Most electives are 10 credit points. Students must take at least two level 3 subjects as electives. Students may wish to consider using elective choices to complete another health sciences specialisation, such as the following.

Elective Majors

Health Promotion, Major

Health Services Management, Major

Public Health, Major (p. 1622)

Elective Minors

Exercise Science, Minor (https://hbook.westernsydney.edu.au/majors-minors/exercise-science-minor/)

Health and Recreation, Minor (p. 1475)

Health Promotion, Minor (p. 1479)

Health Practice Management, Minor (p. 1478)

Infectious Diseases, Minor (p. 1514)

Physical Activity and Health (p. 1608)

Public Health, Minor (p. 1622)

Sport Development, Minor (p. 1675)

Related Programs

Bachelor of Health Science (4656) (p. 329)
Diploma in Health Science/Bachelor of Health Science (6000) (p. 732)

Clinical Teaching, Testamur Major (T014)

Western Sydney University Major Code: T014

Previous Codes: A4070.1, A4071.1, A4072.1, A4073.1

Available to students in other Western Sydney University programs?
No

The Clinical Teaching major provides students with an opportunity to gain formal education in clinical teaching to either enhance their existing teaching experience or provide skill development in this area. Graduates who complete the Clinical Teaching major will be prepared to take on a leadership role in clinical teaching in the roles such as clinical nurse educator, nurse educator, clinical nurse specialist and undergraduate placement facilitator.

Major Structure

Select the link for your program below to see details of the major

Graduate Diploma in Nursing (Clinical Teaching) - 60 cp 1 year pathway

60 credit point Pathway Structure

Qualification for this award requires the successful completion of 60 credit points including the subjects listed below.

Subject	Title	Credit Points
NURS 7064	Clinical Teaching and Workplace Learning for Competent Practice	10
NURS 7015	Clinical Teaching for Learning	10
NURS 7019	Cultural and Social Diversity in Health Care	10
NURS 7023	Evidence Based Health Care	10
NURS 7003	Applied Clinical Practice using Simulation	10
PUBH 7020	Policy, Power and Politics in Health Care Provision	10
Total Credit Points		**60**

Graduate Diploma in Nursing (Clinical Teaching) - 80 cp 1 year pathway

80 credit point Pathway Structure

Qualification for this award requires the successful completion of 80 credit points including the subjects listed below.

Subject	Title	Credit Points
NURS 7064	Clinical Teaching and Workplace Learning for Competent Practice	10
NURS 7015	Clinical Teaching for Learning	10
NURS 7019	Cultural and Social Diversity in Health Care	10
NURS 7023	Evidence Based Health Care	10
NURS 7003	Applied Clinical Practice using Simulation	10
NURS 7040	Perspectives on Nursing	10
PUBH 7020	Policy, Power and Politics in Health Care Provision	10
Select one elective		10
Total Credit Points		**80**

Master of Nursing (Clinical Teaching) - 1 year pathway

1 year pathway

Qualification for this award requires the successful completion of 80 credit points including the subjects listed below.

Subject	Title	Credit Points
NURS 7064	Clinical Teaching and Workplace Learning for Competent Practice	10
NURS 7015	Clinical Teaching for Learning	10
NURS 7019	Cultural and Social Diversity in Health Care	10
NURS 7023	Evidence Based Health Care	10
NURS 7003	Applied Clinical Practice using Simulation	10
Select one elective		10
Complete one of the following 20 credit point subjects:		20
NURS 7065	Capstone Experience in Health Care	
NURS 7042	Research Project in Health Care	
OR complete the two following 10 credit point subjects		
NURS 7043	Scholarship for Practice Change in Health Care	
NURS 7045	Writing for Publication	
Total Credit Points		**80**

Master of Nursing (Clinical Teaching) - 1.5 year pathway

1.5 year pathway

Qualification for this award requires the successful completion of 120 credit points including the subjects listed below.

Subject	Title	Credit Points
NURS 7064	Clinical Teaching and Workplace Learning for Competent Practice	10
NURS 7015	Clinical Teaching for Learning	10
NURS 7019	Cultural and Social Diversity in Health Care	10

NURS 7023	Evidence Based Health Care	10
NURS 7003	Applied Clinical Practice using Simulation	10
NURS 7040	Perspectives on Nursing	10
PUBH 7020	Policy, Power and Politics in Health Care Provision	10
Select three electives		30
Complete one of the following 20 credit point subjects:		20
NURS 7065	Capstone Experience in Health Care	
NURS 7042	Research Project in Health Care	
OR complete the two following 10 credit point subjects		
NURS 7043	Scholarship for Practice Change in Health Care	
NURS 7045	Writing for Publication	
Total Credit Points		**120**

Composition, Minor (0067)

Western Sydney University Minor Code: 0067

Previous Code: SM1015.1

Available to students in other Western Sydney University programs?
No

Please note: this minor is available **only** to students enrolled in programs 1659 Bachelor of Music, 1738 Bachelor of Music (Dean's Scholars) and 1841 Bachelor of Music/Bachelor of Creative Industries.

Composition develops the creative voice of the composer as distinctive within industry contexts and eclectic in its skill basis and cultural/genre engagement. It does this through developing creative voice awareness, wide contemporary notated composition skills, orchestration and songwriting abilities, as well as improvisation techniques, intercultural awareness, interdisciplinary readiness and collaborative abilities. Collaborative skills are developed including: composer-performer interactivity skills, and songwriting/composition collaborative abilities (lyricists, visual media, dance). Other skills developed include: industry-style pitching abilities, studio sound recording, and screen media production skills. Reflective-practice writing skills are honed to identify and resource creativity, including personal creative voice, with intercultural and global, Australian indigenous, and sustainability hybridities.

Location

Campus	Mode	Advice
Penrith Campus	Internal	EnquiriesHCA@westernsydney.edu.au

Minor Structure

Students must complete four subjects as follows.

Subject	Title	Credit Points
PERF 2004	Composition and Creativity	10
PERF 3023	Songwriting and Composer Collaborations	10

Computational Mathematics, Testamur Major (T118)

Western Sydney University Major Code: T118

Previous Code: MT3040.1

Available to students in other Western Sydney University programs?
No

The power of modern computers adds substantial clout to traditional mathematical and statistical techniques — provided that you know how to make use of the opportunities that computers offer. Building on the Bachelor of Mathematics, this major equips graduates with the skills to make the best use of computational tools. You will learn how to use computers effectively as a mathematician or a statistician, with a focus on efficiency, reliability, and security. These skills are absolutely indispensable if you consider enrolling for an HDR degree, but they will also help you make a case in your next job application.

Bachelor of Engineering Advanced (Honours) (3771) (p. 316)

Conservation Science, Minor (0317)

Western Sydney University Minor Code: 0317

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

This minor will show you how to use science to support conservation strategies and policies. It integrates conservation, ecology and biodiversity – with a focus on the problems of restoring and maintaining viable populations of animal and plant species, and natural and managed ecosystems – so you can better address complex conservation problems. This program is taught by world-class experts and supported by industry partners. You will deepen your understanding of all aspects of biodiversity and conservation, mitigating risk, environmental restoration, national and international conservation policy, and systematic conservation decision-making processes.

Construction Engineering, Testamur Major (T132)

Western Sydney University Major Code: T132

Previous Code: MT3052.1

Available to students in other Western Sydney University programs?
No

Construction Engineering consists of core subjects in structural engineering, project management and construction technologies. Graduates will work in the fields of construction, structural design, and project management. Career opportunities include those in the private or public sector on projects covering highways, airports, and residential & commercial buildings. This major includes a mandatory 300 to 450 hour industrial placement as a completion requirement.

ENGR 4036	Advanced Engineering Thesis 2: Detailed Investigations	10
BLDG 4007	Modern Construction Projects	10
One Alternate subject		10
Select one elective		10
• Elective unit must be Level 2 or higher		
	Credit Points	**40**
	Total Credit Points	**320**

Alternate Subjects

Alternate subjects may be used to complete one of the minors listed below.

Subject	Title	Credit Points
GEOM 3001	Advanced Building Measurement	10
ENGR 3001	Advanced Engineering Topic 1	10
ENGR 4001	Advanced Engineering Topic 2	10
CIVL 4001	Applied Mechanics	10
CIVL 3021	Bridge Engineering Design	10
BLDG 3010	Building Cost Studies	10
CIVL 4002	Composite Structures	10
BLDG 3004	Construction Information Systems	10
CIVL 3010	Highway Infrastructure	10
CIVL 4008	Pile Foundations	10
BLDG 3009	Quality and Value Management	10
CIVL 4009	Timber Structures (UG)	10

Optional Electives

Subject	Title	Credit Points
BLDG 4006	Modern Construction Enterprises	10
The following subject is an optional elective subject offered to students who are engaged in a School approved project. This subject can be taken during the third year of this program, however, permission is required to enrol in the subject.		
ENGR 3022	Special Technical Project	10

Minors

Construction Economics, Minor (https://hbook.westernsydney.edu.au/majors-minors/construction-economics-minor/)
Structures, Minor (p. 1680)

Equivalent Subjects

The subjects listed below count towards completion of this program for students who passed these subjects in 2021 or earlier.

MECH 4005 Advanced Engineering Thesis 1: Preliminary Investigations, replaced by ENGR 4037 Advanced Engineering Thesis 1: Preliminary Investigations

MECH 4006 Advanced Engineering Thesis 2: Detailed Investigations, replaced by ENGR 4036 Advanced Engineering Thesis 2: Detailed Investigations

The subjects listed below count towards completion of this program for students who passed these subjects in Autumn 2022 or earlier.

ENGR 1008 - Engineering Materials, replaced by PROC 1008 - Introduction to Materials Engineering

Bachelor of Engineering Science

This Major will be offered at Parramatta, and Penrith campuses.

Qualification for this award requires the successful completion of 240 credit points, which include the subjects listed in the recommended sequence below.

*** All students undertaking the Bachelor of Engineering Science are required to enrol in** MATH 1021 Mathematics for Engineers Preliminary **and undertake a readiness test at the beginning of their study.**

The readiness test will be conducted at the beginning of the first semester of enrolment and the result will be used to determine whether a student will remain in MATH 1021 Mathematics for Engineers Preliminary or be transferred by the School to MATH 1016 Mathematics for Engineers 1.

Students remaining in MATH 1021 Mathematics for Engineers Preliminary will be required to complete MATH 1016 Mathematics for Engineers 1 during second semester and will be encouraged to complete MATH 1019 Mathematics for Engineers 2 during the Summer session.

Students who finish MATH 1021 Mathematics for Engineers Preliminary will then use this subject as an elective.

Start-year intake

Major Sequence 2024

This sequence applies to students who commenced in 2024 or later. If you commenced prior to 2024 please refer to the Sequence 2022 - 2023 tab for details.

This major is included in Bachelor of Engineering Science, Bachelor of Engineering (Honours), Bachelor of Engineering Advanced (Honours) and Bachelor of Engineering (Honours)/Bachelor of Business.

Please follow the recommended sequence for your program as noted below.

Select the link for your program below to see details of the major

Bachelor of Engineering Advanced (Honours) (3771)

Qualification for this award requires the successful completion of 320 credit points which include the subjects listed in the recommended sequence below.

** **Electives** must be Level 2 or higher

Start-year intake

Course	Title	Credit Points
Year 1		
Autumn session		
MATH 1034	Mathematics for Engineers 1 (Advanced)	10

Spring session		
ENGR 4043	Advanced Engineering Thesis 1: Preliminary Investigations	20
CIVL 3007	Engineering Geomechanics	10
Select one elective** or Minor subject		10
	Credit Points	**40**
Autumn session		
ENGR 4044	Advanced Engineering Thesis 2: Detailed Investigations	20
BLDG 4007	Modern Construction Projects	10
Select one elective** or Minor subject		10
	Credit Points	**40**
	Total Credit Points	**320**

Equivalent Subjects

The subjects listed below count towards completion of this program for students who passed these subjects in 2021 or earlier.

MECH 4005 Advanced Engineering Thesis 1: Preliminary Investigations, replaced by ENGR 4037 Advanced Engineering Thesis 1: Preliminary Investigations

MECH 4006 Advanced Engineering Thesis 2: Detailed Investigations, replaced by ENGR 4036 Advanced Engineering Thesis 2: Detailed Investigations

The subjects listed below count towards completion of this program for students who passed these subjects in Autumn 2022 or earlier.

ENGR 1008 - Engineering Materials, replaced by PROC 1008 Introduction to Materials Engineering

Bachelor of Engineering Science (3691)

Qualification for this award requires the successful completion of 240 credit points, which include the subjects listed in the recommended sequence below.

*** All students undertaking the Bachelor of Engineering Science are required to enrol in** MATH 1021 Mathematics for Engineers Preliminary **and undertake a readiness test at the beginning of their study.**

The readiness test will be conducted at the beginning of the first semester of enrolment and the result will be used to determine whether a student will remain in MATH 1021 Mathematics for Engineers Preliminary or be transferred by the School to MATH 1016 Mathematics for Engineers 1.

Students remaining in MATH 1021 Mathematics for Engineers Preliminary will be required to complete MATH 1016 Mathematics for Engineers 1 during second semester and will be encouraged to complete MATH 1019 Mathematics for Engineers 2 during the Summer session.

Students who finish MATH 1021 Mathematics for Engineers Preliminary will then use this subject as an elective.

Start-year intake

Course	Title	Credit Points
Year 1		
Autumn session		
ELEC 1006	Engineering Computing	10
ENGR 1011	Engineering Physics	10
ENGR 1024	Introduction to Engineering Practice	10
Select one of the following:		10
MATH 1021	Mathematics for Engineers Preliminary	
MATH 1016	Mathematics for Engineers 1	
	Credit Points	**40**
Spring session		
ENGR 1018	Fundamentals of Mechanics	10
PROC 1008	Introduction to Materials Engineering	10
ELEC 1003	Electrical Fundamentals	10

Creative and Visual Communication, Minor (0337)

Western Sydney University Minor Code: 0337

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

We live in a culture where processing and retaining information is much more effective, engaging, and powerful when it happens through visual communication and storytelling. From design thinking and visual research to video content creation, this minor is an opportunity to experiment with a variety of creative tools and techniques so you can effectively interpret, evaluate, use, and create visual media for different purposes. With “creativity” being one of the most in-demand soft skills that employers look for, this minor will give you an edge in whatever work you do, now and in the future.

This minor is a Challenge Minor, which is an innovative transdisciplinary minor co-created with students as partners. With a Challenge Minor, your learning reaches beyond your discipline, giving you the chance to amplify your learning in new directions. For more information, visit the Challenge Minor (https://www.westernsydney.edu.au/educational_partnerships_and_quality/home/challenge_minors/) website.

Creative Leadership, Minor (0286)

Western Sydney University Minor Code: 0286

Previous Code: SM8000

Available to students in other Western Sydney University Programs: Yes, however the following restrictions apply.

Students in this Creative Leadership minor will embark on a journey to grow as creative leaders who are globally aware, interculturally adept, and innovative changemakers. Students will examine challenges and opportunities from multiple perspectives in a cross-disciplinary environment and will be equipped to anticipate and navigate fast-moving change. In this minor, students will grow as ethical leaders who are interculturally adept, can handle complexity, and seek opportunities to transform their communities. The students will also gain work experience by completing a 60-hour internship to develop their professional identity through work integrated learning. As potential employees, students will have an edge as they offer employers adaptable, multi-level skills that are responding to a rapidly shifting workplace with skill sets necessary to prepare for and respond to change.

Creative Living for Cultural Wellbeing, Minor (0334)

Effective from: 2023
Western Sydney University Minor Code: 0334

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

The Creative Living for Cultural Wellbeing Minor develops students' nuanced capabilities to engage in and curate artistic and cultural practices for a liveable and democratic global world. Students will explore interpersonal and global understandings of creativity, sustainable living practices and cultural wellbeing, with unique opportunities to become the changemakers of the future who can adapt, design, collaborate, and curate projects that contribute to cultural wellbeing in your field of expertise. Through a curated cultural event, students will bring together theoretical and experiential arts practice to develop a strengths-based approach to working with communities with notable industry and community organisations.

Creative Writing, Major (0005)

Western Sydney University Major Code: 0005

Previous Code: M1113.1

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

The Creative Writing major provides students the opportunity to produce their own creative writing and to edit and publish their work. Students study with professional authors, editors and publishers from the Writing and Society Research Centre and staff from the School of Humanities and Communication Arts. In addition, students have the opportunity to study contemporary approaches to language and literary studies, including literary criticism and theory, linguistic analysis, genre and textual study, and to read and examine a wide selection of modern and classic literatures. Career prospects include publishing, editing, teaching, writing and advertising.

Criminology and Criminal Justice, Major (0006)

Western Sydney University Major Code: 0006

Previous Code: M1069.1

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

This criminology major offers students the opportunity to study crime and criminal justice in a critical way that particularly stresses social and cultural definitions of criminality and the reactions to it. Areas of focus include criminal justice institutions and practices; the development of criminology as a discipline and its various strands; forms and patterns of victimisation; crime prevention strategies and debates; aspects of juvenile justice; First Peoples and criminal justice; the evolution of prisons and different forms of punishment; law enforcement and surveillance; violence, gender and crime; cultural depictions of crime and contemporary debates in criminology.

Critical and Systems Thinking, Minor (0287)

Western Sydney University Minor Code: 0287

Previous Code: SM8001

Available to students in other Western Sydney University Programs: Yes, however the following restrictions apply.

Students in this Critical and Systems Thinking minor will embark on a journey to grow as creative thinkers who are globally aware, interculturally adept, and innovative changemakers. They will develop high-level critical, logical, and systems thinking skills and apply entrepreneurial mind-sets while examining challenges and opportunities from multiple perspectives, to propose innovative strategies that address complex contemporary and future challenges in both local and international contexts. These high-level thinking skills will allow the students to be adaptable and agile in the rapidly changing work-place.

Western Sydney University Major Code: 0264

Previous code: M1131

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

Culture and Society is an interdisciplinary major developing knowledge, research skills and analytic capacities relevant to understanding and interpreting landscapes of cultural diversity and social difference in our contemporary world, both in terms of the broad contours, as well as specific micro-social environments. This major provides grounding in contemporary debates and methodologies in cultural studies and social theory, and draws on various disciplines including history, sociology, communications, and linguistics. Topics include popular culture, everyday urban life, cultural and social impacts of scientific theories and new technologies, multiculturalism, and contemporary spirituality. Study in this area is relevant for work involving commentary and analysis of contemporary social issues and cultural practices (e.g. journalism, teaching, activism) and fields concerned with designing, delivering and evaluating cultural and artistic productions, and education, communication, welfare or health services, in culturally diverse communities.

Cyber Security and Ethical Hacking, Minor (0326)

Western Sydney University Minor Code: 0326

Available to students in other Western Sydney University programs?
No

Cyber Security is an essential aspect of today's information systems. The Cyber Security and Ethical Hacking minor aims to introduce graduates to applications of system security in the disciplines of cloud security, network security and ethical and legal aspects of activities in cyber space. Today, the widespread use of networked systems means protecting these systems from various attacks is more important than ever. This minor covers introductory system security knowledge and applications of security protocols in networked systems, blockchain technologies and crypto currencies. Students will learn fundamental security concepts, practical implementation of the security application programs as well as ethical hacking techniques to protect cyber security.

Cyber Security and Ethical Hacking, Testamur Major (T145)

Western Sydney University Major Code: T145

Available to students in other Western Sydney University programs?
No

Cyber Security is an essential aspect of today's information systems. The Cyber Security and Ethical Hacking major aims to develop graduates with skills in network security, cloud security, information security, in the ethical and legal aspects of activities in cyber space. With the widespread use of networked systems, protecting these systems from various attacks is more important than ever. Students apply system security knowledge and security protocols, from basic cryptography algorithms to their applications, in computer systems, networked systems, blockchain technologies and crypto currencies. Students learn how to analyse security vulnerabilities and to implement cybersecurity solutions using ethical hacking techniques and following legal and professional standards.

Major Structure

This sequence applies to students who commenced in Autumn 2023.

Students must complete 80 credit points as follows

Subject	Title	Credit Points
MATH 1006	Discrete Mathematics	10
COMP 3007	Computer Networks and Internets	10
COMP 2028	Cryptography, Cryptocurrencies and Blockchain	10
COMP 3037	Cloud Security	10
INFO 3002	Ethical Hacking Principles and Practice	10
INFO 2004	Cyber Crime and Social Engineering	10
INFO 3014	Digital Investigations and Forensics	10
Select one of the following:		10
INFO 3015	Internet of Things and Smart Environments	
COMP 3036	Full Stack Development	

Major Structure

This structure applies to students who commenced in Spring 2023.

If you commenced in Autumn 2023 please refer to the Autumn 2023 Sequence tab for details.

Students must complete 80 credit points as follows

Subject	Title	Credit Points
COMP 3007	Computer Networks and Internets	10
COMP 2028	Cryptography, Cryptocurrencies and Blockchain	10
COMP 3037	Cloud Security	10
INFO 3002	Ethical Hacking Principles and Practice	10
INFO 2004	Cyber Crime and Social Engineering	10
INFO 3014	Digital Investigations and Forensics	10
Select one of the following:		10
INFO 3015	Internet of Things and Smart Environments	
COMP 3036	Full Stack Development	
** Select one of the following		10
** Students who completed MATH 1006 in the program core, MUST complete one of the following as part of their major: MATH 2009, MATH 2010, COMP 2025		
MATH 2010	Linear Algebra	
COMP 2025	Introduction to Data Science	
** Students who completed MATH 1038 in the program core, MUST complete one of the following as part of their major: MATH 1006, MATH 2009, MATH 2010, COMP 2025		
MATH 1006	Discrete Mathematics	
MATH 2010	Linear Algebra	
COMP 2025	Introduction to Data Science	

Major Structure

This structure applies to students who commenced in Spring 2024.

Students must complete 80 credit points as follows

Subject	Title	Credit Points
COMP 3007	Computer Networks and Internets	10
COMP 3012	Introduction to Cloud Computing	10
COMP 3037	Cloud Security	10
INFO 3002	Ethical Hacking Principles and Practice	10
INFO 3014	Digital Investigations and Forensics	10
Select one of the following:		10
INFO 3015	Internet of Things and Smart Environments	
COMP 3036	Full Stack Development	
COMP 2029	DevOps	
Select one of the following		10
INFO 2004	Cyber Crime and Social Engineering	
COMP 2028	Cryptography, Cryptocurrencies and Blockchain	
** Select one of the following		10
** Students who completed MATH 1006 in the program core, MUST complete one of the following as part of their major: MATH 2010, COMP 2025		
MATH 2010	Linear Algebra	
COMP 2025	Introduction to Data Science	
** Students who completed MATH 1038 in the program core, MUST complete one of the following as part of their major: MATH 1006, MATH 2010, COMP 2025		
MATH 1006	Discrete Mathematics	
MATH 2010	Linear Algebra	
COMP 2025	Introduction to Data Science

Available to students in other Western Sydney University programs?
No

The Cyber Security major aims to develop graduates with sound skills in the discipline of information systems security. Today, the widespread use of networked systems means protecting these systems from various attacks is more important than ever. Cyber Security is an essential aspect of today's information systems. This major covers fundamental information security knowledge and security protocols from basic cryptography algorithms to their applications in computer systems and networked systems. Students will learn fundamental security concepts, practical implementation of the security application programs as well as ethical hacking techniques to protect cyber security.

Cybersecurity, Testamur Major (T003)

Western Sydney University Major Code: T003

Previous Code: ST3065.1

Available to students in other Western Sydney University programs?
No

Cybersecurity is a fundamental aspect of information and communication systems and protecting these systems from various attacks and threats is becoming one of the major technology challenges for public and private sectors. The Cybersecurity field of study aims to develop graduates with advanced knowledge and skills in the discipline of information and communication security. This field of study covers fundamental knowledge in system and network security, security protocols and their applications in computer systems and networked systems such as cloud computing. Students will also learn other related topics such as artificial intelligence and visualisation and their application in cybersecurity development.

Data Analytics, Testamur Major (T004)

Western Sydney University Major Code: T004

Previous Code: ST3053.1

Available to students in other Western Sydney University programs? No

Extracting information from data has become a science in itself, blending skill sets from mathematics, statistics and computing. With a strong applications focus, this major covers the nature of data, how to embark on data driven investigations and visual and computational analytics. Graduates will have the knowledge and skills required to operate effectively in a data driven world.

Data Science and Machine Learning, Minor (0322)

Western Sydney University Minor Code: 0322

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

Data science and machine learning are becoming increasingly important in large range of organisations dealing with large amounts of data. Analysing, processing and using the available data requires specialised skills combining mathematics, statistics and computing with a range of approaches in data science and machine learning. Students in this minor learn how to extract, model and visualise data to provide insights, solve challenging problems and develop predictions.

Data Science, Testamur Major (T079)

Western Sydney University Major Code: T079

Previous Code: MT3038.1

Available to students in other Western Sydney University programs? No

Data is ubiquitous, and analysing data plays an increasingly important role in many careers. Data Science is based on mathematics and statistics, but there is more to it: a Data Scientist has the required expertise to convert all forms of data into valuable information. Building on the Bachelor of Mathematics, this major equips graduates with additional skills and knowledge for designing experimental studies, building and fitting of models, visualisation, estimation and prediction, storage and retrieval of big data. Such skills are essential for tasks such as the analysis of customer transactions and behaviour, scientific investigations, financial trends, and online behaviour.

Digital Cultures, Major (0070)

Western Sydney University Major Code: 0070

Previous Code: M1109.1

Available to students in other Western Sydney University Programs: Yes, however the following restrictions apply.

The Digital Cultures Major offers students the opportunity to learn about how cutting edge technology and digital practices are changing society. By analysing new media, visual arts, and digital design and the effects that the use of these new technologies have on culture and society, students will gain the necessary skills to position themselves for careers in a wide variety of contexts that require understanding of technology or digital media and its impact. Complementing these analytical skills, students will also gain practical skills in the creation of digital media and design.

Western Sydney University Minor Code: 0070

Previous Code: SM1117.1

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

The Digital Cultures minor offers students the opporty to learn about how cutting edge technology and digital practices are changing society. By selecting from subjects analysing new media, visual arts, and digital design and the effects that the use of these new technologies have on culture and society, students will gain the necessary skills to position themselves for careers in a wide variety of contexts that require understanding of technology or digital media and its impact. Complementing these analytical skills, students will also gain practical skills in the creation of digital media and design.

Minor Structure

Students must complete 40 credit points as follows

Note: Students in the Bachelor of Creative Industries complete the structure under the heading Bachelor of Creative Industries below.

Subject	Title	Credit Points
HUMN 3033	Digital Cultures	10
HUMN 2020	Digital Humanities and Research Methods (UG)	10
Select two of the following:		20
Level 1 Pool		
COMM 1012	Data, Mediation, Power	
DESN 1011	Image Design	
COMM 1020	Media Cultures and Industries	
DESN 1018	Visual Storytelling	
DESN 1021	Web and Time-based Design	
COMM 1044	Professional Communication	
Level 2 Pool		
COMM 2024	Media Law and Ethics	
DESN 2014	Researching the Visual	
Level 3 Pool		
DESN 3002	Data Visualisation	
DESN 3008	Interactive Design: Apps	
COMM 3022	Media Memory	
HUMN 3096	What is the Human?	
Total Credit Points		**40**

Bachelor of Creative Industries Students

Creative Industries students must undertake DESN 1011 Image Design or DESN 1021 Web and Time-based Design as their Introduction to Major subject, and then complete the following subjects to achieve this minor:

Subject	Title	Credit Points
HUMN 3033	Digital Cultures	10
HUMN 2020	Digital Humanities and Research Methods (UG)	10
Select two of the following:		20
DESN 3002	Data Visualisation	
DESN 1011	Image Design	
DESN 3008	Interactive Design: Apps	
COMM 3022	Media Memory	
DESN 2014	Researching the Visual	
DESN 1021	Web and Time-based Design	
HUMN 3096	What is the Human?	
Total Credit Points		**40**

Equivalent Subjects

The subjects listed below count towards completion of the minor for students who may have passed subjects in the list in 2023 or earlier.

COMM 1032 Writing Ecologies, replaced by COMM 1044 Professional Communication

Digital Futures, Testamur Major (T005)

Western Sydney University Major Code: T005

Previous code: ST3052.1

Available to students in other Western Sydney University programs? No

Digital technology is influencing practically every aspect of today's knowledge economy and is driving advances in all sectors of society. Many jobs require broad competencies and understandings of the powerful role of technology in society. There is also an increasing demand for practical computing and software skills including for research and analysis of data. This major will allow students to develop practical as well as theoretical skills in this field.

Master of Data Science

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

Advances in computing and technology mean that health care systems and staff have a greater reliance on digital systems to inform, support and manage the delivery of effective patient care. In this Field of Study, students learn about the critical role of digital health innovations, the core components of digital health management system, and human-centred digital health design.

Master of Health Science

Available to students in other Western Sydney University programs? No

The Digital Health major combines the opportunity to study contemporary issues associated with digital health management in healthcare organisations with the integration of a sound understanding of the impact of digital health, as well as the development and implementation of projects and programs relating to this growing and critical area in both organisations and professional practice. The major would be of interest to clinicians, health management and science (information engineering) professionals, and personnel working in health corporate roles with responsibilities in health data and information. Students in this major can further focus their studies in aspects of innovation and entrepreneurship, and research and development in the digital health space

Eco-Socially Conscious Design and Manufacturing, Minor (0310)

Western Sydney University Minor Code: 0310

Previous code: SM3128.1

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

This minor aims to prepare eco-socially aware students for roles in a wide range of industries and to deal with environmental and humanitarian problems created as a result of industrial and other human activities. Students from different disciplines examine sustainability issues from environmental, humanities and economical angles and work together on "real world" problems supported by academics and industry partners. In evaluating the social and environmental impacts, students gain essential skills in decision-making, designing and manufacturing products in a sustainable and equitable manner. Students learn to apply a holistic approach to solving problems in the ongoing automation of manufacturing and industrial practices in the Fourth Industrial Revolution (or Industry 4.0).

This minor is a Challenge Minor, which is an innovative transdisciplinary minor co-created with students as partners. With a Challenge Minor, your learning reaches beyond your discipline, giving you the chance to amplify your learning in new directions. For more information, visit the Challenge Minor (https://www.westernsydney.edu.au/educational_partnerships_and_quality/home/challenge_minors/) website.

Economics for Secondary Teaching, Minor (0141)

Western Sydney University Minor Code: 0141

Previous Code: SM2053.1

Available to students in other Western Sydney University programs? No

The minor, Economics for Secondary Teaching, provides a broad pluralist perspective on fundamental aspects of relationships between individuals, firms, institutions and countries. Students in the minor learn how economies function and how public policy and the way organisations behave affect diverse social, economic and environmental problems. Students are introduced to a wide array of competing economic theories, so that they are critically informed about the ways in which they can transform the world. Students who study economics can expect to develop their analytical and problem solving skills and to be intellectually challenged. The field of study is designed to meet NESA content requirements for teaching Economics in NSW High Schools.

• Students must be enrolled in 1652 Bachelor of Arts (Pathway to Teaching Secondary), 1823 Bachelor of Arts (Pathway to Teaching Secondary) (Dean's Scholars) or 1939 Bachelor of Education (Secondary).

Location

Campus	Mode	Advice
Parramatta Campus - Victoria Road	Internal	Program Advice (https://directory.westernsydney.edu.au/search/email/business.courses@uws.edu.au)

Minor Structure

The subjects in this minor are offered at the Parramatta City campus. The core subjects in the Bachelor of Arts (Pathway to Teaching Secondary) programs and Bachelor of Education (Secondary) program are offered at the Parramatta South, Bankstown City and Penrith campuses. Students may be required to travel between campuses in order to complete this minor.

Students must successfully complete 40 credit points as follows

Economics, Minor (0300)

Effective from: 2022
Western Sydney University Minor Code: 0300

Available to students in other Western Sydney University programs?
No

Taking a largely microeconomic perspective, this economics minor provides students with insight to how economies function, and how public policy and the way organisations behave affect social, economic and environmental problems. Students develop critical thinking skills by examining competing economic theories, and applying these to economic events, outcomes and government policies. In addition, students will gain sought-after skills in evaluating and developing cost-benefit analyses for specific projects.

Economics, Testamur Major (T039)

Western Sydney University Major Code: T039

Previous Code: MT2022.1

Available to students in other Western Sydney University programs?
No

The Economics major provides a broad pluralist perspective on fundamental aspects of relationships between individuals, firms, institutions and countries. Students will learn how economies function and how public policy and the way organisations behave affect diverse social, economic and environmental problems. Students are introduced to a wide array of competing economic theories, so that they are critically informed about the ways in which they can transform the world. A major in Economics prepares students to be active participants in addressing the wide range of problems faced by governments, social organisations and the business community in the domestic and international economies. Students who study economics can expect to develop their analytical and problem solving skills and to be intellectually challenged, whether they view the discipline as providing specific vocational skills or as an area of academic and intellectual interest to them. An Economics major is very highly regarded in the business world and opens up a very large range of career prospects in general business, finance and the public sector.

Economy and Markets, Major (0008)

Western Sydney University Major Code: 0008

Previous Code: M2510.1

Available to students in other Western Sydney University programs?
No

The Economy and Markets major provides a broad pluralist perspective on fundamental aspects of relationships between individuals, firms, institutions and countries. Students will learn how economies function and how public policy and the way organisations behave affect diverse social, economic and environmental problems. Students are introduced to a wide array of competing economic theories, so that they are critically informed about the ways in which they can transform the world. A major in this area prepares students to be active participants in addressing the wide range of problems faced by governments, social organisations and the business community in the domestic and international economies. Students who study economics can expect to develop their analytical and problem solving skills and to be intellectually challenged, whether they view the discipline as providing specific vocational skills or as an area of academic and intellectual interest to them. A major in this area is very highly regarded in the business world and opens up a very large range of career prospects in general business, finance and the public sector.

Economy and Society, Minor (0319)

Western Sydney University Minor Code: 0319

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

The Economy and Society minor is a multi-disciplinary social science academic program centred on human behaviour in the creation of sustainable economies. The minor will equip students with analytical skills to understand complex economic issues from a broader social science perspective. It will also examine the politics of policy making. This area of academic and intellectual interest complements any major from within the Bachelor of Social Science.

Note: Subjects for this minor are offered on different campuses, potential students should ensure that they are able to manage their study and travel before enrolling in this minor.

Education Studies - Secondary Teaching, Minor (0267)

Western Sydney University Minor Code: 0267

Previous Code: SM1142.1

Available to students in other Western Sydney University programs?
No

The Education Studies – Secondary Teaching minor is comprised of the four initial subjects from the Master of Teaching (Secondary) or three subjects towards the Master of Teaching (Secondary) STEM. These subjects are broadly structured for students to investigate the underlying principles and concepts in adolescent development, diversity and social justice, skills in the design of learning experiences along these principles, and putting their application into practice. Available to all students in a Pathway to Teaching (Secondary) degree, enrolment is dependent on the successful completion of 160 credit points in the undergraduate program.

Education Studies – Early Childhood/Primary Teaching, Minor (0331)

Effective from: 2023
Western Sydney University Minor Code: 0331

Available to students in other Western Sydney University programs?
No

The Education Studies – Early Childhood/Primary Teaching minor is comprised of the four initial subjects from the Master of Teaching (Birth-5 Years/Birth-12 Years) program. These subjects are designed to provide students with a foundational understanding of their role as pedagogical leaders in early childhood and primary school contexts. The subjects emphasise the importance of strengthening connections with diverse communities, building partnerships with families and creating safe and supportive spaces for children to create, explore and learn. Compulsory to all students in a Pathway to Teaching (Early Childhood/Primary) program, enrolment is dependent on the successful completion of 160 credit points in the undergraduate program.

Education Studies – Primary Teaching, Minor (0296)

Effective from: 2022
Western Sydney University Minor Code: 0296

Available to students in other Western Sydney University programs? No

The Education Studies - Primary Teaching minor is comprised of the four initial subjects from the Master of Teaching (Primary). This minor is only available to students enrolled in 3756 Bachelor of Science (Pathway to Teaching Primary/Secondary) program. Students can only enrol in TEAC 7032 Diversity, Social Justice and Schooling when they have achieved 120 credit points in their overall program. Students can only enrol in the other three subjects in the minor; TEAC 7156 Aboriginal, Education: Past, Present and Future, TEAC 7092 Primary Human Society and its Environment and TEAC 7161 Educational Psychology for Learning and Teaching when they have achieved 160 credit points in their overall program.

Minor Structure 2023

This structure applies to students who commenced in 2023 or prior. If you commenced in 2024 or later, please refer to the relevant Structure tab for details.

Students must complete 40 credit points as follows.

Please note that students will not be able to enrol in TEAC 7023 until they have completed 120 credit points in the program.

Students will not be able to enrol in TEAC 7156, 7092 or 7149 until completion of 160 credit points in the program.

Subject	Title	Credit Points
TEAC 7156	Aboriginal Education: Past, Present and Future	10
TEAC 7032	Diversity, Social Justice and Schooling	10
TEAC 7092	Primary Human Society and its Environment	10
TEAC 7161	Educational Psychology for Learning and Teaching	10

Equivalent Subject

The subject listed below count towards completion of this minor for students who passed this subject in 2023 or earlier.

TEAC 7023 Culture, Subjectivities and Schooling, replaced by TEAC 7032 Diversity, Social Justice and Learning
TEAC 7149 Understanding and Teaching Children, replaced by TEAC 7161 (https://hbook.westernsydney.edu.au/search/?P=TEAC%207161) Educational Psychology for Learning and Teaching

Minor Structure 2024

This structure applies to students who commenced in 2024 or later. If you commenced prior to 2024 please refer to the relevant Structure tab for details.

Students must complete 40 credit points as follows:

Subject	Title	Credit Points
TEAC 7032	Diversity, Social Justice and Schooling	10
TEAC 7156	Aboriginal Education: Past, Present and Future	10
TEAC 7092	Primary Human Society and its Environment	10
TEAC 7161	Educational Psychology for Learning and Teaching	10
Total Credit Points		**40**

Students must have successfully completed 120 credit points of study before completing the following subject:

Subject	Title	Credit Points
TEAC 7032	Diversity, Social Justice and Schooling	10

Students must have successfully completed 160 credit points of study before completing the following subjects:

Subject	Title	Credit Points

Educational Leadership, Testamur Major (T134)

Western Sydney University Major Code: T134

Previous Code: ST1016.1

Available to students in other Western Sydney University programs? No

This major is designed for teachers and educators seeking to develop the dual capacity to lead teaching and learning as well as lead organisations in an ever-changing business climate. Educational leadership subjects are drawn from the School of Education and the School of Business, providing professionals with comprehensive skills, knowledge and competencies to design original evidence-based investigations and analyse and synthesise a range of data about complex problems to reframe problems and generate solutions. Focusing on theory and practice, the specialisation has significant application to the workplace. Subjects in this specialisation are offered across Autumn/Spring sessions and Quarter sessions, as identified in the subject handbook entries. Please note that the Education Leadership major is fully online therefore onshore international student visa holders are unable to enrol in this major.

Handbook Summary

Summary 2022-2023

The Electrical Engineering major includes core subjects from all branches of electrical engineering. Graduates will work in the fields of electronic components, computers, electro-magnetics, power generation and distribution systems, power and control in public utilities, telecommunications, manufacturing, and electrical systems. This major includes a mandatory 12-week industrial placement as a completion requirement.

Summary 2024

The Electrical Engineering major includes core subjects from all branches of electrical engineering. Graduates will work in the fields of electronic components, computers, electro-magnetics, power generation and distribution systems, power and control in public utilities, telecommunications, manufacturing, and electrical systems. All students complete a mandatory 300 to 450 hour industrial placement.

Recommended Sequence 2022-23

If you commenced in 2024 or later please refer to the Sequence 2024 tab for details.

This major is included in Bachelor of Engineering Science, Bachelor of Engineering (Honours), Bachelor of Engineering Advanced (Honours) and Bachelor of Engineering (Honours)/Bachelor of Business.

Please follow the recommended sequence for your program as noted below.

3691 Bachelor of Engineering Science

This major will be offered at Parramatta South, Penrith and Sydney City campuses

Qualification for this award requires the successful completion of 240 credit points, which include the subjects listed in the recommended sequence below.

*** All students undertaking the Bachelor of Engineering Science are required to enrol in** MATH 1021 Mathematics for Engineers Preliminary **and undertake a readiness test at the beginning of their study.**

The readiness test will be conducted at the beginning of the first semester of enrolment and the result will be used to determine whether a student will remain in MATH 1021 Mathematics for Engineers Preliminary or be transferred by the School to MATH 1016 Mathematics for Engineers 1.

Students remaining in MATH 1021 Mathematics for Engineers Preliminary will be required to complete MATH 1016 Mathematics for Engineers 1 during second semester and will be encouraged to complete MATH 1019 Mathematics for Engineers 2 during the Summer session.

Students who finish MATH 1021 Mathematics for Engineers Preliminary will then use this subject as an elective.

Telecommunications, Minor (https://hbook.westernsydney.edu.au/majors-minors/telecommunications-minor/)
Biomedical Engineering, Minor (p. 1724)

Optional Elective

The following subject is an optional elective unit offered to students who are engaged in a School approved project. This subject can be taken during the third year of this program, however, permission is required to enrol in the subject.

ENGR 3022 Special Technical Project

Equivalent Subjects

The subjects listed below count towards completion of this program for students who passed these subjects in 2021 or earlier.

MECH 4005 Advanced Engineering Thesis 1: Preliminary Investigations, replaced by ENGR 4037 Advanced Engineering Thesis 1: Preliminary Investigations

MECH 4006 Advanced Engineering Thesis 2: Detailed Investigations, replaced by ENGR 4036 Advanced Engineering Thesis 2: Detailed Investigations

The subjects listed below count towards completion of this program for students who passed these subjects in Autumn 2022 or earlier.

ENGR 1008 - Engineering Materials, replaced by PROC 1008 - Introduction to Materials Engineering

Replaced Subjects

The subjects listed below count towards completion of this program for students who passed these subjects in 2022 or earlier.

ELEC 3008 Instrumentation and Measurement, replaced by ELEC 4009 Instrumentation and Measurement

ELEC 3005 Electrical Drives, replaced with ELEC 4008 Electrical Drives

Major Sequence 2024

This major sequence applies to students who commenced in 2024 or later. If you commenced prior to 2024 please refer to the Sequence 2022-23 tab for details.

This major is included in Bachelor of Engineering Science, Bachelor of Engineering (Honours), Bachelor of Engineering Advanced (Honours) and Bachelor of Engineering (Honours)/Bachelor of Business.

Please follow the recommended sequence for your program as noted below.

Bachelor of Engineering Science (3691)

This major will be offered at Parramatta South, Penrith, Sydney City and Surabaya Indonesia campuses.

Qualification for this award requires the successful completion of 240 credit points, which include the subjects listed in the recommended sequence below.

*** All students undertaking the Bachelor of Engineering Science are required to enrol in** MATH 1021 Mathematics for Engineers Preliminary **and undertake a readiness test at the beginning of their study.**

The readiness test will be conducted at the beginning of the first semester of enrolment and the result will be used to determine whether a student will remain in MATH 1021 Mathematics for Engineers Preliminary or be transferred by the School to MATH 1016 Mathematics for Engineers 1.

Students remaining in MATH 1021 Mathematics for Engineers Preliminary will be required to complete MATH 1016 Mathematics for Engineers 1 during second semester and will be encouraged to complete MATH 1019 Mathematics for Engineers 2 during the Summer session.

Students who finish MATH 1021 Mathematics for Engineers Preliminary will then use this subject as an elective.

Previous Codes: KT3125.1, KT3156.1, KT3161.1, KT7001.1, ST3093.1

Available to students in other Western Sydney University programs?
No

This major includes core subjects from all branches of electrical engineering. Graduates will work in the fields of electronic components, computers, electro-magnetics, power generation and distribution systems, power and control in public utilities, telecommunications, manufacturing, and electrical systems.

Please note: Offerings of alternate units are dependent on there being sufficient student enrolment numbers. If enrolments are low, the College may cancel delivery of the alternate unit.		
Total Credit Points		**30**

Bachelor of Engineering (Honours)

Major Structure

Qualification for this award requires the successful completion of 320 credit points, which include the subjects listed in the recommended sequence below.

Full-time start-year intake

* All students undertaking the Bachelor of Engineering (Honours) are required to enrol in MATH 1021 Mathematics for Engineers Preliminary and undertake a readiness test at the beginning of their study.

Students remaining in MATH 1021 Mathematics for Engineers Preliminary will be required to complete MATH 1016 Mathematics for Engineers 1 during second semester and will be encouraged to complete MATH 1019 Mathematics for Engineers 2 during the Summer session.

Optional Elective

The following subject is an optional elective subject offered to students who are engaged in a School approved project. This subject can be taken during the third year of this major, however, permission is required to enrol in the subject.

ENGR 3022 Special Technical Project

- Graduate Certificate in Engineering
- Graduate Diploma in Engineering (exit only)
- Master of Engineering

Postgraduate Major Structure

To complete some of the components within the subjects in this major, students may be required to travel to other Western Sydney University campuses.

Electrical Major Alternate Subjects

Specialist alternate subject offerings are subject to sufficient student demand and may not be offered annually.

Students enrolled in 3693 Master of Engineering choose seven major subjects from the list below

Students exiting with 3694 Graduate Diploma in Engineering (exit only) choose six major alternate subjects

Students enrolled in 3695 Graduate Certificate in Engineering choose four major alternate subjects

Subject	Title	Credit Points
ELEC 7001	Advanced Control Systems	10
ELEC 7003	Advanced Electrical Machines and Drives	10
ELEC 7004	Advanced Power Quality	10
ELEC 7005	Advanced Signal Processing	10
ELEC 7006	Advanced Smart Grids and Distributed Generation	10
ELEC 7008	Instrumentation and Measurement (PG)	10

English Teaching Specialisation (Birth - 5/Birth -12), Minor (0158)

Western Sydney University Minor Code: 0158

Previous Code: SM1129.1

Available to students in other Western Sydney University programs?
No

Students enrolled in the 1708 Bachelor of Arts (Pathway to Teaching Birth-5/Birth-12) or 6017 Diploma in Arts/Bachelor of Arts (Pathway to Teaching Birth-5/Birth-12) will study two subjects in Year 3 from either the Mathematics or English Specialisation teaching minor in order to complete four specialisation units and meet the BA component of the NESA teaching specialisation. Together with completion of subjects in the Master of Teaching (Birth-5/Birth-12) students can achieve the qualification required to teach in Early Childhood settings and Primary schools.

Minor Structure

Students will be eligible for this minor after successfully completion of 40 credit points from the subjects listed below.

Subject	Title	Credit Points
Students must complete the following subjects:		
LANG 1029	Foundations of Academic English	10
LANG 1030	Thinking Critically About Texts and Society	10

And 20 credit points from the subjects contained in one of the following English majors:

English (p. 1434)

Creative Writing

Linguistics

International English

Students may also take the following unit towards the 20 credit point requirement above:

INFO 2009 Multiliteracies (https://hbook.westernsydney.edu.au/subject-details/info2009/#relatedstructurestext)

Equivalent Subjects

The subjects listed below count towards completion of this minor for students who passed these subjects in 2019 or earlier.

HUMN 1002 - Analytical Reading and Writing, replaced by LANG 1029 Foundations of Academic English

LANG 1026 - Texts and Traditions, replaced by LANG 1030 Thinking Critically About Texts and Society

The subject listed below counts towards completion of this minor for students who passed this subject in 2021 or earlier.

COMM 2050 - Multiliteracies, replaced by INFO 2009 Multiliteracies (https://hbook.westernsydney.edu.au/subject-details/info2009/#relatedstructurestext)

English, Major (0009)

Western Sydney University Major Code: 0009

Previous Code: M1053.1

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

The English major invites students to explore contemporary approaches to language, literary study and writing, including literary criticism and theory, linguistic analysis, genre and textual study, and creative writing. The English major focuses on the imaginative workings of language, and students can study a wide selection of modern and classic literature, as well as the relationships between written texts and other media such as film and information technology. Students also have the opportunity to produce their own creative writing and to edit and publish their work. Career prospects include publishing, editing, teaching, writing and advertising.

Enterprise Innovation, Major (0078)

Western Sydney University Major Code: 0078

Previous Code:M2511.1

Available to students in other Western Sydney University programs?
No

The Enterprise Innovation major equips you with the expert skills to create a career as a management specialist. You will be prepared to succeed in a range of roles in contemporary private, public, and not-for-profit organisations in Australia and abroad. In this major you will develop strategic management knowledge to enable effective organisational decision making. The subjects in this major focus on organisational learning and development and behaviour, operations management, leadership and entrepreneurship, change and innovation, and policy. You can look forward to a range of careers in the broad and complex field of management.

Enterprise Systems and Architectures, Testamur Major (T151)

Western Sydney University Major Code: T151

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

This major is for highly motivated students who wish to enhance their experience and further their career opportunities through work-integrated learning. Most subjects in the major offer placements with industry partners, including a six-month internship. The internships are offered by our industry partners, such as DXC, which is the main supplier of the technology for the Aerotropolis infrastructure. There is a limited number of internships available each year; hence students will need to perform at an advanced level to secure one of these. Undertaking the internship will strongly increase the landing of a permanent position with target industry partners upon graduation. The major covers theories and technologies used for the development of large-scale infrastructure projects and the systems and integration that go along with projects of this size. Students will better understand the development and management processes related to each phase of the project and development life cycle. In addition, they will identify, analyse, and formulate solutions to real-world problems that occur in large-scale infrastructure projects. In devising these solutions students will consider principles associated with user interface design, professional and ethical issues, in particular, those relating to security and privacy of customer data and customer behaviour. Students who fail to secure an internship will be transferred to the Software Development major to be able to complete their ICT studies.

Available to students in other Western Sydney University programs? No

The need to achieve sustainability for human societies is a goal recognised globally. Getting this to happen in practice is the challenge facing all sectors of our society; business, government, academia, and private citizens. This major covers the essentials of sustainability as an academic discipline, giving students knowledge and skills in the scientific, social, legislative and planning frameworks so that evidence-based sustainability can be implemented across our society.

Minor Structure

Students must complete four subjects as follows

Subject	Title	Credit Points
Select four of the following:		40
NATS 3020	Food Safety	
NATS 2031	Toxicology	
PUBH 3007	Disease Prevention and Control	
BIOS 1027	Management of Aquatic Environments	
PUBH 3021	Air Pollution & Control	
PUBH 3005	Disaster and Emergency Management	
Total Credit Points		**40**

Environmental Health, Testamur Major (T076)

Western Sydney University Major Code: T076

Previous Code: MT3031.1

Available to students in other Western Sydney University programs? No

The air we breathe, the water we drink, the food we eat, and the places we live, work and play all have major impacts on our health and well-being. The testamur major Environmental Health in a Bachelor of Science, will equip you to explore the diverse range of natural and built-environment challenges that confront us, from the mitigation of human health impacts of global climate change through to the more localised issues of air and water quality, waste management, food security, environmental noise and healthy communities. The major areas of study addressed within the major include air pollution; community studies; emergency management; environmental regulation and policy; environmental monitoring; environmental planning; environmental protection; epidemiology; food safety; noise, occupational environment; risk assessment; sustainable environmental management; toxicology; urban development and water pollution.

Accreditation

T076 (Environmental Health) within the Bachelor of Science and the Bachelor of Advanced Science, has Conditional Provisional Accreditation with Environmental Health Australia

Recommended Sequence 2023

Select the link for your program below to see details of the major

Please note that some subjects require attendance at workshops during mid-semester break.

Bachelor of Science full-time start-year intake

Qualification for the award of Bachelor of Science with a major in Environmental Health requires the successful completion of 240 credit points as per the recommended sequence below.

Course	Title	Credit Points
Year 1		
Autumn session		
NATS 1019	Scientific Literacy	10
BIOS 1001	Biodiversity	10
CHEM 1008	Introductory Chemistry	10
BIOS 1027	Management of Aquatic Environments	10
	Credit Points	**40**
Spring session		
BIOS 1012	Cell Biology	10
ENVL 1006	Environmental Health Issues and Solutions	10
Choose one of		10
MATH 1026	Quantitative Thinking	
MATH 1003	Biometry	
Choose one elective		10
	Credit Points	**40**
Year 2		
Autumn session		
PUBH 2010	Epidemiology	10
BIOS 2022	Microbiology 1	10
BIOS 1035	Anatomy and Physiology in Health	10
Choose one elective		10
	Credit Points	**40**
Spring session		
NATS 3045	Work Internship for Science Professionals	10
NATS 2031	Toxicology	10
EART 3007	Land Degradation and Contamination	10
ENVL 3010	Environmental Planning, Policy & Regulation	10
	Credit Points	**40**
Year 3		
Autumn session		
NATS 3015	Field Project 1	10
PUBH 3021	Air Pollution & Control	10
PUBH 3017	Occupational Health and Safety	10
Choose one elective		10
	Credit Points	**40**
Spring session		
NATS 3020	Food Safety	10
PUBH 3005	Disaster and Emergency Management	10
PUBH 3007	Disease Prevention and Control	10
Choose one elective		10
	Credit Points	**40**
	Total Credit Points	**240**

Bachelor of Science part-time start-year intake

Qualification for the award of Bachelor of Science with a major in Environmental Health requires the successful completion of 240 credit points as per the recommended sequence below.

Course	Title	Credit Points
Year 1		
Autumn session		
BIOS 1001	Biodiversity	10
NATS 1019	Scientific Literacy	10
	Credit Points	**20**
Spring session

Environmental, Testamur Major (T058)

Western Sydney University Major Code: T058

Previous Code: ST3094.1

Available to students in other Western Sydney University programs? No

Location

Campus	Mode	Advice
Parramatta Campus - Victoria Road	Internal	Engineering@westernsydney.edu.au
Parramatta City Campus-Macquarie Street	Internal	Engineering@westernsydney.edu.au

Major Structure

To complete some of the components within the subjects in this program, students may be required to travel to other Western Sydney University campuses.

Environmental Specialised Alternate subjects

Specialist alternate subject offerings are subject to sufficient student demand and may not be offered annually.

Students enrolled in 3693 Master of Engineering choose seven specialist subjects from the list below

Students exiting with 3694 Graduate Diploma in Engineering (exit only) choose six specialised alternate subjects

Students enrolled in 3695 Graduate Certificate in Engineering choose four specialised alternate subjects

Subject	Title	Credit Points
CIVL 7008	Advanced Waste Management	10

Equitable Technologies, Minor (0312)

Western Sydney University Minor Code: 0312

Previous code: SM1152.1

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

What would happen if technologies, digital systems and devices served the interests of those who need them most? The Equitable Technologies Minor invites students to critically evaluate the impacts of technologies, reorientating them towards social and digital equity through social action. Through transdisciplinary learning experiences, students investigate how equitable technologies might transform the lives of specific communities, clients, and citizens for a more just society. This Minor contributes to industry and government requirements for an ethical technology workforce, comprised of people who will demand a socio-technically just future.

This minor is a Challenge Minor, which is an innovative transdisciplinary minor co-created with students as partners. With a Challenge Minor, your learning reaches beyond your discipline, giving you the chance to amplify your learning in new directions. For more information, visit the Challenge Minor (https://www.westernsydney.edu.au/educational_partnerships_and_quality/home/challenge_minors/) website.

Bachelor of Data Science

Subject	Title	Credit Points
3769 Bachelor of Data Science are recommended to choose the following 4 subjects as long as they meet the subject pre-requisite requirements:		
SPRT 1001	Fundamentals of Exercise Science	
HLTH 2003	Biomechanics	
SPRT 2002	Exercise Testing and Measurement	
HLTH 2005	Exercise Prescription I	

- Bachelor of Health Science (Clinical Sciences) - Diploma in Health Science/Bachelor of Health Science

Subject	Title	Credit Points
4656 Bachelor of Health Science/6000 Dip Health Science/B Health Science can choose any 4 from the 7 as long as they meet the subject pre-requisite requirements. Clinical Sciences major students who wish to progress to a graduate entry physiotherapy or exercise physiology course should enrol into BIOS 2012:		
SPRT 1001	Fundamentals of Exercise Science	
HLTH 2003	Biomechanics	
BIOS 2012	Exercise Physiology	
BEHV 3025	Sport and Exercise Psychology	
SPRT 2002	Exercise Testing and Measurement	
HLTH 2005	Exercise Prescription I	
HLTH 2025	Exercise Nutrition	

- Bachelor of Health Science (Health and Physical Education) - Bachelor of Health Science (Health and Physical Education) pathway - Bachelor of Sport Development - Diploma in Health Science/Bachelor of Health Science (Health and Physical Education)

Subject	Title	Credit Points
4742 Bachelor of Health Science (HPE teaching pathway), 4747 Bachelor of Health Science (HPE), 6001 Dip Health Science/B Health Science (HPE), and 4741 Bachelor of Sport Development can choose these 4 subjects as long as they meet the subject pre-requisite requirements.		
HLTH 2003	Biomechanics	
SPRT 2002	Exercise Testing and Measurement	
HLTH 2005	Exercise Prescription I	
HLTH 2025	Exercise Nutrition

Festival and Event Management, Major (0306)

Western Sydney University Major Code: 0306

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

This major combines social science, business and public relations subjects to provide students with the knowledge and skills required to organise, manage and promote festivals and events. Students will learn about the social and cultural significance of festivals and events, and the roles and responsibilities of a variety of stakeholders. The major also explores the important role festivals and events play in tourism and visitor economies. Students who choose to complete the Visitor Economy Professional Placement subject will complete a work placement with a festival/event organiser, providing a stepping-stone to employment.

Parramatta - Victoria Road	Internal	Dr Garth Lean (https://directory.westernsydney.edu.au/search/name/garth%20lean/)

Work Integrated Learning

The Major has a 20 credit point pool subject (TOUR 3003 Visitor Economy Professional Placement) that incorporates a Work Integrated Learning through supervised industry placements. The subject is approximately 231 hours (including a placement with an industry host, professional development and workshops), during which time students gain work-ready skills and undertake professional tasks.

The subject coordinator will work closely with placement providers to ensure appropriate workplace supervision. The process of liaison involves site visits and meetings. These meetings allow the subject coordinator to discuss: specific details about the placements, the criteria for accepting students, placement constraints and the required procedures for student engagement and management during their placement (e.g. induction, supervision, evaluation, patterns of work, special requirements). During the placement weeks, the subject coordinator will engage in one-on-one student supervision and host liaison management (via zoom/Skype for international placements). The placement weeks also include a suite of evaluation processes throughout, including a mid-year and end of year evaluation undertaken by the host provider, and a mid-year review conducted by the subject coordinator (either online or face-to-face).

Major Structure

Students must complete 80 credit points as follows.

Complete the following compulsory subjects.

Subject	Title	Credit Points
TOUR 1003	Global Trends in Tourism and Events	10

Finance and Investment, Major (0228)

Western Sydney University Major Code: 0228

Previous Code: SP2016.1

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

This major introduces students to the fundamental concepts of finance theory – the time value of money, risk and return, capital budgeting and capital structure – and to the tools of financial decision-making in the context of the Australian institutional environment. Students examine the investment, financing and dividend decisions of corporations and develop an understanding of the basic practices of financial management from the perspective of both large and small firms. It also introduces the concept of investment analysis in the context of property. It explores the unique features of income-producing property and examines the performance of these properties, their loans and their taxation through the application of a variety of investment techniques. Also covered are risk analysis techniques for income-producing properties and portfolios.

The specialisation is designed to meet the needs of legal and non-legal professionals from Australia and overseas. This specialisation will develop specialised skills and knowledge to develop careers in the taxation and finance system. Students will be able to examine how the Australian legal and regulatory compliance requirements frame the provision of financial advice and the financial services sector as well as critically evaluate the policy rationale behind the regulation of the provision of financial advice within the Australian financial services sector to apply relevant regulatory provisions to case studies.

Financial Mathematics, Testamur Major (T096)

Western Sydney University Major Code: T096

Previous Code: MT3039

Available to students in other Western Sydney University programs?
No

Sophisticated mathematical techniques, such as stochastic calculus, are critical tools in modern finance. Building on the content taught in the Bachelor of Mathematics, this major equips graduates with the required knowledge, as well as with the background that is required to apply this knowledge successfully. In this major, you will learn not only the essential mathematical skills, but you will also take subjects from the School of Business as well as data science subjects that put these skills in context. The combination of theoretical skills and practical applications will give you the extra edge over competitors in the job market.

Financial Planning and Taxation, Testamur Major (T024)

Western Sydney University Major Code: T024

Previous Code: MT2039.1

The Financial Planning and Taxation major is available to participants enrolled in the Bachelor of Accounting (p. 74). The specialised subjects in this major analyse contemporary issues relevant to financial planning and taxation using case studies and discussion. This major satisfies the accreditation requirements of the Financial Planning Association (FPA) of Australia to become a Financial Planner AFP® and prepares students for entry into the CFP® Certification, It is also accredited by, and meets the education requirements of the Financial Planning Education Council (FPEC) which satisfies the new federal government education requirements as mandated by the Financial Adviser Standards and Ethics Authority (FASEA). Completion of this major also meets the financial advising industry's RG146 generic knowledge requirements, specialist knowledge requirements and skills requirements as they currently stand. Details regarding these requirements can be found on the Bachelor of Accounting page. In addition, completion of this major satisfies the tertiary education requirements to register as a Tax (Financial) Adviser and a Tax Agent with the Tax Practitioners Board (TPB) (pending completion of all subjects specified in the sequence of study for the major), subject to relevant work experience.

Minor elective spaces

Elective subjects may be used toward obtaining an additional approved minor (40 credit points). Western Sydney University offers minors in a range of areas including Sustainability and Indigenous Studies.

Global Sustainability Minor (p. 1469)
Indigenous Australian Studies Minor (p. 1511)

Western Sydney University also offers the following innovative transdisciplinary Challenge Minors (https://www.westernsydney.edu.au/educational_partnerships_and_quality/home/challenge_minors/) which we encourage those students who have elective space to consider.

Equitable Technologies (p. 1447)
Urban Evolution (p. 1715)
Migration and Global Change (p. 1582)
Personal Innovation (p. 1605)
Innovating, Creating and Problem Solving (p. 1517)
Eco-Socially Conscious Design and Manufacturing (p. 1406)
Water for Life (p. 1718)
Climate Justice (p. 1357)
Creative and Visual Communication (p. 1383)
Global Workplaces (p. 1469)
Innovating For Humans (p. 1517)
Creative Living for Cultural Wellbeing (p. 1384)
Ideate.Strategise.Innovate. (p. 1508)
Humanising Data (p. 1506)

For more information, visit the Challenge Minor (https://www.westernsydney.edu.au/educational_partnerships_and_quality/home/challenge_minors/) website.

Search for majors and minors (p. 1262)

Students can apply for an elective minor via Western Now.

WesternNow (https://www.westernsydney.edu.au/westernnow/)

Equivalent Subjects

The subjects listed below count towards completion of the program for students who may have passed subjects in the list in 2022 or earlier.

FINC 1001 - Management Accounting Fundamentals, replaced by ACCT 1010 Management Accounting Fundamentals

Bachelor of Accounting (2783) (p. 74)

Food Science, Testamur Major (T059)

Western Sydney University Major Code: T059

Previous Code: ST3077.1

Available to students in other Western Sydney University Programs: Yes, however the following restrictions apply.

Must be enrolled in a postgraduate program.

This postgraduate major is designed for science graduates interested in furthering a career in food science and technology, working in a variety of settings such as food manufacturing, research and development, regulatory affairs, technical and senior management. Graduates will develop knowledge and skills to meet future challenges to the food supply including sustainability, food safety, and health and nutrition, applicable to both Australian and global contexts. Students will be prepared to become professional food scientists with the cognitive, technical and critical thinking skills to analyse issues and articulate appropriate solutions. A capstone subject involving either a research or professional industry project allows students to integrate their knowledge and skills developed from the whole program.

Location

Campus	Mode	Advice
Parramatta Campus - Victoria Road	Internal	Dr Mark Williams (https://directory.westernsydney.edu.au/search/email/m.williams@westernsydney.edu.a

Major Structure

Qualification for the award of Master of Science (Food Science) requires the successful completion of 160 credit points comprising:

- 20 credit points of core subjects,
- 20 credit points of research capstone subjects,
- 40 credit points of major subjects as follows

Subject	Title	Credit Points
NATS 7015	Food Evaluation	10
NATS 7016	Food Preservation and Packaging Technologies	10
NATS 7017	Food Product Design	10
NATS 7018	Food Quality Management	10

- and at least 40 credit points from Alternate Pool 1 and up to 40 credit points from Alternate Pool 2.

Students should note that the subjects available in Alternate Pool 1 and Alternate Pool 2 are listed under the Structure tab of the Master of Science (p. 1158) page.

Recommended Sequence 2023

Master of Science full-time start-year intake

Forensic Science, Testamur Major (T049)

Western Sydney University Major Code: T049

Previous Code: MT3022

Available to students in other Western Sydney University programs?
No

The Forensic Science Major provides students with specialised expertise in forensic science including methods of forensic analysis, crime scene investigation, forensic photography, forensic investigation, and complex case studies. Career opportunities include forensic scientists, crime scene investigators, private investigators and consultants, police officers, drug analysts, researchers and academics, and specialised forensic science practitioners. The main employers of forensic scientists are State and Federal police services, State and Commonwealth Government Health Departments and analytical chemistry laboratories. Graduates will be versatile with a wide skills base with (depending on their choice of electives) potential for employment in analytical chemistry and microbiology, quality control and assurance, biochemistry and molecular biology, scientific research, education and the chemical industry. All students must complete 60 credit points of study at Level 3 to meet course requirements.

Computer gaming is a prominent component of modern popular culture and is a major, worldwide industry. Developing computer gaming software requires core programming skills and an understanding of the principles behind computer graphics, physics, and linear algebra. Students develop this knowledge through practical, industry-relevant activities to design modules and games. Students also learn the structure of game engines and engine programming. This minor provides students with a solid skillset for games development.

Gender Studies, Minor (0295)

Western Sydney University Minor Code: 0295

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

The Gender Studies minor provides an innovative inter-disciplinary course of study that includes units from English, Criminology, Anthropology, Culture and Society, History and Political Thought, Sociology, Disability Studies, and Islamic Studies. Students may tailor their selection of subjects to construct a minor that reflects their personal and academic interests. A key feature of the minor is the focus on intersectionality. An intersectional approach links the study of gender to other significant axes of privilege and discrimination including 'race', sexuality, ethnicity, (dis)ability and the perspectives and position of First Nations people. Completion of this minor will equip students with the critical competencies they need to analyse the complex dynamics of gender in 21st century Australia, and to be informed agents of change in their personal and professional lives. Most professions now require not only a basic grasp of equity and diversity issues, but also, the capacity to act on these in the provision of inclusive services. Completion of a minor in Gender Studies opens up research and policy career pathways in the State and federal public service, as well as within the private sector. There is also high demand for gender studies expertise in research, policy and advocacy skills in NGOs. The minor provides comprehensive grounding in the area for students interested in post-graduate study.

Geography and Urban Studies, Major (0010)

Western Sydney University Major Code: 0010

Previous Code: M1071.1

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

Students in this major examine the geography of contemporary Australian cities and regions. Geography is the integrated study of people, places and environments. The cutting-edge interests of today's Geographers include post-colonialism, the emergence of global information economies, indigenous issues, class and cultural disparities, population movement, sexuality and space, and the global diffusion of popular culture. Urban Studies is a newer discipline focused on social justice within the city, through its critical assessments of peoples' access to scarce urban resources, such as housing, transport, education and employment. The political, economic, and cultural forces that shape cities and urban policy are the key concerns of the Urban Studies curriculum. These applied interests in urban well-being and city structure are the intellectual basis for the Urban Planning profession. A major in Geography and Urban Studies will prepare students for both employment and a research higher degree.

Global Business, Major (0011)

Western Sydney University Major Code: 0011

Previous Code: M2513.1

Available to students in other Western Sydney University programs?
No

The global economy is becoming increasingly important for organisations seeking out new opportunities to expand their customer base and develop partnerships. Managers who are well versed in the needs of doing business internationally and who can exploit these opportunities will therefore play an integral role in any such corporation. Building on a solid foundation in domestic business education, including global sustainability, international business strategy, managing in a global environment, and international marketing, this major equips graduates with the detailed knowledge of the international dimension of business and the necessary understanding of the workings of that market system.

Global Climate Change, Major (0168)

Western Sydney University Major Code: 0168

Previous Code: M4008.1

Available to students in other Western Sydney University programs?
No

Climate change impacts across all sections of our society, from scientists who study the mechanisms underlying it, to businesses and policy makers who must deal with its effects and take remedial action. A factual understanding of climate, the components that go to make it up, and how climate has varied in the past, is essential for any person working in the climate change area. This specialisation will introduce students to the concept of climate, our understanding of how it works, and how it has changed through time. It will give students a critical understanding of current environmental concerns and debates about the greenhouse effect and climate change, and the science behind greenhouse gas accounting and potential effects on biota. Students completing the specialisation will be well positioned to make informed business decisions about greenhouse gas emissions and abatement.

Global Politics and International Relations, Major (0340)

Western Sydney University Major Code: 0340

Available to students in other Western Sydney University programs?
No

Global Politics and International Relations is concerned with relations among states, the role of international organisations and, foreign policies and power relations between countries. The major will examine the interaction of society, economy and politics across national boundaries. Students will develop knowledge of global politics and analyse the theory and practice of international relations by examining how communities respond to globalisation, migration, poverty and climate change. Students will also examine the influence of global movements and issues, such as environmentalism and religion and how contemporary global challenges are understood and addressed by political actors, from nation states to global social movements.

Global Sustainability, Minor (0196)

Western Sydney University Minor Code: 0196

Western Sydney University Minor Code: SM2054.1

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

The Global Sustainability minor provides a unique, signature learning experience for students involving local and global partners committed to sustainable development. The minor explores the interrelationship between humans and the natural and built environment from multiple paradigms. Students will investigate the grand challenge of achieving a sustainable society and in the process become future thinkers and innovators. Global Sustainability involves the choice of three sustainability subjects from five different schools and a social action internship which can be based regionally or internationally. The minor is recognised by and cobranded with the United Nations University's Regional Centres of Expertise on Education for Sustainable Development.

The transdisciplinary Global Workplaces minor upskills students from any disciplinary background with the knowledge and experience required to succeed in the increasingly globalised, disrupted and diverse world of work. The core values of ethics and diversity run as a backbone throughout the curriculum, providing a moral thread that underpins and helps to apply theoretical training in ethics, management, and international trade. At the same time, the minor offers real-world training in data analytics, business, law, client

management and digital life that gives non-professional students a leg up in the market. This multi-disciplinary curriculum is fulfilled by required transdisciplinary core unit that has been developed in consultation with PricewaterhouseCoopers, a globally leading consultant advisory form.

This minor is a Challenge Minor, which is an innovative transdisciplinary minor co-created with students as partners. With a Challenge Minor, your learning reaches beyond your discipline, giving you the chance to amplify your learning in new directions. For more information, visit the Challenge Minor (https://www.westernsydney.edu.au/educational_partnerships_and_quality/home/challenge_minors/) website.

Graphic Design, Major (0073)

Western Sydney University Major Code: 0073

Previous Code: M1116.1

Available to students in other Western Sydney University programs?
No

The Graphic Design major provides students from outside the Design program with a comprehensive introduction to fundamental skills and knowledge in graphic design. The major is delivered through a series of practice-based and theoretical subjects and you will study areas such as image design, contextual design studies, web design and branding. In addition, you will have the opportunity to choose a practice-based specialisation from the areas of interactive design; digital design; illustration and photomedia.

Visualising complex data sets is an important component of popular news reports, scientific and engineering applications, and business presentations. This minor equips computing students with specialised skills required to develop software that represents complex data sets in a meaningful and accessible way, covering both the mathematical background required to comprehend data and software development techniques required to represent it on a computer.

Greenhouse Horticulture, Testamur Major (T107)

Western Sydney University Major Code: T107

Previous Code: ST3078.1

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

This postgraduate major is designed for science graduates interested in a career in horticulture, protected cropping, greenhouse technology, postharvest technology, and agricultural biotechnology, working in a variety of settings such as food production, research and development, technical and senior management. This unique opportunity in greenhouse horticulture offers students exciting learning opportunities to develop expertise to meet future challenges to food supply, crop management, greenhouse control systems, and integrated pest management in a world-class greenhouse facility. Students will meet with industry experts and growers in becoming professional horticultural researchers with the technical and critical thinking skills to solve complex real-world problems and articulate appropriate solutions. A capstone subject involving either a research or professional industry project allows students to integrate their knowledge and skills developed from the whole program.

Health Informatics, Minor (0037)

Western Sydney University Minor Code: 0037

Previous Code: SM3090.1

Available to students in other Western Sydney University Programs: Yes, however the following restrictions apply.

This minor will deal with the application of approaches, tools and techniques and the development of programs appropriate for Health Information systems. This minor is available to all students except those enrolled in the 3711 Bachelor of Information and Communications Technology (Health Information Management) program.

Location

Campus	Mode	Advice
Penrith Campus	Internal	CDMS@westernsydney.edu.au

Minor Structure

Students must complete the following four subjects

Subject	Title	Credit Points
HLTH 2007	Fundamentals of Medical Concepts and Terminology	10
INFS 3010	Healthcare Data Environments	10
INFS 3011	Healthcare Software and Systems	10
INFS 2004	Introduction to Health Informatics	10

Health Informatics, Testamur Major (T007)

Western Sydney University Major Code: T007

Previous Code: ST3091.1

Available to students in other Western Sydney University programs?
No

The widespread adoption of ICT solutions within the health sector and related developments such as electronic health records and health systems interoperability have created a need for ICT professionals who understand their context and are well equipped to operate within it. This major is aimed at developing knowledge and skills in theoretical concepts and practical technologies needed to design and develop complex software applications across a range of eHealth settings. Students with these knowledge and skills will have greater prospects of finding employment with major healthcare providers or building their career as self-employed developers.

Major Structure

Master of Information and Communications Technology and Master of Information and Communications Technology (Advanced)

Students in Master of Information and Communications Technology and Master of Information and Communications Technology (Advanced) complete the following

Subject	Title	Credit Points
Students must complete the following three subjects:		
PUBH 7001	Advanced Health Classifications and Coding	10
INFS 7001	Advanced Healthcare Data Environments	10
INFS 7002	Advanced Healthcare Software and Systems	10
Select one of the following:		10
COMP 7016	Visualisation	
MATH 7016	The Nature of Data	
Total Credit Points		**40**

Master of Data Science

Students in Master of Data Science complete the following

Subject	Title	Credit Points
PUBH 7001	Advanced Health Classifications and Coding	10
INFS 7001	Advanced Healthcare Data Environments	10
INFS 7002	Advanced Healthcare Software and Systems	10
INFS 7007	Systems Analysis and Database Management Systems	10
Total Credit Points		**40**

Master of Information and Communications Technology/Master of Data Science

Subject	Title	Credit Points
PUBH 7001	Advanced Health Classifications and Coding	10
INFS 7001	Advanced Healthcare Data Environments	10
INFS 7002	Advanced Healthcare Software and Systems	10
COMP 7004	Cloud Computing	10
Total Credit Points		**40**

Bachelor of Information Systems and Bachelor of Information Systems (Advanced)

Students enrolled in the Bachelor of Information Systems and the Bachelor of Information Systems (Advanced) must complete 80 credit points as follows

Subject	Title	Credit Points
PUBH 2004	Clinical Classification and Coding	10
INFS 2001	Database Design and Development	10
HLTH 2007	Fundamentals of Medical Concepts and Terminology	10
INFS 3010	Healthcare Data Environments	10
INFS 3011	Healthcare Software and Systems	10
INFO 3003	Human-Computer Interaction	10
INFS 2004	Introduction to Health Informatics	10
INFS 1006	Systems Analysis and Design	10
Total Credit Points		**80**

Bachelor of Information and Communications Technology and Bachelor of Information and Communications Technology (Advanced)

Students enrolled in the Bachelor of Information and Communications Technology and the Bachelor of Information and Communications Technology (Advanced) must complete 80 credit points as follows

Subject	Title	Credit Points
PUBH 2004	Clinical Classification and Coding	10
INFS 3002	Advanced Clinical Classification	10
HLTH 2007	Fundamentals of Medical Concepts and Terminology	10
INFS 3010	Healthcare Data Environments	10
INFS 3011	Healthcare Software and Systems	10
COMP 2025	Introduction to Data Science	10
INFS 2004	Introduction to Health Informatics	10
INFS 3001	Activity Based Funding/Casemix and Data Quality	10
Total Credit Points		**80**

Equivalent Subjects

The subjects listed below count towards completion of this program for students who passed these subjects in 2021 or earlier.

MATH 2009 Introduction to Data Science is replaced by COMP 2025 Introduction to Data Science

Bachelor of Data Science

Students enrolled in the Bachelor of Data Science must complete 80 credit points as follows

Subject	Title	Credit Points
PUBH 2004	Clinical Classification and Coding	10
INFS 3002	Advanced Clinical Classification	10
HLTH 2007	Fundamentals of Medical Concepts and Terminology	10
INFS 3010	Healthcare Data Environments	10
INFS 3011	Healthcare Software and Systems	10
MATH 2011	Making Sense of Data	10
INFS 2004	Introduction to Health Informatics	10

INFS 3001	Activity Based Funding/Casemix and Data Quality	10
Total Credit Points		**80**

Health Management Studies, Major (0278)

Western Sydney University Major Code: 0278

Available to students in other Western Sydney University Programs: Yes, however the following restrictions apply.

The Health Management Studies major is open to all Western students and offers a broad understanding of the complex social, economic and cultural determinants of health and well-being. The current health care context and service systems are examined and students are encouraged to consider new directions for innovative service design and delivery. A 140-hour work placement is included and allows students an opportunity to engage in the health sector. Graduates will be skilled in understanding, managing and responding to rapid changes within the health care system, the broader political sphere and in areas that deal with policy and service assessment, development and evaluation.

Health Practice Management, Minor (0240)

Western Sydney University Minor Code: 0240

Previous Code: SM4002.1

Available to students in other Western Sydney University Programs: Yes, however the following restrictions apply.

The Minor complements study in another health or interdisciplinary major. Students will choose four of a suite of five subjects which are grouped to develop students' knowledge and the skills required to manage a health practice or health service. Such management skills can be applied to management of any work practice and should provide students with more diverse employment opportunities. Note: To avoid duplication of content studied in a course, students may not take this minor with the following fields of study: T019 Health Services Management or 0053 Health Services Management or 0170 Health Management)

Health Promotion Studies, Major (0298)

Western Sydney University Minor Code: 0298

Previous Code: M4023.1

Available to students in other Western Sydney University Programs: Yes, however the following restrictions apply.

For any student at Western who meets the subjects' pre-requisite rules, has sufficient elective space to complete the subject set and is not enrolled in the Bachelor of Health Science or Diploma in Health Science/ Bachelor of Health Science.

Health Promotion extends beyond raising awareness of healthcare issues to developing and implementing strategies for communities, individuals and policy makers to support good health and wellbeing. Graduates may help address health inequities in communities, link individuals and communities with healthcare, and assist individuals and communities to follow healthy behaviours, working across sectors and engaging collaboratively with communities to do so. Health promotion projects are as diverse as injury prevention, skin cancer prevention, HIV/AIDS awareness and community development. Graduates with studies in health promotion develop understandings of health that may be applied in health work settings. The program combines studies of health politics and planning, health promotion practice and public health with a comprehensive foundation in the health sciences

Health Promotion, Major (0052)

Western Sydney University Major Code: 0052

Previous code: M4019.1

Only available to 4656 Bachelor of Health Science students

Health Promotion extends beyond raising awareness of healthcare issues. It also involves developing and implementing strategies for communities, individuals and policy makers to support good health and wellbeing. Health Promotion graduates help address health inequities in communities, link individuals and communities with healthcare, and assist individuals and communities to follow healthy behaviours, working across sectors and engaging collaboratively with communities to do so. Health promotion projects are as diverse as injury prevention, skin cancer prevention, HIV/AIDS awareness and community development. Health promotion professionals work in diverse settings including healthcare, workplace and educational facilities, community, local, state and federal government, private industry and not-for profit organisations. The major combines studies of health politics and planning, health promotion practice and public health with a comprehensive foundation in the health sciences to develop the professional competencies important for ethical and safe practice. Students will develop the skills required to work in multidisciplinary teams. Evidence-based practice is one of the most important trends in healthcare today and a strong feature of the program. Students in T109 Clinical Science, who would not otherwise have the opportunity to take the 140-hour unit MEDI 3007 Professional Health Placement may choose to do so. This Major will be identified on the Student's Academic Transcript following completion of the course.

Health Science Modelling and Research, Testamur Major (T141)

Western Sydney University Major Code: T141

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

In this Field of Study students investigate the structure and operation of the health care system, and how data modelling can be applied to support effective decision-making. Management and change issues in health care are considered from the perspective of data generation, management, and communication to enable system operation and enhancement, such as tele-health and tele-medicine. Applied research findings enable students to use health informatics to inform management and decision making in the health care environment.

Total Credit Points		40

Master of Data Science (p. 1019)

Health Services Management, Major (0053)

Western Sydney University Major Code: 0053

Previous Code: M4020.1

Only available to 4656 Bachelor of Health Science students

Health Services Management plays a vital role in ensuring that investment in health is well spent and that businesses are efficient and sustainable. Graduates will be skilled in managing and responding to change within the health system and in roles that deal with policy initiative, development and evaluation. The major complements the comprehensive foundation in the health sciences, of the Bachelor of Health Science, and will develop the competencies important for ethical practice, quality care and the skills to work in multidisciplinary teams. The Health Services Management major includes 140 hours of professional placement experience in unit BUSM 2044 Health Service Management. Students in T109 Clinical Science, who would not otherwise have the opportunity to take the 140-hour unit MEDI 3007 Professional Health Placement may choose to do so. The Major is identified on a graduate's academic transcript as a completed unit set.

- Bachelor of Health Science
- Diploma in Health Science/Bachelor of Health Science

Health Services Management plays a vital role in society in ensuring that investment in health is well spent, and that health services are effective, efficient and sustainable. It puts management studies in the distinctive context of the health sector to integrate clinical understanding, business management skills and knowledge of the health care system and policy development. Our Health Services Management graduates worked in quality improvement, project and resource management, and digital health. Our program offers 280 hours of Work Integrated Learning and is accredited by the Australasian College of Health Service Management. There is room for specialisations in particular areas of interest in health, informatics, human resource and occupational safety which aim to extend students interdisciplinary knowledge and skills and ensure a readiness for the health management workforce. The Health Services Management testamur major includes 280 hours of professional placement experience. - The Testamur Major is identified on a graduate's testamur as Bachelor of Health Science (Health Services Management),

Master of Health Science

This specialisation is designed for medical, nursing, allied health and other health professionals who require skills in contemporary management and their application in the health care setting. Particular emphasis is placed on critical and analytic skills in health service governance, financing, quality and safety, planning and evaluation, and health policy thus providing graduates with the ability to respond effectively to changes as they arise. Students in this specialisation can further focus their studies in areas relevant to health service managers, such as project management, aged care management, human resource management, and research and development.

Heritage and Tourism, Major (0012)

Western Sydney University Major Code: 0012

Previous Code: M1077.1

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

In a highly mobile world (migration, tourism, media and communications, travel and transport) and in contemporary life where the preservation of historical and natural environments present as one of the major challenges facing all societies, heritage has become a touchstone for social and cultural identity, our understanding of modernity, peace and development, our senses of citizenship, custodianship and community. At the same time heritage places have become significant tourist destinations and so in a world of flows and networks, the heritage-tourism relationship is a critical one. In the 21st century it is impossible to disentangle the two. This major introduces contemporary heritage issues and provides an in-depth understanding of tourism as a social phenomenon. It enables a critical examination of the relationship between heritage and tourism in number of settings within Australia (including Indigenous Australia) and internationally.

Graduates with a heritage and tourism major can contemplate careers within a diverse range of government, non-government organization and businesses that require understanding, insight and skills related to heritage and tourism.

Western Sydney University Major Code: 0013

Previous Code: M1137.1

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

Since the revival of humanist thought in the Renaissance, universities have placed studies in history and political thought at the centre of exploring what it is to be human. At the heart of the History and Political Thought major are four compulsory subjects which introduce the student to the modern (since 1500) history of humanity. Although

Europe is very prominent in the Major, the student will be invited to compare its history to the histories of Asia, Africa and the Americas. The Major culminates in a capstone subject in students' final semester discussing historical theories and methods. A wide range of elective subjects covers European, American, Australian and Asian history and political thought and includes thematic subjects which range widely over time and place.

Location

Campus	Mode	Advice

Major Structure 2023

Students must successfully complete 80 credit points from the subjects listed below.

Students must complete the following compulsory subjects.

Subject	Title	Credit Points
HUMN 3104	Historical Methodologies	10
HUMN 2067	History of the Ancient World	10
HUMN 1039	Modern European History and Politics	10
HUMN 1054	When Worlds Collide: European Empires and the World, c.1600-1950	10
Total Credit Points		**40**

Students must also complete four subjects from the following pools with a minimum of two subjects at Level 3.

Note: Not all Level 2 and 3 pool subjects will be offered each year. Subjects will be offered on a rotational basis.

Level 2 Subject Pool

Subject	Title	Credit Points
HUMN 2001	A History of Modern Global Buddhism	10
HUMN 2011	Ancient Western Culture: Periclean Athens	10
LANG 2015	Cultural History of Books and Reading	10
HUMN 2034	Keeping the Past	10
HUMN 2074	Origins of the Secular West	10
HUMN 2039	Political Terror	10
HUMN 2040	Politics of Sex and Gender	10
HUMN 2075	Sports History in Global Perspective	10
PHIL 2010	The Ethical Life	10
PHIL 2017	Western Political Philosophy	10

Level 3 Subject Pool

Subject	Title	Credit Points
POLI 3004	American Foreign Policy Since 1945	10
HUMN 3013	Australian Colonial History	10
HUMN 3015	Australian History Around Us	10
HUMN 3017	Australian Indigenous History from Federation to Reconciliation	10
HUMN 3018	Australian Indigenous History: From first contact to 'dying race'	10
HUMN 3019	Britain in the Age of Botany Bay, 1760-1815	10
HUMN 3109	Catastrophe: The Environmental History of the Ancient World	10
HUMN 3024	Comparative Nationalism	10
HUMN 3026	Convicts and Settlers - Australian History 1788 - 1840	10
POLI 3005	Democracy in Asia	10
HUMN 3032	Dictators, Democrats and Dreamers: Indonesia 1942 to now	10
HUMN 3035	Enlightenment and Revolution	10
HUMN 3036	Ethics in Historical Perspective	10
HUMN 3039	Food: A Cultural History	10
HUMN 3040	From Vindication to Liberation: A Comparative History of Feminism	10
HUMN 3042	Global Politics	10
HUMN 3105	History of Religion	10
HUMN 3048	History of Sexuality	10
HUMN 3046	History of Modern China to 1949	10
HUMN 3047	History of Muslim Civilisations and Ideas	10
HUMN 3111	History of the People's Republic of China	10
HUMN 3051	Human Rights and Culture	10
POLI 3009	Looking at Global Politics Through Film	10
HUMN 3115	Medieval Europe from the Fall of the Roman Empire to the Reformation	10
HUMN 3060	Modern Japanese History	10
HUMN 3061	Mystical Islam: The Emergence of Sufism in World History	10
HUMN 3062	Napoleon: the Making of a Legend	10
PHIL 3015	Philosophy of History	10
POLI 3010	Politics of Post-War Japan	10
HUMN 3064	Politics, Power and Resistance	10
HUMN 3076	Sultans, Colonists and Nationalists: Indonesia C1200-1942	10
HUMN 3080	The History of Southeast Asia	10
HUMN 3081	The International Relations of the Middle East Since 1945	10
POLI 3012	The Politics of Civilisation	10
CULT 3021	Theories of Authority	10
HUMN 3084	Theories of Conflict and Violence	10
HUMN 3087	Twentieth Century Australia	10
HUMN 3088	Understanding Freedom	10
HUMN 3090	Understanding Power	10
HUMN 3093	War	10
HUMN 3094	War and Society in the Twentieth Century	10
HUMN 3092	WWII in Asia and the Pacific	10
HUMN 3096	What is the Human?	10

Equivalent Major Subjects

The subjects listed below count towards completion of this major for students who successfully completed the subjects in 2019 or earlier.

HUMN 3010 - American History, 1898-1945, no longer offered.
HUMN 3038 - Exploring Local History, replaced by HUMN 3015 Australian History Around Us
BEHV 3013 - Humanities Internship, no longer offered as part of this major.
HUMN 3053 - International Study Tours, no longer offered as part of this major.
HUMN 2043 - Religion and the Origins of Modern Science, no longer offered.

HUMN 3074 - Social and Political Developments in Contemporary China, replaced by HUMN 3111 History of the People's Republic of China
POLI 3013 - United States Government and Politics, no longer offered.
HUMN 3095 - Warlords, Artists and Emperors: Power and Authority in Japanese History, no longer offered.

Major Structure 2024

Students must complete eight subjects (80 credit points) as follows

Students must complete the following compulsory subjects.

Subject	Title	Credit Points
HUMN 1054	When Worlds Collide: European Empires and the World, c.1600-1950	10
HUMN 1039	Modern European History and Politics	10
HUMN 2067	History of the Ancient World	10
HUMN 3104	Historical Methodologies	10
Total Credit Points		**40**

Students must also complete four subjects from the following pools with a minimum of two subjects at Level 3.

Note: Not all Level 2 and 3 pool subjects will be offered each year. Subjects will be offered on a rotational basis.

Subject	Title	Credit Points

History and Political Thought, Minor (0013)

Western Sydney University Minor Code: 0013

Previous Code: SM1145.1

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any

requisite requirements must also be met. Consult your Program Advisor for further advice.

Since the revival of humanist thought in the Renaissance, universities have placed studies in history and political thought at the centre of of intellectual inquiry. History and politics have always examined contentious issues. Students learn to deal with conflicting information, appreciate the different ways societies have resolved issues in the past and develop skills that enable them to become responsible and active citizens. The History and Political Thought minor requires students to select two of four compulsory subjects which introduce the student to historical periods from the Ancient World to the 20th century, culminating in a capstone subject that discusses the development of historical methodology from ancient times to the present. The remaining two subjects can be selected from a pool that encompasses political thought and historical developments across time and space, enabling students to select fields of particular interest.

Human Nutrition, Testamur Major (T125)

Western Sydney University Major Code: T125

Previous code: MT3044.1

Available to students in other Western Sydney University Programs: Yes, however the following restrictions apply.

This testamur major is available as an elective major for Bachelor of Science students only.

A Human Nutrition Major in Medical Science uses biology, chemistry and physiology to develop concepts in food and nutrient form and function in relation to human metabolism and physiology. This major takes students through the ingestion, digestion, absorption, storage and utilisation of proteins, fats, vitamins, minerals and trace elements.

Students learn how these nutrients can be managed with respect to appetite, exercise, health and disease as well as develop a wide range of laboratory and research skills. Students will also develop critical analytical skills to assess and implement recommendations for testing, monitoring and community education.

All students must complete 60 credit points of study at Level 3 to meet program requirements.

NOTE: Students up to end of 2023 - Students will need to select at least 10 credit points of elective study at Level 3 to meet this requirement.

Location

Human Resource Management, Major (0134)

Western Sydney University Major Code: 0134

Previous Code: SP2025.1

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

Graduates of the Master of Business Administration with the Human Resource Management major are eligible for professional accreditation with the Australian Human Resources Institute (AHRI). This major equips graduates to work in the field of human resource management. Key functional areas are considered within a strategic and contextualised framework, with an underlying objective of searching for ways to strengthen organisations for all stakeholders. This education builds the necessary knowledge base for working in employment relations.

Human Resource Management, Minor (0301)

Effective from: 2022
Western Sydney University Minor Code: 0301

Available to students in other Western Sydney University programs? No

Human resources is about how leadership and management of people can support organisational objectives and create organisational opportunities. Students learn the foundations of human resource management, develop an understanding of the psychology and sociology of in a Human Resource Management context, and what that means for organisations and organisational learning and development. Throughout the program, students are challenged to develop and demonstrate communication, cultural, and analytic skills required to be innovative and responsible team-members and leaders.

Human Resource Management, Testamur Major (T041)

Western Sydney University Major Code: T041

Previous Code: MT2024.1

Available to students in other Western Sydney University programs? No

This major (including online) is accredited with the Australian Human Resources Institute (AHRI). The Human Resource Management Major is designed for people who seek careers in human resource management and industrial relations. Graduates' careers focus on enhancing the value of human and social capital through supporting employee engagement for many different kinds of organisations, market-oriented and community-oriented organisations and many kinds of people. The teaching philosophy is based on knowledge in action, a fusion of the Australia Human Resource Institute's capabilities for HR professionals and the Western Sydney University Graduate Attributes designed to secure success. An aim of the program is to instil those values and attitudes that can support leaders in judgements about balancing the pursuit of organisational objectives with creating opportunities for developing people's capacities and

careers. The perspectives are local and international, with an emphasis on the value of cultural and demographic diversity. Graduates have knowledge of how leadership and management of people can support organisational objectives and create organisational opportunities. This capacity comes from grounding in human resource management and industrial relations practice using contemporary law and research in applied projects. Students combine this with an education in the pressures organisations experience in inter-disciplinary subjects focused on money, markets and management. That is, graduates develop commercial acumen and appreciate the competing interests around work, aware of trends locally and internationally. Throughout the program, students are challenged to develop and demonstrate communication, cultural, and analytic skills required to be innovative and responsible team-members and leaders.

Human Rights Law, minor (0347)

Effective from: 2024
Western Sydney University Minor Code: 0347

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

A minor in Human Rights offers students a comprehensive exploration of international and domestic human rights frameworks, cultivating a deep understanding of ethical and legal considerations. The minor will explore the role of human rights in protecting vulnerable communities including children and the elderly. Students will refine their critical thinking, positioning themselves to tackle pressing global challenges with empathy and expertise. Armed with Human Rights knowledge, students become catalysts for change, advocating for justice and empowerment across diverse societies.

Human Rights, Protection and Development, Major (0095)

Western Sydney University Major Code: 0095

Previous Code: M1096.1

Available to students in other Western Sydney University programs?
No

This major is restricted to students enrolled in programs Bachelor of Humanitarian and Development Studies, Bachelor of Tourism Management and Diploma in Social Science/Bachelor of Humanitarian and Development Studies. This is an alternate Major program that prepares students with knowledge and skills to critically evaluate and assess social processes, policies, and practices, and articulate the place of humanitarian relief and development assistance. This is achieved through a set of subjects specifically tailored towards Human Rights, Protection and Development, providing students with the opportunity to apply skills and knowledge acquired during the first two years of their degree in a 'real world' setting through the Social Sciences International Placement suite of subjects. The international placement opportunity requires students to obtain a medical clearance, and a Working with Children check for certain organisations.

Every day, our lives are impacted by machines processing data about us, often with the goal of predicting future outcomes or depicting trends. Yet this processing typically happens in a black box that we can't often see. We are invited to trust the outcomes, but there are real questions about privacy, liability, fairness, and transparency. This Minor in Humanising Data will help students explore what's behind data analysis, paving the way for increasing our knowledge and understanding of data and opening up employment opportunities in applied areas of data analytics such as data privacy engineers or marketing specialists.

This minor is a Challenge Minor, which is an innovative transdisciplinary minor co-created with students as partners. With a Challenge Minor, your learning reaches beyond your discipline, giving you the chance to amplify your learning in new directions. For more information, visit the Challenge Minor (https://www.westernsydney.edu.au/educational_partnerships_and_quality/home/challenge_minors/) website.

This specialisation links subjects from the School of Engineering, Design and Built Environment, and the School of Social Sciences to develop key practice skills in the humanitarian and development sectors. Using innovative materials co-designed and delivered with industry partners (e.g. Engineers Without Borders, RedR) students will gain comprehensive knowledge and socio-technical skills for dealing with real-world humanitarian problems via sustainable, community-centered approaches. It offers opportunities to co-develop change with regional and international industry partners and local communities

in other countries to develop humanitarian engineering interventions within this emerging career pathway.

Humanitarian Preparedness and Response, Major (0094)

Western Sydney University Major Code: 0094

Previous Code: M1095.1

Available to students in other Western Sydney University programs? No

This major is restricted to students enrolled in programs Bachelor of Humanitarian and Development Studies, Bachelor of Tourism Management and Diploma in Social Science/Bachelor of Humanitarian and Development Studies. This is an alternate Major program that prepares students with knowledge and skills to critically evaluate and assess social processes, policies, and practices, and articulate the place of humanitarian relief and development assistance. This is achieved through a set of subjects specifically tailored towards Humanitarian Preparedness and Response, providing students with the opportunity to apply skills and knowledge acquired during the first two years of their degree in a 'real world' setting through the Social Sciences International Placement suite of subjects. The international placement opportunity requires students to obtain a medical clearance, and a Working with Children check for certain organisations.

Ideate. Strategise. Innovate., Minor (0336)

Western Sydney University Minor Code: 0336

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

How can you turn your creative play or side-hustle into a business? How can your community, board or organisation ideate, strategise and innovate for better, more creative outcomes and impact? This trans-disciplinary minor offers any WSU student an opportunity to expand their creative practice for existing and emerging industry contexts. Learn to ideate and co-design creative solutions and apply human centred design and creative practice, in the contexts of citizenship, stakeholders, environmental and intercultural competencies. Explore

the roles of strategy in developing your professional identity and networks, including through a work placement experience. Develop the strategic mindset, skills and tools to succeed in new economic and social modes of uncertainty and complexity; and design and implement holistic and strategic problem solving and communications. Get to grips with innovation by working across sectors from community to research environments and by designing creative solutions for emerging entrepreneurship opportunities. Understand key tools such as project management, design innovation and innovative and emerging business models, and work in a start-up space.

This minor is a Challenge Minor, which is an innovative transdisciplinary minor co-created with students as partners. With a Challenge Minor, your learning reaches beyond your discipline, giving you the chance to amplify your learning in new directions. For more information, visit the Challenge Minor (https://www.westernsydney.edu.au/educational_partnerships_and_quality/home/challenge_minors/) website.

Immersion Language, Minor (0014)

Western Sydney University Minor Code: 0014

Previous Code: SM1128.1

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

This minor is designed for students wanting to learn a language through an in-country experience. Living in a foreign country, learning the formalities of the language, studying its society and culture, and interacting with the local people on a daily basis enables a student to develop confidence in the use of the language. Students will develop an appropriate level of proficiency in a second language that may be used for professional purposes such as teaching, business or international relations. Students undertaking this language specialisation will be able to use the language in question according to basic grammatical and pragmatic principles, communicate with native speakers appropriately in the spoken as well as the written mode, and demonstrate an understanding of the cultures and societies associated with the language. This minor covers languages that are not taught at Western Sydney University and must be studied as part of an approved study abroad programme in the country where the language studied is one of the nominated national spoken and written languages.

Inclusive Education, Minor (0359)

Effective from: Spring 2024
Western Sydney University Minor Code: 0359

Available to students in other Western Sydney University programs? No

The Inclusive Education Minor provides students with a pathway to postgraduate studies to qualify as an inclusive education specialist teacher. Through a deep examination of current theory and practice, students develop the skills and knowledge necessary to work effectively with students, their families, and other professionals to support the inclusion of all students. The Inclusive Education Minor sits within the Transition to Practice phase of Bachelor of Education programs.

LANG 1011 Indonesian 101	INMS 1101 Indonesian 1A
LANG 1012 Indonesian 102	INMS 1102 Indonesian 1B
LANG 2021 Indonesian 201	INMS 2601 Indonesian 2A
LANG 2022 Indonesian 202	INMS 2602 Indonesian 2B
LANG 3095 Indonesian 301	INMS 3601 Indonesian 3A

LANG 3096 Indonesian 302	INMS 3602 Indonesian 3B
Two of the following subjects:	Two of the following units from the 300 level Language units of study:
LANG 3097 Indonesian 303	INMS 3612 Enculturating the Indonesian Nation
LANG 3098 Indonesian 304	INMS 3611 Autonomy and Human Rights in Indonesia
LANG 3045 Intercultural Communication	ASN3001 Youth and Language in South East Asia (intercultural)

Students must seek advice from the WSU Languages Academic Program Advisor before undertaking this program to ensure that they have accurate information regarding enrolment responsibilities, program progression requirements, tuition fees, Student Contribution Amounts and other fees including the Student Services and Amenities Fee.

A minor in Indonesian is any sequence of 40 credit points with no more than 20 credit points at Level 1.

Students should take subjects that reflect their level of competence in the language and they should not backtrack, i.e. they must not:
- take a Level 1 unit after passing a Level 2 unit in the same language; or
- take a Level 2 unit after passing a Level 3 unit in the same language.

Infectious Diseases, Minor (0231)

Western Sydney University Minor Code: 0231

Previous Code: SM3114.1

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

Infectious diseases are a major threat to health across the globe, including increasing threats from new pathogens and the emergence of antibiotic resistance in established pathogens. This minor will examine organisms that typically cause infectious disease and will deliver skills and knowledge on how these interact with the immune system, cause disease, and are diagnosed and treated. This will be allied to learning and developing skills in epidemiology, how epidemics can be controlled and prevented, and the principle of risk management. This minor will be useful for future population health professionals, medical scientists, researchers, or those involved in biological risk management.

Innovating For Humans, Minor (0288)

Western Sydney University Minor Code: 0288

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

Science, Technology, Engineering and Maths (STEM) are the enabling disciplines that have pushed us into a technological revolution that is seeing the boundaries between the physical, digital and biological worlds blur. When technology blends with biology we have the promise of a future world where we can all have healthier, more equitable and more productive lives. This takes transdisciplinary, innovative thinking, and an understanding of how humans interact with the world and the technology that can shape it. Students in this minor will learn how different disciplines combine to generate the thinking and creativity required to innovate and develop advanced products and innovations that can benefit humankind.

This minor is a Challenge Minor, which is an innovative transdisciplinary minor co-created with students as partners. With a Challenge Minor, your learning reaches beyond your discipline, giving you the chance to amplify your learning in new directions. For more information, visit the Challenge Minor (https://www.westernsydney.edu.au/educational_partnerships_and_quality/home/challenge_minors/) website.

Innovating, Creating and Problem Solving, Minor (0283)

Western Sydney University Minor Code: 0283

Previous Code: SM2056.1

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

A complex future of work requires innovative graduates who are adaptable and inquisitive about a wide variety of workplace, enterprise and societal needs. This Minor has been co-designed with students and industry partners to equip students with practical creative, innovation and problem solving skills that respond to a complex global future, such as risk-taking, multi-disciplinary thinking and effective decision making. Students will have unique opportunities to learn these skills in a multi-disciplinary context with opportunities to tackle real world practical problems while working with notable industry and community organisations.

This minor is a Challenge Minor, which is an innovative transdisciplinary minor co-created with students as partners. With a Challenge Minor, your learning reaches beyond your discipline, giving you the chance to amplify your learning in new directions. Innovation and Change, Major (0017)

Western Sydney University Major Code: 0017

Previous Code: M2514.1

Available to students in other Western Sydney University programs? No

In a world that is undergoing a continuous cycle of change and new ideas, the Innovation and Change major provides students with the key concepts, business models and issues that bring advancement within the context of contemporary business. Students will learn to compete on a global platform and deal with issues surrounding business ethics, corporate social responsibility and cultural awareness. The knowledge and skills acquired through this major will enable future leaders to revitalise organisations and create value in the process of transforming innovations into products or services.

Developing innovation and entrepreneurial capability is essential for small, medium and large businesses. This specialisation introduces students to practical and applied knowledge supported by theory, concepts, frameworks for understanding and developing innovation and entrepreneurial thought, capability, infrastructure and platforms. Students will be exposed to leadership and approaches to the development of new products, services, processes and business models and introduced to ideation as an approach for developing ideas into possible innovative products, services, applications and processes. Students will be exposed to a variety of brainstorming, creativity and foresight methods and tools, with emphasis on scenario planning methods.

Innovative Foods, Testamur Major (T124)

Western Sydney University Major Code: T124

Previous code: MT3046.1

Available to students in other Western Sydney University Programs: Yes, however the following restrictions apply.

This major is available as an elective in Bachelor of Science 3754 , and an elective major option in Bachelor of Medical Science 3755. See the related programs tab for more information.

Please note, the BSc Major Environmental Health T076, BSc Adv 3757, Bachelor of Science (Pathway to Teaching Primary/Secondary) 3756 & BMedSc Adv 3758, do not have sufficient Flexible space to accommodate a second/elective Major.

There is more to innovative foods, food marketing and healthy eating than you realise. This major will help you understand nutrition, and the science behind food in the largest business sector in the world. A major in Innovative Foods will prepare you to be a leader in developing innovative, safe, healthy and sustainable foods. A solid foundation in the biological and chemical sciences, needed to underpin food science, will enable graduates from this program to be confident in the rapidly evolving food technology sector. Graduates can pursue opportunities in food formulation, food research and development, quality assurance, food plant management, food molecular biology, flavour chemistry, consumer relations, food quality assurance and teaching. This flexible program has links with industry and community and enables you to make use of modern sensory and food processing facilities while undertaking units in human nutrition and health, food production, biotechnology, integrated management.

Interactive Analytics, Major (0203)

Western Sydney University Major Code: 0203

Previous Code: M3135.1

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

With increase in accessible data, interactive data analysis is a sought after skill. This Major covers concepts, techniques and technologies in data analytics with interactive communication to support extraction and analysis of big data. By completing this Major, students will gain skills in data science for producing visual, graphical and interactive representation of data analysis outcomes to support predictions and business decision making.

Location

International Business, Minor (0290)

Western Sydney University Minor Code: 0290

Previous Code: SM2059

Available to students in other Western Sydney University programs? No

This minor is about managing international business operations and the role of a range of factors including internationalisation, globalisation, and the power of institutions that can influence these operations. Students learn about the wider and changing context of business operations involving political, legal, economics that influence management practice on a global scale.

International Business, Testamur Major (T042)

Western Sydney University Major Code: T042

Previous Code: MT2025.1

Available to students in other Western Sydney University programs? No

The global economy is becoming increasingly important for organisations seeking out new opportunities to expand their customer base and develop partnerships. Managers who are well versed in the needs of doing business internationally and who can exploit these opportunities will therefore play an integral role in any such corporation. Building on a solid foundation in domestic business education, including global sustainability, international business strategy, managing in a global environment, and international marketing, this major equips graduates with the detailed knowledge of the international dimension of business and the necessary understanding of the workings of that market system.

International English, Major (0018)

Western Sydney University Major Code: 0018

Previous Code: M1132.1

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

International English engages students in a systematic and structured study of the English language and its variations across time and contexts. Students learn to recognise and work with the uses and features of the language that are essential to a wide range of social, academic and professional contexts. The major provides a solid and comprehensive foundation for students who aim to work professionally with English in different contexts and countries, especially those intending to pursue post-graduate qualifications in education. The major focuses on varieties and structures of English, informed by studies of English in specific discourse settings, and specifically aims to ensure that students understand the language and its use very well and that they possess a highly developed capacity to use English well across a range of contexts.

International Governance, Testamur Major (T127)

Western Sydney University Major Code: T127

Previous code: ST2007.1

Available to students in other Western Sydney University programs? No

This major has been discontinued at the end of 2023.

Governance is a key area for those working in law related areas in small and large firms, as well as in many public companies, government departments, large charities and non-government organisations. Internationally, there is a strong need for technical knowledge and understanding of legal governance for those not used to working in a common law legal system versus their own civil code or mixed system. This major provides a strong grounding in key theories, practices and issues in international governance.

International Relations and Asian Studies, Major (0019)

Western Sydney University Major Code: 0019

Previous Code: M1055.1

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

This major has been designed to meet the needs of Australian government, business and society to engage the states and peoples of Asia at all levels in pursuit of national interests and as part of the globalisation process. It provides students with the opportunity to study contemporary Asia, as well as the rich and diverse histories, politics, cultures and languages of Asian countries and the international issues affecting Australia's interests and role in the region and in the world at large. The major area also includes a range of subjects concerned with the United States and Europe as well as with Asia itself, and subjects in international relations covering other parts of the world. It seeks to produce graduates with a broad, liberal education with the skills to mediate between Australia and the world in general and Asia in particular through political, economic, commercial, cultural, diplomatic and strategic links. Students are encouraged to undertake a minor in an Asian language in conjunction with the major. Employment opportunities may be found in the State and Commonwealth public service, overseas organisations, the media, business and industry, education and research.

Islamic Studies, Major (0020)

Western Sydney University Major Code: 0020

Previous Code: M1056.1

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

Students engage in interdisciplinary study essential to an understanding of Islam, past and present. The area of study balances historical and modern Islamic studies and research methods. One of the keys to Islamic Studies is 'relevance' to contemporary Australian society but relevance can only come from a sound comprehension of past traditions in Islamic scholarship and their socio-historical contexts. Preparation for graduate study is also a key objective of this program, with its focus on developing critical and interdisciplinary research skills through a combination of approaches. Students are encouraged to undertake a minor in Arabic to complement the Islamic Studies major.

Location

Campus	Mode	Advice
Bankstown City Campus	Internal	enquiriesHCA@uws.edu.au

Major Structure

This major may be able to be studied entirely online, depending on student subject selection.

Students must successfully complete 80 credit points from the subjects listed below, with no less than three Level 3 subjects.

Students must complete the following compulsory subjects.

Subject	Title	Credit Points
PHIL 1002	Hadith: The Prophetic Tradition	10

Issues in Construction Law, minor (0345)

Effective from: 2024
Western Sydney University Minor Code: 0345

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

This specialisation is designed to develop legal skills and knowledge relevant to the construction industry and related fields. Students will study key aspects of law in the construction industry including managing legal risks, law related to construction delay and disruption and remedies in the construction context.

Campus	Mode	Advice
Parramatta South Campus - Victoria Road	Internal	Dr Rangika Palliyaarachchi (r.palliyaarachchi@westernsydney.edu.au)

Minor Structure

Students must complete 40 credit points from the following subjects:

Subject	Title	Credit Points
LAWS 6003	Managing Legal Risk in Construction Law	10
LAWS 5005	Construction Law	10
LAWS 6001	Law of Construction Delay and Disruption	10
LAWS 6002	Remedies in the Construction Context	10

IT Support, Minor (0205)

Western Sydney University Minor Code: 0205

Previous Code: SM3054.1

Available to students in other Western Sydney University programs? No

The minor prepares students to work with, train and support other people in their use of technology. With its practical orientation, it provides a sound foundation in information technology and computing particularly through learning by direct hands-on experience in class, laboratories and in real-world work experience sites. It is for people who want to work with computers within the IT (Information Technology) industry. This minor is only available to students enrolled in the Bachelor of Information and Communications Technology (p. 361) or Bachelor of Information and Communications Technology (Advanced) (p. 369).

Japanese, Major (0021)

Western Sydney University Major Code: 0021

Previous Code: M1062.1
Status: CURRENT

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

Language majors aim to enable students to develop an appropriate level of proficiency in a second language which may be used for professional purposes such as teaching, interpreting and translation, business or international relations. Students undertaking a language major will be able to use the language in question according to its grammatical and pragmatic principles, communicate with native speakers appropriately in the spoken as well as the written mode, and demonstrate an understanding of the cultures and societies associated with the language.

Inherent Requirements

There are inherent requirements for this major that you must meet in order to complete the major and graduate. Make sure you read and understand the requirements for this major online.

Inherent Requirements (http://www.uws.edu.au/ir/inherent_requirements/inherent_requirements_for_languages_courses/)

Major Structure

There are three entry levels into language majors. Beginner's level is for those with no previous study or minimal study of the language. Intermediate level is typically for students who: are non-native speakers with study of the language to HSC 2 Unit level or have a home background in the language but no comprehensive formal study. Post-Intermediate level is typically for students who are non-native speakers with substantial formal study and near-native competence; or are literate native speakers of the language. Students should consult with the Languages staff regarding the progression sequence that best fits their level of skill. During the first two weeks of class, the lecturer will monitor the performance of students and advise students who need to transfer to a higher or lower class. Students may consult with the Languages Course Advisor, if they are unsure of their entry level. Students should avoid enrolling in subjects at different levels at the one time (e.g. you should not enrol in LANG 2024 Japanese 201 and LANG 3051 Japanese 301 at the same time). Please check the current timetable as some subjects may not be offered every year. Advanced (Level 3) subjects may be offered on a rotational basis.

A major in Japanese comprises a sequence of 80 credit points with 60 credit points at Levels 2 and 3 (with no less than 30 credit points of these at Level 3), however students commencing at beginners level, that is subjects LANG 1020 Japanese 101 and LANG 1021 Japanese 102, and who follow the recommended program structure, are only required to complete 20 credit points at Level 3.

Students should take subjects that reflect their level of competence in the language and they should not backtrack, i.e. they must not:

- take a Level 1 subject after passing a Level 2 subject in the same language; or
- take a Level 2 subject after passing a Level 3 subject in the same language.

Level 1 Subjects

Subject	Title	Credit Points
LANG 1020	Japanese 101	10
LANG 1021	Japanese 102	10

Level 2 Subjects

Subject	Title	Credit Points
LANG 2024	Japanese 201	10
LANG 2025	Japanese 202 Speaking and Listening	10
LANG 2026	Japanese 203	10
LANG 2054	Japanese 204: Speaking and Listening	10

Level 3 Subjects

Subject	Title	Credit Points
LANG 3051	Japanese 301	10
LANG 3052	Japanese 302	10
LANG 3053	Japanese 303: Contemporary Culture and Society	10
LANG 3054	Japanese 304: Discourse in Japanese	10
LANG 3055	Japanese 305: Advanced Reading and Writing	10
LANG 3056	Japanese 306: Japanese Popular Culture	10
LANG 3045	Intercultural Communication	10
LANG 3082	Special Study in Languages and Linguistics	10

Advanced entry level Japanese students may complete the following Level 1 pool subjects. The subjects will be recognised as Level 3 pool subjects for the purpose of specialisation completion.

Subject	Title	Credit Points
LANG 1013	Introduction to Interpreting	10
LANG 1017	Introduction to Translation	10

Equivalent Subjects

The subjects listed below count towards completion of the major for students who passed subjects in the list below in 2020 or earlier.

LANG 3008 - Applied Critical Methods, no longer offered
LANG 3046 - Intercultural Pragmatics, replaced by LANG 3045 Intercultural Communication
LANG 2027 - Japanese 204, replaced by LANG 2054 Japanese 204: Speaking and Listening
LANG 3089 World Literature in Translation

Journalism, Major (0069)

Western Sydney University Major Code: 0069

Previous Code: M1067.1

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

The Journalism Major provides practical experience in preparing and presenting news and digital content for online, print and broadcast platforms. It provides an understanding of how the news media works and the importance of journalism in society. Students develop communication, journalism and storytelling skills suitable for all forms of new, digital and traditional media, including community, corporate and niche platforms.

Law and the Creative Industries, Major (0072)

Western Sydney University Major Code: 0072

Previous Code: M2515.1

Available to students in other Western Sydney University programs? No

The Law and the Creative Industries major equips you with specialised legal skills and knowledge to support your career in the creative industries in Australia. In this major you will develop tailored, strategic knowledge to enable you to effectively contribute to business decision making and to appreciate the legal and regulatory challenges within the context of creative and innovative enterprises. The subjects in this major focus on the fundamentals of Australian law, critique and analysis of law, contracts, torts, alternative dispute resolution and media law, with the option to also incorporate studies in competition and consumer law, intellectual property and law within the employment context. The legal and regulatory focus of this major will provide you with specialised knowledge and skills designed to enhance your access to a range of careers within the creative industries sector. Students are advised that this field of study does not qualify students for admission to legal practice in NSW. Students wishing to pursue a career in legal practice should apply for one of the relevant Bachelor of Laws programs. For further information, please contact the Academic Program Advisor for the Bachelor of Laws as noted below.

Law Enforcement Studies, Minor (0308)

Effective from: 202260
Western Sydney University Minor Code: 0308

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

The Law Enforcement Studies minor offers students an opportunity to distinguish themselves through a specialisation in Policing. The minor equips students with advanced knowledge of modern policing practice and theory. Graduates will develop analytical and problem-solving skills, as well as client-focused approaches to serving diverse communities. The knowledge and skills offered by the minor enhance employability in the law enforcement sector.

Leadership and Management, Testamur Major (T139)

Effective from: 2022
Western Sydney University Major Code: T139

Available to students in other Western Sydney University programs?
No

The Master of Education, Leadership and Management testamur major is designed for emergent and experienced professional leaders in a range of educational organisations, locally and internationally. Subjects are drawn from the School of Education and the School of Business,

providing professionals with comprehensive skills and knowledge to strategically foster teaching and learning, and effectively lead organisations in an ever-changing business climate. Students will apply their knowledge and skills to solve a real-world education business management problem through action-learning. Focusing on theory and practice, the specialisation has significant application to the global and dynamic context of education.

Leadership, Testamur Major (T136)

Effective from: 2022
Western Sydney University Major Code: T136

Available to students in other Western Sydney University programs?
No

The Master of Education, Leadership testamur major is designed for educational leaders who value the strategic importance of leadership and its impact on educational success. This major critically explores concepts and practices of leadership across educational contexts. It recognises that leadership emerges and is enacted in diverse ways, is crucial for fostering change and educational transformation and that educational leaders are responsible for developing the leadership capacities of others. Students will develop knowledge of research principles and practices in educational leadership and review and evaluate theory and scholarship. Students will apply concepts and theories to bodies of knowledge and practice. They will design original evidence-based investigations and analyse and synthesise a range of data to reframe problems and generate solutions. They will develop and evaluate innovations to improve learning outcomes in workplace settings, communicate their findings to diverse audiences and contribute to scholarship in educational leadership

Students will select from the major subjects that are on offer in any given semester. Major subjects can be studied in any order.

Students must successfully complete 40 credit points as listed below.

Subject	Title	Credit Points
Select four subjects from the list below		40
TEAC 7100	Principles and Practices of Evaluation	
TEAC 7026	Designing Curriculum Futures	
TEAC 7068	Learning and Teaching in Challenging Contexts	
TEAC 7063	Leadership, Mentoring and Professional Growth	
HUMN 7027	Leading Change	
Total Credit Points		**40**

Master of Education (1911) (p. 1021)

Learner Wellbeing, Testamur Major (T137)

Effective from: 2022
Western Sydney University Major Code: T137

Available to students in other Western Sydney University programs?
No

The Master of Education, Learner Wellbeing testamur major is designed to expand the knowledge, skills, and capacities of professionals working within educational settings to enable learners to be healthy, happy, engaged and successful. Students will critically examine what constitutes, promotes, and sustains learner wellbeing within an educational context from a multidisciplinary, strengths-based perspective. Informed by a whole school and person-centred approach, students will engage in problem solving, and apply pedagogical knowledge to identify and respond to learner mental health needs, and to improve wellbeing and connectedness within educational contexts.

Western Sydney University Major Code: 0022

Previous Code: M1119.1

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

Language is fundamental to the human experience. Through study of how language works, students make contact with fundamental philosophical, socio-cultural, and psychological questions about what it means to be human. Linguistics prepares students with a foundation for many careers including primary and secondary teaching, policy analysis, communication, and social services in culturally diverse communities. Linguistics students also gain the analytical tools of empirical science including the ability to break complex problems into components with tractable solutions and to evaluate theories on the basis of empirical facts. These skills prepare students for success in post-graduate studies and careers in research, analytics, business and law.

Marketing, Major (0137)

Western Sydney University Major Code: 0137

Previous Code: SP2024.1

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

This major is designed for an age of expanding communication networks, where marketing is increasingly seen as a highly skilled and complex profession. Whether designing or selling a product, communicating a government service, or raising awareness in the non-profit sector, marketing requires a broad understanding of its methodology, its tools, and broad communications and analysis skills.

Marketing, Minor (0291)

Effective from: 2022
Western Sydney University Minor Code: 0291

Previous Code: SM2060

Available to students in other Western Sydney University programs? No

The marketing minor provides students with a grounding in the practice of marketing and its application to any type of organisation. In this minor, students can extend that knowledge into more specialised aspects or marketing such as brand and product development, promotion, strategic marketing and marketing analytics. Students gain communications and analytic skills in assessing and developing key elements of a marketing strategy. There are practical industry-

related activities helping students compile a business portfolio for presentation to potential employers.

Marketing, Testamur Major (T044)

Western Sydney University Major Code: T044

Previous Code: MT2040.1

Available to students in other Western Sydney University programs?
No

This Marketing testamur major applies to students who commenced in 2022 or later. If you commenced prior to 2022 please refer to the MT2027 Marketing major in the legacy handbook for details.

MT2027 Marketing (https://handbook.westernsydney.edu.au/hbook/specialisation.aspx?unitset=MT2040.1)

Contemporary marketing uses strategies and technologies to create significant customer relationships and brand experiences. Through an in-depth understanding of the marketing field including the challenges of global forces, new technologies and changing customer demographics, students develop practical skills that contribute to improving organisational performance. The major is based on industry expectations and students work on industry-based projects and case studies equipping them to take on roles across numerous organisations including in digital marketing, campaign strategies, business and data analytics. This major satisfies the educational requirements for recognition as a Certified Practising Marketer and eligibility for student membership of the Australian Marketing Institute and The Research Society.

Accreditation

The Bachelor of Business Marketing Major has been deemed to have satisfied the requirements of accreditation of Marketing subjects in accordance with the Australian Marketing Institute's Accreditation and Endorsement Program. On completion of an AMI Accredited program graduates are eligible for special graduate membership rates and credit towards becoming a Certified Practising Marketer (CPM) in a shorter duration of time. Specifically, graduates are eligible to apply for a reduction off the minimum five (5) years industry experience required before becoming a CPM.

Major Structure

Qualification for this major requires the successful completion of 80 credit points including all of the core subjects listed below.

Core Subjects for this Major

Subject	Title	Credit Points
MKTG 1006	Marketing Principles	10
MKTG 2010	Customer Experience Fundamentals	10
MKTG 3019	Marketing and Digital Communications	10
MKTG 3021	Strategic Brand Management	10
MKTG 2011	Customer Insights	10
MKTG 3016	Strategic Marketing Management	10
MKTG 1011	Fundamentals of Marketing Analytics	10

MKTG 3020	Omnichannel Marketing	10
Total Credit Points		**80**

Professional Subjects for Careers in Markets

Students undertaking the Marketing major are advised to take the following four subjects to satisfy the requirements for their professional core:

Subject	Title	Credit Points
BUSM 3006	Design Thinking for Creativity	10
MKTG 3009	Marketing Planning Project	10
MATH 1030	Statistics for Business	10
BUSM 2040	The Service Enterprise	10
Total Credit Points		**40**

Recommended Sequence

Qualification for the award of Bachelor of Business with a major in Marketing requires the successful completion of 240 credit points as per the recommended sequence below.

Materials Engineering, Testamur Major (T128)

Western Sydney University Major Code: T128

Previous Code: MT3049.1

Available to students in other Western Sydney University programs? No

Since the dawning of mankind an understanding of how materials can be obtained and used has been critical to successful human endeavour. Materials engineers are concerned with the highly technological and dynamic process of understanding, developing, and applying materials (metals, polymers, ceramics, composites) to a range of engineering problems. Students will develop skills necessary to synthesise relevant information so that they can be effective decision makers in a materials context. These skills will serve them well in varied career opportunities associated with biomedical devices, nanotechnology, advanced manufacturing, opto-electronics, energy, aerospace, and sustainable construction. This major includes a mandatory 300 to 450 hour industrial placement as a completion requirement.

Recommended Sequence 2022-23

If you commenced in 2024 or later please refer to the Sequence 2024 tab for details.

This major is included in Bachelor of Engineering Science, Bachelor of Engineering (Honours), Bachelor of Engineering Advanced (Honours) and Bachelor of Engineering (Honours)/Bachelor of Business.

Please follow the recommended sequence for your course as noted below.

Select the link for your program below to see details of the major

Bachelor of Engineering (Honours)

Qualification for this award requires the successful completion of 320 credit points, which include the subjects listed in the recommended sequence below.

*** All students undertaking the Bachelor of Engineering (Honours) are required to enrol in** MATH 1021 Mathematics for Engineers Preliminary **and undertake a readiness test at the beginning of their study.**

The readiness test will be conducted at the beginning of the first semester of enrolment and the result will be used to determine whether

a student will remain in MATH 1021 Mathematics for Engineers Preliminary or be transferred by the School to MATH 1016 Mathematics for Engineers 1.

Students remaining in MATH 1021 Mathematics for Engineers Preliminary will be required to complete MATH 1016 Mathematics for Engineers 1 during second semester and will be encouraged to complete MATH 1019 Mathematics for Engineers 2 during the Summer session.

	Total Credit Points	**320**

Alternate Subjects

Subject	Title	Credit Points
BIOS 1022	Introduction to Human Biology	10
HLTH 2003	Biomechanics	10
ENGR 3003	Biomedical Electronics	10
ENGR 3004	Biomedical Signals and Data Analysis	10
ELEC 1003	Electrical Fundamentals	10
ENGR 4035	Smart and Liveable Cities	10
ENGR 4034	Climate Smart Engineering	10
ELEC 3010	Renewable Energy Systems Design	10
CIVL 2018	Water Supply Systems Design	10
Modern Digital Design and Development (not yet available)		10
Digital Manufacturing and IIoT (not yet available)		10
Design for Advanced Manufacturing (not yet available)		10
HUMN 1013	Contextualising Indigenous Australia (Day Mode)	10

HUMN 1058	Indigenous Landscapes	10
HUMN 2038	Pigments of the Imagination	10
HUMN 2048	Revaluing Indigenous Economics (Day Mode)	10
PERF 2011	From Corroborees to Curtain Raisers (Day Mode)	10
VISU 2003	From Ochre to Acrylics to New Technologies	10
CEDS 3001	Bridging the Gap: Re-engaging Indigenous Learners	10
HUMN 3082	The Making of the 'Aborigines'	10
WELF 3008	Learning through Indigenous Australian Community Service (Day Mode)	10
HUMN 3070	Rethinking Research with Indigenous Australians: Independent Study Project (Day Mode)	10

Alternate subjects may be used to complete one of the minors listed below.

Biomedical Engineering, Minor (p. 1724)
Indigenous Australian Studies, Minor (p. 1511)
Sustainability Engineering, Minor (p. 1724)
Advanced Manufacturing, Minor (https://hbook.westernsydney.edu.au/majors-minors/advanced-manufacturing-minor/)

Equivalent Subjects

The subjects listed below count towards completion of this program for students who passed these subjects in 2021 or earlier.

MECH 4005 Advanced Engineering Thesis 1: Preliminary Investigations, replaced by ENGR 4037 Advanced Engineering Thesis 1: Preliminary Investigations

MECH 4006 Advanced Engineering Thesis 2: Detailed Investigations, replaced by ENGR 4036 Advanced Engineering Thesis 2: Detailed Investigations

The subjects listed below count towards completion of this program for students who passed these subjects in Autumn 2022 or earlier.

ENGR 1008 - Engineering Materials, replaced by PROC 1008 - Introduction to Materials Engineering

Replaced Subjects

The subjects listed below count towards completion of this program for students who passed these subjects in 2023 or earlier.

CIVL 3020 Sustainable Waste Engineering, replaced by CIVL 4021 Sustainable Waste Engineering

Mid-year intake

Course	Title	Credit Points
Year 1		
Spring session		
MATH 1034	Mathematics for Engineers 1 (Advanced)	10

Bachelor of Engineering Science

Qualification for this award requires the successful completion of 240 credit points, which include the subjects listed in the recommended sequence below.

*** All students undertaking the Bachelor of Engineering Science are required to enrol in** MATH 1021 Mathematics for Engineers Preliminary **and undertake a readiness test at the beginning of their study.**

The readiness test will be conducted at the beginning of the first semester of enrolment and the result will be used to determine whether a student will remain in MATH 1021 Mathematics for Engineers Preliminary or be transferred by the School to MATH 1016 Mathematics for Engineers 1.

Students remaining in MATH 1021 Mathematics for Engineers Preliminary will be required to complete MATH 1016 Mathematics for Engineers 1 during second semester and will be encouraged to complete MATH 1019 Mathematics for Engineers 2 during the Summer session.

Students who finish MATH 1021 Mathematics for Engineers Preliminary will then use this subject as an elective.

Major Sequence 2024

This major sequence applies to students who commenced in 2024 or later. If you commenced prior to 2024 please refer to the Sequence 2022-23 tab for details.

This major is included in Bachelor of Engineering Science, Bachelor of Engineering (Honours), Bachelor of Engineering Advanced (Honours) and Bachelor of Engineering (Honours)/Bachelor of Business.

Please follow the recommended sequence for your program as noted below.

Bachelor of Engineering (Honours) (3740)

Qualification for this award requires the successful completion of 320 credit points, which include the subjects listed in the recommended sequence below.

*** All students undertaking the Bachelor of Engineering (Honours) are required to enrol in** MATH 1021 Mathematics for Engineers Preliminary **and undertake a readiness test at the beginning of their study.**

The readiness test will be conducted at the beginning of the first semester of enrolment and the result will be used to determine whether a student will remain in MATH 1021 Mathematics for Engineers Preliminary or be transferred by the School to MATH 1016 Mathematics for Engineers 1.

Students remaining in MATH 1021 Mathematics for Engineers Preliminary will be required to complete MATH 1016 Mathematics for Engineers 1 during second semester and will be encouraged to complete MATH 1019 Mathematics for Engineers 2 during the Summer session.

** **Electives** must be Level 2 or higher (An exception applies for students completing MATH 1021 Mathematics for Engineers Preliminary. This subject will then count as one of the elective subjects)

Bachelor of Engineering Science (3691)

Qualification for this award requires the successful completion of 240 credit points, which include the subjects listed in the recommended sequence below.

*** All students undertaking the Bachelor of Engineering Science are required to enrol in** MATH 1021 Mathematics for Engineers Preliminary **and undertake a readiness test at the beginning of their study.**

The readiness test will be conducted at the beginning of the first semester of enrolment and the result will be used to determine whether a student will remain in MATH 1021 Mathematics for Engineers Preliminary or be transferred by the School to MATH 1016 Mathematics for Engineers 1.

Students remaining in MATH 1021 Mathematics for Engineers Preliminary will be required to complete MATH 1016 Mathematics for Engineers 1 during second semester and will be encouraged to complete MATH 1019 Mathematics for Engineers 2 during the Summer session.

Students who finish MATH 1021 Mathematics for Engineers Preliminary will then use this subject as an elective.

Mathematics Education, Testamur Major (T138)

Effective from: 2022
Western Sydney University Major Code: T138

Available to students in other Western Sydney University programs?
No

The Master of Education, Mathematics Education testamur major equips primary and secondary school teachers of mathematics with specialist skills, knowledge, and dispositions to assist them in strengthening their role as mathematics specialist teachers within primary or secondary school settings. Through a combination of course content and independent research, graduates will develop deep mathematical pedagogical content knowledge, a strong understanding of the importance of research-based enquiry to inform teaching and leading in mathematics, and skills in mentoring and coaching colleagues.

Major Structure

Students will select from the major subjects that are on offer in any given semester. Major subjects can be studied in any order.

Students must successfully complete 40 credit points as listed below.

Subject	Title	Credit Points
TEAC 7065	Leading Mathematics in the Primary School	10
TEAC 7011	Assessment and Intervention for Mathematics and Numeracy Learning	10
TEAC 7074	Mathematics for Contemporary Learners	10
TEAC 7002	Addressing Diversity in Mathematics Teaching and Learning	10
Total Credit Points		**40**

Master of Education (1911) (p. 1021)

Mathematics Teaching Specialisation (Birth - 5/Birth -12), Minor (0157)

Western Sydney University Minor Code: 0157

Previous Code: SM1149.1

Available to students in other Western Sydney University programs? No

Students enrolled in a Bachelor of Arts (Pathway to Teaching Birth-5/Birth-12) will complete two subjects in Year 3 from the Mathematics teaching subjects sets in order to complete a minor in Mathematics and meet the BA component of a NESA teaching specialisation in Mathematics. Students enrolled in a Bachelor of Arts (Pathway to Teaching Early Childhood/Primary) may use their flexible subjects to study four specialised subjects in Mathematics. These 4 subjects together with completion of subjects in the Master of Teaching (Birth-5 Years/Birth-12 Years), enable students to graduate from the Master of Teaching (Birth-5 Years/Birth-12 Years) with a NESA Primary Teaching Specialisation in Mathematics.

Mathematics, Major (0059)

Western Sydney University Major Code: 0059

Previous Code: M3054.1

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

Mathematics is essential for modelling phenomena in various fields, so many employers these days set a lot of store by mathematical skills. This major covers some basics, but it also allows you to choose topics on which you want to focus. No matter what your area of study is, if you have an interest in mathematics, this major gives you the opportunity to use the elective space in your program to pick up additional skills that will be useful throughout your career. Prospective teachers can tailor this major to meet the NESA requirements for "Mathematics" as first teaching area.

Location

Campus	Mode	Advice
Campbelltown Campus	Internal	CDMS@westernsydney.edu.au
Parramatta Campus - Victoria Road	Internal	CDMS@westernsydney.edu.au

Major Structure

Students must complete a total of eight subjects at Levels 1, 2, and 3, including no more than three subjects at Level 1 and at least three

subjects at Level 3, taking into account any prerequisite requirements of individual subjects.

Subject	Title	Credit Points
Level 1		
No more than three subjects at Level 1 may be included.		
MATH 1006	Discrete Mathematics	
MATH 1014	Mathematics 1A	10
MATH 1015	Mathematics 1B	10
MATH 1028	Statistical Decision Making	10
Level 2		
MATH 2001	Advanced Calculus	
MATH 2003	Differential Equations	
MATH 2010	Linear Algebra	10
COMP 2023	Mathematical Programming	10
Level 3		
At least three subjects at Level 3 must be included.		
MATH 3003	Analysis	
MATH 3006	Mathematical Modelling	
MATH 3015	Groups and Symmetry	10
MATH 3013	Fields and Equations	10
MATH 3012	Combinatorics	10
Total Credit Points		**80**

Mathematics, Minor (0059)

Western Sydney University Minor Code: 0059

Previous Code: SM3025.1

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

This minor applies to students who commenced in 2022 or later.

Students should follow the minor structure for the session start date relevant to the year they commenced.

For Commencement Year 2021 or earlier, please refer to: SM3025 Mathematics (https://handbook.westernsydney.edu.au/hbook/specialisation.aspx?unitset=SM3025.1)

Employers these days set a lot of store by mathematical skills, even for jobs that may not sound at all like “maths”, such as certain marketing jobs. Having some background in mathematical thinking can make the difference between being stumped by a problem and seeing a solution. No matter what your area of study is, this minor gives you the opportunity to use some of the elective space in your program to pick up additional skills that will be useful throughout your career. Prospective teachers can tailor this minor to meet the NESA requirements for “Mathematics” as additional teaching area.

Available to students in other Western Sydney University programs?
No

Mechanical engineering is a dynamic area involving the design and build of moving machines including engines that power transportation, industrial machinery, and a range of tools. Students put the core concepts of mechanical engineering, energy, thermodynamics, mechanics, kinematics, and fluid mechanics, into practical application in workshops, industry projects, and work integrated learning. Students design and construct machines and tools, monitor and evaluate their performance. Employment opportunities include automotive or mechanical engineer, control and instrumentation engineer. This major includes a mandatory 12 weeks of industrial placement as a completion requirement.

Recommended Sequence 2022 - 2023

If you commenced in 2024 or later please refer to the Structure 2024 tab for details.

This major is included in Bachelor of Engineering Science, Bachelor of Engineering (Honours), Bachelor of Engineering Advanced (Honours) and Bachelor of Engineering (Honours)/Bachelor of Business.

Please follow the recommended sequence for your course as noted below.

Bachelor of Engineering Advanced (Honours)

This Major will be offered at Engineering Innovation Hub which is part of Parramatta City campus.

Qualification for this award requires the successful completion of 320 credit points which include the subjects listed below.

Start-year intake

Course	Title	Credit Points
Year 1		
Autumn session		
MATH 1034	Mathematics for Engineers 1 (Advanced)	10

Bachelor of Engineering Science

This Major will be offered at Engineering Innovation Hub which is part of Parramatta City campus, Penrith and Sydney City campuses.

Qualification for this award requires the successful completion of 240 credit points which include the subjects listed in the recommended sequences below.

Start-year intake

Course	Title	Credit Points
Year 1		
Autumn session		
ELEC 1006	Engineering Computing	10
ENGR 1011	Engineering Physics	10
ENGR 1024	Introduction to Engineering Practice	10
Select one of the following:		10
MATH 1021	Mathematics for Engineers Preliminary	
MATH 1016	Mathematics for Engineers 1	
Note: All students are required to enrol in MATH 1021 Mathematics for Engineers Preliminary first and undertake a readiness test at the beginning of their study.		
This test will be conducted at the beginning of the first semester of enrolment and the result will determine whether a student will remain in MATH 1021 Mathematics for Engineers Preliminary or be transferred by the School to MATH 1016 Mathematics for Engineers 1.		
The students who finish MATH 1021 Mathematics for Engineers Preliminary will then use this unit as an elective.		
	Credit Points	**40**
Spring session		
ENGR 1018	Fundamentals of Mechanics	10
PROC 1008	Introduction to Materials Engineering	10
Select one of the following:		10
MATH 1016	Mathematics for Engineers 1	

MATH 1019	Mathematics for Engineers 2	
Select one elective		10
Note: Students who remained in MATH 1021 Mathematics for Engineers Preliminary during the first semester will be required to complete MATH 1016 Mathematics for Engineers 1 during second semester.		
These students must then complete MATH 1019 Mathematics for Engineers 2 during the Summer session.		
	Credit Points	**40**
Year 2		
Autumn session		
MECH 2001	Kinematics and Kinetics of Machines	10
MECH 2003	Mechanics of Materials	10
CIVL 2003	Fluid Mechanics	10
ENGR 3029	Specialisation Workshop 1	10
	Credit Points	**40**
Spring session		
MECH 3004	Dynamics of Mechanical Systems	10
ENGR 2001	Automated Manufacturing	10
MECH 3008	Thermodynamics and Heat Transfer	10
ENGR 3030	Specialisation Workshop 2	10
	Credit Points	**40**
Year 3		
Autumn session		
MECH 3005	Mechanical Design	10
MECH 3001	Advanced Dynamics	10
ENGR 3013	Engineering Science Project 1	10
ENGR 2024	Design Graphics: Communication for Manufacture	10
	Credit Points	**40**
Spring session		
MECH 3007	Thermal and Fluid Engineering	10
ENGR 3020	Numerical Methods in Engineering	10
ENGR 3014	Engineering Science Project 2	10
Select one elective		10
Industrial Experience		
ENGR 2033	Industrial Experience (Engineering Technologist)	0
Note: Elective subjects must be level 2 or higher		
	Credit Points	**40**
	Total Credit Points	**240**

Equivalent Subjects

The subjects listed below count towards completion of this program for students who passed these subjects in Autumn 2022 or earlier.

ENGR 1008 - Engineering Materials, replaced by PROC 1008 - Introduction to Materials Engineering

Major Sequence 2024

This major sequence applies to students who commenced in 2024 or later. If you commenced prior to 2024 please refer to the Sequence 2022-23 tab for details.

This major is included in Bachelor of Engineering Science, Bachelor of Engineering (Honours), Bachelor of Engineering Advanced (Honours) and Bachelor of Engineering (Honours)/Bachelor of Business.

Please follow the recommended sequence for your program as noted below.

Bachelor of Engineering Advanced (Honours) (3771)

This Major will be offered at Engineering Innovation Hub which is part of Parramatta City campus.

Qualification for this award requires the successful completion of 320 credit points which include the subjects listed below.

** **Electives** must be Level 2 or higher

Start-year intake

Course	Title	Credit Points
Year 1		
Autumn session		
MATH 1034	Mathematics for Engineers 1 (Advanced)	10
ENGR 1024	Introduction to Engineering Practice	10
ENGR 1047	Advanced Engineering Physics 1	10

Spring session		
ENGR 4044	Advanced Engineering Thesis 2: Detailed Investigations	20
MECH 4002	Computer Aided Engineering	10
Select one elective** or Minor subject		10
	Credit Points	**40**
	Total Credit Points	**320**

Subject	Title	Credit Points
Optional Electives		
The following subject is an optional elective subject offered to students who are engaged in a School approved project.		
This subject can be taken during the third year of this program, however, permission is required to enrol in the subject.		
ENGR 3022	Special Technical Project	10

Equivalent Subjects

The subjects listed below count towards completion of this program for students who passed these subjects in 2023 or earlier.

BUSM 2047 Venture Makers Foundations, replaced by BUSM 2049 Creative and Innovative Thinkers

Mid-year intake

Course	Title	Credit Points
Year 1		
Spring session		
MATH 1034	Mathematics for Engineers 1 (Advanced)	10
ENGR 1018	Fundamentals of Mechanics	10
ELEC 1003	Electrical Fundamentals	10
ENGR 2023	Advanced Engineering Physics 2	10
	Credit Points	**40**
Autumn session		
MATH 1035	Mathematics for Engineers 2 (Advanced)	10

BUSM 2047 Venture Makers Foundations, replaced by BUSM 2049 Creative and Innovative Thinkers

Bachelor of Engineering (Honours) (3740)

This Major will be offered at Engineering Innovation Hub which is part of Parramatta City campus, Penrith and Sydney City campuses.

Qualification for this award requires the successful completion of 320 credit points which include the subjects listed below.

** **Electives** must be Level 2 or higher (An exception applies for students completing MATH 1021 Mathematics for Engineers Preliminary. This subject will then count as one of the elective subjects)

Associate Degree in Engineering

The Associate Degree in Engineering is a two-year program (full-time) in Engineering designed for people who have workplace experience and wish to upgrade their qualifications in Engineering and possibly continue to the full Bachelor degree program. The Associate Degree in Engineering has a common first year program for all engineering disciplines, exposing students to a wide range of experiences in the first year. In the second year students may choose from the majors in Civil, Electrical, Mechanical or Robotics & Mechatronics. If students choose to apply to study in the the Bachelor of Engineering (Honours) after graduating from the Associate Degree in Engineering they may be given advanced standing in up to 12 subjects.

Location

- Diploma in Aerotropolis Industry 4.0 (Mechatronics Skills)/Bachelor of Engineering Science
- Diploma in Engineering/Bachelor of Engineering Studies

In addition to providing training in conventional mechanical engineering subjects, the major introduces students to subjects of study that address sustainability including sustainable design and sustainable energy engineering. Graduates will be well equipped with broad-based skills that meet the demand of Australian industries and are conscious of the need to promote sustainable design and practices. Examples include mechanical and machinery design; manufacturing; energy production; and marketing and management activities. Skills gained are required in industries such as manufacturing, materials handling, automobile, aerospace, mining, building services and infrastructure development.

Associate Degree in Engineering

Major Structure

Subject	Title	Credit Points
Students must complete three subjects as follows		
MECH 3009	Thermodynamics and Heat Transfer (WSTC AssocD)	10
AND select two subjects from the following:		20
MECH 2004	Mechanics of Materials (WSTC AssocD)	
CIVL 2004	Fluid Mechanics (WSTC AssocD)	
MECH 2002	Kinematics and Kinetics of Machines (WSTC AssocD)	
MATH 1020	Mathematics for Engineers 2 (WSTC AssocD)	
Please note: Offerings of alternate units are dependent on there being sufficient student enrolment numbers. If enrolments are low, the College may cancel delivery of the alternate unit.		
Total Credit Points		**30**

Bachelor of Engineering (Honours)

Major Structure

Qualification for this award requires the successful completion of 320 credit points, which include the subjects listed in the recommended sequence below.

Full-time start-year intake

* All students undertaking the Bachelor of Engineering (Honours) are required to enrol in MATH 1021 Mathematics for Engineers Preliminary and undertake a readiness test at the beginning of their study.

The readiness test will be conducted at the beginning of the first semester of enrolment and the result will be used to determine whether a student will remain in MATH 1021 Mathematics for Engineers Preliminary or be transferred by the School to MATH 1016 Mathematics for Engineers 1.

Students remaining in MATH 1021 Mathematics for Engineers Preliminary will be required to complete MATH 1016 Mathematics for Engineers 1 during second semester and will be encouraged to complete MATH 1019 Mathematics for Engineers 2 during the Summer session.

	Credit Points	**40**
	Total Credit Points	**320**

Alternate Subjects

Alternate subjects may be used to complete one of the minors listed below.

Subject	Title	Credit Points
HLTH 2003	Biomechanics	10
ENGR 4038	Biomedical Electronics	10
ENGR 3004	Biomedical Signals and Data Analysis	10
MECH 4001	Computational Fluid Dynamics	10
ENGR 2024	Design Graphics: Communication for Manufacture	10
ENGR 2013	Graphics 4: Kinetic Narratives	10
INFO 3003	Human-Computer Interaction	10
BIOS 1022	Introduction to Human Biology	10
ELEC 2008	Microcontrollers and PLCs	10
MECH 4003	Mobile Robotics	10
ENGR 3025	Designing for Circular Economy (Advanced)	10

Equivalent Subjects

The subjects listed below count towards completion of this major for students who passed these subjects in 2019 or earlier

ENGR 2011 - Graphics 2: Visual Simulation
ENGR 2012 - Graphics 3: 3D Engineering Specifications and Visualisation

The subjects listed below count towards completion of this program for students who passed these subjects in Autumn 2022 or earlier.

ENGR 1008 - Engineering Materials, replaced by PROC 1008 - Introduction to Materials Engineering

Minors

Automation, Minor (p. 1313)

Biomedical Engineering, Minor (p. 1724)

Computer Aided Design (Mechanical), Minor (https://hbook.westernsydney.edu.au/majors-minors/computer-aided-design-mechanical-minor/)

Bachelor of Engineering Science

Major Structure

Students choose their key program at the end of first year. Mechanical engineering students will then undertake the following subjects.

Full-time start-year intake

Course	Title	Credit Points
Year 2		
Autumn session		
MECH 2001	Kinematics and Kinetics of Machines	10
MECH 2003	Mechanics of Materials	10
CIVL 2003	Fluid Mechanics	10
ENGR 2024	Design Graphics: Communication for Manufacture	10
From 2020 ENGR 2012 Graphics 3: 3D Engineering Specifications and Visualisation was replaced by ENGR 2024 Design Graphics: Communication for Manufacture.		
	Credit Points	**40**
Spring session		
MECH 3004	Dynamics of Mechanical Systems	10
ENGR 2001	Automated Manufacturing	10
MECH 3008	Thermodynamics and Heat Transfer	10
MECH 3002	Advanced Mechanics of Materials	10
Industrial Experience		
ENGR 3017	Industrial Experience (Engineering)	0
	Credit Points	**40**
Year 3		
Autumn session		
MECH 3005	Mechanical Design	10
MECH 3001	Advanced Dynamics	10
ENGR 3013	Engineering Science Project 1	10
Select one elective		10
*Elective subjects must be level 2 or higher		
	Credit Points	**40**
Spring session		
MECH 3007	Thermal and Fluid Engineering	10
ENGR 3020	Numerical Methods in Engineering	10
ENGR 3014	Engineering Science Project 2	10
Select one elective		10
*Elective subjects must be level 2 or higher		
	Credit Points	**40**
	Total Credit Points	**160**

Optional Elective

The following subject is an optional elective subject offered to students who are engaged in a School approved project. This subject can be taken during the third year of this course, however, permission is required to enrol in the subject.

ENGR 3022 Special Technical Project

- Diploma in Aerotropolis Industry 4.0 (Mechatronics Skills)/Bachelor of Engineering Science
- Diploma in Engineering/Bachelor of Engineering Studies

Full-time start-year intake

Course	Title	Credit Points
Year 2		
Autumn session		
MECH 2001	Kinematics and Kinetics of Machines	10
MECH 2003	Mechanics of Materials	10
CIVL 2003	Fluid Mechanics	10
MATH 1019	Mathematics for Engineers 2	10
	Credit Points	**40**
Spring session		
MECH 3004	Dynamics of Mechanical Systems	10
ENGR 2001	Automated Manufacturing	10

MECH 3008	Thermodynamics and Heat Transfer	10
MECH 3002	Advanced Mechanics of Materials	10
Industrial Experience		
ENGR 3017	Industrial Experience (Engineering)	0
	Credit Points	**40**
Year 3		
Autumn session		
MECH 3005	Mechanical Design	10
MECH 3001	Advanced Dynamics	10
ENGR 3013	Engineering Science Project 1	10
Select one elective		10
*Elective subjects must be level 2 or higher		
	Credit Points	**40**
Spring session		
MECH 3007	Thermal and Fluid Engineering	10
ENGR 3020	Numerical Methods in Engineering	10
ENGR 3014	Engineering Science Project 2	10
ENGR 2024	Design Graphics: Communication for Manufacture	10
	Credit Points	**40**
	Total Credit Points	**160**

Equivalent Subjects

The subjects listed below count towards completion of this major for students who passed these subjects in 2019 or earlier.

ENGR 2012 - Graphics 3: 3D Engineering Specifications and Visualisation

Optional Elective

The following subject is an optional elective subject offered to students who are engaged in a School approved project. This subject can be taken during the third year of this course, however, permission is required to enrol in the subject.

ENGR 3022 Special Technical Project

- Graduate Certificate in Engineering
- Graduate Diploma in Engineering (exit only)
- Master of Engineering

Postgraduate Major Structure

To complete some of the components within the subjects in this major, students may be required to travel to other Western Sydney University campuses.

Mechanical Major Alternate Subjects

Specialist alternate subject offerings are subject to sufficient student demand and may not be offered annually.

Students enrolled in 3693 Master of Engineering choose seven major subjects from the list below

Students exiting with 3694 Graduate Diploma in Engineering (exit only) choose six major alternate subjects

Students enrolled in 3695 Graduate Certificate in Engineering choose four major alternate subject

Subject	Title	Credit Points
MECH 7002	Advanced Computer Aided Engineering	10
MECH 7001	Advanced Computational Fluid Dynamics	10
MECH 7003	Advanced Dynamic Systems	10
CIVL 7005	Advanced Numerical Methods in Engineering	10
MECH 7005	Advanced Robotics	10
MECH 7006	Advanced Thermal and Fluid Engineering	10
MECH 7007	Mechanical System Design	10
MECH 7008	Mechatronic System Design	10

Related Programs

Associate Degree in Engineering (7022) (p. 69)

Bachelor of Engineering (Honours) (3740) (p. 308)

Graduate Diploma in Engineering (exit only) (3694) (p. 890)

Master of Engineering (3693) (p. 1036)

Mechatronic and Biomedical, Testamur Major (T116)

Western Sydney University Major Code: T116

Previous Code: ST3089.1

Available to students in other Western Sydney University programs?
No

Location

Campus	Mode	Advice
Parramatta Campus - Victoria Road	Internal	pg-enq@westernsydney.edu.au

Major Structure

Students must complete 100 credit points as follows.

Subject	Title	Credit Points
Complete the following core double major subjects:		
MECH 7005	Advanced Robotics	10
MECH 7004	Advanced Mobile Robotics	10
ELEC 7008	Instrumentation and Measurement (PG)	10
ENGR 7024	Advanced Biomedical Electronics	10
Select three of the following Mechatronic major subjects:		**30**
ELEC 7001	Advanced Control Systems	
ELEC 7003	Advanced Electrical Machines and Drives	
MECH 7007	Mechanical System Design	
MECH 7008	Mechatronic System Design	
MECH 7003	Advanced Dynamic Systems	
Select three of the following Biomedical alternate major subjects:		**30**
ENGR 7023	Advanced Biomedical Data and Images	
ELEC 7002	Advanced Data Networks	
ELEC 7005	Advanced Signal Processing	
ENGR 7025	Human Physiology and Biomedical Technologies	
HLTH 7008	Introduction to Biostatistics	
ELEC 7009	Personal Communication Systems	
Total Credit Points		**100**

Related Programs

Master of Engineering (3693) (p. 1036)

Mechatronic, Testamur Major (T063)

Western Sydney University Major Code: T063

Previous Code: ST3096.1

Available to students in other Western Sydney University programs? No

Location

Campus	Mode	Advice
Parramatta Campus - Victoria Road	Internal	Engineering@westernsydney.edu.au

Microbiology, Minor (0105)

Western Sydney University Minor Code: 0105

Previous Code: SM3044.1

Available to students in other Western Sydney University Programs: Yes, however the following restrictions apply.

The Microbiology minor is available to all undergraduate students except those enrolled in the Microbiology major.

Microorganisms impact on all aspects of our lives. A microbiology sub-major will equip students with the skills and knowledge of microbiology and molecular microbiology relevant to employment in research laboratories and industries including biotechnology companies, medical and environmental laboratories, food, wine and pharmaceutical companies, quality assurance and scientific sales.

Location

Campus	Mode	Advice
Hawkesbury	Internal	science@westernsydney.edu.au

Minor Structure

Students must complete four subjects as follows.

Subject	Title	Credit Points
Level 2		
BIOS 2022	Microbiology 1	10
BIOS 2024	Microbiology 2	10
Level 3		
BIOS 3004	Analytical Microbiology	10
NATS 3030	Medical Microbiology	10
Total Credit Points		**40**

Related Programs

Diploma in Science/Bachelor of Science (6043) (p. 760)

Migration and Global Change, Minor (0314)

Western Sydney University Minor Code: 0314

Previous code: SM4009.1

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

The Migration and Global Change minor offers a transdisciplinary approach to understanding and working in careers related to migration, an issue touching on almost every facet of life in contemporary Australia. The minor provides theoretical grounding in the dynamics of migration that students apply in real-world problems provided by external partners. Multidisciplinary offerings from health science, law, business, social sciences, and the arts provide the foundations for a transdisciplinary core unit 'capstone' designed around an individual or team-based local or international (digital or physical) learning experience with university partners in Australia, Asia or Africa. Students who graduate will have deep awareness of the value of migration, be able to manage and mitigate challenges which arise, and will gain new networks and experiences that make them job ready.

This minor is a Challenge Minor, which is an innovative transdisciplinary minor co-created with students as partners. With a Challenge Minor, your learning reaches beyond your discipline, giving you the chance to amplify your learning in new directions. For more information, visit the Challenge Minor (https://www.westernsydney.edu.au/

educational_partnerships_and_quality/home/challenge_minors/) website.

Location

As a transdisciplinary minor with subjects taken from five different school, students may be expected to travel to different campus' based on the location of each subject.

Campus	Mode	Advice

Minor Structure

Students must complete 40 credit points as follows.

Subject	Title	Credit Points
Select three of the following:		30
HUMN 1026	Global Structures, Local Cultures	
PUBH 2005	Culture, Diversity and Health	
BUSM 2031	Managing in the Global Environment	
LAWS 3029	Immigration Law	
HUMN 3049	Home and Away: Ethnicity and Migration in Australia	
HUMN 3113	Migration and Social Change	
The below core subject is to be undertaken after the student has completed 120cp of their program:		
CULT 3023	Global Citizenship and Engagement	10
Total Credit Points		**40**

Mobile Application Development (for Non-Computing Students only), Minor (0207)

Western Sydney University Minor Code: 0207

Previous Code: SM3058.1

Available to students in other Western Sydney University Programs: Yes, however the following restrictions apply.

This minor covers theories and technologies used for the development of distributed applications for hand-held mobile devices. Students completing this minor will understand and apply the advanced principles related to mobile: hardware devices, user interface design, data storage and transmission, and communication networks. This minor is only available for non-computing students. Students enrolled in Bachelor of Information and Communications Technology (p. 361), Bachelor of Information and Communications Technology (Advanced) (p. 369), Bachelor of Computer Science (p. 217), Bachelor of Computer Science (Advanced) (p. 222), Bachelor of Information Systems (p. 399) or Bachelor of Information Systems Advanced (p. 406) are not permitted to take this minor.

Mobile Computing, Major (0146)

Western Sydney University Major Code: 0146

Previous Code: M3074.1

Available to students in other Western Sydney University programs? No

This major is only available to students enrolled in the Bachelor of Information and Communications Technology (p. 361), Bachelor of Information and Communications Technology (Advanced) (p. 369), Bachelor of Computer Science (p. 217), Bachelor of Computer Science (Advanced) (p. 222), Bachelor of Information Systems (p. 399) or Bachelor of Information Systems (Advanced) (p. 406).

This major covers theories and technologies used for the development of distributed applications for hand-held mobile devices. Students completing this major will understand the advanced principles related to mobile hardware devices, data storage and transmission, and communication networks. In addition they will identify, analyse, and formulate solutions to real-world problems in the mobile domain. In devising these solutions students will also consider principles associated with user interface design, professional and ethical issues, in particular those relating to security and privacy of user data and user behaviour related to mobile devices and its applications.

Modern History, Major (0130)

Western Sydney University Major Code: 0130

Previous Code: M1136.1

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

Modern History includes the studies of societies, states and cultures since the Middle Ages and equivalent periods elsewhere. It provides important insights into the nature of the modern world, and into the origins of the features of modern life we now think of as 'global'. Modern History is an important teaching area for students heading into for Secondary Teaching: the purpose of this major is to group together all of the subjects which count as Modern History for the purposes of the Master of Teaching program and the Institute of Teaching. Successful completion of the Modern History major will count as a first

teaching area for Secondary Teaching. Note that there is a wider list of history subjects available in the History and Political Thought major.

Location

Campus	Mode	Advice
Bankstown City Campus	Internal	EnquiriesHCA@westernsydney.edu.au
Parramatta Campus - Victoria Road	Internal	EnquiriesHCA@westernsydney.edu.au
Penrith Campus	Internal	EnquiriesHCA@westernsydney.edu.au

Major Structure

Students must complete 80 credit points as follows.

Students must complete the following compulsory subjects.

Subject	Title	Credit Points
HUMN 3104	Historical Methodologies	10
HUMN 2067	History of the Ancient World	10
HUMN 1039	Modern European History and Politics	10
HUMN 1054	When Worlds Collide: European Empires and the World, c.1600-1950	10

Students must also complete four subjects from the following Modern History pools, with a minimum of two subjects at Level 3. It is also strongly recommended that students select at least one Australian history subject.

Note: Not all subjects will be offered each year. Subjects will be offered on a rotational basis.

Subject	Title	Credit Points
Level 2 Subject Pool		
HUMN 2001	A History of Modern Global Buddhism	10
HUMN 2034	Keeping the Past	10
HUMN 2074	Origins of the Secular West	10
HUMN 2075	Sports History in Global Perspective	10
LANG 2015	Cultural History of Books and Reading	10
HUMN 2076	The Classical Tradition	10
Level 3 Subject Pool		
POLI 3004	American Foreign Policy Since 1945	10
HUMN 3013	Australian Colonial History	10
HUMN 3015	Australian History Around Us	10
HUMN 3017	Australian Indigenous History from Federation to Reconciliation	10
HUMN 3018	Australian Indigenous History: From first contact to 'dying race'	10
HUMN 3019	Britain in the Age of Botany Bay, 1760-1815	10
HUMN 3024	Comparative Nationalism	10
HUMN 3026	Convicts and Settlers - Australian History 1788 - 1840	10
HUMN 3032	Dictators, Democrats and Dreamers: Indonesia 1942 to now	10
HUMN 3035	Enlightenment and Revolution	10
HUMN 3039	Food: A Cultural History	10
HUMN 3040	From Vindication to Liberation: A Comparative History of Feminism	10
HUMN 3046	History of Modern China to 1949	10
HUMN 3047	History of Muslim Civilisations and Ideas	10
HUMN 3111	History of the People's Republic of China	10
HUMN 3115	Medieval Europe from the Fall of the Roman Empire to the Reformation	10
HUMN 3060	Modern Japanese History	10
HUMN 3062	Napoleon: the Making of a Legend	10
HUMN 3076	Sultans, Colonists and Nationalists: Indonesia C1200-1942	10
HUMN 3080	The History of Southeast Asia	10
HUMN 3081	The International Relations of the Middle East Since 1945	10
HUMN 3087	Twentieth Century Australia	10
HUMN 3093	War	10
HUMN 3094	War and Society in the Twentieth Century	10
HUMN 3092	WWII in Asia and the Pacific	10

Equivalent Subjects

The subjects listed below count towards completion of this Major for students who passed these subjects in 2021 or earlier.

HUMN 3010 - American History, 1898-1945, no longer offered.
HUMN 2043 - Religion and the Origins of Modern Science, no longer offered.

Multimedia Computing, Minor (0328)

Western Sydney University Minor Code: 0328

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

This minor focuses on the technical and theoretical knowledge of design, development and deployment of software applications in Interactive Multimedia Computing. Students learn techniques for developing interactive systems, including asset creation, animation and programming. During the minor, students apply the techniques to develop 3D models and animations and video games or interactive simulations.

Multimedia computing involves combining a range of texts, graphics, video and animation amongst other media into a package that users can easily navigate and control. This requires knowledge of the technical as well as theoretical aspects of the design, development and deployment of software applications in interactive Multimedia Computing environments. Students learn techniques for developing interactive systems and apply these to design and develop 3D models, animations and video games in work integrated learning projects.

Music for Primary Teaching, Minor (0210)

Western Sydney University Minor Code: 0210

Previous Code: SM1082.1

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

The minor, Music for Primary Teaching, offers students experience in composition, sound technology, performance and either research or community engagement. This minor in music is designed to facilitate the teaching of music in the primary classroom, in particular, to enhance skills in performing (singing, playing), listening and composing (organising sound) within a wide range of repertoire and situated in a theoretical context. The music subjects are only available at the Penrith campus.

Location

Campus	Mode	Advice
Penrith Campus	Internal	EnquiriesHCA@westernsydney.ed

Minor Structure

Please note: All students should seek program advice from Music staff prior to enrolling in any subjects in this minor. Subject selection is dependent on the level of knowledge of music notation theory and the outcome of a performance audition. Several subjects in this minor have pre-requisite requirements which can be waived on a case-by-case basis, once the existing levels of applicable skills and knowledge have been assessed.

Students must complete 40 credit points as follows

Subject	Title	Credit Points
PERF 2016	Music Group Performance	10
PERF 1014	Music Production	10
Select one of the following:		10
PERF 2004	Composition and Creativity	
PERF 1024	Music Theory and Songwriting

Music for Secondary Teaching, Major (0140)

Western Sydney University Major Code: 0140

Previous Code: M1130.1

Available to students in other Western Sydney University programs?
No

The major, Music for Secondary Teaching, fulfils the NESA requirements to teach music in secondary schools. It offers students experience in composition, musicology (Western art music history) and performance. It covers a range of musical styles, periods and genres with a strong component of contemporary music and Western art music. An audition is a pre-requisite for the first performance subject, and entry into Songwriting and Music Theory assumes a working knowledge of music notation theory, assessable through a screening test. These music subjects are only available at the Penrith campus.

Location

Campus	Mode	Advice
Penrith Campus	Internal	Clare Maclean (https://directory.westernsydney.edu.au/old/srchprocess_handbook.php?a_value=c.maclean@westernsydney.edu.au)

Special Requirement

Students undertaking this major will be selected by one of three methods:

1. Attain an HSC Music result in band 4 or above. No audition is required.

2. Hold the following AMEB or equivalent (e.g. Trinity College) qualification:

- a. PASS standard (minimum) of 6th Grade Performance (instrument or voice) AND
- b. PASS standard (minimum) of 4th Grade musicianship and/or theory.

No audition is required.

3. Attend an audition in person as a performer and/or composer. Applicants applying as a composer will need to bring recordings and/or scores of original compositions to the audition. After applying to UAC or Directly to Western applicants are required to book an audition online.

Online audition booking system (https://admissions.westernsydney.edu.au/)

If not auditioning, applicants will need to upload their supporting documentation (e.g. AMEB certificates demonstrating level of achievement in performance and musicianship and/or music theory).

Major Structure

Note: Students must sit a screening test prior to enrolling in subject PERF 1024 Music Theory and Songwriting ***or perform an audition prior to enrolling in subjects*** PERF 1010 Music Performance 1 ***or*** *PERF 1012 Music Performance 2* **.**

Music Performance Studies, Minor (0024)

Western Sydney University Minor Code: 0024

Previous Code: SM1047.1

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

Please note: this major is **not** available to students enrolled in programs 1659 Bachelor of Music, 1738 Bachelor of Music (Dean's Scholars) and 1841 Bachelor of Music/Bachelor of Creative Industries.

The Music Performance Studies minor provides students from outside the Music program with a thorough grounding in a variety of group music making practices as well as offering the framework for self-directed musical projects. A number of approaches to writing about music performance are also covered, from theoretical approaches to proposal and review writing. Studies of stagecraft and collaboration further inform students in the music performance stream, who are also encouraged to discover and develop new hybrids.

Music Performance, Minor (0023)

Western Sydney University Minor Code: 0023

Previous Code: SM1017.1

Available to students in other Western Sydney University programs? No

Please note: this minor is available **only** to students enrolled in programs 1659 Bachelor of Music, 1738 Bachelor of Music (Dean's Scholars) and 1841 Bachelor of Music/Bachelor of Creative Industries.

The Music Performance minor offers students opportunities to expand and refine their performance practice. Through group rehearsal and performance, the two second-year subjects explore musical collaboration as performer-performer, and as performer-composer. Through student-devised projects, the two third-year subjects encourage engagement with theatrical, multimedia and/or electroacoustic elements as featured performer. In the capstone subject, students are challenged to present work of substantial duration that is industry-ready, drawing on skills from the rest of the minor. Aspects of onstage skills, performance persona, repertoire and interpretation, and audience communication are addressed. Subjects require writing about performance through project proposals, reflective and contextual essays, and an industry pitch. Students receive, and develop the capacity to give constructive feedback during workshops in each subject.

The Music major provides students from outside the Music program with a comprehensive introduction to current practice in the fields of music, performance and sound production for sound design, composition and performance. Foundation level subjects examine the fundamentals of music performance, acoustics, stereo recording and mixing, MIDI systems and sequencing, sound synthesis, and composition utilising environmental sound. Technical concepts are contextualised within a survey of electroacoustic music and sonic arts practice. Students will also examine studio techniques, new performance technologies, and composition and design for screen media.

Musicology, Minor (0025)

Western Sydney University Minor Code: 0025

Previous Code: SM1065.1

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

Please note: this minor is **not** available to students enrolled in programs 1659 Bachelor of Music, 1738 Bachelor of Music (Dean's Scholars) and 1841 Bachelor of Music/Bachelor of Creative Industries.

The Musicology minor provides students from outside the Music program with an introduction to Western classical music and its history, and popular and classical musics in the twentieth and twenty-first centuries. It offers perspectives on modernism, postmodernism and post-postmodernism, and incorporates social, political and philosophical critiques of music.

Networked Systems, Major (0065)

Western Sydney University Major Code: 0065

Previous Code: M3115.1

Available to students in other Western Sydney University programs?
No

This major is only available to students enrolled in the Bachelor of Computer Science and Bachelor of Computer Science Advanced. This major aims to develop graduates with sound skills in the discipline of networked computer systems. Recent advances in computer and telecommunications networked systems, particularly those based on TCP/IP, have increased the importance of network technologies in the discipline of computer science. This major covers a wide range of topics including computer communication network concepts and protocols, multimedia systems, Internet standards and technologies, network security, wireless and mobile computing, and distributed systems. The candidates are also introduced to some of the relevant current key research issues of the field.

The Networking major is aimed at providing students with knowledge in emerging areas of networking. It focuses on essential fundamentals as well as advanced knowledge on the principles, practices, protocols and standards in some key areas of the networking discipline. This major prepares students for careers in network security and management, multimedia and wireless communications, and other contemporary and emerging networking areas. The major is also designed to introduce students to trends and key research areas in some emerging fields in networking so as to provide students with initial skills and knowledge for future research studies or careers.

Western Sydney University Major Code: T032

Previous Codes: A4050.1, A4051.1, A4052.1

Available to students in other Western Sydney University programs?
No

This major focuses on the practice of workplace health within national and international frameworks. It explores issues such as the physical, social and mental impact of the occupational environment on health. Strategies for the management of workplace health are examined, together with methods of monitoring and evaluating occupational health programs. Students have the opportunity to develop a safety systems program concentrating on hazard identification, risk assessment and devising control measures incorporating safety management principles. Students in this major can further focus their studies in areas relevant workplace health and safety officers, such as project management, and research and development.

Organisations and Work, Major (0026)

Western Sydney University Major Code: 0026

Previous Code: M2512.1

Available to students in other Western Sydney University programs? No

The Organisations and Work major is designed for people interested in careers in organisational development, where there is emphasis on human resource management. Graduates have knowledge of how leadership and management of people can support organisational objectives and create organisational opportunities. That is, graduates develop commercial acumen and appreciate the competing interests around work, aware of trends locally and internationally. Throughout the major, students are challenged to develop and demonstrate communication, cultural and analytic skills required to be innovative and responsible team-members and leaders.

Students must be enrolled in one of the following programs: 1706 Bachelor of Arts, 1655 Bachelor of Arts (Dean's Scholars), 1651 Bachelor of Arts (Pathway to Teaching Primary), 1822 Bachelor of Arts (Pathway to Teaching Primary) Dean's Scholars, 1652 Bachelor of Arts (Pathway to Teaching Secondary), 1823 Bachelor of Arts (Pathway to Teaching Secondary) Dean's Scholars or 1708 Bachelor of Arts (Pathway to Teaching Birth - 5 / Birth - 12).

Peace and Development Studies, Major (0027)

Western Sydney University Major Code: 0027

Previous Code: M1083.1

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any

requisite requirements must also be met. Consult your Program Advisor for further advice.

The Peace and Development Studies major is concerned with methods for promoting peace, human rights and sustainability. It involves a critical analysis of inequalities of power and opportunity that lead to international and local conflict, social dislocation and environmental degradation. Students will examine the structural causes of racist and gendered violence, environmental crises, forced migration, poverty, resource conflict, and inter-generational inequity. The inter-related network of solutions includes empowerment and self-determination, sustainable living, constructive development, peacemaking and peace building. These require understanding of the theories and method for identifying, measuring and resolving conflict and environmental degradation. The assumptions and failings of traditional development practice are critically assessed. Students will engage social theory within an interdisciplinary and applied framework, at local, national and international levels. The major is comprised of three fields: 1) structural inequality, social justice and human rights; 2) development and sustainability; 3) peace and humanitarian responses/actions.

Personal Innovation, Minor (0284)

Western Sydney University Minor Code: 0284

Previous Code: SM2057.1

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

The future of work is changing rapidly, providing new opportunities and challenges for working in disrupted multi-disciplinary contexts. Employers are looking for graduates who are agile and equipped with adaptable personal innovation skills that are responsive to this new environment. This Minor has been co-designed with students and industry partners to equip students with flexible and adaptable strategies to strengthen their employability by building personal innovation skills such as personal branding, working collaboratively and across cultures, and managing change and resilience. Students will have opportunities to apply different frameworks and theories to develop these skills working with reputable graduate employers.

This minor is a Challenge Minor, which is an innovative transdisciplinary minor co-created with students as partners. With a Challenge Minor, your learning reaches beyond your discipline, giving you the chance to amplify your learning in new directions. For more information, visit the Challenge Minor (https://www.westernsydney.edu.au/educational_partnerships_and_quality/home/challenge_minors/) website.

Minor Structure

Students must successfully complete 40 credit points as listed below.

Note: Students will be required to travel between campuses as not all units are offered at all campuses.

Subject	Title	Credit Points
Select three of the following:		30
Please note that students may only choose one subject from BUSM 2030, BUSM 2040 or BUSM 2041		
COMM 1044	Professional Communication	
CULT 3011	Ethical Leadership	
COMM 3046	Personal Branding Strategies: Build and Manage Your Career Profile	
BUSM 2040	The Service Enterprise	
BUSM 2041	Working in Professions	
BUSM 2030	Managing and Developing Careers	
Students to complete the following core subject after completing the three subjects listed above:		
BUSM 3005	Creating Change and Innovation	10
Total Credit Points		**40**

Equivalent Subjects

The subjects listed below count towards completion of the minor for students who may have passed subjects in the list in 2023 or earlier.

COMM 1026 Principles of Professional Communication 1, replaced by COMM 1044 Professional Communication

Pharmacology, Minor (0341)

Western Sydney University Minor Code: 0341

Available to students in other Western Sydney University programs? No

Pharmacology is a multi-disciplinary field that applies knowledge in chemistry, biology, human anatomy and physiology, and pathophysiology to drug design, discovery and the therapeutic treatment of human diseases. This minor is available to all undergraduate students in the School of Science and covers the basic and applied knowledge of pharmacological basis of drug action, principles of pharmacokinetics and pharmacodynamics, topics in clinical pharmacology, drug design, discovery, and structure-activity-relationships, preclinical and clinical development, evaluation of pharmaceutical drugs, and regulatory and legislative frameworks that govern the approval of new therapeutic medicines. This minor is designed to complement different programs offered in the School of Science, preparing skilled graduates for a range of career options that includes further postgraduate study, research and development, clinical trials, and regulatory affairs within the pharmaceutical industry.

Philosophy, Major (0028)

Western Sydney University Major Code: 0028

Previous Code: M1058.1

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

Philosophy has always asked the “big questions” about our lives. These are questions, for example, about the limits of our knowledge, the best way that humans can live together, how we understand the world around us, and what is the good life. A philosophy major will enable students to develop particular skills and attributes - such as clear thinking, capacities to assess arguments and values, sound understanding of important philosophical views that have always been essential to university scholarship, and which continue to be valuable for graduates in both public and private life.

Physical Activity and Health, Minor (0257)

Western Sydney University Minor Code: 0257

Previous code: SM4007.1

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

The Physical Activity and Health minor offers an introduction to knowledge and skills associated with the use of physical activity as a means of promoting health. Students will further develop in areas associated with physical activity, exercise, nutrition, outdoor recreation, games for diverse groups and sport and exercise psychology. The minor is recommended as complementary study for students in the 4656 Bachelor of Health Science. Subjects are taken from the Health and Physical Education program and as such students will be expected to travel to Penrith campus for some subjects.

Place Management and Planning, Major (0304)

Western Sydney University Major Code: 0304

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

This unique major combines subjects from tourism, heritage and planning to prepare students for careers in place management. Place managers use collaborative approaches to design and develop a wide diversity of spaces and places, including precincts, destinations, towns, cities, parks, and many more. In this major, students will develop the skills and knowledge to manage places sustainably in a variety of contexts. This includes the ability to balance competing community, cultural, ecological and economic interests. Students who complete the major will be well positioned to apply for a growing number of place management positions with government and consultancies.

Policing, Public Safety and Security, Testamur Major (T066)

Western Sydney University Major Code: T066

Previous Code: ST1010.1

Available to students in other Western Sydney University programs? No

This major has been retired at the end of 2023.

The major in Policing, Public Safety and Security provides a pathway that will be of specific interest to professionals working within the public safety industry (incorporating police, security organisations and other agencies involved in public safety). Western Sydney University has a long history of working closely with public safety organisations

and the major draws on this experience and expertise. Through specialist subjects the program provides an in depth consideration of some of the complex challenges faced by contemporary leaders in public safety and provides a forum to examine, in detail, possible approaches to these challenges. Examples of the challenges explored within the major include the contemporary role of policing; security and public safety organisations; engaging with and policing vulnerable populations; managing offender behaviour; effective leadership and governance in policing and public safety; evidence based practice and policy development. This major has been developed to serve the needs of mid-career professionals in the public safety industry who wish to develop their leadership abilities through a Master in Business Administration.

Property, Minor (0289)

Western Sydney University Minor Code: 0289

Previous Code: SM2058.1

Available to students in other Western Sydney University programs?
No

In this minor on Property students learn the key concepts relating to property, property development, investment, and finance. These form the foundation for more in-depth topics on financial and risk assessment, and property portfolios. Through industry relevant activities students develop valuation reports and strategies for property investments and portfolios.

Property, Testamur Major (T047)

Western Sydney University Major Code: T047

Previous Code: MT2034.1

Available to students in other Western Sydney University programs?
No

The Property major equips you with the expert skills to create a career as a property specialist. You will be prepared to succeed in a range of roles in the property industry, including careers in valuation, property investment, property funds management, property development and commercial property management. The practical Property major subjects focus on property investment, valuation, property development and property management, with opportunities for engagement with industry, dependent on availability. If you are seeking professional accreditation, you will also undertake specialised professional subjects. The core subjects in the Bachelor of Business (p. 158) will provide you with a foundation of business knowledge and develop your skills in innovation, career planning, and numeracy. The Property major builds on this knowledge and skills in an applied discipline based context. Property specialists work for institutional investors with multi-billion dollar commercial property portfolios, major property companies, valuation firms and leading property advisory companies, both in Australia and overseas.

The Bachelor of Business (Property) is accredited by the Australian Property Institute (API) and depending on electives chosen, students may be eligible for API Certified Practising Valuer (CPV) certification. Students, depending on chosen electives, are also eligible for API certifications of Certified Property Practitioner, Certified Commercial Property Manager, Certified Funds Manager, Certified Asset Manager, Certified Development Practitioner and Residential Property Valuer. Details of which subjects must be completed to meet these requirements can be found via the link located on the Bachelor of Business (p. 158) page.

This major is available on-campus in full time and part time modes or by distance. Please contact the Property major Academic Program Advisor for information on the distance mode offering. Please note that the Parramatta External Campus offering is not available for students in program Bachelor of Business (Advanced Business Leadership).

Psychology Extension, Minor (0186)

Western Sydney University Minor Code: 0186

Previous Code: SM1124.1

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

The Psychology Extension minor is designed to give students enrolled in an accredited psychology sequence the opportunity to study some areas of psychology in greater depth. To complete the minor students must choose four subjects from a prescribed pool. Students enrolled in non-Psychology degrees are welcome to select the minor, but they should carefully check the prerequisites of subjects in the pool as many of them require completion of subjects from the psychology core.

Psychology, Testamur Major (T133)

Western Sydney University Major Code: T133

Available to students in other Western Sydney University programs?
No

Psychology develops students' scientific understanding of human behaviour and experience. The underlying principles, theories and concepts of psychological knowledge are applied in areas of study that include the history and philosophy of psychology, individual differences in behaviour and personality, psychological health and well-being, psychological disorders and intervention, learning and memory, cognition, language and perception, motivation and emotion, neuroscience and the biological bases of behaviour, lifespan developmental psychology, social psychology, research methods and statistics.

Public Health Nutrition, Testamur Major (T068)

Western Sydney University Major Code: T068

Previous Code: ST3079.1

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

This postgraduate major is designed for science graduates seeking to further their career in public health and health promotion; working in a variety of settings, such as local, state or national health organisations, non-government organisations, population health units, community health centres, and international aid agencies. Roles may include health promotion officer, research and evaluation officer, monitoring and surveillance officer, and health policy officer. This major builds an integrated understanding of relevant aspects of community and public health nutrition and its interrelation with other relevant disciplines. A capstone subject involving a public health nutrition research project allows students to integrate their knowledge and skills developed from the whole program and build on research skills that are scaffolded through the curriculum.

Major Structure

Qualification for the award of Master of Science (Public Health Nutrition) requires the successful completion of 160 credit points comprising:

- 20 credit points of core subjects,
- 20 credit points of research capstone subjects,
- 40 credit points of major subjects as follows

Subject	Title	Credit Points
HLTH 7003	Community and Public Health Nutrition	10
PUBH 7031	Health Systems and Policy	10
HLTH 7011	Nutritional Assessment Methods	10
HLTH 7010	Nutrition Promotion	10
Total Credit Points		**40**

- and at least 40 credit points from Alternate Pool 1 and up to 40 credit points from Alternate Pool 2.

Students should note that the subjects available in Alternate Pool 1 and Alternate Pool 2 are listed under the Structure tab of the Master of Science (p. 1158) page.

Recommended Sequence

Master of Science full-time start-year intake

Public Health Studies, Major (0297)

Western Sydney University Major Code: 0297

Previous Code: M4022.1

Available to students in other Western Sydney University Programs: Yes, however the following restrictions apply.

This major is available to students from all other programs except 4656 Bachelor of Health Science or 6000 Diploma in Health Science/ Bachelor of Health Science.

Public health is the science of disease prevention, prolonging life and improving health for individuals and their communities. The Public Health Studies major covers a wide range of areas such as health promotion, disease control, population health assessment and measurement, environmental health and community engagement. Students will gain knowledge of the main factors that underpin the health of a population, public health policy, and how to promote health for all. Students will develop and use skills in epidemiology and biostatistics, surveillance and prevention and apply them to public health problems. This Major will be identified on the Student's Academic Transcript following completion of the course

Public Health, Major (0055)

Western Sydney University Major Code: 0055

Previous Code: M4021.1

Only available to 4656 Bachelor of Health Science students

Public health is the science of disease prevention, prolonging life and improving health for individuals and their communities. This work is achieved by promoting healthy lifestyles, researching disease prevention, conducting population health assessment and measurement, improving environmental health, engaging the community and detecting, preventing and responding to infectious diseases. Public health professionals are required to assess and respond to emerging public health issues and work in a variety of settings, including national and state health departments, community organisations and the global health sector. The Public Health major builds a student's knowledge of the biological, social, cultural, economic and physical factors that underpin the health of a population and how to promote health for all. Students will also develop and use skills in epidemiology and biostatistics, surveillance and prevention, and public health policy. Students in T109 Clinical Science, who would not otherwise have the opportunity to take the 140- hour subject MEDI 3007 Professional Health Placement may choose to do so. This Major will be identified on the Student's Academic Transcript following completion of the course

Electives

Students must take at least one level 3 subject as an elective

Most electives are 10 credit points.

Students may wish to consider using elective choices to complete another health sciences field of study, such as Majors: Health Promotion, Health Services Management. Minors: Health Promotion, Public Health and Nutrition, Health Informatics, Global Sustainability

Minors

Health Promotion, Minor (p. 1479)
Health Practice Management, Minor (p. 1478)
Global Sustainability, Minor (p. 1469)
Health Informatics, Minor (p. 1475)

Majors

Health Services Management, Major (p. 1483)

Health Promotion, Major (https://hbook.westernsydney.edu.au/majors-minors/health-promotion-major/)

Master of Data Science

Students must complete 40 credit points as follows

Subject	Title	Credit Points
PUBH 7016	Introduction to Epidemiology	10
HLTH 7008	Introduction to Biostatistics	10
PUBH 7010	Epidemiology of Non-Communicable Diseases	10
Choose one of the following:		10
PUBH 7033	The Social Determinants of Health	
PUBH 7031	Health Systems and Policy	
PUBH 7028	Surveillance and Disaster Planning	
Total Credit Points		40

Related Programs

Bachelor of Health Science (4656) (p. 329)

Public Relations, Major (0160)

Western Sydney University Major Code: 0160

Previous Code: M1122.1

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

The Public Relations major provides a thorough grounding in the skills and knowledge required in the profession of public relations. Areas of study include strategies and tactics, event management, issues and crisis management, digital and social communication, account and client management, campaign development and evaluation, and an industry internship. The major focuses on the role of the public relations practitioner (both in-house and consultancy) and provides a theoretical framework of the industry. Students engage with both theory and practical projects, and engage with industry throughout the program.

Accreditation

This major is accredited by the Public Relations Institute of Australia (PRIA)

Major Structure

If you commenced in 2024 or later please refer to the Structure 2024 tab for details.

Bachelor of Business Students

Bachelor of Business students must complete the structure under the heading for Bachelor of Business below.

Creative Industries Students

Creative Industries students must complete their Introduction to major subject, as part of the core requirements of the program, prior to enrolling in this major

Subject	Title	Credit Points
MKTG 1009	Public Relations Theory and Practice	10

Students must complete 80 credit points as follow

Subject	Title	Credit Points
Level 2		
COMM 2001	Account and Client Management	10
COMM 2011	Communication Strategies	10
COMM 2015	Events Management	10
MKTG 2005	Issues, Risk and Crisis Communication	10
Level 3		
MKTG 3018	Public Relations: Campaigns	10
COMM 3014	Digital Communication	20
Select one of the following:		10
COMM 3018	Internship	
COMM 3037	Transmedia Production	
Total Credit Points		**80**

Bachelor of Business Students

Students must complete 80 credit points as follows

Subject	Title	Credit Points
Level 1		
MKTG 1009	Public Relations Theory and Practice	10
Level 2		
COMM 2001	Account and Client Management	10
COMM 2011	Communication Strategies	10
COMM 2015	Events Management	10
MKTG 2005	Issues, Risk and Crisis Communication	10
Level 3		
MKTG 3018	Public Relations: Campaigns	10
COMM 3014	Digital Communication	20
Total Credit Points		**80**

Equivalent Alternate Subjects

The alternate subject listed below counts towards completion of this program for students who passed this subject in 2019 or earlier.

COMM 3007 - Communication Campaigns, replaced by MKTG 3018 (https://hbook.westernsydney.edu.au/subject-details/mktg3018/) Public Relations: Campaigns

Major Structure

This structure applies to students who commenced in 2024 or later. If you commenced prior to 2024 please refer to the Structure 2023 tab for details.

Students must complete 80 credit points as follows:

Subject	Title	Credit Points
Level 1		
MKTG 1009	Public Relations Theory and Practice	10
Level 2		
COMM 2001	Account and Client Management	10
COMM 2015	Events Management	10
MKTG 2012	Public Relations: Strategies and Tactics	10
Level 3

Public Relations, Minor (0160)

Western Sydney University Minor Code: 0160

Previous Code: SM1122.1

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any

requisite requirements must also be met. Consult your Program Advisor for further advice.

The Public Relations minor provides a strong foundation in the skills and knowledge required in the profession of public relations. Possible areas of study include strategies and tactics, event management, issues and crisis management, digital and social communication, and account and client management. The minor focuses on the role of the public relations practitioner (both in-house and consultancy) and provides a theoretical framework of the industry. Students engage with both theory and practical projects, and engage with industry throughout the program.

Quantity Surveying, Testamur Major (T087)

Western Sydney University Major Code: T087

Previous Code: MT3035.1, MT3037.1

Available to students in other Western Sydney University programs?
No

Quantity surveying involves estimating and managing costs in construction and buildings of all types. In this major, students extend skills in measuring, estimating and contract administration. Students learn more advanced quantity surveying practices as they relate to modern and digital industry practices. Quantity surveyors are highly sought after with careers as project managers, cost management consultants, or quantity surveyors and estimators in construction organisations.

Recreational Therapy, Testamur Major (T110)

Western Sydney University Major Code: T110

Previous Code: MT4004.1

Available to students in other Western Sydney University programs?
No

Recreational Therapy links leisure and health improvement. Recreational Therapy graduates work with patients to use leisure activities to improve health and life quality, for example in rehabilitation centres, psychiatric units, special schools, day care centres, aged care facilities, and in a range of local government or community services settings. The major combines theory and practice in learning, education programming, aged care, disability and mental health, with a comprehensive foundation of the health sciences. Students will develop the professional competencies important for ethical and safe practice and high-quality care, and the skills to work in multidisciplinary teams. Evidence-based practice is one of the most important trends in healthcare today and is a strong feature of the major. The recreational therapy program is offered on campus or fully online. Students may combine this testamur major in recreational therapy with a minor in health promotion, therapeutic modalities, psychology or exercise and physical activity, or the option to choose up to 40cp of electives based on the student's interest. This flexibility will help diversify the knowledge-base and skillset of students. The course includes 160 hours of compulsory practical placement in second year and a third-year internship of 560 hours - meeting the practice placement requirement for eligibility as a Certified Recreation Therapist with the National Council of Therapeutic Recreation Certification (NCTRC).

Term 1		
BIOS 1038	Anatomy and Physiology in Health (WSTC)	10
BEHV 1015	Psychology and Health (WSTC)	10
HLTH 1014	Evidence in Health (WSTC)	10
	Credit Points	**100**
Year 2		
Spring session		
REHA 1008	Introduction to Leisure and Recreation Theory	10
Select two electives		20
HLTH 1006	Movement and Skill Development	10
	Credit Points	**40**
Autumn session		
REHA 1007	Foundations of Recreational Therapy	10
Select three electives		30
	Credit Points	**40**
Year 3		
Spring session		
REHA 2014	Recreational Therapy Assessment	10
REHA 3041	Facilitation in Recreational Therapy	10
REHA 3044	Shaping the Future of Recreational Therapy	10
REHA 3043	Recreational Therapy Internship	10
	Credit Points	**40**
Summer session		
BEHV 3002	Abnormal Psychology	10
	Credit Points	**10**
Autumn session		
REHA 3042	Health Practice Management	10
PUBH 3028	Transforming Health	10
REHA 2015	Recreational Therapy Process and Planning	10

Enrol again in:		
REHA 3043	Recreational Therapy Internship	10
	Credit Points	**40**
	Total Credit Points	**270**

Electives

Most electives are 10 credit points. Students may wish to consider using elective choices to complete another health sciences field of study, such as:

Minors

Health Promotion, Minor (p. 1479)
Health Practice Management, Minor (p. 1478)
Leisure for Diverse Groups, Minor (p. 1540)
Sport Development, Minor (p. 1675)

Note

Students enrolled in this Testamur Major are encouraged to use their elective choices to complete the complementary Leisure for Diverse Groups, Minor (p. 1540)

Recommended Sequence 2024

Bachelor of Health Science (Recreational Therapy) Full-time start-year intake

Students must complete 240 credit points as follows:

Course	Title	Credit Points
Year 1		
Autumn session		
PUBH 1006	Population Health and Society	10
HLTH 1013	Professional Competencies in Health	10
BIOS 1035	Anatomy and Physiology in Health	10
REHA 1007	Foundations of Recreational Therapy	10
	Credit Points	**40**
Spring session		
COMM 1007	Communication in Health	10
HLTH 1012	Evidence in Health	10
BIOS 1036	Human Development and Disease across the lifespan	10
REHA 1008	Introduction to Leisure and Recreation Theory	10
	Credit Points	**40**
Year 2		
Autumn session		
REHA 2015	Recreational Therapy Process and Planning	10
PUBH 2005	Culture, Diversity and Health	10
Select two electives		20
	Credit Points	**40**
Spring session		
REHA 2014	Recreational Therapy Assessment	10
REHA 3041	Facilitation in Recreational Therapy	10
BEHV 1014	Psychology and Health	10
HLTH 1006	Movement and Skill Development	10
	Credit Points	**40**
Year 3		
Autumn session		
REHA 3042	Health Practice Management	10
PUBH 3028	Transforming Health	10
REHA 3044	Shaping the Future of Recreational Therapy	10
Select one elective		10
	Credit Points	**40**
2H session		
REHA 3043	Recreational Therapy Internship	20
	Credit Points	**20**
Spring session		
BEHV 3002	Abnormal Psychology	10
Select one elective		10
	Credit Points	**20**
	Total Credit Points	**240**

Bachelor of Health Science (Recreational Therapy) Full-time mid-year intake

Students must complete 240 credit points as follows:

Course	Title	Credit Points
Year 1		
Spring session		
COMM 1007	Communication in Health	10
HLTH 1012	Evidence in Health	10
HLTH 1013	Professional Competencies in Health	10

Electives

Most electives are 10 credit points. Students may wish to consider using elective choices to complete another health sciences field of study, such as:

Minors

Health Promotion, Minor (p. 1479)
Health Practice Management, Minor (p. 1478)
Leisure for Diverse Groups, Minor (p. 1540)
Sport Development, Minor (p. 1675)

Note

Students enrolled in this Testamur Major are encouraged to use their elective choices to complete the complementary Leisure for Diverse Groups, Minor (p. 1540)

Related Programs

Bachelor of Health Science (4656) (p. 329)
Diploma in Health Science/Bachelor of Health Science (6000) (p. 732)

Responsible Design and Sustainability, Minor (0087)

Western Sydney University Minor Code: 0087

Previous Code: SM3110

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

Students must complete 40 credit points as follows

Subject	Title	Credit Points
ENGR 1042	Sustainable Materials and Smart Manufacturing	10
ENGR 3025	Designing for Circular Economy (Advanced)	10
BEHV 1018	Psychology: Human Behaviour	10
ENGR 4019	Start-Up Product Launch	10
Total Credit Points		**40**

Related Programs

Bachelor of Design and Technology (3729) (p. 282)

Robotics and Mechatronics Engineering, Testamur Major (T104)

Western Sydney University Major Code: T104

Previous Code: KT3174.1, MT3055

Available to students in other Western Sydney University programs? No

Handbook Summary 2022-2023

Robotics and Mechatronic engineering combines electrical, computing and mechanical engineering and is at the forefront in designing smart machines and systems, such as pilotless spacecraft, car cruise control, automated factories and medical telerobotics. Students explore intelligent mechanical systems and automation through an extensive and integrated hands-on laboratory program, as well as work-integrated industry projects. Students learn in-depth knowledge about the design and construction of these systems to integrate, evaluate and address their performance. The multidisciplinary skills students develop are sought after by leading edge industries, including aerospace and biomedical engineering. This major includes a mandatory 12 weeks of industrial placement as a completion requirement.

Summary 2024

Robotics and Mechatronic engineering combines electrical, computing and mechanical engineering. It is at the forefront in designing smart machines and systems, such as pilotless spacecraft, car cruise control, automated factories and medical telerobotics. Students explore intelligent mechanical systems and automation through an extensive and integrated hands-on laboratory program, as well as work-integrated industry projects. Students learn in-depth knowledge about the design and construction of these systems to integrate, evaluate and address their performance. The multidisciplinary skills students develop are sought after by leading edge industries, including aerospace and biomedical engineering. All students complete a mandatory 300 to 450 hour industrial placement.

Location

Penrith Campus	Internal	Major Advice (edbe@westernsydney.edu.au)

Major Structure 2022 - 2023

If you commenced in 2024 or later please refer to the Structure 2024 tab for details.

This major is included in Bachelor of Engineering Science, Bachelor of Engineering (Honours), Bachelor of Engineering Advanced (Honours) and Bachelor of Engineering (Honours)/Bachelor of Business.

Please follow the recommended sequence for your program as noted below.

Bachelor of Engineering Advanced (Honours)

This Major will be offered at Engineering Innovation Hub which is part of Parramatta City campus.

Qualification for this award requires the successful completion of 320 credit points which include the subjects listed below.

Start-year intake

Course	Title	Credit Points
Year 1		
Autumn session		
MATH 1034	Mathematics for Engineers 1 (Advanced)	10
ENGR 1024	Introduction to Engineering Practice	10
ENGR 1047	Advanced Engineering Physics 1	10
ENGR 1045	Engineering Programming Fundamentals	10
	Credit Points	**40**
Spring session		
ELEC 1009	Electrical Circuit Fundamentals	10
MATH 1035	Mathematics for Engineers 2 (Advanced)	10
ENGR 1018	Fundamentals of Mechanics	10
MANU 2001	Design and Manufacturing	10
	Credit Points	**40**
Year 2		
Autumn session		
ENGR 2027	Engineering Design	10
MECH 2003	Mechanics of Materials	10
MECH 2001	Kinematics and Kinetics of Machines	10
ELEC 1001	Digital Systems 1	10
	Credit Points	**40**
Spring session		
MECH 2005	Mathematics for Mechanical and Mechatronic Engineers	10
ELEC 2009	Microprocessor Systems	10
MECH 3004	Dynamics of Mechanical Systems	10
ELEC 2008	Microcontrollers and PLCs	10
Students who fail to maintain a minimum GPA of 5.0 at the end of completion of 160 Credit Points, and again at the completion of 200 Credit points will be automatically transferred to the B. Engineering (Honours) (3740) program.		
	Credit Points	**40**
Year 3		
Autumn session		
MECH 3001	Advanced Dynamics	10
MECH 3005	Mechanical Design	10
Select one Alternate Subject		10
Select one elective		10
	Credit Points	**40**
Spring session		
MECH 4003	Mobile Robotics	10
MECH 3006	Mechatronic Design	10
ELEC 3008	Instrumentation and Measurement	10
From Spring 2022 ELEC 3008 is replaced with ELEC 4009 Instrumentation and Measurement		
Select one Alternate Subject		10
Industrial Experience		
ENGR 3017	Industrial Experience (Engineering)	0
	Credit Points	**40**
Year 4		
Autumn session		
MECH 4004	Robotics	10
ENGR 4037	Advanced Engineering Thesis 1: Preliminary Investigations	10
Select one Alternate subject		10
Select one elective		10
	Credit Points	**40**
Spring session		
ENGR 4036	Advanced Engineering Thesis 2: Detailed Investigations	10
Select one Alternate Subject		10
Select two electives		20
	Credit Points	**40**
	Total Credit Points	**320**

Alternate Subjects

Subject	Title	Credit Points
HLTH 2003	Biomechanics	10
ENGR 3003	Biomedical Electronics	10
ENGR 3004	Biomedical Signals and Data Analysis	10
MECH 4001	Computational Fluid Dynamics	10
MECH 4002	Computer Aided Engineering	10
ELEC 2007	Engineering Visualization	10
ENGR 2025	Design Graphics: Engineering Documentation	10
ENGR 2024	Design Graphics: Communication for Manufacture	10
CIVL 2003	Fluid Mechanics	10
BIOS 1022	Introduction to Human Biology	10
MECH 3007	Thermal and Fluid Engineering	10
MECH 3008	Thermodynamics and Heat Transfer	10

Minors

SM3093 Computer Aided Design (Mechatronics)

SM3074 Thermal and Fluid Systems

SM3091 Biomedical Engineering

Optional Electives

The following subject is an optional elective subject offered to students who are engaged in a School approved project. This subject can be taken during the third year of this program, however, permission is required to enrol in the subject.

Subject	Title	Credit Points
ENGR 3022	Special Technical Project	10

Equivalent Subjects

The subjects listed below count towards completion of this program for students who passed these subjects in 2021 or earlier.

MECH 4005 Advanced Engineering Thesis 1: Preliminary Investigations, replaced by ENGR 4037 Advanced Engineering Thesis 1: Preliminary Investigations

MECH 4006 Advanced Engineering Thesis 2: Detailed Investigations, replaced by ENGR 4036 Advanced Engineering Thesis 2: Detailed Investigations

Replaced Subjects

The subjects listed below count towards completion of this program for students who passed these subjects in 2022 or earlier.

ELEC 3008 Instrumentation and Measurement, replaced by ELEC 4009 Instrumentation and Measurement

Mid-year intake

Course	Title	Credit Points

Replaced Subjects

The subjects listed below count towards completion of this program for students who passed these subjects in 2022 or earlier.

ELEC 3008 Instrumentation and Measurement, replaced by ELEC 4009 Instrumentation and Measurement

Bachelor of Engineering Science

This Major will be offered at Parramatta City and Penrith campuses.

Qualification for this award requires the successful completion of 240 credit points which include the subjects listed in the recommended sequences below.

Start-year intake

Course	Title	Credit Points
Year 1		
Autumn session		
ELEC 1006	Engineering Computing	10
ENGR 1011	Engineering Physics	10
ENGR 1024	Introduction to Engineering Practice	10
Select one of the following:		10
MATH 1021	Mathematics for Engineers Preliminary	
MATH 1016	Mathematics for Engineers 1	
Note: All students are required to enrol in MATH 1021 Mathematics for Engineers Preliminary first and undertake a readiness test at the beginning of their study.		
This test will be conducted at the beginning of the first semester of enrolment and the result will determine whether a student will remain in MATH 1021 Mathematics for Engineers Preliminary or be transferred by the School to MATH 1016 Mathematics for Engineers 1.		
The students who finish MATH 1021 Mathematics for Engineers Preliminary will then use this unit as an elective.		
	Credit Points	**40**
Spring session		
ENGR 1018	Fundamentals of Mechanics	10
PROC 1008	Introduction to Materials Engineering	10
Select one of the following:		10
MATH 1016	Mathematics for Engineers 1	
MATH 1019	Mathematics for Engineers 2	
Select one elective		10
Note: Students who remained in MATH 1021 Mathematics for Engineers Preliminary during the first semester will be required to complete MATH 1016 Mathematics for Engineers 1 during second semester.		
These students must then complete MATH 1019 Mathematics for Engineers 2 during the Summer session.		
	Credit Points	**40**
Year 2		
Autumn session		
MECH 2001	Kinematics and Kinetics of Machines	10
MECH 2003	Mechanics of Materials	10
ELEC 2001	Circuit Theory	10
ENGR 3029	Specialisation Workshop 1	10
	Credit Points	**40**
Spring session		
MECH 3004	Dynamics of Mechanical Systems	10
ENGR 2001	Automated Manufacturing	10
ELEC 2008	Microcontrollers and PLCs	10
ENGR 3030	Specialisation Workshop 2	10
Industrial Experience		
ENGR 2033	Industrial Experience (Engineering Technologist)	0
	Credit Points	**40**
Year 3		
Autumn session		
MECH 3005	Mechanical Design	10
MECH 3001	Advanced Dynamics	10
ENGR 3013	Engineering Science Project 1	10
ELEC 1001	Digital Systems 1	10
	Credit Points	**40**
Spring session		
MECH 4003	Mobile Robotics	10
ENGR 3014	Engineering Science Project 2	10
ELEC 2010	Power and Machines	10
Select one elective		10
Note: Elective units must be level 2 or higher		
	Credit Points	**40**
	Total Credit Points	**240**

Equivalent Subjects

The subjects listed below count towards completion of this program for students who passed these subjects in Autumn 2022 or earlier.

ENGR 1008 - Engineering Materials, replaced by PROC 1008 - Introduction to Materials Engineering

Mid-year intake

Course	Title	Credit Points
Year 1

ELEC 1006	Engineering Computing	10
BBus Professional Subject 1		10
BBus Professional Subject 2		10
BBus Major Subject 1		10
	Credit Points	**40**
Spring session		
ELEC 1003	Electrical Fundamentals	10
ENGR 1018	Fundamentals of Mechanics	10
BBus Major Subject 2		10
BBus Major Subject 3		10
	Credit Points	**40**
Year 3		
Autumn session		
MECH 2001	Kinematics and Kinetics of Machines	10
MECH 2003	Mechanics of Materials	10
ELEC 2001	Circuit Theory	10
ELEC 1001	Digital Systems 1	10
	Credit Points	**40**
Spring session		
MECH 3004	Dynamics of Mechanical Systems	10
ENGR 2001	Automated Manufacturing	10
ELEC 2010	Power and Machines	10
ELEC 2008	Microcontrollers and PLCs	10
	Credit Points	**40**
Year 4		
Autumn session		
MECH 3005	Mechanical Design	10
MECH 3001	Advanced Dynamics	10
ELEC 2004	Electronics	10
BBus Major Subject 4		10
	Credit Points	**40**
Spring session		
MECH 4003	Mobile Robotics	10
BBus Major Subject 5		10
BBus Major Subject 6		10
BBus Major Subject 7		10
Industrial Experience		
ENGR 3017	Industrial Experience (Engineering)	0
	Credit Points	**40**
Year 5		
Autumn session		
MECH 4004	Robotics	10
ENGR 4025	Final Year Project 1 (UG Engineering)	10
Business Professional Subject 3		10
Business Major Subject 8		10
	Credit Points	**40**
Spring session		
ENGR 4026	Final Year Project 2 (UG Engineering)	10
ELEC 3008	Instrumentation and Measurement	10
From Spring 2022 ELEC 3008 is replaced with ELEC 4009 Instrumentation and Measurement		
MECH 3006	Mechatronic Design	10

Business Professional Subject 4		10
	Credit Points	**40**
	Total Credit Points	**400**

Equivalent Subjects

The subjects listed below count towards completion of this program for students who passed these subjects in Autumn 2022 or earlier.

ENGR 1008 - Engineering Materials, replaced by PROC 1008 - Introduction to Materials Engineering

Replaced Subjects

The subjects listed below count towards completion of this program for students who passed these subjects in 2022 or earlier.

ELEC 3008 Instrumentation and Measurement, replaced by ELEC 4009 Instrumentation and Measurement

Mid-year intake

Course	Title	Credit Points
Year 1		
Spring session		
MATH 1016	Mathematics for Engineers 1	10

	Total Credit Points	**320**

Equivalent Subjects

The subjects listed below count towards completion of this program for students who passed these subjects in Autumn 2022 or earlier.

ENGR 1008 - Engineering Materials, replaced by PROC 1008 - Introduction to Materials Engineering

Major Structure 2024

This major structure applies to students who commenced in 2024 or later. If you commenced prior to 2024 please refer to the Structure 2022-23 tab for details.

This major is included in Bachelor of Engineering Science, Bachelor of Engineering (Honours), Bachelor of Engineering Advanced (Honours) and Bachelor of Engineering (Honours)/Bachelor of Business.

Please follow the recommended sequence for your program as noted below.

Bachelor of Engineering Advanced (Honours) (3771)

Qualification for this award requires the successful completion of 320 credit points which include the subjects listed below.

** **Electives** must be Level 2 or higher

Start-year intake

Course	Title	Credit Points
Year 1		
Autumn session		
MATH 1034	Mathematics for Engineers 1 (Advanced)	10
ENGR 1024	Introduction to Engineering Practice	10
ENGR 1047	Advanced Engineering Physics 1	10
ELEC 1006	Engineering Computing	10
	Credit Points	**40**
Spring session		
ELEC 1003	Electrical Fundamentals	10
MATH 1035	Mathematics for Engineers 2 (Advanced)	10
ENGR 1018	Fundamentals of Mechanics	10
ENGR 2023	Advanced Engineering Physics 2	10
	Credit Points	**40**
Year 2		
Autumn session		
ENGR 2035	Modern Digital Design and Development	10
MECH 2003	Mechanics of Materials	10
MECH 2001	Kinematics and Kinetics of Machines	10
ELEC 1001	Digital Systems 1	10
	Credit Points	**40**
Spring session		
ELEC 2009	Microprocessor Systems	10
MECH 3004	Dynamics of Mechanical Systems	10
ENGR 2001	Automated Manufacturing	10
Select one elective** or Minor subject		10
Students who fail to maintain a minimum GPA of 5.0 at the end of completion of 160 Credit Points, and again at the completion of 200 Credit points will be automatically transferred to the B. Engineering (Honours) (3740) program.		
	Credit Points	**40**
Year 3		
Autumn session		
MECH 3001	Advanced Dynamics	10
MECH 3005	Mechanical Design	10
PROC 2003	Materials Selection and Design	10
BUSM 2049	Creative and Innovative Thinkers	10
	Credit Points	**40**
Spring session		
MECH 3006	Mechatronic Design	10
ELEC 4009	Instrumentation and Measurement	10
ELEC 2008	Microcontrollers and PLCs	10
Select one elective** or Minor subject		10
Industrial Experience		
ENGR 3017	Industrial Experience (Engineering)	0
	Credit Points	**40**
Year 4		
Autumn session		
ENGR 4043	Advanced Engineering Thesis 1: Preliminary Investigations	20
MECH 4004	Robotics	10
Select one elective** or minor subject		10
	Credit Points	**40**
Spring session		
ENGR 4044	Advanced Engineering Thesis 2: Detailed Investigations	20
MECH 4003	Mobile Robotics	10
Select one elective** or Minor subjecs		10
	Credit Points	**40**
	Total Credit Points	**320**

Optional Electives

The following subject is an optional elective subject offered to students who are engaged in a School approved project. This subject can be taken during the third year of this program, however, permission is required to enrol in the subject.

Subject	Title	Credit Points
ENGR 3022	Special Technical Project	10

Equivalent Subjects

The subjects listed below count towards completion of this program for students who passed these subjects in 2023 or earlier.

BUSM 2047 Venture Makers Foundations, replaced by BUSM 2049 Creative and Innovative Thinkers

Mid-year intake

Course	Title	Credit Points
Year 1		
Spring session		
MATH 1034	Mathematics for Engineers 1 (Advanced)	10
ENGR 1018	Fundamentals of Mechanics	10
ELEC 1003	Electrical Fundamentals	10
ENGR 2023	Advanced Engineering Physics 2	10
	Credit Points	**40**
Autumn session		
MATH 1035	Mathematics for Engineers 2 (Advanced)	10
ELEC 1001	Digital Systems 1	10
ENGR 1047	Advanced Engineering Physics 1	10
ELEC 1006	Engineering Computing	10
	Credit Points	**40**
Year 2		
Spring session		
ELEC 2009	Microprocessor Systems	10
ELEC 2008	Microcontrollers and PLCs	10
ENGR 2001	Automated Manufacturing	10
Select one elective** or Minor subject		10
	Credit Points	**40**
Autumn session		
ENGR 2035	Modern Digital Design and Development	10
MECH 2003	Mechanics of Materials	10
ENGR 1024	Introduction to Engineering Practice	10
MECH 2001	Kinematics and Kinetics of Machines	10
Students who fail to maintain a minimum GPA of 5.0 at the end of completion of 160 Credit Points, and again at the completion of 200 Credit points will be automatically transferred to the B. Engineering (Honours) (3740) program.		
	Credit Points	**40**
Year 3		
Spring session		
MECH 3006	Mechatronic Design	10
Select one elective** or Minor subject		10
ELEC 4009	Instrumentation and Measurement	10
MECH 3004	Dynamics of Mechanical Systems	10
	Credit Points	**40**
Autumn session		
MECH 3001	Advanced Dynamics	10
MECH 3005	Mechanical Design	10
PROC 2003	Materials Selection and Design	10
BUSM 2049	Creative and Innovative Thinkers	10
Industrial Experience		
ENGR 3017	Industrial Experience (Engineering)	0
	Credit Points	**40**
Year 4		
Spring session		
ENGR 4043	Advanced Engineering Thesis 1: Preliminary Investigations	20
MECH 4003	Mobile Robotics	10
Select one elective** or Minor subject		10
	Credit Points	**40**
Autumn session		
ENGR 4044	Advanced Engineering Thesis 2: Detailed Investigations	20
MECH 4004	Robotics	10
Select one elective** or minor subject		10
	Credit Points	**40**
	Total Credit Points	**320**

Optional Electives

The following subject is an optional elective subject offered to students who are engaged in a School approved project. This subject can be taken during the third year of this program, however, permission is required to enrol in the subject.

Subject	Title	Credit Points
ENGR 3022	Special Technical Project	10

Equivalent Subjects

The subjects listed below count towards completion of this program for students who passed these subjects in 2023 or earlier.

BUSM 2047 Venture Makers Foundations, replaced by BUSM 2049 Creative and Innovative Thinkers

Bachelor of Engineering Science (3691)

This Major will be offered at Parramatta City and Penrith campuses.

Qualification for this award requires the successful completion of 240 credit points which include the subjects listed in the recommended sequences below.

Start-year intake

Course	Title	Credit Points
Year 1		
Autumn session		
ELEC 1006	Engineering Computing	10
ENGR 1011	Engineering Physics	10
ENGR 1024	Introduction to Engineering Practice	10
Select one of the following:		10
MATH 1021	Mathematics for Engineers Preliminary	
MATH 1016	Mathematics for Engineers 1	
Note: All students are required to enrol in MATH 1021 Mathematics for Engineers Preliminary first and undertake a readiness test at the beginning of their study.		
This test will be conducted at the beginning of the first semester of enrolment and the result will determine whether a student will remain in MATH 1021 Mathematics for Engineers Preliminary or be transferred by the School to MATH 1016 Mathematics for Engineers 1.		
The students who finish MATH 1021 Mathematics for Engineers Preliminary will then use this unit as an elective.		
	Credit Points	**40**
Spring session		
ENGR 1018	Fundamentals of Mechanics	10
PROC 1008	Introduction to Materials Engineering	10
ELEC 1003	Electrical Fundamentals	10
Select one of the following:		10
MATH 1016	Mathematics for Engineers 1	

MATH 1019	Mathematics for Engineers 2	
Note: Students who remained in MATH 1021 Mathematics for Engineers Preliminary during the first semester will be required to complete MATH 1016 Mathematics for Engineers 1 during second semester.		
These students must then complete MATH 1019 Mathematics for Engineers 2 during the Summer session.		
	Credit Points	**40**
Year 2		
Autumn session		
MECH 2001	Kinematics and Kinetics of Machines	10
MECH 2003	Mechanics of Materials	10
ELEC 2001	Circuit Theory	10
ENGR 3029	Specialisation Workshop 1	10
	Credit Points	**40**
Spring session		
MECH 3004	Dynamics of Mechanical Systems	10
ENGR 2001	Automated Manufacturing	10
ELEC 2008	Microcontrollers and PLCs	10
ENGR 3030	Specialisation Workshop 2	10
Industrial Experience		
ENGR 2033	Industrial Experience (Engineering Technologist)	0
	Credit Points	**40**
Year 3		
Autumn session		
MECH 3005	Mechanical Design	10
MECH 3001	Advanced Dynamics	10
ENGR 3013	Engineering Science Project 1	10
ELEC 1001	Digital Systems 1	10
	Credit Points	**40**
Spring session		
MECH 4003	Mobile Robotics	10
ENGR 3014	Engineering Science Project 2	10
Select two electives		20
Note: Elective subjects must be level 2 or higher		
	Credit Points	**40**
	Total Credit Points	**240**

Mid-year intake

Course	Title	Credit Points
Year 1

Bachelor of Engineering (Honours) (3740)

Qualification for this award requires the successful completion of 320 credit points which include the subjects listed in the recommended sequences below.

** **Electives** must be Level 2 or higher (An exception applies for students completing MATH 1021 Mathematics for Engineers Preliminary. This subject will then count as one of the elective subjects)

Start-year intake

Course	Title	Credit Points
Year 1		
Autumn session		
ELEC 1006	Engineering Computing	10
ENGR 1011	Engineering Physics	10

Robotics and Mechatronics, Testamur Major (T037)

Western Sydney University Major Code: T037

Previous Codes: KT3127.1, KT3158.1, KT3163.1, KT7003.1

Available to students in other Western Sydney University programs?
No

This major provides the skills necessary for the design of smart machines of all types: cruise control in automobiles, pilotless spacecraft, automated factories and medical telerobotics. The major, accompanied by an extensive and integrated hands-on laboratory program, is essentially concerned with the design of intelligent mechanical systems and automation, and includes the study of robotics, computer control, automated manufacturing, microprocessor applications and machine design. Graduates in the major acquire the combined skills of mechanical and computer/electrical engineering that are needed in leading-edge industries such as aerospace systems, the car industry, automation and robotic applications, biomedical engineering, laser systems, and building materials manufacture.

Associate Degree in Engineering

Major Structure

Students must complete three units as follows

Subject	Title	Credit Points
Select at least one of the following subjects:		
MECH 2002	Kinematics and Kinetics of Machines (WSTC AssocD)	10
MECH 2004	Mechanics of Materials (WSTC AssocD)	10

Choose either one or two of the following subjects depending on how many subjects have been completed from the list above.		
ELEC 2002	Circuit Theory (WSTC AssocD)	10
ELEC 1002	Digital Systems 1 (WSTC AssocD)	10
ELEC 2005	Electronics (WSTC AssocD)	10
MATH 1020	Mathematics for Engineers 2 (WSTC AssocD)	10

Please note: Offerings of alternate units are dependent on there being sufficient student enrolment numbers. If enrolments are low, the College may cancel delivery of the alternate unit.

Bachelor of Engineering (Honours)

Major Structure

Qualification for this award requires the successful completion of 320 credit points, which include the subjectsj listed in the recommended sequence below.

* All students undertaking the Bachelor of Engineering (Honours) are required to enrol in MATH 1021 Mathematics for Engineers Preliminary and undertake a readiness test at the beginning of their study.

The readiness test will be conducted at the beginning of the first semester of enrolment and the result will be used to determine whether a student will remain in MATH 1021 Mathematics for Engineers Preliminary or be transferred by the School to MATH 1016 Mathematics for Engineers 1

Students remaining in MATH 1021 Mathematics for Engineers Preliminary will be required to complete MATH 1016 Mathematics for Engineers 1 during second semester and will be encouraged to complete MATH 1019 Mathematics for Engineers 2 during the Summer session.

Screen Media, Major (0268)

Western Sydney University Major Code: 0268

Previous Code: M1135.1

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

The Screen Media major provides students with fundamental skills and knowledge in screen media. Areas of study include the exploration of different screen genres and approaches, practical hands-on experience creating commercial, narrative and documentary projects, enhancing screen content using animation and visual effects, plus the application of immersive augmented/virtual reality. This major enables professional communicators to effectively create impactful content in a range of diverse industries (for example within a corporation or for their own business, or within a Public Relations/Advertising Agency).

Location

Campus	Mode	Advice
Parramatta Campus - Victoria Road	Internal	Jacki Montgomery (https://directory.westernsydney.edu.au/search/email/j.montgomery@westernsydney.ed

Major Structure

Students must complete 80 credit points, with at least 30 credit points at Level 3, as follows.

Please note the Screen Media program is currently being enhanced and further details will be available in due course. Subjects under development are not yet accessible by hyperlink.

Creative Industries Students

Note: Creative Industries students must complete either COMM 1015 Foundations of Media Arts and Production or COMM 1039 Introduction to Screen Media prior to enrolling in the Screen Media major.

Secondary Ancient History Education, Major (0352)

Effective from: Spring 2024
Western Sydney University Major Code: 0352

Available to students in other Western Sydney University programs?
No

The Secondary Ancient History Education Major will provide students with 60 credit points of Ancient History discipline knowledge and 20 credit points of Ancient History pedagogy and curriculum knowledge. Together with completion of subjects in the Bachelor of Education (Secondary), this Major will enable students to meet requirements to graduate from the Bachelor of Education (Secondary) with the Ancient History teaching area. The Secondary Ancient History Education Major will span the Foundation and Development phases of the Bachelor of Education (Secondary), enabling students to develop strong pedagogical content knowledge, an understanding of evidence-based pedagogies, and skills in using assessment and feedback to guide and enhance student learning.

Secondary Education, Major (0272)

Western Sydney University Major Code: 0272

Previous Code: M1133.1

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

Students in the Secondary Education Major will study subjects that deal with educational concepts such as sustainability, creativity, social justice and adolescent development. These subjects are broadly structured for students to investigate and critique contemporary education issues. Students will study the first four subjects of the Master of Teaching (Secondary). This major facilitates a transition into a Master of Teaching postgraduate qualification in Secondary Teaching.

Penrith Campus	Internal	Jaydene Barnes (https://directory.westernsydney.edu.au/search/email/j.barnes@westernsydney.edu.au/)

Major Structure

Students must successfully complete 80 credit points as per the recommended sequence below.

All subjects in this major are 10 credit points and are arranged in two pools:

- the Education Studies Learning in Context Pool Subjects (Levels 1, 2 and 3), and
- the (Level 7) Master of Teaching (Secondary) Subjects.

Students must complete 10 credit points at Level 1 and at least 30 credit points at Level 3 or higher.

Subject	Title	Credit Points
Education Studies Learning in Context Pool Subjects		
Students must complete at least four subjects: one subject at Level 1 and three subjects at Level 2 or 3 or higher (a minimum of 30 credit points at level 3 is required overall for this major).		
Level 1 subject		
Students must complete the following Level 1 subject		
HUMN 1013	Contextualising Indigenous Australia (Day Mode)	10
Level 2 subjects		
TEAC 2017	Education and Transformation	10
TEAC 2018	Education for Sustainability	10
TEAC 2037	Learning and Creativity	10
TEAC 2009	Contemporary Childhoods	10
TEAC 2065	Digital Childhoods	10

The Secondary Modern History Education Major will provide students with 60 credit points of Modern History discipline knowledge and 20 credit points of Modern History pedagogy and curriculum knowledge. Together with completion of subjects in the Bachelor of Education (Secondary), this Major will enable students to meet requirements to graduate from the Bachelor of Education (Secondary) with the Modern History teaching area. The Secondary Modern History Education Major will span the Foundation and Development phases of the Bachelor of Education (Secondary), enabling students to develop strong pedagogical content knowledge, an understanding of evidence-based pedagogies, and skills in using assessment and feedback to guide and enhance student learning.

Secondary PDHPE Education (Further Studies), Major (0357)

Effective from: Spring 2024
Western Sydney University Major Code: 0357

Available to students in other Western Sydney University programs?
No

The Secondary PDHPE Education (Further Studies) Major (0357) is designed to enhance the discipline knowledge of 1939 BEd (Secondary) students intending to graduate with PDHPE as a single teaching area. Only students concurrently registered in the Secondary PDHPE Education Major (0356) may take this further studies major as it does not meet NESA requirements for PDHPE teaching when taken separately. Students will have opportunities to expand their PDHPE knowledge and skills through further studies in the areas of community, family, and early childhood, as well as physical activity, sports, lifestyle, and recreation.

Secondary Teaching, Major (0164)

Western Sydney University Major Code: 0164

Previous Code: M1134.1

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

The Secondary Teaching major is comprised of the four initial subjects from the Master of Teaching (Secondary) or three subjects from the Master of Teaching (Secondary) STEM. These subjects are broadly structured for students to investigate the underlying principles and concepts in adolescent development, diversity and social justice, skills in the design of learning experiences along these principles, and putting their application into practice. Available to all students in a Pathway to Teaching (Secondary) degree, enrolment is dependent on the successful completion of 160 credit points in the undergraduate program. Students are also offered the flexibility to study subject content subjects in either Modern History, Geography and Urban Studies, Mathematics, Studies of Religion or English to form their second teaching area. This major, together with a Business major articulates into a Master of Teaching postgraduate qualification in Secondary Teaching, and leads to opportunities for employment across Australia as well as internationally.

Major Structure 2023

This structure applies to students who commenced in 2023 or prior. If you commenced in 2024 or later, please refer to the relevant Structure tab for details.

Students must successfully complete 80 credit points as per the recommended sequence below.

All subjects in this major are 10 credit points and are arranged in pools of which the Secondary Teaching Pool is mandatory.

Students have a choice of either History and Political Thought, Geography and Urban Studies, Mathematics, Studies of Religion or English, as shown below.

Subject	Title	Credit Points
Students must complete the following four compulsory core subjects		
Secondary Teaching Pool		

IMPORTANT NOTE: Students must have successfully completed 160 credit points before enrolling in any of the following four post graduate subjects.

TEAC 7161	Educational Psychology for Learning and Teaching	10
TEAC 7032	Diversity, Social Justice and Schooling	10
TEAC 7160	Literacy and Numeracy for Secondary Teaching	10
TEAC 7108	Professional Practice Community Engagement	10
Total Credit Points		**40**

Students must then choose one of the following five areas

1. History and Political Thought or
2. Geography and Urban Studies or
3. Mathematics or
4. Studies of Religion or
5. English

See the below links for structure details.

History and Political Thought

Subject	Title	Credit Points
Important Note: To meet NESA subject area teaching requirements students who aim to qualify as modern history teachers must complete one subject of Ancient History. This may be attained by completing one of the following subjects: HUMN 2067 History of the Ancient World, HUMN 2011 Ancient Western Culture: Periclean Athens, or HUMN 3020 Catastrophe: The Environmental History of the Ancient and Modern World. It is also strongly recommended that students select at least one Australian history subject.		
Not all subjects will be offered each year. Subjects will be offered on a rotational basis.		
Students must complete one of the following:		10
HUMN 1054	When Worlds Collide: European Empires and the World, c.1600-1950	
HUMN 1039	Modern European History and Politics	
Students must then complete three subjects from the following pool:		30
HUMN 2067	History of the Ancient World	
HUMN 2001	A History of Modern Global Buddhism	
HUMN 2011	Ancient Western Culture: Periclean Athens	
LANG 2015	Cultural History of Books and Reading	
HUMN 2034	Keeping the Past	
HUMN 3093	War	
HUMN 3013	Australian Colonial History	
HUMN 3109	Catastrophe: The Environmental History of the Ancient World	
HUMN 3026	Convicts and Settlers - Australian History 1788 - 1840	
HUMN 3087	Twentieth Century Australia	
HUMN 3104	Historical Methodologies	
HUMN 3092	WWII in Asia and the Pacific	
HUMN 3024	Comparative Nationalism	
HUMN 3036	Ethics in Historical Perspective	
HUMN 3015	Australian History Around Us	
Total Credit Points		**40**

Geography and Urban Studies

Subject	Title	Credit Points
Students must complete the following subjects:		
ENVL 2001	Analysis of Spatial Data	10
ENVL 3006	Transport, Access and Equity	10
Students must then complete two subjects from the following pool:		20
HUMN 1008	Cities: Introduction to Urban Studies	
HUMN 2018	Cultural and Social Geographies	
HUMN 2053	The Economics of Cities and Regions	
HUMN 3041	Geographies of Migration	
Total Credit Points		**40**

Mathematics

Subject	Title	Credit Points
Students must complete the following for subjects:		
MATH 1014	Mathematics 1A	10
MATH 1015	Mathematics 1B	10
MATH 2001	Advanced Calculus	10
MATH 2010	Linear Algebra	10
Total Credit Points		**40**

Studies of Religion

Subject	Title	Credit Points
Students must complete at least one of the following subjects:		10
HUMN 3075	Sociology of Religion	
PHIL 3016	Philosophy of Religion	
HUMN 3105	History of Religion	
Students must then complete three additional subjects. Additional subjects to complete the minor can be chosen from the above three subjects or from the pool subjects listed below		30
HUMN 1061	Islam: Past, Present and Future	
HUMN 2031	Islam in the Modern World	
HUMN 2001	A History of Modern Global Buddhism	
HUMN 3047	History of Muslim Civilisations and Ideas	
HUMN 3061	Mystical Islam: The Emergence of Sufism in World History	
Total Credit Points		**40**

English

Subject	Title	Credit Points
Students must complete the following two subjects:		20
COMM 1004	Approaches to Text	
LANG 1015	Introduction to Literary Studies	
Students must then complete two subjects from the following pool:		20
LANG 2035	Methods of Reading	
LANG 3094	The Value of Literature	
HUMN 2044	Representing Everyday Life in Literary and Visual Cultures	
LANG 3019	Children's and Young Adult Fiction	
LANG 3086	The Novel	
COMM 2020	Introduction to Film Studies	
Total Credit Points		**40**

Equivalent Subject

Secondary Teaching, Testamur Major (T119)

Western Sydney University Major Code: T119

Previous Code: MT3041.1

Available to students in other Western Sydney University programs?
No

There is a high demand for mathematics teachers throughout Australia, with Western Sydney identified as a particular high-demand location by the NSW Department of Education. Building on the Bachelor of Mathematics, this major equips graduates with additional knowledge and skills in contemporary educational concepts. After completing the Bachelor of Mathematics (Secondary Education), graduates can enrol in a postgraduate course to become accredited teachers. The core subjects of the Bachelor of Mathematics meet the NESA requirements for Mathematics as a first teaching area, and students can choose elective subjects to qualify for another teaching area to gain additional options for employment.

Social Ecology, Minor (0215)

Western Sydney University Minor Code: 0215

Previous Code: SM1068.1

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

The Social Ecology minor explores the rich diversity of relationships between the individual, society and environment. Social Ecology embraces a transdisciplinary approach to learning emphasising reflective thinking, criticality, creativity, participation and communication. Students develop skills in ecologically informed analysis, creative thinking and action, social and environmental relationships and transformative education with an emphasis on sustainability, social change and leadership. The minor in Social Ecology is available as an elective package to students across all degrees. Students may also choose any Social Ecology subject as a single elective.

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

Social media is the pulse of the world. Analysing the enormous amount of data generated by such sites as Facebook, Twitter and Linkedin can be used to inform business decisions and understand how and why society reacts to certain situations. This minor will introduce the statistical methods needed to analyse the data from these sites so that businesses are able to use the customer feedback received about their products to inform their business strategy and the impact social media has on society.

A minor in Social Research provides students with training in the methods and theories of social research for their application to social issues and social policy. In addition to interviewing and observation skills, quantitative analysis, spatial analysis, and Indigenous methodologies, the minor offers students the opportunity to apply these skills across a range of themes including ethnography, ethnicity and migration, urban planning and criminology. A Bachelor of Social Science with a minor in Social Research will prepare students for both employment and/or a research higher degree.

Sociology, Major (0030)

Western Sydney University Major Code: 0030

Previous Code: M1073.1

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

The major in Sociology provides students with a thorough training in the methods, theories and select leading areas of contemporary sociology. As well as subjects in which methods and theories are taught, through the social science core, students enrolled in the Sociology major will have opportunities to study a number of particular themes from a sociological perspective, including inequalities, deviance, identities, gender, religion, medicine and health care, ethnicity and migration, and the family, among other possibilities. A Bachelor of Social Science (BSS) with a major in Sociology will prepare students for both employment and a research higher degree.

This minor covers theories and technologies used for the development of software. Students will better understand the development processes related to each phase of the software development life-cycle. In addition, they will identify, analyse, and formulate solutions to real-world problems in the software development domain.

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

In this major, students learn how to create high quality software to meet client needs. This involves applying the theories and practices of software development to determine requirements, design and deliver solutions. In this software development lifecycle process, students use a range of technologies, and programming skills used for the development of software systems and distributed applications. In addition, students develop the ability to identify, analyse, and formulate solutions to real-world problems in the software development domain. In devising these solutions students also consider principles associated with user interface design, professional and ethical issues, in particular those relating to security and privacy of user data and user behaviour related to software development and associated applications.

Software Engineering, Testamur Major (T105)

Western Sydney University Major Code: T105

Previous Code: KT3175.1

Available to students in other Western Sydney University programs?
No

A major in Software Engineering provides a solid foundation in theoretical knowledge on computer software systems with practical acquisition of relevant industry skills. The program examines the processes of software design, development and maintenance. It also covers software specification, analysis, design, testing, implementation and maintenance.
This major is designed in response to the growing demand for innovative, reliable and efficient software systems which are utilised in a broad field of industries. The program is offered inside an industry hub which provides students with direct access and firsthand experience with these industries.

Previous Code: SM1133.1

Available to students in other Western Sydney University Programs: Yes, however the following restrictions apply.

Please note: this major is **not** available to students enrolled in programs 1659 Bachelor of Music, 1738 Bachelor of Music (Dean's Scholars) and 1841 Bachelor of Music/Bachelor of Creative Industries.

The Sound Production minor equips students with fundamental skills and knowledge of current practice in music production, sound design, new electronic media, interactive electronic media, and their applications to music performance and composition. Two foundation level subjects present an overview of the basic concepts and practical applications of electronic and digital music technology to music production and sound design in current music and media arts practice. The minor's final two subjects build on this foundational knowledge, offering progressively more challenging instruction in music technology and its applied contexts. In these subjects, students will undertake self-directed technology-based projects as sound designers, composers and performers.

Sport Development, Minor (0254)

Western Sydney University Minor Code: 0254

Previous Code: SM4006.1

Available to students in other Western Sydney University programs? No

The Sport Development minor offers an introduction to knowledge and skills associated with the sport and recreation industry. Students will focus on and further develop in areas associated with physical activity, exercise, sport coaching, sociology, community development and sport management. Subjects are taken from the School of Health Science and School of Business and as such students will be expected to travel to alternative campus'. The minor is recommended as a complementary study for students in the 4656 Bachelor of Health Science program.

Previous Code: MT2036.1

Available to students in other Western Sydney University programs?
No

The Sport Management major is designed for people who seek careers in Australian and international Sport management. Specialist subjects provide students with a capacity to understand and function within the increasingly dedicated context in which sport is played, organised and managed. Students who complete this major will be equipped with the skills and knowledge to manage sport experiences pertaining to globalisation and emerging contemporary issues in sport. Graduates find career employment at all levels of government as well as within the private sector for both commercial and non-commercial organisations. Positions include project management of facilities and events, management and coordination of leisure, sport and civic event departments, sport marketing, player management and sport public relations, elite sport development, sport and leisure programming.

Major Structure 2022

If you commenced in 2023 or later please refer to the Structure 2023 tab for details.

Qualification for this major requires the successful completion of 80 credit points including all of the core subjects listed below.

Core Subjects for this Major

Subject	Title	Credit Points
BUSM 3008	Developing Sport Professionals	10
BUSM 3053	Our Sporting Future	10
BUSM 3064	Service Industry Analytics	10
BUSM 3065	Special Event Management	10
BUSM 2045	Sport and Society	10
BUSM 2037	Sport Entertainment	10
BUSM 3070	Strategic Sport Leadership	10
BUSM 1031	The World of Sport Business	10
Total Credit Points		**80**

Professional Subjects for Careers in Markets

Students undertaking the Sport Management major are advised to take the following four subjects to satisfy the requirements for their professional core:

Subject	Title	Credit Points
BUSM 3006	Design Thinking for Creativity	10
SPRT 3014	Sport Management Applied Project	10
MATH 1030	Statistics for Business	10
BUSM 2040	The Service Enterprise	10
Total Credit Points		**40**

Equivalent Subjects

The subject listed below counts towards completion of this major for students who passed this subject in 2020 or earlier.

BUSM 3068 Sport and Society, replaced by BUSM 2045 Sport and Society

Replaced Subjects

The subjects listed below counts towards completion of this major for students who passed these subject in 2022 or earlier.

BUSM 2045 Sport and Society, replaced by BUSM 2048 Sports Marketing from 2023.

BUSM 3053 Our Sporting Future, replaced byBUSM 3083 Global Sports Management from 2023.

BUSM 3064 Service Industry Analytics, replaced by MKTG 1011 Fundamentals of Marketing Analytics from 2023.

Recommended Sequence 2022

If you commenced in 2023 or later please refer to the Sequence 2023 tab for details.

Qualification for the award of Bachelor of Business with a major in Sport Management requires the successful completion of 240 credit points as per the recommended sequence below.

STEM, Testamur Major (T135)

Western Sydney University Major Code: T135

Available to students in other Western Sydney University programs?
No

The Master of Education, STEM testamur major is designed for teachers seeking to enhance their knowledge in science, technology, engineering and mathematics, and their capacity to plan, deliver and evaluate effectively integrated STEM learning experiences. Students will develop specialised skills to enable them to critically analyse, reflect on and synthesise multi-disciplinary approaches to STEM teaching, drawing on appropriate theoretical knowledge, allowing them to plan and deliver exemplary practice in STEM teaching. Students will also gain the skills required to be STEM leaders in schools, developing, enacting and evaluating interdisciplinary curriculum reform for the future.

Studies of Religion, Minor (0200)

Western Sydney University Minor Code: 0200

Previous Code: SM1136.1

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

Studies of Religion is a multidisciplinary minor that provides a critical study of religion that is inclusive and diverse. Students will have the opportunity to develop their understanding of religion and explore the significance of religion to people and society. The minor includes subjects from history, philosophy and sociology. It examines the nature of religion and belief systems, including the influence, expression and relevance of religion and belief systems to contemporary Australia. This minor meets NSW Education Standards (NESA) content requirements for students who wish to teach Studies of Religion in NSW Secondary Schools. The skills and knowledge acquired can also be used for career pathways in the public sector, teaching, research, curating, law or politics.

Minor Structure

To complete a minor in Studies of Religion, students are required to successfully complete 40 credit points as follows.

Note: Not all subjects will be offered each year. Subjects will be offered on a rotational basis. Not all subjects will be available on all campuses.

Students must complete at least one of the following subjects.

Subject	Title	Credit Points
HUMN 3075	Sociology of Religion	10
PHIL 3016	Philosophy of Religion	10
HUMN 3105	History of Religion	10

Additional subjects to complete the minor can be chosen from the above three subjects or from the pool subjects listed below.

Subject	Title	Credit Points
Level 1 Subject Pool		
HUMN 1061	Islam: Past, Present and Future	10
Level 2 Subject Pool		
HUMN 2001	A History of Modern Global Buddhism	10
HUMN 2031	Islam in the Modern World	10
Level 3 Subject Pool		
HUMN 3047	History of Muslim Civilisations and Ideas	10
HUMN 3115	Medieval Europe from the Fall of the Roman Empire to the Reformation	10
HUMN 3061	Mystical Islam: The Emergence of Sufism in World History	10

Equivalent subject

The subject listed below counts towards completion of this minor for students who passed the subject in 2020 or earlier.

HUMN 1047 - Understanding Islam and Muslim Societies, no longer offered.
HUMN 2043 - Religion and the Origins of Modern Science, no longer offered.

Sustainability Engineering, Testamur Major (T129)

Western Sydney University Major Code: T129

Previous Code: MT3050.1

Available to students in other Western Sydney University programs?
No

Engineers are leaders in developing novel approaches to solving the biggest challenges faced by environmental and interrelated systems. In this Major, students assess the impact of industrial development then propose design solutions using holistic, futuristic and sustainable technologies and strategies. Through hands-on, real-life projects, students explore solutions that integrate technical, technological (IoT), social, cultural, geographical, regulatory and ethical factors particularly in relation to water, air and land. This major will benefit students aiming for careers such as Environmental Engineer/Scientist/Consultant, Natural Resources Manager, Waste Engineer/Manger/ Consultant, and Sustainability Engineer/ Manager/ Consultant. All students complete a mandatory industrial placement.

Recommended Sequence 2022-23

If you commenced in 2024 or later please refer to the Sequence 2024 tab for details.

This major is included in Bachelor of Engineering Science, Bachelor of Engineering (Honours), Bachelor of Engineering Advanced (Honours) and Bachelor of Engineering (Honours)/Bachelor of Business.

Please follow the recommended sequence for your course as noted below.

Select the link for your program below to see details of the major

Bachelor of Engineering (Honours)

Qualification for this award requires the successful completion of 320 credit points, which include the subjects listed in the recommended sequence below.

*** All students undertaking the Bachelor of Engineering (Honours) are required to enrol in** MATH 1021 Mathematics for Engineers Preliminary **and undertake a readiness test at the beginning of their study.**

The readiness test will be conducted at the beginning of the first semester of enrolment and the result will be used to determine whether a student will remain in MATH 1021 Mathematics for Engineers Preliminary or be transferred by the School to MATH 1016 Mathematics for Engineers 1.

Students remaining in MATH 1021 Mathematics for Engineers Preliminary will be required to complete MATH 1016 Mathematics for Engineers 1 during second semester and will be encouraged to complete MATH 1019 Mathematics for Engineers 2 during the Summer session.

	Credit Points	**40**
	Total Credit Points	**400**

Replaced Subjects

The subjects listed below count towards completion of this program for students who passed these subjects in 2023 or earlier.

CIVL 3020 Sustainable Waste Engineering, replaced by CIVL 4021 Sustainable Waste Engineering

Bachelor of Engineering Science

Qualification for this award requires the successful completion of 240 credit points, which include the subjects listed in the recommended sequence below.

*** All students undertaking the Bachelor of Engineering Science are required to enrol in** MATH 1021 Mathematics for Engineers Preliminary **and undertake a readiness test at the beginning of their study.**

The readiness test will be conducted at the beginning of the first semester of enrolment and the result will be used to determine whether a student will remain in MATH 1021 Mathematics for Engineers Preliminary or be transferred by the School to MATH 1016 Mathematics for Engineers 1.

Students remaining in MATH 1021 Mathematics for Engineers Preliminary will be required to complete MATH 1016 Mathematics for Engineers 1 during second semester and will be encouraged to complete MATH 1019 Mathematics for Engineers 2 during the Summer session.

Students who finish MATH 1021 Mathematics for Engineers Preliminary will then use this subject as an elective.

Start-year intake

Course	Title	Credit Points
Year 1		
Autumn session		
ENGR 1011	Engineering Physics	10
ENGR 1050	Sustainable Engineering Fundamentals	10
ENGR 1024	Introduction to Engineering Practice	10
Select one of the following:		10
MATH 1021	Mathematics for Engineers Preliminary	
MATH 1016	Mathematics for Engineers 1	
	Credit Points	**40**
Spring session		
ENGR 1018	Fundamentals of Mechanics	10
ELEC 1003	Electrical Fundamentals	10
Select one elective		10
• Elective can be any Level for Year 1

	Total Credit Points	**240**

Replaced Subjects

The subjects listed below count towards completion of this program for students who passed these subjects in 2023 or earlier.

CIVL 3020 Sustainable Waste Engineering, replaced by CIVL 4021 Sustainable Waste Engineering

Major Sequence 2024

This major sequence applies to students who commenced in 2024 or later. If you commenced prior to 2024 please refer to the Sequence 2022-23 tab for details.

This major is included in Bachelor of Engineering Science, Bachelor of Engineering (Honours), Bachelor of Engineering Advanced (Honours) and Bachelor of Engineering (Honours)/Bachelor of Business.

Please follow the recommended sequence for your program as noted below.

Bachelor of Engineering (Honours) (3740)

Qualification for this award requires the successful completion of 320 credit points, which include the subjects listed in the recommended sequence below.

*** All students undertaking the Bachelor of Engineering (Honours) are required to enrol in** MATH 1021 Mathematics for Engineers Preliminary **and undertake a readiness test at the beginning of their study.**

The readiness test will be conducted at the beginning of the first semester of enrolment and the result will be used to determine whether a student will remain in MATH 1021 Mathematics for Engineers Preliminary or be transferred by the School to MATH 1016 Mathematics for Engineers 1.

Students remaining in MATH 1021 Mathematics for Engineers Preliminary will be required to complete MATH 1016 Mathematics for Engineers 1 during second semester and will be encouraged to complete MATH 1019 Mathematics for Engineers 2 during the Summer session.

** **Electives** must be Level 2 or higher (An exception applies for students completing MATH 1021 Mathematics for Engineers Preliminary. This subject will then count as one of the elective subjects)

Bachelor of Engineering Science (3691)

Qualification for this award requires the successful completion of 240 credit points, which include the subjects listed in the recommended sequence below.

*** All students undertaking the Bachelor of Engineering Science are required to enrol in** MATH 1021 Mathematics for Engineers Preliminary **and undertake a readiness test at the beginning of their study.**

The readiness test will be conducted at the beginning of the first semester of enrolment and the result will be used to determine whether a student will remain in MATH 1021 Mathematics for Engineers Preliminary or be transferred by the School to MATH 1016 Mathematics for Engineers 1.

Students remaining in MATH 1021 Mathematics for Engineers Preliminary will be required to complete MATH 1016 Mathematics for Engineers 1 during second semester and will be encouraged to complete MATH 1019 Mathematics for Engineers 2 during the Summer session.

Students who finish MATH 1021 Mathematics for Engineers Preliminary will then use this subject as an elective.

Sustainability, Tourism and Environment, Major (0305)

Western Sydney University Major Code: 0305

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

This major combines subjects from the social and environmental sciences to prepare students for careers that ensure tourism, leisure and recreation activities take place in a sustainable way. The natural environment is a key component of leisure, recreation, and tourism experiences, especially in Australia. However, these activities can have significant ecological impacts. In this major, students will learn how to identify, assess, and manage these environmental impacts. The major will also look at how the visitor economy can contribute toward ecological conservation, and addressing major global issues such as climate change, deforestation, poverty, inequality and pollution.

Major Structure

Students must complete 80 credit points.

Complete the following compulsory subjects

Subject	Title	Credit Points
TOUR 3004	Destination Management	10
ENVL 2009	Ecosystem Restoration	10
TOUR 1003	Global Trends in Tourism and Events	10
ENVL 1004	Introduction to Environmental Science	10
BIOS 1027	Management of Aquatic Environments	10
TOUR 2003	Managing Sustainable Places	10
EART 3006	Science of the Anthropocene	10
Total Credit Points		**70**

Students must also complete one subject from the following pool.

Subject	Title	Credit Points
Select one of the following:		10
ENVL 2008	Australian Ecosystems: Threats and Solutions	
ENVL 2010	Conservation Priorities and Process	
ENVL 2007	Environmental Monitoring and Assessment	
HUMN 2073	Issues in Contemporary Heritage	
TOUR 3005	Tourism Policy and Planning	
Total Credit Points		**10**

Equivalent Subjects

The subject listed below counts towards completion of this program for students who passed this subject in 2022 or earlier.

SPRT 2011 - Sustainability, Tourism and Place, replaced by TOUR 2003 Managing Sustainable Places

BUSM 3007 Destination Management, replaced by TOUR 3004 Destination Management

BUSM 3073 Tourism Policy and Planning, replaced by TOUR 3005 Tourism Policy and Planning

TOUR 2001 Issues in Contemporary Heritage, replaced by HUMN 2073 Issues in Contemporary Heritage

TOUR 1002 - Tourism and Global Trends, replaced by TOUR 1003 Global Trends in Tourism and Events

Related Programs

Bachelor of Tourism and Event Management (1916) (p. 625)

Sustainable Business, Major (0249)

Western Sydney University Major Code: 0249

Previous Code: SP2010.1

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

Students undertaking this major will gain skills and knowledge to act on sustainability and social responsibility issues in business recognising the need for financial and business solutions to maintain a competitive edge. Acting on these issues, students enhance critical thinking and problem solving skills, justifying solutions and aligning with the principles of UN SDGs for complex and challenging scenarios that also address social and environmental concerns. Through business projects and research tasks, students build ethical and responsible characteristics, create innovative strategy, and develop skills in judgement, scenario planning and creativity for business environmental management.

Sustainable Development, Major (0163)

Western Sydney University Major Code: 0163

Previous Code: M1107.1

Available to students in other Western Sydney University programs? No

This major is available to students enrolled in the program Bachelor of Business (p. 158) from 2016. Sustainable development balances the need for development with the need to respect cultures, society, community and the environment. This major is an external major for Bachelor of Business students. Students will examine processes of development and the mechanisms to ensure that development is socially and environmentally sustainable.

Sustainable Environmental Futures, Testamur Major (T120)

Western Sydney University Major Code: T120

Previous code: MT3043.1

Available to students in other Western Sydney University programs? No

This major is available as an elective in Bachelor of Science 3754, and an elective major option in Bachelor of Medical Science 3755. See the related programs tab for more information.

Please note, the BSc Major Environmental Health T076, BSc Adv 3757, Bachelor of Science (Pathway to Teaching Primary/Secondary)

3756 & BMedSc Adv 3758, do not have sufficient Flexible space to accommodate a second/elective Major.

Managing our environment sustainably requires professionals who are trained in new technologies across multiple disciplines, including biological and physical sciences, risk assessment, policy and management. Understanding how life interacts with water, soil and the atmosphere empowers us to develop sustainable management solutions for our most pressing environmental challenges. You will learn how to apply fundamental scientific knowledge to evaluate and mitigate the impacts of human activities on natural and managed ecosystems, including the built environment. You will have access to world class ecological and environmental research facilities, and will engage in hands-on, field-based learning, taught by a team at the cutting edge of research in this field. As a graduate, you are prepared for a career in environmental management, consultancy and biological conservation. All students must complete 60 credit points of study at Level 3 to meet course requirements. Students will need to select at least 10 credit points of elective study at Level 3 to meet this requirement.

Location

Campus	Mode	Advice

Sustainable Tourism and Visitor Economies, Major (0320)

Western Sydney University Major Code: 0320

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

Tourism and travel are among the world's largest industries, accounting for a quarter of global employment growth and more than 10% of the world's GDP (World Travel and Tourism Council, 2021). This major provides students with the knowledge and skills to work in a variety of managerial, operational, policy and planning roles in the tourism and heritage sectors. The major has a strong focus on sustainability, culture and innovation, to prepare students to address current and emerging issues in the sectors. Students are provided with opportunities to complete fieldtrips, applied projects and to learn directly from industry and government experts

Sustainable Water Futures, Testamur Major

Sustainable Water Futures, Testamur Major (T152)

Western Sydney University Major Code: T152

Sustainable Water Futures, Testamur Major

Available to students in other Western Sydney University Programs: Yes, however the following restrictions apply.

Must be enrolled in a Post Graduate program

The right to safe drinking water and sanitation is an internationally recognized human right and integral to the realization of other human rights. Efficient water management will be key to this in the future as well as providing adequate food, health and well-being, and preserving our natural environments and ecosystems. This specialisation uses a transdisciplinary approach to developing sustainable solutions to current problems with water resourcing and to equip graduates with the tools to tackle future difficulties in water management. It is expected that upon completion of the program students will have the cognitive, technical and critical thinking skills to analyse issues and articulate appropriate solutions in the complex field of water sustainability. A capstone subject involving either a research or professional industry project will allow students to integrate their knowledge and skills developed throughout the program.

Available to students in other Western Sydney University programs?
No

This major aims to develop graduates with sound skills in the discipline of programming. The focus is on programming at the level of system calls to the underlying operating system and many of the subjects use the industry standard language for systems programming, namely C/C++, as the vehicle of instruction. There is a strong emphasis on the development of highly efficient and reliable code that can provide support services for higher level application oriented programs, as well as the development of programs suitable for systems administration and management. Practical work utilises the Unix environment. This major is appropriate where a career in systems programming or systems administration is planned, or where the student wishes to develop advanced systems programming skills.

Technology Entrepreneurship, Major (0261)

Western Sydney University Major Code: 0261

Previous Code: M3126.1

Available to students in other Western Sydney University programs?
No

The Technology Entrepreneurship major is focused on guiding students through all stages of turning their innovative idea into a start-up company. In an entrepreneurial ecosystem, you will learn the knowledge and techniques for opportunity discovery, impact analysis, customer analysis, strategic team-building and leadership, the psychology and ethics of the start-up, funding modelling and financial analysis, growth and exit strategies. We will be helping you with defining your idea, forming a team around it, building a prototype, developing a pitch for investors and running a start-up company.

Telecommunications Engineering, Minor (0338)

Western Sydney University Minor Code: 0338

Available to students in other Western Sydney University programs? No

Telecommunications Engineering covers a wide range of engineering disciplines such as electrical, electronic, design, wireless communications, optical, power and signal processing. This Minor has been initiated to give graduates extra skill sets to complement fundamental skills that they have acquired through their major studies. Students will be introduced to programming, advanced wireless communications techniques, and communications at an advanced level through mini research projects and practical assignments to familiarise themselves with real life scenarios. The Telecommunications Engineering Minor gives certain skills sets that have been in demand from the industry and thus will strengthen graduate competitiveness in the workforce.

Tourism Management, Major (0302)

Western Sydney University Major Code: 0302

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

Tourism and travel are among the world's largest industries, accounting for a quarter of the world's employment growth and more than 10% of global GDP (World Travel and Tourism Council, 2021). This major provides students with the knowledge and skills required to work within the plethora of careers available in the tourism and travel sectors. Students will learn about the behaviours and motivations of travellers, and how to identify and manage the negative environmental, social, cultural and community impacts of tourism. The major also teaches students about tourism policy and planning, and the management of destinations and the various components of the

tourism and travel sector. Students who choose to complete the Visitor Economy Professional Placement subject will complete a tourism work placement, providing a stepping-stone to employment.

Parramatta - Victoria Road	Internal	Dr Garth Lean (https://directory.westernsydney.edu.au/search/name/Garth%20Lean/)

Inherent Requirements

There are inherent requirements for this major that you must meet in order to complete the major and graduate. Make sure you read and understand the requirements for this major online.

https://www.westernsydney.edu.au/ir/inherent_requirements (https://www.westernsydney.edu.au/ir/inherent_requirements/)

Work Integrated Learning

The Major has a 20 credit point pool subject (TOUR 3003) Visitor Economy Professional Placement) that incorporate a Work Integrated Learning through supervised industry placements. The subject is approximately 231 hours (including a placement with an industry host, professional development and workshops), during which time students gain work-ready skills and undertake professional tasks.

The subject coordinator will work closely with placement providers to ensure appropriate workplace supervision. The process of liaison involves site visits and meetings. These meetings allow the subject coordinator to discuss: specific details about the placements, the criteria for accepting students, placement constraints and the required procedures for student engagement and management during their placement (e.g. induction, supervision, evaluation, patterns of work, special requirements). During the placement weeks, the subject coordinator will engage in one-on-one student supervision and host liaison management (via zoom/Skype for international placements). The placement weeks also include a suite of evaluation processes throughout, including a mid-year and end of year evaluation undertaken by the host provider, and a mid-year review conducted by the subject coordinator (either online or face-to-face).

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

The Tourism major introduces contemporary tourism issues and provides an in-depth understanding of tourism as a social phenomenon in a highly mobile world. Successful tourism planning and management relies on a full appreciation of the context in which it is operating. This suite of subjects enables a critical examination of the relationship between tourism and the assets which underpin it - the heritage of places - natural, social and cultural. It is these attributes which provide much of the incentive and attractions for travel, and which provide the business of tourism. Graduates with a tourism major can contemplate careers within a diverse range of government, non-government organization and businesses that require understanding, insight and skills related to tourism policy, planning and management.

The aim of the Tuberculosis Management major is to provide Registered Nurses with the specialist theoretical knowledge and critical thinking skills to prepare them for advanced practice in the clinical management of Tuberculosis among individuals and communities. Students will be able to align their career goals with their professional knowledge and skills in the major. Opportunities will be provided for students completing the Masters level major to synthesise and apply advanced nursing concepts through a capstone project relevant to their professional specialty area.

Urban Evolution, Minor (0313)

Western Sydney University Minor Code: 0313

Previous code: SM1153.1

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

Urban Evolution is a 21C Minor that will transform the way you think about our cities, preparing you to become a leader in innovative and agile transformation. You will contribute to projects that demonstrate how urban design improves mobility, environmental sustainability, disaster prevention, well-being, and social inclusiveness, and you will learn how robust and effective stewardship of biodiversity improves food production, water quality and addresses the extinction crisis. The distribution of urban prosperity is uneven, often marked by striking spatial, social, health and economic inequalities. Cities are also vulnerable to climate shocks and produce outsized share of carbon emissions and declines in biodiversity. But they are the key to climate sustainability and where green investments have the biggest impact. Urban Evolution embeds global ideas of sustainability with industry partnership and focuses on the promotion of resource efficiency and waste conscious, smart green solutions through the circular economy.

This minor is a Challenge Minor, which is an innovative transdisciplinary minor co-created with students as partners. With a Challenge Minor, your learning reaches beyond your discipline, giving you the chance to amplify your learning in new directions. For more information, visit the Challenge Minor (https://www.westernsydney.edu.au/educational_partnerships_and_quality/home/challenge_minors/) website.

Total Credit Points		**40**

Urban Studies, Major (0162)

Western Sydney University Major Code: 0162

Previous Codee: M1106.1

Available to students in other Western Sydney University programs? No

This major is available to students enrolled in the program Bachelor of Business (p. 158) from 2016. In the Urban Studies major you will examine the geography of contemporary Australian cities and regions. Urban Studies is focused on social justice within the city, through its critical assessments of peoples' access to scarce urban resources, such as housing, transport, education and employment. The political, economic, and cultural forces that shape cities and urban policy are the key concerns of the Urban Studies curriculum. These applied interests in urban wellbeing and city structure are basis for informed urban management.

User experience is key to the success of organisations in shaping great products and services. Taking a user centred approach, students in this major design interactive digital applications, information systems and services that meet the user needs and desires. Students learn about design as a systematic and data driven process backed up by up-to-date theoretical and practical knowledge enabling them to design efficient and effective artefacts in a rapidly changing, fast paced environment. In this multidisciplinary field, students incorporate analytics, research, human factors, security and privacy into their designs using a range of technologies.

Western Sydney University Minor Code: 0311

Previous code: SM3129.1

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

The Water 4 Life minor addresses the interdependence of the environment, climate, human rights, gender inequality, population health, sustainability, and economic growth in relation to water. As the world faces critical issues, solutions to complex problems around water supply are essential. Students are challenged in this minor to integrate multidisciplinary, and systems approaches to generate ideas, identify problems, and create sustainable solutions. Students complete a core 'capstone' unit applying technological skills and environmental knowledge to develop a social action project for positive change.

This minor is a Challenge Minor, which is an innovative transdisciplinary minor co-created with students as partners. With a Challenge Minor, your learning reaches beyond your discipline, giving you the chance to amplify your learning in new directions. Web and Mobile Computing, Testamur Major (T010)

Western Sydney University Major Code: T010

Previous Code: ST3082

Available to students in other Western Sydney University programs? No

The widespread deployment of web and mobile devices has made them a target of choice for companies to carry out their everyday business. The contemporary developers are expected to understand the strengths and limitations of web and mobile technologies and fit these to create successful user-friendly web and/or mobile applications. This specialisation is aimed at developing knowledge and skills in theoretical concepts and practical technologies needed to design and develop complex software applications across a range of web and mobile platforms. Students with these knowledge and skills will have greater prospects of finding employment with reputable companies or building their career as self-employed developers.

Zoology, Testamur Major (T029)

Western Sydney University Major Code: T029

Previous code: MT3014.1

Available to students in other Western Sydney University programs?
No

A Zoology major provides you with the opportunity to study Australia's unique animals and their habitats. Zoologists have a detailed understanding of the diversity of the animal kingdom and are equipped with scientific understanding of how animals function and interact with their environment: ranging from their ecology, behaviour and evolution, to the physiology and biochemistry of cells, tissues and major organ systems. Zoology underpins conservation and sustainability, including major contributions to current research in climate change and ecosystem management. On-campus animal facilities include those for reptiles, small marsupials and rodents, sheep and cattle, as well as over 1000ha of native, rural and aquatic habitats with an abundance of native wildlife. Zoologists graduate with practical laboratory and fieldwork skills that prepare them for a wide variety of vocations in this field.

All students must complete 60 credit points of study at Level 3 to meet program requirements.

NOTE: Students up to end of 2023 - Students will need to select at least 10 credit points of elective study at Level 3 to meet this requirement.

NOTE: This major is available as an elective in Bachelor of Science 3754, and an elective major option in Bachelor of Medical Science 3755. See the related programs tab for more information.

Please note, the BSc Major Environmental Health T076, BSc Adv 3757, Bachelor of Science (Pathway to Teaching Primary/Secondary) 3756 & BMedSc Adv 3758, do not have sufficient Flexible space to accommodate a second/elective Major.

Qualification for the Bachelor of Science (Pathway to Teaching Primary/Secondary) with a major in Zoology requires the successful completion of 240 credit points as per the recommended sequence for the Bachelor of Science with a major in Zoology, given above.

In addition, all students must complete a mandatory 40 credit point minor in Education Studies. Students must choose one of:

Education Studies – Primary Teaching, Minor (0296) (https://hbook.westernsydney.edu.au/majors-minors/education-studies--primary-teaching-minor/)

Or

Education Studies - Secondary Teaching, Minor (0267) (https://hbook.westernsydney.edu.au/majors-minors/education-studies-secondary-teaching-minor/)

Students must meet this requirement by choosing subjects from the selected Education Studies minor as electives within their Bachelor of Science program.

Course	Title	Credit Points
Year 1

Biomedical Engineering, Minor (0122)

Western Sydney University Minor Code: 0122

Available to students in other Western Sydney University programs?
No

The Biomedical Engineering minor includes elements from the bioelectronics, biomechanical and biomechatronic specialisations. This allows students to undertake multidisciplinary study within engineering, which combines knowledge from electronics, chemical, materials, mechanical and mechatronic engineering with the life sciences of medicine, biology and molecular biology. Graduates will be equipped with professional skills to work in biomedical industry as engineers, with a good understanding of multidisciplinary principles and practices.

Accounting (ACCT)

ACCT 0002 Accounting Fundamentals (WSTC) (5 Credit Points)
Subject Details (p. 2302) Legacy Code: 900010
Accounting is the practice of recording, classifying, summarising, analysing and interpreting information, of a commercial nature for the purpose of helping people make decisions. In the world of business, the role of accounting is to support management in providing timely and accurate financial information about the business so that informed decisions can be made. This subject examines the basic principles underpinning accounting and connects the accounting process to financial decision making for a business.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: ACCT 0001 - Accounting Fundamentals (WSTC Prep)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ACCT 0003 Fundamentals of Finance and Accounting (10 Credit Points)
Subject Details (p. 2303) Legacy Code: 201034
In this unit, students will be introduced to the fundamentals of finance and accounting for business. Students will learn to apply numerical skills within the areas of finance and accounting in preparation for post-graduate study. Financial information will be analysed and interpreted for the purpose of decision-making in a range of corporate contexts. Students will be required to demonstrate an understanding of ethical conduct and best practice reporting in undertaking financial and accounting processes.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ACCT 1001 Accounting Information for Managers (10 Credit Points)
Subject Details (p. 2303) Legacy Code: 200101
This subject provides exposure to financial and management accounting information from the viewpoint of a non-accounting specialist. The subject aims to provide breadth of awareness and knowledge in relevant fields of accounting essential to decision making for managers.
Level: Undergraduate Level 1 subject
Equivalent Subjects: ACCT 1003 - Accounting Information for Managers (WSTC) ACCT 1002 - Accounting Information for Managers (Creative Industries)
Incompatible Subjects: ACCT 1005 - Accounting in Context ACCT 1006 Accounting in Context (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ACCT 1003 Accounting Information for Managers (WSTC) (10 Credit Points)
Subject Details (p. 2304) Legacy Code: 700005
This subject provides exposure to financial and management accounting information from the viewpoint of a non-accounting specialist. The subject aims to provide breadth of awareness and knowledge in relevant fields of accounting essential to decision making for managers.
Level: Undergraduate Level 1 subject
Equivalent Subjects: ACCT 1001 - Accounting Information for Managers
Incompatible Subjects: ACCT 1005 Accounting in Context ACCT 1006 Accounting in Context (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ACCT 1005 Accounting in Context (10 Credit Points)
Subject Details (p. 2305) Legacy Code: 200972
Accounting in Context is the first core subject required in the accredited accounting program, but can be included as an elective in other programs. It is designed to provide an overarching context about the purpose and usefulness of accounting information and explain a range of definitions and terms used in accounting and business. Accounting in Context will introduce accounting reports and their interpretation, and explore the impact of policy and measurement methods on accounting information and business decisions. Successful completion of the subject will equip participants with an understanding of the importance of accounting to society and allow them to engage with the next core accounting subject; Financial Accounting Applications.
Level: Undergraduate Level 1 subject
Equivalent Subjects: ACCT 1006 - Accounting in Context (WSTC) ACCT 1004 - Accounting Reports and Decisions
Incompatible Subjects: ACCT 1001 - Accounting Information for Managers ACCT 1003 - Accounting Information for Managers (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ACCT 1006 Accounting in Context (WSTC) (10 Credit Points)
Subject Details (p. 2306) Legacy Code: 700274
Accounting in Context is the first core subject required in the accredited accounting program, but can be included as an elective in other courses. It is designed to provide an overarching context about the purpose and usefulness of accounting information and explain a range of definitions and terms used in accounting and business. Accounting in Context will introduce accounting reports and their interpretation, and explore the impact of policy and measurement methods on accounting information and business decisions. Successful completion of the subject will equip participants with an understanding of the importance of accounting to society and allow them to engage with the next core accounting subject; Financial Accounting Applications.
Level: Undergraduate Level 1 subject
Pre-requisite(s): Students in programs 7102 or 7177 must have successfully completed BUSM 0029 Decision Making for Business (WSTC Prep) before enrolling in this subject
Equivalent Subjects: ACCT 1005 - Accounting in Context ACCT 1002 - Accounting Information for Managers (Creative Industries)
Incompatible Subjects: ACCT 1001 - Accounting Information for Managers ACCT 1003 - Accounting Information for Managers (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ACCT 1007 Financial Accounting Applications (10 Credit Points)
Subject Details (p. 2308) Legacy Code: 200111
This subject gives students the practical skills necessary to analyse the accounting transactions of an entity, and then be able to measure and record these transactions in a systematic manner for the preparation of simple financial statements. Students learn key accounting concepts such as assets, liabilities, revenues and expenses used in financial reporting. Students produce for example profit and loss statements and balance sheets. Knowledge and skills developed in the subject are foundational to higher level financial and management accounting subjects.
Level: Undergraduate Level 1 subject
Pre-requisite(s): ACCT 1005 - Accounting in Context
Equivalent Subjects: ACCT 1008 - Financial Accounting Applications (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ACCT 1008 Financial Accounting Applications (WSTC) (10 Credit Points)
Subject Details (p. 2309) Legacy Code: 700029
This subject gives students the practical skills necessary to analyse the accounting transactions of an entity, and then be able to measure and record these transactions in a systematic manner for the preparation of simple financial statements.
Level: Undergraduate Level 1 subject
Pre-requisite(s): ACCT 1006
Equivalent Subjects: ACCT 1007 - Financial Accounting Applications
Restrictions: Please see the Subject Details page for any restrictions for this subject

ACCT 1010 Management Accounting Fundamentals (10 Credit Points)
Subject Details (p. 2310)
This subject provides an introduction to management accounting in an e-commerce environment. Students examine the interrelations of management accounting to other functional areas, to suppliers, to customers, and to other sources of external information relevant to planning and control. Through a range of activities, students learn the development and logic of routine and non-routine analysis performed to support management decision making.
Level: Undergraduate Level 1 subject
Pre-requisite(s): ACCT 1007
Equivalent Subjects: FINC 1001
Restrictions: Please see the Subject Details page for any restrictions for this subject

ACCT 2001 Contemporary Management Accounting (10 Credit Points)
Subject Details (p. 2312) Legacy Code: 200108
This subject examines the role of contemporary management accounting systems and techniques as well as the factors that influence the design of these systems. Students learn about appropriate choices of the different management accounting techniques and the importance of strategy in the contemporary business environment. Students expand their knowledge by applying techniques through real-life scenarios, and analysing and make recommendations that take into account the constraints and opportunities each present. Through the design of performance measurement systems, students demonstrate skills in critical thinking and decision making valued in the accounting organisations.
Level: Undergraduate Level 2 subject
Pre-requisite(s): FINC 1001 or ACCT 1010
Restrictions: Please see the Subject Details page for any restrictions for this subject

ACCT 2004 Intermediate Financial Accounting (10 Credit Points)
Subject Details (p. 2313) Legacy Code: 200536
This subject extends the knowledge and understanding of financial accounting through the application of problem solving to selected entities drawing upon accounting theory and critical analysis.
Level: Undergraduate Level 2 subject
Pre-requisite(s): ACCT 1007
Equivalent Subjects: ACCT 3008 - Financial Accounting Issues LGYA 9763 - The Anatomy of Financial Accounting
Incompatible Subjects: LGYB 3531 - Advanced Financial Accounting LGYB 8985 - Financial Accounting 3
Restrictions: Please see the Subject Details page for any restrictions for this subject

ACCT 2005 Techniques in Financial Accounting (10 Credit Points)
Subject Details (p. 2313) Legacy Code: 200973
Techniques in Financial Accounting is the third subject in the financial accounting stream and builds upon Financial Accounting Applications as part of the accredited accounting program. It introduces a company as a business structure and the accounting requirements for their formation and operations. Students develop skills in using tools required for accurate record keeping leading to compilation of financial statements, as well as how to account for receivables and payables, the disposal of non-current assets, and preparation of cash flow statements. Successful completion of the subject will equip participants with a practical and theoretical understanding of usefulness of general purpose financial reports.
Level: Undergraduate Level 2 subject
Pre-requisite(s): ACCT 1007
Incompatible Subjects: ACCT 2004 Intermediate Financial Accounting
Restrictions: Please see the Subject Details page for any restrictions for this subject

ACCT 3001 Accounting Information Systems (10 Credit Points)
Subject Details (p. 2314) Legacy Code: 200534
This subject considers the design and implementation of accounting information systems as a data model for resource allocation and management of an organisation. Students are involved in a range of activities to build the knowledge and skills in this growing area including identifying current trends in information management and the changing regulatory requirements. Students learn to use a range of tools for the presentation of data and conceptual models, and articulate the value of information, business intelligence, and information security.
Level: Undergraduate Level 3 subject
Pre-requisite(s): FINC 1001 or ACCT 1010
Equivalent Subjects: ACCT 3010 Issues in Accounting Information Systems
Restrictions: Please see the Subject Details page for any restrictions for this subject

ACCT 3003 Accounting Standards and Governance (10 Credit Points)
Subject Details (p. 2316) Legacy Code: 200974
This subject builds on the first and second year accounting subjects, exploring financial reporting issues in greater depth and challenging students to question the foundations of financial reporting. Topics are on the International Financial Reporting Standards (IFRS) and the Australian Accounting Standards Board equivalents (AASB). The subject develops graduate capabilities centred upon critical thinking skills, technical skills and professional judgement and their application for solving practical financial reporting and environmental social governance issues.
Level: Undergraduate Level 3 subject
Pre-requisite(s): ACCT 2005
Restrictions: Please see the Subject Details page for any restrictions for this subject

ACCT 3004 Advanced Accounting (10 Credit Points)
Subject Details (p. 2317) Legacy Code: 200267
This subject addresses the advanced aspects of accounting. Accounting theories are discussed in terms of how they assist us in understanding current accounting practice and accounting standards. In addition, theoretical concepts are applied to current news and real world events.
Level: Undergraduate Level 3 subject
Pre-requisite(s): ACCT 3007
Equivalent Subjects: ACCT 3002 - Accounting Philosophies and Theories LGYB 3531 - Advanced Financial Accounting (V1)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ACCT 3006 Auditing and Assurance Services (10 Credit Points)
Subject Details (p. 2317) Legacy Code: 200535
The role of the auditor is significant in providing financial information about an organisation and the performance of management. Shareholders and other stakeholders require this information to make investment and other decisions. An auditor provides assurance or a conclusion about a company's financial situation which is intended to give confidence to stakeholders. In this subject, students examine the roles and responsibilities of the auditor, auditing principles and standards and the application of those standards, particularly in an electronic environment.
Level: Undergraduate Level 3 subject
Pre-requisite(s): ACCT 3007
Restrictions: Please see the Subject Details page for any restrictions for this subject

ACCT 3007 Corporate Accounting Systems (10 Credit Points)
Subject Details (p. 2318) Legacy Code: 200109
This subject builds on the fundamental knowledge of accounting procedures gained in prerequisite subjects. It involves the comprehensive study of aspects of corporate accounting and reporting which are regulated by legislation, accounting standards, Australian Securities and Investment Commission and Stock Exchange requirements. This subject is designed to provide students with grounding in the regulation and practice of corporate reporting in Australia. The major orientation is towards the theoretical and practical aspects of corporate reporting, whilst at the same time exploring the reasons for regulatory disclosures.
Level: Undergraduate Level 3 subject
Co-requisite(s): ACCT 2004 Intermediate Financial Accounting OR ACCT 3003 Accounting Standards and Governance
Equivalent Subjects: -
Restrictions: Please see the Subject Details page for any restrictions for this subject

ACCT 3009 Incubator 4: Commercial and Financial Setting of Entrepreneurship (10 Credit Points)
Subject Details (p. 2320) Legacy Code: 301169
Operating a start-up is not just about being creative and innovative; it is also about having the necessary management and operational skills, understanding the commercial and financial setting within which the organisation needs to operate it. This subject aims to provide vital details that set the background to run your organisation whether your customer base is local, national or even international. This objective is driven through a number of topics such as: setting up a business entity, accounting fundamentals, taxation fundamentals. The subject will be delivered through a number of modules. As a vital part of the subject, students are expected to engage and work in "start-up co-working space" on a regular basis. At the successful completion of this subject, students would set up as a business entity for their start-up organisation.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ACCT 3011 The Accountant as a Consultant (10 Credit Points)
Subject Details (p. 2320) Legacy Code: 200118
This subject aims to provide students with a 'hands on' flexible and practical work integrated learning (WIL) experience in the Accounting degree. This is mainly done through working in groups on projects as accountants would do when they engage with clients and entrepreneurs as professional consultants. Students come to understand the role of an accountant in the effective management of the business to sustain, grow and expand the business to higher levels consulting problems involving a wide range of business related issues. This subject is designed to give students an opportunity to apply the theoretical knowledge gained in other subjects in their degree program thus enabling them to bring knowledge to life. On successful completion of this subject students will be able to appreciate the relevance of their business subjects in real business situations and to become business consultants.
Level: Undergraduate Level 3 subject
Pre-requisite(s): ACCT 2001
Equivalent Subjects: LGYB 8986 - The Accountant as a Management Consultant
Restrictions: Please see the Subject Details page for any restrictions for this subject

ACCT 3012 Incubator 4: Commercial and Financial Strategy for Entrepreneurs (10 Credit Points)
Subject Details (p. 2321)
In the Bachelor of Entrepreneurship students learn the different aspects of starting a new business around a creative, innovative product or service. One key skill in being able to run a business or a startup is developing financial and commercial strategies. Students develop their knowledge and skills in this area through a more in-depth look at business models, revenue models and commercial strategies. Students apply critical thinking to evaluate models and strategies in developing a commercial strategy. The skills developed in this subject are highly valued practical business-oriented skills that can be applied in a range of businesses.
Level: Undergraduate Level 3 subject
Equivalent Subjects: ACCT3009
Restrictions: Please see the Subject Details page for any restrictions for this subject

ACCT 7002 Accounting Professional Engagement (10 Credit Points)
Subject Details (p. 2322) Legacy Code: 200693
This subject aims to provide students with a 'hands on' flexible and practical work integrated learning experience in the Accounting degree. This subject focuses on the role that accountants play in the effective management of businesses. Appropriate accounting research methods are used to investigate and report on problems and "real" case studies involving a wide range of business related issues. This is mainly done through working as groups on projects as accountants do when they engage with clients and entrepreneurs as professional consultants.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): ACCT 7005
Restrictions: Please see the Subject Details page for any restrictions for this subject

ACCT 7005 Accounting Theory and Applications (10 Credit Points)
Subject Details (p. 2323) Legacy Code: 200401
Basic questions of the role accounting performs in society are considered from economic, social and environmental perspectives. The nature of the statements advanced to give accounting legitimacy, together with their philosophical underpinnings, are examined. Selected accounting theories and philosophies will be examined and advanced applications in alternative accounting models considered. Accounting research and appropriate methodologies are introduced.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): ACCT 7010
Restrictions: Please see the Subject Details page for any restrictions for this subject

ACCT 7009 Auditing (10 Credit Points)
Subject Details (p. 2324) Legacy Code: 200398
The aim of this subject is to introduce students to the practice of auditing and the underlying concepts, auditor's responsibilities and the audit environment. The focus of attention is on audits carried out under the provisions of corporations legislation and reference is also made to other forms of audit. The subject uses blended learning and case study approaches and students will learn to apply professional, ethical and legal requirements and responsibilities in completing and reporting on auditing and assurance tasks.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): ACCT 7010
Restrictions: Please see the Subject Details page for any restrictions for this subject

ACCT 7010 Company Accounting (10 Credit Points)
Subject Details (p. 2325) Legacy Code: 200400
Company accounting introduces and develops a student's understanding of the Australian reporting requirements and practices relating to corporations. The subject builds upon the fundamental accounting skills gained in Introductory Accounting to develop a student's knowledge of technical methods and theoretical underpinnings of corporate accounting. Students will learn how to prepare consolidated financial statements, with associated disclosures, to ensure compliance with accounting standards, corporations' legislation and Australian Stock Exchange (ASX) requirements. Through a range of practical individual and collaborative means students will explore corporate accountability and the reasons for regulatory disclosure.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): ACCT 7018
Restrictions: Please see the Subject Details page for any restrictions for this subject

ACCT 7012 Corporate Finance (10 Credit Points)
Subject Details (p. 2326) Legacy Code: 200426
As an introductory finance unit, Corporate Finance introduces students to the fundamental concepts of finance theory - the time value of money, risk and return, capital budgeting and capital structure - and to the tools of financial decision-making in the context of the Australian institutional environment. Students examine the investment, financing and dividend decisions of corporations and develop an understanding of the basic practices of financial management from the perspective of both large and small firms.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 8876 - Finance LGYA 8986 - Corporate Finance (PG)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ACCT 7013 Financial Decision Making (10 Credit Points)
Subject Details (p. 2327) Legacy Code: 200784
Students will gain financial literacy through practical understanding of the information contained in financial reports. Appreciating the variety of uses of accounting information for planning and controlling enhances the ability to extract relevant data. This subject emphasises the function of both financial and management accounting in measuring, processing and communicating information useful for decision making.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: ACCT 7001 - Accounting Perspectives for Managers
Incompatible Subjects: ACCT 7018 -Introductory Accounting ACCT 7007 - Accounting A Business Perspective
Restrictions: Please see the Subject Details page for any restrictions for this subject

ACCT 7015 Financial Reports for Decision Making (10 Credit Points)
Subject Details (p. 2328) Legacy Code: 200821
This subject focuses on developing the ability to use accounting information, as extracted from financial reports, to assist with managerial decision making. Students will gain financial literacy through developing an understanding of the information contained in financial reports and applying this information to practical decisions. This subject emphasises the function of both financial and management accounting in measuring, processing and communicating information useful for decision making.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ACCT 7016 Information Systems for Accountants (10 Credit Points)
Subject Details (p. 2329) Legacy Code: 200399
Information Systems for Accountants develops a student's knowledge of integrated systems, information security, compliance management and business intelligence within organisational frameworks. Students will apply data analytics, risk assessment, and control design through a practical project. The use of data science tools and processes to aid in the analysis of an accounting information system. The curriculum ensures students are well-prepared to navigate the complexities of designing and managing sophisticated accounting information systems across diverse organisational landscapes.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): ACCT 7018
Restrictions: Please see the Subject Details page for any restrictions for this subject

ACCT 7018 Introductory Accounting (10 Credit Points)
Subject Details (p. 2330) Legacy Code: 200396
The aim of this subject is to provide a comprehensive introduction to contemporary financial accounting. This is an essential component in the understanding of the production and use of accounting information in business. This subject applies accounting concepts, standards and principles enabling students to be competent in the technical skills in accounting which is a fundamental tool for making economic decisions and for analysing and solving business problems. Students learn to apply such concepts, standards and principles through a range of individual and collaborative means using a blended learning design that draws on current and future trends in the broad international context.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: ACCT 7007 - Accounting A Business Perspective (PG) ACCT 7015 - Financial Reports for Decision Making
Restrictions: Please see the Subject Details page for any restrictions for this subject

ACCT 7019 Management Accounting (10 Credit Points)
Subject Details (p. 2331) Legacy Code: 200494
The fundamental purpose of any management accounting system in an organisation is to provide appropriate information for (i) costing of products and services; (ii) support functions such as planning, controlling, evaluation, continuous improvement and decision making; and (iii) competitive support. This provides financial and non-financial services to the management team to enhance an organisation's competitiveness. The subject is designed to provide an understanding of these areas of information through applying concepts, theories and models in a range of individual and collaborative activities.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): ACCT 7018
Restrictions: Please see the Subject Details page for any restrictions for this subject

ACCT 7026 Behavioural Finance (PG) (10 Credit Points)
Subject Details (p. 2332) Legacy Code: 201038
Cognitive biases and emotional influences have the potential to influence the decision-making of advisors, managers and investors. This subject provides students with the skills to advise clients such that their investment decisions are soundly based. Various biases and influences are introduced to students to demonstrate how they undermine rational investment decision-making. Students are then taught how to apply methods that advisers can use to overcome and correct these biases. Ensuring clients are fully educated about investment decisions is integral to the investment process, and necessary to ensure advisers meet the best interest duty of their profession. This subject is available as a stand-alone bridging subject which is accredited by the Financial Adviser Standards and Ethics Authority (FASEA) having met the FASEA curriculum and standards requirements.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ACCT 9001 Higher Degree Research Thesis - Accounting (80 Credit Points)
Subject Details (p. 2333) Legacy Code: 800031
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

Agriculture (AGRI)

AGRI 1003 Animal Science (10 Credit Points)
Subject Details (p. 2348) Legacy Code: 300801
This subject will provide students with an understanding of comparative physiological and anatomical concepts of a range of mammalian and avian species. Students will develop the skills to apply these concepts in practical situations through the use of field observations and the relationship of these to functional anatomy and physiology of production animals. In addition students will develop many of the principles and concepts employed in animal production. Concepts discussed in lectures are reinforced by practical classes held in the laboratory and in the outdoor laboratories.
Level: Undergraduate Level 1 subject
Equivalent Subjects: AGRI 1002 - Animal Science
Restrictions: Please see the Subject Details page for any restrictions for this subject

AGRI 1004 Feeding the Planet (10 Credit Points)
Subject Details (p. 2349) Legacy Code: 300804
This subject will explore the concepts driving current food production science (population growth, urbanization, emerging affluence, resource constraints, and underlying biological limits) in terms of their universal life cycles, constraints to production and societal issues. Throughout the subject, key questions will be addressed: What are the major health benefits and potential concerns regarding the intensification of production and consumption of food? How does agricultural production affect the efficient use of resources and impact our environment? Can costs of production be reduced to meet the growing demand for food products around the globe while maintaining health and safety for consumers? What are the different types of food production systems? Myths and misconceptions surrounding the food systems will be discussed and analysed. The subject is geared towards learners who seek a greater understanding of food systems and have a desire to learn more about issues surrounding sustainability.
Level: Undergraduate Level 1 subject
Equivalent Subjects: LGYA 6095 - Primary Production
Restrictions: Please see the Subject Details page for any restrictions for this subject

AGRI 1005 Human Animal Interactions (10 Credit Points)
Subject Details (p. 2350) Legacy Code: 300807
This subject introduces students to the varying relationships between humans and animals including domestication, the role of animals for companionship, as workers, the traditional role of animals in agriculture, wildlife and zoo animals and their increasingly recognised aesthetic and therapeutic roles. Students will work with a variety of domesticated animals, captive native mammals, and reptiles on-campus, and in a variety of animal industries off campus, including wildlife parks and zoos. The subject includes a balance of theoretical and practical work in the areas of behaviour and handling, basic husbandry, health care, and ethical management.
Level: Undergraduate Level 1 subject
Incompatible Subjects: AGRI 1006 - Introduction to Animal Science AGRI 1007 - Human Animal Interactions
Restrictions: Please see the Subject Details page for any restrictions for this subject

AGRI 1009 Wildlife Studies (10 Credit Points)
Subject Details (p. 2350) Legacy Code: 300813
This subject involves the study of basic biology, ecology, conservation and management of selected wildlife. Students will learn different management systems and research methods used in the conservation and management of wildlife. The use of wildlife as a sustainable resource will also be analysed within the context of ecological sustainable development and animal ethics.
Level: Undergraduate Level 1 subject
Equivalent Subjects: AGRI 1008 - Introduction to Wildlife Studies
Restrictions: Please see the Subject Details page for any restrictions for this subject

AGRI 1010 Protected Cropping Climate Control and Technology (10 Credit Points)
Subject Details (p. 2351) Legacy Code: 301263
This subject will teach students the intricacies of crop management in a highly controlled growing environment and the interplay between environmental response and plant behavior. In doing so, it will incorporate one nationally recognized unit of competency, "AHCPHT503 - Manage a controlled growing environment". Students will also identify controlled environment technologies including those available, under-development and being researched, such as robotics, sensors and gene technologies. Students will gain an appreciation for the science and technology that drives high-tech greenhouse production and apply their skills in Western Sydney University's state of the art National Vegetable and Protected Cropping Centre (NVPCC) and its PRIVA operating system at the Hawkesbury campus.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

AGRI 1011 Introduction to Agrifood (10 Credit Points)
Subject Details (p. 2352)
This subject introduces the concepts driving current food production science in terms of universal life cycles, constraints to production and societal issues. Throughout the subject, key questions will be addressed: What are the major health benefits and potential concerns regarding the intensification of production and consumption of food? How does agricultural production affect the efficient use of resources and impact our environment? Can costs of production be reduced to meet the growing demand for food products around the globe while maintaining health and safety for consumers? What are the different types of food production systems? The subject is geared towards learners who seek a greater understanding of food systems and have a desire to learn more about issues surrounding sustainability.
Level: Undergraduate Level 1 subject
Equivalent Subjects: AGRI 1004
Restrictions: Please see the Subject Details page for any restrictions for this subject

AGRI 2001 Agronomy (10 Credit Points)
Subject Details (p. 2353) Legacy Code: 300863
This subject enables students to develop understanding of basic crop and pasture agronomy including plant identification, crop/pasture establishment, growth, development, adaptation, plant protection, and grazing management. Students manage a crop in the field and a pot trial in the glasshouse and interact with researchers and industry professionals in understanding broad principles involved in the production and management of crops, pasture and animal production issues. The practical sessions enable students to apply the management principles and become familiar with various measuring techniques.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYA 6118 - Agronomy
Restrictions: Please see the Subject Details page for any restrictions for this subject

AGRI 2003 Animal Health and Welfare (10 Credit Points)
Subject Details (p. 2353) Legacy Code: 300834
This subject will introduce students to the major issues related to animal health and welfare that form essential knowledge for those working with animals. In particular, students will gain an understanding of disease and methods for disease control as well as an introduction to disease diagnosis. In addition, students will gain knowledge about the relationships between animal management and the health and welfare expectations for domesticated and wild animals. The causes of common animal diseases will be introduced as well as the legal obligations of those owning, working or observing animals with respect to maintaining and monitoring their health and welfare.
Level: Undergraduate Level 2 subject
Pre-requisite(s): BIOS 1001
Equivalent Subjects: AGRI 2002 - Animal Health and Welfare
Restrictions: Please see the Subject Details page for any restrictions for this subject

AGRI 2004 Animal Reproduction (10 Credit Points)
Subject Details (p. 2354) Legacy Code: 300835
Reproduction is the origin of life. The aim of this subject is to provide students with a sound understanding of reproduction of both domestic and non domestic animals so that they can design and manage a breeding program for a species of choice. Topics will include anatomy and physiology of male and female reproductive tracts; hormonal control of reproduction; fertilisation, pregnancy, parturition and lactation and advanced reproductive technologies. These topics will be explored in a range of species across different taxonomic groups.
Level: Undergraduate Level 2 subject
Pre-requisite(s): BIOS 1012 Cell Biology
Restrictions: Please see the Subject Details page for any restrictions for this subject

AGRI 2005 Sustainable Food Production (10 Credit Points)
Subject Details (p. 2355) Legacy Code: 300791
Sustainable Food Production provides students with the knowledge and skills required to analyse current and future food production systems with an emphasis on water and energy efficiency. The subject material integrates agronomic principles with food supply chain analysis. This approach facilitates an analytical framework that goes beyond farm-gate productivity by including aspects of the food supply chain. Key concepts include water use efficiency, nitrogen balance, energy balance, life cycle assessment, and greenhouse gas emissions. Case studies will be drawn from a range of food production systems, emphasising productivity per unit of input.
Level: Undergraduate Level 2 subject
Incompatible Subjects: LGYA 6125 - Advances in Agonomy
Restrictions: Please see the Subject Details page for any restrictions for this subject

AGRI 2006 Agriculture, Food and Health (10 Credit Points)
Subject Details (p. 2355) Legacy Code: 301389
This subject is designed to strengthen student understanding of the important interactions between food, agriculture, environment and health. Traditionally the topics of food, agriculture, environment and health have been taught mainly in isolation from each other. It is becoming increasingly apparent that this traditional approach bears little relevance to real world issues and in some cases acts as an impediment to progress. Alternatives to the current 'western industrialised' food production system will be explored. These include organic agriculture, local farmer markets, and consumer driven changes to food production systems.
Level: Undergraduate Level 2 subject
Incompatible Subjects: LGYA 6185 - Ecology of Production
Restrictions: Please see the Subject Details page for any restrictions for this subject

AGRI 2007 Introduction to Agrifood (10 Credit Points)
Subject Details (p. 2356) Legacy Code: 301443
This subject introduces the concepts driving current food production science in terms of universal life cycles, constraints to production and societal issues. Throughout the subject, key questions will be addressed: What are the major health benefits and potential concerns regarding the intensification of production and consumption of food? How does agricultural production affect the efficient use of resources and impact our environment? Can costs of production be reduced to meet the growing demand for food products around the globe while maintaining health and safety for consumers? What are the different types of food production systems? The subject is geared towards learners who seek a greater understanding of food systems and have a desire to learn more about issues surrounding sustainability.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

AGRI 3001 Analysis of Agricultural Supply and Demand (10 Credit Points)
Subject Details (p. 2356) Legacy Code: 301098
Students will develop understanding of the integrated nature of the agri-food value chain (supply and demand) from economic, environmental and social perspectives. Integrative processes and tools from established value chains will be evaluated in the context of changing consumer sentiment. Through analysis of economic and environmental gains (e.g. water and energy savings), students will identify emerging opportunities and challenges for improved and/or alternative food distribution systems. Analytical and reporting tools will be used to develop competence in data management, with emphasis on increasing communication from consumer to producer.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 6131 - Analysis of Agricultural Supply Chains
Restrictions: Please see the Subject Details page for any restrictions for this subject

AGRI 3002 Animal Nutrition and Feeding (10 Credit Points)
Subject Details (p. 2357) Legacy Code: 300853
Animal nutrition and feeding is fundamental to many aspects of animal production and wildlife systems. This subject aims to provide students with knowledge of nutrient requirements for different types of animals and the nutrient composition of common feeds. Students will evaluate and formulate rations to meet a range of animal requirements at different stages of growth, reproduction, lactation and production.
Level: Undergraduate Level 3 subject
Equivalent Subjects: AGRI 3003 - Animal Nutrition and Feeding
Restrictions: Please see the Subject Details page for any restrictions for this subject

AGRI 3005 Animal Production (10 Credit Points)
Subject Details (p. 2358) Legacy Code: 300854
Animal production is about producing animals for food, companionship and conservation. This subject aims to develop an understanding of the major animal production systems used for food and fibre and other resources in Australia (intensive and wildlife), and to apply this knowledge to improving problematic issues and understanding topical issues. Topics will focus on the application of animal production principles to these production systems.
Level: Undergraduate Level 3 subject
Equivalent Subjects: AGRI 3004 - Animal Production
Restrictions: Please see the Subject Details page for any restrictions for this subject

AGRI 3007 Water in the Landscape (10 Credit Points)
Subject Details (p. 2359) Legacy Code: 300870
Many land and water use activities in both urban and rural landscape result in hydrologic changes that have environmental, economic and social consequences. These activities require appropriate management strategies for sustainable water use in catchment. In this unit, the hydrologic cycle will be explored at varying spatial scales in urban and rural contexts. Hydrologic, environmental, economic and social perspectives will be used in the examination of the demand and the use of water.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 6246 - Water in the Landscape
Restrictions: Please see the Subject Details page for any restrictions for this subject

AGRI 3008 Animal Health, Ethics and Welfare (10 Credit Points)
Subject Details (p. 2360) Legacy Code: 301255
This subject will ensure students will be able to evaluate the major issues related to animal health, welfare and ethical frameworks that govern working with animals. In particular, students will gain knowledge of the diseases impacting animals and methods for disease diagnosis and control. In addition, students will apply this knowledge to the relationships between animal management and the health and welfare expectations for domesticated and wild animals. The legal obligations of the impact of legislative regulation for those owning, working or observing animals with respect to approval processes, maintaining and monitoring animal health and welfare is also addressed. Students may need to travel to another campus to complete this subject.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BIOS 1001 AND
AGRI 1003
Incompatible Subjects: AGRI 2002 Animal Health and Welfare
AGRI 2003 Animal Health and Welfare
Restrictions: Please see the Subject Details page for any restrictions for this subject

AGRI 3009 Agricultural Technology (10 Credit Points)
Subject Details (p. 2360) Legacy Code: 301449
Agricultural Biotechnology is rapidly developing and this subject will assure you the knowledge and skills that contribute to the future of sustainable food production. The subject material integrates agronomic principles with current and emerging biotechnology, highlighting issues and solutions based around case studies. This approach facilitates an analytical framework that goes beyond traditional production systems including eco-farming, life-cycle and regenerative agriculture, along with development of innovative and integrated production and waste systems. Key concepts include sustainable resource use, nitrogen balance, energy efficiency, and greenhouse gas emissions and market analysis.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

AGRI 3010 Animal Health and Welfare (10 Credit Points)
Subject Details (p. 2361) Legacy Code: 301456
Diseases of domesticated and native Australian animals, including endocrine, metabolic and pathogenic are significant factors influencing animal health, welfare and production. Understanding the interactions between the host animal genes and immune system along with the environmental influences, you will develop knowledge and skills in sustainably managing animal health and welfare. This subject will develop your knowledge of the diseases impacting animals and methods for disease diagnosis and control. In particular, you will apply this knowledge to the relationships between animal management and the health and welfare expectations for domesticated and wild animals.
Level: Undergraduate Level 3 subject
Equivalent Subjects: AGRI 3008 Animal Health Ethics and Welfare
Incompatible Subjects: AGRI 2002 Animal Health and Welfare
AGRI 2003 Animal Health and Welfare
Restrictions: Please see the Subject Details page for any restrictions for this subject

AGRI 7001 Agricultural Biosecurity (10 Credit Points)
Subject Details (p. 2362) Legacy Code: 301368
Biosecurity is a set of measures to prevent, respond to and recover crops and livestock from pests and diseases that threaten the economy and environment. Comprehensive biosecurity systems help ensure food security and food safety, which is crucial for community health, competitiveness for agricultural export and conservation of natural environments. This subject studies the epidemiologic triangle consisting of the host, disease and the environment in which the disease develops, and the series of measures and practices to detect and prevent entry and spread of pests, diseases and weeds. The potential for future biosecurity mega shocks to the agricultural industry, preparedness for rapid emergency responses to an exotic incursion, and management of invasion of pests and diseases will be discussed.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

AGRI 7002 Agricultural Biotechnology (10 Credit Points)
Subject Details (p. 2362) Legacy Code: 301369
Biotechnology is a powerful enabling technology that is revolutionising agriculture by delivering improved productivity and nutrition, better management of pests and diseases, improved ability to cope with environmental challenges, and development and production of medicines and functional products. The discovery and applications of gene editing by CRISPR-Cas technology as well as modification of organisms using recombinant DNA, RNAi and other molecular technologies are seen as key to providing solutions to global food crisis, climate change associated disasters and health and disease-related issues. This subject focuses on modern and cutting-edge techniques used in cell culture and tissue engineering, genome editing, transformation and transgenesis, rapid breeding and selection and synthetic biology to address contemporary issues in sustainable agriculture.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

AGRI 7003 Agricultural Technologies (10 Credit Points)
Subject Details (p. 2363) Legacy Code: 301370
This subject will provide students with knowledge and practical experience of new technologies associated with broad-acre and intensive cropping and pastures, and their role in mixed farming systems. A major focus of this subject is how new technologies such as drones, machine learning, remote sensing and imaging science technologies are contributing to more productive and sustainable land management systems. The advanced agronomy component of the subject will explore keys to successful crop and pasture management - recognising variability in performance within the paddock and farm, diagnosing the underlying causes of spatial and temporal variability, and using precision agriculture tools to produce better informed enterprise management decisions, plant yield, sustainability and quality for end-users.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

AGRI 7004 Livestock Production Systems (10 Credit Points)
Subject Details (p. 2364) Legacy Code: 301373
This subject covers the principles of animal production required to develop sustainable and efficient production systems to meet the challenges of domestic and global needs. It will cover the scientific principles (biochemical, anatomical and physiological) that underpin intensive and extensive animal production. These principles will be related to key production parameters and indicators including growth, reproduction, lactation and milk production, fibre production and breeding. Students will apply scientific principles to the planning of production in farming simulation models. Through these simulation programs students will explore production case studies and develop advisory plans. Focus areas include animal health and management, whole farm production systems and the challenges to animal production from changing climate, food safety and quality, consumer requirements and animal welfare.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

AGRI 9001 Higher Degree Research Thesis - Agriculture (80 Credit Points)
Subject Details (p. 2365) Legacy Code: 800065
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

Architecture and Urban Envir. (ARCH)

ARCH 1004 Drawing and CAD (10 Credit Points)
Subject Details (p. 2366) Legacy Code: 301228
This subject is designed to provide students with the knowledge and skills necessary to develop elementary design skills and basic CAD (Computer Aided Design) proficiency suitable for application within the building industry. Students will learn to describe building designs in plan, section, elevation, isometric and perspective views. Basic drafting concepts and skills will be acquired in the context of individual detached housing designs. Students will also be required to develop appropriate analytical and problem solving skills in dealing with a realistic house building project.
Level: Undergraduate Level 1 subject
Equivalent Subjects: ARCH 1003 Graphic Communication and Design (WSTC)
ARCH 1001 Graphic Communication and Design
ARCH 1005 Drawing and CAD (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ARCH 1005 Drawing and CAD (WSTC) (10 Credit Points)
Subject Details (p. 2367) Legacy Code: 700306
This subject is designed to provide students with the knowledge and skills necessary to develop elementary design skills and basic CAD (Computer Aided Design) proficiency suitable for application within the building industry. Students will learn to describe building designs in plan, section, elevation, isometric and perspective views. Basic drafting concepts and skills will be acquired in the context of individual detached housing designs. Students will also be required to develop appropriate analytical and problem solving skills in dealing with a realistic house building project.
Level: Undergraduate Level 1 subject
Equivalent Subjects: ARCH 1003 - Graphic Communication and Design (WSTC) ARCH 1001 - Graphic Communication and Design ARCH 1004 - Drawing and CAD
Restrictions: Please see the Subject Details page for any restrictions for this subject

ARCH 2001 Architecture Studio - Fundamentals of Analogue Design (20 Credit Points)
Subject Details (p. 2368) Legacy Code: 301197
This subject will introduce students to fundamentals of spatial composition as it relates to visual and temporal experience in architectural contexts. Project-based assessments will involve the creation of 2D and 3D compositions that explore traditional organisational strategies, classical principles of geometry, materiality, experiential phenomena, and representation. Students will work with analogue and traditional tools including freehand drawing and conventional shop equipment. The subject will also provide an introduction to the history, theory, and discourse of architecture from 4000BC to the Enlightenment.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ARCH 2002 Architecture Studio - Fundamentals of Digital Design (20 Credit Points)
Subject Details (p. 2368) Legacy Code: 301198
This subject introduces students to fundamentals of spatial organisation and human experience in the built environment. Principles of making will be practiced and analysed for their relationship to architectural outcomes, the study of Modern organisational strategies, materiality, experiential phenomena, and abstraction. Students work on project-based assessments that involve an iterative process of reflection and refinement, the use of digital techniques of 3D design including NURBS modelling and rapid prototyping to explore architectural concepts. This work is contextualised as students learn about the history, theory, and discourse of architecture from the Industrial Revolution to the Present.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ARCH 2003 Development Control (10 Credit Points)
Subject Details (p. 2369) Legacy Code: 300723
This subject provides an overview of development control and associated legislation. These include: interpretation of planning law as it relates to the development application process; the assessment of applications for approval for development as an integrated process; the evaluation of the impact assessment process; appropriate consideration of urban design, streetscape, heritage and conservation issues; and the evaluation of the impact of parking, traffic, landscape and services in development proposals.
Level: Undergraduate Level 2 subject
Equivalent Subjects: ARCH 2004 - Development Control
Incompatible Subjects: BLDG 1012 - Property Development Controls
Restrictions: Please see the Subject Details page for any restrictions for this subject

ARCH 3002 Architecture Studio - Global Cities (20 Credit Points)
Subject Details (p. 2370) Legacy Code: 301201
This subject will situate learning in the context of the Global City. Projects will be used to investigate scenarios that are common to the contemporary condition of the developing world and the expanding metropolis in various international contexts. Students will either travel to international sites, work with international partners, or work remotely on problems beyond the Australian context. Work integrated learning will be a key feature of the Global Cities studio and will involve relevant members of the professional community to help lead studio investigations. Assessments will include complex urban projects at a large scale, developed using the design, communications, technical, and theoretical studies that have underpinned their education. Assessments will be project-based in real world scenarios and will incorporate sustainable strategies of design. Studies will be supplemented by tuition in structural design and will also be informed by concurrent studies in building science.
Level: Undergraduate Level 3 subject
Pre-requisite(s): ARCH 3004 AND
ARCH 3003
Restrictions: Please see the Subject Details page for any restrictions for this subject

ARCH 3003 Architecture Studio - Rethinking Urbanism (20 Credit Points)
Subject Details (p. 2371) Legacy Code: 301200
This subject will extend the concept of Urban Transformation, where the architect is an agent of progress and change in the built environment. Students will refine their use of architectural design as a medium for speculation and advocacy in the public realm and in daily life of the city. Rethinking Urbanism will investigate architecture and civic space at the scale of public projects. Students will use various models of three-dimensional representation for communication and experimentation with new ways of building the urban fabric. Assessments will be project-based in real world scenarios and will incorporate sustainable strategies of design.
Level: Undergraduate Level 3 subject
Pre-requisite(s): ARCH 2001 AND
ARCH 2002
Restrictions: Please see the Subject Details page for any restrictions for this subject

ARCH 3004 Architecture Studio - Rethinking the Sub-urban (20 Credit Points)
Subject Details (p. 2372) Legacy Code: 301199
This subject will introduce the concept of Sub-urban Transformation, where the architect is an agent of progress and change in the built environment. Students will learn to use architectural design techniques as a medium for speculation and advocacy in the public realm and in daily life of the city. Rethinking the Sub-urban will investigate domesticity at the scale of residential projects and communities. Students will be concurrently trained in the use of Building Information Modelling (BIM) as a means to develop project work and collaborate as they explore new ways of building the suburban fabric. Assessments will be project-based in real world scenarios and will incorporate sustainable strategies of design.
Level: Undergraduate Level 3 subject
Pre-requisite(s): ARCH 2001 AND
ARCH 2002
Restrictions: Please see the Subject Details page for any restrictions for this subject

ARCH 3005 Architecture Studio - The Infrastructural (20 Credit Points)
Subject Details (p. 2373) Legacy Code: 301202
This subject situates learning in the context of the major urban public projects that sit at the intersection of architecture, infrastructure, and urban design and which highlight the pressure of population growth, climate change, or other significant demographic, economic, political, or ecological transformations. Work integrated learning is a key feature of the Rethinking Infrastructure studio which involve relevant members of the professional community to help lead studio investigations and/or embed students in professional practices. Projects include architectural responses to complex urban and infrastructural projects at a large scale such as transit oriented development, high density housing, landscape urbanism. Students develop professional practice skills on these real world projects and incorporate sustainable strategies of design as well as learning skills in advocacy, entrepreneurship, and professional readiness.
Level: Undergraduate Level 3 subject
Pre-requisite(s): ARCH 3004 and ARCH 3003
Restrictions: Please see the Subject Details page for any restrictions for this subject

ARCH 3006 Urban Design (10 Credit Points)
Subject Details (p. 2374) Legacy Code: 102070
The subject aims to provide students with an understanding of the nature, role and relevance of urban design. It will examine the issue of urban design at both the micro and macro scale. It also aims to promote awareness of, and sensitivity to, design considerations, and to enable students to critically evaluate urban spaces and places. A key feature of the course will be the development of the graphical communication skills of students.
Level: Undergraduate Level 3 subject
Equivalent Subjects: ARCH 3001 - An Introduction to Urban Design
LGYA 1333 - Local Planning
Restrictions: Please see the Subject Details page for any restrictions for this subject

ARCH 4001 Architecture Studio: Urban Architecture (20 Credit Points)
Subject Details (p. 2374) Legacy Code: 301316
This subject will introduce students to urban architecture with complex brief requirements, site conditions and technological considerations. Emphasis is on design resolution considering historical, geographical and social aspects. Experimentation at various theoretical levels is expected and students are encouraged to deliver ambitious and imaginative architectural responses.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ARCH 4002 Energy Efficiency in Buildings (10 Credit Points)
Subject Details (p. 2375)
This subject builds on students' basic knowledge of architecture, construction, and environmental science to introduce principles of architectural sustainability and building science. Students are involved in activities developing essential knowledge of a building's energy efficiency through the application of thermal, lighting, and acoustic design. This enables them to incorporate the construction strategies necessary to achieve indoor environmental quality and improve building users' comfort. The abilities that students develop in this subject will be appealing to organisations looking to expand optimisation and renewable energy strategies.
Level: Undergraduate Level 4 subject
Pre-requisite(s): BLDG 1009
BLDG 1015
Equivalent Subjects: CIVL 4003
Restrictions: Please see the Subject Details page for any restrictions for this subject

ARCH 5001 Urban Architecture Project
Subject Details (p. 2376)
This subject will introduce students to urban architecture within complex contextual environments, site conditions and technological considerations. Emphasis is on the consideration of contextual, historical, geographical and social aspects. Students will be expected to apply various theoretical levels in the delivery of ambitious and imaginative urban architectural responses. This subject will provide students with a variety of opportunities to undertake a specific project in urban architecture which will prepare them for working in professional settings. Some of the well regarded opportunities that students may be eligible to participate in include the Urban Transformation Summer School and the Sydney Opera House BUILD Program.
Level: Postgraduate Coursework Level 5 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ARCH 6001 Urban Transformation Research Project
Subject Details (p. 2376)
An essential skill required by researchers is the ability to propose research, justify it in a persuasive manner, and undertake a project with rigor. Through interactive workshops, Urban Transformation Research Project helps students develop and refine a research proposal. The subject provides students will the opportunity to conduct either (a) a traditional written thesis or (b) a project based design research project. There is no class work, rather, students work individually alongside a supervisor with significant expertise in the area of researching and developing their individual project. After successful completion of this subject, students will have demonstrated an ability to design, justify, and undertake a research project in their discipline which will benefit them in their future careers.
Level: Postgraduate Coursework Level 6 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ARCH 7001 Developing Sustainable Places (10 Credit Points)
Subject Details (p. 2377) Legacy Code: 101636
This subject provides an understanding of environmental, economic and social issues arising from the effects of urban development within city regions and examines the relationship between sustainable development and metropolitan planning in the Australian and global context. It focuses on the concepts related to sustainability, sustainable development and sustainable cities. It also looks into recent initiatives towards the realisation of sustainable cities.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 1340 - Land Use Strategy Design LGYA 1294 - Urban Challenges Developing Sustainable Places
Restrictions: Please see the Subject Details page for any restrictions for this subject

ARCH 7002 Heritage and Planning (10 Credit Points)
Subject Details (p. 2378) Legacy Code: 102069
This subject explores the values behind, and practicalities regarding, heritage and planning, from federal and state perspectives in Australia. With a specific focus on Sydney, the subject explores how planning applications, within the urban development sphere, impact upon heritage assets, and how these impacts are mitigated through heritage planning legislation. The subject asks students to step into the shoes of heritage planning professionals and to identify and research a heritage asset that is to be impacted by a potential planning proposal and then to design an appropriate mitigation response within the bounds of relevant heritage legislation.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: ARCH 3001 - Introduction to Urban Design
Restrictions: Please see the Subject Details page for any restrictions for this subject

ARCH 7003 Managing Cities: History and Theory (10 Credit Points)
Subject Details (p. 2379) Legacy Code: 101633
This subject concerns philosophical thought and critical thinking in public planning. It develops an understanding of planning theories and examines past and present trends in this area. It reviews the theoretical frameworks for an insight into planning processes and analyses the economic, spatial and socio-political dimensions of activities involved.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 1293 - Metropolitan Structures Cities in Transformation
Restrictions: Please see the Subject Details page for any restrictions for this subject

ARCH 7004 Planning and Development Control (10 Credit Points)
Subject Details (p. 2379) Legacy Code: 300708
This subject describes the general planning issues relevant to developments in rural and urban areas. The content covers the factors important in determining the allocation and use of land and resources together with the contributions of development to the built and natural environment. Topics include: urban and rural design issues; the impact of the 3 tiers of Government process on development control, and the legal, political and technical issues relevant to impact assessments. Particular attention will be paid to the role of the private sector in developing controls, self-regulation and appeal processes. Planning in both the micro and macro environments is examined in the context of sustainability, indigenous culture and heritage, private land conservation, community resources and its strategic effects on the recycling of existing land and non-renewable natural resources.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ARCH 7005 Urban Management Practice: Governance and Power in the City (10 Credit Points)
Subject Details (p. 2380) Legacy Code: 101314
Governance is a central but often overlooked issue in Urban Management. What is governance? What are the principles of good governance? What are some of the governance challenges in major metropolitan cities that cover multiple jurisdictions? How do statutory local governments engage with specialist state agencies in fields such as economic development, environmental planning, and infrastructure planning? This subject answers these questions, reviews governance practices in major cities across the world and provides students with knowledge of key governance tools. Students will prepare a research report dealing with a significant urban governance challenge, and provide recommendations about how to implement solutions to that challenge. The central objective of the course is to provide students with a sound framework and set of tools with which to address governance issues.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ARCH 7006 Urban Planning Placement Project (10 Credit Points)
Subject Details (p. 2381) Legacy Code: 102604
This Urban Planning Placement Project subject provides Master of Urban Management and Planning and Master of Planning students with an understanding of the planning/urban management workplace. Students are placed with local planning or urban management employers to work on a variety of planning tasks. Placements are structured for student engagement in professional work in planning. Placement agencies ensure that students are supervised by experienced planners, are mentored through site visits and work on planning projects in a professional capacity. Agreements with supervisors and clear communication lines are set to clarify student engagement and their involvement in meaningful professional tasks that contribute to an authentic learning experience, rather than simply unpaid or irrelevant labour.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 1297 - Urban Management Placement Project LGYC 4646 - Urban Management Placement Project
Restrictions: Please see the Subject Details page for any restrictions for this subject

ARCH 7007 Advanced Design Communication (10 Credit Points)
Subject Details (p. 2382) Legacy Code: 301239
Advanced Design Communication is a core architecture seminar in the Master of Architecture (Urban Transformation) program that will explore contemporary methods of design generation and visualisation, representation techniques, and collaboration tools, including but not limited to digital fabrication, computational and algorithmic design, simulation, virtual and augmented reality, building information modelling, parametric design, and scripting. Students will undertake case studies from the community of practice and precedents in this disciplinary domain, including an investigation of how emerging technologies are used in existing professional settings locally and internationally. Students will develop their own design-based enquiry to apply knowledge and skills acquired in the seminar that result in a project and report of their work.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ARCH 7008 Integrated Building Technology (10 Credit Points)
Subject Details (p. 2382) Legacy Code: 301240
Integrated Building Technology is a core subject in the Master of Architecture (Urban Transformation) course that will introduce students to the range of specialist consultants in structural and civil engineering, mechanical, electrical, communications, and transport systems, fire safety and egress, and environmental systems (acoustics, lighting, thermal) that are required to complete real projects in practice. Students gain an insight into the principles and concepts of each discipline which provides sufficient depth of knowledge and understanding of the role of the architect to meaningfully engage and collaborate with the allied specialists. Understanding how to communicate and document the integration and coordination of systems in a building is developed through exposure to case studies, specialist presentations, and field trips. Students apply concepts introduced in the subject to the design studio project they are concurrently developing in subject Practice Research Studio Housing and demonstrate their understanding of system integration through graphic representation techniques and a design report.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ARCH 7014 Health, Wellbeing and Place (10 Credit Points)
Subject Details (p. 2384) Legacy Code: 102769
Planning for health and wellbeing is essential for ensuring human flourishing in our cities and regions. This subject investigates geographies of health, wellbeing and place through analysis of physical, mental and environmental health and spaces of wellbeing. Drawing on insights from geography, planning and related disciplines it asks how built environment professionals can create healthy futures through place making. Through local, national and international case studies the subject will explore how cities can be better designed to counter growing lifestyle epidemics, motivate active living and respond to the opportunities of population ageing and challenges of environmental change.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ARCH 7015 Urban Transformation Studio Environments (20 Credit Points)
Subject Details (p. 2384) Legacy Code: 301382
Urban Transformation Studio Environments focuses on the research and design aspects of a complex architectural project. It aims to teach students strategies to address crucial topics like whole life carbon, resilience, climate change, and environmental sustainability, emphasising the pivotal role of architects in tackling these issues. Through immersive studio work, students will gain insight into contemporary architectural practices and contemporary precedents, while actively collaborating with an extensive network of professionals, stakeholders, and site conditions. Students will be expected to apply knowledge of strategies and precedents to develop high-quality architectural projects, emphasising spatial, experiential, and technical excellence, alongside a robust understanding of key environmental issues.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: ENGR2025
Restrictions: Please see the Subject Details page for any restrictions for this subject

ARCH 7016 Practice Research Studio Housing (20 Credit Points)
Subject Details (p. 2385) Legacy Code: 301383
Practice Research Studio Housing shall focus upon the research and design of a comprehensive architectural project over the duration of the semester through either a civic, residential, or hybrid project type (as distinct from Practice Research Studio Civic in the preceding semester). Students will explore topics related to the umbrella of urban transformation and to contemporary architectural practices through the studio work, and will engage with a broad community of professionals, stakeholders, and programmatic situations.
Projects shall be representative of the often-contested intersection of competing interests of the urban environment, where the designer must conduct rigorous analysis and research to inform high-quality design outcomes that are attendant to social, ethical, regulatory, technical, procurement, and environmental issues. Students will undertake projects that involve international sites, project contexts, programs, or collaborations. Students are expected to develop project work to a high degree of resolution in terms of spatial and experiential quality, demonstrating through clear communication and representation techniques the technical proficiency, conceptual rigour, and theoretical and historical knowledge that support the project outcomes. Projects in the studio will vary in scale, setting, building type, and complexity from year to year, with a thematic emphasis that contributes to the overall research direction of the architecture program at WSU. Students will be expected to engage in the studio with a high degree of individual motivation, resourcefulness, and inquisitiveness as would be expected of professional level studies.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): ARCH 7008
Restrictions: Please see the Subject Details page for any restrictions for this subject

ARCH 7017 Urban Transformation Studio Indigenous (20 Credit Points)
Subject Details (p. 2386) Legacy Code: 301398
Urban Transformation Studio Indigenous introduces students to concepts and processes relating to project planning, working with country and perspectives of Aboriginal and Torres Strait Islander communities, consulting with First Nations groups, engaging with Indigenous knowledge in the Australian context and working collaboratively with stakeholders to understand site, brief and budget requirements from multiple perspectives. The studio will engage with a real-world design project supported by First Nations consultation and expert mentoring giving students opportunities to implement aspects of Indigenous knowledge in their design process, project development, feasibility and design outcome. Students will gain skills in project development that includes intensive site analyses, the evaluation of multiple design options, designing the program through consultation and then implementing approaches with stakeholder feedback to satisfy the site and spatial requirements of the community. Students will learn about existing forms of knowledge and cultural histories in regard to site, as well as the ethical and cultural tools to engage with meaningful and appropriate consultation and co-design for major public projects. Through the design process, students will apply creative imagination, an understanding of design precedents, emergent knowledge, and skills in critical evaluation to create a detailed proposal for the given site and its community.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): ARCH 7015
AND
ARCH 7016
AND
HUMN 4001
Equivalent Subjects: ARCH 7011- Urban Transformation Thesis Studio 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

ARCH 7018 Architectural Professional Practice (10 Credit Points)
Subject Details (p. 2387) Legacy Code: 301404
This subject introduces students to the expectations and the requirements that are needed for a professional practice in Architecture. As such students will require to critically examine a broad range of real life professional, legal, business and ethical challenges that are likely to face in practice and apply critical thinking in order to resolve these problems. The intention here is to assist students in navigating through complex real life challenges and to bring a common sense and real world approach to solving a problem. Transitioning from university to the workplace can be quite daunting thus, the aim here is to allow students to gain the knowledge and skills to make informed decisions but most importantly to build confidence in themselves as they move forward with their career.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ARCH 7019 Urban Transformation Studio Global (20 Credit Points)
Subject Details (p. 2388) Legacy Code: 301400
In this high-level, project unit, students apply theory and practice to their urban transformation project relating to Greater Western Sydney region while being mentored in developing ethical and aesthetic judgement, creative imagination, independent and critical reasoning skills. Students learn to present a project design that is well resolved integrating spatial and experiential quality, contextual, cultural, social and environmental considerations, technical proficiency, and conceptual rigour. The design contributes to the students' portfolio of work demonstrating concept, resolution and presentation design skills leading towards ethical architectural practice as well as showcasing a civic project for Australia's greatest megatropolis.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): ARCH 7015 Practice Research Studio Civic and ARCH 7016 Practice Research Studio Housing and (HUMN 4001 Research Design 1 or HUMN 4009 Researcher Development 1 Reading Writing and the Business of Research) and (HUMN 4002 Research Design 2 or HUMN 4010 Researcher Development 2 Proposing and Justifying Research)
Equivalent Subjects: 301242 Urban Transformation Thesis Studio 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

ARCH 7020 Cool Green Cities (10 Credit Points)
Subject Details (p. 2389) Legacy Code: 102853
Climate change, urban expansion and densification result in hotter microclimates and loss of green infrastructure. The increasing frequency and severity of heatwaves, floods and droughts require changes to how we design and retrofit existing neighbourhoods and build new suburbs. Contemporary urban planning and design principles recognise blue and green infrastructure as a 'must have'. Blue and green infrastructure is key to building cool and resilient cities capable of functioning well within the social, environmental and economic challenges of the 21st century. This subject provides knowledge about what it takes to deliver cool green cities. Focusing on practical applications at precinct or suburb scale, it enables students to implement learned principles in their professional practice.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: ARCH 7013 - Green Urbanscapes Bio-physical Functions and Services
Restrictions: Please see the Subject Details page for any restrictions for this subject

ARCH 7021 Architecture Studio Autumn Intensive (10 Credit Points)
Subject Details (p. 2390)
This subject will introduce students to real world urban transformation design scenarios and clients in an intensive and site-based manner. Architecture Studio Autumn Intensive focusses on architectural interventions for complex urban scenarios, giving students exposure to issues of scale, spatial design, design detailing and fabrication. With a focus on small-scale buildable interventions, students will be expected to apply skills in design, brief development, user analysis, communication and collaboration in the context of complex urban environments. The subject provides students with an immersive multi-disciplinary design studio experience, introducing them to skills in conceptual thinking and developed design that can be applied to the design of urban interventions. Students will also be introduced to clients, users and consultants in an environment that will prepare them for working in professional architecture and design settings. In order to communicate their design to a range of audiences, students will learn skills in communication, architectural modelling and visualisation in the representation of design solutions for multiple audiences.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: ARCH 5001
Restrictions: Please see the Subject Details page for any restrictions for this subject

ARCH 7022 Architecture Studio Spring Intensive (10 Credit Points)
Subject Details (p. 2390)
This subject will introduce students to real world adaptive re-use design scenarios in an intensive and site-based manner. Architecture Studio Spring Intensive focuses on industrial or urban heritage sites at a range of scales, giving students exposure to issues of recycling, whole life carbon and heritage preservation. As well as developing skills in research and site analysis, students will be expected to develop conceptual and developed design proposals for complex adaptive re-use scenarios with an understanding of the cycles of post-industrialisation. Working in immersive multi-disciplinary design teams, students will develop an awareness of the environmental, social and structural role that architectural heritage plays in urban transformation. Students will work across a range of complex architectural sites which are sometimes derelict, contaminated, heritage-protected or in need of renewal, to learn about the role of adaptive re-use in future architectural and climate scenarios. Students will also be introduced to regulations, clients and consultants in an environment that will prepare them for working in professional architecture and design settings. In order to communicate their design to a range of audiences, students will learn skills in communication, architectural modelling, documentation and visualisation in the representation of design solutions for multiple audiences.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ARCH 9001 Higher Degree Research Thesis - Urban Research Centre (80 Credit Points)

Banking, Finance and Related (FINC)

FINC 1001 Management Accounting Fundamentals (10 Credit Points)
Subject Details (p. 3350) Legacy Code: 200116
This subject replaced by ACCT 1010 Management Accounting Fundamentals from Trimester 2, 2022. This subject provides an introduction to management accounting in an e-commerce environment. The interrelations of management accounting to other functional areas, to suppliers, to customers, and to other sources of external information relevant to planning and control are examined. Topics include the development and logic of routine and non-routine analysis performed to support management decision making.
Level: Undergraduate Level 1 subject
Pre-requisite(s): ACCT 1007
Restrictions: Please see the Subject Details page for any restrictions for this subject

FINC 1003 Professional Relationships and Communication in Business (10 Credit Points)
Subject Details (p. 3351) Legacy Code: 200747
This subject will introduce students to and assist them in the development of a broad range of necessary skills required by today's professional advisers. Such skills are highly valued, transferable and universally recognised in the world of work and will assist students in managing their day to day relationships with clients and colleagues. Skills include: * Creation and on going maintenance of the client adviser relationship and a recognition of the importance of trust as the foundation of that relationship; * Identification of the broad needs of clients and an appreciation of differing levels of client financial literacy; * Communication and interpersonal skills which contribute to productive relationships with clients and colleagues; * Professional/ Academic research and writing skills; * Enhanced team based skills that contribute to productive working relationships and outcomes.
Level: Undergraduate Level 1 subject
Equivalent Subjects: LGYA 4516 - Financial Advisory Relationships
Restrictions: Please see the Subject Details page for any restrictions for this subject

FINC 1004 Financial Concepts and the Language of Business (WSTC) (10 Credit Points)
Subject Details (p. 3351)
A business needs to know how to generate funds and ultimately invest it in resources that will bring it the most benefit. Keeping track of this money as it flows in and out of an enterprise is critical for success which is why we refer to it as speaking the language of business. In this subject, you will learn how to keep consistent records as dictated by accounting principles. With the basics in place, you will further your understanding of where funds come from and how financial information can be used to make informed choices about the future direction of the business.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

FINC 2002 Personal Asset Management (10 Credit Points)
Subject Details (p. 3351) Legacy Code: 200265
This subject provides students with necessary knowledge and skills to construct and manage a portfolio of personal assets. Emphasis is placed on how the individual, rather than the firm, approaches financing and investing decisions. The subject will consider the theories of portfolio construction, concepts of investment risk, return and diversification, matching asset allocation based on client's individual risk profile, design and management of a personal investment portfolio and the law as it relates to investments.
Level: Undergraduate Level 2 subject
Pre-requisite(s): FINC 3006
Incompatible Subjects: -
Restrictions: Please see the Subject Details page for any restrictions for this subject

FINC 3001 Bank Management (10 Credit Points)
Subject Details (p. 3352) Legacy Code: 200818
Bank Management provides students with an understanding of modern banking by identifying the main types of risk confronted by banks and applying relevant techniques to measure and manage those risks. Students will recognise that the risks faced, and the methods and markets through which these risks are managed, are similar for the managers of other types of financial institutions such as building societies, investment banks and insurance companies as well as, to some extent, non-financial corporates. Consequently, the subject will prepare students for careers throughout the financial services sector and will also be beneficial for other business professionals.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

FINC 3002 Behavioural Finance (10 Credit Points)
Subject Details (p. 3353) Legacy Code: 200518
Traditional theories of finance are based the assumption that investors are both rational and utility maximizing. The Efficient Markets Hypothesis in particular has assumptions about investor behaviour which underpin its key predictions. The tenants of behavioural finance disputes the validity of these assumptions. This subject challenges traditional theory by examining how decision making and investor behaviour may be driven by personal and market psychology.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

FINC 3004 Financial Planning (10 Credit Points)
Subject Details (p. 3353) Legacy Code: 200627
The subject endeavours to provide students with an understanding of the complex process and contextualisation of the Australian Financial Planning Industry. This subject aims to introduce students to the principles of personal financial planning and the provision of personal financial advice including the preparation of a Statement of Advice (SOA). Topics covered include the current Australian regulatory environment, strategies for the accumulation of wealth and risk protection, retirement planning, estate planning, taxation consequences, debt and credit management and home ownership. This subject meets ASIC requirements (PS146) in relation to both knowledge and skills.
Level: Undergraduate Level 3 subject
Pre-requisite(s): FINC 3014
Equivalent Subjects: -
Restrictions: Please see the Subject Details page for any restrictions for this subject

FINC 3006 Insurance Advising - Theory and Practice (10 Credit Points)
Subject Details (p. 3354) Legacy Code: 200272
This subject introduces students to the profession of Financial Planning and provides a substantial grounding in the theories and practices of the profession with a special focus on insurance and risk management. This subject aims to enable students to make knowledgeable and sound risk management decisions, to understand advisory functions and the role and legal obligations of the adviser in the financial planning and insurance advisory process. The subject is useful to students who wish to increase their knowledge generally of Financial Planning but also for students specifically interested in the insurance aspects of the financial planning process. The subject is designed to include an understanding and exploration of managing personal risk, the operation of insurance markets, regulation, insurance products including life, general, health and mandated policies and recommendations for using insurance products for individuals, their families and small business. This subject meets Financial Adviser Standards and Ethics Authority (FASEA) accreditation requirements and also introduces general Financial Planning concepts.
Level: Undergraduate Level 3 subject
Equivalent Subjects: -
Restrictions: Please see the Subject Details page for any restrictions for this subject

FINC 3007 International Property (10 Credit Points)
Subject Details (p. 3355) Legacy Code: 200545
This subject examines international property, with particular attention given to international property investment and the factors influencing international property markets. The development of international property markets is assessed, including the structure of mature, developing and emerging property markets. The performance analysis of both direct and indirect international property is also examined to assess the strategic contribution of international property in an investment portfolio.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

FINC 3008 Investment Management (10 Credit Points)
Subject Details (p. 3355) Legacy Code: 200819
Investment Management describes the theory and practice of investment decision-making. The general objective of the subject is to introduce students to the tools of financial investment by providing a conceptual framework within which the key financial decision of investment can be analysed. This subject provides an overview of the theory of investing by describing investor indifference curves and optimal portfolios. The subject will include evaluating asset allocation, security selection and security analysis within an active portfolio management framework, measuring portfolio performance and security selection decisions.
Level: Undergraduate Level 3 subject
Incompatible Subjects: ECON 3015 - Investment Management ECON 3020 - Portfolio Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

FINC 3009 Property Finance (10 Credit Points)
Subject Details (p. 3356) Legacy Code: 200875
The aim of this subject is to provide insight into property finance in Australia and overseas. Students critically review equity and debt financing and examine the financing alternatives available, as well as methods for evaluating these alternatives. Students also examine the impact of debt financing on a property and evaluate the taxation aspects of property transactions. In addition, students gain both a theoretical and an applied understanding of an after-tax cash flow projection in this subject. International property finance is also addressed.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYB 6469 Property Finance and Tax FINC 3010 Property Finance and Tax
Restrictions: Please see the Subject Details page for any restrictions for this subject

FINC 3011 Property Investment (10 Credit Points)
Subject Details (p. 3357) Legacy Code: 200749
Property Investment addresses critical issues in property investment analysis. The characteristics and fundamentals of property investment will be addressed. Students will learn and apply the concepts of property economics, market analysis, valuation, financial analysis and risk analysis in making property investment decision. The subject pays special attention to the discounted cash flow method as the basis of analysis for investment properties. Finally, students will be introduced to property finance, taxation and international property investment issues.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 4694 - Property Investment
Restrictions: Please see the Subject Details page for any restrictions for this subject

FINC 3013 Property Portfolio Management (10 Credit Points)
Subject Details (p. 3358) Legacy Code: 200873
This subject examines the role of property in an investment portfolio, with particular attention given to property portfolio performance analysis and property investment strategy. Indirect property investment vehicles in Australia and overseas are assessed, including Real Estate Investment Trusts, property syndicates, property securities funds and unlisted property funds. The performance analysis of both direct and indirect property is also examined to assess the strategic contribution of property to an investment portfolio.
Level: Undergraduate Level 3 subject
Equivalent Subjects: FINC 3012 Property Portfolio Analysis (V2) LGYA 4695 Property Portfolio Analysis (V2)
Restrictions: Please see the Subject Details page for any restrictions for this subject

FINC 3014 Retirement and Succession Planning (10 Credit Points)
Subject Details (p. 3358) Legacy Code: 200899
Retirement and Succession Planning aims to provide a study of the legislative framework and financial planning issues that impact on advice and decisions relating to retirement planning and estate and succession planning. The subject focuses on identifying practical and strategic planning opportunities and outcomes. The subject will be run with students discussing case studies and preparing critical analysis reports on contemporary issues. Successful completion of the subject will introduce students to retirement planning and superannuation concepts which could lead to careers in these fields.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 1004
Restrictions: Please see the Subject Details page for any restrictions for this subject

FINC 3015 Security Analysis and Business Valuation (10 Credit Points)
Subject Details (p. 3359) Legacy Code: 200921
This subject analyses companies from a fundamental perspective in order to derive an intrinsic value for securities. The focus is on the attempt by active investors to identify mispriced securities using publicly available information, company reports and financial market information. The analytical techniques of financial statement analysis (e.g. fundamental analysis, free cash flow analysis and pro-forma analysis) and the issue of the "reliability" and "quality" of publicly available information are discussed and explored. Those contemplating careers in investment banking, financial consulting, trust funds, superannuation funds, hedge funds, and brokerage firms will find this applied subject both useful and interesting.
Level: Undergraduate Level 3 subject
Pre-requisite(s): ECON 2002
Restrictions: Please see the Subject Details page for any restrictions for this subject

FINC 7001 Communication and Ethics for Financial Planners (10 Credit Points)
Subject Details (p. 3360) Legacy Code: 201008
Students are immersed in an ethical framework in which to practice an array of essential skills required, by financial advisers, to create and maintain professional client adviser relationships. The subject investigates the importance of interpersonal skills and various approaches to dealing with the broad needs of clients - communication, psychological aspects of client decision making, culture and the creation of trust in the adviser -client relationship. This subject also includes professional writing skills, team work, time management, financial literacy and the promotion of professional services.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: FINC 7002 - Communication and Ethics for Financial Planner
Incompatible Subjects: FINC 7004 - Financial Adviser Skills
Restrictions: Please see the Subject Details page for any restrictions for this subject

FINC 7002 Communication and Ethics for Financial Planners (EO) (10 Credit Points)
Subject Details (p. 3361) Legacy Code: 900660
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

FINC 7004 Financial Adviser Communication Skills (10 Credit Points)
Subject Details (p. 3361) Legacy Code: 200987
In this practical subject students develop the ability to write up a risk profile with objectives for clients with varying needs. Students analyse investment decisions and provide advice to clients which is informed by regulatory issues relevant to the finance industry. Students are required to demonstrate the ability to create a Statement of Advice for clients of different risk preference and investor profile.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: BUSM 7007 - Business Communication Skills
Incompatible Subjects: FINC 7001 - Communication and Ethics for Financial Planners
Restrictions: Please see the Subject Details page for any restrictions for this subject

FINC 7005 Financial Adviser Communication Skills (EO) (10 Credit Points)
Subject Details (p. 3362) Legacy Code: 900654
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

FINC 7006 Financial Modelling (10 Credit Points)
Subject Details (p. 3362) Legacy Code: 51054
This subject is essential in preparing students for applied financial analysis and modelling applications used extensively in a number of postgraduate finance subjects. It familiarises students with the strengths and limitations of contemporary quantitative modelling techniques using multivariate statistical procedures and optimisation approaches. Students are also familiarised with relevant software.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

FINC 7007 Financial Planning Research Project (10 Credit Points)
Subject Details (p. 3363) Legacy Code: 200959
Financial Planning Research Project encompasses a major research project and presentation. This equips students with skills to address challenges through research and the ability to apply knowledge developed in earlier subjects of study. This student-centered subject provides supervision of research and analytical practices to enhance skill development and capacity to engage with the problems confronting the financial planning industry. Students will have scope to focus on issues that are of particular concern to the financial planning industry. As an integrating subject, it demands participants bringing their knowledge together and with curiosity to develop recommendations in a format that can showcase their achievements.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

FINC 7008 Financial Products and Markets (10 Credit Points)
Subject Details (p. 3364) Legacy Code: 200986
This subject introduces students to the wide range of investment products and financial securities. Importantly, it develops students' ability to analyse investment opportunities and understand their respective risk and reward profiles. Students will also develop the computational skills necessary for transactions in financial markets, which enable an informed comparison of securities for the purposes of investment decisions.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

FINC 7009 Financial Products and Markets (EO) (10 Credit Points)
Subject Details (p. 3364) Legacy Code: 900653
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

FINC 7010 Insurance and Risk Management (10 Credit Points)
Subject Details (p. 3365) Legacy Code: 200870
This subject introduces students to the use of a range of insurance types and products to manage risk for individuals and small business. It aims to identify, evaluate and manage risk as part of the financial planning process to produce a compliant statement of advice.
A number of risk management strategies are identified and the importance of life insurance, total and permanent disablement, trauma policies, property insurance, health cover, income protection and business insurance in managing risk is addressed. The subject provides an understanding of the various issues that can arise with respect to insurance policies and premiums and uses both the multiple and needs analysis approaches to calculate the level of cover required. A holistic approach to the risk management process is provided where a variety of insurance covers are considered in the context of a full financial plan that is adequate and affordable to the client and their specific needs as identified in the data collection process.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): FINC 7020 AND
FINC 7011 OR
FINC 7008
Equivalent Subjects: LGYB 6488 Insurance and Risk Management (PG)
Restrictions: Please see the Subject Details page for any restrictions for this subject

FINC 7011 Investment Planning (10 Credit Points)
Subject Details (p. 3366) Legacy Code: 200868
Investment Planning is one of the core subjects in the Master of Commerce (Financial Planning). The course is designed to provide the educational basis to enable students to increase competence as professional financial advisers and enable them to gain an advanced knowledge and understanding of the financial planning industry. The subject introduces basic concepts of risk and return in relation to investment planning. Various investment vehicles are covered including shares and fixed interest investments.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYB 6482 Principles of Investment Planning (PG)
Restrictions: Please see the Subject Details page for any restrictions for this subject

FINC 7012 Investment Planning (EO) (10 Credit Points)
Subject Details (p. 3366) Legacy Code: 900656
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

FINC 7013 Planning for Retirement (10 Credit Points)
Subject Details (p. 3367) Legacy Code: 200871
This subject provides an understanding of key issues, decisions and frameworks involved in financial planning for later life and succession. It enables the student to provide advice on business succession planning strategies, to evaluate the most appropriate estate planning for different types of clients at different stages of their life, to analyse wills, trusts and social security provisions, to apply relevant analytical and decision making tools to succession, trust administration, tax strategy and similar post-retirement decisions.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): FINC 7020
Restrictions: Please see the Subject Details page for any restrictions for this subject

FINC 7014 Planning for Retirement (EO) (10 Credit Points)
Subject Details (p. 3367) Legacy Code: 900657
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

FINC 7015 Principles of Financial Planning (10 Credit Points)
Subject Details (p. 3368) Legacy Code: 200866
This introductory subject describes the nature and process of financial planning and financial planning participants within the Australian economic, legal, social, cultural and ethical environment. The key influences affecting the client relationship are identified along with a focus on the use of verbal and non-verbal communication skills to develop client rapport. The subject also involves evaluating data collection and risk tolerance tools and identifying the impact of the regulatory and economic environment on stakeholders. Other topics involve budgetary analysis, term structure, investment decisions, ethics, client goal-setting and statement of advice compliance. The subject provides the foundational knowledge essential to develop and apply comprehensive knowledge across all financial planning areas.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYB 6479 Principles of Financial Planning (PG)
Restrictions: Please see the Subject Details page for any restrictions for this subject

FINC 7016 Principles of Financial Planning (EO) (10 Credit Points)
Subject Details (p. 3369) Legacy Code: 900658
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

FINC 7017 Property Investment Analysis (10 Credit Points)
Subject Details (p. 3369) Legacy Code: 200696
This subject introduces the concept of investment analysis in the context of property. It explores the unique features of income-producing property and examines the performance of these properties, their loans and their taxation through the application of a variety of investment techniques. Also covered are risk analysis techniques for income-producing properties and portfolios.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYB 6499 - Property Investment Analysis (V2)
Restrictions: Please see the Subject Details page for any restrictions for this subject

FINC 7019 Statement of Advice Research Project (10 Credit Points)
Subject Details (p. 3370) Legacy Code: 200960
Statement of Advice Research Project encompasses a major research project, a Statement of Advice (SOA). This SOA equips students with knowledge and skills to address challenges through research and the ability to apply knowledge developed in earlier subjects of study. This student-centered subject provides skill development and capacity to engage with the requirements of the profession. Students will have scope to focus on issues relevant to a case study as a means of developing a comprehensive SOA for a client (in the case study). As an integrating subject, it demands participants bringing together their knowledge to develop recommendations based on learning from earlier subjects. This subject also ensures students meet the regulatory and accreditation education requirements to be a registered financial adviser.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): Students enrolled in 2793 Masters of Financial Planning or 2807 Master of Stockbroking and Financial Advising must have successfully completed 60 credit points
Equivalent Subjects: LGYB 6493 - Current Issues in Financial Planning
Restrictions: Please see the Subject Details page for any restrictions for this subject

FINC 7020 Superannuation (10 Credit Points)
Subject Details (p. 3371) Legacy Code: 200867
This subject provides an understanding of the key issues, decisions and frameworks that affect financial planning for retirement. The subject focuses on superannuation and effective financing of retirement. It includes key concepts in prudential supervision of Australian superannuation, exploration of types of funds relevant to retirement, appreciating trends in retirement financing policies and their effects on providing advice, understanding the social security and age care systems' effect on retirement planning strategies; and correctly computing tax liabilities on superannuation, pensions, and estate management. This subject is the principal one for learning about self-managed superannuation funds, for whom they are suitable and for whom they are not.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

FINC 7021 Superannuation (EO) (10 Credit Points)
Subject Details (p. 3371) Legacy Code: 900659
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

FINC 7022 Applied Project (Finance and Property) (10 Credit Points)
Subject Details (p. 3372) Legacy Code: 201100
Applied Project (Finance and Property) is the integrating capstone subject, which brings together the skills that property students have developed during the course in preparing a high quality professional report in the finance or property industry. The subject encourages property students to demonstrate their ability to solve multi-disciplinary problems in relation to current and future issues that affect the finance or property sectors. The subject will also allow students to critically evaluate issues in their industry to determine and assess potential industry implications. The topics are determined from year to year by discussions between the individual student, the subject coordinator and the student's chosen supervisor.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: MKTG 7003 - Applied Project (Finance and Property)
Restrictions: Please see the Subject Details page for any restrictions for this subject

FINC 7023 Introduction to Finance (10 Credit Points)
Subject Details (p. 3372)
This subject provides business leaders and managers with a contextualised and non-technical introduction and overview of key financial concepts. The subject covers the fundamental principles underlying finance and financial decision-making by individuals and organisations. Upon completion of this subject, learners will possess the analytical skills necessary to understand and assess basic financial data using a range of metrics relevant in a range of contexts including green and sustainable finance.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: BUSM 7007
Restrictions: Please see the Subject Details page for any restrictions for this subject

Behavioural Science (BEHV)

BEHV 0001 Introduction to Human Behaviour (WSTC Prep) (10 Credit Points)
Subject Details (p. 2393) Legacy Code: 700220
This subject provides students with an overview and evolution of psychology and conventional scientific techniques and methods to explain and understand the causes of human behaviour and human personality. It also assists students in the development of academic skills commensurate with tertiary studies. Topics to be studied at an introductory level include: the history of psychology, intelligence, social psychology, psychoanalytic theories, behaviourist/learning theories, cognitive theories, biological view, developmental psychology and abnormal psychology.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: BEHV 0002 - Introduction to Human Behaviour (UWSC)

BEHV 0008 Psychological Foundations of Health (WSTC) (10 Credit Points)
Subject Details (p. 2397) Legacy Code: 900123
This subject provides an introduction to the psychology of health and behaviour relevant to understanding patient health decisions and outcomes. Students will be introduced to psychology and health to understand the tradition and relevance of psychology to nursing. This subject also includes foundation topics such as models of health and illness, health-behaviour change models, risk-taking behaviour, stress and health, learning and conditioning, personality and health, human development over the lifespan, death and dying, as well as group dynamics in health. These topics are offered as basic principles, theories, and models of psychology related to health behaviours, future learning, and professional practice in nursing.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 1001 Behaviour and Environment (10 Credit Points)
Subject Details (p. 2398) Legacy Code: 101182
This is a fully online subject. Everything we do depends on our environment, but rarely do we ask the question "what is the environment?" In this subject, we examine our various environments, the natural world, our built physical spaces and things, and the social, biological, and psychological domains. We then examine questions of: How do we interact with these environments, and how do they shape and influence our behaviour? How does understanding this interaction help us improve the human condition, while also maintaining the integrity of the environment? Drawing from psychology to understand human behaviour, the subject has application to as many discipline areas as there are spheres of human activity.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 1003 Introduction to Research Methods (10 Credit Points)
Subject Details (p. 2398) Legacy Code: 101190
This subject covers the conceptual underpinnings of research in psychology, including methodologies such as experimental, quasi-experimental, non-experimental and qualitative research. Conducting ethical research will be covered, including consideration of how research participants are positioned, issues related to research with diverse populations, as well research validity. Skills for writing research proposals and reports according to the conventions of the Publication Manual of the American Psychological Association (APA) are developed.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 1009 Living, Learning and Working on the Web (10 Credit Points)
Subject Details (p. 2400) Legacy Code: 102502
This subject prepares students for living, learning and working in a digital society. We examine how the web mediates behaviour, communication and culture in contemporary times. Students learn by participating and enterprising in online spaces as part of a supportive learning community. This subject also provides an important opportunity for students to develop a professional online web presence and identity that is relevant for their university studies, employability and the future of work.
Level: Undergraduate Level 1 subject
Equivalent Subjects: HUMN 1064 Digital Identities

BEHV 1010 Positive Psychology: The Science of Happiness, Resilience, and Wellbeing (10 Credit Points)
Subject Details (p. 2400) Legacy Code: 102606
We live in an increasingly volatile, uncertain, complex, and ambiguous (VUCA) world which places greater emotional demands on people and organisations. This subject introduces the Positive Psychology theory, research and the practical evidence-based techniques to enhance wellbeing and resilience in an increasingly VUCA world. Positive psychology is an emerging field of academic study and practical application in personal and work settings which focuses on the creation of individual resilience, strengths and virtues, creativity and other indicators of human flourishing. Throughout this subject, students will be encouraged to actively engage and apply the positive psychology concepts taught within the course and to critically reflect on these experiences to bring about personal change.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 1014 Psychology and Health (10 Credit Points)
Subject Details (p. 2401) Legacy Code: 101614
This subject provides an introduction to the psychology of health, mental health, and health-related behaviour, as relevant to health science professions. Students will be introduced to the principles and applications of psychology and health behaviour, using a biopsychosocial framework. This will be followed by an examination of the psychological aspects of injury and illness and an introduction to psychological interventions related to health concerns. Emphasis is upon understanding health status and mental illness in light of relevant theory and research.
Level: Undergraduate Level 1 subject
Equivalent Subjects: BEHV 1006 - Introduction to the Psychology of Health BEHV 1015 - Psychology and Health (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 1015 Psychology and Health (WSTC) (10 Credit Points)
Subject Details (p. 2403) Legacy Code: 700060
This subject provides an introduction to the psychology of health, mental health, and health-related behaviour as relevant to health science professions. Students will be introduced to the principles and applications of psychology and health behaviour, using a biopsychosocial framework. This will be followed by an examination of the psychological aspects of injury and illness and an introduction to psychological interventions related to health concerns. Emphasis is upon understanding health status and mental illness in light of relevant theory and research.

BEHV 1016 Psychology: Behavioural Science (10 Credit Points)
Subject Details (p. 2404) Legacy Code: 101183
This subject expands on the nature and history of psychology as a scientific discipline by focussing on the study of the biological bases of human behaviour, memory, language and thought, sensation and perception, motivation, emotion and learning. Research methods to scientifically study behaviour is introduced, including ethical research and practice with reference to diverse cultural contexts. The subject provides a foundation of knowledge in Psychology which will support later study in Psychology and other behavioural, social and health sciences.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 1018 Psychology: Human Behaviour (10 Credit Points)
Subject Details (p. 2405) Legacy Code: 101184
Psychology is a field of scientific inquiry that uses a set of scientific techniques and methods to explain and understand the causes of behaviour. As a profession, psychology applies its knowledge to practical problems in human behaviour. This subject covers a range of topics in psychology at an introductory level including: the history of psychology, intelligence, social psychology, developmental psychology, Australian Indigenous and cross-cultural psychology, personality, and abnormal psychology.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 1021 The Individual in Society (10 Credit Points)
Subject Details (p. 2406) Legacy Code: 101557
This subject introduces the main theoretical perspectives for understanding the 'individual in society', including: humanistic, biological, cognitive, behavioural and socio-cultural explanations of individual behaviour. These perspectives are further understood through application of the 'levels of analysis' framework. The content then moves on to social psychology and covers topics such as: self and identity, attitudes and attitude change, conformity and obedience, prejudice and discrimination, aggression, pro-social behaviour and attraction and close relationships. Students explore the relevance of these topics to everyday life and contemporary issues.
Level: Undergraduate Level 1 subject
Equivalent Subjects: BEHV 1002 - Interpersonal Interaction BEHV 1006 - Introduction to the Psychology of Health BEHV 1023 - The Individual in Society
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 1023 The Individual in Society (WSTC) (10 Credit Points)
Subject Details (p. 2408) Legacy Code: 700051
This subject introduces the main theoretical perspectives for understanding the 'individual in society', including: humanistic, biological, cognitive, behavioural and socio-cultural explanations of individual behaviour. These perspectives are further understood through application of the 'levels of analysis' framework. The content then moves on to social psychology and covers topics such as: self and identity, attitudes and attitude change, conformity and obedience, prejudice and discrimination, aggression, pro-social behaviour and attraction and close relationships. Students explore the relevance of these topics to everyday life and contemporary issues.
Level: Undergraduate Level 1 subject
Pre-requisite(s): BEHV 0001 (Diploma of Criminal and Community Justice Extended only)
Equivalent Subjects: BEHV 1021 - The Individual in Society
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 1024 Applied Psychology (10 Credit Points)
Subject Details (p. 2409) Legacy Code: 102706
Psychology is defined as the science of human behaviour and mental processes. Psychological theories aim to explain diverse aspects of everyday human experience and behaviour and are applied in diverse social, organisational and professional settings. In this subject, students explore key professional applications of psychological inquiry and how psychological research and theory can be used to analyse and applied to contemporary issues that influence individuals, groups and communities. Students are encouraged to evaluate the different ways psychological research is communicated.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 1025 Usable Design (10 Credit Points)
Subject Details (p. 2410) Legacy Code: 102716
This subject examines the psychological principles underlying users' experience of design. After introducing fundamental principles of human perception and cognition, we will explore the way these principles shape the experience of users when interacting with a designed product. The subject will also introduce the experimental approaches used to study perceptual and cognitive processes, focussing on critical evaluation of design principles and highlighting techniques relevant to user experience evaluation.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 1026 Cyber Behaviour (10 Credit Points)
Subject Details (p. 2410)
Cyber behaviour is an introductory subject addressing the intersection between humans and today's technologically driven world. This subject will introduce psychological theories about human behaviour, and how those theories predict our behaviours with and perceptions of technology. Topics will include basic understanding of the principles behind human behaviour such as classical conditioning and human cognition, and bridge the technological divide with topics such as cyberpsychology and human computer interaction. In cyber behaviour we will approach these topics with a focus on how they apply within industry and applications to cyber security.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 1027 The Individual in Society (UG Cert) (10 Credit Points)
Subject Details (p. 2411)
This subject introduces the main theoretical perspectives for understanding the "individual in society", including humanistic, biological, cognitive, behavioural and socio-cultural explanations of individual behaviour. These perspectives are further understood through application of the "levels of analysis" framework. The content then moves on to social psychology and covers topics such as self and identity, attitudes and attitude change, conformity and obedience, prejudice and discrimination, aggression, pro-social behaviour, and attraction and close relationships. Students explore the relevance of these topics to everyday life and contemporary issues.
Level: Undergraduate Level 1 subject

BEHV 2002 Brain and Behaviour (10 Credit Points)
Subject Details (p. 2412) Legacy Code: 101684
This subject provides an introduction to the biological and neuroscientific bases of human behaviour. Topics covered include the chemistry of life, the molecular basis of life, the cell and some of the major organ systems of the human body with particular reference to the nervous, endocrine and sensory systems. The subject has a significant laboratory component which reinforces lecture and text material. Students will be introduced to the biological and neuroscientific concepts necessary for a thorough understanding of areas of psychology such as abnormal psychology, cognitive processes, developmental psychology, human learning, and physiological psychology.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYA 0972 - Neuroscience
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 2005 Human Learning (10 Credit Points)
Subject Details (p. 2413) Legacy Code: 101676
Human Learning is concerned with the experimental analysis of human and animal behaviour and focuses upon associative learning, including classical conditioning, operant conditioning, and social learning approaches. Definitions, assumptions, and basic phenomena associated with the study of learning are described and evaluated in terms of their ability to account for various aspects of human behaviour and experience. The practical work highlights important concepts introduced in the lecture program and focuses upon practical techniques of use in everyday situations.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 2008 Mental Health in the Community (10 Credit Points)
Subject Details (p. 2414) Legacy Code: 101594
Mental health service delivery in the community is now the main form of care for people across the lifespan living with mental and emotional disorders. The development of a wider range of pharmacological, psychological and psychosocial treatments has enabled many people to live productively in the community. This subject explores the changes in policy and practice in the development of integrated mental health care and the impact of these changes on the lives of people living with mental illness and their communities. Early intervention, resilience and recovery are concepts explored in this subject in terms of mental health and wellbeing.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 2010 Perception (10 Credit Points)
Subject Details (p. 2415) Legacy Code: 101680
This subject examines the fundamental principles underlying human perception and expands upon the sensation and perception content introduced in the foundational psychology subjects. After reviewing the biological basis of sensing and perceiving, we will explore the way this relatively raw information is processed and organised into the complex perceptions of the visual, auditory, olfactory, gustatory and somatosensory systems, which constitute the fundamental basis of our experience of the world. The subject will also examine the history of perceptual theories and the use of psychophysical methods and experimental approaches to the study of perceptual processes
Level: Undergraduate Level 2 subject
Pre-requisite(s): BEHV 1016
Equivalent Subjects: BEHV 2001 - Biological Psychology and Perceptual Processes
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 2015 Mental Health in the Community (WSTC) (10 Credit Points)
Subject Details (p. 2416) Legacy Code: 700301
Mental health service delivery in the community is now the main form of care for people across the lifespan living with mental and emotional disorders. The development of a wider range of pharmacological, psychological and psychosocial treatments has enabled many people to live productively in the community. This subject explores the changes in policy and practice in the development of integrated mental health care and the impact of these changes on the lives of people living with mental illness and their communities. Early intervention, resilience and recovery are concepts explored in this subject in terms of mental health and wellbeing.
Level: Undergraduate Level 2 subject
Equivalent Subjects: BEHV 2008 - Mental Health in the Community
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 2017 Mental Health in the Community (UG Cert) (10 Credit Points)
Subject Details (p. 2417) Legacy Code: 500044
Mental health service delivery in the community is now the main form of care for people across the lifespan living with mental and emotional disorders. The development of a wider range of pharmacological, psychological and psychosocial treatments has enabled many people to live productively in the community. This subject explores the changes in policy and practice in the development of integrated mental health care and the impact of these changes on the lives of people living with mental illness and their communities. Early intervention, resilience and recovery are concepts explored in this subject in terms of mental health and wellbeing.
Level: Undergraduate Level 2 subject

BEHV 2015 - Mental Health in the Community (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 2018 Personality (10 Credit Points)
Subject Details (p. 2419) Legacy Code: 102906
Most of us probably use the term 'personality' almost every day. Yet the conceptualisation and definition of personality is far from settled. This subject introduces the controversies and debates in the psychology of personality, as well as the major theoretical and applied approaches to its measurement. Emphasis is placed on an understanding of personality research and its implications for the practice of psychology.
Level: Undergraduate Level 2 subject
Equivalent Subjects: BEHV 2011 - Personality Motivation and Emotion
BEHV 3017 - Personality
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 2019 Citizenship and Community Engagement (10 Credit Points)
Subject Details (p. 2420) Legacy Code: 800238
The subject provides second and third year students enrolled in Advanced degrees or the Bachelor of Creative Leadership with opportunities to develop professional identity through exposure to workplaces, community settings and research processes related to their chosen field of study. Students will gain work experience while being encouraged to identify, examine, and discuss notions of citizenship and identity encountered in intercultural and diverse environments. This cross-disciplinary subject employs experiential learning in a 60-hour volunteering internship to achieve the learning outcomes. Individual or team internships are chosen in consultation with Academy staff to ensure their relevance to the learning outcomes.
Level: Undergraduate Level 2 subject
Equivalent Subjects: BEHV 2007 - Internship and Community Engagement
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 2020 Introduction to Digital Mental Health (10 Credit Points)
Subject Details (p. 2421)
This subject introduces students to the emerging field of digital mental health. Digital mental health services, including telehealth, web-based counselling services and mobile phone apps, are increasingly being adopted in the practice of psychology and other health disciplines. This subject describes the uses of digital mental health for health promotion, prevention and treatment of mental illnesses. Benefits and limitations of digital delivery of mental health services are described in the context of the broader public mental health system, with a focus on young people and smartphone apps. An assessment framework for mental health smartphone apps will be introduced to support students' critical evaluation of the quality and integrity of smartphone apps. Students will also apply their understanding of digital mental health to a real-world project.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 3002 Abnormal Psychology (10 Credit Points)
Subject Details (p. 2422) Legacy Code: 101681
This subject is focused on Psychopathology, which is the study of behaviours that cause distress or functional impairment or are judged as deviant within the individual's culture. This subject examines definitions of psychopathology, ways of assessing and diagnosing, theories of the causation of psychopathology and treatments for recognised psychological disorders. Diagnostic criteria from the latest edition of the Diagnostic and Statistical Manual of Mental Disorders are applied to illustrative cases with emphasis on contemporary Australian research and theory. The development of integrated models of psychopathology, including biological, psychological and social factors, is a significant theme of the subject.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BEHV 1016 AND
BEHV 1018
Incompatible Subjects: BEHV 3003 - Abnormal Psychology (online)
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 3004 Advanced Research Methods (10 Credit Points)
Subject Details (p. 2423) Legacy Code: 101689
This subject advances the research methods and statistics in the prerequisite subject, Experimental Design and Analysis. It introduces students to non-experimental, correlational research design, and survey research, including questionnaire design, sampling and administration, with reference to ethics particularly related to cultural contexts and specific groups. Knowledge and skills in the construction and evaluation of psychological tests are also taught. Related correlational statistical techniques are taught, together with advanced analysis of variance, and instruction in the use of SPSS. The subject also develops skills in conducting and reporting psychological research and provides an introduction to qualitative research.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MATH 2006
Equivalent Subjects: MATH 3002 - Advanced Survey Design and Analysis
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 3007 Cognitive Processes (10 Credit Points)
Subject Details (p. 2424) Legacy Code: 101677
Cognitive Processes is the study of the mental processes that underpin attention, perception, decision-making, language, and memory. Conceptual and research questions include: What are the structures and mechanisms of human memory? What processes underpin acquisition of language, and are the processes similar when we learn a second language? What factors affect attention? How do some people become expert problem solvers? Why do humans make irrational decisions? Contemporary theories will be discussed and evaluated. Investigative research methods including experiments, computer modelling, clinical case studies, and brain imaging are evaluated.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BEHV 1016
Equivalent Subjects: BEHV 3012 - Human Learning and Cognition
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 3009 Developmental Psychology (10 Credit Points)
Subject Details (p. 2425) Legacy Code: 101682
Structured around an overview of lifespan development including diversity, this subject explores the holistic nature of growth and development through developmental theory and research. This subject highlights the interactive nature of three main areas of development: biological, cognitive, and psychosocial changes that affect the individual from conception to end of life. The subject encourages observation as a means for understanding development and promoting individual wellbeing. Indigenous Australian knowledges and perspectives are integrated into the subject alongside an appreciation of the richness of diverse cultural contexts.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BEHV 1018
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 3010 Health Psychology (10 Credit Points)
Subject Details (p. 2426) Legacy Code: 101193
Health Psychology is a branch of psychology concerned with the inter-relationship between psychological factors and physical health. It addresses such issues as the possible role of psychological characteristics in health maintenance and promotion, and in the development of illness. Other aspects include reactions to illness, the contribution of psychology to treatment, and explicit means by which health-relevant behaviours might be modified. This subject provides an introduction to Health Psychology and covers theoretical and research issues, the nature and management of stress and pain, issues concerning the receipt of health care and a selection of specific health problems.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BEHV 1016 AND
BEHV 1018
Equivalent Subjects: LGYB 5004 - Health Psychology
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 3011 History and Philosophy of Psychology (10 Credit Points)
Subject Details (p. 2427) Legacy Code: 100015
This subject provides an overview of the origins and historical development of psychology. It examines the major landmarks in the history of psychology, focusing on important individuals, schools of thought, and recurrent ideas and themes. Historical conceptual problems are related to areas of controversy within contemporary psychology, and an insight is provided into the philosophical underpinnings of the various new movements and major theoretical conflicts within psychology today. The subject also provides a critical appraisal of psychology's status as a science, and explores the limits of psychological inquiry.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BEHV 1016 AND
BEHV 1018
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 3013 Humanities Internship (10 Credit Points)
Subject Details (p. 2428) Legacy Code: 100961
This subject aims to provide humanities students with first-hand knowledge of workplaces or research processes related to their chosen field of study (specialisation). Internships may be undertaken in organisations including Western Sydney University, historical societies, museums, libraries, local and state government, non-government organisations, tourism and administration. Internships may also take the form of an individual research project under the supervision of one or more academics. The internship can be in Australia or through one of Western's partners such as CISaustralia overseas. The subject will introduce students to various fields in which the skills and knowledge developed in their study of the humanities can be applied. It will augment their study and provide much needed work or research experience. For further information please contact the subject coordinator or browse the Engaged Learning Subjects vUWS Companion site.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 1894 - Art History Internship LGYB 0114 - History Internship LGYA 0506 - Asian and International Studies Internship LGYA 0906 - Cultural and Social Analysis Practicum
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 3014 Motivation and Emotion (10 Credit Points)
Subject Details (p. 2429) Legacy Code: 101678
The study of motivation and emotion explores the reasons behind people's behaviours, thoughts, and feelings. This subject examines core research and theory on motivational and emotional systems, exploring how these systems function in general and how that functioning varies due to gender, culture, and other sources of difference. Concepts of motivation and emotion are central to understanding human psychology. The subject positions the topic in relation to other areas of psychological theory (such as learning theory, social psychology, personality, and cognition), investigates its role in psychological practice, and addresses its impact upon practical and philosophical debates within the discipline. Students are encouraged to explore and reflect upon the role of motivational systems in their own lives.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BEHV 1016 AND
BEHV 1018
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 3015 Motor Control and Skill Acquisition (10 Credit Points)
Subject Details (p. 2430) Legacy Code: 400886
Motor Control and Skill Acquisition is an investigation of the physiological and psychological processes involved in both the control and the learning of movement. As such, it considers the control mechanisms which are innate to the learner, how these mechanisms change by virtue of both maturation and experience, and how the latter type of changes may be facilitated by manipulation of the learning environment.
Level: Undergraduate Level 3 subject
Equivalent Subjects: BEHV 2009 - Motor Control and Learning
SPRT 3002 - Aquatic Sports
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 3017 Personality (10 Credit Points)
Subject Details (p. 2431) Legacy Code: 101679
In 2022 this subject replaced by BEHV 2018 - Personality. Personality is the study of the mental and behavioural factors on which individual human beings vary. In other words, the study of personality is the attempt to understand why a given individual is the way he/she is. This subject involves an examination of the major personality theories, applications to individual differences, and contemporary research. Emphasis is placed on a critical understanding of personality research and its implications for the practice of psychology.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BEHV 1018
Equivalent Subjects: BEHV 2011 - Personality Motivation and Emotion
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 3018 Psychology and the Online World (10 Credit Points)
Subject Details (p. 2431) Legacy Code: 102350
Digital technologies and online environments have transformed how people interact, communicate, and organise. This subject explores the intersection of psychology and these 'online worlds', and critically examines the potential benefits and challenges it presents. Students will learn about a variety of online behaviours and environments, including the formation of social movements, the spread of moral panics and conspiracy theories, along with the potential of online therapy and psychological interventions. By the end of the subject, students will be able to understand and evaluate the psychological aspects of online activities and apply this knowledge to real-world situations.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BEHV 1018 AND
BEHV 1016
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 3019 Psychology of Language (10 Credit Points)
Subject Details (p. 2432) Legacy Code: 100023
This subject acquaints students with major issues in the psychology of language. Through a series of online modules, it examines different approaches to research and theory on questions such as the acquisition and development of language, the relationship between language and thought, bilingualism and second language learning, speech perception and production, the neurophysiological underpinnings of language, and language in non-human animals. The tutorials align closely with online modules to help students consolidate their learning of lecture materials, and relate to subject assessments, helping students to improve the assessment outcomes. This third year subject deepens and synthesises knowledge of the psychology of language taught in foundational subjects. It progresses key research and critical evaluation skills relevant to a range of professions where language acquisition is an element.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 3021 Psychology, Crime and Law (10 Credit Points)
Subject Details (p. 2433) Legacy Code: 102399
This subject covers the study and application of a broad range of psychological concepts, principles, theory, and methods that relate to crime and the law. This subject examines psychological processes and human behaviour in relation to the Australian legal and court system and the criminal justice system - and considers their application to real-world contexts through case studies and interactive tutorials. The subject also examines forensic mental health in relation to crime and the law with reference to multi-cultural and Indigenous peoples. Emphasis is placed upon the intersection of evidence-based psychology with criminal and legal processes. Topics include the role of memory and attention in witness testimony; age, gender culture and the criminal justice system, and forensic interviewing.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 3023 Social Psychology (10 Credit Points)
Subject Details (p. 2434) Legacy Code: 101683
Social psychology is the study of human behaviour and mental processes in their social context. Social psychology examines social behaviour and social thinking using scientific psychological research methods. This subject considers both classic and recent theories, research and applications in core areas of social psychology such as: attitudes, stereotyping and prejudice, social cognition, group processes, cross-cultural and Indigenous Australian psychology, and social influence. Emphasis is placed upon the role of contemporary research and theory in increasing our understanding of social phenomena and the relevance of this to everyday life.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MATH 2006
Equivalent Subjects: BEHV 2013 - Social and Developmental Psychology
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 3025 Sport and Exercise Psychology (10 Credit Points)
Subject Details (p. 2435) Legacy Code: 401055
This subject explores psychological factors that affect sport performance (e.g., self-efficacy and concentration), psychological factors that predict and increase participation in physical activity (e.g., motivation), and psychological outcomes of physical activity (e.g., mental health, resilience, and cognitive development). Students will examine theory and research and draw upon their own experiences, to apply sport and exercise psychology principles to a variety of real-world scenarios, and design strategies relevant to different contexts such as physical education, personal training, exercise physiology, coaching, and health promotion.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 1536 - Sport and Exercise Psychology BEHV 2014 - Sport and Exercise Psychology
Incompatible Subjects: BEHV 1005 - Introduction to Sport Psychology BEHV 2004 - Exercise Psychology LGYA 7219 - Sociological Aspects
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 3026 Service Learning (10 Credit Points)
Subject Details (p. 2436) Legacy Code: 102740
In this subject, the learning experience combines civic engagement with training, and personal and scholarly reflection. Service learning focuses on the application and development of a broad range of knowledges, capacities and skills in the context of voluntary effort to benefit the community. For example, depending on the site selected, students may: extend their capacity to communicate and work effectively in culturally diverse contexts; gain a better understanding of social inclusion and exclusion in Australia or overseas, or; become more confident about their personal and professional capacity to contribute to the well-being of others or protection of the natural environment. The subject may be taken in Australia or overseas through one of Western's Partners such as CISaustralia, completed individually or as part of a group and in any term of study. For further information please contact the subject coordinator or browse the Engaged Learning Subjects vUWS Companion site.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 4001 Advanced Topics in Psychology (10 Credit Points)
Subject Details (p. 2437) Legacy Code: 101541
In 2022 this subject replaced by 102907 - Advanced Topics in Contemporary Psychology. In this subject students develop an advanced level of theoretical and empirical knowledge in selected core topics of psychology, an awareness of how this knowledge underpins evidence-based approaches to psychological intervention, and an enhanced capacity for conducting research in selected topic areas. The subject fosters an appreciation of psychology as a scientific discipline, and of how sound research provides the foundation for solving problems of human mental processes and behaviour. Skills in the critical evaluation of knowledge and research are developed.
Level: Undergraduate Level 4 subject
Equivalent Subjects: BEHV 4009 - Advanced Topics in Contemporary Psychology
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 4004 Psychology Research Thesis (30 Credit Points)
Subject Details (p. 2437) Legacy Code: 102528
In this subject students investigate a substantive individual research question relevant to the discipline of psychology. Under guidance from supervisors, students engage with all components of psychological research, including conducting a comprehensive literature review, forming an individual research question, developing research methodology to test the question, obtaining ethics approval, and collecting and analysing data. Students produce a written literature review and substantive thesis in the form of a submission-ready journal article. Note that this is a 30 credit point year-long subject taken over two terms (15 credit points in each term).
Level: Undergraduate Level 4 subject
Co-requisite(s): BEHV 4006
Equivalent Subjects: LGYB 5257 - Psychology (Honours) FT YL LGYB 5258 - Psychology (Honours) PT YL BEHV 4003 - Empirical Research Project
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 4005 Theory and Practice of Psychological Assessment and Intervention (10 Credit Points)
Subject Details (p. 2439) Legacy Code: 101420
This subject has been designed to introduce students to psychological assessment by providing practical and theoretical input regarding the administration, scoring, and interpretation of frequently used standardised measures. The scientific and ethical underpinnings of psychological testing and assessment are introduced providing a general context for the employment of standardised psychological tests. Emphasis will then be placed on familiarisation with i) the processes that practitioners go through during a testing session and ii) current research on employing the standardised tests presented in this subject. Students will practise with testing data, reporting results in compliance with American Psychological Association (APA) conventions.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 4006 Research Methods Seminar (20 Credit Points)
Subject Details (p. 2439) Legacy Code: 100983
This is a 20 credit point year-long subject taken over two terms (10 credit points in each term). The aim of this subject is to advance students' awareness, and critical appreciation of interrelated research processes: epistemological frameworks of research; the appropriate interpretation of research data; ethical issues in the conduct of research; the cultural, social, economic, and political contexts of research; and Indigenous Australian knowledges and research practices. Skills will be consolidated in the use of quantitative and qualitative research designs, methods, and analysis techniques to address research questions in psychology and the behavioural sciences.
Level: Undergraduate Level 4 subject
Equivalent Subjects: BEHV 4002 - Empirical Research Methods Seminar
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 4009 Advanced Topics in Contemporary Psychology (10 Credit Points)
Subject Details (p. 2441) Legacy Code: 102907
Psychological research and practice exist in a cultural, historical and social context. This subject provides students with knowledge and skills for working in Psychology in the complex, unpredictable and diverse contemporary Australian society. In this subject students develop an advanced level of theoretical and empirical knowledge in selected topics of psychology, an awareness of how this knowledge underpins evidence-based approaches to psychological intervention, and an enhanced capacity for conducting research in selected topic areas. The subject fosters an appreciation of psychology as a scientific discipline and the interplay between psychological research and real-world psychology practice.
Level: Undergraduate Level 4 subject
Equivalent Subjects: BEHV 4001 - Advanced Topics in Psychology
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 5001 Career Assessment and Counselling (10 Credit Points)
Subject Details (p. 2442)
This subject introduces students to key psychological theories of career choice and satisfaction before describing the integration of career choice assessment tools and appropriate counselling skills to support evidence based and client-centred career advising. It will provide students with knowledge and skill in career assessment and foundational skill in career counselling.
Level: Postgraduate Coursework Level 5 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 5002 Program Design and Ethical Conduct in Career Education (10 Credit Points)
Subject Details (p. 2442)
The ability to design programs that are tailored to lifespan and cultural considerations is an essential skill for career educators. This subject equips students with skills in the design and evaluation of career education programs. Principles of lifespan psychology and ethical approaches that underpin career education programs will be also explored.
Level: Postgraduate Coursework Level 5 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 5003 Flexibility Economy (10 Credit Points)
Subject Details (p. 2443)
The world is experiencing significant social and economic transformations, creating uncertainty in the future of work and business. Domain knowledge is necessary, but not sufficient for organisational or individual success in new business environments. Success now requires complex adaptability and flexibility skills, and the capacity to influence the behaviour of others to respond to emerging challenges. How can we think outside of an industry or disciplinary framework to enhance human performance under uncertainty? How can we efficiently adjust personal and organizational goals and strategies to meet the pressures of local and global crises and technological innovations? The focus in this subject is on flexibility in practice - the evolution of industry routines and workplace habits, rapid changes in job functions and career profiles, and developing workforce expectations and demands. Key psychological concepts and theories will be integrated with business knowledge to help you develop adaptability and capitalize on flexibility as a strength in your workplace.
Level: Postgraduate Coursework Level 5 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 5004 Wellbeing Economy (10 Credit Points)
Subject Details (p. 2443)
The Wellbeing Economy is an emerging global movement aimed to disrupt and transform dominant macro-economic systems focused on economic growth. Proponents of the Wellbeing Economy argue that individual, community and societal wellbeing should be the measures of a successful economy. Major shifts in government and business sector accountability for social justice and 'wellness' outcomes are predicted over the coming decade. At the micro level, what will it mean to live, work and lead in a wellbeing economy? What new knowledge, skills and attitudes will be required on the ground? In this subject traditional and emerging theories and concepts of wellbeing will be explored, critiqued and reimagined. Real world examples of holistic approaches to wellbeing in business and industry contexts will be investigated and applied to your unique, authentic contexts. You will build your capacity to problem-solve and plan for wellbeing outcomes in your individual spheres of influence. Engaging leaders across industries will share their experiences through online learning activities and resources. At the conclusion of this subject, you will have enhanced knowledge and skills to develop, at scale, strategies and plans that support individual, community and organisational wellbeing.
Level: Postgraduate Coursework Level 5 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 7001 Advanced Therapeutic Modalities (10 Credit Points)
Subject Details (p. 2444) Legacy Code: 102361
This subject follows from 102360 Core Therapeutic Modalities. Students in this subject will develop foundational skills in assessment, case formulation and treatment planning through understanding and developing skills in further evidence-based psychological therapies that may be modified based on an evolving case formulation and evaluation and tailored to the client as appropriate to their wider social and cultural context. Further, students will be guided in critical examination of similarities and differences across those therapeutic approaches and their application across conditions, populations, settings and cultural contexts. Please note: some of the activities in this subject may include experiential learning, for example where students may be asked to take on the client role using their own lived experience, to provide opportunity for training in therapeutic modalities that are more "real life". Students may opt-out of these activities without consequence through speaking to the subject coordinator and alternative arrangements for student learning opportunities will be organised.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): BEHV 7015 AND
BEHV 7029
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 7003 Assessment: Cognitive Functions (10 Credit Points)
Subject Details (p. 2445) Legacy Code: 102400
This subject provides a comprehensive introduction to the cognitive psychological assessment of children, adolescents and adults. It is designed to assist students in the professional psychology programs to develop theoretical knowledge and practical skills in the cognitive assessment of clients. Students will become familiar with the current theoretical and empirical foundations of psychological assessment, and the application of these theories and research findings to assessment practice in empirically valid and culturally responsive ways. Students will be introduced to contemporary practice in the assessment of cognition, personality and behaviour. Training in the administration of key instruments will be provided. Students will be instructed in the integration of assessment data into clinically-useful reports, including inter-disciplinary communication. Different approaches to psychological assessment will be compared and evaluated. Ethical and professional issues in psychological assessment will be discussed.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: BEHV 7026 - Psychological Assessment LGYA 1196 - Psychological Assessment 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 7004 Assessment: Psychological Practice (10 Credit Points)
Subject Details (p. 2446) Legacy Code: 102359
This subject will provide students with the skills to psychologically assess and diagnose a range of psychological disorders in adults and in children that are presented in psychological practice. This subject will be complemented by 102400 Assessment: Cognitive Functions in the second semester which will focus more on cognitive assessments. Upon completion of this subject, students will have an understanding of a range of assessment tools, their psychometric qualities, application and utility in a psychological practice. They will also develop skills in applying and interpreting assessment tools and how those tools may aid diagnostic and therapeutic processes.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 7005 Child Clinical Psychology (10 Credit Points)
Subject Details (p. 2446) Legacy Code: 101210
This subject introduces the nature, assessment and treatment of psychological disorders in children and adolescents. Students will examine the diagnostic classification, epidemiology and aetiology of a range of psychological problems in childhood and adolescence, including anxiety disorders, mood disorders, behavioural disorders, trauma and stressor-related disorders, eating disorders, learning disabilities, and attention-deficit disorder. The theoretical and empirical foundations of a range of cognitive and behavioural techniques will be discussed along with a number of major conceptual and practical issues in the treatment of psychological disorders in childhood and adolescence, including cultural and inter-professional contexts.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 0486 - Clinical Problems in Children and Adolescents BEHV 7004 - Assessment Psychological Practice
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 7006 Clinic Placement A (10 Credit Points)
Subject Details (p. 2447) Legacy Code: 101815
This introductory placement subject comprises 180 hours of placement activity accrued one-day a week over 24 weeks and is designed to allow students to apply the theoretical knowledge they have gained in the following coursework subjects, Core Skills & Ethical Practice; Psychological Assessment; Psychopathology: Theory and Practice and Psychological Interventions 1. The aim of the subject is to establish and enhance, under close supervision, a range of clinical psychology assessment and intervention skills applied to real clients. Regular and systematic video-recording of trainee-client sessions and supervisor feedback guided by competency-based principles provide trainees with an excellent opportunity to acquire, consolidate and generalise a wide range of competencies important for clinical psychology practice.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): BEHV 7014 AND
BEHV 7003 AND
BEHV 7029 AND
BEHV 7027
Co-requisite(s): BEHV 7005
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 7008 Clinical Health Psychology (10 Credit Points)
Subject Details (p. 2449) Legacy Code: 101220
In this subject students acquire an understanding of how biological, psychological, social factors interact in health and illness, and how the principles of biopsychosocial models of health inform clinical psychology intervention strategies that can be applied to the management of physical disorders. This subject will cover psychological assessment, formulation that integrates medicine and psychology, clinical health psychology treatments and assessment of their outcomes. Given that comorbidity has an impact on health outcomes, psychological practice when working with co-morbid substance use disorders will also be addressed. Practice within this branch of clinical psychology requires working within inter-disciplinary treatment contexts that include medical interventions and the tailoring of psychological interventions to help manage a medical condition and enhance quality of life. The subject includes culturally responsive attitudes and skills in clinical health psychology practice, including when working with Aboriginal and Torres Strait Islander Australians.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): BEHV 7027 Psychological Interventions 1 AND BEHV 7029 Psychopathology Theory and Practice
Equivalent Subjects: LGYB 5193 - Clinical Health Psychology BEHV 7011 - Clinical Psychopathology 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 7009 Clinical Neuropsychology and Psychopharmacology (10 Credit Points)
Subject Details (p. 2450) Legacy Code: 101817
This subject provides a comprehensive grounding in contemporary neuropsychological theories, methods and measures, including understanding of neurocognitive disorders. The nature of the cognitive systems involved in attention, memory, language, spatial processing, and executive functions will be reviewed, with discussion of the neuropsychological assessment of each of these systems. The subject also includes coverage of the classification, use and efficacy of common psychopharmacological agents. The subject will stress the importance of neural abnormalities in patients, and how these are related to symptoms and behavioural dysfunction. Working within inter-disciplinary contexts that include psychological, pharmacological and surgical treatments for neuropsychological disorders will also be discussed.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): BEHV 7003
Equivalent Subjects: LGYA 1205 - Clinical and Forensic Neuropsychology
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 7010 Clinical Psychopathology 1 (10 Credit Points)
Subject Details (p. 2451) Legacy Code: 101812
This subject provides a comprehensive examination of the nature, context and assessment of adult psychopathology. Students will review and critically evaluate the origins and structure of current diagnostic systems, and examine the diagnostic criteria for a range of major psychopathological syndromes and the range of contexts within which they may arise. Skills in balancing the assessment of adult disorders with counselling and engagement through a clinical diagnostic interview will be acquired. Beginning level skills in the formation of adult disorders will also be acquired.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 1201 - Clinical Psychopathology LGYA 0485 - Advanced Psychopathology
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 7011 Clinical Psychopathology 2 (10 Credit Points)
Subject Details (p. 2451) Legacy Code: 101813
This subject continues the study of clinical psychopathology. Students will examine the nature and assessment of a range of complex psychopathological syndromes, including schizophrenia and other psychotic disorders; eating disorders; personality disorders; substance-related disorders; dissociative disorders; and sexual and gender identity disorders and psychopathology presentations in diverse contexts (such as forensic settings and working with families).
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): BEHV 7010
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 7012 Clinical Research Methods (10 Credit Points)
Subject Details (p. 2452) Legacy Code: 101814
The ability to understand and critique empirical research findings, and to evaluate the efficacy of therapeutic interventions, is essential to the professional psychologist as a scientist-practitioner. This subject equips students with advanced skills in utilising the research literature to guide and enhance their professional practice, design interventions to test clinically relevant hypotheses, and critically evaluate the effectiveness of existing research based on empirical evidence. It includes instruction in both quantitative and qualitative research design, program evaluation, single case designs and pilot studies.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 0492 - Advanced Research Design
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 7013 Cognitive Science: Research and Application (10 Credit Points)
Subject Details (p. 2453) Legacy Code: 800173
Cognitive science is the interdisciplinary scientific investigation of the mind. Contemporary research in cognitive science conducted by members of the MARCS Institute forms the core of the unit. Research areas to be addressed: plasticity and learning; action and coordination; nonverbal communication; and ageing and cognition. Examples of research questions: Can learning be unconscious? What mechanisms enable interpersonal coordination as seen in music and dance ensembles? Why is it that music elicits strong emotions? How does attention influence perception? How does conditioning explain human preferences? Does social facilitation apply to humans interacting with robots? In what way does ageing impact upon decision making? Applications to the arts, education, health, aging, design, human-machine interaction and artificial intelligence will be discussed.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 7014 Core Skills and Ethical Practice (10 Credit Points)
Subject Details (p. 2454) Legacy Code: 101810
In this subject students apply core evidence-based counselling and intervention skills that are responsive to working within culturally and linguistically diverse communities, including and Aboriginal and Torres Strait Islander Australians. This subject addresses key cultural ethical, legal, and professional aspects of psychological practice; including working within one's competency and within inter-disciplinary contexts and the management of risk across the lifespan, including child protection. The theoretical underpinnings of evidence-based intervention strategies and ethical practice across the lifespan are critically examined, including from Aboriginal and Torres Strait Islander perspectives. Students develop their professional understanding of the codes and guidelines of the Australian Psychological Society and Psychology Board of Australia, and the relevant State and Commonwealth Acts and Regulations of Parliament. Major practice problems faced by psychologists and modes of resolution acceptable within the profession are considered. Students reflect on professionalism in psychology practice and how their own perspectives, world views, values and competencies may inform their processes ethical decision-making. Students will also identify areas for ongoing professional development.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 0477 - Core Skills and Ethical Practice LGYA 1198 - Core Skills Counselling and Ethical Practice
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 7015 Core Therapeutic Modalities (10 Credit Points)
Subject Details (p. 2455) Legacy Code: 102360
This subject provides an introduction to the theory and practice of Cognitive Behaviour Therapy (CBT), an evidence-based form of therapy and an important therapeutic tool for psychologists working in diverse settings. Students in this subject will develop foundational skills in CBT assessment, formulation and treatment and a critical understanding of CBT application across conditions, populations and social settings. In addition, students will be introduced to family therapy (FT), including different models of FT, assessment, case formulation and FT application across different family situations. CBT and FT will be contrasted and examined for their application to a range of common psychological presentations, including ways to tailor responsive interventions in Aboriginal and Torres Strait Islander and multicultural contexts.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 7016 Digital Social Research in Action (10 Credit Points)
Subject Details (p. 2456) Legacy Code: 102253
This subject engages students in the practices of digital social research through a simulation of a professional research consultancy. Students will construct and apply a digital social science approach for an internal or external client brief. Students will engage with client and stakeholder needs through their role as a consultant as they carry out the digital social research project for their client. In doing so, students engage with the ethical and moral implications of using digital social data and discover the opportunities to apply and communicate digital social research methods in real world settings.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 7018 Integrated Practices 3: Emotions, Embodiment and Connection (20 Credit Points)
Subject Details (p. 2456) Legacy Code: 102372
This subject presents and explores ways of working therapeutically with trauma. The interpersonal neurobiologists' focus of Mind/Body connection features in detail in this subject. Work with emotions, embodiment and the counsellor/client relationship as instruments of therapeutic change will be considered. Students will learn what it means to be a trauma-sensitive therapist and develop techniques and methods for working across the spectrum of trauma responses including dissociation. A range of psychotherapeutic models will feature such as somatic therapies, sensorimotor psychotherapy, emotionally focused therapy, and notions of 'felt sense'. Complementary modes of healing, such as mindfulness, breathwork and the practices of yoga and meditation will be considered for what they can offer to a trauma-informed approach to therapy. Students will develop skills in working with emotions and nonverbal communication, as well as recognizing how the 'spoken' incorporates the physical.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): WELF 7009 AND
WELF 7013 AND
WELF 7010 AND
WELF 7006 AND
WELF 7014
Co-requisite(s): WELF 7002
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 7020 Learning and Processing Human Language (10 Credit Points)
Subject Details (p. 2457) Legacy Code: 800171
How do humans learn and process language, in its spoken, gestural, and written forms? This subject will equip students with theoretical foundations and practical understandings of how to read and conduct research in this area. Topics may include research areas such as language acquisition, language use and communication, word recognition, reading development and disorders, speech perception and production. In addition, a review of data collection and analysis techniques will be provided. The subject will include lecture and laboratory experimental work. The subject will be focused on research currently conducted by members of the MARCS Institute.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 7021 Neuroscience Methods (10 Credit Points)
Subject Details (p. 2458) Legacy Code: 800192
A multidisciplinary team will provide an introduction to several aspects of neuroscience including cellular, computational, behavioural and biomedical neuroscience. The program will provide a strong foundation in modern neuroscience for those wishing to pursue further independent research in the field. With a focus on real-world neuroscience research, topics include introductory biology, computational modelling, biosignal acquisition, signal processing and data mining. The subject will include lecture and laboratory work.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: BEHV 7030 - Quantiative Methods in Neuroscience
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 7025 Professional Psychology Placement (0 Credit Points)
Subject Details (p. 2458) Legacy Code: 102539
This placement subject provides students with an opportunity to apply knowledge gained in coursework subjects to professional practice and to practice, under clinical supervision, basic assessment and intervention skills with real clients. Each student must undertake a minimum of 300 hours of supervised placements, participate in the mandatory workshops and present at a case presentation to complete the course. This requirement is consistent with standards prescribed by APAC, the course accrediting body.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): BEHV 7015 AND
BEHV 7029 AND
BEHV 7014 AND
BEHV 7003
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 7027 Psychological Interventions 1 (10 Credit Points)
Subject Details (p. 2460) Legacy Code: 101213
This subject covers the theory and practice of Cognitive Behaviour (CBT) from a competency-based perspective. The competency paradigm is introduced first before key competencies including CB-Assessment, formulation, psychoeducation, behavioural (behavioural activation, exposure therapy and behavioural experiments) and cognitive intervention techniques are discussed. For each competency domain, knowledge (theory, models and principles), knowledge-application (procedural knowledge), technical skills (e.g., socratic dialogue) and relationship skills (engagement, collaboration, and collaborative empiricism) are addressed. Higher-order integrative competencies including the use of CBT in multicultural contexts, and meta-competencies such as scientist-practitioner and reflective-practitioner competencies are discussed towards the end of the subject. In alignment with competency-based pedagogies, learning activities include didactic presentations, knowledge-application tasks and skills training within small groups, and assessments include a demonstration of competence appropriate for a developing CB practitioner.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYB 5195 - Psychological Interventions 1 LGYA 1202 - Cognitive Behaviour Therapy Theory and Practice
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 7029 Psychopathology: Theory and Practice (10 Credit Points)
Subject Details (p. 2461) Legacy Code: 102362
This subject provides an examination of a range of major categories of psychopathology, including more typical presentations for psychological treatment and inter-professional indications and communication. Students will critically evaluate the common diagnostic systems of adult psychopathology, and examine the diagnostic criteria for a range of major psychopathology presentations. The subject will equip students with skills in the application of diagnostic and psychometric assessment of these psychological disorders and the ability to construct a case formulation with systemic and cultural considerations, including for Aboriginal and Torres Strait Islander people to inform psychological treatment interventions. Students will also develop skills in discerning when, why and how to collaborate and communicate with multidisciplinary teams in inter-professional context.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: BEHV 7010 - Clinical Psychopathology 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 7031 Applied Research Project (20 Credit Points)
Subject Details (p. 2462) Legacy Code: 102696
This is a 20 credit point year-long subject taken over two sessions (10 credit points in each session). The research project provides an opportunity to construct an informed research question or hypothesis. This justified research proposal is completed and investigated independently by students under supervision, over a one-year period. It is conducted in an area of relevance to professional practice, with a central focus on the scientific analysis of a problem or hypotheses. Students can choose from a range of approved research designs, but must undertake and write an analytic review of the relevant literature, formulate a research question, design of an appropriate method, collect and analyse data, interpret findings, and effectively communicate their research in the form of an empirical research report.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): BEHV 7012
Equivalent Subjects: LGYA 0494 Applied Research Project and Thesis
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 7032 Clinic Placement B (10 Credit Points)
Subject Details (p. 2463) Legacy Code: 102693
This placement subject comprises 220 hours of placement activity accrued one-day a week over 24 weeks, builds on knowledge and skills acquired in coursework subjects and extends and consolidates competencies acquired in Clinic Placement A. The aim of the subject is to establish and enhance, under close supervision, a range of clinical psychology assessment and intervention skills applied to real clients. Regular and systematic video-recording of trainee-client sessions and supervisor feedback guided by competency-based principles provide trainees with an excellent opportunity to acquire, consolidate and generalise a wide range of competencies important for clinical psychology practice.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): BEHV 7006 AND
BEHV 7005
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 7033 Professional Placement 1 (10 Credit Points)
Subject Details (p. 2464) Legacy Code: 102694
This placement subject is an external placement that provides students the opportunity to practise, under clinical supervision, clinical psychological assessment and intervention to a range of clients across age ranges, severity levels and psychological disorders. The aim is to build upon and extend knowledge, skills, relationship and professional attitude competencies acquired during a supervised University Clinic placement while working with real clients seeking clinical psychological services within an external agency. Each external placement must comprise a minimum of 200 hours of clinical psychology practicum work of which at least 80 hours must be in face-to-face client work, and all internal and external placements together must comprise a minimum of 1000 practicum hours of which 400 hours must be in face-to-face client work as defined by APAC. Placements are arranged by the Placement Coordinator who is responsible for ensuring that the placement and supervision meet APAC requirements. Students must participate in the mandatory workshops and present a case at the relevant Case Presentation Day (or equivalent by permission in special circumstances).
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): BEHV 7006
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 7034 Professional Placement 2 (10 Credit Points)
Subject Details (p. 2466) Legacy Code: 102695
This placement subject is an external placement that provides students the opportunity to practise, under clinical supervision, clinical psychological assessment and intervention to a range of clients across age ranges, severity levels and psychological disorders. The aim is to build upon and extend knowledge, skills, relationship and professional attitude competencies acquired during a supervised University Clinic placement while working with real clients seeking clinical psychological services within an external agency. Each external placement must comprise approximately 350 hours [with a minimum of 200 hours] of clinical psychology practicum work of which at least 80 hours must be in face-to-face client work, and all internal and external placements together must comprise a minimum of 1000 practicum hours of which 400 hours must be in face-to-face client work as defined by APAC. Placements are arranged by the Placement Coordinator who is responsible for ensuring that the placement and supervision meet APAC requirements. Students must participate in the mandatory workshops and present a case at the relevant Case Presentation Day (or equivalent by permission in special circumstances).
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): BEHV 7006 Clinic Placement and BEHV 7033 Professional Placement 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 7035 Psychological Approaches to Disability: Theory and Practice (10 Credit Points)
Subject Details (p. 2468) Legacy Code: 102692
This subject offers students a contemporary understanding of the psychological assessment, intervention and evaluation techniques relevant to the support of people with disability. Biological, psychological social and community factors contributing to support will be presented. Ecological, functional and clinical approaches to planning across the life span will be taken, addressing early intervention, childhood, adolescence, adulthood and ageing. A key focus of the subject will be advancing inclusion and quality of life outcomes to enable people with disability to fully participate in society. Current legal, policy and ethical issues will also be discussed, including professional standards for working effectively across multicultural and multidisciplinary contexts.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 7036 Research Internship and Engagement (10 Credit Points)
Subject Details (p. 2469) Legacy Code: 800228
The aim of this subject is to provide MRes candidates with a research development and training opportunity through a cross disciplinary, supportive, experiential learning environment. Through exposure to workplaces, research institutes, community settings, and research processes, students will have the opportunity to apply their research and technical skills and develop their professional identity in their chosen field of research. The placement will be chosen by the student in consultation with the subject coordinator and will be undertaken either as an individual or part of a project team. If students enrolled in B Research Studies/M Research wish to take this subject before having completed the prerequisite subject 800218 Researcher Development 1: Reading, Writing, and the Business of Research, contact the subject coordinator to obtain permission to complete a rule waiver (this will be on a case by case basis only).
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): HUMN 4001
Equivalent Subjects: BEHV 7019 - Internship and Community Engagement (PG)
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 7037 Psychological Practice in Contemporary Contexts (10 Credit Points)
Subject Details (p. 2470) Legacy Code: 102808
The ability to work with mental health issues and psychological distress that arises within a range of contexts is an essential skill for Clinical Psychologists. This subject equips students with skills in assessment, formulation and tailored psychological interventions for those who experience psychological distress within family systems and broader socio-cultural contexts; including abuse and violence; working within medico-legal systems, and broader socio-cultural contexts. The subject will explore theories, psychological techniques and prepare students to working within these settings that include inter-disciplinary collaboration and communication with multidisciplinary health services and legal practitioners. Please note: some of the activities in this subject may include experiential learning, for example where students may be asked to take on the client role using their own lived experience, to provide opportunity for training in therapeutic modalities that are more “real-world”. Students may opt-out of these activities without consequence through speaking to the subject coordinator and alternative arrangements for student learning opportunities will be organised.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): BEHV 7027 AND
BEHV 7006 AND
BEHV 7029 AND
BEHV 7038
Restrictions: Please see the Subject Details page for any restrictions for this subject

BEHV 7038 Assessment and Treatment of Complex Psychological Disorders (10 Credit Points)
Subject Details (p. 2471) Legacy Code: 102809
Clinical psychology is a fast-evolving discipline, and practitioners need to be able to respond to changing psychological health needs of a diverse population. This subject will prepare students to expand their skills in clinical assessment of psychopathology, diagnosis and psychological interventions to respond to the needs and preferences and cultural values of clients who experience complex and/or chronic psychological disorders. Responsive practice within the context of the changing demands for clinical psychology services is foregrounded, as is the unique context of Aboriginal and Torres Strait Islander people. This subject will explore the theories, techniques and effectiveness of new and emerging psychological therapies; prepare students for working in multidisciplinary teams; and introduce students to the practice of clinical psychology with more complex client groups. The subject will also examine the professional and organisational roles of clinical psychologists within these settings. Please note: some of the activities in this subject may include experiential learning, for example where students may be asked to take on the client role using their own lived experience, to provide opportunity for training in therapeutic modalities that are more “real-world”. Students may opt-out of these activities without consequence through speaking to the subject coordinator and alternative arrangements for student learning opportunities will be organised.
Level: Postgraduate Coursework Level 7 subject

Biological Sciences (BIOS)

BIOS 0001 Biology (WSTC) (10 Credit Points)
Subject Details (p. 2479) Legacy Code: 900022
Biology is the study of the cellular processes that occur within organisms and the interactions that occur between organisms within the biosphere. The subject is therefore seen to have relevance to the lives of students. It is important for students to develop an understanding of the biological principles that will enable them to make informed decisions about the advances that are occurring in biotechnology and biomedical science. Undergraduate study in the life sciences requires the student to have acquired a basic body of knowledge that focuses on the diversity and the unity of living things as well as skills in collecting and analysing information and writing concise and coherent explanations.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 0002 Focus on Biology (WSTC Prep) (10 Credit Points)
Subject Details (p. 2479) Legacy Code: 700232
Biology is the study of integrated living systems, from the level of molecular systems that constitute cells to the interactions that occur within and between organisms that together make up the biosphere. This subject will equip students to undertake tertiary level biological subejcts that emphasise both the unity (cell biology) and diversity (evolution) of living organisms. Students will learn about the basic molecular biological underpinnings of cellular structure and function within an integrated framework that proceeds through major themes of bioenergetics, gas exchange and transport systems within multicellular organisms, inheritance and evolution. Students will develop a fundamental body of essential biological concepts, as well as build skills in collecting and analysing information, and writing coherent explanations.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: BIOS 0003 - Focus on Biology (WSTC) BIOS 0001 - Biology
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 0003 Focus on Biology (WSTC) (10 Credit Points)
Subject Details (p. 2481) Legacy Code: 900104
Biology is the study of integrated living systems, from the level of molecular systems that constitute cells to the interactions that occur within and between organisms that together make up the biosphere. This subject will equip students to undertake tertiary level biological subjects that emphasise both the unity (cell biology) and diversity (evolution) of living organisms. Students will learn about the basic molecular biological underpinnings of cellular structure and function within an integrated framework that proceeds through major themes of bioenergetics, gas exchange and transport systems within multicellular organisms, inheritance and evolution. Students will develop a fundamental body of essential biological concepts, as well as build skills in collecting and analysing information, and writing coherent explanations.

BIOS 1001 Biodiversity (10 Credit Points)
Subject Details (p. 2482) Legacy Code: 300802
How many species walk, fly, swim or slither, crawl, hop, wriggle or just float, hitchhike or move so slowly that they appear not to move at all? No one knows and new species appear almost every day. This subject focuses on this spectacular diversity of living things and the process of evolution. Students explore and classify biodiversity and how organisms function, acquire and assimilate resources and co-ordinate growth and reproduction. Organisms interact with one another and their environment forming a complex set of interactions in ecosystems. It is these interactions that have driven evolution. Ultimately human survival depends on the sustainable use of this biodiversity and ecosystems.
Level: Undergraduate Level 1 subject

BIOS 1010 Bioscience 1 (10 Credit Points)
Subject Details (p. 2484) Legacy Code: 401002
This subject will be replaced from Autumn 2022 by 401469 Bioscience 1. This subject introduces nursing and midwifery students to the terminology and major introductory concepts related to normal structure and function of the human body and its relationship to performances of activities of living and healthy lifestyle practices.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 1011 Bioscience 2 (10 Credit Points)
Subject Details (p. 2484) Legacy Code: 401006
This subject will be replaced from Autumn 2022 by 401470 Bioscience 2. This subject extends knowledge gained in Bioscience 1 and introduces nursing students to concepts associated with alterations in health and wellness as a consequence of life transition. It includes an introduction to pathophysiology, pharmacology, immunology and microbiology. The subject also focuses on the impact of microorganisms on the health of people and the body's natural defences, as well as pharmacological interventions, in dealing with infections and injuries and its significance for nursing.
Level: Undergraduate Level 1 subject

Equivalent Subjects: BIOS 1021 - Introduction to Health Breakdown
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 1012 Cell Biology (10 Credit Points)
Subject Details (p. 2485) Legacy Code: 300816
Cells are the most basic form of all life, and underlying normal cell function are the molecules used to build complex cellular structures, generate energy, and propagate dynamic life. The subject will study the fundamental processes through which key biomolecules, including lipids, carbohydrates, amino acids and nucleic acids are manipulated to generate and store energy, and build a broad array of important biological macromolecules including DNA, membranes and proteins. To sustain life, cells respire for energy and replicate for growth and sexual reproduction. Accordingly the subject will examine cellular respiration, transcription, translation, mitosis, meiosis, transmission and how genes are inherited and modified providing insight into the phenomena of life. The role of DNA technologies in the fields of medicine, biotechnology and environmental science will provide students with real world applications.

BIOS 1022 Introduction to Human Biology (10 Credit Points)
Subject Details (p. 2487) Legacy Code: 300361
This subject gives a basic understanding of the human body and introduces the scientific and medical terminology used for anatomy, physiology and biochemistry. It deals with gross structure and microscopic structure of the human body. It also examines microbial organisms, their classification, how they differ from eukaryotic cells and how our body defends against them. Where appropriate, examples of functional diseases will be discussed.

Equivalent Subjects: LGYA 7033 - Human Medical Sciences 1 LGYA 5170 - Physical and Biological Sciences 1 LGYB 7586 - Human Biology 1 BIOS 1023 - Introduction to Human Biology (WSTC)
Incompatible Subjects: NATS 1013 - Introduction to Anatomy BIOS 1025 - Introduction to Physiology
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 1023 Introduction to Human Biology (WSTC) (10 Credit Points)
Subject Details (p. 2488) Legacy Code: 700061
This subject gives a basic understanding of the human body and introduces the scientific and medical terminology used for anatomy, physiology and biochemistry. It deals with gross structure and microscopic structure of the human body. It also examines microbial organisms, their classification, how they differ from eukaryotic cells and how our body defends against them. Where appropriate, examples of functional diseases will be discussed.
Level: Undergraduate Level 1 subject
Pre-requisite(s): Students must pass NATS 0006 - Fundamentals of Health Science (WSTC Prep) prior to enrolling in this unit (except for those enrolled in 7019 - Diploma in Health Science Fast Track as NATS 0006 is not in the Fast Track course structure)
Equivalent Subjects: BIOS 1022 - Introduction to Human Biology
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 1027 Management of Aquatic Environments (10 Credit Points)
Subject Details (p. 2489) Legacy Code: 300824
This subject introduces students to the physical, chemical and biological nature of water systems and the linkages to human activity. These linkages include a development of an appreciation of the essential services and broad uses and values of water in modern human society, and the natural environment. Students are challenged to examine the causes and effects of water pollution and environmental degradation. Students are introduced to scientific water sampling, analysis and reporting of water quality and pollution.
Level: Undergraduate Level 1 subject
Equivalent Subjects: BIOS 1028 - Management of Aquatic Environments
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 1030 Resource Sustainability (10 Credit Points)
Subject Details (p. 2490) Legacy Code: 300810
Resource sustainability deals with the local, national, and global sustainability issues concerning human interactions with the environment. The subject uses current resource issues and scientific concepts to provide the practical and theoretical information needed for students to think critically about environmental issues and to contribute to the sustainable management of natural and built environments. Students will also learn how science and society interact in the management of resources. Using the concept of ecologically sustainable development as a foundation, students will use critical thinking skills to research a resource issue of their choice at the local, national and/or international level. Students will communicate their research using new mediaexploring the issue and make recommendations for improving sustainability.
Level: Undergraduate Level 1 subject
Equivalent Subjects: BIOS 1029 - Resource Sustainability BIOS 1031 - Resource Sustainability (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 1031 Resource Sustainability (WSTC) (10 Credit Points)
Subject Details (p. 2490) Legacy Code: 700099
Resource sustainability deals with the local, national, and global sustainability issues concerning human interactions with the environment. The subject uses current resource issues and scientific concepts to provide the practical and theoretical information needed for students to think critically about environmental issues and to contribute to the sustainable management of natural and built environments. Students will also learn how science and society interact in the management of resources. Using the concept of ecologically sustainable development as a foundation, students will use critical thinking skills to research a resource issue of their choice at the local, national and/or international level. Students will communicate their research using new mediaexploring the issue and make recommendations for improving sustainability.

Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 1033 Concepts in Human Physiology (10 Credit Points)
Subject Details (p. 2491) Legacy Code: 301254
This subject introduces the core concepts and terminology necessary to provide a basic understanding of the physiological responses of the human body using relevant examples. These include the processes of homeostasis, cell-cell interactions and the physical and chemical transport processes that are required to carry out integrated functions. Students will explore these key physiological concepts through practical hands-on experiments and in interactive group work in prac and tutorial classes, respectively. The subject provides the foundation to study the physiology of human organ systems.
Level: Undergraduate Level 1 subject
Equivalent Subjects: NATS 1009 NATS 1021
Incompatible Subjects: BIOS 1025 Introduction to Physiology BIOS 1022 Introduction to Human Biology
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 1034 Management of Aquatic Environments (WSTC) (10 Credit Points)
Subject Details (p. 2492) Legacy Code: 700297
This subject introduces students to the physical, chemical and biological nature of water systems and the linkages to human activity. These linkages include a development of an appreciation of the essential services and broad uses and values of water in modern human society, and the natural environment. Students are challenged to examine the causes and effects of water pollution and environmental degradation. Students are introduced to scientific water sampling, analysis and reporting of water quality and pollution.
Level: Undergraduate Level 1 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 1035 Anatomy and Physiology in Health (10 Credit Points)
Subject Details (p. 2493) Legacy Code: 301350
This subject introduces the levels of structural organisation of the human body together with scientific and medical terminology used in anatomy and physiology. It deals with gross structure and function of the major organ systems of the human body and where appropriate, a brief outline of environmental factors and personal health practices that affect optimal human body function will be introduced. It also deals with basic biomechanics of musculoskeletal system.
Level: Undergraduate Level 1 subject
Equivalent Subjects: LGYA 7033 - Human Medical Sciences 1 LGYA 5170 - Physical and Biological Sciences 1 LGYB 7586 - Human Biology 1 BIOS 1023 - Introduction to Human Biology (WSTC) BIOS 1022 - Introduction to Human Biology BIOS 1038 - Anatomy and Physiology in Health (WSTC)
Incompatible Subjects: NATS 1013 - Introduction to Anatomy BIOS 1025 - Introduction to Physiology
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 1036 Human Development and Disease across the lifespan (10 Credit Points)
Subject Details (p. 2494) Legacy Code: 401394
This subject builds on fundamental assumed knowledge of anatomy and physiology and introduces the study of human disease processes or pathophysiology through the framework of human development as a way of examining growth, health and disease at different stages of the lifespan. General concepts underlying human diseases as well as disorders relating to the lifespan will be studied. Developmental changes in physical, cognitive, social, intellectual, perceptual, personality and emotional growth are discussed. Common communicable and non-communicable, acute, chronic and degenerative health conditions are discussed from a pathophysiological, psychosocial and epidemiological perspective, and their impact on the day to day function of individuals and populations is explored. Risk factors for conditions and disease trajectory are explored at individual and society level, as well as the impact of these conditions on individuals, the health system and wider society.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 1037 Human Development and Disease across the Lifespan (WSTC) (10 Credit Points)
Subject Details (p. 2495) Legacy Code: 700314
This subject builds on fundamental assumed knowledge of anatomy and physiology and introduces the study of human disease processes or pathophysiology through the framework of human development as a way of examining growth, health and disease at different stages of the lifespan. General concepts underlying human diseases as well as disorders relating to the lifespan will be studied. Developmental changes in physical, cognitive, social, intellectual, perceptual, personality and emotional growth are discussed. Common communicable and non-communicable, acute, chronic and degenerative health conditions are discussed from a pathophysiological, psychosocial and epidemiological perspective, and their impact on the day to day function of individuals and populations is explored. BIOS 1039 Biodiversity (UG Cert) (10 Credit Points)
Subject Details (p. 2497) Legacy Code: 500050
How many species walk, fly, swim or slither, crawl, hop, wriggle or just float, hitchhike or move so slowly that they appear not to move at all? No one knows and new species appear almost every day. This subject focuses on this spectacular diversity of living things and the process of evolution. Students explore and classify biodiversity and how organisms' function, acquire and assimilate resources and co-ordinate growth and reproduction. Organisms interact with one another and their environment forming a complex set of interactions in ecosystems. It is these interactions that have driven evolution. Ultimately human survival depends on the sustainable use of this biodiversity and ecosystems.
Level: Undergraduate Level 1 subject
Equivalent Subjects: BIOS 1003 Biodiversity BIOS 1002 Biodiversity LGYB 0458 Biodiversity (UWSC) BIOS 1001 Biodiversity
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 1040 Natural Science (WSTC) (10 Credit Points)
Subject Details (p. 2498)
This subject delves into the rich tapestry of biodiversity, uncovering the myriad of living organisms that inhabit our planet and their intricate roles within ecosystems. In this subject, you will explore and classify biodiversity and the mechanisms through which organisms grow, reproduce, and utilise resources. You will learn about the process of evolution and how evolution has given rise to the diversity of organisms in the biosphere. You will also observe the natural interactions between living organisms and Earth's ecosystems, recognising that these very interactions have been pivotal in driving evolutionary changes. As you progress, you will gain insights into the importance of sustainable engagement with biodiversity, upon which the future of human survival depends.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 1041 Fundamentals of Biotechnology (WSTC) (10 Credit Points)
Subject Details (p. 2498)
In this subject you will explore the intricate world of cell and molecular biology, uncovering the foundational concepts crucial to biotechnology. You will explore the molecular building blocks of life and understand how they interact to form functional cells. You will investigate the roles played by proteins, nucleic acids, and other macromolecules in processes vital for life, like energy production, cell division, and reproduction. You will explore the realm of genetics to grasp the concepts of inheritance, genetic modification, and the pivotal roles nucleic acids and proteins have in the storage and flow of information. With a special emphasis on DNA technologies, you will discover how we can harness the biochemical processes of life for diverse applications. You will also gain insights into the transformative power of DNA technology across areas such as medicine, agriculture, food production, forensics, and environmental science, equipping yourself with knowledge of its real-world implications and innovations.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 2005 Botany (10 Credit Points)
Subject Details (p. 2499) Legacy Code: 300836
From microscopic algae to giant flowering angiosperms, this subject develops students knowledge and understanding of plants on earth. The subject covers the topics of plant anatomy and morphology, classification and systematics, and evolution. Students will examine the major groups of plants: green algae, bryophytes, lycophytes, monilophytes, gymnosperms and angiosperms. Laboratory and field work involves the study of common Australian plants and economically significant plants.
Level: Undergraduate Level 2 subject
Pre-requisite(s): BIOS 1001
Equivalent Subjects: LGYB 5440 - Botany LGYA 5941 - Botany
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 2006 Comparative Physiology (10 Credit Points)
Subject Details (p. 2500) Legacy Code: 300838
Building on the underlying physical and chemical principals/laws that define physiology, this subject from both a systems (e.g. Respiratory) and environmental (e.g. Marine) perspective, seeks to compare the functional physiology of organisms at all levels of organisation. Particular attention will be paid to respiration, temperature tolerance & regulation, living in water, sensory and neurophysiology. Students will have the opportunity to carry out a defined research project.
Level: Undergraduate Level 2 subject
Pre-requisite(s): BIOS 1012 Cell Biology
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 2008 Ecology (10 Credit Points)
Subject Details (p. 2501) Legacy Code: 300839
We live in a society where environmental problems dominate public debate. Ecology is one of the sciences required to find solutions to such problems; terms and ideas that came originally from ecology are used in public discussions, and in legislation. This subject will introduce students to ecology: what is studied, how it is studied, what are the strengths and limitations of ecology. Current ecological thinking will be covered, from the scale of individual organisms, through populations, and up to communities and ecosystems. Methods of study will be highlighted using evidence from molecular ecology through to field investigations.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYB 8458 - Ecology 21 BIOS 2007 - Ecology LGYB 8449 - Ecology 21 (V1)
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 2011 Exercise Nutrition, Body Composition and Weight Control (10 Credit Points)
Subject Details (p. 2502) Legacy Code: 400884
In 2016, this subject is replaced by 401141 - Exercise Nutrition. This subject provides students with an understanding of the interdependent areas of nutrition, body composition and body weight control within the context of sport, physical activity, and exercise. Nutritional needs and recommendations for all levels and types of physical activity are covered along with the links between nutrition and health, body composition, control of body weight and composition. Students will develop skills in nutritional analysis, body composition assessment and the development of exercise programs for weight control. Students will use these skills and knowledge in the individualisation of advice on exercise nutrition and body composition control.
Level: Undergraduate Level 2 subject
Pre-requisite(s): NATS 1009 AND
NATS 1010 AND
BIOS 1015
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 2012 Exercise Physiology (10 Credit Points)
Subject Details (p. 2503) Legacy Code: 401142
This subject covers the essential physiology that helps us understand how we control our exercise behaviour. In lectures there is a focus on physiological control, with emphasis on neuromuscular, cardiovascular, respiratory and thermoregulatory responses during exercise, as well as adaptation of these responses in response to ageing, disease and exercise training. In laboratory classes, there is a focus on the acquisition and interpretation of physiological responses during exercise.
Level: Undergraduate Level 2 subject
Pre-requisite(s): NATS 1009 AND
NATS 1010 AND
SPRT 1001 AND
NATS 1022
Equivalent Subjects: BIOS 2037 - Sport and Exercise Phyiology
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 2014 Functional Proteins and Genes (10 Credit Points)
Subject Details (p. 2503) Legacy Code: 300936
Biochemistry is the study of the chemistry of life. By understanding the structure and roles of biological macromolecules found in cells students will develop the concept of self assembly of these molecules to form life. Topics include the structure of carbohydrates, lipids, proteins, and nucleic acids and how they function in the lipid and aqueous environments of the cell. Basic metabolism is introduced with an overview of the major pathways in cells, mechanisms of regulation, and an introduction into important cofactors and intermediatory molecules. These concepts will be reinforced through practical classes that teach critical skills in experimental design, analysis and interpretation.
Level: Undergraduate Level 2 subject
Pre-requisite(s): BIOS 1012 AND
CHEM 1005
Equivalent Subjects: BIOS 2001 - Biochemistry 1 BIOS 2036 - Proteins and Genes
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 2016 General Microbiology (10 Credit Points)
Subject Details (p. 2504) Legacy Code: 300844
Microorganisms play a crucial role in soil and water ecosystems, in health and disease of plants and animals, including humans, as well as in industries such as the food and brewing industries. The subject builds on students existing knowledge of cell biology and biodiversity, and explores the characteristics of micro-organisms, the conditions required for their growth and survival, methods of control and their significance in the environment, health and industry. The theory and practice of microbiology are integrated in the laboratory component in which students learn techniques of handling, observing, growing and counting microorganisms.
Level: Undergraduate Level 2 subject
Pre-requisite(s): BIOS 1012 OR
BIOS 1001
Equivalent Subjects: BIOS 2015 - General Microbiology
Incompatible Subjects: LGYC 0093 - Microbiology 11 BIOS 2023 - Microbiology 1 BIOS 2022 - Microbiology 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 2018 Genetics (10 Credit Points)
Subject Details (p. 2505) Legacy Code: 300845
Our ability to rapidly and cheaply sequence a genome, ranging from humans, to native and domesticated plants and animals, and infectious bacteria and viruses, has revolutionised the field of genetics. More than ever, we understand our genetic relationship to life on earth, uncovering surprising similarities between our genome and the genomes of small worms and fruit flies. This subject will compare the genomes of different organisms and apply the methodology and theory of modern genetics to understand how the diversity of genetic variability impacts the structure and evolution of genomes, the expression of genes, and ultimately on the health and form of an organism.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYB 5446 - Genetics 22 BIOS 2019 - Human Genetics BIOS 2017 - Genetics
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 2021 Metabolism (10 Credit Points)
Subject Details (p. 2507) Legacy Code: 300848
Organisms degrade food molecules to generate energy and converts excess food molecules into internal fuel stores. This subject will cover topics including: bioenergetics; the structures of key molecules; glycolysis, gluconeogenesis, glycogen synthesis and breakdown; fatty acid oxidation and synthesis; amino acid catabolism; urea synthesis; citric acid cycle; electron transport and oxidative phosphorylation. Emphasis will be on the regulation and integration of these pathways, including their responses to hormonal regulation. The effects of altered dietary and hormonal status on metabolic pathways and their consequences for the organism will be discussed.
Level: Undergraduate Level 2 subject
Equivalent Subjects: BIOS 2002 - Biochemistry 2 CHEM 2005 - Human Metabolism Disease
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 2022 Microbiology 1 (10 Credit Points)
Subject Details (p. 2507) Legacy Code: 300833
In this subject students will use an inquiry-based approach to explore the origin and diversity of microorganisms and their significance in the environment, in foods and industry as well as in health and disease. Students will be introduced to the structure, reproduction, classification, cultivation and enumeration of bacteria, viruses, fungi and protists. The conditions required for growth and survival of microorganisms will be studied as well as physical and chemical methods of control. In laboratory classes students will develop skills in culturing and observing microorganisms and in designing experiments to test microbiological concepts. This subject is a pre-requisite for Microbiology 2 and Level 3 Microbiology subjects.
Level: Undergraduate Level 2 subject
Equivalent Subjects: BIOS 2023 - Microbiology 1
Incompatible Subjects: BIOS 2015 - General Microbiology
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 2024 Microbiology 2 (10 Credit Points)
Subject Details (p. 2508) Legacy Code: 300896
The subject focuses on the origins of genetic variation and the process of gene regulation in prokaryotes and explores the metabolic diversity of microorganisms from a variety of habitats and their application in industry and biotechnology. Using published scientific literature, students will learn how scientists research functional microbial physiology in the postgenomic era. The principles and applications of recombinant DNA techniques are discussed. Laboratory classes introduce students to techniques used to study microbial physiology and biotechnology based on microbial metabolism, such as examining the activity of antimicrobials and biotechnology such as microbial fuel cells.
Level: Undergraduate Level 2 subject
Pre-requisite(s): BIOS 2022
Equivalent Subjects: BIOS 2025 - Microbiology 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 2026 Molecular Biology (10 Credit Points)
Subject Details (p. 2509) Legacy Code: 300817
Molecular biology is central to many fields of the biomedical and natural sciences, and includes genetics, immunology, cell biology, biochemistry, and forensics. Through comparative studies of different organisms, this subject will describe fundamental concepts and methods in the study of DNA and RNA and the application of molecular biology in advanced fields such as genomics. Subjects will include DNA replication; transcriptional, post-transcriptional and epigenetic regulation of gene expression; microarrays, and an introduction to bioinformatics. Practical work will provide opportunities to become familiar with the methods of molecular biology, with an emphasis on the development of problem solving and analytical skills
Level: Undergraduate Level 2 subject
Pre-requisite(s): BIOS 2014 OR
BIOS 2018 OR
BIOS 2021
Equivalent Subjects: BIOS 3020 - Molecular Biology BIOS 3015 - Human Molecular Biology
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 2032 Plant Physiology (10 Credit Points)
Subject Details (p. 2510) Legacy Code: 300865
Plants are the primary producers of terrestrial ecosystems and moderators of climate change. This subject introduces students to how plants grow and interact with their environment. Students will learn how leaves turn sunlight energy into sugars; stems transport water, solutes and organic compounds; roots acquire water and mineral nutrients by themselves or in association with soil microbes; and hormones regulate plant development and responses to the environment. This knowledge set is crucial for managing our Century's key challenges of food security and climate change. Students will be required to travel to the Hawkesbury campus where the practicals take place.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYA 5946 - Introductory Plant Physiology BIOS 2033 - Plant Physiology
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 2034 Principles of Evolution (10 Credit Points)
Subject Details (p. 2511) Legacy Code: 300980
This subject is designed to impart an understanding of the core concepts in modern evolutionary theory, and an appreciation of the central position it plays in unifying all sub-disciplines of biology. The subject will cover modern synthesis, phylogenetics, phylogeography, origin of variation, genetic drift, natural selection, and coevolution, with a major emphasis on evolutionary mechanisms and analytical techniques.
Level: Undergraduate Level 2 subject
Pre-requisite(s): BIOS 1001 AND
BIOS 1012
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 2035 Principles of Zoology (10 Credit Points)
Subject Details (p. 2512) Legacy Code: 300979
Explores the diversity of invertebrate and vertebrate life in a phylogenetic context. Taxonomy, anatomy, ecology, ethology and physiology of major groups of animals are examined. Patterns will be examined from an evolutionary perspective and the subject will focus on structure and function to examine specialisations and adaptations of animals to their environment. The subject will use lectures and laboratory sessions to allow an interactive appreciation of the diversity of biological mechanisms and processes in the Animal Kingdom.
Level: Undergraduate Level 2 subject
Pre-requisite(s): BIOS 1001
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 2040 Invertebrate Zoology (10 Credit Points)
Subject Details (p. 2513) Legacy Code: 301256
More than 99% of animals are invertebrates and due to their key role in all ecosystems, renowned biologist E. O. Wilson famously described them as the 'little things that run the world'. Besides their ecological importance, many invertebrates are useful to humans, whereas others are harmful to agriculture, human and veterinary health. This subject introduces invertebrate diversity in the context of their ecological and economic importance. It also develops skills necessary to classify and distinguish between the major invertebrate taxa. This subject includes fundamental hands-on laboratory and field studies skills for students with broad career pathways in science (e.g. animal, environmental, forensic and medical sciences) as well as agriculture, environmental management, and education.
Level: Undergraduate Level 2 subject
Equivalent Subjects: NATS 3026 Forensic Biology BIOS 2035 Principles of Zoology
Incompatible Subjects: BIOS 3017 Invertebrate Biology
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 2041 Vertebrate Zoology (10 Credit Points)
Subject Details (p. 2513) Legacy Code: 301257
This subject examines the functional ecology and diversity of vertebrate animals (fish, amphibians, reptiles, birds and mammals). It combines anatomy, physiology, ecology and behaviour, to explain how vertebrates survive and reproduce in relation to their environment. We will uncover the evolutionary relationships among vertebrate groups, and examine their adaptations to different environmental challenges. The subject also explores patterns in vertebrate diversity, with a focus on Australian ecosystems. Students further develop their knowledge of the scientific method to conduct their own project to investigate how environmental factors influence vertebrate animal abundance and diversity. Students may be required to travel to another campus to undertake this subject.
Level: Undergraduate Level 2 subject
Pre-requisite(s): BIOS 1001
Incompatible Subjects: BIOS 3023 Vertebrate Biodiversity
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 2042 Biochemistry (10 Credit Points)
Subject Details (p. 2514) Legacy Code: 301460
Biochemistry is the study of the chemistry of life. By understanding the structure and roles of biological macromolecules found in cells students will develop the concept of self assembly of these molecules to form life. Topics include the structure of carbohydrates, lipids, proteins, and nucleic acids and how they function in the lipid and aqueous environments of the cell. Basic metabolism is introduced with an overview of the major pathways in cells, mechanisms of regulation, and an introduction into important cofactors and intermediatory molecules. These concepts will be reinforced through practical classes that teach critical skills in experimental design, analysis and interpretation.
Level: Undergraduate Level 2 subject
Pre-requisite(s): CHEM 1012 Essential Chemistry
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 3001 Advanced Cell Biology (10 Credit Points)
Subject Details (p. 2515) Legacy Code: 300850
Cells of the body are studied in the context of health and disease, including mechanisms by which cells respond to the environment and integrate in and around tissue. Fundamental cellular processes are discussed that are important in embryonic development, stem cells, haematology and cancer. This subject investigates the action of hormones, growth factors and morphogens; their receptors and signalling pathways and the cellular responses they trigger. This subject covers modern techniques in cell culture, tissue engineering, advanced microscopy and other modern experimental approaches that enable dynamic understanding of live cell function.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BIOS 2021 OR
BIOS 2014 OR
BIOS 2026 OR
BIOS 2020
Equivalent Subjects: LGYA 6014 - Mammalian Cell Biology and Biotechnology BIOS 3011 - Cell Signalling
Incompatible Subjects: LGYA 5857 - Cell Signalling and Molecular Immunology
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 3003 Advanced Sports Physiology (10 Credit Points)
Subject Details (p. 2516) Legacy Code: 400888
In 2017, this subject is replaced by 401146 - Applied Physiology. This subject presents the knowledge and laboratory skills essential to understanding the physiological demands on the sports participant, as well as to develop, implement and evaluate sports-specific training programs. Students will develop the knowledge and skills necessary to perform and interpret results for a number of standard laboratory and field-based physiological tests used in talent identification and the assessment of high performance athletes. Prescription focuses on the development and implementation of sport specific fitness programs. Also covered are the physiology of ergogenic aids, overtraining, muscle fatigue and soreness; physiological factors limiting performance; and physiological responses to exercise in challenging environments.
Level: Undergraduate Level 3 subject
Pre-requisite(s): HLTH 2006 AND
HLTH 2004 AND
BIOS 2037
Equivalent Subjects: BIOS 3022 - Sports Physiology
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 3004 Analytical Microbiology (10 Credit Points)
Subject Details (p. 2518) Legacy Code: 300866
The subject provides a theoretical and practical introduction to wide range of microbiological techniques that are commonly used in medical science, industrial and food microbiology, environmental science, and research. Building on a basic understanding of microbiology the subject shows how microorganisms can be isolated, identified, and enumerated using traditional microbiological methods, modern variations on traditional methods, and more recent immunological and molecular methods. The laboratory component is an integral component of the subject as the students use a variety of techniques, methods and commercial systems that are applied in microbiological laboratories, and incorporates problem solving and inquiry based exercises.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BIOS 2022
Equivalent Subjects: BIOS 3031 - Analytical Microbiology
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 3005 Applied Biomechanics (10 Credit Points)
Subject Details (p. 2519) Legacy Code: 401147
To fully understand the science underlying the optimisation of human movement, students require a comprehensive working knowledge of Biomechanics. This subject represents a theoretical and applied study of selected topics in Biomechanics. It builds on the basic principles of Biomechanics that are presented in the subject Biomechanics and applies this knowledge to the analysis of sporting and human exercise performance. To achieve this, advanced methods and concepts in the biomechanical analysis of human performance are identified and explored.
Level: Undergraduate Level 3 subject
Pre-requisite(s): HLTH 2003
Equivalent Subjects: BIOS 3006 - Applied Biomechanics of Exercise BIOS 3007 - Applied Biomechanics of Sport and Exercise
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 3007 Applied Biomechanics of Sport and Exercise (10 Credit Points)
Subject Details (p. 2519) Legacy Code: 400889
To fully understand the science underlying the optimisation of human movement, students require a comprehensive working knowledge of Biomechanics. This subject represents a theoretical and applied study of selected topics in Biomechanics. It builds on the basic principles of Biomechanics that are presented in the subject Introduction to Biomechanics and applies this knowledge to the analysis of sporting and human exercise performance. To achieve this, advanced methods and concepts in the biomechanical analysis of human performance are identified and explored.
Level: Undergraduate Level 3 subject
Pre-requisite(s): HLTH 2008
Equivalent Subjects: BIOS 3006 - Applied Biomechanics of Exercise
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 3012 Conservation Biology (10 Credit Points)
Subject Details (p. 2520) Legacy Code: 300855
Most species disappearances have occurred in major extinction events spread over geological time. Are we in the midst of and the cause of another mass extinction event? This subject will explore this idea by examining the processes that have led to, and are leading to species extinction and the current biodiversity crisis. Many of the methods and issues used in and associated with conservation will be covered in a variety of case studies, field and laboratory activities.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 6073 - Environmental Biology LGYA 6182 - Conservation Biology
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 3013 Ecosystem Carbon Accounting (10 Credit Points)
Subject Details (p. 2521) Legacy Code: 300856
A critical part of society's response to climate change is to measure the movement of greenhouse gases. Once this is done, steps taken to reduce these gases can be correctly targeted and the impact of such steps monitored. This subject will introduce students to the scientific measurement of greenhouse gas uptake and emissions, including assessment of uncertainties and verifiability of measurement. Ecosystem-level models will be used to estimate and quantify movement of greenhouse gases, allowing quantification of the net greenhouse gas emissions over the life cycle of a product. These approaches are vital steps in moving our society to a sustainable future.
Level: Undergraduate Level 3 subject
Pre-requisite(s): EART 2001
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 3014 Genes, Genomics and Human Health (10 Credit Points)
Subject Details (p. 2522) Legacy Code: 300820
A genome is all of the genetic information that makes us who we are. Beginning with an overview of the evolution of the human genome, this subject will introduce you to current concepts in gene regulation and how genetic variability is correlated with susceptibility to rare and common disease in individuals and populations. You will also gain practical experience in key methods and analyses of genetic variation and understand how such techniques are delivering new insights into the origins and treatment of human disease.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BIOS 2018 Genetics
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 3017 Invertebrate Biology (10 Credit Points)
Subject Details (p. 2522) Legacy Code: 300918
Invertebrates are the most diverse and abundant organisms in aquatic and terrestrial environments. Due to their key role in many ecosystems, biologist E. O. Wilson coined the phrase of invertebrates as the 'little things that run the world'. Besides their ecological importance, many invertebrates are useful to humans, whereas others are harmful to agriculture, human and veterinary health. This subject highlights invertebrate diversity and life histories as well as their key ecological and economic importance. It also includes hands-on laboratory and field studies. This subject is designed for students with career pathways in science (e.g. animal, environmental, forensic and medical sciences) as well as agriculture, environmental management and education.
Level: Undergraduate Level 3 subject
Equivalent Subjects: BIOS 3018 - Invertebrate Biology NATS 3026 - Forensic Biology
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 3019 Marine and Aquatic Ecology (10 Credit Points)
Subject Details (p. 2523) Legacy Code: 300978
Temperate freshwater, estuarine and marine aquatic ecosystems play vital roles in providing food, water, recreation and other ecosystem services to human society and habitats for important species that make up global biodiversity. Yet aquatic habitats are the most threatened ecosystems on earth, under threat from global climate change and urbanisation. Through inquiry and problem solving this subject will equip students with the necessary techniques in experimental design and analysis needed to investigate aquatic ecosystems and knowledge of the main animal and plants in aquatic and marine ecosystems. The logic and philosophy of science, scientific studies and experimental analyses will be used to understand temperate aquatic ecosystems throughout this subject. On completion students will have the background knowledge and skills communicate to a range of audiences, so that they can contribute beneficially to management and/or conservation of waterways and oceans and the biodiversity within.
Level: Undergraduate Level 3 subject
Equivalent Subjects: BIOS 3009 - Aquatic Ecology BIOS 3010 - Aquatic Ecology
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 3021 Plant Health and Biosecurity (10 Credit Points)
Subject Details (p. 2524) Legacy Code: 300921
This subject explores needs of world food production systems for improved plant health and biosecurity, from paddock to plate and environmental consequences of management practices. Through their studies, students will learn to recognise the significance of plant pests (invertebrates, microorganisms and weeds) and their impact on human society and food security, and methods of reducing their damage to plants and plant products. Major areas of study include: recognition of pests and diseases and assessment of field damage; strategies for reducing pest damage (including legislative, physical, biological, genetic and chemical control methods) and their benefits and limitations; the theory and practice of integrated pest and disease management systems; and issues associated with quarantine and biosecurity.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 6250 - Plant Microbiology and Protection
Incompatible Subjects: LGYA 5948 - Plant Microbiology Interactions LGYA 6200 - Plant Protection
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 3023 Vertebrate Biodiversity (10 Credit Points)
Subject Details (p. 2525) Legacy Code: 300861
This subject examines the functional ecology and diversity of vertebrate animals (fish, amphibians, reptiles, birds and mammals). It takes an integrative approach, combining anatomy, physiology, ecology and behaviour, to explain how vertebrates survive and reproduce in relation to their environment. We will uncover the evolutionary relationships among vertebrate groups, and examine their adaptations to different environmental challenges. The subject also explores patterns in vertebrate diversity, with a focus on Australian ecosystems. Students will apply their knowledge of the scientific method to design and conduct their own research project to investigate how environmental factors influence vertebrate animal abundance and diversity.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BIOS 1001
Equivalent Subjects: LGYA 5856 - Animal Form Function BIOS 3024 - Vertebrate Biodiversity
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 3026 Evolution and Genetics (10 Credit Points)
Subject Details (p. 2525) Legacy Code: 301253
This subject will ensure students are able to understand the core concepts in modern evolutionary theory and the central position that evolution plays in unifying all sub-disciplines of biology. It will also enable students to distinguish the major genetic mechanisms that underpin these theories and critically assess the general importance of genetics in the evolutionary process. In particular, students will gain an in depth knowledge on speciation and population divergence, origin of genetic variation, genetic drift and founder effects, natural and sexual selection, migration, mutation and coevolution, with a major emphasis on genetic mechanisms and the analytical techniques used to assess them. Students may be required to travel to a different campus to undertake this subject.
Level: Undergraduate Level 3 subject
Incompatible Subjects: BIOS 2034 Principles of Evolution
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 3027 Molecular Biology of the Cell (10 Credit Points)
Subject Details (p. 2526) Legacy Code: 301251
Molecular biology is central to many fields of the biomedical and natural sciences, and includes genetics, immunology, cell biology, biochemistry, and forensics. Through comparative studies of different organisms, this subject will explain fundamental concepts and methods in the study of DNA and RNA, extending to the application of molecular biology in more advanced fields such as genomics. Subjects will include DNA replication; transcriptional, post-transcriptional and epigenetic regulation of gene expression; microarrays, and an introduction to bioinformatics. Practical work will provide opportunities to become familiar with the methods of molecular biology, with an emphasis on the development of problem solving and analytical skills.Students may be required to travel to a different campus to undertake this subject.
Level: Undergraduate Level 3 subject
Incompatible Subjects: BIOS 3015 Human Molecular Biology
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 3028 Pathological Basis of Human Disease (10 Credit Points)
Subject Details (p. 2527) Legacy Code: 301260
Pathology is the study of disease. Students will gain an understanding of human pathogenesis, general and systems pathological processes, and the scientific basis of diagnostic and treatment options. The subject builds upon the students' fundamental knowledge of physiological processes and knowledge of normal human tissue and organ histology, and examines histopathological changes evident in disease states. Students may be required to travel to another campus to undertake this subject.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BIOS 2029 OR
BIOS 2030 OR
NATS 2035
Incompatible Subjects: BIOS 2027
NATS 2037
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 3029 Biotic interactions (10 Credit Points)
Subject Details (p. 2528) Legacy Code: 301266
This subject will introduce the diversity of biotic interactions observed in nature, with an emphasis on their significant roles in maintaining ecosystem function and regulating biological diversity. Major themes will include the role of microbes in plant and animal health and nutrient acquisition via the soil and gastrointestinal microbiomes, the chemical ecology of interactions between plants, and herbivores and pollinators, and interactions between predators and prey. The consequences of biotic interactions for participants can vary from mutual benefit to benefit for one participant and harm for the other, however these outcomes can often change through time and space. Students will be guided to an understanding of how ecological circumstances determine the consequences of biotic interactions.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BIOS 2008 AND
BIOS 1001
Equivalent Subjects: BIOS 3012 Conservation Biology
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 3030 Global Change Ecology (10 Credit Points)
Subject Details (p. 2528) Legacy Code: 301268
Students in Global Change Ecology synthesize and apply their knowledge about how ecological systems are responding to human impacts occurring in the Anthropocene, and how adaptation and mitigation can moderate these impacts. Students will demonstrate attributes expected of Ecology graduates, including skills in oral and written communication, quantitative analysis, and critical thinking. Guest speakers from the research community and industry will be invited to represent potential career paths related to ecological sustainability and the broader career destinations of science graduates.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BIOS 2008 AND
EART 2001
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 3032 Plant Science (10 Credit Points)
Subject Details (p. 2529) Legacy Code: 301272
Plants are the primary producers of terrestrial ecosystems and moderators of climate change. This subject introduces students to how plants grow and interact with their environment. Students will learn how leaves turn sunlight energy into sugars; stems transport water, solutes and organic compounds; roots acquire water and mineral nutrients by themselves or in association with soil microbes; and hormones regulate plant development and responses to the environment. This knowledge set is crucial for managing our Century's key challenges of food security and climate change. Students will be required to travel to the Hawkesbury campus where the practicals take place.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 3033 Applied Bioinformatics (10 Credit Points)
Subject Details (p. 2529) Legacy Code: 301406
The ability to perform computational experiments and analyse data is a key component for a successful career in the biological sciences. This subject focuses on how biology has been enhanced through advances in technology, genomics, transcriptomics, proteomics and metabolomics in the development of cell phenotype. Using model systems, this subject shows how research biologists use computational cell biology to form hypotheses, mine data, analyse experiments, and synthesise information. Students will apply bioinformatics and engage with next-generation DNA sequencing data. Students will apply web-based bioinformatics toolkits to construct and compare model genomes, transcriptome, proteome and metabolome information to profile cell genotype and phenotype. Students will undertake a project that interprets and communicates research findings in the context of real world applications, legal and ethical frameworks.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 3034 Molecular Biotechnology (10 Credit Points)
Subject Details (p. 2530) Legacy Code: 301405
Molecular techniques in cell biology are rapidly developing and offer new solutions to disease mitigation, as well as sustainable solutions to environmental and industrial imperatives. The fundamental cellular processes along with stem cell development, transformation, transfection, cell engineering and re-programming are some of the advanced applications covered in this unit. Students will conduct guided projects investigating the action of hormones, growth factors, morphogens and bio-actives; their receptors and signalling pathways and the cellular responses they trigger. Molecular Biotechnology covers modern techniques in cell screening, cell culture, advanced characterization and experimental approaches enabling dynamic understanding of live microbial, animal and plant cells.
Level: Undergraduate Level 3 subject
Equivalent Subjects: BIOS 3001 - Advanced Cell Biology
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 3035 Sustainable Environments (10 Credit Points)
Subject Details (p. 2531) Legacy Code: 301409
As a student in Sustainable Environments you will synthesize and apply your knowledge about how ecological systems are responding to human impacts in the Anthropocene and how adaptation and mitigation can moderate these impacts. You will demonstrate knowledge of the role of biological and physical processes in provision of ecosystem services. You will apply analytical skills to identify sustainable solutions in social-ecological systems. You will incorporate social and cultural contexts, including relevant Aboriginal perspectives, in communicating science-based knowledge related to the United Nations sustainable development goals in an independent, problem-based sustainability project.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BIOS 2008
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 3036 Agricultural Biosecurity (10 Credit Points)
Subject Details (p. 2532) Legacy Code: 301450
Students will be exposed to current and emerging biosecurity issues world food production systems are expected to comply with and develop to ensure sustainable and safe animal and plant products. This subject will enable you to recognise, monitor and control animal and plant pests (invertebrates, microorganisms and weeds) and their impact on human society and food security. Major areas of study include strategies and procedures to identify, record and assess damage to animal and plant products. Included in this subject are key issues related to legislative, physical, biological, genetic and chemical control methods, along their benefits and limitations. Theory and practice of integrated pest and disease management systems and issues associated with quarantine and biosecurity are contextually embedded in subject content and activity.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 6250 Plant Microbiology and Protection BIOS 3021 Plant Health and Biodiversity
Incompatible Subjects: LGYA 5948 Plant Microbiology Interactions LGYA 6200 Plant Protection
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 3037 Climate change and biodiversity conservation (10 Credit Points)
Subject Details (p. 2532) Legacy Code: 301480
Level: Undergraduate Level 3 subject
Equivalent Subjects: EART 3001 Biological Adaptation to Climate Change
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 3038 Metabolism (10 Credit Points)
Subject Details (p. 2533)
Humans ingest amino acids, carbohydrates, fats, vitamins, and minerals to generate cells and tissue for growth, maintenance and defence, along with energy. This subject will cover topics including: bioenergetics; the structures of key molecules; metabolic pathways in health and disease along with disease remediation by contextualising glycolysis, gluconeogenesis, glycogen synthesis and breakdown; fatty acid oxidation and synthesis; amino acid catabolism; urea synthesis; citric acid cycle, oxidative phosphorylation with the role of vitamins and minerals in metabolic pathways. Emphasis will be on the regulation and integration of these pathways, including their responses to hormonal regulation. The effects of metabolic disease altered dietary and hormonal status on metabolic pathways and their consequences will be addressed in the context of clinical case studies.
Level: Undergraduate Level 3 subject
Equivalent Subjects: BIOS 2021
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 3039 Ecology (10 Credit Points)
Subject Details (p. 2534)
Humans have long been fascinated by Earth's astounding diversity of species and ecosystems. Ecology is the science that study the distribution of these species, the controls on population dynamics, and what structures communities and ecosystems. The resulting knowledge is critical to inform land management and policy decision-making to conserve biodiversity, sustainably manage ecosystems, while supporting a growing human population through provision of ecosystem services including food production and adaptation to climate change. In this subject, you will learn current ecological theory from the scale of individual organisms, through populations, to communities and ecosystems; how to conduct ecological research; and, how to apply ecological knowledge to solve real world problems.
Level: Undergraduate Level 3 subject

BIOS 4001 Science, Technology and Environment Honours Project (60 Credit Points)
Subject Details (p. 2534) Legacy Code: 300412
This is a 60 credit point year-long subject taken over two terms (30 credit points in each term).The aim of this subject is to further develop the student's research and problem solving skills. The student is required to implement a research plan, complete a substantive piece of research in a relevant field within Science, Technology and the Environment and to communicate the results of that work to an interested and technically literate audience. Students will present their research as a thesis with a substantial chapter detailing research objectives, methodology and research outcomes. The thesis topic and structure will vary according to the area of interest of the student and the expertise of the supervisor. The project is meant to be a significant undertaking and to incorporate some element of innovation. Throughout this subject regular planned consultations between the student and supervisor(s) will occur and students will be required to attend seminar series or regular research meetings; these may be formal components of other subjects within the Bachelor (Honours) program. Students are expected to work to a schedule devised in consultation with their supervisor. The schedule will include dates set for progress reports and the presentation of draft chapters for review by the supervisor. The subject builds upon the skills developed in the undergraduate program, extending students' competencies in a range of practical techniques and processes of critical thinking. Students who successfully complete the Honours program will have achieved the appropriate background to enable them to pursue further postgraduate research and/or coursework in the sciences or pursue a career in industry or profession.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 7001 Emerging Technologies for Biological Science (10 Credit Points)
Subject Details (p. 2535) Legacy Code: 800186
This subject serves to enhance the technological education and training for students undertaking research in biological, agricultural and medical sciences. The subject will teach current and emerging technologies utilised in biological investigations with a focus on model species of animals, plants, insects and microorganisms. The subject is structured around emerging technologies in research fields of: 1) whole organism physiology, 2) cell molecular biology and biochemistry, and 3) genomic and epigenomic processes encoded by the nucleus. Students will be exposed to a systems approach in order to investigate complex interactions with a view towards understanding the impacts of the environment on biological interactions. Teaching will be undertaken by Western Sydney University-HIE staff who are world leaders in their respective research fields.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BIOS 9001 Higher Degree Research Thesis - Animal Science (80 Credit Points)
Subject Details (p. 2536) Legacy Code: 800164
Level: PhD and Research Masters Level 9 subject

Building (BLDG)

BLDG 0001 Academic Skills for Construction Management (WSTC Prep) (10 Credit Points)
Subject Details (p. 2539) Legacy Code: 700200
This subject is designed to assist students to become successful independent and reflective learners. It introduces students to a range of theories and concepts to facilitate the development of practical skills and personal attitudes necessary for success in tertiary study. The subject also develops basic competencies in using computers and application software for the Building Design Management and Construction Management industries. The subject covers the use of word-processing software and spreadsheets. Students are also introduced to project management and design software.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 0002 Building Calculations (WSTC Prep) (10 Credit Points)
Subject Details (p. 2540) Legacy Code: 700318
This subject is designed to assist students to become competent in the field of introductory senior mathematics. It introduces and reinforces mathematical skills in the areas of scale, application of scale, Pythagoras theory, trigonometry, sine and cosine, application of sine and cosine, building volumes, application of building volumes, gradients, application of gradients and thermal flow. Emphasis is placed on developing key competencies in building calculations.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: MATH 0027 - Scientific Methods in Construction Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 1006 Building 2 (WSTC) (10 Credit Points)
Subject Details (p. 2540) Legacy Code: 700071
This subject has been replaced by equivalanet subject 700305 from Term 3, 2021. The aim of this subject is to provide students with an overview of the design, classification, applicable Australian Standards, structural systems, construction techniques, materials handling systems, building services, fit-out and finishes for larger scale buildings.
Level: Undergraduate Level 1 subject
Equivalent Subjects: BLDG 1005 - Building 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 1007 Construction Work Safety (10 Credit Points)
Subject Details (p. 2541) Legacy Code: 301061
This introductory subject describes the context of safety management in the Australian construction industry. The topics covered include: The poor long-term record in the construction industry on Workplace Health and Safety (WHS); Strategies for improving the industry performance; Introduction to hazard identification and risk management; and Individual safety awareness and personal responsibility.
Level: Undergraduate Level 1 subject
Equivalent Subjects: BLDG 1008 - Construction Work Safety (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 1008 Construction Work Safety (WSTC) (10 Credit Points)
Subject Details (p. 2542) Legacy Code: 700256
This subject describes the context of safety management in the Australian construction industry. The topics covered include: The poor long-term record in the construction industry on Workplace Health and Safety (WHS); Strategies for improving the industry performance; Introduction to hazard identification and risk management; and Individual safety awareness and personal responsibility.
Level: Undergraduate Level 1 subject
Equivalent Subjects: BLDG 1007 - Construction Work Safety
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 1009 Environmental Building Design (10 Credit Points)
Subject Details (p. 2542) Legacy Code: 301062
This subject explores the important parameters that are used to facilitate sustainable change in the built environment. Building design is a tool to minimise the use of scarce resources and reduce the impact on the natural Australian landscape. Improving the standard of liveability in urban and peri-urban communities is addressed through the development of holistic building design solutions.
Level: Undergraduate Level 1 subject
Equivalent Subjects: BLDG 1010 - Environmental Building Design (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 1010 Environmental Building Design (WSTC) (10 Credit Points)
Subject Details (p. 2543) Legacy Code: 700255
This subject explores the important parameters that are used to facilitate sustainable change in the built environment. Building design is a tool to minimise the use of scarce resources and reduce the impact on the natural Australian landscape. Improving the standard of liveability in urban and peri-urban communities is addressed through the development of holistic building design solutions.
Level: Undergraduate Level 1 subject
Equivalent Subjects: BLDG 1009 - Environmental Building Design
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 1011 Property Building (10 Credit Points)
Subject Details (p. 2544) Legacy Code: 301157
This subject provides students with an overview of regulations and construction techniques with an emphasis on low-rise residential buildings in the Australian context. It covers general process; building regulations; environmental issues; surveying techniques; structural elements (footings, framing and bracing); envelope; services; fit-out and finishes.
Level: Undergraduate Level 1 subject
Incompatible Subjects: BLDG 1001 Building 1 BLDG 1003 Building 1 (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 1012 Property Development Controls (10 Credit Points)
Subject Details (p. 2545) Legacy Code: 200435
Property Development Controls provides students with an understanding of the property planning process from both a State government and Local government perspective. The subject will cover the areas of planning instruments, planning process, property development control issues and planning applications. The subject will also address the areas of the valuation and development impact of planning and environment regulations, with specific reference to the regulatory framework that regulates planning and development in NSW and the impact on the property industry in Australia.
Level: Undergraduate Level 1 subject
Incompatible Subjects: ARCH 2003 - Development Control
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 1013 Building Science (10 Credit Points)
Subject Details (p. 2545) Legacy Code: 301219
This subject provides students with an introductory overview of the way in which scientific principles impact on the structure, fabric and performance of the built environment. Areas covered will include the concepts of force, energy and work in building structures; properties of common building materials; and significant aspects of heat, light and sound in buildings. All the theoretical content will be contextualised within examples drawn from the construction industry. Students will be able to recognise the critical data required for practical decision-making in the area of building technology.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 1014 Non-Residential Building (10 Credit Points)
Subject Details (p. 2546) Legacy Code: 301227
The aim of this subject is to provide students with an introduction to the design, classification, applicable Australian Standards, structural systems, construction techniques, materials handling systems, building services, fit-out and finishes for larger scale buildings. The subject focusses on non-residential building projects such as shopping centres, factories, warehouses, office buildings and associated facilities.
Level: Undergraduate Level 1 subject
Equivalent Subjects: BLDG 1004 Building 2
BLDG 1006 Building 2 (WSTC)
BLDG 1005 Building 2
BLDG 1017 Non Residential Building (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 1015 Residential Building (10 Credit Points)
Subject Details (p. 2547) Legacy Code: 301226
This subject provides students with an overview of regulations and construction techniques with an emphasis on low-rise residential buildings in the Australian context. It covers general process, building regulations, environmental issues, surveying techniques, structural elements (footings, framing and bracing), envelope, services, fit-out and finishes.
Level: Undergraduate Level 1 subject
Equivalent Subjects: BLDG 1002 Building 1
BLDG 1003 Building 1 (WSTC)
BLDG 1001 Building 1
BLDG 1018 Residential Building (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 1016 Building Science (WSTC) (10 Credit Points)
Subject Details (p. 2548) Legacy Code: 700308
This subject provides students with an introductory overview of the way in which scientific principles impact on the structure, fabric and performance of the built environment. Areas covered will include the concepts of force, energy and work in building structures; properties of common building materials; and significant aspects of heat, light and sound in buildings. All the theoretical content will be contextualised within examples drawn from the construction industry. Students will be able to recognise the critical data required for practical decision-making in the area of building technology.
Level: Undergraduate Level 1 subject
Equivalent Subjects: BLDG 1013 - Building Science
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 1017 Non-Residential Building (WSTC) (10 Credit Points)
Subject Details (p. 2549) Legacy Code: 700305
This subject provides students with an introduction to the design, classification, applicable Australian Standards, structural systems, construction techniques, materials handling systems, building services, fit-out and finishes for larger scale buildings. The subject focusses on non-residential building projects such as shopping centres, factories, warehouses, office buildings and associated facilities.
Level: Undergraduate Level 1 subject
Equivalent Subjects: BLDG 1004 - Building 2 BLDG 1006 - Building 2 (WSTC) BLDG 1005 - Building 2 BLDG 1014 - Non-Residential Building
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 1018 Residential Building (WSTC) (10 Credit Points)
Subject Details (p. 2550) Legacy Code: 700304
This subject provides students with an overview of regulations and construction techniques with an emphasis on low-rise residential buildings in the Australian context. It covers general process, building regulations, environmental issues, surveying techniques, structural elements (footings, framing and bracing), envelope, services, fit-out and finishes.
Level: Undergraduate Level 1 subject
Equivalent Subjects: BLDG 1002 - Building 1 BLDG 1003 - Building 1 (WSTC) BLDG 1001 - Building 1 BLDG 1015 - Residential Building
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 1019 Construction Site Administration (WSTC) (10 Credit Points)
Subject Details (p. 2551)
This subject delves into the roles and challenges confronting professionals in construction site management and administration. Through the lens of real-world case studies and project scenarios, students gain an introductory understanding of the diverse responsibilities involved in construction management and site administration. The subject features a specialised task focused on research and problem-solving, targeting sustainability challenges in the construction industry. Alongside developing fundamental research and communication skills, the subject places a strong emphasis on academic and business literacy. Skills in project management and teamwork are also cultivated, preparing students for future academic pursuits and professional engagements in construction site administration and beyond.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 1020 Domestic Construction (WSTC) (10 Credit Points)
Subject Details (p. 2551)
This subject provides students with an overview of domestic construction regulations and techniques with an emphasis on low-rise residential buildings in the Australian context. It covers general processes, building regulations, environmental issues, surveying techniques, structural elements (footings, framing and bracing), envelopes, services, fit-outs, and finishes.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 1021 Commercial Construction (WSTC) (10 Credit Points)
Subject Details (p. 2552)
This subject provides students with an introduction to the design, classification, applicable Australian Standards, structural systems, construction techniques, materials handling systems, building services, fit-out and finishes for larger scale buildings. The subject focusses on commercial construction projects such as shopping centres, factories, warehouses, office buildings and associated facilities.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 1022 Construction Site Safety (WSTC) (10 Credit Points)
Subject Details (p. 2552)
This subject describes the context of safety management within the Australian construction industry. Covering a range of topics, the subject addresses the sector's historically subpar performance in Workplace Health and Safety (WHS) while exploring avenues for improvement. The subject extends beyond basic hazard identification and risk management to encompass an in-depth look at workplace safety responsibilities, causes of accidents, WHS legal frameworks, and individual accountability. It also covers the specific hazards and controls related to WHS, techniques for thorough accident investigation, and the economic and ethical considerations affecting construction safety. Finally, the subject outlines effective principles and strategies for promoting a culture of safety within the industry.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 2001 Building Estimates and Tendering (10 Credit Points)
Subject Details (p. 2553) Legacy Code: 301207
This subject will provide students with an understanding of the principles of design economics and the factors that affect the cost of buildings. Students will learn cost planning process and will be introduced to a range of estimating techniques that could be used at various stages of a building project. A particular focus would be to understand the tendering process and how to prepare detailed estimates using unit rate method.
Level: Undergraduate Level 2 subject
Equivalent Subjects: BLDG 2010 - Estimating 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 2002 Building Measurement (10 Credit Points)
Subject Details (p. 2553) Legacy Code: 301208
This subject is designed to develop the techniques required to measure, quantify and prepare bills of quantities for residential construction using standard method of building measurements. It will help students to appreciate basic role of a quantity surveyor.
Level: Undergraduate Level 2 subject
Equivalent Subjects: GEOM 2001 - Quantity Surveying 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 2003 Building Regulations Studies (10 Credit Points)
Subject Details (p. 2554) Legacy Code: 300885
This subject develops an awareness of the regulations used to control risk in buildings. Major sources of risk, such as fire and public health, are identified and controlled. Building regulations of high risk regions, such as cyclonic, seismic and bushfire-prone areas, are also discussed. The subject emphasises the safety of vulnerable occupants, such as young children, disabled people and the elderly. The subject also explores recent developments in the National Construction Code (NCC: formerly BCA) concerning energy efficiency.
Level: Undergraduate Level 2 subject
Equivalent Subjects: BLDG 3002 - Building Regulation Studies BLDG 3003 - Building Regulation Studies
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 2004 Built Heritage (10 Credit Points)
Subject Details (p. 2555) Legacy Code: 301085
This subject explores the history of building design in Australia and applies this contextual knowledge to the design of additions to existing buildings, as well as, to infill development in heritage areas. Built form, scale, materials, finishes and streetscape are considered so that new structures complement rather than detract from existing heritage buildings. The appropriateness of preservation, restoration, renovation, retrofit and adaptation strategies for older buildings is examined in the context of market and regulatory constraints on built heritage.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 2011 Contract Administration (10 Credit Points)
Subject Details (p. 2555) Legacy Code: 301224
This subject presents the principles of construction contracts and how the contracts are managed in a construction contract at an introductory level. Key project parties, project life cycle, procurement approaches, payment contracts and contract documents are also introduced. Students will complete a range of tutorials and assessments that aim to build understanding of the administration of a contract while further developing the communication skills and basic ability to read, review and interpret contract
Level: Undergraduate Level 2 subject
Incompatible Subjects: GEOM 2002 Quantity Surveying 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 2012 Contract Administration (WSTC) (10 Credit Points)
Subject Details (p. 2556) Legacy Code: 700309
This subject presents the principles of construction contracts and how the contracts are managed in a construction contract at an introductory level. Key project parties, project life cycle, procurement approaches, payment contracts and contract documents are also introduced. Students will complete a range of tutorials and assessments that aim to build understanding of the administration of a contract while further developing the communication skills and basic ability to read, review and interpret contract documentation.
Level: Undergraduate Level 2 subject
Equivalent Subjects: BLDG 2011 Contract Administration
Incompatible Subjects: GEOM 2002 Quantity Surveying 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 2014 Work-Integrated Learning in Sustainable Construction (10 Credit Points)
Subject Details (p. 2557) Legacy Code: 301429
In this subject, students will engage in project-based learning related to Sustainable Construction to practice sustainable approaches in real construction projects. Students will select a project with an agreed industry partner, which will involve sustainable construction practices, for example: sustainability assessments, managing green building projects, carbon emission assessments, cost-benefit analysis and the circular economy. This subject contributes towards the skills required for a work-ready graduate and allows the student to plan, undertake and report on a specific aspect of practice in the context of work.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 2015 Leading Teams in Construction (10 Credit Points)
Subject Details (p. 2558)
This subject provides students with the fundamental knowledge for project leadership and team management. Through the application of their developing skill sets to real-world, industry based scenarios, students will develop their capabilities for managing different teams and stakeholders in construction projects to achieve positive project outcomes. Students will explore complex construction project environments and recognise the role of emotional intelligence and project leadership in successful construction project delivery across a diverse range of career paths in the construction and building industries.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 2025 Leading Teams in Const (10 Credit Points)
Subject Details (p. 2558)
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 3001 Building Design Process (10 Credit Points)
Subject Details (p. 2559) Legacy Code: 301087
Building design is an iterative process. In this subject students will gain experience in generating design proposals and responding to simulated client and stakeholder feedback. Holistic designsolutions that address economic, environmental and social issues (triple bottom line assessment) will be generated for realistic building projects.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BLDG 3007
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 3004 Construction Information Systems (10 Credit Points)
Subject Details (p. 2559) Legacy Code: 200503
This subject is designed to provide skills and knowledge for information management technology and practice as it relates to the building industry. The subject gives and overview of information management, data collection and storage, information classification systems, communications, specialist computer applications and artificial intelligence.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 3007 Design Brief Formulation (10 Credit Points)
Subject Details (p. 2561) Legacy Code: 301086
This subject explores the process of formulating the quantitative and qualitative requirements for a complex construction project. Students will analyse and evaluate competing parameters for a specific building project which contains residential, commercial and community facilities.
Level: Undergraduate Level 3 subject
Pre-requisite(s): ARCH 1001 OR
ARCH 1004 OR
ARCH 1004
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 3008 Negotiation in the Built Environment (10 Credit Points)
Subject Details (p. 2561) Legacy Code: 301105
Construction and Property development is the most complex activity in the Australian economy. There are many professional groups involved in the sector. This subject will train students in the negotiation skills required to successfully complete projects from the perspective of a construction manager, building surveyor, planner, civil engineer, construction lawyer and property developer.
Level: Undergraduate Level 3 subject
Equivalent Subjects: BLDG 2009 - Decision Making for Construction Professionals
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 3009 Quality and Value Management (10 Credit Points)
Subject Details (p. 2562) Legacy Code: 300748
Introduces students to the concepts of quality systems value management techniques and their application to the built environment. Students will gain knowledge of quality assurance and value management theories, techniques and principles so that they can apply as they enter into their professional careers.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 4735 - Quality and Value Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 3010 Building Cost Studies (10 Credit Points)
Subject Details (p. 2563) Legacy Code: 301234
This Subject provides students with advanced quantity surveying techniques for the evaluation of construction costs in the construction management and built environment context. Students learn to perform various cost studies, consider sustainability issues and make whole life cost choices that contribute to cost effective construction projects. The tools and techniques students learn are essential in dealing with increasing complexity in the industry.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 3011 Construction Business Management (10 Credit Points)
Subject Details (p. 2563) Legacy Code: 301427
This subject is centred around the dynamics of managing a construction contracting enterprise. Student groups act as a Board of Directors to plan, communicate, execute, and adjust strategy as they pursue to optimise their firm's outcomes in an online competitive game. Knowledge areas of staffing, finance, labour management, risk management and tendering are challenged. Each week, student groups are scored objectively and given feedback. This shows the team the strengths and weaknesses of the prior week's decision making. Academic staff will work with each student group to refine and improve understanding of the complex dynamics involved. Assessments will be based on decision-making improvement and mastery of strategic and operational principles.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 3013 Work-Integrated Learning in Global Construction (10 Credit Points)
Subject Details (p. 2564) Legacy Code: 301431
In this subject, students will engage in project-based learning related to Global Construction practices in the industry. Students will select a project with an agreed industry partner on construction and management of mega or complex projects to study aspects such as stakeholder management and communication, modern construction methods, productivity and quality assurance. This subject contributes towards the skills required for a work-ready graduate and allows the student to plan, undertake and report on a specific aspect of practice in the context of work.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 3014 Introduction to Building Fire Safety (10 Credit Points)
Subject Details (p. 2565)
This subject provides the foundations in fire safety engineering principles and the techniques and tools used in building fire safety design. Students learn the key principles of fire and heat transfer, building material and cladding systems' behaviours in fire, fire testing methods, fire-damage assessment methods, and concepts of performance-based building fire safety design. Using examples of fire engineering briefs and reports, students expand their knowledge and skills in real-world contexts. It also builds the skills required for a work-ready graduate and allows the student to plan, undertake and report on a specific aspect of practice in the context of their work.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 3015 Contract Management (10 Credit Points)
Subject Details (p. 2565)
This subject provides students with the knowledge and skills to manage building contracts, expanding on knowledge gained in the first year core subject Contract Administration. Students learn the professional practice skills for quantity surveying and contract administration services during construction. Knowledge gained in this subject will benefit students aspiring to careers such as Contract Managers and Quantity Surveyors.
Level: Undergraduate Level 3 subject
Incompatible Subjects: GEOM 2002 Quantity Surveying 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 3016 Work-Integrated Learning in Advanced Digital Construction (20 Credit Points)
Subject Details (p. 2566)
As increased digitalisation drives the construction industry, this unit engages students in industry project-based learning related to Advanced Digital Construction. Students will select a project with an agreed industry partner, which involves or anticipates involvement in any of the following advanced digital construction applications: BIM, e-procurement and tendering, smart contracts, robotics, drones, artificial intelligence, virtual reality, IoT, additive manufacturing (3D) and digital twins. This subject contributes towards the skills required for a work-ready graduate and allows the student to plan, undertake and report on a specific aspect of practice in the context of work.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 3017 Building Certification Ethics (10 Credit Points)
Subject Details (p. 2567)
The subject provides an overview of the ideal ethical standards for construction services incorporating the concept of trustworthiness as the only reliable indicator of ethical building and design practices. The concept of an ethical construction industry that causes no harm to end-user, client, the public or environment is explained. Students explore ethical challenges in the quality assurance mechanisms for building materials and components and reflect on their professional practice that contributes to the protection of end-users through trustworthy buildings.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 4001 Building Design Project 1 (20 Credit Points)
Subject Details (p. 2568) Legacy Code: 301099
In this subject students will source a suitable design project to complete as a capstone work which illustrates the skills they have developed throughout their study program. The project will contain a level of complexity exceeding that of previous building designs produced in the program. Diverse stakeholder input on the projects impact will be gathered and assessed.
Level: Undergraduate Level 4 subject
Pre-requisite(s): BLDG 3001
Incompatible Subjects: CIVL 4018 Building Design Project 1 (Honours)
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 4002 Building Design Project 2 (20 Credit Points)
Subject Details (p. 2568) Legacy Code: 301100
In this subject students will develop the design solution they created in Building Design Project 1 into a fully resolved CAD model suitable for costing, scheduling and contracting. Construction Certificate documentation will be generated.
Level: Undergraduate Level 4 subject
Pre-requisite(s): NONE
Co-requisite(s): BLDG 4001 Building Design Project 1
Incompatible Subjects: CIVL 4019 Building Project 2 (Honours)
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 4003 Construction Economics (10 Credit Points)
Subject Details (p. 2569) Legacy Code: 200504
This subject is designed to provide students with: an understanding of economic principles, national and international economic issues; general investment issues; how the national and international economy functions; how the building industry and the building firm relates to the national and international economy; and how economic reasoning may be applied to various problems in the building industry.
Level: Undergraduate Level 4 subject
Co-requisite(s): BLDG 4012 Industry Based Learning for students in 2607 Bachelor of Construction Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 4005 Major Project in Construction (10 Credit Points)
Subject Details (p. 2570) Legacy Code: 300536
This subject will enhance the ability of students to investigate a selected topic with a construction industry focus and involves preparation of a literature review. Content includes mechanics of a literature review, use of research (or strategic planning) in the construction industry, development of high-value competencies in terms of marketing, organisational structure and project management.
Level: Undergraduate Level 4 subject
Pre-requisite(s): Successful completion of 200 credit points for students in 2607 Bachelor of Construction Management and 3697 Bachelor of Construction Management Studies (exit only)
Successful completion of 130 credit points for students enrolled in Bachelor of Construction Management StudiesBachelor of Laws
Equivalent Subjects: LGYB 5398 - Major Project 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 4006 Modern Construction Enterprises (10 Credit Points)
Subject Details (p. 2571) Legacy Code: 301158
In this subject the pace of change in the construction industry will be addressed. Particular emphasis is placed on the ways in which construction businesses need to adapt their practices to deal with increased digitisation, industrialisation and globalisation. The impact of disruptive innovation on 'back of house' operations in construction enterprises will be studied and trends identified.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 4007 Modern Construction Projects (10 Credit Points)
Subject Details (p. 2572) Legacy Code: 301159
In this unit, accelerating changes in the way construction projects are procured and delivered will be studied. Innovations relating to pre-site construction and to productivity measurement will be evaluated. Quality assurance and risk management will be considered in the light of new project delivery systems. Ways to improve end user satisfaction with construction project delivery will be addressed.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 4008 Digital Construction (10 Credit Points)
Subject Details (p. 2572) Legacy Code: 301225
This subject offers knowledge and skills essential for a successful application of Building Information Modelling (BIM) in the context of built environment. Building Information Modelling (BIM) has the potential to improve integration between design and construction processes, reduce design discrepancies and rework, optimise project time and cost performance, and manage risks. Students will develop an understanding of the generation, reviewing and application of 3D, 4D and 5D BIM models in building projects. Virtual and augmented reality, spatial information capture and performance management systems will also be introduced. This subject will be taught through intensive practice-based workshops and computing labs, enabling students to build skills in virtual design and construction processes.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 4009 Residential Building Project (10 Credit Points)
Subject Details (p. 2573) Legacy Code: 301231
This subject is designed to allow students to gain experience with the complexity of the construction industry by integrating knowledge from earlier subjects. The subject involves group work on construction planning and management, regulatory control and client liaison required for initiating and completing a complex residential construction project.
Level: Undergraduate Level 4 subject
Pre-requisite(s): BLDG 1015 AND
ARCH 1004
Equivalent Subjects: BLDG 2008 Construction in Practice 1
BLDG 3006 Construction in Practice 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 4010 Construction Research Methods (20 Credit Points)
Subject Details (p. 2574) Legacy Code: 301243
This subject introduces students to various research methods that are applicable for research in the Built Environment and also guides students on how to carry out a literature review leading to identifying a clear research question. Students will be required to submit a research proposal for an identified research problem within a chosen research topic, under the supervision of an assigned research academic.
Level: Undergraduate Level 4 subject
Pre-requisite(s): Students must be enrolled in programs 3762 Bachelor of Construction Management (Honours) and 3782 Bachelor of Construction Management Advanced (Honours)) and have completed 220 credit points
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 4011 Construction Thesis (20 Credit Points)
Subject Details (p. 2574) Legacy Code: 301244
In this subject, students continue their research based on the literature review and research design submitted as part of the Construction Research Methods, under the close guidance of the same research supervisor. The research will be extended using appropriate research methods to perform data collection, data analysis and research conclusions. The students will submit an original thesis report on a research endeavour (continued from the research report in subject Construction Research Methods). In addition to the specialist knowledge on the chosen research topic, students will learn a range of skills including academic writing, project management, critical thinking and analytical skills.
Level: Undergraduate Level 4 subject
Pre-requisite(s): BLDG 4010
Incompatible Subjects: ENGR 4024 - Construction Management Honours Thesis
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 4012 Industry Based Learning (0 Credit Points)
Subject Details (p. 2575) Legacy Code: 300724
Students are required to undertake 1200 hours of industry based experience as required by course and professional accreditation bodies.
Level: Undergraduate Level 4 subject
Equivalent Subjects: LGYB 5394 - Industry Based Learning
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 4013 Work-Integrated Learning in Construction Leadership (10 Credit Points)
Subject Details (p. 2575) Legacy Code: 301433
In this subject, students will engage in project-based learning related to Construction Leadership within an industry framework. Students will select a project with an agreed industry partner to develop any of the following managerial and leadership skills in construction settings: organisation management and applications, strategic management, change management, corporate social responsibility, human resource management, knowledge management and organisational resilience. This subject contributes towards the skills required for a work-ready graduate and allows the student to plan, undertake and report on a specific aspect of practice in the context of work.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 4014 Building Design Project 1 (Honours) (20 Credit Points)
Subject Details (p. 2576)
This is a capstone subject, where students will source a suitable design project at their own initiative to illustrate the skills they have developed throughout their program. The project will contain a high level of complexity exceeding that of previous building designs produced in the program. Both the complexity level and the number of design constraints will distinguish this project from the ones undertaken in the non-honours stream subjects. Diverse stakeholder input on the project's impact will be gathered and assessed. The design solution generated will show mastery of resolving complex design problems which integrate technical knowledge with economic and social responsibility. These skills are highly sought after by employers in the building design industry.
Level: Undergraduate Level 4 subject
Pre-requisite(s): BLDG3001 - Building Design Process
Equivalent Subjects: CIVL 4018
Incompatible Subjects: BLDG4001 - Building Design Project 1 (non-honours stream)
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 4015 Building Design Project 2 (Honours) (20 Credit Points)
Subject Details (p. 2577)
In this subject, students will continue to develop the design solution they created in Building Design Project 1 (Honours) into a fully resolved CAD model suitable for costing, scheduling and contracting. Students apply technical and critical thinking skills to address the project constraints, and present project documentation (site plans, floor plans, elevations, sections, details and specifications) of a quality suitable to apply for a Construction Certificate. Complex constraints relating to buildability and efficient project delivery will be resolved. Strict budgetary constraints will be imposed and students will be expected to demonstrate a capacity to use lateral thinking and generate creative solutions in response to problematic situations which arise during project delivery but which were unknown at project commencement. Knowledge gained in this subject will benefit students aspiring to roles in the integrated building design industry and the delivery of building design solutions.
Level: Undergraduate Level 4 subject
Co-requisite(s): BLDG 4014 - Building Design Project 1 (Honours)
OR
CIVL 4018 - Building Design Project 1 (Honours)
Equivalent Subjects: CIVL 4019
Incompatible Subjects: BLDG4002 - Building Design Project 2 (non-honours stream)
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 4016 Work-Integrated Learning in Construction Procurement Management (20 Credit Points)
Subject Details (p. 2578)
In this subject, students will engage in project-based learning related to Construction Procurement to gain practical skills in managing complex and dynamic construction industry procurement practices. Students will select a project with an agreed industry partner on any of the following suggested topics: new procurement systems, commercial and business management implementations, ethics and trust-based relationships, risk management, sustainable and lean construction. This subject contributes towards the skills required for a work-ready graduate and allows the student to plan, undertake and report on a specific aspect of practice in the context of work.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 5001 Construction Claims (10 Credit Points)
Subject Details (p. 2579)
This subject introduces contractual procedures and legal principles relating to construction claims. Students develop cognitive and technical skills to construct and assess construction claims through practical and real world activities. In addition, students examine delay analysis and quantum determination in extension of time (EoT) claims with real work examples. An important component of this subject is understanding the role and responsibility of an expert witness, managing expert appointments effectively, acquiring skills when compiling comprehensive expert reports and delivering expert evidence to tribunals. Students will have opportunities to expand their skills through professional practice tasks.
Level: Postgraduate Coursework Level 5 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 7001 Advanced Contract Management (10 Credit Points)
Subject Details (p. 2579) Legacy Code: 301188
This subject introduces various contract types and risks involved in construction project management. The subject extends to examining contractual claims management and procedures together with alternative dispute resolution methods. The subject will further help students to understand change management process and develop a change management plan.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 7002 Building Regulations (10 Credit Points)
Subject Details (p. 2580) Legacy Code: 300947
This subject introduces the role and functions of the building surveyor and the National Construction Code of Australia (NCCA). The topics include building legislation, NCCA general provisions, structure and philosophy. Students are required to understand the objectives, the function statements and the performance requirements of various sections of Volume One of NCCA. The concept of performance based approach is discussed and compared with the prescriptive approach. The content covers the relationship between research in the development of building codes and the role played by approval/certifying authorities in building assessment and approval. Legal obligations of building surveyors, their tasks of assessment, enforcement and documentation are also explained.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: BLDG 7010 - Fire and Building Regulations
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 7003 Building Studies (10 Credit Points)
Subject Details (p. 2581) Legacy Code: 300716
This subject describes and analyses the technological, socio-economic and sustainability factors that influence the building industry. The topics include advances in contemporary issues affecting sustainability and energy conservation, access and adaptable housing, safety in special areas and building design in accordance with the relevant legislative requirements. Use of assessment tools for sustainability is covered. Discussions are also made on development management, the roles and the relationship between building owners / occupiers, developers and building surveyors.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYB 5426 - Building Studies
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 7004 Building in Bushfire Prone Areas (10 Credit Points)
Subject Details (p. 2582) Legacy Code: 200458
This subject describes the basis for the design and construction of buildings to withstand bushfire attack, the measures that can be incorporated into building design to achieve this and the legislative building requirements affecting bushfire environments. The subject examines the mechanisms of bushfire attack on structures, the role of landscaping on building survival and how materials perform in the presence of a bushfire event. The subject describes the role of the Building Code of Australia (BCA) and Australian Standards in the construction of various building types and the legislative and regulatory environment in which this operates.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 7005 Egress and Risk Assessment (10 Credit Points)
Subject Details (p. 2582) Legacy Code: 300717
This subject introduces the concept of risk assessment for fire safety systems relevant to life safety and property protection. The subject helps students develop an understanding of building occupant characteristics and human behaviour during fire emergencies. Parameters, methods and criteria for risk and economic assessments are covered in this subject.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYB 5424 - Fire Safety Systems 1 (Property)
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 7006 Financing Cities in the Global Economy (10 Credit Points)
Subject Details (p. 2583) Legacy Code: 101315
Financing infrastructure to keep cities running and growing at a time when governments face new financial constraints is a key challenge for urban managers. In order to be able to contribute to the debate about financing cities it is important for future urban managers to develop a basic financial literacy, understand and draw on the options for financing essential urban functions in Australia cities and elsewhere, and assess the tensions involved in public and private financing pathways. This subject addresses these needs through both theoretical and practical approaches to the city as a set of flows within a wider urban network of relations. Students develop their understanding via interactive lectures, case studies, fieldwork exercises and assignments.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 7007 Interpreting Building Regulations (Residential Buildings) (10 Credit Points)
Subject Details (p. 2584) Legacy Code: 301103
The basis of this subject is to ensure students become accustomed to reading and interpreting laws that specifically relate to building legislation. The subject provides students with an introduction to and sound working knowledge of the prescriptive provisions of the National Construction Code (BCA) Volume 1 & 2, associated Standards, codes and statutory interpretation as it applies to residential buildings. This subject will develop a sound knowledge of the National Construction Code (BCA) - Volume 2 and an introduction to rise in storeys, types of construction and the fire requirement for building elements in the National Construction Code (BCA) Vol. 1, Building Profession Act 2005 and other associated legislation. Residential building work includes work under the Home Building Act 1989, which involves the construction of a dwelling, and alterations or additions to a dwelling. It also will relate to repairing, renovating, decorating or applying protective treatment to a dwelling. The subject applies to residential buildings and associated structures and includes the evaluation and interpretation of performance requirements, classification of buildings according to National Construction Code (BCA) criteria, limitations of the referenced documents (National Construction Code (BCA) - Volume 2) and strategies for compliance. Students will need to relate the objectives of the National Construction Code (BCA) and the purpose of its respective provisions in relation to construction of residential buildings and the evaluation of associated documentation.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 7008 Professional Practice and Building Law (10 Credit Points)
Subject Details (p. 2585) Legacy Code: 301104
The basis of this subject is to ensure students become accustomed to reading and interpreting building and related laws. The subject provides students with background knowledge of the negligence, administrative law, life safety, proportional liability, contracts and statutory interpretation as it applies to architecture, building surveying, fire engineering and bushfire protection. The subject studies the codes of professional conduct, ethics, conflict of interest and the rules of evidence within the legal constraints when acting as certifiers and or experts. The jurisdictional requirements for certification are considered and assessed. These professions can act as expert witnesses and consequently need to understand codes of professional conduct, ethics, conflict of interest and the rules of providing expert evidence. In doing so, they are potentially required to brief solicitors or other legal professionals and will ultimately have a duty to the court or tribunal.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 7009 Project Procurement Systems (10 Credit Points)
Subject Details (p. 2585) Legacy Code: 301191
This subject examines contemporary practice in relation to procurement strategies such as traditional procurement, relational contracting, strategic project alliancing, and public-private partnerships / private finance initiatives within project environments. The subject will challenge students to examine built environment business ecologies which underpin strategic procurement decision making. Unique procurement environments will be explored, allowing the students to examine key themes of procurement management.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 7011 Work-Integrated Learning in Project Management A (20 Credit Points)
Subject Details (p. 2586) Legacy Code: 301366
This work integrated learning subject will provide students enrolled in the Master of Project Management with an opportunity to undertake work placement focusing on project management (PM) in a professional organisation within an industry relevant to students' specialisation or generic option. The placement will allow students to observe and develop PM professional skills and behaviour, integrate theoretical and practical PM knowledge and conventions into a real world setting, and establish project management competency, all in line with recognised world standard in project management. This subject aims to promote greater engagement with career planning and progression and hence improve job readiness.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: INFO 7010 - Research Project A INFO 7011 - Research Project B
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 7012 Work-Integrated Learning in Project Management B (20 Credit Points)
Subject Details (p. 2587) Legacy Code: 301367
This WIL subject builds on its predecessor, Work-Integrated Learning in Project Management A and will provide students enrolled in the Master of Project Management with an opportunity to undertake work placement focusing on project management (PM) in a professional organisation within an industry relevant to students' specialisation or generic option. The placement will allow students to further develop PM professional skills and behaviour, integrate theoretical and practical PM knowledge and conventions into a real world setting, and establish project management competency, all in line with recognized world standard in project management. The subject aims to further promote greater engagement with career planning and progression and hence improve job readiness.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): BLDG 7011
Incompatible Subjects: INFO 7010 - Research Project A INFO 7011 - Research Project B
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 7013 Project Procurement Systems (10 Credit Points)
Subject Details (p. 2588) Legacy Code: 301492
This subject examines contemporary practice in relation to procurement strategies such as traditional procurement, relational contracting, strategic project alliancing, and public-private partnerships / private finance initiatives within project environments. The subject will challenge students to examine built environment business ecologies which underpin strategic procurement decision making. Unique procurement environments will be explored, allowing the students to examine key themes of procurement management.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 7014 Construction Industry Practice A (20 Credit Points)
Subject Details (p. 2588)
In this subject, students are placed with relevant employers to work on a variety of industry related tasks. Placements are structured for student engagement in professional work in their relevant field of study. Placement agencies ensure students are supervised by experienced practitioners, are mentored through site visits and work on projects in a professional capacity. Agreements with supervisors and clear communication lines are set to clarify student engagement and their involvement in meaningful professional tasks that contribute to an authentic learning experience. This subject aims to promote greater engagement with career planning and progression and hence improve job readiness.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): Students must be enrolled in courses 3705 Master of Fire Safety Engineering 3703 Master of Building Surveying or 3708 Master of Bushfire Protection and have completed a minimum of 40 credit points before enrolling in this unit
Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 7015 Construction Industry Practice B (20 Credit Points)
Subject Details (p. 2589)
In this subject students are placed with relevant employers to work on a variety of industry related tasks. Placements are structured for student engagement in professional work in their relevant field of study. Placement agencies ensure students are supervised by experienced practitioners, are mentored through site visits and work on projects in a professional capacity. Agreements with supervisors and clear communication lines are set to clarify student engagement and their involvement in meaningful professional tasks that contribute to an authentic learning experience. This subject aims to promote greater engagement with career planning and progression and hence improve job readiness.
Level: Postgraduate Coursework Level 7 subject

BUSM 0029 Decision Making for Business (WSTC Prep) (10 Credit Points)
Subject Details (p. 2601) Legacy Code: 700322
The world of business is a complex one, where decisions can have a major impact on a firm's success or failure. So how do you make a good business decision? In this subject students will explore the value of numerical data as a tool to help businesspeople make informed decisions using sound evidence. We start with the basics of quantitative data - statistics - as a way of calculating the probable outcomes of particular decisions. We then explore how another crucial set of numbers for a firm - the financials - can also empower businesspeople to make smart decisions.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 1001 Business Academic Skills (10 Credit Points)
Subject Details (p. 2602) Legacy Code: 200336
This is a foundation subject that addresses academic essay writing skills relevant to business and economic issues. The subject is designed to develop basic student proficiencies such as information collection, analysis and evaluation, and logical reasoning skills. Through the analysis of ethical issues, this subject teaches students to research; reference using the College of Business and Law's Harvard style; analyse data; develop an argument; and write an academic essay.

BUSM 1044 Leadership in Complexity (10 Credit Points)
Subject Details (p. 2626) Legacy Code: 800239
This subject is designed for high-achieving students enrolled in the Bachelor of Creative Leadership or Advanced Degrees. The subject focuses on theories and traits of different leadership styles in cross-disciplinary environments and their application in various contexts. Leadership is examined through multidisciplinary lenses thereby broadening students' perspectives of leadership and encouraging interdisciplinary thinking and action as emergent creative leaders. Students are challenged to lead in complexity and prepare for unknown futures and skill sets necessary to drive change through innovation.
Level: Undergraduate Level 1 subject
Equivalent Subjects: BUSM 1016 - Leadership in a Complex World
Incompatible Subjects: Students cannot take BUSM 1044 if they have already taken BUSM 1036
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 1045 Creative Enterprises and Information Technologies (WSTC) (10 Credit Points)
Subject Details (p. 2627)
With rapidly increasing industry advancements and emerging technologies professionals need to develop a well-rounded skill set, making them adept in today's technology-driven business environment. This subject delivers a combination of information technology, communications and creative concepts that will give you the ability and skills to excel in your future workplace. You will also develop an understanding of audiences from cross-cultural and international perspectives and develop your ability to creatively communicate complex ideas to a variety of stakeholders. Students will develop the ability to not only consider current challenges and opportunities, but also anticipate what the future may require.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 1046 Managing and Leading Enterprises (WSTC) (10 Credit Points)
Subject Details (p. 2627)
Organisations need to respond to the ever-changing and increasingly complex global environment. The goal of this subject is to address this organisational requirement. You will learn the fundamentals of business management and leadership to acquire the competencies required by businesses. You will learn to motivate teams, make decisions, and manage people and enterprises, which are valuable skills for career advancement. Managing and Leading Enterprise will prepare students for effective professional and managerial careers. This subject will be beneficial if you aspire to start and manage your own business.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 1047 The World of Sport Business (WSTC) (10 Credit Points)
Subject Details (p. 2627)
The World of Sport Business provides students with an entry to sport and its professional organisation and management. Sport organisations are uniquely situated within fluid and emergent social, cultural and political environments and necessitate unique/different managerial approaches which students begin to critically explore. Students will engage with key issues shaping the domestic and international sport management field including, but not limited to, sport professionalisation and commodification, globalisation and sport for development. Students will be introduced to sport governance and leadership theories, sport and its management as a context for ethical analysis, and approaches to sport marketing and promotions in the contemporary sport business context.
Level: Undergraduate Level 1 subject
Equivalent Subjects: BUSM 1032 AND BUSM 1031
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 2004 Business, Society and Policy (10 Credit Points)
Subject Details (p. 2628) Legacy Code: 200158
Business organisations influence and evolve through ongoing social, political and technological change. Taking the perspective that businesses both affect and are affected by government and society, the subject examines the complexities of interactions between three sectors: business, society and government. The subject emphasises the social responsibility of business. The different ideologies used to legitimise the actions of business, the responses from society and the role of government (local, transnational and global) in regulating interactions, are critically evaluated.
Level: Undergraduate Level 2 subject
Equivalent Subjects: BUSM 2003 - Business Society and Policy (UWSC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 2005 Cost Benefit Analysis (10 Credit Points)
Subject Details (p. 2629) Legacy Code: 200924
Students will learn and apply Cost Benefit Analysis, the most commonly used economic tool in business, consultancy and government organisations. The subject is a core subject in the Economics major but is open to all students who have a basic understanding of economics and a desire to improve their analytical skills and employability. At the completion of the subject, students will be able to explain the economic foundations of cost-benefit analysis and they will have experience with analysing, critically evaluating and developing a cost-benefit analysis for a specific proposal. Students will also consider risk analysis and cost-effectiveness analysis.
Level: Undergraduate Level 2 subject
Pre-requisite(s): BUSM 1006 OR
ECON 1011 OR
MKTG 1005
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 2014 Enterprise Industrial Relations (10 Credit Points)
Subject Details (p. 2629) Legacy Code: 200614
Enterprise Industrial Relations builds participants' analytical and research abilities, developing capacity to identify, diagnose and engage with industrial relations challenges from different stakeholder perspectives. Participants work with real-world industrial relations, looking at individual employees' workplace and labour market experiences; the goals and activities of managers; and the role and practices of tribunals, enforcement agencies, employer associations and trade unions. This is done through activities that require working collaboratively on problems using online research to investigate contemporary practice, such as the drivers behind enterprise agreements and the implications of institutional arrangements and trade unions for productivity, equity and human resource utilisation. It is a core subject for the human resource management undergraduate program.
Level: Undergraduate Level 2 subject
Pre-requisite(s): BUSM 1023
Equivalent Subjects: BUSM 2015 - Enterprise Industrial Relations
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 2016 Entrepreneurial Management and Innovation (10 Credit Points)
Subject Details (p. 2630) Legacy Code: 200154
This subject examines the theory, practice and nature of entrepreneurship, as a virtual but often neglected and misunderstood mode of management. A basic premise underlying this subject is that all business entities require enterprising management to enhance their survival ability. This proposition is relevant to new and older, small and large organisations. Additionally, contemporary management practice requires the modern manager to be creative in a learning context and the ways in which these creative environments are reached through entrepreneurship are explored.
Level: Undergraduate Level 2 subject
Co-requisite(s): BUSM 1038
Equivalent Subjects: LGYB 0476 - Entrepreneurial Management and Innovation (UWSC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 2018 Food and Beverage Management (10 Credit Points)
Subject Details (p. 2631) Legacy Code: 200992
A key component of the hospitality industry is the provision of food and beverages. Food and Beverage Management prepares the student to run his or her own business, or to take on management level positions in this field. It focuses on the managerial knowledge and skills required to supervise all components of a foodservice system: marketing, menu planning, production, service, financial controls and quality assurance. Those who wish to work in management positions within the foodservice industry, including in hospitals, restaurants, hotels, and other establishments will benefit from this unit.
Level: Undergraduate Level 2 subject
Equivalent Subjects: BUSM 2033 - Managing the Food and Beverage Experience
LGYA 4392 - Food Service Systems
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 2020 Health Services Management (10 Credit Points)
Subject Details (p. 2631) Legacy Code: 400277
The health workplace is a complex and sophisticated environment that can be understood in many different ways and mean different things to different members of an organisation. Assumptions about organisational structure and action are based on conceptualisations and beliefs about the nature and goals of an organisation. This subject aims to develop an introductory understanding of health administration and management practice and business skills required in an evolving health landscape in concordance with the international competency framework for health administrators and managers.
Level: Undergraduate Level 2 subject
Co-requisite(s): Students enrolled in 3711 Bachelor of Information and Communications Technology (Health Information Management) must have completed or be enrolled in INFS 3010 Healthcare Data Environments
Equivalent Subjects: BUSM 2021 - Health Services Management (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 2021 Health Services Management (WSTC) (10 Credit Points)
Subject Details (p. 2633) Legacy Code: 700068
The health workplace is a complex and sophisticated environment that can be understood in many different ways and mean different things to different members of an organisation. Assumptions about organisational structure and action are based on conceptualisations and beliefs about the nature and goals of an organisation. This subject aims to develop an understanding of organisational theory and its application to management practice and organisational analysis in the health arena.
Level: Undergraduate Level 2 subject
Equivalent Subjects: BUSM 2020 - Health Services Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 2022 Human Resource Development (10 Credit Points)
Subject Details (p. 2633) Legacy Code: 200859
Human Resource Development' (HRD) looks at how the development of people and their skills is essential to the 21st century workplace. By examining the key processes of employee learning, development and career management, participants will understand HRD's impacts on workers' employability and careers, organisational effectiveness and economic sustainability. The subject introduces concepts of workplace learning and engages participants in case study discussion and research into current HRD trends in Australian and international workplaces. The goal of Human Resource Development is to support participants to ask questions about current practice and to encourage critical understanding of the field.
Level: Undergraduate Level 2 subject
Pre-requisite(s): BUSM 1023
Equivalent Subjects: BUSM 2013 - Employee Training and Development BUSM 2012 - Employee Training and Development
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 2024 Incubator 2: Start-up Essentials (10 Credit Points)
Subject Details (p. 2634) Legacy Code: 301206
This subject prepares students to run a lean startup. Lean Start-up techniques are designed to test a business concept, or a hypothesis to create fast-growing businesses. Students learn that the chances of success improve when following the principles of failing fast, customer feedback and continuous learning. Through practical activities students analyse the legal and ethical dilemmas that apply to a start-up (or any) organisation. Upon successful completion of this subject, students would have developed a thorough understanding of developing a startup business using lean startup method, local and international legal and ethical landscape within which modern start-up businesses operate.
Level: Undergraduate Level 2 subject
Equivalent Subjects: BUSM 2023 - Incubator 2 Legal and Ethical Setting of Entrepreneurship
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 2030 Managing and Developing Careers (10 Credit Points)
Subject Details (p. 2635) Legacy Code: 200376
Managing and Developing Careers focuses on employability and career progression. The subject is one of four subjects in the Management professional core in the Bachelor of Business but is open to all students with an interest in reflecting on career progression in leadership and management-related careers. The subject will utilise portfolio development, case studies, occupational and industry research to assist participants identify and reflect on strategies to facilitate achievement and employability. Successful completion of the subject will result in students creating an ongoing portfolio directed to future employability.
Level: Undergraduate Level 2 subject
Equivalent Subjects: BUSM 2041 - Working in Professions BUSM 2040 - The Service Enterprise
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 2031 Managing in the Global Environment (10 Credit Points)
Subject Details (p. 2636) Legacy Code: 200864
This subject introduces students to the complexities of managing in the changing economic, political, legal, technological and socio cultural factors that influence management practice. By addressing issues of cultural awareness, this subject provides an organisational behaviour approach to managing in a dynamic global environment. Management practice and theoretical knowledge are linked in this subject through experiential based learning and assessment activities such as critical analysis of contemporary media, research and case studies.
Level: Undergraduate Level 2 subject
Equivalent Subjects: BUSM 2009 Cross Cultural Management BUSM 2010 Cross Cultural Management LGYC 0038 Cross Cultural Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 2037 Sport Entertainment (10 Credit Points)
Subject Details (p. 2637) Legacy Code: 200996
Sport is now at the heart of many cultures with sport consumption, in a variety of forms, playing a significant role in the lives of many people. This subject explores and explains the sporting experience, providing an understanding of those who consume sport and the relationship between sport, its consumers, and the media. The subject equips students with the tools required to work with the media, producing resources, and to engage with and through social media platforms.
Level: Undergraduate Level 2 subject
Equivalent Subjects: BUSM 2038 - Strategic Communication in Sport
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 2039 The Accommodation Industry (10 Credit Points)
Subject Details (p. 2638) Legacy Code: 200993
The Accommodation Industry is concerned with developing skills for managing people, operations and business in hotels and hospitality companies. It focuses on the business operations and management issues to be found in successful lodging enterprises. The subject incorporates the application of key aspects of marketing, service management, financial management, revenue management and business development within a hospitality context. It develops effective problem solving and critical thinking skills necessary to meet the service industry's ever-changing needs. Students can expect to find employment in a range of domestic and international accommodation management facilities such as hotels, resort groups, cruise ships and the accommodation sector.
Level: Undergraduate Level 2 subject
Equivalent Subjects: BUSM 2032 - Managing the Accomodation Experience
LGYA 4391 - Managing the Accomodation Experience
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 2040 The Service Enterprise (10 Credit Points)
Subject Details (p. 2639) Legacy Code: 200915
Modern economies are increasingly service-based. Knowledge and skills in the field of services are required by people operating across various industries and in a range of roles. Business graduates will either work for firms whose central offering is service or be employed by organisations that use service as an integral supporting element in what they do and what they offer. The subject aims to expose students to relevant theory and practices in order to develop their abilities for potential career opportunities in a service environment.
Level: Undergraduate Level 2 subject
Equivalent Subjects: BUSM 2030 - Managing and Developing Careers BUSM 2041 - Working in Professions MKTG 3011 - Marketing of Services
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 2041 Working in Professions (10 Credit Points)
Subject Details (p. 2640) Legacy Code: 200914
Working in Professions focuses on developing career understandings and appreciating the personal attributes required for employability in the 'real world' of accounting, banking, economics, finance and property. This is a professional subject in the Bachelor of Business, but is also open to participants with an interest in examining and developing their knowledge of employability in these career areas. The subject involves examination of the evolving nature of work in a dynamic globalised context; applied labour market and industry structure analysis; and an exploration of employability attributes, capacities and opportunities across a range of career paths. Successful completion of the subject allows participants to gauge employer expectations, and to identify and reflect on career opportunities in their chosen fields.
Level: Undergraduate Level 2 subject
Equivalent Subjects: BUSM 2030 - Managing and Developing Careers BUSM 2040 - The Service Enterprise
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 2043 Project Management in Humanitarian and Development Studies (10 Credit Points)
Subject Details (p. 2641) Legacy Code: 102707
In 2023, this subject replaced by BUSM 3082 - Project Management in Humanitarian and Development Studies. The primary aim of this subject is to equip students with the concepts, processes and major techniques employed in project management. By integrating theory and practice this subject provides a strong foundation for students in project management as an essential skill in the field of humanitarian and development studies. The subject uses the project management body of knowledge (PMBOK) which covers the required competencies in project management including planning, monitoring, control, implementation and evaluation.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 2044 Health Service Management (10 Credit Points)
Subject Details (p. 2642) Legacy Code: 401393
The subject builds on previous Health Services Management curriculum. It is focused on the changing role of the health services manager and competencies required to manage and lead health services efficiently and effectively in both current and emerging areas of healthcare and health management. Various management functions are explored through 140 hours of placement with blended learning activities including: strategic management, values-based healthcare, quality and safety, risk and governance, health services policy and performance management, finance and resource allocation.
Level: Undergraduate Level 2 subject
Co-requisite(s): BUSM 1037
Incompatible Subjects: BUSM 3015 - Health Services Management Practice BUSM 3014 - Health Services Financial Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 2045 Sport and Society (10 Credit Points)
Subject Details (p. 2643) Legacy Code: 201079
Sport plays a prominent role in the lives of many people across Australia and globally. It provides an opportunity for pleasure and a sense of freedom which may be missing in modern society. However, sport is a contested concept and can be a domain which both reinforces and challenges notions such as gender, ethnicity, and nation. This subject explores sport from a sociological perspective, examining the relationship between sport and society, and encourages students to challenge accepted norms and ideologies.
Level: Undergraduate Level 2 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 2047 Venture Makers Foundations (10 Credit Points)
Subject Details (p. 2645)
The world we inhabit is ever changing - and so is the way that we will work in the future. Technology continues to evolve and impact the way consumers, business and government interact. Graduates today encounter an increasingly complex working environment and need to be equipped with the mindset, skills-set and tools to navigate uncertainty and complexity, whilst having the capacity to identify and act on emerging opportunities presented by changing environments. The Venture Makers Foundations subject is a highly innovative, unique transdisciplinary entrepreneurship training and development experience. This subject provides students with an entrepreneurial perspective and the skills that are needed to thrive and navigate disruption. The subject is delivered in partnership with innovative Industry partners and is authentic, immersive, and relevant, enabling students to develop real professional industry networks locally, nationally, and internationally. Students will develop core entrepreneurial skills and enhance their work readiness as they create and design solutions for solving complex, real-world challenges with potentially significant global impact. The subject is available to all bachelor degree students as an elective.
Level: Undergraduate Level 2 subject
Equivalent Subjects: BUSM 2049
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 2048 Sports Marketing (10 Credit Points)
Subject Details (p. 2645)
Sports marketing refers to promoting goods and services through sporting events and the endorsement of athletes and sports teams. For any sports organisation, it is imperative to have an effective sports marketing strategy in place to build brand awareness, enhance customer loyalty and generate revenue. Companies in sports use marketing strategies to fulfil their goals, such as attracting more junior players, involving parents, increasing the company's public profile, entertaining spectators, acquiring sponsorships, and securing broadcasting rights deals. Students in this subject will learn general marketing knowledge and theories relevant to the sports industry, such as sponsorship, endorsements, customer experience, pricing and operations.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 2049 Creative and Innovative Thinkers (10 Credit Points)
Subject Details (p. 2646)
This subject explores how to use creativity and innovation skills to solve real world problems and provides students with opportunities to work on projects directly with industry. Through practical, hands-on activities, students work through ideas using well-recognised and used tools and techniques. Innovation and creativity skills are highly sought after globally across all sectors. Creativity is increasingly important as a fundamental differentiating skill for graduates and ranks in the top three employability skills. This subject is recommended for all students in all programs who want to establish continuous collaborative engagement with industry and grow personal, career, self-employment and networking opportunities.
Level: Undergraduate Level 2 subject
Equivalent Subjects: BUSM 2047
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3001 Advanced Business Seminars (10 Credit Points)
Subject Details (p. 2647) Legacy Code: 200572
A seminar series involving speakers from outside the university will present on current theoretical or practical issues affecting business and commerce. Students interested in this subject should contact the Subject Coordinator to see whether they qualify.
Level: Undergraduate Level 3 subject
Pre-requisite(s): Students must have successfully completed at least 90 credit points in business related units
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3002 Business Leadership (10 Credit Points)
Subject Details (p. 2648) Legacy Code: 200573
Business Leadership explores the multiple opinions and complex perspectives regarding leadership in the global business context. Exploring the nature of leadership across different cultures and situations, students develop an insight into the highly sophisticated meanings of leadership emerging from the broad literature, history and accounts on the topic. Future leaders emerge from this subject recognising the importance and relevance of their personal leadership goals in the early stages of a business or commerce career.
Level: Undergraduate Level 3 subject
Pre-requisite(s): Students must have successfully completed at least 90 credit points of business related units
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3004 Contemporary Management Issues (10 Credit Points)
Subject Details (p. 2648) Legacy Code: 200568
This is an engaged subject that requires students to undertake real-world projects to support selected industry or community partners. The subject blends in-class and online activities as well as individual and group work, with self-directed problem-based learning. The focus of students' learning is on sustainable business, including the economic, social and environmental dimensions of business. The in-class workshops support students to conduct the required engagement activities with industry or community partners. As a third-year subject, attention is given to students' application of the knowledge and skills already acquired in their degree programs, and on the practice of business management skills.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BUSM 1038 OR
BUSM 1008 OR
BUSM 1019
Equivalent Subjects: LGYB 9012 - Contemporary Management Issues
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3005 Creating Change and Innovation (10 Credit Points)
Subject Details (p. 2649) Legacy Code: 200862
This subject introduces the concepts of change and innovation as they relate to organisational transformation. It explores change as a human and social process, looking at the vital roles of leadership, entrepreneurship, and creativity in change management. In doing so, it provides the theoretical and practical understandings that you will need as both a student of change and a future manager.
Level: Undergraduate Level 3 subject
Equivalent Subjects: BUSM 3038 Management of Change LGYB 9013 Management of Change
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3006 Design Thinking for Creativity (10 Credit Points)
Subject Details (p. 2650) Legacy Code: 200918
Innovation and creative thinking are important skills in strategy development. Part of this process is the ability to solve problems and discover new opportunities; or in other words, the notion of "design thinking". This subject introduces students to concepts and frameworks to create innovative products, services and systems for a range of enterprises, industries and markets. Students will explore and analyse business and social networks, clusters and ecosystems via practice based projects. Design thinking principles will be applied to systematically develop ideas into innovative solutions as a way to drive business growth.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3007 Destination Management (10 Credit Points)
Subject Details (p. 2652) Legacy Code: 101270
In 2023 this subject is replaced by TOUR 3004 - Destination Management. Destination Management provides students with a fundamental understanding of the concepts in destination management. This includes coordination of the destination in terms of the tourism industry's sectors, their relationship with each other and the challenges they face. An appreciation of the importance of a destination's unique cultural, natural and economic attributes is developed from the viewpoint of the visitor and industry representatives. The implications of organising urban spaces for the visitor experience and its influence on sustainability and competitiveness are explored.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3008 Developing Sport Professionals (10 Credit Points)
Subject Details (p. 2652) Legacy Code: 200997
The Sport Management Internship subject provides students with an opportunity to engage with the sport industry through a 120 hour [minimum] industry placement. Students are provided with a unique opportunity to observe sport management practitioners in action and learn in a practical "hands-on" setting. Experience in the field of study is an essential ingredient in preparing an individual for employment either during the period of study or after graduation. Students have the opportunity to apply theoretical concepts, knowledge and skills acquired in lectures and workshops in professional sport, recreation and aligned settings.
Level: Undergraduate Level 3 subject
Pre-requisite(s): -
Equivalent Subjects: BUSM 3066 - Sport Management Internship
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3009 Enterprise Internship (10 Credit Points)
Subject Details (p. 2653) Legacy Code: 200920
This subject is designed to bring to life the knowledge gained during the students' study whilst applying it practically to diverse business contexts through work integrated learning. The internship will build on the comprehensive, coherent and connected knowledge gained in business specialisations to allow the students to explore and develop attributes required to be successful in contributing to outcomes in a business environment. Assessment of the subject is through a practical application of the learned theory into an assessable business report framework. Entry to this subject is by application. Contact the subject coordinator for details.
Level: Undergraduate Level 3 subject
Equivalent Subjects: BUSM 3003 - Business Report
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3010 Entrepreneurial Team (10 Credit Points)
Subject Details (p. 2654) Legacy Code: 200609
This subject is intended to provide an opportunity for high performing students to participate in a team which will develop a business plan for a company division, a non-profit enterprise, an existing business or a new business opportunity.
Level: Undergraduate Level 3 subject
Pre-requisite(s): Successful completion of 160 credit points of business related units
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3011 Frontiers of Business Theory and Analysis (10 Credit Points)
Subject Details (p. 2655) Legacy Code: 200574
This subject looks at selected contemporary issues in business, industry and commerce. Each selected issue will be examined in terms of the way in which the problem is defined, competing definitions of the problem, components of the problems and relationships to other contemporary issues. Relevant theoretical perspectives will be examined and evaluated.
Level: Undergraduate Level 3 subject
Pre-requisite(s): Students must have successfully completed at least 90 credit points of business-related units
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3014 Health Services Financial Management (10 Credit Points)
Subject Details (p. 2656) Legacy Code: 400279
The Australian health care system must account for use of resources, and ensure their equitable and efficient use. Increasingly devolution of management function to cost centre level in health care organisations is occurring. Managers must consider the financial implications of clinical decisions, understand and act on accounting information. They are held responsible for the financial outcomes of their activities. This subject develops a basic knowledge of accounting principles, health services funding arrangements, government reforms, financial reporting, preparation of budgets, business cases and economic appraisals. There are 140 hours of placement in the field working with health managers on financial issues.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BUSM 3015
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3015 Health Services Management Practice (10 Credit Points)
Subject Details (p. 2656) Legacy Code: 400787
The subject begins with an overview of the complexity and variability of health services and provides an understanding of component organisations, federal and state policy issues and environmental factors including the role of the private sector and non-government organisations. The changing role of the health services manager and competencies required for effective managing are examined. Influences on organisations are reviewed, including structures, culture, power and politics. Various management functions are explored through 140 hours of placement e.g. strategic planning, performance management, people management including workplace relations, conflict resolution, resource management (financial and asset), risk management, health and safety in the workplace and quality assurance.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BUSM 2020
Equivalent Subjects: LGYA 7186 - Health Services Management 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3016 Health Services Quality Management (10 Credit Points)
Subject Details (p. 2657) Legacy Code: 400284
The need to improve quality while reducing expenditure has forced health services to re-evaluate their strategies. For these reasons many have embraced the philosophies of Total Quality Management (TQM). Central to its practice is a focus on flexible, consultative management, with the needs of the customer seen as vital to guiding a continuous process of improvement. TQM is a whole system concept, which recognizes the need to manage sets of interacting technical, cultural and political issues. This subject explores the various aspects of TQM and in particular its application within the health services.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3017 Health Services Workforce Management (10 Credit Points)
Subject Details (p. 2658) Legacy Code: 400788
NOTE: This subject is no longer on offer from Spring 2022. Students should enrol in BUSM 3080 Health Care Systems and Organisation Culture instead. This is a flexible learning unit looking at human resource management (HRM) as a strategic activity of health organisations especially as workforce shortages pose significant challenges to the health and aged care sectors. The workforce, with appropriate knowledge and expertise, is essential to the efficient and effective delivery of quality health services. Successful organisations shape the workforce to anticipate current and future directions and goals. Workforce planning is a crucial element of this approach and its success.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BUSM 3015
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3019 Hospitality Management Applied Project (10 Credit Points)
Subject Details (p. 2658) Legacy Code: 200561
Students studying Hospitality Management Applied Project may have the opportunity to undertake an international field trip to experience the hospitality industry from an international perspective. This subject provides students a unique opportunity to integrate knowledge gained from operational and theoretical perspectives of hospitality studies into application in an engaged research project in hospitality management. Students will engage in comprehensive projects which bring together real world industry problems and hospitality theory.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BUSM 2036
Equivalent Subjects: LGYA 4386 - Tourism and Hospitality Research Project
Incompatible Subjects: LGYA 4813 - Sport Management Applied Project
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3021 Hospitality Places and Spaces (10 Credit Points)
Subject Details (p. 2659) Legacy Code: 200989
Contemporary hospitality settings often require specialised services and distinctive facilities. Matching the physical spaces and places with hospitality, to the services and experiences provided, is an integral part/consideration of contemporary hospitality practice. As future managers in the industry, it is imperative to have a sound basic knowledge of the design, development and commercial viability of such products, services and spaces, especially in the context of consumer expectations, in order to remain competitive and sustainable.
Level: Undergraduate Level 3 subject
Equivalent Subjects: BUSM 3055 - Planning and Design Hospitality Facilities
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3022 Hospitality Profitability and Entrepreneurship (10 Credit Points)
Subject Details (p. 2659) Legacy Code: 200994
This subject examines operations management in the hospitality sector, as a means to achieve profitability. Students will develop advanced knowledge and desirable attributes applicable to operational planning, financial management, risk management and legal compliance, human resource management, business relationship management and sustainability. Special emphasis is placed on providing students with knowledge and skills to make informed decisions to proceed and develop their own ventures or alternatively be more innovative within existing businesses.
Level: Undergraduate Level 3 subject
Equivalent Subjects: BUSM 3020 - Hospitality Management Operations
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3023 Hospitality and Tourism in Practice (10 Credit Points)
Subject Details (p. 2660) Legacy Code: 200995
Hospitality and tourism play an important role in society impacting directly and indirectly on many elements of everyday life. With the ability to both positively and negatively impact on individuals, communities and economies, hospitality and tourism are viewed from the perspective of different stakeholders. Within this subject a contextual understanding and analysis of hospitality and tourism is provided through interaction with industry practitioners and discussion of contemporary issues impacting the industry.
Level: Undergraduate Level 3 subject
Incompatible Subjects: BUSM 3018 - Hospitality Industry
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3024 Human Resource and Industrial Relations Strategy (10 Credit Points)
Subject Details (p. 2661) Legacy Code: 200740
Students in 'Human Resource and Industrial Relations Strategy' analyse the human resource and industrial relations strategies of the major employment relations stakeholders. While the principal focus is on the organisational level of analysis and on the strategic interventions introduced by management, the subject also analyses the strategic roles of government, trade unions, and employer associations. Through a range of learning activities, students examine the relationship between business strategies and HR/IR strategies, strategic HR/IR interventions, the concept of strategic choice as it concerns stakeholders and the evaluation of strategy. Students also engage with the development of human resource management and industrial relations as a professional field and consider ethics and professional standards.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BUSM 1023 OR
BUSM 1021
Incompatible Subjects: LGYA 4824 - Human Resource Strategy LGYA 4823 - Industrial Relations Strategy
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3025 Incubator 5: Operational Aspects of Entrepreneurship (10 Credit Points)
Subject Details (p. 2662) Legacy Code: 301170
Operations encompasses essential components that enable a business to function effectively. This includes strategy, marketing, personnel and finance and the identification of opportunities for innovation.
In this subject, students review case studies that explore business operations, enhancing their ability to comprehend the planning needed for entrepreneurs to conduct operations effectively. An integral component involves students developing a business plan with a focus on the operational aspects of new ventures or business concept. The subject is relevant for careers in entrepreneurship, consulting and management.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3027 Innovation and Professional Practice (10 Credit Points)
Subject Details (p. 2662) Legacy Code: 200919
Innovation and Professional Practice uses design thinking to develop participants' capacity to innovate across a range of changing organisational environments and future-oriented work roles. Networking, collaboration and team work around contemporary projects will develop the attitudes and abilities characteristic of ways that professionals lead and contribute to innovation in many contexts. The subject builds on study of organisation and leadership in the Bachelor of Business, and develops participants' innovative thinking through the prism of business acumen. The subject supports work integrated learning approaches that will enable participants to develop portfolio evidence of their professional capacity to lead and participate in sustainable business change.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3028 Innovation, Enterprise and Society (10 Credit Points)
Subject Details (p. 2664) Legacy Code: 200917
Innovation, Enterprise and Society focuses on forces driving innovation, creativity and technical change at the levels of entrepreneurship, enterprise, economy and society. It also examines the effects of innovation at these various levels. This subject is a professional core subject in the Bachelor of Business. The subject takes a multi-disciplinary approach utilising critical thinking, debates, problem solving, policy analysis and case studies. Students will understand the professional, social, public policy and global networks and systems informing and surrounding innovation. Successful completion of the subject equips students to appreciate the entrepreneurial, political and social dimensions of innovation.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3029 International Business Finance (10 Credit Points)
Subject Details (p. 2665) Legacy Code: 200595
The subject is designed to provide students with an overview of the economic, political and institutional environment in which international business is conducted. Particular attention is given to the historical development of the international monetary system, the transnational corporation and the impact of globalization upon international financial transactions and international business practices.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 9776 - International Business Finance
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3030 International Business Project (10 Credit Points)
Subject Details (p. 2666) Legacy Code: 200590
This is a capstone subject in International Business. The aim of the subject is to give students a real-life action learning project in which they undertake an international business strategic planning and analysis exercise for a client organisation. This project usually involves students working in small teams for a client organisation under the direct supervision of the lecturer.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BUSM 1015
Equivalent Subjects: LGYA 9777 - International Business Project 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3031 International Business Strategy (10 Credit Points)
Subject Details (p. 2667) Legacy Code: 200626
In an environment where operating internationally is becoming the norm rather than the exception, firms are faced with ever increasing complexity when formulating their business strategy. This requires an understanding of how firms become and remain international, the basic modes of international involvement, the practice of multinational management and how firms can establish a balance between the sometimes conflicting demands of headquarters, the subsidiary and the governments of all the countries where the multinational enterprise operates. This subject will cover these issues and will deal with both large and small companies that must be global to survive.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MKTG 1006 OR
BUSM 1015
Equivalent Subjects: LGYA 9771 - International Business Strategy
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3032 International Human Resource Management (10 Credit Points)
Subject Details (p. 2668) Legacy Code: 200621
'International Human Resource Management' examines the implications for human resource management that arise from the internationalisation of organisations. Through portfolio reports and case studies, students analyse a range of comparative systems and structures of employment relations and the strategic management of global organisations. This analysis includes a focus on key human resource functions including recruitment, training, reward and evaluation of the impact of society, politics, economics and culture of host countries on human resource strategies. Students examine also the role of global stakeholders and assess the implications for human rights that arise from globalisation.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BUSM 1023
Equivalent Subjects: BUSM 2026 - International Human Resource Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3033 International Management (10 Credit Points)
Subject Details (p. 2669) Legacy Code: 200623
International Management provides an overview of issues confronting managers working in a complex globalised environment. Areas such as global and regional integration, the role of ethics and social responsibility, as well as the changing political, legal and technological environment require consideration by management in multinational organisations. The role of culture and human resource management is another significant area of failure by global managers. Finally global strategic issues such as managing political risk and government relations will be analysed to allow a deeper level of understanding of the complexities of managing in an internationally competitive marketplace.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 9900 - International Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3036 Leadership and Entrepreneurship (10 Credit Points)
Subject Details (p. 2669) Legacy Code: 200863
This subject explores the links between leadership and entrepreneurship in the context of dynamic domestic and global environments. It develops an understanding of how to initiate a business venture, taking advantages of perceived opportunities and mobilising the required resources. To this end, different theories and perspectives on leadership and entrepreneurship are examined, and students are encouraged to apply them to real-life situations. The knowledge and skills learned in this subject will enable future leaders to revitalise organisations and create value in the process of transforming innovations into goods or services.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3042 Managing Diversity (10 Credit Points)
Subject Details (p. 2670) Legacy Code: 200150
This subject explores the complexities and challenges of managing diverse workforces in contemporary organisations. Using applied learning approaches, students are required to formulate corporate policies relating to diversity and then evaluate the implications for implementing these policies in a real world setting. As a key component of human resource management, students are expected to appreciate both the theoretical and practical elements of managing diversity and are required to reflect on their own learning process throughout the subject.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BUSM 1023
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3045 Managing Operations (10 Credit Points)
Subject Details (p. 2671) Legacy Code: 200865
Managing Operations is a comprehensive subject that focuses on the importance of operations in creating competitiveness and dynamic capabilities for individual organisations and organisations connected through supply chains and logistics processes within a global context. The subject is designed for students interested in enhancing their knowledge and skills in designing and improving critical operational processes used by organisations to provide products and services to customers. It encompasses internal and external operations for manufacturing and service organisations; their strategic choices; and tactical and operational decision-making processes for the management of critical and extended resources. The latest qualitative and quantitative tools and techniques, online business simulations and international case studies are used to practise problem solving processes to address challenges of a global nature in the business world.
Level: Undergraduate Level 3 subject
Equivalent Subjects: BUSM 3013 Global Operations and Logistics Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3048 Negotiation, Bargaining and Advocacy (10 Credit Points)
Subject Details (p. 2672) Legacy Code: 200613
In 'Negotiation, Bargaining and Advocacy' students identify and assess contrasting approaches to negotiation and identify the importance of strategy and judgement in negotiation. Students develop their skills through a team-based online negotiation and a critique of the experience of this negotiation. Through case studies, students examine conciliation, mediation and arbitration with a particular focus on advocacy practice in industrial tribunals. An important theme in the subject is the assessment of the contextual and regulatory factors that shape negotiation, bargaining and advocacy practice. This aspect draws on contemporary debates in these spheres most notably concerning the Australian context.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BUSM 1023
Equivalent Subjects: LGYA 9847 - Negotiation Bargaining and Advocacy
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3052 Organisational Learning and Development (10 Credit Points)
Subject Details (p. 2673) Legacy Code: 200157
Organisational Learning and Development is a Level 3 undergraduate subject which analyses practices and processes designed to transform and renew organisations, in order to enable them to respond effectively to change. This subject will use case studies and other experientially based activities to promote a better understanding of structural and human resources interventions used to ensure organisational survival in rapidly changing environments.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3053 Our Sporting Future (10 Credit Points)
Subject Details (p. 2674) Legacy Code: 201001
Sport has become increasingly globalised, commercialised and professionalised, and is influenced by advances in technology and innovation. It is now recognised that sport can play an important role in areas such as economic regeneration, diplomacy, social integration and improving health and wellbeing. This subject will develop students' understanding of how to encourage participation and drive growth in sports business in the face of a rapidly changing landscape.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BUSM 1031
Incompatible Subjects: BUSM 3047 - Managing Service and Experience
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3054 People, Work and Society (10 Credit Points)
Subject Details (p. 2674) Legacy Code: 200860
'People, Work and Society' draws on psychology and sociology to deepen participants' practical human resource management (HRM) expertise. Designed for those aiming at careers as HRM professionals, participants will use HRM knowledge to develop policy and procedure that takes account of the psychology of individuals and groups as well as rising expectations for socially- responsible management. The complexities and rewards around managing diverse workforces receive particular attention. Through the challenge of real-world activities, participants are introduced to the difficult judgements that confront HRM professionals around people at work.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BUSM 1023
Equivalent Subjects: BUSM 3075 - Workplace Behaviour LGYA 9849 - Workplace Behaviour
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3058 Practice Management for Health Professionals (10 Credit Points)
Subject Details (p. 2675) Legacy Code: 400156
From 2017 students should take 401149 - Exercise Physiology Across the Lifespan. This subject is aimed to introduce the student to the management issues in establishing and working in a clinical practice. While the subject will cover issues related to health professionals and public sector management, the focus of the subject will be on issues in private practice. The aim of the subject is to introduce the student to a wide range of topics, including an over view of health care funding in Australia, private and public health system, developing a business plan, different business structures, financial management, managing staff and occupational health and safety issues.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3059 Processes and Evaluation in Employment Relations (10 Credit Points)
Subject Details (p. 2676) Legacy Code: 200575
This subject applies theory and skills developed throughout the discipline in Human Resource Management to real-world organisational and policy challenges and opportunities. Students will develop and use employment relations concepts and "metrics" to design implementation plans and to evaluate policies, practices and change initiatives. Students' skills in communication and problem solving will be assured in this subject.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BUSM 1023
Equivalent Subjects: LGYA 4642 - Human Resources Development Seminar
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3061 Project Management (10 Credit Points)
Subject Details (p. 2677) Legacy Code: 300727
This subject is to give students an understanding of appropriate methods of managing construction projects and to develop skills in using these methods on the type of projects the students expect to undertake in their professional careers. Content: Major knowledge areas of project management.
Level: Undergraduate Level 3 subject
Equivalent Subjects: BUSM 3060 - Project Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3063 Reward and Performance Management (10 Credit Points)
Subject Details (p. 2677) Legacy Code: 200739
'Reward and Performance Management' introduces students to critical perspectives in reward management. Through case studies students consider the wider context in which reward strategies are devised and the strategic decisions that arise if reward is to meet regulatory requirements, organisation objectives and the expectations of the workforce. Students examine the component parts of contemporary reward and critically assess the relationship between performance and reward. Through engagement with different types of performance management systems, students identify and assess contrasting approaches to performance management.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BUSM 1023
Incompatible Subjects: BUSM 3040 - Management of Employee Performance LGYA 4822 - Remuneration Theory and Practice
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3064 Service Industry Analytics (10 Credit Points)
Subject Details (p. 2678) Legacy Code: 200991
Service Industry Analytics is designed to provide a working knowledge of how to analyse and report information required in planning and operating a services business. It explores the methods, uses and limitations of contemporary research in the sport and hospitality industries. Students will gain experience with the planning and implementation of research and assessment of service research problems, utilising the collection and analysis of both quantitative and qualitative data.
Level: Undergraduate Level 3 subject
Equivalent Subjects: BUSM 2036 - Service Industry Studies
LGYA 4814 - Sport Management Research Methods
LGYA 4799 - Hospitality Business Research Methods
LGYA 4863 - Services Research Methods
MKTG 2011 - Customer Insights
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3065 Special Event Management (10 Credit Points)
Subject Details (p. 2679) Legacy Code: 200990
Special Event Management is designed to introduce students to event management in order to develop their skills and knowledge relating to the organisation of various event forms. The subject provides students the opportunity to practically apply management strategies, leadership theories, communication skills, and administration skills to facilitate the design, marketing, communication, innovation and planning of their own event. Careers in the industry can be found across diverse fields in the public and private sectors including hotels, event management companies, exhibition and sports venues, and in community organisations such as clubs, schools and charities.
Level: Undergraduate Level 3 subject
Equivalent Subjects: BUSM 3067 - Sport and Hospitality Event Management
Incompatible Subjects: LGYA 4810 - Sport Event and Facility Management
LGYA 4864 - Convention and Special Event Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3069 Strategic Management (10 Credit Points)
Subject Details (p. 2680) Legacy Code: 200587
This subject explores the nature and essence of strategy and how this is created in various organisational, industry and economic contexts. The complexity of the strategy process, content and context means that there is not one clear position on strategy. The impact of this complexity on managers seeking to develop a strategic thinking capability is examined. The paradoxes and debates in the field of strategy are explored in an effort to understand the concept of sustainable competitive advantage. Students will utilise the theoretical knowledge presented in a dialectical enquiry framework to undertake strategic analysis, and develop a selection of strategic options, for case study scenarios and in a team strategy simulation.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BUSM 1038 OR
BUSM 1008 OR
BUSM 1019
Equivalent Subjects: LGYC 0040 - Strategic Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3070 Strategic Sport Leadership (10 Credit Points)
Subject Details (p. 2681) Legacy Code: 200998
In contemporary sport organisations and contexts, sport practitioners require an in-depth understanding of strategic leadership processes and practices. To respond to sport's ongoing professionalisation, globalisation, demographic changes and emerging consumer expectations, sport managers and government policy makers require knowledge and skills which will allow them to navigate and successfully manage these changes. Students will develop knowledge and skills in areas such as policy development and implementation, sport governance, strategic planning, executive leadership and change management processes and practices. Learning will be applied across diverse sport contexts including high performance and community sport with a focus on sport for development. Students' leadership knowledge and skills will be showcased through a sport leadership, governance and integrity portfolio.
Level: Undergraduate Level 3 subject
Equivalent Subjects: SPRT 3016 - Sport Management Planning and Development
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3072 Tourism Industry Professional Placement (20 Credit Points)
Subject Details (p. 2682) Legacy Code: 102385
In 2023 this subject is replaced by TOUR 3003 - Visitor Economy Professional Placement. Tourism Industry Professional Placement (TIPP) provides students with understanding and experience of the tourism or related industry workplace. Students work in a voluntary capacity with an industry host to gain work-ready skills and undertake professionally appropriate tasks. Students complete a Professional Placement Proposal and Professional Placement Report.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3073 Tourism Policy and Planning (10 Credit Points)
Subject Details (p. 2682) Legacy Code: 101904
In 2023 this subject is replaced by TOUR 3005 - Tourism Policy and Planning. This subject gives students a general understanding of planning theory as it relates to sustainable tourism policy and practice. Students will apply this knowledge to tourism sites, facilities and activities in Sydney with a major assignment focusing on Sydney Olympic Park. A self-guided field trip enables students to apply and understand various planning techniques, tourism policies, scenario mapping strategies and consider conflict resolution practices. Students will present their ideas by integrating quantitative and qualitative data, both in teams and individually. At the conclusion of this subject students will have the skills to apply planning theory to an analysis of tourism policies, sites, facilities and activities in a global city such as Sydney.
Level: Undergraduate Level 3 subject
Equivalent Subjects: TOUR3005 - Tourism Policy and Planning LGYA 1265 - Tourism Policy and Planning BUSM 2035 - Recreational Tourism Policy and Planning
Incompatible Subjects: LGYB 8930 - Tourism Policy and Planning LGYA 6103 - Recreational Planning towards Sustainable Tourism LGYB 8197 - Sustainable Tourism and Recreational Planning
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3074 Work Employment and the Labour Market (10 Credit Points)
Subject Details (p. 2683) Legacy Code: 200243
This subject provides an in-depth study of the links between work, employment and wider labour market issues. An introductory framework will be provided emphasizing the historical perspectives of work and the key theories and concepts involved in industrial sociology. Current and future issues and trends in work organization and practice and their relationships to society will also be considered. The subject will then examine the relationship between labour markets, employment and government policy in both macro and micro settings. Particular emphasis will be placed upon the interaction of regional labour markets, policies and outcomes for key labour market segments.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BUSM 1023
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3077 Construction Project Management (10 Credit Points)
Subject Details (p. 2683) Legacy Code: 301229
This subject is to give students an understanding of appropriate methods of managing construction projects and to develop skills in using these methods on the type of projects expected to undertake in their professional careers. It covers the major knowledge areas of project management theory as they relate to construction.
Level: Undergraduate Level 3 subject
Equivalent Subjects: BUSM 3060 Project Management BUSM 3061 Project Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3078 Business Report (20 Credit Points)
Subject Details (p. 2684) Legacy Code: 201043
This subject is designed to bring to life the knowledge gained during the students' study whilst applying it practically to diverse business contexts through a work integrated learning research project. The project will build on the comprehensive, coherent and connected knowledge gained in business specialisations to allow the student to explore and develop attributes required to be successful in contributing to outcomes in a business environment. Students will have an opportunity to work under the supervision of an academic on a research project. Assessment of the subject will include a formal research presentation to academics and/or industry. Entry to this subject is on a competitive basis. Contact the subject coordinator for details.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3079 Travel in the Digital Age (10 Credit Points)
Subject Details (p. 2685) Legacy Code: 102779
In 2023 this subject replaced by TOUR 3001 - Tourism, Events and Technology. This subject explores the ways in which digital technologies are reshaping travel, including travellers' experiences, and planning and management of the travel industry. Students will learn how digital technologies are being utilised, and the opportunities and challenges these technologies present. The subject will provide opportunities to engage with travel apps, virtual/augmented reality technologies, smart attractions and transport technologies. Students will also learn how to conceptualise and pitch their own digital travel products. Upon completion of the subject, students will be well placed to develop and manage innovative, socially responsible travel and mobility technologies.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3080 Health Care Systems and Organisation Culture (10 Credit Points)
Subject Details (p. 2686) Legacy Code: 401389
This subject identifies complexities associated with health care systems and processes, equipping students with the essential business skills to deal with challenges arising throughout the process of managing health services. A key focus of the subject is in the management of resources as a strategic activity of health organisations, particularly in relation to human resources, as workforce shortages pose a significant challenge to contemporary health management practice.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BUSM 1037
Equivalent Subjects: BUSM 3017 - Health Services Workforce Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3081 Business Analytics Project (10 Credit Points)
Subject Details (p. 2687) Legacy Code: 201091
This subject provides students with the experience of applying business analytics skills and knowledge gained throughout the course of their degree in general and from the Business Analytics major in particular. Students will undertake a project in a real-world case setting to transform data to knowledge providing analytical solution to a client-specified problem. In teams, students will develop a project proposal, final report and/or interactive project tool and presentation. Students will gain insight into the profession of business analytics through independent learning and reflective practice.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BUSM 1042
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3082 Project Management in Humanitarian and Development Studies (10 Credit Points)
Subject Details (p. 2687)
The primary aim of this subject is to equip students with the concepts, processes and major techniques employed in project management. By integrating theory and practice this subject provides a strong foundation for students in project management as an essential skill in the field of humanitarian and development studies. The subject uses the project management body of knowledge (PMBOK) which covers the required competencies in project management including planning, monitoring, control, implementation and evaluation.
Level: Undergraduate Level 3 subject
Equivalent Subjects: BUSM 2043 - Project Management in Humanitarian and Development Studies
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 3083 Global Sports Management (10 Credit Points)
Subject Details (p. 2688)
Sport is a complex, multi-billion-dollar industry that attracts widespread global attention. However, the international nature of the sports industry presents many management challenges and opportunities for sports organisations. This subject explores the global nature of the sports industry and offers students insights into sports governance, tourism and marketing in an international context. Students will learn how governments and other organisations mobilise sport to achieve various social, cultural and financial outcomes that benefit both the business and the wider community.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 4001 Business Analysis Seminars (10 Credit Points)
Subject Details (p. 2689) Legacy Code: 200896
This subject introduces students to exemplary research in selected contemporary issues in business practice and policy. Presented through a series of seminars by leading business academics, selected issues will be examined in terms of the competing definitions of the problem, the methods of analysis to be used to address the problem, components of the problems and relationships to other contemporary issues. As business research is inherently inter-disciplinary and involves multiple stakeholders, relevant and competing theoretical perspectives explaining selected issues will be examined. Different methods of investigation and analysis of issues will be evaluated.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 4002 Seminal Papers in Business (10 Credit Points)
Subject Details (p. 2690) Legacy Code: 200898
The aim of this subject is to develop skills in applying rigorous analysis and critical assessment to research-debates in business disciplines through an examination of seminal literature in particular business fields which often embrace conflicting theoretical approaches. This will provide candidates with the advanced skills needed to critically analyse debates in a business discipline, while also enabling them to gain more familiarity with theories, issues, and problems in a particular research area. Seminal business papers will be analysed through a balanced and constructive critique of their strengths and weaknesses, providing suggestions for how the work might be extended or improved. From this subject, students will be able to apply the rigorous analytical skills to their own work.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7001 Advanced Research Skills (20 Credit Points)
Subject Details (p. 2691) Legacy Code: 200745
Advanced Research Skills is designed for students who are undertaking Doctoral studies. This subject aims to equip participants with sound knowledge of research methods in business, their criteria for use, their basis of selection, their underlying assumptions and limitations, and their computational implications and processes. The subject will introduce candidates to different methodologies in management research and will also provide in-depth study of particular methods that candidates are expected to use in their thesis, e.g. case studies, surveys, questionnaire design, conducting interviews and focus groups as well as qualitative and quantitative data analysis.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): BUSM 7075
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7003 Applied Business Project (10 Credit Points)
Subject Details (p. 2691) Legacy Code: 200798
This is a subject in which students will have individual responsibility for the timely completion of a significant project under the guidance of a member of the University's academic staff. Students will be required to take a real business issue or problem and apply the relevant theories, frameworks and/or concepts learned throughout the MBA. Projects should focus on issues that would be addressed by senior management within an organisation, and should apply a consultancy perspective. This is the capstone subject. Students should take it as their last subject of study.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): BUSM 7062 AND
BUSM 7016 AND
BUSM 7026 AND
BUSM 7023 AND
MKTG 7010 AND

BUSM 7004 Applied Project (Human Resources and Management) (10 Credit Points)
Subject Details (p. 2692) Legacy Code: 200954
Applied Project (Human Resources and Management) is an integrated capstone subject that brings together the skills and understandings HRM and management students have developed during their course of study. The subject encourages HRM and management students to demonstrate their ability to solve multidisciplinary problems in relation to current and future issues that affect the application of human resource and management functions in contemporary workplace and industry contexts. The subject will also allow students to critically evaluate issues critical to these professional domains to determine and assess effective solutions. The topics are determined from year to year by discussions between the individual student, the subject coordinator and the student's chosen supervisor.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7007 Business Communication Skills (10 Credit Points)
Subject Details (p. 2693) Legacy Code: 200817
This subject is designed to assist students to enhance their ability to make written and oral reports suitable for presentation to employers and stakeholders in a modern business environment. More specifically, this foundation subject assists students to evaluate academic literature in various business contexts, to communicate effectively as an individual or within groups and to apply ethical practices in different business contexts. These traits can be applied in the workplace and any contemporary business environment.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7008 Business Internship (10 Credit Points)
Subject Details (p. 2694) Legacy Code: 200769
The Business Internship is designed for students who want to gain industry experience and further their studies through a 10-week business internship. This Business Internship subject is based on a project style subject which requires students to undertake a research project in their chosen field whilst attending an industry based internship.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: BUSM 7070 - Masters Project
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7011 Business Operations and Logistics (10 Credit Points)
Subject Details (p. 2695) Legacy Code: 200838
This subject introduces students to operations and logistics management theory and practice. Operations and logistics management is an important element of business strategy and it is integral to both service and manufacturing industries. Students will develop an appreciation of the latest trends in business operations and logistics management and the applications currently adopted in organisations and industries. They will also learn to apply quantitative techniques for formulating/analysing problems and providing recommended solutions. This subject provides an excellent foundation for further specialisation in logistics and supply chain management but also works well for students in general business operations programs.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: BUSM 7010 - Business Operations Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7012 Business Project (20 Credit Points)
Subject Details (p. 2696) Legacy Code: 200829
This is a 20 credit point subject over two Quarters, 20 weeks in total, 10 credit points in each Quarter. Business Project equips professionals to address contemporary challenges through research and applying knowledge developed in earlier units of study. This student-centred subject provides close supervision of research and analytical practices to enhance skill development and capacity to engage with problems confronting organisations, taking account of contexts and multiple stakeholders. Students will have scope to focus on issues that are of particular concern to organisations or interest for their careers. As an integrating subject, it demands participants bring together their knowledge and curiosity to develop recommendations in a format that can showcase their achievements. In order to complete this subject, students must have studied this subject over two teaching periods.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7013 Business, Society and the Environment (10 Credit Points)
Subject Details (p. 2698) Legacy Code: 200847
Business, Society and the Environment draws on social enquiry and reflection to explore the complex relationships between business and the stakeholders of business, by critically evaluating the social, environmental and political impacts of business decisions and practices. The subject focusses on the challenges and ethical dilemmas emerging from global capitalism, and addresses the significance of government in regulating the impact of business on society and the environment. The subject critically considers the nature of the firm and the role of ideology to justify business decisions.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7014 Compliance Management (10 Credit Points)
Subject Details (p. 2699) Legacy Code: 200776
This subject comprises three modules that focus on quality management, risk management, and performance measurement and benchmarking. The quality systems module explores quality management principles, systems, and frameworks, and the role that quality management plays in creating customer value, improving competitiveness and enhancing organisational effectiveness. The risk management module examines the important risks that need to be managed by businesses, especially in a global business setting, and introduces common frameworks that can be used to develop risk management strategies. The performance measurement and benchmarking module elaborates upon the evolution of performance measurement frameworks and introduces approaches that can be used by businesses to assess the status of their business processes and enhance performance through benchmarking. It will draw upon the concepts and theories covered in the quality and risk management modules. All three modules incorporate aspects related to economic, social and environmental responsibility. Students are required to study all three modules.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 4463 - Management of Quality
Incompatible Subjects: BUSM 7074 - Performance Measurement and Benchmarking LGYB 9039 - Risk Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7016 Contemporary Organisation Behaviour (10 Credit Points)
Subject Details (p. 2700) Legacy Code: 200788
Contemporary Organisation Behaviour has been designed to offer you tools which can help you manage people in an increasingly complex organisational climate. Therefore, the objectives of the subject focus on critically evaluating how organisations, groups and teams, and individual behaviour, can affect work performance and productivity. You will explore in depth a range of Organisational Behaviour variables using theory as the foundation for evaluation and/or research while developing skills in professional practice for communicating, collaborating and critically reflecting. You will have opportunities to relate and apply concepts to your work experience and context learning what might be most relevant to your future plans in management.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: BUSM 7017 - Contemporary Organisation Behaviour
Incompatible Subjects: BUSM 7060 Management Skills
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7018 Contemporary People Management (10 Credit Points)
Subject Details (p. 2701) Legacy Code: 200826
The subject serves as an introduction to human resource management for those considering careers in employment relations and those who will potentially have people management responsibilities. HR processes and practices are studied in contexts and with a consideration of stakeholders' interests, leading to an appreciation of the contribution of human resource management to organisational success. Students will evaluate particular approaches to human resource management through analysing real-world cases and practical activities.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 8572 - Human Resource Management LGYA 4898 - Human Resource Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7019 Corporate Governance and the Global Environment (10 Credit Points)
Subject Details (p. 2702) Legacy Code: 200795
Corporate governance is the set of processes, policies and laws affecting the way a firm is directed, administered or controlled. This subject examines corporate governance systems and how these may contribute to sustainable enterprise. Models of corporate governance are analysed, and decision-making processes are evaluated in various economic and social contexts. The subject also introduces the institutions of the legal system, with particular emphasis on domestic and international corporations law.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 8690 - Governance and Ethics
Incompatible Subjects: LAWS 7009 - Commercial Law
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7020 Creating Sustainable Organisations (10 Credit Points)
Subject Details (p. 2703) Legacy Code: 200853
'Creating Sustainable Organisations' explores new pathways to sustainability and leadership for the 21st Century, encouraging continual reflection and discussion on the nature and implications of current debates on environmental and social issues. It examines different models and strategies designed to balance the need for business growth with responsiveness to social and environmental issues. 'Creating Sustainable Organisations' provides students with the skills to lead in ways that will enable them to be active participants in the solution to the planet's environmental and social problems.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 8728 - Creating Sustainable Organisations
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7021 Credit and Lending Decisions (10 Credit Points)
Subject Details (p. 2703) Legacy Code: 51166
Lending is one of the most important functions of any financial institution. If not managed properly, it can lead to credit quality problems, threatening the existence of the financial institution. This subject aims to provide an analysis of the various lending activities of financial institutions, emphasising the assessment of credit proposals and the management of credit risk.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7022 Derivatives (10 Credit Points)
Subject Details (p. 2704) Legacy Code: 201001
This subject provides an introduction to the major classes of derivatives: forwards, futures, swaps and options. These are studied in detail with the objective of elucidating the ways in which these instruments can be used for the purposes of hedging, speculation and arbitrage. In addition to the analysis of derivative usage and market growth, considerable attention is given to the objective of gaining an understanding of the fundamentals of derivative pricing.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7023 Developing Business Expertise (10 Credit Points)
Subject Details (p. 2705) Legacy Code: 200790
This subject addresses one of the key internal issues facing business today: understanding and using a range of business information to make strategic decisions. Students will use the knowledge gained from prior subjects to solve business problems, deal with unique situations or plan and manage changing circumstances. A multi-disciplinary approach to analyse business situations will be applied to enable students to recognise this inter-related nature of business disciplines. A simulated practice in the application of knowledge to complex situations will be applied to provide an experiential learning environment.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7024 Developing Human Capital and Organisational Capability (10 Credit Points)
Subject Details (p. 2705) Legacy Code: 200827
The subject equips students to lead human resource development initiatives by developing specialist knowledge and skills. Contemporary human resource development is studied within the context of strategic employment relations, challenges around talent management, the evolution of training and development in firms and in public institutions, and with some consideration of organisational learning. By working through stakeholder differences and labour market segments, students argue as they apply knowledge to different contexts. Through argument and application comes insight into critical perspectives on building human capability, career management and development, and current and future trends in human resource development in a number of countries.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 8882 - Employee Training and Development LGYA 4896 - Developing Human Capital
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7025 Diversity, Labour Markets and Workforce Planning (10 Credit Points)
Subject Details (p. 2706) Legacy Code: 200828
Demographic change, economic cycles and labour force participation patterns influence the manner in which HRM functions are conducted. This subject focuses on the way an organisation's external environment impacts on both strategic and workforce maintenance planning. The subject is designed to enable employment relations professionals and managers to plan for organisational sustainability, managing workforce-related risk, and growth. The emphasis on labour markets, workforce diversity and planning allows for accommodation of demographic changes, human capital shortages and economic cycles when planning for labour supply and labour demand requirements. While the aim is to identify gaps between the present and future human capital needs - and implementing solutions so the organisation can accomplish its mission, goals, and objectives - the difficulty of this systematic and proactive process increases with the complexity of an organisation and the longer the time horizon used in the planning.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 8596 - Work and Society LGYA 4899 - Work Society and Labour Markets LGYA 4901 - Workforce Planning
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7026 Emerging Leaders (10 Credit Points)
Subject Details (p. 2707) Legacy Code: 200789
Developing competitive advantage in a globalised business context demands that leaders recognise the imperative of managing stakeholders during periods of significant and complex organisational strategic change.The focus of 'Emerging Leaders' is the development of skills and knowledge that underpins capacities for successful strategic partnering both within and outside the organisation. Engaging with the research and debates on leadership as they relate to current leadership practice and principles in various international and organisational contexts means these newly emerging leaders will be in a position to lead and ensure the performance of individuals, teams and organisations.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7027 Employment Relations Professional Practice (10 Credit Points)
Subject Details (p. 2708) Legacy Code: 200717
Employment Relations Professional Practice concentrates on communicating and performing as employment relations professionals. Students practice the activities undertaken by professionals, such as advocacy and presentation, team work, information and knowledge management, research, analysis and problem solving, and producing reports, policies and analytical essays, with opportunities for feedback. The focus is knowledge of the ER professions, such as the role, function and ethics of human resource managers, industrial officers and the role of professional bodies in Australia and internationally. Support for academic practice will accompany professional activities. The subject is designed for those wanting to build a career in employment relations.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7028 Entrepreneurial Management Capabilities (10 Credit Points)
Subject Details (p. 2708) Legacy Code: 200850
Developing innovation and entrepreneurial capability is essential for small, medium and large businesses. This subject introduces students to practical and applied knowledge supported by theory, concepts, frameworks for understanding and developing innovation and entrepreneurial thought, capability, infrastructure and platforms. Students will be exposed to leadership and approaches to the development of new products, services, processes and business models, with support from Western Sydney University's Launch Pad Technology Business Incubator.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7031 Financial Institution Management (10 Credit Points)
Subject Details (p. 2709) Legacy Code: 51165
This subject provides participants with an overview of the types of financial institutions and the regulatory context within which they operate. Financial risk management and corporate responsibility serve as an underpinning framework to consider the complexity associated with managing contemporary financial institutions in an Australian and International context. A focus of the subject is to provide participants with an opportunity to use techniques to measure and manage financial risk.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7032 Financial Institutions and Markets (MAF) (10 Credit Points)
Subject Details (p. 2710) Legacy Code: 51163
This subject helps students to: understand the role and nature of financial markets and institutions; develop computational skills for transactions in financial markets; understand the factors that determine share price, interest rates and exchange rates; and understand major derivative products and their use in financial markets. This subject contains financial institutions and markets and the transactions that take place in them.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7034 Foundations of Management (10 Credit Points)
Subject Details (p. 2711) Legacy Code: 200785
Developing one's own professional skills, being able to assess and develop the skills of others, and astutely reading the environment, are core to high-achieving executives. Foundations of Management introduces new managers to the fundamentals of management. It takes an holistic view of the elements related to optimal performance of managers, drawing from and reflecting upon participants' experiences. The elements consist of the awareness of ones self as a manager, identifying and developing own management skills required for now and the future needed when working within a dynamic organisational environment. The focus is developing one's own management skills through the application of theory to management practice.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: BUSM 7101 - Workplace Management Dynamics BUSM 7060 - Management Skills
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7035 Funds Management and Portfolio Selection (10 Credit Points)
Subject Details (p. 2711) Legacy Code: 51168
This subject provides an introduction to the theory, concepts, tools, techniques and applications of investment management, drawing on examples from the Australian financial system. The subject focuses on various asset pricing models including capital asset pricing model, single index model arbitrage pricing theory and Fama-French three factor model. The subject introduces various portfolio management strategies, asset classes including bonds and equity securities. The subject also highlights various fund performance measures.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7036 Funds Management and Portfolio Selection (EO) (10 Credit Points)
Subject Details (p. 2712) Legacy Code: 900655
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7040 Governance, Ethics and Social Entrepreneurship (10 Credit Points)
Subject Details (p. 2713) Legacy Code: 200848
There is a growing need for communities and not-for-profit organisations to maintain a degree of organisational and social sustainability, without recourse to philanthropy, government, or other sources of aid. This subject adopts business and entrepreneurial principles to identify and explain the management of a social venture, with a view to ensuring organisational and social sustainability. The subject provides an understanding of governance and ethical practice to support social outcomes.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7043 Industrial Relations and Workplace Change (10 Credit Points)
Subject Details (p. 2713) Legacy Code: 200719
Industrial Relations and Workplace Change is designed to equip current and future employment relations professionals and practitioners with the knowledge necessary to analyse and implement the processes for workplace change and workplace-level bargaining. The understanding of workplace change covered in this subject includes an emphasis on rights, obligations and "voice". The subject focuses on workplace change problem solving for employee engagement and dispute resolution in both local and global workplace change contexts.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 8579 - The Industrial Relations Process
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7045 Innovation Through Digital Technology (10 Credit Points)
Subject Details (p. 2714) Legacy Code: 200845
Business innovation in the Digital Economy recognises that current economic development and leadership is based on digitisation of the global economy. This subject provides a framework for understanding management issues, business development and technology use and change in the areas of innovation and digital business. The subject introduces students to various digital technologies and applications that companies need to address for creating new business opportunities in the fast changing global business environment. Students will develop an appreciation of digital business as a form of organisational innovation and the importance of innovation in the digital economy. Students will learn to formulate a digital business strategy for an organisation and understand various issues involved in digital business innovation. Students will be exposed to the University's business and technology incubator environment.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7046 Innovation for New Markets (10 Credit Points)
Subject Details (p. 2715) Legacy Code: 200851
Entrepreneurship, innovation and new markets are pertinent activities that have collectively become cornerstones of how firms grow and interact with society. This subject introduces students to issues, principles and frameworks associated with exploring opportunities and challenges that relate to these three activities. Emerging and new markets are examples of markets that represent opportunities and challenges for innovation and entrepreneurial activities. Through selected readings that emphasise key themes and issues, students will be exposed to an understanding of what constitutes entrepreneurship, innovation, new markets and market development, how they are influenced by the ever-changing business environment, an examination of opportunities that emerge as a result of changing technology and consumer expectations taking place in emerging and new markets. Emerging markets have become a key source of innovation in products, services and business processes which calls for an examination as to whether these can be extended to developed markets. The subject provides students with an opportunity for continuous practical experiential learning through collaboration with industry Launch Pad partners.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7047 Innovation, Creativity and Entrepreneurship (10 Credit Points)
Subject Details (p. 2716) Legacy Code: 200792
The aim of this subject is to provide students with the necessary skills to understand, execute and manage entrepreneurial innovation processes in firms/organisations, and be more prepared to succeed within an increasingly complex, global and highly competitive entrepreneurial environment. Firms/organisations of various sizes, including small and medium enterprises (SMEs) that are innovative and entrepreneurial provide vision, nurture creativity and idea management as part of their everyday activities and in seeking long-term sustainability.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 8997 - Innovation and Entrepreneurship
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7048 Innovation, Creativity and Foresight (10 Credit Points)
Subject Details (p. 2717) Legacy Code: 200852
Creativity is a systematic, logical process mixing imaginative and creative thinking. Ideation is a process for forming and relating ideas derived through creativity. Innovation seeks to take ideas through invention and entrepreneurial processes to create new economic and social value. Students will be exposed to a variety of brainstorming, creativity and foresight methods and tools, with emphasis on scenario planning methods. Students will be introduced to workshop development, moderation and management approaches and methods. Selected key themes on economic, social, technological, and sustainable development for Australia over the next 10-30 years will be analysed and developed through a scenario planning workshop process, with outputs mapped to business and social innovation and entrepreneurship thinking, and platforms. Students will also be exposed to creativity and foresight methods used by the Western Sydney University Launch Pad Business Technology Incubator.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7050 Integrated Business Experience 1 (10 Credit Points)
Subject Details (p. 2718) Legacy Code: 200831
Successful professionals must be able to view issues and problems from multiple perspectives and be able to utilise a range of different skills to make appropriate decisions. This subject introduces this multi-faceted approach to business by taking the knowledge gained in earlier subjects and of the real-world of business and applying this via case studies. Students will be expected to work independently and in syndicate teams to solve common issues facing businesses and policy makers using critical, integrative and creative thinking. It is recommended that this subject be the final subject within the graduate certificate.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7051 Integrated Business Experience 2 (10 Credit Points)
Subject Details (p. 2719) Legacy Code: 200843
Successful professionals must be able to view organisational issues from multiple perspectives (range of stakeholders) and levels (from local to international), then be able to utilise a range of different skills to make appropriate decisions. This subject takes this multi-faceted approach by utilising the knowledge gained in earlier subjects and applying it to case studies. Building on the subject 'Integrated Business Experience 1', an international focus provides participants with the opportunity to consider issues on a broader scale. Students will be expected to work with a group simulation to solve common issues facing organisations and policy makers using critical, integrative and creative thinking.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): BUSM 7050
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7053 International Finance (10 Credit Points)
Subject Details (p. 2720) Legacy Code: 51211
This subject provides a comprehensive analysis and coverage of contemporary international finance by describing the international financial system, institutions and market practices; international finance theorems and their application; Euromarkets; international borrowing, lending and capital sourcing; measurement of foreign exchange risk; managing foreign exchange exposure; foreign currency derivatives, international investment; and globalisation and the MNC.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7055 Internship (20 Credit Points)
Subject Details (p. 2721) Legacy Code: 200830
This is a 20 credit point subject over two Quarters, 20 weeks in total, 10 credit points in each Quarter. Internship is designed for students who want to gain industry experience and further their studies through a 20-credit point business internship, conducted over two consecutive teaching sessions. This Internship subject is based on a 'project style' subject which requires students to undertake a research project in their chosen field whilst attending an industry-based internship. These highly sought after internships will be filled on a competitive basis.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7058 Leading Contemporary Organisations (10 Credit Points)
Subject Details (p. 2722) Legacy Code: 200833
This subject explores the processes and challenges encountered by leaders in contemporary organisations, taking into account rapidly changing environments. Through an in-depth appraisal of various leadership theories and concepts, it encourages students to reflect on the key competencies required for effective leadership. It also emphasises the importance of self-knowledge, values and ethics for contemporary leaders. Students will be required to design a leadership development program to address current and future leadership issues.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7059 Logistics Processes in Enterprise Resource Planning (10 Credit Points)
Subject Details (p. 2723) Legacy Code: 200836
This subject introduces key logistics processes supported by modern ERP (Enterprise Resource Planning) systems, using an integrated process perspective of the firm. Each process within broader logistics processes provides the basis for executing logistics operations in a range of organisations across manufacturing, service and government sectors. Logistics processes are introduced through key process cycles including manufacturing, planning and control (MPC) in production planning, procurement cycle in purchasing, sales order processing in sales and distribution, and logistics execution. Cross-integration of these process cycles is also illustrated using various integrations among the procurement, fulfilment, production and warehouse management processes. Logistics processes are demonstrated using data, application and technical integration within an ERP system environment.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7061 Managerial Economics (10 Credit Points)
Subject Details (p. 2724) Legacy Code: 200793
This subject introduces students to the application of basic economic concepts to managerial decision-making and their use in a range of business environments. Students will learn how to apply microeconomic tools to common problems facing business managers, such as maximising profit, setting prices, creating efficient incentive structures, and selecting competitive strategies. Case studies are also used to demonstrate the value of microeconomic tools in making business decisions, and to foster the student's application of their learning to their own business environment.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 8716 - Economic Contexts for Managers LGYA 8679 - International Financial Management ECON 7002 - International Trade and Industry Economics
Incompatible Subjects: ECON 7001 - Economics (PG)
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7062 Managerial Finance (10 Credit Points)
Subject Details (p. 2725) Legacy Code: 200787
This subject is designed to provide students with the knowledge and skills required for understanding, analysing and solving corporate financial management issues. The focus is corporate-oriented with emphasis on the practical application of economic theory in financial decisions confronting business today.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 8667 - Financial Management
Incompatible Subjects: ACCT 7014 - Financial Management of Hospitality and Hotel Managers LGYA 7713 - Financial Management in Health Services HLTH 7005 - Health Financial Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7064 Managing Project Teams and Stakeholders (10 Credit Points)
Subject Details (p. 2725) Legacy Code: 301187
This subject is designed to provide students with essential behavioural knowledge areas for project management. Since project management occurs in a team setting, project managers need to master team leadership by understanding team dynamics and behaviour in different team settings, which is a main focus area in this subject. Students will also learn effective ways to identify and engage project stakeholders and communication concepts and tools that effectively influence stakeholders.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7065 Managing in the Global Context (10 Credit Points)
Subject Details (p. 2726) Legacy Code: 200835
Managing in the Global Context provides students with an understanding of the complexities of managing in the changing economic, political, legal, technological and within socio cultural factors that influence global business operations. By addressing areas of understanding the global business environment, managing political risk and government relations, understanding culture, cross cultural communication and negotiation, strategy and structures for global organisations, motivating and leading, business ethics and corporate responsibility and competencies for global managers this subject provides an organisational behaviour approach to managing in a dynamic global context. Through critical analysis of contemporary media, research and case studies this subject provides a basis for linking management practice to theoretical knowledge.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7070 Masters Project (10 Credit Points)
Subject Details (p. 2727) Legacy Code: 200280
Masters Project is an integrated capstone subject that brings together the skills and understanding marketing students have developed during their course of study. The subject encourages students to demonstrate their ability to solve problems in relation to current and future issues within a marketing context in contemporary business. The subject allows students to critically evaluate issues relevant to their topic and assess effective solutions. The topics are determined by discussions between the individual student, the subject coordinator and the student's chosen supervisor.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 8752 - Applied Marketing Planning LGYA 8767 - Masters Project in International Business LGYA 4472 - Business Project (International Marketing)
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7071 Negotiation and Conflict Resolution Management (10 Credit Points)
Subject Details (p. 2728) Legacy Code: 200796
Negotiation has become a strategic necessity for many firms wishing to survive and grow in today's increasingly competitive globalised economy. Negotiation and conflict resolution errors can be costly to direct and indirect stakeholders. As such, Negotiation and Conflict Resolution Management will provide theoretical frameworks for students to develop the practical skills needed to manage the negotiation and conflict resolution needs of any organisation. Through the use of role play and simulations, students will be required to analyse corporate data and apply strategies to create a negotiated agreement. It examines negotiation in different contexts including multiparty negotiations. Emphasis is also placed on causes of conflict and how to identify potential indicators, leading to an analysis of the different conflict modes and patterns.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 8695 - Negotiation for Managers LGYA 8696 - Conflict Resolution
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7072 New Venture Finance (10 Credit Points)
Subject Details (p. 2729) Legacy Code: 200849
New Venture Finance introduces students to essential theories, frameworks, principles and requirements for understanding and seeking funding for new ventures, with a focus on investor philosophy. A dynamic approach to seeking initial and subsequent funding for developing innovations and entrepreneurship is emphasised in this subject, recognizing that most new ventures are not fully funded as they launch. The subject also explores approaches related to new ventures at the stage at which they are maturing into defined businesses. Students will be introduced to commercialisation and strategies for the development of business plans designed to seek funding and support.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7073 One Hundred Days (10 Credit Points)
Subject Details (p. 2729) Legacy Code: 200797
This integrative subject focuses on the first one hundred days of a business executive who has commenced in a new management role. Students will gain insights into the challenges facing managers today and develop the skills in leadership and management expertise that were introduced in earlier subjects. The premise of this subject is that regardless of their level of experience, all managers undertaking new responsibilities need to understand who the key stakeholders are and what the business' personnel practices, financial objectives and marketing strategies are. Students will be given scenarios covering a range of business environments and are expected to problem solve these using the skills and knowledge learned in previous subjects.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): BUSM 7023
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7075 Philosophical Foundations of Business Research (20 Credit Points)
Subject Details (p. 2730) Legacy Code: 200743
This subject aims to develop a deeper understanding of the theoretical traditions in business research, the philosophy of science that informs research and the methodological approaches in business research. We discuss in depth the assumptions behind two major paradigms: The deductive (quantitative) and the inductive (qualitative) paradigms.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7076 Practice Management for Health Professionals (PG) (10 Credit Points)
Subject Details (p. 2731) Legacy Code: 400736
This subject is aimed to introduce the student to the management issues in establishing and working in a clinical practice. While the subject will cover issues related to health professionals and public sector management, the focus of the subject will be on issues in private practice. The aim of the subject is to introduce the student to a wide range of topics, including an over view of health care funding in Australia, private and public health system, developing a business plan, different business structures, financial management, managing staff and occupational health and safety issues.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7078 Project Management (10 Credit Points)
Subject Details (p. 2731) Legacy Code: 51240
This subject introduces students to the philosophy, tools and techniques for effectively managing projects in an organisation. Participants will be required to apply lessons learned to real-world situations and cases, developing their professional expertise in project management in ways that are relevant to their careers. Topics include organisational strategy and project selection; project definition and criteria of merit; tools and techniques; team leadership and management; development of project plans; estimation of time and resources; risk analysis and management; scheduling and control; resource allocation; project tracking; project closure and review. Participants will be expected to use MS Project as a project management tool.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7079 Purchasing and Materials Management (10 Credit Points)
Subject Details (p. 2732) Legacy Code: 51259
This subject introduces purchasing and materials management through a number of concepts, processes and methods across a number of industry sectors including manufacturing, service and public sector. It covers a range of topics including purchasing strategy, organisational structure and responsibilities, global supply management, supplier selection and evaluation, procurement process, price/cost analysis, purchasing contract arrangements and inventory management. Students will develop an appreciation of theoretical knowledge in purchasing and materials management and applications and systems currently adopted in organisations. The knowledge and skills developed through lectures, case analyses and hands-on exercises will prepare students to manage a range of purchasing and materials management functions in global organisations.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7081 Reward Management (10 Credit Points)
Subject Details (p. 2733) Legacy Code: 200721
This subject enables employment relations professionals to deploy advanced practitioner skills in specific workplace and institutional contexts. The management and the negotiation of reward are emphasised. Innovations such as strategic and total reward strategies are critically examined. These innovations relate to the key issues of market-imperatives and fairness, including the balance between collective and individually-determined reward and reward strategies related to performance.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 9000 - Remuneration Theory and Practice
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7082 Risk Management and Decision Making (10 Credit Points)
Subject Details (p. 2734) Legacy Code: 301192
This subject introduces decision theory, concepts and techniques applicable in managing projects. These techniques provide the basis for understanding project risks. The risk management process is reviewed in detail and dynamics of applying it in specialisation domains is discussed. The subject also analyses the concept of value and how value management is applied in managing projects. The different approaches of applying value management in different specialisations are discussed.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7083 Security Analysis and Portfolio Theory (10 Credit Points)
Subject Details (p. 2735) Legacy Code: 51212
This subject examines the valuation of assets, firms and securities. The focus is on the attempt by active investors to identify mispriced securities through projection of a firm's future cash flows based on pro forma financial statements, translating those projections to values and dividing the firm value among the different security holders of the firm. Students develop their understanding of accounting, finance and economic concepts in this applied unit by building models of a firm and conducting analyses of the equity valuation.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7084 Start-up (20 Credit Points)
Subject Details (p. 2735) Legacy Code: 200971
This is a 20 credit point subject over two Quarters, 20 weeks in total, 10 credit points in each Quarter. Developing start-ups and rejuvenating existing businesses are essential for industry and regional development and regeneration. This subject provides students with the knowledge, tools and skills to develop innovative ideas into prototype products and services and start-up businesses. Working within Launch Pad, Western's technology business incubator, students build the capacity to evaluate opportunities and generate innovative business ideas, incorporating diverse perspectives. Students are supported to develop foundational skills in finance, management and business law in order to take action and implement business ideas.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7086 Strategic Business Management (10 Credit Points)
Subject Details (p. 2736) Legacy Code: 200841
This subject critically examines strategic management processes in various business, industry and economic contexts. Students actively participate in experiential learning focussing on strategic leadership, visioning, situation analysis, objective setting and evaluation. Students apply current strategy models and theories to solving industry-specific problems and scenarios. The teaching methods are application-oriented using a variety of engaging technologies and media which simulate real-world strategic problem-solving.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7087 Strategic Employment Relations (10 Credit Points)
Subject Details (p. 2737) Legacy Code: 200722
This capstone subject aims for students to acquire the skills, knowledge and understanding of the challenges of managing people strategically in complex and turbulent environments. The subject examines theories on business strategy, strategic management, human resource strategy and industrial relations strategy. The use of knowledge of Human Resource Management and Industrial Relations in strategic analysis and evaluation for transforming the people management function is explained. Management practice is considered through examining ways of acting strategically relative to tendencies for the human resource function to become mired in tactical responses. The tools and techniques for analysing, implementing and evaluating strategy are emphasised.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: LGYA 8573 - Employment Relations Strategy and Change
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7088 Strategic Management (10 Credit Points)
Subject Details (p. 2738) Legacy Code: 200794
Strategic Management integrates business functional knowledge. The practical approach provides opportunities to use a range of strategic analysis tools and to engage in problem-solving (individually and collaboratively). Simulated strategic decision-making that includes data interpretation and generating options requires exercise of communication, research, and information literacy capabilities. This subject will allow MBA graduates to interpret data, generate strategic options and contribute to strategic decision-making in a number of organisational contexts.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: BUSM 7104 - Strategic Analysis and Decision Making
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7090 Strategic Project Management (10 Credit Points)
Subject Details (p. 2739) Legacy Code: 301193
This subject teaches students the importance of aligning projects with the business strategy. Strategic alignment is a two-way process. Overall business strategy guides project planning, and, in turn, project success drives enterprise strategy. Students understand the bigger-picture goals, how to identify what is being accomplished and why, and how to achieve goals. Other topics include measuring project success and portfolio and program management.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7092 Supply Chain Management (10 Credit Points)
Subject Details (p. 2740) Legacy Code: 200329
With a rapid increase in global trade and increasing customer expectations, firms are under considerable competitive pressure to find cost-effective and creative ways of delivering value to customers. Since the creation of customer value needs to be viewed holistically - from raw material movement from suppliers through to transformation in the factory and then on to distributors and customers - the effective management of the supply chain and related business networks is critical to achieving competitive advantage. Through formal lectures, case study discussions, and assignments, this subject provides the foundational knowledge, tools, and techniques needed to participate in the design, implementation, and management of an effective supply chain.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7093 The Business Environment (10 Credit Points)
Subject Details (p. 2741) Legacy Code: 200783
This subject introduces students to different aspects of the business environment so they develop a general understanding of a wide range of topics within the field of commerce. Management, marketing, legal and economic perspectives are explored as components of business structures taking into account the interactions between political, social, and fiscal enviroments. It is recommended that students undertake this subject in their first quarter of study.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: LGYA 4461 - Operations Management ECON 7001 - Economics (PG) BUSM 7010 - Business Operations Management BUSM 7044 - Information for Business LGYA 8762 - International Business Environment
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7094 The Contemporary Business Environment (10 Credit Points)
Subject Details (p. 2741) Legacy Code: 200820
This subject provides foundational knowledge that is needed to appreciate the complexities involved in managing businesses in an uncertain and complex global setting. Emphasis is placed on the influence of the economic, socio-cultural, political, and technological environments on a business and the need for businesses to adopt a global perspective in formulating and implementing strategic interventions for enhancing competitiveness.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: BUSM 7093 - The Business Environment
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7097 Time and Quality Management (10 Credit Points)
Subject Details (p. 2742) Legacy Code: 301195
This subject introduces time and quality management using basic planning and quality concepts. The subject will cover concept of planning and critical path methods including Project Evaluation and Review Technique (PERT), Line of Balance (LoB), Resource Management and Network. Relevant time management software is to be introduced in this subject to plan and manage project activities. The subject will also help students to understand and analyse quality system accreditation process and manage scope and changes in a project.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7099 Understanding Contemporary Organisations (10 Credit Points)
Subject Details (p. 2743) Legacy Code: 200825
Understanding Contemporary Organisations introduces the theoretical perspectives offered by the disciplines of business and organisation studies to students who have not previously undertaken a business study program. Students will develop their understanding of organisational structure and design and then examine the processes and practices that flow from structure and design. Through this unit, students build an integrated understanding of marketing, finances and people management practices in contemporary organisational settings.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7105 Business Analytics in Practice (10 Credit Points)
Subject Details (p. 2744) Legacy Code: 201019
This subject will explore and analyse ideas and concepts related to business intelligence and advanced analytics in business and broader economic contexts. The ability to identify, gather, extract, and analyse data is vital to organisations. Business analytics uses a variety of software applications to transform such data into useful information that can then be used for constructive decision making, improving operational effectiveness and efficiencies and identifying new business opportunities.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: MKTG 7002 - Applied Marketing Solutions
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7106 Ethics and Professionalism in Financial Services (10 Credit Points)
Subject Details (p. 2745) Legacy Code: 201037
This subject will address the ways in which ethics play a pivotal role in professional behaviour. The process of professionalism is an integral part of management and is responsible for effective decision making. This subject considers the challenges in the financial services environment that require strong ethical values and professional judgement. Ethical decision making is a fundamental requirement of good business practice. This subject will consider the importance of ethics, the FASEA Code of Ethics, how to apply different ethical frameworks for decision making and the meaning of being a professional in financial services. This subject is available as a standalone bridging subject which is accredited by the Financial Adviser Standards and Ethics Authority (FASEA) having met the FASEA curriculum and standards requirements.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7109 Environmental Management: A Business Perspective (10 Credit Points)
Subject Details (p. 2746) Legacy Code: 201081
In this project oriented unit, students apply environmental management concepts within a business context. Students explore a range of practices and strategies to a sustainable business operation, learning why environmental sustainability is the world's most challenging and complex issue. As part of group work projects, students investigate methods and tools to analyse environmental management practices, determine environmental risks, and develop associated mitigation strategies. Additionally environmental management systems and relevant international standards are used to evaluate business environmental performance in real-world cases and emerging environmental management initiatives, such as the circular economy, natural capital accounting, and environmental and social profit and loss.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7111 Project Management Frameworks and Methods
Subject Details (p. 2746)
The subject introduces frameworks, methods, approaches, and best practices employed in project management. From PMBoK, PRINCE2 to Agile, students will delve into each approach's advantages and challenges. Students will be equipped with the knowledge, skills and competencies to navigate diverse projects successfully. Students will also gain practical insights and develop decision-making skills through real-world cases and scenarios across various industries and domains.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7113 Leading for Social Impact (10 Credit Points)
Subject Details (p. 2747)
This subject provides students with an opportunity to explore the rising importance of leaders' impact on improving social outcomes through strategic decisions affecting various stakeholders. Specifically, this subject examines the social economy and social impact, models of leadership that can be used to maximise social impact, trends and drivers redefining the complexities of social impact, and strategies leaders can use to intervene more effectively to achieve social outcomes. Students will acquire critical leadership capabilities that equip them with knowledge and practical skills to achieve outcomes that enhance inclusive, responsible and equitable practices.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: BUSM 7051
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7115 Environmental, Social and Governance Reporting (10 Credit Points)
Subject Details (p. 2747)
Environmental, Social and Governance reporting is not only an improved way for organisations to report on their performance to investors and other key stakeholders. It provides an internal framework for improved decision-making and has been developed to ensure more sustainable value creation in business operations. In this subject, students will work individually in syndicate groups to learn how to best utilise diverse Reporting Frameworks and integrate ESG considerations into organisations governance and strategy. This will enable them to deliver responsible business decision-making and transparent reporting on Enterprise Value creation for the short, medium, and long term.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: ARCH 7001
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7116 Business Project A (10 Credit Points)
Subject Details (p. 2748)
Business Project A is the first of two integrative capstone subjects. The capstone equips professionals to address contemporary challenges through research and applying knowledge developed in earlier subjects of study. This student-centred subject provides close supervision of research and analytical practices to enhance skill development and capacity to engage with problems confronting organisations, taking account of contexts and multiple stakeholders. Students will have scope to focus on issues that are of particular concern to organisations or interest for their careers. As an integrating subject, it demands participants bring together their knowledge and curiosity to develop recommendations in a format that can showcase their achievements. In Business Project A students develop a project proposal that is completed in Business Project B.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: BUSM 7012
BUSM 7055
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7117 Business Project B (10 Credit Points)
Subject Details (p. 2748)
Business Project B is the second of two integrative capstone subjects. The capstone equips professionals to address contemporary challenges through research and applying knowledge developed in earlier subjects of study. This student-centred subject provides close supervision of research and analytical practices to enhance skill development and capacity to engage with problems confronting organisations, taking account of contexts and multiple stakeholders. Students will have scope to focus on issues that are of particular concern to organisations or interest for their careers. As an integrating subject, it demands participants bring together their knowledge and curiosity to develop recommendations in a format that can showcase their achievements. In Business Project B students complete and report the project proposed in Business Project A.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): BUSM 7116
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7118 Internship A (10 Credit Points)
Subject Details (p. 2749)
The internship capstone subjects are designed for students who want to gain industry experience and further their studies through project-based learning. Internship A is the first of two capstone subjects that require students to undertake a research project in their chosen field whilst attending an industry-based internship. In Internship A students will identify a business problem, scope a research project that explores the problem and carry out the early stages of the project. This project will be continued, finalised and reported on in BUSM 7119 Internship B.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: BUSM 7012
BUSM 7055
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 7119 Internship B (10 Credit Points)
Subject Details (p. 2749)
The Internship capstone is designed for students who want to gain industry experience and further their studies through project-based learning. Internship B is the second of two capstone subjects that require students to undertake a research project in their chosen field whilst attending an industry-based internship. In Internship B students carry finalise the workplace research project begun in BUSM 7118 Internship A and present their findings to an industry and academic audience.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): BUSM 7118
Incompatible Subjects: BUSM 7012
BUSM 7055
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 9001 Higher Degree Research Thesis - Business Management (80 Credit Points)
Subject Details (p. 2749) Legacy Code: 800043
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

BUSM 9002 Higher Degree Research Thesis - Management (80 Credit Points)
Subject Details (p. 2750) Legacy Code: 800041
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

Chemical Sciences (CHEM)

CHEM 0001 Chemistry (WSTC Prep) (10 Credit Points)
Subject Details (p. 2771) Legacy Code: 700043
This subject is a platform to introduce Chemistry to students. It introduces students to the basic concepts required to satisfy the needs of most first year university science subjects in both skill and content areas. It is intended that students will gain a greater understanding of the theoretical concepts covered in the subject by completing the practical component of the subject. Students will also be introduced to professional pathways in science.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: CHEM 0002 - Chemistry (UWSC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

CHEM 0002 Chemistry (WSTC) (10 Credit Points)
Subject Details (p. 2772) Legacy Code: 900024
This subject introduces students to the basic concepts required to satisfy the needs of most first year university science courses in both skill and content areas. It is intended that students will gain a greater understanding of the theoretical concepts covered in the course by completing the practical component of the course. Students will also be introduced to professional pathways in science.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: CHEM 0001 - Chemistry (WSTC Prep)
Restrictions: Please see the Subject Details page for any restrictions for this subject

CHEM 1003 Essential Chemistry 1 (10 Credit Points)
Subject Details (p. 2773) Legacy Code: 300800
This subject provides an introduction to some of the essential knowledge, concepts and skills of chemistry, to serve the needs of students majoring in chemistry and those requiring a working knowledge of chemistry. Observable chemical facts and phenomena including structure, dynamics, and energetics, are explained in terms of current mathematical and visual models and further developed in Essential Chemistry 2. Evidence for chemical understanding is provided using IR spectroscopy, mass spectrometry, and computer molecular modelling. Laboratory skills relate theory to practice through the development of practical skills required to determine the concentration of an analyte using volumetric and spectrophotometric analysis.
Level: Undergraduate Level 1 subject
Equivalent Subjects: CHEM 1001 - Chemistry 1 CHEM 1011 - Principles of Chemistry CHEM 1004 Essential Chemistry 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

CHEM 1004 Essential Chemistry 1 (WSTC) (10 Credit Points)
Subject Details (p. 2774) Legacy Code: 700121
This subject provides an introduction to some of the essential knowledge, concepts and skills of chemistry, to serve the needs of students majoring in chemistry and those requiring a working knowledge of chemistry. Observable chemical facts and phenomena including structure, dynamics, and energetics, are explained in terms of current mathematical and visual models and further developed in Essential Chemistry 2. Evidence for chemical understanding is provided using IR spectroscopy, mass spectrometry, and computer molecular modelling. Laboratory skills relate theory to practice through the development of practical skills required to determine the concentration of an analyte using volumetric and spectrophotometric analysis.
Level: Undergraduate Level 1 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

CHEM 1005 Essential Chemistry 2 (10 Credit Points)
Subject Details (p. 2774) Legacy Code: 300803
This subject introduces an investigation of the reactivity of covalent molecules, in particular, of carbon-based compounds. Focusing on introductory chemical dynamics and thermodynamics, students will develop an in-depth understanding of the structure, nomenclature and reactivity of the principal organic functional groups, extending their basic principles of chemistry. They will also understand how molecules are synthesised and the ways they react being important in the function and role of chemistry in biological systems in our domestic and industrial worlds.
Level: Undergraduate Level 1 subject
Equivalent Subjects: CHEM 1002 - Chemistry 2 CHEM 1010 - Medicinal Chemistry CHEM 1006 - Essential Chemistry 2 (WSTC)
Incompatible Subjects: LGYB 6352 - Biological Chemistry 12D
Restrictions: Please see the Subject Details page for any restrictions for this subject

CHEM 1006 Essential Chemistry 2 (WSTC) (10 Credit Points)
Subject Details (p. 2775) Legacy Code: 700122
This subject introduces an investigation of the reactivity of covalent molecules, in particular, of carbon-based compounds. Focussing on introductory chemical dynamics and thermodynamics, students will develop an in-depth understanding of the structure, nomenclature and reactivity of the principal organic functional groups, extending their basic principles of chemistry. They will also understand how molecules are synthesised and the ways they react being important in the function and role of chemistry in biological systems in our domestic and industrial worlds.

Restrictions: Please see the Subject Details page for any restrictions for this subject

CHEM 1008 Introductory Chemistry (10 Credit Points)
Subject Details (p. 2776) Legacy Code: 300808
The chemical sciences underpin our understanding in the environmental, forensic, health, medical, biological and physical sciences. This subject familiarises students with the fundamental principles of chemistry and how chemistry shapes the world around us. Students will be introduced to the concepts of atomic structure, the reactivity of substances, the Periodic Table, stoichiometry, and will learn about the structure and reactivity of substances and mixtures in different chemical environments, and exposed to different forms of electromagnetic radiation. Students will explore real world problems and apply the fundamental principles of chemistry to better understand how we may shape our own future.
Level: Undergraduate Level 1 subject
Incompatible Subjects: CHEM 1003 Essential Chemistry 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

CHEM 1009 Introductory Chemistry (WSTC) (10 Credit Points)
Subject Details (p. 2777) Legacy Code: 700155
The chemical sciences underpin our understanding in the environmental, forensic, health, medical, biological and physical sciences. This subject familiarises students with the fundamental principles of chemistry and how chemistry shapes the world around us. Students will be introduced to the concepts of atomic structure, the reactivity of substances, the Periodic Table, stoichiometry, and will learn about the structure and reactivity of substances and mixtures in different chemical environments, and exposed to different forms of electromagnetic radiation. Students will explore real world problems and apply the fundamental principles of chemistry to better understand how we may shape our own future.
Level: Undergraduate Level 1 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

CHEM 2001 Analytical Chemistry (10 Credit Points)
Subject Details (p. 2780) Legacy Code: 300832
This subject provides insight into both classical methods of analytical analysis and an introduction to modern instrumental methods of analysis. Specifically, the classical methods of analysis include volumetric and gravimetric methods, while the modern instrumental methods include separation techniques and spectroscopy. The role of spreadsheets in data analysis and presentation is discussed and applied in the laboratory program.
Level: Undergraduate Level 2 subject
Pre-requisite(s): CHEM 1008 Introductory Chemistry
Restrictions: Please see the Subject Details page for any restrictions for this subject

CHEM 2006 Inorganic Chemistry (10 Credit Points)
Subject Details (p. 2781) Legacy Code: 300899
This subject introduces students to a thorough study of coordination chemistry (discussing complexes, ligands, structure, isomerism, stability, reaction mechanisms, oxidation states, elements in the first transition series, coordination chemistry in biological systems). The subject then moves on to areas of fundamental inorganic chemistry, including bonding, and solid state chemistry. Advanced Modules cover the following topics: spectroscopy in coordination complexes, physiology and inorganic chemistry, and medicinal inorganic chemistry. This subject also introduces many of the laboratory techniques and equipment that are used in synthetic procedures in coordination chemistry.
Level: Undergraduate Level 2 subject
Pre-requisite(s): CHEM 1008 Introductory Chemistry
Restrictions: Please see the Subject Details page for any restrictions for this subject

CHEM 2008 Organic Chemistry (10 Credit Points)
Subject Details (p. 2782) Legacy Code: 300876
Organic molecules are at the heart of the chemistry of life and industry. This subject builds on the fundamental chemical principles, exploring reaction mechanisms and the concept of reactivity and stereo- and regio-selectivity of many of the central reactions that form the basis of living processes, modern research, and contemporary industrial transformations. The subject contains a problem-based module on the application of spectroscopic methods to organic structure elucidation, focusing on spectroscopic data and a practical section on organic synthesis. The subject will focus on complex organic molecules including biologically relevant molecules, and examples from chemical industries, medicinal and pharmaceutical industries.
Level: Undergraduate Level 2 subject
Pre-requisite(s): CHEM 1012 Essential Chemistry
Restrictions: Please see the Subject Details page for any restrictions for this subject

CHEM 2010 Physical Chemistry (10 Credit Points)
Subject Details (p. 2783) Legacy Code: 300849
Physical Chemistry describes the fundamentals of energy changes in chemical systems (thermodynamics), the rates and mechanisms of chemical reactions (kinetics), and electrochemistry and/or ion and electron transport. These concepts will be applied to a range of chemical and/or biochemical processes. A major focus of the subject will be to develop the ability to study quantitative chemical/biochemical problems, and develop useful physical chemistry experimental and data-analysis skills.
Level: Undergraduate Level 2 subject
Pre-requisite(s): CHEM 1008 Introductory Chemistry
Restrictions: Please see the Subject Details page for any restrictions for this subject

CHEM 3001 Advanced Analytical Chemistry (10 Credit Points)
Subject Details (p. 2784) Legacy Code: 300925
This subject builds on Analytical Chemistry 2 and focuses more on instrumental analysis, isolation and cleanup techniques and aspects of quality control and quality assurance in an analytical laboratory and in manufacturing are discussed. The instrumental methods covered include atomic spectroscopy (for example, atomic absorption and emission, x-ray fluorescence), molecular spectroscopy (for example, UV-Vis, IR, fluorometry, mass spectrometry), chromatography, electrochemistry, thermal methods and automated methods. The theory of the instrumental methods, their construction, operation and applications are covered. The theory and application of isolation and cleanup techniques in inorganic and organic residue analysis are given.
Level: Undergraduate Level 3 subject
Pre-requisite(s): CHEM 2001
Equivalent Subjects: CHEM 3006 - Analytical Chemistry 3 CHEM 3002 - Advanced Chemical Analysis
Restrictions: Please see the Subject Details page for any restrictions for this subject

CHEM 3003 Advanced Inorganic Chemistry (10 Credit Points)
Subject Details (p. 2785) Legacy Code: 300907
Building on the foundations laid in Inorganic Chemistry, this subject focuses on structure and bonding in inorganic chemistry, and the stereochemistry of coordination complexes. Spectroscopic and magnetic properties of inorganic compounds are evaluated as a consequence of structure and bonding, and an introduction to X-ray methods for structure determination is given. Kinetics and mechanism of inorganic reactions are examined, and the area of bioinorganic chemistry is developed. Unique structures and reactions of organotransition metal chemistry are explored. Advanced Modules cover aqueous chemistry of cations and oxyanions, inorganic materials, molecular orbital theory in coordination complexes, group theory; lanthanides and actinides.
Level: Undergraduate Level 3 subject
Pre-requisite(s): CHEM 2004 OR
CHEM 2007 OR
CHEM 2006
Equivalent Subjects: LGYB 9729 - Inorganic Chemistry 3 CHEM 3011 - Inorganic Chemistry 3 LGYA 6134 - Advanced Inorganic Chemistry
Restrictions: Please see the Subject Details page for any restrictions for this subject

CHEM 3004 Advanced Organic Chemistry (10 Credit Points)
Subject Details (p. 2786) Legacy Code: 300906
This subject builds on the reactions learnt in the subject Organic Chemistry, extending the range of C-C bond forming reactions to include the most significant in modern synthesis. In the second stage students learn to develop multistep synthetic strategies to produce target molecules using their level 2 organic chemistry and the reactions above. Structural analysis by mass spectroscopy and more advanced NMR techniques is also investigated. The students use this chemistry in a lab course designed to highlight a number of these concepts (including the synthesis of 2 pharmaceutical compounds and a team experiment) and to extend their range of practical skills.
Level: Undergraduate Level 3 subject
Pre-requisite(s): CHEM 2008
Equivalent Subjects: LGYA 6141 - Drug Design and Synthesis CHEM 3013 - Organic Chemistry 3
Restrictions: Please see the Subject Details page for any restrictions for this subject

CHEM 3005 Advanced Physical Chemistry (10 Credit Points)
Subject Details (p. 2787) Legacy Code: 300926
Advanced Physical Chemistry builds on the fundamental principals of energy changes in systems (thermodynamics), and the rates and mechanisms of reactions (kinetics) learnt in Physical Chemistry and extends this so that students gain an understanding of more advanced topics in this field of chemistry such as polymers, colloids, surfaces, quantum principles and spectroscopy. This subject also will strengthen student's problem solving skills in quantitative chemical analysis, develop experimental techniques and advanced data-analysis skills.
Level: Undergraduate Level 3 subject
Pre-requisite(s): CHEM 2010
Equivalent Subjects: CHEM 3015 - Physical Chemistry 3
Restrictions: Please see the Subject Details page for any restrictions for this subject

CHEM 3008 Biodevices (10 Credit Points)
Subject Details (p. 2788) Legacy Code: 300890
This subject replaces 300414 - Biodevices from Autumn 2014. The subject will investigate nature's nanomachines; lipids, DNA and proteins. The students will learn how only a few basic building blocks can self-assemble into more complex structures, which in turn self-assemble into more complex hierarchical structures from which one can build biodevices. These fascinating self-organising supramolecular structures generally involve some kind of non-covalent binding. Particular emphasis is placed on the underlying principles that govern the functioning of such machines and some coverage of the modelling of such processes using techniques such as statistical thermodynamics is given. Biological computing is also covered.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 6025 - Biodevices
Restrictions: Please see the Subject Details page for any restrictions for this subject

CHEM 3010 Forensic Chemistry (10 Credit Points)
Subject Details (p. 2789) Legacy Code: 300868
This subject extends the student's knowledge and understanding of chemical topics that are relevant to forensic investigations, and provides a deeper understanding of the underlying chemical and physical principles. Topics are taught in the context of the correct principles and procedures for collecting and conserving evidence, and the safe handling of chemical substances. Topics include an extended range of modern chemical instrumentation; the chemistry and analysis of various classes of drugs; clandestine drug laboratories; fire, arson and accelerants; explosions and explosives; and various forms of trace evidence (including textile fibres, glass and paint).
Level: Undergraduate Level 3 subject
Pre-requisite(s): NATS 2019 Forensic and Environmental Analysis
Restrictions: Please see the Subject Details page for any restrictions for this subject

CHEM 3012 Nanochemistry (10 Credit Points)
Subject Details (p. 2790) Legacy Code: 300895
The subject covers basic theory of surface chemistry, latest technologies of surface depositions and industrial and commercial applications of nanomaterials and nanopowders. Upon successful completion, the students will achieve an in-depth understanding of techniques of preparation of nanomaterials and nanopowders that includes plasma arching, chemical vapour deposition, electrodeposition, sol-gel synthesis, ball milling and the use of natural particles. Technical aspects of process control on the microstructure and properties of coatings will be discussed. Case studies of applications of nanopowders and nanomaterials such as biomedical implants, insulators, high power magnets, molecular sieves, supercomputers, jet engines and other industrial applications will be pursued.
Level: Undergraduate Level 3 subject
Pre-requisite(s): CHEM 1003
Equivalent Subjects: LGYA 6162 - Nanochemistry LGYA 6030 - Nanopowders and Nanomaterials
Restrictions: Please see the Subject Details page for any restrictions for this subject

CHEM 3014 Pharmacological Chemistry (10 Credit Points)
Subject Details (p. 2790) Legacy Code: 300920
This subject is aimed at undergraduates with grounding in chemistry and biochemistry who have an interest in a career related to medicinal chemistry. Because it concerns the manner in which foreign molecules can interact with the body's mechanisms it is of direct relevance not only to the pharmaceutical industry but also to the food, agricultural, cosmetic (etc) industries. It conveys the fascination of designing chemical structures for particular uses within biological systems and which overlap the disciplines of chemistry, biochemistry, cell biology and pharmacology. Emphasis is placed upon design of the chemical structure itself rather than an investigation of the specific chemical structure of its site of action in the body. This is reflected in the laboratory work which traces the historical development of drug design, essentially through a process of a series of inorganic syntheses, relevant to a range of common drugs.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 5935 - Pharmacological Chemistry
Restrictions: Please see the Subject Details page for any restrictions for this subject

CHEM 9001 Higher Degree Research Thesis - Functional Genomics (80 Credit Points)
Subject Details (p. 2791) Legacy Code: 800144
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CHEM 9002 Higher Degree Research Thesis - Nanotechnology (80 Credit Points)
Subject Details (p. 2792) Legacy Code: 800142
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CHEM 9003 Higher Degree Research Thesis - Chemical Sciences (80 Credit Points)
Subject Details (p. 2793) Legacy Code: 800075
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CHEM 9004 Higher Degree Research Thesis - Chemistry (80 Credit Points)
Subject Details (p. 2793) Legacy Code: 800132
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CHEM 9005 Higher Degree Research Thesis - Forensics (80 Credit Points)
Subject Details (p. 2794) Legacy Code: 800158
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

Civil Engineering (CIVL)

CIVL 1001 Surveying for Engineers (10 Credit Points)
Subject Details (p. 2795) Legacy Code: 300738
This is a core subject which provides students with basic skills that are required to carry-out Surveying. After the completion of this subject, students will be able to carry-out required preliminary surveying for most of the civil and construction engineering projects. This subject will also serve as a foundation for most of the subjects that follow in the course.
Level: Undergraduate Level 1 subject
Pre-requisite(s): MATH 1016
Equivalent Subjects: CIVL 1002 - Surveying for Engineering CIVL 1003 - Surveying for Engineers (WSTC AssocD)
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 1003 Surveying for Engineers (WSTC AssocD) (10 Credit Points)
Subject Details (p. 2796) Legacy Code: 700120
This subject provides students with basic skills that are required to carry out surveying. After the completion of this subject, students will be able to carry out required preliminary surveying for most of the civil and construction engineering projects. Offerings of alternate subjects are dependent on there being sufficient student enrolment numbers. If enrolments are low, the College may cancel delivery of the alternate subject.0
Level: Undergraduate Level 1 subject
Equivalent Subjects: CIVL 1001 - Surveying for Engineers
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 2002 Environmental Engineering (10 Credit Points)
Subject Details (p. 2797) Legacy Code: 300737
This subject teaches the fundamental theory and methods of environmental engineering required for students studying civil engineering and other disciplines. Students will explore a wide range of issues including water quality and treatment, waste management, and air and noise pollution in order to solve environmental issues in a sustainable manner. To provide experience in real world professional applications of their learning students will generate a portfolio in addition to participating in a group project, labs and a field trip.
Level: Undergraduate Level 2 subject
Equivalent Subjects: CIVL 4006 - Environmental Engineering
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 2003 Fluid Mechanics (10 Credit Points)
Subject Details (p. 2798) Legacy Code: 300762
This subject provides a basic understanding of fluid mechanics principles. Fluid mechanics is the study of the properties and movements of fluids, and key to understanding many of our engineering systems involving fluids, such as power generation, lubrication, irrigation and navigation. While the main focus is on incompressible fluids, effects of compressible fluids are also discussed. The theories learned in classes are reinforced in laboratory sessions. Students analyse fluid systems and apply principles in designing basic pipes and open-channels.
Level: Undergraduate Level 2 subject
Pre-requisite(s): MATH 1016 AND
ENGR 1011 OR
ENGR 1028
Equivalent Subjects: CIVL 2015 - Water Engineering CIVL 2004 - Fluid Mechanics (WSTC Assoc Deg)
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 2004 Fluid Mechanics (WSTC AssocD) (10 Credit Points)
Subject Details (p. 2799) Legacy Code: 700111
The subject provides a basic understanding of fluid mechanics principles. While the main focus will remain on incompressible fluids, effects of compressible fluids will also be discussed. The theories learned in classes will be reinforced in laboratory sessions.Offerings of alternate subjects are dependent on there being sufficient student enrolment numbers. If enrolments are low, the College may cancel delivery of the alternate subject.
Level: Undergraduate Level 2 subject
Pre-requisite(s): MATH 1017 AND
ENGR 1012
Equivalent Subjects: CIVL 2003 - Fluid Mechanics
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 2007 Introduction to Structural Engineering (10 Credit Points)
Subject Details (p. 2800) Legacy Code: 300733
This subject covers the basic concepts in analysing and designing simple structural members. It consists of the fundamentals of structural analysis, concrete structures and steel structures
Level: Undergraduate Level 2 subject
Pre-requisite(s): MECH 2003
Equivalent Subjects: CIVL 2006 - Introduction to Structural Engineering CIVL 2008 - Introduction to Structural Engineering (WSTC Assoc Deg)
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 2008 Introduction to Structural Engineering (WSTC AssocD) (10 Credit Points)
Subject Details (p. 2800) Legacy Code: 700115
This subject covers the basic concepts in analysing and designing simple structural members. It consists of the fundamentals of structural analysis, concrete structures and steel structures.Offerings of alternate subjects are dependent on there being sufficient student enrolment numbers. If enrolments are low, the College may cancel delivery of the alternate subject.
Level: Undergraduate Level 2 subject
Pre-requisite(s): MECH 2004
Equivalent Subjects: CIVL 2007 - Introduction to Structural Engineering
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 2012 Soil Mechanics (10 Credit Points)
Subject Details (p. 2801) Legacy Code: 300985
This is an introductory subject covering the use of soil, and the water in it, as an engineering material. It will provide students with a basic understanding of the physical and mechanical properties of soils, simple soil testing methods to characterise soil strength and deformation behaviour, and how to apply basic techniques to assess the hydro-mechanical response of soils subjected to loading.
Level: Undergraduate Level 2 subject
Pre-requisite(s): MATH 1016
Equivalent Subjects: CIVL 2011 - Soil Engineering CIVL 2013 - Soil Mechanics (WSTC AssocD)
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 2013 Soil Mechanics (WSTC AssocD) (10 Credit Points)
Subject Details (p. 2802) Legacy Code: 700245
This subject is an introductory subject covering the use of soil, and the water in it, as an engineering material. It will provide students with a basic understanding of the physical and mechanical properties of soils, simple soil testing methods to characterise soil strength and deformation behaviour and how to apply basic techniques to assess the hydro-mechanical response of soils subjected to loading.Offerings of alternate subjects are dependent on there being sufficient student enrolment numbers. If enrolments are low, the College may cancel delivery of the alternate subject.
Level: Undergraduate Level 2 subject
Pre-requisite(s): MATH 1017
Equivalent Subjects: CIVL 2011 - Soil Engineering CIVL 2012 - Soil Mechanics
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 2016 Civil and Substructure (10 Credit Points)
Subject Details (p. 2803) Legacy Code: 301220
This subject provides an overview of civil construction and associated sub-structure works comprising footings, pilings and slabs and the high costs associated with these elements. Through site surveys, site assessments and design proposals students will apply their developing understanding of bulk excavation, site drainage, service mains (electricity, gas, water, sewerage, data), roads and retaining walls to real world examples. Students will also examine public infrastructure such as ports, tunnels, bridges and highways to deepen their knowledge base. Additionally, in order to further understand the high costs involved in sub structure works, students will learn to identify problems faced on sites including rock, chemically-aggressive soils and water-logged sites.
Level: Undergraduate Level 2 subject
Pre-requisite(s): BLDG 1017 OR
BLDG 1014
Co-requisite(s): BLDG 1018 OR
BLDG 1015
Equivalent Subjects: CIVL 2001 Construction Technology 1 (Civil)

BLDG 2007 Construction Technology 2 (Sub-structure)
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 2017 Sustainable Construction Materials (10 Credit Points)
Subject Details (p. 2803) Legacy Code: 301399
This subject focusses on the suitability for purpose (performance, durability, sustainability and standards and regulatory compliance) of building and construction materials. Students investigate the physical properties and behaviour of various timbers, metals, concretes, polymers, new materials and composite systems, and their durability within Australia's diverse environments. Students also consider sustainable and eco-friendly construction materials in life-cycle assessment of construction systems and materials selection at the design stage.
Level: Undergraduate Level 2 subject
Incompatible Subjects: CIVL 2009 - Material Science in Construction
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 2018 Water Supply Systems Design (10 Credit Points)
Subject Details (p. 2804) Legacy Code: 301424
In this subject students will examine the quality of water and the standards to be met for the supply of water that is fit for its intended use. The design of treatment processes to meet these standards as well as principles underlying the hydraulic design of the treatment systems are examined in the context of both urban and remote rural communities. Students will also explore alternative supply systems and their merits and demerits, including economic viability, in order to gain design and analysis skills with respect to various water supply systems.
Level: Undergraduate Level 2 subject
Pre-requisite(s): CIVL 2002 OR
ENGR 1050 AND
CIVL 2003
Co-requisite(s): CIVL 3011
Equivalent Subjects: CIVL 4014 Water and Wastewater Treatment
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 3002 Concrete Structures (UG) (10 Credit Points)
Subject Details (p. 2805) Legacy Code: 300736
This subject covers the basic elements of structural behaviour and design with reinforced and pre-stressed concrete. Students will learn to analyse the section capacity of reinforced concrete beams, slabs, and columns, and design simple suspended structures. The subject places a strong emphasis on the process of structural design.
Level: Undergraduate Level 3 subject
Pre-requisite(s): CIVL 2007
Co-requisite(s): CIVL 3014
Equivalent Subjects: CIVL 3001 - Concrete Structures (UG)
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 3003 Construction Planning (10 Credit Points)
Subject Details (p. 2806) Legacy Code: 300728
This subject is intended to provide students with the ability to organise the resources required for a major construction project; to plan the sequence and timing of construction operations; and to assess the risk inherent in achieving a construction schedule.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BLDG 1005 OR
GEOM 2001 OR
BLDG 2002
Equivalent Subjects: BLDG 3005 - Construction Planning
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 3007 Engineering Geomechanics (10 Credit Points)
Subject Details (p. 2807) Legacy Code: 301001
This subject will present the application of principles of soil mechanics to the solution of foundation and geotechnical problems including the evaluation of allowable bearing capacity of shallow and pile foundations, the stability of earth retaining structures and the stability of slopes.
Level: Undergraduate Level 3 subject
Pre-requisite(s): CIVL 3014 AND
CIVL 2012 OR
CIVL 2011
Equivalent Subjects: CIVL 3008 - Foundation Engineering
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 3010 Highway Infrastructure (10 Credit Points)
Subject Details (p. 2808) Legacy Code: 300988
This subject focuses on two key aspects of highway infrastructure design, namely, the bridge superstructure design and the foundation soil preparation prior to construction of the highway pavement. It aims to provide students with specialised knowledge in bridge loading and structural design, methods to deal with soft and weak grounds, and building of earth embankments to support the highway pavement. These aspects will be discussed in relation to Australian design codes.
Level: Undergraduate Level 3 subject
Pre-requisite(s): CIVL 2007 AND
CIVL 2012
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 3011 Hydraulics (10 Credit Points)
Subject Details (p. 2808) Legacy Code: 300765
The subject covers the principles of open channel hydraulics, pipe hydraulics and culvert hydraulics. Specific topics in open channel hydraulics include uniform flow, resistance equations, specific energy principle, flow types, gradually varied flow and rapidly varied flow. The purpose is to enable design of efficient open channels to meet engineering requirements. In addition, principles of pipe and culvert hydraulics are introduced, enabling analysis and design of pipe networks and culverts.
Level: Undergraduate Level 3 subject
Pre-requisite(s): CIVL 2003
Equivalent Subjects: -
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 3012 Steel Structures (10 Credit Points)
Subject Details (p. 2809) Legacy Code: 300730
This subject covers the basic behaviour of steel members and structures, the appropriate methods to analyse them and the design criteria and methods used to proportion them.
Level: Undergraduate Level 3 subject
Pre-requisite(s): CIVL 2007
Co-requisite(s): CIVL 3014
Equivalent Subjects: CIVL 3013 - Steel Structures
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 3014 Structural Analysis (10 Credit Points)
Subject Details (p. 2810) Legacy Code: 300732
This subject introduces students to the aspects of structural analysis of trusses, beams and frames. It covers the first-order elastic analysis of statically determinate and indeterminate structures. This course aims to teach students to master basic skills in structural analysis as well as skills in using computer software to analyse complex structures.
Level: Undergraduate Level 3 subject
Pre-requisite(s): CIVL 2007
Equivalent Subjects: CIVL 3015 - Structural Analysis
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 3016 Building Superstructure (10 Credit Points)
Subject Details (p. 2811) Legacy Code: 301221
The aim of this subject is to provide students with an understanding of the factors that contribute to the design and construction of a building superstructure. Students will be introduced to relevant Australian Standards for common construction materials and practices. The subject also aims to develop the ability of construction students to communicate professionally with other building professionals including structural engineers. Emphasis will be given to the strength, behaviour and failure of structural members, connections and frames.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BLDG 1017 or
BLDG 1014
Co-requisite(s): CIVL2016
Equivalent Subjects: CIVL3004
CIVL3005
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 3017 Construction Scheduling (10 Credit Points)
Subject Details (p. 2812) Legacy Code: 301230
This subject is intended to provide students with the skills and ability to organise the resources required for a major construction project, to plan the sequence and timing of construction operations, and to assess the risk inherent in achieving a construction schedule.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BLDG 1005 OR
BLDG 1014 OR
GEOM 2001 OR
BLDG 2002
Equivalent Subjects: BLDG 3005 Construction Planning
CIVL 3003 Construction Planning
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 3018 Hydrogeology (10 Credit Points)
Subject Details (p. 2812) Legacy Code: 301397
This subject covers principles of hydrogeology. It contains concepts related to occurrence of groundwater, groundwater movement, groundwater hydraulics, water wells, quality of groundwater, groundwater modelling and groundwater management. The objectives of this subject are to enable students to learn the concept of groundwater and apply the learnt concepts in solving groundwater problems in engineering practice.
Level: Undergraduate Level 3 subject
Pre-requisite(s): CIVL 2003
Equivalent Subjects: EART 3004 - Hydrogeology
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 3019 Wastewater Systems Design (10 Credit Points)
Subject Details (p. 2813) Legacy Code: 301426
Providing clean water and sanitation is one of the United Nations Sustainable Development Goals. Students will gain knowledge and skills in designing and proposing modifications to current wastewater and sanitation practices. Students will examine conventional processes and explore how they should be modified to address emerging issues (contaminants, climate variability) and how the potential of wastewater as a resource can be realised. Students will also identify various ways smart technologies can be adopted in addressing the challenges facing wastewater disposal/resource recovery.
Level: Undergraduate Level 3 subject
Pre-requisite(s): CIVL 2003 AND
CIVL 2002 OR
ENGR 1050 OR
PROC 1006
Equivalent Subjects: CIVL 4014 - Water and Wastewater Treatment
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 3020 Sustainable Waste Engineering (10 Credit Points)
Subject Details (p. 2814) Legacy Code: 301422
Sustainable waste management is an important consideration for any student who is training to become an engineer, as waste is produced in all engineering fields. In this subject students will identify and characterise sources of solid and hazardous waste generated in the community. The application of circular economy and zero waste principles are examined alongside real-world case studies to focus on sustainable management of waste incorporating minimisation, recycle, recovery and disposable options.
Level: Undergraduate Level 3 subject
Equivalent Subjects: CIVL 4011 Waste Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 3021 Bridge Engineering Design (10 Credit Points)
Subject Details (p. 2815)
This subject focuses on one key aspect of bridge engineering design, namely, the bridge superstructure design. It aims to provide students with specialised knowledge in bridge loading, the types of possible loads, calculation of ultimate load combinations and investigate the different sizes for the beams (girders) of simple bridge design and structural design. These aspects will be discussed in relation to Australian design codes to prepare students for roles such as design engineer or analyst. Furthermore, this subject will involve industry guest speakers, with state of the art engineering design, who will be able to review and contribute to the assessment tasks.
Level: Undergraduate Level 3 subject
Pre-requisite(s): CIVL 3002 Concrete Structures (UG)
CIVL 3012 Steel Structures
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 3022 Bridge Embankment Design (10 Credit Points)
Subject Details (p. 2815)
This subject focuses on the design of a real-world highway bridge approach embankment on soft ground. It aims to provide students with specialised knowledge covering ground improvement to support the approach embankment, characterisation of the foundation soil based on real site investigation data, loading combinations, settlement and stability considerations. The design will be taught with reference to relevant Australian and international design codes adopted by Australian industry. Industry speakers will be invited to provide industry perspective and insights of embankment design. The knowledge and skills developed in this subject will prepare students for roles as geotechnical design engineers.
Level: Undergraduate Level 3 subject
Pre-requisite(s): CIVL 2012 Soil Mechanics
AND
ENGR 2016 Pavement Materials and Design
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 4001 Applied Mechanics (10 Credit Points)
Subject Details (p. 2816) Legacy Code: 300986
Applied mechanics deals with the mechanical responses of structural components under various loading and support conditions. This subject will introduce the theoretical foundations and solution methods for the stability and dynamic responses of beams, columns and plates and their associated applications in engineering practices.
Level: Undergraduate Level 4 subject
Pre-requisite(s): CIVL 3014
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 4002 Composite Structures (10 Credit Points)
Subject Details (p. 2817) Legacy Code: 300987
This subject builds on knowledge gained in steel and concrete structures, especially the design of structural members using either steel or concrete. Students will learn the design of composite beams, floors, columns and connections based on Australian and International standards as well as mechanics of materials.
Level: Undergraduate Level 4 subject
Pre-requisite(s): CIVL 3012 AND
CIVL 3002
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 4003 Construction Technology 5 (Envelope) (10 Credit Points)
Subject Details (p. 2817) Legacy Code: 200471
After undertaking this unit, you should understand the way internal spaces are designed and constructed to optimise thermal, visual and acoustic comfort and for energy efficiency.
Level: Undergraduate Level 4 subject
Co-requisite(s): Students in 2607 Bachelor of Construction Management must enrol in BLDG 4012 Industry Based Learning before enrolling in this unit
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 4004 Construction Technology 6 (Services) (10 Credit Points)
Subject Details (p. 2818) Legacy Code: 300725
To provide students with a vehicle to develop knowledge and skills needed to comprehend the design of services in major buildings, and in so doing engender a life-long interpretation of the intricacies of physical installation and their critical sequence in the construction process.
Level: Undergraduate Level 4 subject
Equivalent Subjects: LGYB 5400 Construction Technology 6 (Services)
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 4008 Pile Foundations (10 Credit Points)
Subject Details (p. 2819) Legacy Code: 300990
This subject covers analysis and design criteria for pile foundations subjected to axial, lateral and dynamic loading based on the Australian Standards. Computer software necessary to carry out analysis and design will be introduced. Also field testing methods available for pile integrity testing will be discussed.
Level: Undergraduate Level 4 subject
Pre-requisite(s): CIVL 3007 OR
CIVL 3008
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 4009 Timber Structures (UG) (10 Credit Points)
Subject Details (p. 2820) Legacy Code: 300739
Students learn about the engineering properties of timber and assess it as a construction material. Design methods based on structural mechanics are covered including the design of members and connections.
Level: Undergraduate Level 4 subject
Pre-requisite(s): CIVL 2007
Co-requisite(s): CIVL 3014
Equivalent Subjects: LGYB 1031 - Timber Structures (UG)
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 4010 Transportation Engineering (10 Credit Points)
Subject Details (p. 2820) Legacy Code: 300982
This subject provides students with the course material that will assist them with the execution of Civil Engineering Construction and Urban Development / Town Planning projects. The subject mainly focuses on the planning, design and construction of transportation facilities for urban and rural areas. Students will have an opportunity to implement the skills learnt using a case of a subdivision development.
Level: Undergraduate Level 4 subject
Pre-requisite(s): CIVL 1001 AND
ENGR 2016 AND
EART 4001
Incompatible Subjects: CIVL 2005 - Infrastructure Engineering
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 4011 Waste Management (10 Credit Points)
Subject Details (p. 2821) Legacy Code: 300994
Sustainable waste management, to reduce climate impact, is an important consideration for any student who is getting trained as an engineer. In this subject students will identify and characterise sources of atmospheric, solid and hazardous waste generated from the community. Students will then focus on sustainable management of waste incorporating minimisation, recycle, recovery and disposable options as well as greenhouse gases and their impact on climate change.
Level: Undergraduate Level 4 subject
Pre-requisite(s): CIVL 2002
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 4012 Water Resource Engineering (10 Credit Points)
Subject Details (p. 2822) Legacy Code: 300993
This subject introduces optimisation theories applicable to water resources projects. The subject applies different optimisation models to select the best option available. Engineering economic theories specifically applicable to water resources projects are also discussed.
Level: Undergraduate Level 4 subject
Pre-requisite(s): CIVL 3011
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 4015 Complex Building Project (10 Credit Points)
Subject Details (p. 2823) Legacy Code: 301232
This subject enables students to integrate and develop knowledge gained earlier in the course allowing them to simulate industry practice. Students are given a brief to undertake large and complex construction projects (eg. high rise buildings, airport construction, or sports stadium construction). They then take account of regulatory control, financial limitations, and stakeholder impacts whilst managing a team and being flexible and responsive to changing demands.
Level: Undergraduate Level 4 subject
Co-requisite(s): BLDG 4012
Equivalent Subjects: LGYB 5402 Building in Practice 3
CIVL 4005 Construction in Practice 3
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 4016 Envelope and Services (10 Credit Points)
Subject Details (p. 2823) Legacy Code: 301222
The building envelope and its inter-relationship with building services are critical to the successful functioning of our modern built environment. In this subject students will learn how to minimise operational energy requirements by making good choices in terms of materials and systems which focus on end-user needs. Measurement of building performance and continuous improvement is addressed alongside compliance with building codes and relevant Australian standards.
Level: Undergraduate Level 4 subject
Equivalent Subjects: CIVL 4003 Construction Technology 5 (Envelope)
CIVL 4004 Construction Technology 6 (Services)
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 4017 Surface Water Hydrology (10 Credit Points)
Subject Details (p. 2824) Legacy Code: 301329
Surface water hydrology covers the principles of hydrology as it pertains to surface water component of the hydrologic cycle. The principal focus is on the relationship between rainfall and surface runoff. The extent of flooding resulting from storm events will be evaluated through floodplain delineation process. Successful completion of this subject provides the competencies required to propose sustainable engineering solutions to potential adverse impacts of land-use changes. This subject builds on the hydraulic concepts acquired from the subjects completed earlier.
Level: Undergraduate Level 4 subject
Pre-requisite(s): CIVL 3011
Equivalent Subjects: CIVL 4007 - Hydrology EART 4001 - Surface Water Hydrology
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 4018 Building Design Project 1 (Honours) (20 Credit Points)
Subject Details (p. 2825) Legacy Code: 301101
In this subject, students who have a record of superior performance in the Building Design Management program, will source a suitable design project at their own initiative, to complete as a capstone work which illustrates the skills they have developed throughout their study program. The project will contain a high level of complexity exceeding that of previous building designs produced in the program. Both the complexity level and the number of design constraints will distinguish the project undertaken for this subject from the non-honours stream subject. Diverse stakeholder input on the project's impact will be gathered and assessed. The design solution generated will show mastery of complex design problems which integrate technical knowledge with economic and social responsibility. Superior skill in resolving design conflicts will be demonstrated.
Level: Undergraduate Level 4 subject
Pre-requisite(s): BLDG 3001
Incompatible Subjects: BLDG 4001 Building Design Project 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 4019 Building Design Project 2 (Honours) (20 Credit Points)
Subject Details (p. 2825) Legacy Code: 301102
In this subject, students who have a record of superior performance in the program will continue to develop the design solution they created in Building Design Project 1 (Honours) into a fully resolved CAD model suitable for costing, scheduling and contracting. Construction Certificate documentation of professional standard will be generated. Both the complexity level and the number of design constraints will distinguish the project undertaken for this subject from the non-honours stream subject. Diverse stakeholder input on the projects impact will be gathered and assessed. Complex constraints relating to buildability and efficient project delivery will be resolved. Strict budgetary constraints will be imposed and students will be expected to demonstrate a capacity to use lateral thinking and generate creative solutions in response to problematic situations which arise during project delivery but which were unknown at project commencement.
Level: Undergraduate Level 4 subject
Pre-requisite(s): CIVL 4018
Incompatible Subjects: BLDG 4002 Building Design Project 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 4020 Construction Research Project (20 Credit Points)
Subject Details (p. 2826) Legacy Code: 301223
In this subject, students will undertake practical research into identified technical, managerial or economic problems in the construction industry. Students are required to undertake these industry-based research projects and produce an individual final report plus a 15 minute presentation.
Level: Undergraduate Level 4 subject
Pre-requisite(s): BLDG 4010
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 4021 Sustainable Waste Engineering
Subject Details (p. 2827)
This subject explores the application of circular economy and zero waste principles alongside real-world case studies to focus on sustainable management of waste. Through a real-world design challenge students will apply learning to propose sustainable solutions that incorporate minimisation, recycling, recovery and disposable options. The skills and knowledge acquired in this subject can be applied to many career pathways including Engineering, Built Environment, and Science related disciplines.
Level: Undergraduate Level 4 subject
Equivalent Subjects: CIVL 4011
CIVL 3020
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 5001 Building Engineering (10 Credit Points)
Subject Details (p. 2827)
This subject provides students with an understanding of the factors that contribute to decisions in building design, particularly compliance with the National Construction Code and related standards. Students apply their learning to real world contexts as they integrate the construction codes, standards and engineering structural principles to building engineering. Students build their skillset to assess the structural performance acceptability of buildings.
Level: Postgraduate Coursework Level 5 subject
Equivalent Subjects: CIVL 7011 - Building Engineering
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 7001 Advanced Applied Mechanics (10 Credit Points)
Subject Details (p. 2828) Legacy Code: 301010
Applied mechanics deals with the mechanical responses of structural components under various loading and support conditions. This subject will introduce the theory of elasticity and study the bending, buckling and vibration behaviours of beams, plates and shells and their associated applications in engineering practices.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 7002 Advanced Composite Structures (10 Credit Points)
Subject Details (p. 2829) Legacy Code: 301008
This subject enables students to gain an in-depth knowledge into composite structures based on Australian Standards and International Standards. Recent advances in the design of composite beams, slabs, columns and connections will be introduced.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 7003 Advanced Geotechnical Engineering (10 Credit Points)
Subject Details (p. 2829) Legacy Code: 300604
This subject will provide an overview of soil mechanics concepts required for the solution of practical geotechnical engineering problems. Students will be taught soil and foundation analysis including design techniques. The topics will cover shallow foundations, pile foundations, the stability of earth retaining structures, excavations, soft soils, groundwater flow and stability of slopes. Practical engineering cases will be emphasized.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 6113 - Foundation Engineering (PG)
