Air Pollution and Control introduces students with an interest in working in the fields of environmental science, environmental consulting, environmental management and environmental health to the basic principles and practices of air quality assessment and management. Air pollution does not recognise socio-political boundaries, and air pollutants transfer intercontinentally through pathways both close to the Earth's surface and upper atmosphere. Air Quality management represents a major challenge facing humanity because it poses a threat to human health, agriculture and environmental sustainability, as it can penetrate even remote and once pristine environments. As such, air pollution management and control is of International, National, State and Local government and community concern. This subject critically analyses the natural and anthropogenic sources of air pollution, their nature, health and environmental impacts, monitoring, regulation and control.
Level: Undergraduate Level 3 subject
Incompatible Subjects: PUBH 3002 Air Quality and Climate Change
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 3022 Advances and Challenges in Health Promotion (10 Credit Points)
Subject Details (p. 4797) Legacy Code: 401380
This subject presents current advances and challenges in health promotion. Advances in technology are critiqued with regards to their positive and negative contribution to health promotion. This subject also reviews social marketing strategies and how these can be used in health promotion campaigns. Complexities in working with vulnerable communities in different settings are explored including schools, workplaces, communities (including Indigenous, culturally and linguistically diverse, refugee and homeless groups), healthcare settings, rural/remote areas and prisons. New patterns in health and their challenges are covered. Ethical and political considerations in health promotion are also included.
Level: Undergraduate Level 3 subject
Pre-requisite(s): PUBH 3026 AND
PUBH 1010
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 3023 Evidence in Professional Reasoning (10 Credit Points)
Subject Details (p. 4798) Legacy Code: 401384
In this unit, you will incorporate the evidence knowledge and skills developed in previous units into professional practice. The evidence-based practice process manages expanding and uncertain knowledge by formulating answerable questions, effectively searching literature, critically appraising evidence and applying and evaluating its significance in clinical practice and healthcare decision-making. Professional reasoning requires consideration of best available evidence, client or patient perspectives, professional expertise and practice context. You will learn professional reasoning for shared decision-making and safe and effective communication for patient scenarios relevant to your program.
Level: Undergraduate Level 3 subject
Pre-requisite(s): Students need to have passed HLTH2024 Research in Methods Health PLUS ONE clinical unit from their specific program (see list below)
HLTH1012 Evidence in Health
REHA2007 Podiatry Pre-Clinical - Students enrolled in Course Code 4661 (Continuing) or 4708 (Current) must have completed this Subject
REHA2004 Occupational Therapy Practice 2 - Students enrolled in Course Code 4663 (Continuing) or 4711 (Current) must have completed this Subject
REHA3003 Clinical Education General - Students enrolled in Course Code 4662 (Continuing) or 4706 (Current) must have completed this Subject
REHA3049 Speech Pathology Practice 1 - First clinical practice subject in Speech Pathology curriculum
Equivalent Subjects: HLTH 3005 Evidence-based Practice
Incompatible Subjects: PUBH 4001 Evidence in Professional Reasoning (Honours)
HLTH 4002 Evidence-based Practice (Advanced)
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 3024 Harm Minimisation and Prevention (10 Credit Points)
Subject Details (p. 4799) Legacy Code: 401387
Injury and harm have been recognised as contributing factors to the Global and Australian Burden of Disease and Injury and have been identified as a National Health Priority in Australia. To effectively measure the impact of injury and harm, and develop prevention strategies, insight and understanding of the causes, risk factors, Disability Adjusted Life Years (DALYs) and Quality Adjusted Life Years (QALYs) must be taken into consideration. Evidence-based approaches to injury prevention and harm minimisation must be applied and effectively communicated to stakeholders of differing capacities and viewpoints. This subject utilises injury prevention and harm minimisation theory, case-based and project-based learning to challenge future public health leaders to develop effective injury prevention and harm minimisation strategies and also to communicate their message effectively, navigating the complexities of differing worldviews and stakeholder responsibilities.
Level: Undergraduate Level 3 subject
Equivalent Subjects: PUBH 3014 - Injury Prevention
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 3025 Health Policy and Advocacy (10 Credit Points)
Subject Details (p. 4800) Legacy Code: 401390
Health professionals work in a complex sector governed by policy on population health and healthcare. This subject considers the role of policy in international and national healthcare. It examines policy making as both a rational and linear process responding to population health needs in just and fair ways, and the reality of policy making which occurs within a complex socio-political and economic environment shaped by powerful groups. Therefore, the aim of this subject is to consider how health professionals can develop effective evidence-based policy and the role advocacy can play in the health policy arena to engender greater health equity.
Level: Undergraduate Level 3 subject
Pre-requisite(s): PUBH 1012 OR
PUBH 1010
Equivalent Subjects: PUBH 2013 - Health Politics Policy and Planning LGYA 7182 - Health Politics Policy and Planning PUBH 3011 - Health Politics Policy and Planning
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 3026 Health Promotion Planning and Implementation (10 Credit Points)
Subject Details (p. 4801) Legacy Code: 401391
This subject builds on the knowledge gained in Health Promotion: Theory and Approaches. It is concerned with developing knowledge and skills related to undertaking needs analysis at community and population levels. It focuses on planning and implementing interventions aligned with core values and principles necessary for ethical health promotion. The need for evaluation throughout this process is emphasised.
Level: Undergraduate Level 3 subject
Pre-requisite(s): PUBH 1010
Incompatible Subjects: PUBH 3012 - Health Promotion Practice 1 PUBH 3013 - Health Promotion Practice 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 3027 Public Health in a Changing World (10 Credit Points)
Subject Details (p. 4802) Legacy Code: 401397
This subject engages students to explore public health in relation to dynamic social, political, economic, environmental and cultural contexts. Students will critique research, policy, practice and evaluation processes to identify their impact on health practices and health outcomes over time. Using their knowledge in public health, epidemiology, sociology and economics students will be required to identify and articulate gaps in current health care and learn to develop a plan towards addressing them. The subject will engage students in reflecting on the future of health care across national and international contexts. Priority health issues that will be discussed in this subject may include chronic and age-related disease, communicable disease, mental health, sexual and reproductive health, child and maternal health, Indigenous health, migrant and refugee health, and environmental health.
Level: Undergraduate Level 3 subject
Pre-requisite(s): PUBH 1012 AND
PUBH 2020
Equivalent Subjects: PUBH 3003 - Contemporary Issues in Public Health
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 3028 Transforming Health (10 Credit Points)
Subject Details (p. 4803) Legacy Code: 401405
This subject focuses on utilising previously acquired health science knowledge and skills to identify, co-design and create innovative ways to address a current health issue identified by the health industry. Students will consider interventions, projects, research proposals and recommendations on service delivery options. The subject requires students to work collaboratively with multiple stakeholders to plan, manage, deliver and review a simulated project. Students thus develop and apply knowledge and skills in leading and managing health projects, stakeholder negotiation, committee structure and functioning, project consultation, planning and management with a deliverable outcome such as a report or research proposal.
Level: Undergraduate Level 3 subject
Equivalent Subjects: PUBH 3010 Health Planning Project
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 4001 Evidence in Professional Reasoning (Honours) (10 Credit Points)
Subject Details (p. 4804) Legacy Code: 401379
In this subject, students will incorporate the evidence knowledge and skills developed from previous subjects in professional practice. The evidence-based practice process manages expanding and uncertain knowledge by formulating answerable questions, effectively searching literature, critically appraising evidence and applying and evaluating its significance in clinical practice and healthcare decision-making. Professional reasoning requires consideration of best available evidence, client or patient perspectives, professional expertise and practice context. Students will learn professional reasoning for shared decision-making, and safe and effective communication for patient scenarios relevant to your program. Students will study the theory and application of research methods to honours research in their chosen field, and practise the skills to analyse evidence in the health sciences.
Level: Undergraduate Level 4 subject
Pre-requisite(s): HLTH2024 Research Methods in Health
HLTH2021 Research Methods (Qualitative and Quantitative)
REHA2007 Podiatry Pre-Clinical - Students enrolled in Course Code 4661 (Continuing) or 4708 (Current) must have completed this subject
REHA2004 Occupational Therapy Practice 2 - Students enrolled in Course Code 4663 (Continuing) or 4711 (Current) must have completed this subject
REHA3003 Clinical Education General - Students enrolled in Course Code 4662 (Continuing) or 4706 (Current) must have completed this subject
REHA3049 Speech Pathology Practice 3 - First clinical practice subject in 4788 Speech Pathology curriculum
Equivalent Subjects: HLTH 4002 - Evidence-based Practice (Advanced)
Incompatible Subjects: HLTH 3005 - Evidence-Based Practice
PUBH 3023 - Evidence in Professional Reasoning
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 4002 Honours Thesis in Health Science (F/T) (60 Credit Points)
Subject Details (p. 4805) Legacy Code: 400558
This is a 60 credit point year-long subject taken over two terms (30 credit points in each term).This subject is the culmination of studies for students who have completed an undergraduate degree in Health Science and provides substantial training in research. Under staff supervision, students choose the particular topic for their research, design their own program of research, perform the research and analyse the results. The culmination of this process is the production of a thesis in which students describe the rationale for their topic, their research program, ethical issues, results, and their conclusions.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 4003 Honours Thesis in Health Science (P/T Year 1) (20 Credit Points)
Subject Details (p. 4805) Legacy Code: 400559
This is a 20 credit point year-long subject taken over two terms (10 credit points in each term). This subject is the culmination of studies for students who have completed an undergraduate degree in Health Science and provides substantial training in research. Under staff supervision, students choose the particular topic for their research, design their own program of research, perform the research and analyse the results. The culmination of this process is the production of a thesis in which students describe the rationale for their topic, their research program, ethical issues, results, and their conclusions.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 4004 Honours Thesis in Health Science (P/T Year 2) (40 Credit Points)
Subject Details (p. 4806) Legacy Code: 400560
This is a 40 credit point year-long subject taken over two terms (20 credit points in each term). This subject is the culmination of studies for students who have completed an undergraduate degree in Health Science and provides substantial training in research. Under staff supervision, students choose the particular topic for their research, design their own programme of research, perform the research and analyse the results. The culmination of this process is the production of a thesis in which students describe the rationale for their topic, their research programme, ethical issues, results, and their conclusions.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 5001 Infectious Diseases and Outbreak Response (10 Credit Points)
Subject Details (p. 4806)
Infectious disease occurs following interaction between a host and microbial by parasites. This subject will encompass clinical aspects, epidemiology, prevention and control of important communicable diseases, both in Australia, and globally. Starting at a foundational level, this subject will explain how infectious agents interact with human hosts. Prevention of infectious disease will then be investigated through examination of immunisation approaches and vaccine preventable diseases, infection control in healthcare settings and infectious disease surveillance and legislative requirements. Key principles of outbreak response to infectious disease will be explored through practical application of contemporary outbreak investigation methods and disaster response aspects of infectious disease control measures. The subject will conclude with an examination of emerging global infectious disease threats including through bioterrorism climate change and indigenous aspects of infectious disease.
Level: Postgraduate Coursework Level 5 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 6001 Epidemiology of Climate Change (10 Credit Points)
Subject Details (p. 4807)
By looking at air quality, nutrition, infectious diseases, and human migration, this subject explains how increases in greenhouse gases impact public health and people around the globe, and how climate change directly affects us and our lives. It details things we can do to mitigate negative health risks associated with rising temperatures and what factors make some populations more vulnerable than others to climate change's negative health impacts. Finally, it explains how measures to reduce greenhouse gas emissions can not only limit future climate changes but can also generate substantial immediate health "co-benefits" over and above the benefit of reducing climate change.
Level: Postgraduate Coursework Level 6 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 6002 Systems Science and Population Health (10 Credit Points)
Subject Details (p. 4808)
This subject will introduce students to applications of system science methods to population health problems in epidemiology that can be used to guide policy and program decision making. Students will be provided with an overview of the sorts of problems that might benefit from system science techniques, and the different types of dynamic modelling methods that can be used (e.g. system dynamics models, agent-based models) using a series of case studies focussing on a range of chronic disease outcomes. Participants will also have the opportunity to interact with example models, to explore model structures, underlying assumptions, and conduct scenario testing of suites of policy interventions.
Level: Postgraduate Coursework Level 6 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 6003 Applied Clinical Epidemiology (10 Credit Points)
Subject Details (p. 4808)
This subject will introduce students to topics in applied epidemiology that can inform clinical practice, research and health program evaluation, and health policy decisions. Students will develop skills in conducting systematic reviews of the literature and meta-analyses, and the design and analysis of clinical trials. Students will also be provided with an overview of principles ethical clinical research, and strategies for the dissemination and communication of epidemiological findings.
Level: Postgraduate Coursework Level 6 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 6004 Applied Epidemiology Research Design (10 Credit Points)
Subject Details (p. 4809)
This subject is designed to extend students' practical application of different epidemiological study designs to give them a practical understanding of how epidemiological principles and practices are used in real world settings. Students should have basic knowledge and skills in epidemiology to be successful in this subject. Students will have the opportunity to acquire and apply the practical knowledge and skills needed to undertake epidemiological research to investigate contemporary local and global health issues.
Level: Postgraduate Coursework Level 6 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 6005 Applied Epidemiology Project (40 Credit Points)
Subject Details (p. 4809)
This subject is a capstone subject for high-achieving students (GPA >5.5) enrolled in the Master of Epidemiology. Students will get the opportunity to apply the epidemiological skills learnt during their postgraduate study as a supervised intern within a professional health, research or non-governmental organisation setting. The placement will consist of a minimum of 300 hours work (approximately 10 weeks full time work or equivalent part time). The placement will allow students to you will undertake a project which will make a useful contribution to the workplace and will be assessed via a final report and presentation as well as your professional placement supervisor's report. Professional settings are usually located external to the University. Examples include Western Sydney Local Health District, South Western Local Health District, Nepean Blue Mountain's Primary Health Network, Wentwest (Western Sydney) Primary Health Network.
Level: Postgraduate Coursework Level 6 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7001 Advanced Health Classifications and Coding (10 Credit Points)
Subject Details (p. 4810) Legacy Code: 301178
This subject is designed to enable the student to classify diseases and interventions using the current version of the International Statistical Classification of Diseases and Related Health Problems, Tenth Revision, Australian Modification, the Australian Classification of Health Interventions and the Australian Coding Standards (ICD-10-AM/ACHI/ACS). The subject will also include the historical development of clinical classification systems as well as the purpose and value of classifying diseases and interventions within the health system. The students will become familiar with the structure and content of ICD-10-AM ACHI/ACS and be introduced to the rules and conventions associated within ICD-10-AM/ACHI. Further, students will carry out research based analytical tasks gaining an in-depth knowledge in relation to health classification systems and terminology systems such as SNOMED-CT (Systematized Nomenclature of Medicine - Clinical Terms).
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7002 Analytic Approaches in Epidemiology (10 Credit Points)
Subject Details (p. 4811) Legacy Code: 401175
This subject extends the basic principles of epidemiology introduced in 401076 'Introduction to Epidemiology' and equips students with practical analytical skills to design and conduct epidemiological studies. The subject considers the principle models of causation and analytical approaches to epidemiological study design and analysis. Students will use causal diagrams and evidence from the literature to develop analytic strategies for specific study designs, develop practical skills in calculating and interpreting measures of association and effect modification, and be introduced to principles and strategies for quantitative bias analysis.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): PUBH 7016 OR
PUBH 7015
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7003 Approaches to Epidemiology (10 Credit Points)
Subject Details (p. 4812) Legacy Code: 400856
Social epidemiology explores the effects of social-structural factors and their impact on health outcomes. This subject explores the principles, strategies and activities associated with social epidemiology, including the contribution of the social determinants of health in understanding the incidence, prevalence, and distribution of health-related states in different populations. Students will explore the importance of primary health care decision making and evidence-based evaluation to improve health outcomes in clinical practice.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYB 9174 - Approaches to Epidemiology
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7005 Controversies in Epidemiology (10 Credit Points)
Subject Details (p. 4813) Legacy Code: 401178
This subject offers students an opportunity to synthesise theories and methodologies from epidemiology. It highlights current controversies and practices in epidemiology. Students attend weekly presentations on topics related to content area interests, and other relevant seminars. Students will convene with faculty to reflect on and critique components of research presentations relevant to the students' interest and to the contemporaneous topics being covered in the core epidemiology curriculum. Course assignments involve critical appraisal of conceptual and methodological issues presented in the seminars, and related issues relevant to student's own research.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): PUBH 7016 OR
PUBH 7015
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7006 Data Management and Programming for Epidemiology (10 Credit Points)
Subject Details (p. 4813) Legacy Code: 401179
Modern epidemiology deals with ever increasing volumes of data and complexity of analysis. This course is aimed at equipping students with effective practices for managing data and programme code and ensuring the security of their data. Students will be taught the fundamentals of managing code and data in a revision control system as well as good programming practices and techniques which can form a basis for a robust, repeatable and test-driven research methodology. Programming instruction and exercises will use the SAS and R languages, and SQL databases.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): HLTH 7008
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7007 Disaster and Emergency Management (PG) (10 Credit Points)
Subject Details (p. 4814) Legacy Code: 301050
This subject consists of project based studies that explore how human societies prepare for and respond to disasters and emergencies. The subject uses case studies to investigate the historical practice of preparation, prevention, response and recovery strategies for community safety during times of critical incidents. The subject will facilitate improved understanding by developing scenarios of impending issues such as natural disasters and man made emergencies. Focus will be on Australian national and State coordination arrangements for disaster planning including the comprehensive approach to emergency management. Students will need to attend a 5 day workshop and undertake a group presentation and report as well as an exercise in Incident Control System principles at a workshop.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7008 Environmental Epidemiology (10 Credit Points)
Subject Details (p. 4815) Legacy Code: 401177
Environmental Epidemiology is the study of the environmental causes of ill-health and disease with a view to prevention. It is a discipline that has changed significantly over time, more recently becoming concerned with complex systemic change such as global warming. Environmental Epidemiology encompasses a broad range of activities, from exposure assessment to adaptation planning, implementation and evaluation. The course aims to equip students with the knowledge and skills to understand and critically appraise evidence from the relevant literature, to design a study suitable for exposure and vulnerability assessment, and to develop appropriate health policy.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): PUBH 7016
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7009 Epidemiology and Quantitative Methods (10 Credit Points)
Subject Details (p. 4816) Legacy Code: 400417
In this subject, students will study the fundamental concepts and principles of epidemiology and biostatistics and will be given the opportunities through exercise and tutorials to apply these concepts and principles to published public health literature. The subject is designed to give students the skills to interpret and critically evaluate public health literature and to equip the students with the skills for public health research. A range of research studies is examined, including studies of occurrence and risk factors for disease, and studies evaluating intervention treatments or programs. Both the epidemiological and statistical evidence for the findings are critically assessed.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYB 7971 - Epidemiology and Quantitative Methods
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7010 Epidemiology of Non-Communicable Diseases (10 Credit Points)
Subject Details (p. 4816) Legacy Code: 401174
This subject will document the fundamental concepts in epidemiology and control of non-communicable diseases (NCDs), common research methods used in NCD epidemiology, and unique applications of these methods in key NCD areas, including reproductive epidemiology, behavioural epidemiology, epidemiology of ageing and epidemiology of specific NCDs (including cardiovascular disease, diabetes, cancer, chronic respiratory diseases, musculoskeletal problems and mental health problems). The principal goals of this subject are to provide a broad overview of the field, and to develop the knowledge and skills needed to (i) critically evaluate published research in NCD epidemiology and (ii) design an epidemiological study to address an NCD topic.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): PUBH 7016 OR
PUBH 7015
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7011 Health Advancement and Health Promotion (10 Credit Points)
Subject Details (p. 4817) Legacy Code: 400418
By investigating and addressing the multilevel determinants of health outcomes and inequalities, health promotion initiatives aim to improve the health and wellbeing of individuals and societies. In this unit, we will nurture an understanding of concepts and models of health promotion, evaluate the relative successes of recent and classic initiatives within Australia and overseas, and critically engage with debates concerned with the most appropriate strategies for tackling health inequalities in the context of major societal challenges (e.g. population ageing, urbanisation and climate change). Core competencies are nurtured (e.g. Plan and evaluate an intervention) to prepare students for practicing and further study in the field of health promotion.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7012 Health Economics and Comparative Health Systems (10 Credit Points)
Subject Details (p. 4818) Legacy Code: 400967
The unit explores contemporary examples of the role of economics in the organisation, funding and provision of health services. Case examples include, Australia, America, China, Hong Kong, Scandinavia, United Kingdom and India. Students use the principles of economics to assess funding of health with a focus on the interface between economics, ethics and equity in decision making. They also consider the tendency for health systems to be organised around economic principles in areas such as, contracting out, health insurance and pharmaceuticals. Students are encouraged to reflect on the challenges and future directions of their own health system in the context of the unit components.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7013 Health Promotion: A Primary Health Care Approach (10 Credit Points)
Subject Details (p. 4819) Legacy Code: 400836
An individual's personal characteristics and their family, social and community environments have complex interrelationship with their health and health behaviours. The challenge for health professionals is to understand this complexity and encourage the practice of health promotion within a primary health care framework so enabling people to achieve a sense of power and control over their lives. The subject explores the health of individuals and communities in the context of health promotion. Evidence-based health promotion strategies are examined using social health and ecological perspectives.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 7318 - Context of Health Promotion
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7014 Health and Socio-political Issues in Aged Care (10 Credit Points)
Subject Details (p. 4819) Legacy Code: 400837
This subject examines health and socio political issues in aged care within a social capital framework. Social constructs and contexts of ageing are explored and issues of social and economic disadvantage are examined. Equity and access to health care services and the experiences of older people within these services are also highlighted. The role of health professionals and managers in actively engaging in health and social policy debate for ethically just care and services for older people is addressed.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 7153 - Contemporary Issues in Aged Care
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7015 Introduction to Clinical Epidemiology (10 Credit Points)
Subject Details (p. 4820) Legacy Code: 401173
This subject aims to impart the principles of population based (epidemiologic) evidence to the understanding of variations in the outcome of illness and the reasons thereof (Clinical Epidemiology) thereby providing the framework for finding the best answers to "real world" questions about clinical practice and health care. Individuals taking this course (who usually have a health care background) acquire the basic skills required to understand the fundamental questions about the effectiveness of clinical therapies, usefulness of screening and diagnostic tools, prognosis and disease causation and gain the skills required of effective Evidence-Based Medicine practitioners.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: PUBH 7016 - Introduction to Epidemiology
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7016 Introduction to Epidemiology (10 Credit Points)
Subject Details (p. 4821) Legacy Code: 401076
Epidemiology is the study of the distribution and determinants of disease and other health-related conditions in populations, and the application of this study to the control of health problems. Epidemiology encompasses a broad range of activities fundamental to the health sciences. The course is aimed to equip students with the ability to understand and critically appraise evidence from the health sciences used in the formulation of clinical interventions, assessments of population disease burden, and development of health policy. Students will be taught the fundamental concepts and principles of epidemiology and will be given the opportunities through exercises and tutorials to apply these concepts and principles to case studies from current epidemiological research and practice.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: PUBH 7015
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7017 Leadership and the Development of Organisational Capacity (10 Credit Points)
Subject Details (p. 4822) Legacy Code: 400778
This subject examines the concept, form and structure of health care organisations. Organisational theory is explored and used to analyse a range of structures used in nursing and contemporary health care. Factors which influence organisational design, function and effectiveness are explored and discussed including: organisational behaviour, strategy, culture, power and politics, technology, sustainability and effectiveness. A major focus in the subject is planning for strategic organisational development to meet the challenges of rapid change and the need for performance improvements in patient care delivery. Concepts related to the strategic development of workforce capacity in the health care arena are considered through the application of a range of theories including the learning organisation. Leadership will be examined within the context of the subject with a particular emphasis on change management.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7018 Leadership for Quality and Safety in Health Care (10 Credit Points)
Subject Details (p. 4823) Legacy Code: 400777
Increasingly clinical leaders, practitioners and health service managers are being held accountable for improving the quality and safety of patient care and for developing a culture of quality improvement within their teams. In this subject students learn about quality, patient safety and governance frameworks and strategies that they can employ within healthcare to improve system performance, patient safety and patient outcomes. The main approaches used to address quality of care and patient safety are examined and their applications critiqued. Students will explore leadership issues for developing systematic, coherent quality improvement frameworks and quality initiatives that can be applied within their own sphere of practice.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: HLTH 7016 - Quality and Safety in Health Care
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7019 Occupational Health Management (10 Credit Points)
Subject Details (p. 4824) Legacy Code: 300391
This subject focuses on the practice of occupational health within national and international frameworks. It explores issues such as the physical, social and mental impact of the occupational environment on health and includes the human body's response to occupational health hazard exposure through toxicological and epidemiological principles. Strategies for the management of occupational health are examined, together with methods of monitoring and evaluating occupational health programs.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYB 8273 - Occupational Health Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7020 Policy, Power and Politics in Health Care Provision (10 Credit Points)
Subject Details (p. 4825) Legacy Code: 400238
Health and healthcare leaders often engage in the development and implementation of national policy. The success of these policies is often viewed through the health outcomes in terms of access and equity of quality care. Therefore, it is critical to understand the political and social constructions that underpin the development of health and healthcare policy. Students will explore and critically analyse issues related to the development, implementation and outcomes of health and health care policies specifically in relation to the impact on culturally diverse and disadvantaged groups in society today.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): Students enrolled in program 4673 Master of Mental Health Nursing (Nurse Practitioner) must have passed the following three subjects before they can enrol in this subjects - NURS 7018 Contemporary Professional Practice in Mental Health Nursing and NURS 7023 Evidence-based Nursing and NURS 7028 Leadership in Clinical Practice
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7021 Primary Health Care and its Applications (10 Credit Points)
Subject Details (p. 4826) Legacy Code: 400412
This subject explores the impact and relevance of Primary Health Care in its context as a World Health Organization (WHO) strategy for achieving “Health for All”. It examines ways in which Primary Health Care, along with other significant WHO initiatives, including the ‘Sustainable Development Goals’ provides a framework for just and humane health care systems now and into the future. Opportunity for discussion of the complex factors that impact on the health status of populations is provided. Complex dimensions of health and well-being are explored, enabling students to inform health care practices and planning of programs that can lead to sustainable health within a primary health care framework.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7022 Public Health, Policy and Society (10 Credit Points)
Subject Details (p. 4827) Legacy Code: 400416
This subject examines the nature of public health and develops a systemic understanding of various public health policy frameworks and issues. The subject provides the context and history for understanding public health approaches, explores the cultural and social dimensions of health and illness and the economic and political environment in which health policies and strategies are developed and implemented. The subject advocates a view of health that includes an implicit recognition of the physical, social and economic environment, affirms the importance of social justice and equity in health care, and emphasises the importance of inter-sectoral collaboration.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYB 7972 - Health Management Policy and Society LGYB 8025 - Health Management Policy and Society
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7023 Safe and Sustainable Construction (10 Credit Points)
Subject Details (p. 4828) Legacy Code: 301190
This subject introduces two important aspects of construction projects: workplace safety and sustainability. Safety and sustainability are crucial issues in the upper echelons of the construction industry. This subject is intended to explore the theoretical frameworks and best practices to support health and safety in construction projects. It introduces various assessment tools and techniques that can be used to measure and improve sustainability in construction projects.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7024 Safety and Risk Management (10 Credit Points)
Subject Details (p. 4829) Legacy Code: 300677
This subject provides a critical insight into the theory and practice of managing safety and health at the workplace with a dual focus on risk management and safety management. Students have the opportunity to develop a safety systems approach concentrating on hazard identification, risk assessment and devising control measures incorporating safety management principles. Safety culture and its influence on Occupational Health and Safety (OHS) practice is also detailed. In addition, the subject addresses the legal underpinning of OHS requirements at the workplace. Labour market change and the role of government, unions and employer organisations are also examined. Global perspectives on OHS from various jurisdictions ranging from the USA, Hong Kong and China are also scrutinised.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 5996 - Safety Management LGYA 6000 - Risk Assessment
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7025 Statistical Methods in Epidemiology (10 Credit Points)
Subject Details (p. 4829) Legacy Code: 401176
Statistical ideas are integral to the conceptual basis of epidemiology and provide the tools needed to interpret epidemiological information and conduct epidemiological studies. Most professions in the health sciences need to be able to read and interpret statistics relating to individual and population health status and health risks, and to identify appropriate statistical methods to evaluate interventions, health policies and programs. Many public health practitioners are actively involved in surveillance, quantitative research and/or evaluation. This subject aims to support students to reach a level of proficiency in the selection of appropriate statistical methods to address specific research questions with a given dataset, conduct the selected analysis, interpret the results appropriately and draw valid and insightful conclusions about the research question.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): HLTH 7008
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7026 Supporting Aged Communities (10 Credit Points)
Subject Details (p. 4830) Legacy Code: 400241
The subject aims to analyse the dynamic systems of aged care services, to challenge orthodox strategies for reform in aged care and to identify ways in which primary health care can be employed as a process of change in aged care services.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7027 Supporting Individuals and Communities in Crisis (10 Credit Points)
Subject Details (p. 4831) Legacy Code: 400838
The planning, development and implementation of primary health care initiatives rest largely on the capacity of health care workers to develop and engage in partnerships with a diverse range of consumers, health care workers and organisations. In this subject, students will critically examine the complexities inherent in developing and sustaining effective and active partnerships with individuals and groups in primary health care contexts. Students will examine cultural and socio-political issues that shape multidisciplinary and trauma informed communication. Students will also explore how to plan for and respond to crises, emergencies, and disasters at an individual, organisational and community level.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7028 Surveillance and Disaster Planning (10 Credit Points)
Subject Details (p. 4832) Legacy Code: 400847
As the world responds to climate change and increased globalisation, the human population is becoming increasingly vulnerable to natural and human disasters. This subject equips students with skills in disaster preparedness and public health surveillance. It addresses the psychosocial and mental health aspects of disaster management, the systems of disaster response and how these aspects are relevant across the all-hazard approach to Prevention, Preparation, Response and Recovery (PPRR). Using current evidence and understanding of this field, students will gain knowledge, skills and experience in leadership and management across the PPRR spectrum and the public health, clinical and other coordination in terms of impact and outcome. Australian requirements and systems in relation to surveillance and disaster planning will be analysed as will international and Australian roles in the region.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7029 Digital Health Management (10 Credit Points)
Subject Details (p. 4833) Legacy Code: 401366
Digital health technologies and services are significant contributors to the transformation of healthcare delivery. Uncertainty, abandonment and lack of organisational willingness to adopt, and failure to manage the realisation of business benefits from health information technology investments lead digital technology projects to fail. This subject provides an overview of capability required to enable health organisations to measure and optimise the value of digital health initiatives. Students will be introduced to various concepts and frameworks used to measure and quantify the benefits of digital health in Australia and elsewhere. Students will have opportunities to participate in industry case studies and analysis.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): For students enrolled in 4778 Graduate Diploma in Digital Health and 4698 Master of Health Science 2-year and 15-year pathways
PUBH 7031 Health Systems and Policy
Note Students in the 1 year pathway will need to complete a rule waiver form to enrol in this unit
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7030 Health Systems Planning and Evaluation (10 Credit Points)
Subject Details (p. 4834) Legacy Code: 401364
This subject addresses health services planning and evaluation, as well as health economics. This subject aims to provide students with the necessary knowledge and skills to understand and apply the major concepts involved in health services planning and evaluation. Workforce planning and service capability frameworks are addressed as well as planning capital infrastructure for health services. How to evaluate and implement a health services plan is also described. The second module introduces the student to several economic concepts relevant to healthcare management and demonstrates how they are applied to actual situations in the healthcare industry.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): For students enrolled in 4700 Graduate Diploma in Health Science and 4777 Health Services Management and in 4698 Master of Health Science 2-year and 15-year pathways
PUBH 7031 Health System and Policy
Equivalent Subjects: PUBH 7012 Health Economics and Comparative Health Systems
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7031 Health Systems and Policy (10 Credit Points)
Subject Details (p. 4835) Legacy Code: 401363
A detailed understanding of the structure and functioning of the health system is essential to effectively work, manage and lead in health services. This subject explores concepts that form the basis for the way health systems are designed and operate. This subject will equip students with the skills to critique challenges and opportunities that can influence how health services are delivered and resourced such as health workforce shortages, digital health innovations, public-private partnerships, and changing demographics. This subject will also examine the crucial role of governance and health policy in determining funding priorities and shaping health systems with a particular focus on the Australian health system, but within an international context. These issues are critiqued with health reform and the drivers for change nationally and internationally.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: PUBH 7022 Public Health Policy and Society
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7032 Patient-centred digital healthcare (10 Credit Points)
Subject Details (p. 4836) Legacy Code: 401367
Patient-Centred Digital Healthcare introduces students to consumer engagement and consumer informatics approaches and many other examples of innovations using data analytics and digital health strategies in clinical, community-based, and home-based settings. Students will learn about the role of Patient-facing Technologies to empower patients and improve safety and the importance of standardisation of the electronic management of healthcare information and the automation of clinical processes in delivering patient-centred care. Central to fulfilling this role is ensuring that care is delivered in a safe and effective manner. Students are encouraged to identify, articulate, reflect upon, and value digital health technologies in their local health services.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): For students enrolled in 4778 Graduate Diploma in Digital Health and 4698 Master of Health Science 2-year and 15-year pathways
PUBH 7031 Health Systems and Policy
Note Students in the 1 year pathway will need to complete a rule waiver form to enroll in this unit
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7033 The Social Determinants of Health (10 Credit Points)
Subject Details (p. 4837) Legacy Code: 401372
The social determinants of health recognise that the health and wellbeing of individuals and communities are influenced by a range of social factors such as wealth, education, gender, and ethnicity. Such factors determine access to and use of resources influencing health outcomes and resulting in disparities in health or health inequalities. In this unit, students will use theories and frameworks for the social determinants of health to assess the role of key social factors in affecting the health and illness of individuals and communities. Students will be introduced to the challenges of measuring and addressing the social determinants of health, and critically examine examples of programmatic and policy interventions aimed at reducing health inequalities and addressing the social determinants of health.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: HLTH 7001 A Global Perspective on the Social Determinants of Health
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 7034 Workplace Safety and Risk Management (10 Credit Points)
Subject Details (p. 4838) Legacy Code: 401373
This subject provides a critical insight into the theory and practice of managing health and safety in the workplace. Students have the opportunity to develop a safety systems approach, concentrating on hazard identification, risk assessment and devising control measures incorporating safety management principles to address current and emerging workplace health and safety issues. Students will learn the importance of developing a safety culture in the workplace as a core principle of safe work system management. In addition, the subject addresses the legal underpinning of health and safety requirements at the workplace. Labour market change and the role of government, unions and employer organisations are also examined. Global perspectives on workplace health and safety from various jurisdictions are also scrutinised.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): PUBH 7031
Equivalent Subjects: PUBH 7024 Safety and Risk Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 9001 Higher Degree Research Thesis - Community Health (80 Credit Points)
Subject Details (p. 4839) Legacy Code: 800115
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 9002 Higher Degree Research Thesis - Public Health (80 Credit Points)
Subject Details (p. 4840) Legacy Code: 800113
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

Radiography (RADI)

RADI 5001 Physics for Diagnostic Ultrasound (10 Credit Points)
Subject Details (p. 4842)
This subject introduces students to ultrasound physics, a key area of knowledge for sonographers. They will learn about the essential physical principles that underpin ultrasound imaging, extending from the basic principles of sound waves through to emerging technologies and applications. This subject provides an essential basis for future study in the Graduate Diploma in Sonography (Cardiac or Vascular).
Level: Postgraduate Coursework Level 5 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

RADI 6001 Pathophysiology in Diagnostic Ultrasound (10 Credit Points)
Subject Details (p. 4842)
This subject will develop a student's understanding of the abnormal anatomical features and pathophysiological processes that underpin frequently encountered diseases within both the Australian Indigenous and non-Indigenous populations in ultrasound practice. Common congenital, genetic and acquired diseases, alongside biofeedback mechanisms controlling homeostasis will be explored. Furthermore, the roles of key pharmacological agents for disease management will be examined.
Level: Postgraduate Coursework Level 6 subject
Pre-requisite(s): RADI 5001 - Physics for Diagnostic Ultrasound
Restrictions: Please see the Subject Details page for any restrictions for this subject

RADI 6002 Research Foundations for Sonography (10 Credit Points)
Subject Details (p. 4843)
Research Foundations in Sonography provides sonography students with foundational knowledge and experience in research. The subject is comprised of two modules: 1. Research Foundations. 2. Research Application. Module 1 includes topics such as evidence, research ethics and disseminating research. Module 2 includes quality assurance and research in the clinical context.
Level: Postgraduate Coursework Level 6 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

RADI 7001 Advanced Principles and Practice of Cardiac Sonography (10 Credit Points)
Subject Details (p. 4844) Legacy Code: 401247
This subject is an essential part of the final year of the Masters in Cardiac Sonography. It will build on the student's knowledge and skills gained in prior units, as they select and study a contemporary cardiac ultrasound technology. Students are required to research and write a literature review about their chosen technology, and to evaluate their own use of the technology in clinical practice. In addition, students will have the opportunity to teach first year cardiac sonographers, and write a reflection on their teaching experience.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): RADI 7009 AND
RADI 7005
Restrictions: Please see the Subject Details page for any restrictions for this subject

RADI 7002 Practice of Cardiac Sonography 1 (10 Credit Points)
Subject Details (p. 4844) Legacy Code: 401189
In this subject, students will learn how to acquire and optimise ultrasound images and to make key measurements. They will learn to draw conclusions about cardiac anatomy and function based on images and measurements and will develop their professional and ethical skills by learning how to plan and implement a cardiac ultrasound scan in a safe and ethical manner. The skills and knowledge learnt in this subject, which includes a work-integrated learning component, provide foundational skills in cardiac sonography.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): RADI 5001 - Physics for Diagnostic Ultrasound
Restrictions: Please see the Subject Details page for any restrictions for this subject

RADI 7003 Practice of Cardiac Sonography 2 (10 Credit Points)
Subject Details (p. 4846) Legacy Code: 401190
In this subject, students will develop their image acquisition, optimisation and measurement skills. They will learn to perform more extensive cardiac sonographic scan and will further develop their professional and ethical attributes. This subject, which includes a work-integrated learning component, will ensure the consolidation of foundational skills, knowledge and attributes.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): RADI 5001 - Physics for Diagnostic Ultrasound
RADI 7002 - Practice of Sonography 1 (Cardiac)
Co-requisite(s): RADI 6001 - Pathophysiology in Diagnostic Ultrasound
Restrictions: Please see the Subject Details page for any restrictions for this subject

RADI 7004 Practice of Cardiac Sonography 3 (10 Credit Points)
Subject Details (p. 4847) Legacy Code: 401191
This subject aims to further develop students' understanding of the essential aspects of working in a clinical environment and to consolidate their imaging skills. Students will learn to how to image a variety of lesions and diseases, including common adult congenital heart defects, systemic diseases that affect the heart, pericardial and pulmonary diseases and cardiac masses. Considerable time will be spent in the clinical environment refining imaging techniques, and students will prepare an evaluation of their imaging skills. .
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): RADI 7003
Co-requisite(s): RADI 7008
Restrictions: Please see the Subject Details page for any restrictions for this subject

RADI 7005 Practice of Cardiac Sonography 4 (10 Credit Points)
Subject Details (p. 4848) Legacy Code: 401192
This subject aims to assure that students have gained adequate knowledge and skills to be able to practice competently, confidently and ethically as cardiac sonographers. Care for and communication with patients and colleagues, continual professional development (CPD) and exposure to advanced and leading edge imaging technologies will be given particular emphasis during this subject. Once more, considerable time will be spent in the clinical environment performing imaging skills and activities independently (as per special requirements).
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): RADI 7004
Restrictions: Please see the Subject Details page for any restrictions for this subject

RADI 7006 Principles of Cardiac Sonography 1 (10 Credit Points)
Subject Details (p. 4849) Legacy Code: 401185
In Autumn 2024, this subject replaced by RADI 5001 - Physics for Diagnostic Ultrasound. This subject introduces students to two key areas of knowledge for cardiac sonographers: 1) cardiac anatomy and physiology, and 2) ultrasound physics. Students will learn about the normal and abnormal anatomy and physiology of the human heart. They will also learn about the essential physical principles that underpin ultrasound imaging. This subject provides an essential basis for future study in the Graduate Diploma in Cardiac Sonography.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

RADI 7007 Principles of Cardiac Sonography 2 (10 Credit Points)
Subject Details (p. 4849) Legacy Code: 401186
This subject will build on the knowledge acquired in Principles of Cardiac Sonography 1, via a blend of theoretical and practical activities. The students' understanding of cardiac anatomy and physiology will be extended, and they will begin studying cardiovascular diseases. Aspects of ultrasound physics studied in this subject include identifying imaging artifacts, recognizing equipment limitations, and bio-effects and safety.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): RADI 7006
Restrictions: Please see the Subject Details page for any restrictions for this subject

RADI 7008 Principles of Cardiac Sonography 3 (10 Credit Points)
Subject Details (p. 4850) Legacy Code: 401187
In 2024, this subject replaced by RADI 6002 - Research Foundations for Sonography. This subject will extend the knowledge students have gained from Principles of Cardiac Sonography 2. Students will utilise their knowledge of normal and abnormal cardiac anatomy and physiology to study congenital and acquired heart lesions. They will examine systemic, pulmonary and pericardial diseases and cardiac masses, analyse data from basic echocardiogram measurements, and learn case study research skills by undertaking a case report. The university library's vast resources will provide an important aid to learning in this subject.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): RADI 7007
Restrictions: Please see the Subject Details page for any restrictions for this subject

RADI 7009 Principles of Cardiac Sonography 4 (10 Credit Points)
Subject Details (p. 4851) Legacy Code: 401188
In Spring 2025, this subject will be replaced by RADI - 7025 - Applied Cardiac Sonography. This subject aims to assure that students have gained adequate knowledge and skills to be able to practice competently and confidently as cardiac sonographers. Students will learn about more complex heart dis-ease and how to detect them by echocardiography and other imaging modalities. They will further devel-op their research skills and start contributing to the sonographic practice through conducting a case pro-ject and presenting the report to the professional audience. The university library's vast teaching and re-search resources will provide an important means for facilitating learning in this subject.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): RADI 7008
Restrictions: Please see the Subject Details page for any restrictions for this subject

RADI 7010 Research Project in Cardiac Sonography (20 Credit Points)
Subject Details (p. 4851) Legacy Code: 401248
In 2021 this subject replaced by 401467 - Medical Research Project (PG). The primary aims of this subject are to: i. Design, and ii. Execute and complete, a research project based on the cardiac ultrasound technology chosen by the student in Advanced Principles and Practice of Cardiac Sonography. Successful completion of the subject results in the composition of a report, and in an oral presentation, which will include details of the aims, methods, results and conclusions of the project.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): HLTH 7008 AND
RADI 7001
Restrictions: Please see the Subject Details page for any restrictions for this subject

RADI 7011 Practice of Vascular Sonography 1 (10 Credit Points)
Subject Details (p. 4852) Legacy Code: 401293
This subject introduces students to the practice of vascular sonography. Students will learn how to acquire and optimise ultrasound images and to make basic measurements. In addition, they will learn to draw conclusions about vascular anatomy and function based on the images and measurements; and they will develop their professional and ethical skills through learning how to plan for and implement a vascular ultrasound examination in a safe and ethical manner. The skills learnt in this unit, which includes a work-integrated component, provide well-rounded, foundation skills in vascular sonography.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): RADI 5001
Restrictions: Please see the Subject Details page for any restrictions for this subject

RADI 7012 Practice of Vascular Sonography 2 (10 Credit Points)
Subject Details (p. 4853) Legacy Code: 401295
Content in this subject will be an extension of the knowledge and skills developed in Practice of Sonography 1. Students will learn to perform more extensive vascular examinations and will develop their professional and ethical attributes. Learning in the subject, which includes a work-integrated learning component, will consolidate foundational vascular skills in vascular sonography.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): RADI 5001 - Physics for Diagnostic Ultrasound
RADI 7011 - Practice of Vascular Sonography 1
Co-requisite(s): RADI 6001 - Pathophysiology in Diagnostic Ultrasound
Restrictions: Please see the Subject Details page for any restrictions for this subject

RADI 7013 Practice of Vascular Sonography 3 (10 Credit Points)
Subject Details (p. 4855) Legacy Code: 401297
This subject aims to further develop students' understanding of the essential aspects of working in a clinical environment and will help to consolidate their imaging skills. Students will learn how to image a variety of arterial and venous pathologies. Considerable time will be spent in the clinical environment refining imaging techniques, and students will prepare and evaluation of their imaging skills.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): RADI 7012
Co-requisite(s): RADI 7017
Restrictions: Please see the Subject Details page for any restrictions for this subject

RADI 7014 Practice of Vascular Sonography 4 (10 Credit Points)
Subject Details (p. 4856) Legacy Code: 401299
This subject aims to assure that students have gained adequate knowledge and skills to be able to practice competently, confidently and ethically as vascular sonographers. Care for and communication with patients and colleagues, continued professional development (CPD) and exposure to advance and leading edge imaging technologies will be given particular emphasis during this subject. Once more, considerable time will be spent in the clinical environment performing imaging skills and activities independently (as per special requirements)
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): RADI 7013
Co-requisite(s): RADI 7018
Restrictions: Please see the Subject Details page for any restrictions for this subject

RADI 7015 Principles of Vascular Sonography 1 (10 Credit Points)
Subject Details (p. 4857) Legacy Code: 401292
In Autumn 2024, this subject replaced by RADI 5001 - Physics in Diagnostic Ultrasound. In this subject, students will study two essential areas of knowledge for vascular sonographers: I. cardiovascular anatomy and physiology and II. ultrasound physics. The normal anatomy and physiology of the cardiovascular system, and the key physics principles utilized in ultrasound imaging will comprise the majority of the subject content. This subject provides an essential basis for future study in the Graduate Diploma in Vascular Sonography.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): RADI 7011 - Practice of Vascular Sonography 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

RADI 7016 Principles of Vascular Sonography 2 (10 Credit Points)
Subject Details (p. 4858) Legacy Code: 401294
This subject builds on the knowledge acquired in Principles of Vascular Sonography 1, via a blend of theoretical and practical activities. Students' knowledge of general pathology principles will be extended, and they will also cover the principles of coagulation and atherosclerotic disease. Aspects of ultrasound physics studies in this subject include identifying imaging artefacts, recognizing equipment limitations and bio-effects and safety. Basic vascular pharmacology is also covered.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): RADI 7015
Co-requisite(s): RADI 7011 - Practice of Vascular Sonography
Restrictions: Please see the Subject Details page for any restrictions for this subject

RADI 7017 Principles of Vascular Sonography 3 (10 Credit Points)
Subject Details (p. 4859) Legacy Code: 401296
This subject will extend the student's knowledge of cerebrovascular and peripheral vascular arterial disease, along with thrombotic venous disease. Students will learn essential research skills, for which the university's vast learning resources will provide an important aid.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): RADI 7016
Co-requisite(s): RADI 7013 - Practice of Vascular Sonography 3
Restrictions: Please see the Subject Details page for any restrictions for this subject

RADI 7018 Principles of Vascular Sonography 4 (10 Credit Points)
Subject Details (p. 4859) Legacy Code: 401298
This subject aims to provide students with adequate knowledge and skills to practice competently and safely as vascular sonographers. Students will learn about more specialised diseases and how to detect them using ultrasound and other imaging modalities. Research skills will also be developed and students will start contributing to a wider sonographic practice by conducting a case project and presenting the report to the professional audience. The university library's vast teaching and research resources will provide an important means for facilitating learning in this subject.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): RADI 7017
Co-requisite(s): RADI 7014 - Practice of Vascular Sonography 4
Restrictions: Please see the Subject Details page for any restrictions for this subject

RADI 7019 Practice of Obstetric and Gynecological (O&G) Sonography 1 (10 Credit Points)
Subject Details (p. 4860)
This subject introduces students to the practice of obstetric and gynecological (O&G) sonography. Students will learn how to acquire and optimise transabdominal ultrasound images and make key measurements. They will learn to draw conclusions about fetal and maternal anatomy and function based on images and measurements. In addition, students will develop their professional and ethical skills by learning how to plan and implement O&G ultrasounds in a safe and ethical manner. The skills and knowledge learnt in this subject, which includes work-integrated learning, provide foundational clinical and professional skills in O&G sonography.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): RADI 5001 - Physics for Diagnostic Ultrasound
Restrictions: Please see the Subject Details page for any restrictions for this subject

RADI 7020 Practice of Obstetric and Gynecological (O&G) Sonography 2 (10 Credit Points)
Subject Details (p. 4862)
In this subject, students will continue to develop their image acquisition, optimisation and measurement skills in O&G sonography. They will learn to perform a transvaginal examination to assess the gravid and non-gravid female pelvis. Critique of scanning protocols will allow students to deliver sonographic examinations that address a clinical indication. Students will investigate methods for conveying clinical information and maintaining patient confidentiality and privacy. An applied understanding of medical ethics, workplace health and safety, and reflection frameworks will enhance the provision of high-quality patient care. The subject, which includes a work-integrated learning component, will ensure the consolidation of foundational skills, knowledge and attributes.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): RADI 7019 - Practice of Obstetric and Gynecological (OG) Sonography 1
Co-requisite(s): RADI 6001 - Pathophysiology in Diagnostic Ultrasound
Restrictions: Please see the Subject Details page for any restrictions for this subject

RADI 7021 Practice of Obstetric and Gynecological (O&G) Sonography 3
Subject Details (p. 4863)
In this subject, students will enhance their skills in image acquisition, optimisation, and measurement. They will learn to identify crucial features of fetal and maternal anatomy and physiology required to perform a comprehensive O&G sonographic assessment. Additionally, students will explore effective communication techniques for delivering adverse findings, managing workplace relationships, and meeting patient expectations. They will collaborate with peers and incorporate feedback to deliver a multimedia presentation to a professional audience with confidence. The subject also includes a work-integrated learning component to promote the development of skills, knowledge, and attributes.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): RADI 7020 - Practice of O G Sonography 2
Co-requisite(s): RADI 6002 - Research Foundations for Sonography
Restrictions: Please see the Subject Details page for any restrictions for this subject

Rehabilitation Therapies (REHA)

REHA 1001 Introduction to Occupational Therapy (10 Credit Points)
Subject Details (p. 4865) Legacy Code: 400160
This subject introduces students to the profession of occupational therapy, conceptual foundations underpinning the profession, and areas of clinical practice. Students will learn about the important and unique contribution made by occupational therapists in peoples lives to promote health and well-being. The important role of occupation in daily life will be discussed. In particular, this subject presents an overview of how occupational therapy reduces activity limitations people may have, and in doing so enhances the social participation for people of all ages and abilities. The problem solving process used by occupational therapists to assist clients will be introduced.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 1002 Introduction to Physiotherapy Practice (10 Credit Points)
Subject Details (p. 4866) Legacy Code: 400906
This subject introduces students to the concept of physiotherapy as a profession, including regulatory, ethical and legal frameworks underpinning practice within the context of the changing health environment. In addition, students will be introduced to fundamental aspects of physiotherapy practice, including gathering, analysing and problem-solving information through a process of clinical reasoning. Students will also develop practical skills in relation to assessment of movement, patient manual handling and transfers, and patient education regarding gait and use of assistive devices.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 1003 Introduction to Podiatry (10 Credit Points)
Subject Details (p. 4867) Legacy Code: 400905
The broad aim of this subject is to introduce the work of podiatrists in health care and explain the important role of podiatric services in the community. Students will gain knowledge of professional and legislative requirements and develop skills in clinical and reflective practice. The focus will primarily be on areas designed to prepare students for incorporating the clinical standards for infection control and general clinical assessment skills in preparation for competent and culturally safe practice in clinical subjects.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 1004 Occupational Therapy Practice 1 (10 Credit Points)
Subject Details (p. 4868) Legacy Code: 400907
This subject introduces students to the principles of professional practice. Students will be provided with learning opportunities through a variety of experiential and community engagement activities that will begin to develop their skills and competence. Professional competencies addressed include communication, documentation, reflection and professional and ethical behaviour. A professional practice placement is incorporated in this subject. Students will complete practice hours in accordance with World Federation of Occupational Therapy accreditation guidelines.
Level: Undergraduate Level 1 subject
Pre-requisite(s): REHA 2006 People Environments and Occupations
COMM 1007 Communication in Health
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 1005 Introduction to Speech Pathology Practice (10 Credit Points)
Subject Details (p. 4869) Legacy Code: 401300
This subject introduces students to the profession of speech pathology, including the regulatory, ethical and legal frameworks which underpin speech pathology practice within the context of the changing health environment. Students will explore and reflect on their developing professional identity with reference to the Professional Standards for Speech Pathologists in Australia, including the domains of professional conduct, reflection and lifelong learning, and speech pathology practice. In addition, students will have opportunities to develop core skills in communication and professional interaction, including gathering, analysing and reflecting on information through a process of clinical reasoning. Students will also develop introductory level skills in core speech pathology processes such as safe and effective observation, documentation and therapeutic communication through practical activities with academic staff and other students.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 1006 Communication and Mealtime Foundations (10 Credit Points)
Subject Details (p. 4871) Legacy Code: 401416
This subject provides an orientation to the foundational concepts that underpin Speech Pathologists' practice in the areas of communication and mealtimes across the lifespan. The subject will introduce students to core practice areas and explore the role of the Speech Pathologist in working with individuals, families and communities across different clinical contexts. Students will have the opportunity to compare and contrast typical and disordered presentation of speech, language, voice, fluency, multimodal communication and swallowing in both children and adults. Throughout the subject, theoretical approaches to working effectively in partnership with individuals, families and models will be illustrated.
Level: Undergraduate Level 1 subject
Pre-requisite(s): REHA 1005
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 1007 Foundations of Recreational Therapy (10 Credit Points)
Subject Details (p. 4872) Legacy Code: 401386
This subject introduces students to the profession of recreational therapy, its models and modalities of practice as well as potential areas of work and intervention. It explores the conceptual foundations underpinning the profession, the different approaches to recreation therapy practice and areas of clinical intervention. Students will learn about the important and unique contribution made by recreation therapists in people's lives to promote human development and individual and collective well-being.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 1008 Introduction to Leisure and Recreation Theory (10 Credit Points)
Subject Details (p. 4873) Legacy Code: 401395
Introduction to Leisure and Recreation Theory introduces students to key concepts in leisure and recreation, particularly as they relate to health and well-being. Students will learn about models and theories that assist them in understanding leisure behaviours and recreation practices from different perspectives. The various disciplinary approaches to leisure studies and practice are reviewed, and the multifaceted nature of leisure is explored. In particular, students are encouraged to identify, articulate, reflect upon, and value leisure in their own lives and the lives of others.
Level: Undergraduate Level 1 subject
Incompatible Subjects: REHA 2002 - Introduction to Leisure and Recreation Theory
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 1009 Introduction to Leisure and Recreation Theory (UG Cert) (10 Credit Points)
Subject Details (p. 4874) Legacy Code: 500060
Introduction to Leisure and Recreation Theory introduces students to key concepts in leisure and recreation, particularly as they relate to health and well-being. Students will learn about models and theories that assist them in understanding leisure behaviours and recreation practices from different perspectives. The various disciplinary approaches to leisure studies and practice are reviewed, and the multifaceted nature of leisure is explored. In particular, students are encouraged to identify, articulate, reflect upon, and value leisure in their own lives and the lives of others.
Level: Undergraduate Level 1 subject
Equivalent Subjects: REHA 1008 Introduction to Leisure and Recreation theory
Incompatible Subjects: REHA 2002 Introduction to Leisure and Recreation Theory
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 2001 Core Competencies in Physiotherapy Practice (10 Credit Points)
Subject Details (p. 4875) Legacy Code: 400982
Students build on their knowledge and skills explored in their first 1.5 years of physiotherapy study. It focuses on the core competencies of physiotherapy professional practice, which will be developed through a variety experiential and community engagement learning activities. Professional competencies addressed in this subject include communication, documentation, and reflection, professional and ethical behaviour. In addition, students will develop skills in client assessment, and interpretation of findings to formulate hypothesized problem lists and goals for patients.
Level: Undergraduate Level 2 subject
Pre-requisite(s): REHA 1002
Co-requisite(s): NATS 2008
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 2002 Introduction to Leisure and Recreation Theory (10 Credit Points)
Subject Details (p. 4876) Legacy Code: 400244
Introduction to Leisure and Recreation Theory introduces students to key concepts in leisure and recreation, particularly as they relate to health and well-being. Students will learn about models and theories that assist them in understanding leisure behaviours and recreation practices from various perspectives, but with a particular focus on insights from sociology and psychology. In particular, students are encouraged to identify, articulate, reflect upon, and value leisure in their own lives and the lives of others.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 2003 Musculoskeletal Disorders and Imaging (10 Credit Points)
Subject Details (p. 4877) Legacy Code: 401180
This subject will introduce students to clinical and theoretical foundations of musculoskeletal disorders that can impact on the function of the lower extremity and reduce patient quality of life. Musculoskeletal disorders including rheumatic diseases, inflammatory arthropathies, connective tissue disorders, bone disease and tumours will be covered. Advanced assessment evaluation will be taught with a focus on diagnostic imaging techniques including ultrasound, X-rays, magnetic resonance imaging, computer tomography and bone scans. This will assist in the clinical diagnosis of disease processes that present in podiatric settings
Level: Undergraduate Level 2 subject
Pre-requisite(s): REHA 1003 AND
REHA 2005 AND
NATS 1022
Co-requisite(s): REHA 2007
Equivalent Subjects: REHA 3032 - Podiatric Techniques 1B
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 2004 Occupational Therapy Practice 2 (10 Credit Points)
Subject Details (p. 4878) Legacy Code: 400909
This subject provides opportunities for students to understand the wide-ranging practice areas of relevance to occupational therapy. Students will complete a 90-hour project placement across the semester in partnership with diverse health and community-based service providers. Through a variety of experiential, self-directed, and flexible learning opportunities provided through class practicums and practice placement activities, students will develop critical occupational therapy skills and competence in communication, professional behaviours, ethical practice, critical reflection, quality improvement and project management.
Level: Undergraduate Level 2 subject
Pre-requisite(s): REHA 1004
Equivalent Subjects: LGYA 7061 - Occupational Therapy Clinical Practice 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 2005 Pathomechanics and Podiatric Medicine (10 Credit Points)
Subject Details (p. 4879) Legacy Code: 401181
This subject will introduce students to clinical/practical and theoretical foundations of human biomechanics of the foot and lower extremity, and the assessment, diagnosis and treatment of common foot and lower extremity pathologies. The subject consists of co-ordinated lectures and practical components to cover the theory and application of foot and lower extremity biomechanics and gait analysis, relevant physical examinations (bones, joints, soft tissues), diagnosing common foot and lower extremity conditions and related treatment options.
Level: Undergraduate Level 2 subject
Pre-requisite(s): NATS 1022 AND
REHA 1003
Co-requisite(s): HLTH 2003
Incompatible Subjects: REHA 3031 - Podiatric Techniques 1A
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 2006 People, Environment and Occupations (10 Credit Points)
Subject Details (p. 4880) Legacy Code: 400908
Analysing an individual's participation in meaningful occupations is an essential clinical reasoning process to be mastered by occupational therapists. Therapists must be able to analyse three factors to do so: the person's abilities; the demands of the occupation; and the impact of the environmental context on participation. This subject will facilitate the development of these skills so that students can maximise the person-environment-occupation fit to optimise participation for people with a variety of health challenges or disabilities.
Level: Undergraduate Level 2 subject
Pre-requisite(s): REHA 1001
Co-requisite(s): HLTH 1001 OR
HLTH 1012
Equivalent Subjects: LGYA 7691 - Functional Analysis
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 2007 Podiatry Pre-Clinical (10 Credit Points)
Subject Details (p. 4881) Legacy Code: 400933
This subject will prepare students for working with patients in the UniClinic and external placement through consolidation and application of podiatric theory and assessment skills first introduced in Year 1. Students will develop knowledge of effective strengths-based communication skills through small group work, participation in workshops, regular opportunities for discussion, and group clinical work. The subject will also apply student knowledge of functional anatomy, dermatological, vascular, neurological, and biomechanical assessment techniques and management into the context of common podiatric conditions.
Level: Undergraduate Level 2 subject
Pre-requisite(s): HLTH 1010
COMM 1007
PUBH 1006
REHA 2005
Co-requisite(s): REHA 2003
Incompatible Subjects: LGYA 7036 - Podiatry Pre-clinical Studies
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 2009 Workplace Learning 1 (Therapeutic Recreation) (10 Credit Points)
Subject Details (p. 4883) Legacy Code: 400246
This subject provides students with the opportunity to apply theoretical and practical knowledge and skills gained in the course to develop their practice and professional behaviours in a therapeutic recreation workplace setting. The subject develops skills for students in working with individuals in a therapeutic recreation program that include assessment, planning, programming and evaluation.
Level: Undergraduate Level 2 subject
Pre-requisite(s): PUBH 1008
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 2010 Adult Speech and Language (10 Credit Points)
Subject Details (p. 4884) Legacy Code: 401302
This subject discusses speech and language development and change from young adults to the elderly. It focuses on acquired communication disorders of neurological origin, such as aphasia and related disorders, apraxia of speech and dysarthria, and the diagnosis and treatment of serious communication disorders.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 2012 Speech Impairments in Children (10 Credit Points)
Subject Details (p. 4885) Legacy Code: 401303
This subject extends previous learning about child communication and the assessment and intervention for speech and language disorders in children. This approach integrates theoretical topics with an exploration of relevant clinical processes and stresses the importance of evidence-based practice.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 2013 Speech and Hearing Across the Lifespan (10 Credit Points)
Subject Details (p. 4885) Legacy Code: 401304
The subject discusses communication disorders in older children and adults and their assessment and treatment. The subject focuses on hearing impairment and its implications for communication, audiological assessment and diagnosis and treatment methods for hearing loss. The subject also introduces cultural and linguistic diversity and its impact on communication and communication disorders.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 2014 Recreational Therapy Assessment (10 Credit Points)
Subject Details (p. 4885) Legacy Code: 401399
This subject focuses on the theoretical and practical aspects associated with the planning, implementation and management of assessments and evaluation in recreational therapy services, including all documentation needs of the profession. Students will learn all components of assessments as they are connected to a comprehensive program plan and will develop their recreational therapy assessment and evaluation skills. Students will be required to complete an 80-hour industry-based placement as part of the requirements for this subject.
Level: Undergraduate Level 2 subject
Pre-requisite(s): REHA 1007
Equivalent Subjects: REHA 3036 Workplace Learning 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 2015 Recreational Therapy Process and Planning (10 Credit Points)
Subject Details (p. 4887) Legacy Code: 401402
Students will be required to complete an 80-hour industry based placement as part of the assessment requirements for this subject. This subject introduces students to the development, implementation and evaluation of recreational therapy programming. Development and ongoing assessment of programs will be explored through theoretical and practical situations. Students will learn how to adapt recreation and leisure activities for clients with varying abilities and needs and apply recreation therapy models into practice.
Level: Undergraduate Level 2 subject
Pre-requisite(s): REHA1007 AND
REHA 1008
Equivalent Subjects: REHA 2009 Workplace Learning 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 2016 Hearing, Speech and Swallowing Science (10 Credit Points)
Subject Details (p. 4888) Legacy Code: 301381
Speech Pathologists require a sound knowledge of the relevant structures and functions of the central and peripheral nervous system to be able to understand hearing, language and swallowing processes, and how disease or dysfunction affects them. This subject covers the anatomical and vascular structures of the head and neck, their development and functions, medical imaging and neural plasticity. Topics include the somatosensory systems, motor systems, and the role of the brainstem, cranial nerves, and executive systems in controlling hearing, speech, language and swallowing processes. Common congenital, degenerative and acquired neurological disorders are described. This subject will develop knowledge relevant to other subjects related to speech pathology.
Level: Undergraduate Level 2 subject
Pre-requisite(s): NATS 1009
Co-requisite(s): NATS 1010
Incompatible Subjects: NATS 3006 Anatomy of the Head Neck
NATS 3037 Neuroanatomy
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 2017 Communication Changes Across the Lifespan (10 Credit Points)
Subject Details (p. 4889) Legacy Code: 401423
This subject discusses communication disorder in children and adults arising from physical, sensory, cognitive, linguistic, psychosocial, functional and environmental changes that occur across the lifespan. The subject focuses on assessment of communication skills, interpretation and reporting of findings, diagnosis, and planning of treatment and management priorities within holistic, person-centred frameworks. Students will have the opportunity to explore disordered presentation of speech, language, voice, and fluency and build on emerging clinical reasoning, critical reflection skills, and strategies for working effectively in partnership with individuals, families and communities.
Level: Undergraduate Level 2 subject
Pre-requisite(s): REHA 1006
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 2018 Elements of Language: Analysis and Application (10 Credit Points)
Subject Details (p. 4890) Legacy Code: 401434
This subject will introduce core linguistic concepts including the sound structure of language (phonetics), how sounds convey meaning (phonology), the formal structure of words (morphology) and sentences (syntax), and the ways in which each of these differ across languages. Emphasis will be placed on the cultural and linguistic diversity of the Western Sydney region, and this will serve as a lens through which the linguistic concepts covered throughout the course will be taught. Students will learn how to transcribe typical and disordered speech using the International Phonetic Alphabet and will be familiarised with how to analyse language at the phoneme, word, and sentence levels. Knowledge will be applied to the exploration of real-world clinical cases. The knowledge acquired within this subject will lay the foundations for understanding, diagnosing and treating speech and language disorders.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 2019 Optimising Communication for Adults (10 Credit Points)
Subject Details (p. 4891) Legacy Code: 401421
This subject discusses theoretical and evidence-based intervention approaches that underpin speech pathology practice for adults with communication disorders. The subject explores speech pathology management of speech, language, voice and fluency and multimodal communication through studying communication needs with adult cases. Students will have opportunities to plan evidence-based intervention goals and create management plans for individuals, families and communities in a range of clinical contexts. Students will continue to develop core speech pathology practice skills through demonstration, practice and simulation.
Level: Undergraduate Level 2 subject
Pre-requisite(s): REHA 2017
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 2020 Optimising Communication for Children (10 Credit Points)
Subject Details (p. 4892) Legacy Code: 401422
This subject discusses theoretical and evidence-based intervention approaches that underpin speech pathology practice for children with communication disorders. The subject explores speech pathology management of speech, language, voice and fluency with diverse paediatric cases. Students will have the opportunity to plan intervention goals and develop management plans for individuals, families and communities in a range of contexts. Students will continue to develop core speech pathology practical skills through demonstration, practice and simulation.
Level: Undergraduate Level 2 subject
Pre-requisite(s): REHA 2017
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3001 Cardiorespiratory Physiotherapy (10 Credit Points)
Subject Details (p. 4894) Legacy Code: 400984
This subject builds on the knowledge and skills developed in the first 2.5 years of physiotherapy study. This subject focuses on client assessment and evidence based management in acute cardiorespiratory physiotherapy contexts. Students will extend and advance the knowledge, competencies and skills in cardiorespiratory physiotherapy clinical reasoning including assessment, interpretation and prioritisation of findings, synthesis of complex information along with the implementation and evaluation of appropriate treatment strategies. This framework will also be applied to the management of patients in Intensive Care, where students will develop specialist knowledge and skills in cardiorespiratory assessment and treatment of acutely ill unstable patients with cardiorespiratory failure and complex comorbidities. This will require strong communication skills, ethical and professional behaviour and an appreciation of interprofessional care required in acute clinical scenarios including intensive care subjects.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 3003 AND
REHA 3009
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3002 Child and Adolescent Occupations (10 Credit Points)
Subject Details (p. 4895) Legacy Code: 400162
Students learn about occupational therapy practice with children and youth in different practice settings. This subject examines child development and explores the occupations of children and youth. The impact of family, social, cultural and political contexts on this period of life is analysed. Occupational therapy models, frames of reference, assessments and interventions are applied to practice scenarios. Family-centred practice is a key focus of this subject.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 2006 AND
REHA 2004
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3003 Clinical Education (General) (10 Credit Points)
Subject Details (p. 4895) Legacy Code: 401197
This clinical subject builds on the knowledge and skills developed in first 2 years of physiotherapy study. It focuses on generic aspects of physiotherapy professional practice, which will have been developed through a variety experiential and community engagement learning activities. Professional competencies addressed in this subject include communication, documentation, and reflection, professional and ethical behaviour. In addition, students will develop skills in client assessment, interpretation of findings and education. A professional practice placement is incorporated into this subject. This subject requires physiotherapy students to demonstrate assessment, intervention skills and problem solving skills in a general environment. The focus will be on generic skills such as communication, problem solving, manual handling, gait and basic assessment skills. The placement may include ambulatory care, acute care, rehabilitation or paediatrics.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 2001
Co-requisite(s): REHA 3009 AND
REHA 3017 AND
REHA 3015
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3004 Clinical Education A (Acute Care) (10 Credit Points)
Subject Details (p. 4897) Legacy Code: 400985
This clinical education placement will provide the context for students to apply the theoretical and research knowledge and skills learnt in 400984 Cardiopulmonary Physiotherapy. Students will be required to assess and treat clients in the acute care and intensive care settings. Assessments and treatments will focus on improving or preventing client impairments. These may include decreased mobility and function altered by acute illness or injury, which may be combined with a chronic disease or a disability. These assessment and treatments will tend to have a cardiorespiratory physiotherapy focus, but clients may also present with neurological and musculoskeletal conditions which require intervention. Students will, therefore, be expected to integrate knowledge and skills learnt across all physiotherapy-specific units in their provision of client-centred care as well as draw on more general knowledge and skills from earlier stages of the course.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 3018 AND
REHA 3001 AND
REHA 3016
Co-requisite(s): REHA 4015
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3005 Clinical Exercise Physiology 1 (10 Credit Points)
Subject Details (p. 4898) Legacy Code: 400887
In 2017, this subject is replaced by 401145 - Exercise for Health and Disease Prevention. Clinical Exercise Physiology 1 is primarily concerned with teaching students how to design and implement exercise assessments and exercise prescriptions for clinical populations (high-risk). Emphasis is placed on cardiovascular, metabolic, pulmonary and immunological diseases. Subject content relates to how exercise can be applied to prevent, manage and/or treat chronic diseases, informed by an understanding of the pathophysiology and its impact on health status. Students will be involved in designing exercise programs using an evidence-based approach, which will enable a client to achieve optimum results whilst maintaining a high regard for safety, adherence and motivation. Students will be involved in practical sessions aimed at developing the skills necessary for exercise screening, testing and prescription in clinical populations.
Level: Undergraduate Level 3 subject
Pre-requisite(s): HLTH 2006 AND
BIOS 2037
Equivalent Subjects: REHA 3008 - Exercise Prescription For Special Populations
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3006 Ergonomics and Work Occupations (10 Credit Points)
Subject Details (p. 4899) Legacy Code: 401121
The productivity role is a key aspect of adult life for most people. Occupational therapists play a major role in assisting clients who have had their productivity role affected in some way. This subject explores the importance of productivity for adults, in particular those engaged in paid employment. The focus of this subject is the rehabilitation of the injured worker within the context of the work health and safety legislation and the WorkCover case management system. In addition, this subject will explore vocational counselling and rehabilitation for clients with psychosocial, cognitive and physical disabilities.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 2006 AND
NATS 1022
Incompatible Subjects: REHA 7006 - Ergonomics and Work Occupations
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3007 Exercise Prescription II (10 Credit Points)
Subject Details (p. 4899) Legacy Code: 401144
This subject focuses on the role of exercise in the functional rehabilitation of musculoskeletal injuries including work and sporting injuries. It covers injury and re-injury prevention strategies; mechanisms of injury; patho-physiology of injury and repair process; design and evaluation of rehabilitation exercise programs; how the exercise program functions in concert with other methods of injury treatment and management; important pharmacological, communication, psychosocial and cultural considerations; the role of the exercise physiologist in the rehabilitation team; the effects of nervous system disorders and injury on skeletal muscle control, injury and rehabilitation are also considered.
Level: Undergraduate Level 3 subject
Pre-requisite(s): HLTH 2005
Equivalent Subjects: REHA 3011 - Exercise in Musculoskeletal Injury Rehabilitation REHA 3012 - Exercise in Musculo-Skeletal Rehabilitation
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3009 Exercise Rehabilitation (10 Credit Points)
Subject Details (p. 4901) Legacy Code: 400997
Exercise Rehabilitation focuses on the assessment and management of patients using exercise training. All patient groups are covered but there is an emphasis on cardiorespiratory disorders. Professional competencies addressed in this subject include an understanding of the normal physiological responses to exercise, the implications of pathology and exercise. The subject also includes further development and practice of skills in the patient physical examination, and clinical reasoning such that hypothesized problem lists and goals for patients are developed. The prescription of exercise-based interventions with other physiotherapy modalities is also covered. This subject also facilitates the attainment of professional competencies including effective communication skills, ethical reasoning, professional behaviour, and an appreciation of interprofessional care.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BIOS 2029 AND
REHA 2001 AND
HLTH 2024
Co-requisite(s): REHA 3017 AND
REHA 3015 AND
AND
REHA 3003
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3010 Exercise for Health and Disease Prevention (10 Credit Points)
Subject Details (p. 4902) Legacy Code: 401145
This subject emphasises teaching students to design safe and effective exercise programs for optimal health, well-being, and the prevention of major chronic diseases. Holistic recovery strategies, including sleep, nutrition and stress-reduction are also explored. Students will learn about the aetiology of major chronic diseases, including cancers, cardiovascular disease, metabolic diseases, neurological diseases and mental illnesses, and how these conditions can be targeted with exercise. Students will also develop the practical skills necessary for screening and testing populations at-risk and with chronic diseases.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BIOS 2012 AND
HLTH 2005
Equivalent Subjects: REHA 3008 - Exercise Prescription For Special Populations REHA 3005 - Clinical Exercise Physiology 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3012 Exercise in Musculo-Skeletal Rehabilitation (10 Credit Points)
Subject Details (p. 4903) Legacy Code: 400902
In 2017, this subject is repalced by 401144 - Exercise Prescription II. This subject focuses on the role of exercise in the functional rehabilitation of musculoskeletal injuries including work and sporting injuries. It covers injury and re-injury prevention strategies; mechanisms of injury; patho-physiology of injury and repair process; design and evaluation of rehabilitation exercise programs; how the exercise program functions in concert with other methods of injury treatment and management; important pharmacological, communication, psychosocial and cultural considerations; the role of the exercise physiologist in the rehabilitation team; the effects of nervous system disorders and injury on skeletal muscle control, injury and rehabilitation are also considered.
Level: Undergraduate Level 3 subject
Pre-requisite(s): HLTH 2006
Equivalent Subjects: REHA 3011 - Exercise in Musculoskeletal Injury Rehabilitation
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3013 Intersections of Health, Leisure and Wellbeing (10 Credit Points)
Subject Details (p. 4904) Legacy Code: 400789
In this subject students will develop knowledge and skills required to facilitate and critically evaluate leisure education interventions to bring about changes in the leisure behaviour of individuals, particularly those at risk of developing or with a diagnosed mental illness. Students will analyse evidence to plan, implement and evaluate leisure education programs.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3014 Musculoskeletal Physiotherapy (10 Credit Points)
Subject Details (p. 4904) Legacy Code: 400999
This subject focuses on client assessment and treatment using manual physiotherapy techniques. An emphasis is placed on diagnostic reasoning and evaluation, understanding the implications of pathology in a physiotherapy context, prioritising problems and integrating manual therapy with other physiotherapy treatments. This requires strong communication skills, ethical and professional behaviour and an appreciation of interprofessional care.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 3004
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3015 Musculoskeletal Physiotherapy A (10 Credit Points)
Subject Details (p. 4905) Legacy Code: 401199
This subject builds on the knowledge and skills developed in the first two years of physiotherapy study. It focuses on client assessment and evidence-based management in musculoskeletal physiotherapy contexts. This will require strong communication skills, ethical and professional behaviour and an appreciation of interprofessional care. Professional competencies addressed in this subject include developing skills in musculoskeletal physiotherapy assessment, interpretation and prioritisation of findings along with the implementation and evaluation of appropriate treatment strategies.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 2001 AND
NATS 2008 AND
HLTH 1010 AND
BEHV 1014 AND
HLTH 2024
Co-requisite(s): REHA 3009 AND
REHA 3017 AND
REHA 3003
Equivalent Subjects: REHA 3026 - Orthopaedic Physiotherapy
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3016 Musculoskeletal Physiotherapy B (10 Credit Points)
Subject Details (p. 4906) Legacy Code: 401200
This subject focuses on client assessment and treatment using manual physiotherapy techniques. An emphasis is placed on diagnostic reasoning and evaluation, understanding the implications of pathology in a physiotherapy context, prioritising problems and integrating manual therapy with other physiotherapy treatments. This requires strong communication skills, ethical and professional behaviour and an appreciation of interprofessional care.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 3003
Equivalent Subjects: REHA 3014 - Musculoskeletal Physiotherapy
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3017 Neurological Physiotherapy (10 Credit Points)
Subject Details (p. 4907) Legacy Code: 400986
This subject builds on the knowledge and skills developed in the first 2 years of physiotherapy study. It focuses on client assessment and evidence-based management in neurological physiotherapy contexts. This will require strong communication skills, ethical and professional behaviour and an appreciation of interprofessional care. Professional competencies addressed in this subject include introductory skills in neurological physiotherapy assessment, interpretation and prioritisation of findings, and formulation of basic interventions.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 2001 AND
NATS 3037 AND
NATS 2008 AND
HLTH 2021 AND
PUBH 2005 AND
HLTH 2024

REHA 3015 AND
REHA 3003
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3018 Neurological Rehabilitation (10 Credit Points)
Subject Details (p. 4907) Legacy Code: 400998
This subject focuses on client assessment and evidence-based physiotherapy management in neurological rehabilitation. This will require strong communication skills, ethical and professional behaviour and an appreciation of interprofessional care. Professional competencies addressed in this subject include clinical reasoning in neurological physiotherapy assessment and treatment, implementation and evaluation of evidence-based interventions and management of complex conditions.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 3017 AND
REHA 3003
Co-requisite(s): REHA3001
REHA3016
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3019 Occupation and Ageing (10 Credit Points)
Subject Details (p. 4908) Legacy Code: 400176
In this unit, students will examine the ageing process using the biopsychosocial model, and reflect on their own attitudes towards ageing, including how social stereotypes of older people must be challenged to promote a positive view of this stage of life. Students will gain knowledge about how occupational performance may be impacted due to ageing, including common conditions assessed and treated by occupational therapists. Students will use research evidence to prepare occupational therapy intervention plans that promote quality of life and maximum social participation for clients' and their families.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 2004 REHA 3021
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3020 Occupation and Mental Health (10 Credit Points)
Subject Details (p. 4909) Legacy Code: 400169
This subject provides an understanding of the impact of major mental illnesses and disorders on occupational participation. These illnesses/disorders are examined from varying perspectives including consumer, recovery, population health and biomedical. Mental health legislation, policies, strategies and standards are examined in relation to clinical practice in this field. Occupational therapy theory, assessments, interventions and outcomes are incorporated together with cross-disciplinary approaches and current evidence to provide a foundation for practice in mental health settings.
Level: Undergraduate Level 3 subject
Pre-requisite(s): NATS 3037 AND
BEHV 1014 AND
REHA 2006
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3021 Occupation and Neurology (10 Credit Points)
Subject Details (p. 4910) Legacy Code: 400171
This subject prepares occupational therapy students to work in a variety of settings with individuals who have a neurological condition. The impact of common neurological conditions on the person, their environment and their occupations will be examined. Students will be exposed to a variety of assessments, interventions and evaluation tools suitable for this client population.
Level: Undergraduate Level 3 subject
Pre-requisite(s): Students enrolled in 4663 Bachelor of Health ScienceMasters of Occupational Therapy or 4711 Bachelor of Occupational Therapy 4 must have completed units NATS 3037 - Neuroanatomy and REHA 2006 - People Environment and Occupations
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3022 Occupation and the Environment (10 Credit Points)
Subject Details (p. 4911) Legacy Code: 400165
In this subject students will understand how the environment not only provides a context for the activities people choose to engage in, but also how well they can complete them. Students will learn how the social, cultural, physical and institutional environments that they live in can influence health and well-being, provide structures for social inclusion or exclusion, and enable or limit people to participate in everyday activities. Using an occupational lens, students will gain skills in analysing environmental barriers to occupational performance and modifying environments to increase participation.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 2006
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3023 Occupational Therapy Clinical Practice 3b (10 Credit Points)
Subject Details (p. 4912) Legacy Code: 400175
This subject will allow students to consolidate academic knowledge and clinical skills. There will be opportunities to actively participate in assessment, analysis, goal setting, treatment/programme planning and occupational therapy intervention under the supervision of an occupational therapist. The placement will allow students to work for 5 consecutive weeks with occupational therapists in one of the many settings where therapists currently practice.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LGYA 7062
Incompatible Subjects: LGYB 7771 - Clinical Placement 3
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3024 Occupational Therapy Practice 3 (10 Credit Points)
Subject Details (p. 4912) Legacy Code: 400910
This subject will enable students to consolidate academic knowledge and practice skills. On campus practicums will focus on occupational therapy skill development to equip students with the skills to provide occupational therapy interventions during off-site professional practice placements. There will be opportunities to actively participate in assessment, analysis, goal setting, intervention and evaluation under the supervision of an occupational therapist. Students will experience full time work with occupational therapists in practice settings. Students will complete practice hours in accordance with World Federation of Occupational Therapy accreditation guidelines.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 2004
Co-requisite(s): REHA 3020 AND
REHA 3021 AND
REHA 3002
Equivalent Subjects: LGYA 7071 - Occupational Therapy Clinical Practice 3A
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3025 Occupational Therapy Process (10 Credit Points)
Subject Details (p. 4914) Legacy Code: 400912
This subject provides students with the knowledge and skills to apply the occupational therapy problem-solving process in an evidence-based way, across a diverse range of practice situations. Students will gain knowledge in the application of each stage of the occupational therapy process, learn skills in the selection and implementation of assessments and outcome measures, and undertake intervention planning to suit clients with different occupational needs and health trajectories. Different occupational therapy approaches will be reviewed and students will gain skills in tailoring intervention approaches to suit client need and practice context.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3027 Pharmacology for Podiatrists (10 Credit Points)
Subject Details (p. 4914) Legacy Code: 401182
This subject will cover the pharmacological foundations and principles of drugs with a particular emphasis on those that may be prescribed by podiatrists upon appropriate qualification, including indications, contraindications, drug-drug interactions and adverse drug reactions. Student knowledge of national legislation relating to the effective and safe use of drugs will be developed, alongside an understanding of the process for obtaining prescribing rights and the attendant responsibilities. Upon successful completion of this subject and registration as a podiatrist, students will be eligible to seek further training to gain endorsement to prescribe.
Level: Undergraduate Level 3 subject
Pre-requisite(s): NATS 2008
Co-requisite(s): REHA 3028
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3028 Podiatric Practice 1 (10 Credit Points)
Subject Details (p. 4915) Legacy Code: 400929
This subject is the first of four podiatry clinical practice subjects. Building on previous core and podiatry specific theory subjects this subject introduces students to basic and general clinical skills, including history taking, patient communication, assessment, diagnosis, management and documentation in the clinical environment of common foot disorders under supervision. The student will also be introduced to basic skills in mechanical therapy as part of the clinical therapies component of the subject. Clinical activities will include UniClinic sessions, Clinical Therapies, Tutorials, and External Clinical Placement.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 2007 AND
REHA 2003
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3029 Podiatric Practice 2 (10 Credit Points)
Subject Details (p. 4917) Legacy Code: 400930
This subject will further develop students assessment skills encouraging the student to make the appropriate selection of techniques (biomechanical assessments) and to introduce the student to the diagnosis and management of a variety of simple foot pathologies. In this subject, the second of the four clinical practice units, students will participate in assessments of patients under supervision and continue with the management of foot pathologies. Clinical activities will be divided into five areas: General Medicine Clinic, Biomechanical Assessment Clinical, Tutorial, Clinical Therapies and External Clinical Placement.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 3028
PUBH 2005
REHA 3027
REHA 4021
Equivalent Subjects: LGYA 7043 - Podiatric Practice 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3030 Podiatric Surgery (10 Credit Points)
Subject Details (p. 4919) Legacy Code: 401183
This subject will introduce students to local anaesthesia, the theory of surgical procedures and the practice of skin and nail surgical techniques. As such, this subject allows students to assess patients' suitability for administration of local anaesthesia; understand procedures involved in obtaining voluntary consent, appreciate, and reasonably predict and describe the possible adverse effects of administering local anaesthesia. Surgery will focus the medico-legal requirements, principles of theatre protocol, peri-operative and post-surgical management of the patient and nail and skin surgery, in preparation for student undertaking surgery during Podiatric Practice 3 and 4.
Level: Undergraduate Level 3 subject
Pre-requisite(s): NATS 3037
REHA 3028
REHA 3027
Incompatible Subjects: REHA 3033 - Podiatric Techniques 2A
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3035 Therapeutic Recreation Professional Project (10 Credit Points)
Subject Details (p. 4921) Legacy Code: 400254
This subject will no longer be offered. Student are advised to enrol into the equivalent subject called REHA3041 Facilitation in Recreational Therapy in Spring 2022. The aim of this subject is for students to explore the facilitation of therapeutic recreation interventions. Students will have opportunities to apply practical professional skills, including working through the treatment process and building rapport with individuals and groups. This subject is a hands on subject where students engage in mock activity interventions.
Level: Undergraduate Level 3 subject
Pre-requisite(s): HLTH 1001 AND
REHA 3036
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3036 Workplace Learning 2 (Community Placement) (10 Credit Points)
Subject Details (p. 4921) Legacy Code: 400252
This subject provides students with the opportunity to experience the practice of therapeutic recreation in the workplace through a supervised placement experience with industry. Students will complete practice hours in accordance with the National Diversional and Recreation Therapy Australia requirements. Students will develop skills in client assessment, problem identification, program planning, implementation and evaluation in a range of therapeutic service settings. Students will develop learning contracts and explore the advocacy and support needs of the clients.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 2009
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3037 Clinical Practice 1 (10 Credit Points)
Subject Details (p. 4923) Legacy Code: 401307
This clinical subject will operationalise the knowledge and skills developed in the first three years of speech pathology study to provide appropriate and holistic care for paediatric clients. Students will undertake supervised clinical practice to assess and treat paediatric clients. Clinical experience placements may be in speech pathology subjects in hospital, community health, school or on-campus settings. Professional competencies addressed in this subject include communication, documentation, reflection and professional and ethical behaviour. In addition, students will develop skills in client assessment, interpretation of findings and education.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 2011
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3038 Clinical Practice 2 (10 Credit Points)
Subject Details (p. 4923) Legacy Code: 401309
This clinical subject will operationalise the knowledge and skills developed in the first three years of speech pathology study to provide appropriate and holistic care for paediatric clients. Students will undertake supervised clinical practice to assess and treat paediatric clients. Clinical experience placements may be in speech pathology subjects in hospital, community health, school or on-campus settings. Professional competencies addressed in this subject include communication, documentation, reflection and professional and ethical behaviour. In addition, students will develop skills in client assessment, interpretation of findings and education.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 2010
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3039 Fluency and Voice (10 Credit Points)
Subject Details (p. 4924) Legacy Code: 401308
This subject addresses the management of fluency disorders in children, adolescents and adults. It covers theoretical perspectives on stuttering and other fluency disorders, assessment and intervention principles, counselling and facilitating therapy, management of fluency disorders and indicators of successful change.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 2011 AND
REHA 2010
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3040 Swallowing Assessment and Management (10 Credit Points)
Subject Details (p. 4925) Legacy Code: 401305
The subject addresses normal and disordered swallowing at mealtimes. It focuses on the assessment and management of feeding and swallowing disorders in infants, children and adults and addresses assessment and intervention practices. Clinical assessment and specific intervention techniques are studied in relation to specific dysphagic populations.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3041 Facilitation in Recreational Therapy (10 Credit Points)
Subject Details (p. 4925) Legacy Code: 401385
This subject explores the facilitation of recreational therapy interventions, including processing and building rapport and trust with individuals and groups. Various recreational therapy modalities, and their application and benefits to achieving health outcomes will be explored and critiqued. This subject is designed to be hands-on and students will be tasked with facilitating a mock intervention for their peers.
Level: Undergraduate Level 3 subject
Co-requisite(s): REHA 2014
Equivalent Subjects: REHA 3035 - Therapeutic Recreation Professional Project
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3042 Health Practice Management (10 Credit Points)
Subject Details (p. 4926) Legacy Code: 401401
This subject examines the essential management skills that are required of an effective manager in clinical and non-clinical settings, including healthcare facilities, community-based or private leisure, therapy and recreation services, and the health service setting. Consumer management, quality service management, practitioner performance, legal liability and risk management are all examined.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3043 Recreational Therapy Internship (20 Credit Points)
Subject Details (p. 4927) Legacy Code: 401400
This subject allows students to integrate and apply all learning accumulated throughout their Recreational Therapy major. It focuses on preparing students to professional practice by including 560h of internship in recreational therapy services in addition to coursework focusing on professional development. Students will have an opportunity to work on their professionalism, assessment skills, planning and implementation of recreation therapy programs and services, evaluation and documentation of client progress and work on their administration skills. This subject is designed to meet all National Council for Therapeutic Recreation Certification (NCTRC) requirements, leading to potential Certified Therapeutic Recreation Specialist (CTRS) designation. The internship may be in any area of recreation therapy practice that serves students' needs and accreditation requirements.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 2014 AND
REHA 2015
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3044 Shaping the Future of Recreational Therapy (10 Credit Points)
Subject Details (p. 4929) Legacy Code: 401404
Recreation therapists are frequently tasked with solving very complex problems in their practice. This subject uses project-based learning to provide students with the opportunity to work collaboratively to solve an industry-driven problem, using systematic and evidence-based techniques to do so. Students will be challenged to think broadly to take into account the interrelationships among a full range of causal factors underlying the problem at hand, and will be required to use more collaborative and innovative approaches to solve industry challenges.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 2014 AND
REHA 2015
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3045 Communication Access in Communities (10 Credit Points)
Subject Details (p. 4929) Legacy Code: 401425
This subject will introduce the concept of 'Communication access for All' and focus on strategies to create communication accessible environments that promote inclusion of individuals with communication support needs across the lifespan. The scope of the subject will encompass the features of communication accessible environments, multimodal communication methods, assistive technology, and Augmentative and Alternative Communication (AAC). Students in Speech Pathology will develop competency in the assessment, management, measurement, and support of complex communication in individuals across the lifespan, and will explore how capacity building models and strategies can enhance the activities and participation of individuals, families and communities.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 2019 AND
REHA 2020
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3046 Optimising Mealtimes Across the Lifespan (10 Credit Points)
Subject Details (p. 4930) Legacy Code: 401424
This subject discusses theoretical and evidence-based approaches to assessment and management of a diverse range of swallowing disorders in infants, children and adults. Students will have opportunities to interpret and synthesise assessment findings and create management plans to optimise mealtime experiences by exploring cases that address the needs of individuals with swallowing disorders, their families and communities. Students will plan and implement core speech pathology assessment and therapy skills, related to swallowing and mealtime management through observation and practice. Evidence-based, interdisciplinary and holistic approaches to swallowing and mealtime management will be integrated during this subject.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 1006 AND
REHA 2016
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3047 Speech Pathologists Working with Adults, Families and Communities (10 Credit Points)
Subject Details (p. 4931) Legacy Code: 401433
The subject adopts a problem based learning approach towards speech pathology management of communication, hearing and mealtimes through collaboration with individual adults, families and communities. Students will synthesise their knowledge and skills in adult speech, language, voice, fluency and swallowing and multimodal communication in speech pathology practice to manage complex cases. They will engage with problem based learning experiences that require integration of theoretical and evidence based intervention approaches with collaborative person and family and centred practice. Students will critically evaluate of models of service delivery in response to community needs.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 2019
Co-requisite(s): REHA 3049
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3048 Speech Pathologists Working with Children, Families and Communities (10 Credit Points)
Subject Details (p. 4932) Legacy Code: 401427
This subject utilises a problem-based learning approach to explore assessment, management and measurement of change in complex cases of communication and mealtime disorder in children. Authentic case scenarios of paediatric clients will encourage students to integrate theoretical knowledge, clinical reasoning, and practical speech pathology skills to plan and evaluate approaches to working with children, their families and the communities in which they live. Individual, targeted and universal intervention strategies will be addressed within the context of collaborative, family centred philosophy.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 2020
Co-requisite(s): REHA 3049
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3049 Speech Pathology Practice 1 (10 Credit Points)
Subject Details (p. 4933) Legacy Code: 401426
This clinical placement subject will operationalise the knowledge and skills developed in the first three years of speech pathology study, to provide appropriate and holistic care for clients of speech pathology across the lifespan, their families and communities. Students will undertake 21 days of supervised clinical practice in a range of authentic speech pathology contexts including, but not limited to, hospitals, community health settings, schools / preschools / day-care, disability and/or not for profit organisations, private practice or on-campus settings. Professional competencies addressed in this subject include communication, documentation, reflection and professional and ethical behaviour. In addition, students will develop skills in client assessment, interpretation of findings, planning and implementation of speech pathology services, education, advocacy and advice. Students will be working at a near/approaching intermediate level of competency.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 2019 AND
REHA 2020
Co-requisite(s): REHA 3046
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3050 Speech Pathology Practice 2 (10 Credit Points)
Subject Details (p. 4935) Legacy Code: 401428
This second clinical practice subject will operationalise the knowledge and skills developed in the first three years of speech pathology study to provide appropriate and holistic care for clients of speech pathology across the lifespan, their families and communities. Students will undertake 21 days of supervised clinical practice in either adult or paediatric care (that which was not completed in Speech Pathology Practice 1). Clinical Practice will be taken in a relevant setting from among a range of authentic speech pathology contexts including, but not limited to, hospitals, community health settings, schools / preschools / day-care, disability and/or not for profit organisations, private practice or on-campus. Professional competencies addressed in this subject include communication, documentation, reflection and professional and ethical behaviour. In addition, students will develop skills in client assessment, interpretation of findings, planning and implementation of speech pathology services, education, advocacy and advice. Students will be working at an intermediate level of competency.
Level: Undergraduate Level 3 subject
Pre-requisite(s): REHA 3049
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 3051 Leisure Education Programming and Mental Health (UG Cert) (10 Credit Points)
Subject Details (p. 4936) Legacy Code: 500062
In this subject students will develop knowledge and skills required to facilitate and critically evaluate leisure education interventions to bring about changes in the leisure behaviour of individuals, particularly those at risk of developing or with a diagnosed mental illness. Students will analyse evidence to plan, implement and evaluate leisure education programs.
Level: Undergraduate Level 3 subject
Equivalent Subjects: REHA 3013 Leisure Education and Mental Health
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4001 Clinical Education B (Rehabilitation) (10 Credit Points)
Subject Details (p. 4937) Legacy Code: 401110
This clinical education placement will operationalise the theoretical and research knowledge and skills learnt in the first three years of the course. Students will be required to assess and treat clients in rehabilitation settings. Treatments will be focused on improving client mobility and function that is altered by illness, injury, chronic disease or a disability. This will assist in preparation for client discharge home or to an appropriate residential facility, as well as enhance functioning at home or in the community. Assessment and treatments will tend to have a neurological physiotherapy focus, but clients may also present with cardiorespiratory and musculoskeletal conditions which require intervention. Students will, therefore, be expected to integrate knowledge and skills learnt across all physiotherapy-specific units in their provision of client-centred care as well as draw on their more general knowledge from earlier stages of the course.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 3018 AND
REHA 3016 AND
REHA 3001 AND
LGYA 7023
Co-requisite(s): REHA 4015
Incompatible Subjects: REHA 7001 - Clinical Education B (Rehabilitation)
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4002 Clinical Education C (Ambulatory Care) (10 Credit Points)
Subject Details (p. 4939) Legacy Code: 401111
This clinical education placement will operationalise the theoretical and research knowledge and skills learnt in the first three years of the course. Students will be required to assess and treat clients who present in hospital outpatient departments, community settings and private practices. This involves the assessment of the client's impairments, function and disability within their home and community environment. Interventions may include manual and exercise therapy; use of electrophysical agents, taping and bracing; and education regarding both prevention and management of conditions. Assessment and treatment will tend to have a musculoskeletal physiotherapy focus, however, clients may also present with neurological and cardiorespiratory conditions that require intervention. Students will therefore integrate knowledge and skills learnt across all physiotherapy-specific units in their provision of client-centred care as well as draw on their more general knowledge from earlier stages of the course.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 3001 AND
REHA 3018 AND
REHA 3016
Co-requisite(s): REHA 4015
Incompatible Subjects: REHA 7002 - Clinical Education C (Ambulatory Care)
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4003 Clinical Education D (Paediatrics) (10 Credit Points)
Subject Details (p. 4940) Legacy Code: 401112
This clinical education placement will operationalise the knowledge (theory and research) and skills learnt in Paediatric Physiotherapy. Students will also integrate and apply the knowledge and skills learnt in musculoskeletal, cardiorespiratory and neurological physiotherapy, as well as other health science units to provide appropriate and holistic family-centred care to paediatric clients. Students will be required to assess and treat paediatric clients in acute hospital, rehabilitation or community settings. This approach to management involves the consideration of a child's age, development, and diagnosis during assessment and treatment. Advanced communication skills are required to educate parents and children on the prevention and management of paediatric conditions.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 3001 AND
REHA 3018 AND
REHA 3016 AND
LGYA 7023
Co-requisite(s): REHA 4014 AND
REHA 4015
Incompatible Subjects: REHA 7003 - Clinical Education D (Paediatrics)
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4004 Clinical Education E (Advanced Care) (10 Credit Points)
Subject Details (p. 4941) Legacy Code: 401113
This clinical subject involves the integration of musculoskeletal, neurological and cardiorespiratory physiotherapy assessment and treatment skills in an advanced physiotherapy care environment. Advanced problem-solving skills will be required to manage complicated client presentations in various clinical environments. Advanced care environments may include speciality areas such as burns, spinal, emergency, intensive care and aged care subjects within a hospital, or private practice and community-based services where the physiotherapist is the primary care practitioner. Student preferences and prior clinical placement experience will be considered in the clinical placement allocation process. This will help to ensure all students are given the opportunity to explore the breadth of practice of physiotherapy in different environments.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 3009 OR
REHA 3004
Co-requisite(s): REHA 4015 AND
REHA 4001 OR
REHA 4002
Incompatible Subjects: REHA 7004 - Clinical Education E (Advanced Care)
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4005 Clinical and Professional Practice (Honours) (20 Credit Points)
Subject Details (p. 4942) Legacy Code: 401120
This subject will introduce practical principles of professional, ethical and legal issues associated with working as a podiatrist, focusing on the workplace, administrative policies and procedures as required for registration with the state Registration Board. Students then undertake a clinical block in a public sector placement designed to further consolidate podiatric assessment, communication and management skills. The student will be involved in treating pathologies in general health and the high risk patient encompassing all aspects of podiatry
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 3028 AND
REHA 3029 AND
REHA 4017 AND
REHA 4007 AND
REHA 3030 AND
REHA 4018
Co-requisite(s): REHA 4021
Incompatible Subjects: REHA 7020 - Podiatric Clinical Block for Honours REHA 7023 - Podiatric Professional Practice Studies
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4006 Complex Cases and Professional Issues (10 Credit Points)
Subject Details (p. 4944) Legacy Code: 401108
In this subject, students will further develop their clinical reasoning with respect to clients with complex presentations in areas such as aged care, women's health, return to work, private practice and culturally and linguistically diverse individuals. Complex information will be synthesized such as the theory, research and skills across the spectrum of physiotherapy care , and theories related to professionalism, ethics, safety and communication. This subject also contains the discussion of a range of recent professional developments in physiotherapy, which are relevant to entry level practitioners. These include registration as a physiotherapist, continuing education, workload control strategies, duty of care responsibilities and quality improvement processes (including critical reflection), employment strategies and career pathways.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 4015 AND
REHA 4014
Co-requisite(s): REHA 4001 OR
REHA 4002 OR
REHA 4003 OR
REHA 3004 AND
REHA 4008
Incompatible Subjects: REHA 7005 - Complex Cases and Professional Issues
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4007 Dermatology and Gerontology (10 Credit Points)
Subject Details (p. 4945) Legacy Code: 401116
This subject builds on previous clinical and theoretical subjects to develop in-depth knowledge in dermatology and gerontology. Foundations of dermatology including the function and structure of the skin, assessment, differential diagnosis, aetiological factors and the management of disorders of the skin, with particular emphasis on common foot conditions and co-morbidities will be investigated. Population's trends, aging norms, pathology, co-morbidities and attitudes to aging will be explored. Particular focus will be placed on pathophysiology, mechanics, diagnosis and treatment options to maintain normal daily activities.
Level: Undergraduate Level 4 subject
Pre-requisite(s): NATS 2008 AND
REHA 3027 AND
REHA 2003
Incompatible Subjects: REHA 7024 - Podiatric Techniques 3A and REHA 7025 - Podiatric Techniques 3B
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4008 Integrating Research into Physiotherapy Practice (10 Credit Points)
Subject Details (p. 4946) Legacy Code: 401109
In this unit, students will further develop their evidence based practice skills and knowledge by applying it in practice settings. This will involve applying the academic knowledge and skills from three prior evidence based practice and research units by synthesising it with their clinical experience and skills. Students will be allocated a topic area from which they will identify a clinical "problem" or health-related issue. Students will then plan and design a robust research project to answer this question. Students will be expected to reflect on the barriers and facilitators of evidence-based practice, and develop strategies and interventions to be used to facilitate the implementation of evidence in practice by clients and health care practitioners.
Level: Undergraduate Level 4 subject
Pre-requisite(s): HLTH 3005 OR
HLTH 4002 AND
REHA 3004 OR
REHA 4001 OR
REHA 4002 OR
REHA 4003
Incompatible Subjects: REHA 7007 - Integrated Research into Physiotherapy Practice
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4009 Occupational Justice (10 Credit Points)
Subject Details (p. 4947) Legacy Code: 401123
This subject critically examines practice in the community with a focus on social inclusion and occupational justice. Life perspectives of people experiencing occupational injustice are explored. Current and historical ideologies which underpin global and national legislation and policies on human rights are examined. The promotion of occupational participation through occupational therapy practice is outlined. This subject challenges popular myths and stereotypes of people with disabilities. Issues such as de-institutionalisation, duty of care, dignity of risk, choice-making, rights and negligence are critiqued against legal, ethical and personal perspectives. This subject assists students develop critical thinking and reflection skills for practice.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 3020
Co-requisite(s): REHA 3022
Equivalent Subjects: LGYA 7065 - Occupation and Social Participation
Incompatible Subjects: REHA 7010 - Occupational Justice
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4010 Occupational Therapy Practice 4A (20 Credit Points)
Subject Details (p. 4948) Legacy Code: 401126
This subject is the first of two final clinical placement subjects in the 4th year of the program. This subject aims to facilitate the transition from student to occupational therapy practitioner by allowing students to consolidate academic knowledge and practice skills in preparation for becoming a competent beginning practitioner. Students will be expected to actively participate in assessment, analysis, goal setting, intervention and evaluation under the supervision of an occupational therapist. Students will complete practice hours in accordance with World Federation of Occupational Therapy accreditation guidelines.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 3024 AND
REHA 4013
Incompatible Subjects: REHA 7013 - Occupational Therapy Practice 4 Workshop
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4011 Occupational Therapy Practice 4B (20 Credit Points)
Subject Details (p. 4950) Legacy Code: 401127
This subject is the second of two final clinical placement subjects in the Year 4 of the program. This subject aims to facilitate the transition from student to occupational therapy practitioner by allowing students to consolidate academic knowledge and practice skills in preparation for becoming a competent beginning practitioner. Students will be expected to actively participate in assessment, analysis, goal setting, intervention and evaluation under the supervision of an occupational therapist. Students will complete practice hours in accordance with World Federation of Occupational Therapy accreditation guidelines. This subject also emphasises career planning and preparation for entering the professional world as an occupational therapist.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 3024
Co-requisite(s): REHA 4010
Incompatible Subjects: REHA 7011 - Occupational Therapy Clinical Practice 4
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4012 Occupational Therapy Project (10 Credit Points)
Subject Details (p. 4951) Legacy Code: 401122
The aim of this subject is for students to critically apply their knowledge of professional theory, practice, research and evaluation skills to the investigation of an occupational therapy professional issue of interest or concern. Students will apply unobtrusive research methods to investigate their chosen topic. Students develop an extensive knowledge of their chosen topic and critically analyse the implications of their findings in terms of theory, policy and contemporary health care practice. Students will synthesise their findings into a scholarly research project report and present their findings at a professional-level capstone student conference.
Level: Undergraduate Level 4 subject
Pre-requisite(s): HLTH 3005
Incompatible Subjects: REHA 7014 - Occupational Therapy Project
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4013 Occupational Therapy Specialties (10 Credit Points)
Subject Details (p. 4952) Legacy Code: 401124
This subject provides occupational therapy students with the opportunity to select from, and undertake advanced study in, a range of occupational therapy clinical specialty areas. Several streams will run concurrently in this subject representing key clinical areas of specialisation in occupational therapy. Students will be able to focus their study, by selecting a combination of clinical specialty streams. Streams will cover relevant clinical content, examining the unique occupational therapy contribution in each specialty area.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 3002 AND
REHA 3020 AND
REHA 3019
Incompatible Subjects: REHA 7015 - Occupational Therapy Specialities
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4014 Paediatric Physiotherapy (10 Credit Points)
Subject Details (p. 4953) Legacy Code: 401106
This subject aims to prepare the student as a competent entry-level practitioner in paediatric physiotherapy. It focuses on understanding the changes which occur from infancy to maturity and the impact of congenital or acquired conditions, or lifestyle diseases causing dysfunction. Clinical and ethical reasoning and family-centred practice are both stressed. The approach will also emphasise the role of physiotherapy within inter-professional teams to prepare for different work settings (acute care, rehabilitation and/or community). The subject integrates prior learning from previous years (especially subjects related to neurology, musculoskeletal, cardiopulmonary physiotherapy and exercise rehabilitation).
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 3003 AND
REHA 3001 AND
HLTH 3005 OR
HLTH 4002
Co-requisite(s): REHA 4015
Incompatible Subjects: REHA 7017 - Paediatric Physiotherapy
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4015 Physiotherapy for Chronic Illness and Disease (10 Credit Points)
Subject Details (p. 4954) Legacy Code: 401107
This subject focuses on the role of physiotherapy in chronic disease management. A case-based learning approach will be undertaken to provide students with the theory, research and practice which underpins the assessment and treatment of people with chronic disease. The role of lifestyle factors in the development of chronic disease will be explored, along with health promotion and preventative strategies. The importance of client-centred care, which respects culture and diversity, and the multidisciplinary team approach will also be investigated in the context of frequently occurring chronic conditions.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 3018 AND
REHA 3016 AND
HLTH 3005 OR
HLTH 4002
Co-requisite(s): REHA 4001 OR
REHA 4002 OR
REHA 4003 OR
REHA 3004
Incompatible Subjects: REHA 7018 - Physiotherapy for Chronic Illness and Disease
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4016 Podiatric Clinical Block (20 Credit Points)
Subject Details (p. 4955) Legacy Code: 401117
This subject is the major clinical placement subject in the 4th year of the program. Students will participate in clinical activities in public and private sector placements. The subject builds on previous clinical and academic knowledge to further develop students' clinical reasoning skills encouraging appropriate selection of assessment techniques to diagnose, treat and provide optimal health outcomes. Students under supervision will manage foot and lower limb pathologies across the scope of practice including treating diverse patient cohorts and complex cases (including the high risk foot) transitioning towards a competent graduate entry podiatrist.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 4018
REHA 4007
REHA 4017
Co-requisite(s): REHA 4019
Equivalent Subjects: REHA 7019 - Podiatric Clinical Block
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4017 Podiatric Paediatrics and Sports Medicine (10 Credit Points)
Subject Details (p. 4957) Legacy Code: 401115
This subject will introduce students to clinical and theoretical foundations of biomechanical alignment, trauma, psychological and behavioural factors leading to pain and restricted function of the foot and lower extremity affecting daily living activities. Particular focus will be placed on the mechanics, diagnosis and treatment options of problems experienced in paediatrics and sports in normal daily activities or the sporting arena. This integration will enhance the previously taught assessment and diagnostic techniques in the development of appropriate management and treatment programs of the lower extremity in different populations.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 3028 AND
REHA 3029 AND
REHA 2005
Co-requisite(s): REHA 4018
Incompatible Subjects: REHA 7024 - Podiatric Techniques 3A REHA 7025 - Podiatric Techniques 3B
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4018 Podiatric Practice 3 (10 Credit Points)
Subject Details (p. 4958) Legacy Code: 401114
This subject is the third of four clinical practice subjects. Building on previous clinical subjects and academic knowledge the subject develops student assessment skills encouraging the student to make the appropriate selection of assessment techniques to diagnose, treat and provide short and long term health outcomes. Students will continue to participate in clinical activities under supervision to manage foot pathologies with increased scope to evaluate and manage more complex cases (i.e. surgery, paediatrics, high risk foot). Clinical activities include UniClinic sessions, Clinical Therapies, Tutorials, and External Clinical Placement.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 3029 AND
REHA 3030
Incompatible Subjects: REHA 7021 - Podiatric Practice 3
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4019 Podiatric Practice 4 (10 Credit Points)
Subject Details (p. 4960) Legacy Code: 401118
This subject is the final of four clinical podiatric practice subjects. The subject builds on student clinical reasoning encouraging the student to make the appropriate selection of assessment techniques to diagnose and manage a spectrum of foot and lower limb pathology. Students under supervision will consolidate skills managing diverse patient cohorts and complex cases (including surgery, paediatrics, sports injury and the high risk foot) transitioning towards a competent graduate entry podiatrist. Clinical activities include UniClinic sessions, Clinical Therapies, Clinical tutorials, and Specialist Clinical Activity.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 4018
REHA 4007
REHA 4017
Co-requisite(s): REHA 4016 OR
REHA 4036
Incompatible Subjects: REHA 7022
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4020 Podiatric Professional Practice Studies (10 Credit Points)
Subject Details (p. 4961) Legacy Code: 401119
This subject will introduce students to the principles of professional development and appropriate requirements to function as a registered podiatrist. As podiatrists may work as a primary provider, as part of a multidisciplinary team, in the public or private health care setting, they require extensive knowledge of many aspects of the management of a practice or business. During seminars, students will be introduced to a number of principles specific to professional, ethical and legal issues associated with working as a podiatrist, and practice and workplace administrative policies and procedures.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 4018
Incompatible Subjects: REHA 7023 - Podiatric Professional Practice Studies
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4021 The High Risk Foot (10 Credit Points)
Subject Details (p. 4963) Legacy Code: 401184
The subject builds on fundamentals of pathophysiology and podiatry specific subjects to understand and manage the impact of systemic disease on foot health. The subject specifically investigates pathology associated with the 'high risk foot' including lower extremity manifestations associated with vascular, endocrine, neurological pathology and immunosuppression. This subject aims to develop comprehensive, coherent and connected knowledge to assist making informed decisions and contribute to sustainable change and improvements in health care for people with systemic disease, with particularly emphasis on diabetes and wound management.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 2003 AND
REHA 2007 AND
NATS 2038
Co-requisite(s): REHA 3028
Incompatible Subjects: REHA 7026 - Podiatric Techniques 3C
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4022 Alternative and Augmentative Communication Systems (10 Credit Points)
Subject Details (p. 4965) Legacy Code: 401306
The subject focuses on disability across the lifespan, assistive technology, multi-modal communication methods and Alternative & Augmentative Communication (AAC) systems. The scope covers aided and unaided AAC systems with intentional communication and assessment and intervention methods for people with complex communication needs and those who use AAC.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4023 Clinical Practice 3 (10 Credit Points)
Subject Details (p. 4965) Legacy Code: 401311
This clinical subject will operationalise the knowledge and skills developed in the first three years of speech pathology study to provide appropriate and holistic care for paediatric clients. Students will undertake supervised clinical practice to assess and treat paediatric clients. Clinical experience placements may be in speech pathology subjects in hospital, community health, school or on-campus settings. Professional competencies addressed in this subject include communication, documentation, reflection and professional and ethical behaviour. In addition, students will develop skills in client assessment, interpretation of findings and education.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 2011
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4024 Clinical Practice 4 (10 Credit Points)
Subject Details (p. 4966) Legacy Code: 401313
This clinical subject will operationalise the knowledge and skills developed in the first three years of speech pathology study to provide appropriate and holistic care for paediatric clients. Students will undertake supervised clinical practice to assess and treat paediatric clients. Clinical experience placements may be in speech pathology subjects in hospital, community health, school or on-campus settings. Professional competencies addressed in this subject include communication, documentation, reflection and professional and ethical behaviour. In addition, students will develop skills in client assessment, interpretation of findings and education.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 2011
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4025 Complex Communication Needs (10 Credit Points)
Subject Details (p. 4967) Legacy Code: 401310
The subject focuses on complex cases arising in speech pathology, multi-modal communication methods and acquired disabilities and application of Alternative & Augmentative Communication (AAC) systems. Assessment and intervention methods for people with complex communication needs and those who use AAC are considered in detail. The scope includes acquired disabilities and various genetic conditions such as cleft palate and other craniofacial anomalies.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 4022
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4026 Professional Issues (10 Credit Points)
Subject Details (p. 4967) Legacy Code: 401312
Covering a range of ethical and professional issues for speech pathologists, the Professional Issues subject includes recent professional developments in speech pathology relevant to entry level practitioners, ethical and medico-legal issues, registration as a speech pathologist, communication and working with others (including interprofessional issues), safety, continuing education, workload control strategies, duty of care responsibilities, quality improvement processes (including critical reflection), employment strategies and career pathways.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4027 Innovative Speech Pathology Practice (10 Credit Points)
Subject Details (p. 4968) Legacy Code: 401429
The subject focuses on complex cases and contexts arising in speech pathology and innovative approaches to service delivery and workforce responsivity. Students will have the opportunity to design and develop solutions to novel and authentic clinical and service scenarios, integrating professional knowledge, skills and experiences. This subject will encourage students to consolidate clinical reasoning and reflection skills to a sophisticated level and engage creativity and innovation to solve contemporaneous problems in Speech Pathology practice.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 3050
Co-requisite(s): REHA 4028
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4028 Speech Pathology Practice 3 (10 Credit Points)
Subject Details (p. 4968) Legacy Code: 401430
This third clinical practice subject will operationalise the knowledge and skills developed in the first three years of speech pathology study, to provide appropriate and holistic care for individuals, families and communities. Students will undertake 32 days of supervised clinical practice in diverse speech pathology contexts including, but not limited to hospitals, community health, school, private practice, not for profit, disability or on-campus settings. Professional competencies addressed in this subject include communication, documentation, reflection and professional and ethical behaviour. In addition, students will develop skills in client assessment, interpretation of findings, planning and implementation of speech pathology services, education, advocacy and advice. Students will be working at an approaching/near entry level of professional competency during this clinical subject.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 3050 AND
REHA 3046 AND
REHA 3045 AND
REHA 3047 AND
REHA 3048
Co-requisite(s): REHA 4027
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4029 Speech Pathology Practice 4 (10 Credit Points)
Subject Details (p. 4970) Legacy Code: 401432
This fourth clinical practice subject will operationalise the knowledge and skills developed during four years of speech pathology study, to provide appropriate and holistic care for individuals, families and communities. Students will undertake 32 days of supervised clinical practice in diverse speech pathology contexts including, but not limited to hospitals, community health, school, private practice, not for profit, disability or on-campus settings. Professional competencies addressed in this subject include communication, documentation, reflection and professional and ethical behaviour. In addition, students will consolidate and extend their skills in client assessment, interpretation of findings, planning and implementation of speech pathology services, education, advocacy and advice. Students will be working at an entry level of professional competency during this clinical subject.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 4028
Co-requisite(s): REHA 4030
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4030 Speech Pathology Professional Issues (10 Credit Points)
Subject Details (p. 4971) Legacy Code: 401431
This subject will address contemporary professional issues relevant to entry-level and future speech pathology practice, Students will integrate knowledge and skills from the year 3 and 4 academic and clinical subjects to generate evidence-based and ethically sound approaches to managing complex and contemporary professional issues. Students will critically reflect on their roles and responsibilities as future professional practitioners, leaders and advocates for the speech pathology profession. Students will engage in career planning and develop strategies to facilitate their transition to professional practice and fulfilling the roles and responsibilities expected of new graduate speech pathologists.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 4028
Co-requisite(s): REHA 4029
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4031 Honours Research 1 (20 Credit Points)
Subject Details (p. 4972) Legacy Code: 400945
This subject commences the significant research component of the student's honours degree. Students will work on their specific research project in conjunction with their supervisor, engaging in the early stages of the research process related to critical review of the literature, designing their project, considering ethical dimensions of their study, and collecting data. The emphasis of this subject is on the application of research knowledge gained in other subjects to the practical conduct of the individual honours project.
Level: Undergraduate Level 4 subject
Pre-requisite(s): HLTH 4002
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4032 Honours Research 2 (20 Credit Points)
Subject Details (p. 4973) Legacy Code: 400946
In this subject students will complete the significant research component of their honours study. They will build upon the skills and knowledge of research, evidence-based practice and scholarly enquiry gained in subjects completed earlier in the program. The emphasis of this subject is the completion of a supervised honours research project. Each student will work individually with their supervisor to complete the stages of data collection and data analysis and will write their results into a format suitable for submission for examination. Students will also present their final at a student conference that is at professional conference level.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 4031
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4033 Honours Research 2 (Podiatric Medicine) (20 Credit Points)
Subject Details (p. 4974) Legacy Code: 401046
This is a 20 credit point year-long subject taken over two terms (10 credit points in each term). In this subject students will complete the significant research component of their honours study as a year-long subject of study (offered as 1H and 2H sessions). They will build upon the skills and knowledge of research, evidence-based practice and scholarly enquiry gained in subjects completed earlier in the program. The emphasis of this subject is the completion of a supervised honours research project. Each student will work individually with their supervisor to complete the stages of data collection and data analysis and will write their results into a format suitable for submission for examination.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 4031 AND
HLTH 4002 AND
REHA 3028 AND
REHA 3029
Co-requisite(s): REHA 4018
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4034 Occupational Therapy Clinical Practice 4 (20 Credit Points)
Subject Details (p. 4974) Legacy Code: 400179
In 2013 this subject replaced by 400914 - Occupational Therapy Practice 4. This subject will allow students to consolidate academic knowledge and clinical skills in preparation for becoming a competent beginning practitioner. Students will be expected to actively participate in assessment, analysis, goal setting, treatment/programme planning and occupational therapy intervention under the supervision of an occupational therapist.
Level: Undergraduate Level 4 subject
Pre-requisite(s): LGYA 7072 AND
REHA 3023
Equivalent Subjects: LGYB 7906 - Clinical Placement 4
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 4035 Occupational Therapy Practice 4 (Honours) (20 Credit Points)
Subject Details (p. 4975) Legacy Code: 401161
This subject will allow students to consolidate academic knowledge and practice skills in preparation for becoming a competent beginning practitioner. Students will be expected to actively participate in assessment, analysis, goal setting, intervention and evaluation under the supervision of an occupational therapist. Students will complete practice hours in accordance with World Federation of Occupational Therapy accreditation guidelines. Career development workshops will be conducted to prepare students for entry into the profession of occupational therapy. In addition, honours students will examine their role as beginning practitioner researchers during their placement and the role of research in underpinning clinical decisions.
Level: Undergraduate Level 4 subject
Pre-requisite(s): REHA 3024 AND
REHA 4031
Incompatible Subjects: REHA 7012 - Occupational Therapy Practice 4 (Honours)
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 7005 Complex Cases and Professional Issues (10 Credit Points)
Subject Details (p. 4977) Legacy Code: 401049
From 2018 students should take 401108 Complex Cases and Professional Issues. In this subject, students will further develop their clinical reasoning with respect to clients with complex presentations. A framework will be presented, which synthesises complex information such as the theory, research and skills in musculoskeletal, cardiorespiratory and neurological physiotherapy across the lifespan, and theories related to professionalism, ethics, safety and communication. This framework will be applied to the area of Intensive Care, where students will develop further knowledge and skills in specific cardiorespiratory techniques such as manual hyperinflation and suctioning. This subject also contains the discussion of a range of recent professional developments in physiotherapy, which are relevant to entry level practitioners. These include registration as a physiotherapist, continuing education, workload control strategies, duty of care responsibilities and quality improvement processes (including critical reflection), employment strategies and career pathways.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): REHA 3001 AND
REHA 3014 AND
REHA 7018 AND
REHA 3004
Co-requisite(s): REHA 7001 OR
REHA 7002 OR
REHA 7003 OR
REHA 7004
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 7007 Integrating Research into Physiotherapy Practice (10 Credit Points)
Subject Details (p. 4978) Legacy Code: 401050
From 2018 students should take 401109 Integrating Research into Physiotherapy Practice. In this subject, students will further develop their evidence based practice skills and knowledge by applying it in practice settings. This will involve applying the academic knowledge and skills from three prior evidence based practice and research subjects by synthesising it with their clinical experience and skills. Students will be allocated a topic area from which they will identify a clinical "problem" or health-related issue. Students will then plan and design a robust research project to answer this question. Students will be expected to reflect on the barriers and facilitators of evidence-based practice, and develop strategies and interventions to be used to facilitate the implementation of evidence in practice by clients and health care practitioners. This subject also involves students developing leadership and educator skills by facilitating and participating in a journal club.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): HLTH 3005 OR
HLTH 4002 AND
REHA 7001 OR
REHA 7002 OR
REHA 7003 OR
REHA 7004
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 7008 Introduction to Podiatry and Clinical Education (10 Credit Points)
Subject Details (p. 4979) Legacy Code: 400942
This is the first subject to introduce Master's entry students to some basic theoretical and practical components related to podiatric practice with an emphasis on clinical competencies in patient communication and management that will be reinforced in the one week clinical placement in either a private practice or public sector setting. In addition, a clinical component will introduce students to skills required to treat basic skin conditions and evaluate the functional anatomy, gait and cursory examination as well as communication skills which are necessary components for the Podiatric Practice clinical subjects. Furthermore, general clinical treatment techniques will be covered such as chair side devices, strapping and removable pads to more complex skills such as the manufacture of non-cast orthotic devices will be covered.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 7009 Neurological Physiotherapy Practice (10 Credit Points)
Subject Details (p. 4980) Legacy Code: 400987
This subject introduces the scope of physiotherapy practice in Australia and around the world as well as ethical and professional behaviours and communication skills required by physiotherapists. Students will develop skills in conducting simple subjective and objective examinations of posture, range of movement, muscle strength and length and providing gait rehabilitation. These knowledge and skills will be applied to the physiotherapy management of clients with acute neurological disorders. physiotherapy contexts. Neurological competencies addressed in this subject include introductory skills in neurological physiotherapy assessment, interpretation and prioritisation of findings along with the selection and implementation and evaluation of appropriate treatment strategies.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): REHA 3026 AND
REHA 3001 AND
REHA 3004
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 7010 Occupational Justice (10 Credit Points)
Subject Details (p. 4981) Legacy Code: 400916
This subject critically examines practice in the community with a focus on social inclusion and occupational justice. Life perspectives of people experiencing occupational injustice are explored. Current and historical ideologies which underpin global and national legislation and policies on human rights are examined. The promotion of occupational participation through occupational therapy practice is outlined. This subject challenges popular myths and stereotypes of people with disabilities. Issues such as de-institutionalisation, duty of care, dignity of risk, choice-making, rights and negligence are critiqued against legal, ethical and personal perspectives. This subject assists students to develop critical thinking and reflection skills for practice.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): REHA 3022 AND
REHA 3020
Equivalent Subjects: LGYA 7065 - Occupation Social Participation
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 7011 Occupational Therapy Practice 4 (20 Credit Points)
Subject Details (p. 4981) Legacy Code: 400914
This subject will allow students to consolidate academic knowledge and practice skills in preparation for becoming a competent beginning practitioner. Students will be expected to actively participate in assessment, analysis, goal setting, intervention and evaluation under the supervision of an occupational therapist. Students will complete practice hours in accordance with World Federation of Occupational Therapy accreditation guidelines while undertaking the second of two final year clinical placements. Students will also gain knowledge and skills in relation to career planning, professional networking and workforce entry.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): REHA 7013
Equivalent Subjects: REHA 4034 - Occupational Therapy Clinical Practice 4
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 7012 Occupational Therapy Practice 4 (Honours) (20 Credit Points)
Subject Details (p. 4983) Legacy Code: 400949
From 2018 students in course code 4712 - Bachelor of Occupational Therapy (Honours) should take 401161 - Occupational Therapy Practice 4 (Honours). This subject will allow students to consolidate academic knowledge and practice skills in preparation for becoming a competent beginning practitioner. Students will be expected to actively participate in assessment, analysis, goal setting, intervention and evaluation under the supervision of an occupational therapist. Students will complete practice hours in accordance with World Federation of Occupational Therapy accreditation guidelines. Career development workshops will be conducted to prepare students for entry into the profession of occupational therapy. In addition, honours students will examine their role as beginning practitioner researchers during their placement and the role of research in underpinning clinical decisions.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): REHA 3024 AND
REHA 4031
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 7013 Occupational Therapy Practice 4 Workshop (10 Credit Points)
Subject Details (p. 4984) Legacy Code: 400915
This subject will facilitate the transition from student to occupational therapy practitioner. This subject will allow students to consolidate academic knowledge and practice skills in preparation for becoming a competent beginning practitioner. Students will be expected to actively participate in assessment, analysis, goal setting, intervention and evaluation under the supervision of an occupational therapist. Students will complete practice hours in accordance with World Federation of Occupational Therapy accreditation guidelines while undertaking the first of two final year clinical placements.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): REHA 7015
Equivalent Subjects: REHA 4034 - Occupational Therapy Clinical Practice 4
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 7014 Occupational Therapy Project (10 Credit Points)
Subject Details (p. 4985) Legacy Code: 400913
The aim of this subject is for students to critically apply their knowledge of professional theory, practice, research and evaluation skills to the investigation of an occupational therapy professional issue of interest or concern. Students will apply unobtrusive research methods to investigate their chosen topic. Students develop an extensive knowledge of their chosen topic and critically analyse the implications of their findings in terms of theory, policy and contemporary health care practice. Students will synthesise their findings into a scholarly research project report and present their findings at a professional-level capstone student conference.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): REHA 3025 AND
HLTH 3005
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 7015 Occupational Therapy Specialties (10 Credit Points)
Subject Details (p. 4986) Legacy Code: 400917
This subject provides occupational therapy students with the opportunity to select from, and undertake advanced study in, a range of occupational therapy clinical specialty areas. Several streams will run concurrently in this subject representing key clinical areas of specialisation in occupational therapy. Students will be able to focus their study, by selecting a combination of clinical specialty streams. Streams will cover relevant clinical content, examining the unique occupational therapy contribution in each specialty area.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): REHA 3025
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 7016 Occupational Therapy Theory and Practice (10 Credit Points)
Subject Details (p. 4986) Legacy Code: 400911
This subject introduces master's entry students to the theory and practice of occupational therapy. Students will explore the unique contribution of occupational therapists in the health care setting, apply theoretical and philosophical principles underpinning the profession to client groups, and learn analytical skills to examine the relationship between a person, their environment and their participation in daily occupations. The occupational therapy problem solving process will be briefly introduced. In addition, students will study clinical and professional competencies related to practice as a health professional. Finally, the above knowledge and skills will be applied during supervised fieldwork experience.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 7017 Paediatric Physiotherapy (10 Credit Points)
Subject Details (p. 4987) Legacy Code: 401047
From 2018 students should take 401106 - Paediatric Physiotherapy. This subject aims to prepare the student as a competent entry-level practitioner in paediatric physiotherapy. It focuses on understanding the changes which occur from infancy to maturity and the impact of congenital or acquired conditions, or lifestyle diseases causing dysfunction. Clinical and ethical reasoning and family-centred practice are both stressed. The approach will also emphasise the role of physiotherapy within inter-professional teams to prepare for different work settings (acute care, rehabilitation and/or community). The subject integrates prior learning from previous years (especially subjects related to neurology musculoskeletal and cardiopulmonary physiotherapy and exercise rehabilitation).
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): REHA 3009 AND
REHA 3018
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 7018 Physiotherapy for Chronic Illness and Disease (10 Credit Points)
Subject Details (p. 4988) Legacy Code: 401048
From 2018 students should take 401107 - Physiotherapy for Chronic Illness and Disease. This subject focuses on the role of physiotherapy in chronic disease management. A case-based learning approach will be undertaken to provide students with the theory, research and practice which underpins the assessment and treatment of people with chronic disease. The role of lifestyle factors in the development of chronic disease will be explored, along with health promotion and preventative strategies. The importance of client-centred care, which respects culture and diversity, and the multidisciplinary team approach will also be investigated in the context of frequently occurring chronic conditions.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): REHA 3009
Co-requisite(s): REHA 7001 OR
REHA 7002 OR
REHA 7003 OR
REHA 7004
Restrictions: Please see the Subject Details page for any restrictions for this subject

REHA 7027 Research into Practice: bridging the clinician-researcher divide in applied and creative therapies (10 Credit Points)
Subject Details (p. 4990) Legacy Code: 102728
Evidence Based Research (EBR) can inform excellence in clinical practice in order to best meet the needs of our clients and patients. How we choose and use this research is critical, as is the way that we understand ourselves to be a researcher, beyond our practitioner identity. If you are seeking to translate benchtop research (basic laboratory approaches) into applied research practice, and if you are transitioning towards a new identity as a clinician-researcher, this is the subject for you. Our applied research focus considers broad applications relevant to the creative arts therapies, verbal therapies, allied and other health professions, by looking at research processes which ultimately improve practice in the 'real world'.
Level: Postgraduate Coursework Level 7 subject

MKTG 1002 Advertising: An Introduction (WSTC) (10 Credit Points)
Subject Details (p. 4287) Legacy Code: 700088
In this subject students gain a grounding in the key areas of advertising and the key steps in the advertising process, viz. research, strategy, creative (copywriting & art direction), media planning and marketing communication. Students are also introduced to the issues surrounding advertising and its role in society.
Level: Undergraduate Level 1 subject
Co-requisite(s): Students enrolled in the combined DiplomaBachelor courses listed below must pass all College Preparatory units listed in the course structure before progressing to the Year 2 units
Equivalent Subjects: MKTG 1001 - Advertising An Introduction
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 1003 Consumer Behaviour (10 Credit Points)
Subject Details (p. 4288) Legacy Code: 200084
From 2022 this subject replaced by MKTG 2010 Customer Experience Fundamentals. A focus on the consumer is critical in marketing philosophy. Effective marketing strategies are necessarily formulated as a result of the understanding of basic consumer behaviour. The aim of the subject Consumer Behaviour is to introduce students to consumer behaviour as a critical component in marketing philosophy, and fundamental to the development of effective marketing strategies. This subject applies concepts, theories and models derived from disciplines such as sociology, anthropology, psychology, economics, and mass communications theory to a consumer context. Students will learn to apply such concepts, theories and models through a range of individual and collaborative means using a blended learning design that draws on current and future consumer trends in various marketplaces.

MKTG 1013 Marketing Enterprises (WSTC) (10 Credit Points)
Subject Details (p. 4296)
Marketing Enterprises is an ideal introduction to understanding consumer behaviour, preferences, and trends. It is designed to provide students with a comprehensive understanding of integrated marketing strategies in various environments using real-world case studies and practices. Marketing Enterprises is a fundamental subject for marketing majors and offers a general overview for those who wish to design, develop, manage, and maintain consumer information. Marketing students can explore various career opportunities, such as marketing managers, analysts, digital marketing specialists, and advertising executives. In today's world, where businesses face unprecedented challenges and opportunities, a solid foundation in marketing is essential for success.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 2001 Advertising: Creative (10 Credit Points)
Subject Details (p. 4296) Legacy Code: 100552
This is a practice-oriented subject designed to teach students how to conceive and produce original and effective advertising to meet strategic goals. From interpretation of a brief, to creating and evaluating concepts, and presenting campaigns, the subject aims to mirror real processes within the advertising industry.
Level: Undergraduate Level 2 subject
Pre-requisite(s): MKTG 1001
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 2002 Incubator 1: Innovation and Creativity for Entrepreneurship (10 Credit Points)
Subject Details (p. 4297) Legacy Code: 301165
This subject explores the ways innovative ideas for a product or service can be turned into a successful start-up business. Students explore practical activities to generate creative ideas and learn about innovation, as well as follow the stages involved in developing a conceptual idea. Upon successful completion of the subject, students will possess potential startup options that could be further explored in more advanced incubator subjects.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 2003 Incubator 3: Product Development (10 Credit Points)
Subject Details (p. 4298) Legacy Code: 301168
Product development is about expanding on a creative, innovative idea or concept through specific stages into a product or service. Students apply practical learning techniques in each of the stages for the product or service development. In addition, students use a human-centred design approach to explore a problem and include a 'human' or user perspective in addressing the problem. The approach includes creating a digital or physical prototype to test the product or service concept with potential customers. Students create and apply methods to collect feedback from potential customers which is used to refine their prototype. In these activities students are applying critical and creative thinking, decision making and communication skills which are essential employability skills.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 2004 International Marketing Research (10 Credit Points)
Subject Details (p. 4298) Legacy Code: 200374
This subject aims to provide students with tools to undertake and critically evaluate simple international marketing research projects. It covers basic marketing research concepts and statistical techniques with emphasis on the impact of the international environment in conducting both primary and secondary data research.
Level: Undergraduate Level 2 subject
Pre-requisite(s): MATH 1030 AND
MKTG 1006 AND
BUSM 1015
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 2005 Issues, Risk and Crisis Communication (10 Credit Points)
Subject Details (p. 4299) Legacy Code: 102064
This subject explores the principles and practice of issues management in order to avoid crises, manage when one arises, and seek opportunities to learn and benefit from a crisis where possible, using effective communication. It investigates the development of crisis management plans, and the testing and implementing of these plans. Dealing with the media and pressure groups is covered, along with training a crisis communication team and organising a response to a crisis situation.
Level: Undergraduate Level 2 subject
Pre-requisite(s): MKTG 1009

MKTG 1006
Equivalent Subjects: LGYA 4334 - Fundamentals of Marketing Research
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 2010 Customer Experience Fundamentals (10 Credit Points)
Subject Details (p. 4301) Legacy Code: 201082
Customer experiences occur when there is interaction between a company and their customers. Increasing digitisation of this interface has resulted in a shift of buyer expectations where communication is no longer a one-way process. The result being that this exchange comprises of the customer journey where internal factors such as attitudes, learning and emotions combined with external factors such as culture, social communities, and global networks influence decisions. This subject introduces the complexity of technology driven relationships where customers become co-creators of their own personalized experiences and how companies can be part of this. Students will learn the importance of creating positive customer experiences and how this adds value to organisation strategy.
Level: Undergraduate Level 2 subject
Equivalent Subjects: MKTG 1003 - Consumer Behaviour
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 2011 Customer Insights (10 Credit Points)
Subject Details (p. 4302) Legacy Code: 201084
Digital technologies are generating large volumes of information (data) about customers and markets. The key is determining how to organise and analyse this data to generate useful insights about customers for marketing decisions. The focus of this subject is on data analysis and reasoning to better understand the culture of insight-driven businesses. Students will examine different sources of information and the processes needed to ensure the generation of quality output. Activities around data visualization, and the role of social media platforms which support this, will prepare students for their future business careers.

MKTG 3003 Commercial Property Management (10 Credit Points)
Subject Details (p. 4305) Legacy Code: 200600
This subject examines the operation of commercial property management as a discrete professional discipline of the property industry. Students examine the fundamental principles of the day-to-day management of the various classes of mainstream commercial investment property. In this subject, students acquire an understanding of the various roles, duties, obligations and legal liabilities of the Commercial Property Manager. Various legislative and statutory provisions are explored, as well as the inter-relationship of commercial property management with the professional disciplines of asset management, investment management and portfolio management, and other sectors of the property Industry. Students also gain an understanding of contemporary commercial leasing practice and the relationships which operate between the building owner, the building manager, and commercial tenants, including the interests and objectives of all concerned parties.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYC 0055 - Commercial Property Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 3004 Export Strategy and Applications (10 Credit Points)
Subject Details (p. 4306) Legacy Code: 200589
Australia's export opportunities have yet to be fully realised. In other words, of all the firms that could be considered as having an export potential, only a very small percentage of them actually do (export). This subject teaches students about the management perspectives and the operational requirements needed for a successful export initiative. Specific topics include strategic intent, capability assessment, information gathering, export entry models evaluation, market mix factors, risk management, export finance, logistics and sales management. The overriding aim of the subject is to enable students to be confident in working in an international business environment and to seek out and undertake management and operational tasks necessary to the global development of the firm.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BUSM 1015
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 3005 Incubator 6: Funding and Start-up (10 Credit Points)
Subject Details (p. 4307) Legacy Code: 301171
This subject investigates various funding opportunities that might be suitable for your business concept through a number of theoretical topics, such as: possible funding sources including venture capitalists and angel investors, joint venture funding, pitching your ideas. The subject is structured into a number of modules. Further, as activities associated with this subject, students would have to actively seek and secure funding for the start-up.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 3006 Incubator 7: Growth and Exit Strategies (10 Credit Points)
Subject Details (p. 4307) Legacy Code: 301172
Startups must plan for both business growth and exit from the business. In this final incubator subject students will explore, analyse, evaluate and select from a range of suitable growth and exit strategies. This includes deciding whether their own or a live case study business will grow organically or will require a fast growth model and rapid expansion. Students will also need to consider possible exit strategies (such as initial public offering (IPO), trade sales or personal redundancies). At the completion of the subject, students will have developed a future growth plan with possible exit strategies.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 3007 International Marketing (10 Credit Points)
Subject Details (p. 4308) Legacy Code: 200094
Marketing internationally has become a necessity for many firms that wish to survive and grow in today's dynamic and increasingly linked world economy. International Marketing is concerned with understanding and successfully managing the different international economic, cultural, political and legal environments as they affect the marketing activities of companies. International Marketing examines the role of marketing research, international finance, overseas market entry and expansion strategies and the marketing mix in international markets. On completion of this subject students will have acquired a sound theoretical basis and, particularly, a practical understanding of how companies operate in international markets.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MKTG 1006 OR
BUSM 1015
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 3009 Marketing Planning Project (10 Credit Points)
Subject Details (p. 4309) Legacy Code: 200096
Marketing planning project (MPP) assimilates and builds on the wide range of marketing units that students have previously completed. MPP assimilates students' specialist knowledge developed in other units through the use of a 'real-life' case context in which students demonstrate their mastery of marketing in the development and presentation of a professional marketing plan.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MKTG 1006

MKTG 3011 Marketing of Services (10 Credit Points)
Subject Details (p. 4311) Legacy Code: 200090
Given the service-based nature of modern economies, business graduates will either work for firms whose central offering is service or be employed by organisations that use service as an integral supporting element in what they do and what they offer. Therefore, increasingly, knowledge and skills in the field of marketing of services are required by personnel operating across various industries and in a range of roles. The subject aims to: expose students to relevant theory and practice in the field of services marketing; develop participants into more complete marketers capable of operating in service marketing environments.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MKTG 1006
Equivalent Subjects: BUSM 2040 - The Service Enterprise
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 3013 Property Development 2 (10 Credit Points)
Subject Details (p. 4311) Legacy Code: 200748
This subject builds upon previous preliminary studies in the professional discipline of Property Development within the Bachelor of Business (Property) degree and is designed to provide a more in-depth and advanced educational exposure to the wide range of essential inherent functions, core activities, contemporary issues and associated considerations relevant to Property Development, in the context of both theory and practice.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 4693 - Property Development 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 3014 Property Development Process (10 Credit Points)
Subject Details (p. 4312) Legacy Code: 200874
In this unit, students critically evaluate the property development process, from the initial development concept through to the end-use of completed development projects. Consideration is given to the implications of the property development process and development decisions from the viewpoints of developers, end users, financiers, public authorities and the community. Students acquire a theoretical understanding of the property development process, development appraisal techniques including financial and feasibility aspects, as well as an understanding of how to apply these techniques to a property scenario. Planning issues are also critically examined.

Equivalent Subjects: LGYB 7468 Property Development MKTG 3012 Property Development
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 3016 Strategic Marketing Management (10 Credit Points)
Subject Details (p. 4313) Legacy Code: 200087
Customer-centric marketing strategies are vital to capturing competitive advantage and sustaining business success. This subject explores the core concepts and tools of contemporary strategic marketing management. The subject focuses on the skills and framework to develop and manage an integrated marketing strategy that creates value for customers and generates growth for the firm in both online and offline environments. Using a marketing simulation, the subject provides the students the opportunity to make a series of complex, real-world marketing decisions in a competitive environment.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MKTG 1006
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 3017 The Markets of Asia (10 Credit Points)
Subject Details (p. 4314) Legacy Code: 200098
Markets of Asia focuses on internationalisation and global competitiveness of organisations in the Asian region. The subject also encourages an appreciation of cultural diversity, and develops students' knowledge and skills so that upon completion of this subject, they will understand the relevant business practices needed to be responsive to enterprise opportunities and threats within this global community.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BUSM 1006
Equivalent Subjects: LGYA 9922 - Regional Market Study (Asia)
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 3018 Public Relations: Campaigns (10 Credit Points)
Subject Details (p. 4315) Legacy Code: 102729
In this capstone subject students will learn to professionalise key aspects of the public relations management process. The subject links and applies theoretical understanding with writing, planning and presentation skills in response to a client brief. The 'real-world' situation allows students to demonstrate their capacity for problem analysis and to develop appropriate and timely program solutions. Students are required to work within a limited budget and to realistic industry timelines to produce a public relations campaign for their portfolios. Assessment tasks enable students to demonstrate emerging professional capacity to develop a campaign and prepare for a public relations position, either in an in-house or consultancy role.
Level: Undergraduate Level 3 subject
Pre-requisite(s): COMM 2011 AND
COMM 2015
Equivalent Subjects: COMM 3029 - Public Relations Campaigns COMM 3007 - Communication Campaigns
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 3019 Marketing and Digital Communications (10 Credit Points)
Subject Details (p. 4316) Legacy Code: 201086
The evolving role of digital technologies and digital media has changed how marketers effectively manage a communication campaign in the digital age. This subject offers insights into marketing communication strategies that can effectively reach tech savvy audiences. The principles taught in this subject will provide a strong understanding of the communication process and help utilise the marketing communications mix (advertising, sales promotions, personal selling, sponsorship marketing, public relations, and direct marketing) more effectively. Students completing this subject will be able to build and manage marketing and digital communication campaigns.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MKTG 1006
Equivalent Subjects: MKTG 2006 - Marketing Communications
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 3020 Omnichannel Marketing (10 Credit Points)
Subject Details (p. 4317) Legacy Code: 201087
Technology advances are changing customer value requirements. As a result, customers expect an efficient, insightful and tailored service which requires personalised selling processes through high performance technology and customer-centred business models. Multiple touchpoints and digitally driven processes are created to reach them in the right place at the right time. Omnichannel marketing is now central to business transactions. This subject provides students with an understanding of the dynamics and complexities in creating value across various touchpoints in the business to business space. It considers the need to develop an enterprise-wide digital strategy and align technology, organizational structure and processes to develop an omnichannel approach to provide consistent and seamless engagement with buyers.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MKTG 1006
Equivalent Subjects: MKTG 3002 - Business to Business Marketing
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 3021 Strategic Brand Management (10 Credit Points)
Subject Details (p. 4318) Legacy Code: 201083
Consumers' brand interaction in the marketplace is shaped by a digital and technology driven marketing environment. Innovative and interactive branding strategies have become the key to a successful marketing strategy. Students learn to strategically create, develop, innovate, position and protect branding in an ever-changing environment to establish a sustainable competitive advantage. Through these industry-related activities, students create a business driven portfolio, which can be presented to potential employers. This subject uses workshop sessions and online activities to create an interactive learning environment and bring the content to life.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MKTG 1006
Equivalent Subjects: MKTG 3001 - Brand and Product Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 3023 Incubator 6: Funding a Start-up (10 Credit Points)
Subject Details (p. 4319)
This subject investigates various funding opportunities available for startup businesses. Theoretical knowledge and real-world experiences are blended to ensure students are knowledgeable, immersed in and connected with the Australian funding ecosystem. Students finish the subject with knowledge of the different funding sources to explore on the startup journey, and an increased social capital with Australian funders.
Level: Undergraduate Level 3 subject
Equivalent Subjects: MKTG3005
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 7007 Corporate Asset and Property Management (10 Credit Points)
Subject Details (p. 4320) Legacy Code: 201015
The subject focuses on the role and functions of corporate asset management as a strategic goal of a corporation. Students examine business structure and how corporate asset management fits into an organisation, and assess the operation of commercial property management and the various roles, duties, obligations and legal liabilities of a Commercial Property Manager. Various legislative and statutory provisions are explored, as well as the inter-relationship of commercial property management with the professional disciplines of asset management, investment management, portfolio management and other sectors of the property industry.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 7010 Customer Value Management (10 Credit Points)
Subject Details (p. 4321) Legacy Code: 200791
In an economy where products, marketing campaigns and management practises are ever changing, business executives are increasingly recognising that understanding the value of their customers is vital to the survival of the business. Loyal customers are what every organisation seeks. However, increasingly complex supply/demand relationships also result in 'promiscuity' among customers. Therefore, it is crucial that managers have the skills to not only strive for excellence and consistency in product-centric perspectives, but also foster and strengthen those that are customer-centric. This subject fundamentally examines the opportunities and challenges in: a) identifying customers, b) adding value to supplier/consumer relationships, including tools that firms/organisations can use to provide value for customers while ensuring profitability over the entire life of the relationship.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: MKTG 7009 - Customer Relationship Marketing
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 7011 Feasibility Modelling (10 Credit Points)
Subject Details (p. 4322) Legacy Code: 201014
This subject emphasises the evaluation of a site for the purposes of selecting development projects, evaluating different options and making the decision as to whether to proceed to a more detailed feasibility study and modelling. The subject provides students with the knowledge and skills to prepare a full feasibility report and analysis of a project's concept and financial modelling. Students will apply theories and concepts to a case study using current and available applications.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: MKTG 7022 - Property Feasibility Study LGYB 7483 - Feasibility Study
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 7014 International Property Finance (10 Credit Points)
Subject Details (p. 4323) Legacy Code: 201012
This subject develops students' knowledge of finance with particular reference to the property industry. The theories on financial capital markets and market efficiencies are presented with an emphasis on property investment methods, financial leverage, and bankruptcy. The subject also explores various sources of financing and techniques to aid funding decision- making. Students examine recent and emerging developments in the international property investment and financing arena, as well as sustainable investment and financing strategies.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: ACCT 7020 - Property Finance and Taxation LGYC 0016 - Property Finance and Taxation
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 7015 Investment Property Valuation (10 Credit Points)
Subject Details (p. 4324) Legacy Code: 201011
This subject focuses on the theory and practice of valuing income-producing properties, specifically retail, office and industrial properties. Students will learn to critically evaluate the various factors affecting the valuation. The content covered in this subject provides a foundation for further study in property valuation.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): MKTG 7028
Equivalent Subjects: FINC 7018 - Property Valuation LGYA 4889 - Income Property Appraisal LGYC 1571 - Income Property Appraisal
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 7017 Marketing Management (10 Credit Points)
Subject Details (p. 4325) Legacy Code: 200786
Marketing Management is designed to provide an introduction to the key concepts, principles and practices that constitute the Marketing discipline. Marketing as a business philosophy that underpins the activities of the firm is a key focus. Areas covered include: the marketing process and marketing implementation; marketing and strategic planning, including return on marketing investment (ROMI); the marketing environment; marketing research and marketing information systems; consumer and business buying behaviour; market segmentation of consumer and business markets; product development and product management; brand management; pricing strategy; communication strategy; competitive marketing strategy; marketing implementation.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: MKTG 7018 - Marketing Management LGYC 1535 - Strategic Marketing
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 7019 Marketing Systems (10 Credit Points)
Subject Details (p. 4325) Legacy Code: 200737
This subject studies the marketing process from a holistic viewpoint, considering the intersection of the economy, the government, and the community. This perspective will help students to analyse and understand the interrelated and interdependent parts that comprise a marketing system. Specifically, this subject examines: consumer behaviour, market regulation, social responsibility and sustainability. Students will learn to consider the marketing process and its consequences at both an aggregate and micro level. This subject exposes students to the systematic and analytical approaches expected from them in postgraduate studies in marketing.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 8733 - Marketing Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 7022 Property Feasibility Study (10 Credit Points)
Subject Details (p. 4327) Legacy Code: 200893
In 2019 this subject is replaced by 201014 Feasibility Modelling. This subject emphasises the evaluation and development of feasibility studies for the purposes of selecting development projects, evaluating different options and making the decision as to whether to proceed to a more detailed feasibility study. The subject provides students with the knowledge and skills to prepare a full feasibility report and analysis of a project's concept and financial feasibility. This is achieved through the application of theories and concepts to a case study. Students will have access to applications being used in the industry to complete a feasibility report. Additionally, students will develop skills to carry out both scenario and sensitivity testing on the outcomes of the proposed development project.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYB 7483 - Feasibility Studies
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 7023 Property Investment and Risk Management (10 Credit Points)
Subject Details (p. 4328) Legacy Code: 201010
This subject discusses investment and risk management in the contemporary property context (both local and international). It explores the unique features of income-producing property and examines the performance of such properties, through the application of a variety of investment techniques. The significance of green property investment is also highlighted. Students will perform risk analysis techniques for income-producing properties and portfolios.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: FINC 7017 - Property Investment Analysis LGYB 6499 - Property Investment Analysis (V2)
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 7024 Property Portfolio Analysis (10 Credit Points)
Subject Details (p. 4328) Legacy Code: 200891
This subject examines the role of property in an investment portfolio, with particular attention given to property portfolio performance analysis, property investment vehicles and property investment strategy. The performance analysis of both direct and indirect property is also examined to assess the strategic contribution of property to an investment portfolio.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYB 6498 - Property Portfolio Analysis
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 7026 Statutory Valuation and Property Law (10 Credit Points)
Subject Details (p. 4329) Legacy Code: 201016
This subject covers valuation codes laid down by statute and their application in compulsory acquisition and resumption of property. It also includes compensation valuation for compulsory acquisition, professional negligence, litigation, evidence, and alternative dispute resolution. Students will develop an understanding of professional liability and responsibility, and prepare for role as an expert witness.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): MKTG 7028 AND
MKTG 7015
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 7028 Strategic Property Market Analysis (10 Credit Points)
Subject Details (p. 4330) Legacy Code: 201009
Students will develop an understanding of the property industry and its role in the investment context, as well as the collection and analysis of property data. Markets, institutional property portfolios, the role of Government policy, and the controls that affect development, residential valuation and application of economic theory to property development will also be studied.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 7030 Sustainable Property Development (10 Credit Points)
Subject Details (p. 4331) Legacy Code: 201013
The subject focusses on the importance of Planning and its role in relation to the property development process. This subject provides a wide ranging study of the objectives, functions, roles and methods of operation of the development process, the financial aspects of development, social considerations, taxation aspects and planning matters.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: MKTG 7021 - Property Development LGYC 0023 - Property Development (V2)
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 7032 Valuation of Special Premises (10 Credit Points)
Subject Details (p. 4332) Legacy Code: 201017
The value of special premises constitutes an important segment of valuation practice in Australia. A number of special valuation considerations arise in valuation of this class of premises. However, the most compelling reason for studying the valuation of special premises is the fact that such properties provide an ideal vehicle whereby valuation principles and methods of valuation can be practiced and critically evaluated by students.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): MKTG 7028
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 7033 Customer Experience (10 Credit Points)
Subject Details (p. 4332) Legacy Code: 201022
Customer experiences occur when there is interaction between a company and their customers for the duration of their relationship. It comprises the customer journey, the consumer-brand 'touchpoints' and the environment in which these experiences happen. Increasing digitisation of the organisation-customer interface has resulted in a shift of buyer expectations where it is easier to compare market offerings and where communication is no longer a one way interaction. This subject considers the complexity of the technology driven relationship where customers become co-creators of their own personalized experiences and how companies can be part of this.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: MKTG 7004 - Buyer Behaviour
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 7034 Digital Marketing (10 Credit Points)
Subject Details (p. 4333) Legacy Code: 201026
In the last decade or so, marketing has moved from traditional practice to the digital realm where technology now drives many decisions in marketing strategy. It is now even more important that all types of organisations are able to deliver the right message, to the right people, at the right time. Digital marketing is often closely linked to the internet as the primary channel of contact and where success is measured via mobile and social media marketing. This subject will teach students the principles of digital marketing so they understand the key frameworks of digital marketing technology and are able to apply marketing strategies to target tech savvy consumers.
Level: Postgraduate Coursework Level 7 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 7035 Frontiers of Branding (10 Credit Points)
Subject Details (p. 4334) Legacy Code: 201024
Technology has dramatically changed the way brands interact in the marketplace. Marketers are increasingly faced with the challenge of meeting the needs of sophisticated consumers who have multiple brands to choose from in a very competitive environment. This makes innovative branding strategies the key differentiating variable. This subject helps students understand the concept of branding and the utilization of brand assets by learning to strategically create, develop, innovate, position and protect the brand in an ever-changing environment in order to establish a sustainable competitive advantage.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: BUSM 7049 - Integrated Brand Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 7036 MarketingMe (10 Credit Points)
Subject Details (p. 4335) Legacy Code: 201021
This subject provides a unique opportunity for students to personalise their postgraduate degree and have a meaningful readily-built portfolio for future employers. It comprises a range of short learning modules designed to provide students with a selection of employment related skills such as career preparation, personal brand building, industry certification and how to use the latest technology pertinent to their field of study. Students will follow certain paths in order to travel through 150 hours of educational participation time, including a range of modules and their final portfolio. Students can pick and choose the relevant modules at any time during their course, thus allowing flexibility to manage their choices as they progress through the degree. Please note that students in the Master of Marketing, will automatically be given access to vUWS to complete their learning modules, without the need to formally enrol in this subject. However, in order to successfully complete this subject, students should enrol in it when in their final session of study. You will be required to gain approval from your Director of Academic Program to enrol in this subject by submitting an online eForm.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): Students must be in the program 2817 - Master of Marketing and have completed 40 credit points of study before enrolling in this subject
Permission required to enrol in this subject in the last session of study
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 7037 Multichannel Marketing (10 Credit Points)
Subject Details (p. 4336) Legacy Code: 201023
Today's customers have far greater control over the buying process than previously, be that in business or consumer markets. Multichannel marketing is about providing your customers with every opportunity to engage with your business across a variety of offline and online platforms. This subject looks at how the messages and media deployed by an organisation create and sustain demand as a means to build network relationships. As customer expectations rise and the influences of technology becomes more prevalent, students will learn about the importance of personalized campaigns that will resonate with each customer account.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: BUSM 7009 - Business Marketing
Restrictions: Please see the Subject Details page for any restrictions for this subject

MKTG 7038 Social Marketing (10 Credit Points)
Subject Details (p. 4336) Legacy Code: 201025
Social Marketing is the application of marketing concepts to the achievement of social ends. Usually this will involve changing attitudes and behaviours in a way that benefits both individuals and communities. This subject builds students' knowledge of how social marketing theory can be used to facilitate behaviour change and improve social outcomes within communities. It will include how to design, manage and evaluate social and behaviour change programs.

Restrictions: Please see the Subject Details page for any restrictions for this subject

SPRT 1005 Outdoor Recreation (10 Credit Points)
Subject Details (p. 4997) Legacy Code: 400808
Students will learn about the variety of outdoor recreation and educational pursuits available to individuals, in school or community settings. Through active participation and guided instruction, students will also learn how to supervise specific forms of outdoor recreation and education in activities such as hiking, canoeing and camping. Learning content will reinforce the rationale for the development, administration and delivery of school-based and community outdoor recreation and education programs within Australia.
Level: Undergraduate Level 1 subject
Equivalent Subjects: SPRT 2005 - Outdoor Recreation 1 SPRT 1006 - Outdoor Recreation (WSTC) TEAC 1014 - Experience based Outdoor Education
Restrictions: Please see the Subject Details page for any restrictions for this subject

SPRT 1006 Outdoor Recreation (WSTC) (10 Credit Points)
Subject Details (p. 4997) Legacy Code: 700063
Students will learn about the variety of outdoor recreational pursuits available to individuals, whether in a school-based or community setting. Through active participation and guided instruction, students will also learn how to supervise specific forms of outdoor recreation. Lecture content will reinforce learning and skill development through the study of the development, administration and delivery of school-based and community public recreation programs, as well as studying the role of recreation within Australia.
Level: Undergraduate Level 1 subject
Equivalent Subjects: SPRT 1005 - Outdoor Recreation
Restrictions: Please see the Subject Details page for any restrictions for this subject

SPRT 1008 Sport for Social Development (10 Credit Points)
Subject Details (p. 4998) Legacy Code: 401243
This subject provides an introduction to the concept of Sport for Development. Students will explore the role sports and physical recreation can play in achieving positive social outcomes in communities, both locally and internationally. Students will learn about the multidisciplinary nature of Sport for Development and how the disciplines of health and sports science, sports management and community development come together in the planning, implementation and evaluation of sports and physical recreation projects.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

SPRT 1009 Exercise Performance and Health (10 Credit Points)
Subject Details (p. 4999)
Students will learn the functional anatomy, basic exercise physiology, physical fitness, motor development and exercise training content required to practice as competent exercise/sport/health professionals. Students will also administer and undertake laboratory exercises designed to test, design and administer fitness programs for healthy individuals.
Level: Undergraduate Level 1 subject
Pre-requisite(s): SPRT 1001
Incompatible Subjects: SPRT 3001
Restrictions: Please see the Subject Details page for any restrictions for this subject

SPRT 1010 Sport for Social Development (WSTC) (10 Credit Points)
Subject Details (p. 5000)
This subject provides an introduction to the concept of Sport for Development. Students will explore the role sports and physical recreation can play in achieving positive social outcomes in communities, both locally and internationally. Students will learn about the multidisciplinary nature of Sport for Development and how the disciplines of health and sports science, sports management and community development come together in the planning, implementation and evaluation of sports and physical recreation projects.
Level: Undergraduate Level 1 subject
Equivalent Subjects: SPRT 1008
Restrictions: Please see the Subject Details page for any restrictions for this subject

SPRT 2002 Exercise Testing and Measurement (10 Credit Points)
Subject Details (p. 5000) Legacy Code: 401150
Level: Undergraduate Level 2 subject
Co-requisite(s): SPRT 1001
Restrictions: Please see the Subject Details page for any restrictions for this subject

SPRT 2007 PDHPE: Games for Diverse Groups (10 Credit Points)
Subject Details (p. 5001) Legacy Code: 400798
This subject focuses on teaching and coaching young children in a range of Indigenous, striking/fielding, and target sports. The aim is to build on students' knowledge and application of various teaching / coaching styles with a focus on the game sense approach. In particular, the subject addresses issues of diversity and inclusion in school, sport, and recreation activities. As part of the subject, students will implement a teaching program in a local primary school and complete introductory coaching certificates in a variety of sports.
Level: Undergraduate Level 2 subject
Equivalent Subjects: SPRT2013
Restrictions: Please see the Subject Details page for any restrictions for this subject

SPRT 2009 Professional Development and Work Experience (10 Credit Points)
Subject Details (p. 5002) Legacy Code: 400903
Experience in the field of study is an essential ingredient in marketing an individual for employment and often for professional memberships. Professional Practice provides students with an opportunity to observe and assist Sport & Exercise Science practitioners in action and to learn in a practical hands on setting. Students will have the opportunity to see how knowledge and skills acquired in lectures and tutorials/ laboratories can be applied and also relate theoretical concepts and skills to situations in exercise-related settings. This subject is the first of two subjects which require a work placement which is usually off campus.
Level: Undergraduate Level 2 subject
Pre-requisite(s): SPRT 1001
Co-requisite(s): HLTH 2006
Equivalent Subjects: SPRT 2010 - Professional Practice in Sport Exercise Science 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

SPRT 2011 Sustainability, Tourism and Place (10 Credit Points)
Subject Details (p. 5003) Legacy Code: 102386
In 2023 this subject is replaced by TOUR 2003 - Managing Sustainable Places. Sustainability, Tourism and Place provides students with a fundamental understanding of the current debates in tourism management and sustainable places. The complex relationship and interaction among diverse stakeholders involved in places and tourism are explored. The subject encourages a systems approach, and focuses on traveller origin places, tourist experience and community development. The subject aims to assist students in the analysis of the role of tourism in sustainable places by applying a wide range of case studies.
Level: Undergraduate Level 2 subject
Equivalent Subjects: SPRT 2006 - Outdoor Recreation and Leisure
Restrictions: Please see the Subject Details page for any restrictions for this subject

SPRT 2012 Community Sport Development (10 Credit Points)
Subject Details (p. 5004) Legacy Code: 401283
The subject develops students' knowledge and understanding of the concept of community sports development and its role in addressing key issues of social inclusion, diversity, and health promotion. Students explore local and national Australian policies and initiatives, with a focus on monitoring and evaluating and exploring evidence around the social impact of sport. The module facilitates students' knowledge and understanding of community needs within the context of sport and active recreation. Further, students will propose innovative sport development initiatives and programs where students will design and implement a localised sport development initiative in partnership with a local sport organisation.
Level: Undergraduate Level 2 subject
Pre-requisite(s): SPRT 1008
Restrictions: Please see the Subject Details page for any restrictions for this subject

SPRT 2013 Leading Games and Sports (10 Credit Points)
Subject Details (p. 5004)
This subject focuses on teaching and coaching young people in a range of Indigenous games, non-mainstream sports, and various other inclusive activities. The aim is to build on students knowledge and application of various teaching /coaching styles with a focus on the game sense approach. In particular, the unit addresses issues of diversity and inclusion in school, sport, and recreation activities. As part of the subject, students will implement a teaching program in a local primary school and complete introductory coaching certificates in a variety of sports.
Level: Undergraduate Level 2 subject
Pre-requisite(s): HLTH 1020
Equivalent Subjects: SPRT 2007
Restrictions: Please see the Subject Details page for any restrictions for this subject

SPRT 3001 Applied Exercise Science for Personal Trainers and Coaches (10 Credit Points)
Subject Details (p. 5005) Legacy Code: 401056
Students will learn the functional anatomy, exercise physiology, physical fitness, motor development and exercise training content required to function as competent personal trainers and/or sports coaches. Students will also administer and undertake laboratory exercises designed to test and administer fitness programs for healthy individuals
Level: Undergraduate Level 3 subject
Pre-requisite(s): BIOS 1022 AND
SPRT 1001
Equivalent Subjects: LGYA 7759 - Personal Training and Coaching
Restrictions: Please see the Subject Details page for any restrictions for this subject

SPRT 3002 Aquatic Sports (10 Credit Points)
Subject Details (p. 5006) Legacy Code: 400895
From 2016, this subject is replaced by 400866 - Motor Control and Skill. Students will actively engage in a variety of aquatic activities including rowing, canoeing, kayaking, diving, water polo and swimming. Through participation in practical tutorials, students will develop their ability to teach and coach each of the aforementioned aquatic activities in a school or community recreation setting. Students will also train in swimming to improve stroke mechanics and fitness. This will form part of the Bronze Medallion Lifesaving certification, which involves developing competencies in resuscitation, four strokes of swimming, personal survival and rescue skills.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

SPRT 3003 Coaching Sport and Recreation Activities (10 Credit Points)
Subject Details (p. 5007) Legacy Code: 401169
Coaching Sport and Recreation Activities offers students with a learning experience based on the principles of physical education and sports coaching in variety of sports and recreational activities. This subject builds upon physical activity instruction and teaching games for understanding (game sense) introduced in earlier subjects. You will have the opportunity to plan, implement, and reflect on your own teaching practice during tutorials and within community sport contexts. You will learn to see things from multiple perspectives based on content delivered by university staff, peers, and external sport organisations. The subject incorporates experience in meaningful situations that will help prepare you for work in a dynamic field of education. This subject includes approximately 35 hours of work integrated learning.
Level: Undergraduate Level 3 subject
Pre-requisite(s): SPRT 2007
Equivalent Subjects: SPRT 3007 - Ethical Issues in Sport and Athletics SPRT 3010 - Recreational Sports LGYA 0701 - Human Movement 6
Restrictions: Please see the Subject Details page for any restrictions for this subject

SPRT 3005 Contemporary Youth Health Issues (10 Credit Points)
Subject Details (p. 5008) Legacy Code: 400894
This subject has been replaced by SPRT 3024 Contemporary Youth Health from 2023. The subject explores contemporary health issues related to young people. Students will examine a range of topics from a multidisciplinary approach, which include the social, cultural, political and biological factors that influence and construct young people's lives and health. Students will explore pathogenic and salutogenic approaches to understanding and promoting young people's health. When considering and analysing the influences and contexts, students will be able to gather resources and develop diverse meaningful strategies that will assist young people to promote health practices.
Level: Undergraduate Level 3 subject
Incompatible Subjects: HUMN 3072 - Sexuality SPRT 3006 - Introduction to Drug Use in Society
Restrictions: Please see the Subject Details page for any restrictions for this subject

SPRT 3008 Exercise Physiology Across the Lifespan (10 Credit Points)
Subject Details (p. 5008) Legacy Code: 401149
This subject is focused on physiological changes across the human lifespan and their effects on exercise tolerance. There is a particular focus on structural, physiological and motor development changes across the lifespan with emphasis on the control of neuromuscular, cardiovascular, respiratory and thermoregulatory function. Social determinants of health and physiological adaptation to exercise training will be covered, alongside contraindicated exercises and common injuries/conditions that are present at different stages across the lifespan.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BIOS 2012
Restrictions: Please see the Subject Details page for any restrictions for this subject

SPRT 3011 Sport Development Applied Project (10 Credit Points)
Subject Details (p. 5009) Legacy Code: 401246
The Sport Development Applied Project continues student's engagement with an organisation in the sport and active recreation industry. Building on the foundation laid in the Sport Development Internship, the Applied Project provides students with an opportunity to apply their acquired academic knowledge and skills into real-world applications in an engaged strategic project in sport development.
Level: Undergraduate Level 3 subject
Pre-requisite(s): SPRT 3012
Incompatible Subjects: SPRT 3014 Sport Management Applied Project BUSM 3066 Sport Management Internship
Restrictions: Please see the Subject Details page for any restrictions for this subject

SPRT 3012 Sport Development Internship (10 Credit Points)
Subject Details (p. 5010) Legacy Code: 401244
The Sport Development Internship provides students with the opportunity to experience the practice of sport development in the workplace through a supervised placement in the sport and active recreation industry. Internships will allow students to relate their acquired academic knowledge and to apply their skills to real-world applications in an industry setting. Students will have the opportunity to observe, develop and practice skills in negotiation, problem identification, program planning, implementation and evaluation in a range of settings. The work completed during the Sport Development Internship also lays the foundations for the Sport Development Applied Project to follow.Students will complete a minimum of 100 hours of placement/internship as part of this unit.
Level: Undergraduate Level 3 subject
Incompatible Subjects: SPRT 3014 Sport Management Applied Project BUSM 3066 Sport Management Internship
Restrictions: Please see the Subject Details page for any restrictions for this subject

SPRT 3014 Sport Management Applied Project (10 Credit Points)
Subject Details (p. 5011) Legacy Code: 200751
This subject provides students a unique opportunity to integrate knowledge gained from operational and theoretical perspectives of sport studies into application in an engaged research project in sport management. Students will engage in comprehensive projects which bring together real world industry problems and sport theory. Students studying Sport Management Applied Project may have the opportunity to undertake an international field trip to experience the sport environment from an international perspective.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BUSM 2036
Equivalent Subjects: LGYA 4813 - Sport Management Applied Project
Incompatible Subjects: BUSM 3019 - Hospitality Management Applied Project
Restrictions: Please see the Subject Details page for any restrictions for this subject

SPRT 3017 Work Experience in Sport and Exercise Science (10 Credit Points)
Subject Details (p. 5011) Legacy Code: 400904
Experience in the field of study is an essential ingredient in marketing an individual for employment and often for professional memberships. Work Experience in Sport and Exercise Science provides students with an opportunity to observe and assist Sport & Exercise Science practitioners in action and to learn in a practical setting. Students will have the opportunity to see how knowledge and skills acquired in lectures and tutorials/laboratories can be applied and also relate theoretical concepts and skills to situations in exercise-related settings. .
Level: Undergraduate Level 3 subject
Pre-requisite(s): Students in course versions 46581 46582 and 46583 must successfully complete three pre-requisite units - BIOS 2037 Sport and Exercise Physiology REHA 3012 Exercise in Musculo-Skeletal Rehabilitation and SPRT 2009 Professional Development and Work Experience Students in course version 46584 must successfully complete two prerequisite units - BIOS 2012 Exercise Physiology and HLTH 2005 Exercise Prescription 1
Equivalent Subjects: SPRT 3015 - Sport and Exercise Science in Practice
Restrictions: Please see the Subject Details page for any restrictions for this subject

SPRT 3020 Applied Research Project (10 Credit Points)
Subject Details (p. 5012)
This capstone subject requires students to design and conduct a detailed project of independent inquiry in an area of interest. In consultation with subject coordinators and academic staff, students will build on existing evidence synthesis skills by collecting data in a variety of formats to answer key questions related to their field, leading to outcomes and solutions relevant to real-world settings and future employment contexts.
Level: Undergraduate Level 3 subject
Equivalent Subjects: SPRT 3011 Sport Development Applied Project
Incompatible Subjects: SPRT 3014 Sport Management Applied Project 200664 Sport Management Internship
Restrictions: Please see the Subject Details page for any restrictions for this subject

SPRT 3021 Sport Development Internship A (10 Credit Points)
Subject Details (p. 5013)
Sport Development Internship A provides students with the opportunity to prepare for an experience of sport development in the workplace through a supervised placement in the sport and active recreation industry. Preparing for Internships will allow students to relate their acquired academic knowledge and to apply their skills to real-world applications in an industry setting.
Level: Undergraduate Level 3 subject
Incompatible Subjects: SPRT 3014
BUSM 3008
Restrictions: Please see the Subject Details page for any restrictions for this subject

SPRT 3022 Outdoor Education, Sustainability and Health (10 Credit Points)
Subject Details (p. 5014)
Students will learn in, through, and about a variety of outdoor recreation experiences available in community and school contexts. Through active participation, guided instruction, and independent exploration, students will learn how to supervise specific forms of outdoor recreation in activities such as bushwalking, canoeing, camping and the 'micro-adventure'. This subject applies an interdisciplinary approach to learning about people, the environment and health. Students will consider how these connections and interactions play an important role in promoting, supporting and sustaining the wellbeing of individuals, the community, and the environment, now and into the future.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

SPRT 3023 Advanced HPE and Sport Leadership (10 Credit Points)
Subject Details (p. 5015)
This subject offers students with a learning experience based on the principles of physical education and sports coaching in variety of sports and recreational activities. It builds upon physical activity instruction and teaching games for understanding (game sense) introduced in earlier subjects. You will have the opportunity to plan, implement, and reflect on your own teaching practice during tutorials and within community sport contexts. You will learn to see things from multiple perspectives based on content delivered by university staff, peers, and external sport organisations. The subject incorporates experience in meaningful situations that will help prepare you for work in a dynamic field of education.
Level: Undergraduate Level 3 subject
Pre-requisite(s): HLTH 1020 AND
SPRT 2013
Equivalent Subjects: HLTH 3008
Restrictions: Please see the Subject Details page for any restrictions for this subject

SPRT 3024 Contemporary Youth Health (10 Credit Points)
Subject Details (p. 5016)
The subject explores contemporary health related to young people. Students will examine a range of topics from a multidisciplinary approach, which include the social, cultural, political and biological factors that influence and construct young people's lives and health. When considering and analysing the influences and contexts, students will be able to gather resources and develop diverse and meaningful strategies that will assist young people to promote health practices.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

SPRT 9001 Higher Degree Research Thesis - Sport and Recreation (80 Credit Points)
Subject Details (p. 5016) Legacy Code: 800095
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

Studies in Human Society (HUMN)

HUMN 0001 Academic Skills for Islamic Studies (WSTC Prep) (10 Credit Points)
Subject Details (p. 3483) Legacy Code: 700228
This subject introduces students to the essential academic skills required for success in tertiary studies. It employs an explicit pedagogy approach to teach students how to become independent, active, and reflective learners. The subject also includes essential research and writing skills specific to the Diploma in Islamic Studies.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 0002 Academic Skills for Policing (WSTC Prep) (10 Credit Points)
Subject Details (p. 3483) Legacy Code: 700235
This subject introduces students to the essential academic skills required for success in tertiary studies. It employs an explicit pedagogy approach to teach students how to become independent, active, and reflective learners. The subject also includes essential research and writing skills specific to the social sciences and policing.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 0003 Academic Skills for the Social Sciences (WSTC Prep) (10 Credit Points)
Subject Details (p. 3484) Legacy Code: 700233
This subject introduces students to the essential academic skills required for success in tertiary studies. It employs an explicit pedagogy approach to teach students how to become independent, active, and reflective learners. The subject also includes essential research and writing skills specific to the social sciences.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 0006 Australian Studies (WSTC Prep) (10 Credit Points)
Subject Details (p. 3484) Legacy Code: 700213
Australian Studies aims to inform students of some of the aspects of the historical development of Australia and highlight some of the important physical, social, political and economic issues and events which have helped shape the development of Australia as an independent, modern nation. The study of issues, events, attitudes and values in the Australian context along with the development of academic skills will assist students in their study of Humanities units at the tertiary level. In addition, all students, especially international students, should acquire a better appreciation of the environment in which they live and learn to think more critically about issues facing people in the 21st century.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: HUMN 0007 - Australian Studies (UWSC)
Incompatible Subjects: HUMN 0005 - Australian Studies (UWSC) HUMN 0004 - Australian Contemporary Studies (UWSC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 0007 Australian Studies (WSTC) (10 Credit Points)
Subject Details (p. 3485) Legacy Code: 900077
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 0008 Comparative World Religions (WSTC Prep) (10 Credit Points)
Subject Details (p. 3486) Legacy Code: 700229
This subject introduces students to the internally diverse and dynamic nature of religions in the world today. It explores the values and beliefs of religious traditions around the world, their points of difference and similarity. It aims to equip students with an understanding of the way that religions are embedded in culture. The subject provides students with a social science and humanities based vocabulary for discussing theological notions and debating the influence of religion on history, culture and contemporary issues. The subject also provides students with an opportunity to apply academic research and writing skills.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 0009 Cultural Perspectives (WSTC Prep) (10 Credit Points)
Subject Details (p. 3486) Legacy Code: 700212
This subject is designed to help students understand why people from diverse cultures and historical periods may think differently, behave differently and have vastly different worldviews. This subject is designed to help students understand more about themselves, their family and friends and the reasons why people do things in particular ways and believe the things that they do. It has a strong theoretical base but is also designed to encourage reflection.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: HUMN 0010 - Cultural Perspectives (UWSC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 0017 Key Ideas in Arts and Social Sciences (WSTC) (10 Credit Points)
Subject Details (p. 3488) Legacy Code: 900109
This subject explores some of the most influential ideas in the humanities and social sciences, including democracy, imperialism, romantic love and secularisation. The subject traces the origins of these ideas and their manifestation in the world today. The subject will equip students with the ability to identify and evaluate some of the central ideas underpinning public discussion on a range of political and cultural issues today. In addition, it will provide students with a solid foundation of cultural and historical knowledge which is assumed knowledge in many University level subjects.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: HUMN 0015 - History of Western Thought (UWSCFS) HUMN 0016 - Key Ideas in Arts and Social Sciences (UWSCFS)
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 0018 Literacy for Tertiary Studies (WSTC) (5 Credit Points)
Subject Details (p. 3488) Legacy Code: 900047
The University Foundations Studies Literacy for Tertiary Studies course aims to develop and consolidate some key academic skills which will assist students, especially those with limited exposure to quantitative and analytical study, successfully complete their Foundation Studies and future undergraduate study.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 0019 Studies of Society (WSTC) (10 Credit Points)
Subject Details (p. 3489) Legacy Code: 900091
This subject aims to help students develop an understanding and appreciation of Australian society. The subject will provide general information and familiarise students with key structures, events, concepts and terminology used in relation to Australian's modern society. At the end of this subject, students should have greater knowledge and understanding on Australia's history, governmental and political systems. They will learn about consumer laws, civilian rights and responsibilities as well as the composition of Australia's population and relevant variations and trends.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 0020 Understanding Academic Life (WSTC Prep) (10 Credit Points)
Subject Details (p. 3489) Legacy Code: 700281
This subject introduces students to the skills needed for success in academic life. It introduces students to a range of topics to facilitate and develop an increased confidence in fundamental academic skills, develop planning and goal setting skills necessary for university. This subject forms a pre-requisite to 700168 Tertiary Study Skills in Criminal and Community Justice, 700174 Tertiary Study Skills in Social Science and 700175 Tertiary Study Skills in Policing.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: HUMN 0003 - Academic Skills for the Social Sciences JUST 0001 - Academic Skills for Criminal and Community Justice HUMN 0002 - Academic Skills for Policing
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 0021 Understanding the Social Sciences (WSTC Prep) (10 Credit Points)
Subject Details (p. 3490) Legacy Code: 700234
The subject is designed to introduce students to the scientific basis of the social sciences, its basic research methodologies, and the impact social science has on social policy, social justice, and social change. The subject is also intended to provide students with an understanding of key disciplines that comprise the social sciences in order that students can make an informed choice about majors and sub-majors when they progress to a Bachelor degree. The subject will also provide students with an opportunity to acquire and apply basic research and digital literacy skills.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1007 Brave New World: Negotiating Social Change in the 21st Century (10 Credit Points)
Subject Details (p. 3491) Legacy Code: 101886
The discipline of Sociology has witnessed a transformation reflecting significant changes in society and social life. This subject re-examines the sociological dimensions of a variety of social concerns, for example: environmental issues, global migration, health, religion, indigeneity, gender, ethnic conflict and sub-cultural groups and asks: In the 'brave new world' of contemporary society we need to re-evaluate the conventional sociological concern of social structure and inequality in the face of these broad social changes. This subject will examine the social transformations which characterise contemporary social life; in particular the pace of social change and the implications of social media. In exploring these social concerns the links are drawn between more recent theoretical constructs and the more traditional focus on national social structures and inequalities. The subject will place special emphasis on concepts such as risk, individualism and uncertainty.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1008 Cities: Introduction to Urban Studies (10 Credit Points)
Subject Details (p. 3492) Legacy Code: 101589
This subject is a keystone in the Geography and Urban Studies major. It aims to introduce students to the major urban challenges that will shape our society in the future and to the major substantive concerns in the field of urban management and planning It will develop students' understanding of how their own urban experiences are shaped by broader historical, cultural, economic, and social forces, and will enable students to compare the Australian urban context and issues with those in other world regions.
Level: Undergraduate Level 1 subject
Equivalent Subjects: LGYA 1336 - The Urban Context
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1010 Contemporary Society (Advanced) (20 Credit Points)
Subject Details (p. 3492) Legacy Code: 101516
Contemporary Society introduces students to central issues in social analysis and a range of perspectives that have been used to understand the social world. It provides them with a theoretical grounding in the central concepts and methods of social theory through an encounter with problems raised when social theory directly engages with practical problems such as racism, environmentalism and inequality.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1013 Contextualising Indigenous Australia (Day Mode) (10 Credit Points)
Subject Details (p. 3493) Legacy Code: 101751
This subject will provide a comprehensive overview of Indigenous Australian cultures, histories and identities. The scope of the subject spans pre-colonisation to the twenty-first century across Australia and all relevant fields of study. A cross-section of institutional, community and popular culture contexts will be explored through flipped mode of delivery supported by face to face tutorials. This body of knowledge will provide a context for various professions and discussions. Students will have the exciting opportunity to hear from a diverse range of Indigenous educators from academics to artists through to performers and community elders. A broad understanding of Indigenous Australia will position students to be advocates for change in contemporary Australia.
Level: Undergraduate Level 1 subject
Equivalent Subjects: LGYA 6068 - Indigenous Australia Back to the Future
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1015 Development and Sustainability (10 Credit Points)
Subject Details (p. 3494) Legacy Code: 101572
The subject introduces the basic concepts relating to sustainability and development, and explores their relevance to real-world situations at the local, national, and global levels. The causes of unsustainability as well as their short-term and long-term effects on society and the environment will be evaluated. Students will analyse, using appropriate sustainability indicators and social change theories, a social change initiative (i.e., program, project, policy) designed to integrate the socio-economic, cultural and environmental dimensions of sustainability within the context of a specific developmental focus (e.g. poverty alleviation, gender equality, human/social development, heritage conservation, biodiversity, tourism, green accounting, sustainable livelihoods). Students will engage in problem-based learning skills in order to critically analyse and discuss current issues in development, and provide solutions to sustainability.
Level: Undergraduate Level 1 subject
Equivalent Subjects: -
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1016 Different Ways of Being in the World: Introduction to Social Anthropology (10 Credit Points)
Subject Details (p. 3495) Legacy Code: 102344
The key and foundational focus of Social Anthropology is the relationship between people and their cultures. This subject provides an introduction to key concepts, methods and theories of classical and contemporary Social Anthropology. It will guide the students to an informed and critical understanding of the nature and extent of human diversity and differences, as well as the similarities which unite us as people. The subject has two parts. The first part introduces students to the history and scope of Social Anthropology through selected work of some classical anthropologists, introducing key concepts and conceptual frameworks. The second part is designed around selected case studies of Indigenous Peoples in Australia, the Asia Pacific, and the Americas, providing the students with critical insight into the application of anthropological theory and the epistemological contribution of the discipline of Social Anthropology.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1017 Everyday Life (10 Credit Points)
Subject Details (p. 3495) Legacy Code: 100897
This subject introduces students to key themes and issues in the study of everyday life. It draws on different disciplinary areas - especially anthropology, sociology and cultural studies - and different theoretical and methodological perspectives to examine the ways cultural practices and meanings are used to shape human identities and societies in everyday life. It will focus on rituals and routines in the different spaces of everyday life, and the ways these contribute to the production of local worlds and the key cultural categories that give meaning to these worlds. It will include a focus on how we research everyday life.
Level: Undergraduate Level 1 subject
Equivalent Subjects: LGYB 0187 - Introduction to Cultural Studies
HUMN 1018 - Everyday Life (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1018 Everyday Life (WSTC) (10 Credit Points)
Subject Details (p. 3496) Legacy Code: 700135
In Term 3, 2022 this subject replaced by HUMN 1067 - Introduction to Culture and Society (WSTC). This subject introduces students to key themes and issues in the study of everyday life. It draws on different disciplinary areas - especially anthropology, sociology and cultural studies - and different theoretical and methodological perspectives to examine the ways cultural practices and meanings are used to shape human identities and societies in everyday life. It will focus on rituals and routines in the different spaces of everyday life and the ways these contribute to the production of local worlds and the key cultural categories that give meaning to these worlds. It will include a focus on how we research everyday life.
Level: Undergraduate Level 1 subject
Co-requisite(s): Students enrolled in the combined DiplomaBachelor courses listed below must pass all College Preparatory units listed in the course structure before progressing to the Year Two units
Equivalent Subjects: HUMN 1017 Everyday Life
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1026 Global Structures, Local Cultures (10 Credit Points)
Subject Details (p. 3497) Legacy Code: 102345
Globalisation has created a world of convergence and, at the same time, of division. Nations appear now to be less sovereign and more limited, as their political, economic and cultural systems become enmeshed within, and in some instances subordinate to, a world system. Similarly, certain cultural styles, from the choice of footwear to neo-liberal politics, have become part of a global culture. However, while we as citizens are becoming increasingly international, we as humans are looking for meaning in smaller, local, communities. Globalisation has not, it seems, created an homogenous world culture, but rather, a world in which citizens participate in, and identify with, both global and local cultures. This subject traces the emergence of a global society and culture and, through the use of case studies drawn from throughout the world, examines the links between global structures and local cultures.
Level: Undergraduate Level 1 subject
Equivalent Subjects: HUMN 1024 - Global Structures Local Cultures
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1028 Human Rights, Peace and Development (10 Credit Points)
Subject Details (p. 3497) Legacy Code: 101573
The Universal Declaration of Human Rights (UDHR) was written in response to the atrocities of World War II. Since its ratification, the UDHR has been a 'roadmap' for peace, forming the basis for international responses to conflicts, poverty and disadvantage. This subject examines and critiques the concept of human rights. It will be shown how differentials of political and economic power between countries and groups within countries are used to prioritise and preference different rights so as to justify selective humanitarian efforts in the initial phases of peace-making and the policy requirements for peace-building in human social, economic and cultural development.
Level: Undergraduate Level 1 subject
Equivalent Subjects: HUMN 1033 - Inequality and Human Rights HUMN 1029 - Human Rights Peace and Development (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1029 Human Rights, Peace and Development (WSTC) (10 Credit Points)
Subject Details (p. 3498) Legacy Code: 700158
The Universal Declaration of Human Rights (UDHR) was written in response to the atrocities of World War II. Since its ratification, the UDHR has been a "roadmap" for peace, forming the basis for international responses to conflicts, poverty and disadvantage. This subject examines and critiques the concept of human rights. It will be shown how differentials of political and economic power between countries and groups within countries are used to prioritise and preference different rights so as to justify selective humanitarian efforts in the initial phases of peace-making and the policy requirements for peace-building in human social, economic and cultural development.

Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1039 Modern European History and Politics (10 Credit Points)
Subject Details (p. 3499) Legacy Code: 102000
This subject introduces students to the major events and ideas that have shaped Europe in the late modern period. There is a strong focus on the dramatic events of the twentieth century following the demise of empire, and the subsequent rise of competing nationalisms and radical politics. The subject is concerned equally with the cultural and social contexts in which these events occurred. Students will study the diverse ways in which historians have approached the history of the twentieth century from the study of high politics to the focus on daily life. Methodological questions that will be addressed include the relative role of individual agency and of structural constraints in explaining historical change. The subject will encourage students to evaluate the period as a whole, drawing on scholarship which engages the modernity - democracy - violence nexus.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1041 People, Place and Social Difference (10 Credit Points)
Subject Details (p. 3500) Legacy Code: 102170
This subject focuses on the local experiences of cultural and socio-economic difference. This includes applied social science approaches to inequality, diversity, community, sense of place, and environmental sustainability in the urban setting. There is an emphasis upon spatial literacy for social scientists (fieldwork, mapping, data analysis and place description).
Level: Undergraduate Level 1 subject
Equivalent Subjects: LGYA 1337 - Geography of Urban and Regional Development HUMN 1045 - The Geographies of Social Difference (UWSC) HUMN 1044 - The Geographies of Social Difference HUMN 1042 - People Place and Social Difference (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1042 People, Place and Social Difference (WSTC) (10 Credit Points)
Subject Details (p. 3501) Legacy Code: 700159
This subject focuses on the local experiences of cultural and socio-economic difference. This includes applied social science approaches to inequality, diversity, community, sense of place, and environmental sustainability in the urban setting. There is an emphasis upon spatial literacy for social scientists (fieldwork, mapping, data analysis and place description).
Level: Undergraduate Level 1 subject

HUMN 1048 Understanding Islam and Muslim Societies (WSTC) (10 Credit Points)
Subject Details (p. 3502) Legacy Code: 700160
This is an introductory level subject that forms part of the Islamic Studies major. The subject will contribute to the development of sound disciplinary expertise in the academic study of Islam - historical and sociological. The subject will familiarise students with critical approaches to the study of Islam that touch on its origins and development, formation of traditions, social structures and institutions as well as familiarising students with issues regarding Islam in the Western context. The subject will assist students to develop cross-cultural awareness and interaction, communication and interpersonal skills, inventiveness and a capacity for independent thinking and analysis and problem solving skills.
Level: Undergraduate Level 1 subject
Equivalent Subjects: HUMN 1047 - Understanding Islam and Muslim Societies
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1049 Understanding Visual Culture (10 Credit Points)
Subject Details (p. 3503) Legacy Code: 101979
Visual media are a major feature of everyday life in contemporary society. The circulation of images shapes our sense of who we are individually and collectively; how we move through the world; and the possibilities that exist for enacting social change. This subject introduces students to the histories and theories of visual culture, from painting and photography, through cinema and television, to digital media, including social media and user-generated content. Students will gain practical skills in analyzing visual and audiovisual texts as well as a comprehensive understanding of the role of visual culture in the production and maintenance of power relations. These skills are crucial to engaging critically with contemporary culture.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1051 Who do you think you are? (Day Mode) (10 Credit Points)
Subject Details (p. 3504) Legacy Code: 101762
This subject is available to all Undergraduate students who have open electives. Who do you think you are? will provide students practice in the analysis of historical documents, family narratives, autobiography, political and social issues around a project that will give a context for their own personal story. Students will develop skills in oral history work, locating and retrieving archival documents and compiling their own 'family tree'. Students will also develop skills in practising speaking and writing genre appropriate to their own family history. An introduction to the theory of identity and identification will enable students to appreciate the complexities of becoming.
Level: Undergraduate Level 1 subject
Co-requisite(s): HUMN 1013
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1052 Australian Politics and Active Citizenship (10 Credit Points)
Subject Details (p. 3504) Legacy Code: 102738
We live in an increasingly interconnected world where international trade, foreign policy, digital communication and flows of migrants and cultures across borders appear to undermine the importance of national communities. Despite this, everyday life is still profoundly influenced by the decisions which national governments make and the powers they exercise. This subject introduces Australian political institutions, processes and contemporary issues. It traces democracy beyond Parliamentary representation to encompass active citizenship, through which public opinion is formed and expressed. Students will identify key political issues in contemporary Australia, understand how political institutions respond, and develop the skills to contribute to public debates.
Level: Undergraduate Level 1 subject
Equivalent Subjects: HUMN 1005 - Australia and the World HUMN 1006 - Australia and the World (WSTC) HUMN 1055 - Australian Politics and Active Citizenship (WSTC)

HUMN 1053 Diversity, Language and Culture (10 Credit Points)
Subject Details (p. 3505) Legacy Code: 102736
The purpose of this subject is to equip students with skills to understand and navigate a culturally and linguistically diverse society, including that of Greater Western Sydney. Students will gain an historically informed, critical understanding of the meaning of culture, the impact of colonisation, indigenous Australian cultures, and of approaches to diversity, multilingualism and multiculturalism. They will explore the value of their existing and emerging skills in multilingualism and cross-cultural communication as tools to navigate a rapidly changing global environment. Students will practise their intercultural communication skills in a team setting through interactive learning activities and group work.
Level: Undergraduate Level 1 subject

HUMN 1054 When Worlds Collide: European Empires and the World, c.1600-1950 (10 Credit Points)
Subject Details (p. 3506) Legacy Code: 102768
This subject provides an historical investigation of the interaction between European empires - specifically the British and the Dutch - and the Americas and Asia-Pacific region, from 1600-1950. It examines the combination of domination and cultural negotiation between colonisers and colonised, which included, among other processes, the trans-Atlantic slave trade. It examines both how peoples were managed as imperial subjects, and how they responded to this management. The subject explores both the effect of imperial rule on the colonised, and of empire upon the colonisers. It draws upon historical literature from a variety of sources and perspectives, and from European and Asian history.
Level: Undergraduate Level 1 subject
Equivalent Subjects: HUMN 1022 - Global History CULT 1014 - The First Globalisation HUMN 1023 - Global History
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1055 Australian Politics and Active Citizenship (WSTC) (10 Credit Points)
Subject Details (p. 3507) Legacy Code: 700294
We live in an increasingly interconnected world where international trade, digital communication and flows of migrants and cultures across borders appear to undermine the importance of national communities. Despite this, everyday life is still profoundly influenced by the decisions which national governments make and the powers they exercise. This subject introduces Australian political institutions, processes and contemporary issues. It traces democracy beyond Parliamentary representation to encompass active citizenship, through which public opinion is formed and expressed. Students will identify key political issues in contemporary Australia, understand how political institutions respond, and develop the skills to contribute to public debates.

HUMN 1057 Doing Sociology (10 Credit Points)
Subject Details (p. 3509) Legacy Code: 102787
With a focus on what it is that sociologists 'do' and why, this subject considers how sociology contributes to a better understanding of everyday life. That is, to the routine engagements, interactions and practices that make up our individual and social worlds. Where we live, what we consume, how we feel and the meanings we give our work, leisure, environments and relationships will all be analysed with reference to academic and popular content. Serving as an introduction to the discipline of sociology and its various sub-fields and methods, 'Doing Sociology' places emphasis on how sociological knowledge can be applied. In this way, the subject provides students with the opportunity to consider what they might do with sociology; how a sociological perspective might help them better understand the social world and contribute in a meaningful way to resolving contemporary social issues.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1058 Indigenous Landscapes (10 Credit Points)
Subject Details (p. 3510) Legacy Code: 102805
Indigenous Landscapes aims to explore 'traditional' Indigenous Australian ways of knowing landscape in contemporary, meaningful, and relevant ways. Specifically, the subject acknowledges and values pre-colonial Australian history and land-use practices. Content includes 'traditional' land management practices; cold-burning, protected area management, sustainable land use; cultural heritage and heritage landscapes, Sovereign land rights. This subject also aims to equip students with cultural competency in order to address issues of dispossession and disadvantage brought about by the historical destruction and disruption of ecological integrity.

HUMN 1060 Introduction to Indigenous Australia: Peoples, Places and Philosophies (10 Credit Points)
Subject Details (p. 3512) Legacy Code: 102815
This subject introduces students to the rich diversity: past, present and future of Aboriginal and Torres Strait Islanders in Australia with emphasis placed on the importance of identity, diversity, representation and resilience. You will engage directly with Indigenous sources and learn to critically analyse content from Indigenous Standpoints. Presenting as a challenging and thought-provoking experience of Aboriginal and Torres Strait Islander peoples, places and philosophies, this subject provides a solid theoretical foundation of Indigenous perspectives for the knowledges and professional practices in your chosen field.
Level: Undergraduate Level 1 subject

HUMN 1061 Islam: Past, Present and Future (10 Credit Points)
Subject Details (p. 3513) Legacy Code: 102823
This is an introductory level subject that forms part of the Islamic Studies major. The subject will contribute to the development of sound disciplinary expertise in the academic study of Islam - historical, anthropological, and sociological. The subject will familiarise students with critical approaches to the study of Islam that touch on its origins and development, formation of traditions, social structures and institutions, and with issues regarding Islam in the Western context. The subject will aid students in developing cross-cultural awareness and interpersonal communication skills.
Level: Undergraduate Level 1 subject
Equivalent Subjects: HUMN 1047 - Understanding Islam and Muslim Societies HUMN 1048 - Understanding Islam and Muslim Societies (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1062 Introduction to Indigenous Australia: Peoples, Places and Philosophies (WSTC) (10 Credit Points)
Subject Details (p. 3514) Legacy Code: 700320
This subject introduces students to the rich diversity: past, present and future of Aboriginal and Torres Strait Islanders in Australia with emphasis placed on the importance of identity, diversity, representation and resilience. You will engage directly with Indigenous sources and learn to critically analyse content from Indigenous Standpoints. Presenting as a challenging and thought-provoking experience of Aboriginal and Torres Strait Islander peoples, places and philosophies, this subject provides a solid theoretical foundation of Indigenous perspectives for the knowledges and professional practices in your chosen field.

HUMN 1063 Critical and Systems Thinking (10 Credit Points)
Subject Details (p. 3514) Legacy Code: 800242
This subject is designed for high-achieving students enrolled in Bachelor of Creative Leadership or Advanced degrees. It enables students to develop high-level critical thinking skills that are essential for life-long career success. Students engage with key theoretical frameworks and concepts in critical and systems thinking using interdisciplinary approaches to enable them to think and act outside the silos of their disciplines. Throughout the subject, students are challenged to consider how they think as opposed to how they think they think (biases and heuristics). A clear understanding of the necessity of systems thinking approaches in leadership paradigms equips students to be the leaders of tomorrow.
Level: Undergraduate Level 1 subject
Equivalent Subjects: HUMN 1036 - Introduction to Critical Thinking
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1064 Digital Identities (10 Credit Points)
Subject Details (p. 3515)
This subject examines identity in a digitalising society. It asks questions such as: who are we becoming with digital technologies? How are digital experiences shaped by long standing social inequalities? Students learn about identities as the flows of data across formalised systems of governance and commerce, and as the ways we make ourselves in interactions with others in social media spaces. Pressing issues are explored such as online harm, privacy, surveillance, and human rights. Students reflect upon personal and professional digital identities, and reimagine digital technologies and social media for new possibilities of identity, equity and justice.
Level: Undergraduate Level 1 subject

HUMN 1066 Introduction to Culture and Society (10 Credit Points)
Subject Details (p. 3517) Legacy Code: 102913
Introduction to Culture and Society examines the ways culture - as both representation and practice - shapes individual and collective identities. It will focus on the rituals and routines of everyday life, and their connection to our wider social relationships. The subject will also explore inequality both in Australia and globally, the social structures that generate this inequality and the cultural processes by which we mark status and social distinction.
Level: Undergraduate Level 1 subject

HUMN 1068 Intersectionality: Identity, Diversity and Difference (WSTC) (10 Credit Points)
Subject Details (p. 3519)
This subject explores various relevant theories, narratives and concepts that underpin social scientific scholarship. Students will gain critical insight into ideas such as identity, culture, structures of inequality and difference (e.g. such as gender, race, class, sexuality), and their intersections. With a focus on contemporary social life, the subject provides opportunity for students to consider current social issues and various macro and micro forces impacting social change on a social and spatial level. By exploring a range of key theories and concepts in the social sciences, students will gain knowledge and skills in how to analyse our social world – the world in which they will be working in the future as professionals – and thereby be in a position to more fully comprehend the world around them, its issues, problems, inequalities and injustices that they will be working with. The subject will prepare students with a range of skills relevant to scholarship in the social sciences, such as critical reading, sociological theorisation and analysis, as well as statistical and spatial literacy.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1069 Human Rights and Community Action (WSTC) (10 Credit Points)
Subject Details (p. 3520)
In this subject, students engage with the concepts and philosophy of human rights and explore how these ideas influence the Australian experience within legal, governmental and social service institutions. Students will be challenged to consider if vulnerable groups have their human rights promoted or undermined by current practice and identify a human rights issue to address through a community action plan. Students will gain subject relevant skills linking theory to practice in the process of critical reflection and exercising statistical literacy.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 1070 Indigenous Australia: People, Places and Philosophies (WSTC) (10 Credit Points)
Subject Details (p. 3521)
This subject introduces students to the rich diversity: past, present and future of Aboriginal and Torres Strait Islanders in Australia with emphasis placed on the importance of identity, diversity, representation and resilience. You will engage directly with Indigenous sources and learn to critically analyse content from Indigenous standpoints. Presenting as a challenging and thought-provoking experience of Aboriginal and Torres Strait Islander peoples, places and philosophies, this subject provides a solid theoretical foundation of Indigenous perspectives essential for the knowledge and professional practices in your chosen field.

HUMN 1071 Images of Childhood (10 Credit Points)
Subject Details (p. 3521)
This subject will explore how the meanings we place on children vary across cultures and communities and over time. Students will have the opportunity to examine implicit and explicit images of childhood and to consider how these images inform how we think and engage with children in our everyday lives; the role they play in the institutions that impact children's lives and in the disciplines that study children. Images will be drawn from a range of contexts and types of media. Students will also have the opportunity create their own representations of children.

HUMN 1072 The Human Experience: Fundamentals of Arts and Humanities (WSTC) (10 Credit Points)
Subject Details (p. 3522)
In this subject, you will explore core concepts and approaches of major Arts disciplines: sociology, philosophy, history, and literature, applying critical and creative thinking. You will also develop skills in reading and textual analysis to understand the human experience better. This subject will introduce you to the basic principles of reader-response theory and general strategies to improve reading resilience. Textual analysis skills are built through engagement with a diverse range of texts on a variety of themes, which are relevant to the contemporary world. You will be able to read, discuss, analyse, and communicate about texts in ways appropriate to academic levels of study in Arts and Humanities.
Level: Undergraduate Level 1 subject

HUMN 1073 Understanding Contemporary Australia (WSTC) (10 Credit Points)
Subject Details (p. 3522)
Contemporary Australian society is dynamic and diverse, influenced by an increasingly interconnected world where international trade, foreign policy, digital communication and flows of migrants and cultures across borders appear to undermine the importance of national communities and identities. Despite this, everyday life is still profoundly influenced by the decisions which national governments make and the powers they exercise. This subject explores Australia's history, peoples, liberal democratic tradition and contemporary challenges and issues we face as members of the national and global community. You will identify and explore established narratives, connect past developments with present issues and examine specific events within the broader context of world history. You will also develop the skills to further understand broader influences on contemporary Australia and your personal lived experiences.

HUMN 2011 Ancient Western Culture: Periclean Athens (10 Credit Points)
Subject Details (p. 3524) Legacy Code: 100244
The Athens of Pericles is studied from three perspectives: philosophy, politics, and history. The use of reason and rhetoric is examined through the works of some pre-Socratics, Sophists and Socrates. The focus on philosophy and politics will be placed in the context of the history of the city-state and democratic citizenship.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2012 Anthropologies of the Everyday (10 Credit Points)
Subject Details (p. 3524) Legacy Code: 102347
In 2021, this subject replaced by 102844 - Society, Culture and Human Diversity. Although people's lives vary significantly depending on ethnographic context, it is also through everyday practices and rituals that the universality of the human condition becomes most obvious. Close studies of how people create a living and make meaning of their everyday experiences in various contexts can thus provide valuable lessons about cultural difference as well as about what it means to be human, and is consequently a core aspect of anthropological inquiry. In this subject students engage with this overarching theme via ethnographic case studies as well as through inquiries into their own everyday lives.
Level: Undergraduate Level 2 subject
Pre-requisite(s): HUMN 1016
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2014 Civil Society in Contemporary China (10 Credit Points)
Subject Details (p. 3525) Legacy Code: 101968
This subject is intended to give students an understanding of the social development of the People's Republic of China (PRC). It will engage with some of the key concepts that scholars have utilised to understand social changes. In this vein, the subject will consider China's socio-political transformation from a civil society perspective. It will consider a range of stakeholders - from non-governmental organisations to trade associations - and examine the events that have contributed to the development of China's civil society.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2015 Community and Social Action (10 Credit Points)
Subject Details (p. 3526) Legacy Code: 101595
Dismantling oppressive and complex forms of disadvantage and inequality are social justice and human rights issues demanding collective action. Activism is not solely about disruption and disobedience. This subject focuses on local, national and global social movements, the use of digital technologies and differing forms of activism using theories of social change. We identify and reflect on diverse perspectives, challenging normative constructs between individual and structural explanations of inequality and explore tactics and strategies adopted by activists, from the early 20th century through to contemporary campaigns. Students are enabled to take part in meaningful ways as active change agents through design, planning and participation in a social action campaign, thereby building knowledge and skills in community engagement, relationship building and the strategies and methods involved in bringing about positive social change.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYA 1286 - Education for Social Action
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2017 Complex Emergencies and International Guidelines (10 Credit Points)
Subject Details (p. 3526) Legacy Code: 102367
In 2023, this subject replaced by HUMN 3116 - Complex Emergencies and International Guidelines. Over the last five decades, the world has experienced a significant number of disasters, which have occurred in many different forms including natural (e.g. Tsunami or drought) and human-induced (e.g. wars or ethnic conflicts), leading to an unplanned exponential increase in the number of international non-government organisations. This subject examines the causes and consequences of disasters and the application of international guidelines governing humanitarian responses. It provides an outline of theoretical approaches to the understanding of the political aspects of emergencies and introduces real-life case studies that aim to engage students in critical thinking and improve their knowledge of the core humanitarian standard on quality and accountability; the humanitarian charter and minimum standards; and the challenges related to interagency coordination in emergencies
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2018 Cultural and Social Geographies (10 Credit Points)
Subject Details (p. 3527) Legacy Code: 101590
Examines the nexus between society, culture and place. Considers contemporary social and cultural planning issues including: local community relations, place management, place redefinitions, ethnic concentration, cultural precincts, and the spatial politics of gender and sexuality. The roles of cultural products in carrying spatial information and reinforcing identity are examined. Introduction to cultural and social geography, and developments in cognate fields of cultural studies and anthropology. Key theories of identity. Case studies range across ethnicity, religion, age, gender, sexuality, class and nationalism. The analysis and assessment advances an appreciation of social and cultural difference and social justice.
Level: Undergraduate Level 2 subject
Equivalent Subjects: HUMN 2019 - Cultural and Social Geographies (UWSC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2020 Digital Humanities and Research Methods (UG) (10 Credit Points)
Subject Details (p. 3528) Legacy Code: 102425
This subject investigates the methodological possibilities of digital technologies for interdisciplinary humanities and social sciences research. It covers several major digital research methods, exploring previous applications and examining their orientations and implications. Digital research methods and applications may include digitisation, online curation, visualisation, network analysis, geographical information systems, data mining and simulation. In the context of these, the subject will probe histories of technology and knowledge production, the evolution of digital texts and practices, and issues in contemporary culture such as digital design, gamification, virtual identity, and digital rights.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2021 Doing Business in China (10 Credit Points)
Subject Details (p. 3528) Legacy Code: 101857
This subject is primarily aimed at acquainting undergraduate students with the academic theory and debates surrounding China's business etiquette and its globalizing economy. Drawing on a wide range of English-language studies, subject lectures will cover in broad strokes the historic background of the economic reforms carried out in China over the last three decades, as well as their societal implications. They will discuss, for example, the evolution of corporate law and property rights in the PRC since 1949, and the underlying differences and interdependence between the Chinese and Australian economies.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2022 Emergency Field Operations: Supply Management and Logistics (10 Credit Points)
Subject Details (p. 3529) Legacy Code: 102368
In 2023, this subject replaced by HUMN 3119 - Emergency Field Operations Supply Management and Logistics. This subject will equip students with the required skills to assess organisational capacity to respond to disasters and other complex humanitarian emergencies. The subject will cover logistical frameworks and tools for planning, the sustainable deployment of goods and services, and monitoring and evaluating the effectiveness of local and global supply chains. It will discuss the challenges, ethical, and political dimensions of supply chains and contingency plans in emergency and disaster response contexts.
Level: Undergraduate Level 2 subject
Co-requisite(s): HUMN 2017
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2024 Ethnographies of Southeast Asia and the Pacific (10 Credit Points)
Subject Details (p. 3529) Legacy Code: 102346
This subject will introduce students to ethnographic field study through a close examination of the anthropology of two regions with which Australia is geographically and politically aligned; the Pacific Islands and South-east Asia. Drawing upon classic and contemporary ethnography the subject will provide opportunities for comparative and trans-historical studies of how cultures in these regions have been constructed and changed in relation to larger global dynamics. It will also provide an insight into the ways in which anthropological theory is developed in the context of attempts to explain and interpret cultural difference. Key topics of study, explored through case studies, will include the colonial experience, traditions and modernities, nations and nationalism, transnationalism, religion, social conflict, and material cultures. The subject will include ethnographic films.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2025 Families and Intimate Life (10 Credit Points)
Subject Details (p. 3530) Legacy Code: 102143
This subject will critically examine sociological perspectives on families and intimate life, building on the approaches and theories introduced in the first year of Sociology studies. The familiarity of families and intimate relationships will be thrown into question. Students will be asked to examine their beliefs, unpack myths of the 'naturalness' of family, and question the 'personal'. Families and intimate relationships will be viewed as part of the wider social structure, their constitutions shaped by culture, economies, social policy, technology and globalisation. The subject will demonstrate the historical and cultural specificity of the nuclear family and its role in the creation and reproduction of social inequality and social difference.
Level: Undergraduate Level 2 subject
Equivalent Subjects: HUMN 2052 - Sociology of the Family HUMN 2016 - Comparative Studies of Families and Kinship
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2027 Health, Illness and Biomedicine: A Sociological Perspective (10 Credit Points)
Subject Details (p. 3531) Legacy Code: 101610
The Sociology of Medicine and Health Care starts from the basic premise that illness and health are social as well as biological processes. Traditional areas of the discipline are explored and in each case their applicability to public health is stressed. At the same time, an important goal is to suggest how that field is being redefined and reinvigorated by social and cultural studies of science and technology. The theoretical perspectives and substantive issues raised and developed to study them are critically examined. The provision and organisation of health care are examined with emphasis on the social and political context in which public health is pursued and ill health treated within Australia.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYA 1357 Sociology of Medicine and Health Care
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2028 Identity and Belonging (10 Credit Points)
Subject Details (p. 3532) Legacy Code: 101612
Identity and belonging are foundational concepts in sociology. This subject commences with an overview of the ways in which these concepts are understood in the social sciences and how these understandings have been impacted more recently by processes of globalisation. Through engagement with films, documentaries and academic texts the subject explores different modes and sites of identity and belonging as they circulate on both local and global scales. Specifically, we will examine topics like gender and sexuality, home and neighbourhood, the nation state and nationality, social class, consumption, work and leisure, ethnicity, youth cultures and new media. The subject equips students with the concepts and theories necessary for an understanding of social continuity and social change and encourages them to reflect on their own identities and social and cultural positionings.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2030 Islam In the Modern World (WSTC) (10 Credit Points)
Subject Details (p. 3533) Legacy Code: 700162
This subject introduces students to Islam and its adherents within contemporary global context. It looks at key Muslim intellectuals from the 19th Century until the present and examines their attempts to come to terms with modernity as a Western project, while addressing critical issues facing Islam. Areas for consideration include: renewal and reform; the impact of colonialism and globalisation on Muslim discourse; independent judgement (ijtihad) versus emulation (taqlid); and issues associated with civil society. Students will also explore the challenge of shaping a Muslim identity in the modern world - in the context of key Muslim institutions and social movements.
Level: Undergraduate Level 2 subject
Equivalent Subjects: HUMN 3055 - Islam in the Modern World
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2031 Islam in the Modern World (10 Credit Points)
Subject Details (p. 3534) Legacy Code: 102294
This subject introduces students to Islam and its adherents within contemporary global context. It looks at key Muslim intellectuals from the 19th Century till the present and examines their attempts to come to terms with modernity as a Western project while addressing critical issues facing Islam. Areas for consideration include: renewal and reform; the impact of colonialism and globalisation on Muslim discourse; independent judgment (ijtihad) versus emulation (taqlid); and issues associated with civil society. Students will also explore the challenge of shaping a Muslim identity in the modern world in the context of key Muslim institutions and social movements.

HUMN 2032 Issues in World Development: Rich World, Poor World (10 Credit Points)
Subject Details (p. 3534) Legacy Code: 101331
This subject introduces students to the field of international development, where the divide between the rich world and poor world takes a centre stage. While development has created prosperity around the world, it is not without discontents. Social and economic inequality at the global level is a real problem and has been increasing. The 'developed' and 'developing' world paradigm will be critically examined. Students will be equipped with theories and practicum examining development, underdevelopment and their related issues within a contemporary political, economic and social framework. Students will also have exposure to current global development debates such as poverty, global inequality, sustainable development, democracy and security.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYA 7635 - Issues in Third World Development HUMN - 2033 Issues in World Development Rich World Poor World (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2033 Issues in World Development: Rich World, Poor World (WSTC) (10 Credit Points)
Subject Details (p. 3535) Legacy Code: 700267
This subject introduces students to the field of international development, where the divide between the rich world and poor world takes a centre stage. While development has created prosperity around the world, it is not without discontents. Social and economic inequality at the global level is a real problem and has been increasing. The 'developed' and 'developing' world paradigm will be critically examined. Students will be equipped with theories and case studies examining development, underdevelopment and their related issues within a contemporary political, economic and social framework. Students will also have exposure to current global development debates such as poverty, global inequality, sustainable development, democracy and security.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYA 7635 - Issues in Third World Development HUMN 2032 - Issues in World Development Rich World Poor World
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2034 Keeping the Past (10 Credit Points)
Subject Details (p. 3536) Legacy Code: 100001
Legislation requires the preservation of natural, built and movable heritage, but choices about what to keep often produce controversy and reveal starkly varying opinions about what is historic. From the choice of people commemorated in statues to modest buildings on the site of new developments, local communities and central governments are divided about whose past is protected and praised. The historian's investigation of places and objects is an important part of the formal assessment process and may be part of controversial debates. Parramatta has a rich selection of heritage places. How does heritage fit in a modern CBD? Site visits around the city will identify archaeological and architectural heritage to promote discussions, museums will showcase objects from the past, documents preserved in archives will offer insights and historical research techniques will help to answer the questions "What should be kept from the past?" and "Why should it be kept?"
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYA 9196 - Keeping the Past
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2036 Mangamai'bangawarra: Indigenous Science (10 Credit Points)
Subject Details (p. 3537) Legacy Code: 300959
This subject explores aspects of Aboriginal science and medical science in the treatment and prevention of illness. The subject has a particular focus on the knowledge of the local D'harawal People. The culture and history of Indigenous Australians is introduced to provide a contextual backdrop to the study of Indigenous medical remedies from eastern Australia, the deserts, and the tropics. To complement this study, Indigenous perspectives on the seasons, weather and land management will be studied.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2037 Peace-Making and Peace-Building (10 Credit Points)
Subject Details (p. 3537) Legacy Code: 101575
The concept of Peace is more than just an absence or cessation of conflict, but also the achievement of social justice and equitable standards of living. Humanitarian work/interventions in response to war and natural and human-made disasters that result in refugee crises are referred to as peace-making whilst the implementation of sustainable Community Development programs aimed at achieving the empowerment and improved standards of living for vulnerable groups is referred to as peace-building. This subject examines and critiques some of the strategies of peace-making and peace-building that have been adopted both within Australia and internationally.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2038 Pigments of the Imagination (10 Credit Points)
Subject Details (p. 3538) Legacy Code: 101752
This subject is available to all Undergraduate students who have open electives. Pigments of the Imagination challenges the accepted view that there is such a thing as 'race' based on skin colour and that identity is based on it. This subject will encourage students to consider their own definitions of race and explore the view that it is an imaginary concept. Students will examine the various ways race as an imaginary concept permeates our education practices and cultural representations influencing the construction of racially classified positions for Indigenous Australians as well as all Australians. Students will be encouraged, by critically analysing a range of cultural texts to re-imagine Indigenous and Non-Indigenous relations through flipped mode of delivery supported by face to face tutorials.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2039 Political Terror (10 Credit Points)
Subject Details (p. 3539) Legacy Code: 101797
Since the terrorist attacks of 11 September, 2001, threats of terrorism have been entrenched in both headlines and the collective psyche. Across the globe, terrorism, anti-terrorism and the politics of fear are influential factors in the formulation of domestic and foreign policies. The current wave of terror and counter-terror raises important questions. What do we mean by terror? Is the war on terror really a war like no other? Is the current terrorist threat unprecedented? This subject will examine historical precedents and theories of terrorism.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2040 Politics of Sex and Gender (10 Credit Points)
Subject Details (p. 3539) Legacy Code: 100882
This subject provides an introduction to the study of the contemporary politics of sex and gender. Students study key concepts and learn to apply these concepts in the analysis of current issues. Concepts covered include the meanings of sex, gender and sexuality; biology and social constructionism; gendered bodies; doing gender; equality and difference. The concept of intersectionality - how gender intersects in complex relationships of power with other differences such as ethnicity, sexuality, dis/ability and class - is central to this area of study. The subject explores the meaning and potential for social change for a more equitable society and the obstacles to that. Strategies examined range from the use of targets and quotas, to social and cultural activism. Students have the opportunity to explore areas of personal and scholarly interest.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYB 0160 - Sex Gender and Social Relations
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2044 Representing Everyday Life in Literary and Visual Cultures (10 Credit Points)
Subject Details (p. 3540) Legacy Code: 101917
This subject explores how the realm of everyday life has been imagined and represented in a range of literary traditions and visual and media cultures. It examines what we understand by this concept, realist and experimental approaches to its representation, and how everyday life is shaped by various historical, social and cultural factors (e.g. technology, gender, class, war). With a focus on modern and contemporary texts and contexts, students will study primary works in relation to key theories of the everyday. Possible topics include: Victorian realism, Surrealism, stream of consciousness narration, social documentary photography, social realist cinema, postmodern narrative, blogs.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2046 Researching Culture (10 Credit Points)
Subject Details (p. 3541) Legacy Code: 101906
This subject introduces students to the diverse field of cultural research. It outlines and explains qualitative research methods and methodologies used by cultural researchers. Tutorials and assessment tasks involve 'hands-on' activities designed to familiarise students with the research process and research practices that explore taken-for-granted aspects of everyday life such as interviews, focus groups and observation based research; as well as sensory research, the use of diary methods, and the critically important ethical dimensions of social and cultural research. Through completion of this subject, students will gain critical literacies in creating and analysing a range of qualitative data.
Level: Undergraduate Level 2 subject
Pre-requisite(s): HUMN 1066 Introduction to Culture and Society OR HUMN 1049 Understanding Visual Culture
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2048 Revaluing Indigenous Economics (Day Mode) (10 Credit Points)
Subject Details (p. 3542) Legacy Code: 101753
Revaluing Indigenous Economics will examine Australia's Indigenous economy and its dynamics. It will challenge students to reflect on the significant contribution Indigenous Australians have made and continue to make to our growing economy. It will also challenge students to rethink the politics of the welfare economy as it relates to Indigenous Australians. Students will be introduced to a number of enterprise development case studies for example, The Arts, Mining and Land Development, Tourism and the Environment, Sports and Small Business.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2050 Social Research Methods (Block Mode) (10 Credit Points)
Subject Details (p. 3543) Legacy Code: 101767
In this subject students are introduced to the research process and different approaches to research. Key research themes and concepts are examined, and students learn methods and techniques for gathering, analysing, and interpreting research data. The ethical and practical implications of research and the use of research results are discussed. Indigenous research issues are addressed, particularly for research with Aboriginal and Torres Strait Islander participants and communities.
Level: Undergraduate Level 2 subject
Equivalent Subjects: HUMN 2049 - Social Research Methods LGYA 7650 - Research and the Human Services (AREPMETRO)
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2053 The Economics of Cities and Regions (10 Credit Points)
Subject Details (p. 3543) Legacy Code: 101591
'Economics of cities and regions' introduces the major political-economic issues facing cities and regions. Class discussions investigate how political-economic forces (such as globalisation, structural change etc) shape the development of cities and regions. Class activities enable students to apply economic principles to urban and regional planning and policy decisions, and teach students to analyse the social and distributional impacts of policy and planning decisions.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYA 1283 - Urban Development Resource Allocation
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2056 The Racial State (10 Credit Points)
Subject Details (p. 3544) Legacy Code: 101990
Racism is often thought of as both primordial and pathological. Racist states, such as Apartheid South Africa or Nazi Germany, are usually considered to be exceptions rather than the rule and mainly a thing of the past. This subject examines the ways in which, despite the challenge to racism, race remains a fundamental organising idea in modern western states, one that has a direct affect on our everyday realities. We will examine how race is reproduced through politics, culture, socialisation and economic structures. We will consider the effects this has on individual and societal lived experience in complex post-immigration, postcolonial societies.
Level: Undergraduate Level 2 subject
Equivalent Subjects: HUMN 2063 - New Ethnicities Old Racisms
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2057 Tourism in Society (10 Credit Points)
Subject Details (p. 3545) Legacy Code: 101598
In 2023 this subject replaced by TOUR 2004 - Tourism and Festivals in Society. In this subject students approach tourism as a cultural and social phenomenon and tourism industries, tourist behaviour, the tourist experience and tourism impacts are examined through a socio-cultural lens. Considering tourism as an agent of social change, the subject explores the interplay between tourism, mobility and globalisation, tourism and development, and tourism and world events. The subject will also unpack some of the common motivations for leisure travel, explore the role of tourism in everyday life, and examine the interconnections between the media, consumer culture, visual culture and the tourist experience.
Level: Undergraduate Level 2 subject
Equivalent Subjects: HUMN 1046 - Tourism in Society (UWSC) LGYA 1264 - Tourism in Contemporary Society LGYB 8188 - Tourism Issues and Change
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2058 Urban Life/Urban Culture (10 Credit Points)
Subject Details (p. 3545) Legacy Code: 100291
Big cities can be frantic, difficult, polluted and often dangerous places in which to live. Yet cities also contain possibilities for social and cultural stimulation not available elsewhere. This subject traces the origins and development of modern cities in all of their complexity. It looks at how industrial cities emerged in Europe and Australia, and at the threat that uncontrolled urban growth posed to social order. We examine the conditions of urban life that promote alienation and anonymity, and how people overcome social fragmentation. There is discussion of modern cities - from those that sprawl, like Sydney, to the relatively compact and dense centres of Europe, the north-eastern United States and Asia. We look at the gendered nature of public space, and how class and ethnic tensions are played out in cities. Students read a range of texts on urban culture and society. These include classic works by writers like Friedrich Engels, George Simmel and Walter Benjamin, to the contemporary work of David Harvey, Richard Sennet and Mike Davis.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2061 Women with Muslim Identity (10 Credit Points)
Subject Details (p. 3546) Legacy Code: 101879
An exploration of perceptions of Muslim women and of the meaning and significance of Muslim identity for women today. Students will analyse ways in which Muslim women perceive themselves and are perceived by others in the context of contemporary Islamic revivalism, focussing on differences and relationships among various outsider's and insider's perceptions. A central focus will be the resurgence of the veil in the context of contemporary Islamic revivalism; Students will explore the meanings of veiling in the context of discussions and debates on the role of women, equality and freedom, cultural diversity, religious values and secularity.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2062 Youth Cultures and Moral Panics (10 Credit Points)
Subject Details (p. 3547) Legacy Code: 100298
Young people have long been the focus of social fears. Public figures regularly express concern about the disorder created by unruly youths, or the effects of change on young people. This is the case in relation to popular music, 'youth gangs', new technologies and other areas. This subject will consider how young people became defined as a problem by politicians, policy, the media and others. Resulting 'moral panics' represent social anxieties around economic, social and technological change, producing calls for 'solutions' which often entail repressive laws or policing. Students will examine a range of case studies from Australia and elsewhere.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2064 Responses to Disaster: School of Social Sciences Winter School (10 Credit Points)
Subject Details (p. 3548) Legacy Code: 102790
This elective subject, focused on "responses to disaster", is applicable to all undergraduate degree programs with an elective component in the School of Social Sciences. Students will undertake a 14-day international field trip where they will be immersed in a rich intercultural learning and student-centred environment. Students are given the opportunity to apply their discipline specific skills and knowledge in understanding how natural disasters impact various facets of a local community, and how these are managed in a real-world setting. Students must have a medical clearance letter and any requisite vaccinations. They should provide this letter to the Subject Coordinator prior to enrolment and departure.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2065 Self and Society (10 Credit Points)
Subject Details (p. 3548) Legacy Code: 102788
This core theory subject for sociology majors introduces students to traditional and contemporary debates in social thought and provides tools for sociological analysis. The subject outlines the development of sociological thought in the context of changing social realities and relations between the individual and society, with a particular focus on the formation of the Self. A number of theorists and theoretical areas are addressed, spanning over 150 years of evolving sociological analysis. This enables students to better grasp the relation between theory and application, the diversity of sociological analysis, as well as providing the capacity to think across a number of different sociological schools of thought.
Level: Undergraduate Level 2 subject
Incompatible Subjects: HUMN 3071 - Self and Society
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2066 Investigating and Communicating Social Problems (10 Credit Points)
Subject Details (p. 3549) Legacy Code: 102816
This subject builds interdisciplinary social science skills to investigate and engage with social challenges that impact contemporary society. Students are introduced to the methods and principles of research for community consultation, strengths assessment and capacity building. Data literacy skills will be developed, with a focus on understanding and creating qualitative and quantitative data and how they are used within contemporary society. Students will be asked to investigate and intervene in social challenges using ethical and evidence-based analyses. The subject is aimed to suit students who are pursuing either a research or occupational trajectory and assessments are tailored to discipline-appropriate learning.
Level: Undergraduate Level 2 subject
Equivalent Subjects: HUMN 2049 - Social Research Methods
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2067 History of the Ancient World (10 Credit Points)
Subject Details (p. 3550) Legacy Code: 102814
Students explore the rise and fall of major civilizations in the ancient world. The subject surveys empires from Europe to East Asia. The subject surveys the transition from hunter gatherers to the age of agriculture and the rise of city states, and vast empires with far-flung trading networks. It also looks at the impact of ancient pandemics, technology and alcohol, mythology, religion and philosophical ideas. The subject allows students to explore how ideas of nature and spirituality defined imperial power centres and how these empires in turn drove trade and created vast cultural zones that still impact the world today. Students will read and respond to the voices of the past and forge their own interpretation of the broad outline of the ancient world.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2068 Cultures of Southeast Asia and Oceania (10 Credit Points)
Subject Details (p. 3551) Legacy Code: 102843
This subject will introduce students to ethnographic field study through a close examination of two regions with which Australia is geographically and politically aligned; Oceania (the Pacific Islands) and South-east Asia. Drawing upon classic and contemporary ethnography the subject will provide opportunities for comparative and trans-historical studies of how cultures in these regions have been constructed and changed in relation to larger global dynamics. The subject will also provide an insight into the ways in which social theory is developed in the context of attempts to explain and interpret cultural difference. Key topics of study, explored through case studies, will include the colonial experience, tradition and modernities, nations and nationalism, transnationalism, religion, social conflict, and material cultures. The subject will include a close study of visual and virtual research methodologies.
Level: Undergraduate Level 2 subject
Equivalent Subjects: HUMN 2024 - Ethnographies of Southeast Asia and the Pacific
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2069 Society, Culture and Human Diversity (10 Credit Points)
Subject Details (p. 3552) Legacy Code: 102844
In this subject students will conduct comparative studies of how people create a living and make meaning of their everyday experiences in various contemporary contexts. By using cultural diversity as an analytical lens, students will engage with the broader questions about what it means to be human, how cultures change and adapt and how studies of human diversity can provide answers to many of the challenges of the future. Through case studies, critical analyses and self-reflection students will also examine how key subject themes such as cultural competence, ethnographic inquiry and comparativism are applied in anthropology and other key employment areas for social science and humanities graduates.
Level: Undergraduate Level 2 subject
Equivalent Subjects: HUMN 2012 - Anthropologies of the Everyday
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2070 First Peoples and Criminal Justice (10 Credit Points)
Subject Details (p. 3552) Legacy Code: 102916
How does colonialism underscore the foundational narratives, knowledges and operation of the legal and criminal justice institutions of colonised nations? Focusing primarily on the Australian context of colonial invasion and settlement, this subject explores the plight of Indigenous peoples and their severe over-representation in the Australian criminal justice system. Studying the impact of colonisation and exploring Indigenous narratives, students will critically examine issues faced by Aboriginal and/or Torres Strait Islander people and their experience of criminal justice in Australia. Overall, the subject will equip students with an understanding of the relationship between dominant colonial narratives of race and institutional racism, while considering how Indigenous knowledge can inform better social and criminal justice outcomes for Indigenous populations. Comparative examples of criminal (in)justice for Indigenous populations in other colonised nations will also be considered.
Level: Undergraduate Level 2 subject
Equivalent Subjects: CULT 2019 - First Peoples and Criminal Justice
Incompatible Subjects: WELF 2008 - Human Rights Human Services and the Law
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2071 Knowledge Journeys (10 Credit Points)
Subject Details (p. 3553) Legacy Code: 800240
This subject is designed for high-achieving students enrolled in the Bachelor of Creative Leadership or Advanced degrees. It examines sources of knowledge and how we learn. Students are supported to approach new knowledge as a journey of developing skills as independent, life-long, self-directed learners. Analysis of knowledge journeys of others, using creative enquiry, and Indigenous learning techniques, are key learning activities in the unit. A focus on knowledge and research journeys, rather than 'outcomes' alone, facilitates learning from mistakes in seeking solutions to real world problems. Fundamental research approaches will be considered and applied in the subject.
Level: Undergraduate Level 2 subject
Equivalent Subjects: HUMN 2045 - Research Stories
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2072 Logic, Argumentation and Post-Truth (10 Credit Points)
Subject Details (p. 3554) Legacy Code: 800241
The subject is designed for high-achieving students enrolled in the Bachelor of Creative Leadership or Advanced degrees. This subject prepares learners for leadership roles by developing their skills in logical and rhetorical argumentation, and persuasive techniques. Throughout the subject, students will appraise the structure of logical and rhetorical arguments, apply persuasive techniques, and examine the influence of post-truth on global issues and public opinion.
Level: Undergraduate Level 2 subject
Equivalent Subjects: HUMN 2035 - Logic Rhetoric and Argumentation
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2073 Issues in Contemporary Heritage (10 Credit Points)
Subject Details (p. 3554)
The aim of this subject is to get students thinking critically about heritage. To do so, it examines two main questions: “What is heritage?” and “Why does it matter?”. While the answers to both may appear fairly straightforward, this subject is designed to make students question and problematise their own assumptions, rethink what is and is not heritage, and consider why, in fact, we even care at all. The subject will introduce concepts such as national identity, memorialisation, belonging, collective memory, forgetting and repatriation. It will also introduce and examine heritage legislation, theory and practice.
Level: Undergraduate Level 2 subject
Equivalent Subjects: TOUR 2001 - Issues in Contemporary Heritage
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2074 Origins of the Secular West (10 Credit Points)
Subject Details (p. 3555)
Early Modern European culture was underpinned by religious conceptions of nature, society and morality. The Modern West sees itself as having emancipated itself from these religious underpinnings, and as being grounded in human naturalistic and scientific values. This subject traces the transition from the first of these conceptions to the second, through politics, philosophy, culture and science.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2075 Sports History in Global Perspective (10 Credit Points)
Subject Details (p. 3556)
The subject explores the history of popular sports, including cricket, rugby, soccer, golf, baseball, tennis, the Olympic Games, and table tennis. It uses case studies from different countries and time periods to highlight how sports shaped, and were shaped by national identity, politics, diplomacy as well as class, race and gender. Drawing on examples from Australia and the world, students learn about how the professionalisation of sports in the early 1900s created immense controversy over the participation of working class athletes. It also explores how sports became parts of national identity, such as cricket and rugby in Australia, sumo wrestling in Japan, and baseball in the United States of America. Students taking the subject will learn how popular attitudes towards men’s and women’s sports changed across the twentieth century as a result of large-scale social, political and cultural movements.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 2076 The Classical Tradition (10 Credit Points)
Subject Details (p. 3556)
The cultures and intellectual life of Ancient Greece and Rome influenced European life and thought for much of the succeeding two thousand years. But the greatest influence came with the 'classical revival' of the 1400s through to the 1700s, beginning with the 'Renaissance'. This subject outlines several key themes in Ancient Culture: moral and political philosophy, literature, history, and rhetoric and the art of speaking, It then traces the later careers and revivals of these themes in the period 1400-1700.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3009 Alternatives to Violence (10 Credit Points)
Subject Details (p. 3558) Legacy Code: 101570
The key tenet of this subject is the belief that there are superior alternatives to violence for peace building. Holistic development (including socio-cultural, political, economic, governance, etc.) provides the best and most constructive alternatives to violence. The subject examines different alternatives to violence within the broader context of peace and development studies. Students will be equipped with theoretical approaches to alternatives to violence and an ability to evaluate and apply those alternatives in social development contexts.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3012 Applied Indigenous Research Project (10 Credit Points)
Subject Details (p. 3559) Legacy Code: 102310
In this subject students will undertake a guided personal inquiry project. Students will investigate and reflect on the practical, cultural and ethical complexities of being an Indigenous researcher. Students will examine ethics guidelines for research with Indigenous peoples and the realities of applying them in practice. They will study examples of Indigenous research scholarship to develop and present their own Statement of Research Philosophy.
Level: Undergraduate Level 3 subject
Pre-requisite(s): HUMN 2050
Equivalent Subjects: LGYA 1682 - Rethinking Research with Indigenous Australians Independent Study project (Block Mode) HUMN 3070 - Rethinking Research with Indigenous Australians Independent Study project (Day Mode)
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3013 Australian Colonial History (10 Credit Points)
Subject Details (p. 3560) Legacy Code: 102004
This subject introduces students to the 18th and 19th century foundations of modern Australia, and to the social, economic, political and cultural events that shaped Australian history. Students will be encouraged to consider the process of historical change within an historiographical framework and will use primary sources to explore some of these debates. Some of the themes explored will be colonisation, convictism, class, urbanisation, gender, land, indigenous society, culture and political developments leading to the federation of the Australian colonies in 1901.
Level: Undergraduate Level 3 subject
Equivalent Subjects: HUMN 1019 - Foundations of Modern Australia HUMN 3014 - Australian History 1860-1920
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3015 Australian History Around Us (10 Credit Points)
Subject Details (p. 3560) Legacy Code: 102516
Historians are detectives, searching for clues and unravelling the puzzles of the past. A walk down your local street holds many clues about the history of a local area - from the name of the street, the architecture of the buildings, the trees planted by the road, even the new building that indicates a recent change. Local studies are used as the foundation for socio-economic studies across many disciplines while an understanding of local history contributes to establishing personal and community identities. In this subject students will learn research skills to uncover the lives of people from the past, re-imagine familiar places and consider events long forgotten that happened in the streets of their suburbs. The final assignment is a chance to turn these discoveries into a new history for their community.
Level: Undergraduate Level 3 subject
Equivalent Subjects: HUMN 3038 - Exploring Local History
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3016 Australian History Since 1920 (10 Credit Points)
Subject Details (p. 3561) Legacy Code: 100987
In 2013 this subject replaced by 101999 - Twentieth Century Australia. This subject includes a general overview of major developments in Australian political and social history since 1920, and also focuses on particular issues such as the Great Depression, 1949 coal strike, the Petrov Affair and the Whitlam dismissal.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 0953 - Australian History Since 1920 LGYB 4929 - Australian History Since 1920
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3017 Australian Indigenous History from Federation to Reconciliation (10 Credit Points)
Subject Details (p. 3562) Legacy Code: 101872
This subject aims to explore the history of the relationship between Indigenous and non-Indigenous Australians from Federation (1901) to the present. At the beginning of the twentieth century, Australia became a nation without paying much attention to the first Australians. It was widely assumed that they would die out or at least remain an insignificant welfare problem. Instead, these first Australians survived and grew as a minority population; they also increasingly made themselves heard as a people - so successfully that in 2008 the Parliament of Australia felt obliged formally to apologise for their years of mistreatment. This subject highlights two stories: the non-Indigenous transition from complacency to engagement, and the survival and increasing political effectiveness of the descendants of Australia's first peoples.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3018 Australian Indigenous History: From first contact to 'dying race' (10 Credit Points)
Subject Details (p. 3562) Legacy Code: 101919
Until 1788, Australia was peopled by those who we now call Aborigines. Then Europeans arrived and began to spread across the continent, displacing and marginalising the Aborigines. This subject will tell the stories of that transformation, beginning with an account of the ideas and motivations of British authority in the late eighteenth century and concluding at the moment when six British colonies formed a federated nation. Topics to be covered will include: violence, humanitarianism, Christian missions, institutional authority. The course will emphasise and explain regional and temporal differences in the ways that Indigenous and non-Indigenous interacted. Students will study primary sources and learn to understand them in context.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 1557 - Australian Indigenous History
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3019 Britain in the Age of Botany Bay, 1760-1815 (10 Credit Points)
Subject Details (p. 3563) Legacy Code: 102079
This subject introduces the social, economic, political and cultural forces that shaped the society from which the first white Australians came. It considers processes of historical change and uses primary sources to explore historical debates concerning these changes. Themes covered include social class; sex and gender; crime and punishment; industrial revolution, urbanisation, and public health; the public sphere; political life; war, militarisation, and empire. This subject places special emphasis on the use of digitised primary sources, training students in their use. It also requires an extended piece of original primary source-based historical research. The subject spans the period 1760-1815.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3023 Climate Change and Culture (10 Credit Points)
Subject Details (p. 3563) Legacy Code: 101870
This subject introduces climate change as a complex social, cultural and political phenomenon, one that is re-shaping the way we live in the world and future lifestyles. Because climate change is highly contested, the course critically examines the issue from different theoretical, disciplinary, social and cultural perspectives. Topics range from cultural theory and forms of social action to the history and construction of climate change as concepts and debates around nature, culture, science, economics and consumption; to social justice, Indigenous knowledge systems, popular culture, the media and Australian politics, global governance, cities and urban planning.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3024 Comparative Nationalism (10 Credit Points)
Subject Details (p. 3564) Legacy Code: 102003
Nationalism, an ideology considered by many to have passed its peak, now dominates world politics and permeates political discourse. This phenomenon is crucial to understanding Trump's America First campaign, the problems affecting the EU and secession, the tensions and conflicts that are garbed in a religious rhetorical veil, and which constitute much of the agenda of today's "war on terror." What is nationalism? What is national identity? What are the main forms of its articulation in history and in the present, across geographical borders, class boundaries, gender and generational cleavages? This subject will survey the major theories of nationalism, and examine diverse examples of historical and contemporary nationalisms, predominantly within the European context. This is an upper level subject whose readings draw on a variety of approaches and examples and aim at providing a solid introduction to the scholarly literature.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3025 Conceptualising Islam (10 Credit Points)
Subject Details (p. 3565) Legacy Code: 102494
The 'Muslim question' has been a topic of interest to Western scholarship for over four hundred years. This subject introduces students to multidisciplinary approaches to the study of Islam and invites students to consider the construction and deconstruction of Islamic Studies as a field of study at various stages of history. The subject provides students with the opportunity to gain increased awareness of both the debates within the field and those that scrutinise the field. That is, becoming comfortable with interrogating the cluster of theoretical and methodological strategies for scholarly inquiry into Islamic Studies.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3026 Convicts and Settlers - Australian History 1788 - 1840 (10 Credit Points)
Subject Details (p. 3565) Legacy Code: 101799
In little more than half a century Australia was transformed from a convict prison to a parliamentary democracy. The people who made this transformation were the ex-convicts, free settlers and first generation of colonial born children. The survival of data about ordinary people between 1788-1840 makes it possible to investigate families, communities, employment, law and order and the daily experiences of urban and frontier life in these formative years. Using family history resources on the internet and sophisticated digital archives of historical records in Australia and overseas, this subject will challenge assumptions about "who do you think we were?"

Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3029 Cultures of Crime and Punishment (10 Credit Points)
Subject Details (p. 3566) Legacy Code: 102479
The focus of this subject is on the ways in which crime and punishment are defined and practiced in a range of different cultures, and how different countries' social customs and cultural values influence the evolution of their understanding of, and response to, criminal behaviour. Drawing on both theoretical frameworks and practical examples, the subject will provide students with an opportunity to work in a collaborative learning environment, working with both instructors and other students to undertake and communicate research logically.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3030 Cyber Justice (UG) (10 Credit Points)
Subject Details (p. 3566) Legacy Code: 102529
The world is being transformed by digital technologies. The same technologies that make life more comfortable for some can unleash violence and destruction for others. Cyber war and cyber terrorism offer new risks for the international community. Bullying, identity theft and bank fraud, on a more local level, are given a new life in the cyber world. Cyber technologies also provide enhanced opportunities for detecting and apprehending criminals, resolving disputes and modernising justice processes. New social spaces are opened up (social media networks, the 'dark web'), and new identities made possible (online grooming profile, avatars). How does the law keep up with the emergence of new crimes and technology-enhanced versions of old ones, and how do the cultural worlds of hackers, crackers and trackers work? The subject examines how justice processes and spaces, as well as criminal networks and strategies, are being reimagined to take advantage of the new technologies.
Level: Undergraduate Level 3 subject
Incompatible Subjects: LAWS 3015 - Cyber Law and Justice
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3031 Death and Culture (10 Credit Points)
Subject Details (p. 3567) Legacy Code: 100996
This subject is a critical introduction to the social practices surrounding death in modernity. Although primarily addressing social arrangements in the West, the subject examines the bio-politics of death in a wider cultural framework, with attention to geographies of power and economic influence. The subject traces the historical development of concepts of the individual; the impact on Western ideas around death of genocide and modern warfare; and assesses contemporary ethical, social and medical controversies (like euthanasia and the trade in body parts). The subject attempts to demonstrate the relationship of death to: social institutions; ideas of community and the construction of self in modernity.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYC 1307 - Death and Culture LGYA 0949 - Death and Culture
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3032 Dictators, Democrats and Dreamers: Indonesia 1942 to now (10 Credit Points)
Subject Details (p. 3568) Legacy Code: 102188
This subject surveys the post-independence history of Indonesia, Australia's nearest and most important Asian neighbour. Commencing with the Japanese Occupation during World War II, it traces Indonesia's often turbulent contemporary history through dictatorship and poverty to democracy and prosperity, bringing the story up to the latest developments at the time of teaching. Students will study Indonesia's struggle for independence and then equally challenging struggle to build a new nation able to take its place in the world amidst serious economic problems and profound political differences. The subject is also concerned with the historiographical problems confronting students of Indonesian history.
Level: Undergraduate Level 3 subject
Incompatible Subjects: HUMN 2054 - The History of Modern Indonesia
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3033 Digital Cultures (10 Credit Points)
Subject Details (p. 3568) Legacy Code: 102410
This is the compulsory Level 3 capstone subject for the Cultural and Society major and a compulsory subject in the Digital Cultures major. It gives students essential skills for researching and analysing contemporary cultural and social processes through a digital lens. Key topics include youth and digital culture, digital citizenship, racism and the digital, film and games, and digital work and economies. Through this subject, students gain an understanding of how digital technologies transform everyday practices, meanings and identities, create new opportunities and problems for addressing societal challenges and explore what it means to participate in a digital society, now and in the future.
Level: Undergraduate Level 3 subject
Equivalent Subjects: HUMN 3028 - Culture Society and Globalisation
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3034 Emotions, Culture and Community (10 Credit Points)
Subject Details (p. 3569) Legacy Code: 100860
This subject examines forms of cultural expression and collective selfunderstanding articulated as emotional identifications. Topics covered may include shame, pride, responsibility, forgiveness,resentment, hope, disgust, generosity, happiness, hate and love. The subject explores how these have been taken up in contemporary cultural analysis as a focus for understanding affinities and conflicts between individuals and communities and for how Australians imagine their historical interconnectedness. It introduces some key theoretical perspectives that have been, and might be, applied to the study of emotions, culture and community.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3035 Enlightenment and Revolution (10 Credit Points)
Subject Details (p. 3570) Legacy Code: 101974
The Enlightenment and Age of Revolutions are pivotal moments in Western and global history and had lasting political and cultural repercussions. This module seeks to explore links between them and to place them in wider intellectual and cultural context. Particular focus will be placed upon the paradigmatic French revolution, but within a framework emphasising other revolutions of the period. Hence individual classes treat society and government in Europe; the moderate and radical strands of enlightenment; precursors to the French revolution in the Atlantic world; the public sphere; the French revolution and Terror; Revolutionary Imperialism and Napoleonic rule; the revolutionary legacy.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3036 Ethics in Historical Perspective (10 Credit Points)
Subject Details (p. 3571) Legacy Code: 102007
The subject provides an historical overview of the different types of ethical beliefs and practices that have been used in specific social settings from the classical world to the modern West. It looks at different types of spiritual and secular ethical behaviours, and the doctrines associated with each. It focuses upon the types of ethical argument and judgment-making specific to particular professions, occupations and social statuses over time. It concludes by surveying the different types of ethics taught to professionals today in the West, and on the differences between each, as well as the specific requirements of each. It will be of interest both to students with an interest in the history of ideas, and to students who want to learn more about ethics and moral decision-making.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 0908 - Ethical Cultures
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3039 Food: A Cultural History (10 Credit Points)
Subject Details (p. 3571) Legacy Code: 102305
The modern world seems obsessed by food. This subject will look at the historical development of sources of food, from archaeological evidence of the earliest human meals through the emergence of agriculture and its scientific modifications to the physical and cultural evidence of technological changes in methods of preservation, preparation, cooking and eating various foods. We will examine the globalisation of food and the varieties of historical cuisines around the world. Food is also integral to our social, religious and cultural lives and the subject will investigate the historical origins of some of these customs. Students will have the opportunity to range across time and place (through readings, recipes and field trips) to explore foods that are part of their cultural heritage - or feasts that they wish they could have eaten from centuries long past.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3040 From Vindication to Liberation: A Comparative History of Feminism (10 Credit Points)
Subject Details (p. 3572) Legacy Code: 102520
Beginning with Mary Wollstonecraft's A Vindication of the Rights of Woman, this historical survey analyses the Western feminist ideas and action over the past two centuries, exploring examples from Australia, France, the UK and the US. Important stages in the history of Western feminism will be studied, from the early equality feminism of the eighteenth century, to domestic feminism and the woman suffrage campaigns of the nineteenth. Aspects of the history of more recent feminism will include such developments as the role of maternalism in the creation of the welfare state, and the shift to an emphasis on liberation in the 1960s and 1970s.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3041 Geographies of Migration (10 Credit Points)
Subject Details (p. 3573) Legacy Code: 101694
An international and cross-institutional discussion of immigration and settlement. Covering the theory and experience of immigration. Considers the international and national regulation of immigration and settlement policies, as well as refugee policy. Case studies are from Australia and Canada, and Singapore. Within mixed tutorial groups (with students from Singapore, Vancouver & Sydney) students will exchange experiences and opinions of immigration.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3042 Global Politics (10 Credit Points)
Subject Details (p. 3573) Legacy Code: 101735
The experiences of globalization are explored from a variety of levels across time and space, from the individual to the local, the national to the international. The focus in this course will be on issues of politics, both domestic and international, but we will keep in mind that globalization is a phenomenon that is explored and assessed by a wide range of disciplines, including history, sociology, politics, law, economics, anthropology, gender studies, human geography, economics, regional and area studies, science and technology, health and epidemiology.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3043 Globalisation and Sustainability (10 Credit Points)
Subject Details (p. 3574) Legacy Code: 200815
Globalisation and Sustainability introduces students to critical debates about the role of global and national institutions of power in determining economic, environmental, social and cultural outcomes. Students will be introduced to opposing and controversial theoretical perspectives on globalisation and sustainability and issues relating to Aboriginal and Torres Strait Islander peoples to improve policy and practice in the future. In the process students will be encouraged to consider problems relating to ethics, rights, justice and democracy in society. This subject can also be taken by students who have studied social science and humanities.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3044 Healing and Culture (10 Credit Points)
Subject Details (p. 3575) Legacy Code: 101716
This subject takes as its starting point the idea that disease has social and cultural as well as biological origins. What people define as good health and illness, and how they treat the latter are profoundly shaped by cultural frameworks. Healing practices, including biomedicine, are underpinned by cultural understandings and larger configurations of power. We will examine notions of disease causality across cultures and explore the argument that good and ill health are about more than just the body. Popular understandings of illness and its origins, and techniques for responding to and seeking to remedy illness can be a reflection of how different societies imagine their place in the world.
Level: Undergraduate Level 3 subject
Incompatible Subjects: LGYA 0933 - Special Topics in Cultural and Social Analysis
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3046 History of Modern China to 1949 (10 Credit Points)
Subject Details (p. 3575) Legacy Code: 100507
This Asian history subject is concerned with the transformation of China in a social, political and intellectual context since the late eighteenth century. The subject focuses on China's modern transformation in the first half of the twentieth century and its relevance for contemporary China. The scope is broad, encompassing changes from the last phases of the Qing Dynasty to the Republican era and the rise to power of the Communists in 1949. The approach is issue-oriented, thematic and, where appropriate, chronological.
Level: Undergraduate Level 3 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3047 History of Muslim Civilisations and Ideas (10 Credit Points)
Subject Details (p. 3576) Legacy Code: 102184
This subject focuses on intellectual, societal, institutional and technological developments within the Muslim world. It looks at comparisons and interconnections between regions and peoples and outlines the history and context of Muslim political thought from the death of Mohamed to the contemporary period. The subject will have a strong historiographical focus that examines 'Islamic data-sets' and assesses the concepts of primary and secondary source materials which conventionally are used to construct interpretations of the past.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3048 History of Sexuality (10 Credit Points)
Subject Details (p. 3577) Legacy Code: 101991
This subject introduces students to some key debates about the definition and origin of sexuality as a concept, and to the historical origins of particular sexual identities and the political values attributed to them. It teaches students to take account of the differing ways that forms of desire, pleasure, obscenity, pornography, perversion, sin and transgression have been articulated across time and place. In the subject we traverse an array of temporal moments and geographic loci, drawn to the 'hotspots' of historiographic contention.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3049 Home and Away: Ethnicity and Migration in Australia (10 Credit Points)
Subject Details (p. 3577) Legacy Code: 101611
Using contemporary and historical sociological accounts of migration and ethnicity, this subject analyses the social, cultural and economic impact of international migration, with specific reference to Australia. It further introduces students to major sociological issues, both theoretical and empirical, relating to the construction of migrant groups within settler societies through interviews and qualitative analysis. Key concerns of the subject include the position of indigenous peoples, race and racism, ethnic identity, and ethnic conflict and cooperation in society.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 1305 - Sociology of Ethnicity and Migration
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3050 Housing Markets and Policy (10 Credit Points)
Subject Details (p. 3578) Legacy Code: 101592
Housing affordability and equity are central urban problems. This subject focuses on the history and current challenges of housing markets and policy in Australia. Comparisons are drawn between rental and home ownership, the roles of the public, social, and private sectors, and between Australian, European, and North American housing markets and policies. We will critically evaluate how policy, markets and the experiences and practices of households interact. We will consider key housing challenges including ending homelessness, housing for health, housing in an ageing society, and housing in times of crisis such as climate change, bushfire and pandemic.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 1331 Regional Planning
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3051 Human Rights and Culture (10 Credit Points)
Subject Details (p. 3579) Legacy Code: 101988
This subject examines the cultural consequences of the rise of the global human rights regime. It introduces debates about cultural relativism and universal human rights and explores a number of areas of contemporary conflict between cultural practices and human rights norms. It also examines the role of human rights NGOs in creating a new global human rights culture, and asks what it means to be a subject of human rights.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3054 Islam in Southeast Asia (10 Credit Points)
Subject Details (p. 3580) Legacy Code: 101467
Islam is a significant feature of Southeast Asia's past and present. Employing methodologies and insights drawn primarily from history, political science, and anthropology, this subject explores Islam's place in and contribution to contemporary Southeast societies and politics, as well as its history in the region. Major themes to be explored include: the debates about Islam's spread to Southeast Asia and its interaction with the region's established socio-religious features, the colonial experience, Islam's often contested place in the national life of Southeast Asian nations, its past and ongoing links with the rest of the Muslim world, as well as contemporary issues associated with the War on Terror and conflicts in Muslim societies.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYB 0177 - Islam in Asian and World Politics
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3056 Islam in the West (10 Credit Points)
Subject Details (p. 3580) Legacy Code: 101822
The subject focuses on the question of Muslim presence in the West with reference to the dynamics of inclusion and exclusion. Its aim is to enable students to look at the question of Muslim presence in terms of an action-reaction phenomenon in which different outlooks, ideas, institutions and nodes of information and authenticity interact to create an environment in which identities are developed. These identities then go on to shape the cooperative and conflictual relationships between different subsections of Muslim minorities and the majority non-Muslim Western states and societies. While focusing on the contemporaneity of the question, the subject looks at the study of Muslim presence in the West in a socio-historical context by providing an understanding of how Muslim-Western contacts shaped the nature of their relationship in the past. Then, the subject looks to contrasting the changes before and after 9/11 with reference to a set of ideas, institutions and contexts.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3057 Islam, Media and Conflict (10 Credit Points)
Subject Details (p. 3581) Legacy Code: 101468
Provides students with an understanding of global, regional and local news media production and representations of Islam and Muslim societies. It discusses new, emerging and alternative forms of media discourses of conflict in the Muslim world, and analyses selected news reports as forms of case studies. Taking the notion of 'Orientalism' as its starting point, the subject/unit critically examines the extent to which the mediatisation of conflict impacts relations between Islam and the West vis-a-vis debates on Orientalism, 'Asian values' and Islamic world views.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3058 Islamic Revivalism in the Globalised World (10 Credit Points)
Subject Details (p. 3582) Legacy Code: 102297
In the last decades there has been a surge in Islamic consciousness in Musllim communities across the globe. Islamic history has been punctuated by periods of revivalist activity and its hallmark always has been a desire for the return to Islamic origins - the basics of the faith as enshrined in the islamic scripture. This subject explores the phenomenon of contemporary Islamic revivalism. The subject contrasts contemporary Islamic revivalism with earlier expressions. It aims to demonstrate that contemporary Islamic revivalism has manifested itself in a multiplicity of forms as a defensive reaction to an epoch characterised as modernity.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3060 Modern Japanese History (10 Credit Points)
Subject Details (p. 3582) Legacy Code: 100271
This subject considers Japan's trajectory from the battle of Sekigahara in 1600 until the atomic bombings in 1945. We will examine the samurai and ritual suicide, the tea ceremony and Zen Buddhism. We will read tales told by those who frequented the "floating world," populated by wealthy merchants, geisha, and sumo wrestlers. We will consider the creation of Imperial Japan, and we will study its emergence as the only non-Western Great Power. We will enquire into Japan's fledgling democracy in the 1920s, and its descent into militarism and aggression in the 1930s. Finally, we will consider Japan's participation in World War II: its victories, its losses, its propaganda, and its abject defeat.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3061 Mystical Islam: The Emergence of Sufism in World History (10 Credit Points)
Subject Details (p. 3583) Legacy Code: 102495
Global Islamism has projected a particularly severe, even militant face of Islam across much of the world. Much less well known is the fact that for much of its history Islam has had a quite different face: it has been mystical and contemplative more than proselytising. The Sufist tradition was formed within the first three centuries of Islamic history; its influence spread far and wide across the Muslim World where "Sufis" played a pivotal role in engaging non-Muslim peoples both within and on the fringes of their world. The subject explores religious pluralism and an alternative narrative in Islam.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3062 Napoleon: the Making of a Legend (10 Credit Points)
Subject Details (p. 3584) Legacy Code: 102343
This subject appraises the achievement of Napoleon Bonaparte and the manner in which he has been portrayed in his own propaganda, by his contemporaries and by historians. It also considers the historical impact of the Napoleonic and anti-Napoleonic myths in the history of France and Europe. At the heart of the module is the paradox of Napoleon's enduring popularity in France, despite his responsibility for crushing defeats in 1812-1814 and again 1815.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3063 Peace & Development Project (10 Credit Points)
Subject Details (p. 3585) Legacy Code: 101571
The Peace & Development major is concerned with understanding and addressing inequities of power, wealth & opportunity that contribute to international and local conflicts and environmental degradation. In this capstone subject students will have the opportunity to consolidate their understanding, knowledge and skills of peace and development issues through planning, implementing and writing up individual or collective projects. Students will identify individual and collective actions that can be taken to improve conditions so that opportunities for peaceful, equitable & sustainable living are created locally & globally.
Level: Undergraduate Level 3 subject
Pre-requisite(s): HUMN 1028
Equivalent Subjects: LGYA 1314 - Work-based Learning Project Humanitarian Peace and Health Studies
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3064 Politics, Power and Resistance (10 Credit Points)
Subject Details (p. 3585) Legacy Code: 101985
This subject examines the effects of politics on society and of the social on politics. Politics is understood as a struggle for defining how we live in common with others. We examine how power is attained and maintained and how some ideologies dominate over others to shape opportunities for challenging the status quo. Our focus is the contemporary nation-state in the context of globalisation, increased transnationalism, and shifting balances of power. Key themes include economic and social inequality in the modern state, the colonial power matrix, discipline and punishment, gender and race, and resistance to oppression. Each week will combine theoretical approaches and case-study based 'perspectives' on the topic.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3065 Postcolonial Australian Cinema (10 Credit Points)
Subject Details (p. 3586) Legacy Code: 101987
This subject will examine the role of cinema in forming images of national and cultural identity. The subject will explore the development of Indigenous and postcolonial cinema in Australia. The subject will discuss political debates and issues in postcolonial Australian cinema, and will raise questions about the nature of memory as it is mediated by cinematic experience, the representation of history, and the history of representation of indigenous cultures and peoples. The subject will examine these questions through a study of postcolonial Australian cinema produced by both Indigenous and non-Indigenous filmmakers.
Level: Undergraduate Level 3 subject
Equivalent Subjects: HUMN 3021 - Cinema Culture Memory
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3066 Power as a Cultural System (10 Credit Points)
Subject Details (p. 3587) Legacy Code: 102348
In this subject students will explore notions of power, domination, authority and conflict from an anthropological perspective. Students will draw upon specific case studies of the social and political organisation of a variety of communities to understand how social order is perceived, achieved and maintained cross-culturally, through local systems of governance but also through social categories such as race, kinship, ethnicity and nations. Through these examinations students will also apply anthropological insights in order to understand how social practices such as participation, collaboration, resistance and violence operate in local political contexts. In the final part of the subject students will assess the various ways anthropologists work with and against local power structures and to what extent ethnography and applied anthropological work can intervene in systems of oppression.
Level: Undergraduate Level 3 subject
Pre-requisite(s): HUMN 1016
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3067 Power, Politics and Knowledge (10 Credit Points)
Subject Details (p. 3587) Legacy Code: 200752
Please note that this subject is no longer on offer. Please contact business.courses@uws.edu.au or phone (02) 9685 9200 for further information. The aim of this subject is to provide students with a thorough grasp of the complex relationships between power, politics and knowledge in organisational settings. It also highlights the need for managers to use power ethically and equitably in workplaces. These aims are addressed through an examination of a range of theories of power, and topics such as: distribution and exercise of power in organisations, organisational politics, gender and power, language and power, resistance to power, and others. Innovative class activities and assessment methods (e.g., brainstorming; storytelling; film analysis) are used in this subject to ensure that students are able to effectively apply theoretical concepts to real life situations.
Level: Undergraduate Level 3 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3068 Public Health Response in Complex Emergencies (10 Credit Points)
Subject Details (p. 3588) Legacy Code: 102369
This subject examines several different aspects of public health in emergencies including rapid assessment of the health status of the population, public health surveillance measures, and the priorities in an emergency phase. To effectively respond to complex emergencies, government and non-government organisations must enact policy and activity to prevent, protect against, and respond to injuries and threats posed by infectious disease outbreaks and hunger. The subject provides an outline of the principles of disaster prevention, preparedness and mitigation, and introduces students to aspects of human resources in the coordination of different operational initiatives.
Level: Undergraduate Level 3 subject
Co-requisite(s): HUMN 2017
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3069 Queer Culture (10 Credit Points)
Subject Details (p. 3589) Legacy Code: 102191
Queer culture will introduce students to queer theory and provide opportunities to use these theories in the close study of cultural practice and politics. Queer theory counters the idea that people have stable sexes, genders and sexualities. Instead, queer theory argues that the experience of those that are homosexual, bisexual, transgender, and intersex highlight the frequent mis-matches in what are taken for granted to be 'normal' experiences of identity. Queer theory demonstrates the impossibility of a natural or normal sexuality, but it also demonstrates the problem with the terms 'man' and 'woman', 'male' and 'female', 'normal' and 'abnormal'. In Queer culture students will learn about queer theories and have the opportunity to apply these theories to an in-depth and personally engaging study of queer politics and activism; queer media, film and performance; and queer sex, selfhood, and identity trans/formations.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3070 Rethinking Research with Indigenous Australians: Independent Study Project (Day Mode) (10 Credit Points)
Subject Details (p. 3589) Legacy Code: 101759
This subject will provide students with an exciting opportunity to undertake an Independent Study Project on an Indigenous topic. Students will gain greater knowledge of Indigenous people and develop effective communication skills as well as a level of cultural competency. The Independent Study Project will expose students to the complexities of the cultural inter-relationships and the politics of undertaking research with Indigenous people. It will also provide students with skills and ideas for future research projects that will add to Indigenous knowledge and provide a sound foundation for ethical research.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3075 Sociology of Religion (10 Credit Points)
Subject Details (p. 3590) Legacy Code: 101359
In this subject some of the main sociological approaches to the study of religion will be considered. The subject will be orientated particularly to the tension between religion and social theory in the evolution of sociological thought. It addresses the impact of religion and religious bodies on Australian society and politics. The subject will focus on the relation of theory and practice, on the research of contemporary religious practice, and on the contemporary relevance of major theorists in the sociology of religion. It will address issues such as Buddhism, Fundamentalism(s), gender in religion, globalisation, Islam, modernity/post modernity, neo-paganism, networks in spiritualities, New Age, popular culture, and new religious movements.
Level: Undergraduate Level 3 subject
Equivalent Subjects: Unit LGYB 5040 - Sociology of Religion
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3076 Sultans, Colonists and Nationalists: Indonesia C1200-1942 (10 Credit Points)
Subject Details (p. 3591) Legacy Code: 102187
This subject examines the historical background of Indonesia's struggle to attain independent nationhood. Emphasis will be placed on social, cultural and political factors that shaped Indonesia prior to 1942, encompassing the classical period of the Hindu-Buddhist kingdoms, the rise of the early modern Islamic sultanates, the first encounters between Europeans and the peoples of the 'Malay world', the emergence of the Dutch East India Company (VOC) as a dominant force in the region, the subsequent imposition of the Dutch colonial rule, and, most significantly, the development of modern Indonesian nationalism.
Level: Undergraduate Level 3 subject
Incompatible Subjects: HUMN 2054 - The History of Modern Indonesia
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3077 Sustainable Futures (10 Credit Points)
Subject Details (p. 3592) Legacy Code: 101569
In this subject we will explore the questions 'can we create a sustainable society? If so what would it look like and how could it be done; is it possible to live ethically with each other and the planet?' While major contemporary theoretical concepts will be explored the emphasis is on developing sustainable alternatives to the way we now live both locally and globally. Particular attention will be paid to thinking ecologically, postcolonial development and issues of race and gender.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3078 The Anthropologies of Gender and Sexualities (10 Credit Points)
Subject Details (p. 3592) Legacy Code: 102349
Examining the social construction of gender has been central to anthropological inquiries since the 1930s. Early ethnographic studies were instrumental in debunking gender essentialism and challenging the hegemony of western constructs about 'masculinity' and 'femininity'. Since the 1930s, critical Anthropological theories and ethnographies have through cross-cultural comparison, demonstrated the great variation in expressions of individual sexuality/ies, the dynamics and confines behind the construction of gender roles and the cultural meaning and expression of gender categories across the globe. This subject will address the ongoing exploration of and challenges to the sex (biology) vs. gender (culture) dichotomy and contemporary cultural, social and political transformation (manipulation) of these categories.
Level: Undergraduate Level 3 subject
Pre-requisite(s): HUMN 1016
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3079 The Asian Century (10 Credit Points)
Subject Details (p. 3593) Legacy Code: 101957
This subject explores whether the 21st century can be referred to as the Asian Century. It addresses itself to a host of questions, including: What is the Asian Century? How does it differ from the American Century (20th Century) and the British Century (19th Century)? What are the historical, cultural and philosophical foundations of the Asian Century? How has Asia been transformed since World War II, and more recently? What are the risks and challenges for Asian states in the Asian Century? What are the challenges and the opportunities for the West (including Australia) in the Asian Century?
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3080 The History of Southeast Asia (10 Credit Points)
Subject Details (p. 3594) Legacy Code: 102491
This subject introduces students to the history of Southeast Asia, and to the major ideas and debates pertaining to the historical development of Southeast Asia as an important and distinctive world region in its own right. The course will examine the historical, cultural and religious factors that have shaped Southeast Asian societies, from antiquity to the modern era. Key topics include the origins and characteristics of early civilisations, traditional patterns of state formation, global trade networks and European imperialism, popular resistance and the nationalist challenge to the colonial order, decolonisation in Cold War Southeast Asia, and nation-building in the twentieth century.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3081 The International Relations of the Middle East Since 1945 (10 Credit Points)
Subject Details (p. 3595) Legacy Code: 101783
This subject offers a historical study of the international relations of the Middle East from 1945 to the present. It examines the relations of Middle Eastern states to global structures of power; the pattern of relations between regional states; the causes of regional wars and international co-operation; the impact of domestic factors on the foreign policy of states; the importance of oil to international politics and the global economy; and the role of ideologies and non-state forces in international relations and between states in the Middle East.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3082 The Making of the 'Aborigines' (10 Credit Points)
Subject Details (p. 3596) Legacy Code: 101757
This subject is available to all undergraduate students who have open electives. The Making of the 'Aborigines' explores the complex human relations and historical forces that have constructed Australia's indigenous people as 'Aboriginal' and/or 'Torres Strait Islander'. It will involve a critical examination of a range of contemporary social and political issues impacting on and being engaged by Indigenous people. A more comprehensive understanding of the position of Indigenous people in contemporary Australian society will enable students to engage more effectively with Indigenous people.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3084 Theories of Conflict and Violence (10 Credit Points)
Subject Details (p. 3596) Legacy Code: 100969
Why do humans kill? What is the nature of war? This course is a selection of different established theories offering explanations of human violence and social conflict. Both theories of individual violence and aggression, and collective conflict are studied to give students a perspective on the forces behind these phenomena. Theories from politics, philosophy, psychoanalysis, sociobiology, sociology, and cultural studies are introduced to exemplify the classic positions and lines of reasoning. These are used to question and explain current forms of violence and conflict, and to give students better understanding of the issues behind attempts to forestall, manage or end conflict.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 0295 - Theories of Violence and Conflict
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3087 Twentieth Century Australia (10 Credit Points)
Subject Details (p. 3597) Legacy Code: 101999
This survey subject provides an overview of major events in Australian political, cultural and social history of the twentieth century. The subject will examine key events such as World Wars and the Great Depression, but will also discuss broader changes that affected Australians, black and white, male and female, rich and poor. In doing so, it will examine some of the ideas and political movements that dominated twentieth century Australia, including class politics, feminism, imperial loyalty, indigenous politics, nationalism, racism and sectarianism.
Level: Undergraduate Level 3 subject
Equivalent Subjects: HUMN 3014 - Australian History since 1860 - 1920 HUMN 3016 - Australian History since 1920
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3088 Understanding Freedom (10 Credit Points)
Subject Details (p. 3598) Legacy Code: 101798
"Understanding Freedom" consists of a close analysis of major theories of freedom from ancient times to the contemporary world. It explores the relation between freedom and imprisonment, freedom and politics, freedom and the everyday, as well as the way that freedom informs the production of culture.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3090 Understanding Power (10 Credit Points)
Subject Details (p. 3598) Legacy Code: 101731
This subject aims to explore contemporary understandings of power and its various manifestations in the modern world. Numerous themes are considered including informal and formal mechanisms of power, the uses and abuses of power, resistance, plus various examples of "powered" sites. The subject examines the relation between power, violence and the state. The subject concentrates on a few, influential theorists of power. Particular attention is paid to how power has an impact on the production of culture.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 1008 - Understanding Power
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3091 Violence in Everyday Life (10 Credit Points)
Subject Details (p. 3599) Legacy Code: 101898
The subject provides an overview of the 'dark side' of human society and culture - violence. It examines how violence shapes, threatens and informs aspects of everyday life at home, work, school, the sports field and the street. Through a series of structured learning activities students engage with a range of documents and images to explore practices and experiences of violence. The role of institutions like the state, churches and sporting bodies in regulating violence will be considered. Students will gain skills in understanding the cultural milieu of marginal groups, languages of power and the emotions of excitement, fear and terror produced by acts of violence, skills useful for effective functioning in the workplace and family. The subject provides skills for honours level research in social and cultural analysis, law and legal studies, criminology, and history and political thought.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3092 WWII in Asia and the Pacific (10 Credit Points)
Subject Details (p. 3600) Legacy Code: 101830
This subject provides inquiry into the origins, course, and aftermath of WWII in Asia and the Pacific. We will ask why Japan and China went to war with each other in the 1930s; we will also seek understanding of why and how that war came to include the United States, Britain, the Soviet Union, the Netherlands, Australia, New Zealand, and practically all of Asia. We will examine the atomic attacks against Hiroshima and Nagasaki: Was the bomb a necessary evil? Or could/should the US have avoided using the bomb? We will also look intensively at post-WWII Asia. How did two wartime allies - the US and the Soviet Union - become bitter enemies within months of the war's end? Why did China descend into civil war? What was the war in Korea all about? Were wars of independence throughout SE Asia unavoidable? How was it that Japan escaped much of this postwar misery?
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3093 War (10 Credit Points)
Subject Details (p. 3600) Legacy Code: 102423
Have you ever wondered what war is good for? Edwin Starr thought it was good for "absolutely nothing." This subject will take you on an intellectual journey, around the globe and across history, as you reach your own answer to this question. You will evaluate the norms associated with war as well as the experiences of warriors from ancient through modern times. You will assess the role of militias, armies, navies, and air forces in the broad sweep of history. You will consider nuclear weaponry, terrorism, guerrilla warfare, just war theory, as well as anti-war movements.
Level: Undergraduate Level 3 subject
Incompatible Subjects: HUMN 2059 - War
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3094 War and Society in the Twentieth Century (10 Credit Points)
Subject Details (p. 3601) Legacy Code: 101993
This subject explores the social and cultural history of warfare in the twentieth century, with a particular emphasis on the experience of 'ordinary' men and women during the First and Second World Wars. Drawing on case studies and scholarship from Australia, Britain and the United States, students will examine a diverse range of topics and themes, including the politics of gender, class and race in wartime.
Level: Undergraduate Level 3 subject
Equivalent Subjects: HUMN 2060 - War and Society 20th Century Australia
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3096 What is the Human? (10 Credit Points)
Subject Details (p. 3602) Legacy Code: 101010
This subject examines theories of human nature from a variety of historical and disciplinary perspectives. It engages with, and encourages the student to evaluate, conceptions of the human - some of which have had wide currency in the broader culture and some which have not. The subject also engages the idea of whether a unified conception of human nature is tenable at all.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYC 1283 - What is the Human?
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3098 Genders and sexualities: beyond the binary (10 Credit Points)
Subject Details (p. 3602) Legacy Code: 102733
This subject encourages students to critically reflect on how their own identities and experiences of genders and sexualities are shaped by broader social practices that define what is natural and what is normal. The subject focuses on two substantive topics: the body and institutions. Bodies are usually understood through biological explanations of gender and sexuality. However, this subject will consider how the body is shaped by the social discourses and practices through which genders and sexualities are produced. The subject investigates how age, race, class and ability are coded differently in terms of gender and sexuality. Institutions - families, schools, workplaces and religions - will be studied as sites where genders and sexualities may be observed but also produced and negotiated.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3100 Social Sciences International Placement (1): Preparation for Placement (10 Credit Points)
Subject Details (p. 3603) Legacy Code: 102723
This subject is designed to equip students with the knowledge and skills required to successfully undertake a placement abroad, or in the case of those students who need to undertake a local placement, an organisation in Australia that is focused on international development. To this end, to prepare students for HUMN 3101 Social Sciences International Placement (II) the subject examines issues of sustainability and the political and ethical dimensions of volunteering, development and/or fieldwork. It interrogates the rise of volunteering and learning for development abroad experiences, and provides opportunities for students to reflect on their own part in this growth 'industry'. Workshops and online activities will cover practical topics such as health and wellbeing, and living and working in development contexts. They will also provide students with opportunity to learn more about their placement country and/or organisation and to begin developing skills in intercultural communication and interaction, ethnographic observation and reflexivity.
Level: Undergraduate Level 3 subject
Pre-requisite(s): Students enrolled in course 1733 must complete the following pre-requisites CULT 1017 Understanding Society and BEHV 1021 The Individual in Society and CULT 1020 Working with Communities and HUMN 1041 People Place and Social Difference and CULT 2005 Ethics in the Social Sciences and HUMN 2049 Social Research Methods PLUS one of the following Advanced core units BUSM 1016 Leadership in a Complex World Or DESN 2002 Creativity Innovation and Design Thinking Or BEHV 2007 Internship and Community Engagement Or CULT 3011 Ethical Leadership
Students enrolled in courses 1664 and 6030 must complete the following pre-requisites CULT 1017 Understanding Society and CULT 1020 Working with Communities and HUMN 1041 People Place and Social Difference and SPRT 2011 Sustainability Tourism and Place and CULT 3015 Heritage and Tourism and CULT 3016 Indigenous Cultures A Global Perspective

Co-requisite(s): HUMN 3101
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3101 Social Sciences International Placement (II): Placement (20 Credit Points)
Subject Details (p. 3604) Legacy Code: 102724
This subject provides students with the opportunity to apply skills and knowledge acquired during the first two years of their degree to a 'real world' setting. Students will undertake a 14 week internationally focused placement with organisations in, for example, the community, not-for-profit or government sectors. The subject coordinator will partner students with an international organisation, and together with the placement host(s) will jointly supervise the student. The work that students undertake during placement will vary, but may include: community visits, community consultation, development of educational programs, policy evaluation, research and report writing. Relevant activities may also be undertaken at another university in the placement country. The work placement will provide students with invaluable experience working in social sciences related fields in cross-cultural contexts. Prior to commencing the placement, students are required to complete pre-placement coursework (in co-requisite subject HUMN 3100 Social Sciences International Placement (I)). On return from placement the experience will be rounded out with the completion of HUMN 3102 Social Sciences International Placement (III). Students are required to complete a Working with Children Check, and medical clearance may also be required to undertake placement in a developing country, along with a Working With Children check for certain organisations. Those students unable to undertake an internationally based placement for health or personal reasons should contact the Subject Coordinator before enrolment in this subject to discuss available options for being placed locally. Students should also note that NSW Health facilities have further, specific requirements, and should seek advice from the Subject Coordinator.
Level: Undergraduate Level 3 subject
Pre-requisite(s): Students enrolled in course 1733 must complete the following pre-requisites CULT 1017 Understanding Society and BEHV 1021 The Individual in Society and CULT 1020 Working with Communities and HUMN 1041 People Place and Social Difference and CULT 2005 Ethics in the Social Sciences and HUMN 2049 Social Research Methods plus one of the following Advanced core units BUSM 1016 Leadership in a Complex World or DESN 2002 Creativity Innovation and Design Thinking or BEHV 2007 Internship and Community Engagement or CULT 3011 Ethical Leadership
Students enrolled in courses 1664 and 6030 must complete the following pre-requisites CULT 1017 Understanding Society and CULT 1020 Working with Communities and HUMN 1041 People Place and Social Difference and SPRT 2011 Sustainability Tourism and Place and CULT 3015 Heritage and Tourism and CULT 3016 Indigenous Cultures A Global Perspective

Co-requisite(s): HUMN 3100
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3102 Social Sciences International Placement (III): Post-placement Reflections (10 Credit Points)
Subject Details (p. 3605) Legacy Code: 102725
This subject is the final component of the Social Sciences International Placement. Facilitated by the subject coordinators the subject comprises a series of workshops and assessments, which will provide opportunities for students to debrief and reflect critically on their placement experience. Assessments and workshops are designed so that students learn how to convey newly acquired skills, perspectives and life choices in different settings (classroom; job interviews and applications), and to apply the placement experience in immediate and life-long educational, professional and personal endeavours.
For those students who have undertaken a placement overseas, the subject is also designed to encourage reintegration into their home culture. Specifically, assessments and workshops are designed so that students intentionally process and analyse the layered meanings of their time spent abroad, and the feelings and experiences of coming 'home'.
Level: Undergraduate Level 3 subject
Pre-requisite(s): Students enrolled in course 1733 must complete the following pre-requisites CULT 1017 Understanding Society and BEHV 1021 The Individual in Society and CULT 1020 Working with Communities and HUMN 1041 People Place and Social Difference and CULT 2005 Ethics in the Social Sciences and HUMN 2049 Social Research Methods plus one of the following Advanced core units BUSM 1016 Leadership in a Complex World or DESN 2002 Creativity Innovation and Design Thinking or BEHV 2007 Internship and Community Engagement or CULT 3011 Ethical Leadership
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3103 Group Project (10 Credit Points)
Subject Details (p. 3606) Legacy Code: 102741
This subject is designed to extend the employability, professional skills and networks of students. Every year, a range of options will be offered to students. These may involve activities as diverse as group research projects with existing available databases; simulation projects with ‘real world’ problems determined in partnership with an external agency or internal Western organisational subject; the development of a small-scale event that services a School objective and a community need; or a disciplinary or inter-disciplinary capstone project. The common objective is the development of students’ skills in collaboration and team work through a focus on authentic tasks and problem-solving.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3104 Historical Methodologies (10 Credit Points)
Subject Details (p. 3607) Legacy Code: 102766
The subject is an overview of Western historical thought and writing, from Herodotus to Foucault, demonstrating different approaches to historical knowledge. We examine some of the many ideas and sources that have influenced historical writing as well as some of the enduring questions, such as 'What is historical truth?' and 'Can history ever be objective?' Our exploration will include both close reading of texts and more 'hands-on' exercises to gain insight into different historical methodologies.
Level: Undergraduate Level 3 subject
Pre-requisite(s): Any two of the following subjects -
HUMN 1054 OR
HUMN 1059 OR
HUMN 1039 OR
HUMN 2042 OR
HUMN 2067
Equivalent Subjects: HUMN 3083 - Theories and Methods of History
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3105 History of Religion (10 Credit Points)
Subject Details (p. 3608) Legacy Code: 102734
This subject will investigate 'religion' as an object of historical study. Students will consider a variety of approaches to historical considerations about beliefs, scriptures, and rituals that have come to be defined as religion, as well as those that have not. The subject will examine the development of various religious traditions from its foundation to its present state by exploring them in light of their cultural, political, and social context.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3106 Study Tours (10 Credit Points)
Subject Details (p. 3608) Legacy Code: 102742
This subject provides students with opportunities outside the usual classroom experience. It is designed particularly for students who (1) enrol in short course study tours and/or (2) take a placement with an international or domestic workplace. A number of WSU partners offer short course study programs either internationally or domestically. The study tours offer an opportunity to spend up to three weeks off campus and experience real-life settings that allow for application of academic knowledge and understanding of on-the-spot discoveries.
Level: Undergraduate Level 3 subject
Equivalent Subjects: HUMN 3053 - International Study Tours
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3107 Labour and Culture (10 Credit Points)
Subject Details (p. 3609) Legacy Code: 102781
In recent history, social, economic, political and technological forces have produced profound changes to work and working life, undermining the stability of jobs and vocational skills, and disrupting and fragmenting career structures. This subject traces 1) the history of work, from pre-industrial to post-industrial times, 2) the rise of the factory system, 'Fordism' and scientific management of production, 3) the modern idea and experience of leisure and recreation as an adjunct to wage labour, and, in post-Fordist times, of culture and creativity as a central part of work, 4) the influence of technology on skills, and the rise of the 'knowledge economy' in the digital era, 5) the role of worker organisations in securing and protecting conditions of work.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3108 We Are The University: Students Co-creating Change (10 Credit Points)
Subject Details (p. 3609) Legacy Code: 102791
This project-based subject offers students a chance to learn, negotiate and practise change-making skills in, and for, our University, Western Sydney University. At the heart of this subject is student partnership, curriculum co-creation, and an invitation for students to be involved in improving the educational experience at Western. Working in groups and alongside a university mentor, students will have an opportunity to contribute genuine solutions to an authentic education challenge that might be (a) commissioned by senior staff of the University; (b) intended to support students' aspirations to become a student leader; or (c) offers students a chance to undertake a project that advances their existing student leader or representative role. By choosing this elective subject, students not only receive credit for the partnership work they undertake, the University will have a new way of involving students in its decision-making processes. This is a subject intended to sharpen students' analytical skill-set and provide a taste of what it's like to operate as a change-maker inside a large and complex institution. This subject is recommended for all students, regardless of discipline.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3109 Catastrophe: The Environmental History of the Ancient World (10 Credit Points)
Subject Details (p. 3610) Legacy Code: 102835
This subject examines past human interactions with the environment with its primary focus on the ancient Mediterranean and Near East between 2000 BC to 1600 AD. Case studies include Sumer, the lost civilisations of the Sahara, Egypt, Greece, Rome, the Maya and later European colonial empires. Students will assess, evaluate and synthesize data drawn from environmental history to analyse how the limits of natural resources constrain civilisations. The subject asks how catastrophic collapse of civilisations informs the sustainability of our own societies. Key topics will be soil fertility, deforestation, desertification, and climate change from ancient times to the Anthropocene.
Level: Undergraduate Level 3 subject
Equivalent Subjects: HUMN 3020 - Catastrophe The Environmental History of the Ancient and Modern World
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3111 History of the People's Republic of China (10 Credit Points)
Subject Details (p. 3611) Legacy Code: 102842
This subject is concerned with the historical complexities during the period between the establishment of the People's Republic in 1949 and up to the present day. It will equally focus on the Mao Zedong era (1949-1976) and on the post-1976 period, which saw the adoption and implementation of an "open-door" policy, and the launch of the "Four Modernisations". Due attention will also be paid to the Xi Jinping era (2012-present). We will explore a wide range of social and political issues that have a bearing on China's future as a potential world leader in the twenty-first century.
Level: Undergraduate Level 3 subject
Equivalent Subjects: HUMN 3074 - Social and Political Developments in Contemporary China
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3112 Indigenous Methodologies (10 Credit Points)
Subject Details (p. 3612) Legacy Code: 102850
This subject provides an introduction to Indigenous research methodologies. It will develop the conceptual and theoretical knowledge of Indigenist, decolonial and anti-racist research methodologies to research with Indigenous peoples, and research that is of significance to Indigenous Australians. The subject also addresses ethical considerations and processes providing students with the skills and knowledge to engage in ethical research praxis.
Level: Undergraduate Level 3 subject
Pre-requisite(s): HUMN 1060
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3113 Migration and Social Change (10 Credit Points)
Subject Details (p. 3612) Legacy Code: 102862
This subject will address the key concepts and issues of migration particular to settler colonies like Australia as well as nations in Europe and the Asia Pacific. It will consider the lives of first and second generation migrants and the spaces they inhabit, that is, rapidly growing suburbs and urban fringes. Attention will be paid to how migrant identities intersect with their class, gender and other categories. This includes a close examination of how their livelihoods are impacted by increasing gentrification, health and environmental crises, and intensified forms of border control and anti-immigration sentiment. Finally, the subject will encourage student to understand the contemporary influences such as solidarity movements and online cultures that impact our understanding of migration and prompt social change.
Level: Undergraduate Level 3 subject
Equivalent Subjects: HUMN 3085 - Transnational Migration HUMN 3086 - Transnationalism and Migration
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3114 Changemakers and Entrepreneurship (10 Credit Points)
Subject Details (p. 3613) Legacy Code: 800243
This subject is designed for high-achieving students enrolled in the Bachelor of Creative Leadership or Advanced degrees. The subject supports students to successfully navigate innovation and entrepreneurship journeys by pushing boundaries, experimenting, learning from mistakes, and adapting to find new ways of approaching technical and social problems. In this subject, students will develop knowledge and skills in pitching and communicating solutions, creating material for crowdsourcing platforms and collaborating in multi-disciplinary teams to design solutions to contemporary problems affecting both local and global communities.
Level: Undergraduate Level 3 subject
Equivalent Subjects: HUMN 3052 - Innovation Lab
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3115 Medieval Europe from the Fall of the Roman Empire to the Reformation (10 Credit Points)
Subject Details (p. 3613) Legacy Code: 102861
This subject is an introductory survey of European history from the Middle Ages to the Early Modern period. It begins chronologically with the fall of the Roman Empire, and concludes with the Protestant Reformation. Students will be introduced to three core themes. The first is the gradual emergence of a distinction between church and state in the Christian west, the second is the feudal organization of medieval societies, and the third is the development of intellectual life, including the origin of universities, natural law, and the Renaissance. Students will develop their knowledge as well as their skills in interpreting a variety of primary sources, including Medieval epic, theology, Renaissance art, political tracts, and archival documents including the Domesday book.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3116 Complex Emergencies and International Guidelines (10 Credit Points)
Subject Details (p. 3614)
Over the last five decades, the world has experienced historically significant disasters, which have occurred in many different forms including natural (e.g. Tsunami or drought) and human-induced (e.g. wars or ethnic conflicts), leading to an unplanned exponential increase in the number of international non-government response organisations. This subject examines the causes and consequences of disasters and the application of international guidelines governing humanitarian responses. It provides an outline of theoretical approaches to the understanding of the political aspects of emergencies and introduces real-life case studies that aim to engage students in critical thinking and improve their knowledge of the core humanitarian standard on quality and accountability; the humanitarian charter and minimum standards; and the challenges related to interagency coordination in emergencies.
Level: Undergraduate Level 3 subject
Equivalent Subjects: HUMN 2017 - Complex Emergencies and International Guidelines
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3117 Place-Making for Tourism and the Cultural Economies (10 Credit Points)
Subject Details (p. 3615)
The subject will explore the strategic use of practices and institutions like the arts, heritage, architecture and museums to enhance and attract creative economic activities. Theories that assist in framing and explaining these changes are presented and debated alongside exemplar and emerging case studies to encourage the analysis of space, culture and economic practice in contemporary contexts.
Level: Undergraduate Level 3 subject
Equivalent Subjects: CULT 3014 - Heritage Interpretation
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3118 Indigenous Cultures: A Global Perspective (10 Credit Points)
Subject Details (p. 3616)
Drawing on global case studies, this subject aims to introduce students to some of the pressing socio-cultural issues facing indigenous peoples around the world. The subject examines the complex relationships between globalisation, colonialism and post-colonialism and contemporary indigenous cultures and identities. It draws attention to the way in which issues of representation, cultural autonomy, cultural commodification, development and human rights play out with respect to indigenous peoples' lives. More specifically, the subject interrogates the power relations and politics central to many of these issues and examines the nature of contemporary indigenous and non-indigenous interactions, particularly in the contexts of tourism and heritage, the cultural industries, the environment, development and urbanisation.
Level: Undergraduate Level 3 subject
Equivalent Subjects: CULT 3016 - Indigenous Cultures A Global Perspective
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3119 Emergency Field Operations: Supply Management and Logistics (10 Credit Points)
Subject Details (p. 3616)
This subject will equip students with the required skills to assess organisational capacity to respond to disasters and other complex humanitarian emergencies. The subject will cover logistical frameworks and tools for planning, the sustainable deployment of goods and services, and monitoring and evaluating the effectiveness of local and global supply chains. It will discuss the challenges, ethical, and political dimensions of supply chains and contingency plans in emergency and disaster response contexts.
Level: Undergraduate Level 3 subject
Equivalent Subjects: HUMN 2022 - Emergency Field Operations Supply Management and Logistics
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 3120 AI and Society (10 Credit Points)
Subject Details (p. 3617)
AI is no longer only a topic of science fiction fantasy. It now answers questions, writes essays and code, manages customer service inquiries, and generates images, music and film. Its arrival poses new and critical questions about how technology impacts society. What does the effortless production of media mean for the future of education, work, culture, and governance? Does AI hold promise for key global challenges, from climate change to geopolitical instability? Or will it lead to rising inequality, alienation and corporate control? Trained on accumulations of media on the Internet, what are its effects on forms of social difference – gender, class, race, indigeneity, sexuality, disability? Students will develop critical literacy skills through introductions to the history, technical foundations, and current debates surrounding AI. The subject will involve a practice-based generative AI project, exploring issues of bias, plagiarism, copyright, ethics, misinformation and decision-making.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 4001 Researcher Development 1: Reading ,Writing, and the Business of Research (10 Credit Points)
Subject Details (p. 3618) Legacy Code: 800218
Research is the process of using knowledge to generate new understandings of the world. Research is also a social enterprise, with communities and norms of behaviour, and is an industry that is shaped by numerous cultural and economic forces. Taking a holistic approach that includes general research skill development, this subject focuses on four main topics: (1) critical reading, (2) effective writing, (3) research as a professional industry, and (4) the ethics of stewardship and personal responsibility. The subject equips students with vital skills that underpin their discipline-specific learning, and lays the ground for their development as professional researchers.
Level: Undergraduate Level 4 subject
Equivalent Subjects: HUMN 4009 - Research Design 1 Theories of Enquiry
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 4002 Researcher Development 2: Proposing and Justifying Research (10 Credit Points)
Subject Details (p. 3619) Legacy Code: 800220
An essential skill required by researchers is the ability to propose research and justify it in a persuasive manner. Through interactive workshops, Researcher Development 2 helps students develop and refine a research proposal. The subject includes workshops on research ethics that will help students articulate the significance and relevance of their work and will assist those requiring ethics clearance. The written proposal is defended through the oral Presentation of Proposal (POP). After successful completion of this subject, students will have demonstrated an ability to design and justify a research project in their discipline.
Level: Undergraduate Level 4 subject
Pre-requisite(s): HUMN 4001
Equivalent Subjects: HUMN 4010 - Research Design 2 Practices of Research
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 4003 Writing Beyond the Academy: Knowledge Translation and Public Audience Communication (10 Credit Points)
Subject Details (p. 3620) Legacy Code: 800219
It is now more important than ever for researchers to explain their research to the public. Although it can be challenging to translate specialist knowledge for non-specialist readers, this is the skill students will receive training for in Writing Beyond the Academy. By following the model of The Conversation, a widely popular knowledge translation platform, students will learn the principles of public audience writing, how to pitch to an editor and how to work with their feedback, and produce their own public audience essay.
Level: Undergraduate Level 4 subject
Equivalent Subjects: HUMN 4012 - Research Literacies
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 4006 Honours Thesis Part Time 2 (20 Credit Points)
Subject Details (p. 3621) Legacy Code: 101807
This unit is the second unit of the research project and thesis of the BSS Honours program and consists of a research project designed and implemented under the direction of an academic supervisor and research mentor. It is only available to students who have been accepted into the honours programmes for the following Bachelors degrees - Community Welfare, Policing, Social Science and Tourism Management. This unit is the culmination of studies for students who have completed their undergraduate degree and provides substantial training in research. Under staff supervision, students choose the particular topic for their research, design their own programme of research , perform the research and analyse the results. The production of a thesis is at the end of this process. Students describe the rationale for their topic, their research programme, ethical issues, results and their conclusions.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 4008 Honours Thesis Part Time 4 (20 Credit Points)
Subject Details (p. 3621) Legacy Code: 101809
This unit is the fourth unit of the research project and thesis of the BSS Honours program and consists of a research project designed and implemented under the direction of an academic supervisor and research mentor. It is only available to students who have been accepted into the honours programmes for the following Bachelors degrees - Community Welfare, Policing, Social Science and Tourism Management. This unit is the culmination of studies for students who have completed their undergraduate degree and provides substantial training in research. Under staff supervision, students choose the particular topic for their research, design their own programme of research , perform the research and analyse the results. The production of a thesis is at the end of this process. Students describe the rationale for their topic, their research programme, ethical issues, results and their conclusions.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 5001 Borders, Mobilities and Justice (10 Credit Points)
Subject Details (p. 3622)
What kinds of illegal activities occur between and across borders? What do governments mean when they refer to “illegal immigrants”? This subject has a critical human security focus that aims to distinguish between illegal activity across borders and highly politicised narratives around immigration and asylum seeking. By examining the tensions between security, order and justice, the subject will focus on the increased demand for immigration and resettlement in a world marked by political unrest, global pandemics, and climate change. As such, students will critically examine notions of human mobility and the physical, legal and discursive construction of borders, and what that means pre and post-immigration for certain segments of the global population. These issues will be explored through global perspectives and with an interdisciplinary focus, emphasizing the impact of global issues on human lives. One of the core aims of this subject is to give students the ability to critically appraise how current domestic and international practices deployed by governments can perpetuate humanitarian and security crises, as well as the ever-increasing inequality between rich and poor nations. By the end of this subject, students will be able to make theoretically informed recommendations across rapidly changing and comparative national and political contexts.
Level: Postgraduate Coursework Level 5 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 6001 Transnational Crime and Human Security Threat (10 Credit Points)
Subject Details (p. 3622)
Transnational crime generates serious individual and collective social harm, and poses human security threats at national, regional and international levels. It challenges states, exploits individuals, compromises economies and the environment, destroys civil society, and ultimately weakens democracy. This subject begins by assessing the concepts and definitions of transnational crime. Instead of offering a general overview of transnational crime, this subject focuses on various types of transnational crime and examines their emergence, impact, and control from a human security perspective, by examining how globalisation affects criminal organisations. While considering the security threat that transnational crime and criminal organisations pose at national and global levels, this subject aims to equip students with a holistic understanding of transnational crime beyond conventional criminological perspectives, hence nurturing students' ability to develop just and human security focused policies to prevent and control transnational crime.
Level: Postgraduate Coursework Level 6 subject
Equivalent Subjects: HUMN 7047 - Transnational Crime
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7001 Advanced Social Research Methods (10 Credit Points)
Subject Details (p. 3623) Legacy Code: 102177
Students in Advanced Social Research Methods concentrate on methods for collecting and analysing research data. The subject builds on the key research concepts established in 102175 Research in the Social Sciences, in particular research methodology. Advanced Social Research Methods provides students with an overview of research design and the methods for collecting and analysing research data within the broad spectrum of the social sciences. This includes purposes, strengths and limitations and applications to professional domains and/or discipline contexts. Students attend in-depth workshops on specific methods offered by practicing researchers to evaluate the merits of different research methods.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): HUMN 7036
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7002 Applied Imagination (10 Credit Points)
Subject Details (p. 3624) Legacy Code: 101651
This subject asks students to reflect upon imagination and its use in research, inquiry, and social action. It challenges students to develop an applied understanding of imagination in the development of creative responses to personal and social concerns. Underlying this exploration is a challenge to students to reflect upon the relationship between form, content and communication, objectivity and subjectivity, arts theory and practice, the writer, performer, artist and educator. The subject considers mediums for expression and communication; imagination as an analytical tool, and imagination as a means for understanding, communicating and enabling intentions and outcomes.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7003 Applied Innovation and Entrepreneurship (10 Credit Points)
Subject Details (p. 3624) Legacy Code: 800211
Entrepreneurial & innovative skills are more important than ever for today's graduates where applying creativity to drive commercial outcomes is commonplace both for those working inside organisations and those developing their own business. This subject, based on the fundamental principle of 'doing', proposes to deliver principles and content through a highly applied approach. This is a subject that teaches entrepreneurship in a fundamentally different way to the traditional course structures. The subject is delivered through Western Sydney University's highly successful "Launch Pad Innovation Centre" which provides both Tech Start-up and SME business support. This subject maximises the opportunity for real-world application by delivering through a case study driven approach and utilising a mix of presenters including: academia, business mentors, industry specialists from Launch Pad partners such as KPMG, NAB and government industry representatives, and actual start-up and SME business owners as guest lecturers.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): HUMN 7038 AND
HUMN 7005 AND
HUMN 7026 AND
HUMN 7037
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7004 Australian Cultural Policy and Practice (10 Credit Points)
Subject Details (p. 3626) Legacy Code: 102542
Understanding of Australia's cultural identity is essential for those who intend to engage in its promotion or in the management of cultural exchanges between Australia and other countries. This subject will describe the main features of Australian cultures including Indigenous culture, Western culture as inherited through settlement from Britain and elsewhere, and of multiculturalism arising from recent migration patterns. Students will study the history and current status of Australia's political institutions, its important international alliances and treaties, and the development of its independent foreign policy. An introduction will be given to Australia's major cultural management organisations and arts institutions (including invited guest speakers).
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7005 Career and Personal Development (10 Credit Points)
Subject Details (p. 3626) Legacy Code: 800198
A key skill in becoming a professional researcher is learning how to manage your career options. Fundamental aspects of this include making strategic choices regarding research focus and employment directions, learning to build professional networks both locally and internationally, and undertaking self-directed learning to continually expand your abilities and knowledge. This subject is designed to provide a structured approach to these aspects of career planning, and will include collaborative workshops where experienced researchers join the group to discuss the art of navigating around external constraints while forging your own path forward. As an early application of these principles, the subject involves completion of your Confirmation of Candidature proposal.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7006 China Culture Study (10 Credit Points)
Subject Details (p. 3627) Legacy Code: 102544
This subject provides students with opportunities outside the usual classroom experience. The subject uses knowledge acquired previously in the subject Chinese Cultural Policy and Practice and offers a real life application of this knowledge within a Chinese cultural context. Students will be required to travel to China for two to three weeks during their inter session break. While in China, they will visit important cultural and academic institutions and keep a daily diary of this experience. On their return to Australia students will be finalising assessment tasks required as part of this subject.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): HUMN 7007
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7007 Chinese Cultural Policy and Practice (10 Credit Points)
Subject Details (p. 3627) Legacy Code: 102541
China's relationship with Australia and the rest of the world is critical to Australia's future success. This subject offers a broad introduction to Chinese society, history and politics and will cover in more detail cultural developments, including the creative arts such as music, literature, visual arts and film, together with popular arts and the digital transformation of media and the arts. An outline of Chinese aesthetic theories, cultural policies and the work of critics will be presented. The roles of art institutions such as museums, galleries, performance companies and publishers will be considered, together with agencies involved in international cultural exchange such as translators, censors and copyright agencies. The study of the interplay of Chinese language, thought and culture will be an integral part of this subject. A case study of a particular cultural medium may be presented by an invited guest speaker. This subject may be further developed through the China Culture Study subject which is an alternate subject within the Master of Chinese Cultural Relations course.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7009 Critical and Creative Enquiry (20 Credit Points)
Subject Details (p. 3628) Legacy Code: 102628
This subject is designed to extend students' capacity to undertake critical and creative research in the arts therapies. Students will have the opportunity to work together and extend each other's work while undertaking a small research project that does not involve human research subjects. The theories and ethics of difference and diversity will be central to the process of enquiry. This includes formulation of research questions or problems, the choice and articulation of appropriate methodologies; data gathering and analysis; and the preparation of a research report. Students will learn to systematically question the dominant assumptions of their field and generate alternatives to a tendency for practitioner research to reproduce 'the same'.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): WELF 7008 OR
HUMN 7036
Equivalent Subjects: HUMN 7025 - Integrated Project LGYA 7525 - Integrating Theory Research and Practice
Incompatible Subjects: HUMN 7010 - Critical and Creative Enquiry WELF 7020 - Practising Research and Researching Practice
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7011 Cultural Diplomacy and Soft Power (10 Credit Points)
Subject Details (p. 3629) Legacy Code: 102543
This subject provides an introduction to key topics and debates in diplomacy and international relations. Relationships with other governments depend on diplomacy, which has been defined as the art of persuasion. Diplomatic modes, including those based on universalist values and those based on pragmatic self-interest will be considered and tested in the context of contemporary bilateral, regional and multilateral relations. The concepts of soft power and international public relations will be considered in the light of current cultural diplomacy campaigns, and tested through simulated role-play.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7012 Cyber Justice (PG) (10 Credit Points)
Subject Details (p. 3630) Legacy Code: 102424
This subject explores the evolving relationship between digital technology, justice and crime. How are the temptations and risks associated with harmful or illicit behaviour being re-shaped by information and communication technologies, by social media and the computer networks that increasingly hold organisations together? Cyber crime is typically understood as use of information and communication technologies to assist in the commission of other crimes, actions that target computer networks or software, or new offences that could only exist with the technology. Cyber justice meanwhile emphasises the use of information and communication technologies to improve access to justice and the efficiency of justice procedures, not just to deal with cyber crime. How does the law keep up with the emergence of new crimes and technology-enhanced versions of old ones, and how do forensic investigators and analysts contribute to this process? The subject examines how justice processes and spaces, as well as criminal networks and strategies, are being reimagined to take advantage of the new technologies.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7013 Debates in Global Interactions (10 Credit Points)
Subject Details (p. 3630) Legacy Code: 102341
The subject considers the history of the ways that different regions of humanity have interacted, since 1400. The subject will consider such topics as: ethnic-centrism (how to address it in historical and political knowledge?); the era of 'Pan Asia' (what does the rise of China and India mean for historical and political studies?); the prominence of 'nation' in historical knowledge (how to treat human history as 'global'?); the relationship of ethno-nationalism to globalization; the periodization of global history (turning points in the emergence of a global humanity); the determinants of difference and commonality in human history; the characteristics of 'empires'; the natural limits of humanity.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7015 Digital Humanities Research Methods (PG) (10 Credit Points)
Subject Details (p. 3631) Legacy Code: 102426
This subject investigates the methodological possibilities of digital technologies for interdisciplinary humanities and social sciences research. It covers several major digital research methods, exploring previous applications and examining their orientations and implications. Digital research methods and applications may include digitisation, online curation, visualisation, network analysis, geographical information systems, data mining and simulation. In the context of these, the subject will probe histories of technology and knowledge production, the evolution of digital texts and practices, and issues in contemporary culture such as digital design, gamification, virtual identity, and digital rights.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7017 Ecopedagogies (10 Credit Points)
Subject Details (p. 3632) Legacy Code: 102157
In simplest terms, ecopedagogies is teaching and learning in partnership with Nature. This interdisciplinary subject examines place-based theory and outdoor-experiential education. Research has repeatedly shown that outdoor experiential learning promotes health, well-being, cognitive advancement, growth and development for children, youth and adults. Correspondingly, the importance of ecopedagogies in this historical era cannot be underestimated. The precariousness of human/nature interrelationships compels us to explore new ways of learning and knowing and ecopedagogies provides new ways of connecting with the natural world. Further insight is gained through engaging with First Peoples' knowledge systems through the conceptualisation of 'country' and relational frameworks.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7018 Ecopsychology and Cultural Change (10 Credit Points)
Subject Details (p. 3632) Legacy Code: 101652
From 2020 students should note that core subjects are now taught in semesters rather than half yearly sessions. Ecopsychology is concerned with the relationship between human consciousness, human actions and environmental issues. It seeks to understand the sources, both phenomenological and socio-cultural, of the disjuncture between nature and psyche and to develop possibilities for personal and cultural re-connection and healing. Through applying experiential methods, critical inquiry and engagement with ecopsychological writings, students develop their awareness of "self", "nature", "culture" and explore the dynamics between them. The subject incorporates perspectives on ecological identity, ecospirituality and sense of place as ways of re-imagining the human-nature relationship and effecting ecologically-oriented change.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7019 Emergency and Disaster Management (10 Credit Points)
Subject Details (p. 3633) Legacy Code: 102575
This subject uses comparative analysis of different emergency responses to humanitarian disasters to provide students with the skills and knowledge required to play a role in future emergency and disaster management. Students will gain knowledge of the geo-political forces and key international frameworks and standards that shape humanitarian responses, and of the motivations and approaches of aid donors and humanitarian NGOs when intervening in states. They will also gain foundational knowledge of assessment of NGO capacities and organisational infrastructure for managing emergencies, for example their organisational structures and cultures, donor priorities, support systems and personnel.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7021 Fieldwork in Complex and Hostile Places (20 Credit Points)
Subject Details (p. 3633) Legacy Code: 800213
Working overseas is demanding and poses unique research challenges as well as risks to personal security and safety. This seven-day intensive subject teaches a range of applied research approaches, field skills, techniques and technologies to prepare students for operating safely overseas. The immersive scenario-based role-play learning is delivered at an off-site location. Drawing on United Nations accredited curriculum, the subject equips students with an appreciation for the major methodological, ethical, legal, logistical and personal challenges they are likely to confront when working 'in the field.' The subject is of special relevance to students seeking employment in Government and NGO sectors.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7022 Global Criminology and Human Rights (10 Credit Points)
Subject Details (p. 3634) Legacy Code: 102200
Global criminology is concerned with the process of respecting and fostering ideals of justice, the rule of law and human rights in an expanding range of transnational and domestic locations. These include stable, divided and post-conflict societies that are variously dealing with issues of discrimination, exploitation, insecurity and violence via international agreements, judicial and political means. The global development of justice initiatives has challenged the traditional criminological concern with individual offenders prosecuted by the sovereign nation state acting on behalf of a sole victim. In this subject students will gain a critical understanding of theories and concepts of global criminology, detail of the key aspects and uses of international criminal law, and the potential of alternative modes of attaining social justice. Case studies from around the globe will be analysed along with an emphasis placed on assessing the significance of issues, rights and justice reforms in developing regions.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7023 Global Health, Migration and Development (10 Credit Points)
Subject Details (p. 3635) Legacy Code: 102576
This subject introduces students to the intersection between global health, human migration and economic development. Students are introduced to international efforts to manage and support better health for all populations, particularly those under stress through civil conflict or epidemic. Through the lens of migration theories, the course will examine why and how people migrate, the dynamisms and complexities of migrants' settlement in their new environment, the socio-economic and political dimensions of forced migration and its consequences, and the relationship between voluntary migration and economic and development goals at regional, national and international level.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7024 Humanitarian and Development Agendas and Progress (10 Credit Points)
Subject Details (p. 3636) Legacy Code: 102577
This subject enables students to map the emergence of international humanitarian and development agencies from the mid-20th century to the modern day. Students will consider and asses international efforts to end poverty, such as the United Nations Conference on the Human Environment, the Rome Declaration and Plan of Action on World Food security, the Millennium Development Goals (MDGs) and the post-2015 Sustainable Development Goals (SDGs). A particular emphasis is placed on developing the skills to gauge the accountability and ethical approaches of humanitarian actors and agencies in global development.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7026 Knowledge Translation (10 Credit Points)
Subject Details (p. 3637) Legacy Code: 800199
Knowledge translation looks at how knowledge created through research can be applied in real world contexts. It takes research from the theoretical stage (i.e. "that's interesting, but so what?") to the applied stage where it can be used to create real impact. In this subject, we explore the two main processes of knowledge translation - communication and implementation. This is a highly collaborative subject where the interdisciplinary group meets to engage in general theoretical discussion and practice various knowledge translation activities based on our various fields of research.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7027 Leading Change (10 Credit Points)
Subject Details (p. 3638) Legacy Code: 102161
From 2020 students should note that core subjects are now taught in semesters rather than half yearly sessions. This subject explores change and leadership through a range of contexts. In this subject we critically analyse cultural, structural and political dimensions of change in organisations, systems and communities. This subject is grounded in leadership models that feature collaborative and relationship enhancing approaches to enable purposeful change.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7028 Management and Evaluation of Aid Programs (10 Credit Points)
Subject Details (p. 3638) Legacy Code: 102578
Evaluation of development aid and relief programs is an instrument for accountability and effective learning in terms of what works, for whom, in what circumstances, and at what cost. This subject uses critical and practical analyses to provide students with the skills and knowledge required to plan, implement, manage, and evaluate development aid and relief programs. Students are introduced to program planning and management strategies, types of evaluation approaches and their application, and evaluation dissemination utilisation. They gain practical skills to translate evaluation into policy and practice
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7029 Master of Social Science Thesis (40 Credit Points)
Subject Details (p. 3639) Legacy Code: 102040
This is a 40 credit point year-long subject taken over two terms (20 credit points in each term). This yearlong subject requires the completion of a research thesis and associated activities. The purpose of this subject is the completion of a research study building on the research subjects so far completed in the core subjects of the Master of Social Science. Students will work with a supervisor to frame, conceptualise, conduct and complete a research study and present a final research thesis.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): HUMN 7036 AND
HUMN 7045
Co-requisite(s): HUMN 7001
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7031 Political Economy of Development (10 Credit Points)
Subject Details (p. 3640) Legacy Code: 101895
The subject introduces students to the main theories and the diverse political economy dimensions of development. It consists of three modules. The first deals with key concepts that interrogate the meaning of development, origins of prosperity and the concepts of poverty, inequality and redistribution, which are contentious in their applications to various groups. The second module examines core issues in the political economy of development, which include globalisation, foreign aid, democracy, conflict and the role of the state. The last module engages with pertinent case studies focusing on Asia, the Pacific as well as problems with development in the Western world.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7032 Public Health in Complex Emergencies (Advanced) (10 Credit Points)
Subject Details (p. 3640) Legacy Code: 102574
The health, socio-economic, and political aspects of conflicts and disasters are complex and multidimensional, requiring political commitment and coordinated and effective prevention. This subject uses critical analyses to provide students with the skills and knowledge required to understand the politics of public health response in emergency situations. Students will be introduced to rapid health assessment protocols in, and health priorities and the prevention of public health effects of, complex emergencies. They will gain practical skills to evaluate and critically appraise the evidence used to inform public health policy and the effectiveness of different decision-making practices in emergency situations.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7034 Research Project in Cultural Exchange (40 Credit Points)
Subject Details (p. 3641) Legacy Code: 102545
In this subject you will undertake a research/development project in relation to cultural exchange with China. This may include professional involvement in a cultural exchange activity and/or a research project on an issue relating to cultural exchange. The activity will include researching the literature and interpreting this in relation to the chosen task in a research/project report. There is no class work. Each student will be supervised by a member of staff in the School of Humanities and Communication Arts.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): HUMN 4010
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7035 Research and Public Policy (10 Credit Points)
Subject Details (p. 3642) Legacy Code: 800212
Public policy can effect change in society at global, national and local levels. This subject examines public policy and the role of research in its development. Students will explore, analyse and understand the link between research and public policy, will receive guest lectures from experts in public policy development, and have the opportunity to produce a peer-reviewed public policy paper or article.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): HUMN 7038 AND
HUMN 7005 AND
HUMN 7026 AND
HUMN 7037
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7036 Research in the Social Sciences (10 Credit Points)
Subject Details (p. 3643) Legacy Code: 102175
From 2016 this subject replaced by 102357 - Ethics and Diversity in Research and Therapy for students enrolled in 4595-Master of Art Therapy only. This subject provides foundational skills and knowledge for research in the Social Sciences including contemporary developments such as digital and online research. It introduces key research concepts of epistemology, ethics, theory and methodology drawing on different fields of studies within the Social Sciences. The subject canvasses critical debates and approaches to research in the Social Sciences; the processes by which knowledge is created through research; and the purposes to which knowledge is applied in the Social Sciences. Finally, the subject focusses on developing student's skills and knowledge for developing research questions and research proposals.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: CULT 7005 - Research for Practice

HUMN 7037 Researcher Engagement and Impact (10 Credit Points)
Subject Details (p. 3644) Legacy Code: 800209
Maximising impact requires strategy. In addition to an extensive relationship-building with external parties as well as a general commitment to knowledge translation, achieving impact also means being strategic with research design from the earliest stages of project planning. Who is your research targeted to? What are the broader social aims of your research? Which individuals and organisations might have a stake in the outcomes of your research? What are the relevant disciplinary, policy, economic, industry, and social contexts for your research? What barriers or opportunities exist within these contexts? What social media and other communication platforms are available for you to transfer knowledge? What types of public communication should you engage in, and at what stages of your research? This subject will explore how to design research projects with such questions in mind, by combining collaborative workshops with assessments tailored specifically to your own circumstances. Whatever stage your research is at, you will have the opportunity to produce output that will feed into your broader impact or engagement objectives.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7038 Researcher Knowledge and Development (10 Credit Points)
Subject Details (p. 3644) Legacy Code: 800197
Researchers must have an in-depth knowledge of their research area and the appropriate methods used, as well as the ability to access and manage large amounts of information. This subject will provide students with the opportunity develop a range of literacies and cognitive abilities, culminating in the presentation of the student's Early Candidature Plan.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7040 Social Ecology (10 Credit Points)
Subject Details (p. 3645) Legacy Code: 102152
This subject focuses on learning in the context of social-ecological understanding. It asserts that ecological sustainability is a consequence of the understanding and enactment of social-ecological relationships. In this regard 'social ecology' describes a field of understanding while 'sustainability' describes praxis in a social-ecological context. Both experience and the understanding of experience - learning- are subject matter. This study is undertaken through reference to ecological systems of understandings in the context of challenges to that understanding. It is grounded in reference to learning, change, creativity, culture, politics and the physical environment. The subject introduces key theorists and invites students to examine their personal relationship to social-ecological learning.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: HUMN 7039 - Researching Social Ecology
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7041 Social Research in the Digital World (10 Credit Points)
Subject Details (p. 3646) Legacy Code: 102194
This subject provides a critical introduction to the opportunities and challenges of digital social research as well as the theoretical, methodological, and ethical implications of carrying out research in and on the digital. The social web provides researchers both with a tool and an environment to explore the intricacies of everyday life. In this subject, students will be immersed in online environments to further understand the theoretical, methodological and ethical issues of social research in the digital world. Through such activities, students participate as active digital researchers in online social science spaces to result in a professional online web presence and an in depth understanding of current and future research trends in digital social research.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7044 Theories of Difference and Diversity (10 Credit Points)
Subject Details (p. 3646) Legacy Code: 102176
This subject will introduce students at post-graduate level to contemporary theories and concepts of difference and diversity. The subject will particularly examine feminism, post-structuralism, new materialism, queer theory and critical realism. It will also address specific concepts such as inequality, human rights, freedom and marginalisation. It will apply these theories and concepts to investigations of contemporary social issues and debates related to race, disability, ethnicity, sexuality, gender and other categories of individual identity and collective belonging. The subject will provide a strong theoretical base to the work that students have undertaken in the subject Theories for Critical Practice, and inform the work to be undertaken in the other subjects in this specialisation.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7045 Theories of the Social (10 Credit Points)
Subject Details (p. 3647) Legacy Code: 102179
This subject examines the notions that humans are intrinsically social beings who are at once products of and producers of their own circumstances. By providing an overview and critical engagement with a wide array of social theories, the subject explores key aspects of human society including structure and agency; knowledge and power relations; culture and identity; class, economy and consumption; self, society and the public sphere; social change and social justice. Students consider the social, political and discursive processes through which theories are made and applied, and how theories may both limit and create possibilities for research and practice. Throughout the subject students will be encouraged to use critical social theory to not only expose and analyse social systems but also to engage in reflection about how theoretical perspectives can inform practices of change.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: HUMN 7043 - Theories for Critical Practice HUMN 7050 Theories of the Social
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7047 Transnational Crime (10 Credit Points)
Subject Details (p. 3648) Legacy Code: 102198
In 2023 this subject is replaced by HUMN 6001 Transnational Crime and Human Security Threat. In traditional criminology crimes have been understood as acts that breach the criminal code of a given nation state. By contrast, transnational crimes are defined as violations of law that embrace more than one nation in their planning, operation or impact. These crimes often have a much broader (though often veiled) relation to serious individual and collective social harm and can be especially difficult to prevent or investigate and prosecute. Students will be expected to understand the global and regional developments that foster transnational crime, its range and security impacts, and international agreements and conventions as well the new forms of policing developed to counter it.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7048 Understanding Race (10 Credit Points)
Subject Details (p. 3648) Legacy Code: 102601
What is race? What is racism? How are they related? Why do they continue to shape social, political and economic relations well after the biological concept of race was disproven? What are the links between race and colonialism and in Australia particularly, the invasion and settlement of Aboriginal land? How is race related to property? How do ideas of race become embedded in state institutions and why do they continue to shape disadvantage and inequality? Though race develops differently in different contexts, it is best thought about through relational readings that draw out both the differences but also the similarities between places and times. This subject will draw on race critical and decolonial texts to focus on race as a modern idea that is shaped in the contexts of colonialism, slavery, and persists in post-immigration multicultural societies.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7049 Violence, Culture and Criminal Justice (10 Credit Points)
Subject Details (p. 3649) Legacy Code: 102199
In recent decades, a new wave of racial, ethnic and religious violence and terrorism has been linked to rapid patterns of globalisation and tensions over group and national identities. Specific knowledge about violence and considerations about its real extent, causes and cultural meanings remain uncertain. Yet there is evidence of a recent general decline in violence with a significant role for legal and quasi-legal bodies for acknowledging injury, punishing previously 'deniable' violence and promoting reconciliation. Seminar topics in this course will include the global patterns and forms of violence; individual versus societal and historical explanations; biology, evolution and culture; gender, race and inequality; hatred, genocide, collective identity and psychoanalysis; the role of states and law in countering and condoning interpersonal and collective violence; debates about victimhood and the cultural symbols of violence and its memorialisation.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7051 How to Write History (10 Credit Points)
Subject Details (p. 3650) Legacy Code: 102661
This subject introduces students to specific styles of historical methodology, considering how each of these styles alter the kinds of questions historians ask, how they select their sources, and how they account for the differences between past and present. Students undertake an independent, guided Applied Project on a historical methodology relevant to their intended thesis project.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7054 Social Science Research Project (40 Credit Points)
Subject Details (p. 3650) Legacy Code: 102817
This subject requires students to design, plan and manage a research project using existing literature and/or data sets. Students will engage critically and analytically with the literature in the field, and undertake research to evaluate and report on research findings. Under the guidance of an academic supervisor students will develop a research question, conduct a systematic review of literature/write a case study/work on an existing dataset, and write a thesis on a topic related to the social sciences. Through this process, students will gain insight into the various components of the research process. Further, they will demonstrate an ability to identify issues, synthesise salient information, and articulate original ideas to make a practical contribution to the existing body of knowledge relevant to the social sciences.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: HUMN 7052 - Humanitarian and Development Research Project
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7055 Social Science Training Placement (40 Credit Points)
Subject Details (p. 3651) Legacy Code: 102818
This subject encompasses a three-month training placement (approximately 420 hours) which is designed to consolidate knowledge and skills in the area of contemporary humanitarian and development aid or in the overlapping arenas of international criminological issues such as trafficking, criminalisation and victimisation or other fields in the social sciences. Students will design, plan, implement and report their findings on a project or projects, during a placement with a domestic or international organisation in the community, the not-for-profit, or government sectors. Students will be required to undertake a specific, focused project or projects relevant to the host organisation's needs, as an opportunity to apply the skills, training and knowledge acquired through coursework in the Master of Humanitarian and Development Studies or the Master of International Criminology programs or other master's programs in social science related disciplines.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: HUMN 7053 - Humanitarian and Development Training Placement
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7056 Grant Proposals and Applications (10 Credit Points)
Subject Details (p. 3652) Legacy Code: 800226
Early career researchers engage in an exceedingly dynamic and competitive research and academic environment. They are expected to possess skills to successfully develop research projects, identify appropriate funding opportunities and communicate their knowledge by applying for research funding in line with their program of research. In this elective subject students will develop the knowledge and skills required to draft complex grant applications - using a framework that includes research design, hypotheses, research questions, and results - while communicating information in an accurate but accessible manner. Students will develop and refine their ideas for future research funding based on their knowledge gained across all the GCREDI subjects as well as their research studies. Students will communicate those ideas in practice through development of grant writing skills relevant to funding opportunities associated with their chosen career paths.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): HUMN 7038 AND
HUMN 7005 AND
HUMN 7026 AND
HUMN 7037
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 7057 Thirty-Day Research Placement (10 Credit Points)
Subject Details (p. 3653) Legacy Code: 800227
In this experiential learning subject, Graduate Certificate in Researcher Engagement, Development and Impact (GCREDI) students undertake a 30-day internship placement to experience current research practice, to develop professional networks, and to demonstrate and strengthen the transferable, professional and technical research skills they have developed through the GCREDI course and their HDR candidature. Completion of an internship gives research candidates the opportunity to strengthen their research career options and allows for further development of skills in research, planning, management, strategy, professional communication and leadership. The 30-day internship placement can be undertaken in an industry, government or non-government organisation, and is self-sourced by the student in consultation with the Subject Coordinator.
Level: Postgraduate Coursework Level 7 subject

HUMN 9007 Higher Degree Research Thesis - Translational Health Research Institute (80 Credit Points)
Subject Details (p. 3656) Legacy Code: 800194
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 9008 Higher Degree Research Thesis - Gender Specific Studies (80 Credit Points)
Subject Details (p. 3656) Legacy Code: 800023
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 9009 Higher Degree Research Thesis - History (80 Credit Points)
Subject Details (p. 3657) Legacy Code: 800019
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 9010 Higher Degree Research Thesis - Indigenous Studies (80 Credit Points)
Subject Details (p. 3658) Legacy Code: 800021
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 9011 Higher Degree Research Thesis - Social Ecology (80 Credit Points)
Subject Details (p. 3659) Legacy Code: 800029
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 9012 Higher Degree Research Thesis - Sociology (80 Credit Points)
Subject Details (p. 3660) Legacy Code: 800123
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 9013 Higher Degree Research Thesis PT - History (80 Credit Points)
Subject Details (p. 3661) Legacy Code: 800018
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HUMN 9014 Higher Degree Research Thesis - Writing and Society Research Centre (80 Credit Points)
Subject Details (p. 3661)
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

Teacher Education (TEAC)

TEAC 0001 English for Academic Purposes (EAP) - UWSCollege (10 Credit Points)
Subject Details (p. 5017) Legacy Code: 70061
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1006 Children's Literature and Digital Texts (10 Credit Points)
Subject Details (p. 5018) Legacy Code: 102630
This subject introduces key concepts in literature for children and young adults, examining theory and research related to literature; the diversity of literature and multi-literate environments; and the impact of social and cultural influences on literature. Through reading a wide range of literature, including literary classics, popular texts, graphic novels, picture books, in paper-based and electronic forms, students will identify the interrelationships between image and writing and ideological assumptions conveyed through these texts. It will focus on Australian literature, Aboriginal and Torres Strait Islander literature, Asian literature and bilingual texts.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1007 Creative Arts for Early Learning (10 Credit Points)
Subject Details (p. 5018) Legacy Code: 102664
This subject will engage students in developing a critical appreciation for the role of the arts in their own right, in society and in the early years. Students will develop appreciation for the relevance of the arts in children's play and identity formation, and as meaning making and communication tools. Opportunities for creative thinking and creative expression will be explored firsthand through introductory experiences and theory in the areas of drama, music, visual arts, dance and media arts. This subject is included in the Foundation Phase of the Bachelor of Education.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1008 Curriculum and Aboriginal Perspectives (10 Credit Points)
Subject Details (p. 5019) Legacy Code: 102115
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This subject is designed to introduce students to the characteristics of classrooms and curriculum implementation. Students will explore the structure of New South Wales/National curricula in all key learning areas, examine the perspectives which influence curriculum and the way in which curriculum is interpreted using Aboriginal and Torres Strait Islander perspectives. The subject provides an understanding of the importance of the art forms and Aboriginal ways of knowing as powerful teaching and learning strategies across the primary curriculum and as creative arts in their own right. This subject is included in the Foundation Phase of the Bachelor of Education.
Level: Undergraduate Level 1 subject
Equivalent Subjects: EDUC 2001 - Creative Arts 1 - AREP
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1010 Early Primary Mathematics (10 Credit Points)
Subject Details (p. 5020) Legacy Code: 102119
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This subject is designed to extend the development of mathematical concepts, skills and understandings for children from Kindergarten to Year 3 based on the NSW Syllabus for the Australian curriculum Mathematics K-6. An awareness of relevant research and curriculum documents, combined with the practical knowledge of teaching, learning and assessment strategies, will assist teachers to design and implement a series of experiences that will enhance the conceptual knowledge of their students.
Level: Undergraduate Level 1 subject
Equivalent Subjects: EDUC 1002 - Early Primary Maths (AREP)
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1011 Educational Psychology (10 Credit Points)
Subject Details (p. 5021) Legacy Code: 102636
This subject highlights the interacting contributions of biology and environment to the development of children and explores how teachers' knowledge of this process must inform their pedagogy. Specifically, this subject examines classic and current theories and research evidence-base relating to the biological, cognitive, social, emotional, and moral development of children and the implications of these for learning and classroom practice. It includes theoretical perspectives on the brain and learning including memory formation, retention and models of motivation, attention, and knowledge acquisition. This subject dispels common educational neuromyths and focuses on evidence-informed pedagogical practices that support learning, engagement, motivation, and wellbeing in culturally responsive classrooms. This subject is included in the Foundation Phase of the Bachelor of Education.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1012 English as an International Language (10 Credit Points)
Subject Details (p. 5022) Legacy Code: 102438
English is the first Global Language and the most important international Lingua Franca today. The teaching of English as a second or foreign language is a huge industry internationally, and a driver of export dollars in the Australian economy. The teaching of English as an International Language (EIL) is a new area of study and it is indispensable for any student seeking to gain a competitive edge in an international career. This subject is a key introductory subject in the International English Major. It is designed to equip graduates with marketable skills across multiple areas, including International Relations, Marketing and Business, Interpreting and Translation, and TESOL.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1013 Everyday Childhoods (10 Credit Points)
Subject Details (p. 5022) Legacy Code: 102665
In this subject students will engage in an exploration of what it means to be a child in a postmodern world and how different theoretical approaches influence ways of understanding children's lives. Alongside questions of how gender, sexuality, ethnicity, 'race', language, class, ability and religion are constituted through a child's identity, students will explore the notion of a child's subjectivity. A child's subjectivity is the conscious and unconscious thoughts and emotions of the child, their sense of self, their body and their way of understanding their relationship to the world. Building on this knowledge, students will also explore the four key child-environment identities of the physical child, the social child, the learning child and the natural child and by analysing a variety of scholarly and non-scholarly texts around the child's body and behaviour will reflect on a child's individuality and emerging identity.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1014 Experience-based Outdoor Education (10 Credit Points)
Subject Details (p. 5023) Legacy Code: 102206
In this subject students connect with the natural world through outdoor adventure activities. Students learn about themselves, others, and the environment through experiential activities. The subject focuses on self-reliance, resiliency, interdependence, managing personal risks, and the value of life-long outdoor recreation for enjoyment, health and well-being. This subject will involve a full day practical field trip in the outdoors as well as scheduled tutorials. The practical field trip is physically demanding whilst also extending students mentally and socially. Given the nature of the bushwalking field trip, participants require a moderate level of personal fitness.
Level: Undergraduate Level 1 subject
Equivalent Subjects: SPRT 1005 - Outdoor Recreation
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1017 Identity and Voice in Multimodal Texts (10 Credit Points)
Subject Details (p. 5024) Legacy Code: 102114
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. Aboriginal and Torres Strait Islander people's identities are depicted in a wide range of texts pertaining to expressions of and about Aboriginality. These various representations form the way Indigenous identities are constructed, projected and reflected in society often through the media. Students will examine how we then set in motion a better understanding of this phenomenon using carefully selected texts, the diverse nature of them and compare the outcomes; particularly the way they affect relationships between Indigenous and non-Indigenous Australians. The subject explores genres, voice, authority, identity, the complexities surrounding these debates and discourses, and how teachers are the advocates for negotiating power, space and voice for communities into the future. The examination of the portrayal of Aboriginal and Torres Strait Islander people in texts in a school context will be deconstructed so students understand the process of producing current and future identities. This subject is included in the Foundation Phase of the Bachelor of Education.
Level: Undergraduate Level 1 subject
Equivalent Subjects: EDUC 1003 - Indigenous Cultural texts in Education
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1020 Language and Literacy 1 (10 Credit Points)
Subject Details (p. 5025) Legacy Code: 102118
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. The subject examines ways of enhancing children's language learning through speaking, listening, reading and writing as they begin to create and understand the oral, written and visual texts of their environment. Current literacy and language theories are examined. The diverse needs of learners are considered and appropriate teaching strategies to develop literacy skills are explored. Students will appreciate children's literature and the way it can be used to promote literacy and language learning in a variety of early learning contexts K-2. The subject prepares individuals for more advanced subjects involving language and literacy, and primary English teaching specialisation.
Level: Undergraduate Level 1 subject
Equivalent Subjects: EDUC 2004 - Language and Literacy 1 - AREP
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1022 Literacy Skills for Teacher Education (10 Credit Points)
Subject Details (p. 5027) Legacy Code: 102112
This subject introduces students to the profession of teaching and examines key priorities that are central to the literacy demands on a teacher-educator. It aims to develop oral and written communication skills, skills in reading for academic purposes, and knowledge, skills and confidence in literacy and academic writing. The subject also provides a general orientation to University life, familiarising students with the language of tertiary institutions and the general requirements for progression and assessment.
Level: Undergraduate Level 1 subject
Equivalent Subjects: COMM 1029 - University Study Skills
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1024 Mathematical Patterns and Relationships (10 Credit Points)
Subject Details (p. 5028) Legacy Code: 102249
Students will use a variety of investigative techniques to highlight the evidence of patterns and relationships in mathematics. The inherent structure of mathematics will be approached through the examination of various mathematical systems. In addition, students will examine the nature of mathematical thought including inductive and deductive reasoning. This subject contributes directly to the achievement of a sound foundation in mathematics.
Level: Undergraduate Level 1 subject
Equivalent Subjects: TEAC 1025 - Mathematical Patterns and Relationships (WSTC)
TEAC 2041 - Mathematical Patterns and Relationships
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1025 Mathematical Patterns and Relationships (WSTC) (10 Credit Points)
Subject Details (p. 5029) Legacy Code: 700137
Students will use a variety of investigative techniques to highlight the evidence of patterns and relationships in mathematics. The inherent structure of mathematics will be approached through the examination of various mathematical systems. In addition, students will examine the nature of mathematical thought including inductive and deductive reasoning. This subject contributes directly to the achievement of a sound foundation in mathematics.
Level: Undergraduate Level 1 subject
Co-requisite(s): Students enrolled in the combined DiplomaBachelor programs must have passed or be enrolled in the College Preparatory subjects in order to enrol in this subject
Equivalent Subjects: TEAC 1024 - Mathematical Patterns and Relationships
TEAC 1040 - Mathematical Patterns and Relationships (Block)
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1028 Numeracy for Teaching (10 Credit Points)
Subject Details (p. 5030) Legacy Code: 102113
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This subject considers beginning teachers' own mathematics skills and knowledge and how they can use them to support their own numeracy. Primary school teacher education students need to feel confident and competent in their understanding of mathematics as well as in mathematics pedagogy. Students will use a variety of investigative techniques to increase their experience of patterns and relationships in mathematics. The inherent structure of mathematics will be approached through the examination of various mathematical systems and their relationship to the current mathematics K-6 syllabus. Mathematics is specifically taught within this subject to develop professional skills required to meet the demands of primary classroom teaching.
Level: Undergraduate Level 1 subject
Equivalent Subjects: EDUC 1007 - Numeracy for Teaching
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1029 Professional Experience 1: Introduction to Classrooms (10 Credit Points)
Subject Details (p. 5031) Legacy Code: 102117
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This subject is designed to introduce students to the characteristics of classrooms and curriculum implementation, Students will explore the structure of teaching, learning and curriculum in all key learning areas, with a particular focus on literacy and numeracy. They will examine the perspectives which influence the curriculum and the way in which curriculum is interpreted in the classroom environment. The subject will assist students in commencing the development of their professional portfolio with a ten day's practicum, focusing on professional experience and the work of teachers in primary classrooms.
Level: Undergraduate Level 1 subject
Equivalent Subjects: EDUC 1009 - Professional Experience 1 Introduction to Classrooms
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1030 Science and Engineering in Early Childhood (10 Credit Points)
Subject Details (p. 5032) Legacy Code: 102667
This subject will develop students' critical and meaningful understanding of the way in which engineering, science and technology shape our lives and the world we live in. It will extend students' understanding of how engineering, science and technology integrate and impact on each other and how they can be promoted in creative and meaningful ways in the learning environment. This subject will foster a positive disposition in students towards teaching and applying engineering, science and technology in diverse and multi-dimensional educational settings for children aged birth to 5 years. It will focus on investigation, critical thinking and problem solving as they relate to young children's learning processes. The subject will engage with relevant pedagogical approaches and the Early Years Learning Framework principles, practices and learning outcomes. This subject is included in the Foundation Phase of the Bachelor of Education.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1031 Sociology for Educators (10 Credit Points)
Subject Details (p. 5033) Legacy Code: 102629
This subject includes the study of society, culture, gender, ethnicity, sexuality and social class. It explores sociological understandings of the impact of the social on individuals and how this influences education, knowledge, society and change. The subject addresses the diverse needs of children in complex contexts. It provides students with opportunities to reflect on universal assumptions often imposed on children, families and communities, through applying analytical tools and developing their professional identity as critical reflexive educators. This subject is included in the Foundation Phase of the Bachelor of Education.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1032 The Developing Child (10 Credit Points)
Subject Details (p. 5033) Legacy Code: 102046
An in-depth knowledge of child development is essential for educators to plan and provide culturally and developmentally appropriate practices for children in the early years. In this context, this subject aims to explore the diverse nature, processes and aspects of children's development from conception to 12 years of age. The subject investigates the physical, socio-emotional, cognitive, language, moral, creative, spiritual and academic domains of development. Students will gather an understanding of the evolving methods used to develop theory about child development – from traditional case study approaches to contemporary brain research. The role of family, community, and other sociocultural influences will also be considered in relation to understanding the holistic nature of children's development. Students will apply their knowledge of theories and methods of child study in the compilation of a Child Portfolio. This subject is included in the Foundation Phase of the Bachelor of Education.
Level: Undergraduate Level 1 subject
Equivalent Subjects: TEAC 1033 - The Developing Child (WSTC) TEAC 1041 - The Developing Child (Block)
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1033 The Developing Child (WSTC) (10 Credit Points)
Subject Details (p. 5034) Legacy Code: 700273
An in-depth knowledge of child development is essential for educators to plan and provide culturally and developmentally appropriate practices for children in the early years. In this context, this subject aims to explore the diverse nature, processes and aspects of children's development from conception to 12 years of age. The subject investigates the physical, socio-emotional, cognitive, language, moral, creative, spiritual and academic domains of development. Students will gather an understanding of the evolving methods used to develop theory about child development – from traditional case study approaches to contemporary brain research. The role of family, community, and other sociocultural influences will also be considered in relation to understanding the holistic nature of children's development. Students will apply their knowledge of theories and methods of child study in the development of a Child Portfolio. Students must complete the WSU's online Child Protection Awareness Training before undertaking the Child Portfolio.
Level: Undergraduate Level 1 subject
Co-requisite(s): Students enrolled in the combined DiplomaBachelor courses listed below must pass all College Preparatory units listed in the course structure before progressing to the Year Two units
Equivalent Subjects: TEAC 1032 - The Developing Child
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1037 Exploring Patterns and Relationships in Mathematics (10 Credit Points)
Subject Details (p. 5036) Legacy Code: 102795
This subject supports pre-service teachers in the understanding of mathematical processes and content. Pre-service teachers will develop competence and confidence in the content areas of Number and Algebra, Measurement and Geometry; Probability and Statistics. They will be able to solve problems related to these areas and communicate their solution methods, using processes from the Working Mathematically strand. This subject is included in the Foundation Phase of the Bachelor of Education.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1038 Literacy and Numeracy for Educators (10 Credit Points)
Subject Details (p. 5037) Legacy Code: 102794
The primary purpose of this subject is to equip first-year students with personal literacy and numeracy skills necessary for their academic success. This subject aims to develop students' personal literacy and numeracy skills necessary for participating in academic and professional contexts. It also supports pre-service teachers as literate and numerate citizens to strengthen positive attitudes, skills, and knowledge about literacy and numeracy roles in everyday contexts. Students will have opportunities to develop their interpersonal, verbal and non-verbal communication skills. These skills are integral to the inherent requirements of a graduate teacher who are required to undertake the national literacy and numeracy test mandated by the Australian Government. Pre-service teachers will develop confidence and competence in their understanding of the roles of literacy and numeracy in society, with particular emphasis on problem-solving and effective communication in practical situations. Students will be provided with opportunities to develop critical self-awareness, self-regulation and the ability to organise oneself as a self-directed learner. Essential elements of academic scholarship, including information media literacy, understanding assessment, and academic integrity, will be developed. This subject is included in the Foundation Phase of the Bachelor of Education.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1039 Scientist, Artist, Teacher (10 Credit Points)
Subject Details (p. 5038) Legacy Code: 102821
This subject is designed to develop pre-service teachers' efficacy and identities in the content area of science and the arts. Building on the concepts of teaching-artists and scientist-as-teacher this subject gives future teachers agency to create innovative and transformative learning experiences for the primary classroom. In this subject students build on their content knowledge in science and the arts, as developed in the subjects Science and Technology in the Primary Years, and Creative Arts Education. They will develop science, performing arts (dance, drama and music), visual arts and media arts skills which can enhance their repertoire for the classroom. This subject will additionally explore the intersection of science and the arts, developing knowledge of creativity, aesthetics, innovation, artistic and scientific processes. It has been designed to give all students the opportunity to develop their knowledge, understanding, skills, confidence and competence in the science and the arts in discrete and integrated forms. This subject is included in the Foundation Phase of the Bachelor of Education.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1040 Mathematical Patterns and Relationships (Block) (10 Credit Points)
Subject Details (p. 5039) Legacy Code: 500072
Students will use a variety of investigative techniques to highlight the evidence of patterns and relationships in mathematics. The inherent structure of mathematics will be approached through the examination of various mathematical systems. In addition, students will examine the nature of mathematical thought including inductive and deductive reasoning. This subject contributes directly to the achievement of a sound foundation in mathematics.
Level: Undergraduate Level 1 subject
Equivalent Subjects: LGYA 2716 - Mathematics 1 Patterns and Relationships LGYB 2441 - Mathematics for K-6 Teachers TEAC 1025 - Mathematical Patterns and Relationships (WSTC) TEAC 2041 - Mathematical Patterns and Relationships TEAC 1024 - Mathematical Patterns and Relationships
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1041 The Developing Child (Block) (10 Credit Points)
Subject Details (p. 5040) Legacy Code: 500071
An in-depth knowledge of child development is essential for educators to plan and provide culturally and developmentally appropriate practices for children in the early years. In this context, this subject aims to explore the diverse nature, processes and aspects of children's development from conception to 12 years of age. The subject investigates the physical, socio-emotional, cognitive, language, moral, creative, spiritual and academic domains of development. Students will gather an understanding of the evolving methods used to develop theory about child development – from traditional case study approaches to contemporary brain research. The role of family, community, and other sociocultural influences will also be considered in relation to understanding the holistic nature of children's development. Students will apply their knowledge of theories and methods of child study in the development of a Child Portfolio. Students will apply their knowledge of theories and methods of child study in the development of a Child Portfolio. Students will complete Working with Children Check (WWCC) (or the equivalent in their home state), the NSW Department of Education's online Child Protection Awareness Training and Annual update as part of the subject.
Level: Undergraduate Level 1 subject
Equivalent Subjects: TEAC 1032 - The Developing Child TEAC 1033 - The Developing Child
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1042 Developing Literacy and Numeracy (10 Credit Points)
Subject Details (p. 5041)
This subject addresses how children and adolescents develop concepts in literacy and numeracy. The focus is on the effective teaching of literacy and numeracy across the curriculum, including explicit and culturally responsive strategies for linguistically diverse learners, including EAL/D students. There is a specific emphasis on how to teach oral language, phonics, reading, comprehension and writing strategies. Foundational mathematical concepts including number, algebra, geometry, measurement, and statistics are explored. Understanding the development of mathematical proficiency, fluency, problem-solving and reasoning is a key focus.
Level: Undergraduate Level 1 subject
Equivalent Subjects: TEAC 1038
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 1043 Information and Communications Technologies for Teaching and Learning (10 Credit Points)
Subject Details (p. 5041)
This subject will introduce, develop and apply innovative digital literacy skills needed to be successful in the teaching profession. The subject will address digital literacy as a multidimensional skill-set covering domains related to: i) searching, accessing, analysing, and critically evaluating information; ii) communicating and sharing information; iii) creating digital products; iv) safety, and v) problem-solving. The subject will focus on the digital learner, instructional design in digital contexts, e-safety, social media, intellectual property, and legal implications of ICT for teachers. The subject develops the critical digital literacy skills for teachers as determined by the Australian Professional Standards for Teachers. This subject is included in the Foundation Phase of the Bachelor of Education.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2001 Active and Healthy Childhoods (10 Credit Points)
Subject Details (p. 5042) Legacy Code: 102669
Early childhood educators are responsible for promoting the health, safety and wellbeing of young children from birth to five years including children from vulnerable backgrounds. This includes children from migrant, low SES, refugee and Aboriginal and Torres Strait Islander backgrounds. This subject focuses on developing students' understandings of holistic health, safety, nutrition, and wellbeing of young children. It also assists students to recognise the factors that impact on children's socio-emotional wellbeing and promote resilience. This subject promotes students' ability to identify, source, and apply relevant policies and resources to respond to children's emerging health and wellbeing issues in collaboration with various stakeholders and by taking into consideration the children's and families' rights, needs, values and cultural practices. This subject is included in the Development Phase of the Bachelor of Education.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2004 Being a Teacher (10 Credit Points)
Subject Details (p. 5044) Legacy Code: 102637
Theory and the practice of teaching are explored in depth in this subject. This subject explores the necessary teaching and interpersonal skills required to build positive relationships with students and manage the classroom. Students will develop skills in planning, implementing and evaluating the students' learning which are designed to meet school students' curriculum needs. It introduces students to a range of teaching strategies and assists with helping to identify when and why to use them. It explores how educational theories and practitioner research underpin and inform curriculum development and pedagogical practice. Integrated in the learning will be the use of information technologies. This subject will also facilitate students in developing a critical understanding of their individual progress towards satisfying the Australian Professional Standards for Teachers at the Graduate level. The knowledge and skills developed in the other subjects of study in the program can be applied in this and the Professional Experience subjects. This subject is included in the Development Phase of the Bachelor of Education.
Level: Undergraduate Level 2 subject
Co-requisite(s): TEAC 2048
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2005 Learning Through Play (10 Credit Points)
Subject Details (p. 5044) Legacy Code: 102670
This subject focuses on analysing the changing nature, contexts and multiple perspectives on children's play. Drawing upon classical and contemporary theories, it examines how educators can facilitate young children's development, authentic learning and wellbeing in prior-to-school contexts as they play. Students will apply their knowledge of theories of play pedagogy and the principles of The Early Years Learning Framework to consolidate their understandings of the importance of play for children birth to 5 years. Students will further develop skills in observing and analysing children's play and plan play experiences for young children. This subject is included in the Foundation Phase of the Bachelor of Education.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2009 Contemporary Childhoods (10 Credit Points)
Subject Details (p. 5046) Legacy Code: 102048
In this subject students will engage in an exploration of what it means to be a child in a postmodern world and how different theoretical approaches influence ways of understanding children's lives. Alongside questions of how gender, sexuality, ethnicity, 'race', language, class, ability and religion are constituted through a child's identity, students will explore the notion of a child's subjectivity. A child's subjectivity is the conscious and unconscious thoughts and emotions of the child, their sense of self, their body and their way of understanding their relationship to the world. Building on this knowledge, students will also explore the four key child-environment identities of the physical child, the social child, the learning child and the natural child and by analysing a variety of scholarly and non-scholarly texts around childhood, children's bodies and behaviour will reflect on a child's individuality and emerging identity. This subject is included in the Foundation Phase of the Bachelor of Education.
Level: Undergraduate Level 2 subject
Equivalent Subjects: TEAC 2012 - Contemporary Perspectives of Childhoods TEAC 2010 Contemporary Childhoods (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2010 Contemporary Childhoods (WSTC) (10 Credit Points)
Subject Details (p. 5047) Legacy Code: 700289
In this subject students will engage in an exploration of what it means to be a child in a postmodern world and how different theoretical approaches influence ways of understanding children's lives. Alongside questions of how gender, sexuality, ethnicity, 'race', language, class, ability and religion are constituted through a child's identity, students will explore the notion of a child's subjectivity. A child's subjectivity is the conscious and unconscious thoughts and emotions of the child, their sense of self, their body and their way of understanding their relationship to the world. Building on this knowledge, students will also explore the four key child-environment identities of the physical child, the social child, the learning child and the natural child and by analysing a variety of scholarly and non-scholarly texts around childhood, children's bodies and behaviour will reflect on a child's individuality and emerging identity.
Level: Undergraduate Level 2 subject
Co-requisite(s): Students enrolled in the combined DiplomaBachelor courses listed below must pass all College Preparatory units listed in the course structure before progressing to the Year Two units
Equivalent Subjects: TEAC 2009 - Contemporary Childhoods
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2011 Contemporary Issues in Aboriginal Education (10 Credit Points)
Subject Details (p. 5048) Legacy Code: 102121
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This subject is designed to meet the needs of teachers entering the profession who require in depth knowledge of the field which frames Australia's Aboriginal identity. It investigates both Aboriginal historical perspectives and interactions with educational institutions and the policies which frame the delivery of Aboriginal content and resources to all students. The subject provides a contextualised framework on which many Key learning area's perspectives and background knowledge delivery is based. The subject specifically relates to working successfully with Aboriginal children, families and communities in educational and social settings. It will examine relationships between Aboriginal and non-Aboriginal societies, social indicators and also critique the impacts of current policy changes in areas such as self-determination, representation, mutual obligation and perspectives for positive, respectful educational outcomes for future generations of students. This subject is included in the Foundation Phase of the Bachelor of Education.
Level: Undergraduate Level 2 subject
Equivalent Subjects: EDUC 1006 - Issues in Aboriginal Education
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2013 Creative Arts (10 Credit Points)
Subject Details (p. 5049) Legacy Code: 102125
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This subject introduces students to theoretical models and sound pedagogical practices of using Music, Media Arts and Visual Arts in the primary classroom. Collaborative, experiential and blended learning as well as reflective practices are the key operating principles of the subject. Students will explore the theory and practice of the arts in the education process of children through practical and professional experiences. The subject provides an understanding of the importance of the art forms, both as powerful teaching and learning strategies across the primary curriculum and as creative arts in their own right in the K-2 classroom.
Level: Undergraduate Level 2 subject
Equivalent Subjects: EDUC 2008 - Creative Arts 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2014 Cultural Diversity, Society and Learning (10 Credit Points)
Subject Details (p. 5050) Legacy Code: 102120
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. Teachers are required to understand the diverse cultural make up of schools and how to teach a diverse range of children. Using sociological and cultural theory, the subject examines conservative, liberal and radical approaches to cultural diversity in education. This cultural diversity includes dimensions of gender, religion, ethnicity, race, class, language and sexuality. The subject develops cultural literacy through the application of various theories such as Marxist and feminist-post structuralist analysis of these social relations to cultural diversity; pedagogy and cyberspace. Within this framework it is also essential that teachers engage with and understand the diversity and fluidity of individuals and the broader Australian community in order to promote equitable practices in schooling and to facilitate educational and professional transformation. Developing understandings of society, culture and the formation of subjectivities will promote an enhanced awareness of equity issues as well as crucial analytical and critical tools to address the needs of diverse students, their families, teachers, and the broader school community.
Level: Undergraduate Level 2 subject
Equivalent Subjects: EDUC 1001 - Cultural Diversity Society and Learning
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2015 Diversity and Difference (10 Credit Points)
Subject Details (p. 5051) Legacy Code: 101112
This subject introduces students to a range of contemporary theoretical frameworks that will develop their understandings about the social construction of difference, identity and subjectivity within social, historical and political contexts. A critical awareness of the intersections between language, knowledge, power and discourse provides students with the practical and theoretical tools necessary for reflecting, analyzing and deconstructing inequalities and subjectivity in personal and professional contexts. This subject is included in the Development Phase of the Bachelor of Education.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYA 0317 - Diversity and Difference 2 Understanding the 'Self' in Socio-Cultural Contexts
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2017 Education and Transformation (10 Credit Points)
Subject Details (p. 5051) Legacy Code: 101263
This subject provides opportunities for students to examine theories and practices associated with Transformative Learning in relation to their personal development as educators. Transformative Learning is learning that is empowering, deep and life changing. It and similar ways of approaching learning - the holistic, ecological and systemic - share a reflective base. All are inquiries into the relationships that make learning work. Students investigate these as theoretical and practical approaches to learning in real world settings: as powerful educational feedback systems. This subject combines the design and practical enactment of theoretically grounded approaches to socially relevant and personally meaningful learning.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2018 Education for Sustainability (10 Credit Points)
Subject Details (p. 5052) Legacy Code: 101663
Increasingly, the need to develop sustainable ways of living that can reduce our ecological footprint and conserve precious natural resources for future generations is recognised as a critical concern of education at all levels. Developing 'sustainability literacy' requires new ways of thinking and learning that enable us to recognise the connections between environmental concerns, social patterns and individual actions. This subject approaches key issues in sustainability education with a learner-centred approach that builds skills for inquiry, analysis and creative action and involves a three-hour field trip. It promotes personal and social change, develops civic values and empowers learners to be leaders for a sustainable future. This subject is included in the Foundation Phase of the Bachelor of Education.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2020 Educational Psychology for Teaching Children (10 Credit Points)
Subject Details (p. 5053) Legacy Code: 102126
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. Responsive teaching engages students holistically in learning that is tailored to meet their physical, cognitive, social, emotional and developmental needs. This subject will consider the learning needs and styles of primary children, including Indigenous children. It will introduce key approaches to instruction based on theories and research in educational psychology. A particular focus will be the development of children's sense of self and the ways that children's school experiences interact with cultural and familial influences to shape identity, motivation and engagement throughout the primary years. Particular emphasis is given to developing responsive teaching practices which promote social and emotional wellbeing of children and are underpinned by high-quality relationships which extend to include the valuing of families and the wider community.
Level: Undergraduate Level 2 subject
Equivalent Subjects: EDUC 2002 - Educational Psychology for Primary Teaching
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2021 Early Childhood Curriculum and Pedagogy (10 Credit Points)
Subject Details (p. 5054) Legacy Code: 102674
This subject supports a developing understanding of the principles and practices of early childhood curriculum and pedagogy. A range of approaches to curriculum and pedagogy will also be examined. Students will learn about approaches to observing and documenting children's learning in ways that celebrate children's competencies and build connections between children, families and educators while also identifying any areas where children's experiences may be extended. Students will develop strategies for planning and connecting curriculum to children's social worlds which facilitate children's in-depth investigations and critical thinking in ways that cater for diverse interests. This subject is included in the Development Phase of the Bachelor of Education.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2023 Engaging in Early Childhood Education (10 Credit Points)
Subject Details (p. 5055) Legacy Code: 102673
This subject incorporates 20 days of professional experience in an early childhood setting. Prior to external practicum work, students engage in intensive on campus coursework. The fieldwork introduces students to work in early childhood contexts while the coursework prompts students to reflect on the nature of early childhood teaching, their role as teachers in teaching and learning, the frameworks that guide practice and contemporary issues related to teaching young children. Students also apply skills in observation-based assessment of children's interests, development, dispositions and learning, explore curriculum decision making based on their assessments of learning and development and other strategies to facilitate children's engagement, learning and development. Students will immerse themselves in the setting and demonstrate capacity to work effectively with children Birth – 5 years. This subject is included in the Development Phase of the Bachelor of Education.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2024 Engaging with Children, Families, Colleagues and Communities (10 Credit Points)
Subject Details (p. 5056) Legacy Code: 102645
This subject explores the importance of engaging with children, families, colleagues and communities of diverse backgrounds to foster a child's learning, health and well-being. Preservice educators will reflect on complex interrelationships between theories, research, policies and practices and the importance of positive relationships and partnerships with children, families, colleagues, and communities. Students will explore discourses associated with disadvantage through the analysis of children's life experiences and contexts. In this way, preservice educators will gain an understanding of the nuances of working collaboratively and in partnership with children, families, colleagues, and communities, including strategies to work ethically, sensitively and confidentially. This subject is included in the Development Phase of the Bachelor of Education.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2025 English Language Analysis (10 Credit Points)
Subject Details (p. 5057) Legacy Code: 102439
In this subject, students will develop a thorough understanding of the structure of English and the use of English across contexts. Students will study the workings of the English language, including its sounds, grammar, syntax and textual forms, through the analysis of diverse texts. The skills developed through the analysis of real-world texts throughout the subject will prepare students for effective participation in a range of personal and professional contexts, enhancing their capacity for study and for employment.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2029 Fundamentals for Working Mathematically (10 Credit Points)
Subject Details (p. 5058) Legacy Code: 102208
In this subject students will acquire a variety of problem solving, investigation and mathematical modelling techniques that incorporate the application of algebra and highlight the importance of understanding probability, data and graphical representations in real life. Students will apply mathematics in real contexts; evaluate data gathered in real time and identify patterns while engaging with the concepts of number, probability, measurement, problem solving, linear and exponential representations. Engagement with this subject contributes directly to the achievement of a sound understanding and application of mathematical concepts and develops mathematical thinking.
Level: Undergraduate Level 2 subject
Equivalent Subjects: TEAC 2042 - Mathematics Principles and Applications
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2030 Health and Physical Education (10 Credit Points)
Subject Details (p. 5059) Legacy Code: 102124
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. Students will work on developing their knowledge and understanding of Health and Physical Education (HPE). This subject is designed to introduce the NSW Syllabus for the Australian Curriculum: Personal Development, Health and Physical Education K-10 (incorporating Health and Physical Education K-6). Through an examination of the syllabus, modules and support documents, students will develop the necessary skills to design an effective scope and sequence for K-6 Health and Physical Education (HPE) and develop a program of work suitable for a specific stage of learner K-2. Assessment and evaluation will be addressed and the need to develop descriptive student profiles relating to student achievement of outcomes will be highlighted.
Level: Undergraduate Level 2 subject
Equivalent Subjects: EDUC 2005 - Personal Development Health and Physical Education 1 (AREP)
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2031 History, Geography, Civics and Citizenship (10 Credit Points)
Subject Details (p. 5060) Legacy Code: 102122
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This subject provides opportunities for students to develop knowledge of the outcomes, subject matter, pedagogies and experiences that define the key learning area of History, Geography, Civics and Citizenship (HSIE). Key concepts of change in family history, local history, and Australia's history and understanding Australia as a Nation are explored. In Geography, concepts that develop a sense of curiosity about environments, peoples, cultures and place, in both Australia and the world, are a priority. In Civics and Citizenship, the focus is on relationships between the individual and the state, and the values and mutual responsibilities and obligations for civil, political and social participation in Australian society. It enables students to develop their own content knowledge and understandings, skills and dispositions necessary for planning, programming and teaching HSIE K-6. It promotes teaching strategies that prepare primary children for informed and effective citizenship, contributing to the quality of their society and environments.
Level: Undergraduate Level 2 subject
Equivalent Subjects: EDUC 2003 - Human Society and Its Environment (AREP)
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2032 Inclusive Education Practices (10 Credit Points)
Subject Details (p. 5061) Legacy Code: 102130
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. Teacher education students develop understanding and skills that enable them to understand and assess the intellectual, emotional, social and physical needs of all children in the classroom. This subject assists teacher education students to develop appropriate skills, attitudes and methodologies to enable them to plan, implement and evaluate programs which meet the educational needs of individual children with disabilities, learning difficulties and/or behaviour disorders as well as those who are gifted and talented. This subject also explores strategies and theoretical approaches which promote and enable inclusion and effective learning within the context of National and State policy and legislation.
Level: Undergraduate Level 2 subject
Equivalent Subjects: EDUC 2011 - Inclusive Education Practices - AREP
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2033 Indigenous Landscapes and Sustainability (10 Credit Points)
Subject Details (p. 5061) Legacy Code: 102133
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. The subject explores how Aboriginal ways of knowing country, and how tacit Aboriginal cultural knowledge embeds many of the principles of sustainability. Country defines First Nations people's identity and spirituality globally. The subject provides opportunity of the exploration and development of self and identity in terms of traditional stewardship practices that underpin the practice and principles related to the maintenance of place/country, language, spirituality. The subject builds awareness and understanding about Aboriginal 'ways of knowing' and 'caring' for Country. The subject provides community engagement opportunities for the exploration of oral traditions, language, writings about nurturing, visiting, talking, singing and feeling 'sorry' for Country. It will design a framework whereby as future educators they will be able to use an ecological approach to their teaching of significant global issues such as: sustainable land and energy use, the impact of human society on land and land management, global warming, the concept of self-sustaining systems and valuing sustainable patterns of living. The subject requires students to undertake visits to Environmental Field Studies Centres, the UWS Sustainability Subject and local cultural learning centres to work with Elders. This subject is included in the Development Phase of the Bachelor of Education.
Level: Undergraduate Level 2 subject
Equivalent Subjects: EDUC 2010 - Human Society and Its Environment 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2034 Language Assessment and Testing (10 Credit Points)
Subject Details (p. 5062) Legacy Code: 102475
This subject introduces students to fields of language assessment and testing in teaching English as a foreign/second language. It provides students with some insight into the key language components for assessment, assessment design and development. It also equips students with updated knowledge about different assessment approaches which impact on the teaching and learning of English as a foreign/second language in local and global contexts.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2037 Learning and Creativity (10 Credit Points)
Subject Details (p. 5063) Legacy Code: 101259
This subject examines the inter-related processes of learning and creativity and the application and practice of these in all aspects of life. Learning and Creativity is contextual. This context is personal, social, cultural and environmental. The subject content is critically positioned within diverse theories, with an emphasis on experiential learning and ongoing critical reflection. The subject promotes understanding of feeling and experience as much as concepts and ideas. It emphasises the tools and skills of learning, the everyday nature of creativity and enables students to develop and apply their creativity. It is designed for students interested in personal, community and cultural development, in the context of far reaching change.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2043 Numeracy and Mathematics in the Early Years (10 Credit Points)
Subject Details (p. 5064) Legacy Code: 102641
The subject will develop students' understandings of children's construction of mathematical and numeracy concepts during the years from Kindergarten to Year 3. Students will develop their ability to assess young children's mathematical understandings and numeracy development, and to provide learning experiences for a diversity of learners, including investigation and the use of digital technologies, to enhance the growth of children's mathematical thinking. The subject will study the NSW K-10 Syllabus in all of its strands, with a particular emphasis on the Working Mathematically strand. This subject is included in the Development Phase of the Bachelor of Education.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2046 Pedagogy and Praxis in Aboriginal and Torres Strait Islander Education (10 Credit Points)
Subject Details (p. 5066) Legacy Code: 102643
This subject is designed to meet the needs of early childhood, primary and secondary teachers who are required to develop their pedagogical approaches in order to become culturally responsive educators that meet the specific needs of Aboriginal and Torres Strait Islander learners. Preservice teachers examine current research which supports the teaching of Aboriginal and Torres Strait Islander learners their particular educational settings. Through their development as teacher professionals the subject will provide opportunities for future teacher professionals to demonstrate their application of these pedagogical approaches and explain how this shapes their future classroom practice. This subject provides foundational experiences to engage with Aboriginal and Torres Strait Islander history, culture and education educational experiences in NSW. It provides opportunities for preservice teachers to explore praxis which is underpinned by research. The subject requires educators to apply appropriate application of cultural protocols which enables future teachers to successfully work with Aboriginal children, families and communities in ways that maximise learning outcomes for Aboriginal learners in a range of educational settings. This subject is included in the Development Phase of the Bachelor of Education.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2048 Professional Experience 1: Working in Classrooms (10 Credit Points)
Subject Details (p. 5067) Legacy Code: 102639
This subject is designed to introduce students to the practical and pedagogical perspectives of becoming a teacher in the primary school context. As Pre-service Teachers, students will engage in the culture of schools to gain an understanding of how schools and classrooms operate. This professional experience provides opportunities for students to observe and engage in classroom organisation, classroom management strategies, lesson planning and delivery, and student/teacher interactions. Primary Professional Experience 1: Working in Classrooms has a two week (15 day) placement component. This subject is included in the Development Phase of the Bachelor of Education.
Level: Undergraduate Level 2 subject
Pre-requisite(s): TEAC 2062
Co-requisite(s): TEAC 2004
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2049 Professional Experience 2: School-based Learning (10 Credit Points)
Subject Details (p. 5068) Legacy Code: 102128
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. Students will have 20 days placement in schools. During these days students will work in partnership with classroom teachers to further develop and begin to put into practice their knowledge of curriculum and pedagogy. Students will observe classrooms, assist individuals and groups of students with their learning, and begin to teach lessons. By the end of the subject students will have taught lessons in all of the Key Learning Areas, assessed student learning and evaluated their teaching.
Level: Undergraduate Level 2 subject
Equivalent Subjects: EDUC 2007 - Professional Experience 2 School-based learning (AREP)
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2052 Science and Technology (10 Credit Points)
Subject Details (p. 5069) Legacy Code: 102123
This subject is designed to introduce the NSW Syllabus for the Australian Curriculum: Science K-10 (incorporating Science and Technology K-6), with a focus on K-2. The significance of children's views is emphasised in the selection, design and sequencing of activities for primary students in the development of science and technology experiences. Scientific concepts are considered in the context of distinct but related science and technology areas of built environments, information and communications, living things, natural phenomena, products and services, and Earth and its surroundings. Relevant science and technology content, together with strategies useful in developing primary science and technology knowledge, understandings, skills, processes, values and attitudes will be explored. The tutorials and assignments are designed to place student teachers in situations where they can focus on themselves as learners and to reflect on the implications of their learning and the learning of others in their future professional practice.
Level: Undergraduate Level 2 subject
Equivalent Subjects: EDUC 2006 - Science and Technology 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2053 Science and Technology in the Primary Years (10 Credit Points)
Subject Details (p. 5070) Legacy Code: 102644
This subject introduces students to the NSW Syllabus for the Australian Curriculum: Science and Technology K-6. It focuses on developing students' pedagogical content knowledge appropriate for teaching science and technology to learners in the primary years. This subject demonstrates how scientific and technological learning experiences can be developed to cater for the needs of the diverse groups of learners in primary schools, including English as an Additional Language or Dialect (EAL/D), Aboriginal and Torres Strait Islander and low socioeconomic status (SES) learners. Students will also focus on themselves as learners and reflect on the implications of their learning and the learning of others in their future professional practice. This subject is included in the Development Phase of the Bachelor of Education.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2054 Scientific Discovery and Invention (10 Credit Points)
Subject Details (p. 5071) Legacy Code: 102209
Scientific discovery and inventions have made a significant impact on contemporary society. Science is a dynamic, futures oriented, collaborative human endeavour arising from curiosity and interest. In this subject students explore science as a distinctive way of thinking about and explaining events and phenomena. This subject aims to develop students' understanding of the creativity of science and technology concepts and investigative and innovative processes. As the subject also aims to investigate the impact of scientific discoveries and inventions on society, students will examine how various perspectives, such as cultural (including Australian Aboriginal and Torres Strait Islander) perspectives, explain natural phenomena. This subject will benefit students interested in teaching as a career to design authentic learning programs that explore how scientific discovery and invention are applied in everyday life. This subject is included in the Foundation Phase of the Bachelor of Education.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2055 TESOL Teaching Methodology (10 Credit Points)
Subject Details (p. 5072) Legacy Code: 102474
This subject focuses on the process of teaching English as a foreign/second language. It aims to give students in the field of TESOL knowledge, skills and strategies in teaching such as choosing teaching approaches, selecting and sequencing language content, managing classrooms, evaluating and designing teaching and learning resources for a wide range of learner levels and types. The subject also aims to develop skills of critical reflection, action research and evaluation of their own practice for potential teachers.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2056 Teaching Art in the Early Years (10 Credit Points)
Subject Details (p. 5073) Legacy Code: 102671
This subject continues students' exploration of the creative arts and focuses on pedagogies to support the creative child. The role of the teacher and environment as art educators will be explored in detail, specifically the role of the pedagogical leader in facilitating meaningful, sustained and inclusive art experiences for the young child. Students will explore the relevance of the arts in the development of children's play and will engage with appropriate information and communication technologies for learning in the arts. Students will also draw from theory and research literature to critically analyse traditional and contemporary approaches to teaching the arts and the role of the teacher in supporting children's ability to make meaning from and express their social and cultural worlds. This subject is included in the Development Phase of the Bachelor of Education.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2058 Wellbeing and Promoting Positive Learning Environments (10 Credit Points)
Subject Details (p. 5074) Legacy Code: 102129
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. The purpose of this subject is for prospective teachers to develop an understanding of the individual and contextual factors which influence children's behaviour and to apply this knowledge to building and maintaining positive learning environments. The subject focuses on proactive and preventative measures through the establishment of a healthy learning ecology. It draws upon professional experiences to apply sound theoretical foundations to base approaches to responding to a range of student behaviours while simultaneously promoting student mental health, wellbeing and resilience. The subject provides support for the development of an integrated management plan that reflects the diverse nature of children's behaviour and is informed by both theory and a critical evaluation of personal and professional dispositions.
Level: Undergraduate Level 2 subject
Equivalent Subjects: EDUC 2013 - Personal Development Health and Physical Education 2 (AREP)
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2060 Developing Aboriginal Languages K-6 (10 Credit Points)
Subject Details (p. 5075) Legacy Code: 102747
This subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander education program. This subject introduces teacher education students to the developing and planning processes required to develop Aboriginal and Torres Strait Islander languages and LOTE opportunities across K-6. Students will engage with the complexities in teaching Aboriginal languages. As they engage with a diverse array of themes, debates and contested issues in Australia's Aboriginal language revitalisation programs they develop understanding about protocols and consultations that are required to deliver programs in schools. Students will learn to create culturally-responsive learning experiences for primary classrooms that embrace Aboriginal and Torres Strait Islander histories and cultures and develop skills and knowledge in teaching Aboriginal languages. This subject is included in the Transition Phase of the Bachelor of Education.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2061 Teaching K-6: Pedagogies, Priorities and Capabilities (10 Credit Points)
Subject Details (p. 5076) Legacy Code: 102749
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. The subject will develop students' knowledge and skills for planning and teaching in K-6 classrooms using both the Cross-Curriculum Priority Areas (CPPA) through the incorporation of the seven General Capabilities (GC). The subject enables the delivery of learning area content focusing on key learning areas, HSIE and English at the same time as developing knowledge, understanding and skills relating to Aboriginal and Torres Strait Islander histories and cultures, Asia and Australia's engagement with Asia and/or Sustainability. The subject will explore how Literacy, Numeracy, ICT capability and Critical and creative thinking are fundamental in students becoming successful lifelong learners whilst the areas of Personal and social capability, Ethical understanding, and Intercultural understanding focus on ways of being, behaving and learning to live with others, and taught through the HSIE and English learning areas.
Level: Undergraduate Level 2 subject
Equivalent Subjects: TEAC 1021 - Learning Teaching and Technologies
Incompatible Subjects: TEAC 2036 - Learning Futures and Curriculum Integration
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2062 Teachers as Change Makers (10 Credit Points)
Subject Details (p. 5077) Legacy Code: 102796
Through engaged learning, Teachers as Change Makers builds professional teaching skills by enhancing pre-service teachers' understandings of the clientele with whom they will be professionally involved as teachers. This subject includes a practical component requiring a minimum of 25 hours of engaged learning in primary schools that provide support to children from a range of diverse backgrounds and experiences. Through practical experience such as learning support programs, the subject explores the criticality of ethical understandings and teaching practices that may influence the educational outcomes of children. In particular, this subject focuses on promoting the importance of reciprocal and reflexive teaching approaches for providing inclusive settings that make a difference to children's educational experiences and provides a space to critically explore how teaching practices can empower students and communities. This subject is included in the Foundation Phase of the Bachelor of Education.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2063 History, Geography, Civics and Citizenship in the Primary Years (10 Credit Points)
Subject Details (p. 5078) Legacy Code: 102820
This subject provides opportunities for students to develop knowledge of the outcomes, subject matter, pedagogies and experiences that define the key learning area of History, Geography, Civics and Citizenship in primary (Kindergarten to Year 6) classrooms. Key concepts of change in family history, local history, and Australia's history and understanding Australia as a Nation are explored.
In Geography, concepts that develop a sense of curiosity about environments, peoples, cultures and place, are a priority. In Civics and Citizenship, the focus is on relationships between the individual and the state.? The values and mutual responsibilities and obligations for civil, political and social participation in Australian society are also explored. These areas enable students to develop their own content knowledge and understandings, skills and dispositions necessary for planning, programming and teaching. This subject promotes teaching strategies that prepare primary children to be informed and effective change agents. This subject is included in the Development Phase of the Bachelor of Education.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2064 Contemporary Childhoods (Block) (10 Credit Points)
Subject Details (p. 5079) Legacy Code: 500073
In this subject students will engage in an exploration of what it means to be a child in a postmodern world and how different theoretical approaches influence ways of understanding children's lives. Alongside questions of how gender, sexuality, ethnicity, 'race', language, class, ability and religion are constituted through a child's identity, students will explore the notion of a child's subjectivity. A child's subjectivity is the conscious and unconscious thoughts and emotions of the child, their sense of self, their body and their way of understanding their relationship to the world. Building on this knowledge, students will also explore the four key child-environment identities of the physical child, the social child, the learning child and the natural child and by analysing a variety of scholarly and non-scholarly texts around childhood, children's bodies and behaviour will reflect on a child's individuality and emerging identity.
Level: Undergraduate Level 2 subject
Equivalent Subjects: TEAC 2009 - Contemporary Childhoods TEAC 2010 - Contemporary Childhoods
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2065 Digital Childhoods (10 Credit Points)
Subject Details (p. 5080)
This subject aims to develop students' understanding of children and adolescents' engagement in a digital environment, and how their experiences contribute to their understanding of their world and their role within it. Students will critically explore multiple aspects of digital engagement. This will include the various ways that children and adolescents use technology; the educational, economic, social, cultural and political factors that mediate their experiences; and the implications of their digital engagement for play, learning, social engagements, and identity. Students will examine the social impact of technologies on children and adolescents, and identify strategies to deliver and effect ethical change. This subject is included in the Foundation Phase of the Bachelor of Education.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 2067 Being a Teacher (WSTC) (10 Credit Points)
Subject Details (p. 5080)
Theory and the practice of teaching are explored in depth in this subject. This subject explores the necessary teaching and interpersonal skills required to build positive relationships with students and manage the classroom. Students will develop skills in planning, implementing and evaluating the students' learning which are designed to meet school students' curriculum needs. It introduces students to a range of teaching strategies and assists with helping to identify when and why to use them. It explores how educational theories and practitioner research underpin and inform curriculum development and pedagogical practice. Integrated in the learning will be the use of information technologies. This subject will also facilitate students in developing a critical understanding of their individual progress towards satisfying the Australian Professional Standards for Teachers at the Graduate level. The knowledge and skills developed in the other subjects of study in the program can be applied in this and the Professional Experience subjects.
Level: Undergraduate Level 2 subject
Equivalent Subjects: TEAC 2004
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3003 Community Responsive Pedagogies and Leadership (10 Credit Points)
Subject Details (p. 5081) Legacy Code: 102139
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This subject is designed to build on students' sociological understandings of primary schooling and how it impacts on First Nation peoples.. The subject builds on experiential, theoretical and curriculum knowledge developed in the course. Schools have a long tradition of working with communities at the 'chalkface' of social change. Such relationships are complex, evolving and spatially/temporally different because of a local/global sense of place and the socio-political context. Possibilities for promoting socially just practices for different communities are therefore contingent upon a range of strategies for inclusion. This subject examines theoretical frameworks that can assist in understanding the complexities of these processes and will incorporate a 5 day community engagement activity involving First Nation peoples. This subject is included in the Transition Phase of the Bachelor of Education.
Level: Undergraduate Level 3 subject
Equivalent Subjects: EDUC 3001 - Communities and Primary Schools
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3004 Creative Arts Education (10 Credit Points)
Subject Details (p. 5082) Legacy Code: 102647
This subject explores the importance of the creative arts in the primary classroom, addressing the content and pedagogies appropriate to dance, drama, music and visual arts. This subject has been designed to give students the opportunity to develop their knowledge, understanding, skills, confidence and competence in the five art forms of creative arts. It also provides students with the opportunity to develop their planning and teaching skills in the creative arts, through exploring pedagogies for the teaching of practical arts classes. This subject develops students as teachers who demonstrate creativity when teaching, empathy with diverse groups of student learners, a commitment to socially just schools and classrooms and who understand artistic processes. It aims to give students an understanding of the role of aesthetics, imagination and play in learning. An independent learning program also encourages learners to develop their own arts skills in three strands. This subject is included in the Development Phase of the Bachelor of Education.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3005 Critical Literacies (10 Credit Points)
Subject Details (p. 5083) Legacy Code: 102678
This subject increases students' understanding of literacy as a dynamic, social and cultural practice. It explores the changing nature of literacy by globalisation, new technologies and the diversity of language/language dialects. Students will explore the importance of valuing children's culture, home language/dialect as an integral component to identity, particularly for bilingual and Aboriginal and Torres Strait Islander children. Issues of power and language are considered through social, cultural and critical theories surrounding diversity and difference, and how this shapes the decisions of educators to build the literacy capacities of all children. Students will learn about contemporary frameworks of literacy and language and draw on this knowledge to extend children's literacy learning. This subject is included in the Development Phase of the Bachelor of Education.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3006 Education in a Cosmopolitan Society (10 Credit Points)
Subject Details (p. 5083) Legacy Code: 101661
This subject responds to the question of what it might mean to educate "world teachers" for a cosmopolitan age where classrooms and schools are being shaped by the increasing mobility of ideas, people, technology, media and finance. For some time, multicultural education, as policy and practice, has dominated schooling in Australia. While this was an important period in Australia, times have changed. The globalisation of teaching is one dimension of this change as supranational bodies more and more shape what teachers do. Set against these global agendas are the mobilities that teachers must respond to at the local level. This subject examines cosmopolitan social and education theory as a means to understand these dynamics, framing teachers as agents of change.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3008 English Language Linguistics (10 Credit Points)
Subject Details (p. 5084) Legacy Code: 102476
In 2021, this subject replaced by 102813 - English Talk. This subject offers students a formal study of the workings of the English language as it is used around the world. Using real-world examples, this subject builds on the content and skills which students have developed in the unit: English as an International Language. It prepares students with a thorough knowledge of variations in English across the globe, introducing them to the ways in which English varies at phonological, grammatical and register levels across contexts. This subject is essential for a student's development of more formal skills in the English language, developing their English knowledge and skill into a professional and personal asset.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LANG 3099 - English Talk
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3009 Ethical Futures (10 Credit Points)
Subject Details (p. 5085) Legacy Code: 101623
This subject is designed to build the leadership capacity of educators through exploring, understanding and expressing the values and ethics embedded in policy, practice and educational change. The subject also addresses the importance of ethically informed advocacy and its role in educational futures and democratic processes. This subject is included in the Development Phase of the Bachelor of Education.
Level: Undergraduate Level 3 subject
Equivalent Subjects: TEAC 2047 - Policy Politics and Educational Futures
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3010 Health and Physical Education in the Primary Years (10 Credit Points)
Subject Details (p. 5085) Legacy Code: 102652
This subject is designed to explore the content and pedagogies of Health and Physical Education (HPE) in the PDHPE NSW K-6 curriculum. Students will develop an understanding of effective pedagogies of HPE. The knowledge and skills developed in this subject can be applied in the other subjects of study in the course and Professional Experience subjects. This subject aims to develop teachers who demonstrate empathy with diverse groups of student learners and commitment to socially just schools and classrooms. This subject is included in the Development Phase of the Bachelor of Education.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3012 Global and Community Citizenship in Early Childhood (10 Credit Points)
Subject Details (p. 5086) Legacy Code: 102675
This subject explores the key concepts of learning and teaching in the areas of history, geography, civics and citizenship, and incorporates place studies, sustainability and environmental education. Aboriginal and Torres Strait Islander studies in birth to 5 years early childhood settings are a focus in this subject. The subject will explore a broad, complex and engaging field of study which reflects people as social beings who interact together and with the environment through and over time. Perspectives including those of Aboriginal and Torres Strait Islander peoples, socio-cultural influences and place-based pedagogies will be investigated. Students will be encouraged to explore their own place in Australian society and the way in which this contributes to their professional identity and teaching practice. This subject is included in the Development Phase of the Bachelor of Education.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3013 Inclusive Practices (10 Credit Points)
Subject Details (p. 5087) Legacy Code: 102654
Effective and inclusive teaching requires knowledge of how students learn as well as proficiency in applying appropriately tailored teaching strategies to cater to needs of all students. The subject provides a foundation of knowledge and practice that facilitates development of appropriate and inclusive attitudes and skills for teaching learners with diverse needs in the regular classroom. It will address professional skills, approaches and relevant legislation in the implementation of the principles of inclusive education practices in primary school settings. In particular, the capacity to structure individualised education programs will be developed drawing on practical experiences and a broad familiarity with the field. This subject is included in the Transition Phase of the Bachelor of Education.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3014 Language and Literacy 2 (10 Credit Points)
Subject Details (p. 5088) Legacy Code: 102134
This subject will continue the development of students' understandings about language and literacy in a K-6 context. The subject will focus of the area of writing, including literary, factual, media and multi-media texts. Students will develop their theoretical knowledge about the teaching and learning of writing and the relationship between writing, reading, talking and listening.
Level: Undergraduate Level 3 subject
Equivalent Subjects: EDUC 2012 - Language and Literacy 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3015 Language and Literacy in Years 3-6 (10 Credit Points)
Subject Details (p. 5088) Legacy Code: 102650
The subject extends understandings of English content based on the strands of language, literature and literacy and the NSW Syllabus for the Australian Curriculum: English K-10 with a focus on years 3-6. Students will draw on contemporary theories of literacy learning and teaching, and will examine a repertoire of teaching and assessment strategies for deconstructing and constructing a range of texts in classrooms. By investigating a range of written and multimodal genres, their textual structures and grammar, students will develop their meta-semiotic awareness. This awareness is crucial when they plan to teach primary school students literacy skills related to various learning areas of the Australian Curriculum. In this subject, students' technological, pedagogical and content knowledge is progressively enhanced to prepare them to teach innovatively with digital media with simultaneous infusion of emergent language and literacy practices. This subject is included in the Development Phase of the Bachelor of Education.
Level: Undergraduate Level 3 subject
Pre-requisite(s): TEAC 3016 Language and Literacy in the Early Years or TEAC 1020 Language and Literacy 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3016 Language and Literacy in the Early Years (10 Credit Points)
Subject Details (p. 5089) Legacy Code: 102646
The subject examines ways of understanding English content based on the strands of language, literature and literacy in the Australia Curriculum: English and the NSW K-6 English Syllabus. Students will understand how language skills are acquired and introduced to theories related to language and literacy learning, particularly from a sociocultural perspective. Students will explore the relationships between language, literacy and literature across a range of contexts with the focus on children in the early years, aged five to eight. Students will also develop an understanding of current theoretical and pedagogical approaches for English language teaching and learning with a focus on culturally and linguistically diverse learners. Students will determine young children's speaking, listening, reading, phonological and graphological awareness, and writing strengths and needs and develop strategies for teaching students in the early years. This subject is included in the Development Phase of the Bachelor of Education.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3017 Learning Environments (10 Credit Points)
Subject Details (p. 5090) Legacy Code: 102679
This subject engages students in exploring the role of physical environments that support children's learning in early childhood and community settings. Theoretical perspectives, including Aboriginal and Torres Strait Islander perspectives, sociocultural influences and place-based pedagogies will be investigated. Relevant policy and regulation documents around risk, play and pedagogy will be examined. Through field visits to early childhood and community settings, students will have the opportunity to plan and design indoor and outdoor learning environments that encourage investigation and discovery using natural and open-ended materials. The overall focus of this subject is for students to develop an understanding and appreciation for learning environments that promote a connection to place and sustainability. This subject is included in the Development Phase of the Bachelor of Education.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3019 Numeracy and Mathematics in Years 3-6 (10 Credit Points)
Subject Details (p. 5091) Legacy Code: 102649
This subject explores pedagogy specifically relating to the teaching and learning of primary mathematics in years 3 - 6. This subject is one of 16 subjects that provide opportunities for students as Pre-service Teachers to prepare for their future employment as a teacher and to engage with the key elements of the New South Wales Education Standards Authority (NESA). Students will develop skills in pedagogy and practice within the area of primary mathematics. The knowledge and skills developed in the other subjects of study in the course can be applied in this subject and the knowledge and skills developed in this subject can be applied in other subjects in the course. This subject is included in the Development Phase of the Bachelor of Education.
Level: Undergraduate Level 3 subject
Pre-requisite(s): TEAC 2043 Numeracy and Mathematics in the Early Years or
TEAC 1010 Early Primary Mathematics
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3020 Professional Experience 2: Working with Assessment Data for Instruction (10 Credit Points)
Subject Details (p. 5092) Legacy Code: 102648
This subject focuses on student data and assessment in relation to Pre-service Teachers' curriculum specialisation. Students will develop the capacity to interpret student assessment data to inform their teaching as well as develop knowledge of formal and informal assessment strategies. The subject has a three-week (15 day) placement component, which provides opportunities to examine and interpret student data to inform planning and teaching. It also has one day on campus. Students will employ formal and informal assessment strategies to support student learning and inform teaching. Students are required to analyse their own learning in relation to the Graduate Teacher Standards as a review of the progress of their Learning Portfolio is undertaken in this subject. This subject is included in the Development Phase of the Bachelor of Education.
Level: Undergraduate Level 3 subject
Pre-requisite(s): TEAC 2048
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3021 Professional Experience 3: Engaging with Diverse Students and Communities (10 Credit Points)
Subject Details (p. 5094) Legacy Code: 102656
This subject provides students with the opportunity to participate in a 20-day professional experience set in the context of their future profession and under the supervision of qualified teachers. As Pre-service Teachers, students will develop an understanding of diverse learners within specific school and classroom contexts. Individual students' strengths, needs and learning styles will be identified to support the design and delivery of teaching experiences that will enhance engagement and learning. The subject also gives students an opportunity to reflect on the processes involved in the teaching cycle, and refine their competencies as beginning teachers. Students are required to analyse their own learning in relation to the Graduate Teacher Standards as a review of the progress of their Learning Portfolio. This subject is included in the Transition Phase of the Bachelor of Education.
Level: Undergraduate Level 3 subject
Pre-requisite(s): TEAC 3020
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3023 Professional Experience 4: Teaching in Country (10 Credit Points)
Subject Details (p. 5095) Legacy Code: 102141
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This subject will build on previous Professional Experience in the program. Students will be placed for 30 days in one of the partner local/regional/rural schools with a high Aboriginal and Torres Strait Islander student population. Students are required to develop skills related to effective planning, programming, evaluating and teaching in a teaching context, which will be assessed against the Graduate Teacher Standards and as part of their Teaching Performance Assessment (TPA). Students will experience how school and classroom curricula and policy are influenced by the nature of the school's community.
Level: Undergraduate Level 3 subject
Pre-requisite(s): TEAC 1029 AND
TEAC 2049 AND
TEAC 3040
Equivalent Subjects: LGYA 1486 - Professional Experience 3 Teaching in Context - AREP
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3026 Responsive Pedagogies (10 Credit Points)
Subject Details (p. 5097) Legacy Code: 102676
Responsive, respectful and reciprocal relationships with children are a basic tenet of early childhood education and lead to quality outcomes for children. Interactions among children, adults and environments are key to children's learning. Responsive pedagogies use a relationship-based approach to nurture children and families' unique dispositions, cultural and social strengths. This subject promotes respectful interactions that are associated with social justice, equity, inclusivity and ethical practice. Responsive interactions require teachers to be engaged, to connect and use diverse, nuanced knowledge of curriculum and content to extend children's learning and thinking. This subject is included in the Development Phase of the Bachelor of Education.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3028 Fostering Positive Behaviour in the Early Years (10 Credit Points)
Subject Details (p. 5098) Legacy Code: 102682
Educators have a key responsibility for guiding and facilitating young children's positive behaviours, their sense of belonging, and wellbeing. This subject provides students with an opportunity to analyse a range of theoretical approaches and various developmental and socio-cultural contextual factors that influence children's behaviours, learning and social interactions. Specifically, students will develop knowledge about diverse approaches to guiding children positively in partnership with families that are responsive to the children's needs, family's aspirations and expectations. Students will apply the legislative and ethical protocols in designing a guidance plan to support the development of positive behaviours and socio-emotional wellbeing in an early childhood setting. Students will also critically evaluate their personal and professional dispositions relating to guiding young children's positive learning and behaviours. This subject is included in the Transition Phase of the Bachelor of Education.
Level: Undergraduate Level 3 subject
Co-requisite(s): -
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3029 TESOL Curriculum Design (10 Credit Points)
Subject Details (p. 5099) Legacy Code: 102477
This subject explores issues, approaches and stages in the TESOL curriculum design process within a range of contexts. It assists students to identify and implement effective strategies for planning, designing and evaluating language learning programs relevant to the needs of the learners and the contexts of learning.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3030 TESOL Placement (20 Credit Points)
Subject Details (p. 5100) Legacy Code: 102478
This subject provides students an opportunity to undertake a professional practice subject which consists of an internship in an English language teaching organisation for students of TESOL. It involves participation in the various aspects of the work of the teaching organisation, including classroom observation, service learning, supervised English language teaching practice component, and volunteer tutoring either in Australia or overseas. In-context placement experience assists TESOL students' career development.
Level: Undergraduate Level 3 subject
Pre-requisite(s): TEAC 2055
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3031 The Brain and Learning (10 Credit Points)
Subject Details (p. 5100) Legacy Code: 102207
Interest in the relationship between the brain and how people learn is at an all-time high. Surprisingly, most theories of teaching and learning say little about the brain. In an age where 'brain-based' educational products are a multimillion-dollar industry, there is a need for students, parents, and anybody with an interest in education to have some basic knowledge of the brain. This subject is designed to provide students with a straightforward introduction into the limitations and possibilities of brain function, especially with respect to memory and learning. In addition, this subject also examines motivation, exceptional learners, and challenging groups.
Level: Undergraduate Level 3 subject
Equivalent Subjects: TEAC 3034 - Young People Their Futures and Education
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3032 Understanding and Teaching in Context (10 Credit Points)
Subject Details (p. 5101) Legacy Code: 102136
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. The subject aims to directly challenge students to inquire into, reflect upon, collect classroom data, analyse and respond to the data and subsequently begin to develop a repertoire of pedagogies that cater to the needs of learners within contexts which reflect the diversity of today's educational settings. The subject aims to develop skills related to effective planning, programming, evaluating and teaching in a wide variety of teaching contexts in Primary classrooms.
Level: Undergraduate Level 3 subject
Co-requisite(s): TEAC 3040
Equivalent Subjects: LGYA 1494 - Understanding and Teaching in Context - AREP
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3036 Data and Assessment in the Primary classroom (10 Credit Points)
Subject Details (p. 5102) Legacy Code: 102754
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This subject investigates the functions and roles of assessment in K-6 classrooms. It considers ways in which assessment can provide positive support that enhances students' progression within the school context. Teacher education students will review, refine and develop their knowledge and skills connected with being an assessment-literate teacher in their own classrooms. The subject will explore both national and international data sets and how these inform policy, classroom practices and professional roles into the future.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3037 Engaging in the Profession (10 Credit Points)
Subject Details (p. 5102) Legacy Code: 102755
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. Students need to have a variety of experiences that are set in the context of their future profession. Through these experiences they need to draw together, as a capstone, all the previous subjects in the course, integrating them through a well-balanced program that allows the students to refine their skills as beginning teachers. This gives them opportunity to reflect on the processes involved, identify their competencies and assist the school by recognising potential issues and assisting in implementation of the resulting praxis. This subject includes all areas of foundations and curriculum complementing a final practicum experience that will show the interrelationship between theory and practice. It also addresses issues that assist in the development of the individual student toward their transition into teaching. Students will produce a professional learning portfolio in this subject to demonstrate achievement of the Graduate Teacher Standards. The learning portfolio will enable students to reflect deeply on their emerging skills and understanding, towards development of a critical perspective of their practice as a teacher.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 1496 - Engaging the Profession - (AREP)
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3038 Health and Physical Education 2 (10 Credit Points)
Subject Details (p. 5103) Legacy Code: 102752
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This subject further builds students' knowledge and understandings of the NSW Syllabus for the Australian Curriculum: Health and Physical Education K-10 (incorporating Health and Physical Education K-6) with a focus on the personal development and health components. Through an examination of the syllabus, modules and support documents, students will develop the necessary skills to design an effective scope and sequence for K-6 Health and Physical Education (HPE) and develop a program of work suitable for a Year 5 - 6 learner. Assessment and evaluation will be addressed and the need to develop descriptive student profiles relating to student achievement of outcomes will be highlighted.
Level: Undergraduate Level 3 subject
Pre-requisite(s): TEAC 2030 AND
TEAC 2058
Equivalent Subjects: EDUC 2005 - Personal Development Health Physical Education 1 (AREP)
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3039 Mathematics 1: Geometry, Number and Algebra Years K-6 (10 Credit Points)
Subject Details (p. 5104) Legacy Code: 102751
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This subject is designed to enhance teacher education students' understanding of the NSW Syllabus for the Australian Curriculum: Mathematics K-10. The subject provides greater understanding of the content areas of measurement, number, geometry, algebra and statistics in the K-6 classroom focusing on years 5 and 6 and into the secondary school mathematics curriculum. The subject makes clear links to secondary school (year 7) mathematics and will develop the students' conceptual understanding of mathematics and numeracy learning progression from primary to secondary school.
Level: Undergraduate Level 3 subject
Pre-requisite(s): TEAC 1028 AND
TEAC 1010
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3040 Professional Experience 3 (10 Credit Points)
Subject Details (p. 5105) Legacy Code: 102750
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This subject is a 10 credit point subject. The subject is designed to enable students to have direct experience of teaching in schools, building towards a final professional experience. The Professional Experience stream integrates with the curriculum content and pedagogy delivered in other course subjects. The rationale behind this Professional Experience subject is to give students the opportunity to synthesise and apply their knowledge and skills from all previous subjects for a total of 20 days. The teaching block will enable students to build or cement relationships with a school community. Teacher Education students will be able to consolidate their teaching through the integration of theory and practice as their final preparation as beginning teachers.
Level: Undergraduate Level 3 subject
Pre-requisite(s): TEAC 1029 AND
TEAC 2049
Incompatible Subjects: TEAC 3022 - Professional Experience 3 Engaging with the Profession
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3041 Science and Technology 2 (10 Credit Points)
Subject Details (p. 5106) Legacy Code: 102753
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This subject is designed to enhance prior work in the science and technology areas with a particular focus on the primary years: 3 – 6. The significance of children's views is emphasised in the selection, design and sequencing of activities for primary students in science and technology experiences through the four content areas: Biological sciences, Chemical sciences, Earth and Space sciences and the Physical sciences. Emphasis will be given to Aboriginal and Torres Strait Islander science elaborations and to develop authentic locally driven, land based teaching of content and classroom resources.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3043 Reading Children's Literature and Digital Texts (10 Credit Points)
Subject Details (p. 5107) Legacy Code: 102798
In this subject students will gain knowledge and understanding about using children's literature and digital texts to teach reading, critical literacy, comprehension, media literacy and how texts convey meaning through choices in language (written) and images (visual). It will explore how children's literature and digital contexts can be used in a K-6 classroom for the teaching of the mechanics of reading, information literacy, comprehension skills (literal, implied, inferential), text design and the social construction of texts. It will develop students deeper understanding of the four resources model of reading and viewing: text decoder, text participant, text user and text analyst. This subject will examine literature experiences and practices in digital environments and the principles of interactivity, connectivity and access that now characterise the reading experience in the digital age. Through the subject, students will be introduced to a language to talk about both written and visual texts by focusing on the meaning making resources used in constructing the texts. This subject is included in the Transition Phase of the Bachelor of Education.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3044 STEM Principles and Practices in the Primary Years (10 Credit Points)
Subject Details (p. 5108) Legacy Code: 102797
The purpose of this subject is for students to gain exposure to authentic contexts for integrating science, technology, engineering and mathematics (STEM) and to develop knowledge and skills with designing and implementing STEM learning experiences. Students will have the opportunity to complete authentic interdisciplinary STEM tasks, and draw upon this experience to design and implement interdisciplinary STEM learning activities aligned to syllabus outcomes. This subject will allow students to simulate and evaluate the teaching practices associated with high-quality interdisciplinary STEM lessons. This subject is included in the Development Phase of the Bachelor of Education.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3046 Engaging Pedagogies (10 Credit Points)
Subject Details (p. 5108) Legacy Code: 102819
This subject focuses on the evidence basis and critical practice of effective pedagogy. It considers coherent and deliberate planning and sequencing of tasks and lessons including curriculum-aligned learning outcomes, assessment and feedback to support student engagement and mastery. It critically explores the use of responsive pedagogies for teaching, including explicit teaching, modelling and scaffolding. It evaluates the application of digital technologies and strategies for effective teaching. It challenges students to inquire and reflect upon contemporary issues that affect learning and teaching in classrooms, including working with students from low socio-economic backgrounds, culturally and linguistically diverse (CALD) students, students who have English as an additional language or dialect (EALD), Aboriginal and Torres Strait Islander learners, and students from diverse religious backgrounds. It enables students to investigate and consider a range of contemporary pedagogical approaches to facilitate substantive student engagement, and relate these to educational philosophy and contemporary learning theories. There are opportunities to consider the Quality Teaching Model and the Fair Go pedagogical model as frameworks that support student retention of information, engagement and connection to learning. This subject is included in the Development Phase of the Bachelor of Education.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3047 Pedagogical Leadership (10 Credit Points)
Subject Details (p. 5109) Legacy Code: 102822
Early childhood teachers have a significant role in providing the pedagogical leadership required to deliver quality early childhood services for children and families. This subject introduces key concepts of pedagogical leadership which are then applied in other subjects in the course. In this subject students examine a range of theoretical perspectives and approaches to curriculum and analyse the ways different theories and approaches shape pedagogical practices. Students will have opportunities to research contemporary theories of early childhood education, reflect on their own beliefs and values, refine their personal philosophy of teaching and learning, and consider the implications for their future role as pedagogical and educational leaders in early childhood settings. This subject is included in the Development Phase of the Bachelor of Education.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3048 Creative Arts 2 (10 Credit Points)
Subject Details (p. 5110) Legacy Code: 102851
This subject examines theoretical models and pedagogical practices for using Dance, Drama and Media Arts in primary classrooms and builds on the subject 102125 Creative Arts. Students will develop a range of skills required in the teaching of the arts that support young learner's self-efficacy and awareness. Aboriginal media and performing arts form the basis for strong cultural identity formations for all students. The subject focuses on positive media representations, personal histories and experiences that shape and influence Aboriginal and Torres Strait Islander peoples and their community life.
Level: Undergraduate Level 3 subject
Pre-requisite(s): TEAC 2013
Incompatible Subjects: TEAC 2059 - Creative Arts 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3049 Mathematics in Early Childhood (10 Credit Points)
Subject Details (p. 5111)
This subject explores the powerful mathematical and numeracy ideas that shape children's lives from birth to five years. Students will develop the ability to identify, assess and plan for young children's diverse mathematical and numeracy understandings, whilst using current curriculum frameworks and theoretical underpinnings to guide them. This subject will support students to make connections to mathematics and numeracy in everyday life, develop knowledge of effective pedagogical practices, and develop positive dispositions towards being a teacher of mathematics in the early years. This subject is included in the Development Phase of the Bachelor of Education.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3050 Professional Practice Birth - 3 Years (10 Credit Points)
Subject Details (p. 5112)
Students will complete a 30 day professional experience placement which includes a 10-day placement with children under the age of two years and a 20-day placement with children two – three years of age. Prior to the placement, students will engage in a series of workshops focused on developing their knowledge, skills and pedagogy. In this subject, there is a strong focus on building relationships with children, families and staff as well as adhering to work health and safety and the Australian Children's Education and Care Quality Authority's (ACECQA) National Quality Standard. Students will observe and assess children's play and learning within the socio-cultural context. They will use this knowledge to create and facilitate responsive and engaging play-based experiences that extend and enrich young children's learning. This subject requires students to apply the principles, practices and outcomes of Belonging, Being and Becoming: The Early Years Learning Framework for Australia (V2.0). This subject is included in the Development Phase of the Bachelor of Education.
Level: Undergraduate Level 3 subject
Pre-requisite(s): TEAC 2023 Engaging in Early Childhood
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3051 Creativity and Cultural Wellbeing for Communities (10 Credit Points)
Subject Details (p. 5113)
Creativity and cultural wellbeing explore how art making can foster individual, community wellbeing and global citizenship. Cultural wellbeing is broadly understood as the vitality of relationships between people, place and the freedom to participate in recreation, creative and cultural activities. In the practice-based modules students will experiment with art genres and reflect on how creative processes can facilitate embodiment, belonging, safe spaces for cultural expression, intergenerational wellbeing, relationship to place, creative agency and adaptability. Students will identify a social issue that is important to them or their community and apply design strategies to lead a creative community project.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 3052 Connecting with Regional, Rural and Remote Communities and Schools (10 Credit Points)
Subject Details (p. 5114)
This subject provides an opportunity to engage with rural, remote and regional schools and communities. The subject explores the context of regional, rural and remote schools and considers how localised communities can respond to learner needs to address equity and opportunities for further academic success. The subject focuses on how teachers can create a classroom of explicit teaching pedagogy and high expectations in these diverse settings. The subject explores how technology and pedagogy can be maximised to support remote learning. Teacher resilience and career planning in these contexts is explored as part of a continuous cycle of learning, teaching and leading. There is the opportunity for a short immersion and case study in a regional context in this subject.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 4002 Developing Primary Mathematics (10 Credit Points)
Subject Details (p. 5115) Legacy Code: 102135
The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This subject is designed to extend the development of mathematical concepts, skills and understandings for children from years 3 to 6 based on the Australian curriculum and the NSW Educational Standards Authority (NESA) requirements. An awareness of relevant research and curriculum documents, combined with the practical knowledge of teaching, learning and assessment strategies, will assist teachers to program and implement a series of investigative experiences that will enhance the conceptual knowledge of their students.
Level: Undergraduate Level 4 subject
Equivalent Subjects: EDUC 2009 - Developing Primary Mathematics (AREP)
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 4003 Early Literacies (10 Credit Points)
Subject Details (p. 5116) Legacy Code: 102684
This subject explores the history of literacy in the early years from different theoretical perspectives and the tensions between theory, expectations and practice. It breaks down language development for diverse learners and develops students' understanding of strategies to scaffold children's language learning and development when working in diverse community contexts. The subject builds on the previous subject of Critical Literacies and focuses the changing nature of literacy and the diverse literacy pathways individuals take up. Students will investigate the processes children go through when speaking, listening, reading and writing in the early years, and the interrelatedness of these processes to make meaning. Students will develop play-based, literacy-enriched experiences underpinned by contemporary literacy perspectives. This subject is included in the Transition Phase of the Bachelor of Education.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 4004 Leadership in Practice Leadership, Research and Practice (10 Credit Points)
Subject Details (p. 5117) Legacy Code: 102687
In this subject the complexity of leadership in early childhood contexts is explored. Students will analyse leadership theories and consider how the leadership role can and does influence the quality of practitioners' practices and Early Childhood Education and Care (ECEC) service provision. Students will reflect on their professional identity, values, experiences, knowledge and practices to develop a personal perspective of how effective leadership is enacted to lead staff teams and strengthen relationships. Students will also engage with the tenets of research as they investigate their own pedagogy and practice as emerging leaders of early education settings. Using an action research model to explore the processes of data collection, analysis techniques and literature review, students will have the opportunity to develop a portfolio in which they critically analyse their own practices and consider strategies to build their leadership capability and pedagogical practice. This subject is included in the Transition Phase of the Bachelor of Education.
Level: Undergraduate Level 4 subject
Co-requisite(s): TEAC 4009 - Professional Practice 3-5 Years
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 4006 Professional Experience 4: Transition into the Profession (10 Credit Points)
Subject Details (p. 5117) Legacy Code: 102659
Students will participate in a 30-day professional experience set in the context of their future profession and under the supervision of qualified teachers. This is the final professional experience subject in your degree. The completion of this Professional Experience recognises you as a conditionally qualified teacher. This subject aims to recognise your shift from pre-service teacher to beginning teacher. Students will be prepared by exploring issues involved in understanding the needs of learners within specific school and classroom contexts, and will design and teach experiences in ways that will enhance student engagement and student learning outcomes. The subject is designed to develop your professional identity and the importance of continued professional learning, the relationship between professional and community organisations in supporting educators, and how these influence student outcomes. It will build awareness of skills and practices that will help facilitate preservice teacher's personal wellbeing and resilience in their teaching career. The subject links theory and practice and enables students to construct new knowledge and new ways of practice as part of their transition into the teaching profession. In line with primary teaching specialisation requirements, your professional experience may focus on teaching, evaluating and assessing in the subject area of Science and Technology. Students are required to analyse their own learning in relation to the Graduate Teacher Standards through the completion of a Learning Portfolio and the TPA (Teaching Performance Assessment). This subject is included in the Transition Phase of the Bachelor of Education.
Level: Undergraduate Level 4 subject
Pre-requisite(s): TEAC 3021
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 4009 Professional Practice 3-5 years (10 Credit Points)
Subject Details (p. 5119) Legacy Code: 102686
The subject is the final professional experience subject in the Bachelor of Education (Early Childhood), comprising a 30-day placement with children aged 3-5 years. It has a strong focus on pedagogical leadership, initiating and sustaining collaborative partnerships with staff, children and families, and implementation of integrated curriculum through effective programming and planning. The subject facilitates in-depth investigation and critical thinking, preparing students to connect to children's social worlds and provide innovative, inclusive and meaningful learning environments. This subject requires students to apply the principles, practices and outcomes of Belonging, Being and Becoming: The Early Years Learning Framework for Australia (V2.0). This subject is included in the Transition Phase of the Bachelor of Education.
Level: Undergraduate Level 4 subject
Pre-requisite(s): TEAC 3050 Professional Practice Birth – 3 years
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 4010 Researching Professional Practice (10 Credit Points)
Subject Details (p. 5120) Legacy Code: 102657
The subject is designed to develop students' skills and expertise in investigating their own teaching in Science and Technology. The subject facilitates a researcherly disposition towards their own professional practice. Students will focus on a specific aspect of their teaching practice related to the concept of engagement and critically reflect upon their own evolving professional identity, philosophy and practice. The subject draws upon key principles and methods of participatory action research to facilitate students' skills and expertise as teacher-researchers. Students will plan an action research proposal that could be implemented in their future practice. This subject is included in the Transition Phase of the Bachelor of Education.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 4011 Inclusion in the Early years (10 Credit Points)
Subject Details (p. 5121) Legacy Code: 102685
Inclusion is both a right and an expectation for all children. Its effectiveness, however, depends upon teachers having the competencies, dispositions and skills to advocate for equity of access, participation and inclusion for children with a broad range of abilities within early childhood settings. In this subject, students reflect on the social construction of disability, policy and research in relation to the identification of additional needs, intervention and inclusion. Students will learn to assess curriculum and environments for learning, and to design, evaluate and communicate inclusive plans. The subject will focus on enhancing quality inclusive early childhood education through responsive adaptation and modification of the environment, curriculum and teaching practices. The importance of forming genuine partnerships with families and collaborating with the team around the child are advocated as essential for effective inclusion. This subject is included in the Transition Phase of the Bachelor of Education.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 4012 Teaching EAL/D Students in the Primary Years (10 Credit Points)
Subject Details (p. 5122) Legacy Code: 102799
The 2016 ABS Census reveals that Australia is a 'fast changing, ever expanding culturally diverse nation'. One in four Australian children come from language backgrounds other than English including children born in Australia and immigrants, refugees and asylum seekers arriving in Australia each year. Many of these students will require English language learning support in the classroom. This support will vary depending on learner needs and language proficiency. The focus of this subject is to provide initial education teachers with a foundation of theoretical principles related to teaching and learning English.
The emphasis will be on developing an understanding of appropriate classroom strategies within a mainstream, cross-curricula program, for learners of English as a second language including appropriate pedagogies for Aboriginal and Torres Strait Islander students.
This subject is included in the Transition Phase of the Bachelor of Education.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 4018 Management and Administration in Early Childhood Settings (10 Credit Points)
Subject Details (p. 5123)
Early childhood teachers work in complex and dynamic environments that are influenced by historical, social, cultural and political contexts. As advocates for quality children and family services that embrace social justice, inclusivity and equity, early childhood teachers must enact their ethical, legal and professional responsibilities. Early Childhood Education and Care (ECEC) services are similar to small businesses, requiring teachers to be knowledgeable about systems, strategies and processes to meet organisation goals and mandatory regulatory and licensing requirements. This subject builds students' foundational skills in strategic planning, policy development, staff management, conflict resolution and team building. Students will investigate effective management and administration dimensions, including human resources, marketing, financial accountability, governance and compliance processes. This subject is included in the Transition Phase of the Bachelor of Education.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5001 Aboriginal Studies Curriculum 1 (10 Credit Points)
Subject Details (p. 5124) Legacy Code: 102873
The subject will examine and model effective contemporary classroom practice in teaching Aboriginal Studies in Stages 4 and 5. The subject will provide opportunities to engage with the inquiry pedagogy. The specifics of the relevant NSW Education Standards Authority Years 7-10 Syllabuses and links with the K-6 curriculum will be analysed and critiqued as will current Australian and NSW educational/curriculum policies and priorities. Emphasis will be placed on principles underlying Aboriginal Studies teaching to develop innovative lesson and subject planning, choose relevant and creative texts and how to create authentic assessment tasks and apply consistent feedback for student learning. Opportunities for investigation and discussion of current research particularly related to the development of inquiry, concepts and skills will be presented. This subject is included in the Development Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7004 OR TEAC 7161 AND
TEAC 7032 AND
TEAC 7027 OR TEAC 7160
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5002 Aboriginal and Society Studies Curriculum 2 (10 Credit Points)
Subject Details (p. 5125) Legacy Code: 102874
The subject will build on Aboriginal Studies Curriculum 1 and examine and model effective innovative classroom practice in teaching senior Aboriginal Studies and Society Studies in Stage 6. The subject will provide opportunities to engage with the inquiry pedagogy and social science thinking. The specifics of the relevant NSW Education Standards Authority Years stage 6 Syllabuses will be analysed and critiqued as will current Australian and NSW educational/curriculum policies and priorities. Emphasis will be placed on principles underlying sociological and Indigenous studies teaching to develop innovative lesson and subject planning, choose relevant sources, and how to create authentic assessment tasks and apply consistent feedback for student learning. Opportunities for investigation and discussion of current research particularly related to the development of senior inquiry project, and subject specific concepts will be presented. This subject is included in the Development Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7004 OR TEAC 7161 AND
TEAC 7032 AND
TEAC 7027 OR TEAC 7160
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5003 Business Studies/Commerce Curriculum 1 (10 Credit Points)
Subject Details (p. 5126) Legacy Code: 102875
The subject will examine and model effective contemporary classroom practice in teaching Commerce in Stages 4 and 5. The subject will provide opportunities to engage with the inquiry pedagogy. The specifics of the relevant NSW Education Standards Authority Years 7-10 Syllabuses and links with the K-6 curriculum will be analysed and critiqued as will current Australian and NSW educational/curriculum policies and priorities. Emphasis will be placed on principles underlying Commerce teaching to develop innovative lesson and subject planning, choose relevant and creative texts and how to create authentic assessment tasks and apply consistent feedback for student learning. Opportunities for investigation and discussion of current research particularly related to the development of inquiry, concepts and skills will be presented. This subject is included in the Development Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7004 OR TEAC 7161 AND
TEAC 7032 AND
TEAC 7027 OR TEAC 7160
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5004 Business Studies/Legal Studies/Economics Curriculum 2 (10 Credit Points)
Subject Details (p. 5127) Legacy Code: 102876
The subject will build on Commerce/Business Studies Curriculum 1 and examine and model effective innovative classroom practice in teaching senior Business Studies, Legal Studies and Economics in Stage 6. The subject will provide opportunities to engage with the inquiry pedagogy and historical thinking. The specifics of the relevant NSW Education Standards Authority Years stage 6 Syllabuses will be analysed and critiqued as will current Australian and NSW educational/curriculum policies and priorities. Emphasis will be placed on principles underlying Business, Economics and Legal Studies teaching to develop innovative lesson and subject planning, choose relevant sources, and how to create authentic assessment tasks and apply consistent feedback for student learning. Opportunities for investigation and discussion of current research particularly related to the development of senior inquiry, and subject specific concepts will be presented. This subject is included in the Development Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7004 OR TEAC 7161 AND
TEAC 7032 AND
TEAC 7027 OR TEAC 7160
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5005 English Curriculum 1 (10 Credit Points)
Subject Details (p. 5128) Legacy Code: 102863
The subject will examine and model effective contemporary classroom practice to develop students' pedagogical content knowledge in the teaching of English. The subject will provide opportunities to engage with English teaching in all textual forms including spoken, written and visual forms to build meaning. The specifics of the relevant NSW Education Standards Authority Years 7-10 Syllabus and links with the K-6 curriculum will be analysed and critiqued as will current Australian and NSW educational/curriculum policies and priorities. Emphasis will be placed on principles underlying English teaching to develop innovative lesson and subject planning, choose relevant and creative texts to create authentic assessment tasks and apply consistent feedback for student learning. Opportunities for investigation and discussion of current research into the teaching of English and different approaches to the study of texts will be important. This subject is included in the Development Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7004 OR TEAC 7161 AND
TEAC 7032 AND
TEAC 7027 OR TEAC 7160
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5006 English Curriculum 2 (10 Credit Points)
Subject Details (p. 5129) Legacy Code: 102864
This subject extends pedagogical content knowledge about the teaching of English provided in English Curriculum 1. Responses to texts and composing meaning for communication, knowledge, enjoyment and agency for senior students is presented in this subject. Opportunities for quality literature of past and contemporary societies and engage with the literature and literary heritage of Aboriginal and Torres Strait Islander Peoples is provided. The design, selection and application of pedagogical choices for senior students in lesson sequences, text selections, subject planning and assessment is the focus of the subject. Professional learning and the critical discussion of educational research in teaching English is explored. This subject is included in the Development Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7004 OR TEAC 7161 AND
TEAC 7032 AND
TEAC 7027 OR TEAC 7160
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5007 EALD Curriculum 1 (10 Credit Points)
Subject Details (p. 5130) Legacy Code: 102865
The subject will examine theories and model effective pedagogies for teaching and assessing English as an Additional Language Dialect (EALD) students in diverse classrooms. The subject will provide opportunities to engage with strategies for teaching language proficiencies in spoken and written texts. Students will learn how to teach for meaning and understanding in language forms using syntax and semantic structures such as grammar and vocabulary. The specifics of the relevant NSW and Australian English Syllabus and curriculum documents will be analysed and critiqued. Emphasis will be placed on principles underlying EALD pedagogy to develop an understanding of the cultural and language barriers faced by EALD students. This subject is included in the Development Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): -
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5008 EALD Curriculum 2 (10 Credit Points)
Subject Details (p. 5131) Legacy Code: 102866
The subject will examine and model effective contemporary classroom practice in teaching senior EALD students. The subject will provide opportunities to engage with texts and writing within EALD. Relevant Stage 6 syllabuses and Australian curriculum documents will be explored. Emphasis will be placed on the core principles underlying EALD teaching. This subject will provide opportunities for students to develop innovative lesson and subject planning, choose relevant and creative texts and construct authentic assessment tasks for Stage 6 students. Opportunities for investigation and discussion of current EALD research particularly related to the development of cultural and linguistic capacity will be explored. This subject is included in the Development Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): -
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5009 Geography Curriculum 1 (10 Credit Points)
Subject Details (p. 5132) Legacy Code: 102871
The subject will examine and model effective contemporary classroom practice in teaching Geography in Stages 4 and 5. The subject will provide opportunities to engage with the inquiry pedagogy. The specifics of the relevant NSW Education Standards Authority Years 7-10 Syllabuses and links with the K-6 curriculum will be analysed and critiqued as will current Australian and NSW educational/curriculum policies and priorities. Emphasis will be placed on the principles underlying Geography teaching to develop innovative lesson and subject planning, choose relevant geographical tools, create authentic assessment tasks, and apply consistent feedback for student learning. Opportunities for investigation and discussion of current research particularly related to the development of geographical inquiry, concepts and skills will be presented.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7004 OR TEAC 7161 AND
TEAC 7032 AND
TEAC 7027 OR TEAC 7160
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5010 Geography Curriculum 2 (10 Credit Points)
Subject Details (p. 5133) Legacy Code: 102872
The subject will build on Geography Curriculum 1 and examine and model effective innovative classroom practice in teaching senior Geography in Stage 6. The subject will provide opportunities to engage with the inquiry pedagogy and historical thinking. The specifics of the relevant NSW Education Standards Authority Years stage 6 Syllabuses will be analysed and critiqued as will current Australian and NSW educational/curriculum policies and priorities. Emphasis will be placed on the principles underlying Geography teaching to develop innovative lessons and subject planning, choose relevant geographical tools, create authentic assessment tasks and apply consistent feedback for student learning. Opportunities for investigation and discussion of current research particularly related to the development of senior geographical inquiry, and subject specific concepts will be presented. This subject is included in the Development Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7004 OR TEAC 7161 AND
TEAC 7032 AND
TEAC 7027 OR TEAC 7160
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5011 HSIE Curriculum 1 (10 Credit Points)
Subject Details (p. 5134) Legacy Code: 102869
The subject explores the key concepts and approaches in Human Society and its Environment (HSIE) education. The subject will provide deeper opportunities to engage with inquiry pedagogy. The specifics of the relevant HSIE NSW and Australian syllabus and curriculum documents will be analysed and critiqued. Emphasis will be placed on principles underlying HSIE such as Aboriginal and Torres Strait Islander perspectives, Civics and Citizenship, sustainability and heritage. Opportunities to engage in site and field studies within HSIE will be a strong focus within the subject. The subject will comprise critical exploration of current research particularly related to the development of pedagogical inquiry and concepts. This subject is included in the Development Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): -
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5012 HSIE Curriculum 2 (10 Credit Points)
Subject Details (p. 5135) Legacy Code: 102870
The subject build upon curriculum subjects in Human Society and its Environment (HSIE) for teaching in Stage 6. The subject will provide deeper opportunities to engage with the critical inquiry pedagogy. The specifics of the relevant HSIE NSW Education Standards Authority Stage 6 Syllabuses will be explored. Emphasis will be placed on principles underlying HSIE such as Aboriginal and Torres Strait Islander perspectives, Civics and Citizenship, sustainability and heritage for senior students in relevant humanities and social science disciplines. Opportunities to engage in project based inquiry to support senior curriculum in HSIE will be a strong focus within the subject. The subject will comprise critical exploration of current research particularly related to the development of pedagogical inquiry and concepts for senior students. This subject is included in the Development Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): -
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5013 History Curriculum 1 (10 Credit Points)
Subject Details (p. 5136) Legacy Code: 102867
The subject will examine and model effective contemporary classroom practice in teaching History in Stages 4 and 5. The subject will provide opportunities to engage with the inquiry pedagogy. The specifics of the relevant NSW Education Standards Authority Years 7-10 Syllabuses and links with the K-6 curriculum will be analysed and critiqued as will current Australian and NSW educational/curriculum policies and priorities. Emphasis will be placed on principles underlying History teaching to develop innovative lesson and subject planning, choose relevant and creative texts and how to create authentic assessment tasks and apply consistent feedback for student learning. Opportunities for investigation and discussion of current research particularly related to the development of historical inquiry, concepts and skills will be presented. This subject is included in the Development Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7004 OR TEAC 7161 AND
TEAC 7032 AND
TEAC 7027 OR TEAC 7160
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5014 History Curriculum 2 (10 Credit Points)
Subject Details (p. 5137) Legacy Code: 102868
The subject will build on History Curriculum 1 and examine and model effective innovative classroom practice in teaching senior History in Stage 6. The subject will provide opportunities to engage with the inquiry pedagogy and historical thinking. The specifics of the relevant NSW Education Standards Authority Years Stage 6 Syllabuses will be analysed and critiqued as will current Australian and NSW educational/curriculum policies and priorities. Emphasis will be placed on principles underlying Modern and Ancient History teaching to develop innovative lesson and subject planning, choose relevant sources, and how to create authentic assessment tasks and apply consistent feedback for student learning. Opportunities for investigation and discussion of current research particularly related to the development of senior historical inquiry, historiography, and subject specific concepts will be presented. This subject is included in the Development Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7004 OR TEAC 7161 AND
TEAC 7032 AND
TEAC 7027 OR TEAC 7160
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5015 Languages Curriculum 1 (10 Credit Points)
Subject Details (p. 5138) Legacy Code: 102889
This subject explores contemporary and differentiated approaches to teaching Languages in secondary contexts. Students will use relevant syllabus documents to develop innovative and engaging lesson plans. Students will apply a range of effective teaching strategies designed to engage a diversity of learners in a supportive classroom environment. Digital and other aural/oral resources to assess and improve learning in the discipline to develop language acquisition and cultural understanding will be explored. Opportunities for investigation and discussion of current research particularly related to the development of cultural capacity in Languages teaching will be presented. This subject is included in the Development Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7004 OR TEAC 7161 AND
TEAC 7032 AND
TEAC 7027 OR TEAC 7160
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5016 Languages Curriculum 2 (10 Credit Points)
Subject Details (p. 5139) Legacy Code: 102890
This subject explores contemporary and differentiated approaches to teaching Languages in senior secondary contexts and builds on Languages Curriculum 1. Students will use relevant syllabus documents to develop innovative and engaging lesson plans that cater for a range of HSC language courses and levels. Students will apply a range of effective teaching strategies designed to engage a diversity of learners in a supportive, rich and culturally responsive classroom environment. Digital and other aural/oral resources to assess and improve learning in the senior years in the discipline to develop language acquisition and cultural understanding will be explored. Opportunities for investigation and discussion of current research particularly related to the development of cultural capacity in Languages teaching will be presented. This subject is included in the Development Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7004 OR TEAC 7161 AND
TEAC 7032 AND
TEAC 7027 OR TEAC 7160
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5017 Languages Curriculum 3 (10 Credit Points)
Subject Details (p. 5140) Legacy Code: 102891
In this subject, the place of Languages in secondary curriculum will be further explored using evidence-based approaches for curriculum development and alignment and to plan for effective teaching and learning, including formative and summative assessment. Pre-service teachers will learn approaches for teaching a range of Languages using inquiry pedagogy. They will a focus on assessment design for range of levels in Language teaching and the importance of culturally situated learning. The subject will demonstrate approaches for engaging diverse secondary learners from native speakers to beginners. Pre-service teachers will develop subject and assessment plans and demonstrate a knowledge of curriculum, learning and assessment theory. The subject requires students to develop original portfolio of teaching artefacts that demonstrate capacity to create and critique resources for effective teaching and learning in Languages.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7027 AND
TEAC 7004 AND
TEAC 7032
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5018 Languages Curriculum 4 (10 Credit Points)
Subject Details (p. 5141) Legacy Code: 102892
This subject provides pedagogical and curriculum enrichment to the teaching of Languages and builds on methods and concepts from earlier Languages Curriculum subjects. It explores approaches to language teaching; designing and implementing classroom language learning activities; developing the skills and knowledge to teach the language macro-skills of reading, writing, listening and speaking; classroom management; materials evaluation and selection; technological aids to language teaching/learning; reflecting on and evaluating teaching. Pre-service teachers will develop subject and assessment plans and demonstrate a knowledge of curriculum, learning and assessment theory. The subject requires students to develop critique resources and practices for effective teaching and learning in Languages.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7027 AND
TEAC 7004 AND
TEAC 7032
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5019 Mathematics Curriculum 1 (10 Credit Points)
Subject Details (p. 5142) Legacy Code: 102893
The subject will examine and model effective contemporary classroom practice to develop students' pedagogical content knowledge in the teaching of Mathematics. The subject will provide opportunities to engage with teaching Mathematics across strands and courses in years 7-10. The specifics of the relevant NSW Education Standards Authority Years 7-10 Syllabus and links with the K-6 curriculum will be analysed and critiqued as will current Australian and NSW educational/curriculum policies and priorities. Emphasis will be placed on principles underlying Mathematics teaching to develop innovative lesson and subject planning, choose relevant data and contexts to create authentic assessment tasks and apply consistent feedback for student learning. Opportunities for investigation and discussion of current research particularly related to the development of applied and inquiry based Mathematics learning will be presented. This subject is included in the Development Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7004 OR TEAC 7161 AND
TEAC 7032 AND
TEAC 7027 OR TEAC 7160
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5020 Mathematics Curriculum 2 (10 Credit Points)
Subject Details (p. 5143) Legacy Code: 102894
All students seeking a first secondary teaching area qualification must complete Years 11-12 Mathematics teaching methodology subject. The subject will examine and model effective contemporary classroom practice to develop students' pedagogical content knowledge. The specifics of the relevant Board of Studies NSW Years 11-12 Syllabus and links with the Years 7-10 curriculum will be analysed and critiqued as will current Australian and NSW educational/curriculum policies and priorities. Emphasis will be placed on principles underlying engaged inquiry teaching within the specific secondary subject, on creativity and quality teaching outcomes, on innovative program, subject and lesson planning and on the role of student data in authentic and appropriate assessment practices. Students will have opportunities for investigation and discussion of current research particularly related to sustainability and diversity in the teaching of the specific subject area. This subject is included in the Development Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7004 OR TEAC 7161 AND
TEAC 7032 AND
TEAC 7027 OR TEAC 7160
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5021 Mathematics Curriculum 3 (10 Credit Points)
Subject Details (p. 5144) Legacy Code: 102895
This subject enables students to extend their knowledge of Mathematics education with a particular focus on STEM in years 7-10. Students will explore their role in implementing the general capabilities of numeracy, both within the mathematics curriculum and in supporting the capable and confident use of mathematics across other learning areas at school and in society. A range of informed approaches to catering for the diverse needs of students to the middle years of schooling including intervention and appropriate challenge will be addressed. Issues in education such as Mathematics teaching for productive disposition will be explored with further professional and applied research into Mathematics education.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7027 AND
TEAC 7004 AND
TEAC 7032
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5022 Mathematics Curriculum 4 (10 Credit Points)
Subject Details (p. 5145) Legacy Code: 102896
This subject enables students to extend their knowledge of Mathematics education with a particular focus on differentiated and applied syllabuses in years 11-12. Students will explore their role in implementing the general capabilities of numeracy, both within the mathematics curriculum and in supporting the capable and confident use of mathematics across society and future work. A range of informed and evidence based approaches to cater for the diverse needs and challenges of students in the senior years of schooling will be addressed. Issues in education such as Mathematics self-efficacy, critical and creative thinking will be explored with further professional and applied research into Mathematics education for senior students.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7027 AND
TEAC 7004 AND
TEAC 7032
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5023 Mental Health in Educational Contexts (10 Credit Points)
Subject Details (p. 5146) Legacy Code: 102912
This subject is designed to promote the application and integration of current psychological and educational pedagogy, theory, evidence and best practice in supporting students who may be experiencing mental health challenges in educational settings. A problem-based approach to learning and teaching is used, employing case-based vignettes depicting various specific mental health presentations. Students are required to determine how they will develop student, classroom and curriculum level interventions to promote the wellbeing and learning of young people in educational settings. This occurs through small group work and self-directed research in which students are encouraged to utilise their prior knowledge in the topic area and identify the gaps in their knowledge as they attempt to solve the problem whilst being supported by their tutor and peers.
Level: Postgraduate Coursework Level 5 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5024 Music Curriculum 1 (10 Credit Points)
Subject Details (p. 5147) Legacy Code: 102877
The subject will examine and model effective contemporary classroom practice in teaching Music in Stages 4 and 5. The subject will provide opportunities to engage with the performance, production and composition principles related to the discipline of Music. The specifics of the relevant NSW Education Standards Authority Years 7-10 Syllabuses and links with the K-6 curriculum will be analysed and critiqued as will current Australian and NSW educational/curriculum policies and priorities. Emphasis will be placed on pedagogical content knowledge underlying Music teaching to develop innovative lesson and subject planning, choose relevant and creative texts, create authentic assessment tasks and apply consistent feedback for student learning. Opportunities for investigation and discussion of current research particularly related to the development of Music education. This subject is included in the Development Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7004 OR TEAC 7161 AND
TEAC 7032 AND
TEAC 7027 OR TEAC 7160
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5025 Music Curriculum 2 (10 Credit Points)
Subject Details (p. 5148) Legacy Code: 102878
The subject will build on Music Curriculum 1 and examines and models effective innovative classroom practice in teaching senior Music in Stage 6. The subject will provide opportunities to engage with inquiry pedagogy and historical thinking. The specifics of the relevant NSW Education Standards Authority Stage 6 Syllabuses will be analysed and critiqued as will current Australian and NSW educational/curriculum policies and priorities. Emphasis will be placed on principles underlying Music teaching to develop innovative lessons and subject planning, choose relevant tools, create authentic assessment tasks and apply consistent feedback for student learning. Opportunities for investigation and discussion of current research particularly related to the development of senior music performance, composition and production will be presented. This subject is included in the Development Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7004 OR TEAC 7161 AND
TEAC 7032 AND
TEAC 7027 OR TEAC 7160
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5026 Music Curriculum 3 (10 Credit Points)
Subject Details (p. 5149) Legacy Code: 102879
This subject in Music curriculum, explores in greater depth pedagogical content knowledge established in Music Curriculum 1, including general capabilities, cross-curriculum priorities and other allied materials. They will critique their prior knowledge and experience in the field and how these connect with the scope of the curriculum, identifying opportunities, challenges and responsibilities of Music teaching. Pre-service teachers will explore extended theoretical frameworks associated with teaching and learning in Music education. They will learn evidence-based approaches to plan for effective teaching and learning, including embedded literacy and numeracy, and the use of digital technologies. They will learn approaches for engaging learners and to meet the learning needs of diverse students. They will learn to compose good questions, arrange music compositions and analyse music forms and concepts.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7027 AND
TEAC 7004 AND
TEAC 7032
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5027 Music Curriculum 4 (10 Credit Points)
Subject Details (p. 5150) Legacy Code: 102880
This subject will explore the discipline of Music education in contemporary Australian society, and the senior secondary Music extension curriculum. The subject will investigate current evidence-based approaches for curriculum development for quality teaching and learning, including formative and summative assessment. Pre-service teachers will learn approaches for building knowledge and praxis of Music. They will learn approaches for engaging adolescent learners and differentiate the curriculum in the senior secondary years. They will further develop skills to shape the dialogic talk of the classroom. Pre-service teachers will formulate subject and assessment plans in order to demonstrate a knowledge of curriculum, learning and assessment theory. They will develop teaching resources for effective teaching and learning and to link with curriculum. They will critique curriculum implementation in current socio-cultural school contexts.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7027 AND
TEAC 7004 AND
TEAC 7032
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5028 PDHPE Curriculum 1 (10 Credit Points)
Subject Details (p. 5151) Legacy Code: 102885
The subject will examine and model effective contemporary classroom practice to develop students' pedagogical content knowledge in the teaching of Personal Development, Health and Physical Education (PDHPE). The subject will provide opportunities to engage with teaching PDHPE across health and practical skills strands in years 7-10. The specifics of the relevant NSW Education Standards Authority Years 7-10 Syllabus and links with the K-6 curriculum will be analysed and critiqued as will current Australian and NSW educational/ curriculum policies and priorities. Emphasis will be placed on principles such as games-sense theory that inform PDHPE teaching. This subject will develop current and applied skills in innovative lesson and subject planning, choose relevant data and contexts to create authentic assessment tasks and apply consistent feedback for student learning. Opportunities for investigation and discussion of current research particularly related to the development of applied and health based learning will be presented. This subject is included in the Development Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7004 OR TEAC 7161 AND
TEAC 7032 AND
TEAC 7027 OR TEAC 7160
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5029 PDHPE Curriculum 2 (10 Credit Points)
Subject Details (p. 5152) Legacy Code: 102886
This subject explores contemporary and differentiated approaches to teaching Personal Development, Health and Physical Education (PDHPE) in senior secondary contexts and builds on PDHPE Curriculum 1. Students will use relevant syllabus documents to develop innovative and engaging lesson plans that cater for a range of senior learners. Students will apply a range of effective teaching strategies designed to engage a diversity of learners in a supportive, safe and culturally responsive classroom environment. Digital and practical resources to assess and improve learning in the senior years in the discipline will be developed. Opportunities for investigation and discussion of current research particularly related to the development of Health Education will be explored. This subject is included in the Development Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7004 OR TEAC 7161 AND
TEAC 7032 AND
TEAC 7027 OR TEAC 7160
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5030 PDHPE Curriculum 3 (10 Credit Points)
Subject Details (p. 5153) Legacy Code: 102887
In this subject, pre-service teachers will consider the place of Health education in contemporary Australian society and explore programs in Physical Activity and Sports Studies (PASS). They will explore a range of evidence-based approaches for curriculum development and alignment in PASS and to plan for effective teaching and learning, including formative and summative assessment. Pre-service teachers will learn approaches for building knowledge of Health education and how to provide constructive feedback and reporting. This subject will require students to engage in teaching practical skills in areas such as sport, recreational, combat games, physical fitness activities and physical activity for remediation and therapy.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7027 AND
TEAC 7004 AND
TEAC 7032
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5031 PDHPE Curriculum 4 (10 Credit Points)
Subject Details (p. 5154) Legacy Code: 102888
In this subject, pre-service teachers will consider the place of Health education in contemporary Australian society and explore senior programs in Community and Family Studies (CAFS) and Sport Lifestyle and Recreation Studies (CEC). They will explore a range of evidence-based approaches for curriculum development and alignment in CAFS and CEC and to plan for effective teaching and learning, including formative and summative assessment. Pre-service teachers will learn approaches for building knowledge of Health education and how to provide constructive feedback and reporting. This subject will require students to engage in teaching wellbeing, positive relationships, responsible care and appreciation for diversity and interdependence in community contexts.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7027 AND
TEAC 7004 AND
TEAC 7032
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5032 Science Curriculum 1 (10 Credit Points)
Subject Details (p. 5155) Legacy Code: 102897
The subject will examine and model effective contemporary classroom practice to develop students' pedagogical content knowledge in the teaching of Science. The subject will provide opportunities to engage with teaching Science across strands and programs in years 7-10. The specifics of the relevant NSW Education Standards Authority Years 7-10 Syllabus and links with the K-6 curriculum will be analysed and critiqued as will current Australian and NSW educational/curriculum policies and priorities. Emphasis will be placed on principles underlying Science teaching to develop innovative lesson and subject planning, choosing relevant data and contexts to create authentic assessment tasks and applying consistent feedback for student learning. There will be a focus on the development of laboratory skills and techniques including aspects of general and mandatory safety requirements. Opportunities for investigation and discussion of current research particularly related to the development of applied and inquiry-based Science learning will be presented. This subject is included in the Development Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7004 OR TEAC 7161 AND
TEAC 7032 AND
TEAC 7027 OR TEAC 7160
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5033 Science Curriculum 2 (10 Credit Points)
Subject Details (p. 5156) Legacy Code: 102898
The subject will explore senior Science curriculum to develop pre-service teachers' pedagogical content knowledge in the teaching of Science across Biology, Chemistry, Earth and Environment and Physics. The subject will provide opportunities to engage with teaching Science across a range of programs in years 11-12. The specifics of the relevant NSW Education Standards Authority Stage 6 Science Syllabus will be analysed and critiqued as will current Australian and NSW educational/curriculum policies and priorities. Emphasis will be placed on principles underlying Science teaching to develop innovative lesson and subject planning, choose relevant data and contexts to create authentic assessment tasks and apply consistent feedback for student learning. There will be a focus on the development of laboratory skills and techniques including aspects of general and mandatory safety requirements. Opportunities for investigation and discussion of current research particularly related to the development of applied and inquiry-based Science learning will be presented. This subject is included in the Development Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7004 OR TEAC 7161 AND
TEAC 7032 AND
TEAC 7027 OR TEAC 7160
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5034 Science Curriculum 3 (10 Credit Points)
Subject Details (p. 5157) Legacy Code: 102899
The subject will examine and model effective contemporary classroom practice to develop students' pedagogical content knowledge in the teaching of Science related to STEM. The subject will provide opportunities to engage with teaching STEM projects connected to Science across strands and programs in years 7-10. The specifics of the relevant NSW Education Standards Authority Years 7-10 Syllabus, STEM Syllabus and links with the K-6 curriculum will be analysed and critiqued as will current Australian and NSW educational/curriculum policies and priorities. Emphasis will be placed on principles underlying Science and STEM teaching to develop innovative lesson and subject planning, choose relevant data and contexts to create authentic assessment tasks and apply consistent feedback for student learning. There will be a focus on the development of laboratory skills and techniques including aspects of general and mandatory safety requirements. Opportunities for investigation and discussion of current research particularly related to the development of applied and inquiry-based Science learning will be presented.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7027 AND
TEAC 7004 AND
TEAC 7032
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5035 Science Curriculum 4 (10 Credit Points)
Subject Details (p. 5158) Legacy Code: 102900
The subject will explore senior Science curriculum to develop pre-service teachers' pedagogical content knowledge in the teaching of Investigating Science and Science Extension. The subject will provide opportunities to engage with teaching interdisciplinary Science. Emphasis will be placed on principles underlying Investigating Science and Science Extension teaching to develop innovative lesson and subject planning, choose relevant data and contexts to create authentic inquiry project based assessment tasks and apply consistent feedback for student learning. There will be a focus on the development of laboratory skills within the context of Investigating Science and techniques including aspects of general and mandatory safety requirements. Opportunities for investigation and discussion of current research particularly related to the development of applied and inquiry-based Science learning in Science Extension will be explored in depth.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7027 AND
TEAC 7004 AND
TEAC 7032
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5036 Technology Curriculum 1 (10 Credit Points)
Subject Details (p. 5159) Legacy Code: 102881
The subject will examine and model effective contemporary classroom practice to develop students' pedagogical content knowledge. The specifics of the relevant Technology Syllabus and links with the K-6 curriculum will be analysed and critiqued as will current Australian and NSW educational/curriculum policies and priorities. Emphasis will be placed on principles underlying engaged inquiry teaching within the specific secondary subject, on creativity and quality teaching outcomes, on innovative program, subject and lesson planning and on the role of data in authentic and appropriate assessment practices. Students will investigate and discuss current research particularly related to sustainability and diversity in the teaching of specific technology areas. This subject is included in the Development Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7004 OR TEAC 7161 AND
TEAC 7032 AND
TEAC 7027 OR TEAC 7160
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5037 Technology Curriculum 2 (10 Credit Points)
Subject Details (p. 5160) Legacy Code: 102882
The subject will examine and model effective contemporary classroom practice to develop students' pedagogical content knowledge. The specifics of the relevant Board of Studies NSW Years 11-12 Syllabuses in Technology Key Learning Area and links with the Years 7-10 curriculum will be analysed and critiqued as will current Australian and NSW educational/curriculum policies and priorities. Emphasis will be placed on principles underlying engaged inquiry teaching within the specific secondary subject, on creativity and quality teaching outcomes, on innovative program, subject and lesson planning and on the role of student data in authentic and appropriate assessment practices. Students will have opportunities for investigation and discussion of current research particularly related to sustainability and diversity in the teaching of the specific subject area. This subject is included in the Development Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7004 OR TEAC 7161 AND
TEAC 7032 AND
TEAC 7027 OR TEAC 7160
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5038 Technology Curriculum 3 (10 Credit Points)
Subject Details (p. 5161) Legacy Code: 102883
In this subject, the place of Technology and applied STEM in secondary curriculum will be further explored using evidence-based approaches for curriculum development and alignment and to plan for effective teaching and learning, including formative and summative assessment. Pre-service teachers will learn approaches for teaching a range of Technologies using STEM pedagogy. They will focus on assessment design for project and problem-based learning. The subject will demonstrate approaches for engaging diverse senior secondary learners. Pre-service teachers will develop subject and assessment plans and demonstrate a knowledge of curriculum, learning and assessment theory. The subject requires students to develop original portfolio of teaching artefacts that demonstrate capacity to create and critique resources for effective teaching and learning in Technology.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7027 AND
TEAC 7004 AND
TEAC 7032
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5039 Technology Curriculum 4 (10 Credit Points)
Subject Details (p. 5162) Legacy Code: 102884
In this subject, the place of Technology Curricula in senior secondary will be further explored using evidence-based approaches for curriculum development and alignment and to plan for effective teaching and learning, including formative and summative assessment. Pre-service teachers will learn approaches for teaching a range of Technologies and how to provide constructive feedback and reporting connected to project and problem-based learning. The subject will demonstrate approaches for engaging diverse senior secondary learners. Pre-service teachers will develop subject and assessment plans and demonstrate a knowledge of curriculum, learning and assessment theory. The subject requires students to develop original portfolio of teaching artefacts that demonstrate capacity to create and critique resources for effective teaching and learning in Technology.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): TEAC 7027 AND
TEAC 7004 AND
TEAC 7032
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5040 Digital Literacies in Education (10 Credit Points)
Subject Details (p. 5163)
This subject will introduce, develop and apply innovative digital literacy skills needed to be successful in the teaching profession. The subject will address digital literacy as a multidimensional skill-set covering domains related to: i) searching, accessing, analysing, and critically evaluating information; ii) communicating and sharing information; iii) creating digital products; iv) safety, and v) problem-solving. The subject will focus on the digital learner, instructional design in digital contexts, e-safety, social media, intellectual property and legal implications for teachers. The subject will assess the critical analysis, creation and application of digital literacy skills for teachers as determined by the Australian Professional Teaching Standards. This subject is included in the Development Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 5 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5041 Career Education Practice (10 Credit Points)
Subject Details (p. 5164)
This subject introduces students to core knowledge and skills necessary to prepare others to follow their career/work aspirations. By examining labour market information, identifying relevant support organisations and services students will be able to apply career development theories, concepts, research, and associated models and frameworks to provide career planning that is sensitive and respectful of an individual's capabilities and barriers to work. This subject also introduces students to methods to evaluate the advice and services which they provide.
Level: Postgraduate Coursework Level 5 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 5042 Supporting Career and Education Aspirations (10 Credit Points)
Subject Details (p. 5164)
This subject introduces students to the core knowledge and skills necessary to support career and education aspirations through professional practice as a career advisor. The subject examines theoretical perspectives on career aspirations, empirical research into the development of aspirations, strategies to support the aspirations of specific populations, and skills to identify the strengths, values, and interests of those participating in career education.
Level: Postgraduate Coursework Level 5 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7001 Aboriginal & Culturally Responsive Pedagogies (10 Credit Points)
Subject Details (p. 5165) Legacy Code: 102085
In this subject students will be introduced to research, perspectives and practices associated with successful and culturally appropriate curriculum and pedagogy for teaching Aboriginal and Torres Strait Islander adolescent students. The subject is informed by current research practices, policy developments and curriculum deliverables that require culturally appropriate, responsive, respectful and informed teaching and learning practices that will benefit all education participants. Students will gain knowledge, insight, skills and appreciation of the importance and implications of consultation, negotiation and two-way partnerships with local Aboriginal communities and schools. It will also focus on empowering students to effectively reflect on all aspects of inquiry-based teaching with respect to Aboriginal perspectives and the delivery of lessons and effective support to all secondary students. This subject is included in the Development Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): TEAC 7004 OR TEAC 7161 AND
TEAC 7032 AND
TEAC 7027 OR TEAC 7160
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7002 Addressing Diversity in Mathematics Teaching and Learning (10 Credit Points)
Subject Details (p. 5166) Legacy Code: 102322
In this subject students will apply their knowledge of curriculum and pedagogy to address diversity within the primary mathematics classroom. Students will explore strategies to address a broad range of learning needs incorporating gifted and talented students, students from diverse cultural backgrounds including Aboriginal students and students with additional needs including dyscalculia. Other issues such as gender and mathematics for English as an Additional Language Learners (EALD) will be investigated.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7003 Addressing Diversity in Science Teaching and Learning (10 Credit Points)
Subject Details (p. 5167) Legacy Code: 102486
The purpose of this subject is for students to develop knowledge of science teaching for primary aged children of science with additional needs and diverse linguistic and cultural backgrounds. Students will explore a range of needs, including gender issues with science learning, EAL/D backgrounds, learning difficulties, and gifted and talented abilities, and identify strategies to respond to those needs with specific instructional plans. In addition, students will learn to implement culturally relevant and context-based pedagogies in primary science education.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7004 Adolescent Development and Teaching (10 Credit Points)
Subject Details (p. 5167) Legacy Code: 102081
From 2024, this subject is replaced by TEAC 7161 - Educational Psychology for Learning and Teaching. This subject examines research and contemporary classroom practice relevant to the cognitive, physiological, and social/affective needs of adolescents to highlight the reciprocal effects that teaching has on adolescence and how in turn adolescence affects teaching practice. Emphasis is placed on the use of evidenced-based literature in examining adolescent-centred challenges to teaching and learning. Topics addressed include definitions of adolescence past, present and future, biological and cognitive milestones of adolescence, adolescents at-risk, secondary schooling fostering educational and general resilience in adolescents, and helping adolescents thrive.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7005 Advanced Academic English Skills (10 Credit Points)
Subject Details (p. 5168) Legacy Code: 102325
This is a language-analysis intensive subject with practical application for real situational English language teaching. It offers students theoretical overviews of language analysis, from the sentential-clausal-lexical-grammatical level to highly contextualised discourse study. It requires students to engage with a variety of real-life instances of language use while also investigating the potentialities of extensive linguistic repertoires. By exposing students to both the realities of actual language use and the possibilities inherent in varieties of English, students are better prepared for the demands of English (second and foreign) language teaching across multiple contexts.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7010 Assessing to Support Learning (10 Credit Points)
Subject Details (p. 5169) Legacy Code: 102147
Professionals' knowledge and skill in assessment supports the identification, planning, monitoring and evaluation of their work with individuals with additional needs. Assessment not only applies to assessing the needs of the individual, but extends to identifying the needs of the family and the educational setting. This subject explores various models of assessment (and their underlying theory and implications for practice). Various approaches are investigated that are utilised to elucidate a range of educational needs across the lifespan by a range of professionals (e.g. functional, standardised, diagnostic, strengths-based, curriculum-based). Students apply problem-based learning by selecting and critiquing assessment strategies to inform the goals, educational instruction and adjustments, and progress for an individual, their family and educational setting. Students also develop skills in communicating with colleagues and families regarding issues around assessment.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7011 Assessment and Intervention for Mathematics and Numeracy Learning (10 Credit Points)
Subject Details (p. 5170) Legacy Code: 102324
A significant aspect of teachers' work is focused on assessment and mathematics classrooms are renowned for their traditional reliance on pen and paper testing. In this subject students will investigate contemporary formative and summative assessment practices of and for learning mathematics. Students will investigate how to use results from assessments including NAPLAN to plan teaching and learning, and provide intervention where appropriate. A range of intervention programs used in Australian schools will be explored and compared.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7012 Assessment and Intervention for Science Learning (10 Credit Points)
Subject Details (p. 5171) Legacy Code: 102488
The purpose of this subject is for students to be informed of different types of diagnostic, formative, and summative assessment strategies used in primary science contexts. Examination of assessment methods and resources will help teachers develop a comprehensive philosophy of assessment in primary science. Students will develop skills in adapting instructional subjects to incorporate a research-based assessment system, become familiar with strategies to analyse assessment data, and design interventions in response to assessment data.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7013 At the cultural interface - learning two ways (10 Credit Points)
Subject Details (p. 5171) Legacy Code: 102165
From 2020 students should note that core units are now taught in semesters rather than half yearly sessions. History, politics and ignorance make the cultural interface between Aboriginal and non-Aboriginal Australians contested and fraught. In turn, cultural misunderstanding contributes to inequities in educational attainment, employment and social disadvantage. Students apply a critical perspective to the discourses surrounding Aboriginal disadvantage and white privilege. They develop processes to engage respectfully with local Aboriginal and Islander communities in order to learn and share in a two-way exchange of knowledge. They listen deeply and intersubjectively in their exploration of Aboriginal worldviews, and they reflect on what it means to decolonise their own thinking so as to build partnerships based on mutuality and reciprocity.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7015 Children, Families, Communities (10 Credit Points)
Subject Details (p. 5172) Legacy Code: 102102
The subject examines the implications of children's early life experiences on their development, learning, health and wellbeing. Students will analyse cross-disciplinary research, policy and discourses associated with children and families living in communities experiencing disadvantage and the impact of adverse and positive childhood experiences on children's life trajectories. An opportunity to learn from professionals working in community programs will be invaluable when students in groups design and present programs that strengthens communities' and families' capacities to provide nurturant environments for children. Students will reflect on the complex interrelationship between collaboration, research and practice to identify their role as community leaders working in and with communities. This subject is included in the Foundation Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: TEAC 7036 - Early Intervention and Prevention in Early Childhood Contexts
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7018 Computational Thinking across the STEM Curriculum (10 Credit Points)
Subject Details (p. 5173) Legacy Code: 102509
This subject will enable students to develop knowledge of computational thinking as it can be applied across the STEM curriculum in schools. Students will learn about the nature of computational thinking as a problem solving approach which can be applied to produce digital solutions. The subject will allow students to undertake a critical examination of innovative, interdisciplinary approaches to the development of computational thinking and relevant pedagogical strategies to maximise student learning and engagement with STEM disciplines.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7020 Contemporary Teacher Leadership (10 Credit Points)
Subject Details (p. 5174) Legacy Code: 102098
This multidisciplinary subject seeks to redefine and inform practice about what it means to be part of teacher-led development in the 21st century. Students will need to develop unique skills and understanding necessary for creating, sustaining and expanding communities of practice within and beyond classrooms. Through an examination of relevant literature connected with local and global networks, students will build, an understanding of cultural assets; professional leadership capacity; and what is required to effect change, leadership and innovation in school culture through teaching and learning innovations and program evaluation. Learning outcomes are based on learning about leadership within an established community of practice.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): -
Co-requisite(s): -
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7022 Creative Teaching and Learning (10 Credit Points)
Subject Details (p. 5175) Legacy Code: 102105
This subject focuses on processes of creative thinking and creative expression in children and introduces students to the theory and practices of using drama, music, dance, media arts and visual arts in prior to school and school contexts. Arts-based pedagogies, collaborative learning, multiple modes of learning and reflective practices are the key operating principles of the subject. The subject will encompass creativity both as it relates to the arts as well as its critical role in fostering creative thinking and teaching and learning practices. Students will explore the relevance of the arts in the development of children's play and will engage with appropriate information and communication technologies for learning in the arts. The subject provides an understanding of the importance of the art forms both as pedagogical approaches across the early childhood and primary years and as creative arts in their own right. This subject is included in the Development Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: TEAC 7045 - Fostering Creativity in Children's Learning
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7023 Culture, Subjectivities and Schooling (10 Credit Points)
Subject Details (p. 5176) Legacy Code: 102071
From 2024, this subject is replaced by TEAC 7032 Diversity, Social Justice and Schooling. This subject focuses on the socio-political, economic and cultural milieu that shapes teacher and student subjectivities. Teachers are required to understand the variety of, and changing nature of, discourses and ideologies that both constitute and are constituted in society, schooling, teaching, and learning, in an increasingly multifaceted, globalized and cosmopolitan environment. Within this framework it is also essential that teachers engage with and understand the diversity and fluidity of individuals and the broader Australian community in order to promote equitable practices in schooling and to facilitate educational and professional transformation. Aboriginal and Torres Strait Islander peoples and their relationship to schooling will also be explored in this subject, providing pre-service teachers with deeper understandings of Australia's first nations people. Developing understandings of society, culture and the formation of subjectivities will promote an enhanced awareness of equity issues as well as crucial analytical and critical tools to address the needs of diverse students, their families, teachers, and the broader school community.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: TEAC 7039 - Education Knowledge Society and Change
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7026 Designing Curriculum Futures (10 Credit Points)
Subject Details (p. 5178) Legacy Code: 102159
This subject considers the research and theoretical basis of curriculum futures, with a focus on design for learning and learning design, and critically examines contextual factors and their implications for learning design in a range of settings. The subject provides a critical overview of perspectives on curriculum, curriculum design and examines authentic learning and assessment. Examples of curriculum futures will be negotiated and explicated. The overall focus is on curriculum decision-making and planning for improved learning outcomes.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: TEAC 7024 - Curriculum Futures
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7027 Designing Teaching and Learning (10 Credit Points)
Subject Details (p. 5178) Legacy Code: 102086
In this unit, students will explore a range of contemporary issues impacting upon adolescent learning in the 21st century and how those issues may be addressed through the thoughtful re-design of teaching and learning. In a future characterised by rapid change and re-conceptualisations of compulsory schooling, attention will be given to the role of the secondary school teacher in assisting their students to develop new ways to think and new ways to work, as well as acquiring new tools and skills for living and working in the 21st century. Students will be encouraged to articulate their own vision for sustainable and engaged secondary education appropriate to the first half of the 21st century. In particular, it is critical that students possess the capacity to develop secondary students' abilities to engage in real world problem solving and collaborate meaningfully through emerging technologies. Students will collect evidence in an e-portfolio to demonstrate they meet the Australian Professional Standards for Teachers at the graduate level. Students begin their e-portfolio in 102086 Designing Teaching and Learning and continue to collect evidence throughout their Master of Teaching (Secondary) course.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: TEAC 7081 - Pedagogies in Practice TEAC 7080 - Pedagogies for Learning CART 1003 - Literacies for Learning
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7029 Disability in Context (10 Credit Points)
Subject Details (p. 5179) Legacy Code: 102156
The developmental trajectory and quality of life of individuals with additional needs is affected not only by the nature and level of the disability itself but also by the ways in which that disability interacts with the contexts in which they live their lives. In turn, the impact of the disability will affect the individual's family and those working with them. This subject adopts both a developmental and ecological perspective to enable analysis of the specific impact of disability on an individual, their family, the professionals working with them and the contexts in which they do so. In so doing, it evaluates the efficacy of theoretical models and frameworks available to assist in ensuring best outcomes for the individual and those around them.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): Students enrolled in 1939 Bachelor of Education (Secondary) or 1876 Bachelor of Education (Primary) must successfully complete TEAC 3013 before enrolling in this subject
Equivalent Subjects: HUMN 7046 - Transformative Leadership
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7030 Diverse Literacies (10 Credit Points)
Subject Details (p. 5180) Legacy Code: 102101
This subject increases students' understandings of the impact of globalisation, new technologies and the diversity of Australian languages and dialects on children's literacy practices. Students will develop insights into the importance of languages and cultures in children's identity formation, particularly in relation to the importance of the home languages and/or dialects, for multilingual and Aboriginal and Torres Strait Islander children. Contemporary social theories of diversity, difference, literacy and languages learning will be introduced to students and the links between theory and practice will be applied. Students will investigate the literacy practices in diverse family and community contexts and apply literacy-enriched play and pedagogies to extend languages learning and literacy for all children. This subject is included in the Development Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: TEAC 7046 - Global Literacies TEAC 1026 - Multiliteracies
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7032 Diversity, Social Justice and Schooling (10 Credit Points)
Subject Details (p. 5181) Legacy Code: 102083
This subject focuses on the socio-political, economic and cultural milieu that shapes teacher and student subjectivities. It explores diversity, social justice, equity, and schooling through the multi-layered operation of social power and privilege. It advances students' understanding of how social and cultural difference in Australia has shaped contemporary education, schooling and cross-cultural relationships. In particular, the subject examines diversity as a social construct that has promoted the differential treatment of particular social and cultural groups and served as the basis for response to subsequent social and cultural inequities by these groups. The subject engages students in critical analysis essential for professional pedagogical practice in education for diversity and social justice in Australia and beyond. This subject is included in the Foundation Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: TEAC 7023
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7037 Early Learning Environments (10 Credit Points)
Subject Details (p. 5183) Legacy Code: 102622
Learning occurs within the context of a dynamic global society that has important cultural, social, historical and environmental dimensions. Students will explore a range of theoretical perspectives and pedagogical approaches that support learning about human society and its environment including areas of history, geography, civics and citizenship and sustainability for children in early childhood and primary school settings. Policies and frameworks around risk and play will be explored. First Nations' perspectives and inclusive pedagogies that support equality and diversity will be examined. Through a 35 hours (equivalent of 5 days) placement at an early childhood setting, students will evaluate the relationship between childhood environments and children's experience of place and everyday learning. Students will design learning experiences that support children's investigation, discovery, problem solving and meaning making using a range of materials and texts. This subject is included in the Development Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7038 Working Mathematically 1: Exploring Connections (10 Credit Points)
Subject Details (p. 5184) Legacy Code: 102603
This subject develops students' critical understandings of how numeracy and mathematical ideas shape young children's lives during their first eight years. Students will develop their ability to provide rich learning experiences that enhance and assess the development of children's numeracy and foundational mathematical concepts. The subject will foster positive dispositions towards teaching and applying mathematics and numeracy in educational settings for children using the Early Years Learning Framework for Australia, the Australian Curriculum and the NSW Mathematics K-10 Syllabus curriculum documents. It will also consider the literacy demands of Mathematics. This subject is included in the Development Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 1111 - Mathematics Science Technology 0-8 TEAC 7060 - Investigating with Mathematics Science and Technology
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7041 Effective Working Relationships (10 Credit Points)
Subject Details (p. 5186) Legacy Code: 102146
From 2020 students should note that core subjects are now taught in semesters rather than half yearly sessions. This subject supports the development of students' knowledge and skills by analysing a range of consultation models; examining the perspectives and needs of families as well as professionals from different discipline backgrounds; and developing effective interpersonal communication skills, collaborative problem solving, dispute resolution, teamwork and teambuilding. In addition, professionals with advanced knowledge of inclusive education and disability studies may serve as agents of change within their professional setting. The subject explores this role and encourages students to reflect upon how they may enact this ability to advocate inclusive education and facilitate the capacity of others.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7043 Engaging Communities (10 Credit Points)
Subject Details (p. 5186) Legacy Code: 102148
From 2020 students should note that core subjects are now taught in semesters rather than half yearly sessions. Community engagement is variously seen as a strategy for improving educational outcomes, increasing community ownership and/or empowering citizens to take collective action. Although appeals to 'community' often assume a homogeneous ideal, active community engagement needs to respond to a diversity of needs and experiences. This subject begins by exploring the notion of community, its uses and meanings in different discursive and professional contexts. Students will be introduced to theory and praxis aimed at identifying community needs, partnering across diversity and working effectively and inclusively to build community strengths and engagement. The subject's applied learning focus requires students to develop and implement a community engagement strategy for a selected setting.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7044 English Linguistics for TESOL (10 Credit Points)
Subject Details (p. 5187) Legacy Code: 101825
This subject provides students with a linguistics background, including English grammar, necessary to excel in English language teaching and assessment. Encompassing the areas of syntax, semantics, morphology, phonology and phonetics, the subject equips students with the technical vocabulary of linguistics and pedagogical grammar as well as the analytical skills necessary to identify and describe both the English language and patterns of performance by second and bilingual language learners. These foundational skills prepare students for success in language teaching, assessment and second language research.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7051 Inclusive Environments (10 Credit Points)
Subject Details (p. 5188) Legacy Code: 102149
Significant reform has occurred over the last three decades with regard to educating individuals with additional needs. This subject explores the history and current position on disability as well as philosophy, policy, legislation, and practice around educating individuals with additional needs internationally. The research literature examining the benefits and barriers to inclusive education will be analysed. Students will develop skills of critical review required to evaluate the research in the field. Lastly, the subject addresses the ways in which educational settings can be designed to be more responsive to learners with additional needs and how students can promote inclusion through organisational change.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7057 Becoming an Exemplary Teacher (10 Credit Points)
Subject Details (p. 5188) Legacy Code: 101899
This subject empowers aspiring educators to excel as exemplary teachers in today's educational landscape. It explores the historical and contemporary social, cultural, and political influences on early childhood and primary education. Students critically examine the evolving role of teachers, focusing on factors contributing to responsive teaching and quality learning experiences. Emphasizing inclusivity and support for learners, the subject fosters critical reflection about teaching practice to prepare students for their future roles in education. This subject is included in the Foundation Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7061 Leadership and Management (10 Credit Points)
Subject Details (p. 5189) Legacy Code: 102108
This subject explores the complex socio-political context of early childhood and school education. It will focus on the knowledge and skills related to effective management, leadership and advocacy in the education sector. This subject will engage students in review of the legal, ethical and professional accountabilities of teachers. Effective leadership and management theories, models and practices of quality educational providers will be evaluated. Students will also examine strategies for advocacy and building partnerships with families and communities. This subject is included in the Transition Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: TEAC 7073 Managing Child and Family Services
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7063 Leadership, Mentoring and Professional Growth (10 Credit Points)
Subject Details (p. 5190) Legacy Code: 100701
Becoming a professional is a complex and intricate process. Beyond adequate initial training (both theoretical and the implementation of theory into practice) it takes a commitment and undertaking to career-long learning and professional development. Such commitment and undertaking need not be an isolated process. Educational leaders are available to assist in the promotion of professional development. This subject provides leaders with the understandings and strategies for implementing mentoring and professional development programs.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7065 Leading Mathematics in the Primary School (10 Credit Points)
Subject Details (p. 5191) Legacy Code: 102323
This subject provides an in-depth exploration of the required mathematics knowledge for primary teaching and for leading other teachers in their professional learning. Students will explore and further develop their pedagogical content knowledge, applying it to the primary mathematics curriculum. They will develop a deep understanding of specific mathematical content, the ways in which children learn that content and appropriate, research based pedagogies.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7067 Leading Science in the Primary School (10 Credit Points)
Subject Details (p. 5192) Legacy Code: 102487
The purpose of this subject is for students to engage in leadership practices and theory associated with an expert primary science teacher. Students will evaluate curriculum resources and consider strategies for integrating science with other disciplines in primary teaching contexts. Students will develop their capacity for leading science professional learning experiences and innovation to other educators.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7068 Learning and Teaching in Challenging Contexts (10 Credit Points)
Subject Details (p. 5193) Legacy Code: 102158
This subject involves the study of pedagogy in contexts regarded as 'challenging'. The main focus will usually be on the contexts of school and early childhood, but alternative sites of education will also be studied as appropriate. The definition of a challenging context will be considered with an emphasis on contexts of poverty. Students will undertake a critical analysis of policies and practices that impact and respond to challenging contexts. The subject is structured around the investigation of dilemmas and specific provocations, and explores engaging pedagogies for education.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7071 Literacy Connections 1: Understanding and Creating (10 Credit Points)
Subject Details (p. 5193) Legacy Code: 101803
In this subject, students investigate processes of speaking, listening, reading, writing, viewing, representing and critical thinking. The subject focuses on teaching children from birth to 8 years, with a focus on strategies that support emergent literacy. Strategies to support children with English as an additional language or dialect will be explored. Students will learn how to support children's effective communication and teach children in the early stages of reading and writing. The key literacy elements of oral language, concepts of print, phonological and phonemic awareness, phonics, fluency, vocabulary and comprehension will be addressed. It also focuses on the role of the teacher in assessing children's language and literacy learning, and planning intentional learning experiences to extend learning. This subject is included in the Development Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): -
Equivalent Subjects: LGYA 1112 - Literacy 0-8
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7072 Managing Challenging and Diverse Behaviour (10 Credit Points)
Subject Details (p. 5194) Legacy Code: 102151
This subject provides professionals with the skills to successfully and systemically manage challenging behaviours exhibited by individuals in classrooms, early childhood, or other educational settings. This subject will focus on managing critical features of the environment to encourage positive behaviours and prevent challenging behaviours from occurring. Intervention strategies are also developed to address significant negative behavioural challenges when preventative measures are ineffective. Professionals will develop competencies in identifying and analysing problem behaviours and designing suitable management plans. Such skills will be helpful to either professionals working directly with individuals with additional needs, or as consultants supporting those who provide direct support to individuals with challenging and diverse behaviours.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: TEAC 7014 - Behaviour Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7074 Mathematics for Contemporary Learners (10 Credit Points)
Subject Details (p. 5195) Legacy Code: 102321
In this subject students will explore issues relating to the teaching and learning of mathematics in the contemporary primary classroom. These issues will include promoting positive dispositions of learners, engaging pedagogies and developing creative and critical thinking for critical numeracy. Students will explore theory relating to the integration of information and communication technologies in the mathematics classroom including the development of teachers' Technological Pedagogical Content Knowledge (TPACK).
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7076 Multicultural Nonverbal Communication (10 Credit Points)
Subject Details (p. 5196) Legacy Code: 102283
This subject introduces students to the interdisciplinary fields of linguistics, communication and cultural semiotics. It builds links between these areas of studies and beyond, which provide students with knowledge of how human beings use nonverbal communication systems and channels to achieve effective communication in intercultural and multicultural contexts. This subject covers three key perspectives, including paralinguistics, proxemics and kinesics. Authentic audio and visual materials are used to facilitate students' awareness of the multidimensional process in which people communicate verbally and nonverbally simultaneously. It also helps enhance their sensitivity when they interact with people from diverse linguistic and cultural backgrounds.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7082 Pedagogy for Positive Learning Environments (10 Credit Points)
Subject Details (p. 5197) Legacy Code: 102082
This subject is designed to promote the application and integration of current psychological and educational theory, evidence, and best practices in creating positive learning environments for the purposes of learning, behaviour, and wellbeing. The subject provides a thorough understanding of theoretical and empirical perspectives on behaviour management as they apply to Australian contexts. Skill development will be encouraged through interactive tutorial activities and exercises. Areas of content include: theoretical and empirical foundations of expectation/rules setting and routines; proactive practices in positive behaviour support; student engagement theory; relational pedagogy; using data to inform behaviour management strategies; and whole school approaches to manage behaviour and wellbeing. This subject is included in the Development Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): TEAC 7161
Equivalent Subjects: TEAC 7086 - Positive Learning Environments TEAC 7113 - Psychology for Teaching TEAC 7141 - Teaching and Learning in Classrooms
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7083 People, Place and Pedagogy (10 Credit Points)
Subject Details (p. 5198) Legacy Code: 102106
From 2020 students should note that core subjects are now taught in semesters rather than half yearly sessions. This subject will provide students with the opportunity to explore key concepts of learning and teaching in the curriculum areas of social studies, history, geography, place studies, civics and citizenship, economics, sustainability and environmental education and Aboriginal and Torres Strait Islander studies in early childhood and primary education. The subject will encourage pre-service educators to develop their philosophy and practice of teaching and learning, particularly within the contexts of a rapidly changing and dynamic human global culture that has significant cultural, historical, social and environmental dimensions. The subject will cover a broad, complex and engaging field of study reflecting that people are social beings who interact with one another and with the natural and social environments through and over time. Aboriginal and Torres Strait Islander perspectives, socio-cultural influences and place-based pedagogies will be investigated, and relevant policy and regulation documents around risk, play and pedagogy will be examined.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7084 Person-Centred Practice (10 Credit Points)
Subject Details (p. 5199) Legacy Code: 102166
The shift in educational policy and legislation to one of inclusion has been accompanied by a move to models of service delivery which are person- and family-centred and which also recognise the need for tiers in intervention. Whilst the range of service delivery models currently operating across educational and community settings for varied levels of need and developmental stages will be explored and evaluated, emphasis will be given to person-centred practice. Through an analysis of the literature encompassing both evidence-based practice and practice-based evidence students will evaluate the implications of the model for individuals, families, teachers, other professionals, schools, services, their own practice and for systems practice.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7087 Pedagogical Leadership: Critically Reflective Practice (10 Credit Points)
Subject Details (p. 5200) Legacy Code: 102107
In this subject, students use the conceptual frame of pedagogical leadership to examine discourses of leadership and pedagogy in early childhood settings to re-shape practice. The principles and practices of Belonging, Being and Becoming: The Early Years Learning Framework for Australia are used as a basis for critical reflection on the student's own practice and areas for ongoing learning and change. Students will develop their research skills and capacity to lead pedagogy by engaging in critical analysis of current research and evolving theories of leadership to design and undertake an action research project. This subject is included in the Transition Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): TEAC 7103
Equivalent Subjects: TEAC 7042 - Engaging Children in Curriculum
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7088 Primary Creative Arts (10 Credit Points)
Subject Details (p. 5201) Legacy Code: 101585
This subject introduces students to pedagogical theory and practices in the four diverse art forms of Dance, Drama, Music, and Visual Arts in the primary classroom. The subject provides practical knowledge, skills and understandings of the importance of all four art forms both as powerful teaching and learning strategies across the primary curriculum and as the creative arts in their own right for pre-service teachers. This subject builds students' capabilities to demonstrate creativity when teaching, empathy with diverse groups of student learners, a commitment to socially just schools and classrooms and an understanding of artistic processes. This subject will give students an understanding of the role of aesthetics, imagination and play in learning. This subject is included in the Development Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7089 Primary English and Literacy 1 (10 Credit Points)
Subject Details (p. 5202) Legacy Code: 101579
This subject is designed to explore key concepts associated with the teaching of the English Key Learning Area in the K-6 years, set in the broader context of a contemporary new literacies environment. It will examine the processes involved in the teaching of English with a focus on effective pedagogical practices, responsive teaching and explicit and systematic teaching of phonics and reading traditional print-based literacies and multiliteracies. Students will investigate teaching, learning, assessment and the key processes and components of learning to read using a range of factual and literary texts, involving every day and specialised knowledge for a range of readers/viewers. Students will be introduced to children's literature and authentic texts for the development of students' reading skills and abilities. Students will develop understandings of effective pedagogy and practice within the area of K-6 English and investigate the NSW English K-10 (focus on K-6) syllabus. This subject is included in the Development Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7090 Primary English and Literacy 2 (10 Credit Points)
Subject Details (p. 5203) Legacy Code: 101586
This subject is designed to provide a comprehensive account of the teaching of spoken, written and multimodal texts in the primary years of schooling. Students gain an understanding of different theories related to producing texts in a range of modes for different purposes. They investigate a range of written and multimodal genres, their textual structures and grammar and learn to apply these in planning and teaching in mainstream, English as an Additional Language or Dialect (EAL/D) and Aboriginal and Torres Strait Islander contexts, gaining a critical awareness of varying pedagogic approaches. Students will develop skills in pedagogy and practice, including next practice, within English & Literacy for K-6 students. The knowledge and skills developed in the other subjects of study in the program can be applied in this subject and Professional Experience subjects. This subject is included in the Transition Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7091 Primary Health and Physical Education (10 Credit Points)
Subject Details (p. 5204) Legacy Code: 102072
This subject is designed to explore the content and pedagogies of Health and Physical Education (HPE) in the NSW primary curriculum. Students will develop an experiential understanding of the pedagogy of HPE. The knowledge and skills developed in the other subjects of study in the course can be applied in this subject and Professional Experience subjects. In this subject students will also continue to develop their research skills. This subject aims to develop teachers who demonstrate empathy with diverse groups of student learners and commitment to socially just schools and classrooms. This subject is included in the Development Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: TEAC 7095 - Primary Personal Development Health and Physical Education
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7092 Primary Human Society and its Environment (10 Credit Points)
Subject Details (p. 5205) Legacy Code: 101582
Human Society and Its Environment focuses on History, Geography and three cross-curriculum priority areas in: Aboriginal and Torres Strait Islander histories and cultures; Asia and Australia's engagement with Asia; and Sustainability. As a key learning area in the K-6 curriculum HSIE provides opportunities for students to develop knowledge, understanding and skills in the subject matter, as well as proficiency in teaching inquiry learning approaches. In History, key concepts of changes in family history and local history are explored and Australia's history and understanding Australia as a Nation are explored through the relationships between the individual and the state, and the values and mutual responsibilities, and obligations for civil, political and social participation in Australian society. In Geography, concepts that develop a sense of curiosity about environments, peoples, cultures and place, in both Australia and the world are a priority. The subject emphasises pedagogy and lesson design for high possibility classrooms that specifically address the literacy and technology general capabilities. The subject also focuses on inquiry, place and project based learning which engages diverse groups of learners, develops their understanding about local and global communities, and prepares them to become informed and active citizens who contribute to the quality of Australian society. This subject is included in the Foundation Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7093 Primary Mathematics and Numeracy 1 (10 Credit Points)
Subject Details (p. 5207) Legacy Code: 101580
The subject will develop students' understandings of children's construction of mathematical and numeracy concepts during the years from Kindergarten to Year 2. The subject will model explicit numeracy instruction and scaffolding of numerical, spatial, graphical, statistical, and algebraic domains. Students will develop their ability to assess young children's mathematical understandings and numeracy development. The subject will explore how to create learning experiences for diverse learners, incorporating investigations and digital technologies to enhance the growth of children's mathematical thinking. Students will interrogate the NSW Mathematics K-10 Syllabus, with a focus on Kindergarten to Year 2, and with a particular emphasis on the Working Mathematically strand. This subject is included in the Development Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7094 Primary Mathematics and Numeracy 2 (10 Credit Points)
Subject Details (p. 5208) Legacy Code: 101584
This subject builds on the subject Primary Mathematics and Numeracy 1 with a focus on learners from Year 3 to Year 6, and assumes students have gained familiarity with the knowledge, skills and understandings children required across all strands of the NSW Mathematics K-10 Syllabus, with a focus on Year 3 to Year 6, including the Working Mathematically components. The subject will model explicit numeracy instruction and scaffolding of numerical, spatial, graphical, statistical, and algebraic domains. In this subject, students develop their understanding of primary mathematics in the mid to upper primary years, with a strong emphasis on aspects of teaching such as student engagement, assessment, differentiation for diversity and the integration of technology. By engaging with this subject, students will have the opportunity to experience, plan and assess a broad range of practices to enhance learning outcomes and improve engagement with mathematics. This subject is included in the Transition Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7099 Primary Science & Technology (10 Credit Points)
Subject Details (p. 5209) Legacy Code: 101583
This subject will focus on developing scientific and technological pedagogical content knowledge appropriate for teaching science and technology for students in the K-6 years. It models appropriate pedagogical and pedagogical content knowledge. Students use collaborative social learning situations to develop content knowledge, along with interpersonal and communication skills. The pedagogies modelled will be inclusive and demonstrate how scientific and technological learning experiences can be developed to cater for the needs of the diverse groups of student learners in primary schools. Students learn about engaging science and technology activities that empower primary school students and create futures for students where the capacity to engage with and critically evaluate scientific and technological activity will become increasingly necessary. Students focus on themselves as learners and reflect on the implications of their learning and the learning of others in their future professional practice. This subject is included in the Development Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7100 Principles and Practices of Evaluation (10 Credit Points)
Subject Details (p. 5210) Legacy Code: 102168
This subject provides opportunities to examine and apply evaluation strategies to assess and evaluate learning, educational and social programs and policies. Theories drawn from evaluation will be used to assist students to develop evaluative frameworks and approaches to critically evaluating programs.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 1545 - Evaluating Learning Programs
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7101 Professional Experience (Additional Needs) (10 Credit Points)
Subject Details (p. 5211) Legacy Code: 102153
This subject provides students with an opportunity to apply the knowledge and skills about teaching students with additional needs to a real-life classroom. In turn, this authentic learning experience enriches their future professional growth and capacity to support individuals with additional needs. Students complete a practicum and, where appropriate, a series of field visits and observations, within an educational setting, that supports individuals with additional needs. The placement will be completed in the student's area of specialisation in an early childhood, primary, secondary or other relevant setting. Students are able to demonstrate a range of skills in planning, implementing and evaluating educational programs for students with additional needs that optimise learning outcomes and inclusion.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 1090 - Professional Practice in Context
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7103 Professional Experience 3 - 5 Years (10 Credit Points)
Subject Details (p. 5212) Legacy Code: 102110
This subject incorporates theoretical aspects of teaching with a compulsory 30 day placement with children aged 3-5 years, to provide students with opportunities to reflect on their teaching skills and build capacity as emerging educational leaders. In this capstone early childhood professional experience, students build their professional capacity to take the day to day responsibility for the learning, development, health and wellbeing of a group of children, in collaboration with supervising staff. Students will work collegially with staff and families to design, implement and evaluate an inclusive curriculum that engages children with investigative and critical thinking that connects to children's social worlds. The subject requires students to apply the principles, practices and outcomes of Belonging, Being and Becoming: The Early Years' Learning Framework for Australia together with understanding of curriculum content (in the areas of Language, Literacy and Communication, Mathematics, Science and Technology, Creative Arts, Human Society and Physical Development, Health and Wellbeing). Students will complete an early childhood focused Teaching Performance Assessment in this subject. This subject is included in the Transition Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): TEAC 7104
Co-requisite(s): TEAC 7087
Equivalent Subjects: TEAC 7035 - Early Childhood Professional Experience 2 TEAC 2051 - Professional Portfolio
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7104 Professional Experience Birth - 2 Years (10 Credit Points)
Subject Details (p. 5214) Legacy Code: 102109
In this subject student engage with theory and practice to develop an understanding of quality environments for children Birth – 2 years in early childhood education and care settings. This subject incorporates a 25 day supervised placement with a strong focus on supporting children's health and wellbeing through the building of relationships with children, staff, and children's families in care settings. Students will apply their knowledge of work health and safety and the Australian Children's Education and Care Quality Authority's National Quality Standards as they develop and demonstrate responsive caregiving and educational practices. Students will apply knowledge of young children's learning and development and develop their skills in observation and assessment, planning, implementing and reflecting on engaging experiences that respond to children's family and community experiences and funds of knowledge. During the placement students will spend a minimum of 10 days working with children under 2 years. Students will present evidence of their developing capacity as teachers during an EXPO at the conclusion of placement. This subject is included in the Development Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): TEAC 7147
Equivalent Subjects: TEAC 7034 - Early Childhood Professional Experience 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7106 Professional Experience K - 6 (10 Credit Points)
Subject Details (p. 5215) Legacy Code: 102111
Students will design and teach lessons and units of work in ways that enhance student engagement and learning outcomes making relevant links with NSW Education Standards Authority syllabus documents. This professional experience subject supports students to meet the Australian Professional Standards for Teachers at the graduate level by focusing on developing professional knowledge, effective pedagogical practices, responsive teaching, classroom management and engagement in the primary school context. The subject also gives students opportunities to reflect on their own teaching and learning, and to achieve professional goals. This subject is included in the Transition Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): TEAC 7103
Equivalent Subjects: TEAC 7096 - Primary Professional Experience
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7108 Professional Practice Community Engagement (10 Credit Points)
Subject Details (p. 5217) Legacy Code: 102605
Professional Practice Community Engagement is a Professional Experience subject of the Master of Teaching (Secondary), incorporating a five-day or 30 hours academic service learning placement and is designed to develop sustainable practical knowledge and skills that supplement those developed in the other Professional Experience subjects. This subject will expand Teacher Education students' understandings of the contemporary issues confronting the wider education community. As such, a diverse range of educational settings including secondary school contexts are utilised to provide a deeper perspective for future secondary teachers beyond curriculum matters, and to facilitate engagement with holistic schooling practices. Teacher Education students choose from the available educational contexts to suit their needs, interests, expertise and communities. This subject is included in the Foundation Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: EDUC 7002 - Professional Experience 3 TEAC 7139 - Secondary Professional Practice 3
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7111 Professional Project (10 Credit Points)
Subject Details (p. 5219) Legacy Code: 102163
Professional project enables students to engage in an intensive study of an aspect of work related learning in order to develop, implement or improve some aspect of current professional or personal practice. It provides opportunities for students to use research skills and related theory directly as they implement a practice-based research-informed project within their own areas of specialisation. Students will be required to consult, present 'work in progress' and prepare a final report for a suitable audience.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): TEAC 7115
Equivalent Subjects: TEAC 7055 - Independent Studies – Practice in Context
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7112 Prosocial Learning Environments (10 Credit Points)
Subject Details (p. 5219) Legacy Code: 101105
Educators have a key responsibility in guiding children's development of self-discipline, moral autonomy, sense of social belonging, and wellbeing, whilst acknowledging the plurality of family and community values and expectations surrounding children's socio-emotional development and conduct. Students will build an in-depth knowledge of a range of theories and practical approaches to proactively guide children's learning of positive behaviours and minimise and manage instances of challenging behaviours. The subject focuses on the design of safe, structured, and positive learning environments that promote a positive socio-emotional climate utilising whole early childhood and primary school policies and frameworks. The subject assists students to critically evaluate the implementation of various guidance approaches and reflect on their personal and professional dispositions regarding behaviour and guidance in early childhood and primary school settings. This subject is included in the Development Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7114 Research and Professional Practice (10 Credit Points)
Subject Details (p. 5221) Legacy Code: 102100
From 2020 students should note that core subjects are now taught in semesters rather than half yearly sessions. This subject aims to develop students' capacity to reflect on and develop their teaching practice and professional identity as practitioner researchers. Vital to this process is the capacity to use research to interpret current educational contexts and the implications for their role as teachers. Students will explore research processes including data collection, analysis techniques and the processes that experienced researchers take in order to ensure their research is valid, reliable, ethical, useful and socially responsible. Contemporary theories as well as social, cultural, economic and political structures important to the role and work of teachers will also be critically reviewed. In this subject students will challenge established, historical conceptualisations of 'teacher' to develop their own understanding of this role in contemporary, early childhood and primary education contexts.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7115 Researching Practice (10 Credit Points)
Subject Details (p. 5221) Legacy Code: 101656
This subject enables students to engage in research practice in their area of professional interest or specialisation. Students will develop deep insight into the application of research in practice contexts and diverse research methodologies appropriate to practitioner research. They will develop skills in analysing, critiquing, and synthesising the literature in a relevant research area. Evaluation of research literature will be the basis for planning a self-directed professional project that employs identifiable research methods and tools to address a question of personal and/ or professional relevance.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7116 Researching STEM Education for Future Leadership (10 Credit Points)
Subject Details (p. 5222) Legacy Code: 102512
This subject seeks to redefine and inform practice about what it means to be a contemporary STEM teacher by engaging with literature on a specific research topic in STEM education and designing and implementing a research project in a team on that area of STEM education. The focus is also on the role of teacher/practitioner-research as central to professional learning in contemporary education. The central role of practitioner research in the practice of future STEM educational leaders is emphasised. Students will also be required to complete evidence-gathering in an e-portfolio to demonstrate they meet the Australian Professional Standards for Teachers. This subject is included in the Transition Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): TEAC 7121
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7119 Researching and Developing Engaging Pedagogies (10 Credit Points)
Subject Details (p. 5223) Legacy Code: 102075
This subject builds on the interplay between research and practice. It extends students' understanding of the processes and uses of participatory action research, also known in this context as teacher-based inquiry. It reviews theories on engaging practices in diverse professional contexts, with a focus on working with students from low socio-economic backgrounds, Aboriginal and Torres Strait Island learners and students who have English as an additional language or dialect (EAL/D). It also reviews pedagogic approaches linked to 21st century education. It challenges students to inquire into and reflect upon their professional practice and develop engaging classroom pedagogies and assessment practices in the area of their primary teaching specialisation (English, Mathematics or Science and Technology). The subject expands students' research skills through the critical review and application of various approaches to document, measure and evaluate student engagement. In line with NESA primary teaching specialisation requirements, students must apply these research skills and understandings to their school, classroom context and selected curriculum area specialisation. This subject is included in the Transition Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): TEAC 7154 - Professional Experience 1 and TEAC 7141 - Teaching and Learning in Classrooms
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7120 STEM Pedagogies in Practice (10 Credit Points)
Subject Details (p. 5224) Legacy Code: 102511
The purpose of this subject is for students to gain exposure to authentic contexts for integrating science, technology, engineering and mathematics and to develop knowledge and skills with designing and implementing STEM learning experiences. Students will have the opportunity to complete an authentic interdisciplinary STEM task, and draw upon this experience to design and implement interdisciplinary STEM learning activities aligned to syllabus outcomes. This subject will allow students to simulate and evaluate the teaching practices associated with high-quality interdisciplinary STEM lessons, and collaborate with peers who have expertise in different STEM disciplines.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): TEAC 7121 STEM Foundations (This prerequisite applies to students enrolled in program 1848 only)
Co-requisite(s): TEAC 7154
This corequisite applies to students enrolled in program 1848 only
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7121 STEM foundations (10 Credit Points)
Subject Details (p. 5225) Legacy Code: 102508
This subject will enable students to engage with knowledge of research-based integrated approaches to the teaching of science, technology, engineering and mathematics in schools. Students will learn about interdisciplinary methods for STEM learning, including project based learning and design thinking. The subject will allow students to undertake a critical examination of innovative, interdisciplinary approaches to curriculum development and relevant pedagogical strategies to maximise student learning and engagement with STEM disciplines. This subject is included in the Development Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7122 Science for Contemporary Learners (10 Credit Points)
Subject Details (p. 5226) Legacy Code: 102485
The purpose of this subject is for students to investigate how primary-age children think scientifically and develop knowledge of the natural world, and explore constructivist strategies for teaching primary science aligned to current reform efforts. An emphasis will be placed on understanding the essential features of inquiry-based pedagogies, scientific practices, and the role of creativity, coding, and technology in teaching and learning science. Students will apply their understandings of learning and constructivist pedagogies to the design of a series of primary science lessons.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7140 TESOL Methodology and Curricula (20 Credit Points)
Subject Details (p. 5226) Legacy Code: 101697
Focusing on the process of teaching English as a second or other language, the subject provides students with knowledge about approaches to teaching necessary to plan, design and evaluate curricula most appropriate to the needs of different learners. Students will develop skills in action research to facilitate critical evaluation of their teaching practices as independent professionals.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: LGYA 0753 - TESOL Methodology LGYA 0746 - TESOL Curriculum Development
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7141 Teaching and Learning in Classrooms (10 Credit Points)
Subject Details (p. 5227) Legacy Code: 102076
From 2020 students should note that core subjects are now taught in semesters rather than half yearly sessions. This subject is designed to prepare students for their role as active, thoughtful leaders of learning environments for primary students. Students will come to an understanding of their trajectory as professional learners as they develop a deeper understanding of who they are as teachers. The portfolio that they begin in this subject will be a vehicle for them to reflect deeply on their emerging skills and understandings and will be part of their development of a critical perspective of their practice as a teacher. Building on previous understanding about how children learn the students will plan lesson sequences using a range of teaching strategies. The subject will familiarise students with the processes needed to implement the mandated national and state curriculums in their unique classrooms with the diversity of students with whom they are working. A study of techniques to create safe and well managed learning environments where school students feel a sense of ownership of their learning will aid successful completion of the associated practicum subject. The practice of continuous assessment, planning, implementation and reflection that is the curriculum cycle will provide an organising principle around which the understandings gained in the curriculum units can be built.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): TEAC 7154 Professional Experience 1
Equivalent Subjects: TEAC 7069 - Learning for Teaching
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7142 Teaching and Learning with Adults (10 Credit Points)
Subject Details (p. 5228) Legacy Code: 102155
This subject explores the pedagogical issues which shape the ways in which teaching and learning for adults might be organised in a variety of contexts. It is suitable for leaders, teachers, tutors, trainers and other staff working in schools, organisations, workplaces and communities. The subject will draw upon a range of theoretical perspectives including approaches to learning, knowledge and assessment, the relationship between organisational context, teaching and learning, and the role of the adult educator as a 'practical theorist'.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7144 Technology Assisting Learning (10 Credit Points)
Subject Details (p. 5229) Legacy Code: 102154
Assistive technologies have the potential to meet a range of simple to complex needs for individuals with additional needs, and boost an individual's participation, communication, learning outcomes and quality of life. As such, professionals must develop both knowledge and skill in identifying and embedding appropriate technology into the assessment, goal-setting, teaching and evaluation cycle. Emphasis will be placed on demonstrating deep knowledge of the literature and demonstrating skills in assessment and instructional practices employing technology to support learning, communication, curricular, and instructional access either in a learning or natural setting. Students will be expected to critically examine the educational function and efficacy of communication technology, assistive technology, digital and multimedia text, or educational software.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: TEAC 7077 - Multiliteracies and additional needs
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7147 Play, Health and Wellbeing (10 Credit Points)
Subject Details (p. 5229) Legacy Code: 102104
Play provides a foundation for children's holistic health, wellbeing, learning and relationships. This subject engages students in a critical inquiry of children's play and its pedagogical potential to facilitate engagement in learning and complex interactions. Developmental, cultural, and critical theories of play will be interrogated to enhance understanding of the value and relevance of play in both early childhood and school settings. Play-based pedagogies aligned with The Early Years Learning Framework for Australia, the Australian Curriculum and NSW Personal Development, Health and Physical Education curriculum, and national and state health promotion initiatives are used to assess and plan for children's emerging play, relationships, movement, health and wellbeing. Students will examine children's rights, agency and abilities within multiple play contexts, and the influence of community and families' diverse values and cultural practices, on play opportunities that promote active and healthy ways of being. This subject is included in the Foundation Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: TEAC 7085 Play development and learning
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7148 Transformative Learning (10 Credit Points)
Subject Details (p. 5231) Legacy Code: 101658
This subject provides opportunities to examine and apply theories drawn from critical pedagogy, transformative learning and ecological thinking. It challenges students to critically examine the relationships through which personal and social knowledge is constructed and their efficacy in the construction of learning for the future. Inherent in such thinking are questions about the processes of change in education systems that lead through equity, inclusiveness, wellbeing, social justice and ecological sustainability.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7149 Understanding and Teaching Children (10 Credit Points)
Subject Details (p. 5231) Legacy Code: 102077
From 2024, this subject is replaced by TEAC 7161 - Educational Psychology for Learning and Teaching. From 2020 students should note that core subjects are now taught in semesters rather than half yearly sessions. This subject is designed to facilitate prospective teachers to develop the dispositions and critical skills to create learning communities that are academically challenging, developmentally responsive, socially equitable and promote social and emotional wellbeing. The subject highlights the interacting contributions of biology and environment to the development of children and explores how teachers' knowledge of this process informs their instructional strategies. Specifically, this subject examines a body of classic, as well as current theories, research and practice relating to the cognitive, physiological, and social/affective needs of children and focuses on the relevance of these for classroom practice. Particular emphasis is given to developing responsive teaching practices which promote social and emotional wellbeing of children and are underpinned by high-quality relationships which extend to include the valuing of families and the wider community.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: TEAC 7040 - Educational Psychology for Primary Teaching
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7150 Universal Design for Learning (10 Credit Points)
Subject Details (p. 5232) Legacy Code: 102150
Developing the ability to meet the needs of a diverse group of learners within a flexible learning situation is critical to promote inclusion. This subject reviews multiple approaches and strategies employed (e.g. accommodation, adjustment, differentiation) and advocates for Universal Design for Learning to achieve this goal. Strategies are critiqued based on their capacity to enhance learning outcomes for individuals with additional needs and to advance inclusion. These analyses are then used to develop strategies and methods which can facilitate the learning and inclusion of individuals with a range of abilities, skills and needs. Students evaluate strategies, plan and reflect on a learning experience based on Universal Design for Learning.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7151 Applied Mathematics and Science in Secondary STEM Education (10 Credit Points)
Subject Details (p. 5233) Legacy Code: 102764
This subject develops in-service teachers' knowledge and skills in the application of mathematics and science in the STEM (science, technology, engineering and mathematics) disciplines. The subject content and assessments are designed to (1) build teachers' foundational skills in science/mathematics, and (2) build teachers' professional skills in the implementation of science/mathematics in their classrooms. A particular focus of the subject is how science/mathematics can be used to authentically integrate curriculum content from across the different STEM disciplines through inquiry- and problem-based learning, with the ultimate aim of enhancing student engagement and achievement in the STEM disciplines.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7152 Applied Robotics and Programming in Secondary STEM Education (10 Credit Points)
Subject Details (p. 5234) Legacy Code: 102763
This subject develops in-service teachers' knowledge and skills in the application of robotics and coding in the STEM (science, technology, engineering and mathematics) disciplines. The subject content and assessments are designed to firstly build teachers' foundational skills in robotics/coding, and secondly, build teachers' professional skills in the implementation of robotics/coding in their classrooms. A particular focus of the subject is how robotics/coding can be used to authentically integrate curriculum content from and across the different STEM disciplines through inquiry- and problem-based learning, with the ultimate aim of enhancing student engagement and achievement in the STEM disciplines.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7153 Creating Inclusive Classrooms: Perspectives on Theory, Policy, and Practice (10 Credit Points)
Subject Details (p. 5235) Legacy Code: 102746
This subject examines the theoretical, legislative, ethical, international and local policy perspectives that inform inclusive practices for diverse learning needs in school settings. It critically analyses disability, special needs, inclusive principles, and evidence-based practice. Students will develop skills in using best practice to assess, plan, monitor, and evaluate learning for students with diverse abilities. The importance of establishing collaborative partnerships with families, educational professionals, and community support services will be examined. This subject focuses on the promotion of educational and social inclusion to enhance learning outcomes, health, and wellbeing for all young people in school contexts. This subject is included in the Development Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: TEAC 7052 - Inclusive Practices TEAC 7053 - Inclusive Teaching for Effective Learning TEAC 7049 - Inclusive Education –Theory Policy and Practice
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7154 Professional Experience 1 and Pedagogy (10 Credit Points)
Subject Details (p. 5236) Legacy Code: 102792
This subject is the first Professional Experience subject of the Master of Teaching (Primary) and Master of Teaching (Secondary) programs. This subject is included in the Development Phase of the Master of Teaching program. This subject incorporates a 30-day placement in a NSW school. It is designed to introduce all students to the philosophical, ethical, practical and pedagogical perspectives of becoming a teacher in diverse, contemporary educational settings. The aim of this subject is to enable you to proactively engage in real-life educational settings to learn and enhance your professional development as a future teacher. This subject gives you the opportunity to explore the relationship between practical and theoretical knowledge of teaching. This subject will provide you with an opportunity to explore a range of learning activities that occur inside and outside the classrooms, and the roles of the teaching and non-teaching staff within the school. Through ongoing observation, supervised teaching and contribution in the wider school community, the subject ensures you work towards the achievement of the national standards for a graduate teacher.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): Students enrolled in 1714 Master of Teaching (Secondary) or 1848 Master of Teaching (Secondary) STEM must has successfully completed
TEAC 7161 Educational Psychology for Learning and Teaching and TEAC 7032 Diversity Social Justice and Schooling and
(TEAC 7160 Literacy Numeracy for Secondary Teaching or TEAC 7027 Designing Teaching and Learning)
Students enrolled in 1781 Master of Teaching (Primary) must has successfully completed
TEAC 7161 Educational Psychology for Learning and Teaching and TEAC 7032 Diversity Social Justice and Schooling
Co-requisite(s): Students enrolled in 1714 - Master of Teaching (Secondary) or 1848 Master of Teaching (Secondary) STEM must have successfully completed or be enrolled in TEAC 7082 Pedagogy for Positive learning Environments
Students enrolled in 1781 Master of Teaching (Primary) must have successfully completed or be enrolled in TEAC 7082 Pedagogy for Positive learning Environments or TEAC 7141 Teaching and Learning in Classrooms
Equivalent Subjects: TEAC 7097 - Primary Professional Practice 1 TEAC 7135 - Secondary Professional Practice I TEAC 7109 - Professional Practice 1 TEAC 7102 - Professional Experience 1 TEAC 7136 - Secondary Professional Practice 1 STEM
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7155 Professional Experience 2 (10 Credit Points)
Subject Details (p. 5238) Legacy Code: 102793
The aim of this subject is to enable education students to proactively engage in real-life educational settings to learn and enhance their professional development as a future teacher. This second professional experience subject provides 30 of the 60 required professional experience days. This provides you with an opportunity to explore ranges of learning activities that occurs inside and outside the classrooms and the roles of the teaching and non-teaching staff within the school. You will also have opportunity to reflect on the teaching and learning cycle and refine your competencies as a beginning teacher under the supervision of qualified educators. This subject includes the TPA (Teaching Performance Assessment) which is designed to assess Teacher Education Students teaching as measured by the Australian Professional Standards for Teachers at the Graduate level. This subject is included in the Transition Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): TEAC 7154
Co-requisite(s): -
Equivalent Subjects: TEAC 7110 Professional Practice II TEAC 7098 Primary Professional Practice 2 TEAC 7105 Professional Experience II TEAC 7137 Secondary Professional Practice 2 TEAC 7138 Secondary Professional Practice 2 - STEM
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7156 Aboriginal Education: Past, Present and Future (10 Credit Points)
Subject Details (p. 5240) Legacy Code: 102810
This subject builds the capacity of students to work in culturally competent and sensitive ways in relation to Aboriginal and Torres Strait Islander education in primary schools and early childhood settings. It allows for the development of understandings of the similarities and/or diversities of local Aboriginal and Torres Strait Islander groups including culture, histories, languages and identity. It examines the social and cultural contexts that influence engagement by Aboriginal and Torres Strait Islander children, families and communities. It explores ways of improving engagement through effective early childhood and school culture, curriculum and community approaches. By investigating current approaches for teaching Aboriginal and Torres Strait Islander children and integrating Aboriginal knowledges, perspectives and culturally sensitive pedagogies into education, the students develop their own practices in providing an inclusive learning environment for all children. This subject is included in the Foundation Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: TEAC 7016 - Classrooms without Borders
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7157 Action Research in Teaching (10 Credit Points)
Subject Details (p. 5242) Legacy Code: 102811
This subject provides an opportunity for students to engage with literature on a particular aspect of a research topic and design a research project in a team. Students will: locate and select relevant research literature to investigate a particular research question; analyse key ideas, assumptions and domains of knowledge in the literature around that question; identify appropriate research methods and designs for answering it; critically apply appropriate forms of data collection and data analysis to that research design, and develop research findings into an informed discussion linking to broader academic conversations around the field being researched. This subject is included in the Transition Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: TEAC 7117 - Researching Teaching Learning 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7158 Researching Teaching and Learning (10 Credit Points)
Subject Details (p. 5243) Legacy Code: 102852
This subject builds on the premise that, in contemporary education environments, teachers continue to develop their professional knowledge and practice through their engagement in reflective inquiry. The capacity to read and make sense of research is an important professional attribute for teachers interested in sustainable practices, engaged inquiry learning by adolescents, and diversity, social justice and equity. The subject provides pre-service teachers with a starting point and practical insights into the day-to-day decision making of educators. The content will follow the order and logic that experienced researchers take in order to ensure quality in their research, and also to ensure that it is valid, reliable, ethical, useful and socially responsible. Given the professional skills required by teachers, the subject pays particular attention to the elements involved in action research.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: TEAC 7118 - Researching Teaching and Learning 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7160 Literacy and Numeracy for Secondary Teaching (10 Credit Points)
Subject Details (p. 5243)
This subject addresses how to effectively teach literacy and numeracy across a range of secondary subjects. It focuses on how to teach oral language, phonics, reading and comprehension strategies within different disciplines. Students will learn about how writing can be used to develop adolescents' learning and depth of understanding using explicit, guided and independent pedagogies for writing. The subject covers the six strands of mathematics including number, algebra, geometry, measurement, statistics and probability. Students will apply proficiencies in understanding, fluency, problem-solving and reasoning. The use of scaffolds and application of numeracy in a range of curriculum areas will be addressed. This subject is included in the Foundation Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: -
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7161 Educational Psychology for Learning and Teaching (10 Credit Points)
Subject Details (p. 5244)
This subject highlights the interacting contributions of biology and environment to the development of children and adolescents and explores how teachers' knowledge of this process must inform their pedagogy. Specifically, this subject examines classic and current theories and research evidence-base relating to the biological, cognitive, social, emotional, and moral development of children and adolescents and the implications of these for learning and classroom practice. It includes theoretical perspectives on the brain and learning including memory formation, retention and models of motivation, attention, and knowledge acquisition. This subject dispels common educational neuromyths and focuses on evidence-informed pedagogical practices that support learning, engagement, motivation, and wellbeing in culturally responsive classrooms. This subject is included in the Foundation Phase of the Master of Teaching program. This subject is included in the Foundation Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: TEAC 7149 and TEAC 7004
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7162 Children's Learning and Development (10 Credit Points)
Subject Details (p. 5246)
Early and middle childhood represent periods of rapid growth in children's physical, cognitive, language, social, emotional, and moral development. This subject provides students with a comprehensive understanding of child development as well as a deep knowledge of learning theories and contemporary research evidence to evaluate implications for teaching children birth-12 years. In particular, students will develop an understanding of brain development and cognitive processes for children birth-12 years. Students will examine the critical role that family, culture, and community play in children's development and evaluate the impact of their personal perspectives on their teaching practices. This subject enables students to understand and critique theory and research evidence about child development and learning theories to plan and implement evidence-based teaching pedagogy that is culturally and developmentally appropriate. This subject is included in the Foundation Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7163 Investigations: Sustainability, Science and Technology (10 Credit Points)
Subject Details (p. 5247)
This subject explores the place of science, technology and sustainability in the Early Years Learning Framework, the Australian Curriculum and relevant syllabuses. It will focus on scientific and technological pedagogical content knowledge appropriate for teaching science and technology. The subject will explore the importance of Aboriginal ways of knowing in science using culturally sensitive pedagogies. Within the subject there is significant emphasis on developing scientific inquiry skills and computational and systems thinking in applying technology. The subject supports confident, curious, creative and imaginative life-long learners to inquire, discover and think critically to develop sustainable ideas and solutions using digital and design technologies. This subject is included in the Transition Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: TEAC 7099
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7164 Literacy Connections 2: Communicating, Reading and Writing (10 Credit Points)
Subject Details (p. 5247)
This subject is designed to extend students' understanding of teaching reading, writing, speaking and listening in the upper primary years of school. Students will apply their knowledge of the relevant curriculum documents to assess and plan for children in Stages 2 and 3. Students will explore how a range of texts are applied to teach reading comprehension at the literal, inferential and evaluative levels and provide a context for children's writing for a range of purposes. Opportunities to integrate literacy across the curriculum, drawing on multimodal approaches will be explored. A critical understanding of a range of pedagogical and assessment practices will inform teaching and learning for children with diverse languages, cultures and abilities. Students will apply this knowledge to develop and evaluate literacy lessons. This subject is included in the Transition Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): TEAC 7071
Equivalent Subjects: TEAC 7090
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7165 Working Mathematically 2: Strengthening Connections (10 Credit Points)
Subject Details (p. 5249)
This subject builds on the knowledge and practices developed in Working Mathematically 1: Exploring Connections to prepare students to work with upper primary school learners. Students will expand their understanding of primary mathematics in the NSW Mathematics K-10 syllabus for Stages 2 and 3. The focus of this subject is on mathematics pedagogy, curriculum, inquiry, learner engagement, assessment, differentiation for diversity and the integration of technology. Assessment for learning and planning will be underpinned by the Australian Curriculum: Mathematics and the relevant NSW Mathematics syllabus and curriculum documents. Students will explore how mathematical learning, fluency and problem-solving is conceptually developed. This subject will promote confident teachers who engage learners in meaningful mathematical experiences which promote autonomy and agency. This subject is included in the Transition Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: TEAC 7094
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7166 Inclusive Pedagogies (10 Credit Points)
Subject Details (p. 5250)
Inclusion is a right for all children. This subject explores how socio-cultural factors influence children's experiences of difference, diversity and disability. Students will reflect on their role as a teacher in advocating for equity and access to nurturing early childhood and primary inclusive learning environments. By drawing on research and relevant curriculum documents, students will learn to optimise learning through a tiered, strength-based approach that reduces barriers to learning and strengthens the diverse capabilities of all learners. The subject promotes the importance of collaborative partnerships with families and all those working with the child. This subject is included in the Transition Phase of the Master of Teaching program.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: TEAC 7052 TEAC 7053 TEAC 7049 TEAC 7153
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 7167 Primary English and Literacy 3 (10 Credit Points)
Subject Details (p. 5251)
The focus on this subject is the exploration and critical evaluation of the teaching of English and Literacy across K-6 classrooms. This subject recognises that language, discourses, and text shape students' interactions with our complex world and how we can teach students in K-6 to understand how meaning is shaped, conveyed, interpreted, and reflected. Contemporary pedagogical practices of teaching English with reference to National Literacy Progressions will be explored. There is strong emphasis on critical and creative understanding of approaches to develop literacy in K-6 with attention to understanding, interpreting, and creating texts with a wide range of diverse learners. A wide range of children's literature will be used with particular focus given to the selection and use of rich Aboriginal and Torres Strait Islander literature in teaching English. The subject provides opportunities for pre-service teachers to understand, critique and apply current literacy approaches that deliver successful outcomes for students. This subject is in the transition stage of program.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 9001 Higher Degree Research Thesis - Teacher Education: Early Childhood (80 Credit Points)
Subject Details (p. 5251) Legacy Code: 800011
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TEAC 9002 Higher Degree Research Thesis - Teacher Education: Primary (80 Credit Points)
Subject Details (p. 5252) Legacy Code: 800013
Level: PhD and Research Masters Level 9 subject

Tourism (TOUR)

TOUR 1002 Tourism and Global Trends (10 Credit Points)
Subject Details (p. 5254) Legacy Code: 101901
In 2023, this subject replaced by TOUR 1003 - Global Trends in Tourism and Events. This subject introduces students to the foundational knowledge and skills required for tourism study at UWS and professional practice in a range of tourism related careers. This subject provides students with opportunities to familiarise themselves with the core concepts and basic theory of tourism management studies. It aims to equip students with an understanding of sustainable tourism, the tourism system, and mega trends of tourism. It covers the global complexity of the tourism industry; of the social, environmental, and political realities; and the role of governments - federal, state and local together with private enterprise in the development of tourism experience, industry practice, and destinations.
Level: Undergraduate Level 1 subject
Equivalent Subjects: TOUR 1001 - Tourism Sustainability and Global Trends
Incompatible Subjects: LGYA 1263 - Sustainable Tourism in Practice LGYA 1262 - Managing Tourism
Restrictions: Please see the Subject Details page for any restrictions for this subject

TOUR 1003 Global Trends in Tourism and Events (10 Credit Points)
Subject Details (p. 5254)
This subject introduces students to the foundational knowledge and skills required for tourism, event and heritage studies at WSU and professional practice in a range of related careers. The subject provides students with opportunities to familiarise themselves with the core concepts and basic theory of tourism, event, and heritage studies. It aims to equip students with an understanding of sustainable industry and community, the tourism system, and mega trends in tourism and event management. It covers the global complexity of tourism and event management; of the social, environmental, and political realities; and the role of governments – federal, state and local together with private enterprise in the development of experience, industry practice, and destinations.
Level: Undergraduate Level 1 subject
Equivalent Subjects: TOUR 1002 - Tourism and Global Trends
Restrictions: Please see the Subject Details page for any restrictions for this subject

TOUR 2001 Issues in Contemporary Heritage (10 Credit Points)
Subject Details (p. 5255) Legacy Code: 101601
In 2023 this subject is replaced by HUMN 2073 Issues in Contemporary Heritage. The aim of this subject is to get students thinking critically about heritage. To do so, it examines two main questions: "What is heritage?" and "Why does it matter?". While the answers to both may appear fairly straightforward, this subject is designed to make students question and problematise their own assumptions, rethink what is and is not heritage, and consider why, in fact, we even care at all.
The subject will introduce concepts such as national identity, ethics, memorialisation, belonging, nostalgia, heritage values, status, control and repatriation. It will also introduce and examine heritage legislation, theory and practice.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TOUR 2003 Managing Sustainable Places (10 Credit Points)
Subject Details (p. 5255)
Managing Sustainable Places provides students with a fundamental understanding of current debates in tourism and sustainable place management. The complex relationships and interactions among the diverse stakeholders involved in managing sustainable places and tourism are explored. The subject encourages a systems approach, focusing on managing visitor experiences alongside destination attributes and community development. The subject assists students to analyse the role of tourism, events, and heritage in sustainable places through applying a wide range of case studies.
Level: Undergraduate Level 2 subject
Equivalent Subjects: SPRT 2011 Sustainability Tourism and Place
Restrictions: Please see the Subject Details page for any restrictions for this subject

TOUR 2004 Tourism and Festivals in Society (10 Credit Points)
Subject Details (p. 5256)
In this subject student's approach tourism and festivals as cultural and social phenomena. Tourism and festival related industries, visitor behaviour, visitor experience and the impacts of these are examined through a socio-cultural lens. Considering tourism as an agent of social change, and festivals as a key driving force within this, the subject is framed within the interplay between tourism, mobility and globalisation, tourism and development, and tourism and world events. The subject will also unpack some of the common motivations for leisure travel, explore the role of tourism in everyday life, and examine the interconnections between the media, consumer culture, visual culture and the tourist and festival experience.
Level: Undergraduate Level 2 subject
Equivalent Subjects: HUMN 2057 - Tourism in Society
Restrictions: Please see the Subject Details page for any restrictions for this subject

TOUR 3001 Tourism, Events and Technology (10 Credit Points)
Subject Details (p. 5257)
This subject explores the ways in which digital technologies are reshaping travel, including travellers' experiences, and planning and management of the travel industry. Students will learn how digital technologies are being utilised, and the opportunities and challenges these technologies present. The subject will provide opportunities to engage with travel apps, virtual/augmented reality technologies, smart attractions and transport technologies. Students will also learn how to conceptualise and pitch their own digital travel products. Upon completion of the subject, students will be well placed to develop and manage innovative, socially responsible travel and mobility technologies.
Level: Undergraduate Level 3 subject
Equivalent Subjects: BUSM 3079 - Travel in the Digital Age
Restrictions: Please see the Subject Details page for any restrictions for this subject

TOUR 3002 Cultural Tourism and Events (10 Credit Points)
Subject Details (p. 5257)
This subject examines the relationship between culture, heritage, tourism and events. It firstly provides an introduction to contemporary issues in heritage, tourism and event management. Secondly, it investigates the phenomenon of cultural tourism – its nature (including places and events), the market, visitors, the issues in planning and management – in the context of heritage and sustainable tourism praxis in Australia (and globally) as well as in the context of local communities.
Level: Undergraduate Level 3 subject
Equivalent Subjects: CULT 3015 - Heritage and Tourism
Restrictions: Please see the Subject Details page for any restrictions for this subject

TOUR 3003 Visitor Economy Professional Placement (20 Credit Points)
Subject Details (p. 5258)
The Visitor Economy Professional Placement subject provides students with an opportunity to complete a work placement in the tourism, events, hospitality, visitor economy and/or visitor experience sectors. Students work in a voluntary capacity with an industry host to develop work-ready knowledge, skills and networks. The subject has a strong focus on professional development, with students learning how to apply for professional roles (including developing resumes, expressions of interest and conducting interviews), and develop online profiles, networks, and career goals and plans. On completion of the subject, students will be well placed to apply for positions in the visitor and experience economies.
Level: Undergraduate Level 3 subject
Equivalent Subjects: BUSM 3072 - Tourism Industry Professional Placement
Restrictions: Please see the Subject Details page for any restrictions for this subject

TOUR 3004 Destination Management (10 Credit Points)
Subject Details (p. 5259)
Destination Management provides students with a fundamental understanding of the concepts associated with managing places as destinations. The subject develops analytical skills that include the coordination of a destination through tourism industry's sectors, their relationship with each other and the opportunities and challenges they face in the predictable future. An appreciation of the importance of a destination's unique cultural, natural and economic attributes is developed from the viewpoint of sustainability and through the prism of a destination audit. The nature of competition and gaining competitive advantage is addressed throughout the content.
Level: Undergraduate Level 3 subject
Equivalent Subjects: BUSM 3007 - Destination Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

TOUR 3005 Tourism Policy and Planning (10 Credit Points)
Subject Details (p. 5260)
This subject provides students with a general understanding of planning theory as it relates to sustainable tourism policy and practice. Students will hear directly from practitioners about the ways in which policy and planning is being deployed to address contemporary tourism issues. The subject will explore various planning techniques, tourism policies, scenario mapping strategies and consider conflict resolution practices. The major assessment develops students' abilities to identify deficiencies in current policy and to propose policy recommendations.
Level: Undergraduate Level 3 subject
Equivalent Subjects: BUSM 3073 - Tourism Policy and Planning
Restrictions: Please see the Subject Details page for any restrictions for this subject

TOUR 3006 Festivals and Events (10 Credit Points)
Subject Details (p. 5260)
This subject explores the complexities of planning and managing major festivals and events. Students will gain an appreciation of the benefits festivals and events can provide for communities and visitor economies, as well as the challenges and risks they present. The subject will also cover a variety of other aspects, including: marketing, branding, sustainability, place-making, access, equity and security/ policing. Students will be encouraged to attend events and festivals over the course of the semester, and experts will be invited to provide 'real-world' case-studies. The major assessment allows students to draw on the knowledge and skills they are developing to propose their own major festival/event.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TOUR 5001 Sustainable Tourism and Heritage (10 Credit Points)
Subject Details (p. 5261)
This subject explores heritage and tourism through the lens of sustainability. It examines how heritage and tourism are impacted by sustainability challenges as well as how heritage and tourism can be undertaken in more sustainable ways. The subject contextualises how heritage and tourism have been used in social, economic and urban development and revitalisation strategies across the globe. It critically investigates how heritage and tourism are unfolding in the Global South, Indigenising and decolonising approaches and contemporary movements towards activism and justice (social, cultural, environmental, restorative). The subject also considers threats to these sectors' sustainability, including impacts of the Anthropocene.
Level: Postgraduate Coursework Level 5 subject
Equivalent Subjects: TOUR 7001 - Sustainable Tourism Hospitality and Events
Restrictions: Please see the Subject Details page for any restrictions for this subject

TOUR 5002 Frontiers in Sustainable Tourism Practice and Places (10 Credit Points)
Subject Details (p. 5262)
Tourism is a practice that both reflects and creates the changing, global world. International tourism is a key driver of the human experience of globalisation including the development of global citizenry, the opportunities and obligations that accompany this and the challenges, limitations and sometimes unintended effects of seemingly inconsequential travel choices. The tourism industry is concerned with the ongoing production of novel ways of experiencing the world and draws upon innovation in science and technology as well as imaginaries to accomplish this. This subject will examine how tourism creates and responds to futures in the realms of space, economy, culture and knowledge and how we can assess, evaluate and predict the effects of these.
Level: Postgraduate Coursework Level 5 subject
Equivalent Subjects: TOUR 7002 - Tourism Hospitality and Event Futures
Restrictions: Please see the Subject Details page for any restrictions for this subject

TOUR 6001 Tourism, Heritage and Events Policy and Governance (10 Credit Points)
Subject Details (p. 5262)
This subject explores policy and governance in the tourism, heritage and events sectors. Students will explore current policies, and learn how to critically analyse them, especially in the context of sustainable development. The subject will also explore different governance structures in these sectors, and their influence on policy development and sustainability outcomes. After completing this subject, students will be well placed to take on governance, planning and policy roles to reshape the tourism, heritage and events sectors, both in Australia and internationally.
Level: Postgraduate Coursework Level 6 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TOUR 6002 Critical Issues for Heritage and Tourism Futures: Assessed Seminars (10 Credit Points)
Subject Details (p. 5263)
In Spring 2024, this subject replaced by TOUR 7006 - Contemporary Issues for Tourism, Hospitality and Event Management. The world in which we live is undergoing rapid change – socially, environmentally, and politically. Responding to such change requires the constant renewal of our knowledge and skills. This subject explores a range of issues currently facing professionals and researchers working in heritage and tourism management, nationally and internationally. Students who complete this subject are provided an opportunity to deepen their understanding of a chosen issue by preparing and presenting a seminar.
Level: Postgraduate Coursework Level 6 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TOUR 6003 Sustainable Visitor Economies (10 Credit Points)
Subject Details (p. 5264)
In Spring 2024, this subject replaced by TOUR 7003 - Sustainable Visitor Economies. While the intersecting industries and mobilities that comprise the 'visitor economy' (e.g. tourism, events, international education, business travel, hospitality, accommodation, transport, etc.) have traditionally been observed individually, there is a growing recognition of the need for holistic approach to planning and managing these diverse sectors. This is especially important for accomplishing sustainability outcomes. In this subject, students will learn about principles and strategies for managing sustainable visitor economies. Industry and government stakeholders will share case-studies detailing their experiences managing visitor economies.
Level: Postgraduate Coursework Level 6 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TOUR 6004 Data Capture and Creative Communication (10 Credit Points)
Subject Details (p. 5264)
In Spring 2024, this subject replaced by TOUR 7004 - Tourism, Hospitality and Events Insights. This subject provides students with the knowledge and skills to creatively address a range of operational and engagement challenges in the tourism, heritage and visitor economy sectors. Through practical application and class-based theory, students will have the opportunity to learn a variety of data-capture and creative communication techniques, including: safe drone operation, high quality audio-visual recording, video editing, digital mapping, and graphic design for marketing, interpretation and public engagement.
Level: Postgraduate Coursework Level 6 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TOUR 7001 Sustainable Tourism, Hospitality and Events (10 Credit Points)
Subject Details (p. 5265)
Sustainability has become a major issue in the contemporary visitor economy, including in the tourism, hospitality, events and related sectors. However, stakeholders do not necessarily understand the specific aspects of sustainability which their business has an impact upon or is impacted by. Stakeholders in tourism, hospitality and events are not always familiar with the tools of sustainability assessment and have limited comprehension of how a robust sustainability audit can aid in reducing operational costs improving corporate image and increasing customer patronage. This subject will provide students with an opportunity to undertake a sustainability audit from an environmental, economic and social perspective.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: TOUR 5001 - Sustainable Tourism and Heritage
Restrictions: Please see the Subject Details page for any restrictions for this subject

TOUR 7002 Tourism, Hospitality and Event Futures (10 Credit Points)
Subject Details (p. 5265)
Tourism is a practice that both reflects and creates the changing, global world. International tourism is a key driver of the human experience of globalisation including the development of global citizenry, the opportunities and obligations that accompany this and the challenges, limitations and sometimes unintended effects of seemingly inconsequential travel choices. The tourism industry is concerned with the ongoing production of novel ways of experiencing the world and draws upon innovation in science and technology as well as imaginaries to accomplish this. Further, tourism is not insulated from practices that happen within the events and hospitality fields and must be taken into account when considering wholistic and strategic approaches. This subject will examine how these create and respond to futures in the realms of space, economy, culture and knowledge and how we can assess, evaluate and predict the effects of these.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: TOUR 5002 - Frontiers in Sustainable Tourism Practice and Places
Restrictions: Please see the Subject Details page for any restrictions for this subject

TOUR 7003 Sustainable Visitor Economies (10 Credit Points)
Subject Details (p. 5266)
While the intersecting industries and mobilities that comprise the 'visitor economy' (e.g. tourism, events, international education, business travel, hospitality, accommodation, transport, etc.) have traditionally been observed individually, there is a growing recognition of the need for holistic approach to planning and managing these diverse sectors. This is especially important for accomplishing sustainability outcomes. In this subject, students will learn about principles and strategies for managing sustainable visitor economies. Industry and government stakeholders will share case-studies detailing their experiences managing visitor economies.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: TOUR 6003 - Sustainable Visitor Economies
Restrictions: Please see the Subject Details page for any restrictions for this subject

TOUR 7004 Tourism, Hospitality and Events Insights (10 Credit Points)
Subject Details (p. 5266)
This subject provides students with the knowledge and skills to analyse, interpret, translate, and communicate research insights in the tourism, hospitality and event management sectors. Through practical application and class-based theory, students will have the opportunity to gain the critical skills required to locate, select, evaluate and analyse relevant qualitative and quantitative data gathered through a variety of data collection techniques. Students will also learn how to interpret, translate and communicate research insights to diverse audience using creative techniques.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: TOUR 6004 - Data Capture and Creative Communication
Restrictions: Please see the Subject Details page for any restrictions for this subject

TOUR 7005 Tourism, Hospitality and Events Policy and Governance (10 Credit Points)
Subject Details (p. 5267)
This subject explores policy and governance in the tourism, hospitality and events sectors. Students will explore current policies, and learn how to critically analyse them, especially in the context of sustainable development. The subject will also explore different governance structures in these sectors, and their influence on policy development and sustainability outcomes. After completing this subject, students will be well placed to take on governance, planning and policy roles to reshape the tourism, hospitality and events sectors, both in Australia and internationally.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: TOUR 6001 - Tourism Heritage and Events Policy and Governance
Restrictions: Please see the Subject Details page for any restrictions for this subject

TOUR 7006 Contemporary Issues for Tourism, Hospitality and Event Management (10 Credit Points)
Subject Details (p. 5267)
The world in which we live is undergoing rapid change – socially, environmentally, and politically. Responding to such change requires the constant renewal of our knowledge and skills. This subject explores a range of issues currently facing professionals and researchers working in tourism, hospitality and event management, nationally and internationally. Students who complete this subject are provided an opportunity to deepen their understanding of a chosen issue by preparing and presenting a seminar.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: TOUR 6002 - Critical Issues for Heritage and Tourism Futures Assessed Seminars
Restrictions: Please see the Subject Details page for any restrictions for this subject

TOUR 7007 Visitor Economy Professional Placement (Postgraduate) (20 Credit Points)
Subject Details (p. 5268)
The Visitor Economy Professional Placement subject provides students with an opportunity to complete a work placement in the tourism, events, hospitality, visitor economy and/or visitor experience sectors. Students work in a voluntary capacity with an industry host to develop work-ready knowledge, skills and networks. The subject has a strong focus on professional development, with students learning how to apply for professional roles (including developing professional resumes, expressions of interest and conducting interviews), and develop online profiles, networks, and career goals and plans. On completion of the subject, students will be well placed to apply for positions in the visitor and experience economies.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

TOUR 9001 Higher Degree Research Thesis - Tourism (80 Credit Points)
Subject Details (p. 5268) Legacy Code: 800069
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

Visual Arts and Crafts (VISU)

VISU 2003 From Ochre to Acrylics to New Technologies (10 Credit Points)
Subject Details (p. 5270) Legacy Code: 101755
This subject examines the emergence of the Indigenous Australian visual arts movement. It will provide students with a body of knowledge which explores the transition of art-making as it emerged from an historical cultural practice: from ochre to acrylics to new technologies. In examining the Indigenous visual arts movement beginning with the Papunya Tula artists, students will gain an insight into the significant contribution urban and regional Indigenous artists make to the Australian economy and culture. Students will have the exciting opportunity to participate in site visits and engage with a number of Indigenous visual artists. This subject is available to all Undergraduate students who have open electives.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

VISU 2007 Animation and Visual Effects (WSTC) (10 Credit Points)
Subject Details (p. 5270) Legacy Code: 700328
Explore the art and technology of animation and visual effects as applied to digital screen media production. In this unit, you will be introduced to the principles of animation and compositing and learn how to create effective motion sequences integrated with sound. Working with commercial software, you will explore the unique possibilities of animation and visual effects production and experiment with alternative, creative, narrative storytelling approaches. Develop critical, conceptual and practical skills within the context of animation and visual effects which will then enable you to deliver powerful and compelling visual stories on multiple media platforms.
Level: Undergraduate Level 2 subject
Co-requisite(s): Students enrolled in the combined DiplomaBachelor courses listed below must pass all College Preparatory units listed in the course structure before progressing to the Year Two units
Equivalent Subjects: COMM 2031 - Principles of Non-Linear Editing COMM 2008 - Animation and Visual Effects COMM 2042 - Visual Effects COMM 2051 - Animation and Visual Effects COMM 2054 - Animation and Visual Effects (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

VISU 3002 Photomedia: Fashion and Identity (10 Credit Points)
Subject Details (p. 5271) Legacy Code: 100941
This subject explores issues of identity through photographic practice as used in Fashion Photography. Fashion is a universal form of self-expression, making it the communication strategy most employed to express identity based on material and non-material cultures. The role of photography in the creation of iconic and culturally referential images in both commercial and editorial work will be researched, analysed and interpreted in order to place the student's work in context. It provides students with capacity building through an advanced experience with studio lighting, digital effects for fashion based image making and experience with location and studio photography and of professional photography as it is used in fashion publications.
Level: Undergraduate Level 3 subject
Pre-requisite(s): DESN 2013
Equivalent Subjects: LGYA 0822 - Fashion Style and Identity LGYA 2433 - Photomedia 2 Fabrication
Restrictions: Please see the Subject Details page for any restrictions for this subject

ACCT 0002 Accounting Fundamentals (WSTC)

Credit Points 5

Legacy Code 900010

Coordinator Abdullah Al Aabed (https://directory.westernsydney.edu.au/search/name/Abdullah Al Aabed/)

Description Accounting is the practice of recording, classifying, summarising, analysing and interpreting information, of a commercial nature for the purpose of helping people make decisions. In the world of business, the role of accounting is to support management in providing timely and accurate financial information about the business so that informed decisions can be made. This subject examines the basic principles underpinning accounting and connects the accounting process to financial decision making for a business.

School Western Sydney The College

Discipline Accounting

Student Contribution Band HECS Band 4 5cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 0 Preparatory subject

Equivalent Subjects ACCT 0001 - Accounting Fundamentals (WSTC Prep)

Restrictions

Students must be enrolled in a Western Sydney University The College Foundation Studies program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the role of Accounting in business
2. Explain basic Accounting principles and standards.
3. Complete Analysis Charts and record transaction details
4. Construct basic financial statements.
5. Demonstrate simple budgeting and CVP analysis skills.
6. Apply accounting knowledge in basic financial decision-making

Subject Content

Topic 1 What is Accounting?
Forms of ownership
The nature, purpose, role and main principles of accounting
The accounting equation
Topic 2 Recording transactions
Transaction analysis
Organisation of accounting information through the double entry system
Topic 3 Preparation of Financial Statements
The main financial summaries used by accountants
Topic 4 Management Accounting
Budgeting
Basic cost behavior and CVP analysis
Topic 5 Accounting for financial decision-making
The financial environment of business
Interpretation of financial statements
Impact of decisions based on interpretation of financial statements

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Intra-session Exam	1 hr	10	N	Individual
Intra-session Exam	1 hr	20	N	Individual
Participation	Weekly	10	N	Individual
Case Study	1.5 hrs	20	N	Individual
Final Exam	2 hrs	40	N	Individual

ACCT 0003 Fundamentals of Finance and Accounting

Credit Points 10

Legacy Code 201034

Coordinator Mark Thomas (https://directory.westernsydney.edu.au/search/name/Mark Thomas/)

Description In this unit, students will be introduced to the fundamentals of finance and accounting for business. Students will learn to apply numerical skills within the areas of finance and accounting in preparation for post-graduate study. Financial information will be analysed and interpreted for the purpose of decision-making in a range of corporate contexts. Students will be required to demonstrate an understanding of ethical conduct and best practice reporting in undertaking financial and accounting processes.

ACCT 1005 Accounting in Context

Credit Points 10

Legacy Code 200972

Coordinator Helen Black (https://directory.westernsydney.edu.au/search/name/Helen Black/)

Description Accounting in Context is the first core subject required in the accredited accounting program, but can be included as an elective in other programs. It is designed to provide an overarching context about the purpose and usefulness of accounting information and explain a range of definitions and terms used in accounting and business. Accounting in Context will introduce accounting reports and their interpretation, and explore the impact of policy and measurement methods on accounting information and business decisions. Successful completion of the subject will equip participants with an understanding of the importance of accounting to society and allow them to engage with the next core accounting subject; Financial Accounting Applications.

School Business

Discipline Accounting

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Equivalent Subjects ACCT 1006 - Accounting in Context (WSTC) ACCT 1004 - Accounting Reports and Decisions

Incompatible Subjects ACCT 1001 - Accounting Information for Managers ACCT 1003 - Accounting Information for Managers (WSTC)

Restrictions

This subject is not available to students enrolled in programs 2607 Bachelor of Construction Management, 2769 Bachelor of Construction Management Studies/Bachelor of Laws, 3692 Bachelor of Construction Technology, 3727 Bachelor of Building Design Management. Students enrolled in these programs must complete subject ACCT 1001 - Accounting Information for Managers.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine the usefulness of accounting for decision making.
2. Analyse the ethical, regulatory and sustainability dimensions of accounting.
3. Demonstrate through real-world examples how accounting concepts apply to businesses in the 21st century.
4. Analyse how different accounting techniques impact on accounting information.
5. Demonstrate skills in research and communication.

Subject Content

1. What is accounting and its purpose?
2. Who uses accounting information and how is it used for decision making?
3. What does accounting information look like for different business structures?
4. The regulatory, ethical and sustainability dimensions of accounting.
5. Accounting terms, principles and concepts.
6. Applying the definition and recognition of balance sheet items (assets, liabilities and equity) to a business case study.
7. Applying the definition and recognition of income statement items (income and expenses) to a business case study.
8. Business transactions - recognising, classifying and recording.
9. Exploring the accounting equation.
10. Accounting Techniques: the impact of policies and measurement methods on accounting information and business decisions.
11. Interpreting financial statements.

ACCT 1006 Accounting in Context (WSTC)

Credit Points 10

Legacy Code 700274

Coordinator Abdullah Al Aabed (https://directory.westernsydney.edu.au/search/name/Abdullah Al Aabed/)

Description Accounting in Context is the first core subject required in the accredited accounting program, but can be included as an elective in other courses. It is designed to provide an overarching context about the purpose and usefulness of accounting information and explain a range of definitions and terms used in accounting and business. Accounting in Context will introduce accounting reports and their interpretation, and explore the impact of policy and measurement methods on accounting information and business decisions. Successful completion of the subject will equip participants with an understanding of the importance of accounting to society and allow them to engage with the next core accounting subject; Financial Accounting Applications.

School Business

Discipline Accounting

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Pre-requisite(s) Students in programs 7102 or 7177 must have successfully completed BUSM 0029 Decision Making for Business (WSTC Prep) before enrolling in this subject

Equivalent Subjects ACCT 1005 - Accounting in Context ACCT 1002 - Accounting Information for Managers (Creative Industries)

Incompatible Subjects ACCT 1001 - Accounting Information for Managers ACCT 1003 - Accounting Information for Managers (WSTC)

Restrictions

Students must be enrolled at Western Sydney University, The College in one of the following programs: 7177 Diploma in Business, 7100 Diploma in Business Fast Track, 7102 Diploma in Business Extended, 6037 Diploma in Business/Bachelor of Business.
Students enrolled in 7102 - Diploma in Business Extended must have passed 40 credit points of the preparatory subjects in their program in order to enrol in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate the usefulness of accounting for decision making.
2. Analyse the ethical, regulatory and sustainability dimensions of accounting.
3. Demonstrate through real-world examples how accounting concepts apply to businesses in the 21st century.
4. Analyse how different accounting techniques impact on accounting information.
5. Demonstrate skills in research and communication.

Subject Content

1. What is accounting and its purpose?
2. Who uses accounting information and how is it used for decision making?
3. What does accounting information look like for different business structures?
4. The regulatory, ethical and sustainability dimensions of accounting.
5. Accounting terms, principles and concepts.
6. Applying the definition and recognition of balance sheet items (assets, liabilities and equity) to a business case study.
7. Applying the definition and recognition of income statement items (income and expenses) to a business case study.
8. Business transactions ? recognising, classifying and recording.
9. Exploring the accounting equation.
10. Accounting Techniques: the impact of policies and measurement methods on accounting information and business decisions.
11. Interpreting financial statements.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Portfolio	2,500 words	30	N	Individual
Intra-session Exam	1 hour	10	N	Individual
Intra-session Exam	1 hour	10	N	Individual
End-of-session Exam	2 hours	50	Y	Individual

ACCT 1007 Financial Accounting Applications

Credit Points 10

Legacy Code 200111

Coordinator Mamun Billah (https://directory.westernsydney.edu.au/search/name/Mamun Billah/)

Description This subject gives students the practical skills necessary to analyse the accounting transactions of an entity, and then be able to measure and record these transactions in a systematic manner for the preparation of simple financial statements. Students learn key accounting concepts such as assets, liabilities, revenues and expenses used in financial reporting. Students produce for example profit and loss statements and balance sheets. Knowledge and skills developed in the subject are foundational to higher level financial and management accounting subjects.

School Business

Discipline Accounting

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Pre-requisite(s) ACCT 1005 - Accounting in Context

Equivalent Subjects ACCT 1008 - Financial Accounting Applications (WSTC)

Learning Outcomes

1. Explain the role and purpose of accounting, accounting processes and systems.
2. Apply the accounting elements (assets, liabilities, equity, revenues and expenses) and the underlying principles and relationships of the elements for the purpose of periodic financial reporting.
3. Identify components of the accounting cycle.
4. Prepare journalising and posting transactions to general and subsidiary ledgers and complete a trial balance.
5. Prepare financial statements for simple business structures using manual based and computerised accounting software.
6. Outline the conceptual framework and accounting standards to account for different types of transactions.

Subject Content

1. Revision of key prior knowledge
2. Extension of the accounting cycle and accounting processes
3. Double entry accounting
4. Accounting for GST
5. Transferring information from journal to the ledger
6. Recording of inventory (perpetual and periodic systems), valuation methods, and depreciation of non-current assets
7. Trial balance
8. Bank Reconciliation
9. Preparation of simple financial statements
10. Partnership formation

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Portfolio	Equivalent to 1,500 words	15	N	Individual
Quiz	60 minutes (per quiz)	20	N	Individual
Practical	Equivalent to 1,000 words	15	N	Individual
Final Exam	2 hours	50	Y	Individual

ACCT 1010 Management Accounting Fundamentals

Credit Points 10

Coordinator Rada Massingham (https://directory.westernsydney.edu.au/search/name/Rada Massingham/)

Description This subject provides an introduction to management accounting in an e-commerce environment. Students examine the interrelations of management accounting to other functional areas, to suppliers, to customers, and to other sources of external information relevant to planning and control. Through a range of activities, students learn the development and logic of routine and non-routine analysis performed to support management decision making.

School Business

Discipline Accounting

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Pre-requisite(s) ACCT 1007

Equivalent Subjects FINC 1001

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Develop costing techniques outlining their strengths and weaknesses.
2. Apply different decision models in the evaluation of product costing, product pricing and sales forecasting.
3. Prepare a master budget with all of the required supplementary schedules.
4. Assess what is relevant and irrelevant information in non-routine decision-making.
5. Explain ethical issues in management accounting.
6. Describe management accounting in an electronic environment.
7. Appraise basic concepts of control, and the behavioural impacts of control systems.

Subject Content

1. Introduction to management accounting
2. Basic cost management concepts and cost behaviour
3. Cost volume profit analysis
4. Product and service costing: job-order system
5. Product and service costing: A process systems approach
6. Relevant decision making
7. Budgeting for planning and control
8. Flexible budgeting, Standard costing and variance analysis
9. Allocating costs of support departments and joint products

Assessment

ACCT 2001 Contemporary Management Accounting

Credit Points 10

Legacy Code 200108

Coordinator Rada Massingham (https://directory.westernsydney.edu.au/search/name/Rada Massingham/)

Description This subject examines the role of contemporary management accounting systems and techniques as well as the factors that influence the design of these systems. Students learn about appropriate choices of the different management accounting techniques and the importance of strategy in the contemporary business environment. Students expand their knowledge by applying techniques through real-life scenarios, and analysing and make recommendations that take into account the constraints and opportunities each present. Through the design of performance measurement systems, students demonstrate skills in critical thinking and decision making valued in the accounting organisations.

School Business

Discipline Accounting

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) FINC 1001 or ACCT 1010

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the role of management accounting systems in supporting business strategy and the limitations of traditional management accounting techniques
2. Communicate solutions in a clear, concise and ethical manner supported by analysis to assist management in decision making, resource management and value creation
3. Identify the factors that influence the design of management accounting systems and choice of contemporary management accounting techniques
4. Design a strategic performance measurement system using the balanced scorecard to incorporate non-financial performance measures
5. Apply contemporary management accounting techniques to real life scenarios
6. Collaborate with diverse team members to plan and complete a group project dealing with management accounting concepts and recommendations

Subject Content

1. Balanced score card, key performance indicators, performance benchmarking.
2. Profitability analysis.
3. Product life cycle and target costing.
4. Pricing and product mix decisions.
5. Business process re-engineering.
6. Inventory management techniques.
7. Quality management: measurement and control, and cost of quality reports.
8. Productivity: measurement and control, productivity analysis, value added, non-value added.
9. Value chain analysis.
10. Strategic management accounting.
11. Behavioural issues, performance related remuneration.
12. Sustainability and environmental management accounting

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Practical	Weekly	10	N	Individual
Quiz	5 times throughout teaching term	10	N	Individual
Case Study	2000 words	20	N	Group
Final Exam	2 hours	60	Y	Individual

ACCT 2004 Intermediate Financial Accounting

Credit Points 10

Legacy Code 200536

Coordinator Michael Wilson (https://directory.westernsydney.edu.au/search/name/Michael Wilson/)

Description This subject extends the knowledge and understanding of financial accounting through the application of problem solving to selected entities drawing upon accounting theory and critical analysis.

School Business

Discipline Accounting

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) ACCT 1007

Equivalent Subjects ACCT 3008 - Financial Accounting Issues LGYA 9763 - The Anatomy of Financial Accounting

Incompatible Subjects LGYB 3531 - Advanced Financial Accounting LGYB 8985 - Financial Accounting 3

Assumed Knowledge

Sufficient grasp of introductory accounting to competently prepare external financial statements.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Recall the nature of, analyse and apply basic accounting theory;
2. Recall the elements of the international accounting conceptual framework;
3. Apply the conceptual framework and accounting standards to account for different types of transactions;
4. Appraise the usefulness of information in accounting reports for decision making purposes.

Subject Content

- An introduction to accounting theory and Critical analysis
- development and evaluation of accounting Standards and conceptual frameworks
- Critical analysis of The historical cost accounting system
- Accounting for assets, liabilities and owners' equity and presentation in financial statements
- accounting for revenues and expenses and presentation in financial statements
- construction of A statement of comprehensive income

ACCT 2005 Techniques in Financial Accounting

Credit Points 10

Legacy Code 200973

Coordinator Stanley James (https://directory.westernsydney.edu.au/search/name/Stanley James/)

Description Techniques in Financial Accounting is the third subject in the financial accounting stream and builds upon Financial Accounting Applications as part of the accredited accounting program. It introduces a company as a business structure and the accounting requirements for their formation and operations. Students develop skills in using tools required for accurate record keeping leading to compilation of financial statements, as well as how to account for receivables and payables, the disposal of non-current assets, and preparation of cash flow statements. Successful completion of the subject will equip participants with a practical and theoretical understanding of usefulness of general purpose financial reports.

School Business

Discipline Accounting

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) ACCT 1007

Incompatible Subjects ACCT 2004 Intermediate Financial Accounting

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Indicate the purpose and outcomes of the accounting cycle in relation to reporting entities.

2. Prepare financial statements for a company business structure using a manual based accounting system.
3. Prepare general purpose financial reports for reporting entities by application of accounting principles.
4. Analyse basic accounting theory and how it is applied.

Subject Content

1. Revision of debit and credits and introducing company structure.
2. Companies: formation and operations.
3. Reconstruction of accounts and error correction.
4. End of period adjustments. Depreciation and amortisation.
5. Closing and reversing entries.
6. Ten column worksheet and financial statement compilation.
7. Accounting for receivables and payables.
8. Non-current asset disposal.
9. Preparation of cash flows.
10. Accounting theories.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Level Undergraduate Level 3 subject

Pre-requisite(s) FINC 1001 or ACCT 1010

Equivalent Subjects ACCT 3010 Issues in Accounting Information Systems

Assumed Knowledge

Basic financial and management accounting fundamentals, including use of spreadsheets in accounting and the use of a computerised accounting package.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the design of accounting information systems, enterprise resource planning systems, and business processes.
2. Identify organisational risk and internal control issues, cyber security issues and requirements for monitoring and auditing accounting information systems.
3. Develop conceptual models of organisational relationships demonstrating knowledge of business processes and information flows in an organisation.
4. Use a range of tools for data analysis, presentation and to implement the conceptual models of information systems
5. Examine the potential impact of new and emerging technologies on accounting information systems
6. Apply professional ethics, problem solving, and communication skills involved in working with accounting information systems

Subject Content

1. Introduction to accounting information systems and enterprise resource planning systems
2. Accounting database and database theory
3. Internal control and enterprise risk management
4. Information security and computer fraud
5. Business process modelling and Intelligence decision making model
6. Accounting systems development and documentation
7. Business value of information and intelligent business reporting (XBRL)
8. Emerging technologies: Blockchain, artificial Intelligence
9. Big data and data analytics

ACCT 3003 Accounting Standards and Governance

Credit Points 10

Legacy Code 200974

Coordinator Krishan Prasad (https://directory.westernsydney.edu.au/search/name/Krishan Prasad/)

Description This subject builds on the first and second year accounting subjects, exploring financial reporting issues in greater depth and challenging students to question the foundations of financial reporting. Topics are on the International Financial Reporting Standards (IFRS) and the Australian Accounting Standards Board equivalents (AASB). The subject develops graduate capabilities centred upon critical thinking skills, technical skills and professional judgement and their application for solving practical financial reporting and environmental social governance issues.

School Business

Discipline Accounting

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) ACCT 2005

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the need for financial accounting regulation by employing appropriate theories.
2. Apply the rules of International Financial Reporting Standards/ International Accounting Standards (IFRS/IAS) and their Australian equivalents (AASB) to selected financial transactions and events.
3. Analyse financial transactions and events in order to prepare a complete set of financial statements based on accrual accounting.
4. Analyse financial statements.
5. Demonstrate business communication skills through written assignments and seminar presentations.
6. Apply environmental social governance (ESG) in analysis of financial statements.

Subject Content

1. Accounting regulation, conceptual framework and accounting for liabilities revenue, expenses, equity and intangibles.
2. Applying accounting standards and accounting theory.
3. Accounting for property plant and equipment: revaluations.
4. Accounting for impairment: intangibles.
5. Accounting for financial instruments.
6. Accounting for revenues.
7. Accounting for employee benefits.
8. Accounting for leasing.
9. Accounting for different types of business structures: equity and share capital.
10. Financial statement analysis.
11. Corporate social responsibility (CSR) and environmental social governance (ESG).

Assessment

ACCT 3004 Advanced Accounting

Credit Points 10

Legacy Code 200267

Coordinator Krishan Prasad (https://directory.westernsydney.edu.au/search/name/Krishan Prasad/)

Description This subject addresses the advanced aspects of accounting. Accounting theories are discussed in terms of how they assist us in understanding current accounting practice and accounting standards. In addition, theoretical concepts are applied to current news and real world events.

School Business

Discipline Accounting

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) ACCT 3007

Equivalent Subjects ACCT 3002 - Accounting Philosophies and Theories LGYB 3531 - Advanced Financial Accounting (V1)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically evaluate accounting theories;
2. Interpret practice and rules through appropriate theoretical analysis;
3. Analyse and understand the current implications and impacts of financial reporting practices;
4. Demonstrate critical thought through communicating good arguments both orally and in writing;
5. Work in a team environment and negotiate possible explanations or solutions which lead to successful outcomes;
6. Explain the notion of power and control in corporate structures.

Subject Content

- The nature of accounting theories and their justification
- applications of those theories through practical exercises and linkages to current practice and real World events, to reinforce previously learnt accounting skills
- Critical evaluation of theories of accounting and theories related to The development and regulation of accounting
- Examination and application of selected topical and complex accounting Standards for Examination in depth

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

ACCT 3006 Auditing and Assurance Services

Credit Points 10

Legacy Code 200535

Coordinator Rina Datt (https://directory.westernsydney.edu.au/search/name/Rina Datt/)

Description The role of the auditor is significant in providing financial information about an organisation and the performance of management. Shareholders and other stakeholders require this information to make investment and other decisions. An auditor provides assurance or a conclusion about a company's financial situation which is intended to give confidence to stakeholders. In this subject, students examine the roles and responsibilities of the auditor, auditing principles and standards and the application of those standards, particularly in an electronic environment.

School Business

ACCT 3009 Incubator 4: Commercial and Financial Setting of Entrepreneurship

Credit Points 10

Legacy Code 301169

Coordinator Anton Bogdanovych (https://directory.westernsydney.edu.au/search/name/Anton Bogdanovych/)

Description Operating a start-up is not just about being creative and innovative; it is also about having the necessary management and operational skills, understanding the commercial and financial setting within which the organisation needs to operate it. This subject aims to provide vital details that set the background to run your organisation whether your customer base is local, national or even international. This objective is driven through a number of topics such as: setting up a business entity, accounting fundamentals, taxation fundamentals. The subject will be delivered through a number of modules. As a vital part of the subject, students are expected to engage and work in "start-up co-working space" on a regular basis. At the successful completion of this subject, students would set up as a business entity for their start-up organisation.

School Computer, Data & Math Sciences

Discipline Business Management

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and apply the process involved in setting up a business entity
2. Identify business accounting needs and chose appropriate accounting structure
3. Investigate how the Australian and international taxation structures applies to start-ups
4. Demonstrate an understanding of interpreting accounting documents that are commonly used in a business setting
5. Apply individualðfs skills and knowledge in a collaborative and effective manner in achieving a common goal in a group setting
6. Demonstrate effective verbal and written communication skills that appeal to a wide audience

Subject Content

1) Setting up a business entity in Australia
2) Understanding various accounting statements, such as, Income statements, Statement of Cash flow, Balance Sheet, Profit and Loss accounts
3) Banking structure and setting up business accounts
4) Taxation structure and how it affects start-ups

Assessment

ACCT 3011 The Accountant as a Consultant

Credit Points 10

Legacy Code 200118

Coordinator Sharne Simmons (https://directory.westernsydney.edu.au/search/name/Sharne Simmons/)

Description This subject aims to provide students with a 'hands on' flexible and practical work integrated learning (WIL) experience in the Accounting degree. This is mainly done through working in groups on projects as accountants would do when they engage with clients and entrepreneurs as professional consultants. Students come to understand the role of an accountant in the effective management of the business to sustain, grow and expand the business to higher levels consulting problems involving a wide range of business related issues. This subject is designed to give students an opportunity to apply the theoretical knowledge gained in other subjects in their degree program thus enabling them to bring knowledge to life. On successful completion of this subject students will be able to appreciate the relevance of their business subjects in real business situations and to become business consultants.

Level Undergraduate Level 3 subject

Pre-requisite(s) ACCT 2001

Equivalent Subjects LGYB 8986 - The Accountant as a Management Consultant

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Appreciate the kinds of problems encountered by local businesses/ organisations and the symptoms that will be apparent in their accounts;
2. Analyse and solve various business problems using case study approaches;
3. Develop skills in financial and strategic planning for small business;
4. Enhance report writing and verbal communication skills;
5. Demonstrate a foundation of ethical thinking in commercial engagements;
6. Demonstrate an understanding of the role an accountant as a consultant provides to business.

7. Analyse a business problem encountered by any for- profit, a not-for profit, or a government organisation, and its impact on stakeholders;
8. Apply appropriate accounting research methods and tools to solve problems;
9. Use appropriate communication methods, verbal and written, to convey information;
10. Work productively, in a group of consultants, to solve and report on a business problem;
11. Develop a project tender which includes appropriate curriculum vitae;
12. Present project findings to an audience of peers or industry professionals.

Subject Content

- strategic thinking and strategic accounting
- financial and management accounting
- Regulatory Issues
- client management Issues
- financial management
- business or professional ethics
- Entrepreneurship ? Background on The role of The entrepreneurial profile
- Marketing of businesses including pricing of products and services
- business and succession planning
- Internal control
- Project tenders including curriculum Vitae

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Proposal	1100 words	10	N	Individual
Reflection	1500 words	30	N	Individual
Presentation	20 minutes	20	N	Group
Report	4500 words	40	N	Group

ACCT 3012 Incubator 4: Commercial and Financial Strategy for Entrepreneurs

Credit Points 10

Coordinator Anton Bogdanovych (https://directory.westernsydney.edu.au/search/name/Anton Bogdanovych/)

Description In the Bachelor of Entrepreneurship students learn the different aspects of starting a new business around a creative, innovative product or service. One key skill in being able to run a business or a startup is developing financial and commercial strategies. Students develop their knowledge and skills in this area through a more in-depth look at business models, revenue models and commercial strategies. Students apply critical thinking to evaluate models and strategies in developing a commercial strategy. The skills developed in this subject are highly valued practical business-oriented skills that can be applied in a range of businesses.

ACCT 7002 Accounting Professional Engagement

Credit Points 10

Legacy Code 200693

Coordinator Dorothea Bowyer (https://directory.westernsydney.edu.au/search/name/Dorothea Bowyer/)

Description This subject aims to provide students with a 'hands on' flexible and practical work integrated learning experience in the Accounting degree. This subject focuses on the role that accountants play in the effective management of businesses. Appropriate accounting research methods are used to investigate and report on problems and "real" case studies involving a wide range of business related issues. This is mainly done through working as groups on projects as accountants do when they engage with clients and entrepreneurs as professional consultants.

School Business

Discipline Accounting

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) ACCT 7005

Restrictions

Students must be enrolled in a postgraduate Business program. Students wishing to take this subject as an elective need approval from the program Advisor.

Assumed Knowledge

Knowledge of accounting principles, practices and relevant theoretical background.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Outline the kinds of problems encountered by local businesses/organisations (for example, small and medium enterprises (SMEs), government or not for profit organisations) and the symptoms that will be apparent in their accounts;
2. Analyse and solve various business problems using appropriate accounting research methods and case study approaches;
3. Develop financial and strategic plans for small business;
4. Extend report writing and verbal communication skills;
5. Develop a foundation of ethical thinking in commercial engagements;
6. Demonstrate an understanding of the responsibilities accountants as consultants have in business;
7. Develop a comprehensive business plan or analyse a takeover, change management proposal, or the implementation of a new business process or system.
8. Analyse a business problem encountered by businesses/organisations government or not for profit organisation, and its impact on stakeholders;
9. Apply appropriate accounting research methods and tools to solve problems;

10. Use appropriate communication methods, verbal and written, to convey information;
11. Work productively in groups (in the role of a consultant) to solve and report on a business problem;
12. Tender for a project and construct curriculum vitae appropriate to a project tender;
13. Present project findings to an audience of peers or industry professionals.

Subject Content

- strategic thinking and strategic accounting
- financial and management accounting
- Regulatory Issues
- client management Issues
- financial management
- business or professional ethics
- Entrepreneurship ? back ground on The role of The entrepreneurial profile
- Marketing of businesses including pricing of products and services
- succession planning
- Internal control
- accounting research methods
- professional behaviour
- Entrepreneurship

ACCT 7005 Accounting Theory and Applications

Credit Points 10

Legacy Code 200401

Coordinator Qingliang Tang (https://directory.westernsydney.edu.au/search/name/Qingliang Tang/)

Description Basic questions of the role accounting performs in society are considered from economic, social and environmental perspectives. The nature of the statements advanced to give accounting legitimacy, together with their philosophical underpinnings, are examined. Selected accounting theories and philosophies will be examined and advanced applications in alternative accounting models considered. Accounting research and appropriate methodologies are introduced.

School Business

Discipline Accounting

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) ACCT 7010

Restrictions

Students must be enrolled in a postgraduate Business program or in programs 8083 Bachelor of Research Studies, 8084 Master of Research (HC) and 8085 Master of Research (LC). The prerequisite requirement noted above does not apply to students enrolled in programs 8083 Bachelor of Research Studies, 8084 Master of Research (HC) and 8085 Master of Research (LC). Students wishing to take this subject as an elective need approval from the program Advisor.

Assumed Knowledge

Basic knowledge of accounting principles.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Articulate the role of accounting in society;
2. Demonstrate an awareness of the differing perspectives from which accounting may be assessed;
3. Critically analyse a selection of accounting theories and present those ideas to a group;
4. Demonstrate an ability to work in small groups;
5. Critique contemporary issues in accounting;

6. Demonstrate an ability to utilise research methods applicable to applied accounting research.

Subject Content

1. Role of accounting in society
2. Introduction to methodology for knowledge recognition, reasoning, critical thinking.
3. What accounting research currently involves and how to conduct useful accounting research.
4. Role of Accounting in Environmental, Social and Governance
5. Different types of theories, including critical accounting theory.
6. Different models for measurement of profit and of wealth, including lease accounting.
7. Human behaviour, particularly in organisations and is relevance for accounting theory.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

ACCT 7010 Company Accounting

Credit Points 10

Legacy Code 200400

Coordinator Ushi Ghoorah Hurrychurn (https://directory.westernsydney.edu.au/search/name/Ushi Ghoorah Hurrychurn/)

Description Company accounting introduces and develops a student's understanding of the Australian reporting requirements and practices relating to corporations. The subject builds upon the fundamental accounting skills gained in Introductory Accounting to develop a student's knowledge of technical methods and theoretical underpinnings of corporate accounting. Students will learn how to prepare consolidated financial statements, with associated disclosures, to ensure compliance with accounting standards, corporations' legislation and Australian Stock Exchange (ASX) requirements. Through a range of practical individual and collaborative means students will explore corporate accountability and the reasons for regulatory disclosure.

School Business

Discipline Accounting

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) ACCT 7018

Restrictions

Students must be enrolled in a postgraduate Business program. Students wishing to take this subject as an elective need approval from the program Advisor.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Prepare Financial Statements in accordance with applicable accounting standards.
2. Critically evaluate financial statements demonstrating professional judgement and communication.
3. Discuss corporate accountability within the AASB Framework, the Financial Reporting Conceptual Framework and sustainability frameworks.

Subject Content

1. Accounting standards (standard settlers, regulation and application).
2. Cash flow statements.
3. Tax effect accounting.
4. Accounting for non-current assets including impairment and revaluations, including changes in accounting estimates and errors, and events after reporting period.
5. Consolidations for wholly owned entities.
6. Accounting for Financial instruments and relevant disclosures.
7. Introduction to accounting for foreign currency translations.

ACCT 7013 Financial Decision Making

Credit Points 10

Legacy Code 200784

Coordinator Nicole Ibbett (https://directory.westernsydney.edu.au/search/name/Nicole Ibbett/)

Description Students will gain financial literacy through practical understanding of the information contained in financial reports. Appreciating the variety of uses of accounting information for planning and controlling enhances the ability to extract relevant data. This subject emphasises the function of both financial and management accounting in measuring, processing and communicating information useful for decision making.

School Business

Discipline Accounting

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects ACCT 7001 - Accounting Perspectives for Managers

Incompatible Subjects ACCT 7018 -Introductory Accounting ACCT 7007 - Accounting A Business Perspective

Restrictions

Students must be enrolled in 2755 Master of Business Administration, 2756 Graduate Diploma in Business Administration (Exit Only), 2757 Graduate Certificate in Business Administration, 2762 Executive Master of Business Administration.

Assumed Knowledge

A knowledge of basic mathematics is assumed.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Interpret the basic terms and concepts of both financial accounting and management accounting enabling interpretation of information in financial reports;
2. Identify the role and limitations of general purpose financial statements in providing information for decision making;
3. Use financial analysis tools to evaluate external financial reports for performance, position and working capital requirements;
4. Apply cost behaviour concepts and various costing systems to decision making;
5. Demonstrate an understanding of the significance of budgets for planning and control;
6. Analyse internal accounting reports for performance evaluation.

Subject Content

- Usefulness of accounting information for decision making
- structure and use of financial accounting reports
- analysis of financial accounting reports
- structure and use of management accounting information, including cost behaviour and budgets
- analysis of management accounting information

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Credit Points 10

Legacy Code 200821

Coordinator Ushi Ghoorah Hurrychurn (https://directory.westernsydney.edu.au/search/name/Ushi Ghoorah Hurrychurn/)

Description This subject focuses on developing the ability to use accounting information, as extracted from financial reports, to assist with managerial decision making. Students will gain financial literacy through developing an understanding of the information contained in financial reports and applying this information to practical decisions. This subject emphasises the function of both financial and management accounting in measuring, processing and communicating information useful for decision making.

School Business

Discipline Accounting

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Interpret the basic terms and concepts of both financial accounting and management accounting enabling interpretation of information in financial reports;
2. Identify the role and limitations of general purpose financial statements in providing information for decision making;
3. Use financial analysis tools to evaluate external financial reports for performance, position and working capital requirements;
4. Apply cost behaviour concepts and various costing systems to decision making;
5. Demonstrate an understanding of the significance of budgets for planning and control;
6. Analyse internal accounting reports for performance evaluation.

Subject Content

1. Usefulness of accounting information for decision making
2. Structure and use of financial accounting reports
3. Analysis of financial accounting reports
4. Structure and use of management accounting information, including cost behaviour and budgets
5. Analysis of management accounting information

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Case Study	2,000 Words	20	N	Group
Intra-session Exam	1.5 Hours	30	N	Individual
Final Exam	2 Hours	50	Y	Individual

ACCT 7016 Information Systems for Accountants

Credit Points 10

Legacy Code 200399

Coordinator Daniel Yeung (https://directory.westernsydney.edu.au/search/name/Daniel Yeung/)

Description Information Systems for Accountants develops a student's knowledge of integrated systems, information security, compliance management and business intelligence within organisational frameworks. Students will apply data analytics, risk assessment, and control design through a practical project. The use of data science tools and processes to aid in the analysis of an accounting information system. The curriculum ensures students are well-prepared to navigate the complexities of designing and managing sophisticated accounting information systems across diverse organisational landscapes.

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) ACCT 7018

Restrictions

Students wishing to enrol in this subject as an elective must gain approval from an Academic program Advisor (Accounting) and must be enrolled in a postgraduate Business program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically evaluate an existing accounting information system, the effectiveness of its internal controls, and its ability to provide a level of information security that meets decision-makers information needs.
2. Utilise data science tools to model different business scenarios, collect, process, and present information cost-effectively to enhance operations and support reporting requirements of an organisation.
3. Apply data science to extract information from internal and external data sources
4. Analyse business intelligence and information visualisation techniques to provide useful insights to decision-makers.

Subject Content

1. Documenting Accounting Information Systems.
2. Systems Development Activities.
3. Database Management Systems and relational data model.
4. Controlling Accounting Information Systems.
5. Accounting Information Systems applications.
6. Business Intelligence and Sustainability Reporting.
7. Emerging Technology and Data Analytics.

Assessment

ACCT 7018 Introductory Accounting

Credit Points 10

Legacy Code 200396

Coordinator Yongqing Li (https://directory.westernsydney.edu.au/search/name/Yongqing Li/)

Description The aim of this subject is to provide a comprehensive introduction to contemporary financial accounting. This is an essential component in the understanding of the production and use of accounting information in business. This subject applies accounting concepts, standards and principles enabling students to be competent in the technical skills in accounting which is a fundamental tool for making economic decisions and for analysing and solving business problems. Students learn to apply such concepts, standards and principles through a range of individual and collaborative means using a blended learning design that draws on current and future trends in the broad international context.

School Business

Discipline Accounting

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects ACCT 7007 - Accounting A Business Perspective (PG) ACCT 7015 - Financial Reports for Decision Making

Restrictions

Students must be enrolled in a postgraduate Business program. Students wishing to take this subject as an elective need approval from the program Advisor.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Design an appropriately principled financial accounting information system.
2. Use accounting concepts and techniques to analyse, record, process and prepare financial statements.
3. Apply accounting principles to account for current and non-current assets and liabilities and critically evaluate different accounting policies.
4. Apply recognition rules to recognise common revenue transactions.
5. Assess profitability and financial strength of an organisation (sole trader, partnership and company) using accounting information.
6. Appraise the accounting environment, the role of accounting and importance of ethics to the accounting profession.

Subject Content

1. The accounting environment and basics of financial reporting
2. The recording system: recording transactions, journal entries, posting to ledgers and trial balances
3. The recording system: end of period adjustments, worksheet, and finalising accounts
4. Accounting cycle – closing and reversing entries and the accounting system
5. Reporting and measuring assets
6. Measuring and reporting inventories
7. Cash flows and bank reconciliations
8. Revenue recognition
9. Accounting for liabilities
10. Financial statement analysis

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

ACCT 7019 Management Accounting

Credit Points 10

Legacy Code 200494

Coordinator Mamun Billah (https://directory.westernsydney.edu.au/search/name/Mamun Billah/)

Description The fundamental purpose of any management accounting system in an organisation is to provide appropriate information for (i) costing of products and services; (ii) support functions such as planning, controlling, evaluation, continuous improvement and decision making; and (iii) competitive support. This provides financial and non-financial services to the management team to enhance an organisation's competitiveness. The subject is designed to provide an understanding of these areas of information through applying concepts, theories and models in a range of individual and collaborative activities.

School Business

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) ACCT 7018

Restrictions

Students wishing to enrol in this subject as an elective must seek approval of an Academic program Advisor (Accounting) and be enrolled in a postgraduate Business program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply a range of costing analyses and techniques for reporting purposes.
2. Evaluate professional or enterprise practice in relation to culture and diversity in management accounting contexts (including first peoples/global) to make recommendations, including contingencies, alternatives and future implication.
3. Critically analyse quality cost information and its uses.
4. Apply management accounting information to evaluate organisational strategy.
5. Recommend appropriate economic, environmental, and social costs and benefits for organisational sustainability reporting.
6. Prepare forecasts and budgets for planning, control and reporting.

Subject Content

1. Basic cost concepts.
2. Statistics for management accounting incorporating simple linear regression and correlation.
3. Job order and process costing.
4. Support department cost allocations.
5. Activity-based costing.
6. Standard costing.
7. Budgeting.
8. Cost volume profit analysis and tactical decision making.

9. Responsibility accounting and performance evaluation in a decentralised firm.
10. Inventory management.
11. Balanced Scorecard.
12. Environmental cost management and Sustainability Reporting.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

ACCT 7026 Behavioural Finance (PG)

Credit Points 10

Legacy Code 201038

Coordinator Kelly Liu (https://directory.westernsydney.edu.au/search/name/Kelly Liu/)

Description Cognitive biases and emotional influences have the potential to influence the decision-making of advisors, managers and investors. This subject provides students with the skills to advise clients such that their investment decisions are soundly based. Various biases and influences are introduced to students to demonstrate how they undermine rational investment decision-making. Students are then taught how to apply methods that advisers can use to overcome and correct these biases. Ensuring clients are fully educated about investment decisions is integral to the investment process, and necessary to ensure advisers meet the best interest duty of their profession. This subject is available as a stand-alone bridging subject which is accredited by the Financial Adviser Standards and Ethics Authority (FASEA) having met the FASEA curriculum and standards requirements.

School Business

Discipline Accounting

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program or students who are currently registered on the national Financial Adviser Register (FAR) may take this subject as a non-award stand-alone subject in order to meet new education requirements as outlined by the Financial Adviser Standards and Ethics Authority (FASEA).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the different types of behavioural biases that client(s) exhibit;
2. Articulate the different approaches in decision-making client(s) may prefer;
3. Assess the linkages between behavioural biases and decision-making and implications for investment decisions made by client(s);
4. Explain the interactions between individuals and their financial capital;
5. Evaluate the role of behavioural finance in client engagement and the professional client relationship;
6. Critically assess investment strategies that are in the best interest of the client.

Subject Content

- introduction to Behavioural finance
- The types of biases influence client investment decisions
- ways of influencing client decisions to avoid cognitive and emotional biases
- how advisers can increase their own Understanding of client?fs needs and wants to guide their investment decisions
- Informing clients about The Risk and Reward trade-off
- Efficient markets and more realistic interpretations of markets
- theories of utility for client portfolio construction

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

AGEN 1001 Water Quality Assessment and Management

Credit Points 10

Legacy Code 300814

Coordinator Jack Isherwood (https://directory.westernsydney.edu.au/search/name/Jack Isherwood/)

Description Water is essential for all life on earth. This subject will equip students with skills in biological, chemical and physical water quality assessment for a sustainable water future. The subject introduces students to healthy natural waterways and contrasting degraded waters impacted by disturbance from human activities. A broad range of pollutants, their sources and the consequences for human health and the ecology of water ways will be investigated. Management strategies will also be examined based on the sound scientific assessment of water quality. Students in this subject will cover water quality legislation, regulation, policy, guidelines and develop competencies in water monitoring, regulation, treatment and management.

School Science

Discipline Agriculture, Environmental and Related Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Equivalent Subjects AGEN 2002 - Water Quality Assessment and Management

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe and select the physical, chemical and biological components as indicators of water quality.
2. Identify using physical, chemical and biological indicators when water is polluted and describe these pollutants including metals, polycyclic aromatic hydrocarbons, petrochemical (e.g. petrol, oils, greases), nitrates, phosphates, human and faecal waste.
3. Identify, describe and predict the origins, nature and impact of where water quality degradation may occur from industrial, commercial, residential, agricultural contamination at local, regional and national context. For example Stormwater runoff, leaking sewers in Sydney, dioxin release from the old Union Carbide site into Port Jackson and diffuse animal faecal pollution in areas such as Warragamba dam.
4. Design and plan field auditing protocols for pollution study.
5. Identify approaches put in place by the water authorities in terms of catchment management; water and sewage treatment; trade-waste management; stormwater management and treatment; land application (to minimise phytonutrients entering receiving waters); monitoring by health and water authorities.
6. Describe the basis of the legal framework used for water quality management, with particular reference to the Australian Drinking Water guidelines, and Australian and New Zealand Guidelines for Fresh and Marine Water Quality.
7. Interpret the results of water quality audits in the context of legal, regulatory compliance and scientific guidelines in water management issues and community accountability.
8. Explore the special issues of World and local water scarcity (with climate change implications), maintaining sustainable environmental flows, water recycling, stormwater harvesting, water-related health emergencies (boil-water alerts, Norovirus transmission), special ecological impacts (such as EDCs and hermaphrodism; biodiversity reduction) and important pollution case histories (eg: Minamata disaster).
9. Collect water samples aseptically and safely for a range of chemical and bacteriological analyses, specify tests required and the correct transportation medium and containers to ensure chain-or control during transportation with necessary documentation.
10. Gather, analyse and describe a variety of appropriate information sources.

Subject Content

Strategies for the identification and management of water, in the maintenance of water quality for recreational, domestic, industrial and agricultural uses, and for the protection of natural ecosystems.
Water pollution and water management, identification of specific water pollution threats associated with operations in the built environment. These will be placed in the context of water use and availability patterns as pertaining to Australia in general and to NSW in particular.
Assessment of indicators in the auditing of simple impacts on water quality in terms of domestic, recreational, agricultural and industrial uses, and ecosystem management needs.
Legislation and the interpretation of the legal framework used for water quality including drinking water management.
Field visit to sample water in various locations and/or waste water treatment and management sites.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Report - Communicating water science	2,000 words	30	N	Individual
Quiz - Multiple Choice and Short Answer Questions	1.5 hrs	30	N	Individual

- Strategies for the identification and management of water, in the maintenance of water quality for recreational, domestic, industrial and agricultural uses, and for the protection of natural ecosystems.
- Water pollution and water management, identification of specific water pollution threats associated with operations in the built environment. These will be placed in the context of water use and availability patterns as pertaining to Australia in general and to NSW in particular.
- Assessment of indicators in the auditing of simple impacts on water quality in terms of domestic, recreational, agricultural and industrial uses, and ecosystem management needs.
- Legislation and the interpretation of the legal framework used for water quality including drinking water management.
- Field visit to sample water in various locations and/or waste water treatment and management sites.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

AGEN 1003 Water Quality Assessment and Management (UG Cert)

Credit Points 10

Legacy Code 500052

Coordinator Jack Isherwood (https://directory.westernsydney.edu.au/search/name/Jack Isherwood/)

Description Water is essential for all life on earth. This subject will equip students with skills in biological, chemical and physical water quality assessment for a sustainable water future. The subject introduces students to healthy natural waterways and contrasting degraded waters impacted by disturbance from human activities. A broad range of pollutants, their sources and the consequences for human health and the ecology of water ways will be investigated. Management strategies will also be examined based on the sound scientific assessment of water quality. Students in this subject will cover water quality legislation, regulation, policy, guidelines and

develop competencies in water monitoring, regulation, treatment and management.

Level Undergraduate Level 1 subject

Equivalent Subjects AGEN 2002 Water Quality Assessment and Management AGEN 1002 Water Quality Assessment and Management

Restrictions

Students must be enrolled in: 7175 ? Undergraduate Certificate of Environmental Sustainability

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe and select the physical, chemical and biological components as indicators of water quality.
2. Identify using physical, chemical and biological indicators when water is polluted and describe these pollutants including metals, polycyclic aromatic hydrocarbons, petrochemical (e.g. petrol, oils, greases), nitrates, phosphates, human and faecal waste.
3. Identify, describe and predict the origins, nature and impact of where water quality degradation may occur from industrial, commercial, residential, agricultural contamination at local, regional and national context. For example Stormwater runoff, leaking sewers in Sydney, dioxin release from the old Union Carbide site into Port Jackson and diffuse animal faecal pollution in areas such as Warragamba dam.
4. Design and plan field auditing protocols for pollution study.
5. Identify approaches put in place by the water authorities in terms of catchment management; water and sewage treatment; trade-waste management; stormwater management and treatment; land application (to minimise phytonutrients entering receiving waters); monitoring by health and water authorities.
6. Describe the basis of the legal framework used for water quality management, with particular reference to the Australian Drinking Water guidelines, and Australian and New Zealand Guidelines for Fresh and Marine Water Quality.
7. Interpret the results of water quality audits in the context of legal, regulatory compliance and scientific guidelines in water management issues and community accountability.
8. Explore the special issues of World and local water scarcity (with climate change implications), maintaining sustainable environmental flows, water recycling, stormwater harvesting, water-related health emergencies (boil-water alerts, Norovirus transmission), special ecological impacts (such as EDCs and hermaphrodism; biodiversity reduction) and important pollution case histories (eg: Minamata disaster).
9. Collect water samples aseptically and safely for a range of chemical and bacteriological analyses, specify tests required and the correct transportation medium and containers to ensure chain-or control during transportation with necessary documentation.
10. Gather, analyse and describe a variety of appropriate information sources.

Subject Content

1.Strategies for the identification and management of water, in the maintenance of water quality for recreational, domestic, industrial and agricultural uses, and for the protection of natural ecosystems.
2.Water pollution and water management, identification of specific water pollution threats associated with operations in the built environment. These will be placed in the context of water use and availability patterns as pertaining to Australia in general and to NSW in particular.
3.Assessment of indicators in the auditing of simple impacts on water quality in terms of domestic, recreational, agricultural and industrial uses, and ecosystem management needs.
4.Legislation and the interpretation of the legal framework used for water quality including drinking water management.
5.Field visit to sample water in various locations and/or wastewater treatment and management sites.

AGEN 3001 Animal Behaviour

Credit Points 10

Legacy Code 300878

Coordinator John Hunt (https://directory.westernsydney.edu.au/search/name/John Hunt/)

Description Focusing on a variety of wildlife and domestic animal species, the subject addresses how classic ecological and evolutionary principles shape animal behaviour by weighing the experimental and observational evidence for each idea. We illustrate concepts with examples from a wide range of taxonomic groups of animals in diverse ecosystems. Students will conduct experimental field and laboratory procedures, as well as observe and work with groups of animals on the UWS Hawkesbury campus.

Level Undergraduate Level 3 subject

Equivalent Subjects AGEN 3002 - Animal Behaviour

Restrictions

Successful completion of 120 credit points in the Bachelor of Science OR Bachelor of Natural Sciences.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Integrate basic evolutionary theory and genetics principles to determine how/why animal behaviour is both related to and shaped by evolution/genetics.
2. Determine how cost/benefit/risk can be identified in the context of optimality and game theories to formulate and test ultimate and proximate hypotheses for behaviours.
3. Describe the evolution of different reproductive strategies and mating patterns and strategies, and how tools such as phylogenetics and experimentation can be used to study it.
4. Determine how the evolution of animal behaviour is used to understand aspects of human behaviour.
5. Explain why understanding the ethology of companion animals and domestic stock is important in our interactions with them.
6. Conduct field investigations safely and ethically in the field and laboratory, using sampling methodology correctly to obtain valid data.
7. Use spreadsheets and statistical tools in analytical programs to enter, analyse and graph data and to draw appropriate conclusions from data.
8. Communicate findings correctly in oral or in written form using an appropriate style, accessing the scientific literature to place the findings in context.

Subject Content

1. The proximate control, organisation, and development of animal behaviour
2. The ecological and evolutionary mechanisms underlying animal behaviour
3. Foundational and contemporary theories of animal behaviour, as well as the application of animal behaviour
4. General scientific and specific behavioural methodologies to test hypotheses and effectively communicate research using a range of scientific modes

Assessment

AGEN 4001 Researching our Changing Environment

Credit Points 10

Legacy Code 800195

Coordinator David Ellsworth (https://directory.westernsydney.edu.au/search/name/David Ellsworth/)

Description This subject focuses on learning to critically evaluate current research in topics under study at the Hawkesbury Institute for the Environment and how advanced scholarship in your field of study is conducted. The Hawkesbury Institute for the Environment spans a broad set of fields from soil microbial genomics and microbial ecology to the biogeochemistry, ecology and physiology of plants and microbes, animal ecology and evolution, to ecosystems, landscapes and Australia-wide processes. Teaching sessions are designed around a thematic cross-section of research within HIE, representing many of these areas. The subject also involves enhancing skill in evaluating appropriate research methodologies for asking questions and testing hypotheses, including an introduction to some of the large-scale research facilities within HIE that students may be involved with.

Level Undergraduate Level 4 subject

Restrictions

Students must be enrolled in program 8083 Bachelor of Research Studies/Master of Research

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate knowledge of the various research fields within the Institute in which the student is based.
2. Align the studentðfs statement of intent with a proposed research project relating to the research environment and expertise within the Hawkesbury Institute.
3. Critically analyse theoretical knowledge that will inform key perspectives in the studentðfs research area.
4. Demonstrate understanding of techniques and methods involved in collecting, displaying and interpreting scientific data.
5. Understand how a literature review and a synthesis of data/ information are carried out.

Subject Content

- This unit is designed for the Master of Research program, involving first-year Bachelor of Research/ Master of Research students. It exposes students to the research environment within the Hawkesbury Institute for the Environment, the various sub-disciplines within this area of study, and the high-level research approaches taken within each of them.
- The unit will enable students to gain fluency in the various research fields within the Hawkesbury Institute and the literature and methods associated with them by:
- Analysing the research literature in the sub-disciplines encompassed by the Hawkesbury Institute for the Environment and understanding what makes a good journal and a good research manuscript.
- Understanding the advantages and shortcomings of key papers in the literature, and being able to write a critique of others?f published research.
- Spending time in discussion and in reading to be able to understand techniques and methods in the field, and critically evaluate them.
- Gaining an understanding of the motivation and research that is conducted within climate change facilities at the Hawkesbury Institute for the Environment.
- Gaining fluency in the literature by practice, and learning the skill of good

AGEN 7001 Bushfire Behaviour

Credit Points 10

Legacy Code 200457

Coordinator Grahame Douglas (https://directory.westernsydney.edu.au/search/name/Grahame Douglas/)

Description This subject describes the factors affecting bushfire behaviour and the models which are used to predict bushfire behaviour, the principles of fire ecology, and the assessment of bushfire hazards on property and the environment. Topics include the measurement of fuel, rates of spread and flame length equations, fire danger indices and landscape issues, topographical influences on fire behaviour, the importance of fire regimes and fire thresholds on flora and fauna, habitat and fire impacts on environmental services such as soils and water catchments. The role of fire behaviour in determining impacts on structures is also described.

School Eng, Design & Built Env

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

This subject assumes that the student has undertaken undergraduate study in building surveying, planning or related areas or has gained the equivalent building construction knowledge by working in the construction industry in an appropriate capacity for at least four years.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and explain the factors affecting bushfire behaviour;
2. Classify vegetation types and associated fuel structures;
3. Discuss the role of fire weather in developing fire indices;
4. Describe the impacts of bushfire on species and communities of environmental significance and their fire thresholds;
5. Describe the impacts of fire on the environment and environmental services and management strategies to protect these values;
6. Predict the intensity and flame characteristics of a bushfire; and
7. Apply available models to describe bushfire behaviour and its impact on structures.

Subject Content

Factors affecting various aspects of bushfire behaviour;
Initiation of bushfires;
Bushfire spread including spotting behaviour;

Comparative behaviour of bushfires in different vegetation types;
Ecological impacts of bushfires;
Models to describe bushfire behaviour;
Prediction of bushfire behaviour in terms of intensity and spread;
Prediction of bushfire behaviour on property.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

AGEN 7002 Ecosystems in a Changing World

Credit Points 10

Legacy Code 800170

Coordinator Yolima Carrillo Espanol (https://directory.westernsydney.edu.au/search/name/Yolima Carrillo Espanol/)

Description Natural and managed ecosystems on our planet are experiencing a rapidly changing environment as a consequence of changing patterns of land and resource use, loss of biodiversity, altered atmospheric composition and anthropogenic climate change. This subject will introduce students to ecosystem concepts in the context of ecological and evolutionary responses to global change. Students will obtain practical experience in quantitative analysis of carbon, nutrient, water and energy budgets, and explore the consequences of global change for ecosystem services and biodiversity over a range of spatial and temporal scales. Teaching will be led by HIE staff with expertise in ecosystem responses to environmental change, soil microbial contributions to ecosystem function and the impacts of environmental change on plants, animals and their interactions.

Level Postgraduate Coursework Level 7 subject

Assumed Knowledge

A Bachelor of Science in Biology, Environmental Science, or Agricultural Science, with some background in plant science and ecology.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Quantitatively describe fundamental ecosystem functions
2. Solve problems mathematically on paper and in spreadsheets
3. Construct and interpret graphical representations of data
4. Apply systems approach to complex environmental issues
5. Critically discuss primary research articles on ecosystem responses to environmental change
6. Write critical evaluation of a primary research article

Subject Content

Ecosystem concepts, introduction to global change
Geology and soils
Water and energy balance
Primary production and allocation
Carbon cycling
Nutrient cycling
Microbial ecology and ecosystem processes
Trophic dynamics; food webs and plant-animal interactions
Biodiversity and ecosystem function
Temporal dynamics: Disturbance, succession
Scaling from plots to the globe; landscape processes
Global change and ecosystems
Ecosystem management in a changing world

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

AGEN 7004 Perspectives of Sustainable Development

Credit Points 10

Legacy Code 300397

Coordinator Richard Thomas (https://directory.westernsydney.edu.au/search/name/Richard Thomas/)

Description This subject explores the philosophy, policies and practice of sustainable development. In exploring environmental philosophy the subject provides students with an understanding of the nature and emergence of both modern and post-modern paradigms that influence the direction and nature of current development policy. The nature of environmental policy is examined by developing an understanding of how values and attitudes shape a governing ethic about environmental management. The social, political, economic and ecological elements of sustainable development are unfolded to aid students understanding of what needs to be managed. Particular attention is given to those issues confronting developing countries as they move to become industrialised nations yet have high levels of poverty. Finally, the subject introduces the practice of environmental impact assessment as one management tool used in the management process.

Equivalent Subjects LGYB 8266 - Environmental Management Core Studies 1 LGYB 8275 - Environmental Management

Restrictions

Students must be enrolled in the following programs: 3602 - Master of Environmental Management, 3605 - Master of Occupational Safety, Health and Environmental Management, 3606 - Graduate Diploma in Occupational Safety, Health and Environmental Management, 3607 - Graduate Certificate in Occupational Safety, Health and Environmental Management

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Understand the philosophy influencing current environmental management policy and practice.
2. Acquire knowledge of environmental values and ﷺeworldviewsﷺf and how they influence the policy development process.
3. Understand the political, social and ecological components of environmental management and their interaction in environmental management.

Subject Content

Definition of 'environment', 'management' and 'environmental management', ?esustainable development?f and understanding of the need for effective management to address environmental issues.
The history of environmental philosophy and the significance of epistemology in shaping policy.
The way ?eparadigms?f and ?evalues?f influence people's reaction to environmental issues.
Contemporary concepts in environmental management (Ecologically Sustainable Development, environmental health, precautionary principle, stewardship, social capital and environmental justice).
The Social, Economic and Ecological Issues associated with Sustainable Development.

AGEN 7005 Research Protocol Design and Practice

Credit Points 10

Legacy Code 401080

Coordinator John Bidewell (https://directory.westernsydney.edu.au/search/name/John Bidewell/)

Description In this subject postgraduate students develop a proposal for a research study in an area of interest, drawing upon their knowledge and experiences from other subjects in their program of study. Students learn how to apply research methods to a variety of research situations and questions; to understand how research questions are developed and answered empirically through suitable choice of research methodology, design and method; and how research findings are validated and communicated.

HLTH 7008 for students in 4702
HLTH 7025 for students in 4698
CMPL 7012 for students in 4716

Equivalent Subjects AGEN 7003 - Methods of Researching

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Develop research objectives in a chosen area of interest based on a systematic assessment and synthesis of recent and relevant literature.
2. Devise a research plan to address research objectives, including selection of an appropriate study design, data source or data collection plan, sample, analytic strategy, and consideration of ethical implications of the research.
3. Construct a coherent and potentially fundable research protocol.

Subject Content

In this subject, students will be asked to re-visit content from previous units in their program of study and engage with various research paradigms in order to develop a research protocol based on their own research interest area. Unit content will include:
1. The research process
2. Formulating research objectives
3. Research design and causal inference
4. Data collection methods
5. Analytic strategy
6. Ethical issues in research

Assessment

AGEN 7007 Water Planning, Policy and Governance

Credit Points 10

Coordinator Ian Wright (https://directory.westernsydney.edu.au/search/name/Ian Wright/)

Description The growing pressure on water resources is leading to new and more interconnected challenges of water planning, policy and governance. There have been new developments in water management in the last two decades to cope with the challenges through the introduction of new disciplines, new techniques, new language, and new thinking. In planning, policy and governance of water resources, we need to incorporate ecology, economics, and other social sciences along with water engineering as part of solution to the challenges of water management. This unit will focus on the understanding the complexity water planning, policy and governance and understand how water sustainability can be achieved in integrated and meaningful way in different sectors, scales and landscapes. The topics to be covered include the following: water resources development; monitoring and protection of water resources; adaptive water management; water demand management; national and international water policy; water economics; institutional arrangements; water law; water rights; property regimes; hydro-diplomacy; trans-boundary water issues; national and international water allocation agreements and treaties; water conflict resolution; public participation, consensus building and confidence building; water trading; water politics; water security; water resources management, policy and governance in socially and environmentally sensitive areas and regions.

School Science

Discipline Agriculture, Environmental and Related Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Must be enrolled in a post-graduate program

Learning Outcomes

After successful completion of this Subject, students will be able to:

1. Analyse the issues and challenges of water planning, policy and governance at the national and international levels and in different sectors, scales and landscapes.
2. Evaluate the role of water monitoring and adaptive water management in the implementation of water policy and governance.
3. Reflect on the importance of water rights, water laws and water trading in sustainable water management.
4. Apply social hydrology and the hydro-social cycle to a professional water context, especially appraise gender equity, diversity and social inclusion (GEDSI) challenges for equitable water access.
5. Discuss Indigenous and traditional water knowledges and practices; and communicate effectively, respectfully and succinctly to a range of diverse stakeholders.

Subject Content

The subject comprises of four major topic areas:

1.Water planning for sustainability
Water resources planning is critical to ensure that we can meet future water need for drinking, agriculture, industry and environment sustainably. In this workshop we will examine estimating future water demand, evaluating possible new sources of water, protecting water sources, and addressing climate change and increasing water demand in the planning process. We will also examine how we can bring together a myriad issues, interests, and stakeholders through a planning process that can result in a evidence-based, cost-effective, and an environmentally sound water plan that will lead to sustainable water use at the local, regional and national levels.

2.Water policy for sustainability

The increasing complexity of global water challenges requires careful consideration water policies that are implementable and lead to sustainale water use. To address the increasingly complex water challenges the world is facing, we need water policy approaches and innovative methods that link theory and practice, management and policy.

3.Water Governance for sustainability
Water governance plays a vital role in sustainable water use and development. Population growth, economic development and other factors have raised the water demand, but water availability is becoming unstable and climate change has further exasperated the situation. Water scarcity leads to not only environmental pressures but also social tensions since water resources are distributed unevenly across countries, regions and social groups. Students will learn about integrated approaches to water management and governance to facilitate cooperation and exchange of views, enable communication between specialists and practitioners, and provide new water governance skills and competencies required in water practitioners.

4.Managing water for sustainable development
Sustainable water management requires using water in a way that meets current, ecological, social, and economic needs without compromising the ability to meet those needs in the future. This topic will examine managing water beyond jurisdictional boundaries and their immediate water supply operations, and managing water collaboratively while seeking resilient and sustainable regional solutions that minimise risks to people and their environment. The areas of managing water for sustainable development to be considered are agriculture, industry, domestic water supplies, and ecosystems. The water and sustainable development will be further examined in terms of the development leading to healthy people, increased prosperity, equity, protected ecosystem and resilient communities.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

AGEN 7008 Water Sustainability in Agriculture

Credit Points 10

Coordinator Jason Reynolds (https://directory.westernsydney.edu.au/search/name/Jason Reynolds/)

Description Population growth, urbanisation and climate change have increased the competition for water and affected water available for agriculture. The growing demand for food must be obtained using existing water resources sustainably. This subject will focus on the current status, trends and challenges of agricultural water management; understanding the practical and technical aspects of crop water requirement; the allocation, distribution, governance and use of water in agriculture; water management at the farm and regional levels; crop water relations, crop yields and water productivity; irrigation, drainage, and salinity in cultivated areas; rainwater harvesting and crop water management in rainfed areas; the use of wastewater and other low quality waters in agriculture; groundwater management in agriculture and conjunctive use of groundwater and surface water; and the internet of things and digital technologies for managing water in agriculture.

School Science

Discipline Agriculture, Environmental and Related Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Must be enrolled in a postgraduate program

Learning Outcomes

After successful completion of this Subject, students will be able to:

1. Critically examine the issues and challenges of agricultural water management.
2. Analyse crop water requirements and options for improving water productivity
3. Evaluate different technical innovations to improve water sustainability in agriculture.
4. Reflect on the sustainable water management principles at the farm and catchment levels.
5. Evaluate strategies for improving water and food security for and with key stakeholders including local indigenous communities and agricultural management authorities.

Subject Content

The subject comprises four main topics:

Workshop 1. Water sustainability in agriculture.
Sustainable and resilient agricultural systems depend on sustainable and resilient water management. The topics to be covered will include on-farm irrigation management concepts; water reuse and management; and developing farm level water management plans for improving water productivity and sustainability in agriculture.

Workshop 2. Water sustainability and markets.
Management of water resources in response to climate change, population growth, and economic development is a delicate balance. The limited supply of water has to meet the demands for agriculture, environment, and social and culture needs. The topics include water markets, water trading, water pricing and the balance between the

demands for broadscale agricultural practice and environmental outcomes.

Workshop 3. Water storages in agriculture.
Water storage systems play an important role in sustainable agricultural development. Reserves including groundwater, river storage, and dams provide storage capacity for agricultural using during droughts and diversified the cropping system. Topics include the basic concepts of water hydrology; participatory groundwater monitoring and water storages.

Workshop 4. The Murray Darling Basin.
The Murray–Darling Basin is a system of interconnected rivers and lakes. Water is used for a variety of purposes and there are rules around how water is shared. Water from the Basin helps in the production of $30 billion in agricultural production each year and 40% of Australia's farms are within the Basin. The topics covered include: The ancient origin of the basin, the chemistry of water sources, river management, and the future of the basin.

Workshop 5. Agriculture on the Peri-Urban Fringe
The per-urban fringe experiences pressure from urban encroachment and competing water uses. Water can be re-used and recycled for agricultural purposes generating circualar economies for nutrients. Topics include: water treatment, water chemistry, nutrients, and emerging contaminants of concern.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Essay	500 words	40	N	Individual
Presentation	Two group presentations at 15 minutes each	30	N	Individual
Report	2,000 words	30	N	Individual

AGEN 7009 Water Sustainability in Catchments

Credit Points 10

Coordinator Ricky Spencer (https://directory.westernsydney.edu.au/search/name/Ricky Spencer/)

Description With global climate change and other extreme weather conditions, water catchments have never been under more pressure than ever. Professionals with training in catchment management are in high demand. This subject will cover four interconnected themes: (i) Water sustainability in the natural catchments; (ii) Water sustainability in urban catchments; (iii) Water sustainability in peri-urban catchments; and (iv) Sustainability through integrated water resources management. These themes will focus on how key hydrologic processes and anthropogenic activities shape water availability. They will examine the complexity of managing water supplies and river systems in different catchments to address a multitude of challenges and issues to achieve water security and sustainable living. In particular, the subject will enable insight into various natural, environmental and socio-economic parameters affecting water sustainability and achieving catchment-level water sustainability.

School Science

Discipline Agriculture, Environmental and Related Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Must be enrolled in a post-graduate program.

Learning Outcomes

After successful completion of this Subject, students will be able to:

1. Articulate water cycle issues, challenges and options in different catchments, and understand the unique characteristics of water resources throughout the hydrological cycle and at all relevant scales.
2. Develop critical perspectives necessary to understand cross-cultural interactions with important hydrologic processes.
3. Reflect on the allocation of water between various competing demands related to social and economic development.
4. Evaluate the concept of ecosystem services, and consider water's unique characteristics within and across ecosystem services.
5. Critically analyse options and strategies to sustainably manage water quantity and quality, wetlands and river health for key stakeholders including indigenous communities
6. Integrate different perspecitves for planning, designing and sustainably managing water different catchments.

Subject Content

The subject comprises of four major topic areas:

1.Water sustainability in the natural catchments
Water in natural catchments, especially in rivers, creeks and wetlands, acts as the lifeblood of the local environment. It makes nearby towns more liveable and provides a place to relax, unwind and reconnect with nature. Healthy water bodies in the catchment are essential to spiritual, cultural and physical well-being. Water is vital in the natural catchment to sustain plants, animals and humans.

Students will focus on how the key hydrologic processes shape the natural world and our daily lives and explore how different hydrologic processes influence the physical and ecological structure of natural environments and the communities, cultures, and people within these environments. The framework is structured around the global water cycle and students will examine major water cycle components and explore selected case studies to understand how different cultures and communities interact with each hydrologic component. They will also investigate the ecology of aquatic ecosystems, their

structure, processes, and biodiversity, as well as water requirements for ecosystem conservation. Further, students will explore the complex relationship between water resources, the natural environment and the economy, and the growing problem of water scarcity.

2.Water sustainability in urban catchments
Water is vital to the sustainability and liveability of cities and urban catchments. Sustainablewater management in urban catchments plays a critical role in water supply for domestic use, commerce, industry and the urban environment. Therefore, water in these urban catchments must be appropriately used and managed, especially under the pressure of urbanisation.

Students will examine the complexity of managing water supplies and river systems in these catchments to address many challenges and issues to achieve water security and sustainable living. Topics will focus on water-sensitive urban design; approaches to managing urban stormwater quantity and quality through integrating green/blue and grey infrastructures; climate change impact assessments; and wastewater reuse. Overall, the theme will develop the fundamental understanding to guide the design of sustainable urban water supplies, leading to water-smart, liveable and sustainable cities.

3.Water sustainability in peri-urban catchments
There are growing concerns about water and food security to meet increases in population in urban areas. For cities to be liveable and sustainable in the future, there is a need to maintain the natural resource base and the ecosystem services in the peri-urban areas surrounding cities.

Students will examine various natural, environmental and socio-economic parameters that affect water sustainability in peri-urban catchments and explore the changes within these catchments that significantly impact agricultural uses and productivity, environmental amenity and natural habitat, water supply and quality, and energy consumption. They will develop insights into how these changes affect the peri-urban areas and their associated urban and rural environments. Further, students will discuss how the population growth and expansion of urban centres are increasing pressure on potable water supplies, energy and food supplies and the ecosystem services on which the community and the liveability of cities depend.

4.Integrated water resources management
Water is essential to the planet's survival, and managing it is critical as a limited global resource. Complexity is forefront when considering the sharing of water resources between national priorities and multiplied when the resource must be managed between multiple countries.
Managing this essential resource in the local and regional context requires understanding what is technically feasible and environmentally and socially viable.
Students will examine different concepts, options and strategies for managing and sustaining water infrastructure development and use at the local, regional and national. Students will explore the evolution of Integrated water resources management (IWRM) theory and practice, principles and frameworks that guide IWRM and understand the complexity associated with sustainable water management. They will also explore why integration and systems approaches are required to deal with the complexity and challenges of implementing IWRM for achieving sustainable water use and development.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Portfolio	3000 words or equivalent content	40	N	Individual
Debate	15 min per group	30	N	Group
Critical Review	600 words	10	N	Individual
Report	2000 words	20	N	Individual

AGEN 7010 Sustainability through Transdisciplinary Approaches

Credit Points 10

Description Water sustainability faces enormous social, cultural, ecological, technological, economic, gender and political challenges in an era of climate induced drought and floods, water scarcity, over exploitation and increasing pollution and deepening social inequities. Professionals working in the water management grappling with these challenges usually have disciplinary specific training. To lead positive change requires working in and understanding complexity and communicating with a wide range of different people in varying capacities. This unit will equip participants with critical thinking, self-reflexivity and systemic thinking competences that are required beyond technical and discipline specific knowledge. The subject will cover aspects of transdisciplinary thinking and approaches for sustainable development and resources management, the role of people, culture, society in environmental sustainability and transdisciplinary leadership and professional practice. The subject will include social hydrology, gender equity diversity and social inclusion (GEDSI) water challenges and global Indigenous and traditional water perspectives and practices.

School Science

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Must be enrolled in a post-graduate program

Learning Outcomes

After successful completion of this Unit, students will be able to:

1. Articulate the nature and benefits of transdisciplinary approaches to sustainability.
2. Evaluate sustainability challenges through transdisciplinary and systems thinking perspectives
3. Reflect and improve on own professional practice and leadership skills in promoting sustainability outcomes.
4. Collaborate effectively and ethically with stakeholders including local and global indigenous communities on a real-world project to tackle sustainability challenges.
5. Work effectively in a team environment.

Subject Content

The subject comprises four major topic areas:
1.Transdisciplinary thinking and approaches for sustainable development

Different approaches to understanding and tackling complex problematic situation; what is transdisciplinary approach; why use transdisciplinary approach; designing and implementing transdisciplinary approaches to addressing complex environmental problems; Case studies of transdisciplinary problematic situations from a different areas will be examined.

2.Transdisciplinary approaches for resources management
Complexity of managing natural resources under climate change scenarios and competing demands for resources; why and how of implementing transdisciplinary approaches for managing natural resources; Case studies of applying transdisciplinary approaches to managing from different areas (water, health etc.) will be examined.

3.People, culture, society, environmental sustainability through the lens of transdisciplinarity
Environmental sustainability, society and community engagement; Principles of gender equity, diversity, social inclusion, and indigenous knowledge for environmental sustainability; and managing and sustaining natural resources use from multiple perspectives.

4.Transdisciplinary leadership and professional practice
This workshop will focus on transdisciplinary practices that helps to build leadership, perspectives and knowledge from different disciplines, stakeholders and situations. The participants will explore transdisciplinary leadership required in dynamic and complex world and how to best to thrive as professional and bring about sustainable change. Participant will work on real world examples and gain experiences in collective learning environments and develop their professional practice to innovate .

AGRI 1003 Animal Science

Credit Points 10

Legacy Code 300801

Coordinator Julie Old (https://directory.westernsydney.edu.au/search/name/Julie Old/)

Description This subject will provide students with an understanding of comparative physiological and anatomical concepts of a range of mammalian and avian species. Students will develop the skills to apply these concepts in practical situations through the use of field observations and the relationship of these to functional anatomy and physiology of production animals. In addition students will develop many of the principles and concepts employed in animal production. Concepts discussed in lectures are reinforced by practical classes held in the laboratory and in the outdoor laboratories.

School Science

Discipline Animal Husbandry

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Equivalent Subjects AGRI 1002 - Animal Science

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Define key terms and concepts associated with mammalian and avian production animal anatomy and physiology.
2. Compare anatomy and physiology of mammalian and avian production animals.
3. Evaluate animal production systems.
4. Handle production animal species; record observations and reflect on the behaviour of production animal species.

Subject Content

Physiology, anatomy and behavior of a range of animal species
Functional anatomy and physiology in practical context

Assessment

AGRI 1004 Feeding the Planet

Credit Points 10

Legacy Code 300804

Coordinator Priti Krishna (https://directory.westernsydney.edu.au/search/name/Priti Krishna/)

Description This subject will explore the concepts driving current food production science (population growth, urbanization, emerging affluence, resource constraints, and underlying biological limits) in terms of their universal life cycles, constraints to production and societal issues. Throughout the subject, key questions will be addressed: What are the major health benefits and potential concerns regarding the intensification of production and consumption of food? How does agricultural production affect the efficient use of resources and impact our environment? Can costs of production be reduced to meet the growing demand for food products around the globe while maintaining health and safety for consumers? What are the different types of food production systems? Myths and misconceptions surrounding the food systems will be discussed and analysed. The subject is geared towards learners who seek a greater understanding of food systems and have a desire to learn more about issues surrounding sustainability.

AGRI 1005 Human Animal Interactions

Credit Points 10

Legacy Code 300807

Coordinator Sebastian Holmes (https://directory.westernsydney.edu.au/search/name/Sebastian Holmes/)

Description This subject introduces students to the varying relationships between humans and animals including domestication, the role of animals for companionship, as workers, the traditional role of animals in agriculture, wildlife and zoo animals and their increasingly recognised aesthetic and therapeutic roles. Students will work with a variety of domesticated animals, captive native mammals, and reptiles on-campus, and in a variety of animal industries off campus, including wildlife parks and zoos. The subject includes a balance of theoretical and practical work in the areas of behaviour and handling, basic husbandry, health care, and ethical management.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the importance of animals and their uses in society in a global context.
2. Define concepts, terminology and definitions in animal science.
3. Describe the history of human-animal interactions.
4. Discuss animal domestication as a basis for many of the forms of human-animal contact through the role of animals in food and fibre production, nutrient recycling, research (biomedical, production, behaviour and other forms) and for pleasure, companionship and service).
5. Define the principles and ethics of animal exhibitions and public perceptions of animal use.
6. Demonstrate and describe safe handling of a range of animal species including domestic and non-domestic animals.
7. Observe basic animal behaviour, and interpret this behaviour in the context of production, recreation and service.
8. Report research findings using academic written and oral communication and develop intellectual autonomy.

Subject Content

1. Historical Perspectives: Animal attributes exploited by humans; Animal products and human nutrition; Animals and human development
2. Historical Perspectives: Hunter gatherers; Neolithic Revolution; Animals in religion, culture and mythology
3. Positive Interactions: Domestic agricultural animals
4. Positive Interactions: Working and entertainment
5. Positive Interactions: Companion animals
6. Positive Interactions: Animals in medicine and research
7. Human Animal Conflicts: Zoonosis and Allergies; Pests and Parasites
8. Human Animal Conflicts: Invasive and Introduced Species
9. Human Animal Conflicts: Impact of Agricultural Animals on the Environment
10. Human Animal Conflicts: Habitat Destruction and Human Wildlife Conflicts
11. Human Animal Conflicts: Managing Human Wildlife Conflicts for Coexistence
12. Human Animal Conflicts: Morality of Animal Extinctions in the Anthropocene

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	60 minutes	15	N	Individual
Quiz	60 minutes	15	N	Individual
Presentation	180 minutes	20	N	Group
Essay	1000 words	10	N	Individual
Essay	1000 words	10	N	Individual
Final Exam	2 hours	30	N	Individual

AGRI 1009 Wildlife Studies

Credit Points 10

Legacy Code 300813

Coordinator Clarissa House (https://directory.westernsydney.edu.au/search/name/Clarissa House/)

Description This subject involves the study of basic biology, ecology, conservation and management of selected wildlife. Students will learn different management systems and research methods used in the conservation and management of wildlife. The use of wildlife as a sustainable resource will also be analysed within the context of ecological sustainable development and animal ethics.

School Science

Discipline Animal Husbandry

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Equivalent Subjects AGRI 1008 - Introduction to Wildlife Studies

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Define and identify wildlife, both taxonomically and in general terms.
2. Define wildlife population characteristics, population growth, carrying capacity, methods of estimation and other parameters.
3. Explain and articulate basic concepts, definitions and terms commonly used in wildlife studies and management.
4. Explain the methods used to identify animals (to a genus level).
5. Discuss the implications of invasive animals and the environment including feral species in Australia (based on cases studies) and current research in the field.
6. Discuss wildlife conservation and management, including habitat management, endangered wildlife species, international conservation organisations, the roles of zoos in animal conservation and related research.
7. Explain the methods which are used to monitor interactions between animals, animal populations and habitats.
8. Apply concepts and theories in wildlife studies including various management systems and research methods used in the study of animals, both in the wild and captivity.
9. Describe and discuss husbandry of a selected range of animals.
10. Conduct basic habitat and wildlife survey techniques including field transects, quadrats, animal tracks and scat identification.
11. Conduct a literature search on a wildlife studies topic and communicate findings in written form observing the conventions of scientific writing.

Subject Content

1. Wildlife population characteristics, population growth, carrying capacity, methods of estimation and other parameters.
2. Concepts, definitions and terms commonly used in wildlife studies and management.
3. Methods used to identify animals (to a genus level).
4. Invasive animals and the impact on the environment including feral species in Australia (based on cases studies) and current research in the field.
5. Conservation and management of exotic species at local, national and global scale, including management of habitats, endangered species, international conservation organisations and the roles of zoos in animal conservation.
6. Methods used to monitor interactions between animals, animal populations and habitats.
7. Management systems and research methods used in the study of animals, in the wild and captivity.
8. Habitat and wildlife survey techniques on campus including field transects, quadrats, animal tracks and scat identification.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	20 mcq, 30 min per quiz, a total of 120 minutes	20	N	Individual
Applied Project	5 slides/5 minutes each	20	N	Individual
Report	500 words	20	N	Individual
Final Exam	2 hours	40	N	Individual

AGRI 1010 Protected Cropping Climate Control and Technology

Credit Points 10

Legacy Code 301263

Coordinator Lihua Li (https://directory.westernsydney.edu.au/search/name/Lihua Li/)

Description This subject will teach students the intricacies of crop management in a highly controlled growing environment and the interplay between environmental response and plant behavior. In doing so, it will incorporate one nationally recognized unit of competency, "AHCPHT503 - Manage a controlled growing environment". Students will also identify controlled environment technologies including those available, under-development and being researched, such as robotics, sensors and gene technologies. Students will gain an appreciation for the science and technology that drives high-tech greenhouse production and apply their skills in Western Sydney University's state of the art National Vegetable and Protected Cropping Centre (NVPCC) and its PRIVA operating system at the Hawkesbury campus.

School Science

Discipline Agricultural Science

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Outline plant growth behaviour and measurements of crop performance
2. Explain why and how crops respond to environmental factors
3. Describe the greenhouse technologies available to growers that facilitate environmental control
4. Design a program which will optimise inputs for a specific crop in a controlled environment
5. Simulate the management of a controlled growing environment - (AHCPHT503)
6. Report on future prospects and solutions for crowing crops in managed environments

Subject Content

1.Understanding plant behaviour
2.Measuring crop performance
3.Crop response to environmental factors
4.Sensor technology
5.Radiation, temperature, coverings and supplemental lighting
6.Heating, cooling and dehumidifying
7.Vertical farm technology
8.Optimising inputs
9.Managing a controlled growing environment (AHCPHT503)
10.Gene technology
11.Robotics
12.Identifying future prospects

Assessment

Professional Task	1,500 words or equivalent	30	Y	Individual
Investigative Report	1,000 words or equivalent	30	N	Individual
Final Quiz	1 hour	20	N	Individual

AGRI 1011 Introduction to Agrifood

Credit Points 10

Coordinator Ryan Mcquinn (https://directory.westernsydney.edu.au/search/name/Ryan Mcquinn/)

Description This subject introduces the concepts driving current food production science in terms of universal life cycles, constraints to production and societal issues. Throughout the subject, key questions will be addressed: What are the major health benefits and potential concerns regarding the intensification of production and consumption of food? How does agricultural production affect the efficient use of resources and impact our environment? Can costs of production be reduced to meet the growing demand for food products around the globe while maintaining health and safety for consumers? What are the different types of food production systems? The subject is geared towards learners who seek a greater understanding of food systems and have a desire to learn more about issues surrounding sustainability.

Restrictions

None

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify agricultural production systems and sustainable agriculture practices.
2. Explain key principles and contemporary issues in sustainable agriculture.
3. Apply problem-solving skills to sustainable agricultural issues through the process of scientific inquiry.
4. Describe ethical considerations affecting both scientific and professional activities within sustainable agriculture.

Subject Content

1. Sustainable Agriculture principles, challenges and goals.
2. Agricultural systems and sectors (agronomy, agricultural enterprises and digital technologies).
3. Sustainable management of natural resources.
4. Sustainable Agrifood systems.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Numerical Problem Solving	Exercise equivalent to 120 minutes of problem solving	30	N	Individual
Quiz	6 quizzes of equal weighting (5% each) held in class sessions	30	N	Individual
Viva Voce	2 hours	40	N	Individual

AGRI 2001 Agronomy

Credit Points 10

Legacy Code 300863

Coordinator Samsul Huda (https://directory.westernsydney.edu.au/search/name/Samsul Huda/)

Description This subject enables students to develop understanding of basic crop and pasture agronomy including plant identification, crop/pasture establishment, growth, development, adaptation, plant protection, and grazing management. Students manage a crop in the field and a pot trial in the glasshouse and interact with researchers and industry professionals in understanding broad principles involved in the production and management of crops, pasture and animal production issues. The practical sessions enable students to apply the management principles and become familiar with various measuring techniques.

School Science

Discipline Agricultural Science

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Equivalent Subjects LGYA 6118 - Agronomy

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe and explain the key concepts of pasture and crop agronomy
2. Recognise the major crop and pasture species in Australian agriculture
3. Manage crops in the field and glasshouse
4. Use equipment to measure plant growth and development
5. Calculate fertiliser needs for potential production
6. Estimate water requirements for improved crop growth and development
7. Relate grazing management issues to animal production
8. Plan and design an experiment to determine the response of a crop to different levels of nutrient

Subject Content

1. Physiology and adaptation of crop plants
2. Plant nutrition
3. Canopy structure - Photosynthesis and respiration
4. Potential yield, soil - crop/pasture - water relations
5. Plant protection - weeds - Competition and plant community relationships
6. Grain development
7. Grazing management
8. Experimental design and data analysis

AGRI 2003 Animal Health and Welfare

Credit Points 10

Legacy Code 300834

Coordinator Julie Old (https://directory.westernsydney.edu.au/search/name/Julie Old/)

Description This subject will introduce students to the major issues related to animal health and welfare that form essential knowledge for those working with animals. In particular, students will gain an understanding of disease and methods for disease control as well as an introduction to disease diagnosis. In addition, students will gain knowledge about the relationships between animal management and the health and welfare expectations for domesticated and wild animals. The causes of common animal diseases will be introduced as well as the legal obligations of those owning, working or observing animals with respect to maintaining and monitoring their health and welfare.

School Science

Discipline Animal Husbandry

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) BIOS 1001

Equivalent Subjects AGRI 2002 - Animal Health and Welfare

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe and group some common animal disease/parasite aetiologies
2. Describe modes of disease transmission in animals
3. Compare and discuss methods of disease control in animals
4. Identify, define and assess levels of observed animal health in a range of species
5. Perform, analyse and describe basic animal health parameters
6. Conduct and describe some basic disease diagnosis techniques in the laboratory and field
7. Discuss the relationship between animal management and animal health and welfare implications
8. Define legal obligations for those working with animals

Subject Content

Common ectoparasites and endoparasites and their effects on the host

Non-pathogen-derived animal disease including nutritionally-derived
Pathogen-derived animal disease
Common livestock diseases
Common companion animal diseases
Wildlife disease
Disease prevention and control (includes vaccination and animal handling in the field)

Assessment of health in animals (includes in the laboratory and in the field)
The relationships between animal management and animal health and welfare implications
Animal welfare
Legislation and obligations of those working with research, industry, wildlife animal species

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Report: Written investigatory report on animal disease	2,000 words	20	N	Individual
Mid semester quiz	1 hour	30	N	Individual
Final Quiz	2 hours	50	N	Individual

AGRI 2004 Animal Reproduction

Credit Points 10

Legacy Code 300835

Coordinator Sebastian Holmes (https://directory.westernsydney.edu.au/search/name/Sebastian Holmes/)

Description Reproduction is the origin of life. The aim of this subject is to provide students with a sound understanding of reproduction of both domestic and non domestic animals so that they can design and manage a breeding program for a species of choice. Topics will include anatomy and physiology of male and female reproductive tracts; hormonal control of reproduction; fertilisation, pregnancy, parturition and lactation and advanced reproductive technologies. These topics will be explored in a range of species across different taxonomic groups.

School Science

Discipline Animal Husbandry

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) BIOS 1012 Cell Biology

Restrictions

Successful completion of 60 credit points

Assumed Knowledge

Some knowledge of biology, including basic animal anatomy, introductory animal physiology and some understanding of reproductive behaviour.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe a range of reproductive strategies used by domesticated animals and wildlife species
2. Examine reproductive organs systems to determine advanced reproductive technologies to be applied to breeding systems
3. Compare and contrast the principles of manipulating breeding systems using biological and environmental stimuli
4. Analyse biological tissue in the laboratory to determine appearance of normal tissue
5. Report research findings using appropriate academic writing and public speaking

Subject Content

1. Anatomy of male and female reproductive tracts
2. Endocrinology of reproductive cycles
3. Oogenesis, fertilisation
4. Parturition and lactation
5. Pregnancy loss
6. Effect of environment on reproduction
7. Manipulation of reproductive cycles
8. Captive breeding programs
9. Artificial breeding techniques including semen collection and evaluation, embryo transfer and other assisted reproductive techniques

10. Major reproductive diseases and their control
11. Comparative structure and function of male and female reproductive systems, and learn how to manipulate endocrine control of reproductive cycles. Students will work with a range of techniques, including new and emerging technologies, for modifying reproductive performance.
12. Factors affecting reproduction and common causes of reproductive failure will also be explored. Research and write professional standard academic reports.

Special Requirements

Legislative pre-requisites

All activities in the subject involving live animals must be approved by the Western Sydney University Animal Care and Ethics Committee.
All activities in the subject involving the use of animal specimens must be approved by the Western Sydney University Institutional Biosafety and Radiation Safety Committee.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Report	500-1000 words	10	N	Individual
Presentation	3 minutes	15	N	Individual

AGRI 2005 Sustainable Food Production

Credit Points 10

Legacy Code 300791

Coordinator Richard Thomas (https://directory.westernsydney.edu.au/search/name/Richard Thomas/)

Description Sustainable Food Production provides students with the knowledge and skills required to analyse current and future food production systems with an emphasis on water and energy efficiency. The subject material integrates agronomic principles with food supply chain analysis. This approach facilitates an analytical framework that goes beyond farm-gate productivity by including aspects of the food supply chain. Key concepts include water use efficiency, nitrogen balance, energy balance, life cycle assessment, and greenhouse gas emissions. Case studies will be drawn from a range of food production systems, emphasising productivity per unit of input.

AGRI 2006 Agriculture, Food and Health

Credit Points 10

Legacy Code 301389

Coordinator Michelle Mak (https://directory.westernsydney.edu.au/search/name/Michelle Mak/)

Description This subject is designed to strengthen student understanding of the important interactions between food, agriculture, environment and health. Traditionally the topics of food, agriculture, environment and health have been taught mainly in isolation from each other. It is becoming increasingly apparent that this traditional approach bears little relevance to real world issues and in some cases acts as an impediment to progress. Alternatives to the current 'western industrialised' food production system will be explored. These include organic agriculture, local farmer markets, and consumer driven changes to food production systems.

School Science

Discipline Agriculture, Not Elsewhere Classified.

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Incompatible Subjects LGYA 6185 - Ecology of Production

Assumed Knowledge

Basic understanding of resource sustainability issues.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the impacts of food choices on personal health.
2. Analyse the impacts of food choices on the environment.
3. Analyse impacts of food choices on the businesses and communities that provide food services.
4. Apply conceptual models to the analysis of food supply chains.
5. Critically evaluate current and future food supply systems.

Subject Content

Influence of current food production systems on the ?ewestern?f diet.
Current public health issues and their link to diet.
Influence of diet on food production systems.
Impact of diet on the environment.
Analysis of the distribution of food costs along the food supply chain
Concept of ethical eating
Concept of sustainable diets

AGRI 3001 Analysis of Agricultural Supply and Demand

Credit Points 10

Legacy Code 301098

Coordinator Richard Thomas (https://directory.westernsydney.edu.au/search/name/Richard Thomas/)

Description Students will develop understanding of the integrated nature of the agri-food value chain (supply and demand) from economic, environmental and social perspectives. Integrative processes and tools from established value chains will be evaluated in the context of changing consumer sentiment. Through analysis of economic and environmental gains (e.g. water and energy savings), students will identify emerging opportunities and challenges for improved and/or alternative food distribution systems. Analytical and reporting tools will be used to develop competence in data

management, with emphasis on increasing communication from consumer to producer.

School Science

Discipline Agriculture, Not Elsewhere Classified.

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Equivalent Subjects LGYA 6131 - Analysis of Agricultural Supply Chains

Assumed Knowledge

Students enrolling in this subject should have an understanding of basic statistics and a fundamental understanding of the consumer-driven nature of the economy. This subject will build on aspects of agri-food supply chains introduced in earlier subjects in the Bachelor of Sustainable Agriculture and Food Security program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply appropriate research methodology and analyse quantitative and qualitative results
2. Apply data management principles to the understanding and improvement of agricultural value chains (supply and demand)
3. Evaluate the influence of consumer behaviours on agricultural value chains
4. Critique, integrate and communicate information to develop effective and innovative agricultural value chains
5. Critically analyse the social, economic and environmental risks and benefits of improved agricultural value chains.

Subject Content

1. Quantitative and qualitative tools for industry analysis
2. Knowledge and data management across the value chain (supply and demand)
3. Impact of consumer trends and attitudes on agricultural supply and demand
4. Definitions and determinants of success in agricultural value chains
5. Risk assessment and comparative analysis of benefits from improved agricultural value chains
6. Data management in terms of information, energy, water and service metrics
7. Supply chains as a framework for analysis of environmental and social outcomes

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Online quiz	2 x 45 mins	10	N	Individual

Comparative analysis of the mainstream agricultural supply chain used in (Assignment 2) with another, more innovative, agricultural supply chain.	2,500 words	50	N	Individual
Accrued industry work experience	30 hours	S/U	Y	Individual
Industry work experience written article	300 words	10	N	Individual

AGRI 3002 Animal Nutrition and Feeding

Credit Points 10

Legacy Code 300853

Coordinator Ben Moore (https://directory.westernsydney.edu.au/search/name/Ben Moore/)

Description Animal nutrition and feeding is fundamental to many aspects of animal production and wildlife systems. This subject aims to provide students with knowledge of nutrient requirements for different types of animals and the nutrient composition of common feeds. Students will evaluate and formulate rations to meet a range of animal requirements at different stages of growth, reproduction, lactation and production.

School Science

Discipline Animal Husbandry

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Equivalent Subjects AGRI 3003 - Animal Nutrition and Feeding

Restrictions

Successful completion of 120 credit points.

Assumed Knowledge

A basic understanding of animals and biology.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the nutrient requirements of different types of animals at different stages of the life cycle
2. Articulate the effect of different types of digestive systems on feed and nutrient requirements

3. Analyse nutrient composition of common feeds for a range of animal species
4. Describe the factors affecting feed intake
5. Formulate and evaluate rations and supplements for a range of different animal species
6. Identify nutrient deficiencies, excesses and imbalances
7. Conduct and interpret laboratory analysis of feedstuffs
8. Describe common feeding related problems
9. Research and write professional reports

Subject Content

Nutrients - carbohydrates, lipids, protein, minerals, vitamins and water
Nutrient requirements of different animal species at different stages of the life cycle
Regulation of feed intake such as hormones, BMR and palatability
Nutrient composition of common feeds, pastures and specialised feeds
Rations formulation for different animal species at different stages of the life cycle
Common feed and nutrition related problems
Interpreting feed and supplement labels
Special requirements of animals including performance animal, wild and zoo animal nutrition
Recent advances in nutrition
Research and write professional reports

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	1 hour per quiz (conducted online, in own time over 1 week period)	20	N	Individual
Proposal	15 minutes	10	N	Group
Report	2,000 words	20	N	Individual
Presentation	20 minutes	50	N	Group

Coordinator Adrian Renshaw (https://directory.westernsydney.edu.au/search/name/Adrian Renshaw/)

Description Animal production is about producing animals for food, companionship and conservation. This subject aims to develop an understanding of the major animal production systems used for food and fibre and other resources in Australia (intensive and wildlife), and to apply this knowledge to improving problematic issues and understanding topical issues. Topics will focus on the application of animal production principles to these production systems.

School Science

Discipline Agricultural Science

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Equivalent Subjects AGRI 3004 - Animal Production

Restrictions

Successful completion of 120 credit points of Bachelor of Natural Science or Bachelor of Science subjects.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Define, describe and demonstrate a depth of knowledge various animal production systems in Australia.
2. Model animal production systems demonstrating flows of activities and resources, demonstrating how inputs and activities can be manipulated to modify production outputs.
3. Demonstrate how domestic and international animal production systems function in relation to food quality, food safety and food supply.
4. Describe how intensive and extensive animal production systems differ in relation to relative productivity, geographic location and environmental impact.
5. Explain how animal production systems fit within a framework of bioethics, animal welfare, animal rights and biotechnology.
6. Describe how animal production concepts and principles can be applied to the management of wildlife and other natural systems.
7. Demonstrate knowledge of new technologies, innovations, processes and current issues in animal production.
8. Demonstrate the ability to mount a coherent argument with respect to key topical issues related to animal production systems in relation to social, environmental and production outputs and the ability to outline those arguments in both spoken and written formats.

Subject Content

Range of animal production systems and the various outputs and outcomes that result from those systems.
Intensive Animal Production.
Genetic Engineering.
Deer Production.

Wildlife Harvesting.
Wildlife Production Systems.
An international example - case study.
Topical areas in Animal Production.

Special Requirements

Legislative pre-requisites

Students who opt to enrol in this subject are strongly recommended to obtain a Q-Fever vaccination, and Tetanus vaccination/booster. Students who cannot evidence vaccination may be precluded from activities on the Farm, and/or internships with third parties.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	1 hour	40	N	Individual
Debate	5 min and 500 words of notes	20	N	Individual
Report	4,000 words	40	N	Individual

AGRI 3007 Water in the Landscape

Credit Points 10

Legacy Code 300870

Coordinator Jason Reynolds (https://directory.westernsydney.edu.au/search/name/Jason Reynolds/)

Description Many land and water use activities in both urban and rural landscape result in hydrologic changes that have environmental, economic and social consequences. These activities require appropriate management strategies for sustainable water use in catchment. In this unit, the hydrologic cycle will be explored at varying spatial scales in urban and rural contexts. Hydrologic, environmental, economic and social perspectives will be used in the examination of the demand and the use of water.

School Science

Discipline Agricultural Science

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Equivalent Subjects LGYA 6246 - Water in the Landscape

Restrictions

Successful completion of 120 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Synthesise and evaluate different concepts and approaches to sound water management in the context of urban and rural catchments
2. Analyse and evaluate the nature of demands for water in different landscapes and for different users and the difficulties in matching supply and demand
3. Assess different sources of water and uses and analyse the issues related to rainwater harvesting, water conservation and recycling
4. Describe how human activities affect the water quality and health of waterways; and differentiate the impacts of factors such as population pressure and climate change on the availability of water for different uses
5. Research selected water issue through working on a mini project
6. Use social, cultural, economic, policy and institutional perspectives to relate sustainable water supply with demand

Subject Content

1. Water issues and hydrologic cycle
2. Issues relating to water in the environment. Quantity and quality of groundwater and surface water supplies
3. Urban and Rural Irrigation
4. Evaporation and transpiration
5. Salinity, drought and other environmental issues
6. Water management in urban and peri-urban landscape
7. Social, economic and policy aspects of water management

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Report	1000 words and video (5-7 min)	15	N	Individual

AGRI 3008 Animal Health, Ethics and Welfare

Credit Points 10

Legacy Code 301255

Coordinator Mark Jones (https://directory.westernsydney.edu.au/search/name/Mark Jones/)

Description This subject will ensure students will be able to evaluate the major issues related to animal health, welfare and ethical frameworks that govern working with animals. In particular, students will gain knowledge of the diseases impacting animals and methods for disease diagnosis and control. In addition, students will apply this knowledge to the relationships between animal management and the health and welfare expectations for domesticated and wild animals. The legal obligations of the impact of legislative regulation for those owning, working or observing animals with respect to approval processes, maintaining and monitoring animal health and welfare is also addressed. Students may need to travel to another campus to complete this subject.

Level Undergraduate Level 3 subject

Pre-requisite(s) BIOS 1001 AND
AGRI 1003

Incompatible Subjects AGRI 2002 Animal Health and Welfare
AGRI 2003 Animal Health and Welfare

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe and categorise some common animal disease/parasite aetiologies
2. Distinguish between different modes of disease transmission in animals
3. Compare and contrast methods of disease control in animals
4. Identify, define and assess levels of observed animal health in a range of species
5. Perform, analyse and describe basic animal health parameters
6. Conduct, assess and describe some basic disease diagnosis techniques in the laboratory and field
7. Evaluate the relationship between animal management and animal health and welfare implications
8. Assess and select the legal obligations for those working with animals

Subject Content

- Common ectoparasites and endoparasites and their effects on the host
- Non-pathogen-derived animal disease
- Pathogen-derived animal disease
- Livestock disease
- Companion animal disease
- Wildlife disease
- Disease prevention and control
- Assessment of health in animals
- The relationships between animal management and animal health and welfare implications
- Animal welfare
- Legislation and obligations of those working with research, industry, wildlife animal species

Assessment

Final Exam	1 hours	30	N	Individual
Written report to support Viva	500 words	20	N	Individual

AGRI 3009 Agricultural Technology

Credit Points 10

Legacy Code 301449

Coordinator Ryan Mcquinn (https://directory.westernsydney.edu.au/search/name/Ryan Mcquinn/)

Description Agricultural Biotechnology is rapidly developing and this subject will assure you the knowledge and skills that contribute to the future of sustainable food production. The subject material integrates agronomic principles with current and emerging biotechnology, highlighting issues and solutions based around case studies. This approach facilitates an analytical framework that goes beyond traditional production systems including eco-farming, life-cycle and regenerative agriculture, along with development of innovative and integrated production and waste systems. Key concepts include sustainable resource use, nitrogen balance, energy efficiency, and greenhouse gas emissions and market analysis.

School Science

Discipline Agriculture

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 120 credit points

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the key determinants of biotechnology in agricultural production systems.
2. Critically evaluate the impact of biotechnology on sustainable food production systems.

3. Articulate the pathways to incorporate biotechnology into agriculture.
4. Analyse the role of technology in regenerative and sustainable agriculture systems.
5. Apply analytical principles to develop emerging agriculture enterprises.

Subject Content

1. New and emerging biotechnology in agriculture.
2. Sustainable food production systems.
3. Biotechnology in eco-farming, lifecycle and regenerative agriculture.
4. Innovation pathways in plant and animal production.
5. Technology applications in regenerative and sustainable agricultural production.
6. Systems and market analysis of emerging Agrifood enterprises.

Assessment

Level Undergraduate Level 3 subject

Equivalent Subjects AGRI 3008 Animal Health Ethics and Welfare

Incompatible Subjects AGRI 2002 Animal Health and Welfare
AGRI 2003 Animal Health and Welfare

Restrictions

Successful completion of 120 credit points

Learning Outcomes

1. Describe the principle immune defence systems of domestic and native Australian animals.
2. Define and categorise types of animal diseases and causative agent(s).
3. Compare and contrast animal disease aetiology, transmission, diagnosis and control.
4. Evaluate the relationship between animal management and animal health and welfare implications

Subject Content

1. Immune systems of domestic and native Australian animals.
2. Pathogenic, non-pathogenic and zoonotic diseases of domestic and native Australian animals.
3. Aetiology, transmission, diagnosis, and control of animal diseases.
4. Sustainable animal health and welfare management.

Special Requirements

Essential equipment

Outdoor attire / Lab coats, enclosed footwear for indoor labs

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

AGRI 7001 Agricultural Biosecurity

Credit Points 10

Legacy Code 301368

Coordinator Michelle Moffitt (https://directory.westernsydney.edu.au/search/name/Michelle Moffitt/)

Description Biosecurity is a set of measures to prevent, respond to and recover crops and livestock from pests and diseases that threaten the economy and environment. Comprehensive biosecurity systems help ensure food security and food safety, which is crucial for community health, competitiveness for agricultural export and conservation of natural environments. This subject studies the epidemiologic triangle consisting of the host, disease and the environment in which the disease develops, and the series of measures and practices to detect and prevent entry and spread of pests, diseases and weeds. The potential for future biosecurity mega shocks to the agricultural industry, preparedness for rapid emergency responses to an exotic incursion, and management of invasion of pests and diseases will be discussed.

School Science

Discipline Agricultural Science

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Must be enrolled in a postgraduate program.

Assumed Knowledge

Foundation in chemical and biological sciences, quantitative thinking.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically appraise biosecurity systems as applied to global food security.
2. Identify diseases, pests and weeds that are the target of surveillance.
3. Monitor plants and animals for signs of disease and pest infestation.
4. Devise a biosecurity plan that is tailored to the needs of a specific area.
5. Create solutions to dynamic complex problems in biosecurity by synthesizing information from a range of relevant data sources.
6. Justify inferences and solutions to biosecurity issues to a range of audiences.

Subject Content

1.How farms and farm products are affected by microbes (diazotrophs, mycorrhizae, viruses, bacteria, fungi and nematodes), pests and weeds
2.Key concepts of epidemiology; the study of the distribution (frequency, pattern) and determinants (causes, risk factors) of disease-related states and events
3.Methods for diagnosis such as quantitative PCR as well as different sequencing and sensor technologies
4.The symbiotic relationships of microorganisms and insects with plants and animals and their use in biocontrol
5.Methods of control (cultural, chemical, biological, and genetics to breed resistant varieties) and their relative advantages and disadvantages,
6.Data modelling and visualisation together with increased data availability for long-term decision making
7.The relevant legislation and authorities (Biosecurity Australia, AQIS, TGA etc.).
8.The strengths and weaknesses of current biosecurity systems

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Professional Task	2 pages	10	N	Individual
Portfolio	1700 plus appendices	35	N	Individual

AGRI 7002 Agricultural Biotechnology

Credit Points 10

Legacy Code 301369

Coordinator Ryan Mcquinn (https://directory.westernsydney.edu.au/search/name/Ryan Mcquinn/)

Description Biotechnology is a powerful enabling technology that is revolutionising agriculture by delivering improved productivity and nutrition, better management of pests and diseases, improved ability to cope with environmental challenges, and development and production of medicines and functional products. The discovery and applications of gene editing by CRISPR-Cas technology as well as modification of organisms using recombinant DNA, RNAi and other

molecular technologies are seen as key to providing solutions to global food crisis, climate change associated disasters and health and disease-related issues. This subject focuses on modern and cutting-edge techniques used in cell culture and tissue engineering, genome editing, transformation and transgenesis, rapid breeding and selection and synthetic biology to address contemporary issues in sustainable agriculture.

School Science

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Must be enrolled in a postgraduate program

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically appraise the essential principles, technologies, and applications of biotechnology as applied to sustainable agriculture.
2. Distinguish the advantages and disadvantages of using biotechnology in agriculture.
3. Interpret the national and international regulatory framework of agricultural biotechnology.
4. Justify inferences and solutions to the data collected in response experiments in a professional context.
5. Communicate scientific advances in biotechnology to diverse audiences.

Subject Content

1.History of agricultural biotechnology.
2.New technologies in organism modification (CRISPR-Cas, RNAi, Epigenetic marks).
3.Applications of biotechnology for improved yield and nutritional qualities of food crop.
4.Resistance to pest and pathogens.
5.Reduced dependence on agrochemicals, production of vaccines.
6.Faster breeding and selection of crops improved traits.
7.Advances in stem cell research such as development of organoid systems, plant derived scaffolds for tissue engineering.
8.Biotechnology policies and regulation.

Assessment

AGRI 7003 Agricultural Technologies

Credit Points 10

Legacy Code 301370

Coordinator Richard Thomas (https://directory.westernsydney.edu.au/search/name/Richard Thomas/)

Description This subject will provide students with knowledge and practical experience of new technologies associated with broad-acre and intensive cropping and pastures, and their role in mixed farming systems. A major focus of this subject is how new technologies such as drones, machine learning, remote sensing and imaging science technologies are contributing to more productive and sustainable land management systems. The advanced agronomy component of the subject will explore keys to successful crop and pasture management - recognising variability in performance within the paddock and farm, diagnosing the underlying causes of spatial and temporal variability, and using precision agriculture tools to produce better informed enterprise management decisions, plant yield, sustainability and quality for end-users.

School Science

Discipline Agricultural Science

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Must be enrolled in a postgraduate program

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Appraise how precision agriculture technology can be used to optimise crop growth and yields and resource-use efficiency.
2. Propose solutions to dynamic complex problems in agriculture using appropriate analytical methods from data science.
3. Create potential management zones based on assessment of authentic soil and crop data.
4. Formulate informed cropping decisions based on data from rate response experiments and crop modelling in precision agriculture.
5. Justify inferences and conclusions to the data collected in experiments in a professional context.

Subject Content

1.Modern approaches to crop improvement through genetic technologies
2.Developing balanced arguments on the merits and ethics of genetictechnologies
3.Advanced agronomic systems, and understand the relationships between genotype, management and environment
4.New crop management techniques
5.Precision agriculture approaches and technologies
6.Crop biodynamic models and their application, and decision support systems
7.The impacts of possible changes in CO2, temperature and rainfall distribution on crop growth and yield at farm and regional scales
8.Options for future farming systems which integrate knowledge on crop, pasture and livestock improvement
9.Advanced agronomy with likely scenarios for climate variability and change

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

AGRI 7004 Livestock Production Systems

Credit Points 10

Legacy Code 301373

Coordinator Adrian Renshaw (https://directory.westernsydney.edu.au/search/name/Adrian Renshaw/)

Description This subject covers the principles of animal production required to develop sustainable and efficient production systems to meet the challenges of domestic and global needs. It will cover the scientific principles (biochemical, anatomical and physiological) that underpin intensive and extensive animal production. These principles will be related to key production parameters and indicators including growth, reproduction, lactation and milk production, fibre production and breeding. Students will apply scientific principles to the planning of production in farming simulation models. Through these simulation programs students will explore production case studies and develop advisory plans. Focus areas include animal health and management, whole farm production systems and the challenges to animal production from changing climate, food safety and quality, consumer requirements and animal welfare.

School Science

Discipline Animal Husbandry

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Must be enrolled in a postgraduate program

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an integrative understanding of the principles of clean, green and ethical animal production and its importance to modern agriculture.
2. Critically analyse the major problems associated with the production of wool, meat and dairy products.
3. Apply appropriate research informed techniques in interpreting data to support decisions in animal production.
4. Communicate the conclusions of an animal production report to key stake holders.
5. Address complex ethical issues in animal production in line with regulatory frameworks.

Subject Content

1.The structure and operation of agricultural production industries of Australia
2.Australia?fs role in global food and fibre production
3.The principal factors that determine location, environmental impact, sustainability, profitability and international trade competitiveness in animal production systems
4.The major extensive animal production systems in Australia: beef cattle and sheep, and dairy cattle
5.The major intensive animal production systems in Australia: pigs and poultry, including free range and conventional farming systems
6.Productivity benchmarks in the major production animal systems
7.Chain of production from on-farm to consumer
8.The principles of codes of practice and laws governing production animal systems
9.The principles of animal welfare and situations where there is a particular welfare concern
10.Impact of animal production systems on the environment

Coordinator Don Mason (https://directory.westernsydney.edu.au/search/name/Don Mason/)

Description This subject is designed to provide students with the knowledge and skills necessary to develop elementary design skills and basic CAD (Computer Aided Design) proficiency suitable for application within the building industry. Students will learn to describe building designs in plan, section, elevation, isometric and perspective views. Basic drafting concepts and skills will be acquired in the context of individual detached housing designs. Students will also be required to develop appropriate analytical and problem solving skills in dealing with a realistic house building project.

ARCH 1005 Drawing and CAD (WSTC)

Credit Points 10

Legacy Code 700306

Coordinator Robert Paluzzano (https://directory.westernsydney.edu.au/search/name/Robert Paluzzano/)

Description This subject is designed to provide students with the knowledge and skills necessary to develop elementary design skills and basic CAD (Computer Aided Design) proficiency suitable for application within the building industry. Students will learn to describe building designs in plan, section, elevation, isometric and perspective views. Basic drafting concepts and skills will be acquired in the context of individual detached housing designs. Students will also be required to develop appropriate analytical and problem solving skills in dealing with a realistic house building project.

School Eng, Design & Built Env

Discipline Interior and Environmental Design

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Equivalent Subjects ARCH 1003 - Graphic Communication and Design (WSTC) ARCH 1001 - Graphic Communication and Design ARCH 1004 - Drawing and CAD

Restrictions

Students must be enrolled at The College. Students in Extended Diploma programs must pass 30 CPs of preparatory subjects in order to enrol in this subject. Students in Integrated Diploma programs must pass or be enrolled in the preparatory subjects in order to enrol in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply architectural and technical drafting standards and symbols.
2. Generate ideas, designs and 3D models for sustainable housing.
3. Differentiate and correctly interpret site plans, survey plans, floor plans, cross sections, elevations and roof plans.
4. Produce the required documentation for a standard three-bedroom house using a CAD program.

Subject Content

Sketching basic house designs
Drawing types - Plans, elevations and sections
Passive solar design principles
Efficient floor plan layouts
Finishes selection
CAD skills
Construction drawing essentials
Bathroom layouts
Sketching basic house designs

ARCH 2001 Architecture Studio - Fundamentals of Analogue Design

Credit Points 20

Legacy Code 301197

Coordinator Ursa Komac (https://directory.westernsydney.edu.au/search/name/Ursa Komac/)

Description This subject will introduce students to fundamentals of spatial composition as it relates to visual and temporal experience in architectural contexts. Project-based assessments will involve the creation of 2D and 3D compositions that explore traditional organisational strategies, classical principles of geometry, materiality, experiential phenomena, and representation. Students will work with analogue and traditional tools including freehand drawing and conventional shop equipment. The subject will also provide an introduction to the history, theory, and discourse of architecture from 4000BC to the Enlightenment.

Level Undergraduate Level 2 subject

Restrictions

Must be enrolled in 3753 Bachelor of Architectural Design or 3768 Postgraduate Bridging Program (Architecture). Students not enrolled in 3753 or 3768 who wish to enrol into this subject should have a 5.0 minimum GPA and are required to discuss with the Academic program Advisor.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Establish a basic foundation of visual, spatial, and material literacy through iterative studio-based explorations in 2D and 3D composition, aesthetics, and abstraction that relate to human ergonomic scale, functionality, user experience, and context.
2. Develop abilities for inquiry, organization, comparison of information, editing, diagramming, critical observation and reflection in support of design investigations.
3. Design and develop proposals through freehand and mechanical drawing techniques, physical model making, verbal and written communication, including ability to form a persuasive and coherent rationale for one's work.
4. Interpret, analyse, and critique important themes from the history and theory of the architecture discipline; including from an Australian, European and Global context of architectural de

Subject Content

1. Fundamentals of Spatial and Architectural design
2. Architectural history and theory ? Ancient to Enlightenment
3. Architectural communication skills using freehand and orthographic techniques
4. Ergonomics, scale, and proportioning systems
5. 2D and 3D composition of form
6. Design through using conventional workshop techniques

Special Requirements

Legislative pre-requisites

Construction Site Induction Safety "White Card" – this will be facilitated during orientation sessions or the first week of semester.

Assessment

ARCH 2002 Architecture Studio - Fundamentals of Digital Design

Credit Points 20

Legacy Code 301198

Coordinator Ursa Komac (https://directory.westernsydney.edu.au/search/name/Ursa Komac/)

Description This subject introduces students to fundamentals of spatial organisation and human experience in the built environment. Principles of making will be practiced and analysed for their relationship to architectural outcomes, the study of Modern organisational strategies, materiality, experiential phenomena, and abstraction. Students work on project-based assessments that involve an iterative process of reflection and refinement, the use of digital techniques of 3D design including NURBS modelling and rapid prototyping to explore architectural concepts. This work is

contextualised as students learn about the history, theory, and discourse of architecture from the Industrial Revolution to the Present.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Create design solutions using a foundation of visual, spatial, and material literacy through iterative studio-based explorations in 2D and 3D composition, aesthetics, and abstraction that relate to scale, experience, and context.
2. Demonstrate underpinning design skills in inquiry, organization, comparison of information, editing, diagramming, critical observation and reflection in support of design investigations.
3. Communicate architectural design concepts and solutions using a range of technology and techniques demonstrating skills in persuasion and construction of a rationale.
4. Proficiently design with NURBS modelling software to represent architectural forms and to generate physical rapid prototyping models.
5. Critique important themes from the history and theory of the architecture discipline including from an Australian, European and Global context of architectural development, from industrial to contemporary eras.
6. Apply a critical understanding of historical architectural precedents toward contemporary issues, design possibilities, construction systems, and representational techniques, through research and communication skills.s.

Subject Content

1. Fundamentals of Spatial and Architectural design
2. Architectural history and theory ? Industrial Era to Present
3. Architectural communication skills using digital modelling and visualisation
4. Ergonomics, scale, and proportioning systems
5. 2D and 3D composition of form
6. Design through making using rapid prototyping

Special Requirements

Level Undergraduate Level 2 subject

Equivalent Subjects ARCH 2004 - Development Control

Incompatible Subjects BLDG 1012 - Property Development Controls

Assumed Knowledge

Basic understanding of residential construction.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify issues related to development control;
2. Relate the law to the development application process;
3. Assess applications for approval for development as an integrated process;
4. Evaluate environmental impact assessment issues;
5. Identify urban design, streetscape, heritage and conservation issues in projects;
6. Analyse problems with parking, traffic, landscape and services in projects.

Subject Content

Environmental and political issues associated with plan implementation
The role of government related to development control
The planning approval process within the planning framework.
Introduction to Town Planning control

Assessment

ARCH 3002 Architecture Studio - Global Cities

Credit Points 20

Legacy Code 301201

Coordinator Michael Chapman (https://directory.westernsydney.edu.au/search/name/Michael Chapman/)

Description This subject will situate learning in the context of the Global City. Projects will be used to investigate scenarios that are common to the contemporary condition of the developing world and the expanding metropolis in various international contexts. Students will either travel to international sites, work with international partners, or work remotely on problems beyond the Australian context. Work integrated learning will be a key feature of the Global Cities studio and will involve relevant members of the professional community to help lead studio investigations. Assessments will include complex urban projects at a large scale, developed using the design, communications, technical, and theoretical studies that have underpinned their education. Assessments will be project-based in real world scenarios and will incorporate sustainable strategies of design. Studies will be supplemented by tuition in structural design and will also be informed by concurrent studies in building science.

School Eng, Design & Built Env

Discipline Architecture

Student Contribution Band HECS Band 2 20cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) ARCH 3004 AND
ARCH 3003

Restrictions

Students must be enrolled in 3753 Bachelor of Architectural Design. Students not enrolled in 3753 who wish to enrol into this subject should have a 5.0 minimum GPA and are required to discuss with the Academic program Advisor.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply creative design skills to address urban complexity, diverse combinations of architectural programs, and large-scale buildings.
2. Demonstrate an advanced level of theoretical and technical awareness in architectural and spatial design with an ability to develop and test a variety of sensitive design solutions in section, plan and model using hand and digital techniques.
3. Develop and demonstrate an awareness of the broader cultural context in which architecture is practised, through the application of local and global planning considerations, and an understanding of the history of practice of urban design and issues of city planning
4. Develop an understanding of fundamental performance-based aspects of building design, including structural principles, daylight/lighting level analysis, thermal analysis, ventilation and acoustic analysis, where the evaluation of data justifies built form, and/or a specific set of characteristics which modulate how buildings are both built and experienced.
5. Develop an understanding and ability to design appropriate structural solutions and construction strategies for different building types and spatial requirements, with consideration for assembly and cost.
6. Implement technical skills in analysis and representation of structural design.

Subject Content

1.Investigation of Urban Spatial and Architectural design scenarios
2.Fundamentals of architectural building structures
3.Analysis of context and precedent to inform design decisions
4.Organisation of architectural programs and material assemblies in large-scale buildings or large-scale complex urban environments/ scenarios
5.Graphic visualisation and literacy
6.Performance based design solutions in response to daylight, acoustics, thermal performance and other aspects of building science

Special Requirements

Legislative pre-requisites

Construction Site Induction Safety “White Card” – must be obtained in Year 1 of the program.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Presentation	Drawings and/or Models	10	N	Group
Applied Project	Drawings and Models 10 minutes for presentation (allows 5 mins question time)	40	N	Individual
Applied Project	Drawings or Models and 500 words	40	N	Individual
Portfolio	500 words, visual compendium	10	N	Individual

ARCH 3003 Architecture Studio - Rethinking Urbanism

Credit Points 20

Legacy Code 301200

Coordinator Aso Haji Rasouli (https://directory.westernsydney.edu.au/search/name/Aso Haji Rasouli/)

Description This subject will extend the concept of Urban Transformation, where the architect is an agent of progress and change in the built environment. Students will refine their use of architectural design as a medium for speculation and advocacy in the public realm and in daily life of the city. Rethinking Urbanism will investigate architecture and civic space at the scale of public projects. Students will use various models of three-dimensional representation for communication and experimentation with new ways of building the urban fabric. Assessments will be project-based in real world scenarios and will incorporate sustainable strategies of design.

School Eng, Design & Built Env

Discipline Architecture

Student Contribution Band HECS Band 2 20cp

Level Undergraduate Level 3 subject

Pre-requisite(s) ARCH 2001 AND
ARCH 2002

Restrictions

Students must be enrolled in 3753 Bachelor of Architectural Design. Students not enrolled in 3753 who wish to enrol into this subject should have a 5.0 minimum GPA and are required to discuss with the Academic program Advisor.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply creative design skills and well-considered formal responses to intermediate level architectural scenarios, particularly in relation to a contested urban context.
2. Evaluate and design mid-rise structural and construction systems and their resulting material and organisational implications, in particular in the building section and plan, demonstrated through iterative testing of design options.
3. Investigate the multiple and competing factors which influence how urban environments, building morphology, and civic social contexts are constructed and transformed.
4. Exercise a basic understanding of the relevant codes and standards, the building project cycle, and of the various methods of building procurement.
5. Evaluate and design architectural and material assemblies through the management of data utilising parametric modelling software and/or scripting.
6. Evaluate and design architectural and material assemblies through three-dimensional modelling and both physical and digital representation.

Subject Content

1. Investigation of Urban Spatial and Architectural design scenarios
2. Architectural Technologies
3. Analysis of context and precedent to inform design decisions
4. Organisation of architectural programs and material assemblies in medium-scale buildings
5. Graphic visualisation and literacy
6. Using construction and material to express architectural ideas

Special Requirements

Legislative pre-requisites

Construction Site Induction Safety “White Card” – must be obtained in Year 1 of the program.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

ARCH 3004 Architecture Studio - Rethinking the Sub-urban

Credit Points 20

Legacy Code 301199

Coordinator Angelo Korsanos (https://directory.westernsydney.edu.au/search/name/Angelo Korsanos/)

Description This subject will introduce the concept of Sub-urban Transformation, where the architect is an agent of progress and change in the built environment. Students will learn to use architectural design techniques as a medium for speculation and advocacy in the public realm and in daily life of the city. Rethinking the Sub-urban will investigate domesticity at the scale of residential projects and communities. Students will be concurrently trained in the use of Building Information Modelling (BIM) as a means to develop project work and collaborate as they explore new ways of building the suburban fabric. Assessments will be project-based in real world scenarios and will incorporate sustainable strategies of design.

School Eng, Design & Built Env

ARCH 2002

Restrictions

Students must be enrolled in 3753 Bachelor of Architectural Design. Students not enrolled in 3753 who wish to enrol into this subject should have a 5.0 minimum GPA and are required to discuss with the Academic program Advisor.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Design with an awareness and understanding of the material world in architecture, and how technological and environmental design involve the resourcing, configuration, and deployment of material in a variety of contexts.
2. Research, evaluate, and apply climatically responsive design technologies.
3. Apply the use conceptual thinking, analysis, precedent to inform design proposals in response to basic architectural programs, particularly in relation to an suburban context.
4. Integrate technical awareness in relation to basic structural and construction systems and their resulting material and organisational implications.
5. Proficiently use BIM software to effectively explore and represent architectural space and materials through modelling, rendering, and texturing.
6. Use BIM software to document and organise instructions for building assembly and for presentation of architectural ideas.

Subject Content

1. Investigation of Suburban Spatial and Architectural design scenarios
2. Building Information Modelling (BIM)
3. Sustainable design techniques and strategies
4. Organisation of architectural programs and material assemblies
5. Graphic visualisation and literacy
6. Composition of spatial and material forms

Special Requirements

Legislative pre-requisites

Construction Site Induction Safety “White Card” – must be obtained in Year 1 of the program.

ARCH 3005 Architecture Studio - The Infrastructural

Credit Points 20

Legacy Code 301202

Coordinator Rob Meyerson (https://directory.westernsydney.edu.au/search/name/Rob Meyerson/)

Description This subject situates learning in the context of the major urban public projects that sit at the intersection of architecture, infrastructure, and urban design and which highlight the pressure of population growth, climate change, or other significant demographic, economic, political, or ecological transformations. Work integrated learning is a key feature of the Rethinking Infrastructure studio which involve relevant members of the professional community to help lead studio investigations and/or embed students in professional practices. Projects include architectural responses to complex urban and infrastructural projects at a large scale such as transit oriented development, high density housing, landscape urbanism. Students develop professional practice skills on these real world projects and incorporate sustainable strategies of design as well as learning skills in advocacy, entrepreneurship, and professional readiness.

School Eng, Design & Built Env

Discipline Architecture

Student Contribution Band HECS Band 2 20cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) ARCH 3004 and ARCH 3003

Restrictions

Students must be enrolled in 3753 Bachelor of Architectural Design. Students not enrolled in 3753 who wish to enrol into this subject should have a 5.0 minimum GPA and are required to discuss with the Academic program Advisor.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse and evaluate cities and urban form, morphology, systems, ecologies, and interactivity between urban conditions, to inform design solutions that address scenarios of urban complexity and civic or infrastructural scale.
2. Apply an advanced level of theoretical and technical awareness in architectural and spatial design with an ability to explore and propose a variety of sensitive design solutions through the language of architectural representation in section, plan and models using both analogue and digital techniques.
3. Demonstrate an awareness of the broader cultural context in which architecture is practised, through the application of local and regional planning considerations and an understanding of the history and practice of urban design.
4. Understand and apply strategies for climatically responsive, equitable, humane, resilient, and robust design solutions for urban environments.
5. Generate technical and analytical drawings and reports using graphic and modelling skills to convey a design proposal.
6. Develop an awareness of the architect�fs professional, regulatory, and administrative roles, the business and entrepreneurial aspects of practice, and alternate roles of engagement.

Subject Content

1.Investigation of major public infrastructural projects and programs that influence urban and civic outcomes
2.Introduction to the professional architectural practice
3.Analysis of context and precedent to inform design decisions
4.Creative organisation of architectural programs and material assemblies in large-scale buildings or large-scale complex urban environments/scenarios
5.Graphic visualisation and literacy
6.The application of design technology to generate architectural solutions

Special Requirements

Legislative pre-requisites

Construction Site Induction Safety “White Card” – must be obtained in Year 1 of the program.

ARCH 3006 Urban Design

Credit Points 10

Legacy Code 102070

Coordinator Awais Piracha (https://directory.westernsydney.edu.au/search/name/Awais Piracha/)

Description The subject aims to provide students with an understanding of the nature, role and relevance of urban design. It will examine the issue of urban design at both the micro and macro scale. It also aims to promote awareness of, and sensitivity to, design considerations, and to enable students to critically evaluate urban spaces and places. A key feature of the course will be the development of the graphical communication skills of students.

Level Undergraduate Level 3 subject

Equivalent Subjects ARCH 3001 - An Introduction to Urban Design LGYA 1333 - Local Planning

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Understand the issues and concepts used by urban design professionals;
2. Develop design criteria and plans for public spaces;
3. Identify cultural heritage criteria in urban design, and address issues for appropriate protection and/or development of heritage;
4. Determine the environmental impacts of urban design, and address issues for appropriate environmental mitigation and/or enhancement;
5. Determine the social contexts of urban design, and address issues of social justice and community empowerment.

Subject Content

Urban utopias: garden cities to new urbanism
Importance of streetscape design and neighbourhood character
Topography, social context, history and design
The environmental impacts of urban design
Designing public realms: congregation and assembly
Designing boundaries: exclusive and inclusive design
Designing across the public / private binary
Designing transit spaces: assisting with flows and routes
Defensive spaces
Crime prevention through design

Legacy Code 301316

Coordinator Ursa Komac (https://directory.westernsydney.edu.au/search/name/Ursa Komac/)

Description This subject will introduce students to urban architecture with complex brief requirements, site conditions and technological considerations. Emphasis is on design resolution considering historical, geographical and social aspects. Experimentation at various theoretical levels is expected and students are encouraged to deliver ambitious and imaginative architectural responses.

School Eng, Design & Built Env

Discipline Architecture

Student Contribution Band HECS Band 2 20cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 4 subject

Restrictions

Students must be enrolled in 3753 Bachelor of Architectural Design or 3768 Postgraduate Bridging Program (Architecture). Students not enrolled in 3753 or 3768 who wish to enrol into this subject should have a 5.0 minimum GPA and are required to discuss with the Academic program Advisor.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Address a large scale urban and/or public building design project.
2. Demonstrate a comprehensive knowledge of the technical requirements informing a large scale project

3. Analyse and evaluate the links among context, city and architecture.
4. Demonstrate an advanced design proficiency at a conceptual and technical level.

Subject Content

1.Introduction to the professional architectural practice.
2.Analysis of context and precedent to inform design decisions.
3.Creative organisation of architectural programs and material assemblies in large-scale buildings or large-scale complex urban environments/scenarios.
4.Graphic visualisation and literacy.
5.The application of design technology to generate architectural solutions.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
1x Design Project	Drawings and/or Models; 3 minutes (presentation)	20	N	Individual
1x Major Design Project (Group) Presentation (Individual)	Drawings and Models; 3 minutes (presentation)	40	N	Both (Individual & Group)
Drawings, models and report	Drawings, models and 500 words (report)	20	N	Individual
Portfolio & Reflection	1,000 words, visual compendium	20	N	Individual

ARCH 4002 Energy Efficiency in Buildings

Credit Points 10

Coordinator Mohammad Reza Razavi (https://directory.westernsydney.edu.au/search/name/Mohammad Reza Razavi/)

Description This subject builds on students' basic knowledge of architecture, construction, and environmental science to introduce principles of architectural sustainability and building science. Students are involved in activities developing essential knowledge of a building's energy efficiency through the application of thermal, lighting, and acoustic design. This enables them to incorporate the construction strategies necessary to achieve indoor environmental quality and improve building users' comfort. The abilities that students develop in this subject will be appealing to organisations looking to expand optimisation and renewable energy strategies.

School Eng, Design & Built Env

Discipline Architecture

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) BLDG 1009
BLDG 1015

Equivalent Subjects CIVL 4003

Learning Outcomes

After successful completion of this Subject, students will be able to:

1. Evaluate the energy performance of the building envelope.
2. Assess appropriate environmental systems' integration for thermal, lighting, and acoustics comfort in architecture.
3. Determine basic parameters of heating, lighting and sound management in buildings using mathematical models.
4. Mitigate GHG emissions and improve human comfort through various passive design strategies in architecture.
5. Analyse geographical context for optimising IEQ-integrated architectural design considering the climatic elements.
6. Recommend renewable energy sources appropriate to a range of building types.

Subject Content

- Heat: Physics of heat, Thermal comfort, Climate, Buildings' thermal behaviour, Thermal design
- Light: Physics of light, Daylight and sunlight, Electric lighting, Lighting design
- Sound: Physics of sound, Noise control, Acoustic design
- Passive design strategies: heating, cooling, ventilation, and daylighting design
- Renewable energies in buildings and architecture

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Essay	1500 words plus diagrams	40	N	Individual
Case Study	2000 words plus diagrams, photos, and drawings	20	N	Group
Final Exam	2 hours	40	N	Individual

ARCH 5001 Urban Architecture Project

Coordinator Michael Chapman (https://directory.westernsydney.edu.au/search/name/Michael Chapman/)

Description This subject will introduce students to urban architecture within complex contextual environments, site conditions and technological considerations. Emphasis is on the consideration of contextual, historical, geographical and social aspects. Students will be expected to apply various theoretical levels in the delivery of ambitious and imaginative urban architectural responses. This subject will provide students with a variety of opportunities to undertake a specific project in urban architecture which will prepare them for working in professional settings. Some of the well regarded opportunities that students may be eligible to participate in include the Urban Transformation Summer School and the Sydney Opera House BUILD Program.

Students must be enrolled in 3753 Bachelor of Architectural Design and having completed 160 credit points or 3761 Master of Architecture (Urban Transformation). Students not enrolled in 3753 or 3761 who wish to enroll into this subject should have a 5.0 minimum GPA and are required to discuss with the Academic program Advisor.

Learning Outcomes

After successful completion of this Subject, students will be able to:

1.Evaluate the links among context, city and architecture in the formulation of a design response to an urban and/or public project.
2.Synthesise comprehensive knowledge of the technical requirements informing a large scale project.
3.Demonstrate advanced design proficiency at a conceptual and technical level that informs the production of ambitious and imaginative urban architectural responses.
4.Present project outcomes to a diverse audience to justify design outcomes, using appropriate media, processes and strategies.

Subject Content

•Analysis of context and precedent to inform design decisions.
•Creative approaches to large-scale buildings and/or large-scale complex urban environments / scenarios.
•Graphic visualisation and literacy.
•The application of design to generate urban and architectural solutions.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

ARCH 6001 Urban Transformation Research Project

Coordinator Greg Morrison (https://directory.westernsydney.edu.au/search/name/Greg Morrison/)

Description An essential skill required by researchers is the ability to propose research, justify it in a persuasive manner, and undertake a project with rigor. Through interactive workshops, Urban Transformation Research Project helps students develop and refine a research proposal. The subject provides students will the opportunity to conduct either (a) a traditional written thesis or (b) a project based design research project. There is no class work, rather, students work individually alongside a supervisor with significant expertise in the area of researching and developing their individual project. After successful completion of this subject, students will have demonstrated an ability to design, justify, and undertake a research project in their discipline which will benefit them in their future careers.

School Eng, Design & Built Env

Discipline Architecture

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 6 subject

Restrictions

Students must be enrolled in the Master of Architecture (Urban Transformation)

Learning Outcomes

After successful completion of this Subject, students will be able to:

1. Develop a range of relevant research findings around a project theme, based on selected literature, precedent design examples, and project context.
2. Devise a self-directed brief that responds to an identified issue or area of interest.
3. Demonstrate skills in the ethical conduct of research, the justification of the research, and the definition of the contribution to new knowledge and/or innovation.
4. Produce research outcomes that demonstrate an understanding of relevant professional contexts.
5. Employ independent learning and project management skills to undertake and meet research or project requirements.
6. Present research findings and outcomes to a diverse audience using appropriate media, processes and strategies.

Subject Content

- Research process (includes literature review, proposal, methodology etc)
- Design techniques and research
- Ethics in research
- Exegesis in architecture
- Presentation techniques

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Proposal	6 pages	30	N	Individual
Report	1000 words exegesis plus creative work or 3000 words thesis	50	N	Individual
Presentation	30 minutes	20	N	Individual

ARCH 7001 Developing Sustainable Places

Credit Points 10

Legacy Code 101636

Coordinator Louise Crabtree-Hayes (https://directory.westernsydney.edu.au/search/name/Louise Crabtree-Hayes/)

Description This subject provides an understanding of environmental, economic and social issues arising from the effects of urban development within city regions and examines the relationship between sustainable development and metropolitan planning in the Australian and global context. It focuses on the concepts related to sustainability, sustainable development and sustainable cities. It also looks into recent initiatives towards the realisation of sustainable cities.

School Social Sciences

Discipline Urban Design and Regional Planning

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 1340 - Land Use Strategy Design LGYA 1294 - Urban Challenges Developing Sustainable Places

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the multiple dimensions and concerns of urban and regional planning and design (i.e. social, economic, environmental and cultural) that contribute to the sustainable development of places.
2. Examine the implications of contemporary global trends and emerging issues to the sustainability of places.
3. Demonstrate capacity to engage meaningfully and ethically with diverse groups and stakeholders in the planning processes.
4. Justify a planning approach using relevant data that you have assembled and analysed, that aims to address and/or manage an issue relating to the development of sustainable places.

Subject Content

Regenerative and leading practice
Planning for and with nature.
Sustainability indicators.

Active destinations and placemaking
Planning for alternative transport modes
Planning for active living
Planning for and with diverse communities
Sustainable, diverse, and affordable housing
Land use planning and urban amenity
Climate change planning, adaptation, and equity
Healthy cities, healthy planet

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

ARCH 7002 Heritage and Planning

Credit Points 10

Legacy Code 102069

Coordinator Anna Leditschke (https://directory.westernsydney.edu.au/search/name/Anna Leditschke/)

Description This subject explores the values behind, and practicalities regarding, heritage and planning, from federal and state perspectives in Australia. With a specific focus on Sydney, the subject explores how planning applications, within the urban development sphere, impact upon heritage assets, and how these impacts are mitigated through heritage planning legislation. The subject asks students to step into the shoes of heritage planning professionals and to identify and research a heritage asset that is to be impacted by a potential planning proposal and then to design an appropriate mitigation response within the bounds of relevant heritage legislation.

School Social Sciences

Discipline Architecture and Urban Environment, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects ARCH 3001 - Introduction to Urban Design

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Summarise different conceptions of heritage.
2. Analyse the values that state and local government authorities and local communities place on heritage.
3. Apply heritage legislation to real world planning issues.
4. Access heritage planning research resources and apply these to authentic planning issues
5. Construct an appropriate mitigation response to heritage planning issues.
6. Critically evaluate the heritage planning process.

Subject Content

What is heritage? The sociological approach.
Why and how do governments and communities value heritage?
Federal and state heritage legislation as it relates to planning.
The role of local government.
Identifying and process of listing significance of a site.
The extant heritage planning recourses in NSW and how to access them.
The heritage planning mitigation process.
Indigenous heritage and planning issues.
Identifying heritage assets and planning impacts and designing an appropriate response case study.
The adaptive reuse of heritage for tourism.
Comparative heritage planning.
Problematizing heritage planning. Critiquing the heritage planning discourse.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Critical Review	1,200 words	30	N	Individual
Case Study	Report: 1,000 words (only the report is graded). Group Presentation: 5 minutes	30	N	Individual
Report	1,500 words	40	N	Individual

ARCH 7003 Managing Cities: History and Theory

Credit Points 10

Legacy Code 101633

Coordinator Cameron Mcauliffe (https://directory.westernsydney.edu.au/search/name/Cameron Mcauliffe/)

Description This subject concerns philosophical thought and critical thinking in public planning. It develops an understanding of planning theories and examines past and present trends in this area. It reviews the theoretical frameworks for an insight into planning processes and analyses the economic, spatial and socio-political dimensions of activities involved.

School Social Sciences

Discipline Architecture and Urban Environment, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 1293 - Metropolitan Structures Cities in Transformation

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Assess and create a collaborative explanation of the historic development of urban and regional planning.
2. Critically apply and relate understandings of planning histories and theories to contemporary planning.
3. Combine knowledge of planning histories and theories to explain how the role of the planner and planning practices have changed.

Subject Content

Historical overview of planning as a profession
History of urban planning of pre-industrial cities
Nineteenth century slums and the Garden City movement
The modern and the post-modern city
History of evolution of modes of transport, city form and suburbanization
The typologies of planning theory
Systems and rational theories of planning
Marxism and critical theory
Planning under neo-liberalism
Advocacy Planning
Post-modern theories
Post-colonial theories of planning
Collaborative planning

Assessment

ARCH 7004 Planning and Development Control

Credit Points 10

Legacy Code 300708

Coordinator Sameera Wijesiri Pathirana (https://directory.westernsydney.edu.au/search/name/Sameera Wijesiri Pathirana/)

Description This subject describes the general planning issues relevant to developments in rural and urban areas. The content covers the factors important in determining the allocation and use of land and resources together with the contributions of development to the built and natural environment. Topics include: urban and rural design issues; the impact of the 3 tiers of Government process on development control, and the legal, political and technical issues relevant to impact assessments. Particular attention will be paid to the role of the private sector in developing controls, self-regulation and appeal processes. Planning in both the micro and macro environments is examined in the context of sustainability, indigenous culture and heritage, private land conservation, community resources and its strategic effects on the recycling of existing land and non-renewable natural resources.

Level Postgraduate Coursework Level 7 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and explain the conceptual planning issues and relevant State legislation;

2. Compare the requirements for and explain the differences between the various layers of planning as they relate to federal, state and local governments;
3. Review the political, social and physical influences that shape towns and cities and reflect on the role of the community and the courts in influencing development outcomes;
4. Discuss the concepts of environmental capacity, sustainability and the preservation of the natural and built environment and identify constraints to development;
5. Develop various responses for planning urban and rural developments;
6. Analyse the links between development and environmental impacts and identify mechanisms to limit those impacts in planning for safe and cost effective developments.

Subject Content

1. Conceptual planning issues and constraints;
2. Development control and its place in society;
3. Planning hierarchies and planning instruments (planning legislation);
4. Achieving planning objectives;
5. Exempt and complying development;
6. Sustainability and environmental impact;
7. Planning and the management of natural environments;
8. Planning and heritage conservation;
9. Rural development and coastal development;
10. Community consultation;
11. The role of the courts;
12. Planning and the future.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Short Answer	250 words max for each question (500 total)	20	N	Individual
Report	500 words max	20	N	Individual

ARCH 7005 Urban Management Practice: Governance and Power in the City

Credit Points 10

Legacy Code 101314

Coordinator Anna Leditschke (https://directory.westernsydney.edu.au/search/name/Anna Leditschke/)

Description Governance is a central but often overlooked issue in Urban Management. What is governance? What are the principles of good governance? What are some of the governance challenges in major metropolitan cities that cover multiple jurisdictions? How do statutory local governments engage with specialist state agencies in fields such as economic development, environmental planning, and infrastructure planning? This subject answers these questions, reviews governance practices in major cities across the world and provides students with knowledge of key governance tools. Students will prepare a research report dealing with a significant urban governance challenge, and provide recommendations about how to implement solutions to that challenge. The central objective of the course is to provide students with a sound framework and set of tools with which to address governance issues.

ARCH 7006 Urban Planning Placement Project

Credit Points 10

Legacy Code 102604

Coordinator Andrew Gorman-Murray (https://directory.westernsydney.edu.au/search/name/Andrew Gorman-Murray/)

Description This Urban Planning Placement Project subject provides Master of Urban Management and Planning and Master of Planning students with an understanding of the planning/urban management workplace. Students are placed with local planning or urban management employers to work on a variety of planning tasks. Placements are structured for student engagement in professional work in planning. Placement agencies ensure that students are supervised by experienced planners, are mentored through site visits and work on planning projects in a professional capacity. Agreements with supervisors and clear communication lines are set to clarify student engagement and their involvement in meaningful professional tasks that contribute to an authentic learning experience, rather than simply unpaid or irrelevant labour.

School Social Sciences

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 1297 - Urban Management Placement Project LGYC 4646 - Urban Management Placement Project

Restrictions

Students must be enrolled in 1873 Master of Urban Management and Planning or 1712 Master of Planning.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Appreciate the role and function of the relevant employers in the NSW Planning/Urban Management system through engagement in professional planning work.
2. Understand the role of planners/urban managers through interactions with and supervision from experienced planners in the workplace.
3. Critically reflect on the learning they have gained in their workplace in demonstration of the links between theoretical knowledge of the discipline and its practical application.
4. Demonstrate the planning skills and knowledge acquired in their academic training in consideration of the ethical dimensions, issues and relevant guidelines when working in a professional context.

Subject Content

1. An introduction to work based learning, as part of a professional practice-oriented course that delivers advanced knowledge and practical skills applicable in the urban management and planning profession.
2. Compilation of a detailed professional reflective journal for the production of a critical reflective report
3. Interview skills, and building a professional relationship with a prospective employer
4. Seventy hours of professional work placement.
5. Mid placement seminar and journal review

Assessment

ARCH 7007 Advanced Design Communication

Credit Points 10

Legacy Code 301239

Coordinator Aso Haji Rasouli (https://directory.westernsydney.edu.au/search/name/Aso Haji Rasouli/)

Description Advanced Design Communication is a core architecture seminar in the Master of Architecture (Urban Transformation) program that will explore contemporary methods of design generation and visualisation, representation techniques, and collaboration tools, including but not limited to digital fabrication, computational and algorithmic design, simulation, virtual and augmented reality, building information modelling, parametric design, and scripting. Students will undertake case studies from the community of practice and precedents in this disciplinary domain, including an investigation of how emerging technologies are used in existing professional settings locally and internationally. Students will develop their own design-based enquiry to apply knowledge and skills acquired in the seminar that result in a project and report of their work.

School Eng, Design & Built Env

Discipline Architecture

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 3761 Master of Architecture (Urban Transformation)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Use digital tools and workflows from computation to fabrication as a way to conceive, test, and propose architectural and construction projects.
2. Evaluate and propose the use of computational techniques that enable specific and contingent outcomes of each project scenario.
3. Explore and apply ordering, sequencing and modelling of three-dimensional form and spatial content.
4. Apply manual and digital graphic techniques and modelling to describe three- dimensional form and spatial relationships.
5. Draw upon the history and theory of digital techniques in architectural design and representation.

Subject Content

1. Contemporary trends and emerging design communication technologies
2. Digital fabrication and design for manufacture
3. Building information modelling
4. Visualisation, simulation, rendering, virtual reality and augmented reality
5. Digital collaboration technologies and impacts upon professional/industry delivery strategies and enterprises

Assessment

ARCH 7008 Integrated Building Technology

Credit Points 10

Legacy Code 301240

Coordinator Mohammad Reza Razavi (https://directory.westernsydney.edu.au/search/name/Mohammad Reza Razavi/)

Description Integrated Building Technology is a core subject in the Master of Architecture (Urban Transformation) course that will introduce students to the range of specialist consultants in structural and civil engineering, mechanical, electrical, communications, and transport systems, fire safety and egress, and environmental systems (acoustics, lighting, thermal) that are required to complete real projects in practice. Students gain an insight into the principles and concepts of each discipline which provides sufficient depth of knowledge and understanding of the role of the architect to meaningfully engage and collaborate with the allied specialists. Understanding how to communicate and document the integration and coordination of systems in a building is developed through exposure to case studies, specialist presentations, and field trips. Students apply concepts introduced in the subject to the design studio project they are concurrently developing in subject Practice Research Studio Housing and demonstrate their understanding of system integration through graphic representation techniques and a design report.

School Eng, Design & Built Env

Discipline Architecture

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 3761 Master of Architecture (Urban Transformation)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate the integration of relevant building systems appropriate to the design intent and goals of a building project.
2. Use digital and manual techniques to design, communicate and collaborate in the integration of specialist building systems.
3. Integrate construction, structural and civil engineering principles in the design and documentation of a building.
4. Integrate mechanical, electrical, communication, and transport system principles in the design and documentation of a building.
5. Integrate fire safety, suppression, and egress principles in the design and documentation of a building.
6. Propose designs incorporating environmental systems, principles of acoustics, daylighting and thermal conditions relevant to project.
7. Recommend appropriate materials for the project design with regards to selected finishes, fittings components and systems.

Subject Content

1. Building systems and specialist consultant teams required to delivery building projects
2. Communication, collaboration, documentation, and detailing tools and techniques to enable the work of a project team and integration into a building design
3. Structural and civil engineering principles for buildings
4. Mechanical, electrical, communication, transport principles buildings

5. Design principles for fire safety, suppression, and egress
6. Environmental systems and principles of acoustic, daylighting, and thermal design
7. Graphic representation and written communication of systems integration

Special Requirements

Legislative pre-requisites

Construction site safety induction “White Card” – to be obtained in Semester 1 of the program or prior.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Case Study	Drawings and/or models and 300 words	25	N	Group
Applied Project	Drawings and/or models	50	N	Individual
Report	1000 words and graphic compilation and 3 minutes presentation	25	N	Individual

ARCH 7014 Health, Wellbeing and Place

Credit Points 10

Legacy Code 102769

Coordinator Stephen Healy (https://directory.westernsydney.edu.au/search/name/Stephen Healy/)

Description Planning for health and wellbeing is essential for ensuring human flourishing in our cities and regions. This subject investigates geographies of health, wellbeing and place through analysis of physical, mental and environmental health and spaces of wellbeing. Drawing on insights from geography, planning and related disciplines it asks how built environment professionals can create healthy futures through place making. Through local, national and international case studies the subject will explore how cities can be better designed to counter growing lifestyle epidemics, motivate active living and respond to the opportunities of population ageing and challenges of environmental change.

School Social Sciences

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain key health and wellbeing priorities facing planners nationally and internationally.
2. Identify relevant planning legislation and guidelines pertaining to health, wellbeing and place.
3. Identify and critically explain planning responses to health and wellbeing needs nationally and internationally.
4. Critically evaluate place-based responses to health and wellbeing in an Australian case study.

Subject Content

Physical health in the built environment
Environmental health and environmental justice
Planning for mental health
Spaces of Wellbeing
Geographies of disability
Geographies of ageing and dementia
Universal design
Planning for active cities
Therapeutic spaces

Assessment

ARCH 7015 Urban Transformation Studio Environments

Credit Points 20

Legacy Code 301382

Coordinator Aso Haji Rasouli (https://directory.westernsydney.edu.au/search/name/Aso Haji Rasouli/)

Description Urban Transformation Studio Environments focuses on the research and design aspects of a complex architectural project. It aims to teach students strategies to address crucial topics like whole life carbon, resilience, climate change, and environmental sustainability, emphasising the pivotal role of architects in tackling these issues. Through immersive studio work, students will gain insight into contemporary architectural practices and contemporary precedents, while actively collaborating with an extensive network of professionals, stakeholders, and site conditions. Students will be expected to apply knowledge of strategies and precedents to develop high-quality architectural projects, emphasising spatial, experiential, and technical excellence, alongside a robust understanding of key environmental issues.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects ENGR2025

Restrictions

Students must be enrolled in 3761 Master of Architecture (Urban Transformation)

Learning Outcomes

On successful completion of this subject, students should be able to:

1.Analyse complex projects incorporating diverse approaches to whole life carbon, resilience, climate change and environmental sustainability.
2.Implement a reflective and creative design process to engage with environmental issues including whole life carbon, resilience, climate change and environmental sustainability in architecture.
3.Effectively communicate design concepts and research at a professional manner to diverse audiences.
4.Create design options that address the aesthetic, functional, contextual and technical aspects of an architectural project and its site using graphic, three-dimensional modelling and visualisation techniques.
5.Propose appropriate design, materials, components and systems for the specific context that support a holistic and low carbon architectural approach.

Subject Content

1. Complex environmental issues involved in architecture and urban transformation contexts.
2. Skills in architectural design and creative imagination to develop a conceptual approach to environmental issues and climate-resilience.
3. Strategies for reducing carbon emissions and footprint through a project's lifecycle as demonstrated through global architectural and urban precedents.
4. Independent research, analysis, data and evidence to inform design decisions regarding operational and embodied carbon, lifecycle, climate resilience and other environmental factors.
5. Approaches to design technology, materials, site and contextual constraints to create and communicate a rigorous and architectural design proposal.
6. Analysis of the regulatory, social and ethical frameworks that architects operate within.

Special Requirements

Essential equipment

Laptop with required software, per program requirements. Students are required to purchase consumables such as paper, card, plastic, plywood, adhesives, blades, and other essential materials for assessment tasks. Students will also need to pay for their own plotting and printing costs.

Assessment

ARCH 7016 Practice Research Studio Housing

Credit Points 20

Legacy Code 301383

Coordinator Angelo Korsanos (https://directory.westernsydney.edu.au/search/name/Angelo Korsanos/)

Description Practice Research Studio Housing shall focus upon the research and design of a comprehensive architectural project over the duration of the semester through either a civic, residential, or hybrid project type (as distinct from Practice Research Studio Civic in the preceding semester). Students will explore topics related to the umbrella of urban transformation and to contemporary architectural practices through the studio work, and will engage with a broad community of professionals, stakeholders, and programmatic situations. Projects shall be representative of the often-contested intersection of competing interests of the urban environment, where the designer must conduct rigorous analysis and research to inform high-quality design outcomes that are attendant to social, ethical, regulatory, technical, procurement, and environmental issues. Students will undertake projects that involve international sites, project contexts, programs, or collaborations. Students are expected to develop project work to a high degree of resolution in terms of spatial and experiential quality, demonstrating through clear communication and representation techniques the technical proficiency, conceptual rigour, and theoretical and historical knowledge that support the project outcomes. Projects in the studio will vary in scale, setting, building type, and complexity from year to year, with a thematic emphasis that contributes to the overall research direction of the architecture program

at WSU. Students will be expected to engage in the studio with a high degree of individual motivation, resourcefulness, and inquisitiveness as would be expected of professional level studies.

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) ARCH 7008

Restrictions

Students must be enrolled in 3761 Master of Architecture (Urban Transformation)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse and communicate the diverse interests and factors which inform a design project, including client requirements and objectives, physical site characteristics, regulatory frameworks, social and cultural context, and the surrounding environment.
2. Implement a reflective and iterative design process guided by ethical research and evaluated against project criteria and context.
3. Develop a response to a design project which is informed by historical, theoretical, and disciplinary knowledge and awareness, articulated through written and graphic presentation.
4. Create design options that address the aesthetic, functional, contextual and technical aspects of a mixed use housing project at a professional level.
5. Propose appropriate materials, components and systems for the specific context that support a holistic project

Subject Content

1. Complex programmatic project brief and building type in an urban transformation context
2. Developing strategic frameworks, engaging multiple stakeholders, and using a design-synthesis approach
3. Research, analysis, and theory to inform design speculation and propositions
4. Emphasis upon integration of building services, structural engineering, transport, fire safety and egress, and environmental systems into the project design
5. Application of skills in architectural detailing and documentation toward implications for procurement and construction
6. Attendance to issues of environmental sustainability, regulation, social, ethical, and disciplinary concern

Special Requirements

Legislative pre-requisites

Construction Site Induction Safety “White Card”.

Assessment

ARCH 7017 Urban Transformation Studio Indigenous

Credit Points 20

Legacy Code 301398

Coordinator Rob Meyerson (https://directory.westernsydney.edu.au/search/name/Rob Meyerson/)

Description Urban Transformation Studio Indigenous introduces students to concepts and processes relating to project planning, working with country and perspectives of Aboriginal and Torres Strait Islander communities, consulting with First Nations groups, engaging with Indigenous knowledge in the Australian context and working collaboratively with stakeholders to understand site, brief and budget requirements from multiple perspectives. The studio will engage with a real-world design project supported by First Nations consultation and expert mentoring giving students opportunities to implement aspects of Indigenous knowledge in their design process, project development, feasibility and design outcome. Students will gain skills in project development that includes intensive site analyses, the evaluation of multiple design options, designing the program through consultation and then implementing approaches with stakeholder feedback to satisfy the site and spatial requirements of the community. Students will learn about existing forms of knowledge and cultural histories in regard to site, as well as the ethical and cultural tools to engage with meaningful and appropriate consultation and co-design for major public projects. Through the design process, students will apply creative imagination, an understanding of design precedents, emergent knowledge, and skills in critical evaluation to create a detailed proposal for the given site and its community.

ARCH 7016
AND
HUMN 4001

Equivalent Subjects ARCH 7011- Urban Transformation Thesis Studio 1

Restrictions

Students must be enrolled in 3761 Master of Architecture (Urban Transformation)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an awareness of the knowledge, worldviews and perspectives of Aboriginal and Torres Strait Islander Peoples in regard to engagement processes and co-design of a public building and its site.
2. Undertake a detailed site analysis with an awareness of context, working with country, indigenous forms of knowledge and cultural histories in the architectural design process.
3. Participate in collaborative processes and co-design principles, incorporating First Nations knowledge, to formulate a programmatic project brief for a public building.
4. Establish a collaborative framework and design process by engaging diverse stakeholders and implementing clear communication protocols.

5. Apply non-hierarchical systems of thinking and co-design practices to showcase an integrated, well-researched, and culturally responsible approach to a complex design problem.
6. Undertake independent research, precedent analysis and critical thinking to communicate a comprehensive design proposal to diverse audiences, while responding to various challenges

Subject Content

1. Complex programmatic project brief and building type in an urban transformation context and taking into account Indigenous notions of caring for Country.
2. Developing strategic frameworks, engaging multiple stakeholders, including Indigenous community representatives, and using a collaborative approach to design development.
3. Conduct independent research, including Indigenous Knowledges, analysis, and theory to inform design speculation and propositions
4. Attendance to issues of environmental sustainability, caring for Country, regulation, construction, technology, procurement, social, ethical, and disciplinary concern
5. Reflective and research-driven writing to develop an area of specific individual enquiry

Special Requirements

Legislative pre-requisites

Construction Site Induction Safety (White Card) must be obtained in Semester 1 of program (or prior).

Essential equipment

Laptop with required software, per program 3761 requirements. Students are required to purchase consumables such as paper, card, plastic, plywood, adhesives, blades, and other essential materials for assessment tasks. Students will also need to pay for their own plotting and printing costs.

ARCH 7018 Architectural Professional Practice

Credit Points 10

Legacy Code 301404

Coordinator Angelo Korsanos (https://directory.westernsydney.edu.au/search/name/Angelo Korsanos/)

Description This subject introduces students to the expectations and the requirements that are needed for a professional practice in Architecture. As such students will require to critically examine a broad range of real life professional, legal, business and ethical challenges that are likely to face in practice and apply critical thinking in order to resolve these problems. The intention here is to assist students in navigating through complex real life challenges and to bring a common sense and real world approach to solving a problem. Transitioning from university to the workplace can be quite daunting thus, the aim here is to allow students to gain the knowledge and skills to make informed decisions but most importantly to build confidence in themselves as they move forward with their career.

Restrictions

Students must be enrolled in 3761 Master of Architecture (Urban Transformation)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate the competencies and performance criteria required by the NSW Board of Architects and the Australian Institute of Architects (AIA).
2. Critique the implication of the Architects f Professional Code of Conduct.
3. Critique the implication of the Client Architect agreement as it relates to contract law.
4. Demonstrate professional ethics on building procurement choices and tendering processes.
5. Critique the implication of the agent role of the architect.
6. Apply the architect fs duty of care in providing architectural services.
7. Articulate the processes required to operate a small business enterprise as it relates to trade practice.
8. Examine the process of architectural practice through the design, approvals, documentation and contract administration stages.

Subject Content

1. Roles of the architect
2. Ethics and professional conduct, the Architects Code of Conduct
3. The process of architectural practice
4. Client architect agreements
5. Running a business
6. Marketing and financials
7. Entrepreneurship and pitching for work
8. Construction contracts

ARCH 7019 Urban Transformation Studio Global

Credit Points 20

Legacy Code 301400

Coordinator Ursa Komac (https://directory.westernsydney.edu.au/search/name/Ursa Komac/)

Description In this high-level, project unit, students apply theory and practice to their urban transformation project relating to Greater Western Sydney region while being mentored in developing ethical and aesthetic judgement, creative imagination, independent and critical reasoning skills. Students learn to present a project design that is well resolved integrating spatial and experiential quality, contextual, cultural, social and environmental considerations, technical proficiency, and conceptual rigour. The design contributes to the students' portfolio of work demonstrating concept, resolution and presentation design skills leading towards ethical architectural practice as well as showcasing a civic project for Australia's greatest megatropolis.

Equivalent Subjects 301242 Urban Transformation Thesis Studio 2

Restrictions

Must be enrolled in 3761 Master of Architecture (Urban Transformation)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply critical thinking, independent judgement for an architectural design project which synthesises the complex range of architectural knowledge, diverse interests, requirements, and constraints within particular social, cultural and environment contexts.
2. Conduct design processes, investigations and reflections guided by research and evidence.
3. Communicate design options clearly and concisely in a timely manner in a range of formats (drawings, models, presentations) for diverse audiences (clients, stakeholders, team members).
4. Produce design options using contemporary three-dimensional modelling and visualisation technologies that demonstrate spatial design skills.
5. Integrate building, engineering, environmental structures and systems into a project solution.

6. Create a compelling and coherent design appropriate for the environmental/site context demonstrating ethical and aesthetic judgement, coherence and creativity.
7. Generate project outcomes that demonstrate an original contribution to architectural body of knowledge and practice, as well as critically reflective and ethical judgement.
8. Collaborate with others for expert advice and coordination of various project elements in developing knowledge for professional service.

Subject Content

1.Complex programmatic project brief and building type in an urban transformation context
2.Developing strategic frameworks, engaging multiple stakeholders, and using a design-synthesis approach to generate design solutions
3.Conduct independent research, analysis, and theory to inform design speculation and propositions
4.Effective integration of building services, structural engineering, transport, fire safety and egress, and environmental systems into a project design
5.Application of skills in architectural detailing and documentation toward implications for procurement and construction
6.Attendance to issues of environmental sustainability, regulation, social, ethical, and disciplinary concern
7.Reflective and research-driven writing to develop an area of specific individual enquiry

ARCH 7020 Cool Green Cities

Credit Points 10

Legacy Code 102853

Coordinator Sebastian Pfautsch (https://directory.westernsydney.edu.au/search/name/Sebastian Pfautsch/)

Description Climate change, urban expansion and densification result in hotter microclimates and loss of green infrastructure. The increasing frequency and severity of heatwaves, floods and droughts require changes to how we design and retrofit existing neighbourhoods and build new suburbs. Contemporary urban planning and design principles recognise blue and green infrastructure as a 'must have'. Blue and green infrastructure is key to building cool and resilient cities capable of functioning well within the social, environmental and economic challenges of the 21st century. This subject provides knowledge about what it takes to deliver cool green cities. Focusing on practical applications at precinct or suburb scale, it enables students to implement learned principles in their professional practice.

ARCH 7021 Architecture Studio Autumn Intensive

Credit Points 10

Coordinator Michael Chapman (https://directory.westernsydney.edu.au/search/name/Michael Chapman/)

Description This subject will introduce students to real world urban transformation design scenarios and clients in an intensive and site-based manner. Architecture Studio Autumn Intensive focusses on architectural interventions for complex urban scenarios, giving students exposure to issues of scale, spatial design, design detailing and fabrication. With a focus on small-scale buildable interventions, students will be expected to apply skills in design, brief development, user analysis, communication and collaboration in the context of complex urban environments. The subject provides students with an immersive multi-disciplinary design studio experience, introducing them to skills in conceptual thinking and developed design that can be applied to the design of urban interventions. Students will also be introduced to clients, users and consultants in an environment that will prepare them for working in professional architecture and design settings. In order to communicate their design to a range of audiences, students will learn skills in communication, architectural modelling and visualisation in the representation of design solutions for multiple audiences.

Coordinator Michael Chapman (https://directory.westernsydney.edu.au/search/name/Michael Chapman/)

Description This subject will introduce students to real world adaptive re-use design scenarios in an intensive and site-based manner. Architecture Studio Spring Intensive focuses on industrial or urban

heritage sites at a range of scales, giving students exposure to issues of recycling, whole life carbon and heritage preservation. As well as developing skills in research and site analysis, students will be expected to develop conceptual and developed design proposals for complex adaptive re-use scenarios with an understanding of the cycles of post-industrialisation. Working in immersive multi-disciplinary design teams, students will develop an awareness of the environmental, social and structural role that architectural heritage plays in urban transformation. Students will work across a range of complex architectural sites which are sometimes derelict, contaminated, heritage-protected or in need of renewal, to learn about the role of adaptive re-use in future architectural and climate scenarios. Students will also be introduced to regulations, clients and consultants in an environment that will prepare them for working in professional architecture and design settings. In order to communicate their design to a range of audiences, students will learn skills in communication, architectural modelling, documentation and visualisation in the representation of design solutions for multiple audiences.

School Eng, Design & Built Env

Discipline Architecture

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in:
•3753 Bachelor of Architectural Design and have completed 160 credit points or
•3761 Master of Architecture (Urban Transformation) or
•3730 Bachelor of Industrial Design and have completed 160 credit points and discuss with the Academic Program Advisor or
•3731 Bachelor of Industrial Design (Honours) and have completed 160 credit points and discuss with the Academic Program Advisor

Learning Outcomes

After successful completion of this subject, students will be able to:

1.Develop a conceptual design proposal that addresses a real-world design challenge in the context of adaptive re-use and heritage sites.
2.Create a detailed design solution that addresses a real-world design challenge in the context of adaptive re-use and heritage sites.
3.Collaborate effectively in multi-disciplinary teams for collective projects.
4.Present project outcomes to a diverse audience using skills in visualisation, writing, modelling and communication.

Subject Content

1.Conceptual design approaches to adaptive re-use strategies for real world heritage sites.
2.Developed design approaches to adaptive re-use strategies for real world heritage sites.
3.Strategies for heritage and renewal in complex post-industrial scenarios.
4.Graphic visualisation and communication skills.
5.Engagement with real world clients, sites, communities, multi-disciplinary teams and users.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Applied Project	One week intensive	40	N	Group/ Individual
Applied Project	One week intensive	40	N	Group/ Individual

BEHV 0001 Introduction to Human Behaviour (WSTC Prep)

Credit Points 10

Legacy Code 700220

Coordinator Paul Rouillon (https://directory.westernsydney.edu.au/search/name/Paul Rouillon/)

Description This subject provides students with an overview and evolution of psychology and conventional scientific techniques and methods to explain and understand the causes of human behaviour and human personality. It also assists students in the development of academic skills commensurate with tertiary studies. Topics to be studied at an introductory level include: the history of psychology, intelligence, social psychology, psychoanalytic theories, behaviourist/learning theories, cognitive theories, biological view, developmental psychology and abnormal psychology.

School Western Sydney The College

Discipline Behavioural Science

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 0 Preparatory subject

Equivalent Subjects BEHV 0002 - Introduction to Human Behaviour (UWSC)

Restrictions

Students must be enrolled at Western Sydney University, The College.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Distinguish key characteristics of major theories and concepts of human behaviour.
2. Identify the influence of individual differences and of environmental context on behaviour.
3. Review academic sources related to the field of human behaviour for structure and topic focus.
4. Develop an argument in written form and apply appropriate referencing conventions.

Subject Content

1. History of psychology, its ancient roots and evolution as a scientific discipline.
2. Scientific principles of psychology
3. Applied psychology.
4. Theories of intelligence.
5. Psychoanalytic perspective
6. Cognitive perspective
7. Biological perspective
8. Social psychology.
9. Developmental psychology.
10. Abnormal psychology as part of the major perspectives
11. Humanistic perspective

Assessment

BEHV 0008 Psychological Foundations of Health (WSTC)

Credit Points 10

Legacy Code 900123

Coordinator Ryan Sidoti (https://directory.westernsydney.edu.au/search/name/Ryan Sidoti/)

Description This subject provides an introduction to the psychology of health and behaviour relevant to understanding patient health decisions and outcomes. Students will be introduced to psychology and health to understand the tradition and relevance of psychology to nursing. This subject also includes foundation topics such as models of health and illness, health-behaviour change models, risk-taking behaviour, stress and health, learning and conditioning, personality and health, human development over the lifespan, death and dying, as well as group dynamics in health. These topics are offered as basic principles, theories, and models of psychology related to health behaviours, future learning, and professional practice in nursing.

School Western Sydney The College

Discipline Psychology

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 0 Preparatory subject

Restrictions

This subject is only available to College students enrolled in the Undergraduate Preparation Programs.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply basic terminology, principles, theories, and models of psychology to account for health decisions and behaviours.
2. Reflect on personal health decisions and behaviour and relate this to psychological principles introduced in this unit.
3. Demonstrate a foundational understanding of individual and group differences and the impact of these when working with people from diverse backgrounds.
4. Effectively present thoughtful, considered views, arguments and information in written and oral formats, and
5. Apply group dynamics principles for effective team work and group management, along with the ability to monitor oneðfs own work and othersðf work and performance.

Subject Content

Introduction to psychology and health
Models of health and illness
Health-behaviour change models
Risk-taking behaviours
Stress and health
Learning and conditioning
Personality and health
Human development
Death and dying
Group dynamics in health

BEHV 1001 Behaviour and Environment

Credit Points 10

Legacy Code 101182

Coordinator David Arness (https://directory.westernsydney.edu.au/search/name/David Arness/)

Description This is a fully online subject. Everything we do depends on our environment, but rarely do we ask the question "what is the environment?" In this subject, we examine our various environments, the natural world, our built physical spaces and things, and the social, biological, and psychological domains. We then examine questions of: How do we interact with these environments, and how do they shape and influence our behaviour? How does understanding this interaction help us improve the human condition, while also maintaining the integrity of the environment? Drawing from psychology to understand human behaviour, the subject has application to as many discipline areas as there are spheres of human activity.

School Psychology

Discipline Behavioural Science

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply key concepts related to the human-environment relationship.
2. Apply/integrate principles of psychology and the broader social sciences to interpret/explain aspects of the human-environment relationship.
3. Evaluate real-world situations to articulate problems of behaviour-environment interaction.
4. Construct/develop evidence-based arguments for change, drawing on subject content and scholarly research.
5. Propose solutions to problems of behaviour-environment interaction, justifying your decisions based on scholarly research evidence.
6. Apply knowledge and skills gained from the subject to enhance better person-environment fit in a variety of design contexts.

Subject Content

Scene Setting:
1. Subject Introduction: What is the Environment?
2. Consciousness, Brain Processes and Culture
3. Sense of Place and Attachment

Natural Environments
4. The Natural Environment
5. Environment Stressors
6. Restorative Environments

Built Environments
7. Navigating the Environment: Wayfinding and Cognitive Mapping
8. Person/Environment Fit
9. Design of Usable Spaces
10. Future Environments

Social Environments
11. The First People and the Environment
12. Social Environments Across the Lifespan
13. Social Shifts: Smartphones, Social Media, and Pandemics

BEHV 1003 Introduction to Research Methods

Credit Points 10

Legacy Code 101190

Coordinator Emma Walter (https://directory.westernsydney.edu.au/search/name/Emma Walter/)

Description This subject covers the conceptual underpinnings of research in psychology, including methodologies such as experimental, quasi-experimental, non-experimental and qualitative research. Conducting ethical research will be covered, including consideration of how research participants are positioned, issues related to research with diverse populations, as well research validity. Skills for writing research proposals and reports according to the conventions of the Publication Manual of the American Psychological Association (APA) are developed.

School Psychology

Discipline Behavioural Science, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Learning Outcomes

1. Define and explain basic terminology, logic and procedures used in qualitative and quantitative research (APAC Graduate Attribute *1.1i, 1.1xii, 1.3*)
2. Identify and apply appropriate criteria to evaluate research approaches and findings, including ethics and diversity considerations, including for Indigenous Australians (APAC GA *1.1xi, 1.1xii, 1.2, 1.3, 1.4*)
3. Select and explain appropriate research skills for problems under investigation in psychology (APAC GA *1.1xii, 1.3*)
4. Explain alignment of analytical procedures with research methods (APAC GA *1.1xii*)
5. Demonstrate the capacity to design basic research, individually and as part of a group (APAC GA *1.1xii, 1.5, 1.6*)
6. Demonstrate academic writing skills using the American Psychological Association (APA) structure and formatting conventions (APAC GA *1.3, 1.6*)

Subject Content

1. The scientific method and psychology: Why study research methods?
2. Epistemology and research paradigms: Constructivism, positivism, realism
3. Overview of qualitative, quantitative and mixed methods
4. Qualitative research I: Key approaches (e.g. grounded theory, phenomenology)
5. Qualitative research II: Qual research design and techniques in data analysis
6. Quantitative research I: Research hypotheses; IVs and DVs
7. Quantitative research II: Research design; experimental and correlational
8. Quantitative research III: Sampling and hypothesis testing
9. Quantitative research IV: Descriptive statistics; central tendency and variance
10. Research validity: Threats to internal and external validity, controlling extraneous variables
11. Research ethics and diverse populations

Assessment

BEHV 1009 Living, Learning and Working on the Web

Credit Points 10

Legacy Code 102502

Coordinator Benjamin Hanckel (https://directory.westernsydney.edu.au/search/name/Benjamin Hanckel/)

Description This subject prepares students for living, learning and working in a digital society. We examine how the web mediates behaviour, communication and culture in contemporary times. Students learn by participating and enterprising in online spaces as part of a supportive learning community. This subject also provides an important opportunity for students to develop a professional online web presence and identity that is relevant for their university studies, employability and the future of work.

School Social Sciences

Discipline Behavioural Science

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Equivalent Subjects HUMN 1064 Digital Identities

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Participate in online spaces with relevant communities and audiences
2. Interpret online behaviour, communication and participation using psychological and social theories
3. Identify ways in which the web shapes and influences everyday social practices
4. Curate a professional online web presence and identity
5. Design and produce digital content on contemporary social issues
6. Demonstrate an entrepreneurial approach to the dissemination and promotion of digital content

Subject Content

1. The participatory web for learning communities
2. The self online in networked publics
3. Knowledge creation, user generated content and storytelling practices
4. Digital inequalities - human rights, inclusion and citizenship
5. Ethical issues - privacy, surveillance, and safety
6. Influencing on the web - social change and digital activism
7. Researching social life using the social web and digital technologies
8. Digital entrepreneurship
9. Social media, employability and the future of work
10. Life long learning and the future of knowledge production

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Participation A - blog post based around the weekly themes or relevant topics of interest.	2 x 500 words	30	N	Individual
Participation B - Constructive comments on fellow students' blogs.	4 x 50	10	N	Individual
Applied Project	2000 words per group (4 students per group)	30	N	Group
Reflection	1000 words (or spoken equivalent)	30	N	Individual

BEHV 1010 Positive Psychology: The Science of Happiness, Resilience, and Wellbeing

Credit Points 10

Legacy Code 102606

Coordinator Samuel Arnold (https://directory.westernsydney.edu.au/search/name/Samuel Arnold/)

Description We live in an increasingly volatile, uncertain, complex, and ambiguous (VUCA) world which places greater emotional demands on people and organisations. This subject introduces the Positive

Psychology theory, research and the practical evidence-based techniques to enhance wellbeing and resilience in an increasingly VUCA world. Positive psychology is an emerging field of academic study and practical application in personal and work settings which focuses on the creation of individual resilience, strengths and virtues, creativity and other indicators of human flourishing. Throughout this subject, students will be encouraged to actively engage and apply the positive psychology concepts taught within the course and to critically reflect on these experiences to bring about personal change.

School Psychology

Discipline Behavioural Science

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the major themes in the nature and history of positive psychology.
2. Discuss the important role of positive psychology in varying contexts.
3. Outline the key theoretical concepts and major empirical findings in the domains of positive psychology covered in the subject: optimism, resilience, wellbeing, motivation, cognition and emotion.
4. Critically reflect on positive psychology theory and empirical research.
5. Summarise the application of techniques learned in positive psychology.
6. Demonstrate the capacity to implement empirically-driven strategies explored within the subject.

Subject Content

1. The Nature and History of Positive Psychology: Some of the questions we seek to answer are What is Positive Psychology? Where does Positive psychology fits into the history of psychology? Who should study/use positive psychology How Positive Psychology uses the Scientific Method?
2. Optimism and Resilience: What is the difference between irrational and realistic optimism? What is the evidence for optimism on various life outcomes? Can realistic optimism and resilience be learned? What are the different explanatory styles? How explanatory styles influence resilience? Are there practical ways to have a flexible explanatory style in preparation for a stressor (rather than just response)?
3. Happiness: What is happiness and can it be measured? What is going on in the brain? Is happiness state or trait based? What is the research on the dynamic pursuit of happiness? How can we increase happiness and positive emotions? Is there a benefit to increasing happiness other than just feeling good? Are there practical evidence-based techniques to increase happiness?
4. Character strengths: Focus on individual differences in personality and strengths of character. Is there a ?ehappy?f or ?esuccessful? f personality? Can we increase positive outcomes by first looking at individual strengths and individual weaknesses in performance/character?
5. Positive emotions and success outcomes. What is the relationship between positive emotions and many of life?fs success outcomes? Is this relationship causal? What are the theories that highlight this relationship? What practical evidence-based techniques can I bring into my daily life?
6. Meaning, purpose, and positive connections. What i

BEHV 1014 Psychology and Health

Credit Points 10

Legacy Code 101614

Coordinator Caroline Joyce (https://directory.westernsydney.edu.au/search/name/Caroline Joyce/)

Description This subject provides an introduction to the psychology of health, mental health, and health-related behaviour, as relevant to health science professions. Students will be introduced to the principles and applications of psychology and health behaviour, using a biopsychosocial framework. This will be followed by an examination of the psychological aspects of injury and illness and an introduction to psychological interventions related to health concerns. Emphasis is upon understanding health status and mental illness in light of relevant theory and research.

Level Undergraduate Level 1 subject

Equivalent Subjects BEHV 1006 - Introduction to the Psychology of Health BEHV 1015 - Psychology and Health (WSTC)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Define the basic principles, theories and methods of psychology as related to health behaviours.
2. Apply basic health psychology principles to issues of health and wellness.
3. Apply appropriate psychological research to the experience and management of health behaviours.
4. Identify the basic principles of a biopsychosocial approach to mental health and mental illness, including broad types of mental disorders.
5. Demonstrate introductory knowledge of clinical mental health by identifying the aetiology, maintaining factors, and treatment of selected mental disorders.
6. Articulate the roles of psychology and the broader health profession to health and wellbeing.

Subject Content

Psychology of health - Applying psychology to health
Models of health and illness
Health Behaviour - Factors that influence health behaviours - Models of health behaviour
Psychological interventions for health concerns - Models of intervention - Behaviour change methods - Cognitive and behavioural treatments
Psychology of the patient - Symptom perception and interpretation - Help seeking behaviour
Psychological aspects of injury and illness - Psychological antecedents and reactions to injury and illness - Psychological aspects of rehabilitation - Chronic illnesses and pain
Role of psychology in common health issues such as obesity and stress
Introduction to topics of mental health and mental illness - Clinical psychology - Main types of mental disorders

BEHV 1021 The Individual in Society

Credit Points 10

Legacy Code 101557

Coordinator Alex Baumann (https://directory.westernsydney.edu.au/search/name/Alex Baumann/)

Description This subject introduces the main theoretical perspectives for understanding the 'individual in society', including: humanistic, biological, cognitive, behavioural and socio-cultural explanations of individual behaviour. These perspectives are further understood through application of the 'levels of analysis' framework. The content then moves on to social psychology and covers topics such as: self and identity, attitudes and attitude change, conformity and obedience, prejudice and discrimination, aggression, pro-social behaviour and attraction and close relationships. Students explore the relevance of these topics to everyday life and contemporary issues.

Level Undergraduate Level 1 subject

Equivalent Subjects BEHV 1002 - Interpersonal Interaction BEHV 1006 - Introduction to the Psychology of Health BEHV 1023 - The Individual in Society

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the major perspectives in psychology and key social psychological theories and concepts;
2. Summarise levels of analysis and selected social psychological theories and concepts;
3. Apply key theories and concepts to everyday life and contemporary issues.

Subject Content

1. Major perspectives in psychology
2. Levels of analysis framework
3. Self and identity
4. Attitudes and attitude change
5. Prejudice and discrimination and inter-group behaviour
6. Social influence
7. Aggression and pro-social behaviour
8. Attraction and close relationships

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Reflection	800 words	25	N	Individual
Log/ Workbook	Approx. 200 words per tutorial for 5 tutorials (monitored in-class)	20	N	Individual
Reflection	2000 words	40	N	Individual
Quiz	10 weekly quizzes, approx. 1 hour	10	N	Individual
Participation	10 minutes	5	N	Individual

BEHV 1024 Applied Psychology

Credit Points 10

Legacy Code 102706

Coordinator Alana Weithaler (https://directory.westernsydney.edu.au/search/name/Alana Weithaler/)

Description Psychology is defined as the science of human behaviour and mental processes. Psychological theories aim to explain diverse aspects of everyday human experience and behaviour and are applied in diverse social, organisational and professional settings. In this subject, students explore key professional applications of psychological inquiry and how psychological research and theory can be used to analyse and applied to contemporary issues that influence individuals, groups and communities. Students are encouraged to evaluate the different ways psychological research is communicated.

Level Undergraduate Level 1 subject

Restrictions

There are no enrolment restrictions for this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Appraise applications of theory and concepts in psychology and psychological research as reported in different contexts.

2. Apply psychological knowledge and research to real-world problems and social issues across culturally diverse populations.

3. Apply appropriate evidence about mental health and interventions to effectively communicate psychological knowledge.

Subject Content

1. Introduction to Applied Psychology
2. Human-machine interaction 1: Virtual Reality
3. Human-machine interaction 2: Human-robot interaction
4. Human- machine interaction 3: Artificial Intelligence
5. Lifespan Psychology 1: Applications of infancy research into practice
6. Lifespan Psychology 2: Applications of child focused research into practice
7. Lifespan Psychology 3: Applications of adolescent focused research into practice
8. Lifespan Psychology 4: Practical applications of research into older adults
9. Psychological Wellbeing 1: Mental Health Literacy
10. Psychological Wellbeing 2: Community initiatives to improve mental health
11. Psychological Wellbeing 3: Suicide Prevention
12. Psychological Wellbeing 4: Disordered Eating and Body Image
13. Summary and Review

BEHV 1025 Usable Design

Credit Points 10

Legacy Code 102716

Coordinator Tuki Attuquayefio (https://directory.westernsydney.edu.au/search/name/Tuki Attuquayefio/)

Description This subject examines the psychological principles underlying users' experience of design. After introducing fundamental principles of human perception and cognition, we will explore the way these principles shape the experience of users when interacting with a designed product. The subject will also introduce the experimental approaches used to study perceptual and cognitive processes, focussing on critical evaluation of design principles and highlighting techniques relevant to user experience evaluation.

School Psychology

Discipline Behavioural Science, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate understanding of the principles of human visual perception and cognition relevant to user experience design.
2. Explain key experimental techniques used in perceptual and cognitive science.
3. Identify perceptual and cognitive principles relevant to the design of existing websites and applications.
4. Evaluate design utility based on perceptual and cognitive principles underlying user experience.
5. Write a design report, using APA style and formatting.

Subject Content

Introduction: This topic will introduce the design principles used in a range of design contexts. It will focus on ?escreen based?f design and touch on other areas of design.
Basic Visual Pe

BEHV 1026 Cyber Behaviour

Credit Points 10

Coordinator Farhad Ahamed (https://directory.westernsydney.edu.au/search/name/Farhad Ahamed/)

Description Cyber behaviour is an introductory subject addressing the intersection between humans and today's technologically driven world. This subject will introduce psychological theories about human behaviour, and how those theories predict our behaviours with and perceptions of technology. Topics will include basic understanding of the principles behind human behaviour such as classical conditioning and human cognition, and bridge the technological divide with topics such as cyberpsychology and human computer interaction. In cyber behaviour we will approach these topics with a focus on how they apply within industry and applications to cyber security.

School Social Sciences

Discipline Behavioural Science, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

BEHV 2002 Brain and Behaviour

Credit Points 10

Legacy Code 101684

Coordinator Andrew McKinnon (https://directory.westernsydney.edu.au/search/name/Andrew McKinnon/)

Description This subject provides an introduction to the biological and neuroscientific bases of human behaviour. Topics covered include the chemistry of life, the molecular basis of life, the cell and some of the major organ systems of the human body with particular reference to the nervous, endocrine and sensory systems. The subject has a significant laboratory component which reinforces lecture and text material. Students will be introduced to the biological and neuroscientific concepts necessary for a thorough understanding of areas of psychology such as abnormal psychology, cognitive processes, developmental psychology, human learning, and physiological psychology.

Equivalent Subjects LGYA 0972 - Neuroscience

Restrictions

Note that only students enrolled at WSU Online may register in the WSU Online subjects offered at that location.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Distinguish biological psychology as a scientific discipline and explain its major objectives (APAC Graduate Attributes 1.1i, 1.1viii, 1.1xii.)
2. Identify the major themes and perspectives of biological psychology (APAC GA 1.1i, 1.1viii, 1.3)
3. Describe the structure and function of the central and peripheral nervous system (APAC GA 1.1viii,1.3)
4. Individually and with peers, analyse the major theoretical and empirical perspectives associated with various brain processes and evaluate how these processes impact mental functioning and behaviour (APAC GA 1.1v, 1.1vii, 1.1xii, 1.3, 1.5)
5. Apply knowledge of biological psychology to explain a range of clinical conditions (APAC GA 1.1iv, 1.3)
6. Appraise the effectiveness of demonstrated theories and propositions in biological psychology by conducting a phased literature review responding to an associated hypothesis (APAC GA 1.1xii, 1.3, 1.6)

Subject Content

1. Nervous system 1
2. Nervous system 2
3. Neurotransmitters
4. Sensory systems
5. Movement

6. Learning and memory
7. Neuroplasticity
8. Emotion and stress
9. Hunger

BEHV 2005 Human Learning

Credit Points 10

Legacy Code 101676

Coordinator Nicole Traynor (https://directory.westernsydney.edu.au/search/name/Nicole Traynor/)

Description Human Learning is concerned with the experimental analysis of human and animal behaviour and focuses upon associative learning, including classical conditioning, operant conditioning, and social learning approaches. Definitions, assumptions, and basic phenomena associated with the study of learning are described and evaluated in terms of their ability to account for various aspects of human behaviour and experience. The practical work highlights important concepts introduced in the lecture program and focuses upon practical techniques of use in everyday situations.

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Restrictions

Note that only students enrolled at WSU Online may register in the WSU Online subjects offered at that location.

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Identify the basic principles of associative learning and social learning theory (APAC Graduate Attribute 1.1i, 1.1v, 1.3)

2. Use basic principles of associative learning and social learning theory to modify behaviour to bring it into line with stated goals (APAC GA 1.1v, 1.2, 1.5)

3. Describe the therapeutic techniques derived from learning theory (APAC GA 1.1iv, 1.1v)

4. Record a target behaviour, explain and defend the method used, and evaluate whether it appropriately quantifies the identified target behaviour (APAC GA 1.2, 1.3, 1.6)

5. Apply basic principles of associative learning and social learning theory to new situations and identify how these principles might work (APAC GA 1.1v, 1.3, 1.5)

6. Summarise the ideas of associative learning and social learning theories and explain how they can be differentiated from other similar concepts (APAC GA 1.1v, 1.3, 1.5, 1.6)

Subject Content

Lectures

1. Pavlovian to Instrumental transfer
2. Paradigms in the investigation of learning
3. Habituation and sensitization
4. Pavlovian conditioning 1: The basics
5. Pavlovian conditioning 2: Connectionism and learning
6. Pavlovian conditioning 3: Applications

7. Operant conditioning 1: The basics
8. Operant conditioning 2: Reinforcement and punishment
9. Operant conditioning 3: Behavioural economics and choice
10. Learning and abnormal behaviour
11. Behaviour modification, behaviour therapy, and cognitive behaviour therapy
12. Learning and addiction
13. Learning and effective study methods

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Report	1,250 words	30	N	Individual
Presentation	2 minute video presentation	30	N	Group
Quiz	4 short quizzes submitted through vUWS	10	N	Individual
Final Exam	90 minutes	20	N	Individual
Quiz	Short quiz at the end of each tutorial	10	N	Individual

BEHV 2008 Mental Health in the Community

Credit Points 10

Legacy Code 101594

Coordinator Rosemary Qummouh (https://directory.westernsydney.edu.au/search/name/Rosemary Qummouh/)

Description Mental health service delivery in the community is now the main form of care for people across the lifespan living with mental and emotional disorders. The development of a wider range of pharmacological, psychological and psychosocial treatments has enabled many people to live productively in the community. This subject explores the changes in policy and practice in the development of integrated mental health care and the impact of these changes on the lives of people living with mental illness and their communities. Early intervention, resilience and recovery are concepts explored in this subject in terms of mental health and wellbeing.

School Social Sciences

Discipline Behavioural Science

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Restrictions

Students must be enrolled in 1665 Bachelor of Community Welfare, 1666 Bachelor of Social Work, 1709 Bachelor of Criminal and Community Justice, 1710 Bachelor of Criminology, 1713 Bachelor of Criminal and Community Justice/Bachelor of Social Work, 1734 Bachelor of Policing (Leadership Program), 1844 Bachelor of Policing, 2766 Bachelor of Criminology/Bachelor of Laws, 2767 Bachelor of Criminal and Community Justice/Bachelor of Laws, 6025 Diploma in Criminal and Community Justice/Bachelor of Criminal and Community Justice or 7170 Undergraduate Certificate in Counselling and Mental Health.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the theories and discourses underlying contemporary mental health care and treatment.

2. Understand major mental health disorders, and identify a range of interventions and management approaches.
3. Critically describe the significant policy changes and implications for mental health service delivery.
4. Recognise the presentation of mental illness and emotional disorders in clients in community settings.

Subject Content

1. Mental health: contemporary theory, policy and practice issues
2. Mental health literacy- understanding the diagnostic framework,; signs and symptoms of mental illness.
3. Indigenous social and emotional wellbeing
4. Cultural understandings of mental health and illness.
5. Navigating the mental health system
6. The lived experience of mental illness.
7. Interventions in mental health and illness
8. Advocacy and systemic change in mental health

Assessment

BEHV 2010 Perception

Credit Points 10

Legacy Code 101680

Coordinator John Cass (https://directory.westernsydney.edu.au/search/name/John Cass/)

Description This subject examines the fundamental principles underlying human perception and expands upon the sensation and perception content introduced in the foundational psychology subjects. After reviewing the biological basis of sensing and perceiving, we will explore the way this relatively raw information is processed and organised into the complex perceptions of the visual, auditory, olfactory, gustatory and somatosensory systems, which constitute the fundamental basis of our experience of the world. The subject will also examine the history of perceptual theories and the use of psychophysical methods and experimental approaches to the study of perceptual processes

School Psychology

Discipline Behavioural Science

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) BEHV 1016

Equivalent Subjects BEHV 2001 - Biological Psychology and Perceptual Processes

Restrictions

Note that only students enrolled at WSU Online may register in the WSU Online subjects offered at that location.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and explain the major neural structures and computational principles associated with human sensation and perception, specifically including visual, auditory, somatosensory, and chemical sensory systems (APAC Graduate Attribute 1.1viii, 1.1xii).
2. Measure and analyse how the major perceptual systems impact on mental functioning and behaviour using the scientific method (APAC GA 1.1viii,1.3).
3. Describe and evaluate theories and propositions of aspects of sensory and perceptual processes (APAC GA 1.1i, 1.1vi, 1.1xii,1.3).
4. Work individually and in a group to complete a Scientific Laboratory Report conforming to American Psychological Association (APA) Guidelines (APAC GA.1.1viii,1.3, 1.5, 1.6)

Subject Content

1. Introduction: This topic will introduce perception and sensory processing. It will include the early philosophy of perception, gestalt principles, psychophysics and the importance of biology.
2. Chemical Senses: This area will introduce you to the structure and function of the chemosensory systems focussing on olfaction and gustation. You will learn about olfactory and gustatory stimuli,

receptors and coding. We will look at connections between odour, memory and emotions, and specifically examine the cross-modal interactions of taste and odour (flavour) including hedonics.
3. Touch: This topic will cover the phenomenology and physiological coding of human somatosensation, including what environmental information is encoded, and how this is represented in the cortex.
4. Audition: This topic will introduce you to auditory stimuli, physiology, and psychoacoustics. The presented material will examine the perception of sound in the environment and perception of complex sounds including language and music.
5. Vision: This area will cover a range of visual topics. After an introduction to the visual receptors, neural processing and central processes, you will learn about the perception of colour and the role of attention in vision. We will also look at depth/space perception, binocular vision, recognising objects and gestalt principles.

Equivalent Subjects BEHV 2008 - Mental Health in the Community

Restrictions

Students must be enrolled at Western Sydney University, The College. Students enrolled in Extended College programs must have passed 40 credit points of the preparatory subjects in these programs in order to enrol in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the theories and discourses underlying contemporary mental health care and treatment.
2. Understand major mental health disorders, and argue the importance of early intervention and evidence based treatment and management.
3. Critically describe the significant policy changes and implications for mental health service delivery.
4. Recognise the presentation of mental illness and emotional disorders in clients in community settings.

Subject Content

Mental health: contemporary theory, policy and practice issues.
Mental health literacy - understanding the diagnostic framework; signs and symptoms of mental illness.
Indigenous social and emotional wellbeing.
Cultural understandings of mental health and illness.
Navigating the mental health system.
The lived experience of mental illness.
Interventions in mental health and illness.
Advocacy and systemic change in mental health.

BEHV 2018 Personality

Credit Points 10

Legacy Code 102906

Coordinator Emma Walter (https://directory.westernsydney.edu.au/search/name/Emma Walter/)

Description Most of us probably use the term 'personality' almost every day. Yet the conceptualisation and definition of personality is far from settled. This subject introduces the controversies and debates in the psychology of personality, as well as the major theoretical and applied approaches to its measurement. Emphasis is placed on an understanding of personality research and its implications for the practice of psychology.

School Psychology

Discipline Psychology

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Equivalent Subjects BEHV 2011 - Personality Motivation and Emotion BEHV 3017 - Personality

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the major theories of personality (APAC Graduate Attributes 1.1i, 1.1ii).
2. Analyse contemporary personality research to solve scientific problems, including in peer groups (APAC GA 1.1ii, 1.1xii 1.3, 1.5).
3. Identify the practical implications of individual differences and personality research to applied psychology (APAC GA 1.1i, 1.1ii, 1.3).
4. Identify impacts of cultural context on personality and identity, including from Indigenous Australian perspectives (APAC GA 1.1ii, 1.1xi, 1.2)
5. Demonstrate effective written expression of scientific thinking using APA structure and formatting conventions (APAC GA 1.3, 1.6).

Subject Content

1. Introduction to Personality: What is personality and individual differences?
2. The Psychoanalytic Approach: Freud's psychoanalytic perspective; psychoanalytic alternatives to Freud; Neo-Freudian psychoanalytic perspectives.
3. The Behaviourist Approach: Radical behaviourism; cognitive behaviourism.
4. The Humanistic/Existentialist/Phenomenological Approach
5. The Dispositional Approach
6. Comparisons and evaluations.
7. Expressions of personality
8. Extremes of personality expression: personality disorders

BEHV 2019 Citizenship and Community Engagement

Credit Points 10

Legacy Code 800238

Coordinator Robert Salama (https://directory.westernsydney.edu.au/search/name/Robert Salama/)

Description The subject provides second and third year students enrolled in Advanced degrees or the Bachelor of Creative Leadership with opportunities to develop professional identity through exposure to workplaces, community settings and research processes related to their chosen field of study. Students will gain work experience while being encouraged to identify, examine, and discuss notions of citizenship and identity encountered in intercultural and diverse environments. This cross-disciplinary subject employs experiential learning in a 60-hour volunteering internship to achieve the learning outcomes. Individual or team internships are chosen in consultation with Academy staff to ensure their relevance to the learning outcomes.

School Social Sciences

Discipline Behavioural Science, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Equivalent Subjects BEHV 2007 - Internship and Community Engagement

Restrictions

Students must have successfully completed 40 credit points of study in their course with a minimum GPA of 5.0 to enrol in this unit. Students who are enrolled in the Bachelor of Creative Leadership (BCL) must enrol in the unit under the BCL. Enrolment in the unit for students enrolled in the BCL is at the discretion of the Academy or the Director of Academic Program.

Learning Outcomes

1. Identify intersections between knowledge of (multi)-disciplinary backgrounds and how to navigate work environments as successful leaders.
2. Develop a professional identity by conducting workplace-related tasks and gaining work experience.
3. Identify where relationships between disciplinary knowledge and skills, notions of intercultural competency and citizenship, can enable contribution to broader societal transformation.
4. Analyse the impact of citizenship and creative practices on leadership in the workplace and/or community setting.
5. Design creative solutions and innovative practices to solve challenges identified in the workplace and/or community setting.

Subject Content

1. Developing professional identity, culture, intercultural literacy, and intercultural competency.
2. Cultural identity, intra- and interpersonal communication, active listening,
3. Leadership practices: Citizenship, civics, ethics, and diversity.
4. Principles of community engagement, development, and empowerment.
5. Reflective practice for personal and professional development. Branding and personal branding.

Special Requirements

Legislative pre-requisites

Students participating in a NSW Public Health related placement must meet the following Special Legislative Requirements. Students who do not meet these requirements, will not be able to take their placement:
1. National Criminal History Check: Students must have a current (expiring 3 years from date of issue) check valid for their entire course. A valid National Criminal history check must be an Australia wide check, include the student's full name matching their Student ID card and date of birth and not have any offences listed. If a student has a criminal history identified on their check, they must provide a Clinical Placement Authority Card (CPAC) or conditional letter from the NSW HealthShare Employment Screening and Review Unit https://www.health.nsw.gov.au/careers/student_clearance/Documents/appendix-10-student-application.pdf
International students must additionally have a translated International Police Check or statutory declaration.
2. A NSW Working with Children Check (WWCC) clearance letter issued under the category of volunteer valid for their entire course.
3. A current approved first aid certificate valid for their entire course, approved provider courses can be found at http://training.gov.au
4. A completed vaccination/immunisation card with all serology results containing expiry dates and currency must be maintained by the student to ensure compliance for their entire course.
5. NSW Undertaking/Declaration form
6. Completed any additional health forms required (such as NSW Health Code of Conduct, Health Student Undertaking/Declaration and Tuberculosis (TB) Assessment Tool)
7. Relevant Local Health District specific documentation as requested. Contact your School for further details. Resources are also available on the Placement Hub website www.westernsydney.edu.au/compliancehub

Assessment

BEHV 2020 Introduction to Digital Mental Health

Credit Points 10

Coordinator Abhijatya Dhar (https://directory.westernsydney.edu.au/search/name/Abhijatya Dhar/)

Description This subject introduces students to the emerging field of digital mental health. Digital mental health services, including telehealth, web-based counselling services and mobile phone apps, are increasingly being adopted in the practice of psychology and other health disciplines. This subject describes the uses of digital mental health for health promotion, prevention and treatment of mental illnesses. Benefits and limitations of digital delivery of mental health services are described in the context of the broader public mental health system, with a focus on young people and smartphone apps. An assessment framework for mental health smartphone apps will be introduced to support students' critical evaluation of the quality and integrity of smartphone apps. Students will also apply their understanding of digital mental health to a real-world project.

School Psychology

Discipline Behavioural Science, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Evaluate the main features and applications of digital mental health within the stepped care model and the e-spectrum model. (Mapping onto CLO1,2 APAC Graduate Attributes 1.1i, 1.1iii, 1iv, 1.3)

2. Critically evaluate smartphone apps using the American Psychiatric Association's App Evaluation framework, distinguishing accessible, safe and engaging apps. (Mapping onto CLO1,4,5,6 APAC GA 1.1xi, 1.2, 1.3)

3, Create an industry case study on mental health and wellbeing using mental health services. (Mapping onto CLO2,6,7,8 APAC GA 1.1iii, 1,2, 1.3, 1.5, 1.6)

4. Reflect on using digital services to support mental health and wellbeing, in the context of usability and safety. (Mapping onto CLO7,8 APAC GA 1.1iii, 1.4)

Subject Content

1. Introduction to Digital Mental Health (DMH)

2. Application to Workplace Project I

3. Mental Health Promotion and Prevention Using Digital Mental Health Tools

4. Application to Workplace Project 2

5. Treatment Using Digital Mental Health Tools

6. Application to Workplace Project 3

7. Evaluating Quality, Safety and Usability of Smartphone Apps A

8. Application to Workplace Project 4

9. Evaluating Quality, Safety and Usability of Smartphone Apps B

10. Application to Workplace Project 5

11. Future Directions

Special Requirements

Essential equipment

Access to smartphone to download and use mental health apps.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Short Answer	2 x 250 word discussion posts	30	N	Individual
Presentation	500 words	20	N	Individual
Report	1,500 words	30	N	Individual
Reflection	500 words	20	N	Individual

BEHV 3002 Abnormal Psychology

Credit Points 10

Legacy Code 101681

Coordinator Ruth Brookman (https://directory.westernsydney.edu.au/search/name/Ruth Brookman/)

Description This subject is focused on Psychopathology, which is the study of behaviours that cause distress or functional impairment or are judged as deviant within the individual's culture. This subject examines definitions of psychopathology, ways of assessing and diagnosing, theories of the causation of psychopathology and treatments for recognised psychological disorders. Diagnostic criteria from the latest edition of the Diagnostic and Statistical Manual of Mental Disorders are applied to illustrative cases with emphasis on contemporary Australian research and theory. The development of integrated models of psychopathology, including biological, psychological and social factors, is a significant theme of the subject.

School Psychology

Discipline Behavioural Science

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) BEHV 1016 AND
BEHV 1018

Incompatible Subjects BEHV 3003 - Abnormal Psychology (online)

Restrictions

Note that only students enrolled at WSU Online may register in the WSU Online subjects offered at that location.

Assumed Knowledge

A basic understanding of core concepts of personality, social and developmental psychology.

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Distinguish features of contemporary theories of psychopathology within the major paradigms, and examine relationships between causal theory, diagnostic criteria and approaches to treatment (APAC Graduate Attribute 1.1, 1.iii, 1.1iv, 1.1viii, 1.3).
2. Analyse theories of psychopathology in cultural contexts, including from Indigenous Australian perspectives (APAC GA 1.1iii, 1.1xi, 1.2, 1.4).
3. Apply diagnostic criteria to case material and research methodologies to discern the aetiology, course, and treatment of psychological disorders (APAC GA 1.1 1.1iii, 1.1iv, 1.1viii, 1.1xii, 1.3).
4. Critically evaluate empirical reports through literature searches and reviews (APAC GA 1.1xii, 1.3, 1.6).
5. Communicate findings from research, including professional perspectives, in an effective manner (APAC GA, 1.3, 1.5, 1.6).

Subject Content

1. Definitions, history and scope of psychopathology; psychodynamic, cognitive-behavioural, existential-humanistic and systems approaches to causation and treatment of abnormality;

2. Goals and ethics of counselling/therapy; the clinical assessment interview; diagnostic classification systems; a detailed analysis of DSM-5;

3. The impact of culture, gender and developmental stage on diagnosis and treatment; a bio-psycho-social model;

4. Stress, trauma and coping: vulnerability and reactions to stress across the lifespan; psychological factors affecting physical health, psychophysiological and somatic symptom disorders; adjustment disorders; dissociative disorders;

5. Anxiety disorders: diagnosis, aetiology and treatment from an integrated bio-psycho-social perspective;

6. Developmental and neurocognitive disorders: with emphasis on pervasive developmental disorders in childhood and neurocognitive disorders of adulthood;

7. Eating disorders;

8. Substance use disorders;

9. Psychotic disorders;

10. Mood disorders: major depressive disorder; bipolar disorder; the depression-suicide link;

11. Sexual variations and disorders: the continuum of human sexuality and problems of identifying and treating sexual disorders;

12. Personality disorders: definitional problems and classification; borderline personality disorder.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Literature Review	1,500 words	30	N	Individual
Reflection	1,500 words (3x500 word reflection tasks)	30	N	Individual
Final Exam	1.5 hours	30	Y	Individual
Quiz	10	10	N	Individual

BEHV 3004 Advanced Research Methods

Credit Points 10

Legacy Code 101689

Coordinator Karen Mattock (https://directory.westernsydney.edu.au/search/name/Karen Mattock/)

Description This subject advances the research methods and statistics in the prerequisite subject, Experimental Design and Analysis. It introduces students to non-experimental, correlational research design, and survey research, including questionnaire design, sampling and administration, with reference to ethics particularly related to cultural contexts and specific groups. Knowledge and skills in the construction and evaluation of psychological tests are also taught. Related correlational statistical techniques are taught, together with advanced analysis of variance, and instruction in the use of SPSS. The subject also develops skills in conducting and reporting psychological research and provides an introduction to qualitative research.

School Psychology

Discipline Psychology

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) MATH 2006

Equivalent Subjects MATH 3002 - Advanced Survey Design and Analysis

Restrictions

Note that only students enrolled at WSU Online may register in the WSU Online subjects offered at that location.

Assumed Knowledge

Knowledge of experimental design, and basic quantitative analysis techniques up to and including one-way Analysis of Variance.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain non-experimental correlational research methodology, advanced experimental methodology, qualitative and survey research techniques (APAC Graduate Attributes 1.1.i, 1.1xii, 1.3).
2. Articulate principles of scale construction and evaluation and administration in various cultural contexts and with specific groups (APAC GA 1.1i, 1.1xi, 1.1xii, 1.2, 1.3, 1.4).
3. Demonstrate competence in advanced analysis techniques applicable to both experimental and non-experimental research methods (APAC GA 1.1xii, 1.3).
4. Demonstrate competence in writing research reports, including as part of a team (APAC GA 1.1xii, 1.3, 1.5).

Subject Content

1. Overview of quantitative research methods
2. Ethical and cultural considerations in research
3. Surveys - scale construction, evaluation and administration
4. Bivariate correlation and bivariate regression
5. Multiple regression
6. Factorial between-groups Analysis of Variance (ANOVA)
7. Factorial mixed Analysis of Variance (ANOVA) and Factorial Repeated measures Analysis of Variance (ANOVA)
8. Introducing chi-square analyses; one-way chi-square
9. Two-way chi square
10. Qualitative research methods; the Qualitative interview

11. Analysing qualitative data using Thematic Analysis
12. Mixed methods designs
13. Summary and Review

Assessment

BEHV 3007 Cognitive Processes

Credit Points 10

Legacy Code 101677

Coordinator Michael Gascoigne (https://directory.westernsydney.edu.au/search/name/Michael Gascoigne/)

Description Cognitive Processes is the study of the mental processes that underpin attention, perception, decision-making, language, and memory. Conceptual and research questions include: What are the structures and mechanisms of human memory? What processes underpin acquisition of language, and are the processes similar when we learn a second language? What factors affect attention? How do some people become expert problem solvers? Why do humans make irrational decisions? Contemporary theories will be discussed and evaluated. Investigative research methods including experiments, computer modelling, clinical case studies, and brain imaging are evaluated.

BEHV 3009 Developmental Psychology

Credit Points 10

Legacy Code 101682

Coordinator Karen Mattock (https://directory.westernsydney.edu.au/search/name/Karen Mattock/)

Description Structured around an overview of lifespan development including diversity, this subject explores the holistic nature of growth and development through developmental theory and research. This subject highlights the interactive nature of three main areas of development: biological, cognitive, and psychosocial changes that affect the individual from conception to end of life. The subject encourages observation as a means for understanding development and promoting individual wellbeing. Indigenous Australian knowledges and perspectives are integrated into the subject alongside an appreciation of the richness of diverse cultural contexts.

School Psychology

Level Undergraduate Level 3 subject

Pre-requisite(s) BEHV 1018

Restrictions

Note that only students enrolled at WSU Online may register in the WSU Online subjects offered at that location.

Assumed Knowledge

Basic understanding of core concepts of personality, social and developmental psychology.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Display an understanding of contemporary theories, principles, studies and methodologies used in the study of developmental psychology from conception to end of life.
2. Apply knowledge of the various developmental domains (cognitive, physical and social-emotional) and their interrelationships.
3. Demonstrate knowledge and understanding of conception to end of life in all its diversity, to the social, learning environment and apply this to psychological practice.
4. Employ, analyse and interpret various research methodologies in regard to the holistic development of the child, adolescent and adult considering relevant developmental theories and principles.
5. Evaluate matters related to child protection, including interprofessional perspectives, and impacts on development.

6. Evaluate developmental theories and practice approaches from cross-cultural and Indigenous Australian knowledges and perspectives.
7. Demonstrate creativity and reflexivity to critically analyse personally held values, feelings and attitudes.

Subject Content

1. Historical context and research methodologies in lifespan development
2. Biological basis of development
3. Physical and motor development through the life span
4. Physical development and ageing
5. Perceptual and language development across the lifespan
6. Cognitive development through the life span
7. Moral development
8. Early childhood and social emotional development: attachment and it?fs significance in human development
9. The self, personality and individual differences in development
10. Social and emotional development across the lifespan
11. Impact of child abuse and neglect ? the effects on physical, psychological and emotional development; promoting resilience; developing knowledge of child protection matters and mandatory reporting and interprofessional perspectives.
12. Cross cultural and indigenous perspectives in lifespan development
13. End of life issues-death dying and bereavement

BEHV 3010 Health Psychology

Credit Points 10

Legacy Code 101193

Coordinator Tania Perich (https://directory.westernsydney.edu.au/search/name/Tania Perich/)

Description Health Psychology is a branch of psychology concerned with the inter-relationship between psychological factors and physical health. It addresses such issues as the possible role of psychological characteristics in health maintenance and promotion, and in the development of illness. Other aspects include reactions to illness, the contribution of psychology to treatment, and explicit means by which health-relevant behaviours might be modified. This subject provides an introduction to Health Psychology and covers theoretical and research issues, the nature and management of stress and pain, issues concerning the receipt of health care and a selection of specific health problems.

Discipline Behavioural Science

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) BEHV 1016 AND
BEHV 1018

Equivalent Subjects LGYB 5004 - Health Psychology

Assumed Knowledge

Basic understanding of core concepts of personality, biological, social and developmental psychology and research methods is desirable.

Learning Outcomes

1. Recognise the basic principles, theories and methodologies of health psychology (APAC Graduate Attribute 1).
2. Apply knowledge of basic health psychology principles models and theories to a range of health and well-being issues across cultural contexts (APAC GA 2).
3. Demonstrate skills in the critical evaluation of empirical literature and theoretical positions in health psychology (APAC GA 3).

Subject Content

1. The nature and methods of studying health psychology and human behaviour in respect of health across cultural contexts.
2. Stress and health: Defining and measuring stress, understanding stress and illness and coping with stress.
3. Illness and help seeking behaviour.
4. Understanding pain.
5. Adhering to medical advice and compliance.
6. Investigating health specific issues which may include reproductive health, mental health, chronic conditions and appetitive behaviours.
7. Health promotion.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

BEHV 3011 History and Philosophy of Psychology

Credit Points 10

Legacy Code 100015

Coordinator Catherine O'Gorman (https://directory.westernsydney.edu.au/search/name/Catherine OGorman/)

Description This subject provides an overview of the origins and historical development of psychology. It examines the major landmarks in the history of psychology, focusing on important individuals, schools of thought, and recurrent ideas and themes. Historical conceptual problems are related to areas of controversy within contemporary psychology, and an insight is provided into the philosophical underpinnings of the various new movements and major theoretical conflicts within psychology today. The subject also provides a critical appraisal of psychology's status as a science, and explores the limits of psychological inquiry.

School Psychology

Discipline Behavioural Science

Level Undergraduate Level 3 subject

Pre-requisite(s) BEHV 1016 AND
BEHV 1018

Assumed Knowledge

Basic understanding of core concepts of personality, cognition, learning, perception, biological, social and developmental psychology and research methods is desirable

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Display basic knowledge of the historical and conceptual origins of psychology as a discipline, the major landmarks in the history of psychology, and the particular contributions made by various individuals and schools of thought or movements (APAC Graduate Attribute 1);
2. Apply knowledge of historical conceptual problems to contemporary problems in psychology (APAC GA 3);

3. Recognise the problems for psychology of some of its major concepts (such as: mind; behaviour; consciousness; meaning; values; theory; explanation; and so on) (APAC GA 3);
4. Demonstrate knowledge of the various arguments which have been presented in favour of (or against) certain kinds of psychological theory (APAC GA 3);
5. Evaluate the historical background and contemporary debates contributing to the great science/non-science divide in psychology, and the relationship of psychology to other disciplines (APAC GA 3);
6. Describe the interdependence of theory and practice in psychology, including the role of ethics, and the relationship between theory and practice in the scientist-practitioner model of psychological practice (APAC GA 3 and 4);

Subject Content

1. Introduction and major themes
2. Mind and reality in the classical world
3. Mind and reality in the medieval world and the renaissance
4. Descartes, dualism and rationalism
5. British Empiricism and Kant?fs response
6. The Darwinian revolution and William James?fs functionalism
7. The Freudian revolution
8. The behaviourist and cognitive revolutions
9. Psychology and 20th century philosophy of science
10. Recent challenges to traditional scientific psychology
11. Contemporary controversies and future directions

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Portfolio	2000 Words	50	N	Individual
Final Exam	2 hours; 1000 words to be marked	50	N	Individual

BEHV 3013 Humanities Internship

Credit Points 10

Legacy Code 100961

Coordinator Bridget Brooklyn (https://directory.westernsydney.edu.au/search/name/Bridget Brooklyn/)

Description This subject aims to provide humanities students with first-hand knowledge of workplaces or research processes related to their chosen field of study (specialisation). Internships may be undertaken in organisations including Western Sydney University, historical societies, museums, libraries, local and state government, non-government organisations, tourism and administration. Internships may also take the form of an individual research project under the supervision of one or more academics. The internship can be in Australia or through one of Western's partners such as CISaustralia overseas. The subject will introduce students to various fields in which the skills and knowledge developed in their study of the humanities can be applied. It will augment their study and provide much needed work or research experience. For further information please contact the subject coordinator or browse the Engaged Learning Subjects vUWS Companion site.

Level Undergraduate Level 3 subject

Equivalent Subjects LGYA 1894 - Art History Internship LGYB 0114 - History Internship LGYA 0506 - Asian and International Studies Internship LGYA 0906 - Cultural and Social Analysis Practicum

Restrictions

Successful completion of 120 credit points of study in the student's currently enrolled program.

Students must obtain permission from the **subject coordinator** before **enrolling** in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Research workplace applications of knowledge and skills developed through study
2. Engage in current professional or research practice
3. Apply discipline specific skills and knowledge to workplace tasks
4. Reflect on the impact of the subject on their intellectual and professional development

Subject Content

1. Encounter a range of responsibilities and skills dependent on the place of their internship.
2. Gain working knowledge of organisations and/or businesses relevant to their area of study.
3. Observe work-place practices and the development of specific projects.
4. Learn about the duties of specific professions
5. Completion of a placement: minimum of 20 hours, maximum of 50 hours. Maximum hours may be extended at student?fs request.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Presentation	5 minutes plus 1000 words	30	N	Individual
Portfolio	2,000 words	30	N	Individual
Essay	2,500 words	40	N	Individual

Prescribed Texts

- To be stipulated by supervisor before the commencement of internship placement.

BEHV 3014 Motivation and Emotion

Credit Points 10

Legacy Code 101678

Coordinator Tim Marsh (https://directory.westernsydney.edu.au/search/name/Tim Marsh/)

Description The study of motivation and emotion explores the reasons behind people's behaviours, thoughts, and feelings. This subject examines core research and theory on motivational and emotional systems, exploring how these systems function in general and how that functioning varies due to gender, culture, and other sources of difference. Concepts of motivation and emotion are central to understanding human psychology. The subject positions the topic in relation to other areas of psychological theory (such as learning theory, social psychology, personality, and cognition), investigates its role in psychological practice, and addresses its impact upon practical and philosophical debates within the discipline. Students are encouraged to explore and reflect upon the role of motivational systems in their own lives.

School Psychology

Discipline Behavioural Science

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) BEHV 1016 AND
BEHV 1018

Restrictions

Note that only students enrolled at WSU Online may register in the WSU Online subjects offered at that location.

Assumed Knowledge

Basic understanding of core concepts of personality, learning theory, biological, social and developmental psychology.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and explain the major concepts and key research findings in the study of motivation and emotion.
2. Evaluate psychological phenomena using motivational concepts and theories.
3. Differentiate biological and environmental factors behind individual variation in motivational functioning, including the roles of gender and culture.
4. Critique assumptions and perspectives on the role of motivation and emotion theory in controversial psychological debates.
5. Distinguish scientific evidence over opinion to explain and analyse human behaviour.
6. Reflect upon factors impacting one's own motivation, including the role of gender and cultural background.

Subject Content

1. Motivational systems:
- Reflexes
- Instincts
- Sensory sensations
- Drives
- Arousal mechanisms
- Basic emotions
- Social emotions
2. Sources of relevance judgement
- Evolutionary theory
- Learning
- Cognition
- Decision making
3. Motivation and core psychological debates
- The innate vs. acquired (nature/nurture) debate
- The free-will vs. determinism debate
4. Application to practice:
- Introduction to Applied Behaviour Analysis
- Introduction to Cognitive Behavioural Therapy
- Reflections on culture and gender

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

BEHV 3015 Motor Control and Skill Acquisition

Credit Points 10

Legacy Code 400886

Coordinator Kylie Steel (https://directory.westernsydney.edu.au/search/name/Kylie Steel/)

Description Motor Control and Skill Acquisition is an investigation of the physiological and psychological processes involved in both the control and the learning of movement. As such, it considers the control mechanisms which are innate to the learner, how these mechanisms change by virtue of both maturation and experience, and how the latter type of changes may be facilitated by manipulation of the learning environment.

School Health Sciences

Discipline Human Movement

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Equivalent Subjects BEHV 2009 - Motor Control and Learning
SPRT 3002 - Aquatic Sports

Restrictions

Students must be enrolled in 4656 Bachelor of Health Science, 4658 Bachelor of Health Science (Sport and Exercise Science), 4659 Bachelor of Health Science (PDHPE), 4742 Bachelor of Health Science (Health and Physical Education) Pathway to Teaching (Secondary), 4747 - Bachelor of Health Science (Health and Physical Education), 4791 Bachelor of Health and Physical Education (Pathway to Teaching Secondary), 4792 Bachelor of Health and Physical Education, 6000 Diploma in Health Science/Bachelor of Health Science (Health and Physical Education) or 6001 Diploma in Health Science/Bachelor of Health Science (Health and Physical Education)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain and apply the different levels of analysis from which movement control and learning is studied.
2. Describe the biomechanical factors and neurophysiological basis which contribute to control of movement and learning.
3. Describe and evaluate the behavioural changes which accompany learning.
4. Analyse how the cognitive processes influence learning.
5. Evaluate how age and other individual differences impact on movement behaviour
6. Observe and apply classification taxonomies of the neuromuscular and psychological involvement in skills training and development of specific movement skills.
7. Critique experimental literature pertaining to Motor Learning and examine the applied principles which have been generated by this research.
8. Explain the reasoning for and perform discipline specific laboratory WH&S procedures and systems.

Subject Content

- The field of Study and levels of analysis.
- The contribution of The Skeletal system to movement control.
- The contribution of The Muscular system to movement control.
- The proprioceptors and The spinal reflexes.
- The vestibular system, posture and balance.
- The Visual system and movement control.
- motor control functions of The brain.
- The closed-loop model.
- The open-loop model.
- The concept of motor learning and its measurement.
- The learning process.
- The principles of practice.
- feedback and motor learning.
- individual differences and motor behaviour.
- motor development.

BEHV 3017 Personality

Credit Points 10

Legacy Code 101679

Coordinator Phoebe Bailey (https://directory.westernsydney.edu.au/search/name/Phoebe Bailey/)

Description In 2022 this subject replaced by BEHV 2018 - Personality. Personality is the study of the mental and behavioural factors on which individual human beings vary. In other words, the study of personality is the attempt to understand why a given individual is the way he/she is. This subject involves an examination of the major personality theories, applications to individual differences, and contemporary research. Emphasis is placed on a critical understanding of personality research and its implications for the practice of psychology.

BEHV 3018 Psychology and the Online World

Credit Points 10

Legacy Code 102350

Coordinator Mac Mingon (https://directory.westernsydney.edu.au/search/name/Mac Mingon/)

Description Digital technologies and online environments have transformed how people interact, communicate, and organise. This subject explores the intersection of psychology and these 'online worlds', and critically examines the potential benefits and challenges it presents. Students will learn about a variety of online behaviours and environments, including the formation of social movements, the spread of moral panics and conspiracy theories, along with the potential of online therapy and psychological interventions. By the end of the subject, students will be able to understand and evaluate the psychological aspects of online activities and apply this knowledge to real-world situations.

School Psychology

Discipline Behavioural Science

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) BEHV 1018 AND
BEHV 1016

Restrictions

Students must be enrolled in the Bachelor of Cyber Security and Behaviour, Bachelor of Psychology, Bachelor of Psychology (Honours), Bachelor of Social Science (Psychology) or Bachelor of Communication, Bachelor of Arts and Diploma in Arts/Bachelor of Arts programs with a major in Psychological Studies. Students enrolled in the Bachelor of Cyber Security and Behaviour must have successfully completed 70 credit points. Students enrolled in all other programs must have completed the two Level 1 pre-requisite subjects as stated above, as well as 30 credit points from the following Psychology Level 2 subjects: BEHV2002 Brain and Behaviour, MATH2006 Experimental Design and Analysis, BEHV2010 Perception, or BEHV2005 Human Learning.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and evaluate the psychological aspects of online behaviours and social movements (Australian Psychological Accreditation Council - APAC Graduate Competency 1.1x).

2. Critically review the debates about the psychological aspects of online interactions in a range of contexts. (APAC Graduate Competency 1.6).

3. Distinguish between forms of online anonymity and be aware of the risks and benefits of anonymity (APAC Graduate Competency 1.6).

4. Analyse instances of risky or problematic forms of online conduct and identify of explanations of the psychological drivers of such conduct. (APAC Graduate Competency 1.1).

5. Describe the potential and scope of online platforms for delivering psychological services and interventions. (APAC Graduate Competency 1.2).

6. Explain how psychological approaches can inform online safety (APAC Graduate Competency 1.2).

Subject Content

1. Introduction to Cyberpsychology

2. Online Environments

3. Online Learning and Motivation

4. Videogames for training and changing behaviour

5. Digital Addictions

6. Online relationships

7. Online therapy and support

8. Online Aggression

9. Online Racism and Prejudice

10. Online Communities

11. Online Protest

12. Conspiracy theories

Assessment

BEHV 3019 Psychology of Language

Credit Points 10

Legacy Code 100023

Coordinator Liquan Liu (https://directory.westernsydney.edu.au/search/name/Liquan Liu/)

Description This subject acquaints students with major issues in the psychology of language. Through a series of online modules, it examines different approaches to research and theory on questions such as the acquisition and development of language, the relationship between language and thought, bilingualism and second language learning, speech perception and production, the neurophysiological underpinnings of language, and language in non-human animals. The tutorials align closely with online modules to help students consolidate their learning of lecture materials, and relate to subject assessments, helping students to improve the assessment outcomes. This third year subject deepens and synthesises knowledge of the psychology of language taught in foundational subjects. It progresses key research and critical evaluation skills relevant to a range of professions where language acquisition is an element.

School Psychology

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 120 credit points.

Assumed Knowledge

Solid understanding of perception, cognitive processes, and experimental design and analysis in psychology and/or a solid understanding of linguistics and research methods in linguistics.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify issues, theories, and research findings in psychology of language (APAC GA 1).
2. Evaluate key theories in a sub-topic of psychology of language (APAC GA 3).
3. Justify principles of experimental research used in psychology of language (APAC GA 6).
4. Reflect on research participation experiences (APAC GA 2 and 5)

Subject Content

This subject acquaints students with major issues in the psychology of language. All students will complete a set of core modules:

• Introduction to the Psychology of Language
• Is language human-specific?
• Is language species-specific?
• How is language developed?
• How is language learned?
• Neurobiology of Language - Brain and neuro methods
• Neurobiology of Language - Models, signs, genetics
• Bilingualism – How magical is it?
• Second language acquisition – How difficult is it?
• Speech perception
• Speech production
• Generative AI - A new direction

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Reflection	500 words	20	N	Individual

BEHV 3021 Psychology, Crime and Law

Credit Points 10

Legacy Code 102399

Coordinator Alina Ewald (https://directory.westernsydney.edu.au/search/name/Alina Ewald/)

Description This subject covers the study and application of a broad range of psychological concepts, principles, theory, and methods that relate to crime and the law. This subject examines psychological processes and human behaviour in relation to the Australian legal and court system and the criminal justice system - and considers their application to real-world contexts through case studies and interactive tutorials. The subject also examines forensic mental health in relation to crime and the law with reference to multi-cultural and Indigenous peoples. Emphasis is placed upon the intersection of evidence-based psychology with criminal and legal processes. Topics include the role of memory and attention in witness testimony; age, gender culture and the criminal justice system, and forensic interviewing.

School Psychology

Discipline Behavioural Science

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Students must be enrolled in one of the following programs: 1793 Bachelor of Science, Criminology and Psychological Studies, 1834 Bachelor of Psychology, 1711 Bachelor of Social Sciences (Psychology) or 1865 Bachelor of Psychology (Honours). For program 1793 Bachelor of Science, Criminology and Psychological Studies students must have successfully completed 140 credit points and BEHV1016 Psychology: Behavioural Science and MATH2006 Experimental Design and Analysis before enrolling in this subject. For program 1834 Bachelor of Psychology, 1711 Bachelor of Social Sciences (Psychology) & 1865 Bachelor of Psychology (Honours) students must have successfully completed BEHV1016 Psychology: Behavioural Science and MATH2006 Experimental Design and Analysis before enrolling in this subject.

Assumed Knowledge

Introductory knowledge of Psychology, statistics, and research methods.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Assess key concepts, principles, methods, and theory at the interface of psychology, crime, and the law. (APAC Foundational Competencies: 1.1)

2. Critically reflect on major themes relevant to the Australian legal and court system, criminal law, and forensic mental health. (APAC Foundational Competencies: 1.2, 1.3 & 1.6)

3. Analyse examples from the criminal justice system and apply psychological concepts, principles, methods, and theory to these. (APAC Foundational Competencies: 1.1, 1.2, 1.3, & 1.6)

4. Formulate an argument surrounding key issues and topics related to psychology, crime and the law using APA structure and formatting conventions. (APAC Foundational Competencies: 1.1. & 1.3)

5. Articulate the key factors associated with criminal justice proceedings and trial outcomes. (APAC Foundational Competencies:1.1, 1.3, 1.6)

6. Evaluate the nature and history of the extensive interaction between psychology, crime, and the law. (APAC Foundational Competencies: 1. & 1.2)

Subject Content

1 - Introduction to Psychology, Crime and Law

2 - Criminal Law, Australian Legal and Court System

3 - Psychological Processes: Cognition - *Attitudinal Biases, Decision Making and Social Cognition*

4 - Psychological Processes: Memory - *Eyewitness, False and Implanted Memories*

5 - Psychological Processes: Behaviour - *Deception and Lies Detection*

6 - Psychological Processes: Behaviour - *Juror Selection and Juror Decisions*

7 - Criminal Justice System. *Indigenous Australians*

8 - Criminal Justice System. *Youth, Gender, Cultural Differences*

9 - Introduction to Forensic Psychology

10 - Forensic Mental Health*: Developmental, Social, Environmental Risk Factors*

11 - Forensic Interviews and Risk Assessment

12 - Forensic Risk Management and Interventions

13 - Summary and Reflections

BEHV 3023 Social Psychology

Credit Points 10

Legacy Code 101683

Coordinator Cindy Harmon-Jones (https://directory.westernsydney.edu.au/search/name/Cindy Harmon-Jones/)

Description Social psychology is the study of human behaviour and mental processes in their social context. Social psychology examines social behaviour and social thinking using scientific psychological research methods. This subject considers both classic and recent theories, research and applications in core areas of social psychology such as: attitudes, stereotyping and prejudice, social cognition, group processes, cross-cultural and Indigenous Australian psychology, and social influence. Emphasis is placed upon the role of contemporary research and theory in increasing our understanding of social phenomena and the relevance of this to everyday life.

BEHV 3025 Sport and Exercise Psychology

Credit Points 10

Legacy Code 401055

Coordinator Rhiannon White (https://directory.westernsydney.edu.au/search/name/Rhiannon White/)

Description This subject explores psychological factors that affect sport performance (e.g., self-efficacy and concentration), psychological factors that predict and increase participation in physical activity (e.g., motivation), and psychological outcomes of physical activity (e.g., mental health, resilience, and cognitive development). Students will examine theory and research and draw upon their own experiences, to apply sport and exercise psychology principles to a variety of real-world scenarios, and design strategies relevant to different contexts such as physical education, personal training, exercise physiology, coaching, and health promotion.

Restrictions

Students must be enrolled in program 4659 Bachelor of Health Science (PDHPE), 4658 Bachelor of Health Science - Sport and Exercise Science, 4741 Bachelor of Sport Development, 4742 Bachelor of

Health Science (Health and Physical Education)-Pathway to Teaching (Secondary), 4747 Bachelor of Health Science (Health and Physical Education), 4791 Bachelor of Health and Physical Education (Pathway to Teaching Secondary), 4792 Bachelor of Health and Physical Education or 6001 Diploma in Health Science/Bachelor of Health Science (Health and Physical Education)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the evidence related to the cognitive, affective and behavioural outcomes of physical activity participation.
2. Design theory and evidence-based interventions that will promote adoption and adherence to exercise.
3. Assess the influences of psychological factors on participant experiences and performance in sport.
4. Critically evaluate how psychological strategies can be implemented to enhance sporting performance and increase exercise adherence throughout the lifespan.
5. Critically evaluate how psychological strategies can be implemented to enhance sporting performance and increase exercise adherence throughout the lifespan.

Subject Content

1.Sport confidence
2.Anxiety and performance
3.Concentration and performance
4.Team building
5.Motivation and exercise adoption
6.Motivation and exercise maintenance
7.Psychosocial predictors of physical activity participation
8.Psychosocial factors influencing participants?f experiences
9.Goal setting
10.Exercise and mental wellbeing

BEHV 3026 Service Learning

Credit Points 10

Legacy Code 102740

Coordinator Bridget Brooklyn (https://directory.westernsydney.edu.au/search/name/Bridget Brooklyn/)

Description In this subject, the learning experience combines civic engagement with training, and personal and scholarly reflection. Service learning focuses on the application and development of a broad range of knowledges, capacities and skills in the context of voluntary effort to benefit the community. For example, depending on the site selected, students may: extend their capacity to communicate and work effectively in culturally diverse contexts; gain a better understanding of social inclusion and exclusion in Australia or overseas, or; become more confident about their personal and professional capacity to contribute to the well-being of others or protection of the natural environment. The subject may be taken in Australia or overseas through one of Western's Partners such as CISaustralia, completed individually or as part of a group and in any term of study. For further information please contact the subject coordinator or browse the Engaged Learning Subjects vUWS Companion site.

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 60 credit points in currently enrolled program

Students must obtain permission from the subject coordinator before enrolling in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the personal and professional skills required in volunteering.
2. Discuss the historical and contemporary significance of volunteering as a form of civic engagement.
3. Reflect on the personal and organizational challenges and benefits of volunteering.
4. Discuss the contribution of civic engagement to a diverse, sustainable and inclusive society.
5. Explain how your experience as a volunteer has enhanced your personal development and professional profile.

Subject Content

1. Determination of an appropriate placement in conjunction with an Subject Coordinator.

2. Participation in training either at the placement organisation or, if not provided there, through the NSW Centre of Volunteering (2 hours, run weekly)
3. Completion of a placement: minimum of 20 hours, maximum of 50 hours. Maximum hours may be extended at student's request

BEHV 4001 Advanced Topics in Psychology

Credit Points 10

Legacy Code 101541

Coordinator Ahmed Moustafa (https://directory.westernsydney.edu.au/search/name/Ahmed Moustafa/)

Description In 2022 this subject replaced by 102907 - Advanced Topics in Contemporary Psychology. In this subject students develop an advanced level of theoretical and empirical knowledge in selected core topics of psychology, an awareness of how this knowledge underpins evidence-based approaches to psychological intervention, and an enhanced capacity for conducting research in selected topic areas. The subject fosters an appreciation of psychology as a scientific discipline, and of how sound research provides the foundation for solving problems of human mental processes and behaviour. Skills in the critical evaluation of knowledge and research are developed.

BEHV 4004 Psychology Research Thesis

Credit Points 30

Legacy Code 102528

Coordinator Cindy Harmon-Jones (https://directory.westernsydney.edu.au/search/name/Cindy Harmon-Jones/)

Description In this subject students investigate a substantive individual research question relevant to the discipline of psychology. Under guidance from supervisors, students engage with all components of psychological research, including conducting a comprehensive literature review, forming an individual research question, developing research methodology to test the question, obtaining ethics approval, and collecting and analysing data. Students produce a written literature review and substantive thesis in the form of a submission-ready journal article. Note that this is a 30 credit point year-long subject taken over two terms (15 credit points in each term).

Co-requisite(s) BEHV 4006

Equivalent Subjects LGYB 5257 - Psychology (Honours) FT YL LGYB 5258 - Psychology (Honours) PT YL BEHV 4003 - Empirical Research Project

Restrictions

This subject is restricted to students enrolled in programs: 1796 Graduate Diploma in Psychology, 1865 Bachelor of Psychology (Honours), 1860 Bachelor of Psychological Studies (Honours), 1905 Bachelor of Psychological Science (Honours), 1504 Bachelor of Arts (Honours) Psychology, 1500 Bachelor of Psychology (continuing) who have successfully completed 240 credit points including the 160 credit point core sequence in Psychology, 1834 Bachelor of Psychology/1865 Bachelor of Psychology (Honours) students who have successfully completed 240 credit points including the 120 credit point core sequence in Psychology and the 40 credit point Psychology Extension minor prior to 2022 or for students who commenced 1865 Bachelor of Psychology (Honours) from 2022, students must have successfully completed 240 credit points including the 140 credit point core sequence in Psychology.

Assumed Knowledge

Students must have completed an accredited three-year sequence in psychology, or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply advanced bibliographic and information literacy skills to locate and select literature appropriate to a chosen and research topic.
2. Apply conceptual skills to formulate and justify a research proposal.
3. Demonstrate comprehensive knowledge and application skills associated with a chosen, relevant research method.
4. Adhere to the ethical processes and guidelines of the research institution the conduct and reporting of research.
5. Accurately apply appropriate methods of data analysis to research data.
6. Demonstrate rigor in drawing and defending conclusions from research findings in a coherently written research thesis.

Subject Content

Completion of a research Thesis relevant to the field of psychology based on a rigorous design and scrutinized proposal.
Under supervision, an individual student will perform a literature search of their research topic, develop a research design, develop research procedures, make observations, collect and analyse the data and write a thesis on the study.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

BEHV 4005 Theory and Practice of Psychological Assessment and Intervention

Credit Points 10

Legacy Code 101420

Coordinator Quincy Wong (https://directory.westernsydney.edu.au/search/name/Quincy Wong/)

Description This subject has been designed to introduce students to psychological assessment by providing practical and theoretical input regarding the administration, scoring, and interpretation of frequently used standardised measures. The scientific and ethical underpinnings of psychological testing and assessment are introduced providing a general context for the employment of standardised psychological tests. Emphasis will then be placed on familiarisation with i) the processes that practitioners go through during a testing session and ii) current research on employing the standardised tests presented in this subject. Students will practise with testing data, reporting results in compliance with American Psychological Association (APA) conventions.

Restrictions

Students must be enrolled in programs 1796 Graduate Diploma of Psychology, 1865 Bachelor of Psychology (Honours), 1860 Bachelor of Psychological Studies (Honours), 1905 Bachelor of Psychological Science (Honours), 1504 Bachelor of Arts (Psychology) Honours, or 1500/1834 Bachelor of Psychology. Students enrolled in 1500/1834 Bachelor of Psychology or 1865 Bachelor of Psychology (Honours) must have successfully completed 240 credit points.

Assumed Knowledge

Undergraduate subjects in research methods for psychology including an advanced research methods subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Characterise and critique the philosophical and methodological differences between qualitative and quantitative research
2. Accurately apply qualitative methods and analysis techniques to psychological data
3. Accurately apply multivariate quantitative techniques to psychological data using SPSS/PASW analysis software
4. Discriminate between epistemological positions in psychology and describe their alignment to methodological approaches
5. Evaluate and propose ethical research approaches in cultural, social, economic, and political contexts, including from Indigenous Australian perspectives
6. Synthesise and communicate research processes and findings in written reports according to the guidelines of the Publication Manual of the American Psychological Association

Subject Content

The research process
Ontological and epistemological bases of different approaches to research
Interpreting research data and research results
Overview of qualitative research methods, with the option for advanced instruction in selected methods (e.g., discourse analysis)
Overview of quantitative research methods, with options for advanced instruction of selected methods (e.g., factor analysis)
Statistical significance, effect size, and power analysis
Ethical issues in research
The social, economic, and political context of research, including the professional responsibilities of researchers
Communicating research: writing research proposals, theses, dissertations, and journal articles.

Students must be enrolled in programs 1796 Graduate Diploma of Psychology, 1865 Bachelor of Psychology (Honours), 1860 Bachelor of Psychological Studies (Honours), 1504 Bachelor of Arts (Psychology) Honours, 1500/1834 Bachelor of Psychology, or 1905 Bachelor of Psychological Science (Honours). Students enrolled in 1500/1834 Bachelor of Psychology must have successfully completed 240 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate advanced theoretical and empirical psychological knowledge in core areas of the discipline,
2. Reflect on their own knowledge of core areas of contemporary psychology.
3. Complete a project to address self-identified gaps in their skills and knowledge in contemporary Psychology
4. Communicate advanced psychological principles, ideas, and research findings clearly and concisely in varied contexts, including interprofessional.
5. Explain how to extend the boundaries of psychological knowledge through research.
6. Critically evaluate the knowledge derived from published psychological research, and use appropriate judgement in the interpretation and application of that research.

Subject Content

The subject consists of modules on advanced areas of psychology that reflect the need for psychologists to adapt to the changing social and professional environment in which they work.
The subject will cover
- Multidisciplinary health care teamwork
- Sexualities and gender identity
- Indigenous psychology
- Multicultural and multilingual settings
- Therapy modes- such as bibliotherapy, telehealth, blended modes
- The psychology of ageing
- Environmental and political psychology

BEHV 5003 Flexibility Economy

Credit Points 10

Description The world is experiencing significant social and economic transformations, creating uncertainty in the future of work and business. Domain knowledge is necessary, but not sufficient for organisational or individual success in new business environments. Success now requires complex adaptability and flexibility skills, and the capacity to influence the behaviour of others to respond to emerging challenges. How can we think outside of an industry or disciplinary framework to enhance human performance under uncertainty? How can we efficiently adjust personal and organizational goals and strategies to meet the pressures of local and global crises and technological innovations? The focus in this subject is on flexibility in practice - the evolution of industry routines and workplace habits, rapid changes in job functions and career profiles, and developing workforce expectations and demands. Key psychological concepts and theories will be integrated with business knowledge to help you develop adaptability and capitalize on flexibility as a strength in your workplace.

School Psychology

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 5 subject

Restrictions

Must be enrolled in a postgraduate program.

Learning Outcomes

After successful completion of this Subject, students will be able to:

1. Evaluate workplace rules, norms, and habits that determine common industry or organisational practices.
2. Design a strategy to overcome obstacles to flexible practice within an industry or organisational context.
3. Apply psychological theories of human performance to a workforce change scenario.
4. Articulate key adaptability and flexibility skills to lead organisational change.
5. Propose solutions for human and business performance problems in a flexible economy.

Subject Content

Why do we do what we do?

- Social rules and personal habits.
- Change and adjustment

Embedding Flexibility in your Organisation

- Flexibility in practice: changes in the "how" and the "where" we work
- Turning roadblocks in roundabouts

Exploiting the potential to be Flexible

- The growth of the "Gig Economy" – opportunities and challenges.
- New Directions: adapting to change in your industry

Thinking fast and slow

- Algorithms, heuristics and habits
- Adaptability: Forming and changing habits

Putting the intelligence into Business Intelligence

- Motivating and enabling change
- Valuing a diversity of skill and talents

The neuroscience of ‘nimble’

- Creativity, cognitive load and the myth of multitasking
- Thinking through the lifecycle

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Professional Task	15 minutes	25	N	Individual
Professional Task	1,000 words	25	N	Individual
Applied Project	2,000 words	50	N	Individual

BEHV 5004 Wellbeing Economy

Credit Points 10

Description The Wellbeing Economy is an emerging global movement aimed to disrupt and transform dominant macro-economic systems focused on economic growth. Proponents of the Wellbeing Economy argue that individual, community and societal wellbeing should be the measures of a successful economy. Major shifts in government and business sector accountability for social justice and ‘wellness’ outcomes are predicted over the coming decade. At the micro level, what will it mean to live, work and lead in a wellbeing economy? What new knowledge, skills and attitudes will be required on the ground? In this subject traditional and emerging theories and concepts of wellbeing will be explored, critiqued and reimagined. Real world examples of holistic approaches to wellbeing in business and industry contexts will be investigated and applied to your unique, authentic contexts. You will build your capacity to problem-solve and plan for wellbeing outcomes in your individual spheres of influence. Engaging leaders across industries will share their experiences through online learning activities and resources. At the conclusion of this subject, you will have enhanced knowledge and skills to develop, at scale, strategies and plans that support individual, community and organisational wellbeing.

School Psychology

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 5 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

After successful completion of this Subject, students will be able to:

1. Identify emerging concepts, themes, and trends for a wellbeing economy
2. Critically evaluate inclusive and exclusive measurements of economic growth
3. Apply psychological theories and concepts of human behaviour to enhance human performance and wellbeing, including from Indigenous psychology
4. Reflect on and transform personal theories and concepts of wellbeing applied in organisational settings
5. Create and communicate a plan to address barriers to wellbeing within an organisational context

Subject Content

The Foundations of the Wellbeing Economy

- Framing the Wellbeing Economy
- The Principles of the Wellbeing Economy

People and Health in the Wellbeing Economy

- Growth sectors of the Wellbeing Economy
- Health and productivity in organisations

Advancing Wellbeing in your Organisation

- Supporting inclusivity and diversity
- Wellbeing as a compass for organisational policy and culture

Understanding Human Behaviour

- Beliefs, Values and Emotions
- Motives, Motivation and Behaviour

Human Behaviour in Work Context

- Individual differences, diversity
- Roles and talent development, work culture and job satisfaction

Mental Health in Work Context

- Psychological injury, mental health risk, recognition, prevention and intervention
- Indigenous mental health models: Social and Emotional Wellbeing

Special Requirements

Essential equipment

Computer and internet access

Assessment

BEHV 7001 Advanced Therapeutic Modalities

Credit Points 10

Legacy Code 102361

Coordinator Tania Perich (https://directory.westernsydney.edu.au/search/name/Tania Perich/)

Description This subject follows from 102360 Core Therapeutic Modalities. Students in this subject will develop foundational skills in assessment, case formulation and treatment planning through understanding and developing skills in further evidence-based psychological therapies that may be modified based on an evolving case formulation and evaluation and tailored to the client as appropriate to their wider social and cultural context. Further, students will be guided in critical examination of similarities and differences across those therapeutic approaches and their application across conditions, populations, settings and cultural contexts. Please note: some of the activities in this subject may include experiential learning, for example where students may be asked to take on the client role using their own lived experience, to provide opportunity for training in therapeutic modalities that are more "real life". Students may opt-out of these activities without consequence through speaking to the subject coordinator and alternative arrangements for student learning opportunities will be organised.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) BEHV 7015 AND
BEHV 7029

Restrictions

Students must be enrolled in 1814 Master of Professional Psychology.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate knowledge and skills in evidence-based psychological interventions and ways to tailor these to the unique attributes of the person within their wider context and evaluate therapeutic outcomes (APAC GA: 3.7)
2. Apply therapeutic interventions and demonstrate skill in reflecting on practice and identifying areas for improvement. (APAC GA: 3.2, 3.6, 3.9, 3.12 & 3.15)

3. Critically evaluate similarities and differences of therapeutic modalities covered in the subject (APAC GA: 3.9)
4. Based on psychological assessment and formulation, appropriately select therapeutic modalities across diverse settings and cultural contexts and communicate these in a case report (APAC GA: 3.2,. 3.3 & 3.8)

Subject Content

Theoretical and empirical foundations of Narrative therapy (NT)
NT assessment, case formulation and application to select psychological problems
Theoretical and empirical foundations of Motivational Interviewing (MI)

MI therapeutic tools and application to select psychological problems
Theoretical and empirical foundations of Acceptance and Commitment therapy (ACT)
ACT assessment, case formulation and application to select psychological problems
Introduction to Schema therapy: theoretical and empirical foundations, approach and application
Introduction to Solution Focused Brief therapy: theoretical foundation, approach and application
Introduction to Emotion Focused therapy: theoretical foundation approach and application
Introduction to Group therapy: approach, skills and context
Evidence-based therapeutic modalities selection across diverse settings and cultural contexts

Assessment

BEHV 7003 Assessment: Cognitive Functions

Credit Points 10

Legacy Code 102400

Coordinator Tania Perich (https://directory.westernsydney.edu.au/search/name/Tania Perich/)

Description This subject provides a comprehensive introduction to the cognitive psychological assessment of children, adolescents and adults. It is designed to assist students in the professional psychology programs to develop theoretical knowledge and practical skills in the cognitive assessment of clients. Students will become familiar with the current theoretical and empirical foundations of psychological assessment, and the application of these theories and research findings to assessment practice in empirically valid and culturally responsive ways. Students will be introduced to contemporary practice in the assessment of cognition, personality and behaviour. Training in the administration of key instruments will be provided. Students will be instructed in the integration of assessment data into clinically-useful reports, including inter-disciplinary communication. Different approaches to psychological assessment will be compared and evaluated. Ethical and professional issues in psychological assessment will be discussed.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects BEHV 7026 - Psychological Assessment LGYA 1196 - Psychological Assessment 1

Restrictions

Students must be enrolled in 1812 Master of Clinical Psychology or 1814 Master of Professional Psychology.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Define the theoretical and empirical foundations of psychological assessment (APAC GA: 3.2, 3.16, 4.2.1ii)
2. Critically evaluate psychological tests, including their application in culturally responsive ways (APAC GA: 3.2, 3.16, 4.2.1ii)
3. Examine ethical issues in psychological assessment (APAC GA: 3.12)
4. Show knowledge in appropriate selection of assessment methods and measures (APAC GA: 3.4, 3.6, 4.2.2ii)
5. Demonstrate skills in conducting and interpreting major measures of child and adult intelligence, achievement and other cognitive domains (APAC GA: 3.4, 3.6, 3.14, 3.15, 4.2.2ii)
6. Formulate and appropriately communicate assessment results to clients and other professionals (APAC GA: 3.8, 3.10, 4.2.2iii)

Subject Content

1. Theories, models and methods in psychological assessment
2. Intelligence and cognitive systems
3. Intellectual assessment: WAIS-IV, WISC-V and exposure to other tests of intellectual functioning
4. Assessment of academic achievement: WIAT-II, NARA-III and other measures
5. Assessment of memory, executive functioning and other cognitive functions: WMS-IV, CVLT, and other measures
6. Assessment of behaviour, emotion and personality (e.g., MMPI, NEO-PI and ADIS)

7. Observational methods
8. Psychometric principles and methods
9. Developmental and acquired cognitive disorders
10. Report writing
11. Professional and ethical issues in assessment, including application of psychological testing and assessment in culturally responsive ways.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

BEHV 7004 Assessment: Psychological Practice

Credit Points 10

Legacy Code 102359

Coordinator Janet Conti (https://directory.westernsydney.edu.au/search/name/Janet Conti/)

Description This subject will provide students with the skills to psychologically assess and diagnose a range of psychological disorders in adults and in children that are presented in psychological practice. This subject will be complemented by 102400 Assessment: Cognitive Functions in the second semester which will focus more on cognitive assessments. Upon completion of this subject, students will have an understanding of a range of assessment tools, their psychometric qualities, application and utility in a psychological practice. They will also develop skills in applying and interpreting assessment tools and how those tools may aid diagnostic and therapeutic processes.

School Psychology

Discipline Psychology

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Restricted to Postgraduate students with an APAC accredited 4 year psychology sequence.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Define the principle of clinical assessment.
2. Demonstrate knowledge and understanding of assessment application at diagnostic and therapeutic levels.
3. Compare a range of different assessment tools, their psychometric properties and application
4. Apply knowledge of assessment tools across a range of diagnostic and therapeutic contexts
5. Demonstrate skills in conducting and interpreting assessment.
6. Formulate and appropriately communication assessment results to clients and other professionals.

Subject Content

Principles of Clinical Assessment
Assessing Mood Disorders and Self-Harm Risk
Assessing Anxiety Disorders
Assessing Child Behavioural and Emotional Functioning
Assessing OCD and Related Disorders
Assessing Personality and Aptitudes
Assessing Chronic Pain and Physical Disability
Assessing Trauma & Related Disorders

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

Final Exam: Short-answer Questions Exam	2 hours	50	Y	Individual

BEHV 7005 Child Clinical Psychology

Credit Points 10

Legacy Code 101210

Coordinator Fran Doyle (https://directory.westernsydney.edu.au/search/name/Fran Doyle/)

Description This subject introduces the nature, assessment and treatment of psychological disorders in children and adolescents. Students will examine the diagnostic classification, epidemiology and aetiology of a range of psychological problems in childhood and adolescence, including anxiety disorders, mood disorders, behavioural disorders, trauma and stressor-related disorders, eating disorders, learning disabilities, and attention-deficit disorder. The theoretical and empirical foundations of a range of cognitive and behavioural techniques will be discussed along with a number of major conceptual and practical issues in the treatment of psychological disorders in childhood and adolescence, including cultural and inter-professional contexts.

Equivalent Subjects LGYA 0486 - Clinical Problems in Children and Adolescents BEHV 7004 - Assessment Psychological Practice

Restrictions

Students must be enrolled in programs 1812 Master of Clinical Psychology or 1814 Master of Professional Psychology

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate the characteristics of the common emotional and behavioural disorders in childhood and adolescence (APAC GA: 3.5, 4.2.1i, 4.2.1ii, 4.2.1iii & 4.2.2i).
2. Apply reliable and valid and culturally responsive methods of assessing and writing reports for children and adolescents with psychological disorders (APAC GA: 3.2, 3.6, 3.8, 4.2.1iii, 4.2.2ii, 4.2.2iii).
3. Implement and evaluate psychological interventions, including cognitive and behavioural therapies, for a range of emotional and behavioural disorders in childhood and adolescence reflecting upon the appropriate treatment modifications required for each clinical population and including working with the unique attributes of the person within their cultural context (including with Aboriginal and Torres Strait Islander Australians) (APAC GA: 3.2, 3.7, 4.2.2iii, 4.2.2iv, 4.2.3i & 4.2.3ii).
4. Critically evaluate research concerning the efficacy of psychological therapies with children and adolescents (APAC GA: 3.16 & 4.2.3iv).
5. Demonstrate an applied understanding of the role of a psychologist in an inter-professional context in the assessment and treatment of child and adolescent clinical presentations (APAC GA: 3.10, 3.12 & 4.2.3iii).

Subject Content

Theoretical and empirical foundations of child psychopathology
Assessment of psychopathology in childhood
Nature and epidemiology of common childhood disorders
The development, implementation and evaluation of psychological interventions, including cognitive and behavioural therapies, for a range of psychological disorders in childhood and adolescence.
Cultural responsiveness in psychological assessment and interventions with children and families, including with Aboriginal and Torres Strait Islander Australians.
The role and contribution of a psychologist within an inter-professional treatment context.

BEHV 7006 Clinic Placement A

Credit Points 10

Legacy Code 101815

Coordinator Karen Moses (https://directory.westernsydney.edu.au/search/name/Karen Moses/)

Description This introductory placement subject comprises 180 hours of placement activity accrued one-day a week over 24 weeks and is designed to allow students to apply the theoretical knowledge they have gained in the following coursework subjects, Core Skills & Ethical Practice; Psychological Assessment; Psychopathology: Theory and Practice and Psychological Interventions 1. The aim of the subject is to establish and enhance, under close supervision, a range of clinical psychology assessment and intervention skills applied to real clients. Regular and systematic video-recording of trainee-client sessions and supervisor feedback guided by competency-based principles provide trainees with an excellent opportunity to acquire, consolidate

and generalise a wide range of competencies important for clinical psychology practice.

Pre-requisite(s) BEHV 7014 AND
BEHV 7003 AND
BEHV 7029 AND
BEHV 7027

Co-requisite(s) BEHV 7005

Restrictions

Students must be enrolled in program 1812 - Master of Clinical Psychology.

Assumed Knowledge

Theoretical knowledge and skills of ethical professional practice, psychopathology, and psychological interventions.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate core evidence-based clinical psychology assessment and formulation competencies at an advanced-beginner level for common psychological problems, including with culturally diverse and indigenous populations (APAC GA: 3.2, 3.3, 3.4, 3.5, 3.6, 3.8, 3.9, 4.2.1i, ii, iii, 4.2.2 I, ii, iii & 4.2.3iv).
2. Demonstrate core evidence-based clinical psychology intervention competencies at an advanced-beginner level for common psychological problems, including with culturally diverse / indigenous populations and with consideration to the context in which a client lives (APAC GA: 3.2, 3.3, 3.7, 3.8, 3.9, 4.2.2iv & 4.2.3 i, ii, iv).
3. Display therapist-client and supervisee-supervisor relationship competencies at an advanced-beginner level (APAC GA: 3.10, 3.11,3.12, 4.2.3iii).
4. Demonstrate professionalism, professional communication competencies, ethical judgment and ethical conduct in accordance with the Code of Conduct endorsed by the Psychology Board of Australia and meet all of the program inherent requirements. This includes professional engagement with and showing respect for the skills and contributions of other involved professionals (APAC GA: 3.3, 3.8, 3.9, 3.10, 3.11, 3.12, 3.13, 4.2.3iii).
5. Demonstrate scientist-practitioner and reflective practitioner meta-competencies at the beginner level. This includes evaluating the effectiveness of own practice and making changes as required (APAC GA: 3.11, 3.14 & 3.15).
6. Comply with accreditation requirements concerning practicum, casework and supervision hours (APAC GA: 3.2-3.15, 4.2.1, 4.2.2, 4.2.3).

Subject Content

Supervised placement in the Western Sydney University Psychology Clinics.

Special Requirements

Legislative pre-requisites

Special Requirements - NSW Health Legislative Prerequisites ~~Pre-requisites~~

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and compete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- http://training.gov.au (http://training.gov.au/)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

BEHV 7008 Clinical Health Psychology

Credit Points 10

Legacy Code 101220

Coordinator Janet Conti (https://directory.westernsydney.edu.au/search/name/Janet Conti/)

Description In this subject students acquire an understanding of how biological, psychological, social factors interact in health and illness, and how the principles of biopsychosocial models of health inform clinical psychology intervention strategies that can be applied to the management of physical disorders. This subject will cover psychological assessment, formulation that integrates medicine and psychology, clinical health psychology treatments and assessment of their outcomes. Given that comorbidity has an impact on health outcomes, psychological practice when working with co-morbid substance use disorders will also be addressed. Practice within this branch of clinical psychology requires working within inter-disciplinary treatment contexts that include medical interventions and the tailoring of psychological interventions to help manage a medical condition and enhance quality of life. The subject includes culturally responsive attitudes and skills in clinical health psychology practice, including when working with Aboriginal and Torres Strait Islander Australians.

School Psychology

Discipline Psychology

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) BEHV 7027 Psychological Interventions 1 AND BEHV 7029 Psychopathology Theory and Practice

Equivalent Subjects LGYB 5193 - Clinical Health Psychology BEHV 7011 - Clinical Psychopathology 2

Restrictions

Students must be enrolled in 1546 Master of Psychology (Clinical Psychology) or 1812 Master of Clinical Psychology

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Synthesise and apply information from clinical health psychological assessments to case formulation and treatments, considering of the client's social and cultural contexts, including Aboriginal and Torres Strait Islander peoples (APAC GA: 3.2, 3.7, 3.16, 4.2.1i & 4.2.1ii, 4.2.2iii & iv & 4.2.3ii, 4.2.3iv).
2. Evaluate the functions and importance of the contributions of interdisciplinary teams and interventions (including pharmacological) to the development, implementation, and communication of treatment plans (APAC GA: 3.10, 3.12, 4.2.1iv, 4.2.2ii & 4.2.3iii).
3. Plan psychological interventions for clients using MI-MAP case formulation for a range of clinical health populations, making appropriate treatment modifications for each population (APAC GA: 3.2, 3.3, 3.7, 3.9, 3.14, 3.15 & 4.2.2iii, 4.2.3i, 4.2.3ii, 4.2.3iv)
4. Apply competent therapeutic skills in a clinical health psychology intervention (APAC GA: 3.9, 3.14, 3.15 & 4.2.3i)

Subject Content

1. Integrating medicine, other disciplines and psychology: formulation framework for clinical health psychology
2. Transdiagnostic and e-mental health treatment for chronic health conditions
3. Psychoneuroimmunology and health models
4. Models of adjustment to illness
5. Therapeutic modalities (Motivational Interviewing, Problem Solving Therapy)
6. Psychological interventions for co-morbid presentations, including substance use disorders
7. Pain mechanisms and management.
8. Acute and chronic health conditions (e.g., spinal cord injury, stroke, multiple sclerosis; asthma; diabetes; arthritis, obesity, cardiovascular disease)
9. Clinical Health Psychology practice within a range of cultural contexts, including when working with Aboriginal and Torres Strait Islander Australians.

BEHV 7009 Clinical Neuropsychology and Psychopharmacology

Credit Points 10

Legacy Code 101817

Coordinator Andrew McKinnon (https://directory.westernsydney.edu.au/search/name/Andrew McKinnon/)

Description This subject provides a comprehensive grounding in contemporary neuropsychological theories, methods and measures, including understanding of neurocognitive disorders. The nature of the cognitive systems involved in attention, memory, language, spatial processing, and executive functions will be reviewed, with discussion of the neuropsychological assessment of each of these systems. The subject also includes coverage of the classification, use and efficacy of common psychopharmacological agents. The subject will stress the importance of neural abnormalities in patients, and how these are related to symptoms and behavioural dysfunction. Working within inter-disciplinary contexts that include psychological, pharmacological and surgical treatments for neuropsychological disorders will also be discussed.

School Psychology

Discipline Psychology

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) BEHV 7003

Equivalent Subjects LGYA 1205 - Clinical and Forensic Neuropsychology

Restrictions

Students must be enrolled in 1546 Master of Psychology (Clinical Psychology) or 1812 Master of Clinical Psychology or 8108 Doctor of Philosophy/Master of Clinical Psychology

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Draw from appropriate theory to analyse the neuropsychology of neurocognitive disorders (APAC GA: 3.2, 3.5, 4.2.1i, ii &iii, & 4.2.2i)).
2. Demonstrate evidence-based practice skills in neuropsychological assessment and treatment formulation, including in the context of inter-disciplinary interventions (APAC GA: 3.5, 3.6, 4.2.2ii, 4.2.2iii, & 4.2.3iii).
3. Classify and explain the mechanisms of psychoactive drug action (APAC GA: 4.2.1iv).
4. Characterise and explain the common psychopharmacological treatments (APAC GA: 4.2.1iv).
5. Demonstrate applied understanding and competency in the delivery of at least one specific neurocognitive assessment measure (APAC GA: 3.4, 3.6, 4.2.2ii & 4.2.2iii).

Subject Content

1. Neuroanatomy for Clinical Psychologists
2. Neuropsychological Assessment (Neuropsychological Methods, Screening & Interdisciplinary Practice)
3. Disorders of Executive Control, Social Cognition & Emotion Dysregulation
4. Alcohol & Substance Use
5. Memory and Neurodegenerative Disorders
6. Neuropsychology of Psychiatric Disorders
7. Acquired Brain Injuries
8. Neuropsychological Rehabilitation & Intervention
9. Introduction to Psychopharmacology
10. Psychopharmacology: Depression & Anxiety
11. Psychopharmacology: ADHD & Psychotic Disorders
12. The Interplay Between Psychopharmacology & Clinical Psychology

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	1 hour	20	N	Individual

BEHV 7010 Clinical Psychopathology 1

Credit Points 10

Legacy Code 101812

Coordinator Craig Gonsalvez (https://directory.westernsydney.edu.au/search/name/Craig Gonsalvez/)

Description This subject provides a comprehensive examination of the nature, context and assessment of adult psychopathology. Students will review and critically evaluate the origins and structure of current diagnostic systems, and examine the diagnostic criteria for a range of major psychopathological syndromes and the range of contexts within which they may arise. Skills in balancing the assessment of adult disorders with counselling and engagement through a clinical diagnostic interview will be acquired. Beginning level skills in the formation of adult disorders will also be acquired.

School Psychology

Discipline Psychology

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 1201 - Clinical Psychopathology LGYA 0485 - Advanced Psychopathology

Restrictions

Students must be enrolled in 1546 Master of Psychology (Clinical Psychology) or 1812 Master of Clinical Psychology

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss the history and characteristics of the DSM and ICD and critically evaluate their strengths and limitations as classificatory systems of adult psychopathology.
2. Outline the diagnostic features and associated characteristics of the major DSM-5 psychological disorders (anxiety, mood, trauma and obsessive-compulsive and related disorders).
3. Describe the current major theories of the aetiologies of these disorders, identify risk and resilience factors and understand the diverse contexts within which such difficulties may arise.
4. Demonstrate competence in the assessment of adult psychopathology and making relevant and adequate diagnoses, case formulations and management plans for common psychological disorders. Conduct the clinical diagnostic interview in an interpersonally and culturally sensitive manner.

Subject Content

Theoretical and empirical foundations of psychopathology.
Clinical assessment of psychopathology.
Current classification systems (DSM-5 and contrasted to ICD 10, where relevant)
Anxiety disorders.
Mood disorders (including depressive and bipolar disorders).
Trauma and stressor-related disorders.
Obsessive-compulsive and related disorders.
DSM as a construction of disorder and relational problems that may be a focus of clinical attention.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Short Answers – Exam Part A: Mid Semester Part B: End of semester; both in class	1 hour (Part A) 1 hour (Part B)	30	Y	Individual
Practical – Clinical Skills Presentation	20 minutes	30	Y	Individual
Clinical Diagnostic Interview a. Practical skills demonstration (essential competencies) b. Practical skills demonstration (flexibility, reliability, generalisability)	50 minutes	40	Y	Individual

BEHV 7011 Clinical Psychopathology 2

Credit Points 10

Legacy Code 101813

Coordinator Janet Conti (https://directory.westernsydney.edu.au/search/name/Janet Conti/)

Description This subject continues the study of clinical psychopathology. Students will examine the nature and assessment of a range of complex psychopathological syndromes, including schizophrenia and other psychotic disorders; eating disorders; personality disorders; substance-related disorders; dissociative disorders; and sexual and gender identity disorders and psychopathology presentations in diverse contexts (such as forensic settings and working with families).

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) BEHV 7010

Restrictions

Students must be enrolled in 1812 Master of Clinical Psychology.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the diagnostic features and associated characteristics of psychopathological problems likely to be encountered in clinical practice
2. Describe the diagnostic features and associated characteristics of more complex less common, and co-morbid psychopathology diagnostic categories.
3. Apply the current major theories of the aetiologies of these disorders, identify vulnerability and resilience factors, and treatment alternatives
4. Develop skills in complex clinical formulations that are built upon theories, diagnostic characteristics and tailored to individual clients within their unique contexts
5. Develop clinical skills in the recognition of the various psychopathological issues and, where appropriate, the need for referral or involvement of other specialist services and health practitioners.
6. Develop skills in report writing for complex psychopathological issues that includes a comprehensive diagnostic formulation for the foundation for the proposed intervention

Subject Content

Schizophrenia and other psychotic disorders
Feeding and eating disorders
Personality disorders
Substance-related disorders
Sexual dysfunctions
Sleep/wake disorders
Dissociative disorders
Common psychopathological disorders in Forensic populations
Somatic symptom and related disorders
Family systems assessment

Assessment

BEHV 7012 Clinical Research Methods

Credit Points 10

Legacy Code 101814

Coordinator Andrew McKinnon (https://directory.westernsydney.edu.au/search/name/Andrew McKinnon/)

Description The ability to understand and critique empirical research findings, and to evaluate the efficacy of therapeutic interventions, is essential to the professional psychologist as a scientist-practitioner. This subject equips students with advanced skills in utilising the research literature to guide and enhance their professional practice, design interventions to test clinically relevant hypotheses, and critically evaluate the effectiveness of existing research based on empirical evidence. It includes instruction in both quantitative and qualitative research design, program evaluation, single case designs and pilot studies.

School Psychology

Discipline Psychology

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 0492 - Advanced Research Design

Restrictions

Students must be enrolled in 1546 Master of Psychology (Clinical Psychology), 1812 Master of Clinical Psychology or 1814 Master of Professional Psychology.

Assumed Knowledge

Years 1-4 Undergraduate psychology level research design, methods, and analysis.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Recognise research design and methodology as a way of thinking, problem-solving, and approaching substantive clinically-relevant research questions (APAC GA: 3.2).
2. Evaluate and critique theoretical and applied literature to inform research evidence-based practice (APAC GA: 3.16, 4.2.1i & 4.2.3iv).
3. Evaluate a range of research methodologies to design a project that assesses clinical outcomes in psychology practice, including relevant transdisciplinary research for inter-professional practice (APAC GA: 3.9 & 3.17).
4. Conduct and report on a single case design project in relation to a clinically relevant area (APAC GA: 3.8 & 3.17).

Subject Content

Evidence-Based Practice and principles of research design and implementation.
Program and service evaluation.
Single-case experimental designs (SCEDs).
Pilot studies, assessing feasibility and acceptability.
Quasi-experimental designs and Randomised Control Trials.
Systematic Reviews, Meta-analysis, and Clinical Practice Guidelines and transdisciplinary research.
Qualitative Research Designs and Analyses.
Designing a project or developing an assessment process in professional psychology practice.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

BEHV 7013 Cognitive Science: Research and Application

Credit Points 10

Legacy Code 800173

Coordinator Jennifer Macritchie (https://directory.westernsydney.edu.au/search/name/Jennifer Macritchie/)

Description Cognitive science is the interdisciplinary scientific investigation of the mind. Contemporary research in cognitive science conducted by members of the MARCS Institute forms the core of the unit. Research areas to be addressed: plasticity and learning; action and coordination; nonverbal communication; and ageing and cognition. Examples of research questions: Can learning be unconscious? What mechanisms enable interpersonal coordination as seen in music and dance ensembles? Why is it that music elicits strong emotions? How does attention influence perception? How does conditioning explain human preferences? Does social facilitation apply to humans interacting with robots? In what way does ageing impact upon decision making? Applications to the arts, education, health, aging, design, human-machine interaction and artificial intelligence will be discussed.

School Graduate Research School

Discipline Psychology

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Assumed Knowledge

Master of Research core subjects: Research Design 1, Research Literacies or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate understanding of theories and concepts in cognitive science regarding plasticity, nonverbal communication, action and coordination, and ageing.
2. Apply concepts from cognitive science to a real-world practical problem.
3. Discuss interdisciplinary research conducted in one of three programs in MARCS.
4. Use software to create experimental stimuli for an experiment in one of the content areas.
5. Construct and conduct a cognitive science experiment.
6. Develop testable hypothesis and communicate experiment rationale, design, results and implications

Subject Content

1. Introduction to cognitive science: definitions, overview and particular perspectives.
2. Sensory and cognitive plasticity and functional fixedness. For example: evaluative conditioning and preferences; unconscious learning; auditory and visual perception and attention.
3. Action and coordination. For example, sensorimotor processes in interpersonal coordination; creativity, learning and memory in music and dance.

4. Nonverbal communication and mediation. For example, music and emotion; social processes in human-robot interaction; experience design; robots and pedagogy.
5. Ageing and cognition: For example, hearing-related problems; decision-making and aging.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	10 questions x 10 weeks	40	N	Individual
Experiment creation and reporting	Experiment and 10 minute presentation	40	N	Individual
WIKI page	1000 words	20	N	Individual

BEHV 7014 Core Skills and Ethical Practice

Credit Points 10

Legacy Code 101810

Coordinator Michael Gascoigne (https://directory.westernsydney.edu.au/search/name/Michael Gascoigne/)

Description In this subject students apply core evidence-based counselling and intervention skills that are responsive to working within culturally and linguistically diverse communities, including and Aboriginal and Torres Strait Islander Australians. This subject addresses key cultural ethical, legal, and professional aspects of psychological practice; including working within one's competency and within inter-disciplinary contexts and the management of risk across the lifespan, including child protection. The theoretical underpinnings of evidence-based intervention strategies and ethical practice across the lifespan are critically examined, including from Aboriginal and Torres Strait Islander perspectives. Students develop their professional understanding of the codes and guidelines of the Australian Psychological Society and Psychology Board of Australia, and the relevant State and Commonwealth Acts and Regulations of Parliament. Major practice problems faced by psychologists and modes of resolution acceptable within the profession are considered. Students reflect on professionalism in psychology practice and how their own perspectives, world views, values and competencies may inform their processes ethical decision-making. Students will also identify areas for ongoing professional development.

School Psychology

Discipline Psychology

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 0477 - Core Skills and Ethical Practice LGYA 1198 - Core Skills Counselling and Ethical Practice

Restrictions

Students must be enrolled in 1546 Master of Psychology (Clinical Psychology), 1812 Master of Clinical Psychology or 1814 Master of Professional Psychology

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Implement evidence-based counselling and intervention skills within a framework of problem exploration, reflection on one’s own practice and identifying areas for improvement (APAC GA: 3.2, 3.14 & 3.15).
2. Identify, demonstrate and reflect on key skills in building a therapeutic alliance, including attending and active listening, relational skills, including empathy, building motivation to change and goal setting, and evaluating change in a culturally responsive way that can be applied across all forms of psychotherapy (APAC GA: 3.3 & 4.2.2iv).
3. Implement therapeutic practices to ensure, inform and evaluate safe ps

Subject Content

Overview and critical evaluation of counselling and intervention models and frameworks, and their application including basic skills of active listening and responding, communication skills in three phases of problem-focused counselling, and forming a positive working alliance with clients and colleagues.
Therapeutic skills for challenging, goal setting and helping clients choose action strategies.
Cultural adaptations and responsiveness in counselling skills, including working with Aboriginal and Torres Strait Islander people.
Managing risk over the lifespan: Risk assessment, crisis management and child protection.
Managing risk over the lifespan: Risk assessment, crisis management and child protection. 5. Ethical contexts and guides: Rationale for professional codes, relating codes to moral theory, and overview of APS and Registration Board codes and the codes and the APS ethical guidelines for the provision of psychological services for, and conduct of psychological research with, Aboriginal and Torres Strait Islander peoples (2015).
Application and evaluation of moral theory and professional codes to a range of professional issues, including professional boundaries in relationships with clients, working within inter-professional contexts and within one's competency.
Ethical decision making: Sequential steps, meta-ethical considerations and moral theory to inform responding to and dealing with ethical dilemmas.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

BEHV 7015 Core Therapeutic Modalities

Credit Points 10

Legacy Code 102360

Coordinator Fran Doyle (https://directory.westernsydney.edu.au/search/name/Fran Doyle/)

Description This subject provides an introduction to the theory and practice of Cognitive Behaviour Therapy (CBT), an evidence-based form of therapy and an important therapeutic tool for psychologists working in diverse settings. Students in this subject will develop foundational skills in CBT assessment, formulation and treatment and a critical understanding of CBT application across conditions, populations and social settings. In addition, students will be introduced to family therapy (FT), including different models of FT, assessment, case formulation and FT application across different family situations. CBT and FT will be contrasted and examined for their application to a range of common psychological presentations, including ways to tailor responsive interventions in Aboriginal and Torres Strait Islander and multicultural contexts.

School Psychology

Discipline Psychology

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1814 Master of Professional Psychology.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain and critically evaluate theories and models of Cognitive Behavioural Therapy (CBT) and Family Therapy (APAC GA:3.2).
2. Implement a CBT assessment, formulation, therapeutic intervention and reflect on practice (APAC GA: 3.3, 3.6, 3.9, 3.15).
3. Contrast CBT and Family Therapy interventions across a range of psychological problems (APAC GA:3.2).
4. Examine therapeutic complexities and develop ways to evaluate and tailor CBT and Family Therapy approaches in Aboriginal and Torres Strait Islander peoples and multicultural contexts (APAC GA:3.2, 3.3, 3.7).

Subject Content

1. Theoretical and empirical foundations of Cognitive Behaviour Therapy (CBT)
2. CBT issues and methods
3. CBT assessment and case formulation
4. CBT application to common psychological problems and settings.
5. CBT related therapeutic approaches
6. Theoretical and empirical foundations of Family Therapy (FT)
7. Family therapy issues and methods
8. Introduction to family therapy assessment, and case formulation
9. Introduction to family therapy applications
10. Tailoring CBT in Aboriginal and Torres Strait Islander and multicultural contexts

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

BEHV 7016 Digital Social Research in Action

Credit Points 10

Legacy Code 102253

Coordinator Erika Smith (https://directory.westernsydney.edu.au/search/name/Erika Smith/)

Description This subject engages students in the practices of digital social research through a simulation of a professional research consultancy. Students will construct and apply a digital social science approach for an internal or external client brief. Students will engage with client and stakeholder needs through their role as a consultant as they carry out the digital social research project for their client. In doing so, students engage with the ethical and moral implications of using digital social data and discover the opportunities to apply and communicate digital social research methods in real world settings.

School Social Sciences

Discipline Sociology

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Knowledge of digital social research.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Determine opportunities to apply digital social science methods in innovative contexts;
2. Justify the selection and application of digital social science methods for a particular problem;
3. Construct and apply a digital social science approach to research;
4. Communicate digital social science projects in a manner appropriate for the discipline, audience and purpose (e.g. audience-appropriate structure, content, and referencing style);
5. Manage client and stakeholder expectations to ensure ethical and moral conduct in the use of digital social science data.

Subject Content

Research conceptualisation including research aims, objectives, and questions
The importance of social theory for digital research

Research designs and analytical frameworks for digital social research

Client and stakeholders engagement
Stakeholder mapping and management of expectations
Ethical and moral use of digital social data
Progress tracking for successful project delivery
Report writing and strategic communication

Assessment

Report	3,000 words	50	N	Individual

BEHV 7018 Integrated Practices 3: Emotions, Embodiment and Connection

Credit Points 20

Legacy Code 102372

Coordinator Melissa Maclean (https://directory.westernsydney.edu.au/search/name/Melissa Maclean/)

Description This subject presents and explores ways of working therapeutically with trauma. The interpersonal neurobiologists' focus of Mind/Body connection features in detail in this subject. Work with emotions, embodiment and the counsellor/client relationship as instruments of therapeutic change will be considered. Students will learn what it means to be a trauma-sensitive therapist and develop techniques and methods for working across the spectrum of trauma responses including dissociation. A range of psychotherapeutic models will feature such as somatic therapies, sensorimotor psychotherapy, emotionally focused therapy, and notions of 'felt sense'. Complementary modes of healing, such as mindfulness, breathwork and the practices of yoga and meditation will be considered for what they can offer to a trauma-informed approach to therapy. Students will develop skills in working with emotions and nonverbal communication, as well as recognizing how the 'spoken' incorporates the physical.

WELF 7013 AND
WELF 7010 AND
WELF 7006 AND
WELF 7014

Co-requisite(s) WELF 7002

Restrictions

Students must be enrolled in 1817 M Psychotherapy and Counselling.

Assumed Knowledge

Concurrent or previous study of any foundational subject in counselling.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Reflect constructively on the concepts of emotion, embodiment and connection and explore their implications for the practice of psychotherapy and counselling.
2. Critically analyse how findings from contemporary neuroscience can be integrated into trauma-informed therapy from an interpersonal perspective.
3. Evaluate concepts and use of emotions and somatic awareness across different approaches to psychotherapy, including sensorimotor psychotherapy, somatic response therapy, gestalt therapy, the PTSD trauma model, emotionally focused therapy, constructivist self-development theory (CSDT)
4. Recognise and demonstrate the use of emotions, 'felt sense' and somatic awareness within a therapeutic relationship, to assist clients to connect with themselves and others, particularly in relation to healing from trauma.
5. Effectively practice interpersonal counselling under supervision

Subject Content

1. Examination of the mind\body relationship in response to trauma from the perspective of contemporary neuroscience.
2. Exploration of working with emotions and somatic responses in the context of the talking therapies.
3. Understanding the specific features of the therapeutic relationship in the context of working with trauma.
4. Consideration and experiential learning of trauma informed therapeutic models, such as sensorimotor psychotherapy, neurosequential therapy, and emotion focused therapy.
5. Understanding the context and application of complementary practices such as mindfulness, EMDR, yoga, meditation and breathwork in counselling and psychotherapy.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Critical Review	1,500 words	30	N	Individual
Essay	1,750 words	30	N	Individual
Reflection	1,750 word paper plus 20 min of video examples selected from 2x30 min role-plays completed = 2750 word equivalent total	40	N	Individual

BEHV 7020 Learning and Processing Human Language

Credit Points 10

Legacy Code 800171

Coordinator Caroline Jones (https://directory.westernsydney.edu.au/search/name/Caroline Jones/)

Description How do humans learn and process language, in its spoken, gestural, and written forms? This subject will equip students with theoretical foundations and practical understandings of how to read and conduct research in this area. Topics may include research areas such as language acquisition, language use and communication, word recognition, reading development and disorders, speech perception and production. In addition, a review of data collection and analysis techniques will be provided. The subject will include lecture and laboratory experimental work. The subject will be focused on research currently conducted by members of the MARCS Institute.

School Graduate Research School

Discipline Psychology

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Assumed Knowledge

Master of Research core subjects: Research Design 1, Research Literacies or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse and synthesise research ideas in learning and processing human language with a focus on speech articulation, speech perception, word recognition, language learning, reading, and multisensory processing
2. Identify and formulate an empirical research question and develop testable hypotheses
3. Apply skills in using relevant hardware and/or software (e.g., articulatory equipment, perception experiment software, Alveo cloud computing platform for large datasets)
4. Plan and conduct a straightforward empirical research project (e.g. experiments, modelling, corpus analyses)
5. Clearly communicate scientific ideas and results in written and spoken presentation formats

Subject Content

1. Introduction to research areas within human language learning and processing
2. Speech perception and spoken word recognition
3. Speech production: acoustic and articulatory measures
4. Learning and processing native languages
5. Learning and processing subsequent languages
6. Bilingual and multilingual language processing
7. How the development of reading affects language learning and processing
8. Multisensory language processing

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Online Quiz	5 questions x 2 readings per week	40	N	Individual
Practical demonstration of experiment and Written report	Running of experiment and 1000 word report	30	N	Individual
Oral presentation and Written report	20 minutes, 1500 word report	30	N	Group

BEHV 7021 Neuroscience Methods

Credit Points 10

Legacy Code 800192

Coordinator Yossi Buskila (https://directory.westernsydney.edu.au/search/name/Yossi Buskila/)

Description A multidisciplinary team will provide an introduction to several aspects of neuroscience including cellular, computational, behavioural and biomedical neuroscience. The program will provide a strong foundation in modern neuroscience for those wishing to pursue further independent research in the field. With a focus on real-world neuroscience research, topics include introductory biology, computational modelling, biosignal acquisition, signal processing and data mining. The subject will include lecture and laboratory work.

School Graduate Research School

Discipline Psychology

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects BEHV 7030 - Quantiative Methods in Neuroscience

Assumed Knowledge

Students should have at least background/undergraduate knowledge in one or more of the following: mathematics, biology, chemistry, physics, physiology, electronics or similar.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate understanding of the nervous system, its basic functions.
2. Describe the basic structure of neurons.
3. Understand the basis of the resting membrane potential, Nerst and Goldman equations.
4. Describe the dynamics of the action potential, neural excitability, synapses, plasticity, integration and facilitation.
5. Describe the methodology of various neuroscience methods incl. patch clamp and microneurography.
6. Develop basic computational neural models.
7. Understand the utility and pitfalls of various biomedical devices for neural integration.

Subject Content

1. Introduction to the nervous system, basic functions and structure of neurons.
2. Cellular neuroscience
3. Computational neuroscience
4. Behavioural neuroscience
5. Biomedical neuroscience

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	1 hour each	40	N	Individual
Report	1000 words	30	N	Individual
Report	1500 words	30	N	Individual

BEHV 7025 Professional Psychology Placement

Credit Points 0

Legacy Code 102539

Coordinator Paul Strutt (https://directory.westernsydney.edu.au/search/name/Paul Strutt/)

Description This placement subject provides students with an opportunity to apply knowledge gained in coursework subjects to professional practice and to practice, under clinical supervision, basic assessment and intervention skills with real clients. Each student must undertake a minimum of 300 hours of supervised placements, participate in the mandatory workshops and present at a case presentation to complete the course. This requirement is consistent with standards prescribed by APAC, the course accrediting body.

School Psychology

Discipline Psychology

Student Contribution Band

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) BEHV 7015 AND
BEHV 7029 AND
BEHV 7014 AND
BEHV 7003

Restrictions

Students must be enrolled in 1814 Master of Professional Psychology.

Learning Outcomes

1. Demonstrate interviewing skills, psychological assessment, and case-formulation competencies at a beginner's level for one or two highly prevalent psychological problems, including with culturally diverse populations, including Aboriginal and Torres Strait Islander peoples (APAC GA: 3.2, 3.3, 3.5 & 3.6),
2. Apply psychometric and clinical assessment techniques to a highly prevalent health, disability, or mental health problem (APAC GA: 3.4, 3.5 & 3.6).
3. Demonstrate advanced-beginner competencies in core counselling techniques, including with culturally diverse populations, including Aboriginal and Torres Strait Islander peoples (APAC GA: 3.3 & 3.7),
4. Demonstrate intervention skills at the advanced beginner level in one empirically supported treatment approach (e.g., motivational interviewing, behaviour therapy, cognitive therapy) for a highly prevalent health or mental health problem, including with culturally diverse populations, including Aboriginal and Torres Strait Islander peoples (APAC GA: 3.2, 3.3, 3.9 & 3.16).
5. Display professionalism, professional communication competencies and ethical conduct in accordance with the Code of Conduct endorsed by the Psychology Board of Australia and meet all of the course inherent requirements. This includes professional engagement with and showing respect for the skills and contributions of other involved professionals (APAC GA: 3.10, 3.11, 3.12 & 3.13).
6. Comply with accreditation requirements concerning practicum, casework and supervision hours associated with such a placement (APAC GA: 3.2-3.16).
7. Conceptualise and communicate clinical information at the formal professional level
8. Demonstrate scientist-practitioner and reflective practitioner meta-competencies at the beginner level. This includes evaluating the effectiveness of own practice and making changes as required (APAC GA: 3.11,3.12, 3.14 & 3.15).

Subject Content

1. Supervised clinical placement in a setting relevant to the specific program.
2. Attendance and participation in three placement experience workshops.

Special Requirements

Legislative pre-requisites

Special Requirements - NSW Health Legislative Prerequisites ~~Pre-requisites~~

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and compete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website

- http://training.gov.au (http://training.gov.au/)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Assessment

BEHV 7027 Psychological Interventions 1

Credit Points 10

Legacy Code 101213

Coordinator Evelyn Smith (https://directory.westernsydney.edu.au/search/name/Evelyn Smith/)

Description This subject covers the theory and practice of Cognitive Behaviour (CBT) from a competency-based perspective. The competency paradigm is introduced first before key competencies including CB-Assessment, formulation, psychoeducation, behavioural (behavioural activation, exposure therapy and behavioural experiments) and cognitive intervention techniques are discussed. For each competency domain, knowledge (theory, models and principles), knowledge-application (procedural knowledge), technical skills (e.g., socratic dialogue) and relationship skills (engagement, collaboration, and collaborative empiricism) are addressed. Higher-order integrative competencies including the use of CBT in multicultural contexts, and meta-competencies such as scientist-practitioner and reflective-practitioner competencies are discussed towards the end of the subject. In alignment with competency-based pedagogies, learning activities include didactic presentations, knowledge-application tasks and skills training within small groups, and assessments include a demonstration of competence appropriate for a developing CB practitioner.

Discipline Psychology

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYB 5195 - Psychological Interventions 1 LGYA 1202 - Cognitive Behaviour Therapy Theory and Practice

Restrictions

Students must be enrolled in 1546 Master of Psychology (Clinical Psychology) or 1812 Master of Clinical Psychology

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and describe the core features of CBT and its historical and theoretical foundations (APAC GA: 4.2.1i)
2. Critically analyse the differences and similarities between various CBT techniques (APAC GA: 4.2.1i)
3. Demonstrate the core CBT treatment techniques as applied to common psychological disorders (APAC GA: 3.2, 3.5, 3.14, 3.15, 4.2.1i, 4.2.1iii, 4.2.2ii, 4.2.3i)
4. Demonstrate competence in basic CBT assessment techniques, formulation, and treatment planning (APAC GA: 3.2, 3.6, 3.14, 3.15, 4.2.1i, 4.2.2ii, 4.2.2iii, 4.2.3i)
5. Evaluate the effectiveness of CBT for common psychological disorders, including in multicultural contexts. (APAC GA: 3.2, 3.3, 3.7, 3.9, 4.2.1iii, 4.2.2iv, 4.2.3ii)
6. Demonstrate ability to communicate appropriately tailored client formulations and treatment plan (APAC GA: 3.3, 3.8, 3.14, 3.15, 4.2.3i)

Subject Content

Historical and Theoretical foundations of CBT
Cognitive Behaviour Assessment: Issues and Methods
Cognitive Behavioural Case Formulation
CBT Psychoeducation
Principles, procedures and applications of Behavioural techniques including exposure therapies, behavioural activation, behavioural experiments and homework.
Principles, procedures and applications of cognitive techniques including cognitive restructuring and socratic dialogue
Integrative competencies including the use of CBT in culturally and linguistically diverse contexts
The role of scientist-practitioner and reflective-practitioner meta-competencies to develop and maintain career-long competence

Assessment

BEHV 7029 Psychopathology: Theory and Practice

Credit Points 10

Legacy Code 102362

Coordinator Quincy Wong (https://directory.westernsydney.edu.au/search/name/Quincy Wong/)

Description This subject provides an examination of a range of major categories of psychopathology, including more typical presentations for psychological treatment and inter-professional indications and communication. Students will critically evaluate the common diagnostic systems of adult psychopathology, and examine the diagnostic criteria for a range of major psychopathology presentations. The subject will equip students with skills in the application of diagnostic and psychometric assessment of these psychological disorders and the ability to construct a case formulation with systemic and cultural considerations, including for Aboriginal and Torres Strait Islander people to inform psychological treatment interventions. Students will also develop skills in discerning when, why and how to collaborate and communicate with multidisciplinary teams in inter-professional context.

School Psychology

Discipline Psychology

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects BEHV 7010 - Clinical Psychopathology 1

Restrictions

Students must be enrolled in 1812 Master of Clinical Psychology or 1814 Master of Professional Psychology.

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Evaluate the history and characteristics of the Diagnostic and Statistical Manual of Mental Disorders (DSM) and International Classification of Diseases (ICD), and their strengths and limitations as classificatory systems of adult psychopathology (APAC GA: 3.16, 4.2.1i, 4.2.1iii & 4.2.2i).
2. Assess the diagnostic features and associated characteristics of major and comorbid psychological disorders and indications for inter-professional treatments, collaboration and communication. (APAC GA: 3.3, 3.4, 3.5, 3.8, 3.10, 3.11, 3.12, 4.2.1iii, 4.2.2ii, 4.2.2iii & 4.2.3iii).
3. Examine the current major theories of the aetiologies of these disorders, identify risk and resilience factors and apply these across the lifespan, and within a systemic and culturally informed framework, including for Aboriginal and Torres Strait Islander peoples. (APAC GA: 3.2, 4.2.1i & 4.2.1ii).
4. Perform a clinical diagnostic interview that assesses adult psychopathology to generate, communicate and reflect on provisional and differential diagnoses and case level formulation to inform treatment planning that takes into consideration systemic and cultural contexts (APAC GA: 3.3, 3.6, 3.14, 3.15 & 4.2.2iii).

Subject Content

Theoretical and empirical foundations of psychopathology, including current diagnostic classification systems ? International Classification of Diseases, 11th revision (ICD 11), Diagnostic and Statistical Manual of Mental Disorders, 5th edition (DSM 5).
Clinical and psychometric assessment of psychopathology, including risk assessment.
Case formulation that includes systemic and cultural considerations in client presentations.
Anxiety disorders.
Mood disorders.
Trauma and stressor-related disorders.

Obsessive-compulsive and related disorders.
Eating and Feeding disorders.
Schizophrenia and other psychotic disorders.
Personality Disorders.
Substance Related Disorders.

BEHV 7031 Applied Research Project

Credit Points 20

Legacy Code 102696

Coordinator Karen Moses (https://directory.westernsydney.edu.au/search/name/Karen Moses/)

Description This is a 20 credit point year-long subject taken over two sessions (10 credit points in each session). The research project provides an opportunity to construct an informed research question or hypothesis. This justified research proposal is completed and investigated independently by students under supervision, over a one-year period. It is conducted in an area of relevance to professional practice, with a central focus on the scientific analysis of a problem or hypotheses. Students can choose from a range of approved research designs, but must undertake and write an analytic review of the relevant literature, formulate a research question, design of an appropriate method, collect and analyse data, interpret findings, and effectively communicate their research in the form of an empirical research report.

School Psychology

Discipline Psychology

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) BEHV 7012

Equivalent Subjects LGYA 0494 Applied Research Project and Thesis

Restrictions

Students must be enrolled in program 1546 Master of Psychology (Clinical Psychology) and 1812 Master of Clinical Psychology, or the coursework component of 8108 PhD/Master of Clinical Psychology.

Assumed Knowledge

Knowledge of undergraduate level research design, methods, and analysis.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Construct an informed research question or hypothesis and a justified research proposal that is relevant to clinical psychology practice (APAC GA: 3.2).
2. Determine and communicate appropriate research designs, methodologies, and analysis strategies that will address the research question/hypothesis effectively (APAC GA: 3.16).
3. Prepare an ethics application and complete the process for obtaining ethics clearance for research (APAC GA: 3.13).
4. Write an analytic literature review at a professional level of competence (APAC GA: 3.16 & 4.2.1i).
5. Complete an independent piece of research study in an area relevant to professional practice at a professional level of competence (APAC GA: 3.17).
6. Effectively communicate research in the form of a written empirical report (journal article) (APAC GA: 3.8).

Subject Content

Negotiating a supervision contract with an academic supervisor.
Individual study in regular consultation with supervisor; including providing a regular report of progress to the supervisor.
Attendance at seminars and workshops conducted from time-to-time to support completion of the research project.
Writing a research proposal; and obtaining ethics clearance.
Writing a literature review.
Determining a research question and/or hypothesis.
Devising a research design, methodology, and analysis strategy.
Interpreting research findings.
Writing an empirical report (journal article).

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

BEHV 7032 Clinic Placement B

Credit Points 10

Legacy Code 102693

Coordinator Karen Moses (https://directory.westernsydney.edu.au/search/name/Karen Moses/)

Description This placement subject comprises 220 hours of placement activity accrued one-day a week over 24 weeks, builds on knowledge and skills acquired in coursework subjects and extends and consolidates competencies acquired in Clinic Placement A. The aim of the subject is to establish and enhance, under close supervision, a range of clinical psychology assessment and intervention skills applied to real clients. Regular and systematic video-recording of trainee-client sessions and supervisor feedback guided by competency-based principles provide trainees with an excellent opportunity to acquire, consolidate and generalise a wide range of competencies important for clinical psychology practice.

School Psychology

Discipline Psychology

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) BEHV 7006 AND
BEHV 7005

Restrictions

Students must be enrolled in 1812 - Master of Clinical Psychology.

Assumed Knowledge

Theoretical knowledge of ethical professional practice, psychopathology, and evidence-based psychology interventions.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. After successful completion of this Unit, students will be able to demonstrate at least a satisfactory level of skills performance for this stage of professional training as determined by relevant competency-based instruments (currently, the Clinical Psychology Practicum Competencies Scale (CYPRS) and the Clinical Skills Assessment Tool (C-SAT) in the following domains:
2. 1. Demonstrate core evidence-based clinical psychology assessment and formulation competencies at an intermediate level for common psychological problems, including with culturally diverse / indigenous populations and with consideration to the context in which a client lives (APAC GA: 3.2, 3.3, 3.4, 3.5, 3.6, 3.8, 3.9, 4.2.1, 4.2.2i-iii, 4.2.3iv).
3. 2. Demonstrate core evidence-based clinical psychology intervention competencies at an intermediate level for common psychological problems, including cognitive-behaviour interventions identified in the structured competency instruments (e.g.C-SAT and CYPRS), including with culturally diverse and indigenous populations (APAC GA: 3.2, 3.3, 3.7, 3.8, 3.9, 4.2.2iv, 4.2.3i, 4.2.3ii & 4.2.3iv).
4. 3. Demonstrate therapist-client and supervisee-supervisor relationship competencies at an intermediate level (APAC GA: 3.10, 3.11, 3.12 & 4.2.3iii).
5. 4. Display professionalism, professional communication competencies, ethical judgment and ethical conduct in accordance with the Code of Conduct endorsed by the Psychology Board of Australia and meet all of the program inherent requirements. This includes professional engagement with and showing respect for the skills and contributions of other involved professionals (APAC GA: 3.3, 3.8, 3.9, 3.10, 3.11, 3,12, 3,13 & 4.2.3iii).
6. 5. Demonstrate scientist-practitioner and reflective practitioner meta-competencies at the advanced- beginner level. This includes evaluating the effectiveness of own practice and making changes as required (APAC GA: 3.11, 3.12, 3.14 & 3.15).
7. 6. Evidence an ability to integrate knowledge of assessment and formulation into a professional case report that meets standards for evidence-based client care and written professional communication. (APAC GA: 3.4, 3,5, 3.6, 3.7, 3.8, 3.9, 3.16, 4.2.2, 4.2.3i & 4.3.2ii).

8. 7. Comply with accreditation requirements concerning practicum, casework and supervision hours (APAC GA: 3.1-3.17, 4.2.1, 4.2.2 & 4.2.3).

Subject Content

Supervised placement in the Western Sydney University Psychology Clinics.
Increased observation through simulation. Supervision via zoom.

BEHV 7033 Professional Placement 1

Credit Points 10

Legacy Code 102694

Coordinator Brooke Donnelly (https://directory.westernsydney.edu.au/search/name/Brooke Donnelly/)

Description This placement subject is an external placement that provides students the opportunity to practise, under clinical supervision, clinical psychological assessment and intervention to a range of clients across age ranges, severity levels and psychological disorders. The aim is to build upon and extend knowledge, skills, relationship and professional attitude competencies acquired during a supervised University Clinic placement while working with real clients seeking clinical psychological services within an external agency. Each external placement must comprise a minimum of 200 hours of clinical psychology practicum work of which at least 80 hours must be in face-to-face client work, and all internal and external placements together must comprise a minimum of 1000 practicum hours of which 400 hours must be in face-to-face client work as defined by APAC. Placements are arranged by the Placement Coordinator who is responsible for ensuring that the placement and supervision meet APAC requirements. Students must participate in the mandatory workshops and present a case at the relevant Case Presentation Day (or equivalent by permission in special circumstances).

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) BEHV 7006

Restrictions

Students must be enrolled in program 1812 Master of Clinical Psychology.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate core clinical psychology assessment competencies in the treatment of common psychological problems including with culturally diverse populations, including Aboriginal and Torres Strait Islander peoples, at a developmentally appropriate level (APAC GA: 3.2, 3.3, 3.4, 3.5, 3.6, 3.9, 4.2.1, 4.2.2.i-iii, 4.2.3iv).
2. Demonstrate core evidence-based clinical psychology intervention competencies in the treatment of common psychological problems, including with culturally diverse populations, including Aboriginal and Torres Strait Islander peoples, at a developmentally appropriate level (APAC GA: 3.2, 3.3, 3.7, 3.9, 4.2.2iv, 4.2.3i, ii, iv).
3. Demonstrate therapist-client and supervisee-supervisor relationship competencies in the treatment of a range of client populations and across several psychological disorders at a developmentally appropriate level (APAC GA: 3.10, 3.11, 3.12).
4. Display professionalism, professional communication competencies, ethical judgment and ethical conduct in accordance with the Code of Conduct endorsed by the Psychology Board of Australia and meet all of the program inherent requirements. This includes professional engagement with and showing respect for the skills and contributions of other involved professionals (APAC GA: 3.3, 3.9, 3.10, 3.11, 3.12 & 3.13).
5. Demonstrate scientist-practitioner and reflective practitioner meta-competencies at the advanced-beginner level (APAC GA: 3.12, 3.14 & 3.15).
6. Comply with accreditation requirements concerning practicum, casework and supervision hours (APAC GA: 3.1-3.17, 4.2.1, 4.2.2 & 4.2.3).
7. Conceptualise and communicate clinical information at the formal professional level (APAC GA: 3.5, 3.6, 3.8, 3.11 & 3.16)

Subject Content

Supervised placement in a setting relevant to the specific program. Attendance and participation in placement experience workshops. Present a case at the Case Presentation Day (or equivalent by permission in special circumstances).

Special Requirements - NSW Health Legislative Prerequisites ~~Pre-requisites~~

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and compete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- http://training.gov.au (http://training.gov.au/)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

BEHV 7035 Psychological Approaches to Disability: Theory and Practice

Credit Points 10

Legacy Code 102692

Coordinator Samuel Arnold (https://directory.westernsydney.edu.au/search/name/Samuel Arnold/)

Description This subject offers students a contemporary understanding of the psychological assessment, intervention and evaluation techniques relevant to the support of people with disability. Biological, psychological social and community factors contributing to support will be presented. Ecological, functional and clinical approaches to planning across the life span will be taken, addressing early intervention, childhood, adolescence, adulthood and ageing. A key focus of the subject will be advancing inclusion and quality of life outcomes to enable people with disability to fully participate in society. Current legal, policy and ethical issues will also be discussed, including professional standards for working effectively across multicultural and multidisciplinary contexts.

School Psychology

Discipline Psychology

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1814 Master of Professional Psychology.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Recall and appraise the psychological supports for people with disability across the life-span (APAC GA: 3.2).
2. Demonstrate competence in the assessment of support needs of persons with disability, including their cultural needs (APAC GA: 3.3, 3.6 & 3.15).
3. Develop a management plan to support a person with disability to maximise quality of life through participation and inclusion (APAC GA: 3.9).
4. Apply disability psychology skills to evidence-based assessment, intervention and evaluation processes (APAC GA: 3.4 & 3.7).
5. Critically analyse the psychologistðfs role within a multidisciplinary team and responsibility to act in accordance with contemporary disability policy, legal and ethical conventions (APAC GA: 3.10, 3.11, 3.12 & 3.13).

Subject Content

- Definition of disability and introduction to The Roles and functions of psychologists in The disability sector.
- key diagnostic Categories including autism, Intellectual disability, acquired Brain injury, physical disability, Sensory disability.
- psychological support across The life-span: birth of A child with disability, early intervention and transition to school, school education and transition to adulthood, adulthood, and transition to ageing and end of life.
- psychological assessment, intervention and evaluation of psychological supports across The life span.
- Psychologists?f Roles

BEHV 7037 Psychological Practice in Contemporary Contexts

Credit Points 10

Legacy Code 102808

Coordinator Janet Conti (https://directory.westernsydney.edu.au/search/name/Janet Conti/)

Description The ability to work with mental health issues and psychological distress that arises within a range of contexts is an essential skill for Clinical Psychologists. This subject equips students with skills in assessment, formulation and tailored psychological interventions for those who experience psychological distress within family systems and broader socio-cultural contexts; including abuse and violence; working within medico-legal systems, and broader socio-cultural contexts. The subject will explore theories, psychological techniques and prepare students to working within these settings that include inter-disciplinary collaboration and communication with multidisciplinary health services and legal practitioners. Please note: some of the activities in this subject may include experiential learning, for example where students may be asked to take on the client role using their own lived experience, to provide opportunity for training in therapeutic modalities that are more "real-world". Students may opt-out of these activities without consequence through speaking to the subject coordinator and alternative arrangements for student learning opportunities will be organised.

BEHV 7029 AND
BEHV 7038

Restrictions

Students must be enrolled in 1812 Master of Clinical Psychology.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Create a treatment plan that is tailored to the identified person within their family and socio-cultural context, including Aboriginal and Torres Strait Islander peoples.
2. Apply therapeutic skills in a psychological intervention that conceptualises the person within their psychosocial and cultural context; and reflect on the process of the psychological intervention.
3. Reflect on the roles and functions of clinical psychologists in common interprofessional contexts.

Subject Content

- Family therapy and narrative therapy interventions: working with individuals within their family system and socio-cultural context, including couples therapy and interventions that address power imbalances within family systems; including abuse and violence.
- Working within inter-professional contexts, including medico-legal and forensic investigative psychology, legal issues frequently encountered in psychological practice, and communicating with relevant agencies including report writing.
- Tailoring psychological assessment and interventions to diverse cultural contexts, including when working with Aboriginal and Torres Strait Islander people.

Assessment

BEHV 7038 Assessment and Treatment of Complex Psychological Disorders

Credit Points 10

Legacy Code 102809

Coordinator Janet Conti (https://directory.westernsydney.edu.au/search/name/Janet Conti/)

Description Clinical psychology is a fast-evolving discipline, and practitioners need to be able to respond to changing psychological health needs of a diverse population. This subject will prepare students to expand their skills in clinical assessment of psychopathology, diagnosis and psychological interventions to respond to the needs and preferences and cultural values of clients who experience complex and/or chronic psychological disorders. Responsive practice within the context of the changing demands for clinical psychology services is foregrounded, as is the unique context of Aboriginal and Torres Strait Islander people. This subject will explore the theories, techniques and effectiveness of new and emerging psychological therapies; prepare students for working in multidisciplinary teams; and introduce students to the practice of clinical psychology with more complex client groups. The subject will also examine the professional and organisational roles of clinical psychologists within these settings. Please note: some of the activities in this subject may include experiential learning, for example where students may be asked to take on the client role using their own lived experience, to provide opportunity for training in therapeutic modalities that are more “real-world”. Students may opt-out of these activities without consequence through speaking to the subject coordinator and alternative arrangements for student learning opportunities will be organised.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) BEHV 7027 AND
BEHV 7029

Equivalent Subjects BEHV 7028 - Psychological Interventions 2 LGYA 1563 - Psychological Interventions 3

Restrictions

Students must be enrolled in 1812 Master of Clinical Psychology.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Integrate the diagnostic features and associated characteristics of complex and co-morbid psychological disorders into case formulations (APAC GA 3.5, 3.7, 3.8, 4.2.1i, 4.2.1.ii, 4.2.1iii, 4.2.1iv, 4.2.2i, 4.2.2ii, 4.2.2iii, 4.2.2iv).
2. Assess and evaluate when and how to collaborate with an inter-disciplinary team in the treatment of complex and co-morbid psychological disorders (APAC GA: 3.10, 3.11, 3.12, 4.2.3iii).

3. Plan a psychological intervention responding to the unique attributes of the person within their social and cultural context (APAC GA: 3.2, 3.3, 3.6, 3.7, 3.9, & 4.2.3i, 4.2.3ii, 4.2.3iv).
4. Apply therapeutic skills in a psychological intervention and engage in reflective practice on the process and outcomes of the intervention (APAC GA: 3.6, 3.9, 3.15 & 4.2.3i).

Subject Content

- Theoretical and empirical foundations of the practice of clinical psychology interventions with specific clinical populations with complex presentations.
- Assessment, diagnosis and formulation and psychological treatment interventions for a range of complex clinical populations.
- Introduction of a range of intervention modalities that may be tailored trans-diagnostically and to the unique attributes of the person, family, or community within their cultural context (including with Aboriginal and Torres Strait Islander Australians).
- Skills to work collaboratively within clinical and multidisciplinary teams.

BIOS 0001 Biology (WSTC)

Credit Points 10

Legacy Code 900022

Coordinator Virginia Shepherd (https://directory.westernsydney.edu.au/search/name/Virginia Shepherd/)

Description Biology is the study of the cellular processes that occur within organisms and the interactions that occur between organisms within the biosphere. The subject is therefore seen to have relevance to the lives of students. It is important for students to develop an understanding of the biological principles that will enable them to make informed decisions about the advances that are occurring in biotechnology and biomedical science. Undergraduate study in the life sciences requires the student to have acquired a basic body of knowledge that focuses on the diversity and the unity of living things as well as skills in collecting and analysing information and writing concise and coherent explanations.

School Western Sydney The College

Disease Research Task	5 minute presentation	10	N	Individual
Final Examination	3 hours	40	N	Individual

BIOS 0002 Focus on Biology (WSTC Prep)

Credit Points 10

Legacy Code 700232

Coordinator Anne Bertoldo (https://directory.westernsydney.edu.au/search/name/Anne Bertoldo/)

Description Biology is the study of integrated living systems, from the level of molecular systems that constitute cells to the interactions that occur within and between organisms that together make up the biosphere. This subject will equip students to undertake tertiary level

biological subejcts that emphasise both the unity (cell biology) and diversity (evolution) of living organisms. Students will learn about the basic molecular biological underpinnings of cellular structure and function within an integrated framework that proceeds through major themes of bioenergetics, gas exchange and transport systems within multicellular organisms, inheritance and evolution. Students will develop a fundamental body of essential biological concepts, as well as build skills in collecting and analysing information, and writing coherent explanations.

School Western Sydney The College

Discipline Biological Sciences, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 0 Preparatory subject

Equivalent Subjects BIOS 0003 - Focus on Biology (WSTC) BIOS 0001 - Biology

Restrictions

Students must be enrolled at Western Sydney University, The College.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Conceptualise and describe fundamental properties of living systems.
2. Recall the basic structural organisation of prokaryotic and eukaryotic cells.
3. Explain fundamental cellular processes including membrane transport, photosynthesis and respiration.
4. Explain the basic roles of nucleic acids, proteins, carbohydrates and lipids in cell structure and function.
5. Describe and explain the necessity for processes of gas exchange in multicellular organisms.
6. Describe and explain the necessity for transport systems in multicellular organisms.
7. Describe the manner in which genetic information is passed from generation to generation.
8. Outline at a basic level the process of protein synthesis from a DNA template.
9. Explain in simple terms the concept of evolution through natural selection and changes in gene frequency.
10. Describe basic characteristics of six kingdoms of life within an evolutionary framework.
11. Solve problems, analyse and synthesise information, and draw conclusions.

Subject Content

Topic 1: Cells: The Basis of Life
- Characteristics of living systems
- Prokaryotes and eukaryotes
- Organisation, structure and function of cells
- Overview of evolution of eukaryotic cells
- Emergence of multicellularity
Topic 2: Cells in Action
- Life's building blocks: proteins, nucleic acids, lipids and carbohydrates
- Maintaining a boundary: cell membranes and membrane transport, compartmentalisation of eukaryotic cells
- Energising the biosphere: chloroplasts and photosynthesis
- Fuel for life: mitochondria, cellular respiration, and ATP
Topic 3: Life on Land: Gas Exchange in Multicellular Organisms
- Gas exchange systems in multicellular organisms: overview of evolution
- Stomata, guard cells and transpiration
- The mammalian respiratory system
Topic 4: Life on Land: Transport Systems in Multicellular Organisms
- Transport systems in multicellular organisms: overview of evolution
- Roots and shoots, xylem and phloem: transport in flowering plants
- The mammalian circulatory and excretory systems
Topic 5: Reproduction and Inheritance
- DNA, genes, and chromosomes
- Protein synthesis
- Cell division in eukaryotes
- Aspects of Mendelian Inheritance
- Topic 6: Evolution and Biodiversity
- Natural selection, changes of gene frequency in populations
- hylogeny: six kingdoms, three domains of life
- Themes in evolution
Topic 1: Cells: The Basis of Life
- Characteristics of living systems
- Prokaryotes and eukaryotes
- Organisation, structure and function of cells
- Overview of evolution of eukaryotic cells
- Emergence of multicellularity
Topic 2: Cells in Action
- Life?fs building blocks: proteins, nucleic acids, lipids and carbohydrates
- Maintaining a boundary: cell membranes and membrane transport, compartmentalisation of eukaryotic cells
- Energising the biosphere: chloroplasts and photosynthesis
- Fuel for life: mitochondria, cellular respiration, and ATP
Topic 3: Life on Land: Gas Exchange in Multicellular Organisms
- Gas exchange systems in multicellular organisms:

BIOS 1001 Biodiversity

Credit Points 10

Legacy Code 300802

Coordinator Amy-Marie Gilpin (https://directory.westernsydney.edu.au/search/name/Amy-Marie Gilpin/)

Description How many species walk, fly, swim or slither, crawl, hop, wriggle or just float, hitchhike or move so slowly that they appear not to move at all? No one knows and new species appear almost every day. This subject focuses on this spectacular diversity of living things and the process of evolution. Students explore and classify biodiversity and how organisms function, acquire and assimilate resources and co-ordinate growth and reproduction. Organisms interact with one another and their environment forming a complex set of interactions in ecosystems. It is these interactions that have driven evolution. Ultimately human survival depends on the sustainable use of this biodiversity and ecosystems.

Incompatible Subjects LGYA 3841 - Foundation Biology 2 LGYB 5438 - Biological Sciences 12 LGYB 9635 - General Biology

Assumed Knowledge

Basic knowledge of biology and chemistry.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the characteristics of major biological groups and demonstrate how this information can be used to classify an unknown organism.
2. Explain and provide examples that demonstrate how evolution has given rise to biodiversity.
3. Describe and explain the role of cells, tissues and organs in the structure and function of organisms.
4. Explain how organisms acquire the resources necessary to function.
5. Describe the scientific method and demonstrate how it can be used to test explanations of observations by formulating testable hypotheses and designing experiments.
6. Conduct basic investigations of organisms using microscopy, experimentation and perform data analysis and interpret results.
7. Apply and transfer chemical principles to other contexts such as the origin of life, and how organisms acquire the necessary resources to sustain life.
8. Evaluate data and evidence from scientific literature.

Subject Content

The characteristics of living things and the nature of Biodiversity
Science as a way of knowing
Classification, taxonomy and species
Evolutionary theory
A survey of the major groups of living things from bacteria, viruses, protists and fungi to plants and animals
Evolutionary development of structure and function
The role of living organisms in ecosystems
The Biodiversity crisis
Basic light microscopy observing plants, animals and microbes
Sorting, organising and classifying organisms
Formulation of scientific hypothesises, designing experiments and data analysis

BIOS 1010 Bioscience 1

Credit Points 10

Legacy Code 401002

Coordinator Anna Maceri (https://directory.westernsydney.edu.au/search/name/Anna Maceri/)

Description This subject will be replaced from Autumn 2022 by 401469 Bioscience 1. This subject introduces nursing and midwifery students to the terminology and major introductory concepts related to normal structure and function of the human body and its relationship to performances of activities of living and healthy lifestyle practices.

School Nursing & Midwifery

Discipline Human Biology

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Learning Outcomes

1. Define anatomy and physiology of the human body across the lifespan
2. Identify appropriate terminology to biological concepts and mechanisms
3. Describe the physiological healthy body systems and homeostasis
4. Explain the impact of lifestyle practices that improve people's health literacy with relevance to nursing and midwifery practice
5. Analyse biological concepts of health conditions related to Australian National Health Priority areas

Subject Content

1. To inform nursing and midwifery practice, the following body systems are reviewed
   a. Human genome basics
   b. The integument, cardiovascular, respiratory, digestive, musculoskeletal, nervous, endocrine, reproductive and urinary systems
2. For each system, the concepts addressed are
   a. Fundamentals of Anatomy and Physiology
   b. Levels of body system organisation
   c. Growth and development across the lifespan
   d. Homeostasis and health
   e. Relationship to activities of living and healthy lifestyle practices
   f. Relationship to National Health Priorities - Obesity

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	30 minutes each x 3	20	N	Individual
Case Study	1,000 words	40	N	Individual
Final Exam	1 hour	40	N	Individual

BIOS 1011 Bioscience 2

Credit Points 10

Legacy Code 401006

Coordinator Bashir Sumar (https://directory.westernsydney.edu.au/search/name/Bashir Sumar/)

Description This subject will be replaced from Autumn 2022 by 401470 Bioscience 2. This subject extends knowledge gained in Bioscience 1 and introduces nursing students to concepts associated with alterations in health and wellness as a consequence of life transition. It includes an introduction to pathophysiology, pharmacology, immunology and microbiology. The subject also focuses on the impact of microorganisms on the health of people and the body's natural defences, as well as pharmacological interventions, in dealing with infections and injuries and its significance for nursing.

School Nursing & Midwifery

Discipline Human Biology

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Co-requisite(s) BIOS 1010

Equivalent Subjects BIOS 1021 - Introduction to Health Breakdown

Restrictions

Students must be enrolled in 4691 Bachelor of Nursing or 4693 Bachelor of Nursing (Advanced) or 4780 Bachelor of Nursing - WSU Online. Students must be enrolled in 4780 to enrol in WSU Online Campus subjects. Unitrack students may study this subject as a miscellaneous subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the physiological changes that occur in the body in response to health breakdown due to ageing, injury and disease, and in wound healing.

2. Outline the implications of preventative strategies in health breakdown for professional nursing practice.
3. Relate the role of the immune system to the maintenance of health and the consequences of its breakdown.
4. Utilise the concepts associated with primary health care to explain how microorganisms contribute to health breakdown within communities and health care facilities.
5. Discuss the role of pharmacological interventions in health breakdown.

Subject Content

1. The ageing process through to cessation of life
2. Inheritance Patterns ? cancer, genetics and testing
3. Introduction to pathophysiology
4. Cause, pathogenesis, symptoms, course, prognosis, prevention of disease
5. Relevance for nursing
6. Introduction to pharmacology for nurses
7. Pharmacokinetics and pharmacodynamics
8. Microbiology and infections - relevance for nursing
9. Common pathological organisms
10. Sources of infection and modes of transmission
11. National Safety and Quality Health Service Standard 3 ? Preventing and Controlling Healthcare Associated Infections
12. Protein Synthesis
13. Antimicrobial therapy
14. Immune Processes
15. Immune system breakdown and role of the nurse
16. Vaccination and immunisation
17. The inflammatory process
18. Wound healing

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Multiple Choice	30 minutes x 3 quizzes	20	N	Individual
Case Study	1200 words	40	N	Individual
Final Exam	1 hour	40	Y	Individual

BIOS 1012 Cell Biology

Credit Points 10

Legacy Code 300816

Coordinator Gabriel Perrone (https://directory.westernsydney.edu.au/search/name/Gabriel Perrone/)

Description Cells are the most basic form of all life, and underlying normal cell function are the molecules used to build complex cellular structures, generate energy, and propagate dynamic life. The subject will study the fundamental processes through which key biomolecules, including lipids, carbohydrates, amino acids and nucleic acids are manipulated to generate and store energy, and build a broad array of important biological macromolecules including DNA, membranes and proteins. To sustain life, cells respire for energy and replicate for growth and sexual reproduction. Accordingly the subject will examine cellular respiration, transcription, translation, mitosis, meiosis, transmission and how genes are inherited and modified providing insight into the phenomena of life. The role of DNA technologies in the fields of medicine, biotechnology and environmental science will provide students with real world applications.

School Science

Discipline Biochemistry and Cell Biology

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Equivalent Subjects BIOS 1013 - Cell Biology BIOS 1007 - Biology B - Cellular Processes BIOS 1004 - Biology 1 BIOS 1014 - Cell Biology (WSTC)

Assumed Knowledge

Basic understanding of biology and chemistry.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe a range of cell structures and shapes, and cellular organelles
2. Describe the broader role of organelles in cellular function and explain the importance of compartmentalisation
3. Describe the structure and chemical characteristics of the five major groups of molecules important to cellular life (water, carbohydrates, lipids, proteins, nucleic acids) and relate this structure to function in cellular processes
4. Explain why the different forms of cellular division are required for cellular function and the consequences when cellular processes fail to function properly
5. Explain how cells obtain energy, and how they use energy for driving reactions
6. Apply and transfer biological principles to other contexts such as chemical systems
7. Describe a range of DNA technologies in a variety of fields
8. Demonstrate skills in a range of experimental techniques e.g. microscopy, pipetting, biological techniques, calculations, recording data, interpreting and plotting data, writing reports

Subject Content

Structural organisation of cells
Molecular components of cells
Membrane structure and function
Energy and metabolism
Cell communication
How cells divide
Sexual reproduction and meiosis
Patterns of inheritance
DNA: The genetic material
Genes and how they work
Control of gene expression
DNA Technologies

Assessment

BIOS 1014 Cell Biology (WSTC)

Credit Points 10

Legacy Code 700125

Coordinator Anne Bertoldo (https://directory.westernsydney.edu.au/search/name/Anne Bertoldo/)

Description Cells are the most basic form of all life, and underlying normal cell function are the molecules used to build complex cellular structures, generate energy, and propagate dynamic life. The subject will study the fundamental processes through which key biomolecules, including lipids, carbohydrates, amino acids and nucleic acids, are manipulated to generate and store energy, and build a broad array of important biological macromolecules including DNA, membranes and proteins. To sustain life, cells respire for energy and replicate for growth and sexual reproduction. Accordingly the subject will examine cellular respiration, transcription, translation, mitosis, meiosis, transmission and how the genetic code is inherited and modified providing students insights into the phenomena of life. The role of DNA technology in the fields of medicine, biomolecular plant and animal science, food, forensic and environmental science will provide students with real world applications.

Restrictions Students must be enrolled at Western Sydney University, The College. Students enrolled in Extended Diplomas must pass 40 credit points from the preparatory subjects listed in the program structure prior to enrolling in this University level subject. Students enrolled in the combined Diploma/Bachelor programs listed below must pass all College Preparatory subjects listed in the program structure before progressing to the Year 2 subjects.

Assumed Knowledge

Basic understanding of biology and chemistry.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe a range of cell structures and shapes and cellular organelles
2. Describe the structure and function of cellular components to activities of the cellular unit (i.e. greater than the sum of its parts) and explain the importance of compartmentalisation
3. Describe the structure and chemical characteristics of the five major groups of molecules important to cellular life (water, carbohydrates, lipids, proteins, nucleic acids) and relate this structure to function in cellular processes
4. Explain why the different forms of cellular division are required for cellular function and the consequences when cellular process fail to function properly
5. Explain how cells obtain energy, and how they use energy for driving reactions
6. Describe the range of DNA technologies in a variety of fields
7. Apply and transfer biological principles to other contexts such as chemical systems
8. Conduct a range of appropriate and relevant cell biology experimental techniques and explain how they are used

Subject Content

1. Structural organization of cells
2. Biological molecules
3. From molecules to cells

4. Membrane structure and function
5. Energy and metabolism
6. Cell communication
7. How cells divide
8. Patterns of inheritance
9. DNA: The genetic material
10. Genes and how they work

BIOS 1022 Introduction to Human Biology

Credit Points 10

Legacy Code 300361

Coordinator Srinivas Nammi (https://directory.westernsydney.edu.au/search/name/Srinivas Nammi/)

Description This subject gives a basic understanding of the human body and introduces the scientific and medical terminology used for anatomy, physiology and biochemistry. It deals with gross structure and microscopic structure of the human body. It also examines microbial organisms, their classification, how they differ from eukaryotic cells and how our body defends against them. Where appropriate, examples of functional diseases will be discussed.

Incompatible Subjects NATS 1013 - Introduction to Anatomy BIOS 1025 - Introduction to Physiology

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Use the language of anatomy and physiology to accurately describe location of organs and movement of the body
2. Describe the organization of the human body
3. Name the location of the major body cavities, their organs and the general function of these organs
4. Define the structure and function of the typical cell and its organelles
5. Describe the structure and function of different tissue types and organs

6. Explain the basic anatomy and physiology of the major body systems including cardiovascular, musculoskeletal, respiratory, nervous, urogenital and immune systems
7. Describe the basic pathophysiology of major diseases affecting the human body systems including dementia, coronary heart disease, diabetes, cancer, asthma, osteoporosis and infectious diseases

Subject Content

Anatomical terminology
Basic cell biology, histology and biochemistry
Location and function of major organ systems and tissues with emphasis on the cardiovascular, musculoskeletal, respiratory, nervous, urogenital and immune systems
Basic introduction to the pathophysiology of common human diseases such as dementia, coronary heart disease, diabetes, cancer, asthma, osteoporosis, and infectious diseases

Assessment

Level Undergraduate Level 1 subject

Equivalent Subjects BIOS 1028 - Management of Aquatic Environments

Learning Outcomes

On successful completion of this subject, students should be able to:

1. List and compare and contrast the physical, chemical and biological components of a freshwater system;
2. Design an experiment to measure the condition of a freshwater system using physical chemical and biological indicators;
3. Discuss the potential risk to human health from exposure to degraded aquatic environments;
4. Assess impacts of human development on the ecological health of freshwater aquatic environments;
5. Recommend management strategies for improved freshwater environmental management;
6. Explain the concept and principles of Ecologically Sustainable Development;
7. Demonstrate competencies in written and oral communication, teamwork, experimental design, information literacy and data processing.

Subject Content

1. The role of water in modern society
2. Water as a renewable resource
3. Demands of human activity on waterways
4. Ecosystems and waterways
5. Disposal of waste using waterway
6. Water pollution and its causes
7. Water quality and recreation
8. Government policy and regulation of water
9. Water sample collection
10. Laboratory analysis of water chemistry and biology
11. Communication and teamwork
12. Designing and delivering an oral presentation
13. Interpretation of water quality data
14. Use of field water quality meters

BIOS 1030 Resource Sustainability

Credit Points 10

Legacy Code 300810

Coordinator Andy Broderick (https://directory.westernsydney.edu.au/search/name/Andy Broderick/)

Description Resource sustainability deals with the local, national, and global sustainability issues concerning human interactions with the environment. The subject uses current resource issues and scientific concepts to provide the practical and theoretical information needed for students to think critically about environmental issues and to contribute to the sustainable management of natural and built environments. Students will also learn how science and society interact in the management of resources. Using the concept of ecologically sustainable development as a foundation, students will use critical thinking skills to research a resource issue of their choice at the local, national and/or international level. Students will communicate their research using new mediaexploring the issue and make recommendations for improving sustainability.

Level Undergraduate Level 1 subject

Equivalent Subjects BIOS 1029 - Resource Sustainability BIOS 1031 - Resource Sustainability (WSTC)

Assumed Knowledge

Basic biological science and an understanding of referencing.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate critical thinking skills to make informed decisions about environmental issues and resource sustainability at the global, national, local, and personal levels.
2. Describe the scientific principles underlying sustainability, the limits of science in natural resource management, and the concept of ecologically sustainable development.
3. Explain and reflect on how human activities impact on sustainability of environments and resources.
4. Apply skills in academic reading, accessing library resources and field research to understand current issues in resource sustainability.
5. Analyse in-depth a resource issue at a range of scales and recommend solutions to sustainability problems.
6. Use spatial information in sustainable resource management.
7. Communicate a sustainable resource issue through new media.

Subject Content

Broad principles of Environmental Science and ecology and sustainable resource management
Concepts & principles of Ecologically Sustainable Development (ESD) and other policies that influence resource use
How science interacts with societal values in resource use
Local, regional, national and international issues and current events in resource management
Sustainability issues involving Human Population, Threatened and Endangered Species, Invasive Species, Water Availability and Quality, Energy, Climate Change, Fisheries, and Agriculture
Critical thinking skills and the application of these skills to information obtained from the media and other sources regarding resources

Assessment

BIOS 1033 Concepts in Human Physiology

Credit Points 10

Legacy Code 301254

Coordinator Sabine Piller (https://directory.westernsydney.edu.au/search/name/Sabine Piller/)

Description This subject introduces the core concepts and terminology necessary to provide a basic understanding of the physiological responses of the human body using relevant examples. These include the processes of homeostasis, cell-cell interactions and the physical and chemical transport processes that are required to carry out integrated functions. Students will explore these key physiological concepts through practical hands-on experiments and in interactive group work in prac and tutorial classes, respectively. The subject provides the foundation to study the physiology of human organ systems.

School Science

BIOS 1036 Human Development and Disease across the lifespan

Credit Points 10

Legacy Code 401394

Coordinator Cristy Brooks (https://directory.westernsydney.edu.au/search/name/Cristy Brooks/)

Description This subject builds on fundamental assumed knowledge of anatomy and physiology and introduces the study of human disease processes or pathophysiology through the framework of human development as a way of examining growth, health and disease at different stages of the lifespan. General concepts underlying human diseases as well as disorders relating to the lifespan will be studied. Developmental changes in physical, cognitive, social, intellectual, perceptual, personality and emotional growth are discussed. Common communicable and non-communicable, acute, chronic and degenerative health conditions are discussed from a pathophysiological, psychosocial and epidemiological perspective, and their impact on the day to day function of individuals and populations is explored. Risk factors for conditions and disease trajectory are explored at individual and society level, as well as the impact of these conditions on individuals, the health system and wider society.

School Health Sciences

Discipline Human Biology

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Assumed Knowledge

A knowledge of fundamental anatomy and physiology

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe physical, cognitive, and psychosocial milestones of human development throughout the lifespan, applying contemporary theories of development;
2. Describe the biological, epidemiology, pathophysiology and course of communicable and non-communicable disease for common acute and chronic health conditions that occur across the lifespan;
3. Demonstrate broad theoretical knowledge of introductory pathophysiology of diseases;
4. Demonstrate ability to interpret and communicate information in different health contexts using appropriate medical terminology;
5. Explain the consequences of selected human condition and diseases for health systems and society;
6. Describe theoretical perspectives on death, dying, grieving and loss;
7. Describe the interplay and relationship between biology, environment and relationships during various stages of the lifecycle;
8. Describe the influences of healthy development across the lifespan

Subject Content

1. Theories and developmental milestones associated with the stages of human development from conception, prenatal development and birth, to infancy, toddlerhood, childhood, adolescence, early, middle, late adulthood and aging

2. The sequence and processes of physical, cognitive, emotional, and social aspects of human development throughout the lifecycle (from conception and prenatal development though death, dying and bereavement)
3. The interplay and relationship between biology, environment and relationships during the various stages of the human lifecycle
4. The influences on healthy development including nutrition, exercise and social and family relationships
5. The impact of unhealthy behaviours such as substance abuse or disease and disability upon development and functioning throughout the life span
6. Theoretical knowledge of disease pathophysiology
7. Explores common diseases from psychosocial, and epidemiological perspectives
8. Particular conditions considered will vary but will include diseases across the communicable, non-communicable, acute, chronic and degenerative conditions
9. Epigenetics
10. Interpret and communicate information in different health contexts using appropriate medical terminology

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

BIOS 1038 Anatomy and Physiology in Health (WSTC)

Credit Points 10

Legacy Code 700316

Coordinator Anne Bertoldo (https://directory.westernsydney.edu.au/search/name/Anne Bertoldo/)

Description This subject introduces the levels of structural organisation of the human body together with scientific and medical terminology used in anatomy and physiology. It deals with gross structure and function of the major organ systems of the human body and where appropriate, a brief outline of environmental factors and personal health practices that affect optimal human body function will be introduced. It also deals with basic biomechanics of musculoskeletal system.

School Science

Discipline Human Biology

Student Contribution Band HECS Band 2 10cp

BIOS 1026 Introduction to Physiology (WSTC)

Restrictions

Students must be enrolled at The College. Students enrolled in 7142 Diploma in Health Science Extended and 7143 Diploma in Health Science (HPE) Extended need to have passed 40 CPs of preparatory subjects in order to enrol in this subject. Students enrolled in 6000 Diploma in Health Science/Bachelor of Health Science and 6001 Diploma in Health Science/Bachelor of Health Science (HPE) need to have passed or be enrolled in the preparatory subjects in these programs in order to enrol in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Define and use the scientific and medical terminology of anatomy and physiology to accurately describe the location and function of organs and organ systems of the human body
2. Describe the levels of structural organisation of the human body

3. Identify the structure and function of different tissue types and organs
4. Explain the basic anatomy and physiology of the major body systems including integumentary, skeletal, muscular, nervous, endocrine, cardiovascular, lymphatic, immune, respiratory, digestive, urinary, and reproductive systems
5. Determine the environmental and personal health practices affecting optimal function of human body
6. Describe the biomechanics of the human musculoskeletal system.

Subject Content

1. Scientific and medical terminology in anatomy and physiology
2. Levels of structural organisation of human body
3. Gross structure and function of major organ systems of the human body as listed below. Where appropriate, environmental factors and personal health practices affecting optimal function of the human body

(a) The integumentary system
(b) The skeletal system
(c) The muscular system
(d) The nervous system
(e) The endocrine system
(f) The cardiovascular system
(g) The lymphatic system and immunity
(h) The respiratory system
(i) The digestive system
(j) The urinary system
(k) The reproductive system
4. Biomechanics of human musculoskeletal system

BIOS 1039 Biodiversity (UG Cert)

Credit Points 10

Legacy Code 500050

Coordinator Jack Isherwood (https://directory.westernsydney.edu.au/search/name/Jack Isherwood/)

Description How many species walk, fly, swim or slither, crawl, hop, wriggle or just float, hitchhike or move so slowly that they appear not to move at all? No one knows and new species appear almost every day. This subject focuses on this spectacular diversity of living things and the process of evolution. Students explore and classify biodiversity and how organisms' function, acquire and assimilate resources and co-ordinate growth and reproduction. Organisms interact with one another and their environment forming a complex set of interactions in ecosystems. It is these interactions that have driven evolution. Ultimately human survival depends on the sustainable use of this biodiversity and ecosystems.

School Science

Level Undergraduate Level 1 subject

Equivalent Subjects BIOS 1003 Biodiversity BIOS 1002 Biodiversity LGYB 0458 Biodiversity (UWSC) BIOS 1001 Biodiversity

Restrictions

Students must be enrolled in the following program: 7175, Undergraduate Certificate of Environmental Sustainability

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the characteristics of major biological groups and demonstrate how this information can be used to classify an unknown organism.
2. Explain and provide examples that demonstrate how evolution has given rise to biodiversity.

3. Describe and explain the role of cells, tissues and organs in the structure and function of organisms.
4. Explain how organisms acquire the resources necessary to function.
5. Describe the scientific method and demonstrate how it can be used to test explanations of observations by formulating testable hypotheses and designing experiments.
6. Conduct basic investigations of organisms using microscopy, experimentation and perform data analysis and interpret results.
7. Apply and transfer chemical principles to other contexts such as the origin of life, and how organisms acquire the necessary resources to sustain life.
8. Evaluate data and evidence from scientific literature.

Subject Content

1.The characteristics of living things and the nature of Biodiversity
2.Science as a way of knowing
3.Classification, taxonomy and species
4.Evolutionary theory
5.A survey of the major groups of living things from bacteria, viruses, protists and fungi to plants and animals.
6.Evolutionary development of structure and function
7.The role of living organisms in ecosystems.
8.The Biodiversity crisis
9.Basic light microscopy observing plants, animals and microbes
10.Sorting, organising and classifying organisms
11.Formulation of scientific hypothesises, designing experiments and data analysis

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Portfolio	1250 words	30	N	Individual

BIOS 1040 Natural Science (WSTC)

Credit Points 10

Description This subject delves into the rich tapestry of biodiversity, uncovering the myriad of living organisms that inhabit our planet and their intricate roles within ecosystems. In this subject, you will explore and classify biodiversity and the mechanisms through which organisms grow, reproduce, and utilise resources. You will learn about the process of evolution and how evolution has given rise to the diversity of organisms in the biosphere. You will also observe the natural interactions between living organisms and Earth's ecosystems, recognising that these very interactions have been pivotal in driving evolutionary changes. As you progress, you will gain insights into the importance of sustainable engagement with biodiversity, upon which the future of human survival depends.

School Science

Student Contribution Band

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Restrictions

Students must be enrolled in an existing Destination College Diploma program listed below:

- 7188 Diploma in Culture, Society and Justice
- 7189 Diploma in Health Science
- 7190 Diploma in Business
- 7191 Diploma in Information and Communication Technologies
- 7192 Diploma in Building Design and Construction
- 7193 Diploma in Engineering Studies
- 7194 Diploma in Creative Industries and Communications
- 7195 Diploma in Arts
- 7196 Diploma in Science
- 7197 Diploma in Education Studies

Learning Outcomes

1. Identify and describe the characteristics of major biological groups and demonstrate their application in classifying unknown organisms.
2. Explain how evolution gives rise to biodiversity through the process of selection.
3. Explain the functional adaptions of organisms to different environments.
4. Apply your understanding of biodiversity to identify and classify organisms in the natural environment.
5. Demonstrate an understanding of how sustainable practices maintain biodiversity in different ecosystems.
6. Effectively communicate scientific findings and concepts, tailored to both professional and non-professional audiences, employing appropriate terminology.

Subject Content

- the characteristics of living things and the nature of biodiversity
- the major groups of living things from bacteria, viruses, protists and fungi to plants and animals
- classification, taxonomy and species
- sorting, organising and classifying organism
- evolutionary theory
- evolutionary development of structure and function
- the role of living organisms in ecosystems
- threats to biodiversity
- basic laboratory skills for observing plants, animals, fungi, and microbes.

BIOS 1041 Fundamentals of Biotechnology (WSTC)

Credit Points 10

Description In this subject you will explore the intricate world of cell and molecular biology, uncovering the foundational concepts crucial to biotechnology. You will explore the molecular building blocks of life and understand how they interact to form functional cells. You will investigate the roles played by proteins, nucleic acids, and other macromolecules in processes vital for life, like energy production, cell division, and reproduction. You will explore the realm of genetics

to grasp the concepts of inheritance, genetic modification, and the pivotal roles nucleic acids and proteins have in the storage and flow of information. With a special emphasis on DNA technologies, you will discover how we can harness the biochemical processes of life for diverse applications. You will also gain insights into the transformative power of DNA technology across areas such as medicine, agriculture, food production, forensics, and environmental science, equipping yourself with knowledge of its real-world implications and innovations.

School Science

Level Undergraduate Level 1 subject

Restrictions

Students must be enrolled in an existing Destination College Diploma program listed below:

- 7188 Diploma in Culture, Society and Justice
- 7189 Diploma in Health Science
- 7190 Diploma in Business
- 7191 Diploma in Information and Communication Technologies
- 7192 Diploma in Building Design and Construction
- 7193 Diploma in Engineering Studies
- 7194 Diploma in Creative Industries and Communications
- 7195 Diploma in Arts
- 7196 Diploma in Science
- 7197 Diploma in Education Studies

Learning Outcomes

1. Identify and describe the fundamental roles of macromolecules and organelles in determining cell structure and function.
2. Explain the significance of cell division and the potential implications when these processes malfunction.
3. Explain how cells require substrates for development and energy requirements.
4. Identify and describe a variety of DNA and RNA technologies and their applications across a variety of fields.
5. Apply your understanding of molecular and cell biology to experimental methodologies.
6. Effectively communicate molecular cell biology concepts and findings, to professional and non-professional audiences using appropriate terminology.

Subject Content

- Structural organisation of cells
- Molecular components of cells
- Membrane structure and function
- Energy and metabolism
- Cell communication
- How cells divide
- Sexual reproduction and meiosis
- Patterns of inheritance
- DNA: The genetic material
- Genes and how they work
- Control of gene expression
- DNA and RNA Technologies

BIOS 2005 Botany

Credit Points 10

Legacy Code 300836

Coordinator Kristine Crous (https://directory.westernsydney.edu.au/search/name/Kristine Crous/)

Description From microscopic algae to giant flowering angiosperms, this subject develops students knowledge and understanding of plants on earth. The subject covers the topics of plant anatomy and morphology, classification and systematics, and evolution. Students will examine the major groups of plants: green algae, bryophytes, lycophytes, monilophytes, gymnosperms and angiosperms. Laboratory and field work involves the study of common Australian plants and economically significant plants.

Level Undergraduate Level 2 subject

Pre-requisite(s) BIOS 1001

Equivalent Subjects LGYB 5440 - Botany LGYA 5941 - Botany

Assumed Knowledge

Basic knowledge of biology, chemistry and ecology.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Define botany as an area of study and place it in its scientific and social context.
2. Explain how evolutionary processes have led to the diversity of plants.
3. Describe the characteristics of the major groups of plants, and how tools such as microscopy and molecular biology can be used to study them.
4. Explain how botany is used to solve real-world problems such as measuring biodiversity.
5. Conduct botanical investigations safely and ethically in the field and laboratory, using appropriate methodologies correctly to obtain valid data.
6. Use spreadsheets and statistical tools in analytical programs to enter, analyse and graph data and to draw appropriate conclusions.
7. Communicate findings correctly in written form using an appropriate style, accessing the botanical literature to place the findings in context.

Subject Content

Plant tissues
Plant morphology
Plant development
Plant reproduction and alternation of generations
Classification and systematics of the major groups of plants
Plant evolution

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Online Quizzes	20 min per week (10 - 12 weeks)	20	N	Individual
Report on Family Characteristis and plant biodiversity via Virtual Herbarium	1500 words	30	N	Individual
Tasks from tutorials and practicals	1 hour per tutorial/prac	20	N	Individual
Examination	2 hours	30	N	Individual

Coordinator Sebastian Holmes (https://directory.westernsydney.edu.au/search/name/Sebastian Holmes/)

Description Building on the underlying physical and chemical principals/laws that define physiology, this subject from both a systems (e.g. Respiratory) and environmental (e.g. Marine) perspective, seeks to compare the functional physiology of organisms at all levels of organisation. Particular attention will be paid to respiration, temperature tolerance & regulation, living in water, sensory and neurophysiology. Students will have the opportunity to carry out a defined research project.

School Science

Discipline Zoology

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) BIOS 1012 Cell Biology

Restrictions

Successful completion 60 credit points

Assumed Knowledge

Basic biology, chemistry and maths.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe and compare between the different respiratory, excretory and circulatory systems utilised by organisms and discuss how physiological adaptations allow organisms to inhabit extreme environments (eg. deserts & freezing habitats).
2. Explain the mass scaling laws with a particular focus on metabolism.
3. Describe the physiological adaptations that organisms exhibit living in water with reference to osmoregulation, buoyancy and diving.
4. Explain the similarities and differences with phyla in terms of their neurophysiology and sensory organs.
5. Explain how different organisms achieve locomotion (movement) and obtain their nutritional requirements (feeding).
6. Conduct both independent and group investigations safely and ethically in the field and laboratory, using sampling methodology correctly to obtain valid data.
7. Use spreadsheets and statistical tools in analytical programs to enter, analyse and graph data, as to draw appropriate conclusions from data.
8. Communicate findings correctly in oral or in written form using an appropriate style, as well as accessing the scientific literature to place the findings in context.

Subject Content

1. The integrative (multidisciplinary) nature of physiology and its determination by basic physical and chemical principals/laws;
2. The diversity of respiratory (including respiratory pigments) and circulatory systems;
3. Nutrition and the different modes of feeding that exist;
4. Scaling laws and metabolism;
5. The physiological adaptation of organisms to extreme environments (deserts & freezing habitats) including the role of torpor;
6. Comparison of nitrogenous excretion across the phyla (ammonia, urea & uric acid);
7. Movement: types of skeleton, muscle and motility;
8. The adaptation of animals to living in water (buoyancy, osmoregulation & diving);
9. Neurophysiology & the diversity of sensory organs and structures exhibited by animals.

Special Requirements

Legislative pre-requisites

Students who opt to enrol in this subject are strongly recommended to obtain a Tetanus vaccination/booster. Students who cannot evidence vaccination may be precluded from activities on the Farm, and/or internships with third parties.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

BIOS 2008 Ecology

Credit Points 10

Legacy Code 300839

Coordinator Uffe Nielsen (https://directory.westernsydney.edu.au/search/name/Uffe Nielsen/)

Description We live in a society where environmental problems dominate public debate. Ecology is one of the sciences required to find solutions to such problems; terms and ideas that came originally from ecology are used in public discussions, and in legislation. This subject will introduce students to ecology: what is studied, how it is studied, what are the strengths and limitations of ecology. Current ecological thinking will be covered, from the scale of individual organisms, through populations, and up to communities and ecosystems. Methods of study will be highlighted using evidence from molecular ecology through to field investigations.

School Science

Discipline Ecology and Evolution

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Equivalent Subjects LGYB 8458 - Ecology 21 BIOS 2007 - Ecology LGYB 8449 - Ecology 21 (V1)

Restrictions

Successful completion of 60 credit points

Assumed Knowledge

Knowledge of first-year university biology satisfactory completion of Biodiversity and Cell Biology or equivalent and the concepts of classification, evolution, taxonomy, cellular processes plant and animal structure and function.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Define ecology as an area of study and place it in its scientific and social context
2. Explain how factors can be identified as limits to distribution
3. Describe the ecological concepts of populations, communities and ecosystems, and how tools such as modelling and molecular biology can be used to study them
4. Explain how ecology is used to solve real-world problems such as harvesting from wild populations or managing fire regimes
5. Describe indigenous approaches to the natural world and how these link to modern ecology
6. Conduct ecological investigations safely and ethically in the field and laboratory, using sampling methodology correctly to obtain valid ecological data
7. Use spreadsheets and statistical tools in analytical programs to enter, analyse and graph data and to draw appropriate conclusions from data
8. Communicate findings correctly in oral or in written form using an appropriate style, accessing the scientific literature to place the findings in context

Subject Content

1. Scope of ecology from individual organisms to communities and ecosystems
2. Origin of ecology as a science
3. Indigenous approaches to nature and links to modern ecology
4. Limitations of ecology in studying large, complex systems, with random inputs, and a low level of understanding of how they work
5. Limits to distribution of species - dispersal, habitat selection, abiotic and biotic factors
6. Investigations of limits of dispersal eg transplant experiments, physiological response studies
7. Population studies - definition, methodology, life tables as a tool, genetic and evolutionary approaches
8. Population growth - exponential and logistic growth, factors that cause fluctuations in population numbers eg density dependence, time lags, stochastic variation in vital parameters. Stochastic vs. Deterministic models of population growth
9. Biotic interactions in populations - competition, predation, herbivory, beneficial associations
10. Experimental tests of biotic interactions
11. Applied ecology - harvesting from wild populations, fire ecology, molecular ecology
12. Community ecology - definitions, models of how communities function and change eg succession, patch dynamics, equilibrium and non-equilibrium models
13. Ecosystem ecology - primary and secondary production, introduction to biogeochemical cycles.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	30 minutes each quiz	20	N	Individual

Report	2,000 words	25	N	Individual
Presentation	8 minutes, 10 slides max	10	N	Group
Final Exam	2 hours	35	N	Individual
Proposal	Max 1,000 words	10	N	Group

BIOS 2011 Exercise Nutrition, Body Composition and Weight Control

Credit Points 10

Legacy Code 400884

Coordinator Peter Clothier (https://directory.westernsydney.edu.au/search/name/Peter Clothier/)

Description In 2016, this subject is replaced by 401141 - Exercise Nutrition. This subject provides students with an understanding of the interdependent areas of nutrition, body composition and body weight control within the context of sport, physical activity, and exercise. Nutritional needs and recommendations for all levels and types of physical activity are covered along with the links between nutrition and health, body composition, control of body weight and composition. Students will develop skills in nutritional analysis, body composition assessment and the development of exercise programs for weight control. Students will use these skills and knowledge in the individualisation of advice on exercise nutrition and body composition control.

School Health Sciences

Discipline Human Biology

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) NATS 1009 AND
NATS 1010 AND
BIOS 1015

Restrictions

Students must be enrolled in 4658 Bachelor of Health Science (Sport and Exercise Science).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the dietary guidelines and the recommended servings of the core food groups recommended by the National Health and Medical Research Council and other internationally recognized governing bodies.
2. Describe the physiological functions of the macronutrients (carbohydrates, fats and protein) and micronutrients (vitamins, minerals and water).
3. Analyze a diet for its energy, macronutrient and micronutrient content, as well as describe the strengths, weaknesses and limitations of the commonly used methods for measuring and analyzing dietary intake.
4. Describe and discuss the role of nutrition and ergogenic supplements in optimizing exercise performance.
5. Describe the assumptions and limitations of common methods body composition assessment including BMI, waist hip ratio, skinfolds, body composition estimates (from regression equations) and other indices, and demonstrate the knowledge and ability to use a range of body composition and anthropometry measures to service athletes, apparently healthy and obese individuals.
6. Explain the relationship between energy balance and control of body composition.
7. Provide general nutrition advice to promote, achieve and maintain healthy and sport performance related body weights.
8. Explain the nutritional, health and psychological risks of common fad and popular diets.
9. Explain the importance of behavioral modification and other strategies to help individuals to incorporate and adhere to appropriate dietary strategies that support achieving and maintaining a healthy body mass.

Subject Content

1. General dietary guidelines and recommendations for health and physical performance
2. Dietary analysis: methods, applications and limitations of methods
3. Digestive processes and nutrient absorption kinetics
4. Physiological function of macronutrients and micronutrients with an emphasis on their roles related to energy metabolism and exercise
5. Methods of measuring, estimating and interpreting body composition
6. Body mass, fat mass, fat distribution and disease risk
7. Estimating individual energy requirements and energy expenditure
8. Sport-specific nutrition and hydration for optimizing performance, recovery & physiologic adaptation
9. Nutritional supplements and ergogenic aids
10. Nutritional disorders: prevalence, signs, symptoms and key physiological effects
11. Discipline specific OH&S ? related to practical tasks of the unit

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject, students must have:

1) submitted a Student Undertaking Form and have applied for a National Police Certificate;
2) submitted Working with Children Check Student Declaration;
3) possess a current WorkCover Authority approved First Aid Certificate.

BIOS 2012 Exercise Physiology

Credit Points 10

Legacy Code 401142

Coordinator Simon Green (https://directory.westernsydney.edu.au/search/name/Simon Green/)

Description This subject covers the essential physiology that helps us understand how we control our exercise behaviour. In lectures there is a focus on physiological control, with emphasis on neuromuscular, cardiovascular, respiratory and thermoregulatory responses during exercise, as well as adaptation of these responses in response to ageing, disease and exercise training. In laboratory classes, there is a focus on the acquisition and interpretation of physiological responses during exercise.

School Health Sciences

Discipline Human Biology

Student Contribution Band HECS Band 2 10cp

Pre-requisite(s) NATS 1009 AND
NATS 1010 AND
SPRT 1001 AND
NATS 1022

Equivalent Subjects BIOS 2037 - Sport and Exercise Phyiology

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Define core concepts in neuromuscular, cardiovascular, respiratory and thermoregulatory physiology.
2. Describe the scope of physiological responses during exercise using correct values and units of measurement.
3. Identify effects of biological sex, aging and training on physiological responses during exercise.
4. Differentiate between physiological control and regulation during exercise.
5. Calculate, analyse, interpret and illustrate physiological data recorded during laboratory classes.
6. Contrast and contextualise recorded data with data reported in published scientific literature.

Subject Content

1. Overview of the essential physiology of movement and exercise, including metabolism (covered in Bioenergetics).
2. Neuromuscular physiology and exercise.
3. Cardiovascular physiology and exercise.
4. Respiratory physiology and exercise.
5. Thermoregulation and exercise.
6. Laboratory classes focused on ergometry and the recording, analysis and interpretation of neuromuscular, cardiovascular, respiratory and thermal responses during rest and exercise.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Report	300 words plus a maximum of four tables and figures	30	N	Individual
Intra-session Exam	60 minutes	42	N	Individual
Intra-session Exam	40 minutes	28	N	Individual

BIOS 2014 Functional Proteins and Genes

Credit Points 10

Legacy Code 300936

Coordinator Patrick O'Doherty (https://directory.westernsydney.edu.au/search/name/Patrick ODoherty/)

Description Biochemistry is the study of the chemistry of life. By understanding the structure and roles of biological macromolecules found in cells students will develop the concept of self assembly of these molecules to form life. Topics include the structure of carbohydrates, lipids, proteins, and nucleic acids and how they function in the lipid and aqueous environments of the cell. Basic metabolism is introduced with an overview of the major pathways in cells, mechanisms of regulation, and an introduction into important cofactors and intermediatory molecules. These concepts will be reinforced through practical classes that teach critical skills in experimental design, analysis and interpretation.

School Science

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) BIOS 1012 AND
CHEM 1005

Equivalent Subjects BIOS 2001 - Biochemistry 1 BIOS 2036 - Proteins and Genes

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and explain biologically important chemical bonds and functional groups and describe their interaction.
2. Recognise and describe the structure of monomeric units of major biomolecules in a cell.
3. Explain how complex biomolecules form through polymerisation, chemical modification or aggregation of these monomeric units form complex functional or structural molecules.
4. Discuss key metabolic processes, their control and cellular location.
5. Relate different biomolecules to different cellular structures and processes.
6. Handle biomolecules for analysis in a laboratory.
7. Collect, record and analyse laboratory data in a lab book consistent with legal standards.
8. Be able to perform basic biochemical calculations (mole calculations, dilutions, unit conversion, standard curve and basic enzymatic calculations).
9. Work as a member of a group.

Subject Content

1. Overview of Biochemistry
- The cell, groups of important biomolecules, bonds, Functional groups, genes to proteins
- The aqueous environment
2. Biomolecules - Lipids
- The Chemistry and structure of fatty acids
- Membranes: phospholipids and glycolipids
3. Biomolecules - Introduction to Carbohydrates and Glycobiology
- The Chemistry and nomenclature of mono, di and polysaccharides
- Heteropolysaccharides: cellulose, starch, glycogen and The extracellular matrix
4. Biomolecules - Nucleic acids
- Ribose, deoxyribose, phosphodiester bonds, bases
- structural differences between RNA and DNA
5. Biomolecules - Proteins
- Amino acids: functional groups; acid base properties; symbols
- structure of proteins: peptide bonds, protein folding, pictorial representation of protein structure
- Classification and functions of proteins
- protein Packaging and post translational modification
- protein degradation
6. Introduction to metabolism
- Overview of anabolic and catabolic pathways and their regulation
- Characteristics of enzymes: active sites; catalytic principles; Basic enzyme kinetics
- introduction to important branch Point, High energy compounds and co-Factors
7. Quantitative aspects of Biochemistry
- handling and Analysing biomolecules in A laboratory
- developing independence in data organisation, recording and calculations
- maintaining A legal Standard laboratory note book

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Final Examination	2 hours	50	Y	Individual
Written Assignment - research assigned protein	Max 500 words	10	N	Individual
Laboratory Component - (a) Laboratory Book completeness/ correctness, (b) Practical Skills Quiz	Throughout semester	20	N	Individual
Quiz - (a) Post-laboratory questions (online), (b) Functional Molecules Quiz	Throughout semester	20	N	Individual

BIOS 2016 General Microbiology

Credit Points 10

Legacy Code 300844

Coordinator Michael Phillips (https://directory.westernsydney.edu.au/search/name/Michael Phillips/)

Description Microorganisms play a crucial role in soil and water ecosystems, in health and disease of plants and animals, including humans, as well as in industries such as the food and brewing industries. The subject builds on students existing knowledge of cell biology and biodiversity, and explores the characteristics of micro-organisms, the conditions required for their growth and survival, methods of control and their significance in the environment, health and industry. The theory and practice of microbiology are integrated in the laboratory component in which students learn techniques of handling, observing, growing and counting microorganisms.

Assumed Knowledge

Knowledge of introductory biology, especially an understanding of the diversity of living organisms and basic concepts of cell structure and function is essential for students undertaking this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Compare the characteristics and habitats of the major groups of microorganisms.
2. Describe and discuss the factors that favour growth and survival of microorganisms and apply this knowledge to cultivation, control and elimination of microorganisms.
3. Explain the beneficial and detrimental roles of microorganisms in soil and aquatic environments, in human health and the food industry.
4. Discuss epidemiology and control of selected diseases in the Australian context.
5. Access and interpret relevant research literature and communicate microbiological concepts in written form.
6. Work within Workplace Health and Safety guidelines in a group to perform basic microbiological techniques to characterise and enumerate microorganisms.
7. Analyse and report microbiological data and interpret it in the context of Australian standards/guidelines.

Subject Content

1. The characteristics of the major groups of microorganisms and their relationship to other living organisms.
2. Requirements for microbial growth.
3. Physical and chemical methods of control of microorganisms.
4. Introduction to microbial ecology: interactions between microorganisms and other microbes, plants and animals.
5. Human-microbial interactions; normal microbiota and pathogens.
6. Epidemiology of communicable diseases.
7. Introduction to environmental microbiology: microbiology in the aquatic environment and in soils.
8. The significance of microorganisms in the food and wine industries.
9. Microbiological techniques: aseptic technique, culturing of bacteria, microscopic examination of microorganisms, enumeration of microorganisms in environmental samples and foods.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Laboratory Record and Report Booklet	N/A	20	N	Individual

BIOS 2018 Genetics

Credit Points 10

Legacy Code 300845

Coordinator Nathan Absalom (https://directory.westernsydney.edu.au/search/name/Nathan Absalom/)

Description Our ability to rapidly and cheaply sequence a genome, ranging from humans, to native and domesticated plants and animals, and infectious bacteria and viruses, has revolutionised the field of genetics. More than ever, we understand our genetic relationship to life on earth, uncovering surprising similarities between our genome and the genomes of small worms and fruit flies. This subject will compare the genomes of different organisms and apply the methodology and theory of modern genetics to understand how the diversity of genetic variability impacts the structure and evolution of genomes, the expression of genes, and ultimately on the health and form of an organism.

School Science

Discipline Genetics

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects LGYB 5446 - Genetics 22 BIOS 2019 - Human Genetics BIOS 2017 - Genetics

Restrictions

Successful completion of 60 credit points

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Summarise features of the human genome, and compare and contrast the human genome with the genomes of selected plant, animal and pathogen genomes
2. Describe the basic principles of genetic and epigenetic control of gene expression
3. Apply your knowledge of genomes and DNA sequencing methodologies to the bioinformatic analysis of DNA sequences
4. Explain the origin and frequency of common and rare genetic variants
5. Correlate genetic variability with phenotypic variability in health and disease
6. Apply your knowledge of genetic variation in different contexts to identify regions of a genome that are associated with specific phenotypes
7. Analyse and critically evaluate genetic data and present this in the form of a written report

Subject Content

1.Genome structure: compare and contrast the human genome with the genomes of model plant and animal genomes, as well as bacterial and viral genomes
2.Decoding the genome: Sanger and Next-generation DNA sequencing
3.Annotating the genome: genes and genetic switches; coding and non-coding DNA; transcription and open reading frames
4.Introduction to Bioinformatics: homology search and alignments; translation, mutations and reading frames
5.Genetic variants, health and disease: repeat sequences, translocations, aneuploidy, smaller insertions, deletions and substitutions
6.Controlling the genome, an introduction to epigenetics: DNA methylation (X-inactivation, imprinting, gene transcription); the histone code and chromatin packaging
7.Single gene and polygenic traits: pedigrees, populations, penetrance and effect sizes
8.Gene and trait mapping: recombination, linkage and linkage disequilibrium with worked examples from humans (Mendelian disease and population genetics), plants (plant breeding) and animals (ecology and conservation)
9.Genomes and the environment: host-pathogen interactions and selection in genomes

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	A combined multiple choice and short answer quiz assessing skills learnt in online practicals and the lecture and workshop content	20	N	Individual
Quiz	Multiple Choice and short answer questions that will assess the lecture, workshop and practical content of the course	20	N	Individual
Report	2000 words max. Two reports, one group report for Introduction, Aims, Methods and References, a second report for Results, Conclusions and References.	30	N	Individual
Report	1000 word report. Students will be given a set of genetic variants to choose and analyze and they must write a report describing the effects of the variant and how they came to the conclusion consistent with ACMG Guidelines	30	N	Individual

BIOS 2021 Metabolism

Credit Points 10

Legacy Code 300848

Coordinator Ming Wu (https://directory.westernsydney.edu.au/search/name/Ming Wu/)

Description Organisms degrade food molecules to generate energy and converts excess food molecules into internal fuel stores. This subject will cover topics including: bioenergetics; the structures of key molecules; glycolysis, gluconeogenesis, glycogen synthesis and breakdown; fatty acid oxidation and synthesis; amino acid catabolism; urea synthesis; citric acid cycle; electron transport and oxidative phosphorylation. Emphasis will be on the regulation and integration of these pathways, including their responses to hormonal regulation. The effects of altered dietary and hormonal status on metabolic pathways and their consequences for the organism will be discussed.

Level Undergraduate Level 2 subject

Equivalent Subjects BIOS 2002 - Biochemistry 2 CHEM 2005 - Human Metabolism Disease

Restrictions

Successful completion of 60 credit points

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the molecular mechanisms by which dietary macromolecules (carbohydrates, lipids, proteins) are metabolised to generate energy or, alternatively, to store energy.
2. Demonstrate an understanding of the mitochondrial electron transport system and the mechanism by which this system is coupled to ATP synthesis in oxidative phosphorylation.
3. Describe the different roles of the major tissues in energy metabolism. Know the general structural types and functional classifications of regulatory molecules such as hormones, growth factors, cytokines, neurotransmitters.
4. Explain how disruption of a metabolic pathway affects changes in other metabolic pathways in order to maintain homeostasis.
5. Demonstrate competency in; biochemical techniques, use of standard biochemical equipment, graphical skills, biochemical calculations and utilization of professional databases in the research, diagnostic, treatment and policy sectors.
6. Organise, present and interpret experimental observations in clear, concise written and spoken English. Identify, retrieve, read and analyse scientific literature relevant to the study of metabolism.
7. Demonstrate competency of time management through identifying milestones and reporting progress against milestones in accordance with human resource management and industry expectations.

Subject Content

1. Carbohydrate metabolism, including pathways of glycolysis, gluconeogenesis, glycogen metabolism; their metabolic and hormonal regulation.
2. Lipid metabolism, including the fate of dietary lipid, fatty acid oxidation and synthesis, the regulation of fat metabolism, and the relationship between fat metabolism and carbohydrate metabolism in animals and plants.
3. Amino acid metabolism, including degradation and the fate of carbon skeletons (glucogenic and ketogenic amino acids) and amino groups (urea cycle).
4. The citric acid cycle, its role in energy metabolism and its regulation.

5. Electron transport and oxidative phosphorylation, including the structure and function of ATP synthase.
6. Integration of pathways of carbohydrate, fat and amino acid metabolism; the different roles of individual tissues in metabolism; regulation in response to dietary and disease states; maintenance of biochemical homeostasis.
7. Hormone regulation of metabolic processes in health and disease.
8. Design, conduct and interpret biochemical assays including detection of metabolites and hormones in biological samples.
9. Identify the nature of specificity, sensitivity and reproducibility when selecting and using biochemical assays to discriminate between healthy or disease states.
10. Engage and interpret professional literature, including database access and interpretation.
11. Time management, organisation and communication through team work activities as it relates to leadership responsibilities

Assessment

BIOS 2022 Microbiology 1

Credit Points 10

Legacy Code 300833

Coordinator Michelle Moffitt (https://directory.westernsydney.edu.au/search/name/Michelle Moffitt/)

Description In this subject students will use an inquiry-based approach to explore the origin and diversity of microorganisms and their significance in the environment, in foods and industry as well as in health and disease. Students will be introduced to the structure, reproduction, classification, cultivation and enumeration of bacteria, viruses, fungi and protists. The conditions required for growth and survival of microorganisms will be studied as well as physical and chemical methods of control. In laboratory classes students will develop skills in culturing and observing microorganisms and in

designing experiments to test microbiological concepts. This subject is a pre-requisite for Microbiology 2 and Level 3 Microbiology subjects.

Successful completion of 60 credit points

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe and compare the major groups of microorganisms in terms of their structure, reproduction and techniques for cultivation in the laboratory.
2. Describe and discuss the factors that favour growth and survival of microorganisms
3. Explain the key roles of microorganisms in the environment, health and industry.
4. Use knowledge of microorganisms to ensure their appropriate control in public sanitisation, food and environmental industries and treatment of human infection with antibiotics
5. Conduct basic investigations in microbiology within Workplace Health and Safety guidelines and using techniques such as aseptic technique, microscopy, culturing and enumeration and interpret the data.
6. Design, perform, critically evaluate and report an experiment in microbiology using the scientific method.
7. Work effectively in a group to design and perform experiments.
8. Communicate microbiology concepts in oral and written form.

Subject Content

1. The history and scope of microbiology
2. Evolution, diversity and significance of microorganisms and their classification and identification
3. Structure, function and reproduction of prokaryotic and eukaryotic microorganisms and viruses
4. Microbial nutrition and growth
5. Methods used to control microbial growth
6. Principles of scientific method and experimental design to solve problems in microbiology
7. Techniques for observing, growing and enumerating microorganisms

Level Undergraduate Level 2 subject

Pre-requisite(s) BIOS 2022

Equivalent Subjects BIOS 2025 - Microbiology 2

Restrictions

Successful completion of 60 credit points

Assumed Knowledge

Knowledge of the major groups of microorganisms and their structure and functions including DNA and key metabolic pathways.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss and compare examples of the metabolic strategies used by prokaryotes to survive in a wide range of environments and their application in industry
2. Explain the origins of genetic diversity in bacteria and how genes are regulated
3. Describe how recombinant DNA technology is used as a tool to address a range of biological questions
4. Describe and apply biochemical and molecular techniques used in the identification of an unknown microorganism and analyse the results
5. Perform basic techniques employed in the study of microbial physiology and genetics both individually and as a team
6. Analyse and interpret scientific literature and effectively communicate ideas

Subject Content

1. Microbial genomics reveals potential metabolic pathways used by an organism
Prokaryotes use diverse metabolic strategies to obtain energy (aerobic and anaerobic respiration, photosynthesis, and fermentation) and use thes ein biosynthesis. Metabolism can also be harnessed for biotechnology to make microbial fuel cells, biofuels, industrial chemicals, and foods.
3. Prokaryotes regulate gene expression in response to external and internal cues and/or signals
Microorganisms can be classified and indetified using biochemical, immunological, and genetic tests. These methods can also be used to examine mechanisms of microbial evolution.
5. Recombinant DNA technology is used as a tool to address a range of biological questions

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	90 minutes	15	N	Individual
Report	1,000 words	40	N	Individual
Quiz	90 minutes	20	N	Individual
Presentation	10 minutes	25	N	Individual

BIOS 2026 Molecular Biology

Credit Points 10

Legacy Code 300817

Coordinator Liza Cubeddu (https://directory.westernsydney.edu.au/search/name/Liza Cubeddu/)

Description Molecular biology is central to many fields of the biomedical and natural sciences, and includes genetics, immunology, cell biology, biochemistry, and forensics. Through comparative studies of different organisms, this subject will describe fundamental concepts and methods in the study of DNA and RNA and the application of molecular biology in advanced fields such as genomics. Subjects will include DNA replication; transcriptional, post-transcriptional and epigenetic regulation of gene expression; microarrays, and an introduction to bioinformatics. Practical work will provide opportunities to become familiar with the methods of molecular biology, with an emphasis on the development of problem solving and analytical skills

School Science

Discipline Biochemistry and Cell Biology

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) BIOS 2014 OR
BIOS 2018 OR
BIOS 2021

Equivalent Subjects BIOS 3020 - Molecular Biology BIOS 3015 - Human Molecular Biology

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Structure of DNA, genes and chromatin.
2. Key processes of DNA replication and protein synthesis including transcription and translation

3. Transcriptional and post-transcriptional regulation of RNA; epigenetics, polyadenylation, RNA splicing and RNA interference.
4. Analysis of DNA and RNA; Polymerase chain reaction (PCR), DNA sequencing, reverse transcriptase PCR, cloning, microarray analysis, and introductory bioinformatics.
5. Techniques of molecular biology; including laboratory practicals and skills in the design, analysis and interpretation of experiments.

Subject Content

Structure of DNA, genes and chromatin.
Key processes of DNA replication and protein synthesis including transcription and translation
Transcriptional and post-transcriptional regulation of RNA; epigenetics, polyadenylation, RNA splicing and RNA interference.
Analysis of DNA and RNA; Polymerase chain reaction (PCR), DNA sequencing, reverse transcriptase PCR, cloning, microarray analysis, and introductory bioinformatics.
Techniques of molecular biology; including laboratory practicals and skills in the design, analysis and interpretation of experiments.

Assessment

BIOS 2032 Plant Physiology

Credit Points 10

Legacy Code 300865

Coordinator Oula Ghannoum (https://directory.westernsydney.edu.au/search/name/Oula Ghannoum/)

Description Plants are the primary producers of terrestrial ecosystems and moderators of climate change. This subject introduces students to how plants grow and interact with their environment. Students will learn how leaves turn sunlight energy into sugars; stems transport water, solutes and organic compounds; roots acquire water and mineral nutrients by themselves or in association with soil microbes; and hormones regulate plant development and responses to the environment. This knowledge set is crucial for managing our Century's key challenges of food security and climate change. Students will be required to travel to the Hawkesbury campus where the practicals take place.

School Science

Discipline Botany

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Equivalent Subjects LGYA 5946 - Introductory Plant Physiology BIOS 2033 - Plant Physiology

Assumed Knowledge

Sound knowledge of biology and chemistry equivalent to undergraduate Level 1 subjects.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the basic plant structures: cell, leaf, stem, root
2. Explain the fundamental processes of photosynthesis, including the light-dependent and light-independent reactions
3. Explain the principles of leaf gas exchange, including how the environment regulates the trade-off between carbon gain and water loss in higher plants
4. Explain the principles of plant water relations, and of water and nutrient uptake and transport
5. Describe the main principles of plant mineral nutrition, and explain the role of key plant-microbe interactions in plant nutrition
6. Describe the basic principles of plant growth and development, including the role of hormones in controlling plant growth, development and environmental responses.
7. Record accurate and valid measurements, critically analyse experimental results and synthesise findings to reach valid conclusions.
8. Communicate orally and in writing the findings of scientific investigations and contemporary issues in plant physiology incorporating findings from the literature through literature surveys on a specific topic

Subject Content

1. Module 1: Leaf structure and function
a. Leaf structure
b. Light-dependent and independent reactions of photosyntheses
2. Module 2: Leaf ecophysiology
c. Leaf gas exchange and the environment
d. Photosynthetic pathways and ecology
3. Module 3: Stem structure and function
a. Stem structure and plant water relations
b. Water and assimilate transport
4. Module 4: Root structure and function
a. Root structure and mineral nutrition
b. Plant-microbe interactions
5. Module 5: Plants and the environment
a. Plant hormones and development
b. Plant hormones and responses to the environment.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are

regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz - In-class quizzes	5 x In-class quizzes worth 4 marks each Completed during a practical/ tutorial session; up to 30 min each, short answers & MCQ	20	N	Individual
Quiz - Online quizzes	2 x Online quizzes worth 10 marks each Completed online, up to 60 min per quiz, short answers & MCQ; covering 1 practical session	20	N	Individual
Report covering practical session 1	Up to 2,000 words	30	N	Individual
Final Exam - MCQ Exam	2 hours	30	N	Individual

BIOS 2034 Principles of Evolution

Credit Points 10

Legacy Code 300980

Coordinator Paul Rymer (https://directory.westernsydney.edu.au/search/name/Paul Rymer/)

Description This subject is designed to impart an understanding of the core concepts in modern evolutionary theory, and an appreciation of the central position it plays in unifying all sub-disciplines of biology. The subject will cover modern synthesis, phylogenetics, phylogeography, origin of variation, genetic drift, natural selection, and coevolution, with a major emphasis on evolutionary mechanisms and analytical techniques.

School Science

Discipline Ecology and Evolution

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) BIOS 1001 AND BIOS 1012

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Define evolution and provide supporting evidence
2. Explain the concepts of natural selection, biological adaptation and speciation
3. Assess the relative importance of neutral and selective processes in population divergence and speciation
4. Determine the direction and strength of migration, and the origin of genetic variation
5. Construct and interpret evolutionary phylogenies according to the concepts of common ancestry and parsimony of derived characters
6. Test the importance of interactions in driving trait shifts in a geographic context
7. Critically assess and interpret scientific literature, and advances in the field of research
8. Design, execute, analyse and interpret scientific experiments
9. Communicate the findings of investigations and experiments in oral and written form
10. Analyse the application of evolutionary theory to many modern issues, including (but not limited to) infectious disease, human behaviour, and genetic engineering

Subject Content

This subject provides a framework for understanding the concepts of evolutionary biology. It offers an overview of the subject by focusing on the nature of species and how they interact in ecological systems to drive evolutionary change. Students will examine evolutionary theory and supporting evidence from the fossil record, embryonic development, to DNA. Techniques in inferring phylogenetic relationships, estimating divergence times, trait evolution and origin of variation will be applied. Other subjects to be discussed include the role of biodiversity, development, evolution of sex, cooperation and behaviour, infectious disease, coevolution and human evolution.
The subject will have four major topics following the selected textbook, which will be taught over 3 weeks (delivery online modules & quizzes, 3 x 2hr lecture, 1-2 lab/workshop) with 3-4 concepts to explore where specific techniques and examples will be demonstrated/provided.
1. Foundations of Evolutionary Biology
- An Overview of evolutionary biology
- Darwin and natural selection
- Phylogeny and evolutionary history
2. Evolutionary Genetics
- sources of Genetic variation
- The Genetics of populations
- quantitative Genetics
- Genome evolution
3. The History of Life
- The origin and evolution of life
- major transitions
- evolution and development
- species and Speciation
4. Adaptations
- The evolution of sex
- sexual selection
- The evolution of Sociality
- coevolution

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are

regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Mid-term Online tests - 4 online multiple choice tests through vUWS (5% each test)	1 hour (open book and done in own time)	20	N	Individual
Critical review of published article	5min and questions	10	N	Individual
Practical assessment - Short answer in class assessment	200 words	10	N	Individual
Scientific Report	2,000 words	20	N	Individual
Final Exam - combination of multiple choice and short answer questions	2 hours	40	N	Individual

BIOS 2035 Principles of Zoology

Credit Points 10

Legacy Code 300979

Coordinator Kate Umbers (https://directory.westernsydney.edu.au/search/name/Kate Umbers/)

Description Explores the diversity of invertebrate and vertebrate life in a phylogenetic context. Taxonomy, anatomy, ecology, ethology and physiology of major groups of animals are examined. Patterns will be examined from an evolutionary perspective and the subject will focus on structure and function to examine specialisations and adaptations of animals to their environment. The subject will use lectures and laboratory sessions to allow an interactive appreciation of the diversity of biological mechanisms and processes in the Animal Kingdom.

School Science

Discipline Zoology

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) BIOS 1001

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the Phylum and Class to which any animal belongs, and within certain Classes, identify its Order;
2. Place animal Phyla in an evolutionary sequence, using evidence derived from body architecture, symmetry and internal complexity;
3. Explain reproductive mechanisms and life-cycles of animals in relation to lifestyle and habitat;
4. Characterise each of the major animal Phyla and constituent Classes in terms of their distinguishing features; relate physiological complexity to phylogenetic sequence;
5. Analyse the reasons for the success and diversity of the arthropods and vertebrates;
6. Dissect, identify and describe the function of major internal organs or structures of invertebrates and vertebrates;
7. Analyse and present data and communicate key findings.

Subject Content

1. Porifera & Cnidaria
2. Platyhelminthes, Nematoda & Annelida
3. Mollusca
4. Arthropoda
5. Echinodermata
6. Molluscs
7. Segmented Worms & Pseudocoelomates
8. Arthropods and Echinoderms
9. Lower Chordates & Fishes
10. Amphibians
11. Reptiles
12. Birds
13. Mammals

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Recorded Presentation (video or audio)	3 mins	35	N	Individual
Quiz	up to 30 mins per quiz	30	N	Individual
Final Exam - Online multiple choice and open answer questions	2 hours	35	N	Individual

BIOS 2040 Invertebrate Zoology

Credit Points 10

Legacy Code 301256

Coordinator Scott Johnson (https://directory.westernsydney.edu.au/search/name/Scott Johnson/)

Description More than 99% of animals are invertebrates and due to their key role in all ecosystems, renowned biologist E. O. Wilson famously described them as the 'little things that run the world'. Besides their ecological importance, many invertebrates are useful to humans, whereas others are harmful to agriculture, human and veterinary health. This subject introduces invertebrate diversity in the context of their ecological and economic importance. It also develops skills necessary to classify and distinguish between the major invertebrate taxa. This subject includes fundamental hands-on laboratory and field studies skills for students with broad career pathways in science (e.g. animal, environmental, forensic and medical sciences) as well as agriculture, environmental management, and education.

Level Undergraduate Level 2 subject

Equivalent Subjects NATS 3026 Forensic Biology BIOS 2035 Principles of Zoology

Incompatible Subjects BIOS 3017 Invertebrate Biology

Assumed Knowledge

A basic understanding of core concepts of biology and/or zoology is desirable.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe how the ﷺetree of lifeﷺf concept applies to identification and classification of invertebrate taxa.
2. Compare and contrast reproduction, behaviour, physiology, development, lifecycles, morphology and anatomy of the major invertebrate taxa.
3. Develop the knowledge and skills to identify and classify major invertebrate taxa.
4. Describe invertebrate biodiversity in an ecological and evolutionary context.
5. Describe the concepts and evaluate the roles and interactions of invertebrates in the human and natural environments.
6. Describe the major principles of invertebrate conservation and major threats to invertebrates.
7. Develop communication skills in presenting information on the scientific method as it relates to invertebrates and results of scientific studies in an engaging format.

Subject Content

1.Introduction to the principles and concepts underpinning invertebrate diversity
2.Reproduction, behaviour, physiology, development and lifecycles of the major invertebrates orders
3.Classification, morphology and anatomy of the major invertebrate taxa
4.Introduction to applied invertebrate ecology in human and natural environments
5.Engaging communication formats to present scientific information.

Special Requirements

Legislative pre-requisites

Students who opt to enrol in this subject are strongly recommended to obtain a Tetanus vaccination/booster. Students who cannot evidence vaccination may be precluded from activities on the Farm, and/or internships with third parties.

Assessment

BIOS 2041 Vertebrate Zoology

Credit Points 10

Legacy Code 301257

Coordinator Christopher Turbill (https://directory.westernsydney.edu.au/search/name/Christopher Turbill/)

Description This subject examines the functional ecology and diversity of vertebrate animals (fish, amphibians, reptiles, birds and mammals). It combines anatomy, physiology, ecology and behaviour, to explain how vertebrates survive and reproduce in relation to their environment. We will uncover the evolutionary relationships among vertebrate groups, and examine their adaptations to different environmental challenges. The subject also explores patterns in vertebrate diversity, with a focus on Australian ecosystems. Students further develop their knowledge of the scientific method to conduct their own project to investigate how environmental factors influence vertebrate animal abundance

and diversity. Students may be required to travel to another campus to undertake this subject.

Level Undergraduate Level 2 subject

Pre-requisite(s) BIOS 1001

Incompatible Subjects BIOS 3023 Vertebrate Biodiversity

Restrictions

Successful completion of 60 credit points

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the morphological and physiological characteristics that define vertebrate animals
2. Describe the processes and explain patterns in the phylogenetic (evolutionary) history and current diversity of vertebrate animals
3. Compare and contrast the structure and function of major body systems in vertebrate animals to understand their evolution in response to different environmental challenges
4. Interpret the ecological function of variation in morphological, physiological and behavioural traits among vertebrate animals in relation to their environment, especially from an Australian perspective
5. Review the diversity of vertebrate animal species and identify human-induced environmental changes that threaten the viability of animal populations
6. Apply the scientific method and work collaboratively to conduct and analyse a research project addressing the environmental factors that determine the diversity and abundance of vertebrate animal species

Subject Content

- Structure and function of major vertebrate animal groups
- Evolutionary relationships among vertebrate animal groups
- Diversity of vertebrates, around the world and in Australia
- Functional ecology of vertebrates in Australian ecosystems
- Application of scientific method to study vertebrates in relation to their environment

Special Requirements

Legislative pre-requisites

BIOS 2042 Biochemistry

Credit Points 10

Legacy Code 301460

Coordinator Roland Gamsjaeger (https://directory.westernsydney.edu.au/search/name/Roland Gamsjaeger/)

Description Biochemistry is the study of the chemistry of life. By understanding the structure and roles of biological macromolecules found in cells students will develop the concept of self assembly of these molecules to form life. Topics include the structure of carbohydrates, lipids, proteins, and nucleic acids and how they function in the lipid and aqueous environments of the cell. Basic metabolism is introduced with an overview of the major pathways in cells, mechanisms of regulation, and an introduction into important cofactors and intermediatory molecules. These concepts will be reinforced through practical classes that teach critical skills in experimental design, analysis and interpretation.

School Science

Level Undergraduate Level 2 subject

Pre-requisite(s) CHEM 1012 Essential Chemistry

Restrictions

Successful completion of 60 credit points

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and explain biologically important chemical bonds and functional groups and describe their interaction.
2. Recognise and describe the structure of monomeric units of major biomolecules in a cell.
3. Explain how complex biomolecules form through polymerisation, chemical modification or aggregation of these monomeric units form complex functional or structural molecules.
4. Discuss key metabolic processes, their control and cellular location.
5. Relate different biomolecules to different cellular structures and processes.
6. Handle biomolecules for analysis in a laboratory.
7. Collect, record and analyse laboratory data in a lab book consistent with legal standards.
8. Be able to perform basic biochemical calculations (mole calculations, dilutions, unit conversion, standard curve and basic enzymatic calculations).
9. Work as a member of a group.

Subject Content

1. Overview of Biochemistry
- The cell, groups of important biomolecules, bonds, Functional groups, genes to proteins
- The aqueous environment
2. Biomolecules - Lipids
- The Chemistry and structure of fatty acids
- Membranes: phospholipids and glycolipids
3. Biomolecules - Introduction to Carbohydrates and Glycobiology
- The Chemistry and nomenclature of mono, di and polysaccharides
- Heteropolysaccharides: cellulose, starch, glycogen and The extracellular matrix
4. Biomolecules - Nucleic acids
- Ribose, deoxyribose, phosphodiester bonds, bases
- structural differences between RNA and DNA
5. Biomolecules - Proteins
- Amino acids: functional groups; acid base properties; symbols
- structure of proteins: peptide bonds, protein folding, pictorial representation of protein structure
- Classification and functions of proteins
- protein Packaging and post translational modification
- protein degradation
6. Introduction to metabolism
- Overview of anabolic and catabolic pathways and their regulation
- Characteristics of enzymes: active sites; catalytic principles; Basic enzyme kinetics
- introduction to important branch Point, High energy compounds and co-Factors
7. Quantitative aspects of Biochemistry
- handling and Analysing biomolecules in A laboratory
- developing independence in data organisation, recording and calculations
- maintaining A legal Standard laboratory note book

BIOS 3001 Advanced Cell Biology

Credit Points 10

Legacy Code 300850

Coordinator Mark Jones (https://directory.westernsydney.edu.au/search/name/Mark Jones/)

Description Cells of the body are studied in the context of health and disease, including mechanisms by which cells respond to the environment and integrate in and around tissue. Fundamental cellular processes are discussed that are important in embryonic development, stem cells, haematology and cancer. This subject investigates the action of hormones, growth factors and morphogens; their receptors and signalling pathways and the cellular responses they trigger. This subject covers modern techniques in cell culture, tissue engineering, advanced microscopy and other modern experimental approaches that enable dynamic understanding of live cell function.

School Science

Discipline Biochemistry and Cell Biology

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) BIOS 2021 OR
BIOS 2014 OR
BIOS 2026 OR
BIOS 2020

Equivalent Subjects LGYA 6014 - Mammalian Cell Biology and Biotechnology BIOS 3011 - Cell Signalling

Incompatible Subjects LGYA 5857 - Cell Signalling and Molecular Immunology

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe detailed microscopic appearance of eukaryotic cells and their specialization, from stem cells to blood and tissue.
2. Explain the compartmentalization of molecules and their transport throughout the cell.
3. Explain the interrelationship of cells with their immediate environment including adjacent cells, the extra-cellular matrix, and the cytoskeleton.
4. Describe the molecular events, regulated by receptors and signal transduction pathways, cells activate following stimulation.
5. Describe the development of cells (e.g. haematopoiesis), their identification, morphology and function in the context of haematology.
6. Explain the detailed microscopic characterization of eukaryotic cells in blood and tissue, including the use of confocal microscopy and fluorescence correlation spectroscopy.
7. Demonstrate technical and interpretive skills for cell culturing, including cell characterization using advanced microscopy and image analysis.

Subject Content

The structure and function of membranes, organelles and the cell cytoskeleton.
Intracellular compartmentalization of molecules and their transport.
The interrelationship of cells with their immediate environment including adjacent cells, the extra-cellular matrix, and the cytoskeleton.
Cell communication through: Receptors - families, general properties; receptor-ligand binding studies and outcomes, and Signalling molecules - structural variety; functional classification.
Cell division including stem cells, the cell cycle, and its control and cell death.
The development of cells (e.g. haematopoiesis), their identification, morphology and function is investigated in the context of haematological and cell disorders and stem cell therapies.
The detailed microscopic characterization of eukaryotic cells in blood and tissue, including confocal microscopy and fluorescence correlation.
The development of technical and interpretative skills relevant to cell culture methods, cell characterisation through specific stains/probes, using advanced microscopy and image analysis techniques.

BIOS 3003 Advanced Sports Physiology

Credit Points 10

Legacy Code 400888

Coordinator Shona Papalia (https://directory.westernsydney.edu.au/search/name/Shona Papalia/)

Description In 2017, this subject is replaced by 401146 - Applied Physiology. This subject presents the knowledge and laboratory skills essential to understanding the physiological demands on the sports participant, as well as to develop, implement and evaluate sports-specific training programs. Students will develop the knowledge and skills necessary to perform and interpret results for a number of standard laboratory and field-based physiological tests used in talent identification and the assessment of high performance athletes. Prescription focuses on the development and implementation of sport specific fitness programs. Also covered are the physiology of ergogenic aids, overtraining, muscle fatigue and soreness; physiological factors limiting performance; and physiological responses to exercise in challenging environments.

HLTH 2004 AND
BIOS 2037

Equivalent Subjects BIOS 3022 - Sports Physiology

Restrictions

Students must be enrolled in program 4658 - Bachelor of Health Science (Sport and Exercise Science).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss how a variety of physiological, metabolic, hormonal and neural factors may limit athletic performance;
2. Explain the scientific basis for talent identification, the selection of athlete assessment procedures and the adaptations required for different age groups;
3. Organise, conduct and interpret the results of an array of physiological laboratory and field based techniques used in the assessment of high performance athletes and in talent identification including VO2max; anaerobic threshold, OBLA,

anaerobic exercise capacity; plus muscular strength, power and endurance; flexibility (ROM); speed; power; general functional movement and functional skill; and other sport specific tests.

4. Identify the relative importance of the fitness components to performance in a sport and positions within a sport, and describe the effects of different types of sports training (and detraining) on physiological, hormonal, immunological, metabolic and neural responses and adaptations to exercise and on sport specific test results.
5. Demonstrate an ability to: assess athletes fitness; promote, design programmes, implement, supervise, demonstration, monitor and evaluate effective programs for individual athletes and sporting teams (who are children; adolescents, adults and older individuals) for training improvements in: flexibility, aerobic and anaerobic power and capacity, lactate tolerance, anaerobic threshold, metabolic efficiency, strength, speed and power.
6. Describe and explain the effects of challenging environments on sports training and performance including: heat, cold, altitude, pollution.
7. Explain the potential risks and benefits of various physiological ergogenic aids on exercise performance and general health including but not limited to the effects of anabolic steroids, autologous blood transfusion ('blood doping', erythropoietin and growth hormone.
8. Describe the signs, causes and contributing factors related to over training syndrome.
9. Explain how muscular fatigue, weakness, muscular soreness acute muscle soreness and delayed onset muscle soreness may affect biomechanics of motion and thus quality of training and sports performance.
10. Critically evaluate current research literature on the mechanisms on muscular fatigue, acute muscle soreness and

Subject Content

Testing of high performance athletes.
1. Factors that limit athletic performance
a. Physiological
b. Metabolic
c. Hormonal
d. neural
2. Physiological testing of athletes - Scientific basis for athlete testing and Criteria for selecting tests
a. Choosing attributes to be tested and the tests to be used
- identifying important fitness Attributes for A sport
- role of Notational and Game analysis
- ability to discriminate, accuracy, Validity and reliability
- children Vs adolescents Vs adults Vs older individuals
- Catering for current Sports performance level
b. The AIS laboratory standards assistance scheme and Laboratory accreditation
c. General pre-test management and administration
- consent forms
- medical/health assessment/Screening
- explanation of procedures
- Privacy and Personal Information Protection Act 1998 (PPIPA) and the Health Records and Information Privacy Act 2002 (HRIPA) and how they apply to information collected from a client
- legal requirements for individuals Working with children in sport and how An individual shows that they comply with those requirements
- strategies and systems that need to be implemented to ensure The minimisation of health and injury risks associated with training and testing in sport
- record keeping
d. Tests used by sports scientists and their purposes: Characteristics of good measurement, statistics and related terminologies with examples from literature. Fundamental techniques in measurement e.g. controls, accuracy, test selection, recording. Validity, reliability and objectivity using known tests in a laboratory setting. Norms (percentiles and stanines)
e. Tests used by sports coaches and trainers
f. The tests including VO2max; anaerobic threshold, OBLA, anaerobic exercise capacity; plus muscular strength, power and endurance; flexibility (ROM); speed; power; general functional movement and functional skill; and other sport specific tests
g. Assessment procedures for specific sports including calculations and interpretation of resulting data (Running and a team sport)
h. Associated Practical
- equipment calibration
- organise, conduct and interpret The results of An array of physiological laboratory and field based techniques used in The assessment of High performance athletes and in talent identification
3. Talent identification in children, adolescents and young adults
a. Discussion of tests for sports: where identification works well; Where it doesn't work well. The Australian eNTID and other programs
4. Sport specific training
a. Effects of different types of sports training (and detraining) on physiological, hormonal, immunological, metabolic and neural responses and adaptations to exercise and on sport specific test results
b. Programme design
- promotion and evaluation, individual athletes and sporting teams (who are children; adolescents, adults and older individuals) for training improvements in: flexibility, aerobic and anaerobic power and capacity, lactate tolerance, anaerobic threshold, m
- year-round training; periodisation of training (in commonly seen proformas), peaking and tapering, off season training
- developing fitness for optimum performance in specific Sports
- associated practical: program design, implement, supervise, demonstration, Monitor and Evaluate
5. Overtraining
a. Causes and contributing factors
b. Signs and symptoms
c. Effects on
- athlete performance in training and Competition
- on fitness and fitness test results
d. Prevention
e. Treatment
f. Retraining after overtraining syndrome
6. Ergogenic aids
a. Definitions of ergogenic aid and doping
b. The IOC rules what and why
- drugs (therapeutic Vs illegal)
c. Specific drug categories
- anabolic steroids
- blood doping
- amphetamines
- erythropoeitin
- growth hormone
7. Environmental sports physiology implications for sports performance
a. Thermoregulation
b. Altitude
c. Circadian rhythms
d. Pollution
8. Nutrition and Hydration for high performance and elite a

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject, students must have:

1) submitted a Student Undertaking Form and have applied for a National Police Certificate;
2) submitted Working with Children Check Student Declaration;
3) possess a current WorkCover Authority approved First Aid Certificate.

BIOS 3004 Analytical Microbiology

Credit Points 10

Legacy Code 300866

Coordinator Thomas Jeffries (https://directory.westernsydney.edu.au/search/name/Thomas Jeffries/)

Description The subject provides a theoretical and practical introduction to wide range of microbiological techniques that are commonly used in medical science, industrial and food microbiology, environmental science, and research. Building on a basic understanding of microbiology the subject shows how microorganisms can be isolated, identified, and enumerated using traditional microbiological methods, modern variations on traditional methods, and more recent immunological and molecular methods. The laboratory component is an integral component of the subject as the students use a variety of techniques, methods and commercial systems that are applied in microbiological laboratories, and incorporates problem solving and inquiry based exercises.

School Science

Discipline Microbiology

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) BIOS 2022

Equivalent Subjects BIOS 3031 - Analytical Microbiology

Restrictions

Successful completion of 60 credit points

Assumed Knowledge

A good general knowledge of microbiology and having the technical skills needed to work safely with microorganisms.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the microbiological methods used to observe, enumerate, isolate, characterise, differentiate, tag and identify microbial populations.
2. Discuss the importance of rapid methods in medical microbiology with reference to factors such as cost, speed of diagnosis, accuracy, skill levels and accreditation.
3. Describe methods for characterising microbial populations in various environments.
4. Perform a variety of analytical techniques, complying with Occupational Health and Safety guidelines, to identify, characterise and enumerate microorganisms in environmental samples and foods.
5. Apply different analytical methods given the context, situations and/or scenarios.
6. Work cooperatively and constructively in groups to solve problems using the scientific method.
7. Read and interpret scientific articles in the field of analytical microbiology.
8. Create a valid hypothesis, and design and undertake an experimental protocol to test this hypothesis derived from a scientific question.

Subject Content

1. The importance of microscopy, particularly fluorescent microscopy in analytical microbiology.
2. Physical and nutritional methods of selective enrichment of target microorganisms and the use of selective and differential media with emphasis on chromogenic media.
3. Chemical and physical methods to characterise and enumerate microorganisms.
4. The importance of biochemical analyses and computer aided identification systems to identify microorganisms.
5. Methods to determine antibiotic resistance in microorganisms.
6. The different methods of microbial identification based on immunological techniques such as ELISA, immunochromatography and immunoflourescence.
7. The application of molecular methods such as PCR, hybridisation, and NASBA, to detect, differentiate, monitor and target microorganisms quantitatively.
8. Chemical methods such as phospholipid fatty acid analysis and molecular methods such as Terminal RFLP to identify and characterise microbial populations.
9. Application of analytical microbiology in food, medical and environmental studies.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Practical Exam	2 hours	50	Y	Individual
Report	2,000 words	30	N	Group/ Individual
Professional Task	Up to 1,000 words	20	N	Individual

BIOS 3005 Applied Biomechanics

Credit Points 10

Legacy Code 401147

Coordinator Peter Clothier (https://directory.westernsydney.edu.au/search/name/Peter Clothier/)

Description To fully understand the science underlying the optimisation of human movement, students require a comprehensive working knowledge of Biomechanics. This subject represents a theoretical and applied study of selected topics in Biomechanics. It builds on the basic principles of Biomechanics that are presented in the subject Biomechanics and applies this knowledge to the analysis of sporting and human exercise performance. To achieve this, advanced methods and concepts in the biomechanical analysis of human performance are identified and explored.

School Health Sciences

Level Undergraduate Level 3 subject

Pre-requisite(s) HLTH 2003

Equivalent Subjects BIOS 3006 - Applied Biomechanics of Exercise BIOS 3007 - Applied Biomechanics of Sport and Exercise

Restrictions

Students must be enrolled in 4658 - Bachelor of Health Science (Sport and Exercise Science).

Assumed Knowledge

It is expected that students have the knowledge and skills associated with the prerequisite subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe and apply biomechanical principles to assess movement in the context of health, exercise, sport and/or activities of daily living in a variety of populations.
2. Articulate and synthesise factors governing efficient movement from a biomechanical perspective.
3. Utilise biomechanical measurement techniques to assess human movement, human interactions with equipment and the environment, and devise intervention strategies where appropriate.
4. Collect, process and present data common to biomechanical analyses using biomechanical equipment and software applications.
5. Identify and explain biomechanical factors associated with injury and injury prevention.
6. Describe and apply techniques to analyse gait using basic temporal, kinematic and kinetic measurement procedures.
7. Illustrate and explain muscle mechanics concepts that affect muscle performance.

Subject Content

- Qualitative analysis techniques: mechanical analysis of movement and methods of observation for The assessment of performance / technique
- Dynamometry: principles and applications of Force measurement in biomechanics
- Motion analysis: principles and applications in The use of video/ Motion analysis in biomechanics
- Muscle mechanics: theory, assessment and application of muscle mechanics principles in sport and Exercise
- Gait analysis: theory and application of gait analysis techniques in biomechanics
- he application of Biomechanical principles to selected Sports and Exercise movements
- Ergonomics: theoretical and practical applications of The Biomechanical analysis of workstations
- Electromyography: The collection and use of EMG data in biomechanics

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

BIOS 3013 Ecosystem Carbon Accounting

Credit Points 10

Legacy Code 300856

Coordinator Matthias Boer (https://directory.westernsydney.edu.au/search/name/Matthias Boer/)

Description A critical part of society's response to climate change is to measure the movement of greenhouse gases. Once this is done, steps taken to reduce these gases can be correctly targeted and the impact of such steps monitored. This subject will introduce students to the scientific measurement of greenhouse gas uptake and emissions, including assessment of uncertainties and verifiability of measurement. Ecosystem-level models will be used to estimate and quantify movement of greenhouse gases, allowing quantification of the net greenhouse gas emissions over the life cycle of a product. These approaches are vital steps in moving our society to a sustainable future.

School Science

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) EART 2001

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the key components of the global carbon cycle, particular natural and anthropogenic CO2 emissions, CO2 uptake and release of managed and natural ecosystems, storage of carbon in the oceans and on land.
2. Describe and critique the measurement techniques available for measurements of carbon stocks in managed and natural ecosystems.
3. Describe sources of measurement error, spatial and temporal variability, and report uncertainty of estimates using confidence intervals.
4. Apply appropriate techniques to quantify carbon stocks of managed and natural ecosystems, with critical evaluation of the limitations of the methods.
5. Use the full carbon accounting model (FullCAM) to estimate pools and fluxes of carbon in forest ecosystems, and evaluate effects of alternative management strategies and environmental variation.
6. Describe and quantify the carbon storage in forestry products over their expected lifetime.
7. Communicate results of enquiry using a range of formats and media.

Subject Content

Components of the global carbon cycle: pools and fluxes
Ecosystem carbon balance: processes and measurement
Measurement of carbon storage: field methods, measurement error and sampling variability
Quantifying carbon storage: carbon sequestration in vegetation and soils
Ecosystem-level models for greenhouse gas accounting (Full Carbon Accounting Model, FullCAM)
Trade-offs between carbon sequestration and the water cycle: plantation water use, groundwater and salinity
Understanding carbon footprint, and the impact of substituting wood products for fossil fuels
Carbon accounting in an international context : important international treaties and initiatives (Kyoto, carbon trading, REDD), and the varying role of forestry plantations
Comparing greenhouse gas emissions with offsets created by forest plantations

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Scientific Report: Carbon sequestration of trees	1,500 words	20	N	Individual
Scientific Report: Carbon emission and sequestration	1,500 words	20	N	Individual

Life cycle analysis: Slide presentation (10%, group mark); Talk (10%, individual mark)	Slides: 20 - 30 slides; Talk: 5 - 8 mins	20	N	Individual
Final examination: Short answer and essay questions	2 hours	40	N	Individual

BIOS 3014 Genes, Genomics and Human Health

Credit Points 10

Legacy Code 300820

Coordinator Graham Jones (https://directory.westernsydney.edu.au/search/name/Graham Jones/)

Description A genome is all of the genetic information that makes us who we are. Beginning with an overview of the evolution of the human genome, this subject will introduce you to current concepts in gene regulation and how genetic variability is correlated with susceptibility to rare and common disease in individuals and populations. You will also gain practical experience in key methods and analyses of genetic variation and understand how such techniques are delivering new insights into the origins and treatment of human disease.

School Science

Discipline Genetics

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) BIOS 2018 Genetics

Restrictions

Successful completion of 120 credit points

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the structure of the human genome and common genetic variants in the genome
2. Explain the mechanisms by which the integrity of the human genome is maintained and relate errors in these pathways to human health
3. Compare and contrast the genetic basis of rare single-gene Mendelian disorders with common complex multi-gene disorders
4. Describe methods of genetic analysis as applied to single gene and multi-gene disorders
5. Evaluate the role of genetics in exploring the relationship between lifestyle, the environment, and common human diseases
6. Gather information, plan, complete and analyse experiments in molecular genetics

Subject Content

1. Genetic variability in the genomes of modern and ancient human genomes and between populations of modern humans
2. The complexities of gene regulation in the era of genomics
3. Methods of genome and transcriptome sequencing and genotyping
4. A genomic view of human immunology
5. Translating genomics to an understanding of immune disease 6. Ethics and genomics 7. Methods in immunology

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

BIOS 3017 Invertebrate Biology

Credit Points 10

Legacy Code 300918

Coordinator Uffe Nielsen (https://directory.westernsydney.edu.au/search/name/Uffe Nielsen/)

Description Invertebrates are the most diverse and abundant organisms in aquatic and terrestrial environments. Due to their key role in many ecosystems, biologist E. O. Wilson coined the phrase of invertebrates as the 'little things that run the world'. Besides their ecological importance, many invertebrates are useful to humans, whereas others are harmful to agriculture, human and veterinary health. This subject highlights invertebrate diversity and life histories as well

as their key ecological and economic importance. It also includes hands-on laboratory and field studies. This subject is designed for students with career pathways in science (e.g. animal, environmental, forensic and medical sciences) as well as agriculture, environmental management and education.

School Science

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Equivalent Subjects BIOS 3018 - Invertebrate Biology NATS 3026 - Forensic Biology

Restrictions Students must have completed 120 credit points, with at least 40 credit points at level 2.

Assumed Knowledge

A basic understanding of core concepts of biology and/or zoology is desirable.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe invertebrate biodiversity
2. Compare and contrast invertebrate morphology, anatomy, physiology, development, reproduction and behaviour
3. Apply acquired knowledge to identify and classify invertebrates
4. Apply concepts of diversity and abundance through sampling and surveying invertebrate biodiversity in the field
5. Create an invertebrate collection through catching, identifying, classifying, preserving and presenting specimens
6. Design and conduct experiments to study the biology of insects and and write these up as a formal report
7. Identify and evaluate the roles and interactions of invertebrates in the environment
8. Evaluate morphological, ecological and evolutionary relationships of invertebrates

Subject Content

1. Introduction to Invertebrate Diversity
2. Reproduction and Lifecycles of Invertebrates
3. Diversity, Classification, Morphology and Anatomy of: Insects, Crustaceans, Molluscs, Annelids
4. Collection and Identification of terrestrial and aquatic Invertebrates
5. Insect Behaviour
6. Insect-plant Interactions and climate change
7. Applied entomology
8. Insects and parasitoids
9. Bees and other pollinators

Assessment

BIOS 3019 Marine and Aquatic Ecology

Credit Points 10

Legacy Code 300978

Coordinator Sebastian Holmes (https://directory.westernsydney.edu.au/search/name/Sebastian Holmes/)

Description Temperate freshwater, estuarine and marine aquatic ecosystems play vital roles in providing food, water, recreation and other ecosystem services to human society and habitats for important species that make up global biodiversity. Yet aquatic habitats are the most threatened ecosystems on earth, under threat from global climate change and urbanisation. Through inquiry and problem solving this subject will equip students with the necessary techniques in experimental design and analysis needed to investigate aquatic ecosystems and knowledge of the main animal and plants in aquatic and marine ecosystems. The logic and philosophy of science, scientific studies and experimental analyses will be used to understand temperate aquatic ecosystems throughout this subject. On completion students will have the background knowledge and skills communicate to a range of audiences, so that they can contribute beneficially to management and/or conservation of waterways and oceans and the biodiversity within.

School Science

Discipline Marine Science

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Equivalent Subjects BIOS 3009 - Aquatic Ecology BIOS 3010 - Aquatic Ecology

Restrictions Successful completion of 80 credit points at Level 1 and 40 credit points at Level 2.

Assumed Knowledge

Concepts of classification, evolution, taxonomy, cellular processes plant and animal structure and function, normal distribution, representative sampling, probability and uncertainty.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the main characteristics of aquatic habitats including estuarine, freshwater and marine and use taxonomic keys and other

methods to identify organisms where appropriate to species level in freshwater, estuarine and marine habitats.
2. Describe, use and evaluate methods of experimental design and analysis of statistical data in studies in freshwater, estuarine and marine aquatic habitats.
3. Describe the main models which explain factors affecting macrofaunal and floral assemblages in estuarine and marine aquatic habitats.
4. Use and critically evaluate scientific studies to support or reject hypotheses developed and tested within freshwater, estuarine and marine aquatic habitats.
5. Construct experimental designs developed to assess human impacts on aquatic systems and explain these using a philosophical and historical basis of thinking.
6. Demonstrate scientific thinking and communication through the preparation of scientific reports which describe student investigations of aquatic habitats. This involves planning and implementing of experimental designs, selection of appropriate tools to collect representative samples, analyse data and synthesis ideas from the literature to support the main conclusions reached in the investigation.
7. Demonstrate and discuss your appreciation that 70% of our world is covered by aquatic environments and that humans have a responsibility to conserve the biodiversity within for future generations.

Subject Content

1. Characteristics of aquatic habitats ? physical, chemical and biological factors affecting distribution of organisms in estuarine, marine and freshwater aquatic habitats
2. Biotic and abiotic interactions in populations ? competition, predation, herbivory, beneficial associations
3. Experimental tests and analysis of abiotic and biotic interactions
4. Theoretical underpinnings of processes structuring estuarine and marine habitats including larval supply, settlement, post settlement mortality and recruitment into adult populations
5. Natural disturbance and regeneration in benthic communities
6. Connectivity between habitats and the ?gunknown?h process of larval supply in an open system
7. Pressures facing biodiversity of estuarine and marine habitats including ocean acidification

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

BIOS 3021 Plant Health and Biosecurity

Credit Points 10

Legacy Code 300921

Coordinator Jonathan Plett (https://directory.westernsydney.edu.au/search/name/Jonathan Plett/)

Description This subject explores needs of world food production systems for improved plant health and biosecurity, from paddock to plate and environmental consequences of management practices. Through their studies, students will learn to recognise the significance of plant pests (invertebrates, microorganisms and weeds) and their impact on human society and food security, and methods of reducing their damage to plants and plant products. Major areas of study include: recognition of pests and diseases and assessment of field damage; strategies for reducing pest damage (including legislative, physical, biological, genetic and chemical control methods) and their benefits and limitations; the theory and practice of integrated pest and disease management systems; and issues associated with quarantine and biosecurity.

School Science

Discipline Biological Sciences, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Equivalent Subjects LGYA 6250 - Plant Microbiology and Protection

Incompatible Subjects LGYA 5948 - Plant Microbiology Interactions LGYA 6200 - Plant Protection

Assumed Knowledge

Foundation in chemical and biological sciences, quantitative thinking.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Applied Project – Pest & Disease Control	Maximum 5,000 word report (NOTE: limit excludes references section)	25	N	Individual

Report - Practical reports (6)	6 'fill-in-the-blank' , short answer and paragraph prac reports	35	N	Individual
Online Final Exam	2 hours (4 essay style questions) (Open Book)	40	N	Individual

BIOS 3023 Vertebrate Biodiversity

Credit Points 10

Legacy Code 300861

Coordinator Christopher Turbill (https://directory.westernsydney.edu.au/search/name/Christopher Turbill/)

Description This subject examines the functional ecology and diversity of vertebrate animals (fish, amphibians, reptiles, birds and mammals). It takes an integrative approach, combining anatomy, physiology, ecology and behaviour, to explain how vertebrates survive and reproduce in relation to their environment. We will uncover the evolutionary relationships among vertebrate groups, and examine their adaptations to different environmental challenges. The subject also explores patterns in vertebrate diversity, with a focus on Australian ecosystems. Students will apply their knowledge of the scientific method to design and conduct their own research project to investigate how environmental factors influence vertebrate animal abundance and diversity.
