 1876 Bachelor of Education (Primary) or 1939 Bachelor of Education (Secondary).

Students in program 1939 Bachelor of Education (Secondary) or 1876 Bachelor of Education (Primary) must have successfully completed 240cps before enrolling in this subject.

Assumed Knowledge

Professionals with teaching or other relevant qualifications.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically evaluate the relevance of theories and models of development to their practice;
2. Assess the impact of an individual's disability in learning contexts;
3. Evaluate the impact of an individual's disability on their current level of functioning and developmental trajectory;
4. Utilise an ecological model to determine the ways in which an individual's disability affects and is affected by the contexts in which they live their lives;
5. Determine the impact of a disability on the individual's family and the implications for family functioning;
6. Synthesise the factors affecting outcomes for individuals with a disability and their families and consider the implications for quality of life.

Subject Content

1. Theories and models of development and their relevance to disability studies;
2. Ecological theory and its implications for individuals with additional needs;
3. The impact of cognitive, physical, sensory, emotional and behavioural disabilities on development;
4. Models for analysing level of functioning e.g. International Classification of Functioning, International Classification of Functioning – Children and Youth, Developmental Needs Model;
5. Impact of disability on the individual, the family and social and environmental contexts;
6. The interaction between individual characteristics and learning and social contexts;
7. Theory and research on quality of life and its implications for working with individuals with additional needs;
8. Evaluation of outcomes for individuals with additional needs and their families;
9. Implications of functional analysis for policy and practice in the disability field.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Case Study	2,500 words	50	N	Individual

TEAC 7030 Diverse Literacies

Credit Points 10

Legacy Code 102101

Coordinator Louie Liang (https://directory.westernsydney.edu.au/search/name/Louie Liang/)

Description This subject increases students' understandings of the impact of globalisation, new technologies and the diversity of Australian languages and dialects on children's literacy practices. Students will develop insights into the importance of languages and cultures in children's identity formation, particularly in relation to the importance of the home languages and/or dialects, for multilingual and Aboriginal and Torres Strait Islander children. Contemporary social theories of diversity, difference, literacy and languages learning will be introduced to students and the links between theory and practice will be applied. Students will investigate the literacy practices in diverse family and community contexts and apply literacy-enriched play and pedagogies to extend languages learning and literacy for all children. This subject is included in the Development Phase of the Master of Teaching program.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects TEAC 7046 - Global Literacies TEAC 1026 - Multiliteracies

Restrictions

Students must be enrolled in 1783 Master of Teaching (Birth-5 Years/ Birth-12 Years) or 1784 Master of Teaching (Birth-5years).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate the impact of globalisation and new information technologies on literacy and literacy learning.
2. Explain understandings of theory related to literacy as social, cultural and technological practice.
3. Discuss the diversity of literacies, languages and dialects in Australia and different approaches to the revival and retention of Aboriginal and Torres Strait Islander and community languages.
4. Identify the impact of past and present language policies on literacy pedagogies and practices.

5. Understand the cultural context of Aboriginal and Torres Strait Islander learners and the significance of Aboriginal languages and dialects.
6. Analyse issues of language, culture and identity and their relationship to multicultural education.
7. Research diverse family literacy practices and children's literacy funds of knowledge.
8. Apply respect for diverse literacies and understandings of issues of culture, gender, class, inclusion and language in work with children and families.
9. Select and share texts with children and engage children in critical literacy.
10. Implement literacy-enriched play that builds on children's family literacies.

Subject Content

1. Impact of globalisation and new information technologies and the role of critical literacy on literacy learning.
2. Literacy as social, linguistic, cultural, and technological practice and critical literacy.
3. Contemporary theories of diversity, and literacy: language, power, gender, ethnicity and class.
4. Diverse literacies, language policies, practices and texts: Multilingualism in childhood
5. Diverse languages and dialects including Aboriginal English; language loss, maintenance, and revival of Indigenous and community languages.
6. The role of positionality, self-reflection and reflexivity in identifying biases and assumptions and how they impact practices
7. Engaging and communicating with families and communities to build on children's diverse family literacy practices.
8. Selecting diverse literacy resources and engaging children in critical literacy, literacy enriched play and shared book experiences.
9. Intercultural communication, multilingual and multicultural education in supporting cultural and linguistic diversity.

Inherent Requirements

Students must meet the Inherent Requirements for the Master of Teaching (Birth – 5 Years / Birth -12 Years) (p. 1178)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Critical Review	3 x 200 word critical reviews of readings and 600 word reflection	25	N	Individual
Presentation	Resource (1000 words or 5 minute multimedia) and a 3 minute presentation to the tutorial group	25	N	Group

TEAC 7032 Diversity, Social Justice and Schooling

Credit Points 10

Legacy Code 102083

Coordinator Loshini Naidoo (https://directory.westernsydney.edu.au/search/name/Loshini Naidoo/)

Description This subject focuses on the socio-political, economic and cultural milieu that shapes teacher and student subjectivities. It explores diversity, social justice, equity, and schooling through the multi-layered operation of social power and privilege. It advances students' understanding of how social and cultural difference in Australia has shaped contemporary education, schooling and cross-cultural relationships. In particular, the subject examines diversity as a social construct that has promoted the differential treatment of particular social and cultural groups and served as the basis for response to subsequent social and cultural inequities by these groups. The subject engages students in critical analysis essential for professional pedagogical practice in education for diversity and social justice in Australia and beyond. This subject is included in the Foundation Phase of the Master of Teaching program.

Restrictions

Students must be enrolled in program 1781 Master of Teaching (Primary), 1651 Bachelor of Arts (Pathway to Teaching Primary), 1822 Bachelor of Arts (Pathway to Teaching Primary) Dean's Scholars, 6019 Diploma in Arts/Bachelor of Arts (Pathway to Teaching Primary), 1714 Master of Teaching (Secondary), 1848 Master of Teaching (Secondary) STEM, 1652 Bachelor of Arts (Pathway to Teaching Secondary), 1823 Bachelor of Arts (Pathway to Teaching Secondary) Dean's Scholars, 2804 Bachelor of Business (Pathway to Teaching Secondary), 2786 Bachelor of Business, 1843 Bachelor of Graphic Design (Pathway to Teaching Secondary), , 3756 Bachelor of Science (Pathway to Teaching Primary/Secondary), 4791 Bachelor of Health and Physical Education (Pathway to Teaching Secondary), 6013 Diploma in Design/Bachelor of Graphic Design (Pathway to Teaching Secondary) or 6021 Diploma in Arts/Bachelor of Arts (Pathway to Teaching Secondary).

Students enrolled in 1651, 1652, 1822, 1823, 2804, 1843 or 4791 must have passed 160 credit points to enrol in this subject.

Students enrolled in 3756 Bachelor of Science (Pathway to Teaching Primary/Secondary) must have completed 120 Credit Points.

Students enrolled in 6019 and 6021 must have passed 190 credit points (160 at Level 1 or higher) to enrol in this subject.

Students enrolled in 6013 must have passed 180 credit points (150 at Level 1 or higher) to enrol in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically examine the impact of diversity and difference on students' educational outcomes and experiences of schooling.
2. Develop knowledge and understanding of the impact of social constructions of childhood and youth on learning, teaching, and children and young people's experiences of schooling.
3. Explore how varying philosophies of teaching and learning can impact teaching practices and educational outcomes.
4. Investigate the relationships between power, privilege, learning environments and differential educational outcomes for marginalised and non-marginalised groups.
5. Evaluate their professional practice as teachers by connecting their knowledge of diverse groups (visible and non-visible) to their pedagogic approaches.
6. Examine the importance of theory, literature, and research in understanding the challenges of diverse groups (visible and non-visible) in society.
7. Evaluate the relationship between the home environment and literacy at school for the improved learning outcomes of diverse groups of students.
8. Critically assess how educational policies and legislation influence social justice principles that inform and guide professional practice and judgments as teachers.

Subject Content

1. How is diversity defined in primary and secondary school contexts? What is the significance of diversity and social justice and equity for Australia as expressed through the principles and practices of teaching and learning for equity and access, knowledge, and governmentality?
2. How does diversity relate to the concepts of power; culture; religion; 'Whiteness'; White privilege; subjectivity; discourse; ethnicity; race; knowledge; discipline; embodiment; surveillance; silence; normalisation; punishment; habitus; capital; field; gender; sexuality; socio-economic status; globalization; literacy and language?
3. What are the complexities facing educators in a 21st Century context? How do capitalist market economy agendas and increasing practices of standardization alongside social justice and ethical issues affect educators? Why is lifelong learning for all important? How effective are pedagogical approaches such as adaptive ability, creativity; critical thinking, critical pedagogy, culturally responsive teaching, and inquiry based learning and active citizenship?
4. What is the impact of government legislation and educational policies on social justice for linguistic minority students? How do legislation and policies affect English as an Additional Language or Dialect (EALD) teaching programs? How is English taught in school contexts and how is English language acquisition measured and assessed?
5. What are professional understandings about current practices pertaining to home and community languages? What challenges do teachers face in relation to marginalised students? How can teachers develop and establish partnerships with parents and the community?
6. Are there any research-based strategies for teaching second language learners in the context of the mainstream classroom? What are the implications for teaching established by research?
7. What existing policy and legislation pertains to school-based issues including access and equity, multiculturalism, migration, citizenship, anti-discrimination and human rights?

TEAC 7037 Early Learning Environments

Credit Points 10

Legacy Code 102622

Coordinator Katina Dimoulias (https://directory.westernsydney.edu.au/search/name/Katina Dimoulias/)

Description Learning occurs within the context of a dynamic global society that has important cultural, social, historical and environmental dimensions. Students will explore a range of theoretical perspectives and pedagogical approaches that support learning about human society and its environment including areas of history, geography, civics and citizenship and sustainability for children in early childhood and primary school settings. Policies and frameworks around risk and play will be explored. First Nations' perspectives and inclusive pedagogies that support equality and diversity will be examined. Through a 35 hours (equivalent of 5 days) placement at an early childhood setting, students will evaluate the relationship between childhood environments and children's experience of place and everyday learning. Students will design learning experiences that support children's investigation, discovery, problem solving and meaning making using a range of materials and texts. This subject is included in the Development Phase of the Master of Teaching program.

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1783 Master of Teaching (Birth-5 years/Birth-12 years) or 1784 Master of Teaching (Birth – 5 years).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Investigate central concepts, modes of inquiry and a range of pedagogies for teaching history and geography, civics and citizenship and their application for early childhood and primary school-settings.
2. Discuss the relationship between First Nations' perspectives of place, contemporary theories and philosophies of child - nature relationships and sustainability education.
3. Explain the way in which pedagogical approaches support classroom cultural diversity (EAL/D and First Nations students), place-based learning and connection in early education and primary school settings.
4. Analyse the impact of sociocultural and inclusive representations in physical environments on children's learning experiences.
5. Design learning experiences, curriculum and assessment items for children in early education and school settings that draw on theories of place and place pedagogies, child- nature connections and sustainability.
6. Integrate strategies that support differentiation and inclusivity to meet the diverse capabilities of children in early childhood and primary school settings.
7. Engage professionally with children, families and colleagues in an early childhood setting.

Subject Content

1. Introduction to theories of children in nature and outdoor learning through play.
2. Methods for researching inside and outside physical learning environments for and with children, including evaluating relationships between these environments and children's experiences of place.
3. Changes to children's play and learning spaces over time.
4. Significance of place and local context, space and time as influencing factors on everyday interactions.
5. Relevant national and international theories and philosophies related to child-nature relationships and sustainability education, including First Nations perspectives, socio-cultural influences, and place-based pedagogies.
6. Key global policies and regulations for outdoor learning, play, safety and risk, and inclusive environments that recognise agency, equality, cultural identity, rights and responsibilities.
7. Documenting and assessing learning programs and their potential to support place-based pedagogies, sustainability learning, civics and active citizenship, and social sciences in early childhood and primary school contexts.
8. Planning and designing children's learning experiences utilising physical environment features that are underpinned by indigenous knowledge systems, place-based pedagogies, child/nature theories and integrated sustainability learning and play affordances.
9. Planning and designing curriculum and assessment utilising the NSW History and Geography Syllabuses, and curriculum

frameworks such as the Early Years Learning Framework for Australia.

Special Requirements

Legislative pre-requisites

Students must meet the Inherent Requirements for the Master of Teaching (Birth – 5 Years / Birth -12 Years).

Students are required to complete the Working with Children Check (WWCC) process leading to the issuance of a clearance number under the category of volunteer.

Students will need to:
i. Access the Commission for Children and Young People website and complete an online application form to generate an application number.
ii. Present an application number and identification to a Service NSW office who will issue a Working with Children Check number via mail or email.
iii. Submit the letter with a valid Working With Children Check number via WesternNow Student Portal. The document is recorded as a Special Requirement on your academic record. WesternNow Student Portal link

2. Students must complete the two components of the NSW Department of Education's Child Protection Awareness Training (CPAT).

a) Students will need to:
i. Access the NSW Department of Education's MyPL website https://mypl.education.nsw.gov.au/

ii. Complete the online Child Protection Awareness Training: Induction
iii. Save certificate of completion
iv. Submit certificate via WesternNow Student Portal
b) Students will need to:
i. Access the NSW Department of Education's MyPL website https://mypl.education.nsw.gov.au/ (https://mypl.education.nsw.gov.au/)

ii. Complete the Child Protection Awareness Training (CPAT): Annual Update for the calendar year
iii. Save certificate of completion
iv. Submit certificate via WesternNow Student Portal
Both certificates will be recorded on your student record as Special Requirements with the end date for the Annual CPAT recorded. The CPAT: Annual Update will need to be renewed and submitted on an annual basis. Students who have not completed both components of the Child Protection Awareness Training will need to withdraw from the subject.

3. Students must complete the ASCIA anaphylaxis e-training and submit their certificate to Submit certificate via WesternNow Student Portal.

Inherent Requirements

Students must meet the Inherent Requirements for the Master of Teaching (Birth – 5 Years / Birth -12 Years). (p. 1178)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Critical Review	2,000 words	50	N	Individual
Report	2,000 words	50	N	Individual
Professional Placement Performance	5 days Attendance at an early childhood setting	S/U	Y	Individual

TEAC 7038 Working Mathematically 1: Exploring Connections

Credit Points 10

Legacy Code 102603

Coordinator Jana Kovtun (https://directory.westernsydney.edu.au/search/name/Jana Kovtun/)

Description This subject develops students' critical understandings of how numeracy and mathematical ideas shape young children's lives during their first eight years. Students will develop their ability to provide rich learning experiences that enhance and assess the development of children's numeracy and foundational mathematical concepts. The subject will foster positive dispositions towards teaching and applying mathematics and numeracy in educational settings for children using the Early Years Learning Framework for Australia, the Australian Curriculum and the NSW Mathematics K-10 Syllabus curriculum documents. It will also consider the literacy demands of Mathematics. This subject is included in the Development Phase of the Master of Teaching program.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 1111 - Mathematics Science Technology 0-8
TEAC 7060 - Investigating with Mathematics Science and Technology

Restrictions

Students must be enrolled in the 1783 Master of Teaching (Birth-5 Years/Birth-12 Years) and 1784 Master of Teaching (Birth-5 Years).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Reflect on the role of the teacher, family and community in extending children's learning and positive disposition towards mathematics and numeracy.
2. Apply key terminology and rich mathematical vocabulary to explain and represent mathematical ideas and to support numeracy development.
3. Analyse the continuity of learning of key mathematical processes of understanding, fluency, problem-solving and reasoning in the early years.
4. Use the Early Years Learning Framework for Australia, Australian Curriculum (F-Year 2) and the NSW Mathematics K-10 (focus on K-2) syllabus documents to plan, monitor and evaluate developing mathematical knowledge, skills and understandings.
5. Use formative and summative assessment procedures to assess children's mathematical and numeracy using appropriate curriculum documents to set appropriate teaching intentions and learning outcomes for children.
6. Create play and integrated learning experiences that enhance investigation and exploration of working mathematically.
7. Design a range of effective, scaffolded teaching strategies to promote deep mathematical thinking and problem-solving.
8. Choose appropriate resources, concrete manipulatives, games, technologies, literature, and everyday objects to extend children's confidence to engage in mathematical thinking.

Subject Content

- **Role of the teacher** Challenge misconceptions, attitudes and bias and identify positive dispositions and motivations to engage, learn and teach mathematics and numeracy
- **Key terminology**, rich mathematical language and vocabulary.
- **The continuity of learning for children** birth to 8 years working mathematically; the synergy and connections amongst curriculum documents - Early Years Learning Framework for Australia, Australian Curriculum and NSW Mathematics K-10 syllabus (Early Stages 1- Stage 1);
- **The influence** of children's early mathematical and numeracy experiences; using children's funds of knowledge, strengths and capabilities to build capabilities and interest;
- **Promoting equity** in mathematics; supporting learners including Aboriginal and Torres Strait Islander children, multilingual children, children with diverse abilities and experiences..
- **Mathematical concepts** in the early years, mathematics and play, communicating mathematical ideas and concepts; understanding, fluency, problem-solving and reasoning.
- **The planning cycle** - data gathering, assessment, planning for implementation, teaching strategies, monitoring and evaluating integrated and scaffolded mathematical experiences and lessons.
- **Documentation and assessment** of children's mathematical learning including assessment tools and approaches; how data analysis informs the planning cycle.
- **Content** Exploring spatial sense, geometric and algebraic reasoning, structure and pattern, number sense, data and probability reasoning and measuring along with drawing connections and argumentation in the context of play, daily interactions with people and objects and planned integrated experiences; Making connections to conceptual understandings of algebra, measurement and geometry, and statistics and probability concepts;
- **Planning** experiences and lessons that take account of different abilities and experiences.
- **Effective pedagogies and explicit teaching strategies** that scaffold and promote deep mathematical understanding the processes, connections, investigations and engagement in problem-solving to reach proficiency.
- **Resources** role of language and literature in learning mathematics, incorporating a range of materials digital technologies, concrete manipulatives, games, literature, symbols and patterns in the natural world and community environments

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 7041 Effective Working Relationships

Credit Points 10

Legacy Code 102146

Coordinator Kerry Staples (https://directory.westernsydney.edu.au/search/name/Kerry Staples/)

Description From 2020 students should note that core subjects are now taught in semesters rather than half yearly sessions. This subject supports the development of students' knowledge and skills by analysing a range of consultation models; examining the perspectives and needs of families as well as professionals from different discipline backgrounds; and developing effective interpersonal communication skills, collaborative problem solving, dispute resolution, teamwork and teambuilding. In addition, professionals with advanced knowledge of inclusive education and disability studies may serve as agents of change within their professional setting. The subject explores this role and encourages students to reflect upon how they may enact this ability to advocate inclusive education and facilitate the capacity of others.

School Education

Discipline Teacher Education: Special Education

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1682 Master of Special Education; 1714 Master of Teaching (Secondary); 1720 Master of Inclusive Education; 1721 Graduate Certificate in Inclusive Education or 1911 Master of Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the changing nature of service delivery for individuals with additional needs, and the implications for the way professionals partner, facilitate, consult and lead.
2. Determine the varied and multiple perspectives of key partners (e.g. the individual, families, other professionals).
3. Analyse the efficacy of models of practice and the implication for working relationships and roles.
4. Evaluate key professional and personal skills required in the field.
5. Reflect on personal and professional attributes and skills that may assist or hinder their capacity to partner, facilitate, consult and lead.
6. Create professional goals to develop skills to partner, facilitate, consult and lead.

Subject Content

1. Critique of the changing nature of service delivery and the shifting roles of professionals.
2. Exploration of the multiple roles and vital partnerships experienced by professionals.
3. Perspective-taking for the individual, families and other professionals.
4. Models of practice and ways of working (e.g. team around the child).
5. Review of empirical research that evaluates the impact of partnership models.
6. Analysis of key skills required in the current field (e.g. communication, conflict resolution, case management).
7. Reflection on personal attributes and skills as well as critiquing previous professional experience.
8. Goals for professional and personal growth in relation to partnering, communicating and facilitating.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 7043 Engaging Communities

Credit Points 10

Legacy Code 102148

Coordinator Erin Mackenzie (https://directory.westernsydney.edu.au/search/name/Erin Mackenzie/)

Description From 2020 students should note that core subjects are now taught in semesters rather than half yearly sessions. Community engagement is variously seen as a strategy for improving educational outcomes, increasing community ownership and/or empowering citizens to take collective action. Although appeals to 'community' often assume a homogeneous ideal, active community engagement needs to respond to a diversity of needs and experiences. This subject begins by exploring the notion of community, its uses and meanings in different discursive and professional contexts. Students will be introduced to theory and praxis aimed at identifying community needs, partnering across diversity and working effectively and inclusively to build community strengths and engagement. The subject's applied learning focus requires students to develop and implement a community engagement strategy for a selected setting.

School Education

Discipline Teacher Education, Not Elsewhere Classified.

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program, with the exception of those students enrolled in the 8083 Bachelor of Research Studies.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically evaluate notions of community and community engagement
2. Audit a community's membership, strengths and assets
3. Analyse community profile data to determine needs
4. Respond to a diversity of community needs and interests
5. Develop a community engagement strategy
6. Evaluate various forms of feedback and develop recommendations to enhance engagement

Subject Content

1. Notions of 'community' - ideals and realities
2. Diversity within and between communities – strengths and tensions
3. Sites and contexts for community engagement
4. Engagement – purpose, process and dilemmas
5. Mapping community
6. Skills and strategies for working with community
7. Critical competencies for cross-cultural engagement
8. Establishing and maintaining effective partnerships
9. Building inclusive communities

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Case Study - Community Mapping & Initial Engagement Strategy	1,500 words	40	N	Individual
Report - Report on Design and Implementatic of Community Engagement Strategy	4.000 words	60	N	Individual

TEAC 7044 English Linguistics for TESOL

Credit Points 10

Legacy Code 101825

Coordinator Mahasta Zare (https://directory.westernsydney.edu.au/search/name/Mahasta Zare/)

Description This subject provides students with a linguistics background, including English grammar, necessary to excel in English language teaching and assessment. Encompassing the areas of syntax, semantics, morphology, phonology and phonetics, the subject equips students with the technical vocabulary of linguistics and pedagogical grammar as well as the analytical skills necessary to identify and describe both the English language and patterns of performance by second and bilingual language learners. These foundational skills prepare students for success in language teaching, assessment and second language research.

School Humanities & Comm Arts

Discipline English as a Second Language Teaching

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify phonemes, morphemes and syntactic constituents in English and other languages.
2. Describe articulatory configurations required to produce English sounds.
3. Describe English grammar to L2 learners, language researchers, and general audiences.
4. Identify sources of second language comprehension and production difficulties.
5. Demonstrate the relation of linguistic structure and second language developmental patterns.

Subject Content

- Morphology - units of meaning and their combination / The arbitrariness of sound-meaning correspondence / L2 morphological development.
- Phonology - phonemic Categories and allophonic variation / stress and tone in English / sources of L2 pronunciation errors.
- Phonetics - mechanics of speech production / processes involved in L2 perception.
- Syntax - parts of speech / constituent structure / verbal inflection and agreement / pedagogical labels for grammatical Structures / obligatory and optional grammatical constructions
- Semantics/pragmatics - lexical and structural ambiguity / linguistic relativity

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Participation	13 Weeks	10	N	Individual
Short Answer	500 - 1,000 words	40	N	Individual

Quiz	2 x 20 minutes	20	N	Individual
Final Exam	120 minutes	30	N	Individual

TEAC 7051 Inclusive Environments

Credit Points 10

Legacy Code 102149

Coordinator William Nketsia (https://directory.westernsydney.edu.au/search/name/William Nketsia/)

Description Significant reform has occurred over the last three decades with regard to educating individuals with additional needs. This subject explores the history and current position on disability as well as philosophy, policy, legislation, and practice around educating individuals with additional needs internationally. The research literature examining the benefits and barriers to inclusive education will be analysed. Students will develop skills of critical review required to evaluate the research in the field. Lastly, the subject addresses the ways in which educational settings can be designed to be more responsive to learners with additional needs and how students can promote inclusion through organisational change.

School Education

Discipline Teacher Education, Not Elsewhere Classified.

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1714 Master of Teaching (Secondary); 1720 Master of Inclusive Education; 1721 Graduate Certificate in Inclusive Education; 1726 Master of Education (Leadership); 1847 Master of Education (STEM); 1911 Master of Education; 1781 Master of Teaching (Primary); 1876 Bachelor of Education (Primary) or 1939 Bachelor of Education (Secondary).

Students in program 1939 Bachelor of Education (Secondary) or 1876 Bachelor of Education (Primary) must have successfully completed 240cps before enrolling in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically reflect upon social change in relation to the learning and teaching of learners with additional needs.
2. Apply current inclusive education research, legislation, educational policies, Work Health & Safety and risk assessment within educational settings.
3. Critically analyse the barriers to, and benefits of inclusion from the perspective of multiple stakeholders.
4. Critically analyse the ways in which educational settings can be designed to be more inclusive of learners with additional needs.
5. Differentiate curricula and adapt environments to promote authentic learning for all individuals in the setting.
6. Implement learning as a social process determined by particular values and ideologies.
7. Reflect on personal and professional values, practices, and skills to effect positive change in learning environments.
8. Examine and apply action research methodology to improve the strategies, practices and knowledge of inclusive environments.

Subject Content

1. Historical, current and future perspective on advocacy, social change, terminology, attitudes
2. Legislation and policies including a worldwide perspective (e.g. NSW anti-discrimination, DDA, Standards, WHS, Every Student, Every School, Early Years Learning Framework, National Partnerships)
3. Introduction of models and concepts of adjustments and accommodations: e.g. M2ECCA, Loreman's Seven Pillars, UDL, Bronfenbrenner's ecological model
4. Role of personnel and stake holders overtime
5. Benefits and barriers: labelling, language and disability e.g. barriers, attitudes, collaboration, support – evidence based and empirical studies
6. Identifying and critiquing school/organisational climate and how it supports inclusion, or otherwise.
7. Reflection on role and capacity to act as agents of social change within the context of the organisation and learning environments.
8. Action research methodology.

Special Requirements

Essential equipment

Access to vUWS

Assessment

Case Study	2,500 words	50	N	Individual

TEAC 7057 Becoming an Exemplary Teacher

Credit Points 10

Legacy Code 101899

Coordinator Joanne Frost (https://directory.westernsydney.edu.au/search/name/Joanne Frost/)

Description This subject empowers aspiring educators to excel as exemplary teachers in today's educational landscape. It explores the historical and contemporary social, cultural, and political influences on early childhood and primary education. Students critically examine

the evolving role of teachers, focusing on factors contributing to responsive teaching and quality learning experiences. Emphasizing inclusivity and support for learners, the subject fosters critical reflection about teaching practice to prepare students for their future roles in education. This subject is included in the Foundation Phase of the Master of Teaching program.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1783 Master of Teaching (Birth-5 Years/Birth-12 Years) or 1784 Master of Teaching (Birth-5 Years).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Articulate what the current research literature identifies as the characteristics of an exemplary teacher.
2. Critique the influence of historical and current social, cultural and political factors that have shaped the role of teachers.
3. Research the history and theoretical underpinnings of current Australian legislative frameworks and policy in early childhood and primary education.
4. Explain the continuum of children's learning in home, early childhood and primary school settings, and the implications for responsive practice.
5. Critique a range of strategies early childhood and primary school settings use to engage families in two-way communication, learning updates, and collaborative planning and classroom management.
6. Use skills of reflective practice to identify and examine personal values and beliefs and consider the implications for professional and ethical practice.
7. Critique the social, pedagogical and political factors critical to barriers to learning and facilitating learning for diverse learners, Aboriginal and Torres Strait Islander learners and learners from different cultural, religious and linguistic backgrounds and the implications for the role of teacher.

Subject Content

1. What it means to be an exemplary teacher: multifaceted role of teacher, advocate, professional, leader.
2. Critical reflection of socio-cultural and political contexts influencing teaching today: technology, global approaches to education such as OECD, diversity of Australian families and communities, diverse learning capabilities, including children with disability and the complexities of influencing education for Aboriginal and Torres Strait Islander children.
3. Traditional and contemporary theoretical perspectives of early childhood education and perspectives of childhood
4. Australian Context - History of Early Childhood and primary school education, how are teachers perceived in the community; misconceptions and reality of being a teacher and teaching.
5. Australian Government Legislation influencing education policy and funding, Australian Professional Standards for Teachers-similarities between Early Childhood Educators (ECE) and primary teachers.
6. Education and curriculum studies: continuity of learning from ECE to primary schooling, curriculum approaches and frameworks – EYLF; Australian Curriculum and NSW Syllabi
7. Teachers as researchers – understanding and engaging in research to enhance practice.
8. Identifying personal strengths and areas to develop, setting professional goals, becoming a lifelong learner.
9. Reflective practice and reflexivity; Introduction to reflection and reflexivity, writing critical reflections.
10. Developing personal philosophy and presentation skills for teachers

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 7061 Leadership and Management

Credit Points 10

Legacy Code 102108

Coordinator Melissa Cama (https://directory.westernsydney.edu.au/search/name/Melissa Cama/)

Description This subject explores the complex socio-political context of early childhood and school education. It will focus on the knowledge and skills related to effective management, leadership and advocacy in the education sector. This subject will engage students in review of the legal, ethical and professional accountabilities of teachers. Effective

leadership and management theories, models and practices of quality educational providers will be evaluated. Students will also examine strategies for advocacy and building partnerships with families and communities. This subject is included in the Transition Phase of the Master of Teaching program.

School Education

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects TEAC 7073 Managing Child and Family Services

Restrictions

Students must be enrolled in 1783 Master of Teaching (Birth-5 Years/Birth-12 Years) or 1784 Master of Teaching (Birth-5 Years).

Students must have completed 40 credit points in 1783 Master of Teaching (Birth-5 Years/Birth-12 Years) or 1784 Master of Teaching (Birth – 5 Years).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine the roles, functions and accountabilities of leaders and managers in educational settings.
2. Eavlaute theories of management and leadership and their application in educational settings.
3. Analyse the legal, professional and ethical dimensions of management practice in educational contexts.
4. Analyse the influence of management and leadership on quality outcomes in educational contexts.
5. Explore strategies for organisational planning and development including maintenance of effective administration, teamwork, staff management and development.
6. Examine strategies to support the development of partnerships with families and communities and advocacy for children, families and the field of education.

Subject Content

1. The Australian policy context.
2. Legal and professional frameworks influencing teachers' professional practice.
3. Theories of leadership and management.
4. The role of the leaders and managers in prior to school and educational contexts.
5. Effective management processes and practices.
6. Leading and working effectively with staff and colleagues.
7. Advocacy as a professional responsibility in professional practice.
8. Ethical dimensions of leadership and management.

TEAC 7063 Leadership, Mentoring and Professional Growth

Credit Points 10

Legacy Code 100701

Coordinator Mark Richards (https://directory.westernsydney.edu.au/search/name/Mark Richards/)

Description Becoming a professional is a complex and intricate process. Beyond adequate initial training (both theoretical and the implementation of theory into practice) it takes a commitment and undertaking to career-long learning and professional development. Such commitment and undertaking need not be an isolated process. Educational leaders are available to assist in the promotion of professional development. This subject provides leaders with the understandings and strategies for implementing mentoring and professional development programs.

School Education

Discipline Teacher Education

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. critically review current research on teaching, mentoring and promoting the professional development of teachers, student teachers or other educational professionals;
2. use formative evaluation models as a basis for promoting professional growth;
3. analyse in verbal and written form one particular model of professional development;
4. critically evaluate one of various models of professional development leading to the application of such knowledge to the design and implementation of a program of professional development for teachers, student teachers or other educational professionals and,
5. critically reflect on the implementation of the trialled model of professional development.

Subject Content

1. Definition, principles and practices of promoting professional growth
2. Principles and practices to promote adult learning
3. The leaders role in professional development
4. Effective teaching
5. Promoting professional growth of teachers at different career stages

- student teachers
- beginning teachers
- experienced teachers

6. Introduction to the common elements of effective professional development and mentoring
- establishing relationships: knowing your student teacher/ teacher
- formative evaluation for needs assessment
- effective communication and active listening
- sharing knowledge, collaborative planning
- observing and being observed (modelling)
- feedback, coaching and coaching plans
- encouraging reflection
- assessment and Reporting

7. Alternative models for promoting professional growth (for example...)
- action research and case Study writing
- clinical supervision and its modifications (eg. Developmental Instructional Supervision, developmental supervision, Garman (1990) model of clinical supervision)
- internships
- Joyce and Showers' theory, practice, demonstrate, practice, feedback and follow-up model
- national Schools Network protocols
- peer coaching
- professional practice/ development Schools
- schools as learning communities,
- school improvement and renewal
- school-university partnerships
- performance appraisal

8. Ethics and supervisor/leader professional development

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Portfolio	8 minutes presentation, 1000 words review	50	N	Individual
Case Study	2500 words	50	N	Individual

TEAC 7065 Leading Mathematics in the Primary School

Credit Points 10

Legacy Code 102323

Coordinator Peter Mcdonald (https://directory.westernsydney.edu.au/search/name/Peter Mcdonald/)

Description This subject provides an in-depth exploration of the required mathematics knowledge for primary teaching and for leading other teachers in their professional learning. Students will explore and further develop their pedagogical content knowledge, applying it to the primary mathematics curriculum. They will develop a deep understanding of specific mathematical content, the ways in which children learn that content and appropriate, research based pedagogies.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1830 Graduate Certificate in Primary Mathematics Education; 1847 Master of Teaching (Secondary) STEM or 1911 Master of Education.

Assumed Knowledge

Students must have either completed all core mathematics subjects of the MTeach (Primary) program at Western Sydney University, or be a fully qualified primary teacher.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the essential components of pedagogical content knowledge as it relates to the teaching of primary mathematics
2. Examine learning theory relating to primary mathematics

3. Apply mathematical ideas to the Pedagogical Content Knowledge domains map for mathematical knowledge for teaching
4. Demonstrate pedagogical content knowledge across the primary mathematics curriculum by aligning specific mathematical concepts to curriculum, content and pedagogical practices
5. Formulate a whole-school approach to teaching mathematics
6. Design professional learning resources based on specific mathematical concepts or ideas

Subject Content

1. Knowledge for mathematics education leadership
2. Pedagogical Content Knowledge domains for primary mathematics teachers
3. Effective pedagogy in mathematics
4. Programming and planning across the primary school
5. Understanding and addressing mathematics anxiety
6. Beliefs and identity in mathematics
7. Leading change in mathematic pedagogy
8. Effective strategies for in situ professional development and mathematics

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Essay	3,000 words	50	N	Individual
Presentation	Presentation (20 minute) with accompanying resource (1,000 words)	50	N	Individual

TEAC 7067 Leading Science in the Primary School

Credit Points 10

Legacy Code 102487

Coordinator Karina Mckoy (https://directory.westernsydney.edu.au/search/name/Karina Mckoy/)

Description The purpose of this subject is for students to engage in leadership practices and theory associated with an expert primary science teacher. Students will evaluate curriculum resources and consider strategies for integrating science with other disciplines in primary teaching contexts. Students will develop their capacity for leading science professional learning experiences and innovation to other educators.

School Education

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1845 Graduate Certificate in Primary Science Education.

Assumed Knowledge

A basic understanding of planning units of work, features of positive classroom environments, and outcomes of the primary science syllabus is desirable.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate a set of curriculum resources for primary science education and its use in an authentic teaching context
2. Justify the integration of science outcomes across the curriculum
3. Analyse strategies for engaging the local community with implementation of the primary science curriculum
4. Defend how you have developed pedagogical content knowledge and leadership skills for teaching a selected primary science topic
5. Propose how action research can be used to develop professional knowledge of primary science teachers
6. Design a professional development session that supports colleagues in primary science with developing knowledge and skills for teaching a selected primary science topic
7. Articulate future professional development opportunities in primary science education

Subject Content

1. Evaluating curriculum resources for primary science
2. Integrating science with other disciplines
3. Developing professional knowledge and leadership skills for teaching primary science
4. Action research in primary science
5. Leading science professional learning experiences
6. Engaging the community in primary science

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Critical Review	2,000 words	50	N	Individual

Presentation	20 minutes	30	N	Group
Report	1,000 words	20	N	Individual

TEAC 7068 Learning and Teaching in Challenging Contexts

Credit Points 10

Legacy Code 102158

Coordinator Jennifer Curtis (https://directory.westernsydney.edu.au/search/name/Jennifer Curtis/)

Description This subject involves the study of pedagogy in contexts regarded as 'challenging'. The main focus will usually be on the contexts of school and early childhood, but alternative sites of education will also be studied as appropriate. The definition of a challenging context will be considered with an emphasis on contexts of poverty. Students will undertake a critical analysis of policies and practices that impact and respond to challenging contexts. The subject is structured around the investigation of dilemmas and specific provocations, and explores engaging pedagogies for education.

School Education

Discipline Teacher Education

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program, with the exception of those students enrolled in 8083 Bachelor of Research Studies.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Audit areas of challenge in an educational context
2. Locate 'challenge' within the larger context of global educational policy and 'policy travel'
3. Analyse the notion of pedagogical / institutional effectiveness
4. Critically analyse policy and discourse around 'challenge' in contemporary educational contexts
5. Critically analyse responses to policy around challenge in contemporary educational contexts
6. Apply key theoretical perspectives in analysis of challenge and responses to challenge

Subject Content

1. What are challenging contexts in contemporary education?
2. What dilemmas can arise from challenging contexts at the classroom and institutional levels?
3. Is education a way out of poverty?
4. How do/can systems respond to challenging contexts?
5. What are the key features of effective pedagogies for challenging contexts?
6. What is the role of policy instruments such as 'data' in contemporary education, especially in challenging contexts?
7. What are the roles of expectations and aspirations in contemporary education in challenging contexts?
8. How can educational sites/pedagogies be engines of change?

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Presentation	20 minutes+ 10 minutes of questions and discussion	50	N	Group
Essay	2,000 words	50	N	Individual

TEAC 7071 Literacy Connections 1: Understanding and Creating

Credit Points 10

Legacy Code 101803

Coordinator Janene Rox (https://directory.westernsydney.edu.au/search/name/Janene Rox/)

Description In this subject, students investigate processes of speaking, listening, reading, writing, viewing, representing and critical thinking. The subject focuses on teaching children from birth to 8 years, with a focus on strategies that support emergent literacy. Strategies to support children with English as an additional language or dialect will be explored. Students will learn how to support children's effective communication and teach children in the early stages of reading and writing. The key literacy elements of oral language, concepts of print, phonological and phonemic awareness, phonics, fluency, vocabulary and comprehension will be addressed. It also focuses on the role of the teacher in assessing children's language and literacy learning, and planning intentional learning experiences to extend learning. This subject is included in the Development Phase of the Master of Teaching program.

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) -

Equivalent Subjects LGYA 1112 - Literacy 0-8

Restrictions

Students must be enrolled in Students must be enrolled in 1783 Master of Teaching (Birth-5 Years/Birth-12 Years) or 1784 Master of Teaching (Birth-5 Years).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate a sound knowledge of language development from birth, with consideration of cultural, developmental and linguistic differences and the role of oral language as a foundation of reading and writing.
2. Explain the processes of speaking, listening, reading, writing and representing and the role of the teacher and the family in extending children's language and literacy learning.
3. Demonstrate a sound understanding of Aboriginal English and plurilingualism first and second language learning and effective strategies for supporting children who are learning English as an additional language or dialect.
4. Explain the key processes and related pedagogies in learning to read in the early years, including oral language, concepts of print, phonological and phonemic awareness, phonics, fluency, vocabulary, comprehension and wide reading.
5. Use formative and summative assessment procedures to assess children's language and literacy using relevant curriculum and syllabus documents to set appropriate learning goals.
6. Plan culturally responsive learning experiences that utilise a range of paper-based and digital resources and everyday texts to extend children's literacy learning.
7. Use authentic children's literature as a tool for enhancing children's literacy learning, meaning making and critical thinking.

Subject Content

1. Language development and the role of oral language as a foundation for literacy learning and the role of family and community experiences.
2. Processes of speaking, listening, reading, viewing, representing and creative and critical thinking.
3. Plurilingualism teaching strategies to support additional language learning.
4. Aboriginal English and strategies to support children learning Standard Australian English as an additional dialect.
5. Teaching beginning readers and writers including concepts of print, phonological and phonemic awareness, fluency, vocabulary, comprehension and wide reading.
6. Effective pedagogical practices, such as modelled, guided, and independent reading and writing
7. Assessment of children's language and literacy learning including evidence-based approaches, assessment tools and how it informs the planning cycle.
8. Planning, monitoring and evaluating integrated and scaffolded literacy experiences and lessons.
9. Literary and factual texts – selecting and sharing authentic culturally responsive texts.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 7072 Managing Challenging and Diverse Behaviour

Credit Points 10

Legacy Code 102151

Coordinator Christine Grima-Farrell (https://directory.westernsydney.edu.au/search/name/Christine Grima-Farrell/)

Description This subject provides professionals with the skills to successfully and systemically manage challenging behaviours exhibited by individuals in classrooms, early childhood, or other educational settings. This subject will focus on managing critical features of the environment to encourage positive behaviours and prevent challenging behaviours from occurring. Intervention strategies are also developed to address significant negative behavioural challenges when preventative measures are ineffective. Professionals will develop competencies in identifying and analysing problem behaviours and designing suitable management plans. Such skills will be helpful to either professionals working directly with individuals with additional needs, or as consultants supporting those who provide direct support to individuals with challenging and diverse behaviours.

School Education

Discipline Teacher Education: Special Education

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects TEAC 7014 - Behaviour Management

Restrictions

Students must be enrolled in 1682 Master of Special Education; 1720 Master of Inclusive Education; 1721 Graduate Certificate in Inclusive Education or 1911 Master of Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse behaviours in terms of function and motivating factors, reinforcement and educational curriculum and learning environment;
2. Make appropriate decisions in managing challenging behaviour and altering environments within the system of educational settings;
3. Examine theoretical assumptions of school-wide and classroom management systems;
4. Analyse behaviour interventions in the context of theoretical approaches, ethics, legislation, and the rights of the individual;
5. Create positive behavioural systemic support for individuals with challenging behaviours;
6. Adequately describe, monitor and track behaviour;
7. Communicate effectively with key stakeholders to enhance positive behaviours for individuals and initiate change in the learning environment.

Subject Content

- Tiers of prevention and intervention approaches and their application;
- Ethical and legal conduct when working with young children, students and adults with challenging and diverse behaviours;
- Assessment of behaviour using a range of strategies;
- Developing an individual learning support plan to address challenging and diverse behaviours;
- Models for understanding behaviour and developing programs using a systems approach;
- Addressing challenging and diverse behaviours through curriculum and whole-setting/classroom management;
- Managing challenging and diverse behaviours, promoting positive behaviour systems reducing challenging behaviours;
- Analysis of behaviour in an educational setting with reference to classroom and early childhood curricula;
- Guiding others to identify and manage challenging and diverse behaviour.

Special Requirements

Legislative pre-requisites

Students are required to complete a Working with Children Check leading to the issuance of a clearance number.

Students will need to:
i. Access the NSW Office of the Children's Guardian website and complete an online application form to generate an application number.
ii. Present an application number and identification to a NSW Motor Registry or Government Access Centre prior to issuance by mail of a Working with Children Check number.
iii. Email the letter with a valid Working With Children Check number to enrolments@westernsydney.edu.au (https://hbook.westernsydney.edu.au/subject-details/teac7072/Students are required to complete a Working with Children Check leading to the issuance of a clearance number. TEAC 7074 Mathematics for Contemporary Learners

Credit Points 10

Legacy Code 102321

Coordinator Peter Mcdonald (https://directory.westernsydney.edu.au/search/name/Peter Mcdonald/)

Description In this subject students will explore issues relating to the teaching and learning of mathematics in the contemporary primary classroom. These issues will include promoting positive dispositions of learners, engaging pedagogies and developing creative and critical thinking for critical numeracy. Students will explore theory relating to the integration of information and communication technologies in the mathematics classroom including the development of teachers' Technological Pedagogical Content Knowledge (TPACK).

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1809 Graduate Certificate in Primary Mathematics or 1830 Graduate Certificate in Primary Mathematics Education or 1911 Master of Education

Assumed Knowledge

Students must have either completed all core mathematics subjects of the 1781 Master of Teaching (Primary) program at Western Sydney University, or be an accredited primary teacher.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine the importance of promoting positive dispositions towards mathematics amongst teachers and students
2. Locate a range of mathematical pedagogical practices to engage primary students with mathematics
3. Demonstrate how the use of rich tasks can promote critical and creative thinking in the primary mathematics classroom
4. Apply the Substitution, Augmentation, Modification and Redefinition (SAMR) model of technology integration to a range of technology-based mathematics activities
5. Analyse a range of digital resources in relation to their ability to enhance the understanding of mathematical concepts
6. Assess a range of digital resources in relation to their alignment with the NSW K-10 Mathematics Syllabus

Subject Content

1. Issues relating to disposition towards mathematics
2. Engaging teachers and students with mathematics
3. Critical and creative thinking in the mathematics classroom
4. Developing students?f critical numeracy
5. Exploring the Technological Pedagogical Content Knowledge (TPACK) framework
6. Supporting the integration of technology into primary mathematics teaching and learning

Assessment

TEAC 7076 Multicultural Nonverbal Communication

Credit Points 10

Legacy Code 102283

Coordinator Ping Yang (https://directory.westernsydney.edu.au/search/name/Ping Yang/)

Description This subject introduces students to the interdisciplinary fields of linguistics, communication and cultural semiotics. It builds links between these areas of studies and beyond, which provide students with knowledge of how human beings use nonverbal communication systems and channels to achieve effective communication in intercultural and multicultural contexts. This subject covers three key perspectives, including paralinguistics, proxemics and kinesics. Authentic audio and visual materials are used to facilitate students' awareness of the multidimensional process in which people communicate verbally and nonverbally simultaneously. It also helps enhance their sensitivity when they interact with people from diverse linguistic and cultural backgrounds.

School Humanities & Comm Arts

Discipline English as a Second Language Teaching

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate understanding of three major areas (paralinguistics, proxemics and kinesics) in nonverbal communication;
2. Interpret connotative meaning conveyed nonverbally in a range of contexts;
3. Identify various functions performed and roles played via nonverbal channel;
4. Demonstrate awareness of social and cultural codes embedded in body language;
5. Use ELAN to transcribe and code audio and video data, particularly nonverbal information;
6. Demonstrate cross-cultural sensitivity and understanding of cross-cultural differences in nonverbal communication;
7. Use nonverbal communication effectively across languages and cultures.

Subject Content

- Paralinguistic aspects of nonverbal communication, e.g. articulation, tone, volume, pitch, rate, duration, quality, regularity as in music, pause and silence as in casual conversation, and their in-context meaning
- Proxemic dimensions, including space (intimate, personal and public), territory (self and others), power distance (High and low) and time (punctuality and zones)

- Kinesic perspectives, such as gestures (head, hand, finger) facial expressions (anger, disgust, happiness, sadness, smile), eye contact, body movement (bodily contact, posture and pose as in dancing) and artefacts (clothing, colours, shape, size, ornaments with reference to Religions and cultural practices)
- audio and video data transcription and analysis using ELAN (A linguistic annotator for creating complex annotations on video and audio data) and Adobe Premiere Pro CS5
- communication functions, e.g. providing information, regulating interaction, expressing emotions, allowing meta-communication, controlling social situation, and forming and managing impressions
- body language and cultural differences, applauding, smiling, eye contact, head shaking, hand touch, shoulder shrug, head nodding and shaking, hand shake and cheek kissing, etc.
- Applications of nonverbal communication in health care (doctor-patient interaction), legal setting (interpreters' body language in court) , political communication (high-profile politicians' body language in public address and debate), business negotiat

TEAC 7082 Pedagogy for Positive Learning Environments

Credit Points 10

Legacy Code 102082

Coordinator Rachel White (https://directory.westernsydney.edu.au/search/name/Rachel White/)

Description This subject is designed to promote the application and integration of current psychological and educational theory, evidence, and best practices in creating positive learning environments for the purposes of learning, behaviour, and wellbeing. The subject provides a thorough understanding of theoretical and empirical perspectives on behaviour management as they apply to Australian contexts. Skill development will be encouraged through interactive tutorial activities and exercises. Areas of content include: theoretical and empirical foundations of expectation/rules setting and routines; proactive practices in positive behaviour support; student engagement theory; relational pedagogy; using data to inform behaviour management strategies; and whole school approaches to manage behaviour and wellbeing. This subject is included in the Development Phase of the Master of Teaching program.

School Education

Discipline Teacher Education: Secondary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) TEAC 7161

Equivalent Subjects TEAC 7086 - Positive Learning Environments TEAC 7113 - Psychology for Teaching TEAC 7141 - Teaching and Learning in Classrooms

Restrictions

Students must be enrolled in the 1714 Master of Teaching (Secondary) or 1781 Master of Teaching (Primary) or 1848 Master of Teaching (Secondary) STEM.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse complex real-world problems in relation to learning, behaviour and social and wellbeing management including how culturally and linguistically diverse communities' philosophies and beliefs about learning and behaviour can affect teaching practice.
2. Model the use of specific proactive strategies and resources to support students' behaviour and wellbeing.
3. Understand the need to develop, teach and encourage high expectations for student learning, behaviour, and wellbeing.
4. Evaluate personal beliefs, values and teaching practices considering theory, applied learning and research evidence relating to effective behaviour management practices.
5. Articulate the importance of teaching social and emotional skills, both alongside and embedded within substantive curriculum content.
6. Use self-reflective teaching practices, alongside relevant empirical findings and theory, when applying preventative and restorative behavioural interventions to prioritise student wellbeing and promote individual and whole-class learning outcomes.
7. Acquire an understanding of the development and application of whole-school frameworks for behaviour management and wellbeing.

Subject Content

1. Contemporary classroom management.
2. Engagement theory and student behaviour.
3. Understanding student-teacher affective relationships and school behaviour.
4. Social and emotional learning in schools.
5. Proactive practices to prevent misbehaviour and encourage engagement.
6. Intervention strategies for challenging behaviours.

7. Promoting culturally and linguistically informed student engagement, positive behaviour, and wellbeing in schools.

TEAC 7083 People, Place and Pedagogy

Credit Points 10

Legacy Code 102106

Coordinator Tessa Mcgavock (https://directory.westernsydney.edu.au/search/name/Tessa Mcgavock/)

Description From 2020 students should note that core subjects are now taught in semesters rather than half yearly sessions. This subject will provide students with the opportunity to explore key concepts of learning and teaching in the curriculum areas of social studies, history, geography, place studies, civics and citizenship, economics, sustainability and environmental education and Aboriginal and Torres Strait Islander studies in early childhood and primary education. The subject will encourage pre-service educators to develop their philosophy and practice of teaching and learning, particularly within the contexts of a rapidly changing and dynamic human global culture that has significant cultural, historical, social and environmental dimensions. The subject will cover a broad, complex and engaging field of study reflecting that people are social beings who interact with one another and with the natural and social environments through and over time. Aboriginal and Torres Strait Islander perspectives, socio-cultural influences and place-based pedagogies will be investigated, and relevant policy and regulation documents around risk, play and pedagogy will be examined.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1783 Master of Teaching (Birth-5 Years/Birth-12 Years) or 1784 Master of Teaching (Birth-5 Years/Birth-12 Years).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the central concepts, modes of enquiry and a range of strategies for teaching history, geography, civics and citizenship, economics and business, social and environment education and their relevance for early childhood and primary school settings.
2. Investigate and develop critical skills of inquiry, advocacy and leadership around local and global policies that respect and value

people and their cultural identity (especially children and marginal groups within society) their rights and responsibilities and the importance of sustainability and the future planet.
3. Design curriculum and assessment, engaging and embedding it within family and community contexts and drawing on theories of place and place pedagogies, Aboriginal and Torres Strait Islander histories and contemporary perspectives on culture, diversity and inclusion.
4. Reflect critically on theory and practice across the key fields of study and consider ways to incorporate theoretical frameworks to inform their professional identity and philosophies and how they come to understand their own place in the world.
5. Describe the critical role of research in developing their own professional knowledge and the knowledge of their students and community.
6. Apply research findings and propositions around place, people and pedagogy within their educational settings.

Subject Content

1. Theory and practice across the key field of study including ways to incorporate theoretical frameworks to inform personal professional philosophies and coming to understand their own place in the world
2. Knowledge of students and community and application of research resulting in findings and propositions around place, people and pedagogy within their educational settings
3. Critical skills of inquiry, advocacy and leadership around local and global policies that respect and value people and their cultural identity (especially children and other marginal groups within society) their rights and responsibilities, and the importance of sustainability and the future of the planet.
4. Concepts, modes of enquiry and a range of strategies for teaching history, geography, civics and citizenship, economics and business, social and environmental education and their relevance for early childhood and primary school settings
5. Approaches and strategies for designing and implementing curriculum and assessment, engaging and embedding it within family and community contexts drawing on theories of and research in place and place pedagogies, Aboriginal and Torres Strait Islander histories and contemporary perspectives on culture, diversity and inclusion.

Assessment

TEAC 7084 Person-Centred Practice

Credit Points 10

Legacy Code 102166

Coordinator Christine Johnston (https://directory.westernsydney.edu.au/search/name/Christine Johnston/)

Description The shift in educational policy and legislation to one of inclusion has been accompanied by a move to models of service delivery which are person- and family-centred and which also recognise the need for tiers in intervention. Whilst the range of service delivery models currently operating across educational and community settings for varied levels of need and developmental stages will be explored and evaluated, emphasis will be given to person-centred practice. Through an analysis of the literature encompassing both evidence-based practice and practice-based evidence students will evaluate the implications of the model for individuals, families, teachers, other professionals, schools, services, their own practice and for systems practice.

School Education

Discipline Teacher Education: Special Education

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 8083 Bachelor of Research Studies; 1721 Graduate Certificate in Inclusive Education; 4700 Graduate Diploma in Health Science; 4698 Master of Health Science; 1911 Master of Education; 1720 Master of Inclusive Education; 1714 Master of Teaching (Secondary); 1847 Master of Education (STEM); 1876 Bachelor of Education (Primary) or 1939 Bachelor of Education (Secondary).

Students in program 1939 Bachelor of Education (Secondary) or 1876 Bachelor of Education (Primary) must have successfully completed 240cps before enrolling in this subject.

Assumed Knowledge

Professionals with teaching or other relevant qualifications.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critique the range of service delivery models through an analysis of the research literature;
2. Apply the underlying philosophies of person-centred and family-centred practice to their own work with individuals with disabilities;
3. Determine the impact of the context in which they work to the implementation of person-centred practice;
4. Apply understandings of the issues arising at times of transition for individuals with disabilities and their families and work collaboratively and systemically to achieve smooth transitions within and between services;
5. Evaluate the effectiveness of specific programs for individuals and families under the framework of person-centred and family-centred practice.
6. Develop, implement and evaluate person-centred programs.

Subject Content

1. Historical review of approaches to designing and delivering educational and intervention programs across the lifespan;
2. The philosophy of empowerment: policy and practice;
3. Models of service delivery: Family-centred practice; person-centred practice; team around the child; multi-disciplinary, interdisciplinary, transdisciplinary and systems models;

4. The impact of context on service delivery: the ecology of service provision;
5. Evidence-based practice and practice-based evidence for the efficacy of person-centred and family-centred practice;
6. Person-centred practice in educational settings and the implications for individualised learning and teaching;
7. The challenge of transition between service models;
8. The role of the family and carers in person-centred models;
9. The role of the teacher and other professionals in developing and implementing person-centred models;
10. Brokerage models and the implications for the maintenance of professional expertise.

TEAC 7087 Pedagogical Leadership: Critically Reflective Practice

Credit Points 10

Legacy Code 102107

Coordinator Jennifer Green (https://directory.westernsydney.edu.au/search/name/Jennifer Green/)

Description In this subject, students use the conceptual frame of pedagogical leadership to examine discourses of leadership and pedagogy in early childhood settings to re-shape practice. The principles and practices of Belonging, Being and Becoming: The Early Years Learning Framework for Australia are used as a basis for critical reflection on the student's own practice and areas for ongoing learning and change. Students will develop their research skills and capacity to lead pedagogy by engaging in critical analysis of current research and evolving theories of leadership to design and undertake an action research project. This subject is included in the Transition Phase of the Master of Teaching program.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) TEAC 7103

Equivalent Subjects TEAC 7042 - Engaging Children in Curriculum

Restrictions

Students must be enrolled in 1783 Master of Teaching (Birth-5 Years/ Birth-12 Years) or 1784 Master of Teaching (Birth – 5 Years).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse contemporary literature about leadership and pedagogy in early childhood, school and community settings.
2. Discuss the impact of pedagogical leadership on quality teaching and learning outcomes for children.
3. Examine the research process and the role of each step of the process for quality research to build evidence-base practice.
4. Critically reflect on personal professional practice.
5. Develop an action research project.
6. Evaluate the effectiveness of the action research process in improving outcomes in professional practice.

Subject Content

- Module 1 Pedagogical Leadership
  - Understandings of leadership and pedagogy
  - The role of the educational leader/pedagogical leader in early childhood and beyond
  - Evidence based principles of pedagogical leadership
- Module 2 Leading change
  - Building capacity through change
  - Reflective practice and change
  - Models of change management
- Module 3 Capacity building through Action Research
  - What is research?
  - The relevance of engaging with educational research
  - Strategies for locating and critically evaluating peer reviewed educational research
  - Research processes: research design, data analysis and ethical issues.
  - Action research and practitioner research principles and practices

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 7088 Primary Creative Arts

Credit Points 10

Legacy Code 101585

Coordinator Kelly Pecina (https://directory.westernsydney.edu.au/search/name/Kelly Pecina/)

Description This subject introduces students to pedagogical theory and practices in the four diverse art forms of Dance, Drama, Music, and Visual Arts in the primary classroom. The subject provides practical knowledge, skills and understandings of the importance of all four art forms both as powerful teaching and learning strategies across the primary curriculum and as the creative arts in their own right for pre-service teachers. This subject builds students' capabilities to demonstrate creativity when teaching, empathy with diverse groups of student learners, a commitment to socially just schools and classrooms and an understanding of artistic processes. This subject will give students an understanding of the role of aesthetics, imagination and play in learning. This subject is included in the Development Phase of the Master of Teaching program.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in the 1781 Master of Teaching (Primary).

Assumed Knowledge

Basic computer literacy skills.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain central concepts in science and technology and understandings of the processes of investigating, designing and making and using technology.
2. Demonstrate research-based knowledge of the pedagogies appropriate for science and technology education in primary schools.
3. Apply appropriate strategies to create a positive environment supporting student effort and learning and to engage students as well as address student needs when implementing learning experiences in science and technology.
4. Implement learning experiences that demonstrate an in-depth knowledge of the NSW Syllabus for the Australian Curriculum: Science K-10 (incorporating Science and Technology K-6), including Aboriginal and Torres Strait Islander perspectives, and a range of pedagogies appropriate for science and technology education in primary schools
5. Demonstrate proficiency and the capacity to use a variety of ICTs (including IWB fs, digital cameras/microscopes etc. and a variety of software) in the context of science and technology education.
6. Identify and articulate clear learning goals in preparing learning experiences for science and technology education that are appropriate for the cognitive, social and language abilities of students in primary schools.
7. Plan and implement coherent lessons and lesson sequences that are designed to engage students and improve learning outcomes in science and technology.
8. Utilise knowledge of a range of resources appropriate to science and technology education.
9. Work in a team to investigate, the production of a designed and made artefact and, the presentation of a discussion about the process.

Subject Content

1. Theory, principles and practices related to Dance, Drama, Music, and Visual Arts and in the integration of these art forms.
2. Curriculum concepts, strategies and content in Dance, Drama, Music, and Visual Arts and in the integration of these subjects across the arts and across the curriculum, including Aboriginal and Torres Strait Islander perspectives.
3. Creating, presenting and appreciating in each of the art forms, based on the NSW Creative Arts K-6 syllabus/Australian Arts Curriculum.
4. Effective classroom management and teaching strategies for teaching and learning in the Creative Arts.
5. Planning an integrated creative arts program to include all four art forms, based on relevant literature and pedagogies within a primary classroom.
6. Range of strategies for teaching, reflecting on and assessing in the Creative Arts.
7. Teaching perspectives and protocols related to the teaching of Aboriginal and Torres Strait Islander arts in the primary school
8. Integration of the arts across the curriculum focussing particularly on Literacy
9. Development and sharing of personal practical skills, understandings and knowledge to create personal meaning in and through each of the art forms.
10. Critical reflection on their own learning styles and practices within each of the art forms and how this relates to the classroom.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 7089 Primary English and Literacy 1

Credit Points 10

Legacy Code 101579

Coordinator Kathleen Williams (https://directory.westernsydney.edu.au/search/name/Kathleen Williams/)

Description This subject is designed to explore key concepts associated with the teaching of the English Key Learning Area in the K-6 years, set in the broader context of a contemporary new literacies environment. It will examine the processes involved in the teaching of English with a focus on effective pedagogical practices, responsive teaching and explicit and systematic teaching of phonics and reading traditional print-based literacies and multiliteracies. Students will investigate teaching, learning, assessment and the key processes and components of learning to read using a range of factual and literary texts, involving every day and specialised knowledge for a range of readers/viewers. Students will be introduced to children's literature and authentic texts for the development of students' reading skills and abilities. Students will develop understandings of effective pedagogy and practice within the area of K-6 English and investigate the NSW English K-10 (focus on K-6) syllabus. This subject is included in the Development Phase of the Master of Teaching program.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1781 Master of Teaching (Primary).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine the key processes and components in how children learn to read (phonological and phonemic awareness, letter/sound correspondence, phonic knowledge, vocabulary, reading fluency, reading comprehension)
2. Examine the aims, outcomes, and content of relevant English syllabus and curriculum documents with focus on oral language and communication, understanding texts and responding to literature.
3. Identify the learning needs of diverse learners: English as an Additional Language or Dialect, Aboriginal and Torres Strait Islander learners, culturally and linguistically diverse learners, and learners with special needs, including low socio-economic, and gifted and talented students.
4. Review current children's' literature, including Australian literature.
5. Evaluate strategies and concepts involved in reading to learn through the integration of literacy with other KLAs.
6. Apply a range of effective pedagogical practices and culturally and linguistically responsive strategies for planning teaching and assessing the explicit and systematic teaching of phonics, the reception and interpretation of literary, factual and multimodal texts.
7. Plan further instruction based on evaluations, including formative and summative assessment of emergent readers learning needs through collection and analysis of student data and evidence-based practices.

Subject Content

1. Introduction to Theories that underpin Speaking & Listening, Reading and Viewing, Thinking Imaginatively and Creatively, Expressing Themselves
2. Introduction NSW Syllabus for the Australian Curriculum: English K-10 syllabus. (Early Stage 1 to Stage 4)
3. Learning to read and reading to learn (practices and processes 1) Beginning Reading

- Introduction to case study methodology
- Shared, Guided and Independent Reading Pedagogies

4. Reading (Learning to read and reading to learn practices and processes II)
   - Phonemic Awareness and picture books
   - Assessing Reading
   - Strategies and Activities
   - Explicit and systematic teaching of phonics
5. Assessing reading:
   - State and National testing e.g. NAPLAN
   - Authentic reading assessment (identifying all students strengths and needs)
   - Reading and Viewing strategies and activities (Focus on learning needs of Aboriginal and Torres Strait Islander students, including specific strategies for English as an Additional Language or Dialect)
   - Reading groups
6. Multimodal development, Responding and Composing, Speaking and listening, Reading and Viewing
   - Second language acquisition: theory and practice models
   - Strategies and Activities
7. Increasingly complex meaning making: Independent Reading
   - Multiliteracies and new literacies
   - Visual, multimodal and critical literacies
   - Strategies and Activities
8. Working with independent readers
   - A focus on reading to learn
   - Factual texts, literature circles and poetry
   - Strategies and Activities
9. Reading across the KLAs
   - Reading for different purposes, critical literacy and independent research
   - Strategies and Activities
10. Poetry and Readers Theatre
    - Reader identities and academic self-concepts
    - Strategies and Activities

TEAC 7090 Primary English and Literacy 2

Credit Points 10

Legacy Code 101586

Coordinator Lynde Tan (https://directory.westernsydney.edu.au/search/name/Lynde Tan/)

Description This subject is designed to provide a comprehensive account of the teaching of spoken, written and multimodal texts in the primary years of schooling. Students gain an understanding of different theories related to producing texts in a range of modes for different purposes. They investigate a range of written and multimodal genres, their textual structures and grammar and learn to apply these in planning and teaching in mainstream, English as an Additional Language or Dialect (EAL/D) and Aboriginal and Torres Strait Islander contexts, gaining a critical awareness of varying pedagogic approaches. Students will develop skills in pedagogy and practice, including next practice, within English & Literacy for K-6 students. The knowledge and skills developed in the other subjects of study in the program can be applied in this subject and Professional Experience subjects. This subject is included in the Transition Phase of the Master of Teaching program.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1781 Master of Teaching (Primary) or 1783 Master of Teaching (Birth-5/Birth-12 years).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Compare and interpret different theories related to writing and creating of monomodal and multimodal texts.
2. Examine the aim, outcomes, and content of relevant syllabus and curriculum documents, with a particular focus on oral language and communication, vocabulary, print and digital conventions, creating written and multimodal texts, spelling, handwriting, and understanding and responding to literature.
3. Examine the metalanguage (grammar) for written, visual and other semiotic modes.
4. Examine strategies for teaching spelling, punctuation and handwriting.
5. Apply knowledge about text and grammar in teaching and assessing children's writing and representation of ideas.
6. Apply understandings of curriculum design and the use of technology in the teaching of text and grammar in integrated units of work.
7. Evaluate and critique strategies for the teaching of English to diverse learners, focusing on EAL/D and Aboriginal and Torres Strait Islander learners.
8. Analyse student assessment data to monitor progress towards meeting learning outcomes and to establish clear and achievable goals for future learning.

Subject Content

1. Theories of language acquisition and writing
2. Content of NSW Syllabus for the Australian Curriculum: NSW English K-10 (K-6 component) Syllabus
3. Metalanguage of written, multimodal and digital texts and strategies for teaching them
4. Strategies for teaching spelling, punctuation and handwriting
5. Assessment of children's spoken, written, multimodal and digital texts
6. Planning an integrated approach to literacy teaching and teaching literacy in context of other curriculum areas
7. Strategies for the teaching of English to English as an Additional Language/Dialect and Aboriginal and Torres Strait Islander learners
8. English textual concepts
9. Oral language and communication

TEAC 7091 Primary Health and Physical Education

Credit Points 10

Legacy Code 102072

Coordinator Yasmen Kurtulmus (https://directory.westernsydney.edu.au/search/name/Yasmen Kurtulmus/)

Description This subject is designed to explore the content and pedagogies of Health and Physical Education (HPE) in the NSW primary curriculum. Students will develop an experiential understanding of the pedagogy of HPE. The knowledge and skills developed in the other subjects of study in the course can be applied in this subject and Professional Experience subjects. In this subject students will also continue to develop their research skills. This subject aims to develop teachers who demonstrate empathy with diverse groups of student learners and commitment to socially just schools and classrooms. This subject is included in the Development Phase of the Master of Teaching program.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects TEAC 7095 - Primary Personal Development Health and Physical Education

Restrictions

Students must be enrolled in 1663 or 1781 Master of Teaching (Primary).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply the content and central concepts of the NSW primary curriculum (K-6) components of the Personal Development, Health and Physical Education (PDHPE) K - 10 Syllabus and support documents when designing instruction.
2. Create a program of integrated learning experiences covering all Health and Physical Education strands using a range of relevant pedagogies, assessment and teaching strategies, based on the NSW primary curriculum (K-6) components of the Personal Development, Health and Physical Education (PDHPE) K - 10 Syllabus.
3. Apply teaching strategies that are responsive to a diversity of student needs including differences in cultural and linguistic backgrounds.
4. Identify the role of Health and Physical Education within the broader school curriculum, including the relationship between Health and Physical Education contents and Information and Communications Technology, numeracy and literacy.
5. Identify through critical analysis appropriate teaching and learning resources (print and digital) that can be used to enhance students f understandings of health concepts.
6. Examine the concept of "eacher as researcher" by critically reflecting on views of Health and Physical Education and the body as a social construction.
7. Apply appropriate Health and Physical Education pedagogies to improve learning outcomes for primary education.

>

Subject Content

1. Health and Physical Education Content and pedagogical knowledge.
2. Teaching Games for Understanding (TGfU)/ Game Sense approach for Physical Education.
3. Quality teaching pedagogies and engaging learning experiences that achieve the aims and outcomes of the NSW Board of Studies Health and Physical Education syllabus documents.
4. Organisational management strategies for teaching and learning in Health and Physical Education.
5. Case study narrative and podcasts as components of the self-reflective teacher.
6. Planning and writing effective learning experiences for Health and Physical Education.
7. Student assessment in the key learning area of Health and Physical Education.
8. Using information and communication technologies to design, deliver and evaluate learning experiences/ or improve their own professional skills.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Case Study	2,000 words	50	N	Individual
Presentation	Four 5 minutes' duration podcasts	50	N	Individual

TEAC 7092 Primary Human Society and its Environment

Credit Points 10

Legacy Code 101582

Coordinator Jennifer Curtis (https://directory.westernsydney.edu.au/search/name/Jennifer Curtis/)

Description Human Society and Its Environment focuses on History, Geography and three cross-curriculum priority areas in: Aboriginal and Torres Strait Islander histories and cultures; Asia and Australia's engagement with Asia; and Sustainability. As a key learning area in the K-6 curriculum HSIE provides opportunities for students to develop knowledge, understanding and skills in the subject matter, as well as proficiency in teaching inquiry learning approaches. In History, key concepts of changes in family history and local history are explored and Australia's history and understanding Australia as a Nation are explored through the relationships between the individual and the state, and the values and mutual responsibilities, and obligations for civil, political and social participation in Australian society. In Geography, concepts that develop a sense of curiosity about environments, peoples, cultures and place, in both Australia and the world are a priority. The subject emphasises pedagogy and lesson design for high possibility classrooms that specifically address the literacy and technology general capabilities. The subject also focuses on inquiry, place and project based learning which engages diverse groups of learners, develops their understanding about local and global communities, and prepares them to become informed and active citizens who contribute to the quality of Australian society. This subject is included in the Foundation Phase of the Master of Teaching program.

Level Postgraduate Coursework Level 7 subject

Restrictions

Note that only students enrolled at WSU Online may register in the WSU Online subjects offered at that location.

Students must be enrolled in 1651 Bachelor of Arts (Pathway to Teaching Primary), 1781 Master of Teaching (Primary), 1822 Bachelor of Arts (Pathway to Teaching Primary) Dean's Scholars, 3756 Bachelor of Science (Pathway to Teaching Primary/Secondary) or 6019 Diploma in Arts/ Bachelor of Arts (Pathway to Teaching Primary).

Students enrolled in 1651, 1822 or 3756 must have successfully completed 160 credit points to enrol in this subject.

Students enrolled in 6019 must have completed 190 credit points (160 at Level 1 or higher) to enrol in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply knowledge of the disciplines, theories and pedagogies that underpin the learning area of Human Society and its Environment (HSIE) to learning design.
2. Implement the aim, outcomes, stage statements, subject matter, skills, attitudes and values, perspectives and experiences defined in the NSW HSIE K-6 syllabus, and History, and Geography syllabus documents in designing learning experiences for diverse learners in primary classrooms.
3. Design an inquiry and outcome-based unit of work, and whole-school plan that develops a connected set of deep HSIE understandings, and concepts and dispositions of citizenship, and employs pedagogies that promote the development of skills in acquiring information, using inquiry processes and social and civic participation.
4. Design assessment tasks that assess the learning achievements and needs of diverse learners in primary classrooms.
5. Present a personal exploration of HSIE content, and the deep understandings about people, times, places and events related to the Syllabus strands of change and continuity, environments, social systems and structures and cultures.
6. Demonstrate competencies in, teaching with a variety of appropriate resources, including TPACK theory and by integration of information and communication technologies, field visits and site studies.
7. Explain the role and value of HSIE in the broader school curriculum and the relationships with literacy and numeracy.
8. Appreciate the role of an ecological approach to school organisation, events and programs in enhancing HSIE and civics and citizenship.

Subject Content

1. The discipline, epistemological and pedagogical theories that underpin HSIE in terms of History and Geography.
2. The content of HSIE and its expression through the rationale, place of the subject in K-10 syllabus documents, aims, objectives, outcomes, stage statements and organisation of content, including assessment.
3. History including integration of technology and assessment strategies.
4. Geography including integration of technology and assessment strategies.
5. Inquiry Learning approaches and their relationship with methods and processes in History and Geography.
6. Using project-based learning for HSIE in the primary classroom.
7. Civics and Citizenship including digital citizenship.
8. Cross curriculum priority areas including integration of technology and working with local communities.
9. Engaging with, learning from and critiquing innovative practitioners from the field in HSIE classrooms.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Portfolio	800 words & a 3-minute presentation	50	N	Individual
Professional Task	2,000 words	50	N	Individual

TEAC 7093 Primary Mathematics and Numeracy 1

Credit Points 10

Legacy Code 101580

Coordinator Kate Mulkern (https://directory.westernsydney.edu.au/search/name/Kate Mulkern/)

Description The subject will develop students' understandings of children's construction of mathematical and numeracy concepts during the years from Kindergarten to Year 2. The subject will model explicit numeracy instruction and scaffolding of numerical, spatial, graphical, statistical, and algebraic domains. Students will develop their ability to assess young children's mathematical understandings and numeracy development. The subject will explore how to create learning experiences for diverse learners, incorporating investigations and digital technologies to enhance the growth of children's mathematical thinking. Students will interrogate the NSW Mathematics K-10 Syllabus, with a focus on Kindergarten to Year 2, and with a particular emphasis on the Working Mathematically strand. This subject is included in the Development Phase of the Master of Teaching program.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1781 Master of Teaching (Primary)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Understand ways the beliefs, attitudes, and values held by themselves and their students affect their mathematical learning and teaching.
2. Apply knowledge and understanding of the development of those concepts, skills and processes of mathematics related to the teaching of number and algebra, measurement and space, statistics and probability for Kindergarten to Year 2 in accordance with relevant syllabus and curriculum documents.
3. Apply knowledge and understanding of a range of pedagogies that demonstrate explicit teaching, modelling and scaffolding practices for teaching and learning mathematics, including problem solving and investigation-based approaches.
4. Explain the importance of Working Mathematically for primary school mathematics learners and teachers.
5. Identify appropriate assessment strategies to inform the planning of teaching/learning activities that cater for the diverse needs of individual students with an emphasis on evidence-based programs.
6. Apply understandings of the role of mathematics within the broader school curriculum, including the relationship between mathematics, numeracy and literacy.

Subject Content

- The development and construction of mathematical ideas during the early years of schooling;
- Recognition of early mathematical thinking that children can bring to school;
- Early understanding of whole number relationships;
- Numerical thinking strategies;
- Early spatial thinking;
- The development of measurement concepts;
- Use of problem solving and investigation as an effective pedagogy in the mathematics classroom;
- Programming and planning for mathematics in the early years based on the relevant NSW K-10 Syllabus;
- Assessment strategies for the mathematics classroom;
- Pedagogies that address diversity within the mathematic classroom;
- Integration of mathematics with other Key Learning Areas;
- Using programs such as Count Me In Too, TENS, and the ACARA Numeracy Progressions for numeracy teaching and learning; and

- Children's literature, concrete manipulatives, and digital tools for teaching mathematics and numeracy

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 7094 Primary Mathematics and Numeracy 2

Credit Points 10

Legacy Code 101584

Coordinator Dorian Stoilescu (https://directory.westernsydney.edu.au/search/name/Dorian Stoilescu/)

Description This subject builds on the subject Primary Mathematics and Numeracy 1 with a focus on learners from Year 3 to Year 6, and assumes students have gained familiarity with the knowledge, skills and understandings children required across all strands of the NSW Mathematics K-10 Syllabus, with a focus on Year 3 to Year 6, including the Working Mathematically components. The subject will model explicit numeracy instruction and scaffolding of numerical, spatial, graphical, statistical, and algebraic domains. In this subject, students develop their understanding of primary mathematics in the mid to upper primary years, with a strong emphasis on aspects of teaching such as student engagement, assessment, differentiation for diversity and the integration of technology. By engaging with this subject, students will have the opportunity to experience, plan and assess a broad range of practices to enhance learning outcomes and improve engagement with mathematics. This subject is included in the Transition Phase of the Master of Teaching program.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in one of the following programs 1781 Master of Teaching (Primary) or 1783 Master of Teaching (Birth - 5 Years/Birth - 12 Years)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate knowledge and understanding of the development of the concepts, skills and processes of mathematics related to the teaching of number and algebra, measurement and space, and statistics and probability for Year 3 to Year 6 using relevant syllabus and curriculum documents.
2. Implementation of the relevant NSW K-10 Mathematics syllabus across all strands, with particular focus on the Working Mathematically strand.
3. Plan effective and engaging teaching and learning experiences for mid to upper primary learners that include the use of a range of digital resources to enhance student outcomes.
4. Apply knowledge and understanding of a range of engaging pedagogies for teaching and learning mathematics, including cooperative learning, problem solving and investigation-based approaches.
5. Evaluate student learning against curriculum requirements by interpreting student work samples, practising consistent and comparable judgements, and explain the importance of timely and appropriate feedback for student learning.
6. Demonstrate knowledge and understanding of teaching and assessment strategies for differentiating teaching and learning experiences in mathematics to meet the specific needs of students across the full range of abilities.

Subject Content

1. Theories of engagement, numeracy development and learning in mathematics for students in the primary years.
2. Implementation of the NSW K-10 Mathematics syllabus across all strands, with particular focus on the Working Mathematically strand.
3. Incorporation of problem solving and investigation-based pedagogies in primary mathematics and numeracy.

4. Strategies to address affective issues relating to the teaching and learning of primary mathematics.
5. Effective use of digital technologies to enhance the teaching and learning of mathematics and improve student engagement.
6. Catering to learners from diverse backgrounds (e.g. cultural and linguistic).
7. Differentiation to address a range of abilities (including special needs and gifted and talented).
8. Investigation of rich tasks to promote critical numeracy.
9. Effective assessment of mathematics and numeracy.
10. Investigation of the requirements of the ACARA Numeracy Progressions.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 7099 Primary Science & Technology

Credit Points 10

Legacy Code 101583

Coordinator Lesley Gough (https://directory.westernsydney.edu.au/search/name/Lesley Gough/)

Description This subject will focus on developing scientific and technological pedagogical content knowledge appropriate for teaching science and technology for students in the K-6 years. It models appropriate pedagogical and pedagogical content knowledge. Students use collaborative social learning situations to develop content knowledge, along with interpersonal and communication skills. The pedagogies modelled will be inclusive and demonstrate how scientific and technological learning experiences can be developed to cater for the needs of the diverse groups of student learners in primary schools. Students learn about engaging science and technology activities that empower primary school students and create futures for students where the capacity to engage with and critically evaluate scientific and technological activity will become increasingly necessary. Students focus on themselves as learners and reflect on the implications of their learning and the learning of others in their future professional practice. This subject is included in the Development Phase of the Master of Teaching program.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in the 1691 Master of Teaching (Birth-12 Years), 1781 Master of Teaching (Primary), or 1783 Master of Teaching (Birth - 5 Years/Birth - 12 Years).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain central concepts in science and technology and understandings of the processes of investigating, designing and making and using technology.
2. Demonstrate research-based knowledge of the pedagogies appropriate for science and technology education in primary schools.
3. Apply appropriate strategies to create a positive environment supporting student effort and learning and to engage students as well as address student needs when implementing learning experiences in science and technology.
4. Implement learning experiences that demonstrate an in-depth knowledge of the NSW Syllabus for the Australian Curriculum: Science K-10 (incorporating Science and Technology K-6), including Aboriginal and Torres Strait Islander perspectives, and a range of pedagogies appropriate for science and technology education in primary schools
5. Demonstrate proficiency and the capacity to use a variety of ICTs (including IWBfs, digital cameras/microscopes etc. and a variety of software) in the context of science and technology education.

6. Identify and articulate clear learning goals in preparing learning experiences for science and technology education that are appropriate for the cognitive, social and language abilities of students in primary schools.
7. Plan and implement coherent lessons and lesson sequences that are designed to engage students and improve learning outcomes in science and technology.
8. Utilise knowledge of a range of resources appropriate to science and technology education.
9. Reflect on the process of production involving the designing and making of an artefact for a Primary science and technology classroom, and consider how this process has influenced their attitudes towards teaching science and technology.

Subject Content

1. The nature of science and technology as 'disciplines and the strategies of investigating, designing and making and using technology'
2. The nature of the NSW Science and Technology K-6 syllabus, its outcomes for Skills: (Working Scientifically, Design and Production), Knowledge and Understanding Strands (Digital Technologies, Physical World, Earth and Space, Living World, Material World).
3. Affective issues in science and technology education – gender, culture, attitudes, beliefs etc.; responding to student perceptions and attitudes towards Science and Technology.
4. Problem solving, investigating, designing and making in science and technology.
5. Understandings of concepts and concept development and strategies for developing sound conceptual understandings and skills.
6. The structure, aims and objectives, outcomes and content of the NSW Science and Technology K-6 syllabus.
7. Preparing teaching and learning experiences and programming for effective science and technology education.
8. The role of ICTs in science and technology education.
9. Integrating science and technology in other curriculum areas and for integrating other curriculum areas into science and technology.
10. Practical experiences associated with a number of content strands in science and technology including Digital Technologies.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 7101 Professional Experience (Additional Needs)

Credit Points 10

Legacy Code 102153

Coordinator William Nketsia (https://directory.westernsydney.edu.au/search/name/William Nketsia/)

Description This subject provides students with an opportunity to apply the knowledge and skills about teaching students with additional needs to a real-life classroom. In turn, this authentic learning experience enriches their future professional growth and capacity to support individuals with additional needs. Students complete a practicum and, where appropriate, a series of field visits and observations, within an educational setting, that supports individuals with additional needs. The placement will be completed in the student's area of specialisation in an early childhood, primary, secondary or other relevant setting. Students are able to demonstrate a range of skills in planning, implementing and evaluating educational programs for students with additional needs that optimise learning outcomes and inclusion.

School Education

Discipline Teacher Education: Special Education

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 1090 - Professional Practice in Context

Restrictions

Students must be enrolled in 1720 Master of Inclusive Education and have successfully completed 40 credit points.

Assumed Knowledge

Must be a qualified teacher.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. work in a special education or inclusive setting working with students with additional needs;
2. administer systems for assessments across the curriculum and programming areas to determine current levels of performance;
3. interpret assessment data, and plan an individualised education program for young children and/or school students with additional needs;
4. plan a series of learning experiences to cater for the individual needs of young children and/or school students;
5. implement a series of lessons, demonstrating a developing range of effective teaching strategies;
6. implement positive approaches to managing challenging behaviours;
7. participate in collaborative planning to meet the needs of young children and/or school students with families/carers and other service providers;
8. evaluate child/student outcomes and demonstrate skills in making decisions about the effectiveness of instruction and progress;
9. reflect on own teaching and knowledge to enhance skills.

Subject Content

- An extended placement in an education setting, plus an extensive range of observations and field visits;
- Collaborative participation in collaborative planning;
- Developing an individual learning plan in collaboration with families/carers, service providers and child;
- Skills and knowledge used in assessments;
- Instructional strategies for assisting young children or school students to meet learning outcomes;
- Knowledge of the teaching and learning cycle in a range of Key Learning Areas and/or programming areas;
- Communication strategies used during placement teaching sessions including alternative and augmented communication;
- learning organisation and management of learning environments that maximise learning time for all students.

Special Requirements

Legislative pre-requisites

1. Students are required to complete a Working with Children Check leading to the issuance of a clearance number.

Students will need to:
i. Access the NSW Office of the Children's Guardian website and complete an online application form to generate an application number.

ii. Present an application number and identification to a NSW Motor Registry or Government Access Centre prior to issuance by mail of a Working with Children Check number.
iii. Email the letter with a valid Working With Children Check number to enrolments@westernsydney.edu.au.

Where students already have a current Working with Children Check evidence of this must be submitted as above.

2. Students must also attend Child Protection Awareness Training prior to undertaking any visits/placements. Students who have not completed Child Protection training will need to withdraw from the subject. Students who have current Child Protection Certification must also present this when presenting their Working with Children Check.

3. Students must complete the ASCIA anaphylaxis e-training and email their certificate to AnaphylaxisSec@westernsydney.edu.au

4. Students must meet the Inherent Requirements for the Master of Inclusive Education (p. 1063).

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

TEAC 7103 Professional Experience 3 - 5 Years

Credit Points 10

Legacy Code 102110

Coordinator Denise Fraser (https://directory.westernsydney.edu.au/search/name/Denise Fraser/)

Description This subject incorporates theoretical aspects of teaching with a compulsory 30 day placement with children aged 3-5 years, to provide students with opportunities to reflect on their teaching skills and build capacity as emerging educational leaders. In this capstone early childhood professional experience, students build their professional capacity to take the day to day responsibility for the learning, development, health and wellbeing of a group of children, in collaboration with supervising staff. Students will work collegially with staff and families to design, implement and evaluate an inclusive curriculum that engages children with investigative and critical thinking that connects to children's social worlds. The subject requires students to apply the principles, practices and outcomes of Belonging, Being and Becoming: The Early Years' Learning Framework for Australia together with understanding of curriculum content (in the areas of Language, Literacy and Communication, Mathematics, Science and Technology, Creative Arts, Human Society and Physical Development, Health and Wellbeing). Students will complete an early childhood focused Teaching Performance Assessment in this subject. This subject is included in the Transition Phase of the Master of Teaching program.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) TEAC 7104

Co-requisite(s) TEAC 7087

Equivalent Subjects TEAC 7035 - Early Childhood Professional Experience 2 TEAC 2051 - Professional Portfolio

Restrictions

Students must be enrolled in 1783 Master of Teaching (Birth-5 Years/Birth-12 Years) or 1784 Master of Teaching (Birth – 5 Years).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Engage in ethical and reflective practice for professional learning.
2. Assess children's play, development, learning, dispositions, relationships and backgrounds to plan practice.
3. Apply knowledge and understanding of research about children's development and learning to inform practice.
4. Evaluate interest-based experiences and projects that extend on children's strengths and interests, support children's learning needs, foster relationships and support partnerships with children's families.
5. Apply curriculum approaches and pedagogies that are contextually responsive and promote children's investigation, problem-solving, critical thinking and the development of deep knowledge.
6. Apply the principles, practices and learning outcomes of The Early Years Learning Framework in the areas of science and technology, mathematics, human society, physical education health and wellbeing, creative arts and literacy to engage in interactions with children that extend their learning.
7. Design resources that encourage children to use a range of media and technologies to investigate their ideas and values and represent their thinking.
8. Demonstrate pedagogical leadership by collaboratively planning, implementing and evaluating a total learning environment that is inclusive and engaging for diverse learners, including learners from Aboriginal and Torres Strait Islander backgrounds which includes

a range of grouping strategies, promotes positive interactions, extends learning and strengthens relationships.

9. Demonstrate the oral and written literacies expected of a graduate teacher.

Subject Content

- **Module 1 Pedagogical leadership**
  - Understanding professional, ethical and legal responsibilities: – WHS, Child protection, code of conduct, ethical practice
  - Professional development and learning: – professional goals, seeking and acting on feedback
  - Reflection and reflective practice
- **Module 2 Curriculum approaches**
  - The Early Years Learning Framework & the Australian Curriculum
  - Linking theory to philosophy and practice: learning theory, developmental theory, brain development Culturally responsive curriculum - Connecting to children's funds of knowledge that demonstrate respect for diversity, inclusivity and Aboriginal and Torres Strait Islander perspectives
  - Exploration of approaches including Child centred, emergent curriculum, integrated curriculum, Reggio Emilia
- **Module 3 The Learning Environment**
  - Planning, implementing and evaluating the learning environment to support safety, wellbeing and positive behaviours
  - Setting high expectations, consistency, routines, reinforcement and feedback
  - Incorporating appropriate resources and provocations, including ICT
- **Module 4 Content and pedagogy**
  - Pedagogies for learning: - play, projects, learning centres,
  - The planning cycle,
  - Assessment processes & practices– formative, summative,
  - Documentation of children's learning: - Individual, small groups and projects
  - Use of the Early Years Learning Framework principles, practices and learning outcomes to document, assess and plan for learning in the key concept areas eg literacy, mathematics, science and technology:
  - Sequences of learning
  - Challenging but achievable learning intentions
  - Teaching strategies and techniques that facilitate children's investigation, problem-solving and critical thinking eg modelling, questioning, co-constructing, deconstructing, hypothesising, explicit teaching

Special Requirements

Legislative pre-requisites

1. Students are required to complete the Working with Children Check (WWCC) process leading to the issuance of a clearance number under the category of volunteer.

a) Students will need to:
i. Access the Commission for Children and Young People website and complete an online application form to generate an application number.
ii. Present an application number and identification to a Service NSW office who will issue a Working with Children Check number via mail or email.
iii. Submit the letter with a valid Working With Children Check number via WesternNow Student Portal. The document is recorded as a Special Requirement on your academic record. WesternNow Student Portal link: https://wsu.service-now.com/student?id=sc_cat_item&sys_id=9c8b61a2dbbed8504f58e434059619ed (https://wsu.service-now.com/student/?id=sc_cat_item&sys_id=9c8b61a2dbbed8504f58e434059619ed)

2. Students must complete the TWO components of the NSW Department of Education's Child Protection Awareness Training (CPAT)

a) Students will need to:
i. Access the NSW Department of Education's MyPL website https://mypl.education.nsw.gov.au/
ii. Complete the online Child Protection Awareness Training: Induction
iii. Save certificate of completion iv. Submit certificate via WesternNow Student Portal

b) Students will need to:
i. Access the NSW Department of Education's MyPL website https://mypl.education.nsw.gov.au/
ii. Complete the Child Protection Awareness Training (CPAT): Annual Update for the calendar year
iii. Save certificate of completion
iv. Submit certificate via WesternNow Student Portal Both certificates will be recorded on your student record as Special Requirements with the end date for the Annual CPAT recorded. The CPAT: Annual Update will need to be renewed and submitted on an annual basis.

Students who have not completed both components of the Child Protection Awareness Training will need to withdraw from the subject.

3. Students must complete the ASCIA anaphylaxis e-training and submit their certificate to Submit certificate via WesternNow Student Portal.

4. Students must meet the Inherent Requirements for the Master of Teaching (Birth – 5 Years / Birth -12 Years).

TEAC 7104 Professional Experience Birth - 2 Years

Credit Points 10

Legacy Code 102109

Coordinator Sally Arthur (https://directory.westernsydney.edu.au/search/name/Sally Arthur/)

Description In this subject student engage with theory and practice to develop an understanding of quality environments for children Birth – 2 years in early childhood education and care settings. This subject incorporates a 25 day supervised placement with a strong focus on supporting children's health and wellbeing through the building of relationships with children, staff, and children's families in care settings. Students will apply their knowledge of work health and safety and the Australian Children's Education and Care Quality Authority's National Quality Standards as they develop and demonstrate responsive caregiving and educational practices. Students will apply knowledge of young children's learning and development and develop their skills in observation and assessment, planning, implementing and reflecting on engaging experiences that respond to children's family and community experiences and funds of knowledge. During the placement students will spend a minimum of 10 days working with children under 2 years. Students will present evidence of their developing capacity as teachers during an EXPO at the conclusion of placement. This subject is included in the Development Phase of the Master of Teaching program.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) TEAC 7147

Equivalent Subjects TEAC 7034 - Early Childhood Professional Experience 1

Restrictions

Students must be enrolled in 1783 Master of Teaching (Birth-5 Years/ Birth-12 Years) or 1784 Master of Teaching (Birth – 5 Years)

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Demonstrate professional and ethical practice, including appropriate oral and written communication.
2. Evaluate professional goals that draw on graduate teacher standards, the early childhood placement and local community context and feedback from university and setting staff.
3. Provide culturally responsive curriculum and continuity of care for children, reflecting respect for the role of families and communities in children's learning and the diversity of child rearing practices, expectations and values families hold for their children.
4. Document and assess children's play, development, learning, relationships and dispositions in ways that identify children's capabilities and emerging understandings and build connections between children, families and educators.
5. Evaluate play-based experiences and learning centres that extend children's capabilities, interests and funds of knowledge, encourage exploration and creativity and promote social interactions and language.
6. Demonstrate understandings of the principles, practices and learning outcomes of the Early Years Learning Framework and diverse languages, cultures and abilities in documentation and assessment of children's learning and in curriculum planning and interactions.
7. Interact with children in ways that support children's sense of identity and wellbeing, builds relationships, guides behaviour and extends their learning.
8. Create environments and practices that promote children's health, safety and wellbeing and reflect legal requirements and current recommendations in the areas of health and safety.

Subject Content

1. 1. Professional and ethical practice
    a. Australian Professional Standards for Graduate Teachers
    b. The National Quality Standard for Early Childhood Education and Care and School Age Care
    c. Legislation and recommendations for children's health, safety and wellbeing including healthy eating and physical activity
    d. Work health and safety
    e. Establishing and evaluating goals
    f. Professional portfolios
    g. Effective communication skills
    h. Partnerships with families
2. Documentation and assessment of children's learning
    a. Documenting individual children's family and community experiences and funds of knowledge
    b. Documenting and analysing individual children's play, learning, dispositions and relationships.
3. 3. Designing learning experiences & environments
    a. Using the principles, practices and learning outcomes of the Early Years Learning Framework and understandings of health, wellbeing and safety to design, implement and evaluate learning experiences and learning centres
    b. Pedagogies that build relationships, guide behaviour and extend children's learning – e.g. scaffolding, co-construction, reinforcement.
    c. Creating safe learning environments- choice of resources, positioning of experiences and people, supervision

4. Meaningful curriculum
    a. Culturally responsive curriculum - Connecting to children's family and community experiences and funds of knowledge that demonstrates respect for diversity, inclusivity and Aboriginal and Torres Strait Islander perspectives
    b. Dispositions – e.g. curiosity, cooperation, creativity
    c. Learning processes – e.g. exploration, investigation, reinforcement, ZPD- the move from scaffolded to independent practice.
    d. The place of explicit instruction – e.g. hand washing
    e. Play-based curriculum and pedagogies.

TEAC 7106 Professional Experience K - 6

Credit Points 10

Legacy Code 102111

Coordinator Jaydene Barnes (https://directory.westernsydney.edu.au/search/name/Jaydene Barnes/)

Description Students will design and teach lessons and units of work in ways that enhance student engagement and learning outcomes making relevant links with NSW Education Standards Authority syllabus documents. This professional experience subject supports students

to meet the Australian Professional Standards for Teachers at the graduate level by focusing on developing professional knowledge, effective pedagogical practices, responsive teaching, classroom management and engagement in the primary school context. The subject also gives students opportunities to reflect on their own teaching and learning, and to achieve professional goals. This subject is included in the Transition Phase of the Master of Teaching program.

School Education

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) TEAC 7103

Equivalent Subjects TEAC 7096 - Primary Professional Experience

Restrictions

Students must be enrolled in 1783 Master of Teaching (Birth-5 Years/ Birth-12 Years).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Appraise the learning strengths, capabilities and challenges of all learners within the context of their learning environment and local community.
2. Design sequential lessons and units of work that apply knowledge of curriculum content and evidence-based pedagogies, utilising a range of resources that link meaningfully with NSW Education Standards Authorities syllabus documents and the Australian Curriculum.
3. Apply assessment moderation principles to monitor students' progress towards meeting learning outcomes, establish clear, achievable goals for future learning that provide achievable challenges for children of different abilities, and share feedback and goals with students and their families.
4. Implement appropriate, evidence-based pedagogies including a range of grouping strategies, questioning techniques, and prosocial guidance strategies designed to support student learning and promote student engagement and positive behaviours.
5. Evaluate lessons, using reflection and assessment data and to inform future curriculum planning and practice.
6. Critically reflect on own learning, feedback from mentor teacher and university-based supervising teachers, and the National Professional Standards framework to develop and enact professional goals that broaden professional knowledge and practice.
7. Apply techniques that effectively support positive behaviour in classroom contexts, including the use of calm, consistent and proportional responses and feedback.

Subject Content

- Understanding the organisation and expectations of the professional experience subject.
- Understanding the role of theories in decision making within the primary school contexts, including the continuity of theory and practice from early childhood to primary schools.
- Applying content from current mandated curriculum documents in planning lessons and units of work in the primary school context.
- Planning, teaching, managing and assessing for learning across all curriculum areas.
- Processes of assessment moderation, negotiated and differentiated curriculum.
- Analysing student work samples and assessment data to develop clear learning goals and related pedagogies.
- Selecting appropriate pedagogies, strategies and resources for teaching and learning, for example, digital, paper-based and concrete materials.
- Collaborative practice - working effectively with the team around the child, colleagues and families.
- Reflective practice - observing, analysing, reflecting on and evaluating own personal professional practice.
- Professional and ethical conduct and practice.
- Australian Professional Standards for Graduate Teachers.

Special Requirements

Legislative pre-requisites

1. Students are required to complete the **two** components of the Working with Children Check (WWCC) process leading to (a) the issuance of a clearance number under the category of volunteer and (b) verification of the clearance number with the NSW Department of Education.

a) Students will need to:
i. Access the Commission for Children and Young People website and complete an online application form to generate an application number.

ii. Present an application number and identification to a Service NSW office who will issue a Working with Children Check number via mail or email.
iii. Submit the letter with a valid Working With Children Check number via WesternNow Student Portal. The document is trimmed and recorded as a Special Requirement on your academic record.

TEAC 7108 Professional Practice Community Engagement

Credit Points 10

Legacy Code 102605

Coordinator Christina Curry (https://directory.westernsydney.edu.au/search/name/Christina Curry/)

Description Professional Practice Community Engagement is a Professional Experience subject of the Master of Teaching (Secondary), incorporating a five-day or 30 hours academic service learning placement and is designed to develop sustainable practical knowledge and skills that supplement those developed in the other Professional Experience subjects. This subject will expand Teacher Education students' understandings of the contemporary issues confronting the wider education community. As such, a diverse range of educational settings including secondary school contexts are utilised to provide a deeper perspective for future secondary teachers beyond curriculum matters, and to facilitate engagement with holistic schooling practices. Teacher Education students choose from the available educational contexts to suit their needs, interests, expertise and communities. This subject is included in the Foundation Phase of the Master of Teaching program.

Equivalent Subjects EDUC 7002 - Professional Experience 3 TEAC 7139 - Secondary Professional Practice 3

Restrictions

Students must be enrolled in program 1714, 1848, 1652, 1823, 2804, 1843, 4791, 6013 or 6021.

Students enrolled in 1652, 1823 ,2804, 1843 or 4791 must have achieved 160 credit points to enrol in this subject.

Students enrolled in 6021 must have achieved 190 credit points (160 at Level 1 or higher) to enrol in this subject.

Students enrolled in 6013 must have achieved 180 credit points (150 at Level 1 or higher) to enrol in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Engage in critical and sustained reflection on their practice throughout the Professional Practice.
2. Integrate knowledge, understandings and skills relevant to teaching and learning in traditional and non-traditional educational settings.
3. Apply the requirements and responsibilities of all teachers / educators to the specific context of this Professional Practice.
4. Integrate personal learning experiences into the situation in which they will teach to promote student learning.

5. Demonstrate good communication skills and the ability to work effectively and contribute as part of a team of educators.
6. Display initiative and take responsibility for formulating a personal professional development plan.
7. Critically evaluate personal professional development and articulate this development through a written reflective response.

Subject Content

1. How diverse are educational settings? What are the implications of my setting for my future as a secondary school teacher?
2. What is outcomes-based education? Why is an outcomes-based approach relevant in any educational setting?
3. What role does critical reflection play in the professional development of teachers? How can I apply critical reflection to learn through my interactions with my setting?
4. What evaluation strategies can I use in my setting? How will these strategies help me to appraise the effectiveness of teaching and learning in my setting?
5. How do I prepare for a 30 hour professional practice in an educational learning context?

Special Requirements

TEAC 7111 Professional Project

Credit Points 10

Legacy Code 102163

Coordinator Christine Johnston (https://directory.westernsydney.edu.au/search/name/Christine Johnston/)

Description Professional project enables students to engage in an intensive study of an aspect of work related learning in order to develop, implement or improve some aspect of current professional or personal practice. It provides opportunities for students to use research skills and related theory directly as they implement a practice-based research-informed project within their own areas of specialisation. Students will be required to consult, present 'work in progress' and prepare a final report for a suitable audience.

TEAC 7112 Prosocial Learning Environments

Credit Points 10

Legacy Code 101105

Coordinator Yvette Barton (https://directory.westernsydney.edu.au/search/name/Yvette Barton/)

Description Educators have a key responsibility in guiding children's development of self-discipline, moral autonomy, sense of social belonging, and wellbeing, whilst acknowledging the plurality of family and community values and expectations surrounding children's socio-emotional development and conduct. Students will build an in-depth knowledge of a range of theories and practical approaches to proactively guide children's learning of positive behaviours and minimise and manage instances of challenging behaviours. The subject focuses on the design of safe, structured, and positive learning environments that promote a positive socio-emotional climate utilising whole early childhood and primary school policies and frameworks. The subject assists students to critically evaluate the implementation of various guidance approaches and reflect on their personal and professional dispositions regarding behaviour and guidance in early

childhood and primary school settings. This subject is included in the Development Phase of the Master of Teaching program.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled 1783 Master of Teaching (Birth-5 Years/Birth-12 Years) or 1784 Master of Teaching (Birth-5 Years).

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Explain the factors that influence prosocial behaviour in the context of children's development of self-regulation, moral autonomy and sense of social belonging and wellbeing.
2. Justify the importance of working in partnerships with families and colleagues to support children's positive behaviour in early childhood and primary school settings.
3. Incorporate diverse socio-cultural perspectives when designing contextually, linguistically and culturally appropriate approaches to guide children's prosocial learning in educational settings.
4. Critically analyse theories, approaches, models and practices for learning prosocial behaviours.
5. Identify methods to plan and monitor children's behaviour in collaboration with families and colleagues.
6. Design safe, equitable and stable learning environments that promote relationships with others, connectedness and belonging, play and interactions to enhance positive childhood experiences.
7. Critique the efficacy of pedagogical approaches to identify strategies that promote secure, respectful and reciprocal relationships and children's prosocial behaviour.
8. Analyse the role of behaviour guidance policies, frameworks, and documents that seek to strengthen teachers' practices and educational settings' responses to children's engagement in learning and wellbeing.
9. Critically reflect on personal assumptions about children's behaviours to develop a cohesive and ethically sound professional approach to guiding children's positive behaviours.

Subject Content

- **Developmental** factors associated with the neurodiversity and behaviour, positive and challenging behaviours of children, e.g. social cognition; social skills and social competence; temperament; moral development; autonomy; self-concept; self-discipline and self-regulation
- **Working collaboratively** with families and colleagues to gather information and communicate interventions that support children's positive behaviour, relationships, interactions, and ways of belonging, being and becoming; providing feedback
- **Socio-Cultural perspectives** – the influence of communities, adverse and positive childhood experiences, and families on children's learning, behaviour and development; diversity in children's family and community contexts, attitudes and values, learning and behavioural styles and the need for contextually, linguistically and culturally appropriate guidance and individualised approaches, including for children with developmental and learning disabilities
- **Theoretical models** of managing children's difficult behaviours, e.g. control (Dobson, Canter, Jones); management (Rogers, Dreikurs, Glasser); influence (Gordon); analysis of related assumptions, approaches and strategies; implications for teacher practices.
- **Assessment and Planning** - Observations, gathering contextual information and documentation to inform planning, implementation and monitoring of child behaviour and social interactions.
- **Designing environments** that promote a positive physical and socio-emotional climate in early childhood and school setting including outdoor areas and playgrounds; the role of safe, equitable and stable environments, relationships with others, connectedness and belonging, play and interactions for emotional growth with others to create opportunities for positive childhood experiences and help children grow into healthy, resilient adults.
- **Pro-active and responsive pedagogical approaches** that set high expectations and guide children positively, including promoting children's engagement, setting rules, routines, expectations, providing quality teaching, building relationships and friendships, setting clear and achievable learning goals and their efficacy for promoting positive adult-child relationships, children's self-concept, and self-esteem; responsible decision-making; conflict resolution; problem-solving, emotional regulation.
- **Constructive guidance and behaviour management policies and frameworks** aligned with Early Years Learning Framework for Australia, Australian Curriculum, NESA and Department of Education policies, multi-tiered and whole school guidance approaches with consideration of individual, group, educational and community responses; strengths and barriers to participation, engagement in learning and well-being.
- **Acting professionally** making decisions that are ethically sound, philosophically aligned and cohesive; preparedness to justify approaches and practices to guiding children's positive behaviours; ongoing critical reflection of one's own personal and individual assumptions relating to children's behaviours.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 7114 Research and Professional Practice

Credit Points 10

Legacy Code 102100

Coordinator Beatriz Cardona (https://directory.westernsydney.edu.au/search/name/Beatriz Cardona/)

Description From 2020 students should note that core subjects are now taught in semesters rather than half yearly sessions. This subject aims to develop students' capacity to reflect on and develop their teaching practice and professional identity as practitioner researchers. Vital to this process is the capacity to use research to interpret current educational contexts and the implications for their role as teachers. Students will explore research processes including data collection, analysis techniques and the processes that experienced researchers take in order to ensure their research is valid, reliable, ethical, useful and socially responsible. Contemporary theories as well as social, cultural, economic and political structures important to the role and work of teachers will also be critically reviewed. In this subject students will challenge established, historical conceptualisations of 'teacher' to develop their own understanding of this role in contemporary, early childhood and primary education contexts.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1691 Master of Teaching (Birth-5 Years/Birth-12 Years) or 1783 Master of Teaching (Birth-5 Years/Birth-12 Years)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Engage critically with contemporary literature about research and education research debates.
2. Discuss the research process and the role of each step of the process for quality research.
3. Analyse the key factors (including historical perspectives) influencing the practice and identities of teachers in contemporary multicultural and Aboriginal and Torres Strait Islander educational contexts.
4. Articulate key arguments about educational discourse and their implications for education birth ? 12 years.
5. Advocate for the early childhood sector and make informed comment on the educational landscape.
6. Communicate the importance of the research process for professional identity and practice.

Subject Content

The value of engaging with educational research.
The strategies for locating and critically evaluating peer reviewed educational research.
The social, cultural, economic and political structures important to the role and identity of teachers.
Research processes: research design, data analysis and ethical issues.

Research on the key factors (including historical perspectives) of contemporary teaching and learning.
Accountability requirements and their impact on professional practice and identities.
Engaging with research literature as a way to continually refine one's understanding of the role and work of teachers.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

TEAC 7115 Researching Practice

Credit Points 10

Legacy Code 101656

Coordinator Christine Johnston (https://directory.westernsydney.edu.au/search/name/Christine Johnston/)

Description This subject enables students to engage in research practice in their area of professional interest or specialisation. Students will develop deep insight into the application of research in practice contexts and diverse research methodologies appropriate to

practitioner research. They will develop skills in analysing, critiquing, and synthesising the literature in a relevant research area. Evaluation of research literature will be the basis for planning a self-directed professional project that employs identifiable research methods and tools to address a question of personal and/ or professional relevance.

School Education

Discipline Teacher Education

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Must be enrolled in 1714 Master of Teaching (Secondary); 1726 Master of Education (Leadership), 1720 Master of Inclusive Education, 1723 Master of Education (Social Ecology), 1847 Master of Education (STEM), 1888 Master of Education (Leadership and Management), 1911 Master of Education or 1912 Graduate Certificate in Professional Practice.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify areas of inquiry in a personal or professional context;
2. Analyse issues of research process, design and implication;
3. Critique theories underpinning methodologies in practitioner-oriented research;
4. Apply qualitative, quantitative and/ or mixed-method approaches to practice-based research;
5. Demonstrate skills and knowledge involved in conducting academic inquiry;
6. Evaluate research literature and determine its relevance;
7. Critically reflect on own practice/experience and relationship to evidence from the field

Subject Content

1. Explore a range of mixed-methods approaches to practitioner-oriented research methodologies and methods;
2. Articulate a researchable thematic concern, problem or area of investigation relevant to the student?fs life/work;
3. Scope a working interpretation of the identified area of professional practice and use it as a framework for designing and conducting research;
4. Conduct a comprehensive and focussed literature search and write a critical review, analysing and synthesising literature relevant to the research;
5. Prepare a preliminary research plan that includes a consideration of ethical research practices.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 7116 Researching STEM Education for Future Leadership

Credit Points 10

Legacy Code 102512

Coordinator Kathryn Holmes (https://directory.westernsydney.edu.au/search/name/Kathryn Holmes/)

Description This subject seeks to redefine and inform practice about what it means to be a contemporary STEM teacher by engaging with literature on a specific research topic in STEM education and designing and implementing a research project in a team on that area of STEM education. The focus is also on the role of teacher/practitioner-research as central to professional learning in contemporary education. The central role of practitioner research in the practice of future STEM educational leaders is emphasised. Students will also be required to complete evidence-gathering in an e-portfolio to demonstrate they meet the Australian Professional Standards for Teachers. This subject is included in the Transition Phase of the Master of Teaching program.

School Education

Discipline Teacher Education, Not Elsewhere Classified.

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) TEAC 7121

Restrictions

Must be enrolled in the 1714 M Teaching (Secondary); or 1848 Master of Teaching (Secondary) STEM. These students are required to have completed 80 Credit Points from within the Master of Teaching. OR Students must be enrolled in 1882 Graduate Certificate in Secondary STEM Education, or 1887 Graduate Certificate in Primary STEM Education.

Assumed Knowledge

Students will require a knowledge of STEM education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the role of relevant and appropriate professional learning in STEM education and the role of research in that professional learning.
2. Investigate the roles of future leaders in understanding what is required to effect valuable innovation in STEM education.
3. Locate and select relevant research literature to investigate a particular research question in STEM education.
4. Analyse key ideas, assumptions and domains of knowledge in the literature around a research question.
5. Identify appropriate research methods and design in the literature relevant to a particular research question in STEM education.
6. Demonstrate understanding of the ethical frameworks impacting on research in education.
7. Critically apply appropriate forms of data collection and data analysis to a research design on STEM education.

Subject Content

How can an orientation to research be part of the culture of contemporary STEM education and contemporary professional learning?
How is research a central role in contemporary teacher professional learning?
What is the place of research in the practice of future STEM education leaders?
What evidence-based research informs actions / responsibilities / dimensions that characterise effective STEM education in contemporary times?
What modes of research are commonly used in practitioner research in education (e.g. text analysis, action research, case studies, surveys)?
How is research on a nominated key problem or research question in contemporary STEM education best designed, carried out and analysed?

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Proposal	500 words (submitted by each member of group)	10	N	Individual

TEAC 7119 Researching and Developing Engaging Pedagogies

Credit Points 10

Legacy Code 102075

Coordinator Eva Vass (https://directory.westernsydney.edu.au/search/name/Eva Vass/)

Description This subject builds on the interplay between research and practice. It extends students' understanding of the processes and uses of participatory action research, also known in this context as teacher-based inquiry. It reviews theories on engaging practices in diverse professional contexts, with a focus on working with students from low socio-economic backgrounds, Aboriginal and Torres Strait Island learners and students who have English as an additional language or dialect (EAL/D). It also reviews pedagogic approaches linked to 21st century education. It challenges students to inquire into and reflect upon their professional practice and develop engaging classroom pedagogies and assessment practices in the area of their primary teaching specialisation (English, Mathematics or Science and Technology). The subject expands students' research skills through the critical review and application of various approaches to document, measure and evaluate student engagement. In line with NESA primary teaching specialisation requirements, students must apply these research skills and understandings to their school, classroom context and selected curriculum area specialisation. This subject is included in the Transition Phase of the Master of Teaching program.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) TEAC 7154 - Professional Experience 1 and TEAC 7141 - Teaching and Learning in Classrooms

Restrictions

Students must be enrolled in 1663 or 1781 Master of Teaching (Primary).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse contemporary approaches to teaching and learning, with a specific focus on issues and practices surrounding student engagement;
2. Explore pedagogic approaches linked to 21st century teaching and learning practices and review their value and relevance for student engagement;
3. Engage in professional self-reflection to identify issues in practice which warrant further exploration;
4. Interrogate their own teaching and identify strategies for future action in regards to student engagement;
5. Use relevant methodological literature to develop their own methodological design to measure and evaluate student engagement.

Subject Content

- Issues surrounding student engagement and motivation from sociological and psychological perspectives
- 21st century teaching and learning approaches including emerging and innovative pedagogies and how these relate to student engagement
- Classroom environments and processes supporting engaging Teaching and learning experiences, with A focus on students from low socio-economic, EAL/D and Aboriginal and Torres Strait Islander backgrounds
- The use and value of Participatory action research in education and Continuing professional development
- Critiquing personal and professional Teaching practices
- The use of student data to document, measure and Evaluate student engagement
- The symbiotic relationship between theory, research and practice

Inherent Requirements

Students must meet the Inherent Requirements for the Master of Teaching (Primary) (p. 1199)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 7120 STEM Pedagogies in Practice

Credit Points 10

Legacy Code 102511

Coordinator Mary Southall (https://directory.westernsydney.edu.au/search/name/Mary Southall/)

Description The purpose of this subject is for students to gain exposure to authentic contexts for integrating science, technology, engineering and mathematics and to develop knowledge and skills with designing and implementing STEM learning experiences. Students will have the opportunity to complete an authentic interdisciplinary STEM task, and draw upon this experience to design and implement interdisciplinary STEM learning activities aligned to syllabus outcomes. This subject will allow students to simulate and evaluate the teaching practices associated with high-quality interdisciplinary STEM lessons, and collaborate with peers who have expertise in different STEM disciplines.

School Education

Discipline Teacher Education, Not Elsewhere Classified.

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) TEAC 7121 STEM Foundations (This prerequisite applies to students enrolled in program 1848 only)

Co-requisite(s) TEAC 7154
This corequisite applies to students enrolled in program 1848 only

Assumed Knowledge

It is assumed that students will have some knowledge of STEM based pedagogies, for example design thinking, project based learning, and case based instruction.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse essential features of authentic interdisciplinary STEM contexts
2. Critique the design of tasks that require learners to draw upon the STEM disciplines
3. Apply interdisciplinary pedagogies to the design of STEM learning experiences
4. Implement a STEM learning experience aligned to primary or secondary-level syllabus outcomes
5. Evaluate the classroom teaching practices of an interdisciplinary STEM lesson

Subject Content

Authentic STEM contexts
Authentic STEM tasks
Applying interdisciplinary STEM pedagogies
Designing interdisciplinary STEM learning experiences
Classroom teaching practices for interdisciplinary STEM lessons

TEAC 7121 STEM foundations

Credit Points 10

Legacy Code 102508

Coordinator Danielle Pearson (https://directory.westernsydney.edu.au/search/name/Danielle Pearson/)

Description This subject will enable students to engage with knowledge of research-based integrated approaches to the teaching of science, technology, engineering and mathematics in schools. Students will learn about interdisciplinary methods for STEM learning, including project based learning and design thinking. The subject will allow students to undertake a critical examination of innovative, interdisciplinary approaches to curriculum development and relevant pedagogical strategies to maximise student learning and engagement with STEM disciplines. This subject is included in the Development Phase of the Master of Teaching program.

School Education

Discipline Teacher Education, Not Elsewhere Classified.

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

An understanding of at least one STEM (science, technology, engineering or mathematics) school syllabus.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate a critical understanding of theoretical constructs underlying STEM curriculum development as it relates to classroom teaching practice and student learning.
2. Create and evaluate interdisciplinary STEM units
3. Demonstrate a critical understanding of project based learning as a pedagogical strategy for STEM learning.
4. Incorporate design thinking into STEM curriculum integration and development.
5. Critically reflect upon the use of action research to evaluate STEM teaching practices.

Subject Content

K-12 STEM research
Teachers as action researchers
Interdisciplinary curriculum development
Project Based learning
Design thinking

TEAC 7122 Science for Contemporary Learners

Credit Points 10

Legacy Code 102485

Coordinator Karina Mckoy (https://directory.westernsydney.edu.au/search/name/Karina Mckoy/)

Description The purpose of this subject is for students to investigate how primary-age children think scientifically and develop knowledge of the natural world, and explore constructivist strategies for teaching primary science aligned to current reform efforts. An emphasis will be placed on understanding the essential features of inquiry-based pedagogies, scientific practices, and the role of creativity, coding, and technology in teaching and learning science. Students will apply their understandings of learning and constructivist pedagogies to the design of a series of primary science lessons.

School Education

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1845 Graduate Certificate in Primary Science Education; 1847 Master of Education (STEM); 1887 Graduate Certificate in STEM Education or 1911 Master of Education.

Assumed Knowledge

A basic understanding of primary learners' cognitive development, features of positive classroom environments, and outcomes of the primary science syllabus is desirable.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss how young learners develop knowledge to explain the natural world
2. Evaluate alternative conceptions related to primary science topics
3. Synthesize research-based strategies for confronting alternative conceptions
4. Apply inquiry-based pedagogical models to primary technology syllabus outcomes
5. Design primary science learning experiences that incorporate creativity, coding, and authentic scientific practices
6. Integrate appropriate technologies into primary science instruction

Subject Content

1. Understanding big ideas in the primary science curriculum
2. Constructivist frameworks for learning science
3. The role of inquiry, creativity, coding, and scientific practices in learning and teaching primary science
4. The relationship between science and technology in primary education
5. Technologies in primary science education
6. Lesson and unit planning in primary science education

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects LGYA 0753 - TESOL Methodology LGYA 0746 - TESOL Curriculum Development

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate the theory and practice of effective English language teaching and curricula in Australian and international contexts;
2. Demonstrate skills in managing the language learning process in classroom and self-access settings;
3. Critically analyse, design and adapt language teaching resources and curricula for use in a range of settings;
4. Design, implement and evaluate effective syllabus and curricula, incorporating needs and equity analysis, for a range of learner types, including adult learners; and
5. Critically reflect on their own practice as language teachers.

Subject Content

Teaching the macro language skills of speaking, listening writing, reading
Planning, sequencing and evaluating language learning events
Managing the language learning classroom
Developing language teaching resources
Contexts of language curriculum development in Australia and internationally
Analysis of the process of teaching English as a second or other language, including needs analysis, syllabus design, methods of student assessment
Effective teaching strategies and critical self-reflection, including action research
Approaches to curriculum evaluation

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 7141 Teaching and Learning in Classrooms

Credit Points 10

Legacy Code 102076

Coordinator Kellie Jorda (https://directory.westernsydney.edu.au/search/name/Kellie Jorda/)

Description From 2020 students should note that core subjects are now taught in semesters rather than half yearly sessions. This subject is designed to prepare students for their role as active, thoughtful leaders of learning environments for primary students. Students will come to an understanding of their trajectory as professional learners as they develop a deeper understanding of who they are as teachers. The portfolio that they begin in this subject will be a vehicle for them to reflect deeply on their emerging skills and understandings and will be part of their development of a critical perspective of their practice as a teacher. Building on previous understanding about how children learn the students will plan lesson sequences using a range of teaching strategies. The subject will familiarise students with the processes needed to implement the mandated national and state curriculums in their unique classrooms with the diversity of students with whom they are working. A study of techniques to create safe and well managed learning environments where school students feel a sense of ownership of their learning will aid successful completion of the associated practicum subject. The practice of continuous assessment, planning, implementation and reflection that is the curriculum cycle will provide an organising principle around which the understandings gained in the curriculum units can be built.

School Education

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) TEAC 7154 Professional Experience 1

Equivalent Subjects TEAC 7069 - Learning for Teaching

Restrictions

Students must be enrolled in 1781 Master of Teaching (Primary)
Students must have successfully completed 40 credit points to enrol in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Implement teaching strategies that meet the needs of classroom learners from diverse backgrounds and who have a range of learning needs and abilities.

2. Identify the requirements of the practice of teaching through an examination of the curriculum planning and implementation and assessment cycle, including the use of software for profiling and reporting, lesson preparation and class administration.
3. Apply a range of teaching strategies, using digital and traditional resources, to match the learning needs of the children with whom they will be working.
4. Apply principles from theoretical models of discipline to promote positive behaviours for learning and so identify a range of approaches to managing student behaviour and promoting their wellbeing in classrooms.
5. Examine the thoughtful creation of safe classroom environments that promote student engagement and positive learning cultures.
6. Evaluate the role of a range of assessment practices that consistently interpret available data and facilitate feedback to students and parents.
7. Use appropriate data collection methods to assist student teachers to plan and reflect on their classroom practices and to develop a learning portfolio that responds to the Australian Professional Standards for Teachers.
8. Review the skills and understanding required to contribute to educational communities of practice within schools and in broader contexts.
9. Engage in critical reflection of their teaching practice with their peers through the exploration of the links between personal philosophy and practice.

Subject Content

1. Teaching and Learning taking into account: the teaching and learning cycle, evolving curriculum contexts, student learning needs and the creation of positive learning environments over a longer term.
2. Australian Professional Standards for Teachers as benchmarks by which teachers are judged in their professional practice. Use of reflective evidence collection about personal teaching practices to begin the creation of a learning portfolio.
3. Classroom Management as based on a study of Edwards and Watts “models of discipline” and the application of professional interpersonal relationships in creating positive learning environments. The place of an engaging and rigorous curriculum in managing challenging behaviours through utilising preventative and proactive approaches.
4. Synthesis of a variety of teaching strategies and assessment for, of and through learning to create plans for the professional experience context. Based on observation in the professional experience context students will consider the use of particular strategies as are appropriate for their students’ learning needs.
5. Thoughtful use of Information Technologies in the implementation of teaching and learning plans. Extension of students’ personal productivity and the creation of learning resources for curriculum integration assessment and the development of an understanding of appropriate ethical use and critical evaluation of emerging technologies.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 7142 Teaching and Learning with Adults

Credit Points 10

Legacy Code 102155

Coordinator Michele Simons (https://directory.westernsydney.edu.au/search/name/Michele Simons/)

Description This subject explores the pedagogical issues which shape the ways in which teaching and learning for adults might be organised in a variety of contexts. It is suitable for leaders, teachers, tutors, trainers and other staff working in schools, organisations, workplaces and communities. The subject will draw upon a range of theoretical perspectives including approaches to learning, knowledge and assessment, the relationship between organisational context, teaching and learning, and the role of the adult educator as a ‘practical theorist’.

School Education

Discipline Teacher Education, Not Elsewhere Classified.

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the scope and nature of adult education as a field of practice
2. Explore the relationship between learning and development across the lifespan
3. Demonstrate approaches to facilitating adult learning in contexts relevant to students' practice
4. Analyse the relationship between theory, practice and experience in the work of an educator

Subject Content

1. Purposes of adult learning; exploration of the concepts of theory, practice and experience and their relevance to the field of adult learning
2. The learning process; personal and social dimensions;
3. Theories of learning development; learning throughout life
4. The characteristics of an effective educator
5. Planning and preparing learning experiences from curricula/training packages/other frameworks for identifying adult learner needs
6. Teaching strategies (individual, group, workplace based, online)
7. Assessment and evaluation in adult settings

TEAC 7144 Technology Assisting Learning

Credit Points 10

Legacy Code 102154

Coordinator Samantha Hornery (https://directory.westernsydney.edu.au/search/name/Samantha Hornery/)

Description Assistive technologies have the potential to meet a range of simple to complex needs for individuals with additional needs, and boost an individual's participation, communication, learning outcomes and quality of life. As such, professionals must develop both knowledge and skill in identifying and embedding appropriate technology into the assessment, goal-setting, teaching and evaluation cycle. Emphasis will be placed on demonstrating deep knowledge of the literature and demonstrating skills in assessment and instructional practices employing technology to support learning, communication, curricular, and instructional access either in a learning or natural setting. Students will be expected to critically examine the educational function and efficacy of communication technology, assistive technology, digital and multimedia text, or educational software.

School Education

Discipline Teacher Education: Special Education

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects TEAC 7077 - Multiliteracies and additional needs

Restrictions

Students must be enrolled in 1714 M Teaching (Secondary), 1720 Master of Inclusive Education; 1721 Graduate Certificate in Inclusive Education; 1726 Master of Education (Leadership) or 1723 Master of Education (Social Ecology).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critique current research on assistive technology to support learning and promote inclusive practices in educational settings and beyond
2. Assess the learning environment, curriculum and a child's participation so as to contribute to the decision-making process about which assistive technologies, programs or devices will support learning and inclusion
3. Evaluate the suitability of a range of assistive technologies, programs and devices to enhance equitable participation
4. Collaborate with families, professionals, other educators and teaching assistants to implement strategies consistently that embed appropriate assistive technologies within learning environments to promote learning and inclusion
5. Demonstrate leadership in implementing technologies to enhance the learner's continuity of learning between home and inclusive settings (or across environments) and through transitions to the next learning environment

Subject Content

1. Benefits and challenges of using assistive technology.
2. Evaluation of a range of digital media, computers, software, applications, programs and assistive technology and devices.
3. Assessment and decision-making to enhance inclusive teaching and learning using assistive technologies.
4. Collaboration to support integrated use of technology and continuity across environments.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 7147 Play, Health and Wellbeing

Credit Points 10

Legacy Code 102104

Coordinator Prathyusha Sanagavarapu (https://directory.westernsydney.edu.au/search/name/Prathyusha Sanagavarapu/)

Description Play provides a foundation for children's holistic health, wellbeing, learning and relationships. This subject engages students in a critical inquiry of children's play and its pedagogical potential to facilitate engagement in learning and complex interactions. Developmental, cultural, and critical theories of play will be interrogated to enhance understanding of the value and relevance of play in both early childhood and school settings. Play-based pedagogies aligned with The Early Years Learning Framework for Australia, the Australian Curriculum and NSW Personal Development, Health and

Physical Education curriculum, and national and state health promotion initiatives are used to assess and plan for children's emerging play, relationships, movement, health and wellbeing. Students will examine children's rights, agency and abilities within multiple play contexts, and the influence of community and families' diverse values and cultural practices, on play opportunities that promote active and healthy ways of being. This subject is included in the Foundation Phase of the Master of Teaching program.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects TEAC 7085 Play development and learning

Restrictions

Students must be enrolled in 1708 Bachelor of Arts (Pathway to Teaching Birth-5/Birth -12), 1783 Master of Teaching (Birth-5 Years/Birth-12 Years), 1784 Master of Teaching (Birth - 5 Years) or 6017 Diploma in Arts/Bachelor of Arts (Pathway to Teaching Birth-5/Birth-12).

Students enrolled in 6017 Diploma in Arts/Bachelor of Arts (Pathway to Teaching Birth-5/Birth-12) must have successfully completed 190 credit points (160 at Level 1 or higher).

Students enrolled in 1708 Bachelor of Arts (Pathway to Teaching Birth-5/Birth -12) must have successfully completed 160 credit points

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the importance of play for children's holistic health, wellbeing and relationships from birth-to-12 years.
2. Interrogate the developmental, cultural, and critical theoretical perspectives of play and their implications for teachers in early childhood and school settings.
3. Critically analyse children's rights, agency and abilities within multiple play contexts, and the influence of community and families' diverse values, and cultural practices on play opportunities.
4. Plan for children's holistic health and wellbeing aligning with the Early Years Learning Framework for Australia, Australian Curriculum and NSW Personal Development, Health and Physical Education curriculum, and health promotion policies and initiatives.
5. Design learning experiences using play-based pedagogies that scaffold play, and promote health, movement and relationships.
6. Propose collaborative approaches to promote children's healthy, safe and active life in early childhood, community and school-settings

Subject Content

- Children's play and its importance in promoting their holistic health, wellbeing and relationships in early childhood and school settings.
- Physical, socio-emotional health, wellbeing, and safety of children birth-to-12 years.
- Diversity in play contexts and practices linked to health outcomes with a special focus on Indigenous children.
- Developmental, cultural, and critical theories of play and their implications for teachers promoting health, wellbeing and relationships in early childhood and school settings.
- Play and pedagogy including approaches to play, scaffolding play through adult and peer interactions
- Play-based curricular and policy frameworks and initiatives for promoting children's health including the Early Years Learning Framework for Australia and the NSW Personal Development, Health and Physical Education curriculum, and national and/or state policies and initiatives.
- Children's rights, agency and abilities within multiple play contexts, and the influence of community and families' diverse values, and cultural practices on play opportunities.
- Working with families in supporting children's healthy, safe and active life through play
- Documentation, assessment, and planning for children's physical and socio-emotional health and wellbeing.
- Play pedagogies such as active and other forms of play, movement activities, drama, sport, and games.

Inherent Requirements

Students must meet the Inherent Requirements for the Master of Teaching (Birth – 5 Years / Birth -12 Years).
The Master of Teaching (Birth – 5 Years / Birth – 12 Years) Inherent Requirements have been approved by Disability Services. The Inherent Requirements are currently available in the WSU Inherent Requirements website: https://www.westernsydney.edu.au/ir/inherent_requirements/inherent_requirements_for_teaching_courses_postgraduate/master_of_teaching_birth_to_5_yearsbirth_to_12_years (https://www.westernsydney.edu.au/ir/inherent_requirements/inherent_requirements_for_teaching_courses_postgraduate/master_of_teaching_birth_to_5_yearsbirth_to_12_years/)

TEAC 7148 Transformative Learning

Credit Points 10

Legacy Code 101658

Coordinator David Wright (https://directory.westernsydney.edu.au/search/name/David Wright/)

Description This subject provides opportunities to examine and apply theories drawn from critical pedagogy, transformative learning and ecological thinking. It challenges students to critically examine the relationships through which personal and social knowledge is constructed and their efficacy in the construction of learning for the future. Inherent in such thinking are questions about the processes of change in education systems that lead through equity, inclusiveness, wellbeing, social justice and ecological sustainability.

School Education

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Provide evidence of understanding of learning as a social process that is profoundly influenced by prior assumptions, in the form of worldviews, belief and insights that are largely 'taken-for-granted',
2. Recognise that assumptions (or epistemologies) reflect personal values and ideologies constructed through personal, social and cultural relationships,
3. Critically analyse the epistemic origins, developments and systemic qualities of Education and its construction of individual epistemic perspectives (particularly as they relate to learning),
4. Effectively communicate learning about the critical relationship between changes in the world 'out there' and changes in personal understanding (cognitive systems) of processes of 'making meaning' of that world,
5. Critically analyse personal relationships to the assumptions, informed by learning systems, that (a) challenge, and (b) underpin ecological sustainability,
6. Analyse the relationships between social discontent, critical reflectivity, social learning processes, epistemic awareness and transformative learning,
7. Develop a policy response, in an area of personal significance, that reflects a transformative perspective upon learning

Subject Content

1. Epistemological foundations of learning;
2. Transformative learning theory and the experience of transformation;
3. The construction of learning through social-ecological experience
4. The communication of learning.
5. Social-ecological sustainability and learning;
6. Applications of transformative processes;
7. Transformative pedagogies

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Case Study	3,500-4,000 words	60	N	Individual

TEAC 7149 Understanding and Teaching Children

Credit Points 10

Legacy Code 102077

Coordinator Stacey Lumsden (https://directory.westernsydney.edu.au/search/name/Stacey Lumsden/)

Description From 2024, this subject is replaced by TEAC 7161 - Educational Psychology for Learning and Teaching. From 2020 students should note that core subjects are now taught in semesters rather than half yearly sessions. This subject is designed to facilitate

prospective teachers to develop the dispositions and critical skills to create learning communities that are academically challenging, developmentally responsive, socially equitable and promote social and emotional wellbeing. The subject highlights the interacting contributions of biology and environment to the development of children and explores how teachers' knowledge of this process informs their instructional strategies. Specifically, this subject examines a body of classic, as well as current theories, research and practice relating to the cognitive, physiological, and social/affective needs of children and focuses on the relevance of these for classroom practice. Particular emphasis is given to developing responsive teaching practices which promote social and emotional wellbeing of children and are underpinned by high-quality relationships which extend to include the valuing of families and the wider community.

School Education

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects TEAC 7040 - Educational Psychology for Primary Teaching

Restrictions

Note that only students enrolled at WSU Online may register in the WSU Online subjects offered at that location.

Students must be enrolled in 1781 Master of Teaching (Primary), 3756 Bachelor of Science (Pathway to Teaching Primary/Secondary), 1822 Bachelor of Arts (Pathway to Teaching Primary) Dean's Scholars, 1651 Bachelor of Arts (Pathway to Teaching Primary) or 6019 Diploma in Arts/Bachelor of Arts (Pathway to Teaching Primary).

Students enrolled in 1651, 1822 or 3756 must have successfully completed 160 credit points to enrol in this subject.

Students enrolled in 6019 must have successfully completed 190 points (160 at Level 1 or higher) to enrol in this subject.

Learning Outcomes

After successful completion of this subject, students will be able to:
1. Assess instructional strategies designed to support students' learning and development as well as their motivation and engagement.
2. Apply an understanding of issues relating to children's development, giving regard for social and cultural differences.
3. Utilise evidence-based strategies which promote positive learning environments and support children's wellbeing and their development.
4. Evaluate external supports and programs to assist with the promotion and prevention of at-risk and marginalised children.
5. Develop an action plan underpinned by relevant theory and research to address the wellbeing and development needs of a child experiencing difficulties at school.

Subject Content

1. Development in context: Bronfenbrenner's ecological model
2. Learning, cognition and memory: Learning as a constructive process
- Information processing theories
- Metacognition and self-regulation
3. Learning in context: Theories of learning and their implications for instruction and constructing learning environments
- Behaviourism
- Social cognitive theory
- Constructivism
- Humanism
- Instructional strategies applied to learning in context
- Motivation and affect
- Learning and teaching preferences for Aboriginal and Torres Strait Islander peoples
4. Children's development and related needs in context:
- Cognitive, physiological, and social/affective development
- Moral and prosocial development
- Identity development and dispositions
- Sense of self and peer relations
- Aboriginal and Torres Strait Islander development in context
- Beliefs of differing school communities, including culturally and linguistically diverse communities, about learning and behaviour and in relation to teaching practice
5. Positive learning environments and supporting children's wellbeing
- Sociocultural factors influencing mental health and wellbeing of children
- Risk and resilience
- Belonging and inclusion
- Cultivating high-quality respectful relationships
- Initiatives and resources for promoting positive development
- Issues and prevalence of mental health for Aboriginal and Torres Strait Islander peoples
6. Underlying pedagogical assumptions of Information and Communication Technologies (ICT)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Presentation	13 minute presentation in groups of 3.	20	N	Group
Presentation	4 mins for each individual section	30	N	Individual
Final Exam	2 hours	50	N	Individual

TEAC 7150 Universal Design for Learning

Credit Points 10

Legacy Code 102150

Coordinator Annette Sartor (https://directory.westernsydney.edu.au/search/name/Annette Sartor/)

Description Developing the ability to meet the needs of a diverse group of learners within a flexible learning situation is critical to promote inclusion. This subject reviews multiple approaches and strategies employed (e.g. accommodation, adjustment, differentiation) and advocates for Universal Design for Learning to achieve this goal. Strategies are critiqued based on their capacity to enhance learning outcomes for individuals with additional needs and to advance inclusion. These analyses are then used to develop strategies and methods which can facilitate the learning and inclusion of individuals with a range of abilities, skills and needs. Students evaluate strategies, plan and reflect on a learning experience based on Universal Design for Learning.

School Education

Discipline Teacher Education: Special Education

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1714 Master of Teaching (Secondary), 1720 Master of Inclusive Education,1721 Graduate Certificate in Inclusive Education, 1911 Master of Education,
1847 Master of Education (STEM); 1876 Bachelor of Education (Primary) or 1939 Bachelor of Education (Secondary).

Students in program 1939 Bachelor of Education (Secondary) or 1876 Bachelor of Education (Primary) must have successfully completed 240cps before enrolling in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply the principles of UDL to promote authentic learning for diverse learners.
2. Assess the effect of diversity within the educational setting for learning and teaching.
3. Implement practices that facilitate continuities between systems and settings.
4. Design programs that foster positive relationships between individuals with additional needs and their peers.
5. Establish effective, collaborative relationships with families, colleagues, and other professionals to optimise the planning, implementation and monitoring of learning experiences.
6. Document the learner's strengths and needs, and how these will be addressed within the educational setting.
7. Evaluate the effect of UDL on learner's development and belonging.
8. Reflect on personal and professional values, practices and skills to implement UDL.

Subject Content

1. Fundamental concepts of inclusive education
2. Universal Design for Learning (UDL) - origins and definition
3. UDL principles and strategies
4. Learner variability, inclusion and belonging
5. Identifying and documenting the learner's strengths, needs and progress
6. UDL curriculum design
7. Universal Design Assessment
8. UDL in online contexts
9. Critical self-awareness for effective implementation of UDL
10. Planning for transitions

TEAC 7151 Applied Mathematics and Science in Secondary STEM Education

Credit Points 10

Legacy Code 102764

Coordinator Gail Walker (https://directory.westernsydney.edu.au/search/name/Gail Walker/)

Description This subject develops in-service teachers' knowledge and skills in the application of mathematics and science in the STEM (science, technology, engineering and mathematics) disciplines. The subject content and assessments are designed to (1) build teachers' foundational skills in science/mathematics, and (2) build teachers' professional skills in the implementation of science/mathematics in their classrooms. A particular focus of the subject is how science/mathematics can be used to authentically integrate curriculum content from across the different STEM disciplines through inquiry- and problem-based learning, with the ultimate aim of enhancing student engagement and achievement in the STEM disciplines.

School Education

Discipline Teacher Education: Secondary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1882 Graduate Certificate in Secondary STEM Education, 1911 Master of Education, 1848 Master of Teaching Secondary STEM or 1913 Graduate Certificate in Education.

Assumed Knowledge

Students are assumed to be qualified secondary school teachers with classroom experience in delivering the NSW or Australian curriculum.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate foundational knowledge and skills in mathematics and science as applied in integrated secondary STEM education
2. Design teaching and learning sequences which apply mathematics and science as part of integrated STEM units in secondary school contexts.
3. Critically appraise the role of mathematics and science in creating authentic learning experiences for students in secondary school contexts, including through inquiry- and problem-based learning.

Subject Content

- development of An Understanding of mathematical and scientific content relevant to integrated STEM Teaching and learning in secondary schools.
- using mathematics and science to Create authentic learning experiences for secondary school students.
- application of effective mathematical and scientific pedagogy in secondary school contexts.
- inquiry- and Problem-based learning with science/mathematics in integrated STEM Teaching and learning.

Assessment

TEAC 7152 Applied Robotics and Programming in Secondary STEM Education

Credit Points 10

Legacy Code 102763

Coordinator Adam Watson (https://directory.westernsydney.edu.au/search/name/Adam Watson/)

Description This subject develops in-service teachers' knowledge and skills in the application of robotics and coding in the STEM (science, technology, engineering and mathematics) disciplines. The subject content and assessments are designed to firstly build teachers' foundational skills in robotics/coding, and secondly, build teachers' professional skills in the implementation of robotics/coding in their classrooms. A particular focus of the subject is how robotics/coding can be used to authentically integrate curriculum content from and across the different STEM disciplines through inquiry- and problem-based learning, with the ultimate aim of enhancing student engagement and achievement in the STEM disciplines.

School Education

Discipline Teacher Education: Secondary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1882 Graduate Certificate in Secondary STEM Education, 1847 Master of Education (STEM), 1911 Master of Education, 1913 Graduate Certificate in Education, 1714 Master of Teaching (Secondary) or 1848 Master of Teaching (Secondary) STEM.

Assumed Knowledge

Students are assumed to be qualified secondary school teachers with classroom experience in delivering the NSW or Australian curriculum.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate foundational knowledge and skills in both robotics and programming languages.
2. Design teaching and learning sequences which apply robotics and programming languages as part of integrated STEM units in secondary school contexts.
3. Critically appraise the role of robotics and programming languages in creating authentic learning experiences for students in secondary school contexts, through both inquiry- and problem-based learning.

Subject Content

- Robots and other programmable autonomous systems and their application in educational contexts.
- programming languages for The Creation of computer programs and The control of robotics and other autonomous systems.
- using robotics and coding to Create authentic learning experiences for school students.
- inquiry- and Problem-based learning with robotics/coding in integrated STEM Teaching and learning.

TEAC 7153 Creating Inclusive Classrooms: Perspectives on Theory, Policy, and Practice

Credit Points 10

Legacy Code 102746

Coordinator Samantha Woo (https://directory.westernsydney.edu.au/search/name/Samantha Woo/)

Description This subject examines the theoretical, legislative, ethical, international and local policy perspectives that inform inclusive practices for diverse learning needs in school settings. It critically analyses disability, special needs, inclusive principles, and evidence-based practice. Students will develop skills in using best practice to assess, plan, monitor, and evaluate learning for students with diverse abilities. The importance of establishing collaborative partnerships with families, educational professionals, and community support services will be examined. This subject focuses on the promotion of educational and social inclusion to enhance learning outcomes, health, and wellbeing for all young people in school contexts. This subject is included in the Development Phase of the Master of Teaching program.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects TEAC 7052 - Inclusive Practices TEAC 7053 - Inclusive Teaching for Effective Learning TEAC 7049 - Inclusive Education –Theory Policy and Practice

Restrictions

Students must be enrolled in one of the following programs: 1714 Master of Teaching (Secondary), 1781 Master of Teaching (Primary) or 1848 Master of Teaching (Secondary) STEM.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse theoretical, ethical, philosophical, legislative, and policy frameworks underpinning inclusive practices.
2. Reflect on how community and personal assumptions, values, beliefs, and attitudes towards diversity, disability, and inclusive education influence interactions, pedagogies, and the provision of high-quality inclusive environments.
3. Critically assess the enablers and barriers to learning that facilitate access, meaningful participation, and social inclusion.
4. Apply knowledge of disability, special educational needs, theories of development and learning dispositions to identify individual learning needs and refer students who would benefit from educational, community and appropriate specialist support services.
5. Apply effective inclusive behaviour plans, personalised learning programs, and differentiated instruction, in partnership with families and other stakeholders.
6. Design responsive physical and social environments, incorporating technology and resources to facilitate health, wellbeing, and inclusion.
7. Implement family/people-centred and other evidence-based strategies to collaborate and partner with families/caregivers, other professionals, government and community support services, and other stakeholders to effectively support students with disability and special needs.
8. Apply evidenced-based classroom assessment approaches to make instructional decisions for students with disability and special educational needs.

Subject Content

1. Students with disability and diverse intellectual, emotional, social and physical learning needs.
2. Theoretical, ethical, philosophical, legislative, and international and local educational policy frameworks and their implications on the responsibilities of teachers for inclusive practices.
3. Personal and community assumptions, values, beliefs and attitudes towards disability, diversity and inclusion and their impact on interactions, pedagogies, and the provision of high-quality inclusive practices for all learners.
4. Evidence-based assessment approaches to determine special educational needs for instructional decisions
5. Personalised education, transition plans, and specialist support programs to address identified individual learning needs in school environments.
6. Learner-centred, responsive, and inclusive teaching strategies and adjustments to create inclusive learning environments for diverse learners.
7. Collaboration and partnership with families/caregivers, other professionals, government and community support services, and other stakeholders using family-centred and/or people-centred approaches.
8. Technological supports and resources to enhance inclusive education and learning outcomes for students with disabilities and special educational needs.

TEAC 7154 Professional Experience 1 and Pedagogy

Credit Points 10

Legacy Code 102792

Coordinator Katherine Hadley (https://directory.westernsydney.edu.au/search/name/Katherine Hadley/)

Description This subject is the first Professional Experience subject of the Master of Teaching (Primary) and Master of Teaching (Secondary) programs. This subject is included in the Development Phase of the Master of Teaching program. This subject incorporates a 30-day placement in a NSW school. It is designed to introduce all students to the philosophical, ethical, practical and pedagogical perspectives of becoming a teacher in diverse, contemporary educational settings. The aim of this subject is to enable you to proactively engage in real-life educational settings to learn and enhance your professional development as a future teacher. This subject gives you the opportunity to explore the relationship between practical and theoretical knowledge of teaching. This subject will provide you with an opportunity to explore a range of learning activities that occur inside and outside the classrooms, and the roles of the teaching and non-teaching staff within the school. Through ongoing observation, supervised teaching and contribution in the wider school community, the subject ensures you work towards the achievement of the national standards for a graduate teacher.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) Students enrolled in 1714 Master of Teaching (Secondary) or 1848 Master of Teaching (Secondary) STEM must has successfully completed
TEAC 7161 Educational Psychology for Learning and Teaching and TEAC 7032 Diversity Social Justice and Schooling and
(TEAC 7160 Literacy Numeracy for Secondary Teaching or TEAC 7027 Designing Teaching and Learning)
Students enrolled in 1781 Master of Teaching (Primary) must has successfully completed
TEAC 7161 Educational Psychology for Learning and Teaching and TEAC 7032 Diversity Social Justice and Schooling

Co-requisite(s) Students enrolled in 1714 - Master of Teaching (Secondary) or 1848 Master of Teaching (Secondary) STEM must have successfully completed or be enrolled in TEAC 7082 Pedagogy for Positive learning Environments
Students enrolled in 1781 Master of Teaching (Primary) must have successfully completed or be enrolled in TEAC 7082 Pedagogy for Positive learning Environments or TEAC 7141 Teaching and Learning in Classrooms

Equivalent Subjects TEAC 7097 - Primary Professional Practice 1 TEAC 7135 - Secondary Professional Practice I TEAC 7109 - Professional Practice 1 TEAC 7102 - Professional Experience 1 TEAC 7136 - Secondary Professional Practice 1 STEM

Restrictions

Students must be enrolled in the 1714 Master of Teaching (Secondary) or 1846 Graduate Certificate in Education (Curriculum Specialisation) or 1781 Master of Teaching (Primary) or 1848 Master of Teaching (Secondary) STEM or 1914 Graduate Certificate in Secondary Teaching.

Students enrolled in 1714 must have successfully completed 40 credit points to enrol in this subject.
Students enrolled in 1781 must have successfully completed 40 credit points to enrol in this subject.
Students enrolled in 1848 must have successfully completed 40 credit points to enrol in this subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Understand how schools and classrooms are organised and managed.
2. Understand relevant legislative, administrative and organisational policies and processes.
3. Plan lessons that demonstrate knowledge of students, learning theory, quality teaching, Australian Curriculum and NSW Syllabus documents.
4. Implement required lessons that use appropriate pedagogies to engage diverse learners and address learning goals, with support from senior educators.
5. Propose ideas/solutions to enhance safe and challenging learning environments based on relevant theories, policies and practices.
6. Utilise appropriate resources including ICTs and other technologies to foster students' engagement to support learning.
7. Interact ethically and professionally with staff, students, peers, and the broader school community
8. Reflect on own learning and feedback to develop their teaching performance with the Australian Professional Standards for Graduate Teachers

Subject Content

1. Organisation of professional experience (Placement schools; planning and teaching requirements, understanding expectations).
2. Understanding the context of contemporary Australian schools and classrooms.
3. The roles and responsibilities of a teacher in NSW schools (Australian Professional Standards for Teachers, policies, ethics).
4. The Professional Teacher (effective communication, professional interactions, ethical and professional conduct).
5. Addressing diverse learners including physical, cultural, religious, social, linguistic and intellectual characteristics on learning; strategies to build rapport with students).
6. The use of explicit pedagogies and responsive approaches for student engagement, teaching strategies, assessment, and digital learning.
7. Critical reflection in teaching.
8. Use of assessment and feedback in teaching.

Special Requirements

Legislative pre-requisites

1. Students are required to complete the TWO components of the Working with Children Check (WWCC) process leading to (a) the issuance of a WWCC number by the Office of the Children's Guardian under the category of volunteer, AND (b) verification of the WWCC number with the NSW Department of Education.

To obtain a WWCC number, students will need to:
i. Access the Office of the Children's Guardian website and complete an online application form to generate an application number.
ii. Present an application number and identification to a Service NSW office who will issue a Working with Children Check number via mail or email.
iii. Submit the letter with a valid Working With Children Check number via WesternNow Student Portal. The document is trimmed and recorded as a Special Requirement on your academic record. WesternNow Student Portal link: https://wsu.service-now.com/student?id=sc_cat_item&sys_id=9c8b61a2dbbed8504f58e434059619ed (https://wsu.service-now.com/student/?id=sc_cat_item&sys_id=9c8b61a2dbbed8504f58e434059619ed)

For (b) verify WWCC number with the NSW Department of Education, students will need to:
i. Access the NSW Department of Education WWCC Verification declaration form https://online.education.nsw.gov.au/jecpc/crc/wwcc.jsf
ii. Carefully read the information about Identity Documents and obtain a copy of the relevant ID documents.
iii. Complete and submit the verification declaration form.
iv. Once your WWCC verification is complete you will receive an email reply from the DoE Probity Unit confirming your WWCC number has been verified.
v. Submit the verification confirmation email via WesternNow Student Portal. The document is trimmed and recorded as a Special Requirement on your academic record.

2. Students must complete the TWO components of the NSW Department of Education's Child Protection Awareness Training (CPAT), namely (a) complete initial training, AND (b) complete annual updates each year they are enrolled in a teaching degree.

For (a) complete initial training, students will need to:
i. Access the NSW Department of Education's MyPL website https://mypl.education.nsw.gov.au/
ii. Complete the online Child Protection Awareness Training: Induction
iii. Save certificate of completion
iv. Submit certificate via WesternNow Student Portal

For (b) complete annual updates each year they are enrolled in a teaching degree, students will need to:
i. Access the NSW Department of Education's MyPL website https://mypl.education.nsw.gov.au/
ii. Complete the Child Protection Awareness Training (CPAT): Annual Update for the calendar year
iii. Save certificate of completion
iv. Submit certificate via WesternNow Student Portal.

Both certificates will be recorded on your student record as Special Requirements with the end date for the Annual CPAT recorded. The CPAT: Annual Update will need to be renewed and submitted on an annual basis. Students who have not completed both components of the Child Protection Awareness Training will need to withdraw from the subject.

3. Students must complete the ASCIA anaphylaxis e-training and submit their certificate to Submit certificate via WesternNow Student Portal.

4. Students must meet the Inherent Requirements for the Master of Teaching (Primary) (p. 1199), or the Master of Teaching (Secondary). (p. 1214)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Professional Task	2 hours	S/U	Y	Individual
Professional Placement Performance	30 days	S/U	Y	Individual
Professional Placement Performance	30 days	S/U	Y	Individual
Reflection	300 words (lesson plan 1 reflection), 300 words (lesson plan 2 reflection), 400 words (placement reflection) =1,000 words	S/U	Y	Individual

TEAC 7155 Professional Experience 2

Credit Points 10

Legacy Code 102793

Coordinator Grant Jones (https://directory.westernsydney.edu.au/search/name/Grant Jones/)

Description The aim of this subject is to enable education students to proactively engage in real-life educational settings to learn and enhance their professional development as a future teacher. This second professional experience subject provides 30 of the 60 required professional experience days. This provides you with an opportunity to explore ranges of learning activities that occurs inside and outside the classrooms and the roles of the teaching and non-teaching staff within the school. You will also have opportunity to reflect on the teaching and learning cycle and refine your competencies as a beginning teacher under the supervision of qualified educators. This subject includes the TPA (Teaching Performance Assessment) which is designed to assess Teacher Education Students teaching as measured by the Australian Professional Standards for Teachers at the Graduate level. This subject is included in the Transition Phase of the Master of Teaching program.

Co-requisite(s) -

Equivalent Subjects TEAC 7110 Professional Practice II TEAC 7098 Primary Professional Practice 2 TEAC 7105 Professional Experience II TEAC 7137 Secondary Professional Practice 2 TEAC 7138 Secondary Professional Practice 2 - STEM

Restrictions

Students must be enrolled in 1714 Master of Teaching (Secondary), 1781 Master of Teaching (Primary) or 1848 Master of Teaching (Secondary) STEM.
Students enrolled in 1714 must have successfully completed 110 credit points.
Students enrolled in 1848 must have successfully completed 110 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply knowledge of student diversity, current research, quality teaching, Australian Curriculum and NSW Syllabus documents to competently plan, deliver, assess and evaluate lesson sequences and units of work.
2. Implement a wide range of differentiated lessons using appropriate pedagogies to engage diverse learners and address learning goals.
3. Propose ideas/solutions to enhance safe and challenging learning environments based on relevant theories, policies and practices.
4. Utilise appropriate resources including ICTs and other technologies to foster students' engagement and to support learning.
5. Communicate ethically and professionally with students, peers, staff, families and community.
6. Identifies a range of appropriate professional associations and how they can contribute to professional learning and improve teaching practices to support student learning.
7. Compiles a range of strategies to build and maintain teacher wellbeing and resilience.
8. Use evidence-based approaches to reflect and evaluate their professional practice that demonstrate the achievement of the professional teaching standards for graduates.

Subject Content

1. Teaching and Planning Cycle- using data and assessment evidence about students to inform lesson planning, assessment and the provision of feedback to students.
2. Critical self-reflection with reference to the Australian Professional Standards for Graduate Teachers.
3. Connecting research with practice to inform planning and teaching.
4. Pedagogical knowledge to support teaching and learning decision making.
5. Essential skills and knowledge as a teaching professional including, professional identity, registering as a teacher, professional associations and professional learning.
6. Teacher wellbeing and resilience.

Special Requirements

Legislative pre-requisites

1. Students are required to complete the **two** components of the Working with Children Check (WWCC) process leading to (a) the issuance of a clearance number under the category of volunteer and (b) verification of the clearance number with the NSW Department of Education.

a) Students will need to:

i. Access the Commission for Children and Young People website and complete an online application form to generate an application number.

ii. Present an application number and identification to a Service NSW office who will issue a Working with Children Check number via mail or email.
iii. Submit the letter with a valid Working With Children Check number via WesternNow Student Portal. The document is trimmed and recorded as a Special Requirement on your academic record.
WesternNow Student Portal link (https://wsu.service-now.com/student/?id=sc_cat_item&sys_id=9c8b61a2dbbed8504f58e434059619ed)
b) Students will need to:
i. Access the NSW Department of Education WWCC Verification declaration form https://online.education.nsw.gov.au/jecpc/crc/wwcc.jsf
ii. Carefully read the information about Identity Documents and obtain a copy of the relevant ID documents.
iii. Complete and submit the verification declaration form.
iv. Once your WWCC verification is complete you will receive an email reply from the DoE Probity Unit confirming your WWCC number has been verified.
v. Submit the verification confirmation email via WesternNow Student Portal. The document is trimmed and recorded as a Special Requirement on your academic record.

2. Students must complete the **two** components of the NSW Department of Education's Child Protection Awareness Training (CPAT)

TEAC 7156 Aboriginal Education: Past, Present and Future

Credit Points 10

Legacy Code 102810

Coordinator Michelle Locke (https://directory.westernsydney.edu.au/search/name/Michelle Locke/)

Description This subject builds the capacity of students to work in culturally competent and sensitive ways in relation to Aboriginal and Torres Strait Islander education in primary schools and early childhood settings. It allows for the development of understandings of the similarities and/or diversities of local Aboriginal and Torres Strait Islander groups including culture, histories, languages and identity. It examines the social and cultural contexts that influence engagement by Aboriginal and Torres Strait Islander children, families and communities. It explores ways of improving engagement through effective early childhood and school culture, curriculum and community approaches. By investigating current approaches for teaching Aboriginal and Torres Strait Islander children and integrating Aboriginal knowledges, perspectives and culturally sensitive pedagogies into education, the students develop their own practices in providing an inclusive learning environment for all children. This subject is included in the Foundation Phase of the Master of Teaching program.

6048 Diploma in Arts/Bachelor of Arts (Pathway to Teaching Early Childhood/Primary).

Students enrolled in 1651 Bachelor of Arts (Pathway to Teaching Primary), 1822 Bachelor of Arts (Pathway to Teaching Primary) Dean's Scholars), 3756 Bachelor of Science (Pathway to Teaching Primary/Secondary) or 1929 Bachelor of Arts (Pathway to Teaching Early Childhood/Primary) must have successfully completed 160 credit points before enrolling in this subject.

Students enrolled in 6019 Diploma in Arts/Bachelor of Arts (Pathway to Teaching Primary) or 6048 Diploma in Arts/Bachelor of Arts (Pathway to Teaching Early Childhood/Primary) must have successfully completed 190 credit points (160 at Level 1 or higher) before enrolling in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and implement the incorporation of Aboriginal and Torres Strait Islander histories, knowledges and experiences into the curriculum.
2. Critically analyse how teachers' understandings of Aboriginal and Torres Strait Islander knowledges, cultural issues, languages and identities can impact on the educational outcomes of Aboriginal and Torres Strait Islander learners.
3. Identify and apply theories of cultural competence and culturally responsive teaching for working effectively with Aboriginal and Torres Strait Islander children, families and communities.
4. Evaluate appropriate Aboriginal and Torres Strait Islander studies teaching resources and the importance of consultation with Indigenous communities and external personnel with appropriate qualifications and/or knowledge.
5. Explain and apply Aboriginal and Torres Strait Islander peoples' world views and pedagogies.
6. Create pedagogically appropriate Aboriginal and Torres Strait Islander learning and assessment experiences for teaching a range of curriculum areas.
7. Understand and apply the knowledge of relationships beyond the early childhood or school community, to engage in a culturally sensitive manner with Aboriginal and Torres Strait Islander families and communities.

Subject Content

1. Local knowledge, histories, languages and identities relating to Aboriginal and Torres Islander peoples.
2. Social, cultural (including the connections to community, country and kin) and contextual influences (including media representations) on the identities of Aboriginal and Torres Strait Islander people.
3. Cultural awareness, competence and sensitivity for providing inclusive educational opportunities for Aboriginal and Torres Strait Islander children, families and communities.
4. Culturally appropriate pedagogies, resources, assessments, terminology, learning styles and communication.
5. Aboriginal and Torres Strait Islander content in the curriculum.
6. The importance of building relationships and using appropriate protocols when working with Aboriginal and Torres Strait Islander children, families, workers and communities.
7. Current and historical government policies and programs and their impacts on Aboriginal and Torres Strait Islander communities.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Reflection	1,000 words (+/- 10%)	30	N	Individual
Professional Task	2,000 words (+/-10%)	40	N	Individual
Critical Review	1,500 words (+/- 10%)	30	N	Individual

TEAC 7157 Action Research in Teaching

Credit Points 10

Legacy Code 102811

Coordinator David Cole (https://directory.westernsydney.edu.au/search/name/David Cole/)

Description This subject provides an opportunity for students to engage with literature on a particular aspect of a research topic and design a research project in a team. Students will: locate and select relevant research literature to investigate a particular research question; analyse key ideas, assumptions and domains of knowledge in the literature around that question; identify appropriate research methods and designs for answering it; critically apply appropriate forms of data collection and data analysis to that research design, and develop research findings into an informed discussion linking to broader academic conversations around the field being researched. This subject is included in the Transition Phase of the Master of Teaching program.

School Education

Discipline Teacher Education: Secondary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects TEAC 7117 - Researching Teaching Learning 2

Restrictions

Must be enrolled in the 1714 Master of Teaching (Secondary) and have completed 90cp.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Select relevant primary research literature to investigate a nominated action research question.
2. Analyse key ideas, assumptions and domains of knowledge in the literature related to a nominated research question.
3. Select appropriate research methods relevant to action research design.
4. Demonstrate understanding of the ethical frameworks impacting on research in education.
5. Critically apply appropriate forms of data collection and data analysis to a research design.
6. Apply research findings to inform discussion of the nominated theme, linking to the broader research area.

Subject Content

1. How is research on a nominated key problem or research question in education best designed?
2. What is the goal of a literature review?
3. What range of data can be gathered to answer a particular research question?
4. What methods, instruments and approaches are most appropriate to answer a particular research question?
5. How is data collected and analysed?
6. What are evidence and ethics?
7. What modes of research are commonly used in practitioner research in education (e.g. text analysis, action research, case studies, surveys)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	15 minutes each	20	N	Individual
Literature Review	2,000 words	50	N	Individual
Presentation	20 minutes	30	N	Individual

TEAC 7158 Researching Teaching and Learning

Credit Points 10

Legacy Code 102852

Coordinator Mark Richards (https://directory.westernsydney.edu.au/search/name/Mark Richards/)

Description This subject builds on the premise that, in contemporary education environments, teachers continue to develop their professional knowledge and practice through their engagement in reflective inquiry. The capacity to read and make sense of research is an important professional attribute for teachers interested in sustainable practices, engaged inquiry learning by adolescents, and diversity, social justice and equity. The subject provides pre-service teachers with a starting point and practical insights into the day-to-day decision making of educators. The content will follow the order and logic that experienced researchers take in order to ensure quality in their research, and also to ensure that it is valid, reliable, ethical, useful and socially responsible. Given the professional skills required by teachers, the subject pays particular attention to the elements involved in action research.

School Education

Discipline Teacher Education: Secondary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects TEAC 7118 - Researching Teaching and Learning 1

Restrictions

Students must be enrolled in the Master of Teaching (Secondary) or Master of Teaching (Primary)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Utilise a range of academic sources to select and evaluate published research relevant to a given educational issue or debate.
2. Engage critically with a range of research literature on a given educational issue or debate.
3. Analyse the key ideas, assumptions and domains of knowledge underlying aspects of research on a given educational issue or debate.
4. Contrast, synthesise and articulate key arguments in public discourse around educational issues or debates.
5. Interpret data concerning educational issues or debates in the educational research landscape.
6. Demonstrate how different sources and types of secondary school classroom/student data are suitable to respond to different typologies of research questions and associated aims.
7. Explore how research data can be used to make evidence-based recommendations for teaching and learning.

Subject Content

1. What is the value of engaging with educational research literature?
2. Where do we locate relevant peer-reviewed research?
3. What is the breadth of ?eevidence?f in educational research?
4. How can research literature inform public policy and debates around educational issues?
5. How do I become a critical reader of educational research?
6. How can engaging with the research literature inform my understanding of how students learn and factor that impact on learning?
7. How can engaging with research literature contribute to my ongoing development as a teacher?
8. What forms of data are schools collecting and how are they interpreting and using the data?
9. What are the limits and possibilities of data in schools?

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 7160 Literacy and Numeracy for Secondary Teaching

Credit Points 10

Coordinator John Ley (https://directory.westernsydney.edu.au/search/name/John Ley/)

Description This subject addresses how to effectively teach literacy and numeracy across a range of secondary subjects. It focuses on how to teach oral language, phonics, reading and comprehension strategies within different disciplines. Students will learn about how writing can be used to develop adolescents' learning and depth of understanding using explicit, guided and independent pedagogies for writing. The subject covers the six strands of mathematics including number, algebra, geometry, measurement, statistics and probability. Students will apply proficiencies in understanding, fluency, problem-solving and reasoning. The use of scaffolds and application of numeracy in a range of curriculum areas will be addressed. This subject is included in the Foundation Phase of the Master of Teaching program.

School Education

Discipline Teacher Education: Secondary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects -

Restrictions

Students must be enrolled in program 1714, 1848, 1652, 1823, 2804, 1843, 3756, 4791, 6013 or 6021.

Students enrolled in 1652, 1823, 2804, 1843, 3756 or 4791 must have achieved 160 credit points to enrol in this subject.

Students enrolled in 6021 must have achieved 190 credit points (160 at Level 1 or higher) to enrol in this subject.

Students enrolled in 6013 must have achieved 180 credit points (150 at Level 1 or higher) to enrol in this subject

Learning Outcomes

1. Demonstrates understanding about how students learn to read and write effectively in curriculum areas.
2. Evaluates explicit literacy instruction and scaffolding in curriculum areas.
3. Demonstrates knowledge and understanding about mathematical concepts including number, algebra, geometry, measurement, statistics and probability in curriculum areas.
4. Explores mathematical strategies to develop student understanding, fluency, problem-solving and reasoning in curriculum areas and tasks.
5. Applies effective literacy and numeracy teaching strategies in curriculum areas.

Subject Content

- Diagnostic approaches to reading and writing instruction.
- Oral language development in students.
- Phonological awareness and guidelines for instructions in teaching.
- Four roles of a reader.
- Comprehension strategies in making connections, visualising, questioning and summarising.
- Developing student vocabulary in disciplines.
- Fluency approaches in reading.
- Writing development continuum.
- Pre-assessment of writing.
- Conditions that enable quality writing in disciplines.
- Pedagogies for teaching writing.
- Understanding and teaching mathematical concepts in number, algebra, geometry, measurement, statistics and probability.
- Assessing numeracy opportunities in a range of key learning areas.
- Teaching strategies for numeracy in a range of key learning areas.
- Instruction on how to apply proficiencies in numeracy – understanding, fluency, problem-solving and reasoning.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 7161 Educational Psychology for Learning and Teaching

Credit Points 10

Coordinator Jose Hanham (https://directory.westernsydney.edu.au/search/name/Jose Hanham/)

Description This subject highlights the interacting contributions of biology and environment to the development of children and adolescents and explores how teachers' knowledge of this process must inform their pedagogy. Specifically, this subject examines classic and current theories and research evidence-base relating to the biological, cognitive, social, emotional, and moral development of children and adolescents and the implications of these for learning and classroom practice. It includes theoretical perspectives on the brain and learning including memory formation, retention and models of

motivation, attention, and knowledge acquisition. This subject dispels common educational neuromyths and focuses on evidence-informed pedagogical practices that support learning, engagement, motivation, and wellbeing in culturally responsive classrooms. This subject is included in the Foundation Phase of the Master of Teaching program. This subject is included in the Foundation Phase of the Master of Teaching program.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects TEAC 7149 and TEAC 7004

Restrictions

Students must be enrolled in program 1781 Master of Teaching (Primary), 1714 Master of Teaching (Secondary), 1848 Master of Teaching (Secondary) STEM, 1651 Bachelor of Arts (Pathway to Teaching Primary), 1652 Bachelor of Arts (Pathway to Teaching Secondary), 1822 Bachelor of Arts (Pathway to Teaching Primary) Dean's Scholars, 1823 Bachelor of Arts (Pathway to Teaching Secondary) Dean's Scholars, 2804 Bachelor of Business (Pathway to Teaching Secondary), 1843 Bachelor of Graphic Design (Pathway to Teaching Secondary), 4791 Bachelor of Health Science and Physical Education (Pathway to Teaching Secondary), 6013 Diploma in Design/Bachelor of Graphic Design (Pathway to Teaching Secondary), 6019 Diploma in Arts/Bachelor of Arts (Pathway to Teaching Primary), 6021 Diploma in Arts/Bachelor of Arts (Pathway to Teaching Secondary) or 3756 Bachelor of Science (Pathway to Teaching Primary/Secondary).

Students enrolled in 1652 Bachelor of Arts (Pathway to Teaching Secondary), 1823 Bachelor of Arts (Pathway to Teaching Secondary) Dean's Scholars, 2804 Bachelor of Business (Pathway to Teaching Secondary), 1843 Bachelor of Graphic Design (Pathway to Teaching Secondary), 3756 Bachelor of Science (Pathway to Teaching Primary/Secondary), 1822 Bachelor of Arts (Pathway to Teaching Primary) Dean's Scholars, 1651 Bachelor of Arts (Pathway to Teaching Primary) or 4791 Bachelor of Health Science and Physical Education (Pathway to Teaching Secondary) must have successfully completed 160 credit points to enrol in this subject.

Students enrolled in 6019 Diploma in Arts/Bachelor of Arts (Pathway to Teaching Primary), 6021 Diploma in Arts/Bachelor of Arts (Pathway to Teaching Secondary) must have successfully completed 190 credit points (160 at Level 1 or higher) to enrol in this subject.

Students enrolled in 6013 Diploma in Design/Bachelor of Graphic Design (Pathway to Teaching Secondary) must have successfully completed 180 credit points (150 at Level 1 or higher) to enrol in this subject.

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Apply an understanding of issues related to biological, cognitive, social, emotional, and moral development across childhood and adolescence.
2. Apply an understanding of cognitive processes to design effective pedagogical practices.
3. Assess the implications of key learning and motivational theories for teaching and learning.
4. Evaluate the developmental research evidence-base for a range of instructional strategies to determine appropriate use depending on educational context.
5. Appraise culturally responsive methods for promoting students' social and emotional wellbeing.

Subject Content

- Recognition of context in child and adolescent development
- Biological, cognitive, social, emotional, and moral development across childhood and adolescence
- Cognitive processes (learning, attention, memory, executive functions), neuromyths, and implications for teaching and learning
- Learning theories and evidence-based pedagogical practice
- Motivation theories and implications for teaching and learning
- Social and emotional wellbeing in culturally responsive classrooms

TEAC 7162 Children's Learning and Development

Credit Points 10

Coordinator David Hawkins (https://directory.westernsydney.edu.au/search/name/David Hawkins/)

Description Early and middle childhood represent periods of rapid growth in children's physical, cognitive, language, social, emotional, and moral development. This subject provides students with a comprehensive understanding of child development as well as a deep knowledge of learning theories and contemporary research evidence to evaluate implications for teaching children birth-12 years. In particular, students will develop an understanding of brain development and cognitive processes for children birth-12 years. Students will examine the critical role that family, culture, and community play in children's development and evaluate the impact of their personal perspectives on their teaching practices. This subject enables students to understand and critique theory and research evidence about child development and learning theories to plan and implement evidence-based teaching pedagogy that is culturally and developmentally appropriate. This subject is included in the Foundation Phase of the Master of Teaching program.

School Education

Discipline Teacher Education, Not Elsewhere Classified.

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be in a postgraduate program.

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Apply an understanding of child development from conception to 12 years across physical, cognitive, language, social, emotional, and moral domains
2. Analyse the role of family, culture, and community on children's development and implications for teaching and learning
3. Examine the research evidence about brain development and cognitive processes for children birth-12 years including neuromyths and implications for teaching and learning
4. Critique key learning theories to implement effective teaching and learning strategies for children birth-12 years
5. Appraise the research methodologies adopted to create knowledge about child development and learning theories to inform evidence-based teaching and learning strategies

Subject Content

- The relevance of child development and learning theories to teaching, how theory and evidence is created, and how these theories coalesce
- The role of biology and prenatal growth on the development of children birth-12 years: theoretical perspectives and research evidence
- Students will reflect on the role of family, culture, and community on the development of children birth-12 years, including Aboriginal & Torres Strait Islander families, and theoretical perspectives and research evidence.
- Physical, cognitive, language, social, emotional, and moral development of children birth-12 years: theoretical perspectives and research evidence
- Brain development, cognitive processes, neuromyths, and evidence-based teaching strategies to support learning and development of children birth-12 years: theoretical perspectives and research evidence
- Learning theories and implications for teaching children birth-12 years: theoretical perspectives and research evidence
- Critical reflection on one's personal perspectives and implications for teaching and learning

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 7163 Investigations: Sustainability, Science and Technology

Credit Points 10

Coordinator Lesley Gough (https://directory.westernsydney.edu.au/search/name/Lesley Gough/)

Description This subject explores the place of science, technology and sustainability in the Early Years Learning Framework, the Australian Curriculum and relevant syllabuses. It will focus on scientific and technological pedagogical content knowledge appropriate for teaching science and technology. The subject will explore the importance of Aboriginal ways of knowing in science using culturally sensitive pedagogies. Within the subject there is significant emphasis on developing scientific inquiry skills and computational and systems thinking in applying technology. The subject supports confident, curious, creative and imaginative life-long learners to inquire, discover and think critically to develop sustainable ideas and solutions using digital and design technologies. This subject is included in the Transition Phase of the Master of Teaching program.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects TEAC 7099

Restrictions

Students must be enrolled in 1783 Master of Teaching (Birth - 5/Birth – 12 Years)

Learning Outcomes

1. Critically reflect on personal understandings and misconceptions of science and technology concepts and pedagogies
2. Analyse the curriculum frameworks and research underpinning the development of science and technology knowledge and understanding from early childhood through to primary school years.
3. Explain central concepts in sustainability, science and technology and the development of these ideas for children from Birth to 12 years of age.
4. Evaluate a range of research-based strategies, effective pedagogical practices and resources suitable for introducing scientific inquiry and design learning including Aboriginal ways of knowing into early childhood and primary school environments.
5. Design sequenced learning experiences that incorporate responsive teaching practices and intertwine the nature of environmental, social, economic, political and cultural sustainability as they relate to early childhood and primary science and technology education.

Subject Content

• The place of science, technology and sustainability in the Early Years Learning Framework, Australian Curriculum and NSW Science and Technology syllabus.
• Constructivist learning strategies that foster community connections in ways that build on local funds of knowledge and assist in developing confident learners and sustainable communities.
• Science identity in young children – developing a learning environment that promotes interests, habits, computational and systems thinking skills, and scientific and technological inquiry skills.
• Sustainable futures – examining the three interconnected dimensions of sustainability as they relate to science and technology learning in the early childhood and primary years.
• Supporting confident, curious, creative and imaginative learners to inquire, discover and think critically to develop sustainable ideas and solutions using digital and design technologies.
• Planning and sequencing learning experiences that incorporate intentional teaching and scaffold learning through instructional guidance and thoughtful feedback that promote responsive teaching and effective pedagogical practices.
• Documenting and assessing funds of knowledge, skills and learning to inform planning practices.
• The importance of Aboriginal ways of knowing in science and culturally sensitive pedagogies.

TEAC 7164 Literacy Connections 2: Communicating, Reading and Writing

Credit Points 10

Coordinator Jaydene Barnes (https://directory.westernsydney.edu.au/search/name/Jaydene Barnes/)

Description This subject is designed to extend students' understanding of teaching reading, writing, speaking and listening in the upper primary years of school. Students will apply their knowledge of the relevant curriculum documents to assess and plan for children in Stages 2 and 3. Students will explore how a range of texts are applied to teach reading comprehension at the literal, inferential and evaluative levels and provide a context for children's writing for a range of purposes. Opportunities to integrate literacy across the curriculum, drawing on multimodal approaches will be explored. A critical understanding of a range of pedagogical and assessment practices will inform teaching and learning for children with diverse languages, cultures and abilities. Students will apply this knowledge to develop and evaluate literacy lessons. This subject is included in the Transition Phase of the Master of Teaching program.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) TEAC 7071

Equivalent Subjects TEAC 7090

Restrictions

Must be enrolled in 1783 Master of Teaching (Birth-5 years/Birth-12 years)

Learning Outcomes

1. Distinguish the purpose, structure and use of visuals and language devices in a range of texts.

2. Evaluate pedagogical teaching practices and strategies for teaching reading comprehension, writing, speaking and listening, including differentiation strategies.

3. Apply responsive teaching practices to teach English to diverse learners including, learners who speak English as an Additional Language, Aboriginal and Torres Strait Islanders and children with disabilities or special educational needs.

4. Identify a range of assessment tools and their purposes.

5. Analyse students' assessment data using relevant curriculum documents.

6. Integrate literacy learning and teaching across the curriculum drawing on multimodal approaches.

7. Use student assessment data, relevant curriculum documents and English specific content knowledge to plan lessons that extend comprehension and writing and use effective pedagogical practices.

Subject Content

• Australian Curriculum: English and NSW English K-10 Syllabus aims, outcomes and content

• Analysing texts for purpose, structure, use of visuals and language devices used.

• Responsive teaching practices that enhance learning of English to diverse learners including, learners who speak English as an Additional Language, Aboriginal and Torres Strait Islanders and children with disabilities or special educational needs.

• Teaching writing for a range of purposes and audiences

• Teaching comprehension at the literal, inferential and evaluative levels

• Formative and summative assessment tools and practices

• Analysing assessment data including work samples

• Planning lessons based on student assessment data, relevant curriculum documents, English specific content knowledge and using effective pedagogical practices.

• Integration of literacy across the curriculum by drawing on multimodal approaches to literacy.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Participation	6 responses	10	N	Individual
Portfolio	1,500 words	40	N	Individual
Professional Task	1,500 words and 5 minute video presentation	50	N	Individual

TEAC 7165 Working Mathematically 2: Strengthening Connections

Credit Points 10

Coordinator Robert Mcintosh (https://directory.westernsydney.edu.au/search/name/Robert Mcintosh/)

Description This subject builds on the knowledge and practices developed in Working Mathematically 1: Exploring Connections to prepare students to work with upper primary school learners. Students will expand their understanding of primary mathematics in the NSW Mathematics K-10 syllabus for Stages 2 and 3. The focus of this subject is on mathematics pedagogy, curriculum, inquiry, learner engagement, assessment, differentiation for diversity and the integration of technology. Assessment for learning and planning will be underpinned by the Australian Curriculum: Mathematics and the relevant NSW Mathematics syllabus and curriculum documents. Students will explore how mathematical learning, fluency and problem-solving is conceptually developed. This subject will promote confident teachers who engage learners in meaningful mathematical experiences which promote autonomy and agency. This subject is included in the Transition Phase of the Master of Teaching program.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects TEAC 7094

Restrictions

Students must be enrolled in 1783 Master of Teaching (Birth-5 Years/Birth-12 Years).

Learning Outcomes

1. Apply a range of assessment tools and strategies to gather data about learners that enables the differentiation of learning experiences effective pedagogical practices including instructional strategies to strengthen their capabilities, confidence and motivation.
2. Evaluate learning against curriculum requirements by interpreting learner work samples, and practising consistent and comparable judgements, that would enable timely and appropriate feedback for learning.
3. Plan effective and engaging learning experiences that use a range of resources, including the use of technology, to achieve learner outcomes.
4. Interpret theoretical perspectives, research, the Australian Curriculum: Mathematics and the NSW Mathematics K-10 syllabus to design learning experiences that cater for diverse capabilities and promote responsive teaching.
5. Design experiences that demonstrate knowledge and understanding of the development of mathematics concepts and skills related to the teaching of number and algebra, measurement and space, statistics and probability, and the processes of understanding, fluency, problem-solving, and reasoning.
6. Prepare engaging and inclusive experiences that use appropriate pedagogies for teaching and learning mathematics, including student-centred practices, cooperative learning, problem-solving, inquiry, and investigative approaches.

Subject Content

1. Teaching Mathematics - exploring curriculum documents and continuity of learning for children, integrating mathematics across the curriculum, the role of the teacher as a responsive teacher and facilitator and the role of the child as an active learner developing their ability to think creatively, logically and critically.
2. Theoretical underpinnings - Constructivism in mathematics, working mathematically, principles of effective pedagogy in mathematics, Student engagement, lesson structures for promoting conceptual understanding - importance of independent problem-solving once a student approaches proficiency.
3. Assessment for learning and effective pedagogical practices – Assessment strategies and tools, and analysing data to inform planning, explicit teaching strategies and feedback, questions: types and structures.
4. Problem-solving, investigations, inquiry, and designing rich tasks, developing a classroom culture that supports problem-solving, enabling and extending prompts, addressing children's needs in the mathematics classroom, teaching through problem-solving, differentiation.
5. Number and algebra concepts - number sense, number talks, rich tasks to promote fraction understanding, exploring and addressing fraction misconceptions.
6. Measurement and space concepts - linking measurement and space concepts to the real-world, practical and interactive ideas to teach measurement geometry and space, using concrete materials to explore concepts, misconception involving triangles.
7. Statistics and probability concepts - representation and interpretation of data, using games to teach data, chance and probability.
8. Exploring the value of teaching resources in relation to the syllabus and mathematics teaching pedagogy, using technology.
9. Investigating culturally appropriate and student-centred learning with a focus on student equity, autonomy and agency and building proficiency in understanding, fluency, problem solving and reasoning within all lessons.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Professional Task	2,000 words	50	N	Individual
Critical Review	2,000 words	50	N	Individual

TEAC 7166 Inclusive Pedagogies

Credit Points 10

Coordinator Kerry Staples (https://directory.westernsydney.edu.au/search/name/Kerry Staples/)

Description Inclusion is a right for all children. This subject explores how socio-cultural factors influence children's experiences of difference, diversity and disability. Students will reflect on their role as a teacher in advocating for equity and access to nurturing early childhood and primary inclusive learning environments. By drawing on research and relevant curriculum documents, students will learn to optimise learning through a tiered, strength-based approach that reduces barriers to learning and strengthens the diverse capabilities of all learners. The subject promotes the importance of collaborative partnerships with families and all those working with the child. This subject is included in the Transition Phase of the Master of Teaching program.

School Education

Discipline Teacher Education: Special Education

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects TEAC 7052 TEAC 7053 TEAC 7049 TEAC 7153

Restrictions

Students must be enrolled in one of the two following programs: 1783 Master of Teaching (Early Childhood/Primary) or 1784 Master of Teaching (Early Childhood Education)

Learning Outcomes

1. Analyse how socio-cultural factors influence experiences of difference, diversity and disability and how this affects equitable access to nurturing inclusive learning environments.
2. Critique the impact of international, national and state/territory legislation, regulation and policies on early childhood and primary education inclusive pedagogies.
3. Discuss the teacher's role in both advocating for and implementing inclusion to ensure equity, engagement and inclusive pedagogies.
4. Identify communication, coordination and collaborative strategies that will create respectful, reciprocal partnerships with families and the team around the child to support inclusion in early childhood and primary school settings.
5. Analyse children's learning capabilities and barriers to learning by using knowledge of child development, learning theories and research about specific disabilities to inform practices.
6. Create a strength-based inclusion plan that respects family priorities and is aligned with curricula.
7. Plan responsive, intentional teaching strategies that will enhance children's inclusion and learning and are responsive to a child's current abilities, dispositions and skills.
8. Advocate for practices that facilitate smooth transitions and continuity of learning between systems and settings.

Subject Content

• Disability, diversity and differences – theoretical perspectives including medical, social relational and capability models of disability; community values, assumptions about and attitudes to difference, diversity and disability; rights-based approaches and equitable access to inclusive education; social-cultural factors influencing the provision of inclusive and special educational needs education.
• The evidence-based approaches to cater for specific needs and disabilities with a focus on needs with high prevalence in Australian classrooms.
• Inclusion in educational settings – teachers and educational settings' obligations; international agreements (e.g. the UN Convention on Children's Rights, 1989); national and state government policy, legislation and regulations including international and legal entitlements as defined by the Commonwealth Disability Discrimination Act 1992 and core educational policy such as the Disability Standards for Education (2005), Australian Professional Standards for Teachers; Early Years Learning Framework of Australia, the Australian and NSW curriculum documents.
• The role of the teacher as an advocate for inclusion - strategies to enhance children's learning and sense of belonging in their educational setting and community; pedagogical practices that promote high expectations of access and participation and reduce the incidence of exclusion and segregation; confidence and motivation to include and seek support.
• Working in partnership with the team around the child, specifically families and colleagues and professionals from external organisations; family-centred practices; working with social and culturally diverse families including Aboriginal and Torres Strait Islander families; collaboration, coordination and communication to support inclusion and transitions; cross-disciplinary practices and partnerships with and within teams; role of support staff.
• Assessment for learning, identification and referral - assessment tools; data gathering from multiple sources and documentation; assessment informed by knowledge of child development, learning theories, research about specific disabilities, including gifted and talented learning, children with special educational needs and curricular documents.
• Planning Cycle - Barriers to learning, belonging, being and becoming for children; gathering information to inform planning; observation techniques and documentation; designing inclusive environments that plan for support, extension and enrichment of children's learning; writing specific child outcomes; adapting curricula and environments; embedding learning opportunities and experiences; pedagogical practices; monitoring and evaluating pedagogies in relation to the child's progress; documenting and sharing data to inform future planning.
• Responsive pedagogical practices including evidence-based intentional and explicit instructional teaching strategies that support play, inclusion and learning; task analysis; differentiation, modelling, scaffolding, prompting, feedback; models and approaches to support

teaching including universal design for learning and multi-tiered systems.
• Continuity and Transitions – working collaboratively with other stakeholders; research that informs effective transition practices; supporting the continuity of learning in the next education phase; understanding the community, educational and support options; understanding the context where children come from and where they are transitioning to; facilitating participation for families and children in transitions

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Critical Review	1,500 words	30	N	Individual
Case Study	2,500 words	50	N	Individual
Reflection	1,000 words	20	N	Individual

TEAC 7167 Primary English and Literacy 3

Credit Points 10

Coordinator Jacqueline D'Warte (https://directory.westernsydney.edu.au/search/name/Jacqueline DWarte/)

Description The focus on this subject is the exploration and critical evaluation of the teaching of English and Literacy across K-6 classrooms. This subject recognises that language, discourses, and text shape students' interactions with our complex world and how we can teach students in K-6 to understand how meaning is shaped, conveyed, interpreted, and reflected. Contemporary pedagogical practices of teaching English with reference to National Literacy Progressions will be explored. There is strong emphasis on critical and creative understanding of approaches to develop literacy in K-6 with attention to understanding, interpreting, and creating texts with a wide range of diverse learners. A wide range of children's literature will be used with particular focus given to the selection and use of rich Aboriginal and Torres Strait Islander literature in teaching English. The subject provides opportunities for pre-service teachers to understand, critique and apply current literacy approaches that deliver successful outcomes for students. This subject is in the transition stage of program.

School Education

Discipline Teacher Education: Primary

Student Contribution Band

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in program 1781 Master of Teaching (Primary).

Learning Outcomes

After successful completion of this subject, students will be able to:
1. Demonstrate an understanding of the value, purpose and opportunities of teaching English to students in our contemporary world.
2. Apply textual concepts effectively in curriculum planning, instruction and assessment with reference to the K-10 English Syllabus (2022).
3. Demonstrate knowledge and understanding of culturally and linguistically responsive approaches to teaching English
4. Demonstrates cultural responsiveness and deep engagement with quality children's literature with an emphasis on Aboriginal and Torres Strait Islander literature.
5. Critically analyse critical, creative, dialogic and other pedagogies of teaching English

Subject Content

• K-10 English Syllabus (2022) and National Literacy Progression
• Understanding and critiquing, approaches to literacy and English teaching
• Pedagogies for teaching English and literacy (emphasis on creative, dialogic and critical uses of language and literacy)
• Understanding, interpreting, and creating multimodal and digital texts

• Engaging with and responding to children's literature including Aboriginal and Torres Strait Islander literature
• Analysing a range of Textual Concepts
• Planning, programming, and assessing English K-6

TOUR 1002 Tourism and Global Trends

Credit Points 10

Legacy Code 101901

Coordinator Julie Wen (https://directory.westernsydney.edu.au/search/name/Julie Wen/)

Description In 2023, this subject replaced by TOUR 1003 - Global Trends in Tourism and Events. This subject introduces students to the foundational knowledge and skills required for tourism study at UWS and professional practice in a range of tourism related careers. This subject provides students with opportunities to familiarise themselves with the core concepts and basic theory of tourism management studies. It aims to equip students with an understanding of sustainable tourism, the tourism system, and mega trends of tourism. It covers the global complexity of the tourism industry; of the social, environmental, and political realities; and the role of governments - federal, state and local together with private enterprise in the development of tourism experience, industry practice, and destinations.

School Social Sciences

Discipline Tourism

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Equivalent Subjects TOUR 1001 - Tourism Sustainability and Global Trends

Incompatible Subjects LGYA 1263 - Sustainable Tourism in Practice LGYA 1262 - Managing Tourism

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the history and contemporary issues related to tourism .
2. Analyse the tourism system, the complexities of the tourism phenomenon and key tourism concepts.
3. Assess the economic, sociocultural, and environmental impacts of tourism and their management.
4. Identify the functions and strategies of selected organizations/agencies responsible for promoting and managing tourism.
5. Identify and analyse the changing patterns and trends in global tourism over a given period of time using available data.

Subject Content

1. History and core concepts of leisure, recreation, tourism and sustainability.
2. The tourism system
3. The tourist experience
4. Tourism industry and products
5. Tourism markets and marketing
6. Economic dimensions of tourism
7. Valuation of resources
8. Tourism Satellite Account
9. Forecasting
10. Characteristics of the global industry
11. Destinations and their development: case studies

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/Group Task
Multiple Choice	Three during the semester	30	Y	Individual
Report	1,500 words per student	30	Y	Individual
End-of-session Exam	2 hours, approximately 750 words	40	Y	Individual

TOUR 1003 Global Trends in Tourism and Events

TOUR 2001 Issues in Contemporary Heritage

Credit Points 10

Legacy Code 101601

Coordinator Donna James (https://directory.westernsydney.edu.au/search/name/Donna James/)

Description In 2023 this subject is replaced by HUMN 2073 Issues in Contemporary Heritage. The aim of this subject is to get students thinking critically about heritage. To do so, it examines two main questions: "What is heritage?" and "Why does it matter?". While the answers to both may appear fairly straightforward, this subject is designed to make students question and problematise their own assumptions, rethink what is and is not heritage, and consider why, in fact, we even care at all. The subject will introduce concepts such as national identity, ethics, memorialisation, belonging, nostalgia, heritage values, status, control and repatriation. It will also introduce and examine heritage legislation, theory and practice.

School Social Sciences

Discipline Tourism

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Generate an inventory of different types and uses of heritage;
2. Summarize different approaches to heritage in varying geographic and cultural settings;
3. Analyse a contemporary heritage issue in a real-world context, namely: heritage and conflict; heritage ownership; heritage and identity; heritage and politics; looting; repatriation; heritage and destruction; and commemoration;
4. Identify Indigenous standpoints within contemporary heritage debates;
5. Utilise appropriate online technologies to organise, share and communicate heritage-related topics and issues.

Subject Content

The nature of heritage & its philosophies ? what is heritage?
A history of heritage
Heritage taxonomies (natural, cultural, tangible, intangible, digital etc.)
Who ?eowns?f heritage?
The geography of heritage (global distribution, types of heritage, relationships to different urban, archaeological, historic and natural spaces/places)
Heritage and collective memory
Heritage and Identities (communities, ethnicities, nationalism, patriotism etc.)
Heritage and values; heritage and eurocentrism; non-western heritages

Conflicts over heritage (dissonance)
Heritage and Multiculturalism
Museums and heritage
Heritage and profits (looting, fakes and forgeries)
Repatriation and Indigenous heritage

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Annotated Bibliography	1,200 words	30	N	Individual
Essay	1,500 words	40	N	Individual
Reflection	3 blog entries	20	N	Individual
Log/ Workbook	Completion of tutorial workbook	10	N	Individual

TOUR 2003 Managing Sustainable Places

Credit Points 10

Coordinator Julie Wen (https://directory.westernsydney.edu.au/search/name/Julie Wen/)

Description Managing Sustainable Places provides students with a fundamental understanding of current debates in tourism and sustainable place management. The complex relationships and interactions among the diverse stakeholders involved in managing sustainable places and tourism are explored. The subject encourages a systems approach, focusing on managing visitor experiences alongside destination attributes and community development. The subject assists students to analyse the role of tourism, events, and heritage in sustainable places through applying a wide range of case studies.

School Social Sciences

Discipline Tourism

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects SPRT 2011 Sustainability Tourism and Place

Learning Outcomes

1. Appraise the scope and complex interactions in places with tourism development and management;
2. Assess relationships between tourism and places in terms of the social, economic, and environmental vitality;
3. Apply theories to critique destination marketing and the sustainability of places;
4. Evaluate the contribution of tourism and management to healthy and sustainable places.

Subject Content

1. Key concepts and theory in management, sustainability, tourism and places;
2. Structure, roles and systems in places of tourism, events and heritage;
3. Relationship analysis: social, cultural, economic, and environmental impacts at places and sustainability;
4. Contemporary issues in tourism management and sustainability: recreation and leisure, healthy places, construction of places, the role of nature in tourism, virtual tourism, urban, rural, marine and other emerging types of tourism and the impact on the places;
5. Destinations, visitor economy and sustainable places.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

TOUR 2004 Tourism and Festivals in Society

Credit Points 10

Coordinator Felicity Picken (https://directory.westernsydney.edu.au/search/name/Felicity Picken/)

Description In this subject student's approach tourism and festivals as cultural and social phenomena. Tourism and festival related industries, visitor behaviour, visitor experience and the impacts of these are examined through a socio-cultural lens. Considering tourism as an agent of social change, and festivals as a key driving force within this, the subject is framed within the interplay between tourism, mobility and globalisation, tourism and development, and tourism and world events. The subject will also unpack some of the common motivations for leisure travel, explore the role of tourism in everyday life, and examine the interconnections between the media, consumer culture, visual culture and the tourist and festival experience.

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Equivalent Subjects HUMN 2057 - Tourism in Society

Learning Outcomes

1. Examine key concepts in tourism and festival studies
2. Explain the relationship between tourism, festivals and contemporary society
3. Examine the visitor experience and/or behaviours and motives from a social sciences perspective
4. Apply theoretical understandings of contemporary social issues to industry-based case studies

Subject Content

1. Tourism and festivals in contemporary society
2. Tourist motivations: the search for difference and authenticity
3. Visitor experience and the carnivalesque
4. The social construction of tourist attractions
5. Tourism, festivals and spectacle
6. Commodification and tourism
7. Media cultures, tourism and festivals
8. Tourism and development
9. Tourism impacts
10. Tourism, international politics and world events

Assessment

TOUR 3001 Tourism, Events and Technology

Credit Points 10

Coordinator Donna James (https://directory.westernsydney.edu.au/search/name/Donna James/)

Description This subject explores the ways in which digital technologies are reshaping travel, including travellers' experiences, and planning and management of the travel industry. Students will learn how digital technologies are being utilised, and the opportunities and challenges these technologies present. The subject will provide opportunities to engage with travel apps, virtual/augmented reality technologies, smart attractions and transport technologies. Students will also learn how to conceptualise and pitch their own digital travel products. Upon completion of the subject, students will be well placed to develop and manage innovative, socially responsible travel and mobility technologies.

School Social Sciences

Discipline Tourism

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Equivalent Subjects BUSM 3079 - Travel in the Digital Age

Restrictions

Successful completion of 80 credit points of study.

Learning Outcomes

1. Evaluate opportunities for the use of digital technologies in travel, tourism and events.
2. Evaluate potential challenges, threats and social-inequalities created by social technologies.
3. Critically review digital travel, tourism and event technologies.
4. Ascertain technology gaps in the travel, tourism and event industries.
5. Devise new travel, tourism and event technologies.
6. Propose digital technologies to an expert audience.

Subject Content

1. The digital disruption of tourism, travel and events;
2. Rethinking tourism and event communities and stakeholders in relation to the digital futures of work and society;
3. Opportunities, benefits, challenges and risks of digital technologies in travel, tourism and events;
4. Travel, tourism and events smartphone applications and their design and development;
5. Digitally enhanced attractions, destinations and events (including digital interpretation, and the use of augmented and virtual reality);
6. Digital travel experiences, destinations, events and festivals;
7. The future of transport and transit (including autonomous cars/buses/trains/planes, windowless planes, digital airports/hotels); and
8. Opportunities for understanding tourist, events and festival markets with digital technology (including tracking and ethical/privacy implications).

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

TOUR 3002 Cultural Tourism and Events

Credit Points 10

Coordinator Felicity Picken (https://directory.westernsydney.edu.au/search/name/Felicity Picken/)

Description This subject examines the relationship between culture, heritage, tourism and events. It firstly provides an introduction to contemporary issues in heritage, tourism and event management. Secondly, it investigates the phenomenon of cultural tourism – its nature (including places and events), the market, visitors, the issues in planning and management – in the context of heritage and sustainable tourism praxis in Australia (and globally) as well as in the context of local communities.

School Social Sciences

Discipline Tourism

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Equivalent Subjects CULT 3015 - Heritage and Tourism

Learning Outcomes

1. Explain and examine the principles and issues of culture and heritage in relation to tourism and events planning and management practices in Australia, with particular reference to sustainability
2. Analyse the complexities of cultural tourism including its nature, the market, visitor characteristics and motivations, the planning dimensions, attraction types, events and the issues surrounding these (especially politics in government policies, guidelines and regulations)
3. Apply contemporary heritage and cultural tourism theory and practice to propose solutions to key 'real world' Issues of cultural tourism and events management

Subject Content

1. Culture and heritage: key concepts
2. Key management processes
3. Key tourism and events components
4. Key Issues of cultural tourism and events management

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Poster	Visual poster and 500 word written summary	30	N	Individual

Level Undergraduate Level 3 subject

Equivalent Subjects BUSM 3072 - Tourism Industry Professional Placement

Restrictions

To enrol in this subject, students must have completed at least 160 credit points and be enrolled in one of the following programs or specialisations:

- 1664 Bachelor of Tourism Management (as Alternate Core subject)
- 1916 Bachelor of Tourism and Event Management (as Core subject)
- 6030 Diploma in Social Science/Bachelor of Tourism Management (as Alternate Core subject)
- 6047 Diploma in Social Science/Bachelor of Tourism and Event Management (as Core subject)
- 1667 Bachelor of Social Science (Heritage and Tourism) (as Elective subject)
- 0012 Major in Heritage and Tourism (as Specialisation Pool subject)
- 0306 Major in Festival and Event Management (as Specialisation Pool subject)
- 0302 Major in Tourism Management (as Specialisation Pool subject)
- 0304 Major in Place Management and Planning (as Elective subject)
- 0303 Major in Sport, Events and Tourism (as Elective subject)

- 0305 Major in Sustainability, Tourism and Environment (as Elective subject)

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Articulate knowledge and skills, and utilise networks, to apply for professional roles in the tourism, hospitality, events, visitor economy and/or visitor experience sectors.
2. Work effectively in team environments.
3. Design and manage a program of professional development.
4. Self-evaluate and report professional development.
5. Develop and articulate a career plan.

Subject Content

1. Applying for professional roles, including: developing resumes, writing expressions of interest and conducting interviews.
2. Professional development, including: professional workplace conduct and developing goals, plans, online identities and networks.
3. Acquiring visitor economy work-place knowledge and skills.
4. Self-evaluation and reporting work-based activities and performance.

Assessment

TOUR 3004 Destination Management

Credit Points 10

Coordinator Thilakshi Mallawa Arachchi (https://directory.westernsydney.edu.au/search/name/Thilakshi Mallawa Arachchi/)

Description Destination Management provides students with a fundamental understanding of the concepts associated with managing places as destinations. The subject develops analytical skills that include the coordination of a destination through tourism industry's sectors, their relationship with each other and the opportunities and challenges they face in the predictable future. An appreciation of the importance of a destination's unique cultural, natural and economic attributes is developed from the viewpoint of sustainability and through the prism of a destination audit. The nature of competition and gaining competitive advantage is addressed throughout the content.

School Social Sciences

Discipline Tourism

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Equivalent Subjects BUSM 3007 - Destination Management

Restrictions

Successful completion of 80 credit points of study.

Learning Outcomes

1. Analyse structure, roles and interrelationships of Destination Management Organisations (DMO) at various levels of operation
2. Evaluate factors influencing destination management
3. Undertake a destination resource analysis (Audit)
4. Evaluate destination strategies based upon destination management objectives
5. Critique destination management strategies
6. Identify and describe opportunities, challenges and constraints affecting DMOs in formulating strategies

Subject Content

- Destination characteristics and destination profiling (critical review)
- Coordination structures and principle players in the coordination of destination management - Strategic and sustainable destination management (policy, practices and issues)
- Place management

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TOUR 3005 Tourism Policy and Planning

Credit Points 10

Coordinator Donna James (https://directory.westernsydney.edu.au/search/name/Donna James/)

Description This subject provides students with a general understanding of planning theory as it relates to sustainable tourism policy and practice. Students will hear directly from practitioners about the ways in which policy and planning is being deployed to address contemporary tourism issues. The subject will explore various planning techniques, tourism policies, scenario mapping strategies and consider conflict resolution practices. The major assessment develops students' abilities to identify deficiencies in current policy and to propose policy recommendations.

School Social Sciences

Discipline Tourism

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Equivalent Subjects BUSM 3073 - Tourism Policy and Planning

Restrictions

Students must have completed 80 credit points prior to enrolling in this subject.

Learning Outcomes

1. Examine planning theory as it relates to sustainable tourism;
2. Analyse various planning techniques, tourism policies, scenario mapping strategies and conflict resolution practices;
3. Work individually and in teams to present their ideas orally and in written forms;
4. Integrate quantitative and qualitative tourism data to formulate policies and procedures;
5. Apply planning theory to an analysis of tourism policies, sites, facilities and activities.

Subject Content

- Tourism policy and planning
- Sustainable tourism concepts and indicators to case studies
- Tourism experiences and opportunities using qualitative and quantitative data
- Stakeholder conflicts and impact assessments
- Destination management
- Scenario planning
- • Professional presentations
- • Planning frameworks

Assessment

TOUR 3006 Festivals and Events

Credit Points 10

Coordinator Willem Coetzee (https://directory.westernsydney.edu.au/search/name/Willem Coetzee/)

Description This subject explores the complexities of planning and managing major festivals and events. Students will gain an appreciation of the benefits festivals and events can provide for communities and visitor economies, as well as the challenges and risks they present. The subject will also cover a variety of other aspects, including: marketing, branding, sustainability, place-making, access, equity and security/policing. Students will be encouraged to attend events and festivals over the course of the semester, and experts will be invited to provide 'real-world' case-studies. The major assessment allows students to draw on the knowledge and skills they are developing to propose their own major festival/event.

School Social Sciences

Discipline Tourism

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 80 credit points of study.

Learning Outcomes

1. Analyse the role of festivals and events, including their relationship to tourism.
2. Evaluate the benefits and challenges that festivals and events present to communities and visitor economies.
3. Critically appraise festival and event practices.
4. Work individually and in teams to present their ideas orally and in written forms.
5. Propose festivals and/or events to an expert audience.

Subject Content

- The purpose of festivals and events.
- Strategies for planning and managing major festivals and events.
- The role of festivals and events in the visitor economy.
- The challenges and risks of festivals and events.
- Festival and event marketing, branding, sustainability, place-making, access, equity and security and policing.
- NSW and Australian festival and event organiser expert perspectives.
- Developing major festival and event proposals.
- Pitching a major festival/event.

TOUR 5001 Sustainable Tourism and Heritage

Credit Points 10

Coordinator Willem Coetzee (https://directory.westernsydney.edu.au/search/name/Willem Coetzee/)

Description This subject explores heritage and tourism through the lens of sustainability. It examines how heritage and tourism are impacted by sustainability challenges as well as how heritage and tourism can be undertaken in more sustainable ways. The subject contextualises how heritage and tourism have been used in social, economic and urban development and revitalisation strategies across the globe. It critically investigates how heritage and tourism are unfolding in the Global South, Indigenising and decolonising approaches and contemporary movements towards activism and justice (social, cultural, environmental, restorative). The subject also considers threats to these sectors' sustainability, including impacts of the Anthropocene.

School Social Sciences

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 5 subject

Equivalent Subjects TOUR 7001 - Sustainable Tourism Hospitality and Events

Learning Outcomes

1. Evaluate key sustainability issues facing the heritage and tourism sectors.
2. Critically analyse real-world heritage and tourism problems using scholarly ideas about sustainability.
3. Exercise reflexivity around how personal and professional practice can impact on sustainability.
4. Communicate critical scholarly concepts in accessible ways to promote sustainable heritage and tourism futures

Subject Content

1. Sustainability in the context of heritage and tourism.
2. The role of heritage and tourism in development and revitalisation strategies.
3. Perspectives from the Global South.
4. Indigenisation and decolonisation.
5. Justice and activism.
6. Fragility of heritage and tourism futures.

TOUR 5002 Frontiers in Sustainable Tourism Practice and Places

Credit Points 10

Coordinator Felicity Picken (https://directory.westernsydney.edu.au/search/name/Felicity Picken/)

Description Tourism is a practice that both reflects and creates the changing, global world. International tourism is a key driver of the human experience of globalisation including the development of global citizenry, the opportunities and obligations that accompany this and the challenges, limitations and sometimes unintended effects of seemingly inconsequential travel choices. The tourism industry is concerned with the ongoing production of novel ways of experiencing the world and draws upon innovation in science and technology as well as imaginaries to accomplish this. This subject will examine how tourism creates and responds to futures in the realms of space, economy, culture and knowledge and how we can assess, evaluate and predict the effects of these.

School Social Sciences

Discipline Tourism

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 5 subject

Equivalent Subjects TOUR 7002 - Tourism Hospitality and Event Futures

Learning Outcomes

1. Examine how tourism creates and responds to futures in the realms of space, economy and culture.
2. Synthesise advanced knowledge about specific futures, including the challenge or opportunity they present, key debates, approaches, and opinions.
3. Develop and effectively communicate a critical position on a specific futures topic.
4. Demonstrate an in-depth understanding of futures planning via relevant methods and case studies.
5. Assess the limits of forecasting and futures methods.

Subject Content

1. Tourism, the Anthropocene and disruption.
2. Tourism and alternative development paradigms.
3. Tourism, science and fiction in the creation of new imaginaries.
4. Tourism and new spatial frontiers (space and oceans).
5. Tourism as a vector: disease and surveillance.
6. Tourism and the reconfiguration of the local.
7. Global citizenry and touristic practice.
8. Tourism, the production of uncertainty and contradictory outcomes.
9. Scenario planning and forecasting methods.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

TOUR 6001 Tourism, Heritage and Events Policy and Governance

Credit Points 10

Coordinator Willem Coetzee (https://directory.westernsydney.edu.au/search/name/Willem Coetzee/)

Description This subject explores policy and governance in the tourism, heritage and events sectors. Students will explore current policies, and learn how to critically analyse them, especially in the context of sustainable development. The subject will also explore different governance structures in these sectors, and their influence on policy development and sustainability outcomes. After completing this subject, students will be well placed to take on governance, planning and policy roles to reshape the tourism, heritage and events sectors, both in Australia and internationally.

School Social Sciences

Discipline Tourism

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 6 subject

Assumed Knowledge

Basic knowledge of tourism, heritage and/or events is desirable.

Learning Outcomes

1. Analyse the role of governance stakeholders in the tourism, heritage and events sectors in Australian and international contexts.
2. Critically analyse tourism, heritage and events policy and its role in the tourism, heritage and events sectors in Australian and international contexts.
3. Evaluate the relationship of tourism, heritage and event policies to sustainable development outcomes.
4. Propose sustainable tourism, heritage and event policies.

Subject Content

1. Tourism policy and governance.
2. Heritage policy and governance.
3. Festival and events policy and governance.
4. Policy and governance for sustainable development outcomes.
5. Policy analysis.
6. Governance structures.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Critical Review	1,200 words	30	N	Individual
Presentation	15 minutes	25	N	Individual
Proposal	1,500 words	45	N	Individual

TOUR 6002 Critical Issues for Heritage and Tourism Futures: Assessed Seminars

Credit Points 10

Coordinator Joseph Cheer (https://directory.westernsydney.edu.au/search/name/Joseph Cheer/)

Description In Spring 2024, this subject replaced by TOUR 7006 - Contemporary Issues for Tourism, Hospitality and Event Management. The world in which we live is undergoing rapid change – socially, environmentally, and politically. Responding to such change requires the constant renewal of our knowledge and skills. This subject explores a range of issues currently facing professionals and researchers working in heritage and tourism management, nationally and internationally. Students who complete this subject are provided an opportunity to deepen their understanding of a chosen issue by preparing and presenting a seminar.

School Social Sciences

Discipline Tourism

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 6 subject

Restrictions

Students must be enrolled in one of the following programs AND have passed 40 credit points:

- 1920 Master of Sustainable Tourism and Heritage
- 8083 Bachelor of Research Studies
- 8084 Master of Research (High Cost)
- 8085 Master of Research (Low Cost),
- 0320 Sustainable Tourism and Visitor Economies, Postgraduate Major

Assumed Knowledge

A basic understanding of contemporary issues in tourism and heritage is desirable.

Learning Outcomes

1. Assess critical and/or controversial issues facing the tourism and heritage sectors, nationally and internationally.
2. Develop and express a critical position on an issue related to tourism and/or heritage to stimulate collective and constructive debate.
3. Communicate an in-depth understanding of an issue using relevant and illustrative case studies.
4. Organise and present a seminar session.

Subject Content

1. Heritage, tourism and climate change.
2. Heritage, tourism and environmental, social and political context
3. Heritage, tourism and sustainable futures.
4. Heritage, tourism and international development.
5. Heritage, tourism and urban transformations.
6. Heritage, tourism and Indigenous culture
7. Heritage, tourism and migration.
8. Heritage, tourism and the economic context

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Case Study	1500 words	40	N	Individual
Presentation	20 minute presentation + 10 Minutes Q&A	20	N	Individual
Report	1500 words	40	N	Individual

Prescribed Texts

- There is no set text for this subject. A weekly reading list with links to readings will be made available on vUWS.

TOUR 6003 Sustainable Visitor Economies

Credit Points 10

Coordinator Joseph Cheer (https://directory.westernsydney.edu.au/search/name/Joseph Cheer/)

Description In Spring 2024, this subject replaced by TOUR 7003 - Sustainable Visitor Economies. While the intersecting industries and mobilities that comprise the 'visitor economy' (e.g. tourism, events, international education, business travel, hospitality, accommodation, transport, etc.) have traditionally been observed individually, there is a growing recognition of the need for holistic approach to planning and managing these diverse sectors. This is especially important for accomplishing sustainability outcomes. In this subject, students will learn about principles and strategies for managing sustainable visitor economies. Industry and government stakeholders will share case-studies detailing their experiences managing visitor economies.

School Social Sciences

Discipline Tourism

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 6 subject

Learning Outcomes

1. Analyse the role of visitor economies in different destination contexts.
2. Evaluate principles and strategies for managing visitor economies.
3. Evaluate sustainable development goals in relation to visitor economies.
4. Propose strategies for managing visitor economies sustainably.

Subject Content

1. Sustainable Tourism: Contemporary Issues and Perspectives
2. The Visitor Economy: Definitions and Parameters
3. Sustainable Tourism and the Visitor Economy: Impacts
4. Sustainable Tourism and the Visitor Economy: Policy, Planning and Development
5. Sustainable Tourism and the Visitor Economy: Building Destination Resilience
6. Sustainable Tourism and the Visitor Economy: Crisis Management
7. Prospects for Sustainable Tourism and the Visitor Economy

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Applied Project	2,000 words	50	N	Individual
Portfolio	1,000 words	30	N	Individual
Presentation	15 minutes	20	N	Individual

TOUR 6004 Data Capture and Creative Communication

Credit Points 10

Coordinator Donna James (https://directory.westernsydney.edu.au/search/name/Donna James/)

Description In Spring 2024, this subject replaced by TOUR 7004 - Tourism, Hospitality and Events Insights. This subject provides students with the knowledge and skills to creatively address a range of operational and engagement challenges in the tourism, heritage and visitor economy sectors. Through practical application and class-based theory, students will have the opportunity to learn a variety of data-capture and creative communication techniques, including: safe drone operation, high quality audio-visual recording, video editing, digital mapping, and graphic design for marketing, interpretation and public engagement.

School Social Sciences

Discipline Tourism

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 6 subject

Assumed Knowledge

A basic understanding of marketing principles is desirable.

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Demonstrate an ability to capture data and communicate creatively through a number of techniques.
2. Capture audio and video material and edit these into a professional video.
3. Create simple maps using specialist software.
4. Analyse spatial data for the purposes of operational planning.
5. Use graphic design principles and software to create marketing and interpretation materials.

Subject Content

1. Different data capture and creative communication techniques for the tourism, heritage and visitor experience economies sectors.
2. Audio-visual editing skills using Adobe Premiere Rush (free software).
3. Operational mapping skills using Geographical Information Systems (GIS).

4. Graphic design of marketing and interpretation materials using Adobe Illustrator.
5. Professional communication with industry partners to co-design resources that fulfil a business need.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Applied Project	3 minute edited video (Equivalent to 750 words)	30	N	Individual
Applied Project	1,000 words	30	N	Individual
Poster	1,250 words	40	N	Individual

Prescribed Texts

- There is no set text for this subject. A weekly reading list with links to readings will be made available on vUWS.

TOUR 7001 Sustainable Tourism, Hospitality and Events

Credit Points 10

Description Sustainability has become a major issue in the contemporary visitor economy, including in the tourism, hospitality, events and related sectors. However, stakeholders do not necessarily understand the specific aspects of sustainability which their business has an impact upon or is impacted by. Stakeholders in tourism, hospitality and events are not always familiar with the tools of sustainability assessment and have limited comprehension of how a robust sustainability audit can aid in reducing operational costs improving corporate image and increasing customer patronage. This subject will provide students with an opportunity to undertake a sustainability audit from an environmental, economic and social perspective.

School Social Sciences

Student Contribution Band

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects TOUR 5001 - Sustainable Tourism and Heritage

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Definitions, concepts, historical evolution, and the importance of the main sustainability pillars (social, economic, environment).
2. By conducting a sustainability audit, evaluate key sustainability issues facing tourism, hospitality and events. Issues such as environmental sustainability (impacts, carbon, waste, resources, sustainable practices in energy, water, waste, and infrastructure); Economic sustainability (challenges, responsible practices, ethical considerations, CSR, partnerships and spending patterns); and Social Impacts on communities, cultures, and traditions.
3. Critically analyse real-world tourism, hospitality and events problems using scholarly ideas about sustainable auditing and the challenges of implementation.
4. Exercise reflexivity around how personal and professional practice can impact on sustainability.
5. Communicate critical scholarly concepts in accessible ways to promote sustainable tourism, hospitality and events in the future.

Subject Content

1. Sustainability in the context of Tourism, Hospitality and Events
2. The role of sustainable tourism, hospitality and events in development and revitalisation strategies
3. Perspectives from the North / South divide.
4. A review of the methods of assessing the progress of the visitor economy towards sustainability goals.
5. Sustainability auditing and the challenges of its implementation

TOUR 7002 Tourism, Hospitality and Event Futures

Credit Points 10

Description Tourism is a practice that both reflects and creates the changing, global world. International tourism is a key driver of the human experience of globalisation including the development of global citizenry, the opportunities and obligations that accompany this and the challenges, limitations and sometimes unintended effects of seemingly inconsequential travel choices. The tourism industry is concerned with the ongoing production of novel ways of experiencing the world and draws upon innovation in science and technology as well as imaginaries to accomplish this. Further, tourism is not insulated from practices that happen within the events and hospitality fields and must be taken into account when considering wholistic and strategic approaches. This subject will examine how these create and respond to futures in the realms of space, economy, culture and knowledge and how we can assess, evaluate and predict the effects of these.

School Social Sciences

Student Contribution Band

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects TOUR 5002 - Frontiers in Sustainable Tourism Practice and Places

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Examine how tourism, hospitality and events create and respond to futures in the realms of space, economy and culture.
2. Synthesise advanced knowledge about specific futures, including the challenge or opportunity they present, key debates, approaches, and opinions.
3. Develop and effectively communicate a critical position on a specific futures topic.

4. Demonstrate an in-depth understanding of futures planning via relevant methods and case studies.
5. Assess the limits of forecasting and futures methods.

Subject Content

1. Tourism, the Anthropocene and disruption.
2. Tourism, hospitality and events futures.
3. Science and fiction in the creation of new imaginaries.
4. New spatial frontiers (space and oceans).
5. Vectors of future spaces and practices: architectures, robotics, ideas, disease and surveillance.
6. Tourism and events and the reconfiguration of the local.
7. Global citizenry and touristic practice.
8. Futures, uncertainty and contradictory outcomes.
9. Scenario planning and forecasting methods.

TOUR 7003 Sustainable Visitor Economies

Credit Points 10

TOUR 7005 Tourism, Hospitality and Events Policy and Governance

Credit Points 10

Description This subject explores policy and governance in the tourism, hospitality and events sectors. Students will explore current policies, and learn how to critically analyse them, especially in the context of sustainable development. The subject will also explore different governance structures in these sectors, and their influence on policy development and sustainability outcomes. After completing this subject, students will be well placed to take on governance, planning and policy roles to reshape the tourism, hospitality and events sectors, both in Australia and internationally.

School Social Sciences

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects TOUR 6001 - Tourism Heritage and Events Policy and Governance

Assumed Knowledge

Basic knowledge of tourism, hospitality and/or events is desirable.

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Analyse the role of governance stakeholders in the tourism, hospitality and events sectors in Australian and international contexts.
2. Critically analyse tourism, hospitality and events policy and its role in the tourism, hospitality and events sectors in Australian and international contexts.
3. Evaluate the relationship of tourism, hospitality and event policies to sustainable development outcomes.
4. Propose sustainable tourism, hospitality and event policies.
5. Appraise the multidisciplinary nature of the tourism system.

Subject Content

1. Tourism, Hospitality and Events Governance.
2. Tourism, Hospitality and Events policy analysis at International (macro), National (meso), and Local (micro) scale for a sustainable future.
3. Critical Tourism, Hospitality and Events policy and governance.

TOUR 7006 Contemporary Issues for Tourism, Hospitality and Event Management

TOUR 7007 Visitor Economy Professional Placement (Postgraduate)

Credit Points 20

Coordinator Garth Lean (https://directory.westernsydney.edu.au/search/name/Garth Lean/)

Description The Visitor Economy Professional Placement subject provides students with an opportunity to complete a work placement in the tourism, events, hospitality, visitor economy and/or visitor experience sectors. Students work in a voluntary capacity with an industry host to develop work-ready knowledge, skills and networks. The subject has a strong focus on professional development, with students learning how to apply for professional roles (including developing professional resumes, expressions of interest and conducting interviews), and develop online profiles, networks, and career goals and plans. On completion of the subject, students will be well placed to apply for positions in the visitor and experience economies.

School Social Sciences

Discipline Tourism

Student Contribution Band HECS Band 4 20cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1936 Master of Sustainable Tourism, Hospitality and Event Management.

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Articulate knowledge and skills, and utilise networks, to apply for professional and leadership roles in the tourism, hospitality, events, visitor economy and/or visitor experience sectors.
2. Work effectively in team environments as both a team member and team leader;
3. Design and manage a program of professional development.
4. Self-evaluate and report professional development at an advanced level.
5. Develop and articulate a career plan.

Subject Content

• Applying for professional roles, including: developing resumes, writing expressions of interest and conducting interviews.
• Professional development, including: professional workplace conduct and developing goals, plans, online identities and networks.
• Acquiring visitor economy work-place knowledge and skills.
• Advanced self-evaluation and reporting work-based activities and performance.

VISU 2003 From Ochre to Acrylics to New Technologies

Credit Points 10

Legacy Code 101755

Coordinator Madison Shakespeare (https://directory.westernsydney.edu.au/search/name/Madison Shakespeare/)

Description This subject examines the emergence of the Indigenous Australian visual arts movement. It will provide students with a body of knowledge which explores the transition of art-making as it emerged from an historical cultural practice: from ochre to acrylics to new technologies. In examining the Indigenous visual arts movement beginning with the Papunya Tula artists, students will gain an insight into the significant contribution urban and regional Indigenous artists make to the Australian economy and culture. Students will have the exciting opportunity to participate in site visits and engage with a number of Indigenous visual artists. This subject is available to all Undergraduate students who have open electives.

School Humanities & Comm Arts

Discipline Visual Arts And Crafts

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Restrictions

Successful completion of 40 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. outline the Indigenous visual art movement beginning with the Papunya Tula artists;
2. identify different contemporary Indigenous visual artistic styles;
3. differentiate between what is culturally symbolic and what is contemporary visual art form;
4. Examine the way in which Indigenous visual artists are often expected to produce stereotypical works;
5. explore new creative forms in telling their own story.

Subject Content

Historical overview of the emergence of the Indigenous Australian visual arts movement
Introduction to cultural symbolism and meaning in contemporary visual art form
Overview of the different Indigenous visual artistic styles
Understanding of the politics of representation as it relates to Indigenous visual artists
Understanding of the politics of identity/?faboriginality?f/?findigeniety?f
Understanding of the politics of collectors and collections
Understanding of working in creative partnership with Indigenous visual artists

Assessment

VISU 2007 Animation and Visual Effects (WSTC)

Credit Points 10

Legacy Code 700328

Coordinator Ben Fletcher (https://directory.westernsydney.edu.au/search/name/Ben Fletcher/)

Description Explore the art and technology of animation and visual effects as applied to digital screen media production. In this unit, you will be introduced to the principles of animation and compositing and learn how to create effective motion sequences integrated with sound. Working with commercial software, you will explore the unique possibilities of animation and visual effects production and experiment with alternative, creative, narrative storytelling approaches. Develop critical, conceptual and practical skills within the context of animation and visual effects which will then enable you to deliver powerful and compelling visual stories on multiple media platforms.

Applied project	1,500 words equivalent	20	N	Individual
Applied project	Up to 5 minutes	40	N	Individual

VISU 3002 Photomedia: Fashion and Identity

Credit Points 10

Legacy Code 100941

Coordinator Enrico Scotece (https://directory.westernsydney.edu.au/search/name/Enrico Scotece/)

Description This subject explores issues of identity through photographic practice as used in Fashion Photography. Fashion is a universal form of self-expression, making it the communication strategy most employed to express identity based on material and non-material cultures. The role of photography in the creation of iconic and culturally referential images in both commercial and editorial work will be researched, analysed and interpreted in order to place the student's work in context. It provides students with capacity building through an advanced experience with studio lighting, digital effects for fashion based image making and experience with location and studio photography and of professional photography as it is used in fashion publications.

School Humanities & Comm Arts

Discipline Photography

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) DESN 2013

Equivalent Subjects LGYA 0822 - Fashion Style and Identity LGYA 2433 - Photomedia 2 Fabrication

Restrictions

Students must be enrolled in program 1571 Bachelor of Design (Visual Communication), 1737 Bachelor of Design - Visual Communication (Dean�fs Scholars) or 1843 Bachelor of Graphic Design (Pathway to Teaching Secondary). Students from other degrees must be enrolled in the Graphic Design major or sub-major in order to enrol into this subject. Specialist photography facilities with limited space, equipment and limited specialist technical support preclude students who have not completed the pre-requisite subjects from taking this subject as an elective.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply resourceful, creative methods of project development
2. Apply research methods into history, theory and practice of fashion and portraiture photography in developing image content for published forms.
3. Demonstrate proficiency in the use of high-end cameras, studio and location lighting.
4. Utilize sequencing, image editing and post production methods for image enhancement.
5. Demonstrate proficiency in art direction of images for an identified target audience

Subject Content

- The practice of contemporary fashion photography and portraiture will be revealed through The exercises and projects.
- technical skills gained in The exercises will feed into The major Project, helping students develop A professional approach to their chosen topic.
- Visual narrative, as expressed in The multi page spread will be researched and analysed, providing contexts for final photographic and design work.
- Projects will allow students to research and develop appropriate Visual communication strategies, through A range of approaches and perspectives.
- Creative strategies for design solutions revealing aspects of Visual identity will be explored through class presentations and Discussion of work.
- Lynda.com courses: as determined

WELF 1002 Context of Human Services

Credit Points 10

Legacy Code 101596

Coordinator Dibya Chhetry (https://directory.westernsydney.edu.au/search/name/Dibya Chhetry/)

Description This subject introduces students to the role of human services within the Australian political context. Students will develop a critical analysis of the contribution of the market, state and community encouraging reflection on underpinning values. It will also identify the change strategies which can be developed and used in each of these domains to bring about socially just outcomes.

School Social Sciences

Discipline Social Work

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Incompatible Subjects WELF 1005 - Introduction to Welfare POLI 1005 - Social Policy

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the shifts in Australian socio-political environment and apply this knowledge to locate how the human services are positioned within our contemporary context
2. Explain the competing interests that challenge explanations of human services provision
3. Distinguish the values of divergent perspectives underpinning competing explanations to critically evaluate their own values
4. Develop strategies which can be used to generate positive social change

Subject Content

- Australian political structure
- Australian welfare provision
- Introduction and analysis of the state
- Introduction and analysis of the market
- Introduction and analysis of community
- Value underpinnings of individual and systemic understandings
- Identification of change strategies
- Operationalisation of change towards socially just ends

WELF 1003 Human Services Intervention Strategies

Credit Points 10

Legacy Code 400193

Coordinator Teddy Nagaddya (https://directory.westernsydney.edu.au/search/name/Teddy Nagaddya/)

Description This is an introductory subject which examines underlying theories of social welfare work, community work, youth work and international social development. Students will explore the ideological underpinnings of theories and discourses in the human services, particularly with regard to the impact of poverty, inequity and the experience of vulnerable populations. The contribution of other disciplines to knowledge and practice in these fields of practice will also be examined. This subject will focus on developing beginning assessment and intervention skills in working with individuals, groups, and communities. Students will also develop an understanding of ethical issues related to social work practise and working in human service organisations as a member of a team.

School Social Sciences

Discipline Human Welfare Studies and Services, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Restrictions

Students must be enrolled in one of the following programs: 1665 Bachelor of Community Welfare, 1666 Bachelor of Social Work, 1709 Bachelor of Criminal and Community Justice, 1713 Bachelor of Criminal and Community Justice/Bachelor of Social Work, 1735 Bachelor of Humanitarian and Development Studies, 1874 Postgraduate Bridging Program (Social Work), 2767 Bachelor of Criminal and Community Justice/Bachelor of Laws, 6027 Diploma in Social Science/Bachelor of Humanitarian and Development Studies or 7170 Undergraduate Certificate in Counselling and Mental Health..

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe theories, concepts and models underpinning social work and community welfare work.
2. Develop assessment and intervention skills or working with individuals, groups and communities within a context of the inequitable distribution of wealth and power.
3. Apply ethical issues related to working with individuals, groups and communities.
4. Apply professional decision making in the organisational contexts.

Subject Content

- Basic concepts underlying human service practice.
- Human Rights.
- Empowerment.
- Advocacy.
- Self-determination.
- Self-help.
- Social Justice.
- Democratic Participation.
- Anti-Oppressive Practice: gender, ethnicity, class, politics, Aboriginality, culture, religion, (dis)ability, age and sexual orientation.
- Theories underlying human services practice.
- Different ways of understanding the world.
- Different levels of theory: formal and informal.
- Working with individuals.
- An overview major models of casework.
- Assessment and intervention.
- Working with groups.
- Types of groups facilitated by human service workers.
- Principles of working for and with groups.
- Group dynamics and group processes.
- Stages of group development.
- Community Work.
- Personal, professional and organisational power and social control.
- Issues related to accountability.
- The inter relationship of the worker's personal, professional values and those of their agency.
- Understanding of ethics and professional practice in the welfare sector and the role of training and supervision in supporting this.
- A Brief Introduction to Human Services in Contemporary Australia.
- The New 'helping era'- Social Innovation in Human Service Practice.
- Human services within rural and remote regions of Australia.

WELF 1007 Mental Health Workforce Training

Credit Points 10

Legacy Code 102530

Coordinator Tim Griffin (https://directory.westernsydney.edu.au/search/name/Tim Griffin/)

Description This subject is a Level 1 Open Elective for eligible students who have completed the Certificate IV in Mental Health (CHC43315) with Wesley Mission. This Certificate prepares mental health workers for the provision of self-directed, recovery oriented support for people affected by mental illness and psychiatric disability. The initial training is carried out on campus at Western Sydney University under the guidance of Wesley Mission (Sydney). The subject involves reflecting on the links between mental health workforce training and the academic discipline of psychology. The focus of this subject is on the knowledge required for mental health workers.

School Psychology

Restrictions

Students must be enrolled in 1689 Bachelor of Community and Social Development and must have successfully completed 40 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of the range of agencies in the human services sector.
2. Assess the impact of their own values in working with individuals and communities in the welfare context.
3. Demonstrate appropriate verbal and written communication skills for working in community welfare.
4. Apply professional skills appropriate to community welfare agency work.
5. Critically reflect on their experiences in placement, including their learning in the placement, skills acquired and areas for development.
6. Demonstrate report writing skills required for the placement report.

Subject Content

1. Successfully completing 140 hours of practicum in a welfare agency
2. Networking and referral skills
3. Welfare needs and services available to people within a particular region.
4. Role of volunteers in the community sector and the role of students on placement.
5. Critical thinking and analysis.
6. Basic communication skills, including professional telephone skills, and report writing skills
7. Goal setting/preparation for first placement.
8. Value and ethical dilemmas in the human services sector.
9. Task planning and prioritisation
10. How and when to use consultation, peer support and supervision.
11. Methods of reflection on the process of intervention in light of personal and agency ideology and social welfare values.

WELF 1011 Introduction to Social Work in Australia

Credit Points 10

Legacy Code 102860

Coordinator Sharlotte Tusasiirwe (https://directory.westernsydney.edu.au/search/name/Sharlotte Tusasiirwe/)

Description This subject introduces students to social work, its common values, different perspectives, and current debates. Diverse constructions of social work embedded in different knowledge systems and models will be explored. Social work perspectives in a multicultural cosmopolitan Australia will be analysed including, amongst others, Indigenous social work, White western social work, Pacific social work, Afrocentric social work, memorial social work, Brazilian social work, etc. An overview of the changing Australian socio-political environment, policy and practice context will be explored and the role of social work in the different fields of practice analysed, to locate strategies for generating positive and creative social change.

School Social Sciences

Discipline Social Work

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe social work and the common values that underpin social work practice
2. Discuss different constructions of social work embedded in different knowledge systems and their application in multicultural cosmopolitan Australia and globally
3. Recognise Australiaðfs socio-political environment and the nature of disadvantage experienced by certain socio-cultural groups such as women, refugees& asylum seekers, First Nations Peoples, older people, People with Disabilities, LGBTIQ, the unemployed, homeless etc
4. Describe how government policies and practices are developed and implemented to address disadvantage
5. Develop strategies that work towards the broader goals of social justice and human rights and individual and community advocacy and empowerment

Subject Content

Introduction to social work; unifying values like social justice, human rights, anti-oppressive practice
Current debates in social work (like westernisation vs indigenisation/ decolonisation; social work as an agent of social control or social change; globalisation vs localisation; Universalism/professionalism vs multiculturalism)
Introduction to different social work perspectives and the types of social work they inform: Indigenous social work; Western social work Pacific social work
Afrocentric social work, a Nepalese model of social work, etc
Australian socio-political context: contemporary social issues related to inequality: poverty & inequality
Australian socio-political context: Gender & Inequality, racial inequality; environmental injustice etc
Making and implementing social policy to address disadvantage
Social work fields of practice and our roles and responsibilities for practice (Social work with First Nations People, LGBTIQ, Older people and People with Disability, community work, mental health
Research, environmental and disaster work
Social work in a changing world; different landscapes: where to now?

WELF 1012 Understanding Disability: Historical and Contemporary Frameworks

Credit Points 10

Legacy Code 102846

Coordinator Irena Veljanova (https://directory.westernsydney.edu.au/search/name/Irena Veljanova/)

Description Disability Studies is a multi-disciplinary field that investigates, critiques, and enhances society's understandings of disability. The subject will introduce students to contemporary frameworks for recognising how people with disabilities have experienced disadvantage and exclusion because of personal and societal responses to impairment. The subject will explore how disability activists and scholars have re-conceptualised disability from a more empowering social-political and human rights perspective as an element of human diversity. The subject is grounded in case study pedagogy to ensure the integration of applied practice with rich conceptual and rigorous frameworks.

Discipline Care for the Disabled

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply key concepts and the major frameworks (models) for analysing disability.
2. Describe how societyðfs concept of normalcy results in everyday forms of discrimination, exclusion and poverty, in local, national, and global contexts.
3. Explain the ways in which disability rights movements and disabled people have driven change at the local, national and international level.
4. Present information and arguments related to disability studies using an appropriate academic style.
5. Apply strategies to work effectively in a team.

Subject Content

Historical developments in the field and their continuance in contemporary practice.
Introduction of contemporary understandings for recognising how people with disabilities have experienced disadvantage and exclusion.
Personal and societal responses to impairment since industrialisation to the contemporary time.
The work of disability activists and scholars in re-conceptualising disability including contemporary perspectives governed by international socio-legal policy that promote rights, justice and equality.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Annotated Bibliography	4 academic core texts reviewed with a 200 summary of each (total 800 word count plus bibliography)	30	N	Individual
Presentation	15 min online group presentation	30	N	Group
Reflection	1000 words plus bibliography	40	N	Individual

WELF 1013 Counselling Foundations (Block)

Credit Points 10

Coordinator Jack Isherwood (https://directory.westernsydney.edu.au/search/name/Jack Isherwood/)

Description This subject introduces students to key concepts and theories of counselling and other therapeutic approaches. Students will also develop an understanding of counselling practice in an Australian context and will learn how to apply their knowledge of subject content to their own life experiences and real world examples. Students will also develop the capacity to critically evaluate the strengths and weaknesses of different counselling approaches.

School Western Sydney The College

Discipline Counselling

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Restrictions

Students must be enrolled in 7170 Counselling and Mental Health (UG Cert)

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Demonstrate a basic understanding of counselling in the Australian context
2. Identify the prominent ideas and concepts that define contemporary counselling
3. Demonstrate an understanding of the role of theory in counselling practice
4. Use basic skills to evaluate selected counselling modalities
5. Apply the principles of counselling to the student's own life experiences and case studies.

Subject Content

- Counselling in the Australian context
- Theoretical foundations of counselling
- Psychoanalytic/psychodynamic approaches
- Person-centred and experiential approaches
- Behavioural, REBT, and CBT approaches
- Contemporary approaches (e.g., Existential, Solution Focussed, Family, Feminist, Narrative)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Presentation	5-7 minutes	20	N	Individual
Portfolio	1,200 words	40	N	Individual
Case Study	1,200 words	40	N	Individual

WELF 1014 Introduction to Youth Work: History, Theories & Approaches

Credit Points 10

Description This subject introduces learners to the theories and concepts of youth work from multiple perspectives. Discover the origins and development of youth work as a distinct profession, globally and in Australia. Gain an understanding of current youth work code of ethics, with a focus on social justice and human rights. The subject introduces varied approaches to understanding youth, exploring their depictions across time, space, and cultures.

School Social Sciences

Student Contribution Band

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Identify the ways in which diverse perspectives, such as biopsychosocial and developmental theories, anthropological approaches, sociocultural approaches, and Indigenous perspectives, understand youth development.
2. Describe the historical evolution of youth work as a distinct profession, both globally and within Australia.
3. Discuss the ethical principles that underpin effective youth work practice.
4. Apply critical thinking and decision-making skills for effective engagement with young people.

Subject Content

- Social constructions of young people.
- Different approaches to understanding young people within youth work (such as biopsychosocial and developmental theories, anthropological approaches, sociocultural approaches, and Indigenised perspectives on youth development)
- Definition and history of youth work as a profession in Australia and globally.
- Ethics and code of practice of youth work.

WELF 1015 Practicum 1: Foundations in Practice

Credit Points 10

Description This subject explores various models and approaches to youth work practice that promote young people's active involvement, empower them to make decisions, and emphasise cooperation and collaboration, instead of coercion. The subject also incorporates a 140-hour practicum observation component, providing students with first-hand experience and insights into real-world youth work scenarios. Students gain theoretical insights, practical skills, and real-world experience by observing a youth worker in action and assisting with entry level tasks. This integrated approach equips students with

a holistic understanding of youth work models and their practical application.

School Social Sciences

Student Contribution Band

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Pre-requisite(s) WELF 1014 - Introduction to Youth Work Theory and Approaches

Restrictions

Students must be enrolled in program 1933 Bachelor of Youth Work and have successfully completed 40 credit points at Level 1.

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Identify and describe a range of youth work models and approaches used by youth workers in the youth work sector.
2. Apply youth work models to real-world scenarios, considering their strengths and limitations.
3. Describe ethical considerations when selecting and applying youth work models.
4. Analyse the ethical aspects of putting diverse youth models into practice.

Subject Content

- Theories and models for youth work
- Youth work models that promote youth agency, voluntary participation, and are centred on cooperation and collaboration with young people.
- Ethical application of youth work models
- 140-hour youth work field observation component.

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject, students must have submitted a:

- Working with Children Check
- National Police Check

Refer to the Special Requirements website for more information.

WELF 2001 Community Management and Organisations

Credit Points 10

Legacy Code 101644

Coordinator Jeeva Sajan (https://directory.westernsydney.edu.au/search/name/Jeeva Sajan/)

Description This subject focuses on community management in Australia and the social and economic factors that influence and frame community management practices. At the macro level, it examines the effects of neo-liberal (economic rationalist) reforms in the public and community sectors; and the rise of developments such as managerialism and 'third way' approaches, on community management practices. The subject also explores developments in management practices in response to social developments such as multiculturalism, recognition of diversity, equal employment opportunity and recognition of contextual and local issues. It further looks at community management work practices, including volunteerism, steering committees, management committees, and collectives.

School Social Sciences

Level Undergraduate Level 2 subject

Pre-requisite(s) BEHV 1021

Equivalent Subjects LGYB 6026 - Lifespan Development in the Human Services

Restrictions

Students must be enrolled in 1666 Bachelor of Social Work, 4598 Bachelor of Social Work, 4522 Bachelor of Community Welfare or 4523 Bachelor of Community Welfare (Family and Community). Successful completion of 60 credit points including the pre-requisite subject above.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Summarise the key concepts, theories and methods related to the 'Lifespan Perspective' of studying human development.
2. Explain how cultural and social differences influence lifespan development.
3. Relate concepts of lifespan development, including cultural and social differences, to current human services.
4. Recognise bio-psycho-social dimensions across the lifespan.

Subject Content

1. Foundational concepts related to the lifespan perspective and approaches to understanding human development, theories, debates and methods.
2. Cultural and social differences in lifespan development, including indigenous Australians and gender.
3. Lifespan development related to human services.
4. Heredity, prenatal development and birth
5. Bio-psycho-social development related to:
    - Infancy
    - Pre-school years
    - Middle childhood
    - Adolescence
    - Early, middle and Late adulthood
    - Old Age and end of life

Assessment

WELF 2011 Management and Community Organisations (Block Mode)

Credit Points 10

Legacy Code 101775

Coordinator Scott Avery (https://directory.westernsydney.edu.au/search/name/Scott Avery/)

Description This subject focuses on community management in Australian Aboriginal and Torres Strait Islander communities and the social and economic factors that influence and frame community management practices. At the macro level, it examines the effects of neo-liberal (economic rationalist) reforms in the public and community sectors; and the impact of developments such as managerialism and 'third way' approaches on community management practices. The subject has a specific focus on management practices and issues facing organisations operating in Indigenous communities. It explores the tensions and pressures faced by Indigenous organisations and strategies for developing sustainable management practices.

School Social Sciences

Level Undergraduate Level 2 subject

Pre-requisite(s) WELF 2003

Equivalent Subjects WELF 2001 - Community Management and Organisations LGYA 7654 - Managing in Community Services (AREPMetro)

Restrictions

Students must be enrolled in 1689 Bachelor of Community and Social Development and must have successfully completed 60 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the competing agendas and policies that impact on community management processes
2. Analyse and appraise a diverse range of government, provider and consumer and community demands on Aboriginal and Torres Strait Islander community organisations
3. Recognise and critique different models of community management, management styles and techniques with reference to theories of community management
4. Identify skills and strategies for working within different management models and organisations that best suit organisations in Aboriginal and Torres Strait Islander communities
5. Distinguish the local and sustainable management issues for Aboriginal and Torres Strait Islander communities and community organisations

Subject Content

Overview of the changing environment for community organisations and management
Consideration of the social, political and economic factors framing community organisations and management practices in Aboriginal and Torres Strait Islander Communities
Models and practices of community management for sustainability in Aboriginal and Torres Strait Islander communities
Strategies and skills for working within different models of management and organisation
Issues and challenges facing Aboriginal and Torres Strait Islander communities and organisations

Assessment

WELF 3001 Child Abuse as a Social Issue

Credit Points 10

Legacy Code 101381

Coordinator Ireni Farag (https://directory.westernsydney.edu.au/search/name/Ireni Farag/)

Description This subject enables students to examine the way in which child abuse has become a public issue. It considers the assumptions, values and interests which underlie definitions of abuse as well as intervention and prevention strategies promoted to protect children from abuse. In order to do this, students will examine constructions of childhood, the positioning of children and attitudes towards children and families. They will explore the various responses to child abuse in contemporary systems, policies and practices that work to address child abuse. Students will develop the skills required to ensure that children are active participants in decisions made for their protection.

School Social Sciences

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Equivalent Subjects LGYB 5808 - Child Abuse as a Social Issue

Restrictions

Successful completion of 80 credit points

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and describe the ideologies in society that shape child abuse discourse including social constructions of children and childhood
2. Critically analyse the child protection system (policy, research and practice) including the roles of key stakeholders; agencies, families, the State, the media and children themselves
3. Evaluate the role of children in child protection contexts; childrenðfs rights, childrenðfs views and childrenðfs participation particularly in relation to decision-making
4. Recognise and examine the impact of social, cultural, political and contextual factors on the position of children; issues of CALD, disability, Aboriginality, class, gender)
5. Demonstrate critical thinking skills required to respond to the needs of children in a child protection context

Subject Content

History of child abuse; definitions and social constructions of children, childhood and abuse; incidence and prevalence; discourse on risk and protection
Theoretical frameworks, approaches, methods and how they are applied in practice; the role of values
Child protection systems I (key stakeholders; statutory, welfare and social responses)
Child protection systems II (policies and processes, legislation, out-of-home care, early intervention and prevention)
Children?fs role in child protection; children?fs rights, children?fs views and children?fs participation in decision-making
Social relations and diversity within child abuse; issues of CALD, disability, Aboriginality, class, and gender.
Macro view; system reviews and inquiries, research, reflexive practice, future directions

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Utilise strategies for effective engagement with community partners and knowledge of ethical and professional conduct in various community settings. (APAC Foundational Competencies 1.2, 1.3, 1.5)

2. Critically review community engaged learning in relation to service-learning theory in addressing issues faced by community organisations. (APAC Foundational Competencies 1.1, 1.2, 1.3, 1.6)

3. Engage and evaluate in community programs. (APAC Foundational Competencies 1.2, 1.3, 1.5, 1.6)

4. Apply knowledge and theory to real-world situations/issues that concern community organisations. (APAC Foundational Competencies 1.2, 1.3, 1.5)

5. Employ sensitivity toward cultural and social diversity and its impact on social capital. (APAC Foundational Competencies 1.2, 1.4, 1.5)

6. Reflect on their own cultural perspectives and that of other cultures in relation to the community engaged learning, including Aboriginal and Torres Strait Islander cultures, and various vulnerable groups. (APAC Foundational Competencies 1.2, 1.4, 1.6)

Subject Content

1. Introduction to community engaged learning

2. Community concerns surrounding public sector agencies and non-profit community organisations

3. Effective communication and interpersonal skills

4. Effective and logical problem solving, and creative thinking

4. Strategies and skills for service delivery and advocacy

6. Research and collaborative service provision in public sector and non-profit community agencies

7. Leadership and advocacy toward social responsibility and analytical skills for effective intervention

8. Cross-cultural and social diversity in heritage needs/cultural perspectives

9. Lifelong learning through personal engagement with public sector and non-profit community agencies

Special Requirements

Legislative pre-requisites

• Students must have completed a Student Undertaking.
• The legislative requirements depend on the program and/ or placement. For example, working with children check and or criminal record check. Students will be notified about the requirements.

WELF 3008 Learning through Indigenous Australian Community Service (Day Mode)

Credit Points 10

Legacy Code 101758

Coordinator Madison Shakespeare (https://directory.westernsydney.edu.au/search/name/Madison Shakespeare/)

Description Learning through Indigenous Australian Community Service will provide students with an exciting opportunity to apply their disciplinary knowledge and skills in an Indigenous Australian cultural context. Students will negotiate and conduct an interview with an Indigenous or Non-Indigenous Service Provider working in an Indigenous context. Students will gain cross cultural awareness and insights as well as knowledge about Indigenous community affairs including cultural protocols, decision-making and leadership. This experience will provide students with a level of cultural understanding and competency that can lead to improved communication skills and effective partnering with Indigenous people, organisations and communities.

Discipline Human Welfare Studies And Services

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. compile a directory resource related to Indigenous groups, businesses, organisations and service providers relevant to their disciplinary area;
2. demonstrate their engagement through active learning in an Indigenous context;
3. demonstrate capacity to communicate effectively with Indigenous people;
4. identify processes to develop successful partnerships with Indigenous people and their communities.

Subject Content

Overview of cultural protocols/cultural competency skills
Understanding cultural and social contexts of Indigenous community-individual, group, families (extended), organisation and whole community
Understanding the diversity within and between Indigenous people and communities
Understanding Reciprocity
Effective communication with Indigenous people and communities
Developing partnerships with Indigenous people and communities

WELF 3009 Managing Offenders in the Community

Credit Points 10

Legacy Code 102065

Coordinator Shima Shahbazi (https://directory.westernsydney.edu.au/search/name/Shima Shahbazi/)

Description Managing Offenders in the Community is a subject that draws links between the theory and practice of working with offenders in a variety of roles and settings. It provides a legal and policy framework for this work and covers the main theoretical perspectives and research insights into what is effective practice in this work. The subject takes a practical, applied approach linking the material directly to work with offenders and will be of particular interest to current or future practitioners in community justice, corrections, social work and policing.

School Social Sciences

Discipline Criminology

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 100 credit points in the currently enrolled program. This subject is designed to be taken in the third year of the program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Recognise the main theoretical perspectives and research insights that inform work with offenders in the community - Integrate theoretical knowledge;
2. Identify legislative and policy requirements that are relevant to work with offenders in the community - demonstrate understanding of crime etc;
3. Differentiate and compare the various approaches to working with offenders in the community - critically evaluate community justice principle: basic research and analysis;
4. Construct a principled and theoretically informed argument for taking particular approaches in response to offending behaviour, with a particular focus on Aboriginal and Torres Strait Islander peoples - produce clear written evaluations of crime; knowledge and understanding of Aboriginal and Torres Strait Islander cultures and ways of knowing;
5. Assess the main issues in working with an individual offender in the community and recommend approaches to work with him or her - exercise critical skills to solve problems of crime;
6. Formulate a planned intervention for working with an offender in the community, based on theory and research - evaluate and apply criminological knowledge to solve applied problems.

Subject Content

Community Justice in Australia
Working with Adult Offenders in Australia
Working with Young Offenders in Australia
Theories of Offending and Evidence-Based Practice
Restorative Justice and Victims
Risk Management and Public Protection
Diversity: Criminal Justice work with particular groups
Organisation and Management of Criminal Justice
Technology and Criminal Justice
Facilitating Desistance and Building Good Lives
Values and Ethics in Community Justice
Practice Skills: Assessing and Engaging with Involuntary Clients

WELF 3011 Professional Practice in Aged Care and Disability

Credit Points 10

Legacy Code 400968

Coordinator Joanne Rodrigues (https://directory.westernsydney.edu.au/search/name/Joanne Rodrigues/)

Description This subject provides the student with an understanding of current trends underlying policies and services in the aged care and disability industry, which will help them to understand the dynamics of the changing aged care and disability service sector. Students will examine the strategic environments of aged care and disability to develop global and national perspectives, identify drivers of change and development, and the major players in aged care and disability policies. Students will develop an understanding of the aged care and disability competencies and determinants of well-being for aged and disabled persons, which can be used in their future roles in the health industry. Through reflections on practice in aged care and disability , students will develop an individual approach to aged care and disability service issues which they can use in the future as health care professionals.

Level Undergraduate Level 3 subject

Equivalent Subjects LGYA 7162 - Professional Practice in Aged Care REHA 2008 - Professional Practice in Aged Care and Disability

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate knowledge of the strategic environment of the aged care and disability contexts;
2. Discuss the central notions and trends underlying policies and services in aged care and disability services;
3. Examine a range of resources and facilities relevant to services for older people and people with disability;
4. Explore how the service systems for aged people and people with disabilities impact on services provision and interdisciplinary teamwork;

5. Critically apply knowledge of factors leading to the well-being of older persons and people with disabilities and the appropriate service models and processes required to maintain well-being;
6. Critically apply skills in developing processes leading to well-being of older people and people with disabilities in a range of service settings.

Subject Content

Orientation to unit.
Introduction to the aged care and disability environment
1. Legislation & Policy
- funding and policy in aged care and disability
- legal Issues and rights
- tensions in aged care and disability
- drivers of change
- social policy
2. Care Contexts
- globalisation
- population Trends
- Ageism
- economic Fundamentalism and internationalization
- social capital
3. Professional Vision & Change
- quality care
- management and leadership in aged care and disability
- aged care settings
- reflective practice
- team Building
4. Clinical reasoning and practice Issues
- Determinants of health & well-being
- Transcultural Issues
- mental health Issues
- individual control
- direct care workers in aged care and support workers in disability
- carers
- private sector care
- family care
- community care and aged care packages and respite services

WELF 3013 Social Work and Health

Credit Points 10

Legacy Code 400513

Coordinator George Turner (https://directory.westernsydney.edu.au/search/name/George Turner/)

Description This subject integrates health as focus for social work as a profession and as a specific domain of practice. This advanced subject has three main areas of focus. The first area is developing knowledge and skills to critically analyse concepts related to health in global and local social work practice, including decolonising and Indigenous ways of knowing. The second is exploring health for specific populations and communities, the context of health service provision in Australia, and social work in health services. The third is professional skills for social work practice, including social work assessment and health promotion.

WELF 3017 Understanding needs within Indigenous Australian Communities

Credit Points 10

Legacy Code 102411

Coordinator Scott Avery (https://directory.westernsydney.edu.au/search/name/Scott Avery/)

Description In this unit, students build on their knowledge and experience to identify and service the needs of Aboriginal and Torres Strait Islander communities. Students will utilise their research and cultural competency skills to create a community profile and project brief within an Aboriginal and Torres Strait Islander community. This will enable students to effectively integrate theory, practice and culture to understand Aboriginal and Torres Strait Islander community needs. Students will also examine the role of an Aboriginal and Torres Strait Islander Professional in Community Development settings.

School Social Sciences

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Equivalent Subjects LGYA 1759 - Understanding Indigenous Australian Community Service LGYA 1678 - Learning through Indigenous

Australian Community Service (Block Mode) WELF 3008 - Learning through Indigenous Australian Community Service (Day Mode)

Restrictions

Successful completion of 60 credit points of study. Students must be enrolled in the 1689 Bachelor of Community and Social Development (BCSD) program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate ability to create a culturally competent community profile using research knowledge and skills.
2. Demonstrate ability to create a culturally competent project brief using research knowledge and skills.

Subject Content

1. Understanding needs of Indigenous peoples.
2. Researching, planning and creating a community profile.
3. Planning and creating a project brief.
4. Overview of cultural competency skills and their application in workplace documents.
5. Understanding the complexities of the role of an Aboriginal and/or Torres Strait Islander professional in community development.

Assessment

Level Undergraduate Level 3 subject

Equivalent Subjects LGYA 7657 - Welfare Field Education 2 (AREPMETRO) WELF 3018- Welfare Field Education 2

Restrictions

Students must be enrolled in 1689 Bachelor of Community and Social Development and must have successfully completed a minimum of 80 credit points including subject 101765 - Welfare Field Education 1 (Block Mode).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate the skills needed for working in welfare and community organisations
2. Show evidence of networking and career planning
3. Demonstrate an advanced level of knowledge and skills in welfare practice
4. Critically evaluate their own performance, a variety of aspects of agency functioning
5. Demonstrate an ability to critically assess the need for appropriate services and be able to take action to develop these services.

Subject Content

Casework skills, including assertiveness and strategies and techniques for working with a range of client groups
The contexts of welfare and community work ? community, institutional and governmental structures and inter-connections
Group work skills
Community work skills
Ethical practice in welfare work
Resume writing skills and career planning
Occupational Health and Safety issues including dealing with violence in the workplace
Peer support and supervision on placement
Integration of theory with practice
Debriefing placement experiences
Advanced report writing

Special Requirements

Legislative pre-requisites

To be eligible to enrol in a subject and attend a health-related placement in your program, students must meet Western Sydney University program requirements and Special Legislative Requirements to be assessed in their first year of study against the following.
1. National Criminal History Check: Students must have a current (expiring 3 years from date of issue) check valid for their entire program. A valid National Criminal history check must be an Australia wide check, include the student's full name matching their Student ID card and date of birth and not have any offences listed. If a student has a criminal history identified on their check, they must provide a Clinical Placement Authority Card (CPAC) or conditional letter from the NSW HealthShare Employment Screening and Review Unit https://www.health.nsw.gov.au/careers/student_clearance/Documents/appendix-10-student-application.pdf

International students must additionally have a translated International Police Check or statutory declaration.
2. A NSW Working with Children Check (WWCC) clearance letter issued under the category of volunteer valid for their entire program.
3. A current approved first aid certificate valid for their entire program. Approved provider courses can be found at http://training.gov.au (http://training.gov.au/).
4. A completed vaccination/immunisation card with all serology results containing expiry dates and currency must be maintained by the student to ensure compliance for their entire course.
5. NSW Undertaking/Declaration form.
6. Completed any additional health forms required (such as NSW Health Code of Conduct, Health Student Undertaking/Declaration and Tuberculosis (TB) Assessment Tool).
7. Relevant Local Health District specific documentation as requested.

Contact your School for further details. Resources are also available on the Placement Hub (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/) website.

Pre-requisite(s) WELF 2017

Incompatible Subjects WELF 2005 - Field Education 1 WELF 3004 - Community Welfare Field Education

Restrictions

Students must be enrolled in programs 1665 Bachelor of Community Welfare, 1666 Bachelor of Social Work or 1713 Bachelor of Criminal and Community Justice/Bachelor of Social Work and must have successfully completed 120 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain and demonstrate the different communication skills needed for working with a range of clients and volunteers in human services organisations.
2. Prepare for work within the human services sector through developing a network for future employment and career planning after successful completion of 400 hours of practicum.
3. Demonstrate an advanced level of knowledge and skills in human services practice including the role of supervision in the field placement and workplace.
4. Critically evaluate their own learning and practice, and evaluate their readiness for entering the human services workforce; understand concepts of self-care.
5. Demonstrate an ability to critically assess the need for appropriate services and be able to take action and develop these services.

Subject Content

1. 400 hours of supervised practicum in a welfare/human services agency.
2. Intervention skills: casework, group work, community work, including assertiveness and strategies and techniques for working with a range of client/consumer groups.
3. Professional communication skills, including telephone skills and report writing skills, critical thinking and analysis, networking and referral skills.
4. Community needs and human services available to people within a particular region.
5. The nature of supervision, peer support, assessment and self-care on placement.
6. Ethical practice in human services work; consideration of the values and ideology in practice frameworks.
7. Working with volunteers and bureaucracies.
8. Work Health and Safety issues including dealing with violence in the workplace.
9. Methods of critical reflection on process of intervention in light of personal agency ideology and social welfare values.

10. Debriefing from the placement experience; integrating theory with practice and future learning.

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Refer to the Special Requirements website for more information.

WELF 3021 Disability Rights, Policy and Governance

Credit Points 10

Legacy Code 102849

Coordinator Amie Matthews (https://directory.westernsydney.edu.au/search/name/Amie Matthews/)

Description Since the ratification of the United Nations Convention on the Rights of Persons with Disabilities, laws, policy and service supports concerning persons with disability have transformed. This has resulted in significant reforms in Australia and globally. Disability rights have now become central to addressing long standing inequalities and discrimination experienced by persons with disability. Disability rights now also govern social services, supports and programs. This subject examines these developments with the global ratification of disability rights and critically evaluates the ensuing policies and practices that frame the context within which professional practice and expertise occurs. Drawing upon in-depth case studies, students will critically examine and engage in key issues surrounding the translation and realisation of disability rights in governance of social service systems, policy and practices.

Discipline Care for the Disabled

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine international disability rights norms and their impact on national and state policy and governance.
2. Evaluate key international and national governance and policy issues for the realisation of disability rights in everyday life.
3. Apply critical analytical frameworks to disability rights to professional practice to foster learning and improvement.
4. Assess contemporary developments in disability policy impact the practices in professional service environments and practices.

Subject Content

1. Disability rights frameworks - historical through to most recent (international conventions, declarations, global governance institutions - WB, UN, ILO, OECD etc).
2. National and international responses to disability rights (legislation, policy and service provision).
3. In-depth case study examples from Australia, UK, EU and the Global South (Peru, South Africa, Sri Lanka) to illustrate legislative reforms with the ratification of disability rights.
4. The role of disability activists and advocates in driving social change for the realisation of the disability rights (boomerang activism, national activism, online activism).

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	10 multiple choice questions	10	N	Individual

WELF 3022 Disability and Sexuality

Credit Points 10

Legacy Code 102848

Coordinator George Turner (https://directory.westernsydney.edu.au/search/name/George Turner/)

Description This subject introduces students to the mutual fields of sexuality studies and disability studies by employing the critical lenses of queer, disability, and feminist theory to interrogate the privileging and ownership by mainstream culture of sex. By illuminating how people with physical, emotional, and cognitive disabilities experience romance, love, emotional intimacy and physical connection, students will explore how insufficient sexuality supports create diminished agency, excessive vulnerability, lack of access and "otherness" for disabled people. Students will ground their critical thinking by examining how they have constructed sexuality and disability norms based on their values, beliefs and views of these two intersecting and often taboo topics. Students will be encouraged to appreciate the importance of sexuality in the lives of people with disabilities and view the expression of our sexuality, sexuality agency, and access to sexual health as a basic human right.

School Social Sciences

Discipline Care for the Disabled

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Distinguish relevant concepts including sexual literacy, sexual justice and sexual voice within sexuality and disabilities scholarship.
2. Critically reflect on comfort, skills and knowledge through the lens of sexuality and disability.
3. Evaluate the sexuality model, such as the Circles of Sexuality as it applies to sexuality in everyday life for people with disabilities.

Subject Content

The Circles of Sexuality - an integrative, holistic practice model of sexual health.
Sexual justice & activism ? scholarly and professional approaches to sexuality as a human right.
Role of sexual well-being advocates ? Embracing frameworks of strengths, perspective and positive sexuality to support clients with a disability.
Countering the medicalisation of disability and reproduction-focus of sexuality.

Assessment

WELF 3023 Indigenous Disability and Inclusion

Credit Points 10

Legacy Code 102847

Coordinator Jeeva Sajan (https://directory.westernsydney.edu.au/search/name/Jeeva Sajan/)

Description Intersecting two socially and economically marginalised groups, Australia's Indigenous peoples living with disability require services and supports that are both culturally safe and disability aware. Through this subject, future practitioners of the disability and Indigenous services workforce will be exposed to an Indigenous philosophy of disability that is characterised by a culture of inclusion, as a contrast to westernised medical models of disability. The subject will examine the unique exposures to social and economic marginalisation and discrimination encountered by people who are Indigenous and live with disability, and how these factors intersect as barriers to their access to service systems, supports and lives with dignity.

School Social Sciences

Discipline Care for the Disabled

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain how the cultural knowledge of disability interact with western models of disability for Indigenous peoples.
2. Describe the barriers that Indigenous peoples with disability face in accessing services and support systems.
3. Identify how culturally informed disability can facilitate the participation of Indigenous people with disability and other marginalised groups.
4. Examine the ways in which Indigenous knowledge of disability and social inclusion can be enabled in policy and practice.

Subject Content

Indigenous cultural and conceptual understandings of disability and social inclusion, in comparison to western models of disability.
The historical and contemporary impact of colonisation on the discrimination and social inequality experienced by Indigenous people with disability.
Applications of Indigenous disability and inclusion in international human rights and Australian public policy, focussing on the National Disability Insurance Scheme (NDIS) and Closing the Gap.
Contemporary developments in culturally led social inclusion, healing and narrative practice.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

WELF 3024 Professional Practice in Aged Care and Disability (UG Cert)

Credit Points 10

Legacy Code 500061

Coordinator Mia Hatzistergos (https://directory.westernsydney.edu.au/search/name/Mia Hatzistergos/)

Description This subject provides the student with an understanding of current trends underlying policies and services in the aged care and disability industry, which will help them to understand the dynamics of the changing aged care and disability service sector. Students will examine the strategic environments of aged care and disability to develop global and national perspectives, identify drivers of change and development, and the major players in aged care and disability policies. Students will develop an understanding of the aged care and disability competencies and determinants of well-being for aged and disabled persons, which can be used in their future roles in the health industry. Through reflections on practice in aged care and disability, students will develop an individual approach to aged care and disability service issues which they can use in the future as health care professionals.

REHA 2008 Professional Practice in Aged Care and Disability

Restrictions

Students Must be enrolled in: 7173 Undergraduate Certificate in Aged Care Support Or 7176 Undergraduate certificate in Disability Support

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate knowledge of the strategic environment of the aged care and disability contexts;
2. Discuss the central notions and trends underlying policies and services in aged care and disability services;
3. Examine a range of resources and facilities relevant to services for older people and people with disability;
4. Explore how the service systems for aged people and people with disabilities impact on services provision and interdisciplinary teamwork;
5. Critically apply knowledge of factors leading to the well-being of older persons and people with disabilities and the appropriate service models and processes required to maintain well-being;
6. Critically apply skills in developing processes leading to well-being of older people and people with disabilities in a range of service settings.

Subject Content

Orientation to unit.
Introduction to the aged care and disability environment
1 Legislation & Policy
1.Funding and policy in aged care and disability
2.Legal issues and rights
3.Tensions in aged care and disability
4.Drivers of change
5.Social Policy
2 Care Contexts

1.Globalisation
2.Population trends
3.Ageism
4.Economic Fundamentalism and internationalization
5.Social capital
3 Professional Vision & Change
1.Quality care
2.Management and leadership in aged care and disability
3.Aged care settings
4.Reflective practice
5.Team building
4 Clinical reasoning and practice Issues
1.Determinants of health & well-being
2.Transcultural issues
3.Mental health issues
4.Individual control
5.Direct care workers in aged care and support workers in disability
6.Carers
7.Private sector care
8.Family Care
9.Community care and aged care packages and respite services

WELF 4001 Contemporary Social Work Practice

Credit Points 10

Legacy Code 400518

Coordinator Suzanne Egan (https://directory.westernsydney.edu.au/search/name/Suzanne Egan/)

Description This subject provides a forum in which students can examine contemporary issues that impact on social work practice. The use of technology in social work practice and its implications for clients and practitioners; the exploration of culturally and spiritually sensitive and creative approaches to social work practice; and human rights based practice. Students are encouraged to take a critical best practice approach, identifying the best aspects of social work practice and seeking to replicate it. There is a particular emphasis on applying this approach to child wellbeing and protection, mental health and work with Aboriginal Australians and Torres Strait Islander groups.

School Social Sciences

Discipline Social Work

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 4 subject

Pre-requisite(s) WELF3020 - Field Education 1 OR WELF2005 - Field Education 1

Restrictions

Students must be enrolled in 1666 Bachelor of Social Work or 1713 Bachelor of Criminal and Community Justice/Bachelor of Social Work.

Assumed Knowledge

Advanced understanding of practice theories and range of social work methods including casework, group work, community work, research and policy.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify major contemporary issues influencing the ways social workers practise, particularly related to the use of technology and social media;
2. Demonstrate understanding of the need to practise in a culturally and spiritually sensitive manner, including in work with Aboriginal Australians and Torres Strait Islanders;
3. Apply critical, reflective and creative skills to make informed decisions in professional and applied contexts;
4. Outline ways in which practitioners can work to intervene effectively to assist individual and groups of clients in a variety of contexts;
5. Analyse their own social work practice and that of colleagues, to identify and replicate the best aspects;
6. Generalise their learning from a specific practice situation to the overall context in which such situations arise.

Subject Content

1. Technology and social media in social work practice and services

2. Disability
3. Critical best practice and appreciative inquiry
4. Mental health
5. Child protection and child well being
6. Working alongside Aboriginal and Torres Strait Islander peoples and communities
7. Interdisciplinary practice
8. Culturally sensitive approaches to social work
9. Working with older people and communities

WELF 4002 Counselling and Consultation

Credit Points 10

Legacy Code 101247

Coordinator Martin Daly (https://directory.westernsydney.edu.au/search/name/Martin Daly/)

Description This subject introduces students to the basic skills underlying professional helping, providing a foundation for further training in counselling or psychological therapy. Students explore the professional helping relationship, the counselling process, common counselling and therapeutic frameworks, and learn key counselling micro-skills. There is a strong focus on applied skill development through in-class skills practice and assessment. Professional ethics and responsiveness to client characteristics including age, gender and cultural background are also emphasised. The subject provides structured opportunities to reflect on personal and professional development and readiness for further training in professional helping.

School Psychology

Level Undergraduate Level 4 subject

Equivalent Subjects LGYA 0475 - Counselling and Collaborative Consultation 1

Restrictions

Students must be enrolled in one of the following programs: 1796 Graduate Diploma in Psychology, 1860 Bachelor of Psychological Studies (Honours), 1905 Bachelor of Psychological Science (Honours), 1504 Bachelor of Arts (Psychology) Honours, 1500 Bachelor of Psychology students who have successfully completed 240 credit points including the 160 credit point core sequence in Psychology, 1834 Bachelor of Psychology/1865 Bachelor of Psychology (Honours) students who have successfully completed 240 credit points including the 120 credit point core sequence in Psychology and the 40 credit point Psychology Extension minor prior to 2022 or for students who commenced 1865 Bachelor of Psychology (Honours) from 2022, students must have successfully completed 240 credit points including the 140 credit point core sequence in Psychology. All students must have met the minimum requirements for entry into fourth year of the Australian Psychology Accreditation Council (2010; Section 4.1.1): The entry requirement for a fourth year program is previous successful completion within the last 10 years, of an accredited three year sequence in psychology or the first three years of an integrated accredited four year program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate a working knowledge of the nature of the professional helping relationship, including the role of empathy and active listening
2. Build and maintain rapport in a simulated professional helping relationship
3. Demonstrate, apply and evaluate appropriate interpersonal communication and interview skills relevant to psychological practice, including active listening skills, clarifying and reflecting, paraphrasing and summarising, questioning, empathic responding, motivational interviewing, normalising, reframing, and challenging
4. Explain the basic components of common counselling and psychological therapy frameworks, and their application across different client types and presenting problems
5. Demonstrate a working knowledge of key ethical, professional and interprofessional considerations
6. Explain the principles of cultural responsiveness in professional helping
7. Apply self-reflection to evaluate professional strengths and limitations, fitness for practice, and avenues for professional development.

Subject Content

1. The nature of the professional helping relationship.
2. Developing and maintaining rapport.

3. The counselling process.
4. Basic counselling micro-skills, including verbal and non-verbal active listening skills, clarifying and reflecting, paraphrasing and summarising, questioning, empathic responding, motivational interviewing, normalising, reframing, and challenging.
5. Cultural and minority group sensitivity and responsiveness.
6. Introduction to ethical frameworks and responsibilities in psychological therapy.
7. Introduction to risk management.
8. Overview of intervention strategies in counselling and psychological therapy.
9. Adaptation of basic skills to varied professional helping contexts and formats.
10. Challenges and rewards as a professional helper.
11. Readiness for a career in professional helping.

Assessment

WELF 4006 Ideologies of Practice in Social Work

Credit Points 10

Legacy Code 400517

Coordinator Frances Gale (https://directory.westernsydney.edu.au/search/name/Frances Gale/)

Description Social work practice is not a neutral activity arising from an objective viewpoint but is inextricably bound to varying ideologies and propositions that are concerned with human conduct. This subject examines the various ideologies that inform psycho-social and political analysis. Ideologies such as liberalism, critical feminism, critical masculinity, critical class theory, critical race theory, and adultism, and their explanations for psycho-social problems and proposals for change are examined in relation to methods of social work practice. Students will be encouraged to explore how all theory and practice methods incorporate ideological assumptions and how, therefore, the construction of creative solutions demands practice that is reflective and self-critical.

School Social Sciences

Discipline Social Work

WELF 4008 Professional Decision Making in Social Work

Credit Points 10

Legacy Code 102352

Coordinator Sera Harris (https://directory.westernsydney.edu.au/search/name/Sera Harris/)

Description This subject uses a problem-based learning approach to develop students' critical and practical reasoning abilities in professional decision making. Students will compare several models of decision making used at the interface of organisational and individual/family work contexts, and evaluate the usefulness of evidence based inquiry as a decision aid. Through case studies, students will discern the unique characteristics of a situation requiring professional judgement, explore their own habits or preferences in decision making, and develop reasoning skills that produce sound and ethical responses to the situation at hand.

Equivalent Subjects WELF 4004 - Critical Social Work Practice Indirect

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate a capacity to search for, analyse and present best practice evidence in relation to a social work intervention.
2. Critically evaluate evidence based inquiry as a decision making aid in social work practice.
3. Demonstrate understanding of assumptions underpinning several formal and informal (discretionary) decision making models; also, of how decision making models in social work are affected by organisational culture and political context.
4. Demonstrate understanding of how a worker�fs values, purpose/goals, reasoning and relationship skills impact on decision making.

Subject Content

- Models and principles of decision making in professional social work practice
- Research skills to undertake evidence-based practice (EBP) inquiry; understanding how evidence is produced and how social workers interpret and apply evidence in practice
- skills in Critical thinking, negotiated decision making, and practical reasoning.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

WELF 6001 Ethics and Diversity in Counselling

Credit Points 10

Legacy Code 102909

Coordinator Ireni Farag (https://directory.westernsydney.edu.au/search/name/Ireni Farag/)

Description This subject is designed to prepare students to work in a diverse society as counsellors and advocates. Students will study the emergence of research in the counselling professions and explore connections and tensions between personal, professional and research ethics. Students will have the opportunity to examine their own cultural identity development, their own relationship with power and privilege and how these may impact their counselling practice. The subject will critically examine the evolution of the multicultural movement in the counselling profession and will consider issues and concerns of several non-dominant populations, including intersectionality in working with diverse ethnicities, genders, sexualities, religions, age and ability status.

Equivalent Subjects WELF 7008 - Ethics and Diversity in Research and Therapy HUMN 7036 - Research in the Social Sciences

Restrictions

Students must be enrolled in 1817 - Master of Psychotherapy and Counselling.

Assumed Knowledge

Concurrent or previous study of any foundational subject in counselling.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate theories, evolution and contemporary issues in the counselling profession and in multicultural counselling.
2. Analyse diversity, ethical issues and considerations in multicultural counselling.
3. Collaborate with individuals from intersecting and diverse backgrounds to contribute to the solution for ethical issues in multicultural counselling.
4. Reflect on own values and awareness to enhance personal and professional development in multicultural counselling.

Subject Content

1. Theories and evolution of ethical principles in counselling and psychotherapy.
2. Diversity issues in counselling practices.
3. Ethical issues in multicultural counselling.
4. Key ethical principles and frameworks in counselling and psychotherapy.

5. Personal and professional awareness and development in counselling and psychotherapy.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) CART 7004 AND
CART 7005 AND
CART 7010 AND
WELF 7009 OR
WELF 7029 AND WELF 7032

Assumed Knowledge

Knowledge of art therapy theory and practice and counselling theory and practice.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate their ability to relate theoretical knowledge to the placement setting
2. Demonstrate appropriate clinical, ethical and cultural competencies for a trainee practitioner within the placement setting.
3. Begin art therapy clinical practice with individuals and/or groups
4. Observe an agency at work and gain an understanding of agency philosophy, policies and practices
5. Participate appropriately as a member of a professional team alongside experienced employees of the host organisation.
6. Accept, reflect on and respond reflexively to feedback from on and off-site supervisors.
7. Demonstrate their ability to critically and constructively reflect upon their clinical and placement experiences.
8. Conduct a focussed reading project around a particular client group, problem or issue relevant to the student�fs placement agency, and doc

Subject Content

1. 375 placement hours comprised of orientation, observation, art therapy practice, supervision, participation in relevant meetings and professional development
2. Consideration of how the trainee art therapist can best work within the management structure, philosophy and approach of the organisation
3. Working collaboratively and accountably as part of a team
4. Beginning to practice art therapy with clients with direction, guidance and support from onsite and university supervisors
5. Development of clinical skills in practice: therapeutic skills, maintaining the frame of therapy, observation of appropriate boundaries, adherence to ethical practices, cultural responsiveness, engagement and assessment of issues with clients, use of supervision, presentation skills, report writing, record keeping, maintaining art materials, safe and sustainable art therapy studio and clinical practice.
6. Understanding the issues affecting service users, and the role of art therapy as part of the range of services the organisation can offer

Special Requirements

Legislative pre-requisites

Special Requirements - NSW Health Legislative Prerequisites Pre-requisites

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and compete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- http://training.gov.au (http://training.gov.au/)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

WELF 7006

Equivalent Subjects LGYA 1627 - Clinical Studies (Counselling)

Restrictions

Students must be enrolled in 1817 Master of Psychotherapy and Counselling or 1647 Graduate Diploma in Counselling.

Assumed Knowledge

Knowledge of counselling theory and practice and professional practice in a clinical context.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Integrate theoretical knowledge and practical skills in order to effectively work with clients in the placement setting.

2. Demonstrate ability to reflect critically upon one's clinical work through observation, documentation, audiotape and case study analysis.
3. Participate appropriately and effectively as a member of an agency clinical team as demonstrated through consistent professional conduct inclusive of ethical, legal and cross-cultural considerations.
4. Achieve an appropriate standard of professional and clinical practice for a graduating clinician in counselling and psychotherapy through completion of required number of supervised placement hours.
5. Demonstrate understanding of the counselling experience from the position of the client and how this learning informs clinical practice.

Subject Content

- Placement in an appropriate setting for 100 hours
- Observation of an agency at work
- Examination of the way in which the treatment models and management structures of the agency affect the functioning of the therapist or counsellor
- Working as part of a team
- Working with clients under supervision.
- Development of clinical skills in practice: therapeutic skills, maintaining the frame of therapy, observation of appropriate boundaries, adherence to ethical practices, engagement and assessment of issues with clients, use of supervision, presentation skills, report writing, record keeping.
- Development of professional skills including reflective practice, professional and ethical conduct and understanding of inherent requirements for counselling practice.

WELF 7003 Contextualised Practice

Credit Points 10

Legacy Code 102394

Coordinator Maggie Hall (https://directory.westernsydney.edu.au/search/name/Maggie Hall/)

Description Social work practice is informed by, and negotiated through, policy, legislative and ethical frameworks. This subject focuses on how these frameworks influence and shape social work practice in Australia and provides an opportunity for students to critically reflect upon their power, responsibilities and obligations In this subject, students will acquire the knowledge and skills to advocate for marginalised and disadvantaged individuals and groups through activism and advocacy and, work for social justice change through reform of legislation and policy.

School Social Sciences

Discipline Social Work

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1792 Master of Social Work (Qualifying)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse legislative and policy practices that both enhance and inhibit wellbeing at individual, family and community levels.
2. Analyse aspects of state mental health, domestic violence and child protection legislation relevant to social work practice, including confidentiality, involuntary interventions and guardianship.
3. Critically analyse different models of social policy making in Australia
4. Analyse and integrate knowledge of and commitment to social work values and ethics to guide professional practice.
5. Critically evaluate the application of advocacy skills in relation to legislative and policy frameworks and processes.

Subject Content

- legal frameworks for social work practice in Australia
- The policy process
- political institutions and policy making
- Legislative and policy practices that both enhance and inhibit wellbeing at individual, family and community levels.

Case studies:
child wellbeing and protection
mental health
family violence
Aboriginal and Torres Strait Islander peoples
- ethics and social work practice
- Advocacy strategies using knowledge of Legislative and policy frameworks and processes

WELF 7006 Counselling and Psychotherapy Practice

Credit Points 10

Legacy Code 102364

Coordinator Ireni Farag (https://directory.westernsydney.edu.au/search/name/Ireni Farag/)

Description This subject builds on the experiential learning from Foundations of Psychotherapy and Counselling 1 by offering further practice in interpersonal counselling skills in dyadic and group contexts. Students will consolidate and expand the range of skills appropriate to the unfolding counselling relationship through continued skills practice. Students will develop capacity to analyse their own responses in depth and respond reflexively in their work with clients, within an increased understanding of the therapeutic relationship and of what makes counselling effective. Students will continue to participate in small group experiential training, thereby increasing their awareness of interpersonal and group processes.

School Social Sciences

Discipline Counselling

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) WELF 7004 OR
WELF 7009

Equivalent Subjects WELF 7005 - Counselling 2

Restrictions

Students must be enrolled in 1817 Master of Psychotherapy and Counselling, 4595 Master of Art Therapy or 1770 Master of Social Science.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate advancing skills in listening, empathic responding, use of silence, and exploratory questioning.
2. Practice beginning skills in immediacy and other 'skills of encounter' such as providing feedback, and consider the ethical issues and dilemmas encountered in the 'responsible use of self' in counselling and therapy.
3. Facilitate the stages of a short-term counselling relationship.
4. Apply skills in engaging in a therapeutic relationship with clients.
5. Identify how to assess the effectiveness of counselling with and for clients, and how to work constructively toward closure.
6. Critically analyse and make comparisons between individual and group counselling as experienced by both client and counsellor.

Subject Content

Continuing counselling skills practice including triadic work eight practice sessions with an advanced counselling student in their second year of studies.
Further development of existing and new skills in listening, empathic responding, use of silence and exploratory questioning, immediacy, highlighting of conflicts, providing feedback, and interpretation.
Consideration of concepts of transference and countertransference, and the 'use of self' within the counselling/therapy process.
Exploration of the use of psychoeducational and experiential groups within professional counselling practice, including the development of group facilitation skills.
Critical consideration of how change occurs, inside and outside of the counselling relationship, and of how counsellors know when clients are 'better'.
Exploration of when and how to end therapy - the concept of 'termination' as mature, premature or delayed.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Applied Project	2300 words comprising of : 1000 word paper + 10 min audio extract (500 word equivalent) + 4 X 200 word session summaries	35	Y	Individual
Case Study	2700 words comprising of : 1700 word essay + 500 word analysis of transcription from 10 minute audio extract (500 word equivalent)	40	Y	Individual
Report	1500 word written assignment	25	Y	Individual

WELF 7007 Critical Social Work Practice

Credit Points 10

Legacy Code 102395

Coordinator Linda Briskman (https://directory.westernsydney.edu.au/search/name/Linda Briskman/)

Description This subject focuses on the application of critical theories, models and methods of social work practice through the exploration of diverse fields of practice including: child wellbeing and protection; mental health; working with older people; disability; housing and homelessness; LGBTQI social work; and rural and remote practice. The emphasis will be on the contribution of various critical perspectives (Feminist, Post-colonial, Postmodern, Marxist, Green, Critical Race, etc) to social work theory and to the development of alternative forms of practice.

School Social Sciences

Discipline Social Work

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) WELF 7023 AND
WELF 7024

Restrictions

Students must be enrolled in 1792 Master of Social Work (Qualifying)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Compare and contrast critical social work practice theories, approaches and models analysing their application in organisational, social and cultural contexts.
2. Demonstrate an understanding of critical practice skills and of the different ways they can be applied across the spectrum of indirect and direct practice areas, including interpersonal engagement, assessment, professional writing, counselling, health promotion, advocacy and team work.
3. Engage in critical reflection on the use of self in practice, identifying strengths and areas for further development.
4. Demonstrate a thorough understanding of the experience of marginalised individuals, groups and communities within a range of different fields of practice, settings, client groups and geographical locations.

Subject Content

- Examination of various theoretical contributions to critical social work, including:
Human rights
Feminist analysis
Postcolonial and critical whiteness studies
Indigenous world views
Postmodernism
Marxist analysis
Green political theory and environmentalism
- These will be examined across a number of different fields of social work practice, such as:
Child wellbeing and child safety ? including child protection risk assessment
Mental Health- including mental health assessment
Disability ?inclusive and accessible practice
Working with individuals, groups and communities from rural and remote locations
Working with older people
Community Justice
Social work in health settings ? including skills for team and family conferences
International social work ? social work in a global context
LGBTQI social work practice
Housing and homelessness

WELF 7008 Ethics and Diversity in Research and Therapy

Credit Points 10

Legacy Code 102357

Coordinator Shiri Hergass (https://directory.westernsydney.edu.au/search/name/Shiri Hergass/)

Description From 2022 this subject replaced by WELF6001 - Ethics and Diversity in Counselling for students enrolled in 1817 - Master of Psychotherapy and Counselling only. This subject introduces students to key considerations for practicing therapy and research in a diverse and neo-colonial context. Students will study the emergence of research in the arts therapy profession and explore connections and tensions between personal, professional and research ethics. Through close reading of professional documents, case studies and research papers, students will examine how the 'subjects' of therapy and research are conceptualised and constructed. From a perspective that links knowledge and power, students will look at what the published research says about what works and how in therapy; ask whom therapy and research work for; and examine the work these therapy and research practices do.

WELF6001 - Ethics and Diversity in Counselling

Restrictions

Must be enrolled in 4595 M. Art Therapy or 8083, 8084, 8085, 8086, 8087 Bachelor of Research/Master of Research.

Assumed Knowledge

Concurrent or previous study of any foundational subject in either counselling or art therapy.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the key discourses and power relations that shape professional, clinical and research practice in the arts therapies.
2. Critically evaluate what constitutes research evidence in the arts therapies and other psychotherapies.
3. Formulate a sound basis for ethical and relational decision-making in therapy and research.
4. Reflect on one's own positioning and intersectionality, in order to work sensitively with diverse therapy and research participants.
5. Engage art therapy as a practice of social justice to counter ongoing effects of colonisation and the widespread inequities that bring people to therapy.

Subject Content

1. History and significance of research in the psychotherapies and arts therapy.
2. Evidence in the psychotherapies
3. Values and ethics in arts therapy research and clinical practice.
4. Ethical considerations and scenarios for arts therapy research and practice within a culturally and socially diverse and neo-colonial context.
5. Historical and emerging discourses that shape the psychotherapies
6. Normality, abnormality, diversity and difference within counselling and art therapy research and professional literature.

WELF 7009 Foundations of Psychotherapy and Counselling 1

Credit Points 20

Legacy Code 102353

Coordinator Penny Gardner (https://directory.westernsydney.edu.au/search/name/Penny Gardner/)

Description Foundations of Psychotherapy and Counselling 1 is a foundational subject for postgraduate counselling and therapeutic studies. It forms the first part of a 40 credit point sequence undertaken during the first year. Foundations of Psychotherapy and Counselling 1 presents the foundational skills necessary for the successful inception of a productive therapeutic relationship. The sequenced, progressive presentation of these skills via experiential learning is framed by the simultaneous presentation of key theoretical concepts relevant to the skills in question. Students will be required to analyse the features of their own personalities, and to reflect on feedback that they receive from others in the role of psychotherapist/counsellor, in order to develop the self-awareness and sensitivity necessary for this professional role.

Students must be enrolled in 1647 Graduate Diploma in Counselling, 1648 Graduate Certificate in Counselling, 1817 Master of Psychotherapy and Counselling, 4595 Master of Art Therapy or 1770 Master of Social Science.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Articulate the basic counselling skills of 'holding, 'exploring' and 'immediacy'.
2. Demonstrate how (genetic) temperament and attachment style interact in the formation of a 'core personality' and the role of attachment as the foundation of 'transference'.
3. Recognise ethical issues fundamental to the counselling relationship: power/expertise, inequality, boundaries.
4. Demonstrate a capacity for self-reflection, and understanding of how their preferred interpersonal style in the role of counsellor may affect others in the role of client.
5. Develop observational ability in recognising intrapersonal and interpersonal processes in group, with focus on how groups may function as a 'social microcosm'.
6. Demonstrate the ability to critically analyse the similarities and differences in the experience of both client and counsellor in individual counselling and group counselling.

Subject Content

- Introduction to the nature of counselling/psychotherapy as a relational, rather than an instrumental, process.

- The therapeutic contract or 'frame': The promotion of safety, consistency and clear boundaries.

- The nature of psychoeducational and experiential groups as a facet of counselling.

- introduction to the counselling skills appropriate for group facilitation.

- The skills of 'holding', which facilitate this type of relationship: empathic reflection of content and feeling; purposeful use of silence; open questioning.

- The skills of 'exploring', which open up particular areas of the client's experience for conscious reflection: open questioning, targeted (assessment) questioning, stating themes, stating conflicts.

- The implications of ‘exploration’ interventions: who chooses which areas to explore? How particular questions can direct client awareness. How might this shift the power balance between counsellor and client.

- The skill of ‘immediacy’ (addressing the ‘here and now’) as a basic tool for addressing ‘resistance’ and for unblocking a ‘stuck’ counsellor-client relationship

- Human development and neuroscience: temperament and attachment in infancy. How nature and nurture interact to create particular personal ‘styles’ and particular expectations of relationship.

- The evolution of the self in early childhood: major cognitive and psychosocial developments in the preschool years. How awareness of self and awareness of others co-evolve.

- Middle childhood: the attainment of ‘concrete operations’, rules, and limited empathy.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Critical Review	1,000 words analysis + 2 x 20 minute audio recordings (2000 word equivalent)	30	N	Individual
Report	1,000 words	30	N	Individual
Essay	2,000 words	40	N	Individual

WELF 7010 Foundations of Psychotherapy and Counselling 2

Credit Points 10

Legacy Code 102355

Coordinator Alison Hood (https://directory.westernsydney.edu.au/search/name/Alison Hood/)

Description Foundations of Psychotherapy and Counselling 2 presents and critically evaluates the major theoretical paradigms of counselling and psychotherapy. These include; psychoanalytic / psychodynamictherapies; humanistic psychotherapies; behavioural and cognitive behavioural therapies; systemic therapies; constructivist/ postmodern therapies; and expressive therapies. Students will consider the assumptions about human development and behaviour that are central to each of these ways of working, as well as their underlying 'theory of change'. Students will also be introduced to common ways that clients present with psychological difficulties, and will explore various clinical responses to such client issues. These issues will be explored considering intrapsychic, relational and life stressor factors. Students will consider how presenting issues relate to the norms and extremes of various personality types, and what consideration should be given to life-stages in understanding client problems.

School Social Sciences

Discipline Counselling

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) WELF 7009

Equivalent Subjects WELF 7005 - Counselling 2

Restrictions

Students must be enrolled in 1647 Graduate Diploma in Counselling, 1648 Graduate Certificate in Counselling, 1817 Master of Psychotherapy and Counselling, 4595 Master of Art Therapy or 1770 Master of Social Science.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the major therapeutic models for treating mental distress, and critically analyse their major assumptions and practices
2. Articulate the difference between intrapsychic and interpersonal/ relational concepts of ‘self’, ‘personality’ and ‘dysfunctional behaviour’
3. Demonstrate an understanding of the basic issues and themes particular to each of the nine Enneagram personality types, and how these issues at their ‘extreme’ may manifest in the forms of ‘emotional

illness' and dysfunction as described in the Diagnostic and Statistical Manual of Mental Disorders 5th edition (DSM).
4. Identify the difference between problems which arise from immediate stressors (including life stage stressors), and those which are rooted in genetic factors and early experience and analyse how both immediate stressors and longstanding determinants may be involved in a client's presenting problem.
5. Consider the therapeutic advantages of altering the interpersonal environment as well as the language which sustains problems.
6. Examine their own stage of adult development (cognitive and psychosocial) and how it might correlate with their own preferred therapeutic approach.

Subject Content

1. The major theoretical paradigms of counselling and psychotherapy and their assumptions about human development and behaviour.
2. The principles of change central to each of the major theoretical models and the interventions and ways of working they utilise.
3. The differences and similarities in how the major theoretical paradigms of psychotherapy and counselling inform approaches to working with human difficulties.
4. How established personality traits feed into, and may be potentiated or modified by, life events and new relationships, taking into account the individual/intrapsychic model and the relational/constructivist model for understanding problem formation and dysfunctional behaviour.
5. Personality: norms and extremes. Personality as a 'package', with both potentially constructive and potentially destructive aspects and how these relate to common client issues and presentations.
6. How childhood experiences of being parented (functionally or dysfunctionally) interact with personality variables and are repeated, or altered, when individuals themselves become parents.
7. The key issues that commonly arise at each new stage in the adult lifespan, and their implications for counselling/therapy.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Essay	1,800 words + Genogram	50	N	Individual
Practical	15 minute audio recording (750 word equivalent) + 450 word written analysis	35	N	Individual
Participation	20 minutes (maximum)	15	N	Group

WELF 7011 Further Clinical Studies (Art Therapy)

Credit Points 20

Legacy Code 101785

Coordinator Elizabeth Fitzgerald (https://directory.westernsydney.edu.au/search/name/Elizabeth Fitzgerald/)

Description This subject aims to develop clinical practice skills to the level required for professional registration. The subject involves 375 hours of clinical placement working under the guidance of a clinical supervisor. It will involve group supervision of casework and in-depth discussion of issues arising from placements.

School Social Sciences

Discipline Counselling

Student Contribution Band HECS Band 4 20cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) WELF 7001

Equivalent Subjects LGYA 1491 - Further Clinical Studies

Restrictions

Students must be enrolled in program 4595 Master of Art Therapy.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Integrate theoretical knowledge and practical skills in order to effectively work with clients in the placement setting.
2. Demonstrate ability to reflect critically upon one's clinical work through observation, documentation and case study analysis.
3. Participate appropriately and effectively as a member of an agency or clinical team as demonstrated through consistent professional conduct inclusive of ethical, legal and cross-cultural considerations.
4. Achieve an appropriate standard of professional and clinical practice for a graduating clinician in art therapy through completion of required number of supervised placement hours.
5. Apply an intrapersonal and interpersonal understanding of the therapeutic relationship in art therapy to clinical practice.

Subject Content

- Continuing art therapy practice and associated activities in approved settings for the required number of hours in order to reach 750 total hours for the clinical year.

- Examination of the ways in which the philosophies, approaches to practice and management structures of the setting affect the work of the trainee therapist.
- Working as part of a team alongside experienced professionals.
- Working with clients/ participants with the support of clinical supervision
- Observation, documentation, enquiry and reflection in relation to one's art therapy practice.
- Further development of clinical skills in practice: therapeutic and counselling skills, establishing a therapeutic contract and maintaining the frame of therapy, observation of appropriate professional boundaries, adherence to ethical practices, engagement with participants, assessment of issues and planning of therapeutic approach, use of supervision, presentation skills, report writing, record keeping.

Special Requirements

Legislative pre-requisites

Special Requirements - NSW Health Legislative Prerequisites ~~Pre-requisites~~

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and compete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- http://training.gov.au (http://training.gov.au/)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Assessment

WELF 7012 Further Clinical Studies in Psychotherapy and Counselling

Credit Points 20

Legacy Code 102366

Coordinator Susan Field (https://directory.westernsydney.edu.au/search/name/Susan Field/)

Description This subject aims to develop clinical practice skills. It will involve preparation for the field placements and group supervision of casework and issues arising from the placements. The subject involves a clinical placement working under the guidance of a clinical supervisor from the professional background of the students under supervision. Students will undertake 200 placement hours.

School Social Sciences

Discipline Counselling

Student Contribution Band HECS Band 4 20cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) WELF 7002

Equivalent Subjects LGYA 1628 - Further Clinical Studies (Counselling)

Restrictions

Students must be enrolled in 1647 Graduate Diploma in Counselling or 1817 Master of Psychotherapy and Counselling.

Assumed Knowledge

Previous completion of clinical placement.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate ability to relate theoretical knowledge and practical skills to the placement setting, gaining confidence in client work and developing clinical judgement.
2. Engage in further supervised clinical practice with individuals and/or families and groups, including longer-term work with at least some clients, participating as a member of an agency clinical team.
3. Demonstrate ability to reflect critically upon their clinical work, including detailed observation, documentation and analysis of one particular case.
4. Demonstrate an appropriate standard of professional and clinical practice for a graduating clinician in counselling and psychotherapy, including the ability to self-evaluate and respond flexibly to changing clinical situations and reflect on their own professional conduct (including ethical, legal and cross-cultural aspects as relevant).
5. Satisfactorily complete the minimum number of supervised placement hours required by the appropriate professional body.
6. To consider, observe and analyse the counselling process from the position of the client.

Subject Content

- Placement in an appropriate setting for 200 hours
- Observation of an agency at work
- Examination of the way in which the treatment models and management structures of the agency affect the functioning of the therapist or counsellor
- Working as part of a team
- Working with clients under supervision
- Development of clinical skills in practice: therapeutic skills, maintaining the frame of therapy, observation of appropriate boundaries, adherence to ethical practices, engagement and assessment of Issues with clients, use of supervision, presentation skills, report writing, record keeping

WELF 7013 Integrated Practice 1: Self and Story

Credit Points 10

Legacy Code 102370

Coordinator Alison Hood (https://directory.westernsydney.edu.au/search/name/Alison Hood/)

Description This subject explores the concept of 'self' and how stories might shape self-identity or a sense of 'what it means to be me'. The enduring characteristics of stories will be examined alongside their different workings across cultures, traditions, technologies, genres and time. The subject will cover historical and contemporary notions of the unconscious as they inform an understanding of self and story. It will examine how an understanding of the brain, particularly of memory, and the workings of the right and left hemispheres, fit into this exploration. Working with selves and stories, as instruments for change in therapeutic work, will be considered across lifespan and a range of psychotherapies.

School Social Sciences

Discipline Counselling

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) WELF 7009

Restrictions

Students must be enrolled in program 1817 Master of Psychotherapy and Counselling

Assumed Knowledge

Concurrent or previous study of any foundational subject in counselling.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Reflect constructively on the concept of 'self'.
2. Integrate findings from contemporary neuroscience into an understanding of the workings of the unconscious and memory in relation to storytelling and self-narratives.
3. Critically compare concepts and use of self and story across different approaches to psychotherapy, including Jungian Analysis, Narrative Therapy.
4. Understand psychotherapy in the broader context of how stories work within a range of other genres, contexts and media.
5. Analyse how the 'self' is connected to broader familial and cultural narratives.
6. Demonstrate how story-telling and story-making can unfold within a therapeutic relationship, drawing on the client's and others' stories, through various forms including traditional and popular cultures and new technologies.

Subject Content

1. Introduction to historical and contemporary concepts of the self and identity, as they influence counselling and psychotherapy.
2. Introduction to the characteristics and workings of stories within and across cultures incorporating oral and written traditions, as well as electronic and digital technologies.
3. Consideration of storytelling genres (myths, parables, fairytales and narratives of survival, redemption and transformation) as shared in various forms (books, TV, movies, music videos, computer games and social media).
4. Understanding of the context and significance of the use of story in various fields including psychotherapy, and how this relates to ‘self’.
5. Examination of the implications of contemporary neuroscience, particularly its insights into the workings of memory, unconscious processes and structures of the brain, in understanding the self and self-narration.
6. Analysis of how selfhood and story are conceptualised and worked with in a range of contemporary psychotherapies including Jungian Analysis, Narrative Therapy.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

WELF 7014 Integrated Practices 2: Affliction and Recovery

Credit Points 10

Legacy Code 102371

Coordinator Melissa Maclean (https://directory.westernsydney.edu.au/search/name/Melissa Maclean/)

Description This subject critically examines the nature of mental illness and mental wellbeing. Historical and contemporary approaches to mental health and recovery will be reviewed. Diverse explanations for the origins of profound symptoms will also be explored. Mental health assessment tools commonly encountered by counsellors and psychotherapists are presented and their practical applications examined. Through case studies and autobiographical accounts, the voices of those with lived experience of major mental health issues will inform student learning in this subject. This subject invites students to critically evaluate mental health services from a range of perspectives and consider the role of counselling and psychotherapy alongside multiple pathways to recovery. Students will critically evaluate this knowledge and apply it in their development of skills in various psychotherapeutic methods to assist recovery and mental wellness.

School Social Sciences

Discipline Counselling

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) WELF 7009 AND
WELF 7013

Co-requisite(s) WELF 7010

Restrictions

Students must be enrolled in 1817 Master of Psychotherapy and Counselling.

Assumed Knowledge

Concurrent or previous study of any foundational subject in counselling.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate the historical context of mental health and recovery, and how that informs current approaches to mental illness;
2. Show advanced working knowledge of the major categories of psychological and emotional affliction;
3. Compare multiple explanations for profound symptoms described as mental illness;
4. Demonstrate knowledge and critical appraisal of current diagnostic and assessment methods/tools;
5. Demonstrate a knowledge of available mental health treatment services as an adjunct to counselling and psychotherapy;
6. Effectively practice skills in various psychotherapeutic methods to assist recovery and mental wellness.

Subject Content

1.Consideration of approaches to mental health over time, including historical notions of 'madness', the birth of the asylum and the development of modern psychiatry, and the implications of these for current approaches to working with and recovery from mental illness
2.Identification of the major categories of psychological and emotional affliction and understanding of the lived experience of mental illness
3.Examine the diverse explanations of profound symptoms, including the notion that symptomatology may originate childhood or adolescence
4.Examination of mental health diagnostic and assessment tools and how these may be applied in practice
5.Development of a working knowledge of mental health services in the community and how these intersect or complement the role of counsellors and psychotherapists
6.Understanding of the application of various therapies in the context of a trauma model approach or diagnostic approach to mental health

Assessment

WELF 7016 Integrated Practices 4: Self and Relationships

Credit Points 20

Legacy Code 102627

Coordinator Penny Gardner (https://directory.westernsydney.edu.au/search/name/Penny Gardner/)

Description In this capstone unit, students integrate their learning about interpersonal awareness and the value of the therapeutic relationship, which are central to the Master of Psychotherapy and Counselling. A focus on multiple relational influences enhances students' ability to work therapeutically with individuals, couples and families. Clients bring themselves and their current and past relationships into the therapy room with them, as does their counsellor. Students will have the opportunity to investigate their personal values and beliefs about relationships and how these influence their work with clients. Family life-cycle and developmental models are discussed, critiqued and applied to promote understanding of common and diverse client issues and presenting concerns. Ultimately students will explore the concept of interdependence and how relationship is central to human wellbeing.

School Social Sciences

Pre-requisite(s) BEHV 7018

Co-requisite(s) WELF 7012

Incompatible Subjects HUMN 7010 - Critical and Creative Enquiry WELF 7015 - Integrated Practices 4 Self and Relationships

Restrictions

Students must be enrolled in1817 Master of Psychotherapy and Counselling, and must have successfully completed 120 credit points.

Assumed Knowledge

Concurrent or previous study in counselling and/or psychotherapy.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Recognise how diverse and multiple relational influences and family systems present in working with counselling and psychotherapy clients.
2. Critique and integrate knowledge from models such as the family life cycle and Erikson's developmental model in order to undertake assessment of client issues.
3. Analyse and apply family systems with regard to the patterns and diversity of self and relationship within wider cultural and social systems.
4. Effectively practice working hypotheses and the use of counselling skills in working with couples and families.
5. Identify own personal values and biases about the nature of 'healthy' relationships and the influence these have on work as a counsellor or psychotherapist.

Subject Content

Examination of relationship dynamics at the individual, couple and family level.
Identification of the diverse nature of relationships, kinship and the modern family.
Consideration of factors such as the family life cycle, and Erikson's psychosocial stages in understanding the dynamics of interpersonal and intrapersonal presenting issues.
Presentation of family systems theories and approaches to working with couples to help inform working with relationships.
Examination of personal values and biases as related to relationships and how these may influence therapeutic practice.
Participation in experiential workshops to develop counselling skills applicable to working with more than one person at a time in counselling and psychotherapy.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Critical Review	1,500 words	30	N	Individual
Case Study	1,500 words	30	N	Individual
Practical	30 minute recording (1,500 word equivalent) and 1,500 word written analysis of therapist's skills	40	N	Individual

Discipline Social Work

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) WELF 7022

Restrictions

Students must be enrolled in 1792 Master of Social Work (Qualifying)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate engagement in a sustained critical reading program in their chosen area;
2. Analyse and map the issues and connections between theory, research and practice in a chosen specialty;
3. Demonstrate capacity to plan and undertake a social work project;
4. Critically reflect on relationships between theory, research and practice in their area of specialisation;
5. Evaluate and present their work;
6. Show evidence of reflexive practice.

Subject Content

Advanced literature searching
Fundamentals of practitioner research
Ethics of research and professional practice
Plan, undertake and report on a specific aspect of practice in the context of work
Investigation methods and techniques related to project plans
Preparing written project reports
Preparing and presenting project
Undertaking higher order reflective practice

Assessment

WELF 7018 Leadership in Organisations

Credit Points 10

Legacy Code 102392

Coordinator Michael Houlbrook (https://directory.westernsydney.edu.au/search/name/Michael Houlbrook/)

Description This subject focuses on leadership in human service organisations and the social and economic factors that influence and frame practice. Students in the subject will briefly review the contemporary political economic circumstances underpinning human services and the ongoing changes to policy and practice. The subject will examine the idea of what leadership is and present major leadership theories relevant to the human services. The content will address contexts of leadership including setting organisational culture, situational leadership in relation to practice and people, management and governance and leading through change. The subject will also examine trust, ethics and fairness in leadership and leadership in difficult circumstances. The emphasis of the subject will be to equip students with the means to describe, question and reshape leadership practice.

School Social Sciences

Discipline Social Work

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1792 Master of Social Work (Qualifying)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe contemporary factors that impact leadership and management in organisations;
2. Analyse and appraise a diverse range of leadership theories, styles and models relevant to the Human Services;
3. Apply leadership skills and strategies for working in the Human Services;
4. Describe, critically analyse and shape their own leadership practices.

Subject Content

Social and economic factors that influence and frame organisational practices including neoliberalism, managerialism and human services sector reforms
Leadership as a concept and leadership theories
Contextual approaches to leadership ? culture, situation, practice, change
Leadership styles and the development of leadership practice
Giving and getting supervision and support

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

WELF 7019 Power and Marginalisation

Credit Points 10

Legacy Code 102393

Coordinator Rimple Mehta (https://directory.westernsydney.edu.au/search/name/Rimple Mehta/)

Description This subject complements theoretical frameworks introduced in Difference and Diversity to explore issues of power and marginalisation through the experiences of Aboriginal and Torres Strait Islander peoples, mental health consumers, children and young people, and people with disability. Practice and policy responses that challenge or reinforce power and marginalisation are explored.

School Social Sciences

Discipline Social Work

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1792 Master of Social Work (Qualifying).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically apply theoretical frameworks to analyse the construction and processes of marginality.
2. Analyse the impact of powerlessness, marginality, stigma and disadvantage, on individuals, families and communities.
3. Analyse the history and contemporary debates in policy and practice relating to marginality and empowerment of children and families, Aboriginal and Torres Strait Islander peoples, mental health consumers, and people with disability.
4. Evaluate social work's role in mediating power.
5. Critically apply social work knowledge to respond effectively within a human rights and social justice framework at the individual and systemic level.

Subject Content

- Frameworks of power and empowerment
- Contemporary debates in policy and practice relating to marginalisation and empowerment of Aboriginal and Torres Strait Islander peoples, mental health consumers, children and young people, and people with disability.
- Mediating power: the history of Australian social work in marginalisation and empowerment
- Understanding, contesting and privileging marginalised peoples
- Designing strategies for contesting policies and practices that marginalise
- Theories of Power
- Intersectionality and Marginality - Resistance, Activism and Storytelling
- Social Work Applications

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

WELF 7020 Practising Research and Researching Practice

Credit Points 10

Legacy Code 102358

Coordinator Ireni Farag (https://directory.westernsydney.edu.au/search/name/Ireni Farag/)

Description This subject equips Therapy Studies students with the conceptual frameworks and skills needed to conduct basic research in the areas of counselling and psychotherapy. The question 'How do we know what we know?' becomes the connecting thread throughout an introduction to quantitative, qualitative and mixed method approaches to practitioner research. Building on considerations from the prerequisite subject WELF6001 Ethics and Diversity in Counselling, students will develop their understanding of research as a scholarly, professional, social and intersubjective practice. They will learn to generate answerable research questions and a coherent research proposal within appropriate intellectual and methodological frameworks.

School Social Sciences

Discipline Counselling

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) WELF 7008 - Ethics and Diversity in Research and Therapy
Or
WELF 6001 - Ethics and Diversity in Counselling

Equivalent Subjects HUMN 7001 - Advanced Social Research Methods

Restrictions

Students must be enrolled in 1817 Master of Psychotherapy and Counselling.

Assumed Knowledge

Concurrent or previous study of at least one first year postgraduate subject in counselling theory and practice. Broad foundations and ethics of research at postgraduate level.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate critical understanding of qualitative, quantitative and mixed method research design and its applications in counselling research.
2. Compare the strengths and limitations of a range of research methods in relation to the sub-discipline of counselling and psychotherapy.
3. Reflect constructively on the positioning of researchers and research participants in practitioner research.
4. Critically position and evaluate selected published research studies in counselling.
5. Frame an answerable research question that is significant and relevant for their field of practice, and plan how they would systematically approach this question.
6. Relate questions of method to research epistemology and an understanding of research as a scholarly, professional and social practice.

Subject Content

- introduction to a broad range of research methodologies and methods relevant to practitioner research in psychotherapy and counselling.
- introduction to the foundations of quantitative, qualitative and mixed method research design.
- exploration of the relationships between epistemological assumptions, methodology and method.
- critical reading and evaluation of selected published research in the areas of counselling and psychotherapy.
- practice in framing research questions and a research proposal in the student's professional field.
- reflection on research as a social, professional and interpersonal practice.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

WELF 7021 Social Work (Qualifying) Field Education 1

Credit Points 20

Legacy Code 102391

Coordinator Hong-Jae Park (https://directory.westernsydney.edu.au/search/name/Hong-Jae Park/)

Description This subject enables students to participate in a structured and supervised field placement (400 hours). Social Work (Qualifying) Field Education 1 provides students with the opportunity to apply their knowledge and experience in linking theory with the realities of practice, and extend their skills for social work practice with the support of practitioners working in the human services sector. Placements are offered in a variety of agency types spanning all areas

of social work practice: direct service work with individuals, groups and families, community development; research and policy.

School Social Sciences

Discipline Social Work

Student Contribution Band HECS Band 4 20cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) WELF 7023

Restrictions

Students must be enrolled in 1792 Master of Social Work (Qualifying)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate the skills needed for working within human services organisations (as described in the Field Education Manual);
2. Explain the different skills needed for working with a range of service users and organisations;
3. Critically evaluate their own performance in a variety of practice contexts including mental health and child wellbeing.
4. Critically evaluate their own performance in a variety of practice contexts.

Subject Content

400 hours of supervised practice
Campus based Integrative workshops covering:
Learning styles
Developing a Learning Plan and negotiating a promising learning experience
The nature of supervision and assessment
Peer support and teamwork
The use of critical thinking on placement
Intervention Skills focus: Casework, Group work, Community Work, Submission writing writing in diverse fields of practice including mental health and child wellbeing
Professional context: ethical practice, stress and burnout, the role of ideology in practice frameworks
Winding up the placement and developing a learning plan for future social work learning
Intervention Skills focus: Casework, Group work, Community Work, Submission writing

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Refer to the Special Requirements website for more information.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) WELF 7023 AND
WELF 7021

Restrictions

Students must be enrolled in 1792 Master of Social Work (Qualifying) and Students must complete 100 credit points before enrolling in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Utilise advanced skills in a specialised area of social work;
2. Demonstrate advanced social work skills and knowledge in diverse fields of practice including Aboriginal and Torres Strait Island, cross-cultural, mental health and child wellbeing;
3. Be autonomous and independent in practice;
4. Articulate the values, interests and ideologies that underpin practice in the agency, and evaluate their implications for social work practice;
5. Constructively contribute to the work of the organisation and contribute ideas for change or improvement;
6. Critically reflect on their own practice, and evaluate their readiness for entering the social work workforce.

Subject Content

1. 600 hours of supervised practice
2. Writing a job application and resume for a social work position
3. Examining practice competence –the 'theory and practice divide'
4. Exploring skills in dealing with difficult situations
5. Effective use of supervision
6. Understanding social work 'competence' in diverse fields of practice including Aboriginal and Torres Strait Island, cross-cultural, mental health and child wellbeing
7. Evaluating evidence-based practice
8. Social justice as a framework for practice; social work as political practice
9. Dual relationships in 'embedded' social work practice
10. Working in uncertainty – the first year of practice

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

Student Compliance Information for all Health-Related Placements
To be eligible to enrol in a subject and attend a health-related placement in your program at a NSW Health facility, students must meet Western Sydney University course requirements **and** Special Legislative Requirements to be assessed in their first year of study against the following.

1. Student Undertaking form.
2. National Criminal History Check: Students must have a current (expiring 3 years from date of issue) check valid for their entire program. A valid National Criminal history check must be an Australia wide check, include the student's full name matching their Student ID card and date of birth and not have any offences listed. If a student has a criminal history identified on their check, they must provide a Clinical Placement Authority Card (CPAC) or conditional letter from the NSW HealthShare Employment Screening and Review Unit https://www.health.nsw.gov.au/careers/student_clearance/Documents/appendix-10-student-application.pdf
International students must additionally have a translated International Police Check or statutory declaration.
3. A NSW Working with Children Check (WWCC) clearance letter issued under the category of volunteer valid for their entire program.
Contact your School for further details. Resources are also available on the Placement Hub (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/) website

WELF 7029 Indigenous Australia: History, Knowledge and Professional Practice

Credit Points 10

Legacy Code 102744

Coordinator Neil Hall (https://directory.westernsydney.edu.au/search/name/Neil Hall/)

Description Working with Indigenous communities is an important field of practice for social and human service workers in statutory as well as community contexts. This subject introduces students to Aboriginal and Torres Strait Islander histories, including pre-contact, colonisation and contemporary developments. Specific attention will be paid to engaging communities - including practice principles, strategies and skills. This subject will emphasise the importance of culturally responsive practices requiring students to have an understanding of their own values and cultures. Critical self-reflection and positioning are vital skills for cultural responsiveness, and will be developed in this subject.

School Social Sciences

WELF 7030 Research for Social Work Practice

Credit Points 10

Legacy Code 102745

Coordinator Teddy Nagaddya (https://directory.westernsydney.edu.au/search/name/Teddy Nagaddya/)

Description This subject introduces students to the different approaches to knowledge generation for social work practice and policy. The subject highlights how social workers can design and implement ethical research activities including the theories and methods that support different research approaches. The subject explores and analyses contemporary research design issues and the dominant qualitative, quantitative and mixed method approaches in knowledge generation. This is in the context of incorporating Indigenous knowledges and methodologies, and those specifically relevant to gender and cultural diversity. The subject highlights practice-based uses of research including program evaluation, meta-analysis, systematic reviews and community needs assessment.

School Social Sciences

Discipline Social Work

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in programs 1792 Master of Social Work (Qualifying) or 8083 Bachelor of Research Studies/Master of Research. Students in program 1792 Master of Social Work (Qualifying) must have successfully completed 10 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse research relevant to social work.
2. Demonstrate a critical understanding of the ways in which research is used in a variety of social work settings.
3. Critically reflect on the ways in which social workers can undertake research as part of their day-to-day practice.
4. Demonstrate a capacity to design and undertake a community needs analysis.
5. Demonstrate a capacity to design and undertake an agency/program evaluation.

Subject Content

The context, roles and purposes of research for social work practice.
Understanding and critically analysing social research, evidence and policy in the context of diverse political agendas.
Theoretical perspectives for knowledge generation in social work, including Indigenous knowledges and methodologies, and those specifically relevant to gender and cultural diversity.
Critical self-reflection on the 'practitioner as researcher'/'researcher as practitioner' model.
Ethics and social work research.
Understanding social need and population census data for community needs assessments.
Program evaluation, meta-analysis and systematic reviews.
Appraising practice effectiveness research.
Knowledge translation: communicating research for practice and policy.

WELF 7031 Theories and Knowledges for Social Work

Credit Points 10

Legacy Code 102743

Coordinator Rimple Mehta (https://directory.westernsydney.edu.au/search/name/Rimple Mehta/)

Description This subject explores different strands of social theory and their relevance for contemporary social work practice, both in the context of Western Sydney, and also globally. The heritage of the European Enlightenment will be critically examined as providing the basic paradigm for the construction of 'social theory' and also of social work knowledge and practice. The contribution of the humanities, as providing space for creativity and inspiration as well as insight, will also be considered. The limitations as well as the positives of Western epistemologies will be explored, and alternatives such as Southern Theory, Indigenous knowledges, critical theory, and 'new paradigm' thinking will be evaluated.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in program 1792 Master of Social Work (Qulaifying)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically evaluate the range of theories used by social workers, their strengths and their limitations.

2. Demonstrate an understanding through a critique of the Enlightenment heritage of social work, and its epistemological assumptions.
3. Examine and evaluate the relevance of alternative epistemologies for social work, especially in relation to indigenisation and decolonisation.
4. Identify ways in which the humanities and the creative arts can be incorporated into social work knowledge.
5. Demonstrate how these alternative epistemologies can be contextualised for practice in culturally diverse communities.

Subject Content

1. Theory for practice: theories that social workers use
2. The relationship between knowledge, theory and practice
3. Paradigms of social theory: positivist, interpretive, critical and postmodern
4. The Western Enlightenment tradition: strengths and limitations
5. Social work's Enlightenment heritage
6. Alternative epistemologies
7. Indigenisation and decolonisation of social work knowledge
8. The humanities and social work: history, philosophy, literature
9. Creativity, the arts and social work
10. Contextualising social work knowledge in culturally diverse communities

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Essay	1,500 Words	40	N	Individual
Presentation	15 mins	30	N	Group
Essay	750 words	30	N	Individual

WELF 7032 Counselling Skills for the Allied Professions

Credit Points 10

Legacy Code 102806

Coordinator Ireni Farag (https://directory.westernsydney.edu.au/search/name/Ireni Farag/)

Description This subject introduces postgraduate students from allied professions to the major theoretical frameworks and foundational practices of counselling. An in-depth exploration of the embodied and situated experience of the trainee practitioner will be central to learning how to attend to and support others. Students will engage in an ongoing critical consideration of how discourses and practices of selfhood, social justice, power, colonisation, intersectionality, diversity and place shape the subjects of therapy and influence the therapeutic relationship. These intersubjective and scholarly enquiries will inform a scaffolded, intensive practice of microskills. (Legacy code 102806)

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects WELF 7009 - Foundations of Psychotherapy and Counselling 1 WELF 7004 - Counselling 1

Restrictions

Students must be enrolled in program 4595 - Master of Art Therapy or students must be enrolled in another postgraduate program in Social Sciences, such as Social and Community work, Health, Arts in Health Education or Bachelor of Research Studies.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Effectively and empathically practice beginning skills in counselling.
2. Integrate these counselling skills effectively into professional practice, from a critical social science perspective.
3. Recognise and constructively critique the major frameworks of counselling.
4. Respond appropriately in professional situations that require counselling skills.
5. Understand the similarities and differences between different professional roles and the possibilities and limits of their own role and expertise.
6. Establish a 'holding environment' with people in distress, in order to continue to offer therapeutic/ relational support or refer on.

Subject Content

Reflection on the development of the self as practitioner.
In-class practice of foundational counselling skills.

Reflexive analysis of the experience of counselling practice from the position of trainee practitioner, participant and observer, including close analysis of recordings of practice sessions.
Critical consideration of the major theoretical frameworks of counselling.
Exploration of the connections and tensions between the values, beliefs and practices of the student?fs chosen profession and the values, beliefs and practices of professional counselling.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Applied Project	20 minute edited video recording plus 1,000 words (not including transcript)	40	Y	Individual
Critical Review	1, 000 words	35	N	Individual
Presentation	Ongoing in-class presentation of Log Book reflections	25	N	Individual
