Description This subject focuses on the principles and practice of health service management. The subject draws on material from different settings to consider governance, policy, and strategic planning. Students will critique health system reforms, including those that aim to address healthcare inequity. The role of politics and policy will be discussed to clarify the impact on health service management. The subject will explore how health service operations are managed and how performance and outcomes are measured. Students will also explore how patients, carers, and other stakeholders shape health service management.

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) PUBH 7031

Equivalent Subjects HLTH 7007 Health Workforce Planning

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critique health service management processes to clarify how to improve workplace processes and organisational culture
2. Distinguish leadership and management skills, particularly the different approaches that are appropriate for individual circumstances
3. Translate data and information into policy and practice
4. Develop a change management plan
5. Effectively communicate to different audiences through verbal and written reports and presentations

Subject Content

1.The relationships between health service management, leadership, organisational culture, politics, and policy
3.Health service management in the public, private, and not-for-profit sectors
4.Strategic planning, including workforce planning, human resources, and resource management
5.Patient, carer, and public engagement
6.Governance and accountability
7.Measuring and managing impact

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Report	1,250 words	25	N	Individual
Report	1,000 words	35	N	Individual
Professional Task	10 minutes plus 1500 words	40	N	Individual

HLTH 7023 Advanced Sport and Exercise Science

Credit Points 20

Legacy Code 401414

Coordinator Simon Green (https://directory.westernsydney.edu.au/search/name/Simon Green/)

Description Please note, subject 401291.1 Advanced Sport and Exercise Science replaced by 401414.1 Advanced Sport and Exercise Science from 2020.This subject provides Bachelor of Research Studies/Masters of Research candidates with an interest in Sport & Exercise Science with an opportunity to further their knowledge and skill-sets in the field. Working closely with their assigned supervisor(s), students will prepare a work-plan to further enhance their theoretical knowledge through a combination of independent and guided-study. The subject will provide students with an opportunity to strengthen their knowledge and expertise in their selected field of Sport & Exercise Science. The subject is focused on the development of discipline-specific knowledge (theoretical and practical) to prepare students for their research thesis and future career in a Sport & Exercise Science related field.

School Health Sciences

Discipline Human Movement

Student Contribution Band HECS Band 4 20cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 8083 - Bachelor of Research Studies/Masters of Research

Assumed Knowledge

Students to have completed an undergraduate degree in Sport and Exercise Science or other closely related Health, Allied Health or Medical Science/Medicine undergraduate equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Plan, execute and evaluate two programs (learning contracts) of self-directed learning.
2. Develop and demonstrate sound knowledge and understanding of theory and practice in a chosen topic in Sports and Exercise Science.
3. Critically review published research about a topic related to your Masters research project.
4. Develop and demonstrate sound scientific writing skills.
5. Develop and demonstrate sound oral communication and presentation skills.

Subject Content

1.Advanced theoretical content related to the candidates research interests.
2.Developing skill-sets pertaining to Sport & Exercise Science research and/or clinical practice.
3.Management of self-directed learning programs.
4.Interpretation and evaluation of research contributions.

Special Requirements

Legislative pre-requisites

If you are involved in research work with human participants, you will need to consult with supervisors regarding any compulsory training or background checks that might be required.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Learning Contract	2 pages for each contract	10	Y	Individual
Reflection	1 page for each contract	10	Y	Individual
Presentation	45 minutes	40	N	Individual
Report	4,000 - 5,000 words	40	N	Individual

Prescribed Texts

- None. Reading in these subjects will be given by the supervisors and will be recently published primary research and review articles. These publications are available through the library website.

HLTH 7024 Health Services Financing

Credit Points 10

Legacy Code 401362

Coordinator Lei Si (https://directory.westernsydney.edu.au/search/name/Lei Si/)

Description This subject provides health leaders with an introduction to financial management in both public and private sector health services. The learning from this subject forms a basis for understanding the impact of leadership decision-making on financial outcomes and how financial decision-making impacts on clinical service delivery. The development of different approaches to funding to address issues of effectiveness, efficiency and acceptability (including equity) are examined. Pressures for reform are linked to developments at various levels of management and organisation type to enable analysis of potential impacts on clinical delivery. Students will critically analyse the relationship between performance and principles of governance, focusing on developing an improvement in the quality of service delivery. Reflective practice will be used to facilitate the application of resource management and clinical governance to a self-identified workplace issue warranting a clinical governance business case.

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) PUBH 7031

Equivalent Subjects HLTH 7005 Health Financial Management

Restrictions

Students must be enrolled in a postgraduate program

Assumed Knowledge

Competent use of Microsoft Excel, and high school mathematics (arithmetic, formulas and algebra, reading graphs).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse funding arrangements used internationally in comparison to those used within the Australian Healthcare system
2. Examine recent reforms in funding, including government funding, non-government funding and user pays in the Australian and international context.
3. Translate key health financial principles and language into practice.
4. Create a budget with consideration to financial risks from a zero-base for a proposed health service.
5. Analyse budget variances and evaluate options to mitigate financial risks.

Subject Content

1.International comparison of healthcare systems
2.Budgeting for health
3.The Pharmaceutical Benefits Scheme
4.Medicare and the role of private healthcare in Australia
5.Accounting and budgeting principles
6.Casemix and DRGs
7.The State Budget
8.Healthcare Agreements and Planning
9.The Private Public Partnership and Capital Charging
10.Cost-benefit analysis of capital projects in healthcare
11.Financial Risks in Healthcare

Assessment

HLTH 7025 Healthcare Data for Decision-Making

Credit Points 10

Legacy Code 401365

Coordinator Kingsley Agho (https://directory.westernsydney.edu.au/search/name/Kingsley Agho/)

Description Most professions in the health sciences need to read and interpret data relating to individual health status, interpret health risks in communities, and engage in the evaluation of interventions, or impact of health policies or programs. Many public health practitioners are actively involved in surveillance, quantitative research and/or evaluation. This subject provides an opportunity to learn about making health service decisions using appropriate data. Students learn how to explore and use data that are assembled to replicate real patient data to both generate and answer questions. The focus may be managerial or clinical, or an integration of these. Students analyse the assembled patient dataset to generate and interpret health statistics, and translate them into health information and knowledge for decision-making. Students completing this subject develop the ability to explore health data and provide recommendations based on the findings.

School Health Sciences

Discipline Health, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Competent use of Microsoft Excel, and high school mathematics (arithmetic, formulas and algebra, reading graphs).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explore and organise data in order to generate reports and make recommendations
2. Identify and compare the relationship between data, information, knowledge and wisdom and how these elements inform practice, management, and policy
3. Explain data elements in contemporary health data terminologies

Subject Content

1.Health informatics
2.Describing and visualising health data using appropriate software e.g. Microsoft Excel and SPSS
3.Determining relationships between variables
4.Limitations of the data and analysis and risks of misinterpretation
5.Administrative Data and Clinical Data
6.Demography and Health Indicators
7.Working with Excel - Survival Analysis
8.Interpreting data to determine health service needs
9.Communication and dissemination of health information data to key stakeholders
10.Working in Excel (II): Time Series Analysis
3.Determining relationships between variables through data linkage
5.Unintended errors in technology
6.Standardisation of data
7.Privacy, security and confidentiality

Assessment

HLTH 7026 Professional Internship in Health

Credit Points 40

Legacy Code 401368

Coordinator Sadia Hossain (https://directory.westernsydney.edu.au/search/name/Sadia Hossain/)

Description This subject provides students with the opportunity to translate the content of the postgraduate program to the context of the workplace through an integrated workplace internship. This experience will allow the student to develop the necessary skills and competencies expected of high performing health professionals. The Internship enables a focused opportunity to work in contemporary healthcare settings with leaders and managers from a variety of professions. Students will also engage in coursework with a focus on creating an portfolio that revisits all content learned throughout their courses to critically assess their learning journey and learning outcomes. This process will teach students how to systematically self-reflect in deep and transformative ways, engaging with theory and knowledge acquired and developed through their studies to design and create a portfolio of their skills and competencies through a social capital framework. The subject will culminate in a presentation of the results of their internship project in a research and practice seminar.

School Health Sciences

Discipline Health, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 40cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a post-graduate program and have a GPA of 5.5 or greater. Students enrolled in the Master of Public Health or Master of Health Science must have successfully completed 80 credit points. Permission is required for enrolment. Students must submit a CV and cover letter to the subject Coordinator detailing their previous professional experience/background and what they wish to achieve in the internship, including preferred areas of work in health.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critique peer-reviewed literature and identify gaps in current knowledge and practice
2. Demonstrate good analytical skills, strong problem-solving skills and a logical approach to achieving outcomes
3. Plan, manage and deliver a comprehensive applied project or set of related tasks relevant to the health work place.
4. Demonstrate the ability to work cooperatively and effectively within a team environment displaying positive and constructive work behaviours to achieve common goals.
5. Engage in self-analysis to identify factors relevant to supporting life-long learning and ethical professional practice
6. Articulate and implement the principles of reflective practice in personal and professional settings
7. Evaluate personal strengths and their applications to leadership and participation in professional teams
8. Assess ones own capabilities in doing and knowing based on evidence of experience and practice

Subject Content

1.Professional experience in selected workplace
2.The reflective practice: Reporting and responding; relating; reasoning; and reconstructing
3.Social capital, habitus, field and practice ? using Bourdieu?fs social capital theory to self-reflect

Special Requirements

Legislative pre-requisites

Special Requirements - NSW Health Legislative Prerequisites ~~Pre-requisites~~

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and compete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- http://training.gov.au (http://training.gov.au/)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

HLTH 7027 Professional Project in Health 1

Credit Points 20

Legacy Code 401369

Coordinator Evan Atlantis (https://directory.westernsydney.edu.au/search/name/Evan Atlantis/)

Description Health professionals, particularly those at managerial positions, are frequently tasked with solving very complex problems in their practice. Some of these problems are so complex that they can be called 'wicked' problems, or problems that are highly resistant to resolution. This subject uses project-based learning to provide students with the opportunity to work collaboratively and inter-disciplinarily to solve an industry-driven 'wicked' problem, using systematic and evidence-based techniques to do so. Students will be challenged to think broadly to take into account the interrelationships among a full range of causal factors underlying the 'wicked' problem at hand, and will be required to use more collaborative and innovative approaches to solve industry challenges. Students will be exposed to a range of industry representatives who will pose the difficult, 'wicked' problems to them and who will return to assess the proposed solutions.

School Health Sciences

Discipline Health, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 20cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students in 4702 Master of Public Health Pathway) and 4698 Master of Health Science must have successfully completed 40 credit points

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Use collaboration and interpersonal skills to work together with a group of diverse professionals
2. Apply problem-solving skills to an actual health challenge
3. Critically analyse literature and information sources that are related to the identified ewicked f problem
4. Apply appropriate methods and evaluation processes to create a solution-based proposal
5. Evaluate feasibility, potential impact and limitations of potential solutions
6. Articulate complex health science ideas and solutions to a wide range of audiences
7. Demonstrate innovative thinking in creating a solution to a health challenge

Subject Content

1. Understanding wicked problems
2. Tackling wicked problems by working collaboratively and inter-disciplinarily
3. Design thinking
4. The stages of a solution-based proposal

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Literature Review	2,100 words	25	N	Individual
Proposal	3,000 words	35	N	Group/ Individual
Presentation	20 min presentation by Team (total 20-25 slides)	20	N	Group/ Individual

HLTH 7028 Professional Project in Health 2

Credit Points 20

Legacy Code 401370

Coordinator Evan Atlantis (https://directory.westernsydney.edu.au/search/name/Evan Atlantis/)

Description This capstone subject intends to develop students' work-readiness. Health professionals are recurrently asked to engage in reflective practice as a way to improve clinical and non-clinical reasoning. The ability to reflect on action and in action allows health professionals not only to improve their practice but also to more clearly articulate their strengths and weaknesses to potential employers. In this subject, students will focus on creating an portfolio that will require revisiting all content learned throughout their courses to critically assess their learning journey and learning outcomes. It will teach students how to systematically self-reflect in deep and transformative ways, engaging with theory and knowledge acquired and developed

through their studies to design and create a portfolio of their skills and competencies through a social capital framework.

HLTH 7029 Quality and Safety

Credit Points 10

Legacy Code 401371

Coordinator Edwina Gow (https://directory.westernsydney.edu.au/search/name/Edwina Gow/)

Description This subject provides an overview of emerging health policy with particular attention to quality and safety. Students develop a critical view on the organisation of healthcare, measurement and delivery of outcomes from the patient and population perspective as well as organisational accountability for quality and safety. The course consists of three components. The first component targets the main constituents of clinical governance, including practice design, analysis and improvement, error reporting and investigation, public accountability and open disclosure, multi-disciplinary teamwork and clinical leadership. The second component introduces the tools of clinical process redesign which help managers make practical improvements to practices in their subjects. The third component targets risk management by providing an overview of the kinds of risks faced by health service managers by outlining perceptions of risk such as adverse effect versus opportunity capital.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects HLTH 7012 - Organisational Governance and Performance Management

Restrictions

Students must be enrolled in a postgraduate program

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse health reforms to apply to strategic and operational planning and implementation
2. Critique efforts to improve health systems, in Australia and beyond
3. Design strategies to avert risk and manage adversity

4. Integrate good governance into practice within a health service industry
5. Analyse the role of leadership, professional communication and interpersonal skills as they relate to quality and safety
6. Translate evidence and best practice into organisational and clinical governance to improve outcomes

Subject Content

1. Organisational governance
2. Quality and safety in the Australian and global context
3. Quality Improvement frameworks
4. Quality failings
5. Quality indicators, measurement and reporting
6. Quality management
7. Training and education for quality and safety
8. Risks and complaints management
9. Patient and public involvement in improving quality and safety in healthcare
10. Evaluating quality care through audit

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Professional Task	800 words	25	N	Individual
Professional Task	1,500 words	40	N	Individual
Presentation	20 minutes	35	N	Individual

HLTH 7030 Professional Internship in Health (Part-time)

Credit Points 40

Legacy Code 401435

Coordinator Evan Atlantis (https://directory.westernsydney.edu.au/search/name/Evan Atlantis/)

Description This is a 40 credit point year-long subject taken over two terms (20 credit points in each term). This subject provides students with the opportunity to translate the content of the postgraduate program to the context of the workplace through an integrated workplace internship. This experience will allow the student to develop the necessary skills and competencies expected of high performing health professionals. The Internship enables a focused opportunity to work in contemporary healthcare settings with leaders and managers from a variety of professions. Students will also engage in coursework with a focus on creating a portfolio that revisits all content learned throughout their programs to critically assess their learning journey and learning outcomes. This process will teach students how to systematically self-reflect in deep and transformative ways, engaging with theory and knowledge acquired and developed through their studies to design and create a portfolio of their skills and competencies through a social capital framework. The subject will culminate in a presentation of the results of their internship project. This subject can also be taken over one semester (see HLTH 7026 Professional Internship in Health (Full Time).

School Health Sciences

Discipline Health, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 20cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a post-graduate program and have a GPA of 5.5 or greater. Students enrolled in the Master of Public Health or Master of Health Science must have successfully completed 80 credit points. Permission is required for enrolment. Students must submit a CV and cover letter to the subject Coordinator detailing their previous professional experience/background and what they wish to achieve in the internship, including preferred areas of work in health.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critique peer-reviewed literature and identify gaps in current knowledge and practice

2. Demonstrate good analytical skills, strong problem-solving skills and a logical approach to achieving outcomes

3. Plan, manage and deliver a comprehensive applied project or set of related tasks relevant to the health work place.

4. Demonstrate the ability to work cooperatively and effectively within a team environment displaying positive and constructive work behaviours to achieve common goals.

5. Engage in self-analysis to identify factors relevant to supporting life-long learning and ethical professional practice

6. Articulate and implement the principles of reflective practice in personal and professional settings

7. Evaluate personal strengths and their applications to leadership and participation in professional teams

8. Assess ones own capabilities in doing and knowing based on evidence of experience and practice

Subject Content

1. Professional experience in selected workplace
2. The reflective practice: Reporting and responding; relating; reasoning; and reconstructing
3. Social capital, habitus, field and practice ? using Bourdieu?fs social capital theory to self-reflect

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Self-Assessment	500 words	10	N	Individual
Essay	1,000 words	10	N	Individual
Portfolio	1,500 words	40	N	Individual
Presentation	15 minutes	10	N	Individual
Professional Task	2,500 words	30	N	Individual

HORT 1001 Crop Production

Credit Points 10

Legacy Code 300815

Coordinator Qaiyum Parvez (https://directory.westernsydney.edu.au/search/name/Qaiyum Parvez/)

Description This subject aims to provide students with an understanding of the scientific basis of sustainable crop and food production and security. These include broad-acre cropping, fruits/orchards and vegetables. In this subject students will gain an understanding of the physiological controls on crop yield in the variable Australian environment in which crops are grown. Students will become familiar with the science and practice of sustainable crop production and develop crop management skills through the production of nursery crops, vegetables and fruits. Students will also gain an understanding of processing these crops after harvest, to develop an appreciation of factors impacting upon produce quality and safety.

HORT 1004 Horticultural Production Systems

Credit Points 10

Legacy Code 301096

Coordinator Michelle Mak (https://directory.westernsydney.edu.au/search/name/Michelle Mak/)

Description Food represents the single largest part of your environmental footprint. This means our modern, urban-oriented society must begin to reconnect with the sources of our food to create more sustainable future. This subject explores the scientific basis of sustainable crop production by examining fruit, vegetable and grain enterprises. Management of produce from harvest to consumption will also be explored to examine factors that impact upon food quality and safety. Students will compare and contrast growing conditions of the highly variable Australian environment to consider the global context for horticultural industry development. By delving into the world of crop management, students will identify the impacts (opportunities and constraints) of plant physiology on the sustainability of food. Students will also consider how novel food products can prompt consumers to appreciate the environmental, economic and social benefits that can arise from sustainable horticultural production.

Level Undergraduate Level 1 subject

Equivalent Subjects HORT 1003 - Horticultural Production 2 LGYA 5944 - Fruit Production HORT 1002 - Crop Production HORT 1001 - Crop Production

Assumed Knowledge

Basic knowledge of plants.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the science and practices in crop production and the cause and effect behind these practices

2. Analyse the benefits and limiting factors of a range of basic techniques used in crop production
3. Explain the basic principles of production management of selected crops
4. Describe the harvesting, processing, quality control and packaging of foods derived from crop production
5. Explain the cost of production for the selected crops grown and justify this against potential market gains
6. Predict the effects of environmental modification on crop yield, quality and market potential
7. Appropriately determine plant biomass and calculate fertiliser and chemical application rates

Subject Content

1. Sustainable crop production practices to food processing and analysis
2. Growing environment, soil media, and nursery practices
3. Seed (collection, viability, storage, germination) production
4. Fruit production (temperate and subtropical), tropical fruits in Australia
5. Plant propagation and micro propagation
6. Comparative analysis of current and innovative extensive and intensive production systems
7. Broad-acre field & agricultural crop production
8. Environmental and physiological factors affecting agricultural crops in Australian and international climates
9. Fresh produce?harvest, quality & processing
10. Grafting, budding & planting crops in field
11. Field crop management from seeding to harvest and post-harvest
12. Fruits / Orchard pruning & management for fruiting plants
13. Apiculture (production & management)
14. Real world experience through field trips to orchards, mushroom industry and broad-acre crops and project based assessment

Assessment

HORT 1006 Protected Cropping Biosecurity and Pollination

Credit Points 10

Legacy Code 301214

Coordinator Lihua Li (https://directory.westernsydney.edu.au/search/name/Lihua Li/)

Description The protected cropping industry in Australia is a rapidly expanding sector. There is an identified need for trained professionals who have an understanding of the management of plant pests and diseases. Students studying this course will learn industry best practice related to biosecurity, pest and disease management and emergency response procedures. In addition to pest and disease management the challenges of pollination in the context of Australian protected cropping will be explored. Western Sydney University is home to the state of the art National Vegetable and Protected Cropping Centre (NVPCC), this facility will be utilized in the on campus components of this course.

School Science

Discipline Horticulture

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify invertebrate pests and plant pathogens, common to greenhouse and protected cropping systems, and their implications for quarantine, biosecurity and integrated pest and disease management (IPDM)
2. Describe interactions between pests, diseases and their hosts in a closed climate controlled environment, including their impact on yield and economic costs
3. Discuss the types of pollination and pollinators, comparing Australian legislation and practices against international protected cropping systems
4. Explain the importance of pest economic thresholds, population dynamics, and pesticide resistance in relational to biological, chemical and mechanical control strategies
5. Develop a chemical control plan for a protected cropping scenario including identification of chemical classifications, application methods, withholding periods and PPE & WHS
6. Use National standards and industry best practice protocols to plan and oversee an emergency pest and disease control program.

Subject Content

1. Introduction to low, medium and high-tech protected cropping environments. Familiarisation with the unique challenges, biosecurity issues (nationally and on-farm) and pollination services specific to Australian protected cropping.
2. Identification of invertebrate pests including monitoring and economic costs in protected cropping environments.
3. Identification of plant diseases, crop destruction for quarantine purposes and safe re-establishment of production in closed growing environments.
4. Biological pest control techniques, technologies and research specific to protected cropping.
5. PLANTPLAN, Nationally Agreed Standard Operating Procedures (NASOP) and current legislation used to plan and oversee an emergency disease or plant pest control program
6. Chemical pest and disease control, legislation, WHS and PPE.
7. Pesticide resistance in Australia and internationally, commercial crop disease-tolerant packages and their economic advantages and costs.
8. Pollinators suitable to protected cropping and climate controlled horticulture. Alternative pollinators and Australia specific pollinators.
9. Pollination types and mechanisms. Pollination case studies and emerging research opportunities.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are

regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

HORT 1007 Protected Cropping Plant Nutrition

Credit Points 10

Legacy Code 301277

Coordinator Michelle Mak (https://directory.westernsydney.edu.au/search/name/Michelle Mak/)

Description Plant nutrition is essential to plant health and defence, productivity and crop quality; this is especially so in the soilless environment employed by the protected cropping industry. This subject will focus on crop nutrient requirements, nutrient deficiencies and their symptoms, practical nutrient monitoring using hand-held technologies and the PRIVA system and correction techniques. This subject also explores soilless substrates and their influence on nutrient loads, nutrient-rich waste water recovery, reuse and environmentally sustainable disposal options. Western Sydney University is home to the state of the art National Vegetable and Protected Cropping Centre (NVPCC), this facility will be utilized in the on campus components of this course.

School Science

Discipline Horticulture

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the essential elements needed for plant growth and their properties
2. Investigate the relationships between nutrient acidity, electrical conductivity, and plant nutrient requirements and availability in relation to their effect on crop growth and management at different growth stages
3. Explain plant nutrient deficiencies in commonly used substrates including symptoms, sampling techniques and management for correction
4. Illustrate effective waste water management and nutrient optimisation
5. Demonstrate a range of foundational academic skills including oral and written communication, an understanding of scientific method, professional document development, referencing, collaboration skills through group study and independent study skills.

Subject Content

-Factors affecting plant growth, such as; essential elements required for plant nutrition and their properties in response to acid and base changes (pH) and electrical conductivity (EC)
-Plant nutrient requirements and uptake at different growth stages and their management
-Plant nutrient deficiencies, their symptoms, sampling and correction
-Substrates commonly used in protected cropping, their influence on water and nutrient and how these inputs can be recovered, recycled or disposed of in an environmentally sustainable way.
-Practical skills will include using hand-held monitoring technologies. Analytical skills will include choosing appropriate nutrient substitutions, calculating nutrient recipes and evaluating and utilising online tools to verify crop husbandry decision making.
-Demonstrate foundational academic skills such as; critical thinking, academic writing skills, oral and written communication, professional document development, avoiding plagiarism and correct referencing techniques, providing fair and constructive criticism.

Assessment

- Greenhouse horticulture Technology for optimal crop production, Cecilia Stanghellini, Bert Van 't Ooster and Ep Heuvelink, Published: 2019 Pages: 300 ISBN: 978-90-8686-329-7

HORT 2001 Greenhouse Technology for Food Sustainability

Credit Points 10

Legacy Code 301097

Coordinator Zhonghua Chen (https://directory.westernsydney.edu.au/search/name/Zhonghua Chen/)

Description Greenhouses are enclosed structures that optimise temperature, light, water and carbon dioxide to maximise plant production. Also called 'greenhouse horticulture', these advanced systems integrate technologies across disciplines (e.g. horticultural, environmental and material sciences; mechanical engineering and design; robotics and computing programming) to create futuristic

indoor environments that increase the quantity and quality of plant-derived foods. Controlled environments can significantly reduce reliance on inputs (fertiliser, pesticide, energy and water) and reduce environmental impacts (including 'food miles'). This subject explores a range of greenhouse technologies in Australia and overseas-from simple low-cost options, through to cutting-edge technology in energy and water-efficient production. Students will observe current status and future trends in the industry to examine how advanced technologies can improve sustainability measures along with the reliability of horticultural output. Students will consider how innovative horticultural enterprises can provide consumers with greater capacity to adopt more sustainable diets.

Level Undergraduate Level 2 subject

Assumed Knowledge

Students enrolling in this subject should have knowledge of least one of the following subject areas: horticultural production systems; environmental sustainability analytics; technological design and development; consumer behaviour and/or marketing principles; health promotion and/or human nutrition.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate and communicate the future of greenhouse horticulture in Australia in comparison to international experience
2. Identify and articulate key challenges and opportunities (environmental, economic and social) faced by greenhouse horticulture
3. Explain principles of crop husbandry in the context of greenhouse horticulture
4. Explain objectives of greenhouse environment management
5. Analyse, integrate and promote the benefits of technologies employed in greenhouse horticulture
6. Interpret and communicate wider environmental, social and business impacts of greenhouse horticulture

Subject Content

1. Current status of greenhouse horticulture in Australia and globally
2. Opportunities and challenges (environmental, economic and social) faced by greenhouse horticulture
3. Crop husbandry for yield, profit and sustainability
4. Management of greenhouse environment (temperature, humidity, light, CO_2) for crop growth and yield
5. Technologies for improving input efficiency in greenhouse horticulture
6. Emerging consumer markets, and consumer influences on horticultural supply and demand
7. Postharvest food technologies and promotion of sustainable diets
8. Current and future research opportunities in greenhouse horticulture

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Industry proposal	1-page plan plus 15 mins audio-visual	40	N	Individual
Examination	2 hours	20	N	Individual

HORT 2003 Plant Production

Credit Points 10

Legacy Code 301447

Coordinator Jay Bose (https://directory.westernsydney.edu.au/search/name/Jay Bose/)

Description This subject will provide you with an understanding of the scientific basis of sustainable plant production in natural and built environments. These include cropping of plants for food production in extensive and intensive systems. In this subject you will gain an understanding of the physiological controls on plant yield in the Australian environment. You will become familiar with the science and practice of sustainable plant production and develop crop management skills through the production of nursery crops, vegetables and fruits.

Level Undergraduate Level 2 subject

Restrictions

Successful completion of 60 credit points

Assumed Knowledge

Basic knowledge of plants.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the science and practices in plant production and the cause & effect behind these practices.
2. Demonstrate competence in a range of basic techniques used in crop production.
3. Examine the basic principles of production management of selected crops.
4. Analyse the principle components regulating plant production.
5. Predict the effects of environment modification on crop yield & quality.

Subject Content

1. Sustainable plant production practices for food processing and analysis.
2. Growing environments, system modelling and analysis for Australian conditions.
3. Plant propagation and seed (collection, viability, storage, germination) production.
4. Intensive plant production.
5. Broad-acre field & agricultural crop production.

Assumed Knowledge

This subject assumes that students have a basic knowledge of biology, plant morphology and anatomy, chemistry and mathematics. Students are also assumed to be familiar with the World Wide Web and the tools for database searching and basic computer packages such as WORD and EXCEL.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the principles that underpin the production and preservation of protected plant products.
2. Examine the elements of protected cropping technology that alter plant production.
3. Explain how protected cropping technology and data driven systems can be used to manage plant products, from production to consumption.
4. Analyse the factors that contribute to sustainable disease, pest and waste control in protected cropping environments.
5. Critically evaluate the postharvest processes and factors that contribute to plant product transport, storage, processing and quality.

Subject Content

1. Principles of plant product development in protected cropping environments.
2. Pathophysiology disorders of plant products, pre- and post-harvest, in controlled environments.
3. Develop healthy foods and managing waste by modifying plant nutrients and environment.
4. Sustainable protected cropping technology and data driven systems.
5. Postharvest technology and plant product management.

Assessment

Assumed Knowledge

Students entering this subject may have basic knowledge of crop physiology and production, and basic understanding of the physical principles pertaining to glass house design. Student may also have knowledge and experience in one of the following subject areas: horticultural production systems; environmental sustainability analytics; technological design and development; marketing principles and business management.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain objectives of advanced greenhouse technologies and their effective application and
2. Articulate key challenges and opportunities for the selection of suitable greenhouse technology
3. Appraise principles of advanced protected cropping technologies in the context of national and
4. Communicate the advanced greenhouse technologies in contributing to the wider

5. Evaluate advances in greenhouse technologies in Australia in comparison to international greenhouse technological advancements.

Subject Content

1.Current status of advanced greenhouse technologies in Australia and overseas with low-tech,
2.The physical principles of greenhouse systems at different levels: passive greenhouse, climate
3.The advanced management monitoring of crop growth and development and the selection of
4.Advanced cropping systems for current vegetables and herbs and future crops under protected
5.Innovations in covering materials and glass technologies for improving energy use efficient and
6.Advances in fertigation, water and nutrient recycling technologies for optimal crop production
7.Progress in robotics for labour-intensive de-leafing, pollination, and picking technologies.
8.Future global innovations of advanced greenhouse technologies and their use for Australian

Level Postgraduate Coursework Level 7 subject

Assumed Knowledge

Students entering this subject should have knowledge of one of the following subject areas: horticultural production systems; environmental sustainability analytics; computing and technological applications; marketing principles and business management.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Design a project to assist an industry partner to solve a real life problem.
2. Collect and analyse data for the protected cropping project.
3. Develop relationships and rapport with industry and academic professionals.
4. Manage an industry based project to deliver outcomes within the specified
5. Propose innovative solutions to solve uncertain/unforeseen factors using negotiation and
6. Synthesise information from a variety of academic and industry sources.
7. Communicate the project results via a presentation and report to the industry.

Subject Content

Design features of a project undertaken for a protected cropping industry partner.
Reporting on progress to an industry partner to meet appropriate milestones
Management of an industry project
Industry project protocols and methods
Ethical conduct in industry projects
Financial analysis and project budget
Communication and networking
Personal and professional development ? including development of critical and reflective abilities

Special Requirements

Legislative pre-requisites

Students will need to complete a Risk Assessment form for approval of their supervisor before commencing field work for this subject. Students involving research on human participants will need Human Ethics approval from their supervisor and the Subject Coordinator before commencing field data collection. Other approvals may be needed for specific projects.

Assessment

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) HORT 7004

Special Requirements

Legislative pre-requisites

Students need to advise the Unit Coordinator of any changes to the Risk Assessment submitted for subject HORT 7004 Industry Project. Human Ethics reports will be required as part of this subject where approvals were obtained for these in subject HORT 7004 Industry Project. Other reports may be needed for specific projects.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Report	4,000 words	50	N	Individual
Presentation	15 minutes	30	N	Individual
Self-Assessment	1,000 words	20	N	Individual

HORT 7006 Plant-Climate Interactions in Controlled Environments

Credit Points 10

Legacy Code 301357

Coordinator Jay Bose (https://directory.westernsydney.edu.au/search/name/Jay Bose/)

Description This subject aims to provide knowledge of relationships between plant growth, controlled environment and crop physiological aspects relevant to protected crop production. The subject will provide students with relevant knowledge to explain and develop concepts that are key to understanding various areas of environmental plant physiology. The subject will also stimulate students to conceptualise interactions between the physical environment and plant functioning. The subject will compare the important parameters and concepts (e.g. plant growth, plant and fruit development, light interception, light use efficiency, biomass partitioning, and water use efficiency) in horticultural crop growth in the controlled systems.

School Science

Discipline Horticulture

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Must be enrolled in a postgraduate program.

Assumed Knowledge

Students entering this subject should have knowledge of one of the following subject areas: horticultural production systems; environmental sustainability analytics; computing and technological applications; marketing principles and business management.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain physical and chemical factors that control plant growth.
2. Measure, analyse and explain advantages and disadvantages of the light environments.
3. Dissect the fundamental processes of photosynthesis and understand how leaf photosynthesis can
4. Explain the principles of leaf gas exchange and important parameters and concepts underlying
5. Explain the potential and importance of physical-physiological measurements for plant phenotyping
6. Synthesise experimental results to reach valid conclusions.
7. Appraise the interactions between the physical environment and plant function with a focus on crop
8. Communicate the findings of scientific investigations and literature reviews relating to contemporary issues in plant-climate interactions.

Subject Content

1.Plant microclimates such as air and tissue temperature, light, and air humidity.
2.Common methods for measuring soil and plant nutrition controlling crop growth and development
3.Lighting sources and the effects of the light environment (natural versus artificial light, including intensity, spectrum and duration) on crop production
4.Concepts and measurements of crop primary production for horticultural crops grown in controlled systems and the open field
5.Crop gas exchange, growth analysis and biomass allocation to estimate photosynthesis, stomatal conductance and dark respiration
6.Latest advances in plant phenotyping
7.Environmental impacts on crop growth and production under protected cropping

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	3 x online quizzes (60 min. each, multiple choice and short answer questions)	30	N	Individual
Practical	One practical report (15%, 1,000 words) and one 15-min. presentation (15%)	30	N	Group
Report	2,000 words	40	N	Individual
Participation	3 day workshop	S/U	Y	Individual

HUMN 0006 Australian Studies (WSTC Prep)

Credit Points 10

Legacy Code 700213

Coordinator Chantal Rozairo (https://directory.westernsydney.edu.au/search/name/Chantal Rozairo/)

Description Australian Studies aims to inform students of some of the aspects of the historical development of Australia and highlight some of the important physical, social, political and economic issues and events which have helped shape the development of Australia as an independent, modern nation. The study of issues, events, attitudes and values in the Australian context along with the development of academic skills will assist students in their study of Humanities units at the tertiary level. In addition, all students, especially international students, should acquire a better appreciation of the environment in

which they live and learn to think more critically about issues facing people in the 21st century.

School Western Sydney The College

HUMN 0008 Comparative World Religions (WSTC Prep)

Credit Points 10

Legacy Code 700229

Coordinator Kathy Gooch (https://directory.westernsydney.edu.au/search/name/Kathy Gooch/)

Description This subject introduces students to the internally diverse and dynamic nature of religions in the world today. It explores the values and beliefs of religious traditions around the world, their points of difference and similarity. It aims to equip students with an understanding of the way that religions are embedded in culture. The subject provides students with a social science and humanities based vocabulary for discussing theological notions and debating the influence of religion on history, culture and contemporary issues. The subject also provides students with an opportunity to apply academic research and writing skills.

Credit Points 10

Legacy Code 900109

Coordinator Mona Shrestha (https://directory.westernsydney.edu.au/search/name/Mona Shrestha/)

Description This subject explores some of the most influential ideas in the humanities and social sciences, including democracy, imperialism, romantic love and secularisation. The subject traces the origins of these ideas and their manifestation in the world today. The subject will equip students with the ability to identify and evaluate some of the central ideas underpinning public discussion on a range of political and cultural issues today. In addition, it will provide students with a solid foundation of cultural and historical knowledge which is assumed knowledge in many University level subjects.

Oral presentation	10 minutes	25	N	Individual
Final Examination	2 hours	40	N	Individual

HUMN 0019 Studies of Society (WSTC)

Credit Points 10

Legacy Code 900091

Coordinator Mona Shrestha (https://directory.westernsydney.edu.au/search/name/Mona Shrestha/)

Description This subject aims to help students develop an understanding and appreciation of Australian society. The subject will provide general information and familiarise students with key structures, events, concepts and terminology used in relation to Australian's modern society. At the end of this subject, students should have greater knowledge and understanding on Australia's history, governmental and political systems. They will learn about consumer laws, civilian rights and responsibilities as well as the composition of Australia's population and relevant variations and trends.

School Western Sydney The College

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 0 Preparatory subject

Restrictions

Students must be enrolled in a Foundation program at The College.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Define and explain some key concepts related to the subject
2. Identify key elements of Australian society, e.g. population composition and historical events
3. Demonstrate an understanding of Australian institutions and systems, e.g. business, governmental, judicial and political systems
4. Interpret information in the form of text, graphs, statistics and illustrations
5. Write notes, summaries and extended responses based on unit content, readings and class discussions
6. Distinguish and respond to key words and terms in relation to Australian society

Subject Content

1. Australia - History
Settlement by Indigenous peoples and their location across Australia.
1788 the arrival of Europeans.
The role of convicts and migrants in establishing and developing Australia.
2. Australia's Population
Common statistics on size, age, distribution and cultural composition of Australia's population.
Reasons for variations, settlement patterns, range of belief systems and future population trends.
3. Australia's Government System
The three tiered system of government. The role and responsibilities associated with Local , State
and Federal levels of government.
4. Australia's Political Framework
Role of political parties in a democratic society. Types of political parties.
Electoral and voting processes in Australia.
5. Australian Legal System
The role of the judicial system (independent of government and military sections)
Common civilian rights and responsibilities as well as consumer laws.
6. Business In Australia - Consumers - Satisfying Wants
Needs, wants, goods, and services.
Factors determining which wants are satisfied.
7. Business In Australia - Consumers - Money
Barter, money, exchange, credit, interest and interest rates, purchasing goods and services - retail, direct sales, direct marketing.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
In-class Test	70 minutes	15	N	Individual
Stimulus Response Task	900 words	15	N	Individual
In-class Extended (with 350 word Essay Plan submitted prior) Response	60 minutes	20	N	Individual
End of Session Exam (Take Home)	2 hours 10 minutes	50	N	Individual

HUMN 0020 Understanding Academic Life (WSTC Prep)

Credit Points 10

Legacy Code 700281

Coordinator Paul Rouillon (https://directory.westernsydney.edu.au/search/name/Paul Rouillon/)

Description This subject introduces students to the skills needed for success in academic life. It introduces students to a range of topics to facilitate and develop an increased confidence in fundamental academic skills, develop planning and goal setting skills necessary for university. This subject forms a pre-requisite to 700168 Tertiary Study

Skills in Criminal and Community Justice, 700174 Tertiary Study Skills in Social Science and 700175 Tertiary Study Skills in Policing.

HUMN 1007 Brave New World: Negotiating Social Change in the 21st Century

Credit Points 10

Legacy Code 101886

Coordinator Julia Kantek (https://directory.westernsydney.edu.au/search/name/Julia Kantek/)

Description The discipline of Sociology has witnessed a transformation reflecting significant changes in society and social life. This subject re-examines the sociological dimensions of a variety of social concerns, for example: environmental issues, global migration, health, religion, indigeneity, gender, ethnic conflict and sub-cultural groups and asks: In the 'brave new world' of contemporary society we need to re-evaluate the conventional sociological concern of social structure and inequality in the face of these broad social changes. This subject will examine the social transformations which characterise contemporary social life; in particular the pace of social change and the implications of social media. In exploring these social concerns the links are drawn between more recent theoretical constructs and the more traditional focus on national social structures and inequalities. The subject will place special emphasis on concepts such as risk, individualism and uncertainty.

School Social Sciences

Discipline Sociology

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate a sound knowledge and understanding of recent developments in sociological thought and the reasons behind them
2. Apply recent sociological perspectives to some of the key social problems and/or challenges presented globally and within contemporary Australian life
3. Demonstrate a reflexive stance on the various sociological perspectives presented
4. Analyse some specific examples of how global processes of change can impact peopleðfs everyday lives in local contexts
5. Discuss, through a sociological lens, various possible, probable and preferred social futures with reference to current social trends

Subject Content

1. The End of History: Progress, Choice and Equality?
2. Generation and the continuation of tradition
3. Globalisation: the 'Western' perspective
4. Colonialism and neocolonialism
5. Decolonization and its contemporary legacies
6. Social Change
7. Social movements
8. Feminism, sexuality, and intersectionality
9. Social change and backlash
10. Technology, globalisation, connectedness, and change
11. The dark side of technology
12. How can we make social change?

Level Undergraduate Level 1 subject

Equivalent Subjects LGYA 1336 - The Urban Context

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically evaluate debates over major urban development issues (such as environmental sustainability, heritage preservation, or social equity);
2. Analyse the physical, social, economic, and cultural structure of the contemporary Australian city, and contrast it with the structure of cities in other world regions;
3. Formulate a coherent argument about the impacts of a current urban issue (such as transportation, large scale redevelopment, or urban growth) ;
4. Explain major contemporary theories about the urban-level interface between global and local forces;
5. Identify the unique and distinctive elements that define particular urban places, and describe the relationships between these urban place and urban inhabitants.

Subject Content

1. Historical evolution of cities, urban problems, and our attempts to resolve those problems
2. Comparative analysis of the social, economic, political, and cultural forces shaping cities in different world regions
3. Globalisation and social equity
4. Environmental and economic sustainability

HUMN 1013 Contextualising Indigenous Australia (Day Mode)

Credit Points 10

Legacy Code 101751

Coordinator Madison Shakespeare (https://directory.westernsydney.edu.au/search/name/Madison Shakespeare/)

Description This subject will provide a comprehensive overview of Indigenous Australian cultures, histories and identities. The scope of the subject spans pre-colonisation to the twenty-first century across Australia and all relevant fields of study. A cross-section of institutional, community and popular culture contexts will be explored through flipped mode of delivery supported by face to face tutorials. This body of knowledge will provide a context for various professions and discussions. Students will have the exciting opportunity to hear from a diverse range of Indigenous educators from academics to artists through to performers and community elders. A broad understanding of Indigenous Australia will position students to be advocates for change in contemporary Australia.

HUMN 1015 Development and Sustainability

Credit Points 10

Legacy Code 101572

Coordinator Julie Wen (https://directory.westernsydney.edu.au/search/name/Julie Wen/)

Description The subject introduces the basic concepts relating to sustainability and development, and explores their relevance to real-world situations at the local, national, and global levels. The causes of unsustainability as well as their short-term and long-term effects on society and the environment will be evaluated. Students will analyse, using appropriate sustainability indicators and social change theories, a social change initiative (i.e., program, project, policy) designed to integrate the socio-economic, cultural and environmental dimensions of sustainability within the context of a specific developmental focus (e.g. poverty alleviation, gender equality, human/social development, heritage conservation, biodiversity, tourism, green accounting, sustainable livelihoods). Students will engage in problem-based learning skills in order to critically analyse and discuss current issues in development, and provide solutions to sustainability.

HUMN 1016 Different Ways of Being in the World: Introduction to Social Anthropology

Credit Points 10

Legacy Code 102344

Coordinator Helena Onnudottir (https://directory.westernsydney.edu.au/search/name/Helena Onnudottir/)

Description The key and foundational focus of Social Anthropology is the relationship between people and their cultures. This subject provides an introduction to key concepts, methods and theories of classical and contemporary Social Anthropology. It will guide the students to an informed and critical understanding of the nature and extent of human diversity and differences, as well as the similarities which unite us as people. The subject has two parts. The first part introduces students to the history and scope of Social Anthropology through selected work of some classical anthropologists, introducing key concepts and conceptual frameworks. The second part is designed around selected case studies of Indigenous Peoples in Australia, the Asia Pacific, and the Americas, providing the students with critical insight into the application of anthropological theory and the epistemological contribution of the discipline of Social Anthropology.

HUMN 1017 Everyday Life

Credit Points 10

Legacy Code 100897

Coordinator David Tait (https://directory.westernsydney.edu.au/search/name/David Tait/)

Description This subject introduces students to key themes and issues in the study of everyday life. It draws on different disciplinary areas - especially anthropology, sociology and cultural studies - and different theoretical and methodological perspectives to examine the ways cultural practices and meanings are used to shape human identities and societies in everyday life. It will focus on rituals and routines in the different spaces of everyday life, and the ways these contribute to the production of local worlds and the key cultural categories that give meaning to these worlds. It will include a focus on how we research everyday life.

School Humanities & Comm Arts

Student Contribution Band HECS Band 4 10cp

Coordinator Natalie Quinlivan (https://directory.westernsydney.edu.au/search/name/Natalie Quinlivan/)

Description In Term 3, 2022 this subject replaced by HUMN 1067 - Introduction to Culture and Society (WSTC). This subject introduces students to key themes and issues in the study of everyday life.
It draws on different disciplinary areas - especially anthropology, sociology and cultural studies - and different theoretical and methodological perspectives to examine the ways cultural practices and meanings are used to shape human identities and societies in everyday life. It will focus on rituals and routines in the different spaces of everyday life and the ways these contribute to the production of local worlds and the key cultural categories that give meaning to these worlds. It will include a focus on how we research everyday life.

Level Undergraduate Level 1 subject

Co-requisite(s) Students enrolled in the combined DiplomaBachelor courses listed below must pass all College Preparatory units listed in the course structure before progressing to the Year Two units

Equivalent Subjects HUMN 1017 Everyday Life

Restrictions

Students must be enrolled at Western Sydney University, The College. Students enrolled in extended diplomas must pass 40 credit points from the preparatory subjects listed in the program structure prior to enrolling in this University level subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of key issues in the study of everyday life
2. Use central concepts in cultural and social analysis
3. Explain key approaches to the study of everyday life
4. Implement their skills in critical analysis and interpretation
5. Relate subject knowledge to contemporary world
6. Undertake independent and self-directed learning
7. Use skills in the oral and written presentation of knowledge.

Subject Content

- The rituals and routines of everyday life
- the spaces of the everyday ? work, home, leisure etc
- the social construction of identity and belonging in everyday life ? self, gender, nation, ethnicity etc
- youth cultures
- the social construction of nature
- the global dimensions of everyday life
- studying everyday life ? ethnography, semiotics
- The rituals and routines of everyday life
- the spaces of the everyday ? work, home, leisure etc
- the social construction of identity and belonging in everyday life ? self, gender, nation, ethnicity etc
- youth cultures
- the social construction of nature
- the global dimensions of everyday life
- studying everyday life ? ethnography, semiotics
- The rituals and routines of everyday life
- the spaces of the everyday ? work, home, leisure etc
- the social construction of identity and belonging in everyday life ? self, gender, nation, ethnicity etc
- youth cultures
- the social construction of nature
- the global dimensions of everyday life
- studying everyday life ? ethnography, semiotics

Assessment

HUMN 1026 Global Structures, Local Cultures

Credit Points 10

Legacy Code 102345

Coordinator Mary Hawkins (https://directory.westernsydney.edu.au/search/name/Mary Hawkins/)

Description Globalisation has created a world of convergence and, at the same time, of division. Nations appear now to be less sovereign and more limited, as their political, economic and cultural systems become enmeshed within, and in some instances subordinate to, a world system. Similarly, certain cultural styles, from the choice of footwear to neo-liberal politics, have become part of a global culture. However, while we as citizens are becoming increasingly international, we as humans are looking for meaning in smaller, local, communities. Globalisation has not, it seems, created an homogenous world culture, but rather, a world in which citizens participate in, and identify with, both global and local cultures. This subject traces the emergence of a global society and culture and, through the use of case studies drawn from throughout the world, examines the links between global structures and local cultures.

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Equivalent Subjects HUMN 1024 - Global Structures Local Cultures

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Employ the concepts of culture, society, structure and globalisation
2. Critically discuss the relationship between imperialism and the emergence of capitalism
3. Critically discuss global structures and how global inequality is maintained
4. Assess through the use of case studies, the ways in which global structures shape, and are shaped by, local lives

Subject Content

Anthropological approaches to globalisation;
Making the world one ? proto globalisation, imperialism, and the emergence of capitalism;
The anthropology of global capitalism and global inequalities;
Institutions of global governance ? unions, funds, banks and treaty organisations;
The ordering of humanity ? race and racism;
Gender orders;
Religion and conflict;
Nations and communities;
Indigenous peoples and population movements;
Connecting humans ? mobile telecommunications and social media;
Resistance, change and global social movements.

Assessment

HUMN 1028 Human Rights, Peace and Development

Credit Points 10

Legacy Code 101573

Coordinator Melissa Phillips (https://directory.westernsydney.edu.au/search/name/Melissa Phillips/)

Description The Universal Declaration of Human Rights (UDHR) was written in response to the atrocities of World War II. Since its ratification, the UDHR has been a 'roadmap' for peace, forming the basis for international responses to conflicts, poverty and disadvantage. This subject examines and critiques the concept of human rights. It will be shown how differentials of political and economic power between countries and groups within countries are used to prioritise and preference different rights so as to justify selective humanitarian efforts in the initial phases of peace-making and

the policy requirements for peace-building in human social, economic and cultural development.

Level Undergraduate Level 1 subject

Equivalent Subjects HUMN 1033 - Inequality and Human Rights HUMN 1029 - Human Rights Peace and Development (WSTC)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the concepts and philosophy of human rights, peace and development.
2. Identify and describe the different categories of rights ? civil, political, economic and cultural within the context of peace and development
3. Analyse the impact of human rights to the social conditions of vulnerable persons and groups.
4. Identify and describe the significant debates within the area of human rights as they apply to issues of peace and development.
5. Apply human rights concepts and arguments to analyse and evaluate topical and controversial issues within the areas of peace and development .

Subject Content

1. International Human Rights in an Historical Perspective. Defining Peace and Development.
2. The Philosophical Foundations of Human Rights.
3. Civil and Political Rights.
4. Economic and Social Rights.
5. Cultural and Environmental Rights.
6. The rights of different social groups (with particular focus on gender and indigenous peoples)
7. A Critique of the Concept of Human Rights.
8. Examining the UN implementation of the UDHR during conflicts between countries and within countries.
9. Examining implementation of human rights on climate change and the Sustainable Development Goals (SDGs)

HUMN 1039 Modern European History and Politics

Credit Points 10

Legacy Code 102000

Coordinator Margarite Poulos (https://directory.westernsydney.edu.au/search/name/Margarite Poulos/)

Description This subject introduces students to the major events and ideas that have shaped Europe in the late modern period. There is a strong focus on the dramatic events of the twentieth century following the demise of empire, and the subsequent rise of competing nationalisms and radical politics. The subject is concerned equally with the cultural and social contexts in which these events occurred. Students will study the diverse ways in which historians have approached the history of the twentieth century from the study of high politics to the focus on daily life. Methodological questions that will be addressed include the relative role of individual agency and of structural constraints in explaining historical change. The subject will encourage students to evaluate the period as a whole, drawing on scholarship which engages the modernity - democracy - violence nexus.

School Humanities & Comm Arts

Discipline History

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the major themes of modern European politics culture and society;
2. Discuss the impact of war, dictatorship and revolution on everyday life and the reconstruction of Europe since the demise of multi-ethnic empires and the rise of nationalism;
3. Place the specific themes within a broader European and global context;
4. Interpret and critically engage with historical scholarship and evidence;
5. Identify the variety of ways in which historians approach the past.

Subject Content

This subject may include the following themes:
- Modernity and violence
- nations, nationalism, identity
- colonialism and decolonisation
- Conflict-World Wars, revolutions, revolts, resistance
- Transatlantic relations
- The new Europe
- Genocide
- Fascism, Nazism, Stalinism, totalitarianism
- protest and dissent East and West
- gender, race, class, religion
- national Communisms
- Liberalism
- Cold War
- European integration/ disintegration

HUMN 1048 Understanding Islam and Muslim Societies (WSTC)

Credit Points 10

Legacy Code 700160

Coordinator Kathy Gooch (https://directory.westernsydney.edu.au/search/name/Kathy Gooch/)

Description This is an introductory level subject that forms part of the Islamic Studies major. The subject will contribute to the development of sound disciplinary expertise in the academic study of Islam - historical and sociological. The subject will familiarise students with critical approaches to the study of Islam that touch on its origins and development, formation of traditions, social structures and institutions as well as familiarising students with issues regarding Islam in the Western context. The subject will assist students to develop cross-cultural awareness and interaction, communication and interpersonal skills, inventiveness and a capacity for independent thinking and analysis and problem solving skills.

Level Undergraduate Level 1 subject

Equivalent Subjects HUMN 1047 - Understanding Islam and Muslim Societies

Restrictions

Students must be enrolled at Western Sydney University, The College. Students enrolled in Extended Diplomas must pass 40 credit points from the preparatory subjects listed in the program structure prior to enrolling in this University level subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. After successful completion of this Unit, students will be able to:
2. Discern the basic beliefs and practices that constitute the Islamic faith.

3. Identify Islamic doctrine in relevant historical contexts and distinguish the diversity of Muslim societies and cultures.
4. Describe key discourses within the academic study of Islam.

Subject Content

1. The origins of Islam and the historical and social context in which it emerged.
2. The formation of the Islamic Traditions.
3. Islamic 'arts' and humanities including art, architecture, prose and poetry.
4. Islamic institutions including law and philosophical foundations.
5. Islamic societies in the Middle Islamic period (11th - 15th Century).
6. Education and the transmission of knowledge in the pre-modern period.
7. Transition into modernity: post-Ottoman rule particularly the 18th Century.
8. Islam and Muslims in the modern world.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Research Essay	1500 words	40	N	Individual

HUMN 1049 Understanding Visual Culture

Credit Points 10

Legacy Code 101979

Coordinator Sebastian Byrne (https://directory.westernsydney.edu.au/search/name/Sebastian Byrne/)

Description Visual media are a major feature of everyday life in contemporary society. The circulation of images shapes our sense of who we are individually and collectively; how we move through the world; and the possibilities that exist for enacting social change. This subject introduces students to the histories and theories of visual culture, from painting and photography, through cinema and television, to digital media, including social media and user-generated content. Students will gain practical skills in analyzing visual and audiovisual texts as well as a comprehensive understanding of the role of visual culture in the production and maintenance of power relations. These skills are crucial to engaging critically with contemporary culture.

School Humanities & Comm Arts

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Recognise a range of visual, audio-visual and multi-media forms and genres.
2. Explain relevant key concepts and terminologies
3. Analyse a range of visual texts important to the study of visual culture, historical and contemporary art, and digital media forms
4. Demonstrate critical reading skills in the field of visual culture

Subject Content

This subject is modularised and teaching and content may vary slightly from semester to semester based upon staff teaching and research expertise. The subject will focus on different visual modes, such as painting, photography, screen cultures and digital cultures. The subject will examine concepts and methodologies of visual culture study and analysis, which may include
representation
perspective
composition
framing
modes of spectatorship
viewing practices
semiotics
meaning
ideology
genre

HUMN 1051 Who do you think you are? (Day Mode)

Credit Points 10

Legacy Code 101762

Coordinator Peter Pinnington (https://directory.westernsydney.edu.au/search/name/Peter Pinnington/)

Description This subject is available to all Undergraduate students who have open electives. Who do you think you are? will provide students practice in the analysis of historical documents, family narratives, autobiography, political and social issues around a project that will give a context for their own personal story. Students will develop skills in oral history work, locating and retrieving archival documents and compiling their own 'family tree'. Students will also develop skills in practising speaking and writing genre appropriate to their own family history. An introduction to the theory of identity and identification will enable students to appreciate the complexities of becoming.

School Humanities & Comm Arts

Discipline Indigenous Studies

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Co-requisite(s) HUMN 1013

Learning Outcomes

On successful completion of this subject, students should be able to:

1. At the successful completion of this unit, students will be able to:
2. use effective research skills to locate and retrieve archival documents;
3. critically analyse historical documents;
4. identify key social and political issues that have impacted and shaped their own lives and families lives;
5. critically reflect on their own family narratives and history;
6. compile a efamily tree f;
7. practise skills in speaking and writing genre appropriate to their own family history; and
8. rethink their own identity and identifications.

Subject Content

This subject will address some of the following:
Understanding the archives
How to access and retrieve archival/historical documents
Interpreting archival/historical documents
The importance of history
The role of family narratives and oral history
Autobiography work
Memory work
How to compile a family history tree
Identity and identification work

HUMN 1052 Australian Politics and Active Citizenship

Credit Points 10

Legacy Code 102738

Coordinator David Burchell (https://directory.westernsydney.edu.au/search/name/David Burchell/)

Description We live in an increasingly interconnected world where international trade, foreign policy, digital communication and flows of migrants and cultures across borders appear to undermine the importance of national communities. Despite this, everyday life is still profoundly influenced by the decisions which national governments make and the powers they exercise. This subject introduces Australian political institutions, processes and contemporary issues. It traces democracy beyond Parliamentary representation to encompass active citizenship, through which public opinion is formed and expressed. Students will identify key political issues in contemporary Australia, understand how political institutions respond, and develop the skills to contribute to public debates.

HUMN 1053 Diversity, Language and Culture

Credit Points 10

Legacy Code 102736

Coordinator Ee Ling Quah (https://directory.westernsydney.edu.au/search/name/Ee Ling Quah/)

Description The purpose of this subject is to equip students with skills to understand and navigate a culturally and linguistically diverse society, including that of Greater Western Sydney. Students will gain an historically informed, critical understanding of the meaning of culture, the impact of colonisation, indigenous Australian cultures, and of approaches to diversity, multilingualism and multiculturalism. They will explore the value of their existing and emerging skills in multilingualism and cross-cultural communication as tools to navigate a rapidly changing global environment. Students will practise their intercultural communication skills in a team setting through interactive learning activities and group work.

HUMN 1054 When Worlds Collide: European Empires and the World, c.1600-1950

Credit Points 10

Legacy Code 102768

Coordinator Brett Bennett (https://directory.westernsydney.edu.au/search/name/Brett Bennett/)

Description This subject provides an historical investigation of the interaction between European empires - specifically the British and the Dutch - and the Americas and Asia-Pacific region, from 1600-1950. It examines the combination of domination and cultural negotiation between colonisers and colonised, which included, among other processes, the trans-Atlantic slave trade. It examines both how peoples were managed as imperial subjects, and how they responded to this management. The subject explores both the effect of imperial rule on the colonised, and of empire upon the colonisers. It draws upon historical literature from a variety of sources and perspectives, and from European and Asian history.

School Humanities & Comm Arts

Discipline History

Level Undergraduate Level 1 subject

Equivalent Subjects HUMN 1022 - Global History CULT 1014 - The First Globalisation HUMN 1023 - Global History

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss the historical experience of European colonialism, for both colonisers and colonised, with reference the British and Dutch Empires.
2. Describe processes for studying different cultures, Western and non-Western, in contact and collision.
3. Apply selected historiographic and ethnographic skills to the study of historical cultures.
4. Produce compelling arguments with primary and secondary sources.

Subject Content

NB. This content is modular and therefore: the content will be taught according to the available teaching staff?fs areas of expertise; not all topics will be included each semester; content will not necessarily be taught in the order it is listed below.
1. The origins of modern European empires: the British and the Dutch in context.
2. The early British Empire in the Atlantic and Caribbean

3. The British Empire and property: the case of John Locke

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

HUMN 1057 Doing Sociology

Credit Points 10

Legacy Code 102787

Coordinator Amie Matthews (https://directory.westernsydney.edu.au/search/name/Amie Matthews/)

Description With a focus on what it is that sociologists 'do' and why, this subject considers how sociology contributes to a better understanding of everyday life. That is, to the routine engagements, interactions and practices that make up our individual and social worlds. Where we live, what we consume, how we feel and the meanings we give our work, leisure, environments and relationships will all be analysed with reference to academic and popular content. Serving as an introduction to the discipline of sociology and its various sub-fields and methods, 'Doing Sociology' places emphasis on how sociological knowledge can be applied. In this way, the subject provides students with the opportunity to consider what they might do with sociology; how a sociological perspective might help them better understand the social world and contribute in a meaningful way to resolving contemporary social issues.

School Social Sciences

Discipline Sociology

Student Contribution Band HECS Band 4 10cp

HUMN 1058 Indigenous Landscapes

Credit Points 10

Legacy Code 102805

Coordinator Madison Shakespeare (https://directory.westernsydney.edu.au/search/name/Madison Shakespeare/)

Description Indigenous Landscapes aims to explore 'traditional' Indigenous Australian ways of knowing landscape in contemporary, meaningful, and relevant ways. Specifically, the subject acknowledges and values pre-colonial Australian history and land-use practices. Content includes 'traditional' land management practices; cold-burning, protected area management, sustainable land use; cultural heritage and heritage landscapes, Sovereign land rights. This subject also aims to equip students with cultural competency in order to address issues of dispossession and disadvantage brought about by the historical destruction and disruption of ecological integrity.

HUMN 1059 When Worlds Collide: European Empires and the World, c.1600-1950 (WSTC)

Credit Points 10

Legacy Code 700299

Coordinator Chantal Rozairo (https://directory.westernsydney.edu.au/search/name/Chantal Rozairo/)

Description This subject provides an historical investigation of the interaction between European empires-specifically the British and the Dutch-and the Americas and Asia-Pacific region, from 1600-1950. It examines the combination of domination and cultural negotiation between colonisers and colonised, which included, among other processes, the trans-Atlantic slave trade. It examines both how peoples were managed as imperial subjects, and how they responded to this management. The subject explores both the effect of imperial rule on the colonised, and of empire upon the colonisers. It draws upon historical literature from a variety of sources and perspectives, and from European and Asian history.

Equivalent Subjects CULT 1014 - The First Globalisation HUMN 1022 - Global History HUMN 1054 - When Worlds Collide European Empires and the World c1600-1950 HUMN 1023 - Global History (WSTC)

Restrictions

Students must be enrolled at The College to enrol in this subject. Students enrolled in Extended College programs must have passed 40 credit points of the preparatory subjects in these programs in order to enrol in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss the historical experience of European colonialism, for both colonisers and colonised, with reference the British and Dutch Empires.
2. Describe processes for studying different cultures, Western and non-Western, in contact and collision.
3. Apply selected historiographic and ethnographic skills to the study of historical cultures.
4. Produce compelling arguments with primary and secondary sources.

Subject Content

NB This content is modular and therefore: the content will be taught according to the available teaching staff's areas of expertise; not all topics will be included each term; content will not necessarily be taught in the order it is listed below.
1. The origins of modern European empires: the British and the Dutch in context.
2. The early British Empire in the Atlantic and Caribbean
3. The British Empire and property: the case of John Locke
4. The Mughal Empire and its first contact with the British
5. The British and India: 1600-1700
6. Liberal Critics of Empire: Adam Smith and Edmund Burke
7. America revolts against empire: the American Revolution
8. Religion and Liberalism: Raja Rammohun Roy
9. Africa and the trans-Atlantic Slave Trade
10. The Abolition of slavery in the British Empire
11. Gandhi and the Indian independence movement
12. The Dutch Empire in Asia: overview
13. The Dutch in Indonesia
14. British and Dutch colonial policy in SE Asia.
15. A survey of colonial policies and practices re marriage and sex in Asia.
16. A survey of colonial policies on Islam in Asia
17. The battle for ownership in settler colonial Australia
18. The emergence of Australian settler nationalism
19. Issues in the colonial Dutch East Indies
20. The rise of Indonesian nationalism

HUMN 1060 Introduction to Indigenous Australia: Peoples, Places and Philosophies

Credit Points 10

Legacy Code 102815

Coordinator Kaiya Aboagye (https://directory.westernsydney.edu.au/search/name/Kaiya Aboagye/)

Description This subject introduces students to the rich diversity: past, present and future of Aboriginal and Torres Strait Islanders in Australia with emphasis placed on the importance of identity, diversity, representation and resilience. You will engage directly with Indigenous sources and learn to critically analyse content from Indigenous Standpoints. Presenting as a challenging and thought-provoking experience of Aboriginal and Torres Strait Islander peoples, places and philosophies, this subject provides a solid theoretical foundation of Indigenous perspectives for the knowledges and professional practices in your chosen field.

HUMN 1061 Islam: Past, Present and Future

Credit Points 10

Legacy Code 102823

Coordinator Vassilios Adrahtas (https://directory.westernsydney.edu.au/search/name/Vassilios Adrahtas/)

Description This is an introductory level subject that forms part of the Islamic Studies major. The subject will contribute to the development of sound disciplinary expertise in the academic study of Islam - historical, anthropological, and sociological. The subject will familiarise students with critical approaches to the study of Islam that touch on its origins and development, formation of traditions, social structures and institutions, and with issues regarding Islam in the Western context. The subject will aid students in developing cross-cultural awareness and interpersonal communication skills.

HUMN 1063 Critical and Systems Thinking

Credit Points 10

Legacy Code 800242

Coordinator Robert Salama (https://directory.westernsydney.edu.au/search/name/Robert Salama/)

Description This subject is designed for high-achieving students enrolled in Bachelor of Creative Leadership or Advanced degrees. It enables students to develop high-level critical thinking skills that are essential for life-long career success. Students engage with key theoretical frameworks and concepts in critical and systems thinking using interdisciplinary approaches to enable them to think and act outside the silos of their disciplines. Throughout the subject, students are challenged to consider how they think as opposed to how they think they think (biases and heuristics). A clear understanding of the necessity of systems thinking approaches in leadership paradigms equips students to be the leaders of tomorrow.

School Social Sciences

Discipline Studies In Human Society

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Equivalent Subjects HUMN 1036 - Introduction to Critical Thinking

Restrictions

Students must have successfully completed 40 credit points of study in their course with a minimum GPA of 5.0 to enrol in this unit. Students who are enrolled in the Bachelor of Creative Leadership (BCL) must enrol in the unit under the BCL. Enrolment in the unit for students enrolled in the BCL is at the discretion of the Academy or the Director of Academic Program.

Learning Outcomes

1. Describe critical and systems thinking theories and concepts.
2. Discuss the application of critical and systems thinking across various disciplines.
3. Analyse complex scenarios using the framework of critical systems heuristics.
4. Exhibit sound reasoning and problem-solving skills that underpin critical thinking.
5. Reflect on and evaluate assumptions, alternative points of view and related theories, morals, and principles in disciplinary settings.

Subject Content

1. Critical and Systems Thinking: decision making processes, objectivity, subjectivity, and intuition.
2. Systems 1 and 2 thinking.
3. Critical thinking methodologies: validity, reliability, and authenticity.
4. Systems thinking frameworks.
5. Critical Thinking in interdisciplinary settings.
6. How we think vs how we think we think - biases and heuristics.
7. Critical Systems Heuristics frameworks, leadership, and complexity.

Assessment

HUMN 1064 Digital Identities

Credit Points 10

Coordinator Erika Smith (https://directory.westernsydney.edu.au/search/name/Erika Smith/)

Description This subject examines identity in a digitalising society. It asks questions such as: who are we becoming with digital technologies? How are digital experiences shaped by long standing social inequalities? Students learn about identities as the flows of data across formalised systems of governance and commerce, and as the ways we make ourselves in interactions with others in social media spaces. Pressing issues are explored such as online harm, privacy, surveillance, and human rights. Students reflect upon personal and professional digital identities, and reimagine digital technologies and social media for new possibilities of identity, equity and justice.

School Social Sciences

Discipline Sociology

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Equivalent Subjects BEHV 1009 Living Learning and Working on the Web

Learning Outcomes

1. Explain the key issues and implications of digitalising lives
2. Discuss the relationship between identities and social inequalities in digital spaces
3. Connect personal identities to responsible social media practices
4. Develop social research skills for researching digital society.
5. Apply social theories of digital identities, social media, and digital systems

Subject Content

1. Digital identities – what does it mean to be human in a digitalising society? Who are you in digital times?
2. Social theories of identity, inequality and technology
3. Researching digital society
4. Relational selves, communities and social action – what are people doing online and why?
5. Respectful, ethical and productive interactions in digital spaces
6. Equitable technologies and design justice

7. Digital rights – safety, privacy, surveillance, control, ownership, and consent
8. Networked identities of employability in a digital economy
9. Reconciling professional and personal identity dilemmas across digital platforms
10. Towards sustainable, fair and just digital futures

HUMN 1065 Diversity, Language and Culture (Block)

Credit Points 10

Legacy Code 500074

Coordinator Elisha Barrett (https://directory.westernsydney.edu.au/search/name/Elisha Barrett/)

Description The purpose of this subject is to equip students with skills to understand and navigate a culturally and linguistically diverse society, including that of Greater Western Sydney. Students will gain an historically informed, critical understanding of the meaning of culture, the impact of colonisation, Indigenous Australian cultures, and of approaches to diversity, multilingualism and multiculturalism. They will explore the value of their existing and emerging skills in bilingualism and cross-cultural communication as tools to navigate a rapidly changing global environment. Students will practice their intercultural communication skills in a team setting through a field trip to a Western Sydney community.

School Humanities & Comm Arts

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects HUMN 1009 - Contemporary Society HUMN 1011 - Contemporary Society HUMN 1053 - Diversity Language and Culture HUMN 1056 - Diversity Language and Culture (WSTC)

Restrictions

Students must be enrolled in program 7181 - Undergraduate Certificate in Early Childhood Studies or 7188 Diploma in Culture, Society and Justice

Learning Outcomes

1. Explain key concepts in the analysis of diversity, language and culture.
2. Develop communicative competence in a range of intercultural settings.
3. Identify and explain the role of cultural diversity, bilingualism and multilingualism in becoming responsible local and global citizens.
4. Engage critically with media and visual culture to ground their theoretical understanding.
5. Achieve academic literacy by locating and assessing sources and expounding an argument in written and verbal forms.
6. Critically reflect upon experiences of intercultural communication and community engagement.
7. Work effectively in teams.

Subject Content

1. Histories, concepts and policies of cultural diversity.
2. Cultures of Indigenous Australian peoples.
3. Bilingualism and multilingualism.
4. Language as a human endowment.
5. Language typology and language learning.
6. Concepts of social harmony and social protest.
7. Race and colonialism in Australia.
8. Arts and visual culture in contemporary Australia.
9. Advocating for alternative futures.
10. Field trip including in-class preparation: engaging in cultural and intercultural experiences.

HUMN 1066 Introduction to Culture and Society

Credit Points 10

Legacy Code 102913

Coordinator Ee Ling Quah (https://directory.westernsydney.edu.au/search/name/Ee Ling Quah/)

Description Introduction to Culture and Society examines the ways culture - as both representation and practice - shapes individual and collective identities. It will focus on the rituals and routines of everyday life, and their connection to our wider social relationships. The subject will also explore inequality both in Australia and globally, the social structures that generate this inequality and the cultural processes by which we mark status and social distinction.

School Humanities & Comm Arts

Discipline Sociology

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Equivalent Subjects HUMN 1017 - Everyday Life
HUMN 1018 - Everyday Life (WSTC)

Learning Outcomes

After successful completion of this Unit, students will be able to:

1. Exercise sociological and cultural concepts and frameworks to make sense of human experience in ways that go beyond ‘common sense’ accounts of the world.
2. Recognise the role of symbolic creativity in everyday life and its connection to social relations and institutions.
3. Develop an ethnographic understanding of cultural practices, both familiar and distant, in order to make sense of their larger significance to social groups.
4. Research the dimensions of social inequality in Australia and globally
5. Identify both the ways social inequalities are marked in cultural terms, and the wider structures and institutions that serve to reproduce those inequalities.
6. Understand how globalisation and global inequalities shape everyday life in contemporary Australia.

Subject Content

Section 1: Culture, Society and Everyday Life

Week 1: The Idea of Society
Week 2: Cultural Representation
Week 3: Cultural Practices of Everyday Life

Section 2: Practising Culture: Self, Community and Symbolic Creativity

Week 4: Presentation of Self - Getting Dressed
Week 5: Communal Rituals - Ethnographies of Gift Giving
Week 6: Food Consumption and Everyday Multiculturalism

Section 3: Economic Inequality, Boundary Marking and Social Distinction

Week 7 Dimensions of Inequality in Australia
Week 8 The Geographies of Inequality: Poverty and Prosperity in Sydney
Week 9 Parsing Poverty: From the Undeserving Poor to the Bogans

Section 4: The ‘Australian Way of Life’ and its Contradictions

Week 11: Divisions of Labour: Housework, Care Work, Gender and Race.
Week 12: The Backyard & the Bush: Culture & Nature in the Age of Climate Change
Week 13: Conclusion

Restrictions

Students must be enrolled at The College to enrol in this subject.
Students enrolled in Extended College programs must have passed 40 credit points of the preparatory subjects in these programs in order to register in this subject.
Students enrolled in Integrated courses must have passed or be enrolled in the preparatory subjects in these programs in order to register in this subject.

Learning Outcomes

1. Exercise sociological and cultural concepts and frameworks to make sense of human experience in ways that go beyond 'common sense' accounts of the world.
2. Recognise the role of symbolic creativity in everyday life and its connection to social relations and institutions.
3. Develop an ethnographic understanding of cultural practices, both familiar and distant, in order to make sense of their larger significance to social groups.
4. Research the dimensions of social inequality in Australia and globally
5. Identify both the ways social inequalities are marked in cultural terms, and the wider structures and institutions that serve to reproduce those inequalities.
6. Understand how globalisation and global inequalities shape everyday life in contemporary Australia.

Subject Content

Module 1: Culture, Society and Everyday Life
Week 1: The Idea of Society
Week 2: Cultural Representation
Week 3: Cultural Practices of Everyday Life

Module 2: Practising Culture: Self, Community and Symbolic Creativity
Week 4: Presentation of Self - Getting Dressed
Week 5: Communal Rituals - Ethnographies of Gift Giving
Week 6: Food Consumption and Everyday Multiculturalism

Module 3: Economic Inequality, Boundary Marking and Social Distinction
Week 7: Dimensions of Inequality in Australia
Week 8: The Geographies of Inequality: Poverty and Prosperity in Sydney
Week 9: Parsing Poverty: From the Undeserving Poor to the Bogans

Module 4: The 'Australian Way of Life' and its Contradictions
Week 10: Divisions of Labour: Housework, Care Work, Gender and Race.

Week 11: The Backyard & the Bush: Culture & Nature in the Age of Climate Change
Week 12: Conclusion

HUMN 1068 Intersectionality: Identity, Diversity and Difference (WSTC)

Credit Points 10

Coordinator Mona Shrestha (https://directory.westernsydney.edu.au/search/name/Mona Shrestha/)

Description This subject explores various relevant theories, narratives and concepts that underpin social scientific scholarship. Students will gain critical insight into ideas such as identity, culture, structures of inequality and difference (e.g. such as gender, race, class, sexuality), and their intersections. With a focus on contemporary social life, the subject provides opportunity for students to consider current social issues and various macro and micro forces impacting social change on a social and spatial level. By exploring a range of key theories and concepts in the social sciences, students will gain knowledge and skills in how to analyse our social world – the world in which they will be working in the future as professionals – and thereby be in a position to more fully comprehend the world around them, its issues, problems, inequalities and injustices that they will be working with. The subject will prepare students with a range of skills relevant to scholarship in the social sciences, such as critical reading, sociological theorisation and analysis, as well as statistical and spatial literacy.

School Western Sydney The College

Discipline Sociology

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Restrictions

Students must be enrolled in an existing Diploma program at WSTC.

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Understand theories of culture, identity, difference and power.
2. Describe the concept of intersectionality and its application in contemporary Australian society.
3. Identify the social and spatial contexts of diversity and difference in Australia.
4. Recognise the impacts of global forces (such as globalisation and environmental change) on people, place and society.
5. Utilise primary and secondary data to observe patterns of diversity and difference over time and space.
6. Apply key concepts to contemporary case studies.

Subject Content

1. Concepts of culture, cultural difference and identity
2. Social stratification, inequality, polarisation and power
3. Intersectionality
4. Historical and social contexts of diversity and difference in Australia
5. Social and spatial impact of diversity and difference on people
6. Global and local impact of globalisation and environmental change
7. Alternatives: Good practice, policy and research on working with diverse contexts

HUMN 1069 Human Rights and Community Action (WSTC)

Credit Points 10

Coordinator Paul Rouillon (https://directory.westernsydney.edu.au/search/name/Paul Rouillon/)

Description In this subject, students engage with the concepts and philosophy of human rights and explore how these ideas influence the Australian experience within legal, governmental and social service institutions. Students will be challenged to consider if vulnerable groups have their human rights promoted or undermined by current practice and identify a human rights issue to address through a community action plan. Students will gain subject relevant skills linking theory to practice in the process of critical reflection and exercising statistical literacy.

School Western Sydney The College

Discipline Sociology

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Restrictions

Students must be enrolled in an existing Diploma program at WSTC.

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Identify the key philosophical and historical milestones in the development of contemporary international and Australian human rights instruments.
2. Describe international human rights instruments and their relevance to the social conditions of vulnerable persons and groups.
3. Demonstrate an understanding of how human rights concepts and themes influence Australian legislation, policy, and civil society.
4. Examine how key institutions promote or undermine access to justice and equity for vulnerable groups in Australia.
5. Develop a community action plan in response to an identified human rights issue.

Subject Content

1. Human rights – an introduction to the philosophy and history of human rights, including current international and Australian instruments
2. Challenges to contemporary practice
3. Sustainable development in vulnerable communities: social policy, institutional responses and community initiative development
4. Sustainable communities: Social capital and community engagement
5. Professional communication for community engagement

HUMN 1070 Indigenous Australia: People, Places and Philosophies (WSTC)

Credit Points 10

Coordinator Mona Shrestha (https://directory.westernsydney.edu.au/search/name/Mona Shrestha/)

Description This subject introduces students to the rich diversity: past, present and future of Aboriginal and Torres Strait Islanders in Australia with emphasis placed on the importance of identity, diversity, representation and resilience. You will engage directly with Indigenous sources and learn to critically analyse content from Indigenous standpoints. Presenting as a challenging and thought-provoking experience of Aboriginal and Torres Strait Islander peoples, places and philosophies, this subject provides a solid theoretical foundation of Indigenous perspectives essential for the knowledge and professional practices in your chosen field.

School Western Sydney The College

Discipline Indigenous Studies

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Equivalent Subjects HUMN 1060
HUMN 1062

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Outline precolonial indigenous Australian cultural and philosophical world views
2. Discuss the social, cultural and political implications of British colonialism that challenge contemporary Indigenous Australia.
3. Explain societal misconceptions, ideas, attitudes and assumptions about Indigenous Australia.
4. Discuss the importance of core concepts including identity, diversity, representation and resilience.
5. Adopt a socially and culturally responsive personal and professional approach to Indigenous Australia.

Subject Content

1. Introduction to Indigenous Worlds, Standpoints & Research
2. Indigenous Land and Country, Spaces and Places
3. A Historical Timeline: Tracing Major Events from Pre-Colonisation to Today
4. Contemporary Indigenous Activism & Identities
5. Interrogating “Closing the Gap” and Other Policies in Relation to Indigenous Social Determinants
6. Working in Indigenous Contexts

Assessment

HUMN 1071 Images of Childhood

Credit Points 10

Coordinator Di Dickenson (https://directory.westernsydney.edu.au/search/name/Di Dickenson/)

Description This subject will explore how the meanings we place on children vary across cultures and communities and over time. Students will have the opportunity to examine implicit and explicit images of childhood and to consider how these images inform how we think and engage with children in our everyday lives; the role they play in the institutions that impact children's lives and in the disciplines that study children. Images will be drawn from a range of contexts and types of media. Students will also have the opportunity create their own representations of children.

School Humanities & Comm Arts

Discipline Anthropology

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Undertake a basic social semiotic image analysis
2. Analyse how childhood is represented in a range of images
3. Develop arguments about the relationship between images of childhood and real children's lives
4. Create visual and verbal images of children, informed by reflection and scholarship

Subject Content

- Concepts of childhood and stories we tell about children
- What we can learn by examining images of children and childhood
- Basic social semiotic image analysis methods
- Changing images of childhood across time
- Images of childhood across cultures and communities
- Images of childhood in texts aimed at children
- Images of childhood in texts aimed at adults
- Disciplinary differences in how children and childhood are represented
- Relationship between images of childhood and real children's lives
- Institutional images of children and childhood

HUMN 2012 Anthropologies of the Everyday

Credit Points 10

Legacy Code 102347

Coordinator Geir Henning Presterudstuen (https://directory.westernsydney.edu.au/search/name/Geir Henning Presterudstuen/)

Description In 2021, this subject replaced by 102844 - Society, Culture and Human Diversity. Although people's lives vary significantly depending on ethnographic context, it is also through everyday practices and rituals that the universality of the human condition becomes most obvious. Close studies of how people create a living and make meaning of their everyday experiences in various contexts can thus provide valuable lessons about cultural difference as well as

about what it means to be human, and is consequently a core aspect of anthropological inquiry. In this subject students engage with this overarching theme via ethnographic case studies as well as through inquiries into their own everyday lives.

School Social Sciences

Discipline Anthropology

HUMN 2014 Civil Society in Contemporary China

Credit Points 10

Legacy Code 101968

Coordinator Edmund Fung (https://directory.westernsydney.edu.au/search/name/Edmund Fung/)

Description This subject is intended to give students an understanding of the social development of the People's Republic of China (PRC). It will engage with some of the key concepts that scholars have utilised to understand social changes. In this vein, the subject will consider China's socio-political transformation from a civil society perspective. It will consider a range of stakeholders - from non-governmental organisations to trade associations - and examine the events that have contributed to the development of China's civil society.

School Humanities & Comm Arts

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Restrictions

Successful completion of 40 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. explain the conception of civil society and its utility in understanding China's social and political development
2. critically assess the emergence of new social stakeholders in China and their impact on civil society
3. assess the Chinese state's response to civil society stakeholders
4. evaluate the future of China's civil society and its potential in affecting socio-political change
5. use social science methods to construct future research.

Subject Content

. Conceptions of civil society
. Conceptions of Chinese civil society
. Social changes in China since 1978
. State-society relations in China
. Key domestic social stakeholders, including non-governmental organisations
. Emergence of voluntarism
. Role of transnational actors in Chinese civil society
. Role of the state in Chinese civil society
. Future social and political developments in China

HUMN 2015 Community and Social Action

Credit Points 10

Legacy Code 101595

Coordinator Michel Edenborough (https://directory.westernsydney.edu.au/search/name/Michel Edenborough/)

Description Dismantling oppressive and complex forms of disadvantage and inequality are social justice and human rights issues demanding collective action. Activism is not solely about disruption and disobedience. This subject focuses on local, national and global social movements, the use of digital technologies and differing forms of activism using theories of social change. We identify and reflect on diverse perspectives, challenging normative constructs between individual and structural explanations of inequality and explore tactics and strategies adopted by activists, from the early 20th century through to contemporary campaigns. Students are enabled to take part in meaningful ways as active change agents through design, planning and participation in a social action campaign, thereby building knowledge and skills in community engagement, relationship building and the strategies and methods involved in bringing about positive social change.

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Equivalent Subjects LGYA 1286 - Education for Social Action

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of social movements and change processes from diverse perspectives.
2. Recognise the challenges for collective action in the social/political context of NPM (New Public Management).
3. Critically analyse the competing interests involved in social change.
4. Identify the links between contested issues in global and local contexts in terms of bringing about social change.
5. Recognise and reflect on skills used in mobilising power necessary for bringing about social change.

Subject Content

Key concepts and theories of social change
History of Social Movements
Ethical and respectful advocacy and activism change strategies
Social Action & the State
Current Challenges & Opportunities for Social Change
Organising for Social Change
Citizenship & Social Change
Values, competing interests & technology
Environmental Activism
Indigenous Activism
Women & Social Change
Linking individual & structural social change

Assessment

HUMN 2017 Complex Emergencies and International Guidelines

Credit Points 10

Legacy Code 102367

Coordinator Garry Stevens (https://directory.westernsydney.edu.au/search/name/Garry Stevens/)

Description In 2023, this subject replaced by HUMN 3116 - Complex Emergencies and International Guidelines. Over the last five decades, the world has experienced a significant number of disasters, which have occurred in many different forms including natural (e.g. Tsunami or drought) and human-induced (e.g. wars or ethnic conflicts), leading to an unplanned exponential increase in the number of international

non-government organisations. This subject examines the causes and consequences of disasters and the application of international guidelines governing humanitarian responses. It provides an outline of theoretical approaches to the understanding of the political aspects of emergencies and introduces real-life case studies that aim to engage students in critical thinking and improve their knowledge of the core humanitarian standard on quality and accountability; the humanitarian charter and minimum standards; and the challenges related to interagency coordination in emergencies

School Social Sciences

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Define different types of natural and human-induced disasters and phases of emergencies
2. Identify theoretical frameworks to explain the causes of emergencies and assess their applications in various emergency contexts
3. Describe and critically analyse the principles of disaster preparedness and mitigation
4. Analyse factors and activities associated with various types of disasters
5. Articulate key players in emergency response and management, their roles and challenges they face
6. Identify major international guidelines and standards that govern humanitarian responses and assess enabling and disenabling factors associated with the adherence to such standards
7. Critically analyse challenges and ethical dilemmas associated with various emergency scenarios

Subject Content

1. Disasters: Definition, typology, and evolution
2. The right to humanitarian aid: International laws guiding humanitarian response
3. Theoretical foundations of disasters
4. Principal of disaster prevention, preparedness, and mitigation
5. Phases of emergency management and the relief-development continuum
6. Anatomy of disaster response
7. Core humanitarian standard on quality and accountability
8. The SPHERE project: humanitarian charter and minimum standards
9. Key challenges and dilemmas during humanitarian response
10. Militarization and politicization of humanitarian assistance
11. Case studies and lessons learned: Genocide in Rwanda vs. the Asian Tsunami

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Reflection	150 words per week (1-8)	20	N	Individual
Essay	1,500 words	30	N	Individual
End-of-session Exam	2 hours	50	N	Individual

HUMN 2018 Cultural and Social Geographies

Credit Points 10

Legacy Code 101590

Coordinator Andrew Gorman-Murray (https://directory.westernsydney.edu.au/search/name/Andrew Gorman-Murray/)

Description Examines the nexus between society, culture and place. Considers contemporary social and cultural planning issues including: local community relations, place management, place redefinitions, ethnic concentration, cultural precincts, and the spatial politics of gender and sexuality. The roles of cultural products in carrying spatial information and reinforcing identity are examined. Introduction to cultural and social geography, and developments in cognate fields of cultural studies and anthropology. Key theories of identity. Case studies range across ethnicity, religion, age, gender, sexuality, class and nationalism. The analysis and assessment advances an appreciation of social and cultural difference and social justice.

Level Undergraduate Level 2 subject

Equivalent Subjects HUMN 2019 - Cultural and Social Geographies (UWSC)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe key paradigmatic shifts within cultural and social geography, social planning, and cultural studies.
2. Critically evaluate and analyse cultural products.
3. Analyse representations of place, culture and society.
4. Evaluate policies and programs for contemporary place management.
5. Identify and describe key theories of identity and place.

Subject Content

1. Old to new cultural geographies, and the rise of social planning, postmodern cities.
2. Theories of identity and place.

3. Representing people and place: national identity in-place
4. Indigeneity, place and post-colonialism.
5. Social distance and spatial distance.
6. The local politics of difference.
7. Geographies of fear and violence.
8. Sexuality and space.
9. The geographies of racism and anti-racism.
10. Constructions of environment.
11. The spaces of religion and faith.
12. Heritage, identity and the production of urban places.

HUMN 2020 Digital Humanities and Research Methods (UG)

Credit Points 10

Legacy Code 102425

Coordinator Rachel Hendery (https://directory.westernsydney.edu.au/search/name/Rachel Hendery/)

Description This subject investigates the methodological possibilities of digital technologies for interdisciplinary humanities and social sciences research. It covers several major digital research methods, exploring previous applications and examining their orientations and implications. Digital research methods and applications may include digitisation, online curation, visualisation, network analysis, geographical information systems, data mining and simulation. In the context of these, the subject will probe histories of technology and knowledge production, the evolution of digital texts and practices, and issues in contemporary culture such as digital design, gamification, virtual identity, and digital rights.

School Humanities & Comm Arts

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Restrictions

Successful completion of 60 credit points at Level 1.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Communicate a clear understanding of the ways digital technologies are applied in interdisciplinary research contexts;
2. Collaborate with fellow students to engage with digital platforms for research;
3. Articulate the ways in which digital technologies are influencing social and cultural research methodologies; and
4. Describe how new digital technologies can be used to address contemporary research questions.

Subject Content

Introduction to subject - The ?ecomputational turn?f in the humanities (lecture pods, readings)
Digitisation (lecture pods, readings in own time). Workshop: exercise relating to working with electronic texts.
Data/text mining and visualisation (Lecture pods, readings). Workshop: text mining and visualisation exercise.
Gaming (lecture pods, readings). Workshop: case study exercise in gaming.
GIS and mapping (lecture pods, readings). Workshop: mapping exercise.
Network analysis, social media, metadata (lecture pods, readings). Workshop: exercise relating to network analysis.
Students present their own final project.

HUMN 2021 Doing Business in China

Credit Points 10

Legacy Code 101857

Coordinator Niv Horesh (https://directory.westernsydney.edu.au/search/name/Niv Horesh/)

Description This subject is primarily aimed at acquainting undergraduate students with the academic theory and debates surrounding China's business etiquette and its globalizing economy. Drawing on a wide range of English-language studies, subject lectures will cover in broad strokes the historic background of the economic reforms carried out in China over the last three decades, as well as their societal implications. They will discuss, for example, the evolution of corporate law and property rights in the PRC since 1949, and the underlying differences and interdependence between the Chinese and Australian economies.

School Humanities & Comm Arts

Discipline History

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Restrictions

Successful completion of 40 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Students will be able to
2. Explain the historic background and ongoing controversies surrounding China's economic-reform thrust over the last three decades.
3. Carry out effective team or group-based work.
4. Proficiently argue their standpoint, both orally and in writing, in relation to China's development trajectory and the future of Sino-Australian trade.
5. Independently find important sources of data and information that might later help them further develop their knowledge of the Chinese and Australian economies, as well as the process of economic globalization as a whole.
6. Demonstrate team-work allocation capacity, as well as group research and presentation skills.

Subject Content

What have been the most successful/unsuccessful aspects of China's economic reforms?
A Unique Business Etiquette?
Inter-Provincial Competition.
Foreign Investment in China.
Impersonal vs. Personal Trust.
Legal Reform.
The Wenzhou vs.Shanghai Models of Economic Development.
China's Financial and Banking System.
State Owned Enterprises vs. Private Sector.
The Spectre of Corruption/Guanxi.
The Deadweight of Pollution.
The Global Financial Crisis and the End of "Chimerica".
The Future of Sino-Australian Trade and Investment.

HUMN 2022 Emergency Field Operations: Supply Management and Logistics

Credit Points 10

Legacy Code 102368

Coordinator Garry Stevens (https://directory.westernsydney.edu.au/search/name/Garry Stevens/)

Description In 2023, this subject replaced by HUMN 3119 - Emergency Field Operations Supply Management and Logistics. This subject will equip students with the required skills to assess organisational capacity to respond to disasters and other complex humanitarian emergencies. The subject will cover logistical frameworks and tools for planning, the sustainable deployment of goods and services, and monitoring and evaluating the effectiveness of local and global supply chains. It will discuss the challenges, ethical, and political dimensions of supply chains and contingency plans in emergency and disaster response contexts.

School Social Sciences

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Co-requisite(s) HUMN 2017

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe logistics principles, processes and frameworks and their adaptations in humanitarian emergencies
2. Articulate key challenges, ethical issues, and political dimensions of humanitarian logistics
3. Identify and use recognised tools to plan and monitor supply chains and evaluate their effectiveness.
4. Critically assess organisational capacity to respond to a humanitarian emergency
5. Conduct and report a Logistics Capacity Assessment (LCA)
6. Critically assess the role and effectiveness of the Logistics Cluster in humanitarian response
7. Articulate principles of sustainable deployment of goods and services

Subject Content

Logistics and supply chain management: key concepts and frameworks

Logistics in humanitarian emergencies: challenges, standards and the Cluster Approach
Preparedness and procurement: setting up local and global supply networks
Transport, warehousing and distribution
Assessment and monitoring: conducting a Logistics Capacity Assessment (LCA)
Co-ordination and Communication in emergency response contexts
Security and civil-military co-operation
New logistics frontiers: services, cash transfers and market support
Human resource management
Sustainability and performance evaluation

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Case Study	1500 words	30	N	Individual
Applied Project	2000 words per group	20	N	Group
Final Exam	2 hours	50	N	Individual

HUMN 2024 Ethnographies of Southeast Asia and the Pacific

Credit Points 10

Legacy Code 102346

Coordinator Geir Henning Presterudstuen (https://directory.westernsydney.edu.au/search/name/Geir Henning Presterudstuen/)

Description This subject will introduce students to ethnographic field study through a close examination of the anthropology of two regions with which Australia is geographically and politically aligned; the Pacific Islands and South-east Asia. Drawing upon classic and contemporary ethnography the subject will provide opportunities for comparative and trans-historical studies of how cultures in these regions have been constructed and changed in relation to larger global dynamics. It will also provide an insight into the ways in which anthropological theory is developed in the context of attempts to explain and interpret cultural difference. Key topics of study, explored through case studies, will include the colonial experience, traditions and modernities, nations and nationalism, transnationalism, religion, social conflict, and material cultures. The subject will include ethnographic films.

School Social Sciences

Discipline Anthropology

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply anthropological concepts to the description of cultural diversity in South-east Asia and the Pacific islands.
2. Analyse some of the ways symbolic cultures and traditions are influenced by political, material and environmental factors.
3. Draw upon ethnographic case studies to explain regional similarities and differences.
4. Apply anthropological theories to case studies about cultural change.
5. Analyse some ways visual anthropology (film, photography) can effectively aid in the description of cultural phenomena.

Subject Content

1. The peoples of Southeast Asia and the Pacific.
2. The South Pacific and Southeast Asia in the colonial imagination.
3. Melanesian and Polynesian anthropologies.
4. Chiefs and Big Men ? governance and tradition.
5. Gifts, symbols and material culture.
6. Anthropologies of Southeast Asia: Indonesia and Thailand.
7. The village, the nation and nationalism in Indonesia, Thailand and Malaysia.
8. Global interventions: the IMF, the World Bank and INGOs in Cambodia, Indonesia, and Laos.
9. Commodifying culture ? Southeast Asia and the pacific as tourist destinations.
10. Australia in the Region.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Critical Review: Ethnographic Film Critique/ Analysis	1000 words	25	N	Individual
2A. Poster (20%) 2B. Presentation (5%): Poster Presentation	500 words plus visuals	25	N	Individual
Analytical essay	1500 words	50	N	Individual

HUMN 2025 Families and Intimate Life

Credit Points 10

Legacy Code 102143

Coordinator Emily Wolfinger (https://directory.westernsydney.edu.au/search/name/Emily Wolfinger/)

Description This subject will critically examine sociological perspectives on families and intimate life, building on the approaches and theories introduced in the first year of Sociology studies. The familiarity of families and intimate relationships will be thrown into question. Students will be asked to examine their beliefs, unpack myths of the 'naturalness' of family, and question the 'personal'. Families and intimate relationships will be viewed as part of the wider social structure, their constitutions shaped by culture, economies, social policy, technology and globalisation. The subject will demonstrate the historical and cultural specificity of the nuclear family and its role in the creation and reproduction of social inequality and social difference.

School Social Sciences

Discipline Sociology

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Equivalent Subjects HUMN 2052 - Sociology of the Family HUMN 2016 - Comparative Studies of Families and Kinship

Restrictions

Successful completion of 40 credit points

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Recognise and describe the family and intimate relationships as socially constituted.
2. Describe the contemporary diversity of family and intimate relationship forms across cultures.
3. Provide evidence for the historical specificity of family forms and intimate relationships.
4. Analyse the family and intimate relationships in terms of power relations.

5. Demonstrate an understanding of sociological approaches to the family and intimate life.
6. Apply sociological theory to analyse families and intimate life.
7. Recognise and describe the family as a social rather than a biological construct;
8. Recognise and describe intimate relationships as social constructs;
9. Describe the contemporary diversity of family and intimate relationship forms both in our own and other cultures;
10. Provide evidence for the historical specificity of family forms and intimate relationships;
11. Analyse the family and intimate relationships in terms of power relations;
12. Demonstrate an understanding of sociological approaches to the family and intimate life.

Subject Content

• Diverse families and intimate relationships across time and culture
• Sociological theories on the family and intimate life
• Love and romance
• Marriage and cohabitation
• Gendered division of domestic labour
• Childhood and parenting
• Transnational families and outsourcing care
• Violence in families and intimate relationships
• Relationship breakdown, divorce and re-partnering
• Friendship and social networks beyond the family
• Gender, sexuality and power

Assessment

HUMN 2027 Health, Illness and Biomedicine: A Sociological Perspective

Credit Points 10

Legacy Code 101610

Coordinator Irena Veljanova (https://directory.westernsydney.edu.au/search/name/Irena Veljanova/)

Description The Sociology of Medicine and Health Care starts from the basic premise that illness and health are social as well as biological processes. Traditional areas of the discipline are explored and in each case their applicability to public health is stressed. At the same time, an important goal is to suggest how that field is being redefined and reinvigorated by social and cultural studies of science and technology. The theoretical perspectives and substantive issues raised and developed to study them are critically examined. The provision and organisation of health care are examined with emphasis on the social

and political context in which public health is pursued and ill health treated within Australia.

School Social Sciences

Discipline Sociology

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Equivalent Subjects LGYA 1357 Sociology of Medicine and Health Care

Restrictions

Successful completion of 40 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply sociological theories and concepts to the specific area of social activity, medicine and health care;
2. Critically examine the dominant ideologies within the health industry, e.g., the curative model of a health care, the use of technologies in health care, and the medicalisation of society;
3. Identify and critically examine the idea of health and illness, experiences of health & illness and inequalities in those experiences ;
4. Critically examine the role of the health professions, eg medicine, nursing, in social life and their role in social control and the construction of deviance;
5. Critically evaluate health related media content through a sociological lens.

Subject Content

1. What is the social model of health and how does it differ from the biomedical model? What is illness?
2. How do the main sociological perspectives differ in their approach to studying health and illness.
3. Social organisation of health care and the political economy of health. Aging and health: Towards a sociology of ageing and dying
4. Social determinants of health (Issues of inequalities and equity in access)
5. Multicultural Health Applied
6. Medicalisation of Deviance
7. The new health paradigm and the autonomous health consumer (Alternative and complementary health care included).
8. The role of technology in modern health care.
9. Media and Health
10. Constructing medical objects and subjects (Body, Medicine and Society)
11. Transhuman Health Paradigm
12. Health Discrimination

HUMN 2028 Identity and Belonging

Credit Points 10

Legacy Code 101612

Coordinator Jennifer Cheng (https://directory.westernsydney.edu.au/search/name/Jennifer Cheng/)

Description Identity and belonging are foundational concepts in sociology. This subject commences with an overview of the ways in which these concepts are understood in the social sciences and how these understandings have been impacted more recently by processes of globalisation. Through engagement with films, documentaries and academic texts the subject explores different modes and sites of identity and belonging as they circulate on both local and global scales. Specifically, we will examine topics like gender and sexuality, home and neighbourhood, the nation state and nationality, social class, consumption, work and leisure, ethnicity, youth cultures and new media. The subject equips students with the concepts and theories necessary for an understanding of social continuity and social change

and encourages them to reflect on their own identities and social and cultural positionings.

School Social Sciences

Discipline Sociology

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe sociological theories and concepts relevant to identity, belonging and globalisation.
2. Critically reflect on issues of identity and belonging as they emerge in film, documentaries and popular culture.
3. Explain how identities and experiences of belonging have changed, and are changing, over time.
4. Explain the interrelationship between identity and belonging.
5. Analyse the significance of issues of identity and belonging for minority groups.

Subject Content

Identity and belonging
Genders and sexualities
Neighbourhood and home
Ethnicity and race
Nation-states and nationalism
New media and global communities
Consumption and social class
Globalisation and cosmopolitanism

HUMN 2030 Islam In the Modern World (WSTC)

Credit Points 10

Legacy Code 700162

Coordinator Kathy Gooch (https://directory.westernsydney.edu.au/search/name/Kathy Gooch/)

Description This subject introduces students to Islam and its adherents within contemporary global context. It looks at key Muslim intellectuals from the 19th Century until the present and examines their attempts to come to terms with modernity as a Western project, while addressing critical issues facing Islam. Areas for consideration include: renewal and reform; the impact of colonialism and globalisation on Muslim discourse; independent judgement (ijtihad) versus emulation (taqlid); and issues associated with civil society. Students will also explore the challenge of shaping a Muslim identity in the modern world - in the context of key Muslim institutions and social movements.

Level Undergraduate Level 2 subject

Equivalent Subjects HUMN 3055 - Islam in the Modern World

Restrictions

Students must be enrolled at Western Sydney University, The College. Students enrolled in extended Diplomas must pass 40 credit points from the preparatory subjects listed in the program structure prior to enrolling in this University level subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. After successful completion of this Unit, students will be able to:
2. Describe historical developments in the Muslim world and their impact on contemporary contexts.
3. Explain the origins, development and diversity of Islamic thoughts on various contemporary issues.
4. Analyse scholarly and popular debates regarding Muslim societies.
5. Analyse changing relations between Islam and the West during the modern period.

Subject Content

1. The thought of key Muslim intellectuals from the 19th century to the present.
2. Muslim intellectuals on/and modernity as a Western project.
3. The impact of globalisation and colonialism on Muslim discourse.
4. Independent judgement (ijtihad) versus emulation (taqlid).
5. Muslim identity in the modern world in light of key Muslim institutions and social movements.
6. Reform and renewal.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Short answer questions	300 words	10	N	Individual
Analytical and Conception Task	1,000 words	25	N	Individual
In-class short answer exams	2 x 500 words	25	N	Individual

HUMN 2032 Issues in World Development: Rich World, Poor World

Credit Points 10

Legacy Code 101331

Coordinator Zulfan Tadjoeddin (https://directory.westernsydney.edu.au/search/name/Zulfan Tadjoeddin/)

Description This subject introduces students to the field of international development, where the divide between the rich world and poor world takes a centre stage. While development has created prosperity around the world, it is not without discontents. Social and economic inequality at the global level is a real problem and has been increasing. The 'developed' and 'developing' world paradigm will

be critically examined. Students will be equipped with theories and practicum examining development, underdevelopment and their related issues within a contemporary political, economic and social framework. Students will also have exposure to current global development debates such as poverty, global inequality, sustainable development, democracy and security.

HUMN 2034 Keeping the Past

Credit Points 10

Legacy Code 100001

Coordinator Karen Entwistle (https://directory.westernsydney.edu.au/search/name/Karen Entwistle/)

Description Legislation requires the preservation of natural, built and movable heritage, but choices about what to keep often produce controversy and reveal starkly varying opinions about what is historic. From the choice of people commemorated in statues to modest buildings on the site of new developments, local communities and central governments are divided about whose past is protected and praised. The historian's investigation of places and objects is an important part of the formal assessment process and may be part of controversial debates. Parramatta has a rich selection of heritage places. How does heritage fit in a modern CBD? Site visits around the city will identify archaeological and architectural heritage to promote discussions, museums will showcase objects from the past, documents preserved in archives will offer insights and historical research techniques will help to answer the questions "What should be kept from the past?" and "Why should it be kept?"

HUMN 2036 Mangamai'bangawarra: Indigenous Science

Credit Points 10

Legacy Code 300959

Coordinator Hayley Green (https://directory.westernsydney.edu.au/search/name/Hayley Green/)

Description This subject explores aspects of Aboriginal science and medical science in the treatment and prevention of illness. The subject has a particular focus on the knowledge of the local D'harawal People. The culture and history of Indigenous Australians is introduced to provide a contextual backdrop to the study of Indigenous medical remedies from eastern Australia, the deserts, and the tropics. To complement this study, Indigenous perspectives on the seasons, weather and land management will be studied.

School Science

Discipline Indigenous Studies

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Restrictions

Successful completion of 60 credit points

Assumed Knowledge

Equivalent to a basic understanding of Level 1 introductory biology and chemistry.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Contrast Indigenous and European methods of transmitting knowledge from generation to generation,
2. Consider Indigenous perspectives on culture and history, and appraise their integration into daily lives in areas such as the role of food sources in maintaining good health.
3. Identify the Indigenous seasons and the perspective on weather.
4. Evaluate the benefits of Indigenous methods of land management, including the roles of fire, conservation and sustainability.
5. Identify and evaluate the effects of common plant treatments in the desert, eastern Australia and the tropics.
6. Identify and evaluate the effects of common treatments based on animal and insect products.
7. Critically appraise the methods and underlying presumptions of modern pharmaceutical science in research on Indigenous medicinal treatments.

Subject Content

1. Introduction to Indigenous culture and history, with an emphasis on the D'harawal people.
2. The diversity of the Indigenous environment, focusing on the desert, eastern Australia and the tropics, and the role of seasons on those environments.
3. Indigenous relationship to the land and to sustainable land management and care.
4. Common plant treatments in the desert, eastern Australia and the tropics.
5. Treatments derived from animal products and insects.
6. The interaction of modern pharmaceutical science with Indigenous medical treatments.

Assessment

HUMN 2037 Peace-Making and Peace-Building

Credit Points 10

Legacy Code 101575

Coordinator Melissa Phillips (https://directory.westernsydney.edu.au/search/name/Melissa Phillips/)

Description The concept of Peace is more than just an absence or cessation of conflict, but also the achievement of social justice and equitable standards of living. Humanitarian work/interventions in response to war and natural and human-made disasters that result in refugee crises are referred to as peace-making whilst the implementation of sustainable Community Development programs aimed at achieving the empowerment and improved standards of living

for vulnerable groups is referred to as peace-building. This subject examines and critiques some of the strategies of peace-making and peace-building that have been adopted both within Australia and internationally.

School Social Sciences

Discipline Sociology

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Restrictions

Successful completion of 40 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine the moral and philosophical issues of humanitarian intervention
2. Critically assess the justification of armed interventions
3. Describe issues of diplomacy and mediation in conflict resolution situations
4. Identify, examine and critique actions of the State, Business and Third Sectors during humanitarian crises and community development initiatives
5. Design a needs-based program related to peace making and peace building

Subject Content

- War, revolution and humanitarian intervention
- Social dilemmas; fundamental attribution error; evolving motives; communication; changing the pay-offs.
- Cooperation and peace; building cohesiveness; setting superordinate goals; improving attitudes; group and superordinate identities
- Bargaining; mediation; integratrive agreements; controlled communications
- Mapping the ideological battleground: Doubts about humanitarian intervention and development – moral and legal theory. - Examining the UN peacekeeping mission (idea, practice and criticism)
- Redressing structural violence and reforming economic relationships.
- Working with vulnerable groups - the power and responsibilities of the state.
- The challenges for corporate citizens and the power and responsibilities of community groups.
- Building cultures of peace – acting for the future

HUMN 2038 Pigments of the Imagination

Credit Points 10

Legacy Code 101752

Coordinator Madison Shakespeare (https://directory.westernsydney.edu.au/search/name/Madison Shakespeare/)

Description This subject is available to all Undergraduate students who have open electives. Pigments of the Imagination challenges the accepted view that there is such a thing as 'race' based on skin colour and that identity is based on it. This subject will encourage students to consider their own definitions of race and explore the view that it is an imaginary concept. Students will examine the various ways race as an imaginary concept permeates our education practices and cultural representations influencing the construction of racially classified positions for Indigenous Australians as well as all Australians. Students will be encouraged, by critically analysing a range of cultural texts to re-imagine Indigenous and Non-Indigenous relations through flipped mode of delivery supported by face to face tutorials.

School Humanities & Comm Arts

Discipline Studies In Human Society

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Restrictions

Successful completion of 40 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. explain how race is an imaginary concept and about power;
2. identify the various ways race as an imaginary concept permeates our education practices and cultural representations�f;
3. critically reflect on their own racialised position within Australian society;
4. critically analyse the way race as an imaginary concept has impacted the lives of Australia�fs �efirst peoples�f and Indigenous and Non-Indigenous relations; and
5. explore new ways of thinking and speaking/writing about difference, which challenges old race stereotypes.

Subject Content

This subject will address some of the following:
What does ?erace?f mean, to whom, where and when?
The history of ?erace?f
The notion that meanings i.e. race meanings are historically and culturally contingent
The construction and perpetuation of race is about power
Cultural politics and the practices of racialisation e.g. racialised identities, racialised relationships and racism
The politics of representations of ?ethe native?f, ?ethe primitive?f
The ?ereal?f, ?ethe essentialist?f and constructivist positions about race
What does ?estrategic essentialism?f mean and to whom?
The feminist conjuncturalist approach to race
The intersections of race, gender and nation

HUMN 2039 Political Terror

Credit Points 10

Legacy Code 101797

Coordinator Brett Bowden (https://directory.westernsydney.edu.au/search/name/Brett Bowden/)

Description Since the terrorist attacks of 11 September, 2001, threats of terrorism have been entrenched in both headlines and the collective psyche. Across the globe, terrorism, anti-terrorism and the politics of fear are influential factors in the formulation of domestic and foreign policies. The current wave of terror and counter-terror raises important questions. What do we mean by terror? Is the war on terror really a war like no other? Is the current terrorist threat unprecedented? This subject will examine historical precedents and theories of terrorism.

1. Define terrorism and political violence
2. Understand the history of politically motivated terror tactics
3. Distinguish between different forms of political terror
4. Identify significant events and movements in the history of political terror

Subject Content

- A history of Terror
- Terrorism & political violence
- early modern Terror
- Tyrannicide
- French Revolutionary Terror
- Red & white Terror in Soviet Russia
- Authoritarian Terror
- Genocidal Terror
- Anarchist Terror
- national Liberation Terror
- Fundamentalist Terror
- Anti-Terror

HUMN 2040 Politics of Sex and Gender

Credit Points 10

Legacy Code 100882

Coordinator Arunima Kishore Das (https://directory.westernsydney.edu.au/search/name/Arunima Kishore Das/)

Description This subject provides an introduction to the study of the contemporary politics of sex and gender. Students study key concepts and learn to apply these concepts in the analysis of current issues. Concepts covered include the meanings of sex, gender and sexuality; biology and social constructionism; gendered bodies; doing gender; equality and difference. The concept of intersectionality - how gender intersects in complex relationships of power with other differences such as ethnicity, sexuality, dis/ability and class - is central to this area of study. The subject explores the meaning and potential for social change for a more equitable society and the obstacles to that. Strategies examined range from the use of targets and quotas, to social and cultural activism. Students have the opportunity to explore areas of personal and scholarly interest.

HUMN 2044 Representing Everyday Life in Literary and Visual Cultures

Credit Points 10

Legacy Code 101917

Coordinator Lorraine Sim (https://directory.westernsydney.edu.au/search/name/Lorraine Sim/)

Description This subject explores how the realm of everyday life has been imagined and represented in a range of literary traditions and visual and media cultures. It examines what we understand by this concept, realist and experimental approaches to its representation,

and how everyday life is shaped by various historical, social and cultural factors (e.g. technology, gender, class, war). With a focus on modern and contemporary texts and contexts, students will study primary works in relation to key theories of the everyday. Possible topics include: Victorian realism, Surrealism, stream of consciousness narration, social documentary photography, social realist cinema, postmodern narrative, blogs.

School Humanities & Comm Arts

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse ideas and representations of the ordinary/everyday in relation to specific literary and visual traditions and forms
2. Demonstrate a familiarity with some of the key theories of the everyday in cultural studies and how they can be applied to specific works of literature or visual media
3. Identify the relationship between concepts of the everyday and historical, social and cultural contexts
4. Build capacities in the close reading of literary and/or visual texts
5. Demonstrate skills in oral and written presentation, with a focus on writing skills and effective argument.

Subject Content

. Representations of the ordinary and everyday life in one or more literary genres (e.g. prose fiction, poetry, life writing) and visual media (e.g. photography, film, television)
. Definitions and theories of the everyday in relation to cultural formations and practices (e.g. Walter Benjamin, Surrealism, Henri Lefebvre, Georg Lukacs, Roland Barthes, Ben Highmore, Rita Felski, Jean Baudrillard);
. Critical debates surrounding the (im)possibility of representing the everyday;
. The intersections between the everyday and modernity as related to the primary texts (e.g. spaces, technology, class, ethnicity, gender, war/terrorism, modes and technologies of representation);
. The close study of a select number (e.g. 4) of specific literary traditions and visual and media cultures in terms of their engagement with the subject matter of the everyday. Possible topics include:
- Victorian realism and series fiction
- Stream of consciousness narration
- The everyday and poetic tradition (e.g. Romanticism, Imagism, Objectivism)
- Postmodern narrative
- Blogs and other online media (Twitter, Facebook etc.)
- Surrealism
- Documentary photography
- social realist cinema (e.g. kitchen sink drama)
- Hyperrealism

HUMN 2046 Researching Culture

Credit Points 10

Legacy Code 101906

Coordinator Alexandra Coleman (https://directory.westernsydney.edu.au/search/name/Alexandra Coleman/)

Description This subject introduces students to the diverse field of cultural research. It outlines and explains qualitative research methods and methodologies used by cultural researchers. Tutorials and assessment tasks involve 'hands-on' activities designed to familiarise students with the research process and research practices that explore taken-for-granted aspects of everyday life such as interviews, focus groups and observation based research; as well as sensory research, the use of diary methods, and the critically important ethical dimensions of social and cultural research. Through completion of this subject, students will gain critical literacies in creating and analysing a range of qualitative data.

Level Undergraduate Level 2 subject

Pre-requisite(s) HUMN 1066 Introduction to Culture and Society OR HUMN 1049 Understanding Visual Culture

Restrictions

Successful completion of 40 credit points including one of the pre-requisite subjects shown above.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain and appropriately utilise key methods used in cultural research
2. Critically discuss and evaluate cultural research projects
3. Demonstrate understanding of contemporary debates about the practice and ethics of cultural research

Subject Content

1. Introduction to cultural research
2. Exploring experience: conceptual and ethical issues
3. Interviews
4. Focus Groups
5. Observation based research

6. Sensory research
7. Researching material culture
8. Diary method
9. Statistics and cultural research
10. Mixed methods

HUMN 2048 Revaluing Indigenous Economics (Day Mode)

Credit Points 10

Legacy Code 101753

Coordinator Madison Shakespeare (https://directory.westernsydney.edu.au/search/name/Madison Shakespeare/)

Description Revaluing Indigenous Economics will examine Australia's Indigenous economy and its dynamics. It will challenge students to reflect on the significant contribution Indigenous Australians have made and continue to make to our growing economy. It will also challenge students to rethink the politics of the welfare economy as it relates to Indigenous Australians. Students will be introduced to a number of enterprise development case studies for example, The Arts, Mining and Land Development, Tourism and the Environment, Sports and Small Business.

School Humanities & Comm Arts

Discipline Indigenous Studies

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Restrictions

Successful completion of 40 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. explain the foundations and structures of ﷿etraditional﷿f Indigenous Australian economies;
2. identify key issues and challenges impacting Indigenous peoples﷿f business success;
3. investigate the significant contribution Indigenous people have and continue to make to the Australian;
4. discuss Indigenous peoples﷿f participation in the mainstream Australian economy.

Subject Content

Overview of ?etraditional?f foundations and structures of Indigenous economies e.g. trade and trade routes; importance of land for Indigenous people, ceremonial practices and ?ecaring for country?f
The impact of invasion and colonisation by the British and Indigenous displacement and dispossession from ?ecountry?f
Government policies and the management of Indigenous lives
Politics of welfare dependence
Politics of stolen wages and unpaid work
Indigenous contemporary contribution to the Australian economy ?
The Arts, Tourism and the Environment, Mining and Land Development,

Community Services and Enterprises, Voluntary Community Work rebutting the myths and stereotypes about Indigenous people

Level Undergraduate Level 2 subject

Equivalent Subjects HUMN 2049 - Social Research Methods LGYA 7650 - Research and the Human Services (AREPMETRO)

Restrictions

Students must be enrolled in 1689 Bachelor of Community and Social Development and must have successfully completed 60 credit points including subject 101763 - Understanding Society (Block Mode).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Review research literature as a first step in the research process;
2. Identify issues to be considered at each stage of the research process for both qualitative and quantitative research;
3. Identify and explain key research themes and concepts;
4. Apply research knowledge and skills to design a small scale research project;
5. Apply research knowledge and skills to conduct a small scale research project, and analyse and interpret the results;
6. Recognise and act to address issues in research with Aboriginal and Torres Strait Islander participants and communities.

Subject Content

- Approaches to research: key themes and concepts (e.g., epistemology, ontology, axiology; variability and measurement; reliability and validity; correlation and causation)
- methods and methodology: Qualitative, quantitative, mixed methods
- designing research: literature Review, theoretical framework, questions and hypotheses, methodology, data collection, data analysis and interpretation
- research ethics
- Sampling
- Qualitative interviews; qualitative designs
- survey methodology and questionnaire design
- Analysing Qualitative data
- Analysing quantitative data (statistical analysis and analysis software)
- Reporting research
- indigenous research Issues, particularly for research with Aboriginal and Torres Strait Islander participants and communities.

HUMN 2053 The Economics of Cities and Regions

Credit Points 10

Legacy Code 101591

Coordinator Stephen Healy (https://directory.westernsydney.edu.au/search/name/Stephen Healy/)

Description 'Economics of cities and regions' introduces the major political-economic issues facing cities and regions. Class discussions investigate how political-economic forces (such as globalisation, structural change etc) shape the development of cities and regions. Class activities enable students to apply economic principles to urban and regional planning and policy decisions, and teach students to analyse the social and distributional impacts of policy and planning decisions.

HUMN 2056 The Racial State

Credit Points 10

Legacy Code 101990

Coordinator Alana Lentin (https://directory.westernsydney.edu.au/search/name/Alana Lentin/)

Description Racism is often thought of as both primordial and pathological. Racist states, such as Apartheid South Africa or Nazi Germany, are usually considered to be exceptions rather than the rule and mainly a thing of the past. This subject examines the ways in which, despite the challenge to racism, race remains a fundamental organising idea in modern western states, one that has a direct affect on our everyday realities. We will examine how race is reproduced through politics, culture, socialisation and economic structures. We will consider the effects this has on individual and societal lived experience in complex post-immigration, postcolonial societies.

School Humanities & Comm Arts

Discipline Studies In Human Society

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Equivalent Subjects HUMN 2063 - New Ethnicities Old Racisms

Restrictions

Successful completion of 40 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse the relationship between concepts of race and racism, state power and individual experience.
2. Apply key theoretical analyses to their understanding of race as 'lived experience'.
3. Critically evaluate the relationship between institutional apparatuses and public cultures within which racist ideas are expressed.
4. Present ideas in a clear and well-constructed manner through seminar discussions and debates.

5. Work interactively using online methods of communication to plan projects and get feedback from student peers
6. Work collaboratively in the design and conduct of a small-scale research project.

Subject Content

1. Introduction: Race and power
2. Race, racialisation and experience
3. Whiteness, white possession and white supremacy
4. Whose Country? Race and the colonial experience
5. Mobility and Change
6. Institutional and systemic racism
7. State and Popular racism: Islamophobia
8. 'Policing the Crisis'
9. Abolitionist Visions
10. Race, digital technology and social media

HUMN 2057 Tourism in Society

Credit Points 10

Legacy Code 101598

Coordinator Felicity Picken (https://directory.westernsydney.edu.au/search/name/Felicity Picken/)

Description In 2023 this subject replaced by TOUR 2004 - Tourism and Festivals in Society. In this subject students approach tourism as a cultural and social phenomenon and tourism industries, tourist behaviour, the tourist experience and tourism impacts are examined through a socio-cultural lens. Considering tourism as an agent of social change, the subject explores the interplay between tourism, mobility and globalisation, tourism and development, and tourism and world events. The subject will also unpack some of the common motivations for leisure travel, explore the role of tourism in everyday life, and examine the interconnections between the media, consumer culture, visual culture and the tourist experience.

HUMN 2058 Urban Life/Urban Culture

Credit Points 10

Legacy Code 100291

Coordinator George Morgan (https://directory.westernsydney.edu.au/search/name/George Morgan/)

Description Big cities can be frantic, difficult, polluted and often dangerous places in which to live. Yet cities also contain possibilities for social and cultural stimulation not available elsewhere. This subject traces the origins and development of modern cities in all of their complexity. It looks at how industrial cities emerged in Europe and Australia, and at the threat that uncontrolled urban growth posed to social order. We examine the conditions of urban life that promote alienation and anonymity, and how people overcome social fragmentation. There is discussion of modern cities - from those that sprawl, like Sydney, to the relatively compact and dense centres of Europe, the north-eastern United States and Asia. We look at the

gendered nature of public space, and how class and ethnic tensions are played out in cities. Students read a range of texts on urban culture and society. These include classic works by writers like Friedrich Engels, George Simmel and Walter Benjamin, to the contemporary work of David Harvey, Richard Sennet and Mike Davis.

School Humanities & Comm Arts

Discipline Human Geography

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Restrictions

Successful completion of 40 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. describe the processes by which early industrial cities were formed;
2. evaluate the public and political responses to social tensions and inequalities in these cities;
3. analyse the forces that promote urban redevelopment and associated social and political reform;
4. evaluate the motivations behind, and consequences of, urban ethnographic writing and reportage in late nineteenth century Britain and Australia;
5. explain how and why suburbanised low density cities (particularly Sydney) emerged in the period after World War II; and
6. assess how social identities are influenced by urban forms - size, density, zoning practices, division of labour.

Subject Content

Growth of cities in early industrial England
Revolution and Rebuilding in Paris - the legacy of Haussman
Henry Mayhew and the London Poor
The Slum Clearance movement in Britain and Australia
Modernism, Town Planning and the cultivation of social order
Sydney and the suburbs
Urban Disorders, Moral Panics and Defensible Space - From Sydney to Los Angeles
Gender and Public Space

HUMN 2061 Women with Muslim Identity

Credit Points 10

Legacy Code 101879

Coordinator Jan Ali (https://directory.westernsydney.edu.au/search/name/Jan Ali/)

Description An exploration of perceptions of Muslim women and of the meaning and significance of Muslim identity for women today. Students will analyse ways in which Muslim women perceive themselves and are perceived by others in the context of contemporary Islamic revivalism, focussing on differences and relationships among various outsider's and insider's perceptions. A central focus will be the resurgence of the veil in the context of contemporary Islamic revivalism; Students will explore the meanings of veiling in the context of discussions and debates on the role of women, equality and freedom, cultural diversity, religious values and secularity.

Successful completion of 40 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. describe and analyse cross-cultural perceptions of Muslim women
2. describe and analyse experiences of contemporary Muslim women
3. apply these analyses within discussions of diverse conceptions of freedom and agency, modernity and religion, and women's roles
4. engage in intellectual debate and dialogue on these issues

Subject Content

. analysis of cross-cultural perceptions of Muslim women
. social analysis of the resurgence of the veil in the context of contemporary Islamic revivalism
. social analysis of the role of women in Islam
. analysis of experiences and self-understandings of some contemporary Muslim women
. analysis of diverse conceptions of freedom and agency
. analysis of diverse conceptions of modernity, secularity, and religion
. analysis of diverse conceptions of women's roles, women's equality and difference

HUMN 2062 Youth Cultures and Moral Panics

Credit Points 10

Legacy Code 100298

Coordinator Sherene Idriss (https://directory.westernsydney.edu.au/search/name/Sherene Idriss/)

Description Young people have long been the focus of social fears. Public figures regularly express concern about the disorder created by unruly youths, or the effects of change on young people. This is the case in relation to popular music, 'youth gangs', new technologies and other areas. This subject will consider how young people became defined as a problem by politicians, policy, the media and others. Resulting 'moral panics' represent social anxieties around economic, social and technological change, producing calls for 'solutions' which often entail repressive laws or policing. Students will examine a range of case studies from Australia and elsewhere.

School Humanities & Comm Arts

Discipline Sociology

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Restrictions

Successful completion of 40 credit points of study in currently enrolled program.

Assumed Knowledge

Satisfactory understanding of key issues and concepts of first year core subjects.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Understand the nature and formation of moral panics
2. Describe and explain the key features and concepts of subculture theory
3. Investigate the emergence of the category of youth in public discourse
4. Examine the role of the media in amplifying public insecurities around youth and in identifying 'folk devils'
5. Assess the social and economic roots of disorder among young people
6. Consider the connections between social anxieties, governance, policing and media coverage of youth cultures and disorder
7. Evaluate the connections between youth, ethnicity, class and gender in representations of youth in contemporary Australia

Subject Content

- Social contexts of youth cultures and moral panics - industrialisation, migration, consumer society and urbanisation
- Social dimensions of youth cultures and moral panics - relations of class, gender and race/ethnicity
- Moral panic theory, risk and social anxiety
- Theories of youth culture and subcultures
- Media reporting and policing of 'problem youth' in contemporary Australia
- Case studies of youth cultures and moral panics
- Understanding diverse youth cultures in global contexts

HUMN 2064 Responses to Disaster: School of Social Sciences Winter School

Credit Points 10

Legacy Code 102790

Coordinator Kathleen Openshaw (https://directory.westernsydney.edu.au/search/name/Kathleen Openshaw/)

Description This elective subject, focused on "responses to disaster", is applicable to all undergraduate degree programs with an elective component in the School of Social Sciences. Students will undertake a 14-day international field trip where they will be immersed in a rich intercultural learning and student-centred environment. Students are given the opportunity to apply their discipline specific skills and knowledge in understanding how natural disasters impact various facets of a local community, and how these are managed in a real-world setting. Students must have a medical clearance letter and any requisite vaccinations. They should provide this letter to the Subject Coordinator prior to enrolment and departure.

School Social Sciences

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Restrictions

Students must be enrolled in one of the following programs: 1664 Bachelor of Tourism Management 1665 Bachelor of Community Welfare 1666 Bachelor of Social Work 1667 Bachelor of Social Science 1709 Bachelor of Criminal and Community Justice 1710 Bachelor of Criminology 1713 Bachelor of Criminal and Community Justice/Bachelor of Social Work 1732 Bachelor of Planning 1733 Bachelor of Social Science (Advanced) 1734 Bachelor of Policing (Leadership Program) 1735 Bachelor of Humanitarian and Development Studies 1790 Bachelor of Anthropology 1837 Bachelor of Cyber Security and Behaviour 1844 Bachelor of Policing 6023 Diploma in Social Science/Bachelor of Social Science 6025 Diploma in Criminal and Community Justice/Bachelor of Criminal and Community Justice 6027 Diploma in Social Science/Bachelor of Humanitarian and Development Studies 6030 Diploma in Social Science/Bachelor of Tourism Management 6044 Diploma in Social Science (Policing)/Bachelor of Policing. Students must have achieved a minimum GPA of 5 in order to enrol. Students must have completed 80 credit points of study. Students must have a medical clearance letter from their GP, and the appropriate vaccinations. They should provide this proof to the subject Coordinator prior to enrolment and departure.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine the impacts of, and local strategies to manage, natural disasters across different facets of community life using an evidence-based approach.
2. Identify the relationships between local and global processes through the lens of responses to disaster.
3. Apply intercultural competence and critical reflexivity in a cross-cultural collaborative setting.
4. Disseminate learning and information in various formats and to different audiences.

Subject Content

1. How to prepare for cross-cultural collaboration (in an Indonesian context).
2. The ethics and politics of working in a disaster context.
3. How to understand and apply local responses to disaster through different disciplinary lenses.
4. How to consolidate and disseminate intercultural learning.

Assessment

HUMN 2065 Self and Society

Credit Points 10

Legacy Code 102788

Coordinator Irena Veljanova (https://directory.westernsydney.edu.au/search/name/Irena Veljanova/)

Description This core theory subject for sociology majors introduces students to traditional and contemporary debates in social thought and provides tools for sociological analysis. The subject outlines the development of sociological thought in the context of changing social realities and relations between the individual and society, with a particular focus on the formation of the Self. A number of theorists and theoretical areas are addressed, spanning over 150 years of evolving sociological analysis. This enables students to better grasp the relation between theory and application, the diversity of sociological analysis, as well as providing the capacity to think across a number of different sociological schools of thought.

Successful completion of 80 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe traditional and contemporary sociological debates on the formation of the self.
2. Outline the notion of agency, and critically evaluate the relations between the individual and society.
3. Apply major theories and theorists in sociology and social thought.
4. Demonstrate a critical, reflexive stance on classical and contemporary sociology in written form.
5. Analyse a real-life social issue through a sociological lens.
6. Compare and contrast different schools of sociological thinking.

Subject Content

Introduction: Relation between the Self and Society
Classical sociologists: from Tradition to Modernity
Modernity 2: Late, Post- and Liquid Modernity
Consciousness and Identity
Values and Critical Theory: The Critique of Instrumental Reasoning and Reification
Value Freedom, Value Relevance and Political Commitment in Sociology
The Political Value Commitments of Sociologists and the Philosophical Justification
The Sociological Imagination and Civic Ethno methods
The Sociological Imagination and Political Strategy
'Key Sociological Thinkers'

Assessment

HUMN 2066 Investigating and Communicating Social Problems

Credit Points 10

Legacy Code 102816

Coordinator Mandy Scotney (https://directory.westernsydney.edu.au/search/name/Mandy Scotney/)

Description This subject builds interdisciplinary social science skills to investigate and engage with social challenges that impact contemporary society. Students are introduced to the methods and principles of research for community consultation, strengths assessment and capacity building. Data literacy skills will be developed, with a focus on understanding and creating qualitative and quantitative data and how they are used within contemporary society. Students will be asked to investigate and intervene in social challenges using ethical and evidence-based analyses. The subject is aimed to suit students who are pursuing either a research or occupational trajectory and assessments are tailored to discipline-appropriate learning.

Level Undergraduate Level 2 subject

Equivalent Subjects HUMN 2049 - Social Research Methods

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss contemporary social challenges and the role of research in taking affirmative action.
2. Develop data literacy skills within the contexts of social research, professional practice, and engaged citizenship.
3. Explain how quantitative and qualitative data are used by various elements of society.
4. Address issues surrounding bias and misinformation regarding social issues.
5. Apply problem solving skills using both written and verbal forms of communication.

Subject Content

Contemporary social issues and challenges within the community
Data literacy for social and professional practice
Bias and misinformation in contemporary society
Numerical Literacy
Data collection and analysis for community consultation and capacity building
Community strengths and needs assessment

HUMN 2067 History of the Ancient World

Credit Points 10

Legacy Code 102814

Coordinator Gregory Barton (https://directory.westernsydney.edu.au/search/name/Gregory Barton/)

Description Students explore the rise and fall of major civilizations in the ancient world. The subject surveys empires from Europe to East Asia. The subject surveys the transition from hunter gatherers to the age of agriculture and the rise of city states, and vast empires with far-flung trading networks. It also looks at the impact of ancient pandemics, technology and alcohol, mythology, religion and philosophical ideas. The subject allows students to explore how ideas of nature and spirituality defined imperial power centres and how these empires in turn drove trade and created vast cultural zones that still impact the world today. Students will read and respond to the voices of the past and forge their own interpretation of the broad outline of the ancient world.

Restrictions

Students must have successfully compeleted 40 credit points in currently enrolled program

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Compare the historical experiences of ancient societies with a focus on daily life.
2. Examine the key features and characteristics of the civilizations studied.
3. Investigate and apply primary and secondary sources to the study of ancient societies.

Subject Content

1. From Hunter Gatherers to Agriculture.
2. Deep History in Eurasia, Australia and Africa.
3. Environmental and Health Impact of Agriculture.
4. Writing and Sumer.
5. Trade Networks: Assyria, Babylon and Harappan.
6. Ancient Egypt.
7. Ancient Persia.
8. India and Hinduism.
9. China and Buddhism.
10. Greece.
11. Rome.
12. Mediterranean Christianity.
13. Science and Technology in Ancient Empires.

HUMN 2068 Cultures of Southeast Asia and Oceania

Credit Points 10

Legacy Code 102843

Coordinator Rob Costa (https://directory.westernsydney.edu.au/search/name/Rob Costa/)

Description This subject will introduce students to ethnographic field study through a close examination of two regions with which Australia is geographically and politically aligned; Oceania (the Pacific Islands) and South-east Asia. Drawing upon classic and contemporary ethnography the subject will provide opportunities for comparative and trans-historical studies of how cultures in these regions have been constructed and changed in relation to larger global dynamics. The subject will also provide an insight into the ways in which social theory is developed in the context of attempts to explain and interpret cultural difference. Key topics of study, explored through case studies, will include the colonial experience, tradition and modernities, nations and nationalism, transnationalism, religion, social conflict, and material cultures. The subject will include a close study of visual and virtual research methodologies.

School Social Sciences

Discipline Anthropology

Level Undergraduate Level 2 subject

Equivalent Subjects HUMN 2024 - Ethnographies of Southeast Asia and the Pacific

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply anthropological concepts to the description of cultural diversity in Southeast Asia and the Pacific islands.
2. Analyse some of the ways symbolic cultures and traditions are influenced by political, material and environmental factors.
3. Draw upon ethnographic case studies to explain regional similarities and differences.
4. Apply anthropological theories to case studies about cultural change.
5. Analyse some ways visual anthropology (film, photography) can effectively aid in the description of cultural phenomena.

Subject Content

The peoples of Southeast Asia and Oceania.
The Pacific Islands and Southeast Asia in the colonial imagination.
Melanesian and Polynesian anthropologies.
Chiefs and Big Men ? governance and tradition.
Gifts, symbols and material culture.
Anthropologies of Southeast Asia: Indonesia and Thailand.
The village, the nation and nationalism in Indonesia, Thailand and Malaysia.
Global interventions: the IMF, the World Bank and INGOs in Cambodia, Indonesia, and Laos.
Commodifying culture ? Southeast Asia and Oceania as tourist destinations.
Australia in the Region.
Climate change, food security and other contemporary challenges in the region.

Assessment

HUMN 2069 Society, Culture and Human Diversity

Credit Points 10

Legacy Code 102844

Coordinator Malini Sur (https://directory.westernsydney.edu.au/search/name/Malini Sur/)

Description In this subject students will conduct comparative studies of how people create a living and make meaning of their everyday experiences in various contemporary contexts. By using cultural diversity as an analytical lens, students will engage with the broader questions about what it means to be human, how cultures change and adapt and how studies of human diversity can provide answers to many of the challenges of the future. Through case studies, critical analyses and self-reflection students will also examine how key subject themes such as cultural competence, ethnographic inquiry and comparativism are applied in anthropology and other key employment areas for social science and humanities graduates.

Level Undergraduate Level 2 subject

Equivalent Subjects HUMN 2012 - Anthropologies of the Everyday

Restrictions

Successful completion of 40 credit points

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply anthropological concepts to the comparative study of contemporary social and cultural phenomena.
2. Analyse how everyday social behaviour and practice are shaped by cultural factors.
3. Articulate some ways that studying everyday cultural expressions and experiences may help us develop cultural competence.
4. Evaluate the concept of ecultural diversityf through self-reflection.
5. Apply anthropological theories to case studies.
6. Utilise basic observational techniques in order to study aspects of cultural diversity.

Subject Content

Cultural competence through comparative studies.
Belonging and homemaking; space and place.
Everyday communication.
Work, production and exchange.
Childhood and schooling.
Love and friendship.
Food as a cultural entity.
Understanding the human body/embodied experiences.
Understanding violence, illness and death.
Human/animal relations.
Conspicuous consumption.
Human/technology relations.

HUMN 2070 First Peoples and Criminal Justice

Credit Points 10

Legacy Code 102916

Coordinator Lindsay McCabe (https://directory.westernsydney.edu.au/search/name/Lindsay McCabe/)

Description How does colonialism underscore the foundational narratives, knowledges and operation of the legal and criminal justice institutions of colonised nations? Focusing primarily on the Australian context of colonial invasion and settlement, this subject explores the plight of Indigenous peoples and their severe over-representation in the Australian criminal justice system. Studying the impact of colonisation and exploring Indigenous narratives, students will critically examine issues faced by Aboriginal and/or Torres Strait Islander people and their experience of criminal justice in Australia. Overall, the subject will equip students with an understanding of the relationship between dominant colonial narratives of race and institutional racism, while considering how Indigenous knowledge can inform better social and criminal justice outcomes for Indigenous populations. Comparative examples of criminal (in)justice for Indigenous populations in other colonised nations will also be considered.

School Social Sciences

Discipline Indigenous Studies

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Equivalent Subjects CULT 2019 - First Peoples and Criminal Justice

Incompatible Subjects WELF 2008 - Human Rights Human Services and the Law

Restrictions

Successful completion of 40 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Understand the enduring social and criminal justice impact of colonisation on Indigenous populations.
2. Develop a critical appreciation of the colonial underpinnings of our legal and criminal justice systems and the notion of institutional racism.
3. Demonstrate a robust understanding of intersectional disadvantage as it impacts Australia fs First Peoples.
4. Apply decolonial and critical postcolonial texts and knowledges to contemporary criminal justice interventions.

Subject Content

Invasion and settlement: the history of colonisation in Australia
Colonialism, racialisation and criminalisation of Indigenous peoples
Liberalism and the imposition of white man?fs law
The ?ewelfare?f state, protectionism and Stolen Generations
The legacies of colonialism: are we post-colonial?
Contemporary social and criminal justice issues affecting remote and urban Indigenous populations in Australia:
- Intersectional disadvantages affecting Indigenous populations: race, gender, class, disability
- Institutional racism and over-intervention
- Over-policing and deaths in custody
- Indigenous over-representation in prisons
Decolonising criminal justice: Indigenous knowledges informing social and criminal justice outcomes

HUMN 2071 Knowledge Journeys

Credit Points 10

Legacy Code 800240

Coordinator Robert Salama (https://directory.westernsydney.edu.au/search/name/Robert Salama/)

Description This subject is designed for high-achieving students enrolled in the Bachelor of Creative Leadership or Advanced degrees. It examines sources of knowledge and how we learn. Students are supported to approach new knowledge as a journey of developing skills as independent, life-long, self-directed learners. Analysis of knowledge journeys of others, using creative enquiry, and Indigenous learning techniques, are key learning activities in the unit. A focus on knowledge and research journeys, rather than 'outcomes' alone, facilitates learning from mistakes in seeking solutions to real world problems. Fundamental research approaches will be considered and applied in the subject.

School Social Sciences

Discipline Studies In Human Society

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Equivalent Subjects HUMN 2045 - Research Stories

Restrictions

Students taking the Bachelor of Creative Leadership (BCL) must have completed at least 40 credit points in their base degree, achieved a minimum GPA of 5.0, and must enrol in the unit under the BCL. Students who are taking the unit as an elective or part of the advanced degrees, must have completed at least 40 credit points and achieved a minimum GPA of 5. Enrolment in the unit is at the discretion of the Academy or the Director of the Academic Program.

Learning Outcomes

1. Analyse knowledge journeys from different disciplinary perspectives.
2. Explain theories of learning, different types of learning, sources of knowledge, perception, and Aboriginal learning techniques.
3. Develop a framework for growing as life-long independent learner.
4.Apply techniques used in this unit to produce a research narrative.
5. Evaluate mistakes made during knowledge journeys.

Subject Content

1. Life-long, self-directed, self-regulated learning skills and approaches.

2. Sources of learning and techniques for creative enquiry.
3. Aboriginal learning techniques and learning as a process.
4. Knowledge journeys and learning from failure.
5. Research narratives and story-telling.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

HUMN 2072 Logic, Argumentation and Post-Truth

Credit Points 10

Legacy Code 800241

Coordinator Robert Salama (https://directory.westernsydney.edu.au/search/name/Robert Salama/)

Description The subject is designed for high-achieving students enrolled in the Bachelor of Creative Leadership or Advanced degrees. This subject prepares learners for leadership roles by developing their skills in logical and rhetorical argumentation, and persuasive techniques. Throughout the subject, students will appraise the structure of logical and rhetorical arguments, apply persuasive techniques, and examine the influence of post-truth on global issues and public opinion.

School Social Sciences

Discipline Studies In Human Society

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Equivalent Subjects HUMN 2035 - Logic Rhetoric and Argumentation

Restrictions

Students must have successfully completed 40 credit points of study in their program with a minimum GPA of 5.0 to enrol in this subject.

Students who are enrolled in the Bachelor of Creative Leadership (BCL) must enrol in the subject under the BCL. Enrolment in the subject for students enrolled in the BCL is at the discretion of the Academy or the Director of Academic Program.

Learning Outcomes

1. Critique fallacious argumentation from different disciplinary perspectives.
2. Analyse and apply persuasive techniques in interdisciplinary contexts.
3. Contrast logical persuasive techniques and post-truth in relation to local and global issues.
4. Evaluate post-truth perspectives and the role of social media in shaping public opinion.
5. Construct verbal and written arguments that effectively incorporate techniques learned in this unit.
6. Critically reflect on their learning in the unit, in relation to developing personalised strategies for logical and philosophical argument argumentation.

Subject Content

1. Aristotle's persuasive techniques, ethos, logos, and pathos.
2. The structure of philosophical arguments – deductive and inductive - validity and soundness
3. Formal and informal fallacies and euphemism.
4. Logic, reasoning, post-truth and public opinion.
5. Differentiating between logically structured arguments (premises to conclusion) and rhetorical arguments designed to persuade.
6. Post-truth - four theories of the press.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

HUMN 2073 Issues in Contemporary Heritage

Credit Points 10

Coordinator Donna James (https://directory.westernsydney.edu.au/search/name/Donna James/)

Description The aim of this subject is to get students thinking critically about heritage. To do so, it examines two main questions: "What

is heritage?" and "Why does it matter?". While the answers to both may appear fairly straightforward, this subject is designed to make students question and problematise their own assumptions, rethink what is and is not heritage, and consider why, in fact, we even care at all. The subject will introduce concepts such as national identity, memorialisation, belonging, collective memory, forgetting and repatriation. It will also introduce and examine heritage legislation, theory and practice.

School Social Sciences

Discipline Human Geography

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Equivalent Subjects TOUR 2001 - Issues in Contemporary Heritage

Learning Outcomes

1. Generate an inventory of different types and uses of heritage
2. Summarize different approaches to heritage in varying geographic and cultural settings
3. Analyse a contemporary heritage issue in a real-world context, namely: heritage and conflict; heritage 'ownership'; heritage and identity; heritage and politics; looting; repatriation; heritage and destruction; and commemoration
4. Identify Indigenous standpoints within contemporary heritage debates
5. Utilise appropriate online technologies to organise, share and communicate heritage-related topics and issues

Subject Content

1. A history of heritage
2. The nature of heritage & its philosophies – what is heritage?
3. Heritage and identity
4. Issues of ownership and control
5. Indigenous Australia and heritage issues
6. Repatriation of Indigenous heritage
7. Heritage and collective memory
8. Heritage and collective forgetting
9. Conflicts over heritage (dissonance)
10. Heritage and museums
11. Heritage and popular culture
12. Heritage, Tourism and Events
13. Heritage, threat and sustainability

Assessment

HUMN 2074 Origins of the Secular West

Credit Points 10

Coordinator David Burchell (https://directory.westernsydney.edu.au/search/name/David Burchell/)

Description Early Modern European culture was underpinned by religious conceptions of nature, society and morality. The Modern West sees itself as having emancipated itself from these religious underpinnings, and as being grounded in human naturalistic and scientific values. This subject traces the transition from the first of these conceptions to the second, through politics, philosophy, culture and science.

School Humanities & Comm Arts

Discipline History

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Restrictions

Successful completion of 40 credit points of study in currently enrolled program.

Learning Outcomes

1. Critically assess the thought of a variety of key thinkers in early modern European scientific, political and religious thought.
2. Interpret and analyse primary historical sources.
3. Evaluate some of the key historiographic debates around the history of European religious and political thought and the emergence of a secular state.
4. Discuss the origins and ancestry of the modern Western conceptions of secularism and secular society.
5. Discuss the relationship between modern Western science and the culture of secularism.

Subject Content

• Sacred and secular in the Western tradition
• The Reformation and secular authority
• Galileo and the Church
• Hobbes on Scripture and civil sovereignty
• Reason and experiment in natural philosophy
• Locke on civil society and human nature
• Newton and the mechanical universe
• Rousseau and popular sovereignty
• Romanticism, faith and the modern personality
• Darwin and the modern idea of science
• The idea of universal religion: the Ethnographers

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

HUMN 2075 Sports History in Global Perspective

Credit Points 10

Coordinator Brett Bennett (https://directory.westernsydney.edu.au/search/name/Brett Bennett/)

Description The subject explores the history of popular sports, including cricket, rugby, soccer, golf, baseball, tennis, the Olympic Games, and table tennis. It uses case studies from different countries and time periods to highlight how sports shaped, and were shaped by national identity, politics, diplomacy as well as class, race and gender. Drawing on examples from Australia and the world, students learn about how the professionalisation of sports in the early 1900s created immense controversy over the participation of working class athletes. It also explores how sports became parts of national identity, such as cricket and rugby in Australia, sumo wrestling in Japan, and baseball in the United States of America. Students taking the subject will learn how popular attitudes towards men's and women's sports changed across the twentieth century as a result of large-scale social, political and cultural movements.

School Humanities & Comm Arts

Discipline History

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Restrictions

Successful completion of 40 credit points in currently enrolled program.

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Discuss key historical periods in the development of professional and amateur sports from the 1800s to the present;
2. Explain how and when sports facilitated national debates about class, race and gender;
3. Analyse major theoretical interpretations of the globalisation of sports;
4. Examine the way sports facilitated international diplomacy and sanctions regimes during and after the Cold War.

Subject Content

1. Sports: Just a Game?
2. Games We Play
3. Rules of the Game
4. The Rise of Professional Sports
5. Globalisation of Sports During the Age of Empire
6. Class and the Making of Rugby
7. Cricket: From 'Gentleman's Game' to International Pariah
8. Soccer: The Game that Captured the World
9. Tennis
10. Golf: Diplomacy and Power
11. Olympic Games and Diplomacy
12. Cold War sports diplomacy
13. Sports as Social Movements

HUMN 2076 The Classical Tradition

Credit Points 10

Coordinator David Burchell (https://directory.westernsydney.edu.au/search/name/David Burchell/)

Description The cultures and intellectual life of Ancient Greece and Rome influenced European life and thought for much of the succeeding two thousand years. But the greatest influence came with the 'classical revival' of the 1400s through to the 1700s, beginning with the 'Renaissance'. This subject outlines several key themes in Ancient

Culture: moral and political philosophy, literature, history, and rhetoric and the art of speaking, It then traces the later careers and revivals of these themes in the period 1400-1700.

School Humanities & Comm Arts

Discipline History

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Restrictions

Successful completion of 40 credit points in the student's current enrolled program.

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Critically assess the thought in a variety of disciplines in Ancient and Early Modern culture
2. Interpret and analyse primary historical sources.
3. Evaluate some of the key historiographic debates around the revival of Classical thought in the Renaissance and afterwards.
4. Discuss the survival and revival of Classical culture into the early modern and modern worlds.

Subject Content

- Ancient philosophy, literature and rhetoric in Ancient Athens and Rome
- Key Ancient philosophical figures and schools; key literary and rhetorical texts
- The Renaissance and the Western revival of classical learning
- Variant schools of thought on Classical culture in the 16th and 17th Centuries: 'neo-Stoicism'
- The reaction against Classical political thought in the 17th Century
- 'Republicanism' and its impact on political thought
- The 'Battle between the Ancients and Moderns'
- The survival and influence of Ancient politics in an era of Revolutions

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

HUMN 3009 Alternatives to Violence

Credit Points 10

Legacy Code 101570

Coordinator Zulfan Tadjoeddin (https://directory.westernsydney.edu.au/search/name/Zulfan Tadjoeddin/)

Description The key tenet of this subject is the belief that there are superior alternatives to violence for peace building. Holistic development (including socio-cultural, political, economic, governance, etc.) provides the best and most constructive alternatives to violence. The subject examines different alternatives to violence within the broader context of peace and development studies. Students will be equipped with theoretical approaches to alternatives to violence and an ability to evaluate and apply those alternatives in social development contexts.

School Social Sciences

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 80 credit points or subject 101573 Human Rights, Peace and Development.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically evaluate key theoretical approaches to alternatives to violence, non-violence and social change
2. Evaluate the logic and merit of different alternatives to violence and how those alternatives work
3. Apply different alternatives to violence to social development issues

Subject Content

Violence, non-violence, conflict and development
Conflict management, resolution and transformation
Religion and ethnicity
Conflict, natural resources and the environment
On structural violence: Poverty, inequality, marginalization and exclusion
Alternatives to violence (1): Democracy and political development
Alternatives to violence (2): Socio-economic development
Alternatives to violence (3): Civil society and participation
Social change and conflict
Social movements or rebellion?
Non-violence in action

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	4 attempts out of 6 quizzes	20	N	Individual

HUMN 3011 An Introduction to Contemporary Aboriginal Australia

Legacy Code 401242

Coordinator Glenda Mcdonald (https://directory.westernsydney.edu.au/search/name/Glenda Mcdonald/)

Student Contribution Band

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Restrictions

Successful completion of 80 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse contemporary cultural issues in Aboriginal Australia.
2. Apply newly acquired knowledge to their professional practice,
3. Critically reflect on a transformative learning experience in the development of cultural competence related to Aboriginal Australia.
4. Describe the influence of history, politics and economics on the health of Aboriginal Australians today.
5. Identify workplace strategies and practices which facilitate the improvement of the delivery of culturally competent professional practice.
6. Apply the cultural respect, cultural competence and Communication Framework within a professional capacity in relation to Aboriginal Peoples.
7. Apply theoretical concepts of assessment, communication and decision-making from studentðfs own disciplinary perspective to work with Aboriginal communities.

Subject Content

Three topic areas;
1. History of Aboriginal Australia 1787 - Historical periods of interaction between colonisers and Australian Aboriginal people. The period of colonisation from first contact to mid 1850s. The period of protection from mid 1850s to mid 20th century. The period of activism from mid 20th century onwards
2. Aboriginal Culture: A living culture - How cultural values and practices have continued and grown since colonisation. Values include the Dreaming, spirituality, connection to country, social organisation. Practices include stories/songs/dance/art, lore and law, traditional medicine, and rituals associated with births, deaths and marriages.
3. Aboriginal Australia in the Future: Where to from here? - Where to from here includes current state of land rights, activism, election of Aboriginal women to parliament, contemporary advocates (eg. Stan Grant), rise of media in Aboriginal affairs (eg.NITV)

HUMN 3012 Applied Indigenous Research Project

Credit Points 10

Legacy Code 102310

Coordinator Kaiya Aboagye (https://directory.westernsydney.edu.au/search/name/Kaiya Aboagye/)

Description In this subject students will undertake a guided personal inquiry project. Students will investigate and reflect on the practical, cultural and ethical complexities of being an Indigenous researcher. Students will examine ethics guidelines for research with Indigenous peoples and the realities of applying them in practice. They will study examples of Indigenous research scholarship to develop and present their own Statement of Research Philosophy.

Level Undergraduate Level 3 subject

Pre-requisite(s) HUMN 2050

Equivalent Subjects LGYA 1682 - Rethinking Research with Indigenous Australians Independent Study project (Block Mode) HUMN 3070 - Rethinking Research with Indigenous Australians Independent Study project (Day Mode)

Restrictions

Students must be enrolled in the Bachelor of Community and Social Development (BCSD) program. Students must have successfully completed 60 credit points of study.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the experiences of research of an Indigenous scholar;
2. Undertake a guided personal inquiry research project;
3. Create an individual statement of research philosophy;
4. Demonstrate presentation skills to describe and reflect on statement of research philosophy.

Subject Content

Self-reflective research methods for example personal inquiry, autoethnography
Ethics protocols and guidelines relating to Aboriginal and Torres Strait Islander peoples
Learning from experiences of Indigenous researchers

Complexities (practical, cultural and ethical) of being an Indigenous researcher
Indigenous methodologies and methods
Researcher approach and philosophy towards research

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

HUMN 3013 Australian Colonial History

Credit Points 10

Legacy Code 102004

Coordinator Carol Liston (https://directory.westernsydney.edu.au/search/name/Carol Liston/)

Description This subject introduces students to the 18th and 19th century foundations of modern Australia, and to the social, economic, political and cultural events that shaped Australian history. Students will be encouraged to consider the process of historical change within an historiographical framework and will use primary sources to explore some of these debates. Some of the themes explored will be colonisation, convictism, class, urbanisation, gender, land, indigenous society, culture and political developments leading to the federation of the Australian colonies in 1901.

Level Undergraduate Level 3 subject

Equivalent Subjects HUMN 1019 - Foundations of Modern Australia HUMN 3014 - Australian History 1860-1920

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate the skills necessary for an analytical approach to historical documents
2. Use skills of analysis, synthesis and fluid expression in oral and written presentation
3. Describe the various personalities, developments and forces- social, economic, legal, political, geographical and religious- responsible for shaping Australian society in the colonial period.
4. Evaluate historical events through the use of primary sources.

Subject Content

Topics will be chosen from the following:
- European-Aboriginal relations
- British motives for occupation: gaol, trading post or strategic colony?
- Convict Australia: The Convict system and its Legacy
- Geographical expansion: land policies, pastoralism, rural settlements, immigration
- political and constitutional Developments
- cultural and social life: education, religion, art and literature, welfare
- Late 19th-century Australian cities and urbanisation
- immigration
- economic and technological change, such as mining, railways
- colonial politics and The emergence of The Federal movement
- Employment - work in the cities, work in the country; women and work

- The labour movement
- developing/changing attitudes to race, class, gender and social reform/politics
- development of Australian identity through social change, cultural development and recreation

HUMN 3015 Australian History Around Us

Credit Points 10

Legacy Code 102516

Coordinator Helen Bones (https://directory.westernsydney.edu.au/search/name/Helen Bones/)

Description Historians are detectives, searching for clues and unravelling the puzzles of the past. A walk down your local street holds many clues about the history of a local area - from the name of the street, the architecture of the buildings, the trees planted by the road, even the new building that indicates a recent change. Local

studies are used as the foundation for socio-economic studies across many disciplines while an understanding of local history contributes to establishing personal and community identities. In this subject students will learn research skills to uncover the lives of people from the past, re-imagine familiar places and consider events long forgotten that happened in the streets of their suburbs. The final assignment is a chance to turn these discoveries into a new history for their community.

School Humanities & Comm Arts

Discipline History

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects HUMN 3038 - Exploring Local History

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Locate historical sources about Australian places
2. Interpret historical sources relating to a particular locality
3. Research people, places and events in the past
4. Explain the historical processes shaping the development of localities
5. Integrate a variety of historical resources into a historical narrative

Subject Content

Local history and national histories
Family history and community history
Observing signs of the past ?walking the streets, wandering the cemeteries
Hearing the past ? using oral histories
Investigating local history ?public records; maps and photographs
Using digital records ? tracing people and places
Investigating communities in the past ? getting around; earning a living; living locally - education, religion, sport and entertainment
Retrieving hidden or forgotten pasts
Telling the story - writing and exhibiting local history

Equivalent Subjects LGYA 0953 - Australian History Since 1920 LGYB 4929 - Australian History Since 1920

Restrictions

Successful completion of 60 credit points

Learning Outcomes

On successful completion of this subject, students should be able to:

1. To give students the background needed to make them perceptive and critical observers of contemporary Australian society and politics;
2. To present the major issues of political conflict in Australia over the last sixty years;
3. To encourage students to analyse the class interests in various conflicts;
4. To encourage students to develop an awareness of Australia's role in international affairs as it has developed since 1920;
5. To provide students with an overview of themes in recent Australian history, especially as they relate to issues of Australian identity;
6. To encourage students to further incorporate primary sources in their studies of Australian history and to develop skills that will make this possible.

Subject Content

Popular culture in the 1920s and 1930s
D.H. Lawrence, Kangaroo
The Great Depression- economic, social and political issues
Kylie Tennant's The Battlers
Foreign policy in the 1930s
World War Two- military and homefront issues
The 1949 coal strike

The Labor Split
The Cold War
The Petrov Affair
Immigration and suburbanisation
Aboriginal Issues
The Swinging Sixties and 1970s radicalism
The Whitlam dismissal
The New Right
The New Labor Right
Rupert Murdoch and Super League

HUMN 3017 Australian Indigenous History from Federation to Reconciliation

Credit Points 10

Legacy Code 101872

Coordinator Timothy Rowse (https://directory.westernsydney.edu.au/search/name/Timothy Rowse/)

Description This subject aims to explore the history of the relationship between Indigenous and non-Indigenous Australians from Federation (1901) to the present. At the beginning of the twentieth century, Australia became a nation without paying much attention to the first Australians. It was widely assumed that they would die out or at least remain an insignificant welfare problem. Instead, these first Australians survived and grew as a minority population; they also increasingly made themselves heard as a people - so successfully that in 2008 the Parliament of Australia felt obliged formally to apologise for their years of mistreatment. This subject highlights two stories: the non-Indigenous transition from complacency to engagement, and the survival and increasing political effectiveness of the descendants of Australia's first peoples.

School Humanities & Comm Arts

Discipline Indigenous Studies

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. describe and date the principal changes in public policy towards Aborigines over the period 1901-2010
2. identify the regional diversity of colonial structures and of Indigenous Australian's experiences
3. contextually interpret primary sources
4. critically appraise historical controversy

Subject Content

. The political, constitutional and economic position of Indigenous Australians in 1901
. Queensland's 1897- early 1920s
. The ideology and practice of 'protection'
. The rise of Aboriginal critics
. Torres Strait: industry and ethnic difference
. 1937 - the impossibility of a national policy
. Aborigines and TSIs in World War Two - a new deal?
. Assimilation in theory and practice
. Indigenous responses to assimilation
. The 1967 referendum
. Inclusion of Aborigines and TSIs in welfare state
. Land rights
. Remembering and debating 'the Stolen Generations'
. How the High Court rewrote Australian history
. The contested meanings of 'reconciliation'

HUMN 3018 Australian Indigenous History: From first contact to 'dying race'

Credit Points 10

Legacy Code 101919

Coordinator Timothy Rowse (https://directory.westernsydney.edu.au/search/name/Timothy Rowse/)

Description Until 1788, Australia was peopled by those who we now call Aborigines. Then Europeans arrived and began to spread across the continent, displacing and marginalising the Aborigines. This subject will tell the stories of that transformation, beginning with an account of the ideas and motivations of British authority in the late eighteenth century and concluding at the moment when six British colonies formed a federated nation. Topics to be covered will include: violence, humanitarianism, Christian missions, institutional authority. The course will emphasise and explain regional and temporal differences in the ways that Indigenous and non-Indigenous interacted. Students will study primary sources and learn to understand them in context.

School Humanities & Comm Arts

Equivalent Subjects LGYA 1557 - Australian Indigenous History

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the key theoretical concepts relevant to understanding Australia as a settler-colonial society.
2. Examine the geographically variable impact of colonisation and thus of Indigenous responses.
3. Describe the different phases and methods of colonial authority and Indigenous response.
4. Explain the persistence of a self-conscious Indigenous minority and of controversy about its entitlements
5. Analyse primary documents in order to understand the perspectives of government policies and social changes.
6. Evaluate the effects of colonising authority, against the stated aims of such authority
7. Apply historical approaches to identity formation to current debates about Australian society and history.

Subject Content

. European ideas about native peoples in late C18
.The colonisation of Port Jackson and Cumberland Plain, 1788-1820: law and violence
.Tasmania, 1804-1836: law and violence
.The Buxton Report 1837
.What missionaries tried to do up to 1850.
.Swan River, King George Sound and South Australia, 1829-1850: law and violence
.Protection: Coranderrk 1860-1900
.Protection? : Racial pessimism and Social Darwinism
.Queensland 1859-1897: law and violence
.New Norcia Mission 1847-1900
.The Torres Strait 1879-1900

HUMN 3019 Britain in the Age of Botany Bay, 1760-1815

Credit Points 10

Legacy Code 102079

Coordinator Simon Burrows (https://directory.westernsydney.edu.au/search/name/Simon Burrows/)

Description This subject introduces the social, economic, political and cultural forces that shaped the society from which the first white Australians came. It considers processes of historical change and uses primary sources to explore historical debates concerning these changes. Themes covered include social class; sex and gender; crime and punishment; industrial revolution, urbanisation, and public health; the public sphere; political life; war, militarisation, and empire. This subject places special emphasis on the use of digitised primary sources, training students in their use. It also requires an extended piece of original primary source-based historical research. The subject spans the period 1760-1815.

School Humanities & Comm Arts

Discipline History

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of the nature of the discipline of history.
2. Evaluate debates amongst historians.
3. Analyse historical documents and the conduct of original primary-source based historical research using digital resources.
4. Utilise skills of analysis, synthesis and fluid expression in the oral and written presentation of historical evidence or argument.
5. Utilise skills at video/oral presentation of project work and peer assessment.
6. Demonstrate an awareness of the forces - social, economic, cultural, political, geographical and religious - responsible for British society in the period examined.
7. Assess the influence of history on contemporary issues, attitudes and places.

Subject Content

Topics covered in lectures and tutorials will include:
- Polite society
- Industrialisation and urbanisation
- Commercialisation and Consumer culture
- Crime and Punishment
- sex and gender
- religion
- politics and The public sphere
- War, militarisation and empire
- Radicalism and Working class protest

Most topics will be delivered in a series of lecture pods of about 20 minutes each. Tutorials will serve as research skills workshops, instructing students in the conduct and methodologies of historical research. Emphasis will be laid on the use of key on-line resources, notably ECCO (Eighteenth-Century Collections Online); the Burney collection of early English newspapers; The Old Bailey on line. On line research training materials will also be provided.

Prescribed Texts

- Students will be recommended to buy one of the following for background and reference, according to their interests:
- Hilton, Boyd, A Mad, Bad and Dangerous People: England 1783-1846 (Oxford, 2006)
- Langford, Paul, A Polite and Commercial People: England 1727-1783 (1989)
- O'Gorman, Frank, The long eighteenth century: British political and social history, 1688-1832 (London : Arnold, 1997).
- Porter, Roy English Society in the Eighteenth Century (Allen Lane: London 1982)

HUMN 3023 Climate Change and Culture

Credit Points 10

Legacy Code 101870

Coordinator Fiona R Cameron (https://directory.westernsydney.edu.au/search/name/Fiona R Cameron/)

Description This subject introduces climate change as a complex social, cultural and political phenomenon, one that is re-shaping the

way we live in the world and future lifestyles. Because climate change is highly contested, the course critically examines the issue from different theoretical, disciplinary, social and cultural perspectives. Topics range from cultural theory and forms of social action to the history and construction of climate change as concepts and debates around nature, culture, science, economics and consumption; to social justice, Indigenous knowledge systems, popular culture, the media and Australian politics, global governance, cities and urban planning.

School Humanities & Comm Arts

Discipline Human Geography

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. recognise climate change as a social, political, cultural and economic issue;
2. explain the complexities of current debates and issues governing climate change culture
3. apply knowledge of climate change issues and debate in written analysis;
4. demonstrate skills in online and library-based research.

Subject Content

. History and construction of climate change and global warming as concepts
. Science controversies and the construction of climate change
. Cultural theory, methodologies and social action
. Post humanism and the climate crisis
. Debates around nature, culture, economics and consumption
. Climate change in popular culture
. Activism, new institutional forms and the climate crisis
. Indigenous knowledge systems
. Australian politics and global governance
. Cosmopolitics, social justice, climate refugees and immigration policy

. Technology and energy
. Food security
. Water
. Cities and urban planning
. Climate change and cultural institutions
. Communication and media as an intervening public
. Engaging with the Climate Crisis through Music and Art

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

HUMN 3024 Comparative Nationalism

Credit Points 10

Legacy Code 102003

Coordinator Margarite Poulos (https://directory.westernsydney.edu.au/search/name/Margarite Poulos/)

Description Nationalism, an ideology considered by many to have passed its peak, now dominates world politics and permeates political discourse. This phenomenon is crucial to understanding Trump's America First campaign, the problems affecting the EU and secession, the tensions and conflicts that are garbed in a religious rhetorical veil, and which constitute much of the agenda of today's "war on terror." What is nationalism? What is national identity? What are the main forms of its articulation in history and in the present, across geographical borders, class boundaries, gender and generational cleavages? This subject will survey the major theories of nationalism, and examine diverse examples of historical and contemporary nationalisms, predominantly within the European context. This is an upper level subject whose readings draw on a variety of approaches and examples and aim at providing a solid introduction to the scholarly literature.

School Humanities & Comm Arts

Discipline History

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. demonstrate in-depth knowledge about the development of nationalism in nineteenth and twentieth-century Europe and in representations of the nation in art and literature
2. identify and critically evaluate major historical and political theories concerning nationalism
3. explain the historical background of issues related to nationalism in the contemporary world
4. demonstrate skills in research and interpretation, and skills in written presentation.

Subject Content

This subject may include the following themes:
- theories of nationalism
- independence and unification movements
- Imperialism, Anti- colonialism, and nationalism
- narratives of nation and national identity
- gender race and nation
- Citizenship
- representation and symbolism
- violence, War, ethnic cleansing and Genocide
- economic globalisation and The nation state
- nation after The Cold War
- nationalism and human rights

Assessment

HUMN 3025 Conceptualising Islam

Credit Points 10

Legacy Code 102494

Coordinator Milad Milani (https://directory.westernsydney.edu.au/search/name/Milad Milani/)

Description The 'Muslim question' has been a topic of interest to Western scholarship for over four hundred years. This subject introduces students to multidisciplinary approaches to the study of Islam and invites students to consider the construction and deconstruction of Islamic Studies as a field of study at various stages of history. The subject provides students with the opportunity to gain increased awareness of both the debates within the field and those that scrutinise the field. That is, becoming comfortable with interrogating the cluster of theoretical and methodological strategies for scholarly inquiry into Islamic Studies.

School Humanities & Comm Arts

Discipline Sociology

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically assess Islamic Studies scholarship from the past leading up to the present;
2. Describe central thinkers and their works that have contributed to the development of the field
3. Analyse the history of scholarship and approaches to the study of Islam and Muslims;
4. Apply reflexive methodologies and theories to reading Islam in contemporary society; and
5. Recognise key influences and changes in the history of field to the present age.

Subject Content

1.Situating Islam in academic discourse
2.Nineteenth and twentieth century scholarship
2.1 German Orientalism and Islamic Studies
2.2 European Orientalism and the Saidian reaction
3.The invention of geographies and rhetoric
3.1 'Normative' Islam
3.2 'Authenticity debate' in Islamic Studies
4.Identity formations
4.1 Islam and Muslim identities
4.2 Diversity in religious expression and practice
5.Theorising Islam
5.1 The insider-outsider debate
5.2 The role of critics and caretakers
6.The Historical imagination of the Muslim past
6.1 Muslim accounts of origin
6.2 Skeptical accounts of origin

- Hughes, A. (2007). Situating Islam: Past and Future of an Academic Discipline. London: Equinox.

HUMN 3026 Convicts and Settlers - Australian History 1788 - 1840

Credit Points 10

Legacy Code 101799

Coordinator Carol Liston (https://directory.westernsydney.edu.au/search/name/Carol Liston/)

Description In little more than half a century Australia was transformed from a convict prison to a parliamentary democracy. The people who made this transformation were the ex-convicts, free settlers and first generation of colonial born children. The survival of data about ordinary

people between 1788-1840 makes it possible to investigate families, communities, employment, law and order and the daily experiences of urban and frontier life in these formative years. Using family history resources on the internet and sophisticated digital archives of historical records in Australia and overseas, this subject will challenge assumptions about "who do you think we were?"

School Humanities & Comm Arts

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Understand social structures within an historical context
2. Create biographies
3. Describe a variety of historical resources found with on-line searches
4. Identify information in historical source documents
5. Describe the social groups within the colonial population
6. Evaluate conflicting interpretations derived from similar historical evidence

Subject Content

- Background of social structure of 18th century England, Scotland & Ireland
- Convicts, Soldiers, Officials - social backgrounds, criminal backgrounds
- non-European Convicts and Soldiers - African, Indian and Mediterranean connections
- Marriage, bigamy, legitimacy and inheritance in colonial Australia
- colonial Born children - education, employment, family Structures
- what became of The convicts? - The economic and social Contributions of emancipists in The Sydney region
- Immigrant settlers - families of Convicts, adventurers and entrepreneurs, Officials of empire
- Looking out - links to Asia, India and The Pacific

HUMN 3029 Cultures of Crime and Punishment

Credit Points 10

Legacy Code 102479

Coordinator Di Dickenson (https://directory.westernsydney.edu.au/search/name/Di Dickenson/)

Description The focus of this subject is on the ways in which crime and punishment are defined and practiced in a range of different cultures, and how different countries' social customs and cultural values influence the evolution of their understanding of, and response to, criminal behaviour. Drawing on both theoretical frameworks and practical examples, the subject will provide students with an opportunity to work in a collaborative learning environment, working with both instructors and other students to undertake and communicate research logically.

School Humanities & Comm Arts

Discipline History

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply contemporary cultural theories of crime and punishment to understanding criminal behaviour.
2. Explain how social structure and culture affect a society's approach to punishment.
3. Assess the impact of digital culture on crime.
4. Use digital tools to identify the changing nature of crime and criminal justice.
5. Develop research proposals in a collaborative learning environment.
6. Communicate research arguments logically and clearly in oral and written form.

Subject Content

1. Social and cultural theories of crime and punishment
2. Punishment in Nordic cultures
3. Cultures of mass incarceration
4. The changing nature of crime and criminal justice
5. Digital culture and crime

HUMN 3030 Cyber Justice (UG)

Credit Points 10

Legacy Code 102529

Coordinator David Tait (https://directory.westernsydney.edu.au/search/name/David Tait/)

Description The world is being transformed by digital technologies. The same technologies that make life more comfortable for some can unleash violence and destruction for others. Cyber war and cyber terrorism offer new risks for the international community. Bullying, identity theft and bank fraud, on a more local level, are given a new life in the cyber world. Cyber technologies also provide enhanced opportunities for detecting and apprehending criminals, resolving disputes and modernising justice processes. New social spaces are opened up (social media networks, the 'dark web'), and new identities made possible (online grooming profile, avatars). How does the law keep up with the emergence of new crimes and technology-enhanced versions of old ones, and how do the cultural worlds of hackers, crackers and trackers work? The subject examines how justice processes and spaces, as well as criminal networks and strategies, are being reimagined to take advantage of the new technologies.

School Humanities & Comm Arts

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Incompatible Subjects LAWS 3015 - Cyber Law and Justice

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Assumed Knowledge

Successful completion of second-year subjects in cultural and society, history and political thought, law, psychology or criminology would be useful, but are not required. Experience of using social media would also be useful but not required.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the nature of cybercrime (including cyber terrorism and cyber war) and the techniques, targets and harms produced by it.
2. Describe the way cyber technologies are used in policing and courts to transform justice processes and respond to cybercrime.
3. Identify relevant media reports, research material, images and other relevant sources relevant to cybercrime and cyber justice.
4. Assess the quality of research about cybercrime and cyber justice in terms of its method, use of sources and contribution to academic debates.
5. Develop research ideas in a peer-supported learning environment.
6. Communicate research arguments logically and clearly in oral and written form.
7. Use digital technologies to collaborate, develop arguments and settle disputes.

Subject Content

Cybercrime: new and enhanced crimes of the digital age.
Cyberjustice: the transformation of justice by digital technologies.
Cyber war and cyber terrorism.
Cyber bullying and stalking.
Privacy and surveillance.
On-line and virtual justice.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

HUMN 3031 Death and Culture

Credit Points 10

Legacy Code 100996

Coordinator Di Dickenson (https://directory.westernsydney.edu.au/search/name/Di Dickenson/)

Description This subject is a critical introduction to the social practices surrounding death in modernity. Although primarily addressing social arrangements in the West, the subject examines the bio-politics of death in a wider cultural framework, with attention to geographies of power and economic influence. The subject traces the historical development of concepts of the individual; the impact on Western ideas around death of genocide and modern warfare; and assesses contemporary ethical, social and medical controversies (like euthanasia and the trade in body parts). The subject attempts to demonstrate the relationship of death to: social institutions; ideas of community and the construction of self in modernity.

Level Undergraduate Level 3 subject

Equivalent Subjects LGYC 1307 - Death and Culture LGYA 0949 - Death and Culture

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically evaluate the function of social debate around issues of vital social importance.
2. Identify key issues about contemporary experiences of death and dying in a range of learning resources.
3. Demonstrate their understanding of the historical origins of present day beliefs and practices around death and dying
4. Apply theoretical knowledge to real-world situations and give a scholarly context to personal experience.

Subject Content

Content may vary between semesters of offering dependant on the teaching staff expertise and interests.
1. The history of death: 1800-1945
2. Grief, mourning and social ritual
3. Death in High Modernity
4. Mass death and the century of genocide
5. The economics of death: killing for science and profit
6. Death and the media
7. Death, trauma and the unmaking of community
8. Euthanasia
9. Legal Execution
10. Commodifying the corpse: the trade in body parts etc.
11. Deathwork
12. Virtual death
13. Virtual mourning

HUMN 3032 Dictators, Democrats and Dreamers: Indonesia 1942 to now

Credit Points 10

Legacy Code 102188

Coordinator Steven Drakeley (https://directory.westernsydney.edu.au/search/name/Steven Drakeley/)

Description This subject surveys the post-independence history of Indonesia, Australia's nearest and most important Asian neighbour. Commencing with the Japanese Occupation during World War ll, it traces Indonesia's often turbulent contemporary history through dictatorship and poverty to democracy and prosperity, bringing the story up to the latest developments at the time of teaching. Students will study Indonesia's struggle for independence and then equally challenging struggle to build a new nation able to take its place in the world amidst serious economic problems and profound political differences. The subject is also concerned with the historiographical problems confronting students of Indonesian history.

Incompatible Subjects HUMN 2054 - The History of Modern Indonesia

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. outline the main historical forces that created and shaped independent Indonesia
2. explain the complex and varied role that Islam and other religions are playing in Indonesia's post-independence history
3. explore the role of Indonesia's indigenous cultures and politics and their interaction with foreign factors and forces in shaping Indonesia and Indonesia's place in the world
4. produce a coherent argument about the interaction of tradition and the challenge of modernity in generating social tensions and propelling political and social change
5. identify the main problems and issues confronting historians working on Indonesia and the different theoretical scholarly approaches to Indonesian history
6. apply historical research skills to another country and culture.

Subject Content

- Demise of The Dutch colonial regime
- Japanese occupation
- Indonesian revolution
- Sukarno presidency
- 1965 Coup and Mass Killings
- The Soeharto presidency
- Indonesian foreign policy
- Islam and other Religions in Indonesian politics and society
- Indonesian politics and economy
- post-Soeharto reform era

HUMN 3033 Digital Cultures

Credit Points 10

Legacy Code 102410

Coordinator Chris Fleming (https://directory.westernsydney.edu.au/search/name/Chris Fleming/)

Description This is the compulsory Level 3 capstone subject for the Cultural and Society major and a compulsory subject in the Digital Cultures major. It gives students essential skills for researching and analysing contemporary cultural and social processes through a digital lens. Key topics include youth and digital culture, digital citizenship, racism and the digital, film and games, and digital work and economies. Through this subject, students gain an understanding of how digital technologies transform everyday practices, meanings and identities, create new opportunities and problems for addressing societal challenges and explore what it means to participate in a digital society, now and in the future.

Level Undergraduate Level 3 subject

Equivalent Subjects HUMN 3028 - Culture Society and Globalisation

Restrictions

Successful completion of 60 credit points in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse the role of digital technologies in transforming society and culture using central concepts and tools,
2. Apply research inquiry skills and methods involved in researching digital cultures,
3. Identify and describe the dynamics and properties of digital networks, programs and platforms,
4. Evaluate and compare research supported by evidence and observation,
5. Undertake independent and self-directed study/research,
6. Work in teams and collaborate in online settings to undertake research and analysis,
7. Present knowledge in a range of written forms.

Subject Content

- Participatory culture and politics
- Histories and narratives of The digital/future
- Researching digital culture - approaches, methods, ethics
- film, games and users/audiences
- Network dynamics and mobilities
- digital children/youth, gender and race/racisms
- digital identity and Citizenship
- digital work and economies
- digital exclusion and local/Global Divides
- digital Consumption and intimacies

HUMN 3034 Emotions, Culture and Community

Credit Points 10

Legacy Code 100860

Coordinator Alexandra Coleman (https://directory.westernsydney.edu.au/search/name/Alexandra Coleman/)

Description This subject examines forms of cultural expression and collective selfunderstanding articulated as emotional identifications. Topics covered may include shame, pride, responsibility, forgiveness,resentment, hope, disgust, generosity, happiness, hate and love. The subject explores how these have been taken up in contemporary cultural analysis as a focus for understanding affinities and conflicts between individuals and communities and for how Australians imagine their historical interconnectedness. It introduces some key theoretical perspectives that have been, and might be, applied to the study of emotions, culture and community.

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of the study of emotions, culture and community as a growing area of interdisciplinary inquiry.
2. Identify and apply a variety of theoretical perspectives relevant to study in this area.
3. Utilise an extended conceptual vocabulary pertinent to the study of emotions and modes of sociability.

4. Demonstrate, in written and oral formats, advanced skills in researching and analysing contemporary Australia in terms of the affective dimensions of inter-communal relations.

Subject Content

Each week focuses on a specific topic relevant to the study of emotions, culture and community in contemporary Australia. Topics may include:
Shame
Guilt
Love
Hope
Generosity
Responsibility
Forgiveness
Resentment
Disgust
Pride
Happiness
Hate

HUMN 3035 Enlightenment and Revolution

Credit Points 10

Legacy Code 101974

Coordinator Simon Burrows (https://directory.westernsydney.edu.au/search/name/Simon Burrows/)

Description The Enlightenment and Age of Revolutions are pivotal moments in Western and global history and had lasting political and cultural repercussions. This module seeks to explore links between them and to place them in wider intellectual and cultural context. Particular focus will be placed upon the paradigmatic French revolution, but within a framework emphasising other revolutions of the period. Hence individual classes treat society and government in Europe; the moderate and radical strands of enlightenment; precursors to the French revolution in the Atlantic world; the public sphere; the French revolution and Terror; Revolutionary Imperialism and Napoleonic rule; the revolutionary legacy.

School Humanities & Comm Arts

Discipline History

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. demonstrate advanced skills of documentary interpretation when confronted with primary source material
2. analyse and offer critical, internationally comparative judgements on the nature of the enlightenment, public sphere and revolutions of the age of revolutions
3. evaluate possible causative links between the political theory of the enlightenment and the politics of revolution
4. demonstrate critical awareness of the historiographical debates and interpretations surrounding the enlightenment and French revolution
5. contextualise the Enlightenment and the French Revolution in a broader context of debates about the nature of late modernity.

Subject Content

1. Political Culture in the Enlightenment
. Society and government in Enlightenment Europe
. High Politics and the High Enlightenment
. Radical Enlightenments
. The Rise of the Public Sphere
2. Revolutionary France
. The dawn of the Atlantic Revolution
. The Political Origins of the French revolution
. 1789 - the Year of the Great Revolution
. The Fall of the Monarchy and the Birth of the Republic
. Violence, Terror and Civil War
3. Legacies: The French Imperium and the Revolutionary Tradition

. War and Imperialism
. The Napoleonic Episode
. The Revolutionary Tradition in Europe, 1815-1871
. Conclusions

HUMN 3036 Ethics in Historical Perspective

Credit Points 10

Legacy Code 102007

Coordinator David Burchell (https://directory.westernsydney.edu.au/search/name/David Burchell/)

Description The subject provides an historical overview of the different types of ethical beliefs and practices that have been used in specific social settings from the classical world to the modern West. It looks at different types of spiritual and secular ethical behaviours, and the doctrines associated with each. It focuses upon the types of ethical argument and judgment-making specific to particular professions, occupations and social statuses over time. It concludes by surveying the different types of ethics taught to professionals today in the West, and on the differences between each, as well as the specific requirements of each. It will be of interest both to students with an interest in the history of ideas, and to students who want to learn more about ethics and moral decision-making.

School Humanities & Comm Arts

Level Undergraduate Level 3 subject

Equivalent Subjects LGYA 0908 - Ethical Cultures

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. demonstrate an understanding of several different kinds of ethical practices and doctrines operating in public and private life from the classical world to the modern West
2. assess the strengths and weaknesses of at least some of these cultures and traditions
3. demonstrate in-depth understanding of at least one historical case-study pertinent to these debates
4. use skills in written and verbal argumentation

Subject Content

Topics may include:
- ethics as A way of life: Classical philosophy and shaping The moral self
- social ethics in Ancient Greece and Rome
- The emergence of Christian ethics: Augustine and The church fathers
- Monks and courtiers: Ethical teachings in The Medieval courtly and monastic worlds
- books of The courtier: The ethics of counsel in The Renaissance
- Conscience and responsibility: The Reformations and The Ethical subject
- Ethical reasoning: The casuistical tradition
- Guardians and Spectators: the moral periodical in the 18th century
- Philophising ethics: Hume and Kant
- The emergence of The social Conscience in The Anti-Slavery Campaigns

HUMN 3039 Food: A Cultural History

Credit Points 10

Legacy Code 102305

Coordinator Gregory Barton (https://directory.westernsydney.edu.au/search/name/Gregory Barton/)

Description The modern world seems obsessed by food. This subject will look at the historical development of sources of food, from archaeological evidence of the earliest human meals through the emergence of agriculture and its scientific modifications to the physical and cultural evidence of technological changes in methods of preservation, preparation, cooking and eating various foods. We will examine the globalisation of food and the varieties of historical cuisines around the world. Food is also integral to our social, religious and cultural lives and the subject will investigate the historical origins of some of these customs. Students will have the opportunity to range across time and place (through readings, recipes and field trips) to explore foods that are part of their cultural heritage - or feasts that they wish they could have eaten from centuries long past.

School Humanities & Comm Arts

Discipline History

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 60 credit points in the currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify a selection of places and objects relating to food production and eating in global history¬¬
2. Explain the historical and cultural significance of certain foods
3. Investigate the historical and cultural origins of a particular dish (recipe)
4. Construct an evidence based argument or narrative of the results of an investigation into the historical and cultural factors associated with particular foods.

Subject Content

Content will include a selection from the following topics:

1. Archaeological evidence of food origins and cooking methods
2. Trade and wealth - salt, pepper, sugar, spices
3. Plants on the move
4. Keeping it longer - air dried to freeze dried
5. Pots, Pans and Microwaves
6. Fingers, forks or chopsticks
7. Indigenous Australian foods
8. Australian colonial eating
9. Portable foods – take-aways ancient and modern
10. Rations - convicts, military and the home front
11. Food, health and healing
12. Religious practice and foods
13. Recipes, measurements and instruction manuals
14. Class and custom - manners, etiquette and tradition
15. Upstairs, downstairs - kitchens great and small
16. Food Wars
17. Global cuisine traditions.

HUMN 3040 From Vindication to Liberation: A Comparative History of Feminism

Credit Points 10

Legacy Code 102520

Coordinator Bridget Brooklyn (https://directory.westernsydney.edu.au/search/name/Bridget Brooklyn/)

Description Beginning with Mary Wollstonecraft's A Vindication of the Rights of Woman, this historical survey analyses the Western feminist ideas and action over the past two centuries, exploring examples from Australia, France, the UK and the US. Important stages in the history of Western feminism will be studied, from the early equality feminism of the eighteenth century, to domestic feminism and the woman suffrage campaigns of the nineteenth. Aspects of the history of more recent feminism will include such developments as the role of maternalism in the creation of the welfare state, and the shift to an emphasis on liberation in the 1960s and 1970s.

School Humanities & Comm Arts

Discipline History

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the principal feminist movements of several western countries over the past two centuries;
2. Appraise the ideas that characterised different feminist movements of the past;
3. Identify key individuals who shaped feminist thought and fostered change;
4. Explain how Australian feminism has fit into the international context, and identify the ways in which it has been both influenced and influential; and
5. Understand some of the intersections between gender and race, particularly with reference to Australia.

Subject Content

1. What is feminism? Problems defining feminism in the past and the present.
2. Articulating women?fs rights: the French Revolution and equality feminism.
3. Backlash? The rise of evangelism and the cult of domesticity in the nineteenth century.
4. Feminism in the Victorian era: freedom within boundaries.
5. Winning the vote: suffrage campaigns of the nineteenth and early twentieth centuries.
6. Maternalist feminism in the early twentieth century.
7. Interwar feminism in Australia, France and the US; domestic science and the citizen mother.
8. From equality to liberation: the rise of ?esecond wave?f feminism.
9. Race and gender in the second half of the twentieth century.
10.The ?ethird wave?f and why feminism is still important.

Assessment

HUMN 3041 Geographies of Migration

Credit Points 10

Legacy Code 101694

Coordinator Cameron Mcauliffe (https://directory.westernsydney.edu.au/search/name/Cameron Mcauliffe/)

Description An international and cross-institutional discussion of immigration and settlement. Covering the theory and experience of immigration. Considers the international and national regulation of immigration and settlement policies, as well as refugee policy. Case studies are from Australia and Canada, and Singapore. Within mixed tutorial groups (with students from Singapore, Vancouver & Sydney) students will exchange experiences and opinions of immigration.

School Social Sciences

Discipline Human Geography

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 80 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Construct case studies and files on the impacts of international migration, drawing upon statistics, experiences, visual material and other technologies
2. Summarise, contrast and critically analyse theories of international migration
3. Integrate theories of immigration with statistics, field data and personal experiences
4. Relate international migration to the forces and theory of globalisation and population movement
5. Critically evaluate the competing political arguments regarding migration and its impacts
6. Relate political arguments regarding migration to their own personal experiences (and those of their peers)
7. Develop a tolerance and appreciation of cultural difference within cities of immigrant reception
8. Develop a sense of international co-operation and citizenship, and establish enduring links with peers in Singapore (The National University of Singapore (NUS)) and Vancouver (The University of British Columbia (UBC))

Subject Content

Migration types and drives
Theorising migration
Australian immigration: history, flows and impacts
Immigrant residential concentration
Transnationalism
Population, immigration and environment
Transnational flows and migration policies in Singapore
Canadian immigration and settlement
Undocumented migration and human trafficking
Australian aspects of forced migration and human trafficking
Environmental refugees

Assessment

HUMN 3042 Global Politics

Credit Points 10

Legacy Code 101735

Coordinator Brett Bowden (https://directory.westernsydney.edu.au/search/name/Brett Bowden/)

Description The experiences of globalization are explored from a variety of levels across time and space, from the individual to the local, the national to the international. The focus in this course will be on issues of politics, both domestic and international, but we will keep in mind that globalization is a phenomenon that is explored and assessed by a wide range of disciplines, including history, sociology, politics,

law, economics, anthropology, gender studies, human geography, economics, regional and area studies, science and technology, health and epidemiology.

School Humanities & Comm Arts

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate understanding of theoretical approaches to globalisation and global politics;
2. Identify and differentiate phenomena of globalisation;
3. Deploy various disciplinary methods to analyse globalisation;
4. Develop and use effective research skills to investigate globalisation

Subject Content

Defining globalization
Thinking about globalization
History and theories of globalization
Globalization and the state
Globalization, technology and deterritorialisation
Global governance and non-state actors
The Global economy and inequality
Globalization and culture
The ethics of globalization
Globalization, order and security
Anti-globalization and alternatives

HUMN 3043 Globalisation and Sustainability

Credit Points 10

Legacy Code 200815

Coordinator Margaret Moussa (https://directory.westernsydney.edu.au/search/name/Margaret Moussa/)

Description Globalisation and Sustainability introduces students to critical debates about the role of global and national institutions of power in determining economic, environmental, social and cultural outcomes. Students will be introduced to opposing and controversial theoretical perspectives on globalisation and sustainability and issues relating to Aboriginal and Torres Strait Islander peoples to improve policy and practice in the future. In the process students will be encouraged to consider problems relating to ethics, rights, justice and democracy in society. This subject can also be taken by students who have studied social science and humanities.

School Business

Restrictions

Note that only students enrolled at Sydney City Campus may register in the Sydney City Campus subjects offered at that location.

Assumed Knowledge

Basic understanding of economic concepts.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically assess the role of global and national institutions of power in determining economic, environmental, social and cultural outcomes.
2. Compare and debate opposing theoretical and policy approaches to economic, environmental, social and cultural outcomes.
3. Make recommendations to improve policy and practice with regard to complex economic, environmental, social and cultural issues.
4. Demonstrate recognition of the alternative perspectives on economic and social development held by Aboriginal and Torres Strait Islander peoples.
5. Explain the interdependence of the economy and environment.

Subject Content

1. Local and global institutions
- comparative advantage
- Unequal exchange
- development and uneven development
2. Crises and Cycles
- Global financial crises
- sustainable, socially-Just and democratic economic alternatives
3. Aboriginal and Torres Strait Islander issues
- economic and historical perspectives ? rights
- sustainable economic development debates
4. Growth and Sustainability: Ecological sustainable development
- definitions of sustainability
- limits to growth
5. Energy and climate change
- Carbon lock-in, fossil fuel energy system
- Global environmental agreements
- Clean development mechanism
- environmental justice
6. Food, water, population, species
- Global food system and The environment
- management of water resources
- population growth and limits
- species extinction and biodiversity loss

HUMN 3044 Healing and Culture

Credit Points 10

Legacy Code 101716

Coordinator Cristina Rocha (https://directory.westernsydney.edu.au/search/name/Cristina Rocha/)

Description This subject takes as its starting point the idea that disease has social and cultural as well as biological origins. What people define as good health and illness, and how they treat the latter are profoundly shaped by cultural frameworks. Healing practices, including biomedicine, are underpinned by cultural understandings and larger configurations of power. We will examine notions of disease causality across cultures and explore the argument that good and ill health are about more than just the body. Popular understandings of illness and its origins, and techniques for responding to and seeking to remedy illness can be a reflection of how different societies imagine their place in the world.

HUMN 3048 History of Sexuality

Credit Points 10

Legacy Code 101991

Coordinator Alison M Downham Moore (https://directory.westernsydney.edu.au/search/name/Alison M Downham Moore/)

Description This subject introduces students to some key debates about the definition and origin of sexuality as a concept, and to the historical origins of particular sexual identities and the political values attributed to them. It teaches students to take account of the differing ways that forms of desire, pleasure, obscenity, pornography, perversion, sin and transgression have been articulated across time and place. In the subject we traverse an array of temporal moments and geographic loci, drawn to the 'hotspots' of historiographic contention.

School Humanities & Comm Arts

HUMN 3050 Housing Markets and Policy

Credit Points 10

Legacy Code 101592

Coordinator Emma Power (https://directory.westernsydney.edu.au/search/name/Emma Power/)

Description Housing affordability and equity are central urban problems. This subject focuses on the history and current challenges of housing markets and policy in Australia. Comparisons are drawn between rental and home ownership, the roles of the public, social, and private sectors, and between Australian, European, and North American housing markets and policies. We will critically evaluate how policy, markets and the experiences and practices of households interact. We will consider key housing challenges including ending homelessness, housing for health, housing in an ageing society, and housing in times of crisis such as climate change, bushfire and pandemic.

School Social Sciences

Discipline Human Geography

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYA 1331 Regional Planning

Restrictions

Successful completion of 80 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain how specific policies affect different segments of the housing market.
2. Analyse how future financial, economic, social and environmental trends could alter the outcomes of specific housing strategies.
3. Critically evaluate how the Australian housing sector has evolved, and why this path has been different than the path of other economically similar countries, such as Canada, the UK, and the USA.
4. Explain how the role of major housing actors (local and state governments, housing associations, private developers, small and large investors, tenants, and home owners) has evolved, and why.
5. Demonstrate understanding of the major sources of local housing data.

Subject Content

What is housing and why is it so important
Tenure: social / legal construction of housing classes and homeownership as a social policy
Housing affordability and housing subsidies
Tenants in the public, social, and private sectors
Housing and the labour market
Housing as home
Housing and health
Housing and ageing
Responses to homelessness
Housing in times of crisis (e.g in context of climate change, sea level rise, bushfire, pandemic)
Alternative models of housing

HUMN 3051 Human Rights and Culture

Credit Points 10

Legacy Code 101988

Coordinator Di Dickenson (https://directory.westernsydney.edu.au/search/name/Di Dickenson/)

Description This subject examines the cultural consequences of the rise of the global human rights regime. It introduces debates about cultural relativism and universal human rights and explores a number of areas of contemporary conflict between cultural practices and human rights norms. It also examines the role of human rights NGOs in creating a new global human rights culture, and asks what it means to be a subject of human rights.

School Humanities & Comm Arts

Discipline Studies In Human Society

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of the history of the global human rights regime.
2. Engage in reasoned debate about human rights universalism and cultural relativism.
3. Analyse contemporary tensions between respecting cultural diversity and compliance with human rights norms.
4. Critically reflect on the relation between human rights and neoliberal capitalism.
5. Demonstrate an understanding of the role of NGOs in shaping a global human rights culture.
6. Display effective research skills and analytical processes in investigating the cultural issues raised by the rise of the global human rights regime.

Subject Content

- WWII and The drafting of The Universal Declaration of human rights
- The rise of The human rights NGOs (Amnesty international, human rights Watch)
- theoretical debates about Universal human rights and cultural relativism

- Controversies about human rights and culture: private property rights and communal cultures; the 'Asian values debate'; individual rights and indigenous cultures; women's rights and gendered violence
- human rights, The nation-state and self-determination
- 'Humanitarian intervention' and the militarisation of human rights

HUMN 3054 Islam in Southeast Asia

Credit Points 10

Legacy Code 101467

Coordinator Jan Ali (https://directory.westernsydney.edu.au/search/name/Jan Ali/)

Description Islam is a significant feature of Southeast Asia's past and present. Employing methodologies and insights drawn primarily from history, political science, and anthropology, this subject explores Islam's place in and contribution to contemporary Southeast societies and politics, as well as its history in the region. Major themes to be explored include: the debates about Islam's spread to Southeast Asia and its interaction with the region's established socio-religious features, the colonial experience, Islam's often contested place in the national life of Southeast Asian nations, its past and ongoing links with the rest of the Muslim world, as well as contemporary issues associated with the War on Terror and conflicts in Muslim societies.

Level Undergraduate Level 3 subject

Equivalent Subjects LGYB 0177 - Islam in Asian and World Politics

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the main historical factors that have shaped the various practices of Islam in Southeast Asia;
2. Outline the main variations in Islamic practice in different Southeast Asian societies both in the contemporary context and over time;
3. Explore the role of Islam in Southeast Asian politics both in the contemporary context and over time;
4. Develop coherent arguments about the interactions of local traditions and beliefs and orthodox and reforming waves of Islam emanating from the Middle East;
5. Identify the main issues and problems confronting scholars working on Islam in Southeast Asia;
6. Apply historical and religious studies research skills to other countries and cultures.

Subject Content

-Timing, Origins, and mechanisms by which Islam came to Southeast Asia
-Mechanisms and history of Islam's continuing spread throughout Southeast Asia
-Islam's interaction with existing beliefs, customs and political structures in the region, both in the past and present
-Past and ongoing interaction between currents of Islamic thought and teachings in Southeast Asia and those in The rest of The Muslim World
-The impact of colonialism on Islam and Muslims in Southeast Asia
-The role of Islam in Southeast Asia in resistance against colonial rule
-Southeast Asian Muslims and The development of nationalism and independence movements in Southeast Asia
-The history of Islam's place in the national life of Southeast Asian nations, including economies, culture and politics
-Islam's contemporary place in the national life of Southeast Asian nations, including economies, culture and politics
-The role of Islam in Regional rebellions in Southeast Asia (especially Mindanao, Pattani, Aceh)
-Islamist movements in contemporary Southeast Asia such as Jemaah Islamiyah and Abu Sayyaf
-academic debates over methodology and approaches to The Study of Islam in Southeast Asia

HUMN 3056 Islam in the West

Credit Points 10

Legacy Code 101822

Coordinator Jan Ali (https://directory.westernsydney.edu.au/search/name/Jan Ali/)

Description The subject focuses on the question of Muslim presence in the West with reference to the dynamics of inclusion and exclusion. Its aim is to enable students to look at the question of Muslim presence in terms of an action-reaction phenomenon in which different outlooks, ideas, institutions and nodes of information and authenticity interact to create an environment in which identities are developed. These identities then go on to shape the cooperative and conflictual relationships between different subsections of Muslim minorities and the majority non-Muslim Western states and societies. While focusing on the contemporaneity of the question, the subject looks at the study of Muslim presence in the West in a socio-historical context by providing an understanding of how Muslim-Western contacts shaped the nature of their relationship in the past. Then, the subject looks to contrasting the changes before and after 9/11 with reference to a set of ideas, institutions and contexts.

HUMN 3057 Islam, Media and Conflict

Credit Points 10

Legacy Code 101468

Coordinator Jan Ali (https://directory.westernsydney.edu.au/search/name/Jan Ali/)

Description Provides students with an understanding of global, regional and local news media production and representations of Islam and Muslim societies. It discusses new, emerging and alternative forms of media discourses of conflict in the Muslim world, and analyses selected news reports as forms of case studies. Taking the notion of 'Orientalism' as its starting point, the subject/unit critically examines the extent to which the mediatisation of conflict impacts relations between Islam and the West vis-a-vis debates on Orientalism, 'Asian values' and Islamic world views.

HUMN 3058 Islamic Revivalism in the Globalised World

Credit Points 10

Legacy Code 102297

Coordinator Jan Ali (https://directory.westernsydney.edu.au/search/name/Jan Ali/)

Description In the last decades there has been a surge in Islamic consciousness in Musllim communities across the globe. Islamic history has been punctuated by periods of revivalist activity and its hallmark always has been a desire for the return to Islamic origins - the basics of the faith as enshrined in the islamic scripture. This subject explores the phenomenon of contemporary Islamic revivalism. The subject contrasts contemporary Islamic revivalism with earlier expressions. It aims to demonstrate that contemporary Islamic revivalism has manifested itself in a multiplicity of forms as a defensive reaction to an epoch characterised as modernity.

HUMN 3060 Modern Japanese History

Credit Points 10

Legacy Code 100271

Coordinator Peter Mauch (https://directory.westernsydney.edu.au/search/name/Peter Mauch/)

Description This subject considers Japan's trajectory from the battle of Sekigahara in 1600 until the atomic bombings in 1945. We will examine the samurai and ritual suicide, the tea ceremony and Zen Buddhism. We will read tales told by those who frequented the "floating world," populated by wealthy merchants, geisha, and sumo wrestlers. We will consider the creation of Imperial Japan, and we will study its emergence as the only non-Western Great Power. We will enquire into Japan's fledgling democracy in the 1920s, and its descent into militarism and aggression in the 1930s. Finally, we will consider Japan's participation in World War II: its victories, its losses, its propaganda, and its abject defeat.

HUMN 3061 Mystical Islam: The Emergence of Sufism in World History

Credit Points 10

Legacy Code 102495

Coordinator Milad Milani (https://directory.westernsydney.edu.au/search/name/Milad Milani/)

Description Global Islamism has projected a particularly severe, even militant face of Islam across much of the world. Much less well known is the fact that for much of its history Islam has had a quite different face: it has been mystical and contemplative more than proselytising. The Sufist tradition was formed within the first three centuries of Islamic history; its influence spread far and wide across the Muslim World where "Sufis" played a pivotal role in engaging non-Muslim peoples both within and on the fringes of their world. The subject explores religious pluralism and an alternative narrative in Islam.

HUMN 3062 Napoleon: the Making of a Legend

Credit Points 10

Legacy Code 102343

Coordinator Simon Burrows (https://directory.westernsydney.edu.au/search/name/Simon Burrows/)

Description This subject appraises the achievement of Napoleon Bonaparte and the manner in which he has been portrayed in his own propaganda, by his contemporaries and by historians. It also considers the historical impact of the Napoleonic and anti-Napoleonic myths in the history of France and Europe. At the heart of the module is the paradox of Napoleon's enduring popularity in France, despite his responsibility for crushing defeats in 1812-1814 and again 1815.

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss the main features of the career of Napoleon Bonaparte
2. Critically evaluate historiographical debates concerning Napoleon's historical significance, reputation and legacy
3. Present historical evidence and argument in a recorded oral presentation
4. Discuss the importance of myth in history
5. Demonstrate skills at interpreting historical primary source documents
6. Present, analyse and synthesise historical evidence and argument in written form.

Subject Content

1. Napoleon Bonaparte's political career and policies in France and abroad; his attempts to control his own image; the Napoleonic legends; Bonapartism and its legacy after 1815.
2. Historical and contemporary images and interpretations of Napoleon;
3. The circumstances of Napoleon's rise;
4. Napoleon's claims to be a great general and how his victories were achieved;
5. Napoleonic diplomacy and whether he was personally responsible for the persistent warfare of the period 1799-1815;
6. The nature of Napoleonic imperialism; and whether Napoleon's rule in France might be considered enlightened or socially reactionary;
7. Napoleon's claims to liberalism and the appeal of the Napoleonic legend.

HUMN 3064 Politics, Power and Resistance

Credit Points 10

Legacy Code 101985

Coordinator Alana Lentin (https://directory.westernsydney.edu.au/search/name/Alana Lentin/)

Description This subject examines the effects of politics on society and of the social on politics. Politics is understood as a struggle for defining how we live in common with others. We examine how power is attained and maintained and how some ideologies dominate over others to shape opportunities for challenging the status quo. Our focus is the contemporary nation-state in the context of globalisation, increased transnationalism, and shifting balances of power. Key themes include economic and social inequality in the modern state, the colonial power matrix, discipline and punishment, gender and race, and resistance to oppression. Each week will combine theoretical approaches and case-study based 'perspectives' on the topic.

HUMN 3065 Postcolonial Australian Cinema

Credit Points 10

Legacy Code 101987

Coordinator Anne Rutherford (https://directory.westernsydney.edu.au/search/name/Anne Rutherford/)

Description This subject will examine the role of cinema in forming images of national and cultural identity. The subject will explore the development of Indigenous and postcolonial cinema in Australia. The subject will discuss political debates and issues in postcolonial Australian cinema, and will raise questions about the nature of memory as it is mediated by cinematic experience, the representation of history, and the history of representation of indigenous cultures and peoples. The subject will examine these questions through a study of postcolonial Australian cinema produced by both Indigenous and non-Indigenous filmmakers.

HUMN 3066 Power as a Cultural System

Credit Points 10

Legacy Code 102348

Coordinator Kit Hawkins (https://directory.westernsydney.edu.au/search/name/Kit Hawkins/)

Description In this subject students will explore notions of power, domination, authority and conflict from an anthropological perspective. Students will draw upon specific case studies of the social and political organisation of a variety of communities to understand how social order is perceived, achieved and maintained cross-culturally, through local systems of governance but also through social categories such as race, kinship, ethnicity and nations. Through these examinations students will also apply anthropological insights in order to understand how social practices such as participation, collaboration, resistance and violence operate in local political contexts. In the final part of the subject students will assess the various ways anthropologists work with and against local power structures and to what extent ethnography and applied anthropological work can intervene in systems of oppression.

School Social Sciences

Discipline Anthropology

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) HUMN 1016

Restrictions

Successful completion of 80 credit points in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify major anthropological theories and paradigms that can be utilised to understand power relationships and political systems.
2. Use ethnographic case studies to analyse how the political is construed in various cultural contexts.
3. Critically reflect on some of the power relationships intrinsic to ethnographic fieldwork and other professional situations anthropologists are involved in.
4. Formulate research plans and strategies for conducting short term research projects in the anthropological tradition.

Subject Content

1. Social order and the structure of social life
2. Neighbourhoods, villages, cities as sites of power
3. Kinship as a social structure
4. Political anthropology
5. Warfare and violence/peace and conflict resolution
6. The politics of culture
7. Race, ethnicities and nations
8. Religion and power
9. Power and knowledge
10. Research ethics and power

HUMN 3067 Power, Politics and Knowledge

Credit Points 10

Legacy Code 200752

Coordinator Patty Hodgson (https://directory.westernsydney.edu.au/search/name/Patty Hodgson/)

Description Please note that this subject is no longer on offer. Please contact business.courses@uws.edu.au or phone (02) 9685 9200 for further information. The aim of this subject is to provide students with a thorough grasp of the complex relationships between power, politics

and knowledge in organisational settings. It also highlights the need for managers to use power ethically and equitably in workplaces. These aims are addressed through an examination of a range of theories of power, and topics such as: distribution and exercise of power in organisations, organisational politics, gender and power, language and power, resistance to power, and others. Innovative class activities and assessment methods (e.g., brainstorming; storytelling; film analysis) are used in this subject to ensure that students are able to effectively apply theoretical concepts to real life situations.

Level Undergraduate Level 3 subject

Equivalent Subjects LGYB 9015 - Power Politics and Knowledge BUSM 3056 - Power Politics and Knowledge

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the links between power, politics and knowledge.
2. Critically appraise various classical and contemporary theories of power.
3. Apply elements of various theories of power to organisational events.
4. Explain the operation of power at micro- and macro levels.
5. Analyse patterns of distribution and operation of power in organisational settings.
6. Reflect on the importance of using power ethically in organisational settings

Subject Content

Unit overview/Introducing the notion of power.
Theories of power ? past and present.
Power elites.
Organisational power.
Organisational politics.
Power and leadership.
Power and ethics.
Language and power.
Resistance to power.
Subtle forms of power.
Gender and power: Are women as powerful as men in work settings?
Online discussion (exam preparation).
Summary and conclusions.

HUMN 3068 Public Health Response in Complex Emergencies

Credit Points 10

Legacy Code 102369

Coordinator Nidhi Wali (https://directory.westernsydney.edu.au/search/name/Nidhi Wali/)

Description This subject examines several different aspects of public health in emergencies including rapid assessment of the health status of the population, public health surveillance measures, and the priorities in an emergency phase. To effectively respond to complex emergencies, government and non-government organisations must enact policy and activity to prevent, protect against, and respond to injuries and threats posed by infectious disease outbreaks and hunger. The subject provides an outline of the principles of disaster prevention, preparedness and mitigation, and introduces students to aspects of human resources in the coordination of different operational initiatives.

School Social Sciences

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Co-requisite(s) HUMN 2017

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Define different types of natural and human-induced disasters and outline public health responses required for different phases of emergencies.
2. Outline conceptual and methodological approaches related to public health in complex emergencies to inform health priorities, and articulate frameworks and standards that inform and govern the prioritisation process in complex emergencies.
3. Describe an understanding of complex emergency management systems and plans including the humanitarian charter, minimum standards, and the anatomy of disaster response.
4. Describe key players in emergency response and management, their roles and challenges they face.
5. Identify and critically analyse major international guidelines and standards that govern humanitarian responses, and recognise enabling and disenabling factors associated with the adherence to such standards.
6. Analyse the national and international contextual, policy, and legal frameworks that govern a complex emergency response.
7. Critically analyse challenges and ethical dilemmas associated with various emergency scenarios.

Subject Content

1. Epidemiology of disasters
2. Principles of disaster prevention and mitigation
3. Generating the evidence to inform interventions
4. Top health priorities in complex emergencies
5. Mass vaccination and vaccine-preventable diseases
6. Water and sanitation
7. Food and nutrition
8. Shelter and site planning, and non-food items
9. Reproductive health
10. Accountability, effectiveness, and ethical dimensions of humanitarian response
11. Bringing it together: Critical appraisal of the evidence

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

HUMN 3069 Queer Culture

Credit Points 10

Legacy Code 102191

Coordinator David McInnes (https://directory.westernsydney.edu.au/search/name/David McInnes/)

Description Queer culture will introduce students to queer theory and provide opportunities to use these theories in the close study of cultural practice and politics. Queer theory counters the idea that people have stable sexes, genders and sexualities. Instead, queer theory argues that the experience of those that are homosexual, bisexual, transgender, and intersex highlight the frequent mis-matches in what are taken for granted to be 'normal' experiences of identity. Queer theory demonstrates the impossibility of a natural or normal sexuality, but it also demonstrates the problem with the terms 'man' and 'woman', 'male' and 'female', 'normal' and 'abnormal'. In Queer culture students will learn about queer theories and have the opportunity to apply these theories to an in-depth and personally engaging study of queer politics and activism; queer media, film and performance; and queer sex, selfhood, and identity trans/formations.

School Humanities & Comm Arts

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of key aspects of queer theory
2. Apply a range of queer theories to the research and analysis of cultural practice
3. Engage in debate and discussion, in writing online about questions of queer politics, activism and research.
4. Write a well-structured, analysis-based report on research into an aspect of queer culture using queer theory.

Subject Content

- Queer theory
- Queer politics and activism - gay Liberation, The Queer movement, HIV/AIDS politics and activism, international Queer politics and activism
- Queer media, film and performance - drag, Queer film, Queer critiques of mainstream film, online and virtual communities
- Queer sex, selfhood and identity trans/formation - Queer sexual practice and sexual cultures, queerings of masculinity and femininity, for example, female masculinities
- research approaches for investigating Queer cultures and Queer cultural practice

Prescribed Texts

- A book of readings/online reading resources will also be produced.
- Jagose, A. 1996 Queer theory, Melbourne: Melbourne University Press.

HUMN 3070 Rethinking Research with Indigenous Australians: Independent Study Project (Day Mode)

Credit Points 10

Legacy Code 101759

Coordinator Madison Shakespeare (https://directory.westernsydney.edu.au/search/name/Madison Shakespeare/)

Description This subject will provide students with an exciting opportunity to undertake an Independent Study Project on an Indigenous topic. Students will gain greater knowledge of Indigenous people and develop effective communication skills as well as a level of cultural competency. The Independent Study Project will expose students to the complexities of the cultural inter-relationships and the politics of undertaking research with Indigenous people. It will also provide students with skills and ideas for future research projects that will add to Indigenous knowledge and provide a sound foundation for ethical research.

School Humanities & Comm Arts

Discipline Indigenous Studies

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

HUMN 3075 Sociology of Religion

Credit Points 10

Legacy Code 101359

Coordinator Ayah Abubasheer (https://directory.westernsydney.edu.au/search/name/Ayah Abubasheer/)

Description In this subject some of the main sociological approaches to the study of religion will be considered. The subject will be orientated particularly to the tension between religion and social theory in the evolution of sociological thought. It addresses the impact of religion and religious bodies on Australian society and politics. The subject will focus on the relation of theory and practice, on the research of contemporary religious practice, and on the contemporary relevance of major theorists in the sociology of religion. It will address issues such as Buddhism, Fundamentalism(s), gender in religion, globalisation, Islam, modernity/post modernity, neo-paganism, networks in spiritualities, New Age, popular culture, and new religious movements.

School Social Sciences

Discipline Sociology

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects Unit LGYB 5040 - Sociology of Religion

Restrictions

Successful completion of 80 credit points of study.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Provide a critical introduction to some of the major theorists in the sociology of religion.
2. Explore the major rationales for religion as a belief system and their relevance to the contemporary and historical development of institutionalised, and networking forms of, religious practice - with particular reference to the secularisation debate.
3. Investigate the formation of major religious institutions and emergent religious groups, the part they have played in the formation and support of dominant ideologies and the existing social structure, and how these factors have influenced the peculiar nature of religion in Australia.

Subject Content

1. Religion ideology and the individual (the nature of belief systems and the role of sociology in the analysis of religion)
2. Is the influence of religion in society declining? Modernity and the secularisation debate.
3. Durkheim and the functions of religious belief. Religion, community and integration in contemporary society.
4. Weber - Religion and the rational overview
5. State and Religion- The Church of England and the Catholic Church.
6. Islam
7. Buddhism and Eastern Religions
8. New Religious Movements and Cults.
9. Alternative Spiritualties (New Age and Neo-Paganism)
10. Post-modern religions: Fundamentalism(s), Consumer Religions and Hyper-Real Religions.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

HUMN 3076 Sultans, Colonists and Nationalists: Indonesia C1200-1942

Credit Points 10

Legacy Code 102187

Coordinator Karen Entwistle (https://directory.westernsydney.edu.au/search/name/Karen Entwistle/)

Description This subject examines the historical background of Indonesia's struggle to attain independent nationhood. Emphasis will be placed on social, cultural and political factors that shaped Indonesia prior to 1942, encompassing the classical period of the Hindu-Buddhist kingdoms, the rise of the early modern Islamic sultanates, the first encounters between Europeans and the peoples of the 'Malay world', the emergence of the Dutch East India Company (VOC) as a dominant force in the region, the subsequent imposition of the Dutch colonial rule, and, most significantly, the development of modern Indonesian nationalism.

Level Undergraduate Level 3 subject

Incompatible Subjects HUMN 2054 - The History of Modern Indonesia

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the significant historical forces that shaped Indonesia prior to 1942
2. Describe the cultural, religious and political diversity of Indonesian society
3. Recognise the factors that contributed to the rise and fall of traditional Indonesian polities during the pre-colonial era
4. Outline key differences between the Hindu-Buddhist and Islamic kingdoms
5. Discuss the pattern of Dutch colonial rule and changing economic structures in Indonesia
6. Evaluate the impact of modern and traditional influences on the development of Indonesian nationalism
7. Demonstrate effective literacy skills and research techniques.

Subject Content

- Indonesia as An archipelagic cross-roads
- Traditional patterns of state formation and The Legacy of cultural borrowings from India and China
- religious Transformation under Islam and The emergence of A Muslim commercial class
- The rise of Islamic maritime States in The early modern period
- The arrival of European trading companies and their impact upon indigenous political and trading systems
- VOC ascendancy and expansion
- Consolidation of Dutch colonial rule in the 19th century
- The impact of colonialism on indigenous society
- The Dutch Civilising mission and its unexpected outcomes
- The rise of Indonesian nationalism in the early 20th century
- forms of organised resistance to Dutch colonial rule and key ideological influences
- Cooperation versus non-Cooperation
- Subversive forms of Indonesian resistance to Dutch rule
- The Dutch colonial state on The eve of World War II

HUMN 3077 Sustainable Futures

Credit Points 10

Legacy Code 101569

Coordinator Sebastian Pfautsch (https://directory.westernsydney.edu.au/search/name/Sebastian Pfautsch/)

Description In this subject we will explore the questions 'can we create a sustainable society? If so what would it look like and how could it be done; is it possible to live ethically with each other and the planet?' While major contemporary theoretical concepts will be explored the emphasis is on developing sustainable alternatives to the way we now live both locally and globally. Particular attention will be paid to thinking ecologically, postcolonial development and issues of race and gender.

School Social Sciences

Discipline Sociology

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 80 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Compare and contrast contemporary theoretical approaches to sustainable development
2. Apply key concepts and theories to practical solutions for sustainable living
3. Critically reflect upon major critiques of sustainability and development theories and practices i.e. postcolonial perspectives; ecofeminism and gender.
4. Create sustainable solutions to a key issue of sustainable living
5. Recognise key theories and concepts as presented in class and reading materials.

Subject Content

Discourses of development, globalisation and sustainability
Post colonialism
Ecofeminism
Social movements and activism for sustainability
Developing diversity
Sustainable consumption: agriculture, food & resources
Living spaces and places: urban, regional and rural planning and design

HUMN 3078 The Anthropologies of Gender and Sexualities

Credit Points 10

Legacy Code 102349

Coordinator Helena Onnudottir (https://directory.westernsydney.edu.au/search/name/Helena Onnudottir/)

Description Examining the social construction of gender has been central to anthropological inquiries since the 1930s. Early ethnographic studies were instrumental in debunking gender essentialism and challenging the hegemony of western constructs about 'masculinity' and 'femininity'. Since the 1930s, critical Anthropological theories and ethnographies have through cross-cultural comparison, demonstrated the great variation in expressions of individual sexuality/ies, the dynamics and confines behind the construction of gender roles and the cultural meaning and expression of gender categories across the globe. This subject will address the ongoing exploration of and challenges to the sex (biology) vs. gender (culture) dichotomy and contemporary cultural, social and political transformation (manipulation) of these categories.

School Social Sciences

Discipline Anthropology

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) HUMN 1016

Restrictions

Successful completion of 80 credit points in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the concepts and theories of the Anthropologies of Gender and Sexuality.
2. Produce a reflective and comparative analysis on cross-cultural case studies.
3. Critically analyse the gender diversity across human cultures and societies.
4. Apply Anthropological theory to contemporary case studies.
5. Articulate some of the ways biological categories are culturally mediated.

Subject Content

Anthropology of gender.
Anthropology of Sexualities.
Masculinities/femininities/third gender categories.
Sex/gender.
Gender and power
Cultural constructs vs. biological determinism.
Cross-cultural comparison of gender roles.
Fluidity and diversity of human sexualities.
To do or not to do? Sex and taboos.
The gendered body

HUMN 3079 The Asian Century

Credit Points 10

Legacy Code 101957

Coordinator Eduardo Ugarte (https://directory.westernsydney.edu.au/search/name/Eduardo Ugarte/)

Description This subject explores whether the 21st century can be referred to as the Asian Century. It addresses itself to a host of questions, including: What is the Asian Century? How does it differ from the American Century (20th Century) and the British Century (19th Century)? What are the historical, cultural and philosophical foundations of the Asian Century? How has Asia been transformed since World War II, and more recently? What are the risks and challenges for Asian states in the Asian Century? What are the challenges and the opportunities for the West (including Australia) in the Asian Century?

School Humanities & Comm Arts

Discipline History

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. explore and evaluate Asia's regional dynamics
2. discern the historical, philosophical, and cultural underpinnings of the Asian Century
3. compare and contrast various Asian nations' trajectories since the arrival of the West in the mid-19th Century
4. appraise the contributions which different scholars have made to our understanding of the Asian century

Subject Content

- The British and The American centuries
- The Transformation (and rise) of Asian nations, including Japan, China, India, South Korea, Singapore and Indonesia
- The development and Importance of Southeast Asia
- Crisis points in The region
- Central Asia's role in the Asian century
- Applicability of various theories, including modernisation and realist theory, to The Asian century
- social inequality and disparity, political Corruption, The middle income gap, Competition for finite natural resources, environmental damage and Global warming

- China as a threat theory: containment or engagement (or somewhere in between)?
- Continued US primacy in The region? or power-sharing between The US and China? strategic competition? or partnership?

HUMN 3080 The History of Southeast Asia

Credit Points 10

Legacy Code 102491

Coordinator Karen Entwistle (https://directory.westernsydney.edu.au/search/name/Karen Entwistle/)

Description This subject introduces students to the history of Southeast Asia, and to the major ideas and debates pertaining to the historical development of Southeast Asia as an important and distinctive world region in its own right. The course will examine the historical, cultural and religious factors that have shaped Southeast Asian societies, from antiquity to the modern era. Key topics include the origins and characteristics of early civilisations, traditional patterns of state formation, global trade networks and European imperialism, popular resistance and the nationalist challenge to the colonial order, decolonisation in Cold War Southeast Asia, and nation-building in the twentieth century.

School Humanities & Comm Arts

Discipline History

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Succcessful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the central themes and debates pertaining to the historical development of Southeast Asian societies and the region.
2. Demonstrate basic analytical skills of historical interpretation, argument and evidence relevant to Southeast Asia.
3. Explain the various ways in which geography and environment have affected the historical development of the Southeast Asian region.
4. Analyse the historical processes that created the complex societies of Southeast Asia.
5. Scrutinise major cultural borrowings, religious influences and the impact of European colonialism on individual nations of Southeast Asia.
6. Distinguish between the historical development of Southeast Asian states from the early modern to the post-colonial era.

Subject Content

The setting: the population, environment and geography of Southeast Asia
The Indianisation of Southeast Asia
The rise and fall of the classical states
The Islamisation of Southeast Asia
Trade and its networks during the ?eThe Age of Commerce?f
East-west encounters in Southeast Asia: the first European impact
European colonialism in 19th century Southeast Asia
The economic transformation of Southeast Asia during the colonial era

The rise of nationalism and challenges to colonial rule
Progress and modernity in 20th century Southeast Asia
The impact of the Japanese occupation and the revolutionary moment
Independence and a new world order
Cold War Southeast Asia
The Southeast Asian region in the modern world

HUMN 3081 The International Relations of the Middle East Since 1945

Credit Points 10

Legacy Code 101783

Coordinator James Trapani (https://directory.westernsydney.edu.au/search/name/James Trapani/)

Description This subject offers a historical study of the international relations of the Middle East from 1945 to the present. It examines the relations of Middle Eastern states to global structures of power; the pattern of relations between regional states; the causes of regional wars and international co-operation; the impact of domestic factors on the foreign policy of states; the importance of oil to international politics and the global economy; and the role of ideologies and non-state forces in international relations and between states in the Middle East.

School Humanities & Comm Arts

Discipline History

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate ability to develop and expound an argument in written form
2. Skills in oral expression refined by discussing and debating key issues, episodes and themes relevant to the history of the Middle East since 1945
3. Ability to conduct research and demonstrate a depth of knowledge and analysis of particular themes, issues or aspects of post-1945 Middle Eastern history
4. Ability to demonstrate a broad understanding and knowledge of the content of the subject
5. Demonstrate ability to discuss and critically analyse primary texts and other literature related to the subject
6. Develop both written and oral expression, essential skills for students at the upper-level and beyond.

Subject Content

Historical perspectives on the Middle East
The formation of the modern Middle East
The interplay of domestic, regional and international rivalries
The Cold War and the Middle East
The enduring Arab/Israeli conflict
Crises and conflict in the Middle East after the Cold War
Modern and religious ideologies and challenges to the Middle East states: transnational movements
Oil and the Middle East: regional and international political and economic implications
The modern Middle East in historical perspective

HUMN 3082 The Making of the `Aborigines'

Credit Points 10

Legacy Code 101757

Coordinator Madison Shakespeare (https://directory.westernsydney.edu.au/search/name/Madison Shakespeare/)

Description This subject is available to all undergraduate students who have open electives. The Making of the 'Aborigines' explores the complex human relations and historical forces that have constructed Australia's indigenous people as 'Aboriginal' and/or 'Torres Strait Islander'. It will involve a critical examination of a range of contemporary social and political issues impacting on and being engaged by Indigenous people. A more comprehensive understanding of the position of Indigenous people in contemporary Australian society will enable students to engage more effectively with Indigenous people.

School Humanities & Comm Arts

Discipline Indigenous Studies

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. identify key social and political issues that have impacted and shaped eAboriginalf and/or Torres Strait Islanderf lives and communities;
2. critically analyse the impact of key social and political issues on Indigenous Australia;
3. explain the impact of colonisation on Indigenous peoples and the ramifications of such for Non-Indigenous Australians;
4. identify Indigenous peoples' strategies of resistance to the colonising process - comparative studies;
5. use effective research skills to investigate the social and political issues that impact Indigenous Australia.

Subject Content

Invasion and Colonisation
Terra Nullius
State and Commonwealth Policies e.g. Protection, Assimilation, Integration, Self-Determination
Indigenous social indicators
Indigenous welfare dependence
US Civil Rights Movement and influence on Indigenous Australia
1967 Referendum
Politics of Land/Land Rights/Native Title
Deaths in Custody
Stolen Generation
National Apology to the Stolen Generation
Northern Territory Intervention
Stolen wages
Repatriation of Indigenous Remains
Revisionist policies e.g. NSW DSE Aboriginal Education Policy

HUMN 3084 Theories of Conflict and Violence

Credit Points 10

Legacy Code 100969

Coordinator Mark G. E. Kelly (https://directory.westernsydney.edu.au/search/name/Mark G. E. Kelly/)

Description Why do humans kill? What is the nature of war? This course is a selection of different established theories offering explanations of human violence and social conflict. Both theories of individual violence and aggression, and collective conflict are studied to give students a perspective on the forces behind these phenomena. Theories from politics, philosophy, psychoanalysis, sociobiology, sociology, and cultural studies are introduced to exemplify the classic positions and lines of reasoning. These are used to question and explain current forms of violence and conflict, and to give students better understanding of the issues behind attempts to forestall, manage or end conflict.

School Humanities & Comm Arts

Discipline Studies In Human Society

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Equivalent Subjects LGYA 0295 - Theories of Violence and Conflict

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the accepted causes and origins of human violence - individual and collective.
2. Analyse the traditions and forces at work in different particular instances of human violence.
3. Describe the typical forms of argument used in explaining or justifying conflict.
4. Evaluate the reasoning in such explanations and justifications.
5. Examine ethical issues in human conflict and violence.

Subject Content

- introduction to evolutionary theories - role of inter and intra species struggles.
- Origins and development of social Darwinism and socio-biology
- Recent sociobiology and new field of evolutionary Psychology and critiques
- Basic Psychoanalytic accounts of human aggression and violence/ violence and sexuality
- Classic theories of War: Sun Tzu and Von Clausewitz
- Ethical Issues of War and its justification
- The state and violence - Classic statements and modern amendments from Machiavelli, Hobbes, Kant to Weber, Benjamin, Foucault
- Conflict views of modern society - Marx, Sorel and class
- Spectacles of violence in contemporary culture
- Categories of violence: naming and representing
- contemporary Issues of Conflict and violence

Assessment

HUMN 3087 Twentieth Century Australia

Credit Points 10

Legacy Code 101999

Coordinator Bridget Brooklyn (https://directory.westernsydney.edu.au/search/name/Bridget Brooklyn/)

Description This survey subject provides an overview of major events in Australian political, cultural and social history of the twentieth century. The subject will examine key events such as World Wars and the Great Depression, but will also discuss broader changes that affected Australians, black and white, male and female, rich and poor. In doing so, it will examine some of the ideas and political movements that dominated twentieth century Australia, including class politics, feminism, imperial loyalty, indigenous politics, nationalism, racism and sectarianism.

School Humanities & Comm Arts

Discipline History

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Equivalent Subjects HUMN 3014 - Australian History since 1860 - 1920 HUMN 3016 - Australian History since 1920

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the chronology of events in twentieth century Australia.
2. Analyse the causal factors underlying events and social movements in twentieth century Australia.
3. Identify and analyse significant trends and themes in twentieth-century Australian history.
4. Implement a variety of skills and approaches to historical interpretation
5. Evaluate sources to employ historical analysis and argument.

Subject Content

Unit content may vary according to teaching staff available, and may include the following:
- Federation: inclusion and exclusion.
- Australia and The first World War.
- Australia in the 1920s.
- The Great Depression and the 1930s.
- Australia and The second World War.
- The Petrov Affair.
- post-War rumblings: Feminism, race and assimilation.
- Social protest in the 1960s.
- The Whitlam years and their impact on Australian society.
- The final decades: globalisation, indigenous politics and prosperity.

Assessment

HUMN 3088 Understanding Freedom

Credit Points 10

Legacy Code 101798

Coordinator Dimitris Vardoulakis (https://directory.westernsydney.edu.au/search/name/Dimitris Vardoulakis/)

Description "Understanding Freedom" consists of a close analysis of major theories of freedom from ancient times to the contemporary world. It explores the relation between freedom and imprisonment, freedom and politics, freedom and the everyday, as well as the way that freedom informs the production of culture.

School Humanities & Comm Arts

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 60 credit points

Learning Outcomes

On successful completion of this subject, students should be able to:

1. explore contemporary theories of freedom;
2. recognise ways in which theories of freedom can inform contemporary political ideas;
3. outline theories of freedom in Western thought;
4. discuss the role of freedom in philosophy and culture;
5. analyse and critique the traditional understanding of freedom;
6. evaluate how theories of freedom structure the thought of key-thinkers; and
7. apply knowledge gained in this subject to other areas of their experience

Subject Content

- "Understanding Freedom" looks at the way that freedom has been conceptualized and traces the development of that idea in Western thought.
- It examines how freedom is articulated in every-day life, and explores contemporary theories of freedom.
- The Examination of The concept of freedom will be carried out by concentrating on key thinkers who have written on freedom.

HUMN 3091 Violence in Everyday Life

Credit Points 10

Legacy Code 101898

Coordinator Chris Fleming (https://directory.westernsydney.edu.au/search/name/Chris Fleming/)

Description The subject provides an overview of the 'dark side' of human society and culture - violence. It examines how violence shapes, threatens and informs aspects of everyday life at home, work, school, the sports field and the street. Through a series of structured learning activities students engage with a range of documents and images to explore practices and experiences of violence. The role of institutions like the state, churches and sporting bodies in regulating violence will be considered. Students will gain skills in understanding the cultural milieu of marginal groups, languages of power and the emotions of excitement, fear and terror produced by acts of violence, skills useful for effective functioning in the workplace and family. The subject provides skills for honours level research in social and cultural analysis, law and legal studies, criminology, and history and political thought.

School Humanities & Comm Arts

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. critically read, evaluate and interpret texts about violence
2. integrate ideas and data from several different disciplinary traditions to develop an argument
3. work productively with peers to develop a shared research project
4. elaborate a research concept into a researchable question.

Subject Content

. Violence as 'ordinary' behaviour - human nature, social structure or individual deviance?
. Structural violence - slavery, racism and totalitarianism
. Religion and violence - crusades, conquistadores and coexistence
. Violence at home - conflict in intimate relationships
. Ritualised violence and sport - on and off the field
. Psychopaths in the workplace - creating safe environments
. Turf wars - gangs, neighbourhoods and community safety
. Cyberbullying and cybercrime
. Hoons and hooligans - young men, alcohol and thrill-seeking
. Violent education - shaping young minds, reproducing class inequalities
. Making violence routine: training killers in the military
. Developing peacful futures?

HUMN 3092 WWII in Asia and the Pacific

Credit Points 10

Legacy Code 101830

Coordinator Peter Mauch (https://directory.westernsydney.edu.au/search/name/Peter Mauch/)

Description This subject provides inquiry into the origins, course, and aftermath of WWII in Asia and the Pacific. We will ask why Japan and China went to war with each other in the 1930s; we will also seek understanding of why and how that war came to include the United States, Britain, the Soviet Union, the Netherlands, Australia, New Zealand, and practically all of Asia. We will examine the atomic attacks against Hiroshima and Nagasaki: Was the bomb a necessary evil? Or could/should the US have avoided using the bomb? We will also look intensively at post-WWII Asia. How did two wartime allies - the US and the Soviet Union - become bitter enemies within months of the war's end? Why did China descend into civil war? What was the war in Korea all about? Were wars of independence throughout SE Asia unavoidable? How was it that Japan escaped much of this postwar misery?

School Humanities & Comm Arts

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. identify the complexity of international affairs (in general), and (more specifically) analyse the international environment before, during, and after WWII
2. outline the issues that spark wars (in general), and (more specifically) discern the issues over which nations fought during WWII
3. evaluate key differences in scholarly interpretations of events
4. analyse primary source materials
5. construct a sound argument based on solid research into both primary and secondary sources

Subject Content

Origins, course, and aftermath of WWII in Asia and the Pacific
Japanese-U.S. relations; Sino-Japanese relations; Sino-U.S. relations; Soviet-U.S. relations; Japanese-Soviet relations
Colonialism and SE Asian independence
The atomic bomb
The International Military Tribunal for the Far East (IMTFE), war crimes, and international law
Ideology (including democracy, autocracy, authoritarianism, and communism) as a factor in international relations

HUMN 3093 War

Credit Points 10

Legacy Code 102423

Coordinator Peter Mauch (https://directory.westernsydney.edu.au/search/name/Peter Mauch/)

Description Have you ever wondered what war is good for? Edwin Starr thought it was good for "absolutely nothing." This subject will take you on an intellectual journey, around the globe and across history, as you reach your own answer to this question. You will evaluate the norms associated with war as well as the experiences of warriors from ancient through modern times. You will assess the role of militias, armies, navies, and air forces in the broad sweep of history. You will consider nuclear weaponry, terrorism, guerrilla warfare, just war theory, as well as anti-war movements.

HUMN 3096 What is the Human?

Credit Points 10

Legacy Code 101010

Coordinator Chris Fleming (https://directory.westernsydney.edu.au/search/name/Chris Fleming/)

Description This subject examines theories of human nature from a variety of historical and disciplinary perspectives. It engages with, and encourages the student to evaluate, conceptions of the human - some of which have had wide currency in the broader culture and some which have not. The subject also engages the idea of whether a unified conception of human nature is tenable at all.

School Humanities & Comm Arts

Discipline Studies In Human Society

Level Undergraduate Level 3 subject

Equivalent Subjects LGYC 1283 - What is the Human?

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate their familiarity with the most pervasive ideas of human nature in the western philosophical and anthropological traditions.
2. Recognise the complex and intricate links between concepts of human nature and epistemology, religion, ethics and art.
3. Be conversant with debates surrounding the idea of 'the human' and the very possibility of theorising at this level of generality.

Subject Content

1. Classical and contemporary philosophies of human nature
2. Contemporary anthropology and cross-cultural studies
3. Perspectives on human nature from science, especially contemporary biology
4. Postmodern critiques of the possibility of the 'sciences of man'
5. Implications for ideas of human nature on epistemology, ethics, and art
6. The idea of the 'post-human' and technology

HUMN 3098 Genders and sexualities: beyond the binary

Credit Points 10

Legacy Code 102733

Coordinator Lucy Nicholas (https://directory.westernsydney.edu.au/search/name/Lucy Nicholas/)

Description This subject encourages students to critically reflect on how their own identities and experiences of genders and sexualities are shaped by broader social practices that define what is natural and what is normal. The subject focuses on two substantive topics: the body and institutions. Bodies are usually understood through biological

explanations of gender and sexuality. However, this subject will consider how the body is shaped by the social discourses and practices through which genders and sexualities are produced. The subject investigates how age, race, class and ability are coded differently in terms of gender and sexuality. Institutions - families, schools, workplaces and religions - will be studied as sites where genders and sexualities may be observed but also produced and negotiated.

School Social Sciences

Discipline Gender Specific Studies

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 80 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse gender and sexuality in historical, political and social context.
2. Apply a critical understanding of social theories to gender and sexuality.
3. Demonstrate capacity to apply theories of gender and sexuality to personal experiences.
4. Assess institutional discourses of gender and sexuality.

Subject Content

Introduction: Gender, sexuality, identity and intersectionality
Theoretical perspectives on gender and sexuality; relationship between gender and sexuality
Gender, sexuality & power: Discourse, knowledge & subjectivity
Gender and sexuality across the lifespan
Gender, sexuality and the body
Gender, sexuality and violence
Gender, sexuality and the family
Gender, sexuality and the workplace
Gender, sexuality and education
Gender, sexuality and politics (National & global)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Critical Review	1,000 words	30	N	Individual
Essay	1,000 words	35	N	Individual
Case Study	1,000 words	35	N	Individual

HUMN 3100 Social Sciences International Placement (1): Preparation for Placement

Credit Points 10

Legacy Code 102723

Coordinator Nidhi Wali (https://directory.westernsydney.edu.au/search/name/Nidhi Wali/)

Description This subject is designed to equip students with the knowledge and skills required to successfully undertake a placement abroad, or in the case of those students who need to undertake a local placement, an organisation in Australia that is focused on international development. To this end, to prepare students for HUMN 3101 Social Sciences International Placement (II) the subject examines issues of sustainability and the political and ethical dimensions of volunteering, development and/or fieldwork. It interrogates the rise of volunteering and learning for development abroad experiences, and provides opportunities for students to reflect on their own part in this growth 'industry'. Workshops and online activities will cover practical topics such as health and wellbeing, and living and working in development contexts. They will also provide students with opportunity to learn more about their placement country and/or organisation and to begin developing skills in intercultural communication and interaction, ethnographic observation and reflexivity.

Co-requisite(s) HUMN 3101

Restrictions

Students must be enrolled in program 1667 Bachelor of Social Science; 1733 Bachelor of Social Science (Advanced); 1790 Bachelor of Anthropology; 1664 Bachelor of Tourism Management; 1735 Bachelor of Humanitarian and Development Studies, 6023 Diploma in Social Science/Bachelor of Social Science, 6027 Diploma in Social Science/ Bachelor of Humanitarian and Development Studies or 6030 Diploma in Social Science/Bachelor of Tourism Management. Students enrolled in 1667, 1664, 1733, 6023 or 6030 must have achieved a minimum GPA of 5 in order to enrol. All students must also have completed 160 credit points of study.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify key principles in sustainable development.
2. Analyse the ethical, political and power dimensions of volunteering, development and/or fieldwork.
3. Critically evaluate best practice principles in international volunteering, development work and/or fieldwork.
4. Identify key techniques for developing reflexivity.
5. Demonstrate intercultural understanding and awareness.

Subject Content

Introduction to fieldwork and the volunteer experience.
Introduction to sustainable development and the Sustainable Development Goals.
The ethics and politics of volunteering, development and fieldwork.
Cross-cultural communication, intercultural interaction and understanding.
Developing reflexivity.
Preparation for international travel and/or placement.
Health and wellbeing in international work contexts.

HUMN 3101 Social Sciences International Placement (II): Placement

Credit Points 20

Legacy Code 102724

Coordinator Peta Hinton (https://directory.westernsydney.edu.au/search/name/Peta Hinton/)

Description This subject provides students with the opportunity to apply skills and knowledge acquired during the first two years of their degree to a 'real world' setting. Students will undertake a 14 week internationally focused placement with organisations in, for example, the community, not-for-profit or government sectors. The subject coordinator will partner students with an international organisation, and together with the placement host(s) will jointly supervise the student. The work that students undertake during placement will vary, but may include: community visits, community consultation, development of educational programs, policy evaluation, research and report writing. Relevant activities may also be undertaken at another university in the placement country. The work placement will provide students with invaluable experience working in social sciences related fields in cross-cultural contexts. Prior to commencing the placement, students are required to complete pre-placement coursework (in co-requisite subject HUMN 3100 Social Sciences International Placement (I)). On return from placement the experience will be rounded out with the completion of HUMN 3102 Social Sciences International Placement (III). Students are required to complete a Working with Children Check, and medical clearance may also be required to undertake placement in a developing country, along with a Working With Children check for certain organisations. Those students unable to undertake an internationally based placement for health or personal reasons should contact the Subject Coordinator before enrolment in this subject to discuss available options for being placed locally. Students should also note that NSW Health facilities have further, specific requirements, and should seek advice from the Subject Coordinator.

Co-requisite(s) HUMN 3100

Restrictions

NOTE: Enrolment in the Summer session is only available under limited circumstances. Please contact the subject Coordinator for any further information. Students must be enrolled in program 1667 Bachelor of Social Science; 1733 Bachelor of Social Science (Advanced); 1790 Bachelor of Anthropology; 1664 Bachelor of Tourism Management; 1735 Bachelor of Humanitarian and Development Studies, 6023 Diploma in Social Science/ Bachelor of Social Science, 6027 Diploma in Social Science/Bachelor of Humanitarian and Development Studies or 6030 Diploma in Social Science/Bachelor of Tourism Management. Students enrolled in 1667, 1664, 1733, 6023 or 6030 must have achieved a minimum GPA of 5 in order to enrol. All students must also have completed 160 credit points of study, and should seek medical clearance if they are to undertake placement in a developing country context. Students who have not been cleared for undertaking international placement may be able to undertake a local placement, pending medical clearance for local placement activities.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Draw on placement experience to identify challenges in the workplace.
2. Develop responses to workplace challenges.
3. Demonstrate reflexivity in professional and cross-cultural settings.
4. Demonstrate intercultural understanding and awareness.
5. Apply social sciences knowledge in the workplace.

Subject Content

Intercultural immersion
Practising reflexivity in professional and cross-cultural settings
Development, volunteering and fieldwork in practice
Work experience: applying social sciences skills and knowledge in international work contexts.

Special Requirements

Legislative pre-requisites

Please note that due to the ongoing impact of COVID-19, the requirement to submit a Working with Children Check Student Declaration has been temporarily suspended until further notice.

HUMN 3102 Social Sciences International Placement (III): Post-placement Reflections

Credit Points 10

Legacy Code 102725

Coordinator Peta Hinton (https://directory.westernsydney.edu.au/search/name/Peta Hinton/)

Description This subject is the final component of the Social Sciences International Placement. Facilitated by the subject coordinators the subject comprises a series of workshops and assessments, which will provide opportunities for students to debrief and reflect critically on their placement experience. Assessments and workshops are designed so that students learn how to convey newly acquired skills, perspectives and life choices in different settings (classroom; job interviews and applications), and to apply the placement experience in immediate and life-long educational, professional and personal endeavours. For those students who have undertaken a placement overseas, the subject is also designed to encourage reintegration into their home culture. Specifically, assessments and workshops are designed so that students intentionally process and analyse the layered meanings of their time spent abroad, and the feelings and experiences of coming 'home'.

Students must be enrolled in program 1667 Bachelor of Social Science; 1733 Bachelor of Social Sience (Advanced); 1790 Bachelor of Anthropology; 1664 Bachelor of Tourism Management; 1735 Bachelor of Humanitarian and Development Studies, 6023 Diploma in Social Science/ Bachelor of Social Science, 6027 Diploma in Social Science/ Bachelor of Humanitarian and Development Studies or 6030 Diploma in Social Science/Bachelor of Tourism Management. Students enrolled in 1667, 1664, 1733, 6023 or 6030 must have achieved a minimum GPA of 5 in order to enrol. All students must also have completed 160 credit points of study.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically evaluate their own practice in development and/or fieldwork as measured against ebest practice principlesf.
2. Critically reflect on their own intercultural understanding and awareness.
3. Demonstrate reflexivity.
4. Demonstrate intercultural competence.
5. Critically reflect on the utility of social sciences knowledge in the workplace.
6. Identify how the placement experience may be incorporated into future career/study trajectories.

Subject Content

Practising reflexivity
Reflecting on development, volunteering and fieldwork in practice
Reflecting on intercultural experiences
Re-acculturation
Career building: Maximising placement and international experience
Social sciences in the workplace

HUMN 3103 Group Project

Credit Points 10

Legacy Code 102741

Coordinator Alexandra Coleman (https://directory.westernsydney.edu.au/search/name/Alexandra Coleman/)

Description This subject is designed to extend the employability, professional skills and networks of students. Every year, a range of options will be offered to students. These may involve activities as diverse as group research projects with existing available databases; simulation projects with 'real world' problems determined in partnership with an external agency or internal Western organisational subject; the development of a small-scale event that services a School objective and a community need; or a disciplinary or inter-disciplinary capstone project. The common objective is the development of students' skills in collaboration and team work through a focus on authentic tasks and problem-solving.

Level Undergraduate Level 3 subject

Restrictions

Must have successfully completed 160 credit points in enrolled program of study

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse a current community, organisational or professional need or problem.
2. Work effectively in teams to design and deliver a group project in response to an identified need or problem.
3. Apply advanced level disciplinary, or inter-disciplinary, skills and knowledges to "real world" problems.
4. Communicate project outcomes effectively in appropriate formats.
5. Reflect on their implementation of the task, its value to society, and their personal and professional knowledge and skill development.

Subject Content

1. Identification and analysis of a contemporary problem, or challenge, suitable for a semester-long group project.
2. The design and implementation of a semester long group project.
3. Communication of the project outcomes in appropriate formats.
4. Reflection on the group process and outcomes of the project.
5. Self-reflection on the roles undertaken, and the personal and professional benefits of participation.

HUMN 3104 Historical Methodologies

Credit Points 10

Legacy Code 102766

Coordinator Bridget Brooklyn (https://directory.westernsydney.edu.au/search/name/Bridget Brooklyn/)

Description The subject is an overview of Western historical thought and writing, from Herodotus to Foucault, demonstrating different approaches to historical knowledge. We examine some of the many ideas and sources that have influenced historical writing as well as some of the enduring questions, such as 'What is historical truth?' and 'Can history ever be objective?' Our exploration will include both close reading of texts and more 'hands-on' exercises to gain insight into different historical methodologies.

Level Undergraduate Level 3 subject

Pre-requisite(s) Any two of the following subjects -
HUMN 1054 OR
HUMN 1059 OR
HUMN 1039 OR
HUMN 2042 OR
HUMN 2067

Equivalent Subjects HUMN 3083 - Theories and Methods of History

Restrictions

Students are required to have completed two of the three Level 1 and 2 History and Political Thought or Modern History core units.

Successful completion of 80 credit points of study in currently enrolled program.

Assumed Knowledge

Students are expected to have completed prior study in either the History and Political Thought or Modern History majors and to understand the conventions of essay writing and referencing in history.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Recognise key developments in European historiography over several centuries.
2. Analyse important debates over historical writing, such as the question of historical truth.
3. Evaluate the ways in which historical ideas are communicated to the public at large, and the role they play in matters of community identity.
4. Interpret the challenges posed by different types of historical sources.
5. Assess the ways in which historical knowledge is developed.

Subject Content

Historians of classical and medieval Europe.
Historicism
The emergence of social history.
The development of alternative histories of class, race and gender.
Facts, interpretation, objectivity and the postmodern challenge.
Ideas of historical time.
Contested histories, including the Australian frontier wars.
Oral history and oral tradition, including Aboriginal and Torres Strait Islander oral forms in Australian history.
Interpreting sources
Public history
History and the creative imagination.

Assessment

HUMN 3105 History of Religion

Credit Points 10

Legacy Code 102734

Coordinator Milad Milani (https://directory.westernsydney.edu.au/search/name/Milad Milani/)

Description This subject will investigate 'religion' as an object of historical study. Students will consider a variety of approaches to historical considerations about beliefs, scriptures, and rituals that have come to be defined as religion, as well as those that have not. The subject will examine the development of various religious traditions from its foundation to its present state by exploring them in light of their cultural, political, and social context.

Discipline History

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss the history of religion from past to present;
2. Recognise and describe key people and periods in relation to the development of religion historically;
3. Apply and analyse critical-historical approaches to the study of religion;
4. Identify significant influences and/or changes in the process of historical development and the way these may have shaped key features of civilisation up to the present time.

Subject Content

Questions of theory and method: The study of religion in historical perspective, outline of approach to the subject
Prehistoric and ancient traditions
South Asia: Hinduism, Jainism, Buddhism, Sikhism
East Asia: Daoism, Confucianism, and Shinto
The Middle East: Zoroastrianism, Judaism, Christianity, Islam

HUMN 3106 Study Tours

Credit Points 10

Legacy Code 102742

Coordinator Jacki Montgomery (https://directory.westernsydney.edu.au/search/name/Jacki Montgomery/)

Description This subject provides students with opportunities outside the usual classroom experience. It is designed particularly for students who (1) enrol in short course study tours and/or (2) take a placement with an international or domestic workplace. A number of WSU partners offer short course study programs either internationally or domestically. The study tours offer an opportunity to spend up to three weeks off campus and experience real-life settings that allow for application of academic knowledge and understanding of on-the-spot discoveries.

HUMN 3107 Labour and Culture

Credit Points 10

Legacy Code 102781

Coordinator George Morgan (https://directory.westernsydney.edu.au/search/name/George Morgan/)

Description In recent history, social, economic, political and technological forces have produced profound changes to work and working life, undermining the stability of jobs and vocational skills, and disrupting and fragmenting career structures. This subject traces 1) the history of work, from pre-industrial to post-industrial times, 2) the rise of the factory system, 'Fordism' and scientific management of production, 3) the modern idea and experience of leisure and recreation as an adjunct to wage labour, and, in post-Fordist times, of culture and creativity as a central part of work, 4) the influence of technology on skills, and the rise of the 'knowledge economy' in the digital era, 5) the role of worker organisations in securing and protecting conditions of work.

School Humanities & Comm Arts

Discipline Studies in Human Society, Not Elsewhere Classified.

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 60 credit points in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the changes to the organisation of productive work through history.
2. Analyse the forces that have led to changes in production processes and to the contractual arrangements around paid work over time.
3. Critically evaluate ongoing debates about the future of work and employment.
4. Critically evaluate ongoing debates about the role and influence of technological change on working life.
5. Articulate the distinction between material and immaterial labour and between Fordism and post-Fordism.
6. Identify the roles that knowledge, innovation and symbolic creativity plays in contemporary economic life and commodity production.

Subject Content

Content may include:
Pre-Industrial Work: Gathering, Hunting, Making and Growing
Crafts, Guilds and Artisans
Industrial Revolution, Factory Labour and ?eClock Time?f
Work and Leisure
Mass Production, Taylorism and De-Skilling
Fordism, to Post-Fordism
Ethnicity, Indigeneity and Divided Labour Markets
Globalisation, Outsourcing and Supply-Chain Capitalism
Digital Technology, Immaterial Labour and The Knowledge Economy
Organised Labour in Industrial and Post-Industrial Times
Creative Industries, Networking and the Projective City
Jobs, Vocations, and Careers
Co-Working, Digital Nomadism and the New Geography of Work
Towards a Post-Work Society?

HUMN 3108 We Are The University: Students Co-creating Change

Credit Points 10

Legacy Code 102791

Coordinator Tai Peseta (https://directory.westernsydney.edu.au/search/name/Tai Peseta/)

Description This project-based subject offers students a chance to learn, negotiate and practise change-making skills in, and for, our University, Western Sydney University. At the heart of this subject is student partnership, curriculum co-creation, and an invitation for students to be involved in improving the educational experience at Western. Working in groups and alongside a university mentor, students will have an opportunity to contribute genuine solutions to an authentic education challenge that might be (a) commissioned by senior staff of the University; (b) intended to support students' aspirations to become a student leader; or (c) offers students a chance to undertake a project that advances their existing student leader or representative role. By choosing this elective subject, students not only receive credit for the partnership work they undertake, the University will have a new way of involving students in its decision-making processes. This is a subject intended to sharpen students' analytical skill-set and provide a taste of what it's like to operate as a change-maker inside a large and complex institution. This subject is recommended for all students, regardless of discipline.

School Social Sciences

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 80 credit points. Please note that this subject is recommended for all students, regardless of discipline.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Articulate a view of the purpose of universities and students’ role in them, drawing on the scholarly literature and multiple sources of data.
2. Carry out an inquiry project that addresses a substantial challenge intended to improve students’ educational experience at Western.
3. Create an artefact that communicates the findings of the project to the broad university community.
4. Identify why and how a student partnership approach can contribute to successful change-making in universities.
5. Describe the applicability of a partnership approach to your life as a student, and to your likely future endeavours.

Subject Content

1. Why study the University (and WSU)? History and Purpose
- Jeffrey J. Williams?fs concept ?eTeach the University?f
- Representations of the (Australian) University: influenced by philosophy, history, fiction, sociology
- An overview of the university sector in Australia
- An official history of WSU (Forsyth and Hutchinson) / An indigenous history of WSU
2. The difference between Governance and Leadership in universities
- Act of Parliament for WSU
- Leadership / Governance / Committee structure: who are the leaders and what do they lead?
- Role of Office of Governance at WSU: how does the business of university actually work?
- Where is student leadership, gove

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Peer Review	500 words	15	N	Individual
Report	2,000 words	30	N	Group
Presentation	10 minutes	20	N	Group
Reflection	1500 words; 4 min video equivalent	35	N	Individual

HUMN 3109 Catastrophe: The Environmental History of the Ancient World

Credit Points 10

Legacy Code 102835

Coordinator Brett Bennett (https://directory.westernsydney.edu.au/search/name/Brett Bennett/)

Description This subject examines past human interactions with the environment with its primary focus on the ancient Mediterranean and Near East between 2000 BC to 1600 AD. Case studies include Sumer, the lost civilisations of the Sahara, Egypt, Greece, Rome, the Maya and later European colonial empires. Students will assess, evaluate and synthesize data drawn from environmental history to analyse how the limits of natural resources constrain civilisations. The subject asks how catastrophic collapse of civilisations informs the sustainability of our own societies. Key topics will be soil fertility, deforestation, desertification, and climate change from ancient times to the Anthropocene.

Level Undergraduate Level 3 subject

Equivalent Subjects HUMN 3020 - Catastrophe The Environmental History of the Ancient and Modern World

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Define the interaction between Nature and Civilisation in the past
2. Explain the concept of resource constraint
3. Evaluate competing paradigms of environmental explanations for the collapse of civilisations in the ancient world
4. Define, with empirical examples, the key concepts: civilization�f, �enature�f, �eenvironmentalism�f, �eempire�f, �edesertification�f, �edesiccation theory�f, globalism
5. Distinguish civilisations of the world in terms of their relationship with nature

Subject Content

Civilisation and Nature: an overview
The World Inheritance: Religion and Nature
The Sumerians: For the want of a tree a kingdom was lost?
Ancient Greece and Deforestation
Ancient Rome: Soil Fertility and the Rot in the Heart of the Empire
The Mayan Catastrophe: Deforestation and Starvation?
Central Asia: Desertification on the Silk Road
Columbian Exchanges and Encounters 1400-1600
Colonialism and the fear of Global Desert
Forests and Power: An Australian Fantasy
Air Pollution and Climate Change
The Globalization (and future collapse?) of Nature
The Natural Limits of Homo Sapiens

Assessment

Presentation	5-10 minute presentation/ written notes 750 words	25	N	Individual

HUMN 3111 History of the People's Republic of China

Credit Points 10

Legacy Code 102842

Coordinator Niv Horesh (https://directory.westernsydney.edu.au/search/name/Niv Horesh/)

Description This subject is concerned with the historical complexities during the period between the establishment of the People's Republic in 1949 and up to the present day. It will equally focus on the Mao Zedong era (1949-1976) and on the post-1976 period, which saw the adoption and implementation of an "open-door" policy, and the launch of the "Four Modernisations". Due attention will also be paid to the Xi Jinping era (2012-present). We will explore a wide range of social and political issues that have a bearing on China's future as a potential world leader in the twenty-first century.

HUMN 3112 Indigenous Methodologies

Credit Points 10

Legacy Code 102850

Coordinator Corrinne Sullivan (https://directory.westernsydney.edu.au/search/name/Corrinne Sullivan/)

Description This subject provides an introduction to Indigenous research methodologies. It will develop the conceptual and theoretical knowledge of Indigenist, decolonial and anti-racist research methodologies to research with Indigenous peoples, and research that is of significance to Indigenous Australians. The subject also addresses ethical considerations and processes providing students with the skills and knowledge to engage in ethical research praxis.

School Social Sciences

Discipline Indigenous Studies

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) HUMN 1060

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine the ethical research processes and practices relating to research with Indigenous peoples and/or communities.
2. Explain the principles of a range of Indigenous research methodologies appropriate for application in research with Indigenous peoples, or matters related to Indigenous Australia.
3. Reflect on the role as an Indigenous or non-Indigenous researcher or practitioner undertaking research or work with Indigenous people/communities/subject matter.
4. Analyse the major social, political and scholarly influences that have underpinned the development of Indigenous research methodologies.
5. Apply the principles of current Australian research guidelines and codes of conduct.

Subject Content

Standpoint and Decolonisation
Critical self-reflection
Indigenous principles in research
Western research and Indigenous peoples, communities, and cultures
Decolonising frameworks for research with Indigenous Australian peoples
Indigenous Methodologies and Methods
Data sovereignty and Intellectual Property
Ethics and Research Practice

HUMN 3113 Migration and Social Change

Credit Points 10

Legacy Code 102862

Coordinator Sukhmani Khorana (https://directory.westernsydney.edu.au/search/name/Sukhmani Khorana/)

Description This subject will address the key concepts and issues of migration particular to settler colonies like Australia as well as nations in Europe and the Asia Pacific. It will consider the lives of first and second generation migrants and the spaces they inhabit, that is, rapidly growing suburbs and urban fringes. Attention will be paid to how migrant identities intersect with their class, gender and other categories. This includes a close examination of how their livelihoods are impacted by increasing gentrification, health and environmental crises, and intensified forms of border control and anti-immigration sentiment. Finally, the subject will encourage student to understand the contemporary influences such as solidarity movements and online cultures that impact our understanding of migration and prompt social change.

School Humanities & Comm Arts

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Equivalent Subjects HUMN 3085 - Transnational Migration HUMN 3086 - Transnationalism and Migration

Restrictions

Successful completion of 60 credit points in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critique concepts of identity, migration, multiculturalism and cosmopolitanism by applying these to relevant examples.
2. Discuss the intersection of migration with race, ethnicity, gender and class, and with the issues of urban development, global capitalism, public health and environmental crises.
3. Conduct primary research using a relevant methodology.
4. Clearly express complex ideas and arguments orally and in writing.

Subject Content

Migration, multiculturalism and cosmopolitanism
Public space: Ethno-burbs, community gardens, gentrification
Intersection of migration with gender, race and class identities
Art, media and migration
Contemporary crises (like COVID-19) and migration
Global mediated youth cultures and migration

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Reflection	1,500 words	30	N	Individual
Presentation	10 minutes (equivalent to 1,000 words)	20	N	Individual

HUMN 3114 Changemakers and Entrepreneurship

Credit Points 10

Legacy Code 800243

Coordinator Robert Salama (https://directory.westernsydney.edu.au/search/name/Robert Salama/)

Description This subject is designed for high-achieving students enrolled in the Bachelor of Creative Leadership or Advanced degrees. The subject supports students to successfully navigate innovation and entrepreneurship journeys by pushing boundaries, experimenting, learning from mistakes, and adapting to find new ways of approaching technical and social problems. In this subject, students will develop knowledge and skills in pitching and communicating solutions, creating material for crowdsourcing platforms and collaborating in multi-disciplinary teams to design solutions to contemporary problems affecting both local and global communities.

School Social Sciences

Discipline Studies In Human Society

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Equivalent Subjects HUMN 3052 - Innovation Lab

Restrictions

Students must have successfully completed 40 credit points of study in their course with a minimum GPA of 5.0 to enrol in this unit. Students who are enrolled in the Bachelor of Creative Leadership (BCL) must enrol in the unit under the BCL. Enrolment in the unit for students enrolled in the BCL is at the discretion of the Academy or the Director of Academic Program.

Learning Outcomes

1. Assess the need for innovation to address challenges in local and international communities.
2. Describe the main components in the innovation process and the entrepreneurial journey.
3. Communicate the need for innovation and articulate solutions to address complex challenges.
4. Demonstrate global awareness by articulating innovative approaches to real-world problems aligned with the United Nations Sustainable Development Goals.
5. Design feasible innovative strategies to address complex challenges by applying an innovative and entrepreneurial mindset and collaborating in cross-disciplinary teams

Subject Content

1. Types of Innovation.
2. Processes involved in creativity and innovation.
3. Entrepreneurship theories and entrepreneurship journeys for creative leadership.
4. Idea generation and validation.
5. Pitching and crowdfunding platforms.
6. Collaboration in cross-disciplinary teams.
7. Delivering innovative yet feasible solutions to complex problems.
8. The resources/tools/infrastructure that underpin innovation.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

HUMN 3115 Medieval Europe from the Fall of the Roman Empire to the Reformation

Credit Points 10

Legacy Code 102861

Coordinator Simon Burrows (https://directory.westernsydney.edu.au/search/name/Simon Burrows/)

Description This subject is an introductory survey of European history from the Middle Ages to the Early Modern period. It begins chronologically with the fall of the Roman Empire, and concludes with the Protestant Reformation. Students will be introduced to three core themes. The first is the gradual emergence of a distinction between church and state in the Christian west, the second is the feudal organization of medieval societies, and the third is the development

of intellectual life, including the origin of universities, natural law, and the Renaissance. Students will develop their knowledge as well as their skills in interpreting a variety of primary sources, including Medieval epic, theology, Renaissance art, political tracts, and archival documents including the Domesday book.

School Humanities & Comm Arts

Discipline History

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 60 credit points of study in currently enrolled course

Learning Outcomes

1. Discuss the major events, persons and ideas of the Medieval and Early Modern west.
2. Analyse major historical developments of the Medieval and Early Modern period and how they helped lay the foundations of the modern world.
3. Critically analyse a variety of primary and secondary sources, and articulate their significance to relevant historical problems.
4. Communicate thoughtful arguments and evidence-based conclusions orally and in writing.

Subject Content

The topics covered include but are not limited to:

1. The Fall of Rome
2. The “Dark Ages”
3. The Vikings
4. The Carolingians and the Holy Roman Empire
5. William the Conqueror and the Domesday book
6. Thomas Aquinas and natural law
7. Everyday life: the feudal system, plagues, war and famine
8. Christianity meets Islam: the Crusades
9. The origin of universities
10. The Renaissance – art, literature, music
11. The Renaissance – humanism
12. Interactions with the rest of the globe: trade and voyages of discovery
13. Medieval women
14. Crises of the late Medieval church
15. The Protestant Reformation

Assessment

HUMN 3116 Complex Emergencies and International Guidelines

Credit Points 10

Coordinator Jawed Nader (https://directory.westernsydney.edu.au/search/name/Jawed Nader/)

Description Over the last five decades, the world has experienced historically significant disasters, which have occurred in many different forms including natural (e.g. Tsunami or drought) and human-induced (e.g. wars or ethnic conflicts), leading to an unplanned exponential increase in the number of international non-government response organisations. This subject examines the causes and consequences of disasters and the application of international guidelines governing humanitarian responses. It provides an outline of theoretical approaches to the understanding of the political aspects of emergencies and introduces real-life case studies that aim to engage students in critical thinking and improve their knowledge of the core humanitarian standard on quality and accountability; the humanitarian charter and minimum standards; and the challenges related to interagency coordination in emergencies.

School Social Sciences

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Equivalent Subjects HUMN 2017 - Complex Emergencies and International Guidelines

Learning Outcomes

1. Describe different types of natural and human-induced disasters and phases of emergencies
2. Analyse theoretical frameworks to explain the causes of emergencies and assess their applications in various emergency contexts
3. Articulate the principles of disaster preparedness and mitigation
4. Analyse factors and activities associated with various types of disasters
5. Identify key players in emergency response and management, their roles and challenges they face
6. Apply major international guidelines and standards that govern humanitarian responses and assess enabling and disenabling factors associated with the adherence to such standards

7. Analyse challenges and ethical dilemmas associated with various emergency scenarios

Subject Content

1. Disasters: Definition, typology, and evolution
2. The right to humanitarian aid: International laws guiding humanitarian response
3. Theoretical foundations of disasters
4. Principal of disaster prevention, preparedness, and mitigation
5. Phases of emergency management and the relief-development continuum
6. Anatomy of disaster response
7. Core humanitarian standard on quality and accountability
8. The SPHERE project: humanitarian charter and minimum standards
9. Key challenges and dilemmas during humanitarian response
10. Militarization and politicization of humanitarian assistance
11. Case studies and lessons learned: Genocide in Rwanda vs. the Asian Tsunami

Assessment

HUMN 3117 Place-Making for Tourism and the Cultural Economies

Credit Points 10

Coordinator Felicity Picken (https://directory.westernsydney.edu.au/search/name/Felicity Picken/)

Description The subject will explore the strategic use of practices and institutions like the arts, heritage, architecture and museums to enhance and attract creative economic activities. Theories that assist in framing and explaining these changes are presented and debated alongside exemplar and emerging case studies to encourage the analysis of space, culture and economic practice in contemporary contexts.

School Social Sciences

Discipline Human Geography

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Equivalent Subjects CULT 3014 - Heritage Interpretation

Learning Outcomes

1. Describe the key contributors to the re-design of places in post-industrial contexts.
2. Apply knowledge of the museum as a microcosm of changes taking place in wider public settings.
3. Produce a design, drawing on relevant theory and practice to enhance the cultural arts economy of Western Sydney.
4. Synthesise and critically evaluate challenges and opportunities in efforts to remake places for post-industrial economies.

Subject Content

1. Introduction: defining the key contributors to place-making in post-industrial contexts
2. Writing and reading spaces through architecture and design
3. Exemplars and antecedents of remodelling places as consumption-scapes
4. Interpreting spaces through universal markers and marks of distinction
5. Models of material culture & the implications for interpreting heritage
6. Understanding the public/consumer/visitor
7. Engaging the public/consumer/visitor
8. Interpreting places through digital modes of consumption
9. Future directions: embodiment, mobilities, aesthetics and digital media

HUMN 3118 Indigenous Cultures: A Global Perspective

Credit Points 10

Coordinator Donna James (https://directory.westernsydney.edu.au/search/name/Donna James/)

Description Drawing on global case studies, this subject aims to introduce students to some of the pressing socio-cultural issues facing indigenous peoples around the world. The subject examines the complex relationships between globalisation, colonialism and post-colonialism and contemporary indigenous cultures and identities. It draws attention to the way in which issues of representation, cultural autonomy, cultural commodification, development and human rights play out with respect to indigenous peoples' lives. More specifically, the subject interrogates the power relations and politics central to many of these issues and examines the nature of contemporary indigenous and non-indigenous interactions, particularly in the contexts of tourism and heritage, the cultural industries, the environment, development and urbanisation.

School Social Sciences

Discipline Human Geography

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Equivalent Subjects CULT 3016 - Indigenous Cultures A Global Perspective

Learning Outcomes

1. Explain how globalisation has complexified indigenous cultural identities.
2. Demonstrate a critical understanding of the historical and contemporary relationships between indigenous and non-indigenous peoples and cultures by discussing the theories and concepts of colonialism, postcolonialism, autonomy, participatory methods and self-determination.
3. Critically reflect on the issues of cultural representation and cultural consumption.
4. Analyse how politics, power, ethics, ontology and epistemology influence the treatment of indigenous peoples in one of the following contexts: tourism and heritage, the cultural industries, land management and the natural environment, and development.
5. Use online technologies to organise, share and communicate Indigenous-related topics and issues.

Subject Content

1. Concepts of indigeneity in the changing world
2. Theories of colonialism and postcolonialism
3. Autonomy, self-determination and indigenous politics
4. Globalisation and indigenous identities and cultures
5. The representation and consumption of indigenous cultures
6. Mapping indigenous cultural landscape/s
7. Power, land rights, displacement and indigenous protected areas
8. Ethics, tourism, and cultural and environmental heritage
9. Sustainability, development and ethics in practice
10. Ethnography, travel and the Other

Level Undergraduate Level 3 subject

Equivalent Subjects HUMN 2022 - Emergency Field Operations Supply Management and Logistics

Learning Outcomes

1. Articulate logistics principles, processes and frameworks and their adaptations in humanitarian emergencies
2. Describe key challenges, ethical issues, and political dimensions of humanitarian logistics
3. Use recognised tools to plan and monitor supply chains and evaluate their effectiveness
4. Assess organisational capacity to respond to a humanitarian emergency
5. Conduct and report a Logistics Capacity Assessment (LCA)
6. Assess the role and effectiveness of the Logistics Cluster in humanitarian response
7. Articulate principles of sustainable deployment of goods and services

Subject Content

1. Logistics and supply chain management: key concepts and frameworks
2. Logistics in humanitarian emergencies: challenges, standards and the Cluster Approach
3. Preparedness and procurement: setting up local and global supply networks
4. Transport, warehousing and distribution
5. Assessment and monitoring: conducting a Logistics Capacity Assessment (LCA)
6. Co-ordination and Communication in emergency response contexts
7. Security and civil-military co-operation
8. New logistics frontiers: services, cash transfers and market support
9. Human resource management
10. Sustainability and performance evaluation

HUMN 3120 AI and Society

Credit Points 10

Coordinator Norma Lam-Saw (https://directory.westernsydney.edu.au/search/name/Norma Lam-Saw/)

Description AI is no longer only a topic of science fiction fantasy. It now answers questions, writes essays and code, manages customer service inquiries, and generates images, music and film. Its arrival poses new and critical questions about how technology impacts society. What does the effortless production of media mean for the future of education, work, culture, and governance? Does AI hold promise for key global challenges, from climate change to geopolitical instability? Or will it lead to rising inequality, alienation and corporate control? Trained on accumulations of media on the Internet, what are its effects on forms of social difference – gender, class, race, indigeneity, sexuality, disability? Students will develop critical literacy skills through introductions to the history, technical foundations, and current debates surrounding AI. The subject will involve a practice-based generative AI project, exploring issues of bias, plagiarism, copyright, ethics, misinformation and decision-making.

School Humanities & Comm Arts

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 60 credit points.

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Discuss key moments in the historical development of artificial intelligence
2. Explain the basic technical operations of artificial intelligence (model design, training and inference).
3. Recognise, analyse and reflect critically on key debates around AI technologies (gender, racial and other bias; impacts on labour and the future of work; spread of mis/disinformation)
4. Use AI to produce creative work that highlights aspects of AI's cultural and social impact.
5. Communicate effectively in a range of forms including individual / group-based outputs and written and creative work.
6. Apply knowledge gained in this subject to **other areas** of experience.

Subject Content

- Weeks 1-2: Introducing Algorithmic Culture: How to generate a story / artwork / film / song. Apply, reflect and evaluate the use of prompt variations and their effects in producing a piece of work using public AI services
- Weeks 3-4: History of the Future: From the Abacus to the Neural Net.
  Brief introduction to the history and technical foundations of Artificial Intelligence
- Weeks 5-6: Anatomy of AI: How does a Machine Learn? Unpacking a "Neural Network".

Simplified cases and examples to illustrate word prediction, boundary detection (images), linear regression (function), matrix manipulation and “garbage in/garbage out” (GIGO)

- Weeks 7–9: AI Choreography: Designing a “Critical AI” intervention. Explore and debate key concerns and critical perspectives on AI, combining the “lens” of technology and computing, sociology, philosophy, and evolving Australian regulation and policy. Storyboard one or more of these lenses for the AI
- Weeks 10-12: AI Showcase: Utopia / Dystopia? Practice-based group generative AI project – collaborate in a team to design a project that both uses and reflects critically on AI.

HUMN 4001 Researcher Development 1: Reading ,Writing, and the Business of Research

Credit Points 10

Legacy Code 800218

Coordinator Rebekah Ward (https://directory.westernsydney.edu.au/search/name/Rebekah Ward/)

Description Research is the process of using knowledge to generate new understandings of the world. Research is also a social enterprise, with communities and norms of behaviour, and is an industry that is shaped by numerous cultural and economic forces. Taking a holistic approach that includes general research skill development, this subject focuses on four main topics: (1) critical reading, (2) effective writing, (3) research as a professional industry, and (4) the ethics of stewardship and personal responsibility. The subject equips students with vital skills that underpin their discipline-specific learning, and lays the ground for their development as professional researchers.

School Graduate Research School

Discipline Literature

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 4 subject

Equivalent Subjects HUMN 4009 - Research Design 1 Theories of Enquiry

Restrictions

Students must be enrolled in 8083 Bachelor of Research Studies/ Master of Research, 8084 Master of Research (High Cost) or 8085 Master of Research (Low Cost), 8119 Bachelor of Research Studies (Planning), 1712 Master of Planning, 3702 (8112) Master of Information and Communications Technology (Research), 1870 Master of Chinese Cultural Relations, 1883 Master of Cross-cultural Relations, 3761 Master of Architecture (Urban Transformation), 1895 Master of Humanitarian and Development Studies, 1896 Graduate Diploma in Humanitarian and Development Studies or 1897 Graduate Certificate in Humanitarian and Development Studies.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Appraise the personal, societal, institutional, and intellectual process of creating new knowledge or new understanding of current knowledge.
2. Appraise the scholarly literature, identify research problems, and formulate research questions.
3. Employ academic referencing conventions and document production at a research standard;
4. Demonstrate the principles of professional academic writing to generate research grade text
5. Integrate knowledge from other units and sources to create a preliminary research proposal.

Subject Content

- The nature of research as a professional industry;
- The attitudes and the tools required to develop as a professional researcher;
- The principles of effective academic writing;
- The principles of detailed critical reading;
- Theories of how research fields develop over time;
- The external forces that shape research fields and research agendas;
- The concept of stewardship and personal responsibility in research; and
- The importance of reflective writing for developing a research project.

HUMN 4002 Researcher Development 2: Proposing and Justifying Research

Credit Points 10

Legacy Code 800220

Coordinator Michael O'Connor (https://directory.westernsydney.edu.au/search/name/Michael OConnor/)

Description An essential skill required by researchers is the ability to propose research and justify it in a persuasive manner. Through interactive workshops, Researcher Development 2 helps students develop and refine a research proposal. The subject includes workshops on research ethics that will help students articulate the significance and relevance of their work and will assist those requiring ethics clearance. The written proposal is defended through the oral Presentation of Proposal (POP). After successful completion of this subject, students will have demonstrated an ability to design and justify a research project in their discipline.

Level Undergraduate Level 4 subject

Pre-requisite(s) HUMN 4001

Equivalent Subjects HUMN 4010 - Research Design 2 Practices of Research

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate knowledge of codes and laws surrounding the ethical conduct of research.
2. Design a research project that adapts knowledge from diverse sources and articulates research questions that can be feasibly interrogated through research.
3. Identify, assess, and recommend feasible approaches or methods for undertaking the proposed research project.
4. Defend the design, impact, significance, and feasibility of a research proposal to a panel of scholars composed of one�fs broader discipline.

Subject Content

- Planning for research
- Managing human research ethics applications
- Conceptual introduction to ethical considerations of being a researcher and conducting research as public good
- Understanding the genre of research proposals
- Understanding the notion of impact
- Writing abstracts and impact statements
- Strategies for oral presentation of project proposals
- Planning for research
- Managing human research ethics applications
- Conceptual introduction to ethical considerations of being a researcher and conducting research as public good
- Understanding the genre of research proposals
- Understanding the notion of impact

HUMN 4003 Writing Beyond the Academy: Knowledge Translation and Public Audience Communication

Credit Points 10

Legacy Code 800219

Coordinator Jessica Weir (https://directory.westernsydney.edu.au/search/name/Jessica Weir/)

Description It is now more important than ever for researchers to explain their research to the public. Although it can be challenging to translate specialist knowledge for non-specialist readers, this is the skill students will receive training for in Writing Beyond the Academy. By following the model of The Conversation, a widely popular knowledge translation platform, students will learn the principles of public audience writing, how to pitch to an editor and how to work with their feedback, and produce their own public audience essay.

School Graduate Research School

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 4 subject

Equivalent Subjects HUMN 4012 - Research Literacies

Restrictions

Students must be enrolled in 8083 Bachelor of Research Studies/ Master of Research or 8119 Bachelor of Research Studies/ Master of Research (Planning) or 4698 Master of Health Science, 4700 GD Health Science or 4702 Master of Public Health.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically appraise public audience communication conventions used by researchers.
2. Develop a pitch of a research translation story suitable for a public audience in response to editorial guidelines.
3. Discuss how their own research field addresses issues of broader public concern.
4. Apply knowledge translation skills by writing for a non-specialist public audience;
5. Critically assess their own writing through engagement with reviewer feedback.

Subject Content

Introduction to the concept of Knowledge translation
Introduction to the principles of public audience writing

Pitching ideas to editors
Working with editorial feedback
Editing a piece of public audience writing

HUMN 4006 Honours Thesis Part Time 2

Credit Points 20

Legacy Code 101807

Coordinator Rae Dufty-Jones (https://directory.westernsydney.edu.au/search/name/Rae Dufty-Jones/)

Description This unit is the second unit of the research project and thesis of the BSS Honours program and consists of a research project designed and implemented under the direction of an academic supervisor and research mentor. It is only available to students who have been accepted into the honours programmes for the following Bachelors degrees - Community Welfare, Policing, Social Science and Tourism Management. This unit is the culmination of studies for students who have completed their undergraduate degree and provides substantial training in research. Under staff supervision, students choose the particular topic for their research, design their own programme of research , perform the research and analyse the results. The production of a thesis is at the end of this process. Students describe the rationale for their topic, their research programme, ethical issues, results and their conclusions.

HUMN 5001 Borders, Mobilities and Justice

Credit Points 10

Coordinator Selda Dagistanli (https://directory.westernsydney.edu.au/search/name/Selda Dagistanli/)

Description What kinds of illegal activities occur between and across borders? What do governments mean when they refer to "illegal immigrants"? This subject has a critical human security focus that aims to distinguish between illegal activity across borders and highly politicised narratives around immigration and asylum seeking. By examining the tensions between security, order and justice, the subject will focus on the increased demand for immigration and resettlement in a world marked by political unrest, global pandemics, and climate change. As such, students will critically examine notions of human mobility and the physical, legal and discursive construction of borders, and what that means pre and post-immigration for certain segments of the global population. These issues will be explored through global perspectives and with an interdisciplinary focus, emphasizing the impact of global issues on human lives. One of the core aims of this subject is to give students the ability to critically appraise how current domestic and international practices deployed by governments can perpetuate humanitarian and security crises, as well as the ever-increasing inequality between rich and poor nations. By the end of this subject, students will be able to make theoretically informed recommendations across rapidly changing and comparative national and political contexts.

School Social Sciences

Discipline Sociology

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 5 subject

Restrictions

Students must be enrolled in 1923 - Master of Global Security and Justice.

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Examine notions of human mobility and political discourse.
2. Appraise current domestic and international policies in immigration, security and border control.
3. Make theoretically informed recommendations for human security crises.
4. Work in teams to present alternative responses for human security crises.

Subject Content

• Tension between order and justice and how the idea of "borders" can create order and disorder in contemporary States.
• Theories and concepts of borders including: the historical and political creation of a concept of State sovereignty, geo-political borders (of countries).
• Social order as a dynamic relationship between territory, identity and belonging.
• How contemporary issues around borders and immigration came to exist and what should - and can - be done about it?
• Justice as a question of responsibility and ethics at the collective and personal level.
• The impact of global issues and contemporary and historical political responses to them, on human lives.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

HUMN 6001 Transnational Crime and Human Security Threat

Credit Points 10

Coordinator Sharon Kwok (https://directory.westernsydney.edu.au/search/name/Sharon Kwok/)

Description Transnational crime generates serious individual and collective social harm, and poses human security threats at national, regional and international levels. It challenges states, exploits individuals, compromises economies and the environment, destroys civil society, and ultimately weakens democracy. This subject begins by assessing the concepts and definitions of transnational crime. Instead of offering a general overview of transnational crime, this subject focuses on various types of transnational crime and examines their emergence, impact, and control from a human security perspective, by examining how globalisation affects criminal organisations. While considering the security threat that transnational crime and criminal organisations pose at national and global levels, this subject aims to equip students with a holistic understanding of transnational crime beyond conventional criminological perspectives, hence nurturing students' ability to develop just and human security focused policies to prevent and control transnational crime.

School Social Sciences

Discipline Studies In Human Society

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 6 subject

Equivalent Subjects HUMN 7047 - Transnational Crime

Restrictions

Students must be enrolled in a Postgraduate program.

Assumed Knowledge

Undergraduate degree in criminology, criminal justice or a related social science area, or equivalent.

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Review the rival theoretical explanations of transnational crime
2. Assess the causes of transnational crime and globalisation of criminal organisations
3. Evaluate the impact of various types of transnational crime and criminal organisation
4. Critique the obstacles to develop global criminal organisations
5. Examine relevant prevention and control strategies in responding to transnational crime

Subject Content

- Introduction and definition of transnational crime
- Economics of organised crime
- Borderless criminal organisations: mobility of criminal organisation and transantional crime
- Politics and criminal organisations
- Human trafficking and smuggling
- Drug trafficking
- Environmental crime and wildlife trafficking
- Policing the globe

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

HUMN 7001 Advanced Social Research Methods

Credit Points 10

Legacy Code 102177

Coordinator Rowena Butland (https://directory.westernsydney.edu.au/search/name/Rowena Butland/)

Description Students in Advanced Social Research Methods concentrate on methods for collecting and analysing research data. The subject builds on the key research concepts established in 102175 Research in the Social Sciences, in particular research methodology. Advanced Social Research Methods provides students with an overview of research design and the methods for collecting and analysing research data within the broad spectrum of the social sciences. This includes purposes, strengths and limitations and applications to professional domains and/or discipline contexts. Students attend in-depth workshops on specific methods offered by practicing researchers to evaluate the merits of different research methods.

School Social Sciences

Discipline Sociology

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) HUMN 7036

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically compare different research methodologies and approaches in the Social Sciences.
2. Demonstrate critical and strategic understanding of qualitative, quantitative and mixed methods research traditions in the social sciences.
3. Demonstrate depth of understanding of a range of methods of collecting and analysing research data, including their purposes, strengths and limitations.
4. Explicate the potential application of methods for collecting and analysing research data in relation to a research topic in a social science setting.

Subject Content

1. Research Methodologies in the Social Sciences ? theories and frameworks

2. Evaluation of qualitative, quantitative and mixed methods traditions
3. Methods of collecting and analysing research data (a range of methods will be reviewed)
4. Reading and evaluating social research reports
5. Application in professional fields of social research and social research methods

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Participation - online discussion on guest lectures	4 x 250 word contributions (total 1,000 words)	10	N	Individual
Reflection - critical reflections on 3 methods of data collection	3 x 1,000 word reflections (3000 words total)	45	N	Individual
Report - critical reflection on data analysis based on 2 of the methods discussed in assignment 2	2,000 words	45	N	Individual

Prescribed Texts

- Bryman, A. (2016) Social research methods. (5th edn.). Oxford, NY: Oxford University Press.

HUMN 7002 Applied Imagination

Credit Points 10

Legacy Code 101651

Coordinator Christy Hartlage (https://directory.westernsydney.edu.au/search/name/Christy Hartlage/)

Description This subject asks students to reflect upon imagination and its use in research, inquiry, and social action. It challenges students to develop an applied understanding of imagination in the development of creative responses to personal and social concerns. Underlying this exploration is a challenge to students to reflect upon the relationship between form, content and communication, objectivity and subjectivity, arts theory and practice, the writer, performer, artist and educator. The subject considers mediums for expression and communication; imagination as an analytical tool, and imagination as a means for understanding, communicating and enabling intentions and outcomes.

School Education

Discipline Education Studies

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program, with the exception of those students enrolled in the Bachelor of Research Studies.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. analyse and differentiate qualities in creative texts
2. communicate creative understandings
3. apply theory to the imaginative process
4. produce an imaginative response to a chosen issue
5. critically reflect upon personal imaginative processes through unit content
6. demonstrate appreciation of imaginative underpinnings of social construction

Subject Content

- An historical survey of conceptualisations of imagination
- Mapping The imaginative process: inter-relating personal and theoretical responses to performance, writing and Visual representation in A variety of contexts
- Evaluating quality and effectiveness in imaginative work
- Inquiring into The use of imagination in shaping personal and social agendas: The personal and social politics of imagination
- work with A variety of genres of Creative expression
- Creatively exploring personal experience and process of imagining
- imagining and developing Creative means for bringing about personal, social and cultural change

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Textual analysis in essay form	2,500 words	40	N	Individual
Imaginative presentation supported by written critical reflective discussion	2,500 words plus imaginative work (subject to negotiation with unit coordinator)	60	N	Individual

HUMN 7003 Applied Innovation and Entrepreneurship

Credit Points 10

Legacy Code 800211

Coordinator Michael O'Connor (https://directory.westernsydney.edu.au/search/name/Michael OConnor/)

Description Entrepreneurial & innovative skills are more important than ever for today's graduates where applying creativity to drive commercial outcomes is commonplace both for those working inside organisations and those developing their own business. This subject, based on the fundamental principle of 'doing', proposes to deliver principles and content through a highly applied approach. This is a subject that teaches entrepreneurship in a fundamentally different way to the traditional course structures. The subject is delivered through Western Sydney University's highly successful "Launch Pad Innovation Centre" which provides both Tech Start-up and SME business support. This subject maximises the opportunity for real-world application by delivering through a case study driven approach and utilising a mix of presenters including: academia, business mentors, industry specialists from Launch Pad partners such as KPMG, NAB and government industry representatives, and actual start-up and SME business owners as guest lecturers.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) HUMN 7038 AND
HUMN 7005 AND
HUMN 7026 AND
HUMN 7037

Restrictions

Students must be enrolled in a Doctoral (HDR) program and also enrolled in program 8111 - Graduate Certificate in Researcher Engagement, Development and Impact.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Recognise complex interactions among business, social, scientific and technological inputs;
2. Appreciate the dynamics and process of entrepreneurial and research leadership;
3. Demonstrate generic skills in a range of topics surrounding innovation and entrepreneurship;
4. Explain the process of research commercialisation;
5. Identify market opportunities;
6. Identify and understand the driving forces of enterprise success - finance, cash-flow, resources, logistics & strategy;
7. Demonstrate evidence of skills and experiences gained in an ePortfolio;
8. Reflect on own performance and identify own development needs.

Subject Content

- Fuelling innovation
- Understanding lean business models
- Research commercialisation in an innovation economy
- Reinventing through disruption and big data
- Business model innovation
- Customer discovery, validation and acquisition
- Starting your venture
- Challenging inertia
- Financing your innovation
- Staying afloat
- Growth hacking
- The entrepreneurial journey and continuing to be innovative

HUMN 7004 Australian Cultural Policy and Practice

Credit Points 10

Legacy Code 102542

Coordinator Diane Colman (https://directory.westernsydney.edu.au/search/name/Diane Colman/)

Description Understanding of Australia's cultural identity is essential for those who intend to engage in its promotion or in the management of cultural exchanges between Australia and other countries. This subject will describe the main features of Australian cultures including Indigenous culture, Western culture as inherited through settlement from Britain and elsewhere, and of multiculturalism arising from recent migration patterns. Students will study the history and current status of Australia's political institutions, its important international alliances and treaties, and the development of its independent foreign policy. An introduction will be given to Australia's major cultural management organisations and arts institutions (including invited guest speakers).

School Humanities & Comm Arts

Discipline Anthropology

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the Australian cultural identity in relation to a range of current or historic debates
2. Evaluate examples of Indigenous culture, multiculturalism and inherited British and Commonwealth cultures
3. Interpret the roles of state and non-state agencies in the cultural sphere and policy development
4. Develop proposals that represent Australian identity in major cultural events and anniversaries

Subject Content

The complexity of Australian cultural identity
The cultural heritage of Australia?fs First Nations
British settlement and its cultural inheritance
A changing Australia and the diversity of multiculturalism
The development of cultural policy and practice in Australia
Cultural institutions in Australia and how they operate
Representing Australia on film
How the world sees Australia through the visual arts
The sporting life brings Australia to the world stage
How the world hears Australia in words and music

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Summary	500 words	15	N	Individual
Discourse Analysis	1,500 words	35	N	Individual
Proposal	Part (a): 10 minutes, 1,000 words equivalent; Part (b): 2,000 words	50	N	Individual

HUMN 7005 Career and Personal Development

Credit Points 10

Legacy Code 800198

Coordinator Jessica Weir (https://directory.westernsydney.edu.au/search/name/Jessica Weir/)

Description A key skill in becoming a professional researcher is learning how to manage your career options. Fundamental aspects of this include making strategic choices regarding research focus and employment directions, learning to build professional networks both locally and internationally, and undertaking self-directed learning to continually expand your abilities and knowledge. This subject is designed to provide a structured approach to these aspects of career planning, and will include collaborative workshops where experienced researchers join the group to discuss the art of navigating around external constraints while forging your own path forward. As an early

application of these principles, the subject involves completion of your Confirmation of Candidature proposal.

HUMN 7006 China Culture Study

Credit Points 10

Legacy Code 102544

Coordinator Jocelyn Chey (https://directory.westernsydney.edu.au/search/name/Jocelyn Chey/)

Description This subject provides students with opportunities outside the usual classroom experience. The subject uses knowledge acquired previously in the subject Chinese Cultural Policy and Practice and offers a real life application of this knowledge within a Chinese cultural context. Students will be required to travel to China for two to three weeks during their inter session break. While in China, they will visit important cultural and academic institutions and keep a daily diary of this experience. On their return to Australia students will be finalising assessment tasks required as part of this subject.

School Humanities & Comm Arts

Discipline Anthropology

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) HUMN 7007

Restrictions

Students must be enrolled in 1870 Master of Chinese Cultural Relations.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss Chinese culture, as it applies to social and artistic settings.
2. Consider the roles of cultural institutions in relation to knowledge of contemporary Chinese society and Chinafs international cultural links.
3. Integrate existing knowledge with new, on-the-spot discoveries.
4. Reflect on observations of contemporary China in relation to historical, social, artistic and technological developments.

Subject Content

Planned short visit in an international setting.
Integration of discipline knowledge in an international context.
Intercultural understanding and skill development.

HUMN 7007 Chinese Cultural Policy and Practice

Credit Points 10

Legacy Code 102541

Coordinator Qiang Guo (https://directory.westernsydney.edu.au/search/name/Qiang Guo/)

Description China's relationship with Australia and the rest of the world is critical to Australia's future success. This subject offers a broad introduction to Chinese society, history and politics and will cover in more detail cultural developments, including the creative arts such as music, literature, visual arts and film, together with popular arts and the digital transformation of media and the arts. An outline of Chinese aesthetic theories, cultural policies and the work of critics will be presented. The roles of art institutions such as museums, galleries, performance companies and publishers will be considered, together

with agencies involved in international cultural exchange such as translators, censors and copyright agencies. The study of the interplay of Chinese language, thought and culture will be an integral part of this subject. A case study of a particular cultural medium may be presented by an invited guest speaker. This subject may be further developed through the China Culture Study subject which is an alternate subject within the Master of Chinese Cultural Relations course.

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss developments in Chinese history and social changes
2. Critically analyse theoretical frameworks related to Chinese culture
3. Critically evaluate contemporary Chinese cultural manifestations
4. Analyse the development of a particular Chinese art form and its institutional management
5. Discuss issues applying to the technological development and internationalisation of Chinese culture

Subject Content

1. Introduction to Chinese history, society and political developments
2. An overview of aspects of Chinese language, thought and culture
3. Introduction to Chinese aesthetics and cultural policies
4. Outline of Chinese cultural forms including art, music, theatre, film, literature and popular culture
5. An examination of a selected art form through literature search
7. Digitalisation and globalisation of Chinese culture
6. Arts management and the functions of art institutions in China

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Portfolio	1,000 words (equivalent)	30	N	Individual
Report	2,500 words	50	N	Individual

HUMN 7009 Critical and Creative Enquiry

Credit Points 20

Legacy Code 102628

Coordinator Sarah Versitano (https://directory.westernsydney.edu.au/search/name/Sarah Versitano/)

Description This subject is designed to extend students' capacity to undertake critical and creative research in the arts therapies. Students will have the opportunity to work together and extend each other's work while undertaking a small research project that does not involve human research subjects. The theories and ethics of difference and diversity will be central to the process of enquiry. This includes formulation of research questions or problems, the choice and articulation of appropriate methodologies; data gathering and analysis; and the preparation of a research report. Students will learn to systematically question the dominant assumptions of their field and generate alternatives to a tendency for practitioner research to reproduce 'the same'.

Equivalent Subjects HUMN 7025 - Integrated Project LGYA 7525 - Integrating Theory Research and Practice

Incompatible Subjects HUMN 7010 - Critical and Creative Enquiry WELF 7020 - Practising Research and Researching Practice

Restrictions

Must be enrolled in 4595 Master of Art Therapy or 8083, 8084, 8085, 8086, 8087 Bachelor of Research/Master of Research.

Assumed Knowledge

Introductory knowledge of theory and research methodology.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Plan and implement a sustained critical reading program in a relevant area.
2. Map and critically analyse the connections between theory, research and practice.
3. Investigate a research question so as to critically conceptualise relationships between theory, research and practice in arts therapy.
4. Demonstrate an understanding of the research process in practice.
5. Organise, create and reflect on an oral, visual and/or performative presentation of their work.
6. Exemplify high level analytical and written skills in the completion of the final written report.

Subject Content

1. Advanced literature searching.
2. Advanced analysis of how theories of difference and diversity relate to research methods and research practice.
3. Ethics of practitioner research.
4. Exploration of theoretical, critical, collaborative and arts-based research practice.

5. Developing and implementing a research project.
6. Developing collaborative and research team skills.
7. Preparing and giving a seminar presentation on the process of working in teams/groups.
8. Preparing a written research report.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

HUMN 7011 Cultural Diplomacy and Soft Power

Credit Points 10

Legacy Code 102543

Coordinator Di Dickenson (https://directory.westernsydney.edu.au/search/name/Di Dickenson/)

Description This subject provides an introduction to key topics and debates in diplomacy and international relations. Relationships with other governments depend on diplomacy, which has been defined as the art of persuasion. Diplomatic modes, including those based on universalist values and those based on pragmatic self-interest will be considered and tested in the context of contemporary bilateral, regional and multilateral relations. The concepts of soft power and international public relations will be considered in the light of current cultural diplomacy campaigns, and tested through simulated role-play.

School Humanities & Comm Arts

Discipline Anthropology

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the theories of soft power and cultural diplomacy and describe examples of their application
2. Discuss the history and main trends in public and cultural diplomacy worldwide
3. Describe and analyse examples of Australian and Chinese cultural diplomacy
4. Develop solutions to real-life cases involving the application of cultural diplomacy

Subject Content

Theories of cultural diplomacy.
History of cultural diplomacy and international cultural organisations.
Australia?fs cultural diplomacy.
China?fs cultural diplomacy.
Case studies developed through role play.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Presentation: Presentation on personal investigation of a current issue. It involves (a) 500 word overview of the presentation and (b) Presentation (10 minutes per student)	Part (a) 500 words; Part (b) 10 minutes per student	15%	N	Individual
Research Essay: It involves: (a) 2 x 500 word blogs while preparing essay (10%) and (b) Essay 2,500 words (30%)	Part (a) 2 x 500 words; Part (b) 2,500 words	40%	N	Individual
Case Study: Team inquiry task on case-study problem. It involves (a) Group presentation (30%) (b) Individual diary (15%)	Part (a) 20 minutes; Part (b) 1,000 words	45%	N	Both (Individual & Group)

HUMN 7012 Cyber Justice (PG)

Credit Points 10

Legacy Code 102424

Coordinator David Tait (https://directory.westernsydney.edu.au/search/name/David Tait/)

Description This subject explores the evolving relationship between digital technology, justice and crime. How are the temptations and risks associated with harmful or illicit behaviour being re-shaped by information and communication technologies, by social media and the computer networks that increasingly hold organisations together? Cyber crime is typically understood as use of information and communication technologies to assist in the commission of other crimes, actions that target computer networks or software, or new offences that could only exist with the technology. Cyber justice meanwhile emphasises the use of information and communication technologies to improve access to justice and the efficiency of justice procedures, not just to deal with cyber crime. How does the law keep up with the emergence of new crimes and technology-enhanced versions of old ones, and how do forensic investigators and analysts contribute to this process? The subject examines how justice processes and spaces, as well as criminal networks and strategies, are being reimagined to take advantage of the new technologies.

School Humanities & Comm Arts

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Previous study of cultural and social analysis, history and political thought, law, psychology or criminology would be useful, but is not required. Experience of using social media would also be useful but not required.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe and critically evaluate the nature of cybercrime (including cyber terrorism and cyber war) and the techniques, targets and harms produced by it.
2. Describe and critique the way cyber technologies are used in policing and courts to transform justice processes and respond to cybercrime.
3. Identify and evaluate relevant media reports, research material, images and other relevant sources relevant to cybercrime and cyber justice.
4. Analyse and interpret research about cybercrime and cyber justice in terms of its method, use of sources and contribution to academic debates.
5. Develop research ideas in a peer-supported learning environment.
6. Communicate research arguments logically and clearly in oral and written form.
7. Use digital technologies to collaborate, develop arguments and settle disputes.

Subject Content

Cybercrime: new and enhanced crimes of the digital age
Cyberjustice: the transformation of justice by digital technologies
Cyber war and cyber terrorism
Cyber bullying and stalking
Privacy and surveillance
On-line and virtual justice

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

HUMN 7013 Debates in Global Interactions

Credit Points 10

Legacy Code 102341

Coordinator Gregory Barton (https://directory.westernsydney.edu.au/search/name/Gregory Barton/)

Description The subject considers the history of the ways that different regions of humanity have interacted, since 1400. The subject will consider such topics as: ethnic-centrism (how to address it in historical and political knowledge?); the era of 'Pan Asia' (what does the rise of China and India mean for historical and political studies?); the prominence of 'nation' in historical knowledge (how to treat human history as 'global'?); the relationship of ethno-nationalism to globalization; the periodization of global history (turning points in the emergence of a global humanity); the determinants of difference and commonality in human history; the characteristics of 'empires'; the natural limits of humanity.

HUMN 7015 Digital Humanities Research Methods (PG)

Credit Points 10

Legacy Code 102426

Coordinator Rachel Hendery (https://directory.westernsydney.edu.au/search/name/Rachel Hendery/)

Description This subject investigates the methodological possibilities of digital technologies for interdisciplinary humanities and social sciences research. It covers several major digital research methods, exploring previous applications and examining their orientations and implications. Digital research methods and applications may include digitisation, online curation, visualisation, network analysis, geographical information systems, data mining and simulation. In the context of these, the subject will probe histories of technology and knowledge production, the evolution of digital texts and practices, and issues in contemporary culture such as digital design, gamification, virtual identity, and digital rights.

School Humanities & Comm Arts

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss the range of ways digital technologies are applied in advanced interdisciplinary research contexts;
2. Apply the key principles of collaborative design and participation in digital projects in academic and industry settings;
3. Analyse the applications and influence of digital technologies on social and cultural research methodologies; and
4. Create a digital project based on an application of digital technologies to a contemporary research question.

Subject Content

1. Introduction to subject ? The ?ecomputational turn?f in the humanities
2. Digitisation
3. Data/text mining and visualisation
4. Gaming
5. GIS and mapping
6. Network analysis, social media, metadata 7. Students present their own final project.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Reflection	1000 words max	20	N	Individual
Presentation	20 minutes per presentation	30	N	Individual
Essay	3000 words max (or equivalent combination of digital work and written exegesis)	50	N	Individual

HUMN 7017 Ecopedagogies

Credit Points 10

Legacy Code 102157

Coordinator Tonia Gray (https://directory.westernsydney.edu.au/search/name/Tonia Gray/)

Description In simplest terms, ecopedagogies is teaching and learning in partnership with Nature. This interdisciplinary subject examines place-based theory and outdoor-experiential education. Research has repeatedly shown that outdoor experiential learning promotes health, well-being, cognitive advancement, growth and development for children, youth and adults. Correspondingly, the importance of ecopedagogies in this historical era cannot be underestimated. The precariousness of human/nature interrelationships compels us to explore new ways of learning and knowing and ecopedagogies provides new ways of connecting with the natural world. Further insight is gained through engaging with First Peoples' knowledge systems through the conceptualisation of 'country' and relational frameworks.

School Education

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine the broad theoretical underpinnings of ecopedagogies
2. Engage with First Peoples?f knowledge systems and apply them to their understandings of human/nature relationships
3. Apply knowledge of human development and the ways in which it is supported by applied ecological learning
4. Apply ecopedagogical principles to support human health and well-being
5. Critically reflect upon own insights and applications of specific ecopedagogical experiences

Subject Content

Ecological consciousness and its implications in precarious times
Ecopedagogies and the reciprocity of human/nature relationships
First Peoples?f ways of knowing as a foundation for ecopedagogies
Human development and the foundational role of experiential outdoor education
The role of ecopedagogies in learning, health and well-being
Theories and models of childhood/youth/adult outdoor provision and pedagogy
Global perspectives and place-based understandings of human/nature relationships in an increasingly urbanized and technological world

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Learning sequence	2,500 words	50	N	Individual
Implement and report on the project. Include personal reflections on pedagogies and processes and participant feedback	2,500 words	50	N	Individual

HUMN 7018 Ecopsychology and Cultural Change

Credit Points 10

Legacy Code 101652

Coordinator Erin Mackenzie (https://directory.westernsydney.edu.au/search/name/Erin Mackenzie/)

Description From 2020 students should note that core subjects are now taught in semesters rather than half yearly sessions. Ecopsychology is concerned with the relationship between human consciousness, human actions and environmental issues. It seeks to understand the sources, both phenomenological and socio-cultural, of the disjuncture between nature and psyche and to develop possibilities for personal and cultural re-connection and healing. Through applying experiential methods, critical inquiry and engagement with ecopsychological writings, students develop their awareness of "self", "nature", "culture" and explore the dynamics between them. The subject incorporates perspectives on ecological identity, ecospirituality and sense of place as ways of re-imagining the human-nature relationship and effecting ecologically-oriented change.

School Education

Discipline Education Studies

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. critically analyse and reflect upon the experiential and socio-cultural dimensions of their own personal relationships with nature;
2. employ a range of methods for developing a critical and reflexive ecological consciousness;
3. critically evaluate differing psychological, spiritual and ecological standpoints as they apply to the development of ecological identity;
4. critique the influence of personal, cultural and cosmological narratives in shaping human-nature relationships;
5. apply ecopsychological perspectives to inform processes of cultural transformation;
6. articulate potentials and challenges associated with the project of ecopsychology.

Subject Content

Nature and psyche - perceived oppositions and integrative possibilities

Ecological consciousness and ecological identity
Ecological perspectives on self and society
Sense of place
Somatic, archetypal and transpersonal approaches to ecopsychology
Deep ecology & new cosmologies
Place, story, relationships and reconciliation
Ecopsychology and cultural change

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Ecopsychology reflection and project plan	1,000 words	25	N	Individual
Project report	4,500 words	75	N	Individual

HUMN 7019 Emergency and Disaster Management

Credit Points 10

Legacy Code 102575

Coordinator Mubashar Hasan (https://directory.westernsydney.edu.au/search/name/Mubashar Hasan/)

Description This subject uses comparative analysis of different emergency responses to humanitarian disasters to provide students with the skills and knowledge required to play a role in future emergency and disaster management. Students will gain knowledge of the geo-political forces and key international frameworks and standards that shape humanitarian responses, and of the motivations and approaches of aid donors and humanitarian NGOs when intervening in states. They will also gain foundational knowledge of assessment of NGO capacities and organisational infrastructure for managing emergencies, for example their organisational structures and cultures, donor priorities, support systems and personnel.

School Social Sciences

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Contrast the different emergency responses to humanitarian disasters through a comparative analysis of the skills and knowledge required in emergency and disaster management.
2. Critically analyse the geo-political forces and key international frameworks and standards that shape humanitarian responses
3. Articulate the motivations and approaches of aid donors and humanitarian NGOs when intervening in states.
4. Demonstrate a foundational knowledge in the assessment of NGO capacities and organisational infrastructure such as organisational structures and cultures, donor priorities, support systems and personnel for managing emergencies.

Subject Content

- A comparative analysis of the different emergency responses to humanitarian disasters in development of the skills and knowledge required in emergency and disaster management.
- A critical analysis of the geo-political forces and key international frameworks and standards that shape humanitarian responses.
- An exploration of the motivations and approaches of aid donors and humanitarian NGOs when intervening in states.
- A foundational knowledge of the assessment of NGO capacities and organisational infrastructure such as organisational structures and cultures, donor priorities, support systems and personnel for managing emergencies.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Essay	1,500 words	30	N	Individual
Case Study	1,500 words	30	N	Individual
Final Exam	2 hours	40	N	Individual

HUMN 7021 Fieldwork in Complex and Hostile Places

Credit Points 20

Legacy Code 800213

Coordinator Scott Flower (https://directory.westernsydney.edu.au/search/name/Scott Flower/)

Description Working overseas is demanding and poses unique research challenges as well as risks to personal security and safety. This seven-day intensive subject teaches a range of applied research approaches, field skills, techniques and technologies to prepare students for operating safely overseas. The immersive scenario-based role-play learning is delivered at an off-site location. Drawing on United Nations accredited curriculum, the subject equips students with an appreciation for the major methodological, ethical, legal, logistical and personal challenges they are likely to confront when working 'in the field.' The subject is of special relevance to students seeking employment in Government and NGO sectors.

School Graduate Research School

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 20cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate or High Degree Research program code.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. produce a high-quality fieldwork-focused Research Plan, Ethics Application and Risk Management Plan with supporting documentation;
2. demonstrate a practical understanding of the University Risk Management, OHS, Security and Travel Guidelines;
3. understand the range of personal and institutional moral, legal and ethical issues involved with fieldwork;
4. articulate the pros and cons of specific research methods and analytical tools appropriate for addressing their fieldwork research question/problem
5. undertake applied research or work in a complex and hostile location;
6. demonstrate their awareness of the key personal security challenges confronting researchers in the field and how to respond appropriately to mitigate or manage such risks;
7. understand in advanced capacity what complex and hostile environments are, and be able to manage personal and research participant risks whilst undertaking effective research; and
8. make effective plans and decisions regarding fieldwork (prior to, during and after deployment) as part of an overarching research strategy.

Subject Content

1. A Fieldwork Philosophy
2. Scoping the research question/s in preparation for the field
3. Applied Research Design
4. Ethical considerations and applications
5. Legal issues and obligations
6. Data collection methods, data management and cyber security in the field
7. Fieldwork planning and risk management: approaches and techniques
8. Practical field craft ? travel, health and safety skills for fieldwork in complex and hostile places
9. Security Context
10. Field Preparedness and Evacuation
11. Field Communication Protocol
12. Sexual Assault
13. Residence Assessment Exercise
14. Basics of Negotiation
15. Coping with Insecure Environments: Stress Awareness
16. Weapons Awareness
17. Fire and Movement
18. Introduction to GPS and Navigation
19. Field Communication Equipment
20. First Aid: Essentials for life support (EAR/CPR, major bleeding control & evacuation/repatriation)
21. Image and Acceptance
22. Vehicle Check Points/Road Blocks
23. Trip Planning
24. Crowds and Mobs
25. Field Security
26. Kidnap Avoidance and Hostage Survival
27. What to do on arrival in-country (i.e. flexible organisation, travelling light for mobility & security)
28. Patterns of behaviour and predictability including counter-surveillance
29. Stress Disorders (ASD & PTSD and mental health first aid)
30. How to not be a target (image and acceptance)
31. What to do regarding the presence of small arms
32. How to avoid and/or cope with threats of physical violence and physical violence

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Reflection	3,000 words	25	N	Individual
Proposal	7,000 words	65	N	Individual
United Nations learning modules	4 x modules - 9-10 hours in total	10	N	Individual

HUMN 7022 Global Criminology and Human Rights

Credit Points 10

Legacy Code 102200

Coordinator Stephen Tomsen (https://directory.westernsydney.edu.au/search/name/Stephen Tomsen/)

Description Global criminology is concerned with the process of respecting and fostering ideals of justice, the rule of law and human rights in an expanding range of transnational and domestic locations. These include stable, divided and post-conflict societies that are variously dealing with issues of discrimination, exploitation, insecurity and violence via international agreements, judicial and political means. The global development of justice initiatives has challenged the traditional criminological concern with individual offenders prosecuted by the sovereign nation state acting on behalf of a sole victim. In this subject students will gain a critical understanding of theories and concepts of global criminology, detail of the key aspects and uses of international criminal law, and the potential of alternative modes of attaining social justice. Case studies from around the globe will be analysed along with an emphasis placed on assessing the significance of issues, rights and justice reforms in developing regions.

School Social Sciences

Discipline Criminology

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Undergraduate degree in criminology, criminal justice or a related social science area, or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain key terms and issues in global criminology;
2. Distinguish theories of global criminology and globalisation;
3. Assess key literature and research evidence demonstrating a critical understanding of policy implications;
4. Design and successfully complete a research project in International Criminology.

Subject Content

Theory and scope of global criminology
State crimes and legal liability
Transitional justice
The globalisation of law and human rights
Victimology and international victim rights
Crime, Human Rights and the UN
Gender and international justice
Health and human security
Human rights and worker exploitation
Criminalisation versus protection of refugees
Strengths and weaknesses of international criminal justice (the ICC)
Justice initiatives in developing regions

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Opinion Piece (Op-ed)	1,000 words	20	N	Individual
Book Review	1,000 words	20	N	Individual
Applied Project: Research project	3,000 words	60	N	Individual

HUMN 7023 Global Health, Migration and Development

Credit Points 10

Legacy Code 102576

Coordinator Melissa Phillips (https://directory.westernsydney.edu.au/search/name/Melissa Phillips/)

Description This subject introduces students to the intersection between global health, human migration and economic development. Students are introduced to international efforts to manage and support better health for all populations, particularly those under stress through civil conflict or epidemic. Through the lens of migration theories, the course will examine why and how people migrate, the dynamisms and complexities of migrants' settlement in their new environment, the socio-economic and political dimensions of forced migration and its consequences, and the relationship between voluntary migration and economic and development goals at regional, national and international level.

School Social Sciences

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Assumed Knowledge

A broad and coherent knowledge, with depth in the underlying principles and concepts in one or more disciplines in Arts or Social Sciences.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and critically review conceptual frameworks for understanding migration processes and causes and effects of migration locally, regionally, and internationally.
2. Explain the socio-political dimensions of different types of migration and the social and health burden associated with various types of migration.
3. Articulate relevant policy responses to maximise the socio-economic impact of voluntary migration including the strengths and limitations of their application.
4. Succinctly summarise international standards and guidelines as well as best practices governing the needs of forced migrants.
5. Differentiate the roles of key UN agencies from those of international NGOs and the civil society in response to the needs of various types of migrants and in relation to advocacy.
6. Develop competence in analysing the role of voluntary migration in the context of development assistance, poverty alleviation and skill transfer.
7. Critically review the ethical dimensions associated with the militarisation of development aid and humanitarian response.

Subject Content

1. Globalisation and international migration

• Relationship between globalisation and migration
• International migration theories
• Patterns of international migration
• Key frameworks, conventions and dialogues to manage global migration and refugees
• International migration controversies

2. Understanding the distinction between internally displaced peoples, refugees, asylum seekers and migrants

• Overview of the social and health burden of IDPs: fleeing, returning and post conflict phases.
• Policy Response: soft vs. hard laws

3. Responses to forced migration - complex humanitarian emergencies and protracted crises

- History and patterns of complex humanitarian emergencies
- Disaster epidemiology
- Setting priorities and decision making and programming
- International guidelines and standards
- Refugee governance and regional mechanisms and policy response

4. Forced Migration: Asylum seekers

- Who is an asylum seeker? How do they differ from an IDP or a refugee
- Detention practice and ethical dimensions
- UNHCR detention guidelines
- Social and health burden of asylum seekers in detention
- Alternatives to detention: the European perspective vs an Australian perspective
- Social and health policy response: role of NGOs in detention vs. political response.

5. Forced Migration: Climate Change and Displacement

- The challenge of predicting the scale of climate and environmentally induced migration
- Current trends, patterns and approaches to address the issue
- Explore interconnected effects of climate change, health, and migration including the types of health consequences linked to climate change that act as drivers of migration

6. Dimensions of voluntary migration - rural to urban migration; transnational migration

- Rural-urban migration and economic growth in low and middle income countries
- The socio-economic impact of rural-urban migration in developed countries
- The health consequences of rural-urban migration in Africa: Case studies and policy response to rural-urban migration: China, South Korea, and OECD countries

7. Policy dimensions, diasporas and addressing the development challenges related to migration

- The health burden of voluntary migrants

Assessment

Level Postgraduate Coursework Level 7 subject

Assumed Knowledge

A broad and coherent knowledge, with depth in the underlying principles and concepts in one or more disciplines in Arts or Social Sciences.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and assess enablers and barriers to development from historical, geographical, political, demographic, sociological and economic perspectives, and the various roles of different actors in development processes.
2. Describe and critically assess current international efforts to end poverty.
3. Critically consider the accountability and ethical approaches of humanitarian actors and agencies in global development.
4. Theorise the nexus between humanitarian interventions and development processes.
5. Critically review the ethical dimensions associated with the militarisation of development aid and humanitarian response.

Subject Content

1. The complex interplay of ideas surrounding international response and management of natural and man-made disasters, and the consequent efforts to induce development or to rebuild states.
2. The emergence of international humanitarian and development agencies from the mid-20th century to the modern day.
3. Current International efforts to end poverty, such as the United Nations Conference on the Human Environment, the Rome Declaration and Plan of Action on World Food security, the Millennium Development Goals (MDGs) and the post-2015 Sustainable Development Goals (SDGs).
4. Enablers and barriers to development from historical, geographical, political, demographic, sociological and economic perspectives.
5. Humanitarian and development actors and the various roles they play in intervention and development processes.
6. Accountability and ethical approaches of humanitarian actors and agencies in global development.
Ethical dimensions associated with the militarisation of development aid and humanitarian response.

HUMN 7026 Knowledge Translation

Credit Points 10

Legacy Code 800199

Coordinator Michael O'Connor (https://directory.westernsydney.edu.au/search/name/Michael OConnor/)

Description Knowledge translation looks at how knowledge created through research can be applied in real world contexts. It takes research from the theoretical stage (i.e. "that's interesting, but so what?") to the applied stage where it can be used to create real impact. In this subject, we explore the two main processes of knowledge translation - communication and implementation. This is a highly collaborative subject where the interdisciplinary group meets to engage in general theoretical discussion and practice various knowledge translation activities based on our various fields of research.

School Graduate Research School

Discipline Studies In Human Society

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a PhD program or program 8111 - Graduate Certificate in Researcher Engagement, Development and Impact

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Integrate academic presentation experience into a coherent narrative that demonstrates development and refinement of advanced oral and written communication skills for an academic setting, highlighting relevant outcomes and impacts.
2. Understand concepts and frameworks in implementation science and how to utilise implementation science theory to effect change
3. Establish an effective research profile to build networks and dissemination avenues, including various platforms such as Twitter, LinkedIn, ResearchGate, Academia.edu etc
4. Demonstrate evidence of skills, personal attributes and experiences gained in an ePortfolio.

Subject Content

What is knowledge translation?
Knowledge translation as a pathway to building impact opportunities
Strategies for building networks, end users and dissemination avenues

Developing a knowledge translation strategy
Communicating research results and impact within and outside academia
Implementation science and how it can be harnessed to create change

HUMN 7027 Leading Change

Credit Points 10

Legacy Code 102161

Coordinator Loshini Naidoo (https://directory.westernsydney.edu.au/search/name/Loshini Naidoo/)

Description From 2020 students should note that core subjects are now taught in semesters rather than half yearly sessions. This subject explores change and leadership through a range of contexts. In this subject we critically analyse cultural, structural and political dimensions of change in organisations, systems and communities. This subject is grounded in leadership models that feature collaborative and relationship enhancing approaches to enable purposeful change.

School Education

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse the nature of change, change agency and the role of individuals, organisations and systems
2. Critique change strategies, including media, contexts, systems and impacts.
3. Articulate a holistic perspective on leaders as activists, advocates and capacity builders within change processes
4. Analyse models of leadership for productive change
5. Use cases to apply theoretical understandings about leadership and change
6. Evaluate a range of effective strategies, processes and skills that may be used to develop and maintain constructive teamwork;
7. Evaluate a case study of successful change leadership
8. Evaluate reflective and ethical approaches to case study conduct

Subject Content

1. Understanding and critically analysing change and change contexts.
2. Theory and practice of leadership for change.
3. Critiquing and building models of leadership for activism, advocacy and capacity building
4. Application of understandings about leadership and change to specific cases and examples.
5. Building strategic partnerships and active team work.
6. Using and developing case studies to examine change.
7. Reflective and ethical approaches to case study conduct.

HUMN 7028 Management and Evaluation of Aid Programs

Credit Points 10

Legacy Code 102578

Coordinator Thierno Diallo (https://directory.westernsydney.edu.au/search/name/Thierno Diallo/)

Description Evaluation of development aid and relief programs is an instrument for accountability and effective learning in terms of what works, for whom, in what circumstances, and at what cost. This subject uses critical and practical analyses to provide students with the skills and knowledge required to plan, implement, manage, and evaluate development aid and relief programs. Students are introduced to program planning and management strategies, types of evaluation approaches and their application, and evaluation dissemination utilisation. They gain practical skills to translate evaluation into policy and practice

Level Postgraduate Coursework Level 7 subject

Assumed Knowledge

Students have undergraduate level knowledge of research design, method and analysis.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and assess approaches to differing evaluation and monitoring frameworks for humanitarian and development projects.
2. Demonstrate skills in developing theory of change/project logic to guide the establishment of project/program effectiveness.
3. Demonstrate the knowledge and skills required to develop a project proposal in response to a call for an evaluation.
4. Critically examine both internal and external forces and realities that may hinder the acceptance of evaluation findings.
5. Critically evaluate project/program proposals and evaluation reports.

Subject Content

Introduction
Part I: Log Frame
Result-Based Management and the Logical Framework approach
Ten Steps to a Logical Framework

Analysis

1. Situation Analysis
2. Setting objectives
3. Defining a strategy

Planning
1. Project effects
2. Project operations
3. Project context
4. Project Design
5. Indicators and means of verification

The M&E plan
Summary of Part I
Part II: Theory of Change
1. Introduction to Theory of change
2. Analysing problems and linking results
3. Mapping stakeholders and programmes
4. Interpreting and evaluating a theory of change

Part III: Evaluation
1. Evaluation: The Basics
2. Conducting an Evaluation
3. The Evaluation Plan
4. The Evaluation Report
5. Needs Assessment
6. Process Evaluation
7. Impact Evaluation
8. Summary of Part III

Assessment

HUMN 7029 Master of Social Science Thesis

Credit Points 40

Legacy Code 102040

Coordinator Kamel Taoum (https://directory.westernsydney.edu.au/search/name/Kamel Taoum/)

Description This is a 40 credit point year-long subject taken over two terms (20 credit points in each term). This yearlong subject requires the completion of a research thesis and associated activities. The purpose of this subject is the completion of a research study building on the research subjects so far completed in the core subjects of the Master of Social Science. Students will work with a supervisor to frame, conceptualise, conduct and complete a research study and present a final research thesis.

School Social Sciences

Discipline Studies In Human Society

Student Contribution Band HECS Band 4 20cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) HUMN 7036 AND
HUMN 7045

Co-requisite(s) HUMN 7001

Restrictions

Students must be enrolled in 1770 Master of Social Science or 1712 Master of Planning and have successfully completed 80 credit points including subjects 102175 Research in the Social Sciences & 102179 Theories of the Social.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate advanced knowledge and critical analysis skills in reviewing relevant literature
2. Formulate a successful research proposal for high level independent research thesis
3. Identify and apply a comprehensive understanding of the purpose and the requirements for ethics approval
4. Successfully argue the case for the methodology and theoretical perspective for a research project
5. Apply their skills and knowledge in a sustained program of critical reading, research activities and research writing
6. Present the research at a professional standard to an academic audience
7. Exemplify advanced academic analytical and written skills in the completion of the final written research thesis

Subject Content

Supervision contract with an academic supervisor
Seminars and workshops conducted from time-to-time to support completion of the research thesis
Literature review
Research proposal ? research question, methodology, research design, collection and analysis methods

Ethics application and clearance, as necessary
Research activities to complete the thesis
Writing activities to complete the thesis
Written and seminar presentation of the research findings and report

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Theory & Methodology Discussion paper	2,500 words	15	N	Individual
Seminar presentation & Attendance	20 minutes	5	N	Individual
Thesis	15,000 words	50	Y	Individual

HUMN 7031 Political Economy of Development

Credit Points 10

Legacy Code 101895

Coordinator Zulfan Tadjoeddin (https://directory.westernsydney.edu.au/search/name/Zulfan Tadjoeddin/)

Description The subject introduces students to the main theories and the diverse political economy dimensions of development. It consists of three modules. The first deals with key concepts that interrogate the meaning of development, origins of prosperity and the concepts of poverty, inequality and redistribution, which are contentious in their applications to various groups. The second module examines core issues in the political economy of development, which include globalisation, foreign aid, democracy, conflict and the role of the state. The last module engages with pertinent case studies focusing on Asia, the Pacific as well as problems with development in the Western world.

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Review various theoretical perspectives of development and debates surrounding them.
2. Identify and critically analyse the core issues and their inter-linkages in the diverse perspectives of political economy of development.
3. Critically analyse cases of development using appropriate theoretical frameworks.

Subject Content

Module I - Concepts
1. Defining and measuring development
2. Origins of prosperity: Capital, geography, culture and institutions
3. Poverty, inequality and redistribution
Module II ? Core Issues
4. Globalisation: The West and the rest
5. Development assistance and foreign aid
6. Fragile and failed states: The bottom billion
7. Democracy and development
8. The state and development: Searching for a right balance
Module III ? Case Studies
9. The East Asian and Southeast Asian miracle
10. Global financial crisis (GFC) and populism
11. Development in the Pacific: Vulnerability of small island states
12. The struggle of Indigenous peoples

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Essay	800 words	25	N	Individual
Critical Review	800 words	25	N	Individual
Case Study	1,400 words	50	N	Individual

HUMN 7032 Public Health in Complex Emergencies (Advanced)

Credit Points 10

Legacy Code 102574

Coordinator Nidhi Wali (https://directory.westernsydney.edu.au/search/name/Nidhi Wali/)

Description The health, socio-economic, and political aspects of conflicts and disasters are complex and multidimensional, requiring political commitment and coordinated and effective prevention. This subject uses critical analyses to provide students with the skills and knowledge required to understand the politics of public health response in emergency situations. Students will be introduced to rapid health assessment protocols in, and health priorities and the prevention of public health effects of, complex emergencies. They will gain practical skills to evaluate and critically appraise the evidence used to inform

public health policy and the effectiveness of different decision-making practices in emergency situations.

School Social Sciences

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critique the principles that govern health response in complex emergencies, including the responsibility to respond and protect, and the roles and responsibilities of various actors.
2. Articulate relevant policy responses pertaining to decision making frameworks including when to respond, who does what and when, and when to leave or phase out the intervention.
3. Critically review the political and ethical dimensions of public health response in complex emergencies and how they relate to international agendas.
4. Evaluate the strengths and limitations of available evidence and epidemiological data that inform the public health response.
5. Analyse both internal and external forces and realities that may facilitate or impede the delivery of public health services and programs in complex emergencies.
6. Demonstrate the practical skills to plan, implement, and evaluate evidence-based prevention programs.
7. Deploy critical appraisal skills to evaluate the effectiveness of NGO coordination and interagency decision making in the humanitarian response.

Subject Content

- Multidimensional health, socio-economic, and political aspects of conflicts and disasters.
- Analysis of the requisite political commitment and coordinated effort for effective prevention.
- Critical analyses and their use in understanding the politics of public health response in emergency situations.
- Rapid health assessment protocols for priorities in health, and the prevention of public health effects of complex emergencies.
- The development of practical skills in the evaluation and critical appraisal of the evidence used to inform public health policy, and the effectiveness of different decision-making practices in emergency situations.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	10 Multiple Choice Questions	10	N	Individual
Case Study	2,500 words	40	N	Individual
Presentation	15-20 minutes presentation	20	N	Group
Quiz	90 minutes	30	N	Individual

HUMN 7034 Research Project in Cultural Exchange

Credit Points 40

Legacy Code 102545

Coordinator Nicholas Ng (https://directory.westernsydney.edu.au/search/name/Nicholas Ng/)

Description In this subject you will undertake a research/development project in relation to cultural exchange with China. This may include professional involvement in a cultural exchange activity and/or a research project on an issue relating to cultural exchange. The activity will include researching the literature and interpreting this in relation to the chosen task in a research/project report. There is no class work. Each student will be supervised by a member of staff in the School of Humanities and Communication Arts.

School Humanities & Comm Arts

Discipline Anthropology

Student Contribution Band HECS Band 4 40cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) HUMN 4010

Restrictions

Students must have successfully completed 70 credit points in the Master of Chinese Cultural Relations or the Master of Cross-cultural Relations.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse historical and current Australian and Chinese cultural traditions that may influence current cross-cultural exchange activities

2. Apply theoretical perspectives, knowledge and experience based on working with practitioners to developments in intercultural exchange
3. Research issues relating to cross-cultural exchanges and events to resolve barriers to effective cultural interaction
4. Design and implement communication strategies and a business plan in relation to a cultural exchange activity
5. Develop and evaluate an innovative approach to cross-cultural communication and practice

Subject Content

Major practical or theoretical research project supported by documentation.
Documentation of project and progress reports.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

HUMN 7035 Research and Public Policy

Credit Points 10

Legacy Code 800212

Coordinator Anna Denejkina (https://directory.westernsydney.edu.au/search/name/Anna Denejkina/)

Description Public policy can effect change in society at global, national and local levels. This subject examines public policy and the role of research in its development. Students will explore, analyse and understand the link between research and public policy, will receive guest lectures from experts in public policy development, and have the opportunity to produce a peer-reviewed public policy paper or article.

School Graduate Research School

Discipline Studies In Human Society

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) HUMN 7038 AND
HUMN 7005 AND
HUMN 7026 AND
HUMN 7037

Restrictions

Students must be enrolled in a Doctoral (HDR) program and 8111 - Graduate Certificate in Researcher Engagement, Development and Impact.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse public policy in local, national and global contexts
2. Recognise and appraise the sources of existing public policies, their purpose and the processes used in their development.
3. Evaluate how policies can be designed to support basic principles of social justice.
4. Examine the contribution of a number of alternative approaches to the identification of issues, research methods, implementation and analyses of public policy.
5. Prepare an outline of public policy journal article or draft of public policy general audience article addressing a topic relevant to the studentðfs research area.
6. Reflect on own performance and identify own development needs.

Subject Content

Role of public policy
Ethics and public policy
Theory of public policy
Development of public policy
Role of public policy
Ethics and public policy

HUMN 7036 Research in the Social Sciences

Credit Points 10

Legacy Code 102175

Coordinator Sharon Kwok (https://directory.westernsydney.edu.au/search/name/Sharon Kwok/)

Description From 2016 this subject replaced by 102357 - Ethics and Diversity in Research and Therapy for students enrolled in 4595-Master of Art Therapy only. This subject provides foundational skills and knowledge for research in the Social Sciences including contemporary developments such as digital and online research. It introduces key research concepts of epistemology, ethics, theory and methodology drawing on different fields of studies within the Social Sciences. The subject canvasses critical debates and approaches to research in the Social Sciences; the processes by which knowledge is created through research; and the purposes to which knowledge is applied in the Social Sciences. Finally, the subject focusses on developing student's skills and knowledge for developing research questions and research proposals.

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects CULT 7005 - Research for Practice

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Undergraduate degree in the Social Sciences or equivalent.

Learning Outcomes
On successful completion of this subject, students should be able to:

1. Demonstrate critical understanding of the importance of research in the social sciences
2. Critically analyse the processes by which knowledge is created through research
3. Explain and evaluate epistemological and theoretical frameworks for research in the social sciences
4. Understand and demonstrate the steps required in completing a research proposal
5. Appraise different methodological approaches to research in the social sciences

Subject Content
1. Introduction ? research in the social sciences
2. Contemporary approaches to research in the social sciences
3. Doing ethical research in the social sciences
4. From research interest to research question ? developing a research question
5. Conceptualising research in the social sciences - What is ontology/epistemology
6. Theoretical perspectives in the social sciences
7. Research Methodologies
8. Methods for collecting and analysing research data
9. The research proposal template
10. Writing as research

Assessment
The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Literature Review	500 words each, (total 2,000 words)	40	N	Individual

Essay	100 words each, (total 1,000 words)	10	N	Individual
Report	2,000 words	50	N	Individual

HUMN 7037 Researcher Engagement and Impact

Credit Points 10

Legacy Code 800209

Coordinator Jessica Weir (https://directory.westernsydney.edu.au/search/name/Jessica Weir/)

Description Maximising impact requires strategy. In addition to an extensive relationship-building with external parties as well as a general commitment to knowledge translation, achieving impact also means being strategic with research design from the earliest stages of project planning. Who is your research targeted to? What are the broader social aims of your research? Which individuals and organisations might have a stake in the outcomes of your research? What are the relevant disciplinary, policy, economic, industry, and social contexts for your research? What barriers or opportunities exist within these contexts? What social media and other communication platforms are available for you to transfer knowledge? What types of public communication should you engage in, and at what stages of your research? This subject will explore how to design research projects with such questions in mind, by combining collaborative workshops with assessments tailored specifically to your own circumstances. Whatever stage your research is at, you will have the opportunity to produce output that will feed into your broader impact or engagement objectives.

HUMN 7040 Social Ecology

Credit Points 10

Legacy Code 102152

Coordinator David Wright (https://directory.westernsydney.edu.au/search/name/David Wright/)

Description This subject focuses on learning in the context of social-ecological understanding. It asserts that ecological sustainability is a consequence of the understanding and enactment of social-ecological relationships. In this regard 'social ecology' describes a field of understanding while 'sustainability' describes praxis in a social-ecological context. Both experience and the understanding of experience - learning- are subject matter. This study is undertaken through reference to ecological systems of understandings in the context of challenges to that understanding. It is grounded in reference to learning, change, creativity, culture, politics and the physical environment. The subject introduces key theorists and invites students to examine their personal relationship to social-ecological learning.

School Education

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects HUMN 7039 - Researching Social Ecology

Restrictions

Students must be enrolled in a postgraduate program, with the exception of those students enrolled in the Bachelor of Research Studies.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Understand social ecology as a contested term through insight into the history of its use (and thereby possible future uses) in the field of sustainable social practice.
2. Communicate understanding of the systemic base of ecological relationships.
3. Evaluate transformative learning theory for its relevance to individual and social sustainability.
4. Design a project that demonstrates a capacity to work with learning, in and through personal, social and environmental relationships, and design a sustainable response to an issue of learning.
5. Create insight into the relationship between personal experience and learning through ecological understanding.
6. Evaluate ecological understanding and transformative learning theory as socio-cultural phenomena, through reference to real world experience

Subject Content

1. Social ecology, sustainability and the ecological discourse
2. Systemic perspectives and the perspective of the participant
3. Social ecology, sustainability and ecological science
4. Learning in relation to Indigenous ways of knowing, place and ?ethe local?f
5. Learning through imaginative and creative ways of understanding and communicating
6. ?eMindfulness?f in relation to ecological understanding
7. Social ecology, sustainability, social action and patterns and perceptions of change

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

HUMN 7041 Social Research in the Digital World

Credit Points 10

Legacy Code 102194

Coordinator Jenna Condie (https://directory.westernsydney.edu.au/search/name/Jenna Condie/)

Description This subject provides a critical introduction to the opportunities and challenges of digital social research as well as the theoretical, methodological, and ethical implications of carrying out research in and on the digital. The social web provides researchers both with a tool and an environment to explore the intricacies of everyday life. In this subject, students will be immersed in online environments to further understand the theoretical, methodological and ethical issues of social research in the digital world. Through such activities, students participate as active digital researchers in online social science spaces to result in a professional online web presence and an in depth understanding of current and future research trends in digital social research.

School Social Sciences

Discipline Sociology

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse the similarities and differences between emerging methods of digital research and traditional social research methods;
2. Undertake in-depth evaluation of the possible challenges of digital technologies to established theoretical assumptions and paradigms in the social sciences and in interdisciplinary contexts;
3. Articulate a critical understanding of different digital research methods and analyse their relative merits and limitations for different research contexts;
4. Demonstrate their ability to participate in networked scholarly practices across the social web.

Subject Content

1. Overview of the field of digital research
2. Conceptualising digital research settings
3. Digital research similarities and differences in comparison to more traditional research practices
4. Understanding of the place of digital research in the broader field of social research
5. Limitations and possibilities for digital research
6. Ethical concerns associated with digital data gathering, analysis and production
7. The political economy of digital data; power, control, and politics
8. Working with various types of digital data
9. The role of the researcher in digital research

HUMN 7044 Theories of Difference and Diversity

Credit Points 10

Legacy Code 102176

Coordinator Peta Hinton (https://directory.westernsydney.edu.au/search/name/Peta Hinton/)

Description This subject will introduce students at post-graduate level to contemporary theories and concepts of difference and diversity. The subject will particularly examine feminism, post-structuralism, new materialism, queer theory and critical realism. It will also address specific concepts such as inequality, human rights, freedom and marginalisation. It will apply these theories and concepts to investigations of contemporary social issues and debates related to race, disability, ethnicity, sexuality, gender and other categories of individual identity and collective belonging. The subject will provide a strong theoretical base to the work that students have undertaken in the subject Theories for Critical Practice, and inform the work to be undertaken in the other subjects in this specialisation.

HUMN 7045 Theories of the Social

Credit Points 10

Legacy Code 102179

Coordinator Sky Hugman (https://directory.westernsydney.edu.au/search/name/Sky Hugman/)

Description This subject examines the notions that humans are intrinsically social beings who are at once products of and producers of their own circumstances. By providing an overview and critical engagement with a wide array of social theories, the subject explores key aspects of human society including structure and agency; knowledge and power relations; culture and identity; class, economy and consumption; self, society and the public sphere; social change and social justice. Students consider the social, political and discursive processes through which theories are made and applied, and how theories may both limit and create possibilities for research and practice. Throughout the subject students will be encouraged to use critical social theory to not only expose and analyse social systems but also to engage in reflection about how theoretical perspectives can inform practices of change.

School Social Sciences

Discipline Studies In Human Society

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects HUMN 7043 - Theories for Critical Practice HUMN 7050 Theories of the Social

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Undergraduate degree in the Social Sciences or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically reflect the inter-relationships between theory, research and social practices in a discipline/field of practice
2. Appraise core assumptions operating within a discipline and/or field of practice
3. Demonstrate high level judgement in the deployment of key theoretical constructs within a discipline and/or field of practice
4. Contribute to contemporary theoretical debates within and across disciplines and fields of practice.
5. Develop an advanced critical understanding of how social theory can inform transformative practice on an individual and collective level.

Subject Content

Foundations of social theory
Modernity
Marx and Historical Materiality
Ideology, discourse and power
Critical Theory
Subjectivity, existentialism and phenomenology

Post-structuralism, post-modernity and feminism
Psychoanalysis as social theory
Post colonialism and southern theory
Structuration and multiple modernities

HUMN 7047 Transnational Crime

Credit Points 10

Legacy Code 102198

Coordinator Sharon Kwok (https://directory.westernsydney.edu.au/search/name/Sharon Kwok/)

Description In 2023 this subject is replaced by HUMN 6001 Transnational Crime and Human Security Threat. In traditional criminology crimes have been understood as acts that breach the criminal code of a given nation state. By contrast, transnational crimes are defined as violations of law that embrace more than one nation in their planning, operation or impact. These crimes often have a much broader (though often veiled) relation to serious individual and collective social harm and can be especially difficult to prevent or investigate and prosecute. Students will be expected to understand the global and regional developments that foster transnational crime, its range and security impacts, and international agreements and conventions as well the new forms of policing developed to counter it.

School Social Sciences

Discipline Criminology

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Undergraduate degree in criminology, criminal justice or a related social science area, or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe evidence about the full range of transnational forms of crime;
2. Critically describe, distinguish between and assess rival theoretical explanations of transnational crime;
3. Explain criminal justice policy and policing implications of these new forms of crime.

Subject Content

1. Introduction to organised crime and transnational crime
2. Economics of transnational crime
3. Borderless criminal organisation
4. Transnational Crime - Drug Trafficking
5. Transnational Crime - Human trafficking and smuggling
6. Cyber crime and virtual border
7. Wildlife trafficking
8. Policing the globe

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Report	2,500 Words	50	N	Individual

HUMN 7048 Understanding Race

Credit Points 10

Legacy Code 102601

Coordinator Alana Lentin (https://directory.westernsydney.edu.au/search/name/Alana Lentin/)

Description What is race? What is racism? How are they related? Why do they continue to shape social, political and economic relations well after the biological concept of race was disproven? What are the links between race and colonialism and in Australia particularly, the invasion and settlement of Aboriginal land? How is race related to property? How do ideas of race become embedded in state institutions and why do they continue to shape disadvantage and inequality? Though race develops differently in different contexts, it is best thought about through relational readings that draw out both the differences but also the similarities between places and times. This subject will draw on race critical and decolonial texts to focus on race as a modern idea that is shaped in the contexts of colonialism, slavery, and persists in post-immigration multicultural societies.

School Humanities & Comm Arts

Discipline Sociology

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify major sociological, literary and cultural approaches to race and racism
2. Analyse primary texts from the race critical literature
3. Apply race critical analyses to socio-political and historical events and issues

Subject Content

Unit content will draw on the following topics in race critical scholarship:
1. Defining the race concept
2. Race and state
3. Race as property
4. Race critical and decolonial epistemologies
5. Postracialism

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

HUMN 7049 Violence, Culture and Criminal Justice

Credit Points 10

Legacy Code 102199

Coordinator Stephen Tomsen (https://directory.westernsydney.edu.au/search/name/Stephen Tomsen/)

Description In recent decades, a new wave of racial, ethnic and religious violence and terrorism has been linked to rapid patterns of globalisation and tensions over group and national identities. Specific knowledge about violence and considerations about its real extent, causes and cultural meanings remain uncertain. Yet there is evidence of a recent general decline in violence with a significant role for legal and quasi-legal bodies for acknowledging injury, punishing previously 'deniable' violence and promoting reconciliation. Seminar topics in this course will include the global patterns and forms of violence; individual versus societal and historical explanations; biology, evolution and culture; gender, race and inequality; hatred, genocide, collective identity and psychoanalysis; the role of states and law in countering and condoning interpersonal and collective violence; debates about victimhood and the cultural symbols of violence and its memorialisation.

School Social Sciences

Discipline Criminology

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Undergraduate degree in criminology, criminal justice or a related social science area; or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe evidence of the global patterns, histories and forms of interpersonal violence and collective conflict;
2. Critically read, distinguish between, and write about rival theories of human violence;
3. Give examples of the role of international criminal law in countering violence

Subject Content

1. Defining violence
2. The global scope and forms of violence
3. Collective violence and warfare
4. Criminology, biology and evolutionary explanation
5. Society, culture and the civilising process
6. Violence, law and masculinities
7. State violence
8. Violence, race and genocide
9. The Holocaust
10. Industrial killing and distanced suffering
11. Violence, victimhood and memory
12. Memorialising violence, truth and international justice

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

HUMN 7051 How to Write History

Credit Points 10

Legacy Code 102661

Coordinator Alison M Downham Moore (https://directory.westernsydney.edu.au/search/name/Alison M Downham Moore/)

Description This subject introduces students to specific styles of historical methodology, considering how each of these styles alter the kinds of questions historians ask, how they select their sources, and how they account for the differences between past and present. Students undertake an independent, guided Applied Project on a historical methodology relevant to their intended thesis project.

School Humanities & Comm Arts

Discipline History

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Make an informed choice of methodological approach in your Masters thesis, having considered a range of possible options
2. Relate your eventual choice of Masters thesis methodology to existing scholarship of that style
3. Explain why your chosen Masters thesis methodology is the most appropriate approach for their chosen topic
4. Describe the range of methodological approaches that characterise much current historical research
5. Understand what is at stake in historians&#65533;f choices of particular methodologies
6. Detect and analyse the methodological approach of any piece of historical scholarship

Subject Content

Seminars in this subject will focus on the practical methods involved in different approaches to historical scholarship, considering how particular topics may be more suitable to one or another approach, and what changes in a historian?fs account of a topic depending upon the style of scholarship through which the past is approached.
- social and family history ? how can we locate sources that tell US about ordinary people?
- cultural history ? how can we judge The Importance of films, paintings, novels, plays, newspapers, propaganda pamphlets, posters and magazines of The past?
- conceptual history, Intellectual history and history of political thought ? how can we appreciate what mattered to Past minds when their concepts were different to ours?
- history of science, Technology and medicine ? how can we appreciate what Past scientific thinkers assumed about The world?
- gender history and history of sexuality ? how can we reconstruct The way Past people saw sexual desire and saw themselves as sexed beings?
- Big history and deep history ? what is The largest Possible temporal scale for historians to work with, and what are The advantages/ disadvantages of Big vs. small

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Log / Workbook	300 words each week	40	N	Individual

HUMN 7054 Social Science Research Project

Credit Points 40

Legacy Code 102817

Coordinator Nidhi Wali (https://directory.westernsydney.edu.au/search/name/Nidhi Wali/)

Description This subject requires students to design, plan and manage a research project using existing literature and/or data sets. Students will engage critically and analytically with the literature in the field, and undertake research to evaluate and report on research findings. Under the guidance of an academic supervisor students will develop a research question, conduct a systematic review of literature/write a case study/work on an existing dataset, and write a thesis on a topic related to the social sciences. Through this process, students will gain insight into the various components of the research process. Further, they will demonstrate an ability to identify issues, synthesise salient information, and articulate original ideas to make a practical contribution to the existing body of knowledge relevant to the social sciences.

School Social Sciences

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 40cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects HUMN 7052 - Humanitarian and Development Research Project

Restrictions

Students must have completed 80 credit points in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Argue for the significance of research and their impact on society
2. Systemically and critically analyse literature and information sources that are related to the identified research question / hypothesis

3. Justify a research proposal in relation to its significance in the literature, its anticipated impact and the ethical considerations involved
4. Apply appropriate research methods and evaluation processes to collate and critically analyse/interpret data
5. Compose a scientific research report that synthesises research findings.
6. Effectively communicate/disseminate findings of a research project to a variety of audiences

Subject Content

1. The scientific method: Origins and general philosophical approaches
2. Qualitative research methods (Philosophy of qualitative research, observation, good practices and criteria, qualitative interviewing, qualitative analysis, mixed methods)
3. Quantitative research methods (research design, measurement, sampling)
4. Practice, Ethics and Integrity
5. Research proposal development
6. Project Report
7. Presentation of research findings

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

HUMN 7055 Social Science Training Placement

Credit Points 40

Legacy Code 102818

Coordinator Thierno Diallo (https://directory.westernsydney.edu.au/search/name/Thierno Diallo/)

Description This subject encompasses a three-month training placement (approximately 420 hours) which is designed to consolidate knowledge and skills in the area of contemporary humanitarian and development aid or in the overlapping arenas of international criminological issues such as trafficking, criminalisation and victimisation or other fields in the social sciences. Students will design, plan, implement and report their findings on a project or projects, during a placement with a domestic or international organisation in the community, the not-for-profit, or government sectors. Students will be required to undertake a specific, focused project or projects relevant to the host organisation's needs, as an opportunity to apply the skills, training and knowledge acquired through coursework in the Master of Humanitarian and Development Studies or the Master of International Criminology programs or other master's programs in social science related disciplines.

School Social Sciences

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 40cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects HUMN 7053 - Humanitarian and Development Training Placement

Restrictions

Students must have completed 80 credit points in the Master of Humanitarian and Development Studies, Master of Sustainable Tourism and Heritage or Master of International Criminology programs.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse the relevant literature in a contemporary context in the social sciences.
2. Design a project proposal within an organisational environment.
3. Deploy management skills of planning and implementation for a project in a work setting.
4. Apply critical thinking skills in the production of a coherent and substantiated project report.
5. Communicate the outcomes of the project and placement experience at a professional standard to an academic audience

Subject Content

1. Professional experience in the workplace.
2. Introduction to qualitative research (ethnography, observation, field work, good practices and criteria for qualitative research).
3. Planning, designing and implementing applied projects in a work setting.
4. Project proposal.

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject students must have submitted a Working with Children Check Student Declaration (where relevant to the placement to be undertaken). Refer to the Special Requirements website for more information.
Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

HUMN 7056 Grant Proposals and Applications

Credit Points 10

Legacy Code 800226

Coordinator Michael O'Connor (https://directory.westernsydney.edu.au/search/name/Michael OConnor/)

Description Early career researchers engage in an exceedingly dynamic and competitive research and academic environment. They are expected to possess skills to successfully develop research projects, identify appropriate funding opportunities and communicate their knowledge by applying for research funding in line with their program of research. In this elective subject students will develop the knowledge and skills required to draft complex grant applications - using a framework that includes research design, hypotheses, research questions, and results - while communicating information in an accurate but accessible manner. Students will develop and refine their ideas for future research funding based on their knowledge gained across all the GCREDI subjects as well as their research studies. Students will communicate those ideas in practice through development of grant writing skills relevant to funding opportunities associated with their chosen career paths.

School Graduate Research School

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) HUMN 7038 AND
HUMN 7005 AND
HUMN 7026 AND
HUMN 7037

Restrictions

Students must be enrolled in a Doctoral (HDR) program. Students must be enrolled in program 8111 - Graduate Certificate in Researcher Engagement, Development and Impact.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Plan for research and development within their chosen field.
2. Understand how team member(s) skills/attributes are needed to create a compelling proposal.
3. Develop, articulate and communicate a program of research in an accessible manner.
4. Identify funding schemes and agencies appropriate for the candidate's program of research and career progression.
5. Write a well-articulated grant proposal that meets agency/funding scheme requirements.
6. Self-manage research projects as early career researchers.
7. Reflect on own performance and identify own development needs.
8. Interpret the relationship between discipline area and research and its contribution to broader societal transformations.

Subject Content

1. Articulate research needs/opportunities for a chosen field.
2. Outline a program of research to address the needs/opportunities in a field.
3. Developing an impactful but feasible research proposal with an understanding of how to build an effective and compelling application team.
4. Developing a relevant, comprehensive and realistic research budget.
5. Identifying prospective and suitable funding schemes and agencies for scholarships, fellowships, grants, etc.
6. Exploring key funding elements including assessment criteria, audience and style.
7. Organising a grant proposal in line with the requirements of the funder.
8. Project management for researchers.
9. Creating a compelling research proposal narrative by considering the strategic research initiatives of your institution and relevant stakeholders (e.g., community groups, government, industry, etc.)
10. Approaches for revising and refining grant proposals.
11. Reflecting on research impact and contribution to broader societal transformations.
12. Building and demonstrating resilience as early career researchers.
13. Reflecting on research impact and contribution to broader societal transformations.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

HUMN 7057 Thirty-Day Research Placement

Credit Points 10

Legacy Code 800227

Coordinator Anna Denejkina (https://directory.westernsydney.edu.au/search/name/Anna Denejkina/)

Description In this experiential learning subject, Graduate Certificate in Researcher Engagement, Development and Impact (GCREDI) students undertake a 30-day internship placement to experience current research practice, to develop professional networks, and to demonstrate and strengthen the transferable, professional and technical research skills they have developed through the GCREDI course and their HDR candidature. Completion of an internship gives research candidates the opportunity to strengthen their research career options and allows for further development of skills in research, planning, management, strategy, professional communication and leadership. The 30-day internship placement can be undertaken in an industry, government or non-government organisation, and is self-sourced by the student in consultation with the Subject Coordinator.

School Graduate Research School

Discipline Studies In Human Society

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) HUMN 7038 AND
HUMN 7005 AND
HUMN 7026 AND
HUMN 7037 AND
HUMN 7003 OR
HUMN 7035 OR
CEDS 7002

Restrictions

Internship placement must be agreed between placement site and student; and student and subject Coordinator prior to student enrolling in the subject and commencing the internship placement. Students must be enrolled in a Doctoral (HDR) program and also enrolled in program 8111 - Graduate Certificate in Researcher Engagement, Development and Impact.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate skills required to self-manage research projects as early career researchers.
2. Demonstrate planning and management of time and resources required for the internship.
3. Demonstrate an understanding of areas for improvement and development and recommend future development actions using the Extreme Ownership framework.
4. Reflect on own performance and identify own development needs.
5. Interpret the relationship between discipline area and research and its contribution to broader societal transformations.
6. Report on their research work in a professional environment in line with disciplinary standards.
7. Reflect on own perfomrance and identify own development needs.
8. Report on their research work in a professional envirnoment and in line with disciplinary standards.

Subject Content

All content development and delivery are based on the practical application of the following content to the internship placement:
Pre-internship:
1. Experiential learning theory;
2. Project management in research (Part 1): including completion of a pre-internship checklist;
3. Minimum requirements and expectations for a safe workplace and environment; and
4. Professional practices: Innovation, creativity, ethics and diversity in the workplace
5. UN Sustainable Development Goals
During-internship:
1. Developing professional researcher identity;
2. Reflecting on short and longer-term research career plans;
3. Building research and career networks;
4. Experiential learning in practice; and
5. Collaborative practice: collaboration and teamwork in a research environment using the Extreme Ownership framework
Post-internship:
1. Principles of research engagement and impact in industry, government or non-government sectors;
2. Reflecting on personal and professional development;
3. Reflecting on research impact and contribution to broader societal transformations; and
4. Project management in research (Part 2): including completion of a post-internship debrief

Special Requirements

Legislative pre-requisites

Any Internship placement site requirements must be met prior to commencement of the placement and must be valid for its duration. For example, students' projects may comprise working with vulnerable populations, and may require students to undertake Child Protection course; Police Check, First Aid, etc.

Assessment

INFO 0001 Academic Skills for Information Communications Technology (WSTC Prep)

Credit Points 10

Legacy Code 700205

Coordinator Frank Gutierrez (https://directory.westernsydney.edu.au/search/name/Frank Gutierrez/)

Description This subject is designed to assist students to become successful independent reflective learners. It introduces students to a range of theories and concepts to facilitate the development of practical skills and personal attitudes necessary for success in tertiary study. Emphasis is placed on developing the key competencies of scientific inquiry - collecting, analysing, organising and communicating information as well as solving problems, particularly when related to using mathematical ideas and techniques.

School Western Sydney The College

Discipline Information Technology, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 0 Preparatory subject

Restrictions

Students must be enrolled at Western Sydney University, The College.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify effective study skills and strategies to overcome major challenges of tertiary study.
2. Locate and use information technology systems and educational technologies to support learning and assessment.
3. Demonstrate competency in the use of the following Microsoft Applications & HTML: Word, Excel, PowerPoint, HTML
4. Identify and describe the basic components and concepts of Information Technology.
5. Demonstrate an understanding of essential skills and knowledge required for ICT such as research skills, problem solving skills, analysis skills, communication skills and working in a team.
6. Demonstrate understanding of different career paths in ICT.

Subject Content

Topic 1: Academic skills for success at tertiary level
Topic 2: Microsoft Applications - MS Word, MS Excel, MS Powerpoint
Topic 3: Introduction to HTML
Topic 4: What is ICT? Basic components & concepts of ICT such as main components of IT, computer Networking & internetworking, key security issues of IT , social, ethical and privacy issues relating to computing.
Topic 5: ICT Career paths
Topic 1: Academic skills for success at tertiary level
Topic 2: Microsoft Applications - MS Word, MS Excel, MS Powerpoint
Topic 3: Introduction to HTML
Topic 4: What is ICT? Basic components & concepts of ICT such as main components of IT, computer Networking & internetworking, key security issues of IT , social, ethical and privacy issues relating to computing.
Topic 5: ICT Career paths

Assessment

Level Undergraduate Level 0 Preparatory subject

Restrictions

Students must be enrolled at Western Sydney, The College.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and describe the basic components and concepts of Information Technology.
2. Identify the basic components and protocols of computer networking and internetworking.
3. Explain the key security issues of information technology.
4. Recognise and explain the social, ethical and privacy issues relating to computing.
5. Demonstrate competency in the use of the following Microsoft Applications: Word, Excel, PowerPoint.
6. Create a Basic Web site using HTML.

Subject Content

Theory topics
1. Introduction to underpinning concepts of Information Technology
2. Computer Hardware and Software
3. Data representation and converting number systems
4. Communication Networks
5. The Internet and the World Wide Web
a. Security, social, ethical and privacy issues.
Practical Topics
6. Introduction to the Windows Environment
7. Introduction to MS Word
8. Introduction to MS PowerPoint
9. Introduction to MS Excel
10. Introduction to HTML

Assessment

Level Undergraduate Level 0 Preparatory subject

Restrictions

Must be enrolled at The College in Foundation program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Start up, logon and shut down a computer successfully;
2. Save and store documents in appropriate formats;
3. Find relevant and useful information online;
4. Use Microsoft Word to create simple documents and reports;
5. Use Microsoft PowerPoint to create effective slide shows;
6. Print documents.

Subject Content

1. Introduction to Computers
o How computers work;
o Introduction to the operating system
2. Files and Folders
o Managing files and folders;
o Storing and retrieving files.
3. Introduction to the Internet
o Accessing the internet;
o Saving files from the internet;
o Search engines and guides/categories;
o Developing a search strategy, copyright and plagiarism;
o Following a WebQuest;
o Designing a WebQuest.
4. Introduction to Microsoft Word
o Features of a word processor;
o Microsoft Word window and menus;
o Writing and editing simple documents;
o Spell and grammar checkers;
o Inserting graphics from clip art, photos and the internet;
o Improving the appearance of documents.
5. Introduction to Presentation Software:
o Creating a simple slide presentation;
o Using PowerPoint templates;
o Simple animation effects

Assessment

Restrictions

Permission required for students enrolled in 3562 Bachelor of Science (Advanced Science).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. recognise and describe the function(s) of the fundamental components of any computer system
2. demonstrate an understanding of the principles of operation of computer hardware, software, peripheral devices and the integration of these components into computer systems
3. competently use a range of common applications software packages to complete tasks commonly encountered in educational, work and leisure environments
4. effectively utilise electronic networks to communicate
5. demonstrate the ability to successfully search and retrieve information from online sources
6. critically discuss issues raised by the use of computers in society

Subject Content

1. History, development, application of computers and information systems;
2. Hardware - CPU, input and output devices, storage and file organisation, networks, data communication;
3. Operating environments;
4. Disk and file management;
5. Wordprocessing - creating & formatting documents, document presentation;
6. Spreadsheets - creation, formatting, formulas, functions and charts;
7. Databases - concepts; accessing simple databases;
8. Graphics - drawing packages, graphics in documents;
9. Presentations software;
10. Exporting/importing data between applications;
11. Network applications- email, on-line databases, the Internet;
12. Computers in society - privacy and security issues, ethical computer use, ergonomics.

INFO 1002 PC Workshop

Credit Points 10

Legacy Code 300150

Coordinator Miroslav Filipovic (https://directory.westernsydney.edu.au/search/name/Miroslav Filipovic/)

Description This subject introduces students to the hardware and software components of a stand-alone personal computer (PC). Students become familiar with the CPU, memory, secondary storage, IO peripherals and communications devices commonly found in a PC. They learn to assemble and disassemble a PC and to install hardware and software components according to supplier specifications. Students also learn to use and customise the PC operating system to maintain and optimise PC performance.

School Computer, Data & Math Sciences

Discipline Information Technology, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Assumed Knowledge

Basic knowledge of personal computers.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify, locate, distinguish, and describe the individual hardware components of a PC and explain their purpose, functions and operations.
2. Explain and discuss the interaction between computer hardware components and devices and systems software.
3. List, explain and effectively use the major functions of a PC operating system to manage processes, programs, files, and devices.
4. Determine user requirements for new hardware components, devices and peripherals.
5. Explain technical specifications for PC hardware components, devices and peripherals and discuss these with suppliers and vendors.
6. Install PC components, devices and peripherals in accordance with installation procedures and operational standards with minimum disruption to clients.
7. Measure PC system performance and efficiency and tune and optimise components to meet operational requirements.

8. Use and extend the functionality of the PC operating system to monitor and manage the effective and secure operation of the PC and its devices.

Subject Content

PC architecture, CPU, Motherboard, bus, memory, disk systems, ports, monitor, video and sound cards, modems, pointers and joysticks.
Basics of Windows operating system, file management, process management, device management, utility software.
Technical specifications, manuals and standards, connectivity, portability, performance, capacity.
Hardware suppliers, vendors, ordering procedures.
Device installation: Interrupts, DMA channels, IRQs, procedures, settings, switches, customisation, device conflict resolution.
PC Performance measurement and optimisation.
System files, Windows registry, RegEdit.
System recovery, rescue disks, backup and recovery procedures.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Completion of laboratory tasks.	Eight labs (practicals), three hours each.	20	N	Individual
Two Progressive mid-semester tests	2 hours each	30	N	Individual
One home assignment – Report & Case Study	One week to investigate and complete	10	N	Individual
Final Practical Demonstratio	Two hours lab session	40	Y	Individual

INFO 1003 Professional Practice, Communication and Ethics

Credit Points 10

Coordinator Heidi Bjering (https://directory.westernsydney.edu.au/search/name/Heidi Bjering/)

Description Working in ICT business environments requires awareness of how individuals can collaborate to achieve project goals in an ethical and professional way. This subject introduces students to concepts of professional behaviour, including ethics and professional conduct and associated industry behavioural codes, as well as legal aspects related to ICT. Students learn about various types of written and oral communication, professional behaviour when working in teams, and personal project management. In addition, the subject also introduces students to academic integrity and how to practice this during their degree. Students with professional practice skills combined with technical abilities are in high demand.

Learning Outcomes

1. Describe ethics and professional code of conduct associated with the professions related to computing and Information & Communications Technologies (ICT)
2. Communicate in a professional manner among team members and with external stakeholders
3. Demonstrate good written communication skills, including academic and professional writing styles
4. Use project management skills to plan, schedule and manage ongoing activities as an individual and as a team
5. Manage team dynamics that involves working with people of varying skill levels, from different work/life experiences and diverse cultural backgrounds
6. Demonstrate knowledge and practice of academic integrity and how it links to professional integrity
7. Articulate the concepts related to legal aspects of IT, including intellectual property, security and privacy of information, and IT regulatory compliance

Subject Content

- What is a professional, and what are the various professional roles and relationships within IT.
- Ethics as a professional
- Professional Codes (Codes of ethics, professional conduct, and professional practice)
- Communication
  - Oral communication and presentation skills
  - Written communication (including professional and academic writing)
  - Professional communication in online communities
- Managing a team and project and the importance of communication
  - Teamwork, professional behaviour and team communication
  - Creating a work breakdown structure, estimating time, allocating tasks, and preparing schedules
  - Preparing agendas and minutes
  - Resolving conflict
- The importance of shared understanding within a team and within an organisation
- Personal project management
- Academic integrity, how to practice this and expectations at university
- Legal aspects of IT, including intellectual property, security and privacy of information and IT regulatory compliance
- Equity, access, and cultural awareness considerations in IT

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are

regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Portfolio	3 x submissions (6-8 pages each)	40	N	Individual
Report	Report (15-20 pages) Presentation (10 minutes)	30	N	Group
Final Exam	1 hour	30	Y	Individual

INFO 1004 Data Analysis and Storytelling

Credit Points 10

Coordinator Roger Dawkins (https://directory.westernsydney.edu.au/search/name/Roger Dawkins/)

Description This subject will introduce students to the fundamentals of data analysis and data storytelling skills for the communication industries. Students will gain practical experience finding data sets, cleaning and analysing data, developing insights and communicating findings in visual, oral and written formats for various audiences in contexts including advertising, journalism and public relations. Students will use industry standard analysis and visualisation tools to effectively answer research problems and communicate the impact of data, ethically and mindfully. Skills learned are transferable, for example, to audience analysis, market research, product development and other research contexts.This subject will introduce students to the fundamentals of data analysis and data storytelling skills for the communication industries. Students will gain practical experience finding data sets, cleaning and analysing data, developing insights and communicating findings in visual, oral and written formats for various audiences in contexts including advertising, journalism and public relations. Students will use industry standard analysis and visualisation tools to effectively answer research problems and communicate the impact of data, ethically and mindfully. School Humanities & Comm Arts

Discipline Information Technology, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Equivalent Subjects DESN 1018 - Visual Storytelling and DESN 1019 - Visual Storytelling (WSTC)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Gather and clean numerical data sets from online sources using industry standard software.
2. Effectively communicate insights about a data-driven research problem by choosing an appropriate visualisation format and making basic informed design decisions.
3. Create a data-driven story, demonstrating an awareness and understanding of insight and storytelling concepts, using industry standard tools for a defined audience.
4. Reflect on the social and ethical implications of data analysis and visualisation in the communication industries.

Subject Content

1. Data (numerical/statistical) collection and the importation of large data sets.
2. Manipulation of data in spreadsheets (formatting data, cleaning data, parsing data, sorting data and creating formulas).
3. Analysis of data to develop insights to address research problems (in the context of advertising, journalism and public relations).
4. Communication of insights in visual and written formats using industry standard tools (e.g., Tableau).
5. Reflections on the ethics of data analysis and storytelling.

Special Requirements

Essential equipment

Access to a computer and the internet.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Short Answer	30 minutes (practicals) or 250 words (written tasks)	20	N	Individual
Professional Task	1 x data set; 1 x data visualisation; 1 x presentation (5 minutes)	30	N	Group
Applied Project	1 x data set; 1 x data-driven story of images and words	40	N	Individual
Reflection	500 words	10	N	Individual

INFO 2002 Tangible Interaction Design

Credit Points 10

Legacy Code 301088

Coordinator Omar Mubin (https://directory.westernsydney.edu.au/search/name/Omar Mubin/)

Description This subject will provide students with the capacity to create interactive products that can sense environmental stimuli and exhibit an appropriate yet intelligent response. Students will be expected to write script based programs to control hardware circuits connecting various Input/Output peripherals (sensors, actuators). The range of interactive products studied and built by the students will be diverse; ranging from household everyday products to artifacts that can be used in public spaces.

School Eng, Design & Built Env

Discipline Information Technology, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) INFO 3003

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Create electronic hardware that recognises input from human and environmental stimuli.
2. Create software to define logic that operates an interactive physical artefact.
3. Create, test and improve a physical prototype that responds to human behaviour or other sensory input.
4. Demonstrate fluency in critical making; through use of literature in tangible interaction and observation of existing products.
5. Combine hardware, software and functional design to create an interactive product that meets a design brief (e.g. for home, office or public contexts).

Subject Content

1. Tangible and Embedded Interaction (TEI)
2. Actuators and Sensors
3. Environmental Awareness and Recognition
4. I/O Programming (using various platforms such as Arduino, Phidgets, etc)
5. Hardware and Software Integration
6. Wearable Technology
7. Contextualising TEI and application areas (music, entertainment, education, socialisation, persuasion, etc)
8. Research Topics in TEI
9. Internet of Things

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Assessment 1: Interactive Concept	Develop computer code (500 lines equivalent), technical drawings (2 x A3 pages), presentation of 5 minute duration	20	N	Individual
Assessment 2: Interactive Prototype	Develop circuit diagram, computer code (500 lines equivalent), technical drawings (2 x A3 pages), working scaled prototype	30	N	Individual
Weekly Tutorial Exercises/ Labs	2 hour session (3-5 questions)	30	N	Individual
In Class Quizzes x 2	1 hour each	20	N	Individual

INFO 2003 Technologies for Mobile Applications

Credit Points 10

Legacy Code 300976

Coordinator Evan Crawford (https://directory.westernsydney.edu.au/search/name/Evan Crawford/)

Description This subject introduces students to the technologies used to develop and deploy mobile applications. The subject covers evaluating organisational needs in the mobile space, responsive web design, web technologies, interface challenges, location awareness, cloud services and data storage.

Application Project	20 hours	20	N	Individual

INFO 2004 Cyber Crime and Social Engineering

Credit Points 10

Legacy Code 102700

Coordinator Farnaz Farid (https://directory.westernsydney.edu.au/search/name/Farnaz Farid/)

Description This subject focuses on both the theory and application of cyber crime and cybersecurity. More specifically, it focuses on the intersection between human behaviour, cyber crime, and cyber security with topics ranging from social engineering to organisational security

infrastructure. It asks - What outcomes do cyber criminals seek? How can you protect yourself and your business from cyber crime? What methods do cyber criminals typically use to gain their desired outcomes? In this subject, cyber crime and cyber security is covered from both a theory-based and applied understanding of how to reduce the likelihood of or harm caused by cyber crime.

School Social Sciences

Discipline Security Science

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) -

Assumed Knowledge

A basic understanding of computer systems and network structures. This knowledge is gained as the student progresses through their first semester in the program with a start-year intake; or from the completion of two semesters in the program in the case of a mid-year intake. A basic understanding of core theories related to social and cognitive psychology is desirable but not essential.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Define cyber crime and cyber safety by its related theories, terms and methods of investigation.
2. Compare and contrast cyber criminal practices with standard criminal practices.
3. Describe effective interventions to reduce susceptibility and risk from cyber attacks on an individual or organisation.
4. Evaluate the quality of organisational preparedness for cyber crime and susceptibility to different cyber criminal tools.
5. Develop an approach to identifying and assessing weak points in organisational defences.

Subject Content

Introduction and History of Cyber Crime
Online Safety ? applied and theoretical perspectives
Cyber criminals and cyber crime practices
Vulnerability to cyber crime and social engineering attacks
Protection from cyber crime and social engineering attacks on individuals and organisations

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	10 X 5 MCQ each	10	N	Individual
Applied Project	2,000 words	35	N	Group
Portfolio	1,000 words	15	N	Individual
Final Exam	2 hours	40	N	Individual

INFO 2005 Cyber Security and Behaviour Research Project

Credit Points 40

Legacy Code 102704

Coordinator Alana Maurushat (https://directory.westernsydney.edu.au/search/name/Alana Maurushat/)

Description This is a 40 credit point year-long subject taken over two terms (20 credit points in each term). This subject comprises the research pathway of the Bachelor of Cyber Security and Behaviour. Students will undertake a major research project in the field of behavioural cyber security. The specifics of the project will be coordinated between the student and the research supervisor at Western, which is undertaken over two semesters. Students should firstly discuss their proposed research project with the research supervisor, as it may require prior approval by the University's Ethics Committee depending on the research topic chosen. In the first semester, students plan their research, complete a literature review and propose the project plan to a panel of experts. By the end of the second semester students will have completed their thesis by research and will defend that thesis to a panel of experts. As such, students will have contributed to research in the field of cyber security and behaviour which prepares them for further studies towards a Masters or PhD qualification.

School Social Sciences

Discipline Security Science

Student Contribution Band HECS Band 2 20cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Restrictions Students must be enrolled in program 1837 - Bachelor of Cyber Security and Behaviour and have successfully completed 140 credit points

Assumed Knowledge

An understanding of experimental design and research.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Formulate a comprehensive proposal for a high level independent research project.
2. Demonstrate an understanding of research methodology through an analysis of empirical data.
3. Construct a reasoned academic argument to demonstrate critical thinking skills in the production of a coherent and substantiated thesis.
4. Defend the findings of the research at a professional standard to an academic audience.

Subject Content

Literature review
Development of a research proposal, including formulating the research question, methodology, research design, collection and analysis methods
Research and writing activities to complete the thesis
Seminar presentation of the proposal, the project, and defence of the thesis.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Literature Review	2,500 words	30	N	Individual
Presentation	30 minutes	15	N	Individual
Thesis	6,000 - 8,000 words	45	Y	Individual
Presentation	60 minutes	10	N	Individual

INFO 2006 Usable Security

Credit Points 10

Legacy Code 102757

Coordinator Farnaz Farid (https://directory.westernsydney.edu.au/search/name/Farnaz Farid/)

Description This subject will cover the human factors of security and privacy, as well as address emerging issues, challenges and regulations which underpin the need for usable security and privacy. After introducing the fundamental principles of security and privacy, these will be explored while considering how these principles shape the experience of users who are interacting with the designed product. Humans are an essential part of security and privacy, and they also inherently pose significant challenges. Students will be introduced to some of the fundamental security and privacy standards and regulations. They will learn about cognitive and perceptual approaches to usable security as well as how to create systems that are usable and trusted alongside fulfilling the requirements of remaining secure and private. Research topics such as how to design user studies to critically evaluate security, privacy, trust and usability interfaces will be addressed to provide students with an informed view on emerging best practices.

School Social Sciences

Discipline Security Science

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) BEHV 1025 AND
COMP 1005

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of the principles of security, privacy and trust as they relate to key policies, standards and regulations.
2. Evaluate key experimental techniques used in perceptual and cognitive science relevant to usable security and privacy.
3. Explain approaches to social engineering, trust and organisational shift to cyber resilience, and location data permissions.
4. Evaluate modern authentication methods in security.
5. Critically analyse contemporary issues related to security and privacy.
6. Create educational and/or training materials aimed to enhance security and privacy.

Subject Content

- Security, privacy and trust principles used in the design, development and assessment of a range of technologies.
- Security and privacy policies, standards, and regulations.
- Higher order cognitive principles which include aspects of learning, problem solving and decision making with a focus on trust, usability and user perception.
- Organisational shift towards a secure culture of cyber resilience through trust, usable security and behavioural economics.
- Warning and risk design; actions and consequences as both essential and inherently difficult while maintaining security and privacy.
- Humans as the weakest link in the cybersecurity, and educative/AI approaches and theories to counter this risk.
- Security authentication methods such as bio-informatics and password systems.
- Mobile security and privacy - locations and permissions in phone and communication apps.
- Learn people, process and systems for Smart Systems

Assessment

INFO 2008 Cyber Incident Response and Risk Management

Credit Points 10

Coordinator Farhad Ahamed (https://directory.westernsydney.edu.au/search/name/Farhad Ahamed/)

Description Cyber risk management is the process of identifying, analysing, and evaluating how to handle an organisations' cyber security threats. This subject will introduce the fundamental tenets of risk management, and explore cybersecurity risk management frameworks. Cyber incident response is an organised approach to addressing and managing a major security breach, threat or attack. The goal is to handle the incident in a way that limits damage, reduces recovery time and losses, and take pro-active measures in the follow up and recovery phase to prevent future attacks. Students will explore common cyber attacks requiring incident response such as payment diversion fraud (business email compromise), ransomware, data breach, and advanced persistent threats. They will learn about each of these threats and how to manage such threats through the development of incident response plans including people, process, technology and information. This subject is taught with industry partners through case studies and simulations. Due to the sensitive nature of the subject and the requirement of hands on training, it cannot be taught online and is not on offer to WSU Online students. Online students will take an additional elective.

School Social Sciences

Discipline Security Science

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Co-requisite(s) COMP 2027 - Cyber Security

Restrictions

Students must be enrolled in course 1837 Bachelor of Cyber Security and Behaviour, or seek authorisation from the unit coordinator if they are studying another cybersecurity related program at Western Sydney University.

Learning Outcomes

1. Examine key concepts of risk management, common cyber risks, and cyber risk management frameworks.
2. Discuss fundamentals of cyber incident response.
3. Write an appropriate cyber incident response plan relevant to the organisation's needs.
4. Prepare for a cyber security incident through appropriate mechanisms.
5. Respond to cyber incidents through appropriate mechanisms.
6. Follow up post-incident using appropriate mechanisms.

Subject Content

- Risk Management
- Cyber Risks
- Cyber Risk Management Frameworks
- Cyber Incident Response
- Compliance and legal obligations when dealing with cyber incident

INFO 2009 Multiliteracies

Credit Points 10

Coordinator Liam Magee (https://directory.westernsydney.edu.au/search/name/Liam Magee/)

Description This subject develops students' skills, knowledge and competencies to address a wide range of literacies across multiple technologies, platforms and contexts. In any society there are a range of literacies, and contexts in which those literacies might be deployed. These include the digital, written, visual, aural, spatial, gestural, and tactile dimensions of meaning production. Multiliteracies go beyond the traditional textual models of literacy to describe the rich variety of cognitive and cultural tools we use to make sense of the everyday. Multiliteracy is key to our professional and personal effectiveness, as well as to our functioning as individuals and citizens in a world characterised by increasing dependency on information technologies.

School Humanities & Comm Arts

Discipline Information Technology, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Equivalent Subjects COMM2050 Multiliteracies

Restrictions

Successful completion of 40 credit points in currently enrolled program.

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Students will learn to identify multiliterate practices and multimodal texts
2. Engage critically with, and reflect upon, a range of multimodal texts (considering contexts which may include multisensory media, scientific, technological and/or AI modes of communication)
3. Analyse the ways in which scientific disciplines and cultural diversity shape literate practices by the application of different knowledges, approaches, orientations, attitudes and values
4. Work collaboratively with peers to investigate a real-world problem using multiliteracies and propose solutions.

Subject Content

- What is multiliteracy and why is it important?
- "Reading" and "writing" in the 21st century.
- Digitally mediated multisensory communications.
- Theories and methods for interpreting and creating multimodal texts, including scientific and technological texts.
- Tools for analysis or interpretation of digital and social interactions (e.g. data visualisation).
- Emerging social, political and technological challenges (e.g. new applications for AI).

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Portfolio	1,250 words approx combined word length — or word equivalent where submission of findings are made in another format (viz. audio or visual or online artefact creation)	30	N	Individual
Portfolio	1,250 words approx combined word length — or word equivalent where submission of findings are made in another format (viz. audio or visual or online artefact creation)	30	N	Individual
Applied Project	Report (1,000 words or equivalent in audio/video duration, or online artefact creation) and Teamwork Skills self-evaluation (500 words)	30	N	Group
Peer Review	500 words	10	N	Individual

Prescribed Texts

A subject reader of short essential reading resources selected by the subject coordinator/s. May be provisioned online, or as hardcopy (printed).

INFO 3001 Computer Security

Credit Points 10

Legacy Code 300569

Coordinator Tomas Trescak (https://directory.westernsydney.edu.au/search/name/Tomas Trescak/)

Description This subject aims in particular at, but is not limited to, the implementation and management of security and privacy policies of organisations within the standards and legal framework that is also applicable to the Australian standards.

School Computer, Data & Math Sciences

Discipline Security Science

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Assumed Knowledge

Students are expected to have general understanding on computer systems; computer fundamentals, databases, and web technologies.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain fundamental theories related to computer security, and apply them to computer systems and organisations.
2. Describe the modern authentication, authorisation and access control mechanisms used in computer systems; and look at a few methods of access operations and ownership issues.
3. Explain basic concepts in encryption and cryptography and describe application of various cryptographic techniques and algorithms in accomplishing security.
4. Examine security issues within various hardware systems, operating systems and application software and present the general causes that lead to system security failures.
5. Analyse the security issues specific to databases, and understand how to protect sensitive information and statistical systems within an organisation.
6. Identify security threats and risks associated with web and related technologies; and the capacity to make corrective and preventative measures against these threats and risks in organisations.
7. Describe the relevant standards and the legal framework related to security and privacy; and implement security and privacy policies in organizations.

Subject Content

- Introduction to fundamentals of computer security;
- Identification and authentication: System Security, Managing passwords, Online Verification Requirements, PKI, Key establishment, authentication and protocols;
- Access Control: Access operations, Ownership, Access control structure;
- Security in hardware and software: Data and Code, Memory management, Race conditions, Java Security, .NET security framework;
- Operating system security: Windows/Unix security,
- Cryptography: Symmetric/Asymmetric key Encryption, Digital signature, Hashing, Algorithms;
- Web security: IP security, SSL/TLS, DNS, Firewalls, cookies, Intrusion, Digital identification techniques, Client-side Digital Certificates, Certification Authorities, Sever side security, privacy;
- database security: SQL security model, statistical database security, integrated security, data privacy.
- Security policies and legal framework: Organizational policies, standards and legal framework for security and privacy;

1. Describe the complexities of working in the Cyber Security Industry
2. Identify legal and ethical issues of working in cyber environment
3. Differentiate between threats, vulnerabilities, and exploits
4. Identify network architectures and recognise their potential vulnerabilities
5. Apply reconnaissance methodologies to discover weaknesses in computing environment
6. Explain the differences between vulnerability management policies and vulnerability management maturity models
7. Apply concepts of exploiting vulnerabilities to hack into a system using common penetration testing tools and frameworks
8. Explain the principles of symmetric and asymmetric cryptography, and public key infrastructure
9. Identify data classification levels and email marking standards associated with the dissemination of sensitive and classified information
10. Identify data classification levels and email marking standards associated with the dissemination of sensitive and classified information
11. Identify threats in social networks via Open Source Intelligence (OSINT) Methodologies and demonstrate the capturing of Personally Identifiable Information (PII) using OSINT
12. Demonstrate usage of website security assessment tools to identify weaknesses and potential web attack vectors
13. Identify the types of forensic investigations from a cybersecurity perspective, differentiating between software and hardware digital forensic tools
14. Identify the resources required to navigate the cybersecurity landscape as a potential cybersecurity professional

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are

regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	30 minutes (Weekly from Week 2)	40	N	Individual
Quiz	60 minutes	20	N	Individual
Final Exam	2 hours	40	N	Individual

INFO 3002 Ethical Hacking Principles and Practice

Credit Points 10

Legacy Code 301124

Coordinator Weisheng Si (https://directory.westernsydney.edu.au/search/name/Weisheng Si/)

Description This subject teaches students ethical hacking principles and skills with the ultimate goal of defence. It covers practical skills in different stages of ethical hacking, including reconnaissance on public information, port and vulnerability scanning, exploitation of vulnerabilities, post exploitation, and writing a comprehensive report to document detected vulnerabilities and proposed solutions. Students will not only practise with major tools in ethical hacking, but also learn the principles of how these tools work and hence how to defend against them. Students completing this subject can pursue careers such as ethical hackers, security architects or security analysts.

School Computer, Data & Math Sciences

Discipline Security Science

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) COMP 2004 OR
COMP 2005 AND
COMP 2020 OR
COMP 2021

Assumed Knowledge

Students should have a solid understanding of computer networking (especially with the TCP/IP protocol suite), possess basic programming skills in developing computer applications and web applications, and command basic knowledge and skills in databases and operating systems.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the differences between lawful and unlawful behaviour in conducting ethical hacking
2. Apply reconnaissance knowledge and tools to gather public information about systems and networks
3. Apply port scanning knowledge and tools to detect port status in target computers
4. Apply vulnerability scanning knowledge and tools to detect vulnerabilities in target computers
5. Apply exploitation knowledge and tools to verify and exploit the detected vulnerabilities
6. Apply post exploitation knowledge and tools to evaluate the severity of vulnerabilities
7. Detect and defend against social engineering techniques
8. Apply web penetration testing knowledge and tools to detect vulnerabilities in web applications
9. Compile a comprehensive ethical hacking report.

Subject Content

1. Introduction to ethical hacking: concepts, legal requirements, stages, and lab environment
2. Reconnaissance based on public information, and its major tools.
3. Port scanning, and its major tools.
4. Vulnerability scanning, and its major tools
5. Exploitation of vulnerabilities, and its major tools
6. Post exploitation, and its major tools
7. Social Engineering, and its major tools.
8. Web penetration testing, and its major tools.

INFO 3003 Human-Computer Interaction

Credit Points 10

Legacy Code 300570

Coordinator Omar Mubin (https://directory.westernsydney.edu.au/search/name/Omar Mubin/)

Description A key component to the discipline of Information Systems is the understanding and the advocacy of the user in the development of IT applications and systems. IT graduates must develop a mind-set that recognizes the importance of users and organisational contexts. They must employ user centered methodologies in the development, evaluation, and deployment of IT applications and systems. This subject examines human-computer interaction in order to develop and evaluate software, websites and information systems that not only look professional but are usable, functional and accessible.

School Computer, Data & Math Sciences

Discipline Information Technology, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Equivalent Subjects INFS 3015 - Software Interface Design

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply cognitive models to the design of application user interfaces.
2. Indicate ways in which users' characteristics (i.e., age, education, cultural differences, disability etc.) require adaptation of a user interface to increase effectiveness.
3. Integrate appropriate user-centred design methodologies into the development of an application or website and recognise advantages and disadvantages of doing so.e.
4. Describe major usability guidelines and standards, for e.g. ISO or Nielsen
5. Develop both low-fidelity and high-fidelity prototypes and produce user interfaces for domain specific applications.
6. Create an appropriate user evaluation plan with carefully chosen subjective and objective measures.
7. Discuss state of the art research issues and novel interaction technologies under the umbrella of HCI.

Subject Content

- Understanding The user and The user experience

- interaction styles
- Usability Standards
- user-centred design methods
- development tools and prototyping
- Usability testing: tools and methodologies
- Accessibility and assistive technologies
- Personalisation and trust
- Developing for multiple devices (Computer, PDAs, 3G phones etc)
- human computer interface in industry
- research Initiatives in HCI
- emerging technologies

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Log/ Workbook	In-class basic tutorial questions to be completed in a log book during the tutorial session. Number of questions will usually range from 3 - 5	10	Y	Individual
Log/ Workbook	In extension to class work, students will be given weekly exercises that they must be complete at home and submit at two points in the semester	15	Y	Individual
Applied Project	A: 1200 words B: 1200 words in addition to a set of diagrams as part of an appendix C: 10 minutes	75	Y	Individual

INFO 3004 Human-Computer Interaction (Advanced)

Credit Points 10

Legacy Code 300901

Coordinator Omar Mubin (https://directory.westernsydney.edu.au/search/name/Omar Mubin/)

Description IT graduates must be able to develop and evaluate software, websites and mobile apps that not only look professional but are usable, functional and accessible. However, the study of HCI is often restricted to its use as a tool in the software development process. This advanced subject also examines HCI as a field of research and how to conduct research into human user factors. Students in this advanced subject will be required to complete a research project and produce a final research report, which is of a standard capable of being considered for publication in a HCI conference or journal.

School Computer, Data & Math Sciences

Discipline Information Technology, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Incompatible Subjects INFO 3003 - Human-Computer Interaction INFS 3015 - Software Interface Design

Restrictions

Students must be enrolled in program 2801 Bachelor of Information Systems Advanced/Bachelor of Laws, 3684 Bachelor of Information and Communications Technology (Advanced), 3688 Bachelor of Information Systems Advanced or 3745 Bachelor of Information Systems Advanced/Bachelor of Business.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply cognitive models to the design of application user interfaces.
2. Describe ways in which users' characteristics (i.e., age, education, cultural differences, disability etc.) require adaptation of a user interface to increase effectiveness.
3. Integrate appropriate user-centred design methodologies into the development of an application, website or emerging technology (such as mobile and wearable devices)
4. Discuss the advantages and disadvantages for using a human-centred software development approach.
5. Describe and use the major usability guidelines and standards.
6. Develop low-fidelity prototypes, and high-fidelity prototypes.
7. Develop user interfaces for domain specific applications.
8. Create an appropriate user evaluation plan with carefully chosen subjective and objective measures.
9. Discuss state of the art research issues and novel interaction technologies under the umbrella of HCI.
10. Conduct a research based project in HCI and write a research report, which could be considered for publication in a HCI conference or journal.

Subject Content

Understanding the user and the user experience
Interaction styles
Usability standards
User-centred design methods
Development tools and prototyping
Matching interface elements to user requirements
Usability testing: tools and methodologies
Accessibility and assistive technologies
Rich media
Localisation, globalisation
Personalisation and trust
Developing for multiple devices (Computer, PDAs, 3G phones etc)
Human Computer Interface In Industry
HCI and virtual worlds
Emerging technologies
Current technological and theoretical advances in HCI
Research initiatives in HCI

Level Undergraduate Level 3 subject

Pre-requisite(s) INFO 1002 AND
COMP 2013 OR
LGYA 6157

Restrictions

Students must be in their final session of study and enrolled in the Bachelor of Information and Communications Technology or Bachelor of Information and Communications Technology (Advanced).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply the knowledge and skills learned throughout the course in an effective, efficient, and appropriate manner.
2. Elicit, analyse, and interpret client requirements for general and specific appropriate information technology solutions; design (or assist in the design), implement, test, maintain, and document those solutions.
3. Use and apply team work, empowerment methods, meeting concepts, group techniques, and listening skills to address and resolve problems.
4. Communicate effectively, both in writing and orally, with clients, vendors, colleagues, employees, employers, and other people at all levels of the community and organisations within the community.
5. Explain the technical, economic, legal, ethical, moral, and social implications, constraints, costs and benefits of adopting and applying particular technological solutions to address personal and corporate objectives.
6. Participate in, and direct if necessary, a project to investigate, identify, specify, implement, test, install, and maintain an information system involving the identification and control of a set of project activities

Subject Content

Twelve weeks work experience (10 hours per week) practicum with a client organisation, providing support in the area of IT support, user support, user training, sales, servicing, documentation support, internet support, etc.
Fortnightly meeting with Western Sydney University supervisor.
Practicum administration and assessment procedures.
Review of concepts of team work and group dynamics.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Professional Placement Performance	not specified	100	N	Individual

INFO 3006 Information Security

Credit Points 10

Legacy Code 300128

Coordinator Yun Bai (https://directory.westernsydney.edu.au/search/name/Yun Bai/)

Description Information Security is concerned with the protection and privacy of information in computer systems. The focus is primarily on introducing cryptography concepts, algorithms and protocols in information security and applying such knowledge in the design and implementation of secure computer and network systems. The subject also addresses conventional and public key encryption, number theory and algebra and their application in public key encryption and signatures. Students will learn the application of cryptography algorithms in current computer systems and information security management. This subject also provides students with the practical experience around security programming.

School Computer, Data & Math Sciences

Discipline Security Science

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) MATH 1006 AND
COMP 2009 OR
COMP 2015 OR
COMP 2016

Assumed Knowledge

Basic understanding of data structures and discrete mathematics
Basic programming skills in C, C++, java, etc.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe fundamentals in computer security and basic knowledge in cryptography
2. Analyse conventional encryption/decryption methods and the concepts of symmetric keys
3. Design and implement block ciphers and stream ciphers
4. Evaluate principles of public key cryptosystems and public key algorithms
5. Master the number theory used in the RSA algorithm, Diffie-Hellman key exchange and digital signatures
6. Develop authentication functions and hash functions in message authentication
7. Construct security protocols for complex scenarios, based on theories and principles of information security.

Subject Content

Security, cyberattack and countermeasure, cryptography and steganography
Conventional encryption and DES system
Number Theory and algebra, Modular arithmetic and Euclid's algorithm
Public key encryption and RSA algorithm
Digital signature and authentication protocols
Key distribution and management
Security protocols and various applications in current computer systems
Information Security management

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

Level Undergraduate Level 3 subject

Pre-requisite(s) COMP 2007 OR
COMP 2004 OR
COMP 2005

Assumed Knowledge

Good understanding of the principles of information security, and computer networks and internets.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify security threats in LAN and WAN environments;
2. Identify current network security protocols and where they should be implemented;
3. Explain how popular operating systems handle secure communications;
4. Analyse and describe the security services provided by internetworking protocols;
5. Explain the purpose and basic configuration requirements of an internet firewall;
6. Describe the major components needed for secure electronic commerce;
7. Describe techniques for detecting and mitigating security threats to a networked system.

Subject Content

Network Security concepts
Network Security Protocols
Operating System Security
LAN Security
Internet Security
Firewalls

Secure Electronic Commerce
Mobile Security
Secure Network Management

Credit Points 10

Legacy Code 300578

Coordinator Heidi Bjering (https://directory.westernsydney.edu.au/search/name/Heidi Bjering/)

Description This is a final year subject that builds on foundation and intermediate computing subjects to prepare students for professional experience. The subject covers the content in three modules as 1) Ethics and Professional Code of Conduct, 2) Project Management, and 3) Legal, Social, Environmental issues, Quality Assurance and IT Compliance. The content covered in these three modules are carefully designed to fill in the gaps in knowledge that is not so far covered in previous subjects in preparing students for the challenging projects subjects and professional working life ahead. This subject is a pre-requisite to the capstone project, covered in Professional Experience Project subject.

Understanding of systems analysis and design.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe ethics and professional code of conduct associated with the professions related to computing and Information & communications technologies (ICT)
2. Communicate in a professional manner for IT projects among team members and with outside parties.
3. Plan, schedule and manage ongoing project activities as a group and an individual.
4. Carry out cost benefit analysis of software related projects
5. Manage team dynamics that involves working with people of varying skill levels, from different work/life experiences and diverse cultural backgrounds
6. Articulate the concepts related to security, privacy and freedom of information as it relates to electronic data
7. Explain legal, social and environmental issues in relation to computing and ICT
8. Describe the importance of quality assurance and techniques used in verifying quality of software development projects
9. Articulate the core concepts of IT compliance in order to develop a plan that addresses IT control elements.
10. Recognise indigenous culture and safety issues in proposed system designs

Subject Content

- Module 1 ICT Professional Code of Ethics and Code of Practice with special reference to the Australian Computer Society's professional code.
- professional communication and writing and Presenting reports
- types of ICT applications, their impact on society and indigenous cultures and The relevance of ethics in ICT.
- Module 2 Role of a project manager, skills required to manage a project and the importance of communications in all its forms
- Preparing A Project proposal, making A business case and managing stakeholders
- creating A work breakdown structure, Estimating time and costs, Preparing schedules using Standard tools and techniques used in The industry
- Monitoring and managing quality, risks and Continuous process improvement
- teamwork and leadership
- personal Project management
- Module 3 Legal aspects of ICT copyright, privacy, freedom of information, intellectual property, 'white collar' crime, property damage, fraud, theft, bad advice, incompetence, law of contract, trade practices.
- legal Issues and It Regulatory compliance

- Usability and quality assurance of It applications
- social and indigenous Issues and considerations in ICT

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Short Answer	8-10 pages each module	30	N	Individual
Proposal	Report 25-30 pages	30	N	Group
Final Exam	60 minutes	40	Y	Individual

INFO 3011 Social Computing

Credit Points 10

Legacy Code 300961

Coordinator Athula Ginige (https://directory.westernsydney.edu.au/search/name/Athula Ginige/)

Description Rapid growth of computational devices connected to the internet such as mobile phones, tablets, personal computers have made us into a digitally connected society. This has enabled us to develop a new computing paradigm: Social Computing to enhance ways we can fulfil a range of primary and secondary human needs. Already many new businesses have evolved making use of these possibilities surpassing the number of users in corresponding conventional businesses such as retail, transportation and hotel chains. In this subject students will learn the fundamental concepts of Social Computing, how Social Computing is evolving, explore interaction models of social networks, analyse a few reported cases that relate to social computing in detail to understand the impact on society and businesses and explore ways to enhance a range of livelihood activities and future possibilities. This subject will also cover underpinning technologies related to social computing such as Web 2.0, knowledge management and related ethical, security and privacy issues.

School Computer, Data & Math Sciences

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 160 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the characteristics and impact of Social Computing taking examples from our daily life.

2. Describe the factors and technologies that enabled wide spread use of social computing.
3. Analyse a specific scenario related to lack of timely information leading to unsatisfactory outcomes and develop a solution based on a Social Computing paradigm to transform these scenarios.
4. Explain the rapid evolution of Social Computing using theories relevant to technology diffusion.
5. Synthesise the future impact on Social Computing on individuals, organisations and the society as a whole.
6. Identify ethical issues, assess the impact and apply ethical decision-making frameworks to social computing scenarios.

Subject Content

1. Social Computing, its evolution and broader impact
2. The essential characteristics of Social Computing and how these relate to human needs
3. Review of technologies that enabled the Social Computing paradigm

4. Broader review of how Social Computing is impacting our daily activities
5. Explore ways to enhance livelihood activities using social computing

6. Review of technology diffusion patterns that are applicable to Social Computing
7. Security, ethical and privacy issues in Social Computing
8. Future of Social Computing

Assessment

INFO 3012 Cyber Security and Behaviour Placement 1

Credit Points 20

Legacy Code 102702

Coordinator Toby Miles-Johnson (https://directory.westernsydney.edu.au/search/name/Toby Miles-Johnson/)

Description In 2022, this subject replaced by subject INFO3016 - Cyber Security and Behaviour Community Placement. This subject is the initial placement for the work integrated learning embedded in the Bachelor of Cyber Security and Behaviour degree. There are three options: 1. WSU-brokered industry placement on a competitive basis; 2. an approved placement at the student's place of work, or via the student's networks and contacts; 3. an industry project report based on industry-generated case studies and problems. In addition, workshops will be conducted throughout the semester to aid in your learning and to support your professional development during this placement or project. Contact the subject coordinator well in advance to elect your own industry placement (such as your current employer). Only options 2 and 3 are available to WSU Online students.

School Social Sciences

Discipline Security Science

Student Contribution Band HECS Band 2 20cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions Students must be enrolled in program 1837 - Bachelor of Cyber Security and Behaviour and have successfully completed 140 credit points.

Assumed Knowledge

A basic understanding of computer systems, architecture, infrastructure, internet protocols and networking protocols.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate employment skills for a professional career development.
2. Apply problem solving skills, developed through ethical behaviour to identify potential areas for improvement in the workplace.
3. Evaluate and report on professional development.
4. Identify methods for improving organization wide problems and propose solutions.

Subject Content

Industry placement or industry project for the development of employment skills towards a professional career in cyber security.
The application of problem solving skills in a real-world environment or real-world problems, through the identification of the potential for improvement and the implementation of solutions.
Opportunity for professional development in the workplace or related industry project.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Reflection	2 x 750 words each	S/US	Y	Individual
Presentation	15 minutes	S/US	Y	Group
Professional Placement Performance		S/US	Y	Individual

WSU Online Trimesters

INFO 3014 Digital Investigations and Forensics

Credit Points 10

Legacy Code 102701

Coordinator Farhad Ahamed (https://directory.westernsydney.edu.au/search/name/Farhad Ahamed/)

Description This subject focuses on the concepts, theories, and practice of digital investigations and forensics. More specifically, it focuses on using a detailed hands-on approach to the use of computer technology in investigating and demonstrating that particular digital media contains incriminating evidence. With topics ranging from data acquisition, file systems examination, social media, email and network investigations, mobile and cloud forensics, a working knowledge of how to approach digital investigations and utilise various forensic tools to collect, analyse and present digital evidence will be gained. In this subject, digital investigations and forensics is covered from both a theory-based and applied understanding of how to recover admissible legal evidence after an incident, or proactively as a key defence to reduce the likelihood of cyber attacks.

School Social Sciences

Discipline Security Science

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) INFS 1002 AND
INFO 2001 OR
INFO 2004

Assumed Knowledge

A basic understanding of computer systems, architecture, infrastructure, internet protocols and networking protocols. A basic understanding of core theories related to social and cognitive psychology is desirable.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the process of digital investigations and forensics on digital media.
2. Design a proactive digital investigation process to detect and prevent exposure to cyber attacks in organisations.
3. Identify and recover key evidence from digital media using a variety of forensic tools.
4. Conduct and manage digital investigations and forensics involving digital media
5. Demonstrate an understanding of the ethical principles and practice for digital forensic investigators.
6. Present clear evidence and conclusions of a digital investigation in report form.
7. Define the methods, theories, and terms related to digital investigations and forensics.

Subject Content

Fundamentals of digital investigations and forensics
Processing attack and incident scenes
Data acquisition, analysis, and validation
Network, mobile and cloud forensics
Email and social media forensic investigations
Current digital forensics tools
Digital evidence and report writing for high-tech investigations
Ethical issues for digital investigations and forensics

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	10 x 10 MCQ ea	10	N	Individual
Report	2,000 words	30	N	Group
Practical	10 lab projects	20	N	Individual
Final Exam	2 hours	40	N	Individual

INFO 3015 Internet of Things and Smart Environments

Credit Points 10

Legacy Code 301436

Coordinator Aruna Jamdagni (https://directory.westernsydney.edu.au/search/name/Aruna Jamdagni/)

Description This subject covers the essential components and the dominant and emerging applications of the Internet of Things (IoT) and smart environments. These include the functions of sensors, actuators, and relevant communication networks in collecting, analysing, and acting on smart environment data. The role of machine learning in developing smart environment solutions, such as smart cities, smart transportation, smart healthcare, and other leading applications, are also discussed. The subject additionally covers critical IoT cybersecurity and privacy issues and examines approaches for addressing them. It presents the relevant principles and current practices and explores the trends in IoT and smart environments.

School Computer, Data & Math Sciences

Discipline Networks and Communications

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) COMP 2004

Assumed Knowledge

The students should be familiar with the fundamentals of communication networks.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain IoT technologies and its major applications
2. Break down the main components of the IoT, including sensors, actuators, and communication networks
3. Critique the utilisation of the IoT for developing smart cities, smart transportation, self-driving cars, smart aged care and healthcare, and other major smart solutions
4. Analyse the significant IoT cybersecurity threats and privacy concerns and propose solutions to address them
5. Apply creative skills to plan institution or expansion of the IoT and its smart applications
6. Demonstrate capabilities for independent learning of evolving concepts in IoT and smart environments and for clearly communicating those concepts

Subject Content

1.Overview of the Internet of Things and smart applications
2.IoT enabling technologies
3.IoT key components: sensors, actuators, and communication networks
4.Smart environments
5.IoT-related protocols and standards
6.IoT cybersecurity and privacy
7.Dominant and emerging smart applications
8.Machine learning for IoT data analysis and security
9.Trends in IoT and smart environments

Assessment

INFO 3016 Cyber Security and Behaviour Community Placement

Credit Points 20

Legacy Code 102905

Coordinator Joe Chaoul (https://directory.westernsydney.edu.au/search/name/Joe Chaoul/)

Description This subject is the first placement for the work integrated learning embedded in the Bachelor of Cyber Security and Behaviour degree. Students will do an internal cyber security placement with the new live security operations centre known as the Western centre for Cybersecurity Aid and Community Engagement (Western CACE). Western CACE will provide training for students as well as members of the small business communities with cyber preparedness training. Students will be guided through handling real cyber attacks and assisting small business respond to these attacks. There are a paucity of government services that address and aid small business with live cyber attacks. Western CACE fills this necessary gap where students will exit knowing how to deal with ransomware, payment diversion fraud, data breach, emerging threats, and the security control implementations post-incident. The placement with Western CACE acts as a stepping stone to their next placement which is their external industry placement (INFO 3017 Cyber Security and Behaviour Industry Placement). A two day induction/workshops will be conducted in the week prior to commencing with Western CACE with ongoing professional development onsite within the Centre as directed by the Centre Manager, Director and industry leaders. WSU Online students will not do a face to face placement at Western CACE unless they are able to attend face to face sessions in Sydney for both INFO 2008 Cyber Incident Response and Risk Management and this unit. WSU Online students will have the following options: an approved placement at the student's place of work, or via the student's networks and contacts OR an industry project report based on industry-generated case studies and problems.

Level Undergraduate Level 3 subject

Equivalent Subjects INFO 3012 - Cyber Security and Behaviour Placement 1

Restrictions

Students must be enrolled in Program 1837 - Bachelor of Cyber Security and Behaviour and successful completion of 140 credit points.

Assumed Knowledge

A basic understanding of computer systems, architecture, infrastructure, internet protocols, types of cyber threats, best practice for cyber incident response, and networking protocols.

Learning Outcomes

1. Explore contemporary real-world cyber security issues in community service.
2. Propose solutions or methods to aid organisations with risk management, and cyber incident response.
3. Apply tools, techniques and software utilized in computer security responding cyber security issues/incidents emerging in community services.
4. Construct reports and presentations that can effectively communicate complex information related to cyber security and behaviour in community service.
5. Reflect on professional development needs to enhance evidence-based practice in cyber security in community service.

Subject Content

1. Industry placement or industry project for the development of cyber incident response skills towards a professional career in cyber security.
2. Customer and client care in dealing with cyber incidences.
3. Technical and process knowledge for the essential security controls through national and international standards.
4. Learn, train and guide small businesses through data breaches, ransomware, payment diversion fraud and emerging threats.
5. Reflect on emerging threats, and how to modify approaches to improve cyber incident response.

Assessment

INFO 3018 Computing Practicum

Credit Points 10

Coordinator Simi Kamini Bajaj (https://directory.westernsydney.edu.au/search/name/Simi Kamini Bajaj/)

Description This subject provides students with real-world experience in the Computing industry in Australia and other locations around the world. Students undertake 120 hours of full-time or part-time equivalent industry placement as a Work Integrated Learning (WIL) component, carrying out computing related tasks and receive instructions and tuition in aspects of professional practice. Students may nominate an organisation of their choice, in Australia, or within a department/division of Western Sydney University carrying out computing related tasks locally or globally, with the exception of their home country for non-Australian resident students. However, for all cases, students must seek the approval of the Subject Coordinator before the commencement of their industry placement.

School Computer, Data & Math Sciences

Discipline Information Technology, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Pre-requisite(s) Students in 3687 Bachelor of Information Systems and 3639 Bachelor of Information and Communications Technology - COMM 1026 INFS 1006
Students in 3688 Bachelor of Information Systems (Advanced) - COMM 1026 INFS 1015
Students in 3506 Bachelor of Computer Science - COMM 1026

Learning Outcomes

1. Analyse knowledge and skills requirements for workplace practice as part of performance planning and goal setting
2. Communicate effectively in a variety of forms to diverse audiences
3. Conduct professional presentations appropriate to context
4. Work in a team environment demonstrating professional practice attributes and workplace culture awareness
5. Report and reflect workplace experience, relevance of academic material to workplace activities, response to performance feedback, and skills development.

Subject Content

A 120 hrs full time or part-time equivalent of industrial training in the ICT industry performing following tasks:

- Find details of assigned workplace including relevant work practices and procedures
- Follow relevant work practices and procedures
- Learn verbal and written professional communication practices and methods
- Professional presentation
- Perform appropriate workplace tasks as directed
- Seek feedback on assigned tasks from appropriate person
- Document evidence of activities carried as required

Work integrated learning

Students will be working in an external organisation within Australia or department/division within the University carrying out tasks related to ICT in the day-to-day business activities. Students are free to nominate an organisation of their choice within Australia. For those students who are not able to find their own placements, SCDMS and/or the University's Careers Division could support student in finding one. These positions may/may not involve payments.

This engagement allows the University to expose computing students to the industry prior to completion of courses. This essentially helps to bridge the gap in academia and ICT industry.

The engaging organisations have the opportunity to access future workforce. This may assist them in finding possible future employees.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Log/ Workbook	A daily kept diary with the employer's evaluation at the end of each week	S/U	Y	Individual
Report	A 2-3 pages report detailing the tasks, responsibilitie undertaken and skills gained by the student	S/U	Y	Individual
Professional Placement Performance	A standard form (approx. 1 page) is provided for Employer to fill in and submit to the unit coordinator as a confidential report.	S/U	Y	Individual
Presentation	15 minutes video presentation	S/U	N	Individual

INFO 3019 Project Management

Credit Points 10

Coordinator Bassam Khoreich (https://directory.westernsydney.edu.au/search/name/Bassam Khoreich/)

Description This subject is designed to provide students with the fundamental project management skills, theories and methods required in today's complex business environment with a focus on project conception, initiation, planning, monitoring and control in ICT. Students explore developing project solutions in various ICT areas, project management methodologies, time management, team management, and different knowledge areas contributing to the successful delivery of a project life cycle. Students work in teams under the supervision of a staff member, to plan and investigate their projects using a range of project management tools and techniques and integrate ethical principles into project planning, execution, and stakeholder interactions. Skills in project management and working with others on projects in the ICT context are in demand by employers.

School Computer, Data & Math Sciences

Discipline Other Information Technology

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) Students who are NOT in 3769 Bachelor of Data Science must complete
INFO 1003 - Professional Practice Communication and Ethics -OR- COMM 1044 Professional Communication -OR- COMM 1026 Principles of Professional Communication 1

Restrictions

Students enrolled in **3769 Bachelor of Data Science** only must have completed 140 credit points before enrolling in this subject.

Assumed Knowledge

Understanding of systems analysis and software design principles.

Learning Outcomes

After successful completion of this Subject, students will be able to:

1. Identify the role and responsibilities of the project manager
2. Analyse the requirements and attributes of ICT projects within business environments
3. Examine the measurement values for project success and the need for assuring quality outcomes
4. Apply project management tools and techniques, and ethical decision-making frameworks in planning, conducting and evaluating ICT projects
5. Demonstrate communication and collaboration skills in managing and leading project management tasks in a diverse team environment
6. Analyse real-world case studies, identify ethical issues and propose ethical solutions.

Subject Content

1. The Project Management Process: Lifecycle; Key Approaches
2. Project Planning: Evaluation; Selection; Planning; Initiation; Execution; Closure
3. Organising: Resources; Teams and Human Resources; Task Estimation; Time Scheduling; Cost and Budgeting
4. Controlling: Stakeholders; Risk; Monitoring/Control; Quality; Communication; Tools
5. IT project management practices with professional ethical standards

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Proposal	15-20 pages	40	N	Group
Case Study	1,500-2,000 words	20	N	Group
Practical	15 minutes (per practical)	40	N	Individual

INFO 3020 Cyber Security and Behaviour Research Project

Credit Points 40

Coordinator Alana Maurushat (https://directory.westernsydney.edu.au/search/name/Alana Maurushat/)

Description This is a 40 credit point year-long subject taken over two terms (20 credit points in each term). This subject comprises the research pathway of the Bachelor of Cyber Security and Behaviour. Students will undertake a major research project in the field of behavioural cyber security. The specifics of the project will be coordinated between the student and the research supervisor at Western, which is undertaken over two semesters. Students should firstly discuss their proposed research project with the research supervisor, as it may require prior approval by the University's Ethics Committee depending on the research topic chosen. In the first semester, students plan their research, complete a literature review and propose the project plan to a panel of experts. By the end of the second semester students will have completed their thesis by research and will defend that thesis to a panel of experts. As such, students will have contributed to research in the field of cyber security and behaviour which prepares them for further studies towards a Masters or PhD qualification.

INFO 3021 Information Security (Advanced)

Credit Points 10

Coordinator Yun Bai (https://directory.westernsydney.edu.au/search/name/Yun Bai/)

Description This subject introduces cryptography theory and application. It teaches cryptography algorithms and protocols in information security and the application of such knowledge in the design and implementation of secure computer and network systems.

The contents include symmetric and asymmetric encryptions, signature, matrix, number theory, algebra, and security protocols. Students will learn the application of cryptography algorithm in current computer systems and information security management. This subject also provides practical exercises by security programming.

School Computer, Data & Math Sciences

Discipline Security Science

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) MATH1006
COMP2030

Assumed Knowledge

Basic understanding of data structures and discrete mathematics
Basic programming skills in C, C++, Java, Python, etc.

Learning Outcomes

After successful completion of this Subject, students will be able to:

1. Describe fundamentals in computer security and basic knowledge in cryptography
2. Explain conventional encryption/decryption methods and the concepts of symmetric keys
3. Design and implement block ciphers and stream ciphers
4. Explain principles of public key cryptosystems and public key algorithms
5. Summarize the number theory used in the RSA algorithm, Diffie-Hellman key exchange and digital signatures
6. Apply authentication functions and hash functions in message authentication
7. Illustrate Kerberos authentication protocols
8. Apply security requirements and design in electronic mail systems and in electronic commerce
9. Explain principles and mechanisms of security management
10. Investigate and apply advanced mathematical knowledges to security algorithms and implementations

Subject Content

1. Security, cyberattack and countermeasure, cryptography, and steganography
2. Conventional encryption and DES system
3. Number Theory and algebra, Modular arithmetic, and Euclid's algorithm
4. Public key encryption and RSA algorithm
5. Digital signature and authentication protocols
6. Key distribution and management
7. Security protocols and various applications in current computer systems
8. Information Security management
9. Conventional and public key decryption algorithms and implementation

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Short Answer	2-5 pages	15	N	Individual
Practical	500 lines of program	20	N	Individual
Final Exam	2 hours	50	N	Individual
Report	5-10 pages	15	N	Individual

INFO 5001 Workflow Management for Business Solutions

Credit Points 10

Coordinator Merv Small (https://directory.westernsydney.edu.au/search/name/Merv Small/)

Description Through project-based learning, students will learn how to configure digital workflows applications and build custom applications with a strong emphasis on human centered design and end-to-end process re/engineering. Mentoring and coaching is provided by the industrial-academic team to allow students to develop real world, work ready skills to fulfil various organisational roles implementing the digital workflows platform. Teaching and learning activities focus on ServiceNow which is a cloud-based platform that delivers cross-enterprise digital workflows, connecting people, functions and systems. At the conclusion of this subject, you will have completed certifications for both the ServiceNow Fundamentals and Application Development Fundamentals, both highly sought after in the current job market.

School Computer, Data & Math Sciences

Discipline Information Technology, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 5 subject

Restrictions

Students must be either enrolled in a postgraduate program or if accessing from undergraduate program, they must complete at least 160 credit points.

Assumed Knowledge

Students are expected to have a general understanding of IT platforms and some basic knowledge of coding

Learning Outcomes

1. Analyse conceptually how roles, groups and users work together to provide role-based access;
2. Create forms and views, with a focus on a positive user experience;
3. Analyse business processes, focussing on human-centred design;
4. Create knowledge articles to assist users to find the information they need;
5. Develop workflows to automate applications;
6. Collaborate with peers in an ethical and respectful manner to create an application that addresses requirements;
7. Present the features and benefits of an application in a clear and convincing manner.

Subject Content

ServiceNow Fundamentals

- Explore and Configure ServiceNow Applications through ServiceNow Fundamentals taught as Instructor-Led Training (ILT)
- During this subject students will:
  - learn about the NOW Platform® User Interface
  - gain a basic knowledge of the database schema
  - understand uses for commonly accessed applications, and
  - be introduced to advanced features and functionality, such as scripting and application development.

Application Development Fundamentals

- This hands#on course will provide training and lab work to support application development fundamentals in ServiceNow. Attendees will build an award#winning loaner equipment application by working through a checklist of considerations for application creation, including decisions such as creating an application table vs. extending an existing table, and determining how users will interact with the application.
- Detailed labs that reinforce good practices in these areas support the topics covered in class:
- Design an application table: to extend or not to extend?
- Create and implement forms and views for a positive user experience
- Manage application business logic with scripts
- Control access to the application and its records
- Send notifications to stakeholders and collaborators
- Use Flow Designer to automate applications
- Integrate to ServiceNow and to public web services
- Use the Service Catalog to provide access to applications
- Test the application manually and automatically
- Use the Application Repository to install/uninstall applications

Special Requirements

Essential equipment

Laptop

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Level Postgraduate Coursework Level 6 subject

Pre-requisite(s) ENGR 7017 - Professional Practice and Communication

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Understanding of systems analysis and design principles.

Learning Outcomes

1. Create project management documentation including business cases and proposals for IT projects following project management body of knowledge guidelines

2. Analyse issues and failures in IT project management
3. Manage project scope, quality and budget using project management methodology
4. Work with diverse team members and stakeholders to manage project schedules and resources using appropriate tools and techniques
5. Demonstrate research, writing and presentation skills relating to project management
6. Critically reflect on professional practice skills, legal, ethical and social issues in the IT context
7. Communicate in a clear and convincing manner with diverse audiences using a range of formats

Subject Content

1. Developing business cases for IT projects
2. Developing project proposals
3. Challenges and failures in IT project managements
4. Project management
5. Recent project management methodologies
6. Developing consultancy and research skills
7. Presentation skills and inter-personal skills

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Applied Project	10 pages (for Part 1) 15 pages (for Part 2)	60	N	Group
Essay	800 words	10	N	Individual
Presentation	15 minutes	10	N	Group
Report	1800 words	20	N	Individual

INFO 6002 Postgraduate Capstone Project

Coordinator Jianhua Yang (https://directory.westernsydney.edu.au/search/name/Jianhua Yang/)

Description This capstone subject organises students in groups to work on industry-based projects. It provides students with opportunities to gain substantial practice in the development of information systems or software projects including requirements analysis, data gathering and synthesising, system design, implementation, data processing and testing, in a real-world context. Suitable projects are featured with complex computing problems and are sourced from external organisations or within the university. Students work in groups. Each group is guided by an academic supervisor or an industry mentor to achieve the goals set by a client who provides the project. The subject aims to develop students' project management skills, effective teamwork, analytical problem-solving, computational and big data thinking, as well as valuable experience in self-directed learning and reflective practice within a professional setting.

School Computer, Data & Math Sciences

Discipline Information Technology, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 6 subject

Restrictions

Students must be enrolled in a postgraduate program and have successfully completed at least 60 credit points of postgraduate subjects.

Assumed Knowledge

Software development methodologies; Software analysis and design modelling tools and techniques; Programming languages; Implementing databases management systems; Software construction and testing.

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Complete all tasks through a system development lifecycle to produce a software product or certain deliverables, working in a group independently with task allocation.
2. Create a full set of professional level documents covering all phases of the system development lifecycle.
3. Integrate skills and knowledge gained from previous subjects as required by the project.
4. Control probable risks when planning, organising and controlling project processing activities.
5. Manage software projects under certain constraints and apply newly learned technologies and knowledge to the completion of project processing activities.
6. Demonstrate the ability to reflect on learning experiences and the issues involved when managing software development projects.
7. Demonstrate verbal communication skills when presenting a developed system to a diverse audience.

Subject Content

There are no formal lectures for this subject but a couple of workshop/ information sessions. The subject content covers typical activities in developing an information system or a software project in real-world context.
•System development lifecycle including requirement analysis for a software system, design solutions that meet the requirements, system construction, data processing and testing, techniques and tools for the assurance of quality and compliance of the software system throughout its development life cycle.
•Project planning and management.
•Stakeholder management, including communication of designs, solutions, ideas to stakeholders.
•Team skills, including communication, collaboration, and negotiation.
•Reflection for improved performance, professional development, and lifelong learning.
•Documentation requirements for communicating software systems requirements and design (technical documentation & document version control).
•Final project presentation & promotion.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Portfolio	1.1 Project Proposal - 4500 words 1.2 Systems Analysis & Design Report - 7,500 words n. 1.3 Handover & Deployment Report -2,500 words . 1.4 Diary and Reflections Report 1.4.1 Diary (at least 1 entry per week with each entry of 100-250 words of length). 1.4.2 Reflections Report (600 words)	35	N	Group/ Individual
Professional Task	2.1 Working Prototype - 2.2 Completed Final System.	50	N	Group
Presentation	Final Presentation - (25 minutes)	15	N	Group

INFO 6003 Postgraduate Research Project

Coordinator Jianhua Yang (https://directory.westernsydney.edu.au/search/name/Jianhua Yang/)

Description This project-based subject provides students with opportunities to develop comprehensive research and project management skills. Students are matched with a supervisor to explore an area of research interest. Working closely with their supervisor, each student will identify their individual research topic then engage in theoretical and practical research investigations. Each student is expected to develop their skills to work independently as a researcher to manage their research project as well as produce and deliver a comprehensive research report on their findings. This subject provides students with the skills necessary to move on to higher academic research levels or pursue career opportunities in industry-based research.

School Computer, Data & Math Sciences

Discipline Information Technology, Not Elsewhere Classified.

Level Postgraduate Coursework Level 6 subject

Equivalent Subjects INFO 7017

Restrictions

Students must be enrolled in a postgraduate program and have successfully completed at least 60 credit points of postgraduate subjects.

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Critically analyse the relevant literature to identify potential research problems.
2. Generate research questions and hypothesis based on literature review.
3. Justify the research proposal in relation to its significance in literature and its anticipated impact.
4. Construct a plan and methodology to conduct research on an identified question/issue/problem.
5. Articulate research aims and findings in professional, formal and informal formats and contexts.
6. Apply self-management skills in planning and executing research.
7. Demonstrate research ethics in synthesising complex information from a range of sources and referencing appropriately.

Subject Content

There are no formal lecture sessions for this unit. The unit content covers typical activities in carrying out a research project. The unit content may also be recommended by the unit coordinator/project supervisor for a specific research project.
•Question formulation: develop research question(s) or hypotheses. The end result of the students' initial reading should be well-defined research question(s). The research question(s) will help the students to focus on the scope of their work.
•Problem identification: identify a problem in a relevant field, such as information communications and technology, data science, artificial intelligence, information governance, at a general or fundamental, technical, or regulatory or philosophical level that needs investigation. It is important that the students examine the assumptions that underlies the problem.
•Literature review: critically review and appraise current literature related to the students' study topics are an essential first step. Extensive reading and referencing the key papers and other sources are seen as a part of the problem-solving process. The students must read widely and compare the opinions of the many authors in their reports.
•Definition of objectives: define what intends to achieve, scopes, and results expected.
•Methodology: establish research methodology for the investigation of the research issue.
•Planning: prepare a research plan for carrying out the research.
•Proposal: write detailed description of a series of activities aimed at solving certain research problem, including project justification, research objectives, methodology, implementation timeline, resources needed to execute the project.
•Constructing: implement logical framework, methods, models, systems, or algorithms in contexts.
•Analysis and discussion: conduct detailed quantitative and qualitative analyses of the data collected and discuss the results.
•Reporting: produce a comprehensive report and present the outcomes and deliverables clearly stating the student's own original contribution to the project.
•Presentation: introduce the project with motivation and ideas. Explain methodologies and research process. Demonstrate and discuss findings/outcomes.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

INFO 7003 Advanced Topics in User System Interaction

Credit Points 10

Legacy Code 301045

Coordinator Harry Wang (https://directory.westernsydney.edu.au/search/name/Harry Wang/)

Description The domain of User System Interaction or also known as Human Computer Interaction (HCI) dictates that IT graduates must be able to develop and evaluate interfaces that not only look professional but are usable, functional and accessible. This post graduate subject also examines HCI as a field of research and discusses novel areas of research in the area. Students in this subject will be required to complete a research project alongside a literature review document both of which comprise of content that is of a standard of being able to be considered for publication and/or presentation in a HCI conference or journal.

School Computer, Data & Math Sciences

Discipline Information Technology, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) INFS 7007

Incompatible Subjects INFO 3003 - Human-Computer Interaction
INFO 3004 - Human-Computer Interaction (Advanced)

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply cognitive and user models to the design of application user interfaces.
2. Describe ways in which users' characteristics (i.e., age, education, cultural differences, disability etc.) require adaptation of a user interface to increase effectiveness.
3. Integrate appropriate user-centred design methodologies into the development of an application, website or emerging technology (such as mobile and wearable devices)
4. Describe and use the major usability guidelines and standards.
5. Develop low-fidelity prototypes, and high-fidelity prototypes.
6. Develop user interfaces for domain specific applications.
7. Create an appropriate user evaluation plan with carefully chosen subjective and objective measures.
8. Discuss state of the art research issues and novel interaction technologies under the umbrella of HCI by means of presenting discourse through a literature review paper.

Subject Content

Understanding the user and the user experience
Interaction styles
Usability standards
User-centred design methods
Development tools and prototyping
Matching interface elements to user requirements
Usability testing: tools and methodologies
Accessibility and assistive technologies
Rich media
Localization, globalization
Developing for multiple devices (Computer, PDAs, 3G phones etc)
Human Computer Interface In Industry
Emerging technologies
Research initiatives in HCI
Research skills (literature review, collecting and analysing data, writing a research report)
Novel Interaction Techniques
Multimodal Interaction
Mobile HCI

Attendance

It is highly recommended that students engage with the weekly tutorial activities as work will be marked within each tutorial.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Log/ Workbook	3 -5 questions to be completed during tutorial	10	Y	Individual
Log/ Workbook	Weekly exercises to be completed at home	20	N	Individual
Applied Project	Part A - 750 words Part B - 1,200 words Part C - 10 minutes presentation	50	Y	Individual

Literature Review	1,500-2,000 words	20	N	Individual

INFO 7004 ICT Practicum

Credit Points 0

Legacy Code 301047

Coordinator Rhys Tague (https://directory.westernsydney.edu.au/search/name/Rhys Tague/)

Description In this subject, students undertake 120 hours of full-time or part-time equivalent industry placement as a Work Integrated Learning (WIL) component required for the successful completion of their course. Students can nominate an organisation of their choice however, they must seek the approval of the Subject Coordinator before the commencement of the industry placement. Students have the option to work in an organisation in Australia, or within a department/division of Western Sydney University carrying out ICT related tasks or globally, with the exception of their home country for non-Australian resident students. This provides an opportunity for real-world experience in the ICT industry in Australia as well as anywhere in the world. Students with substantial post-qualification work experience in Australia or globally (with the exception of their home country for non-Australian residents) may be eligible for advanced standing for this subject.

School Computer, Data & Math Sciences

Discipline Information Technology, Not Elsewhere Classified.

Student Contribution Band

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) For students enrolled in 3698 Master of Information and Communications Technology (Advanced) or 3699 Master of Information and Communications Technology - ENGR 7017 Professional Practice in Communication
For students enrolled in 3765 Master of Artificial Intelligence - COMP 7020 Artificial Intelligence Ethics and Organisations

Restrictions

Students must be enrolled in 3698 Master of Information and Communications Technology (Advanced), 3699 Master of Information and Communications Technology or 3765 Master of Artificial Intelligence.

Assumed Knowledge

A broad background knowledge in ICT discipline (i.e. equivalent to that obtained after completing two-three years of ICT/Computing).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Relate academic course material to workplace conditions
2. Develop experience in various aspects of ICT industry such as planning, organising and managing ICT projects as well as adapting to workplace culture in Australia or globally)
3. Develop appropriate workplace skills, work habits and professional attitudes by working with professionals
4. Communicate effectively in a variety of forms to diverse audiences
5. Work in a team environment

Subject Content

A 120 hrs full time or part-time equivalent of industrial training in the ICT industry performing following tasks:
1. Find details of assigned workplace including relevant work practices and procedures
2. Follow relevant work practices and procedures
3. Perform appropriate workplace tasks as directed
4. Seek feedback on assigned tasks from appropriate person
5. Document evidence of activities carried as required

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Participation	A daily kept diary with the employer's evaluation at the end of each week	S/U	Y	Individual
Log/ Workbook	A 2-3 pages report detailing the tasks and responsibilitie undertaken by the student	S/U	Y	Individual

Professional Placement Performance	A standard form (approx. 1 page) is provided for Employer to fill in and submit to the subject coordinator as a confidential report.	S/U	Y	Individual

INFO 7005 IT Project Management

Credit Points 10

Legacy Code 300260

Coordinator Mahsa Razavi (https://directory.westernsydney.edu.au/search/name/Mahsa Razavi/)

Description This subject is designed to provide students with an opportunity to learn and apply the knowledge, values and skills of consultancy, project management, and research by undertaking an IT project. The subject covers preparing and presenting project proposals in various ICT areas, project management, time management, communication skills, and the evolving legal, ethical, and social responsibilities of IT professionals. Students will work in teams under the supervision of a staff member, to plan and investigate their project.

School Computer, Data & Math Sciences

Discipline Other Information Technology

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Understanding of systems analysis and design principles.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Develop business cases and proposals for various IT projects
2. Demonstrate understanding of issues in IT project management
3. Demonstrate competence in project management, researching, planning, carrying out and evaluating an IT project
4. Work with people, in a small project team, managing their own time
5. Write, produce and present review reports of their progress
6. Demonstrate professional commitment and understanding of legal, ethical and social issues
7. Demonstrate communication skills using different and new media

Subject Content

Developing business cases for IT projects
Developing project proposals
Challenges and failures in IT project managements
Project management
Recent project management methodologies
Developing consultancy and research skills

Presentation skills and inter-personal skills

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Proposal	10-page for part-1 and 15-page for part-2	60	N	Group
Essay	800 Words	10	N	Individual
Presentation	15 Minutes	10	N	Group
Report	1800 Words	20	N	Individual

INFO 7007 Masters Thesis

Credit Points 80

Legacy Code 301125

Coordinator Yi Zhou (https://directory.westernsydney.edu.au/search/name/Yi Zhou/)

Description This is a 80 credit point year-long subject taken over two terms (40 credit points in each term). This subject provides an opportunity for masters students to carry out a comprehensive investigation and practical work on a cutting edge research topic in the area of Information and Communication Technologies. Students are encouraged to select topics they envisage to be of value to their future careers. Students will undertake individual research-intensive project-based study under the guidance of an academic supervisory panel.

School Computer, Data & Math Sciences

Discipline Information Technology, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 40cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) ENGR 7017 AND
ENGR 7018 AND
HUMN 4009 AND
HUMN 4010

Restrictions

Students must be enrolled in the Master of Information and Communications Technology (Research).

Assumed Knowledge

Prior knowledge deemed appropriate by the project supervisor.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Further critically review and analyse literature in relevant area to identify important research problems.
2. Develop a successful research plan and methodology to tackle identified research problems.
3. Conduct effective research activities to carry out the research plan.
4. Exemplify advanced academic analytical and written skills in the final thesis.
5. Communicate ideas and plans at a professional level to academic audiences.

Subject Content

All students enrolled in this subject will be supervised by an academic supervisor or a supervisory panel to undertake a yearlong independent ICT related research project, proposed in the subject 800169 - Research Design 2. Under supervision, each student needs to further critically review and appraise current literature, and conduct research activities to carry out the research plan. At the end, all students need to write a master thesis for the undertaken research and present their major research findings. Students are highly encouraged to publish peer-reviewed papers from outcome of their research.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
3-month progress report	2500 words	10	N	Individual
6-month progress report and presentation	5000 words for progress report, 20 minutes for progress presentation	20	N	Individual
Final masters thesis	20,000-25,000 words	60	N	Individual
Final presentation	30 minutes	10	N	Individual

Assumed Knowledge

Student must know how to write Objected-Oriented code.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Practicals	1-2 pages lab report per practical (2 practicals in total)	20	N	Individual
Applied Project (10% report + 20% project quality and demonstratior	10 pages document per group (3-4 students per group), including technical report, architecture diagrams, and user manual, plus 15 minutes demonstratior of the working software system	30	N	Group
Quiz	1 hour	30	Y	Individual
Research Report	8 pages document	20	N	Individual

INFO 7009 Network Security

Legacy Code 301068

Coordinator Ante Prodan (https://directory.westernsydney.edu.au/search/name/Ante Prodan/)

Student Contribution Band

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Restrictions

Students must be enrolled in the online program Master of Advanced Networking or any other postgraduate Western Sydney University program where this subject can be taken as an unspecified elective and where there are sufficient credit points available in the study program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify network security threats.
2. Explain techniques for evaluating and managing information security risks.
3. Implement the techniques for designing and implementing network security using available security infrastructure and devices.
4. Analyse the theory behind - and techniques for implementing - access control, authentication, authorisation and accounting.
5. Design secure network architectures.
6. Implement firewall and intrusion prevention technologies.
7. Use cryptography and virtual private networks to ensure secure transmission of information.
8. Outline the importance of physical and environmental security to have a holistic understanding of network security challenges.
9. Integrate knowledge and skills from various sources into a coherent whole, making the appropriate abstractions.
10. Critically evaluate and reflect upon your own work.
11. Solve problems using network modelling tools and real equipment.
12. Interpret complex issues both systematically and creatively, making informed judgements in the absence of complete data.
13. Integrate knowledge and skills from various sources into a coherent whole, making the appropriate abstractions.
14. Solve problems and apply solutions independently to professional or equivalent level tasks/projects/functions.
15. Work with others to refine ideas, leading to an improved understanding of key concepts within the computing systems context.
16. Build and maintain advanced networks using Cisco equipment.
17. Advocate the appropriate use of advanced security technologies.
18. Prepare to gain industry-recognised certification.

Subject Content

1. Security threats and risk management
2. Security architecture and design
3. Security implementation
4. Cryptography
5. Security management

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

TMA - Problem solving task; Apply research to problem; Cisco activities	1200 words	20	Y	Group
TMA - Group Case Study; Apply research to problem; Cisco activities	1100 words	20	Y	Group
Final examination	3 hours	50	Y	Individual

INFO 7010 Research Project A

Credit Points 20

Legacy Code 301055

Coordinator Md Kamrul Hassan (https://directory.westernsydney.edu.au/search/name/Md Kamrul Hassan/)

Description This subject is a problem based research subject. Students are expected to conduct individual studies under supervision by academic staff. Students will acquire the basic skills that are essential for completing a research project. They will learn how to identify research topics in the fields relevant to their courses. They will be required to define research objectives and scope, conduct literature survey, establish research methodology, prepare a research plan and present these contents in a final report and through an oral presentation. This subject is a pre-requisite of subject Research Project B in which the research plan will be carried out.

INFO 7012 Strategy for Technological Innovation

Credit Points 20

Legacy Code 301053

Coordinator Ante Prodan (https://directory.westernsydney.edu.au/search/name/Ante Prodan/)

Description This online subject introduces a range of perspectives on the strategy formation process, recognising that there is no one universal process to fit all needs. A significant part of the teaching centres on an overview of strategic management. This is then placed into the context of technological innovation through six teaching blocks, each block providing a different perspective on the strategy formation process.

School Computer, Data & Math Sciences

Discipline Other Information Technology

Student Contribution Band HECS Band 2 20cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in the online program Master of Computing or any other postgraduate Western Sydney University program where this subject can be taken as an unspecified elective and where there are sufficient credit points available in the study program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the different perspectives of strategy and strategic management and a range of theoretical, conceptual and applied material relevant to their study and application across a variety of organisational, sectoral or industrial settings relevant to technological innovation and management.
2. Discuss the relationship between, and the significance of the various perspectives on strategy for technological innovation and management.
3. Analyse a range of contextual and temporal variables that condition and shape the practice of strategy for technological innovation and management.
4. Evaluate the contested nature of the various perspectives and the theories, approaches and methodologies (e.g. tools and techniques) that inform and underpin them.
5. Interpret a range of contemporary and/or pervasive issues (which may change over time), relevant to a students organisation, sector or industry, or the subject, field or discipline a student has studied and integrate this into their work as example/case study material.
6. Critically analyse and evaluate conceptual, theoretical and applied approaches relevant to strategy and technological innovation, and/or TM and strategic management, with particular reference to the organisational, sectoral or industrial setting appropriate to a students location and/or interests.
7. Critically analyse and evaluate current research and scholarship in the field of strategy and technological innovation, and/or TM and strategic management more generally, with particular emphasis on a students chosen organisational, sectoral or industrial setting.
8. Apply knowledge and understanding of strategy/strategic management to technological innovation and management through independent learning and reflection on practice and experience.
9. Effectively communicate knowledge, ideas and conclusions about strategy, strategic management and technological innovation and management with particular reference to the organisational, sectoral or industrial context of most relevance to them.
10. Reflect on their performance, identify their learning needs and develop appropriate learning strategies.
11. Design and apply research and the skills required for analysing, and communicating, potentially complex findings and conclusions.
12. Implement a professional and ethical approach to any investigative/research work.

Subject Content

Perspectives on strategy - Dimensions of innovation
Planning for strategic position - Dynamic interaction
Learning - Planning and analysis
Culture - Culture and strategic options
Power and politics - Shaping strategy and innovation
Environment - Choice of and constraints on innovation
Configurations - Understanding configurations and change

Assessment

Essay and contribution to wiki	2000 words	15	N	Individual
Essay and contribution to wiki	2000 words	20	N	Individual
Final assessment - written report	3000 words	50	N	Individual

INFO 7013 Web Engineering

Credit Points 10

Legacy Code 300443

Coordinator Antoinette Cevenini (https://directory.westernsydney.edu.au/search/name/Antoinette Cevenini/)

Description Today organizations extensively rely on web based information systems to market, sell, manage customer relations, and for most of the internal operations. Users are increasingly using mobile devices to interact with this information. Due to rapidly changing business environment these systems need to be designed in away to accommodate the frequent changes. New technologies and frameworks have been developed to support development of large, complex, mobile based, maintainable and evolutionary web systems. In this subject students will study some of these technologies, design methods and frameworks that can be successfully used to engineer such web systems. They will get hands on experience by developing such a system.

School Computer, Data & Math Sciences

Discipline Information Technology, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 5881 - Web Application Development

Restrictions

Students must be enrolled in a postgraduate program offered by the School of Computer, Data and mathematical Sciences.

Assumed Knowledge

Ability to develop simple static web sites. Knowledge about server-side and browser-side scripting.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the types of Web based systems and develop conceptual models to meet the specific information needs and/or to support a set of business processes.
2. Select a suitable development process based on needs and constraints.
3. Develop a suitable architecture for the Web System within the constraints, policies and guidelines.
4. Model and design various components as per the architecture.
5. Develop user interfaces based on usability guidelines.
6. Select appropriate technologies and standards to implement these components.
7. Create a project plan to develop the system.
8. Implement and test the critical components of the Web System.
9. Demonstrate the ability to work in a team environment in relation to Web development projects.

Subject Content

- Overview of web Engineering
- types of web systems and characteristics
- conceptual modeling of web systems
- design of user Interfaces and user interaction Models
- web technologies and Standards
- web system architectures
- design methodologies
- web development processes

Assessment

INFO 7014 Advanced Topics in Cybersecurity

Credit Points 10

Legacy Code 301236

Coordinator Seyed Shahrestani (https://directory.westernsydney.edu.au/search/name/Seyed Shahrestani/)

Description This subject focuses on the advanced features of Cybersecurity, contemporary views on security, and the solutions that aim to protect the emerging services and technologies. The emphasis is on the development of student skills to enable them to do proficient research and development works and studies in the cybersecurity discipline. On successful completion of this subject, students will be equipped with an in-depth understanding of relevant issues, attacks on massively interconnected systems, and the evolving approaches to improve the reliability of advanced services.

School Computer, Data & Math Sciences

Discipline Security Science

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

The students should be familiar with the fundamentals of computer networking and security. It is advisable that the students must have either taken appropriate subjects in these areas (e.g., 300695 Network Technologies and 300696 Systems and Network Security) or have equivalent knowledge.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the important concepts applicable to the emerging cybersecurity-related approaches and technologies.
2. Analyse the vital cybersecurity issues in modern applications and services.
3. Explain the contemporary issues in security and reliability of modern massively interconnected systems.
4. Evaluate the performance of the emerging cybersecurity solutions and the related technologies.
5. Demonstrate proficiency with key research and development issues in the fields of cybercrime and cybersecurity.

Subject Content

Cybersecurity: Context and Background
Contemporary Issues in Cybersecurity
Trust and Behavior Analysis
Securing Massively Interconnected Systems
Advanced System Cybersecurity and Reliability
Cybersecurity Research, Resources, and Citation
Methodologies for Research in Advanced Cybersecurity

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Report	1,200 words	20	N	Individual
Intra-session Exam	2 hours	30	N	Individual
Applied Project	4,000 words and 5-10 minutes per student	50	N	Both (Individual & Group)

INFO 7015 Applied Cybersecurity

Credit Points 10

Legacy Code 301235

Coordinator Mahsa Razavi (https://directory.westernsydney.edu.au/search/name/Mahsa Razavi/)

Description This subject covers the current approaches, technologies, and applied practices pertinent to cybersecurity and helps the student to understand important related protocols and standards. It describes the features needed for the mitigation of cyber vulnerabilities for improving the reliability of the underlying systems, privacy preservation, and achieving protections against cybercrime and internet fraud. It also examines the basics of ethical hacking, network assurance, cyber risk management, and incident analysis. The subject discusses the trends in applied cybersecurity and introduces some of the relevant current key research issues and features of the field.

School Computer, Data & Math Sciences

Discipline Security Science

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) COMP 7013

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the fundamental concepts of applied cybersecurity
2. Identify cybersecurity threats and the services applied to combat them
3. Explain cybersecurity technologies and practices
4. Analyse and describe the advantages and shortcomings of the more commonly applied cybersecurity approaches
5. Discuss the trends in cybersecurity
6. Explain key research issues in applied cybersecurity

Subject Content

-Applied Cybersecurity: Overview
-Applied Cybersecurity: Concepts, Threats, and Fundamental Solutions
-Cybercrime and Digital Forensics
-Cyber Incident Detection, Analysis, and Recovery
-Ethical Hacking
-Cyber Identification and Authentication
-Applied Software and Web Security
-Cybersecurity: Cloud, Mobile, and Wireless Environments
-Cyber Assurance and Risk Management

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Practical	2 hours	20	N	Individual
Final Exam	2 hours	50	N	Individual
Report	4,000 words and 10 minutes	30	N	Group

INFO 7016 Postgraduate Project A

Credit Points 10

Legacy Code 301384

Coordinator Jianhua Yang (https://directory.westernsydney.edu.au/search/name/Jianhua Yang/)

Description This is a project-based subject for the Master studies in Computers, Data and Mathematical Sciences. The purpose of this subject is to develop research skills and learn how to manage a research project. Students will engage in research investigation and practical work on a topic in a field of current research interest that is of value to the candidate's professional and intellectual development. Students are expected to actively pursue their interest in an individual research area and undertake self-studies under guidance of a project supervisor. Students will identify research topics in consultation with supervisors, carry out a literature review, define research objectives, establish research methodology, and prepare a research plan. Eventually each student is required to produce a research report with preliminary findings.

School Computer, Data & Math Sciences

Discipline Information Technology, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects ENGR 7014 - Master Project 1

Restrictions

Students must be enrolled in a postgraduate program and have successfully completed 60 credit points of postgraduate subjects.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse the relevant literature to identify potential research problems in the fields of ICT, DS, AI, and Mathematics.
2. Generate research questions and hypothesis based on the literature review and the changing landscape.
3. Justify the research proposal in relation to its significance in literature and its anticipated impact based on computational thinking, big-data thinking, and/or mathematical thinking.

4. Construct a plan and methodology to conduct research on an identified question/issue/problem.
5. Articulate research aims and findings in professional, formal and informal formats and contexts.
6. Apply self-management skills in planning and executing research within computing contexts.
7. Demonstrate research ethics in synthesising complex information from a range of sources and referencing appropriately.

Subject Content

There are no formal lecture sessions for this subject. The subject content covers typical activities in carrying out a research project. The subject content may also be recommended by the subject coordinator/ project supervisor for a specific research project.
- Questioning: develop research question(s) or hypotheses. The end result of the students?f initial reading should be well-defined research question(s). The research question(s) will help the students to focus on the scope of their work.
- Problem identification: identify A Problem in A relevant field, such as information Communications and Technology, data science, Artificial Intelligence, information Governance, at A general or fundamental, technical or Regulatory or Philosophical level that needs investigation. It is important that The students examine The assumptions that underlies

Assessment

INFO 7017 Postgraduate Project B

Credit Points 10

Legacy Code 301385

Coordinator Jianhua Yang (https://directory.westernsydney.edu.au/search/name/Jianhua Yang/)

Description This project based subject is a continuation of subject Postgraduate Project A. Students are expected to work individually under the supervision of academic staff to solve a research problem and deliver the final outcomes on the research topics they selected in Postgraduate Project A. Students will carry out the research plans, employ the identified methodologies, and fulfil the research objectives within the defined scope. Students will acquire problem solving skills and research experience necessary to participate in a future research projects. To complete their project each student is required to deliver an oral presentation and a final written report detailing the outcomes of their research project.

School Computer, Data & Math Sciences

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) INFO 7016

Equivalent Subjects ENGR 7015 - Master Project 2

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Fundamentals of software or information systems management, Knowledge in research methodology and Skills in literature review and oral presentation.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Conduct continuous review of existing literature in the fields of ICT, DS, AI, and Mathematics to identify the relevance to the proposed research project.
2. Execute a prepared research plan using appropriate methodologies.
3. Evaluate research findings against intended project outcomes.
4. Articulate research results in professional/formal and informal formats and contexts.
5. Apply self-management skills in executing research in computing contexts.
6. Demonstrate research ethics in synthesising complex information from a range of sources and referencing appropriately.

Subject Content

There are no formal lecture sessions for this subject. The subject content covers the following research activities. However, it may also be recommended by the subject coordinator/project supervisor for a specific research project.
- Literature review: further review and appraise the current literature related to the study topic.
- Implementation of research methodology: the research plan and methodology that have been established in Postgraduate Project A are implemented in this subject. Students may carry out the experimental work or numerical simulations or theoretical analysis or field studies.
- Analysis and discussion: conduct detailed quantitative and qualitative analyses of the data collected and discuss the results.
- Reporting: produce a complete dissertation and present the final findings clearly stating the student's own original contribution to the study topic.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Presentation	20 minutes	20	N	Individual
Report	1,500 - 2,500 words (includes figures, formulas, tables)	20	N	Individual
Report	7,500 to 15,000 words (includes figures, formulas, tables)	60	N	Individual

INFO 7018 Cloud Systems Development

Credit Points 10

Legacy Code 301386

Coordinator Rodrigo Neves Calheiros (https://directory.westernsydney.edu.au/search/name/Rodrigo Neves Calheiros/)

Description The majority of backend systems supporting modern mobile applications as well as commercial applications are built to run on the cloud. This requires a shift of design where reliability, scalability, performance, and security are key considerations in every stage of the software development process. This subject incorporates the AWS Academy Cloud Developing curriculum, to support learning in the areas of designing, developing, deploying, and monitoring applications for the cloud. Through the completion of an applied project, students will implement the techniques they have learned to enable communication and coordination between services, options for data persistence in the cloud, and optimisation of applications for, potentially, millions of users. Students completing this subject can pursue careers as Cloud Engineers and Software Developers.

School Computer, Data & Math Sciences

Discipline Information Technology, Not Elsewhere Classified.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) COMP 7004

Equivalent Subjects INFO 7008 Modern Software Architectures

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Student must know how to write Objected-Oriented code. Students must have familiarity with networking concepts.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate cloud systems and services, as well as design approaches for cloud applications.
2. Analyse relevant monitoring systems to solve production issues.
3. Critically review system requirement determining appropriate cloud-based applications, approaches and services.
4. Design a complete cloud-based application using cloud technologies.

5. Implement cloud APIs and web-based applications and services using a range of technologies.

Subject Content

1. Cloud application design and architecture
2. Data persistence in the cloud
3. Strategies for application optimisation
4. Cloud application deployment and monitoring
5. Cloud application communication and coordination
6. Cloud application security

Assessment

INFS 1002 Information Systems in Context

Credit Points 10

Legacy Code 300573

Coordinator Ana Hol (https://directory.westernsydney.edu.au/search/name/Ana Hol/)

Description This subject aims to give students the ability to recognise and explain business information systems with regard to type, function, purpose, and the frameworks within which these systems are used. Topics in this subject include computing fundamentals; computer hardware and software; computers and society; use of business application packages - spreadsheets, word processing, database, graphics; organisational information systems; information systems development and acquisition; data and knowledge management; electronic commerce, internets, extranets; networking; enterprise-wide information systems; the internet and information systems security; privacy, ethics and computer crime.

School Computer, Data & Math Sciences

Discipline Systems Analysis and Design

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects INFS 1003 Information Systems in Context (WSTC)

Incompatible Subjects INFS 1004 Introduction to Information Systems

Assumed Knowledge

2 Unit Mathematics and 2 Unit English (General).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and explain an information system with regards to its type, functionality, role and impact;
2. Recognise and explain the role of management, information system professionals and end users when developing and implementing information systems in a business environment;
3. Discuss the implications of contemporary issues effecting business information systems;
4. Identify and explain the structure and business uses of data, information and knowledge banks;
5. Apply the knowledge of common business application packages to present information at a professional level;
6. Summarise, analyse and present data collected through research.
7. Recognise and identify an information system with regards to its type, functionality, role and impact;

Subject Content

Key Issues in Information Systems (IS), Applications of IS in Business: Fundamentals of IS, General Systems Theory, why businesses need IS, IS for business operations and competitive advantage, Changes in the business world.
Information Basics: Data representation and Information management, Data-banks, Technology (Hardware, Software and Communications Technology) as it pertains to effective management of information, the Internet, Intranets and Extranets in business management.
Using and Developing IS: Developing business solutions through effective management of information, Managerial decision support through IS, Focus on end-user needs in business IS, Strategic IS Planning, Business Process Redesign, Management of implementation of IS within business.
Business Challenges in Management of business globalisation, Security, Privacy and Ethics in business practices.
Practical Skills embedded to portfolio activities that will enhance and support students searching skills, the ability to write and critically analyse and effectively present findings using the MS packages (Word, Excel, and PowerPoint).
- key Issues in information systems (is), applications of is in business: fundamentals of is, general systems theory, why businesses need is, is for business Operations and competitive advantage, changes in The business world.

INFS 1006 Systems Analysis and Design

Credit Points 10

Legacy Code 300585

Coordinator Simi Kamini Bajaj (https://directory.westernsydney.edu.au/search/name/Simi Kamini Bajaj/)

Description This subject introduces the concepts of System Analysis and Design. The study of methodologies and techniques for problem recognition, requirement analysis, process modelling, solution design and data modelling are essential elements of this subject. The Systems Development Life Cycle model is employed as the prime approach to

teach the subject, equipping students with the basic skills required for developing models for analysis, design, implementation and solving information systems problems. This subject introduces students to approaches of system development including structured, object oriented and agile. Students are exposed well to system design activities including UI, data, basic system architecture and system processing. The use of drawing tools will be discussed in practical sessions.

Level Undergraduate Level 1 subject

Equivalent Subjects LGYA 5776 Introduction to Analysis and Design INFS 1007 Systems Analysis and Design (WSTC)

Assumed Knowledge

Students should have knowledge of the fundamentals of information systems, computer systems, computer applications and information processing.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Recognise the key role of a systems analyst and describe the generic roles and responsibilities of users, developers and managers within the context of business information systems.
2. Recall the fundamental building blocks and architecture of information systems.
3. Describe and apply the various phases of the System Development Life Cycle, including related documentation and appropriate project management approaches.
4. Analyse user and system requirements for the purposes of producing abstract models based on real business problems.
5. Explain the use and application of Computer Aided Software Engineering (CASE) Tools in the creation of systems development artefacts.
6. Explain the issues around information systems governance, consumer and information security and professional ethics in regards to their impact on information systems design and operation.

Subject Content

- introduction to systems and information.
- concepts of systems analysis and design.
- The Systems Development Lifecycle (SDLC).
- Problem Definition, statement and documentation.
- introduction to requirements gathering and analysis using business process, data and object oriented modelling
- implementation issues.
- human computer interaction
- Project management.
- information systems Governance, Consumer and information security and professional ethics
- systems development documentation.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Portfolio	Short answer descriptions + diagrams + workshop participation	30	N	Individual
Quiz	1 hour	20	N	Individual
Final Exam	2 hours	50	N	Individual

6. Summarise, analyse and present data collected through research.

Subject Content

1.Key Issues in Information Systems, Applications of IS in Business: Fundamentals of IS, General Systems Theory, why businesses need IS, IS for business operations and competitive advantage, Changes in the business world.
2.Information Basics: Data representation and Information management, Databanks, Technology (Hardware, Software and Communications Technology) as it pertains to effective management of information, the Internet, Intranets and Extranets in business management.
3.Using and Developing IS: Developing business solutions through effective management of information, Managerial decision support through IS, focus on end-user needs in business IS, Strategic IS Planning, Business Process Redesign, Management of implementation of IS within business.
4.Business Challenges in Management of business globalisation, Security, Privacy and Ethics in business practices.
5.Practical Skills embedded to portfolio activities that will enhance and support students?f searching skills, the ability to write and critically analyse and effectively present findings using the MS packag

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Short Answer	1,200 words	40	N	Individual
Portfolio	2 x 600 Words	40	N	Individual
Presentation	5-7 minutes presentation	20	N	Individual

INFS 1015 Systems Analysis and Design (Advanced)

Credit Points 10

Coordinator Simi Kamini Bajaj (https://directory.westernsydney.edu.au/search/name/Simi Kamini Bajaj/)

Description Computing graduates must be able to analyse business requirements and propose a design solution to those requirements. This subject equips students with these skills by further developing previously acquired concepts on systems analysis and design. Students are introduced to novel approaches in system development including Structured, Object oriented and Agile. The Systems Development Life Cycle model is employed as the prime approach equipping students with the basic skills required for developing models for analysis, design and implementation approaches to solving information systems problems. Students will engage in authentic real-world projects to understand requirements, analyse, design and develop models and artefacts using several systems development methodologies.

School Computer, Data & Math Sciences

Discipline Systems Analysis and Design

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Assumed Knowledge

Students should have knowledge of the fundamentals of information systems, computer systems, computer applications and information processing.

Learning Outcomes

1. Explain systems analysis, systems design and information systems demonstrating knowledge of governance, ethics, security in regard to their impact on information systems design and operation
2. Apply appropriate analysis and system design techniques for information systems development
3. Analyse appropriate system development approaches and methodologies
4. Communicate system requirements, solutions, and designs, in a variety of formats for diverse stakeholders
5. Collaborate in cross cultural teams and projects in an ethical, responsible, and respectful manner to meet business needs
6. Design user interfaces, abstract models, architecture and artefacts for design using suitable tools
7. Create system security, evaluation, and implementation plan for an information system project

Subject Content

- Introduction to systems and information.
- Concepts of systems analysis and design.
- The Systems Development Lifecycle (SDLC).
- System Development methodologies
- Project management.
- Documenting Problem definition, statement, and documentation.
- Introduction to requirements gathering and analysis using several approaches such as structured, object oriented and agile
- Requirements models
- System Design solutions
- Human computer interaction
- Data Design
- Software and system architecture
- Implementation issues.
- Information systems governance, consumer and information security and professional ethics
- Systems Development Documentation.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Portfolio	Written submissions & workshop demonstrations delivered progressively through the semester.	30	N	Individual
Quiz	Written submissions & workshop demonstratior delivered progressively through the semester.	10	N	Individual

Applied Project	1500 words	20	N	Individual
Final Exam	2 hours	40	N	Individual

INFS 2001 Database Design and Development

Credit Points 10

Legacy Code 300104

Coordinator Maria Mikhail (https://directory.westernsydney.edu.au/search/name/Maria Mikhail/)

Description The main purpose of this subject is to provide students with an opportunity to gain a basic knowledge of database design and development including data modelling methods, techniques for database design using a set of business rules that are derived from a case study and finally implementation of the database using a commercial relational database management system. Through group work and tutorial practicals, students examine a number of important database concepts such as database administration, concurrency, backup and recovery and security whilst developing their professional communication and team work skills.

School Computer, Data & Math Sciences

Discipline Database Management

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Equivalent Subjects INFS 2003 - Database Design and Development (WSTC)

Incompatible Subjects LGYA 4371 - Database Management System for Business Information Systems

Assumed Knowledge

Basic programming skills, including variable declaration, variable assignment, selection statement and loop structure.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe components of a database system, advantages and disadvantages of a database system, roles peoples play and the historical development of a database system in the context of a Relational Database Management System (RDBMS).
2. Apply basic skills in database modeling, including ER diagrams and normalization in RDBMS.
3. Explain the basic concepts of relational algebra and apply them in queries.
4. Describe the general concepts of transaction management.
5. Identify concepts in database administration.
6. Describe concepts in database security and backup.
7. Define and manipulate data using structured query language (SQL)
8. Design and develop a database for a business application using a commercial database management system

Subject Content

- Introduction to database concepts and ANSI Spark 3 level architecture.
- concepts in data modeling.
- integration of data and data independence.
- Translating A case Study into relational concepts and integrity constraints.
- introduction to relational algebra.
- data modelling: conceptual, logical and physical database design.
- data Definition and manipulation using SQL.
- EER concepts with generalization and specialization.
- Anomalies in databases and data normalization.
- introduction to database security and administration.
- introduction to transaction management, concurrency and locking.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Case Study	maximum 2000 words in no more than 20 pages	15	N	Group
Applied Project	maximum 2000 words (excluding SQL source code) in no more than 20 pages	15	N	Group
Practical	Refer to additional information below for details	20	N	Individual
Final Exam	2 hours	50	Y	Individual

INFS 2002 Database Design and Development (Advanced)

Credit Points 10

Legacy Code 300941

Coordinator Zhuhan Jiang (https://directory.westernsydney.edu.au/search/name/Zhuhan Jiang/)

Description This subject covers the principles, methodologies and technologies for the database design and development, exploring in particular the data modelling methods and the use of the language SQL for the database applications. The subject also examines a number of important database concepts such as database administration, concurrency, backup and recovery, and security. Students in this advanced subject are furthermore required to investigate new technological and theory advances in the database industry and apply them to the solution of concrete database problems.

School Computer, Data & Math Sciences

Discipline Database Management

INFS 2004 Introduction to Health Informatics

Credit Points 10

Legacy Code 300566

Coordinator Yu Fang (https://directory.westernsydney.edu.au/search/name/Yu Fang/)

Description This introductory subject aims to give the student an insight into the key knowledge and skill set required in the emerging domain of Health Informatics. Critical topics include: The Australian healthcare system, health care improvement modelling, health information systems and management, paper-based v's electronic health records, clinical documentation and data quality, health information management, consumer information security, privacy and ethics, decision support and clinical delivery support systems, healthcare data representation and interchange standards, telehealth and Information Communication technologies (ICT). This will be complemented by practical exercises and assessment support sessions. Through these experiences students will gain an understanding of the application of ICT to the healthcare domain and the skills necessary to play a pivotal role in the design and delivery of healthcare systems and health information management.

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Equivalent Subjects INFS 2005 - Introduction to Health Informatics (WSTC)

Assumed Knowledge

Familiarity with use of common business software, eg word proceesing, spreadsheets, database.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the fundamental aspects of the Australian healthcare system and the application of ICT to healthcare
2. Describe the different standards for health data representation and interchange
3. Apply technical skills in healthcare data modelling
4. Explain the current status of health record data capture and storage (paper v's electronic) and the importance of data quality and clinical documentation to patient safety and quality
5. Describe the impact of electronic health records on health informatics and healthcare delivery
6. Summarise the different types of patient administration and health information systems available within various healthcare settings including Hospital, primary care and community/allied health
7. Describe consumer issues and professional governance matters applicable in the Health Informatics domain including data security and privacy
8. Identify opportunities for the use of Telehealth/Telemedicine
9. Describe the domain of health information management, and the foundational concepts associated with disease classification and terminologies
10. Describe the issues associated with indigenous cultural safety relating to health system designs, functionality and use.

Subject Content

1. Introduction to the Australian healthcare system
2. Review of fundamental aspects of Information and communications technologies applicable to healthcare
3. Purpose and use of health information
4. Paper based vs electronic health information
5. Consideration of the impact of Electronic health records and associated issues including privacy, security and usage
6. Types of patient administration and health information systems available within various healthcare settings including Hospital, primary care and community/allied health
7. Introduction of Healthcare data modelling methods and patient journey modelling
8. Consideration of the impact of clinical documentation and data quality on patient safety and quality
9. Review of Australian and International approaches for health data representation and interchange
10. Supporting healthcare information systems including clinical information systems, databases and decision support systems
11. Exploration of theoretical foundations in the application of Telehealth/Telemedicine
12. Consideration of Informatics professional roles and governance and consumer issues in health informatics
13. Exploration of Health informatics in research and evidence-based practice
14. Overview of health information management and its role within a healthcare setting

7. Describe consumer issues and professional governance matters applicable in the Health Informatics domain including data security and privacy
8. Identify opportunities for the use of Telehealth/Telemedicine
9. Describe the domain of health information management, and the foundational concepts associated with disease classification and terminologies
10. Describe the issues associated with indigenous cultural safety relating to health system designs, functionality and use

Subject Content

1. Introduction to the Australian healthcare system
2. Review of fundamental aspects of Information and communications technologies applicable to healthcare
3. Purpose and use of health information
4. Paper based vs electronic health information
5. Consideration of the impact of Electronic health records and associated issues including privacy, security and usage
6. Types of patient administration and health information systems available within various healthcare settings including Hospital, primary care and community/allied health
7. Introduction of Healthcare data modelling methods and patient journey modelling
8. Consideration of the impact of clinical documentation and data quality on patient safety and quality
9. Review of Australian and International approaches for health data representation and interchange
10. Supporting healthcare information systems including clinical information systems, databases and decision support systems
11. Exploration of theoretical foundations in the application of Telehealth/Telemedicine
12. Consideration of Informatics professional roles and governance and consumer issues in health informatics
13. Exploration of Health informatics in research and evidence-based practice
14. Overview of health information management and its role within a healthcare setting

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Assignment 1 – Research Report Diagrams to be included	6-8 pages 3000 words	30	N	Individual
Assignment 2 – Modelling Submission Predominantly diagrams = 1000-2000 word report. Students are required to make equal contributions to the Group Assignment. (Failure to contribute equally to the group assignment may be reflected in a lower mark than for their team members)	6-8 pages Diagrams + 2000 words	30	N	Group
Final Examination Written short answer test.	2 hrs	40	N	Individual

INFS 2006 Object Oriented Analysis

Credit Points 10

Legacy Code 300144

Coordinator Jiansheng Huang (https://directory.westernsydney.edu.au/search/name/Jiansheng Huang/)

Description The core strength of this subject is to analyse and model business objectives and critical requirements of software systems to be developed using object-oriented (OO) approaches. The system analysis is taken to greater depths within the context of Object Orientation. The Unified Modelling Language version 2.0 (notably use cases, user case diagrams, activity diagrams, class diagrams and sequence diagrams) is used as the modelling standard for creating OO models in the problem space. The subject also covers the rational unified process methodology and applications of design patterns for software development through practical case studies.

School Computer, Data & Math Sciences

Discipline Systems Analysis and Design

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) INFS 1006

Equivalent Subjects MATH 2013 Object Oriented Analysis (WSTC)

Assumed Knowledge

General understanding of what an information system is and how information systems development is undertaken and
• Introductory knowledge about system analysis and design, including
- basic problem solving experience in computerised information systems
- ability to derive systems requirements from problem definitions
- ability to produce system models using process, data, object and network modelling.
- understanding design and implementation issues include, (but may not be limited to), elementary database design, input, output and user interface design and prototyping.
• General knowledge on programming languages
- Understanding difference between procedure programming and object oriented programming
- Introductory knowledge of classes and objects and the class construction
- Introductory knowledge on object orientation, including encapsulation, inheritance.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the theoretical fundamentals underpinning Object Oriented Analysis.
2. Identify Unified Modelling Language (UML) of the Object Management Group (OMG) for analysing software requirements,

3. Outline an object oriented lifecycle and methodology and explain the process of object oriented analysis, especially within the context of iterative and incremental nature of the process,
4. Apply the iterative and adaptable process frame work of RUP in software development.
5. Construct well-documented UML-based artefacts from the early phases of the development process for the case study,
6. Construct the Model of the Problem Space based on the analysis in an industrial CASE tool,
7. Apply team work skills in a small development team, including: distributing the development workload, resolving disputes, running meetings, and taking minutes,
8. Identify and create operational (non-functional) requirements of a system including performance and security,
9. Develop a report based on verbal and written instructions about the performance of software development tasks and associated administrative duties,
10. Illustrate quality assurance, quality control and user-expectations via reports and theoretical explanation.
11. Explore possibilities of applying design patterns in software design.

Subject Content

1. The concepts of Object Orientation including the fundamentals, processes and application of the concepts to practical modelling and object-oriented analysis techniques,
2. Three modelling spaces: Problem, Solution and Background; Roles in Requirement Analysis,
3. Critical Requirement Analysis and Business Evaluation to arrive at high-level requirements and their prioritisation,
4. Package Diagrams and high-level slicing of packages as sub-systems,
5. Four phases of Rational Unified Process: Inception (RUP), Elaboration, Construction and Transition,
6. Documenting Actors and Use Cases,
7. Introduction to Use Case Diagrams, Use Case Notations, Relationships, Analysis & Testing,
8. Activity Diagrams as mechanisms to document the flow of the system/use case,
9. Class Notations and definition of a class including attributes and operations,
10. Documenting Class Diagram and Relationships between various classes such as Association and Inheritance,
11. Documenting Sequence Diagrams and the persistence design with Class and Sequence Diagrams,
12. Major ingredients and creation of State Chart Diagrams,
13. Prototypes and Operational (Non-Functional) Requirements including Performance, Scalability, Security & Volume,
14. Quality assurance, management and testing aspects of a system,
15. Emerging technologies and design,
16. Introduction to Creational, Structural and Behavioural design patterns.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Participation	Ten 2-hour Tut/Lab sessions	20	N	Individual
Applied Project	1 group project, equal score for every member in the group, take 30 - 40 hours for each member to complete his/her own work (group assessment).	30	N	Group
Final Exam	3 hours	50	N	Individual

INFS 2009 Database Design and Development (UG Cert)

Credit Points 10

Legacy Code 500048

Coordinator Jack Isherwood (https://directory.westernsydney.edu.au/search/name/Jack Isherwood/)

Description The main purpose of this subject is to provide students with an opportunity to gain a basic knowledge of database design and development including data modeling methods, techniques for database design using a set of business rules that are derived from a case study and finally implementation of the database using a commercial relational database management system. The subject also examines a number of important database concepts such as database administration, concurrency, backup and recovery and security.

School Computer, Data & Math Sciences

Discipline Database Management

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Equivalent Subjects INFS 2001 Database Design and Development INFS 2003 Database Design and Development

Restrictions Students need to be enrolled in 7174 ? Undergraduate certificate of ICT

Assumed Knowledge

Basic programming skills, including variable declaration, variable assignment, selection statement and loop structure.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe components of a database system, advantages and disadvantages of a database system, roles people play and the historical development of a database system in the context of a Relational Database Management System (RDBMS)
2. Apply basic skills in database modelling, including ER diagrams and normalisation in RDBMS
3. Explain the basic concepts of relational algebra and apply them in queries
4. Describe the general concepts of transaction management
5. Identify concepts in database administration
6. Describe concepts in database security and backup
7. Define and manipulate data using structured query language (SQL)
8. Design and develop a database for a business application using a commercial database management system

Subject Content

1.Introduction to database concepts and ANSI Spark 3 level architecture.
2.Concepts in data modelling
3.Integration of data and data independence
4.Translating a case study into relational concepts and integrity constraints
5.Introduction to relational algebra/calculus
6.Data modelling: Conceptual, logical and physical database design
7.Data definition and manipulation using SQL
8.Concepts in generalisation and specialisation
9.Anomalies in databases and data normalisation
10.Database administration
11.Introduction to database security and encryption
12.Introduction to transaction management, concurrency and locking.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Portfolio	Portfolio-A 500 words (1,2) 15% Portfolio-B 600 words (3-7) 20%	35	N	Individual
Applied Project	1200 words	40	N	Individual
Presentation	5 - 10 minutes	25%	N	Individual

INFS 2010 Work-Integrated Learning in Digital Construction

Credit Points 10

Legacy Code 301428

Coordinator Keivan Bamdad Masouleh (https://directory.westernsydney.edu.au/search/name/Keivan Bamdad Masouleh/)

Description The digitalisation of construction industries has grown considerably in the past decade and this subject responds in practical ways by engaging students in project-based learning related to Digital Construction within an industry framework. Students will select a project with an agreed industry partner, which involves simple digital applications in day-to-day construction such as software applications, information systems, digital solutions, apps and fintechs. This subject contributes towards the skills required for a work-ready graduate and allows the student to plan, undertake and report on a specific aspect of practice in the context of work.

School Eng, Design & Built Env

Discipline Information Systems, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Restrictions

Students must be enrolled in 3782 Bachelor of Construction Management Advanced (Honours) AND have applied and selected by a partner organisation before enrolling in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Manage various aspects of a project related to Digital Construction, including planning and implementation, to produce agreed deliverables that align with feedback.
2. Conduct research on the theoretical basis on the selected digital construction project demonstrating ethical, digital and information literacy.
3. Reflect on the learning and professional development achievements related to the selected digital construction project.
4. Apply communication and collaboration skills through the selected digital construction project and the workplace.
5. Integrate technical and digital tools for project management applications.

Subject Content

Students will learn how to manage a project on following simple digital applications in day-to-day construction, along with relevant theoretical knowledge through research:
?software applications
?information systems
?digital solutions/ apps/ fintechs

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Restrictions

Students must be enrolled at Western Sydney University, The College. Students enrolled in Extended Diploma programs must have passed 40 credit points of preparatory subjects in order to enrol in this subject. Students enrolled in the combined Diploma/Bachelor programs listed below must pass all College Preparatory subjects listed in the program structure before progressing to the Year 2 subjects.

Assumed Knowledge

General understanding of what an information system is and how information systems development is undertaken and Introductory knowledge about system analysis and design, including
- basic problem solving experience in computerised information systems
- ability to derive systems requirements from problem definitions
- ability to produce system models using process, data, object and network modelling.
- understanding design and implementation issues include, (but may not be limited to), elementary database design, input, output and user interface design and prototyping.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the theoretical fundamentals underpinning Object Oriented Analysis.
2. Identify Unified Modelling Language (UML) of the Object Management Group (OGM) for analysing software requirements,
3. Outline an object oriented lifecycle and explain the process of object oriented analysis, especially within the context of iterative and incremental nature of the process,
4. Apply the iterative and adaptable process frame work of RUP in software development
5. Construct well-documented UML-based artefacts from the early phases of the development process for the case study,
6. Construct the Model of the Problem Space based on the analysis in an industrial CASE tool,
7. Apply team work skills in a small development team, including: distributing the development workload, resolving disputes, running meetings, and taking minutes,
8. Identify and create operational (non functional) requirements of a system including performance and security,
9. Develop a report based on verbal and written instructions about the performance of software development tasks and associated administrative duties,
10. Illustrate quality assurance, quality control and user-expectations via reports and theoretical explanation.
11. Explore possibilities of applying design patterns in software design.

Subject Content

1. The concepts of Object Orientation including the fundamentals, processes and application of the concepts to practical modelling and object-oriented analysis techniques,
2. Three modelling spaces: Problem, Solution and Background; Roles in Requirement Analysis,
3. Critical Requirement Analysis and Business Evaluation to arrive at high-level requirements and their prioritisation,
4. Package Diagrams and high-level slicing of packages as sub-systems,
5. Four phases of Rational Unified Process (RUP): Inception, Elaboration, Construction and Transition
6. Documenting Actors and Use Cases,
7. Introduction to Use Case Diagrams, Use Case Notations, Relationships, Analysis & Testing,
8. Activity Diagrams as mechanisms to document the flow of the system/use case,
9. Class Notations and definition of a class including attributes and operations,
10. Documenting Class Diagram and Relationships between various classes such as Association and Inheritance,
11. Documenting Sequence Diagrams and the persistence design with Class and Sequence Diagrams,
12. Major Ingredients and Creation of State Chart Diagrams,
13. Prototypes and Operational (Non-Functional) Requirements including Performance, Scalability, Security & Volume,
14. Quality assurance, management and testing aspects of a system,
15. Emerging technologies and design.
16. Introduction to Creational, Structural and Behavioural design patterns.

INFS 3001 Activity Based Funding/ Casemix and Data Quality

Credit Points 10

Legacy Code 300954

Coordinator Jim Basilakis (https://directory.westernsydney.edu.au/search/name/Jim Basilakis/)

Description This subject will introduce students to Activity Based Funding and Casemix within the Australian healthcare system. It is designed to cover a variety of casemix classification systems for acute, non-admitted, sub-acute and mental health patients. Attention will be given to Diagnosis Related Groups (DRGs) with specific reference to the Australian Refined Diagnosis Related Groups (AR-DRGs) and the relationship to Activity Based Funding and purchasing models. Measuring performance with activity data and clinical costing methods will be explored. Emphasis will be placed on the impact of data quality as a critical component in achieving excellence in clinical costing, casemix and patient safety.

School Computer, Data & Math Sciences

Discipline Other Health

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) PUBH 2004

Assumed Knowledge

Medical terminology and clinical classification.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply casemix classification and grouping systems used in health
2. Explain the current landscape associated with ABF and Purchasing Models including the impact of the NEP, weighting and fee for service
3. Analyse, apply and communicate the relationship between DRGs, administrative/clinical data and episode/casemix funding/payment/revenue systems, including activity based funding
4. Explain the relationship between casemix classification and clinical costing
5. Analyse audits and quality checks for clinical coding, costing and appropriate DRG allocation
6. Evaluate quality and safety principles and theory for quality and performance management in healthcare
7. Comprehend the impact of data quality as a critical component in achieving excellence in clinical costing, casemix, service quality and improved patient safety
8. Discuss the importance of engaging clinicians in outcome analysis and improved performance

Subject Content

1. Introduction to ABF/Casemix and the Australian healthcare system
2. Purchasing Models (NEP, weighting and fee for service)
3. Measuring performance with activity data and engaging clinicians in outcome analysis
4. Costing Standards
5. Acute care classifications and their casemix application
6. Non admitted patients occasions of service: - Ambulatory care classification - Emergency Department activity classification
7. Sub acute care and Mental Health classification
8. Data Quality and its impact on patient safety and service transformation
9. Managing quality and coding consistency including coding audits
10. Managing ABF systems including data collection
11. Management information system design and development

Assessment

INFS 3002 Advanced Clinical Classification

Credit Points 10

Legacy Code 300953

Coordinator Anupama Ginige (https://directory.westernsydney.edu.au/search/name/Anupama Ginige/)

Description In this subject, the student will be introduced to disease notification and registration procedures. Mortality or cause of

death coding will also be examined.Concepts of organising health information in a logical way to interface with an electronic information system will be investigated. The design and role of various health classification systems including the World Health Organizations Family of International Classifications (WHO FIC), specifically ICD 11 and casemix classification systems (e.g. AR DRGs, AN SNAP) will also be discussed. The practical component of this subject will focus on the student further developing their classification skills in the more complex areas of clinical coding including endocrine disorders, specifically diabetes mellitus, circulatory diseases and interventions, genitourinary disorders, specifically chronic kidney disease, obstetrics, paediatrics and congenital anomalies and trauma and procedural complications. The ACS will be applied in detail when classifying from complex discharge summaries and full clinical episodes of care. The student will also be exposed to electronic clinical coding tools that can be used in the classification process.

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) PUBH 2004

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the key design principles which underpin the development of effective classification systems;
2. Accurately classify and group complex clinical records and discharge summaries using ICD-10-AM/ACHI/ACS (manually and electronically);
3. Discuss the process of disease registration and notification procedures;
4. Apply the rules associated with mortality coding;
5. Explain the relationship between terminologies and classifications and discuss their application in relation to the electronic health record;
6. Select the appropriate term to apply to the key concepts in classification and explain the process by which concepts from related or disparate classifications can be linked;
7. Analyse critically a variety of classification systems and make judgements about the clinical, management and other settings where they are appropriately applied;
8. Discuss contemporary and emerging issues in data classification at the national and international level.

Subject Content

1. Design principles for classifications
2. The process of disease registration and notification procedures
3. Managing the coding function including the use of coding audits to improve coding quality
4. Terminologies and their relationship to the development and use of clinical languages
5. The significance of mapping between classification systems
6. Casemix classification systems
7. The WHO Family of International Disease Classifications
8. The application of classification systems in health care settings and the relationship with the electronic health record
9. National and international research and implementation directions

The practical component of this subject will focus on the student further developing their classification skills in the more complex areas of coding including: endocrine disorders, specifically diabetes mellitus, circulatory diseases and interventions, obstetrics, neonatal and congenital anomalies, injuries, poisonings, adverse reactions, sequelae and post-procedural complications.
The student will also be exposed to electronic clinical coding and grouping tools than can be used in the classification process

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Practical Exam	2 hours	40	N	Individual
Report	1,000 words plus 15 minute verbal presentation	30	N	Group
Final Exam	2 hours & 15 minutes	30	Y	Individual

INFS 3003 Artificial Intelligence

Credit Points 10

Legacy Code 301174

Coordinator Vernon Asuncion (https://directory.westernsydney.edu.au/search/name/Vernon Asuncion/)

Description This subject provides basic studies in the major areas of artificial intelligence: search, knowledge representation, logic programming, machine learning and knowledge based systems, agent planning and learning. The first part of this subject will focus on the foundation of artificial intelligence: search algorithms and their implementations, game playing, logics and knowledge representation, and inference in reasoning systems. The second part will cover the principles of knowledge based systems (intelligent systems), planning, and machine learning. The subject plays an important part in preparing students for career paths as AI engineers, Machine Learning engineers and intelligent software engineers.

School Computer, Data & Math Sciences

Discipline Information Systems

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) MATH 1006 AND
COMP 2009

Equivalent Subjects LGYA 5740 Artificial Intelligence LGYA 5781 Knowledge Based Systems INFS 3013 Intelligent Systems

Assumed Knowledge

Basic understanding of data structures and algorithms and basic programming skills in Pascal C/C++ or Java etc.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Articulate the major concepts of artificial intelligence and knowledge based systems and their historical context.
2. Effectively develop essential and advanced search algorithms for classical and complex AI problem solving.
3. Explain and develop classic and non-classic game playing programs for specific game tasks.
4. Construct sound and effective first-order inference procedures and adapt them to solve complex reasoning problems in various domains.
5. Analyse and evaluate critical AI technologies including the intelligent agent planning systems and decision tree learning algorithm.
6. Integrate AI search algorithms and logic reasoning mechanisms to solve complex problems in the domain of intelligent agents.

Subject Content

Introduction to Artificial Intelligence and Knowledge Based Systems
Search I: Solving Problems by Search
Search II: Informed Search (A* Search)
Search III: Game Playing
Reasoning and Logic
First Order Logic
Development of Intelligent Systems
Planning and Acting
Learning Decision Trees
Decision Making

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

INFS 3005 Developing Web Applications with XML

Credit Points 10

Legacy Code 300111

Coordinator Heidi Bjering (https://directory.westernsydney.edu.au/search/name/Heidi Bjering/)

Description This third year subject provides a comprehensive coverage of XML, related emerging technologies and their use in web applications. Students will be given opportunities to develop web based information systems which rely upon these technologies. This subject is heavily oriented to practical based work.

School Computer, Data & Math Sciences

Discipline Information Systems, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Assumed Knowledge

300582-Technologies for Web Applications, 300580-Programming Fundamentals.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Create functional and practical client side web applications using XML
2. Create functional and practical Web applications in XML utilising server side scripting
3. Understand and explain the use of XML for document management, web sites and application development/integration
4. Identify and explain how XML and related technologies are currently being applied in the real world
5. Implement the concept of Document Type Definitions
6. Implement the concept of XML Schema
7. Implement transformation of XML documents using CSS, XSLT.
8. Explain the use of Xlink, Xpointer and Xpath to retrieve information from XML documents

Subject Content

- creating markup with XML
- document type Definition (DTD)
- XML schema and namespaces
- formatting XML for output
- XPath
- XSLT
- XLink and XPointer
- XQuery
- XML and document object model (DOM) and simple API for XML (SAX)
- Server side scripting and XML
- XML technologies and applications
- XML and international Standards

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Practical	4 exercises	20	N	Individual
Applied Project	approximately 25 hours work outside of class time	25	N	Individual
Applied Project	Approximately 25 hrs work outside of class time	25	N	Individual
Final Exam	2 hours	30	N	Individual

INFS 3006 Emerging Trends in Information Systems

Credit Points 10

Legacy Code 300584

Coordinator Ana Hol (https://directory.westernsydney.edu.au/search/name/Ana Hol/)

Description This subject provides a means for students to self-reflect on their future career and their possible involvement in the field of Information Systems and explore the changing nature of information systems in organisations via one of the following: engagements with local businesses, specifically crafted study tours or focused internships. In this subject students will study the role that emerging technologies play in selection, design and development of information systems. Students will be able to research and assess new technologies while networking and engaging with real life businesses, as well as develop and introduce effective strategies for achieving change and improvement that can be delivered by successfully implementing emerging technologies.

School Computer, Data & Math Sciences

Discipline Information Systems

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) INFS 1002 AND
COMP 2020

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Review and analyse current and emerging trends in Information System technologies as well as implementation challenges;
2. Analyse requirements and develop plans for IS applications and integration of systems;
3. Examine the roles and suitability of developing business intelligence and data mining strategies for IS applications;
4. Identify issues related to IS in organisations;
5. Examine and evaluate collaborative IS technologies and applications;
6. Develop a set of skills for applying strategies in future career settings;
7. Review, analyse and summarise current literature in selected topic areas in ICT discipline.

Subject Content

- Current and emerging technologies and implementation challenges;
- Planning for system integration, changes and integrations;
- Factors relating to business intelligence, big data, web mining, and utilisation of sensor technologies;
- Personalisation of IS applications;
- Transforming organisations through IS: business models, measuring effectiveness and strategies;
- Globalisation of the IS business environment;
- Contemporary issues in IS: legal, ethical, social, regulatory, security;
- Emerging trends in eTransformation and eCollaboration;
- job readiness.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Critical Review	2000 words	30	N	Individual
Presentation	15 minute presentation	30	N	Group

Applied Project	3-5 min video and 1A4 PowerPoint Page	40	N	Individual

INFS 3007 Emerging Trends in Information Systems (Advanced)

Credit Points 10

Legacy Code 300942

Coordinator Ana Hol (https://directory.westernsydney.edu.au/search/name/Ana Hol/)

Description This subject provides a means for students to self-reflect on their future career and their possible involvement in the field of Information Systems. In this advanced subject students will be required to undertake an individual but closely supervised research project. Students will explore the changing nature of information systems in organisations via one of the following: engagements with local businesses, specifically crafted study tours or focused internships. In this subject students will study the role that emerging technologies play in selection, design and development of information systems. Students will be able to research and assess new technologies while networking and engaging with real life businesses, as well as develop and introduce effective strategies for achieving change and improvement that can be delivered by successfully implementing emerging technologies. In addition, students in this subject will be required to present their findings in a form of an academic paper with a possibility of publishing.

School Computer, Data & Math Sciences

Discipline Information Systems

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) INFS 1002 AND COMP 2020

Incompatible Subjects INFS 3006 - Emerging Trends in Information Systems

Restrictions

Students must be enrolled in 2801 Bachelor of Information Systems Advanced/Bachelor of Laws; 3688 Bachelor of Information Systems Advanced or 3745 Bachelor of Information Systems Advanced/ Bachelor of Business.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Review and analyse current and emerging trends in Information System technologies as well as implementation challenges;
2. Analyse requirements and develop plans for IS applications and integration of systems;
3. Examine the roles and suitability of developing business intelligence and data mining strategies for IS applications;
4. Identify issues related to IS in organisations;
5. Examine and evaluate collaborative IS technologies and applications;
6. Develop a set of skills for applying strategies in future career settings;
7. Review, analyse and summarise current literature in selected topic areas in ICT discipline;
8. Identify research gaps and propose research questions;
9. Conduct the research investigation and develop a research output (ie. framework, model, method, system);

Subject Content

- Current and emerging technologies and implementation challenges;
- Planning for system integration: enterprise resource planning systems, supply chain management systems, customer relationship management systems;
- Factors relating to business intelligence, data and web mining for IS;
- Personalisation of IS applications;
- Transforming organisations through IS: business models, measuring effectiveness and strategies;
- eCollaboration technologies and applications;
- Globalisation of the IS business environment;
- Contemporary issues in IS: legal, ethical, social, regulatory, security;
- Emerging trends in eTransformation and eCollaboration;
- Research strategies, literature review, identification of research gaps and the proposal of research questions;
- Individual project supervision and time management;

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Critical Review	2000 words	30	N	Individual

INFS 3008 Formal Software Engineering

Credit Points 10

Legacy Code 300404

Coordinator Yan Zhang (https://directory.westernsydney.edu.au/search/name/Yan Zhang/)

Description This subject is concerned with the design, development and maintenance of computer software systems. The subject focuses on current formal specification and system verification technologies and methodologies. Foundations of model checking such as Linear Temporal Logic and Computation Tree Logic, as well as a particular practical model checker SPIN will be thoroughly studied in this subject. The SPIN model checker with programming language PROMELA will be used for all software development and verification practices throughout this subject. The subject plays an important part in preparing students for career paths as software engineers and IT developers.

School Computer, Data & Math Sciences

Discipline Programming

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) MATH 1006 AND
COMP 2009

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the general concepts and principles of formal methods for software development and verification
2. Model concurrent systems using the concepts and principles of transition systems and program graphs.
3. Adapt Linear Temporal Logic (LTL) and Computation Tree Logic (CTL) to specify the required properties for software systems.
4. Formulate PROMELA programs and apply SPIN model checker to specify and verify the correctness of various software systems and programs.
5. Evaluate different formal methods in relation to the performance of formal specification and verification tasks for various practical software systems.
6. Develop a functional verification prototype system for an actual software project, using advanced SPIN model checker and PROMELA programming methodologies.

Subject Content

Concept and Development of Formal Methods and System Verifications.
Modeling Concurrent Systems.
Linear Time Properties.
Linear Temporal Logic (LTL).
Computation Tree Logic (CTL).
SPIN Model Checker.
PROMELA Programming Language.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

INFS 3010 Healthcare Data Environments

Credit Points 10

Legacy Code 300955

Coordinator Anupama Ginige (https://directory.westernsydney.edu.au/search/name/Anupama Ginige/)

Description This subject extends the student's knowledge of Health Informatics by introducing concepts relating to electronic communications within the health industry. It exposes students to a variety of environments used to create, store, transfer and deliver healthcare data. Areas include minimum data sets, data linkage, messaging concepts/standards, terminologies, healthcare evaluation, electronic health records and related standards, security, privacy and trust, medico legal, epidemiology and population health together with TeleHealth/ TeleMedicine approaches, methodologies, tools and techniques.

School Computer, Data & Math Sciences

Discipline Information Systems

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) INFS 2004

Equivalent Subjects INFS 3019 - e-Health

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate the use of minimum data sets in LHD (local health district), State and National reporting and the importance of data linkage.
2. Evaluate the impact of Security, Privacy, Trust, Medico-Legal aspects and Ethics related to health data.
3. Analyse messaging concepts and standards and how it affects the interoperability between EMR systems.
4. Interpret the use of clinical terminology and classification systems in health.
5. Characterise the concepts of epidemiology and population health in relation to data capture, analysis and research
6. Evaluate the purpose of healthcare evaluation in relation to accreditation/certification standards.
7. Critically evaluate and articulate purpose of electronic medical record (EMR) systems and functional e-Health applications.

Subject Content

1. Electronic Medical Record (EMR) systems and standards
2. Health data, interoperability and messaging concepts/standards
3. Minimum health data sets and mandatory reporting
4. Clinical terminology and classification systems
5. Data linkage and special data types
6. Consideration of the impact of Security, Privacy and Trust for EMR
7. Medico Legal and Ethics related to health data
8. Exploration and application of approaches, methodologies, tools and techniques to support the design and development of e-Health applications
9. Population health
10. Health data mining and big data
11. Approaches to the evaluation of health care at a national, organisational and individual level with a view to improving the quality of health care through practice guidelines, program evaluation, clinical indicators and consumer satisfaction surveys

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Portfolio	Four entries: 800 - 1,000 words per entry	40	N	Individual
Quiz	Three quizzes: 40 minutes each	30	N	Individual

INFS 3011 Healthcare Software and Systems

Credit Points 10

Legacy Code 300956

Coordinator Yu Fang (https://directory.westernsydney.edu.au/search/name/Yu Fang/)

Description In this subject students will learn the concepts underpinning the services computing paradigm of "bridging the gap between Business Services and IT Services". Services Computing technology includes Web services and serviceoriented architecture (SOA), business consulting methodology and utilities, business process modelling, transformation and integration. Students will learn, through the development of practical examples, how to utilise these technologies within a healthcare context

School Computer, Data & Math Sciences

Discipline Information Systems

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) INFS 2004

Equivalent Subjects INFO 3009 Services Computing in Healthcare

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the purpose and the basic functional and practical elements of Web Services for healthcare applications (including an overview of XML related technologies)
2. Design high level user and technical specification of Web Services for healthcare applications.
3. Identify and articulate areas within healthcare where Web Services can be utilised, and how this might be achieved.
4. Identify and articulate the particular needs of business process modelling, transformation and integration within healthcare.
5. Describe and analyse the operations of specific Web Services in healthcare applications, including Clinical Decision Support and Health Portals
6. Apply highly developed and technically advanced written presentation skills in describing Web Services for healthcare applications.

Subject Content

XML related technologies and Web Services
Integration of applications and information within healthcare (eg Clinical Decision Support)
Service oriented architecture for health applications (eg Health Portals)

Business process modelling, transformation and integration in a healthcare context

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

INFS 3012 Information Systems Deployment and Management

Credit Points 10

Legacy Code 300572

Coordinator Ana Hol (https://directory.westernsydney.edu.au/search/name/Ana Hol/)

Description This subject provides a detailed overview of system implementation and deployment stages taking into consideration the steps that are necessary to place a newly developed system into production. In this subject students learn the skills required for accurate requirements gathering, timely and effective system development, and successful implementation that would result in effective system performance. For this to be achieved successfully this subject also addresses the importance of project management skills. The subject also highlights the issues of transition processes after the development phase, the activities required in systems support and maintenance in the system's operational stage.

School Computer, Data & Math Sciences

Discipline Systems Analysis and Design

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) COMP 1005 AND
INFS 1006 OR
COMP 1005 AND
DESN 1021

Equivalent Subjects LGYA 5900 Enterprise Information Management

Assumed Knowledge

A general understanding of various Information Systems in the eBusiness environment - familiarity with information system development processes.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain how system deployment fits within the system development life cycle.

2. Develop a plan for system deployment reflecting the organisational culture and business processes.
3. Evaluate deployment strategies in terms of selecting a suitable one the specific business problem.
4. Apply project management skills and ensure deployment and transitioning schedules are followed.
5. Describe what needs to be considered, so that system users and customers receive appropriate training.
6. Assess possible risks and develop backup plans and strategies.
7. Analyse the change management requirements for implementing and managing a successful system.
8. Critically analyse proposed Information Systems solutions and identify possible improvements.

Subject Content

- system Deployment A Critical aspect of system development life cycle

- Assessing The organisation where system is to be deployed: audience, customers, users, departments
- system implementation: direct, parallel, Phased
- planning for system Deployment: timeline, Schedule, planning
- Assessing The system: testing, Assessing user / company requirements, assuring system performs as required
- Project management skills, Deployment management and transitioning
- user training and documentation
- risks assessment and backup plans and strategies
- change management requirements for implementing and managing successful system

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Self-Assessment	3 minutes (video)	15	N	Individual
Presentation	25 minutes	25	N	Group

INFS 3017 Web Systems Development

Credit Points 10

Legacy Code 300583

Coordinator Weisheng Si (https://directory.westernsydney.edu.au/search/name/Weisheng Si/)

Description In this subject students further develop their theoretical and practical skills in designing and developing web based information systems using systems analysis, programming, database, human computer interaction and web technologies skills that they have learnt in previous subjects. Current web development technologies and/or frameworks will be utilised to build a complex web information system in a collaborative web development team. Techniques of porting web systems to mobile platforms will also be explored.

School Computer, Data & Math Sciences

Discipline Computer Science, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) COMP 2020

Equivalent Subjects LGYA 5737 Advanced Web Site Development

Assumed Knowledge

- Fundamental web development skills such as HTML, CSS, Javascript and PHP.
- Principles of relational database design and development, practical skills in SQL.
- Principles of systems analysis and design including the specification of end-user requirements and a good knowledge of the SDLC and its application to solving computer system related problems.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Design and create dynamic data driven web based information systems incorporating appropriate client and server data validation.
2. Explain and implement techniques of maintaining state in a stateless http environment.
3. Describe and apply essential page design principles to create and manage the overall layout and appearance of web systems using techniques such as templates, master pages, and style sheets.
4. Explain and implement advanced techniques of user interaction with client devices (eg, AJAX).
5. Design and implement an authentication and access control system for web based information systems.
6. Demonstrate necessary technical and theoretical skills and knowledge to work as a member of a project team to successfully develop complex web based information systems.
7. Describe appropriate methods of improving web system performance.
8. Port web based systems to mobile devices.
9. Apply CSS framework to lay out and style website

10. Apply LINQ to construct database queries
11. Apply Entity Framework Core to bind objects with database records
12. Implement both client-side and server-side data validation
13. Implement dynamic webpages with Razor syntax
14. Apply MVC framework to develop web systems
15. Implement user authentication and authorization for web systems
16. Apply collaborative skills to work in a team in developing complex web systems

Subject Content

Presentation and interface design and development
Client and server-side data validation
Database connectivity and dynamic page creation
Authentication and access control
Maintaining state
Collaborative Web Development
Advanced techniques of user interaction with client devices
Improving Web Systems Performance
Porting web based systems to mobile devices using current tools and techniques
1. Cascading Style Sheet (CSS) framework such as Bootstrap
2. Language Integrated Query (LINQ)
3. Object to relational database mapping: Entity Framework Core
4. Client-side and server-side data validation
5. Razor pages programming
6. Model-View-Controller (MVC) programming framework: ASP.NET Core
7. Authentication and authorisation
8. Collaborative web development

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Practical	50 and 60 hours to complete over a period of 12 weeks	50	N	Individual
Practical	30 to 40 hours to complete over a period of 13 weeks	25	N	Group
Final Exam	1 hour	25	N	Individual

Prescribed Texts

INFS 3018 Web Systems Development (Advanced)

Credit Points 10

Legacy Code 300902

Coordinator Weisheng Si (https://directory.westernsydney.edu.au/search/name/Weisheng Si/)

Description This subject teaches state-of-the-art web frameworks for developing complex web systems. This subject utilises the skills of basic web programming, database design, and systems analysis that students have learnt in previous subjects. Major topics in this subject include Cascading Style Sheet (CSS) framework, Razor pages, Model-View-Controller (MVC) programming, object to relational database mapping, and authentication and authorization. Moreover, this subject trains students' collaborative skills by asking students to build a complex website in a small team. As an advanced subject, deeper topics such as custom data validation and error handling will be discussed.

School Computer, Data & Math Sciences

Discipline Computer Science, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) COMP 2020

Incompatible Subjects INFS 3017 Web Systems Development

Restrictions Students must be enrolled in programs 3684 Bachelor of Information and Communication Technology (Advanced) or 3688 Bachelor of Information Systems Advanced.

Assumed Knowledge

- Fundamental web development skills such as HTML, CSS, Javascript and PHP.
- Principles of relational database design and development, practical skills in SQL.
- Principles of systems analysis and design including the specification of end-user requirements and a good knowledge of the SDLC and its application to solving computer system related problems.

Learning Outcomes

On successful completion of this subject, students should be able to:
1. Apply CSS framework to lay out and style website
2. Apply LINQ to construct database queries
3. Apply Entity Framework Core to bind objects with database records
4. Implement both client-side and server-side data validation
5. Implement dynamic webpages with Razor syntax
6. Apply MVC framework to develop web systems
7. Implement user authentication and authorization for web systems
8. Apply collaborative skills to work in a team in developing complex web systems
9. Implement custom session states needed by web systems
10. Apply error handling techniques to build robust web systems

Subject Content

1. Cascading Style Sheet (CSS) framework such as Bootstrap
2. Language Integrated Query (LINQ)
3. Object to relational database mapping: Entity Framework Core
4. Client-side and server-side data validation
5. Razor pages programming
6. Model-View-Controller (MVC) programming framework: ASP.NET Core
7. Authentication and authorisation

8. Collaborative web development
9. Session states
10. Error handling

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Practical	50 to 60 hours to complete over a period of 12 weeks	50	N	Individual
Applied Project	30 to 40 hours to complete over a period of 13 weeks	25	N	Group
Final Exam	1 hour	25	N	Individual

INFS 3020 Artificial Intelligence (Advanced)

Credit Points 10

Coordinator Vernon Asuncion (https://directory.westernsydney.edu.au/search/name/Vernon Asuncion/)

Description Artificial Intelligence (AI) comprises the areas of: search, knowledge representation, logic programming, machine learning and knowledge based systems, agent planning and learning. This subject provides the students with the solid foundations on those areas.
The first part will focus on the foundation of artificial intelligence: search algorithms and their implementations, game playing, logics and knowledge representation, and inference in reasoning systems.
The second part will cover the principles of knowledge based systems (intelligent systems), planning, and machine learning. This subject also introduces students to current state-of-the-art AI systems for difficult (primarily NP-hard) search problems.

School Computer, Data & Math Sciences

Discipline Information Systems

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) MATH1006
COMP2030

Assumed Knowledge

Basic understanding of data structures and algorithms and basic programming skills in Pascal, C/C++ or Java, etc.

Learning Outcomes

After successful completion of this Subject, students will be able to:

1. Articulate the major concepts of artificial intelligence and knowledge based systems and their historical context.
2. Implement well designed and various search algorithms for problem solving.
3. Implement a well designed proper two-person game playing programs for specific tasks.
4. Devise first order logics to formalise proper real world domains.
5. Apply proper first order inference procedures to solve reasoning problems.
6. Analyse the process of agent planning.
7. Implement the Decision Tree Learning algorithm.
8. Solve “hard” combinatorial search problems using state-of-the-art tools.

Subject Content

1. Introduction to Artificial Intelligence and Knowledge Based Systems
2. Search I: Solving Problems by Search
3. Search II: Informed Search (A* Search)
4. Search III: Game Playing
5. Reasoning and Logic
6. First Order Logic
7. Development of Intelligent Systems
8. Planning and Acting
9. Learning Decision Trees
10. Decision Making
11. Encoding “hard” combinatorial search problems into SAT and Answer Set Programming (ASP).

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Applied Project	15% each. Each assignment will require about 12 hours work.	30	N	Individual
Practical	2.5% for each lab practice demonstratior Each practical will require about 4 hours work.	5	N	Individual
Final Exam	2 hours	50	N	Individual
Applied Project	5-10 pages	15	N	Individual

INFS 3021 Formal Software Engineering (Advanced)

Credit Points 10

Description This subject introduces the theory and practice of formal software engineering. It is concerned with the design, development, and maintenance of computer software systems. The subject teaches complex software system modelling and verification, it covers most fundamental and important topics in this area, such as currency system modelling, Linear Temporal Logic (LTL) and Computation Tree Logic (CTL) model checking algorithms, as well as the practical model checker system SPIN. Students will be also trained for practical problem solving by applying the theories, methodologies and tools taught from this subject.

School Computer, Data & Math Sciences

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) MATH1006
COMP2030

Assumed Knowledge

Basic understanding of data structures and discrete mathematics
Basic programming skills in C, C++, Java, Python, etc.

Learning Outcomes

After successful completion of this Subject, students will be able to:

1. Describe the general concepts and principles of formal methods for software development and verification.
2. Model concurrent systems using the concepts and formal notations of transition systems and program graphs.
3. Apply Linear Temporal Logic (LTL) and Computation Tree Logic (CTL) to specify the required properties.
4. Perform model checking using SPIN model checker.
5. Formulate PROMELA programs and use SPIN to specify and check the correctness of given software systems and programs.
6. Apply the advanced verification tools to undertake essential formal specification and verification tasks.
7. Undertake complex software system maintenance and verification by applying LTL/CTL model checking algorithms, formal proofs and practical PROMELA programming.

Subject Content

1. Concept and Development of Formal Methods and System Verifications
2. State Transition Systems and Concurrent Systems Modelling
3. Linear Time Properties
4. Linear Temporal Logic (LTL) and Algorithm
5. Computation Tree Logic (CTL) and Algorithm
6. SPIN Model Checker
7. PROMELA Programming Language
8. Problem Solving for Software Systems Verifications

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Practical	To take place during practicals	40	N	Individual
Quiz	1.5 hours	20	N	Individual
Quiz	1.5 hours	20	N	Individual
Report	10 hours	20	N	Individual

INFS 7001 Advanced Healthcare Data Environments

Credit Points 10

Legacy Code 301028

Coordinator Anupama Ginige (https://directory.westernsydney.edu.au/search/name/Anupama Ginige/)

Description This subject extends the students knowledge of Health Informatics by introducing concepts relating to electronic communications within the health industry. It exposes students to a variety of environments used to create, store, transfer and deliver healthcare data. Areas include minimum data sets, data linkage, messaging concepts/standards, terminologies, healthcare evaluation, electronic health records and related standards, security, privacy and trust, medico legal, epidemiology and population health together with TeleHealth/TeleMedicine approaches, methodologies, tools and techniques. Advanced skills and knowledge on researching into recent developments in specific sub-topics will be acquired through assessment components in the subject.

School Computer, Data & Math Sciences

Discipline Systems Analysis and Design

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate the usage of electronic health records in Australian Health System situations, including standards, messaging, terminologies, classification systems and clinical languages, security and privacy, health data linkage and minimum data sets.
2. Develop data environments to support functional e-Health applications.
3. Explain and the concepts of epidemiology and population health in relation to data capture, analysis and research.
4. Analyse the purpose of healthcare evaluation in relation to accreditation/certification standards including evaluation methods and policies and procedures for health information management, to the extent of their typical use in Australian Health System situations.
5. Apply new knowledge gained from unit to complex cases arising in the Australian Health System workplace, exercising professional judgement in the context of the new knowledge area.
6. Apply research methods consistent with planning, implementation and evaluation of e-Health data solutions to address previously unseen workplace problems in the Australian Health System.
7. Evaluate the impact of Security, Privacy, Trust, Medico-Legal aspects and Ethics related to health data.

Subject Content

1. Electronic Medical Record (EMR) systems and standards
2. Health data, interoperability and messaging concepts/standards
3. Minimum health data sets and mandatory reporting
4. Clinical terminology and classification systems
5. Data linkage and special data types
6. Consideration of the impact of Security, Privacy and Trust for EMR
7. Medico Legal and Ethics related to health data
8. Exploration and application of approaches, methodologies, tools and techniques to support the design and development of e-Health applications
9. Population health
10. Health data mining and big data
11. Approaches to the evaluation of health care at a national, organisational and individual level with a view to improving the quality of health care through practice guidelines, program evaluation, clinical indicators and consumer satisfaction surveys
12. Critical evaluation techniques of clinical and population research

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

INFS 7002 Advanced Healthcare Software and Systems

Credit Points 10

Legacy Code 301029

Coordinator Yu Fang (https://directory.westernsydney.edu.au/search/name/Yu Fang/)

Description In this subject students will learn the concepts underpinning the services computing paradigm of "bridging the gap between Business Services and IT Services". Services Computing technology includes Web services and service-oriented architecture (SOA), business consulting methodology and utilities, business process modelling, transformation and integration. Students will learn, through the development of practical examples, how to utilise these technologies within a healthcare context. Advanced knowledge and knowledge of recent developments in specific sub-topics will also be acquired through practical components in the subject.

School Computer, Data & Math Sciences

Discipline Information Systems

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Characterise the functional and practical elements of XML-related technologies and Web Services relating to the areas of messaging, workflow and clinical documentation within a healthcare context.
2. Design high-level user and technical specification of Web Services for healthcare applications.
3. Apply highly developed and technically advanced written presentation skills in describing Web Services for healthcare applications.
4. Analyse and integrate ideas from forefront knowledge via readings and scientific literature about best practice integration approaches in existing sharable healthcare system implementations.
5. Analyse the operations of Web services in the context of newer Internet technologies (eg. mobile and Cloud-based) and adapting to the changing business requirements in healthcare.
6. Apply new knowledge gained from unit to complex cases arising in the Australian Health System workplace, exercising professional judgement in the context of the new knowledge area.

Subject Content

1. Use and application of XML-related technologies and Web Services in the healthcare environment (eg. business process modelling, transformation, messaging, document architectures)
2. Best practice approaches for achieving integration of applications and information within healthcare
3. Techniques for achieving adaptable and scalable system architectures responsive to healthcare business requirements
4. Industry and regulatory standards relevant to national and international healthcare system implementations

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

INFS 7003 Advanced Topics in ICT

Credit Points 10

Legacy Code 300694

Coordinator Ante Prodan (https://directory.westernsydney.edu.au/search/name/Ante Prodan/)

Description In the ever-changing landscape of Information and Communications Technologies (ICT), this subject places a strong emphasis on computer simulation as an essential tool for understanding and influencing complex systems in various domains, from Social Sciences, Innovation and Entrepreneurship, Management, Networking to Space Science. The subject unfolds over three topics with a primary focus on the practical and theoretical aspects of computer simulation. Students are equipped with the skills needed to develop, analyse, and apply simulations to real-world scenarios. Supplementing the core curriculum, guest lectures cover additional ICT trends in specialisation domains of individual students. Assessment methods comprise of a group simulation project portfolio, a report on state-of-the-art literature review and a report on societal perspective and application to specific domain area, where students demonstrate both simulation expertise and a grasp of broader ICT topics.

School Computer, Data & Math Sciences

Discipline Information Systems, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) COMP 7015

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Basic programming skills

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Develop a working prototype software using computer simulation in a specific domain, such as healthcare, logistics and social sciences.
2. Critique methodologies and applications of computer simulation to support decision making.
3. Assess the current "state of the art" in selected topic areas of Advanced ICT.
4. Critically analyse technical publications in selected topic areas of Advanced ICT.
5. Apply knowledge gained during the subject to contextualise new ideas in ICT and discuss them with experts in the field.

Subject Content

The major content of this subject is focused on computer simulation. It aims to give students an in-depth understanding of the methodologies and applications of computer simulation to support decision making across various sectors and solve complex problems in the areas of their

different specialisations: Social sciences (Digital Futures), Innovation and Entrepreneurship, Management, Networking, and Space Science.

The subject is rigorously designed to foreground computer simulation as its principal component, complemented by a selection of two advanced topics that align with the evolving landscape of ICT. Emphasis is placed on endowing students with the proficiency to collaborate, as well as conceptualise, deconstruct, and implement sophisticated computer simulations, addressing the multifaceted challenges inherent in contemporary business environments. Concurrently, the subject integrates ancillary themes relevant to the current ICT advancements, which are tailored to the students' areas of specialisation.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Portfolio	3000-4000 words + software prototype	50	N	Group
Presentation	15 Mins (approximatel 10 slides)	10	N	Group
Report	1000-1500 words	20	N	Individual
Report	1000-1500 words	20	N	Individual

Prescribed Texts

- No specific textbook is prescribed because of the nature of topics which will change from one year to another. The subject will use research journals, white papers and case studies as well as material available on the Web.

INFS 7004 Content Management Systems and Web Analytics

Credit Points 10

Legacy Code 300697

Coordinator Simi Kamini Bajaj (https://directory.westernsydney.edu.au/search/name/Simi Kamini Bajaj/)

Description Content management systems (CMS) is a collective name for a wide range of web applications used by organisations/institutions/enterprises and social communities in establishing a continuing web presence. They may connect to backend systems and can provide complete web application services. This subject builds on both the conceptual and practical skills/knowledge to develop and utilise CMS's; in their management; in technical, legal, ethical and security issues; and in utilising web analytics to obtain business intelligence of their operation and impact.

School Computer, Data & Math Sciences

Discipline Information Systems

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 5891 Web Site Management and Security

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Web development and HTML basics.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Give details of the architecture, functions, operation and characteristics of contemporary Content Management Systems and deploy and deploy a representative CMS;
2. Demonstrate a working knowledge of relevant legal issues: current web-related legislation, copyright, privacy, and intellectual property;
3. Identify privacy concerns and security issues in design, developing and maintaining CMSs including accessibility issues;
4. Demonstrate an understanding of the fundamentals of server protection and control of access to information;
5. Develop management policies for implementation of Web-based services for commercial applications
6. Demonstrate a working knowledge of the various web analytic tools, their application, relevance, scope and limitations and how they can be applied in the business context
7. Demonstrate a working knowledge of community and social networks and the impact of CMSs in society.

Subject Content

- architecture and functions of CMSs, comparison of CMSs and their functionality
- operation, management, policy development and workflow
- security, IP, ethics, Accessibility, Privacy and legal requirements of enterprise systems
- Internationalisation and The user interface
- Deployment and maintenance Issues
- principles, methods, tools and usage of web Analytics
- community CMSs as compared to enterprise CMSs
- developing web applications with CMSs
- future Trends and Developments of CMSs

Assessment

INFS 7005 Smart Construction

Credit Points 10

Legacy Code 301189

Coordinator Srinath Perera (https://directory.westernsydney.edu.au/search/name/Srinath Perera/)

Description This subject introduces the evolving smart technologies applicable to construction and facilitates critical thinking in how these technologies can be gainfully applied in the construction industry. It builds up understanding of the subject content from baseline principles of management information systems moving towards evolving new technologies such as digital engineering, Building Information Modelling, Blockchain, Artificial Intelligence among others. The modern construction enterprises are critically analysed to determine the application of suitable technologies for their advancement.

School Eng, Design & Built Env

Discipline Information Systems

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate course

Assumed Knowledge

It is expected that students will have a basic understanding of construction procurement processes at undergraduate level.

Learning Outcomes

1. Analyse and review the different types and classifications of information systems, data modelling, system analysis and design and their application within the construction industry.
2. Review application of knowledge-based systems and AI in construction projects and enterprises.
3. Analyse different e-business technologies and their application in the construction industry.
4. Evaluate the use of Digital Engineering technologies such as Building Information Modelling and how it can be effectively used to manage projects.
5. Analyse and review the impact of Industry 4.0 and the need for a digital strategy for smart and modern construction enterprises.

Subject Content

1. Construction Information Systems

2. Data modelling

3. System Analysis and design

4. Building Information Modelling for Project Management

5. e-Business; Internet of Things, cloud technologies, data analytics,

6. Blockchain, Smart Contracts and other technologies

7. Artificial intelligence and knowledge management systems

8. Impact of Industry 4.0

9. Smart modern construction

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Two online quizzes	30 minutes x 2	35	N	Individual
Case Study and Presentation	2,000 words And 10 minutes (including 5 minutes Q&A)	25	N	Both (Individual & Group)
Report And Presentation	4,000 words And 10 minutes (including 5 minutes Q&A)	40	N	Both (Individual & Group)

INFS 7006 Software Testing and Automation

Credit Points 10

Legacy Code 300770

Coordinator Wasim Syed (https://directory.westernsydney.edu.au/search/name/Wasim Syed/)

Description Software Testing and Automation will cover topics in two sections - Fundamentals of Software Testing and Test Automation. Section 1 will enable students to get a good understanding of different types of testing, the entire life cycle of Testing; how to design and prepare Test Cases, Test Data, execute these Test Cases and manage the defects. Students will also learn the importance of exclusive Test Environment for Testing and how to create a Traceability Matrix relating Requirements to Test Cases. Since approaches to testing software have also evolved with rigorous systematic approaches and advanced

tools to automate some of the testing tasks. Section 2 will expose students to Test Automation using an automation tool, Object mapping and repository creation, Exception handling, logging and reporting, and Creation and Execution of Automation scripts.

School Computer, Data & Math Sciences

Discipline Information Systems, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Knowledge about: Software Development Life Cycle; Programming knowledge in one of the Object Oriented programming language for e.g. Java, C++; Scripting Language such as Java Script.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Design and prepare Test Cases as part of the test preparation phase of testing life cycle
2. Prepare Test Data for the Test Cases
3. Execute Test Cases and Capture Test Evidences as part of test execution phase of testing life cycle
4. Create defect reports, assign severity levels, manage defects and track defects to closure as part of the defect life cycle
5. Create Traceability Matrix (relating Requirements to Test Cases)
6. Demonstrate an understanding of the syntax of automation tool scripting
7. Create Test automation scripts using an automation tool
8. Conduct regression testing using the test automation scripts
9. Demonstrate a broader understanding of importance and state-or-the art of software testing as practiced in the industry

Subject Content

Section I - Fundamentals of Software Testing:
1. Basics of software testing
2. Types of testing
3. Testing life cycle
4. Test Design
5. Defect management life cycle
6. Test Execution
7. Traceability Matrix
Section II - Automation Testing:
1. Overview of test automation tool, Record and Playback
2. Object map and Object repository creation, Verification Points
3. Global & Environment Variables
4. Data Pool Creation & Using External Data Sources
5. Exception Handling
6. Logging & reporting
7. Creation of Test Automation Scripts
8. Execution of Test Automation Scripts

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	3 (90 Minutes) quizzes	35	N	Individual
Applied Project	15 hours	25	N	Group
Applied Project	20 hours	25	N	Individual

INFS 7007 Systems Analysis and Database Management Systems

Credit Points 10

Legacy Code 300977

Coordinator Aruna Jamdagni (https://directory.westernsydney.edu.au/search/name/Aruna Jamdagni/)

Description The main purpose of this subject is to provide students with an opportunity to gain knowledge and experience of developing a business information system in a systematic way. This subject examines the general methodology of systems development life cycle, including different phases and various modeling techniques. The subject specialises in the development of a full systems analysis and design documentation by using system development methodologies, including data analysis and modeling methods. It extensively covers database design techniques where students will use a set of business rules obtained from requirements and use case analysis, and database implementation using a commercial database management system. At the same time, student learning, intercommunication and collaborative working skills are enhanced by student participation in tutorial presentations and group assignments.

School Computer, Data & Math Sciences

Discipline Information Systems, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. explain the key role of a system analyst and compare the generic roles and responsibilities of users, developers and managers within the context of business information systems
2. apply various phases of System Development Life Cycle (SDLC) to collaborative projects in a business environment.
3. analyse user and system requirements for producing abstract models on business problems.
4. explain essential components of a Relational Database Management System (RDBMS) and the database ANSI/SPARC 3 level architecture.
5. apply and generalise skills in database modeling, including Entity-Relationship Diagram (ERD), normalization and Global Relation Diagram (GRD).
6. develop a database using the SDLC methodology and implement this system in a commercial database management system such as Microsoft SQL.
7. explain the general concepts of database transactions and concurrency control.

Subject Content

Systems analysis design and the Systems Development Life Cycle (SDLC)
Project creation, selection and management
Requirements analysis and use case analysis
Process modeling and Data Flow Diagram (DFD)
Systems architecture, user-interface design and program design
Systems testing, documentation and transition
Database architecture, ANSI/SPARC 3 level architecture
Data modeling, Entity-Relationship modeling and Relational modeling
Anomalies in databases and data normalization.
Entity-Relationship Diagram (ERD) and Global Relation Diagram (GRD)
Introduction to database transaction management, concurrency and locking.
Database implementation and SQL

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	2 hours	35	Y	Individual
Practical	10 in-class tutorial practical exercises. 1 for each week, lasting 10 weeks. Each exercise to be completed no later than the next class.	30	Y	Group
Report	presentation: 10 minutes including question time report: maximum 2000 words in no more than 20 pages	35	Y	Group

INFS 7008 Systems and Network Security

Credit Points 10

Legacy Code 300696

Coordinator Linh Pham (https://directory.westernsydney.edu.au/search/name/Linh Pham/)

Description This subject is concerned with the protection of information in computing systems and when transferred over networks. It addresses techniques for securing networking applications and their security arrangements. Students gain an understanding of the fundamentals of the provision of security in networks and systems, as well as an appreciation of some of the problems that arise in devising practical security solutions.

School Computer, Data & Math Sciences

Discipline Information Systems

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 5882 - Distributed Systems and Network Security

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Basic knowledge of networked and computer systems. Basic understanding of cryptography.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe fundamental concepts of networked system security and security threats.
2. Explain encryption techniques.
3. Analyse and describe common security protocols.
4. Analyse and describe typical authentication protocols and authorization approaches.
5. Explain security issues in networked computer systems.
6. Describe network security in typical networks including LANs and internetworks.
7. Describe security issues and implementation of secure measures on the Internet

Subject Content

Security concepts and terminology
Security threats
Cryptography
Authentication
Authorization
Security protocols
Network security
Computer security

Assessment

INFS 7009 Web Technologies

Credit Points 10

Legacy Code 300693

Coordinator Kieran Luken (https://directory.westernsydney.edu.au/search/name/Kieran Luken/)

Description This subject covers the technologies required for the construction and maintenance of web pages and web sites. It focuses on the web page and site design, markup languages, client-side technologies such as Cascading Style Sheets and Javascript, as well as server-side technologies such as web servers, database connectivity, and server side scripting. It also includes the use of multi-media, security, access rights, and the exploration of some of the latest technological wonders populated on the Internet. This subject is heavily orientated towards practical experience based on amplifying the theoretical concepts.

School Computer, Data & Math Sciences

Discipline Information Systems, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Create individual web sites and demonstrate a working knowledge of HTML, CSS, JavaScript, and simple database interaction
2. Develop and implement prototype server-side and client-side applications, using scripting languages and style sheets
3. Demonstrate the understanding of XHTML, DHTML, XML, AJAX, Web Service, multi-media, and human interaction design principles
4. Adjust the site presentation and performance related to the use of mobile devices
5. Explore the merits and various methods to enable web security, auditing and access control for typical platforms and applications
6. Design and implement prototype web-based information systems for commercial applications
7. Identify and discuss variety of current web technologies, potential issues, and the possible future directions

Subject Content

- Internet and the markup languages: HTML, XHTML, XML and others; HTTP protocol and the client-server model of the web; page and site creation.

- Methods of client interfacing to the web, web page design, current multimedia principles of web page layout and the human interface; Cascading Style Sheets.

- Client-side scripting with JavaScript, making use of client-side scripts, including AJAX or DOM, to enable better user experience and interactivity.

- Common web site security and access control, SSL, encryption, digital certificates, and basic copyright issues.

- Web site organisation, web logging, site statistics, site administration, and content management systems.

- Web servers, and the use of web development libraries or tools.

- Latest trend and features of web technologies.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	50 minutes	20	N	Individual
Quiz	90 minutes	20	Y	Individual
Practical	8 hours (5-8 linked webpages, depending on the student's own design)	20	N	Individual
Applied Project	15 hours (10-15 linked webpages, depending on the student's own site design)	40	N	Group

Prescribed Texts

- No specific textbook is prescribed because of the diversity in Web technologies. Also, a tremendous amount of material is available on the Web itself.

JUST 0001 Academic Skills for Criminal and Community Justice (WSTC Prep)

Credit Points 10

Legacy Code 700219

Coordinator Mona Shrestha (https://directory.westernsydney.edu.au/search/name/Mona Shrestha/)

Description This subject introduces students to the essential academic skills required for success in tertiary studies. It employs an explicit pedagogy approach to teach students how to become independent, active, and reflective learners. The subject also includes essential research and writing skills specific to the social sciences and criminal justice.

School Western Sydney The College

Discipline Justice and Law Enforcement, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 0 Preparatory subject

Restrictions

Students must be enrolled at Western Sydney University, The College.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Use both independent and collaborative learning strategies to advance the knowledge of the individual and that of their peers.
2. Communicate effectively through the development of critical reading, listening, speaking and writing skills in context.
3. Locate and use information technology systems and educational technologies to support learning and assessment.
4. Apply problem solving skills and research skills, to make informed decisions.
5. Reflect on learning experiences, in order to assess their own learning styles and elearn how to learnf.
6. Demonstrate an understanding of the difference between qualitative and quantitative research, as well as primary and secondary sources, as it applies to the social sciences and criminal justice.

Subject Content

1. Introduction and academic skills
2. Introduction to academic culture
3. Information skills and blended learning
4. Essential skills for Criminal and Community Justice

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Oral presentation	5 minutes	10	N	Individual
Reference test	1 hour	10	N	Individual
Reflective Learning Journal: Part 1 – 20% Part 2 – 20%	1,200 words	40	N	Individual

Research Project: (a) Article analysis (week 3 or 4) – 10% (b) Concept map – 10% (c) Group presentation – 10% (d) Final submission (Reflective activity) – 10%	(a) 500 words article analysis (b) 500 words (c) 5 mins (d) 1200 words	40	N	Both (Individual & Group)

JUST 0002 Introduction to Australian Law Enforcement (WSTC Prep)

Credit Points 10

Legacy Code 700236

Coordinator Michelle Dadamo (https://directory.westernsydney.edu.au/search/name/Michelle Dadamo/)

Description This subject provides a broad overview of law enforcement in Australia. It aims to equip students with an understanding of power, law and authority in relation to law enforcement agencies in Australia, as well as an overview of the operations and procedures of those agencies. The subject also provides students with an understanding of what it means to become a law enforcement professional in Australia.

School Western Sydney The College

Discipline Justice and Law Enforcement, Not Elsewhere Classified.

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 0 Preparatory subject

Restrictions

Students must be enrolled at Western Sydney University, The College.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of the nature of law enforcement in Australia.
2. Outline the ethics and professionalism expected of Australian law enforcement officers.
3. Identify and explain the various operations and procedures within Australian enforcement agencies.
4. Apply writing, referencing and problem-solving skills commensurate with tertiary studies.
5. Demonstrate research and digital literacy skills.
6. Participate effectively in collaborative learning environments to present information related to Australian law enforcement.

Subject Content

Power and authority
Legislation relevant to law enforcement
Who are the Police?
Private policing
Government departments
Disaster and emergency management
State law enforcement agencies
National law enforcement agencies
The impact of law enforcement on local communities
Becoming a law enforcement professional

JUST 1003 Policing Practices

Credit Points 10

Legacy Code 102314

Coordinator Kate Linklater (https://directory.westernsydney.edu.au/search/name/Kate Linklater/)

Description This subject concentrates on the implications for police practice of the legislative framework, and police responsibilities including procedures, practices and methods. The content will focus on police decision-making and discretion, and the meaning and practice of police powers. The approach necessary for working with diverse communities is described and analysed, as are associated communication practices. Concepts examined include the appropriate use of force, the appropriate use of personal information and the characteristics of ethical policing practice. Although the key focus of learning relates to the New South Wales Police Force; examples are also drawn from Australian state and federal policing as well as international policing contexts.

JUST 2011 Law of Commercial Obligations

Credit Points 10

Legacy Code 200554

Coordinator James Paterson (https://directory.westernsydney.edu.au/search/name/James Paterson/)

Description This subject replaced by LAWS 2016 Law of Commercial Obligations from Spring 2023. This subject introduces students to the Australian laws governing transactions involving the transfer, registration and use of property. Focusing on commercial applications students will consider laws governing real, intellectual and personal property including topics such as registration requirements under the Torrens title system and the Personal Property Securities Act (PPSA) as well as enforceability and alienation of proprietary interests, leases and deeds, and subsidiary interests such as covenants and easements.

Level Undergraduate Level 2 subject

Pre-requisite(s) LAWS 1001

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Differentiate proprietary interests in the Australian legal system;
2. Critically analyse and assess the legal framework that governs property transactions in Australia;

3. Articulate the legal rights, obligations and liabilities of parties to commercial transactions involving proprietary interests;
4. Apply relevant legal concepts to practical property law problems.

Subject Content

- The concept of property in Australian Law, including Intellectual property
- Torrens title system
- The PPSA (personal property Securities act)
- Registration and transfer of proprietary interests
- Enforceability and alienation of proprietary interests
- commercial leases
- Subsidiary interests including covenants, Easements

JUST 2013 Mediation

Credit Points 10

Legacy Code 200294

Coordinator Miriam Ziegler (https://directory.westernsydney.edu.au/search/name/Miriam Ziegler/)

Description This subject will focus on the fundamental skills and theory of mediation, specifically in the context of the Australian legal system. It builds upon the more general introduction given in the subject Alternative Dispute Resolution (which is a prerequisite for this subject). This subject is experientially based, and students will be expected to participate in discussions, exercises and role-plays. The theory and practice of mediation will be critically considered, as will the social and legal contexts within which mediation is practised. The subject is presented with a multi-disciplinary, analytical and practical approach, including the perspectives of First Nations peoples. It will focus on mediation in different legal contexts such as commercial litigation, employment law and family law. Issues of culture, power, mediator neutrality and ethical dilemmas for the mediator will be considered. This subject is intended to be an introduction to the practice of mediation.

School Law

Level Undergraduate Level 2 subject

Pre-requisite(s) LAWS 2001

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss contemporary issues in mediation, including the perspectives of First Nations peoples
2. Effectively prepare for mediation by conducting pre-mediation processes
3. Conduct mediation, including an evaluation of the practical, procedural, ethical and legal issues
4. Write clearly and persuasively, referencing according to the Australian Guide to Legal Citation
5. Demonstrate sound oral communication skills

Subject Content

1. Introduction to Mediation and Conflict Resolution
2. Negotiation and Mediation Advocacy Skills
3. Mediation Process
4. Mediator Skills
5. Assessment and Preparation for Mediation
6. Legal and Ethical Issues in Mediation
7. Current Trends in Mediation
8. Mediation and First Nations peoples

JUST 2020 Criminal Law for Policing

Credit Points 10

Legacy Code 102690

Coordinator Adrian Leiva (https://directory.westernsydney.edu.au/search/name/Adrian Leiva/)

Description Knowledge of the criminal law is useful to state and federal police forces, government and private organisations, military police, private investigators, anti-corruption agencies, and in industries such as banking and insurance. All have a vested interest in preventing, detecting and investigating breaches of the criminal law through a policy framework. This subject introduces students to the common criminal offences encountered by police officers, with a focus on those investigating breaches of the criminal law rather than those prosecuting or defending. Common elements of Australian (particularly NSW legislation) and international jurisdictions and Commonwealth legislation are covered.

JUST 3002 Assessment and Treatment of Offenders

Credit Points 10

Legacy Code 102068

Coordinator Erin Kruger (https://directory.westernsydney.edu.au/search/name/Erin Kruger/)

Description This subject will provide an overview and analysis of the assessment and treatment of offenders from a range of perspectives. The assessment of violent, sexual, youth, gender, disabilities, cultural and institutional (i.e., policing and correctional) perspectives and developments will be considered in primarily Australian, but also, international contexts. There are equally variable treatment options considered including cognitive behavioural therapy, dialectical behavioural therapy, risk-need-responsivity, addictions, culturally appropriate, and alternatives such as music, animals, exercise, and art therapies. This subject will take a multi-disciplinary approach to the assessment and treatment of offenders, with particular attention to the inherent complexities and diversities associated with offender management.

JUST 3006 Governance in Policing

Credit Points 10

Legacy Code 102169

Coordinator Adrian Leiva (https://directory.westernsydney.edu.au/search/name/Adrian Leiva/)

Description In this subject students examine the nature and function of governance and accountability processes within policing and the broader private security industry. There is a focus on the commitment by governments to practices at an individual and organisational level that are based on accountability, contestability and continuous improvement. Issues such as human rights, ethics in policing, conflicts of interest, misconduct, and corruption and criminality within policing and related industries, are explored; and relevant explanatory theories are examined. Different models and levels of governance and accountability in Australia are also explored, as are the roles of professional standards subjects within police forces, external accountability agencies such as police integrity commissions, the ombudsman, and crime and misconduct agencies . These are compared with other approaches worldwide. Throughout the subject extensive use will be made of case studies and problem based learning where students will be invited to propose solutions to real world problems.

School Social Sciences

Discipline Police Studies

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) CULT 3017 AND
CULT 2006 OR
CULT 2016

Restrictions This is a specialist core subject and is restricted to students enrolled in programs 1662/1844 Bachelor of Policing, 1719 Bachelor of Policing Studies - Non NSW Police Pathway, 1734 Bachelor of Policing (Leadership Program) or 6029 Diploma in Social Science (Policing)/Bachelor of Policing.

Assumed Knowledge

Students are required to possess a sound knowledge of key issues in, and mechanisms of, policing practices, as well as legislative functions, as established as foundational knowledge in the policing core subjects over the first two years of study, in order to successfully undertake this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically evaluate research evidence and literature on ethics, governance and accountability in policing
2. Evaluate the strengths and weaknesses of governance processes and procedures in real world issues.
3. Articulate the need for governance and governance approaches to policing in Australia and internationally.

Subject Content

1. Ethics in policing
2. Ethical dilemmas in policing
3. Historical developments in governance and accountability
4. Corruption, misconduct, conflicts of interest - explanations and theories
5. Governance and Accountability - theories and practice, structures and mechanisms
6. Australian and international approaches to governance in policing and related industries
7. The impact of governance and accountability on policing practice

JUST 3008 Independent Study (Law)

Credit Points 10

Legacy Code 200704

Coordinator Elen Seymour (https://directory.westernsydney.edu.au/search/name/Elen Seymour/)

Description This subject will result in the writing of a research paper of 5,000 words on an approved topic in law. It is anticipated that the subject will be used in appropriate situations such as where the Law School has a Visiting Professor who is prepared to supervise independent study in an area related to their expertise. The intent is that the areas researched will focus principally on those areas identified by the Schools in its Research Strategy. These include (i) international and trans-national governance, (ii) elder law, (iii) law and medicine, (iv) revenue law and (v) professional services law.

Level Undergraduate Level 3 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Present a sustained evidence based research paper
2. Demonstrate a high level of comprehension of the selected topic
3. Undertake legal research to locate up to date and accurate information from a variety of both primary and secondary sources
4. Engage in analytical, critical and reflective evaluation of issues and materials
5. Develop reasoned, coherent and persuasive arguments that lead to a logical conclusion
6. Demonstrate excellent academic method
7. Demonstrate originality in research and writing

Subject Content

Research methodology and support activities
Literature review
Proposal
Submission of paper

Assessment

JUST 3011 Issues in the Criminal Justice System

Credit Points 10

Legacy Code 200701

Coordinator Rossi Kotsis (https://directory.westernsydney.edu.au/search/name/Rossi Kotsis/)

Description This subject introduces candidates to the criminal justice system through an examination of justifications for punishment and the policy and practice of various criminal justice agencies. Attention is paid to the significance of race, class and gender, and how these variables impact upon justice within the criminal justice system. Where possible, visits to criminal justice agencies and a prison are organised, and practitioners are invited to seminars to enable candidates to gain a more practical understanding of the criminal justice system.

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) LAWS 2004

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Assess the dynamic nature of criminal justice and criminal procedure and the social, political and legal factors which contribute to this dynamism.
2. Critically analyse the impact of the criminal justice system on different social groups, including Indigenous Peoples.
3. Develop clear, logical and persuasive arguments about issues of criminal law and criminal justice.
4. Propose solutions to contemporary issues in criminal justice.

Subject Content

1. Criminal legal theory
2. Impact of the criminal justice system on social groups
3. Police investigation and discretion
4. Charge negotiation
5. Jurisdictional limits and classification of criminal charges
6. Impact of political and social factors on criminal laws and procedures
7. The jury as a tribunal of fact
8. Victims of crime
9. Sentencing
10. Technology in the criminal justice system

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

JUST 3012 Policing Leaders Internship

Credit Points 10

Legacy Code 101969

Coordinator Kate Linklater (https://directory.westernsydney.edu.au/search/name/Kate Linklater/)

Description The Policing Leaders Internship offers work experience to students enrolled in the Bachelor of Policing (Leadership) and Bachelor of Policing degrees within the School of Social Sciences. Internships can take place in a range of policing organisations such as the NSW Police Force, Police Association of NSW, and other member organisations of the Police Federation of Australia. Internship placements will require students to utilise a range of social science skills obtained throughout the Bachelor of Policing (Leadership) and Bachelor of Policing degree programs. This practical work schedule is supported by a reading program that examines different approaches to the study of policing organisations (their structures, functions and policies) and links these issues to the internship experience. The internship provides work at a host organisation for fourteen full days, totalling 105 hours. Typically, this internship component will be realised as one day per week for fourteen weeks, however an alternative spread of work may be agreed between the organisation, the student, and the subject coordinator. The subject is only offered in the Spring session of Level 3, and is worth 10 subjects of credit, which will be recorded as an elective on your degree transcript. There is only one lecture for this subject.

School Social Sciences

Discipline Police Studies

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Co-requisite(s) JUST 3006 AND
CULT 3001

Restrictions

(1). Students must be enrolled in 1734 Bachelor of Policing (Leadership Program), 1844/1662 Bachelor of Policing or 6029 Diploma in Social Science (Policing)/Bachelor of Policing and have passed 80 credits at Level 1 and 60 credits at Level 2. (2). Students will be required to have achieved a GPA of 5 for all Level 1 and Level 2 core subjects of their degree. Internship placements are limited to 20 and will be prioritised for Bachelor of Policing (Leadership Program) students, for whom this subject is core. Any remaining internships will then be offered to Bachelor of Policing students who meet the two prerequisites. In the case of more than 20 students in 1734 meeting these requirements, students will be allocated based on their GPA ranking.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Appraise the working environments of contemporary policing organisations
2. Follow direction from police practitioners to undertake applied tasks
3. Critically reflect on the application of their individual ethics and professional practice
4. Evaluate the important policy and practice contexts of contemporary policing organisations
5. Apply their academic knowledge to the practice contexts of contemporary policing organisations
6. Synthesise the research, policy and practice evidence related to a critical issue considered during their placement

Subject Content

1. Understanding Management theory within policing practice
2. Understanding Organisational theory within policing practice
3. To gain practical experience within a relevant policing organisation

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

JUST 3014 Creating Criminal Justice Solutions

Credit Points 10

Legacy Code 102713

Coordinator Toby Miles-Johnson (https://directory.westernsydney.edu.au/search/name/Toby Miles-Johnson/)

Description In this subject, students will consider some of the contemporary issues faced by the criminal justice system and the possible solutions to these real world problems. Using knowledge and skills drawn from their experience and study in their degree, students will be required to explore a critical policing or criminal justice issue and develop potential solutions. The subject aims to develop skills in problem analysis and managing the practical constraints faced by social scientists working in applied criminal justice and policing settings. Students will identify a critical issue (such as policing domestic violence, police engagement with CALD youth, criminal justice responses to cybercrimes), which they will explore individually and in groups throughout the semester. Students will become familiar with and learn to apply the policy/practice development cycle to identify critical issues, survey existing research and practices, develop alternative strategies for resolving the identified problem, and evaluating the expected outcomes.

School Social Sciences

Discipline Justice Administration

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Equivalent Subjects JUST 3004 - Contemporary Issues in Criminal Justice and Policing

Restrictions

Successful completion of 60 credit points at Level 1 and 60 credit points at Level 2. Students must be enrolled in programs 1662/1844 Bachelor of Policing, 1719 Bachelor of Policing Studies - Non NSW Police Pathway, 1709 Bachelor of Criminal and Community Justice,

1713 Bachelor of Criminal and Community Justice/Bachelor of Social Work, 1734 Bachelor of Policing (Leadership Program), 2767 Bachelor of Criminal and Community Justice/Bachelor of Laws, 6025 Diploma in Criminal and Community Justice/Bachelor of Criminal and Community Justice and 6029 Diploma in Social Science (Policing)/Bachelor of Policing. Enrolment in the online option of the subject will be limited to students returning to complete their Bachelor of Policing after completing the CSU Associate Degree in Policing Practices. Student enrolment in the subject will be monitored and any students enrolled in the online option who are not in this category will be requested to change their enrolment to an on-campus location.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply problem-solving models to an issue within the field of criminal justice/policing to inform knowledge and understanding of the issue and to facilitate the development of responses to the issue.
2. Critically evaluate a range of academic, policy and other materials relevant to an issue within the criminal justice/policing field.
3. Construct coherent reports summarising the issue, identifying factors relevant to its aetiology and providing adequate suggestions for intervention and evaluation.
4. Demonstrate an understanding of the challenges inherent in developing responses to real world issues.

Subject Content

This is a capstone subject for the Bachelor of Criminal and Community Justice (including double degrees), Bachelor of Policing, Bachelor of Policing Studies and Bachelor of Policing (Leadership) pathways. Students undertake an in-depth analysis of an issue relevant to criminal justice/policing, utilising their knowledge, skills and experience of justice processes, practices and policy. They will use academic, policy and other relevant literatures to develop suggested responses to an issue and propose a method of evaluation for their proposed intervention. Students will be introduced to problem solving models and their application to justice processes and practices, and will apply problem solving techniques to address the issue. They will develop a report based on a series of assessments which include a scoping exercise, a policy briefing paper and an evaluation study proposal. The subject content will vary from year to year as the subject aims to engage students with the critical issues facing the criminal justice system and policing at the time of completing their degrees. In past years, students have considered innovative approaches to policing domestic violence and responding to domestic violence victims? f needs at the time of reporting, strategies for reducing the impact of cybercrime, and programs to enhance the relationships between police and CALD youth. Core research, policy and project management content will be introduced to students by way of online learning. This will include
Public policy and policy making
Research-led practice and evidence-based practice
Problem solving models
Developing policy from research
The nexus between policy and practice
Scoping a research problem
Identifying policy innovations
Evaluating policy and practice innovation

JUST 6001 Comparative International Policing

Credit Points 10

Coordinator Toby Miles-Johnson (https://directory.westernsydney.edu.au/search/name/Toby Miles-Johnson/)

Description This subject is designed to help you understand why international policing should be considered as an ongoing comparative global endeavour. This subject seeks to explore the possibilities and limitations of comparative international policing from a global perspective by examining policing case studies in both national contexts (for example comparing Australian police organisation's policing practices) and in international contexts (comparing global police organisation's policing practices). Within the framework of comparative criminology, we will examine the challenges of international comparative analysis and policing practice, compare national and international police organisations, and examine policing practices in relation to deviance and social response.

School Social Sciences

Discipline Police Studies

Student Contribution Band HECS Band 4 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 6 subject

Restrictions

Postgraduate students only

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Examine issues related to comparative international policing, and differences in police strategies and programmes
2. Critically analyse global policing strategies and policies using evidence-based approach
3. Evaluate the issues that exist in comparative policing practices nationally and internationally in relation to policy versus practice
4. Critique the varied aims, rationale and theories which inform policy and strategic responses in relation to comparative policing practices

Subject Content

- Policing – national and international contexts
- Comparative analysis
- Global police cultures
- Various models of policing
- Policing policy versus police practice

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

JUST 7006 Legal Internship

Credit Points 10

Legacy Code 201064

Coordinator Rebecca Dominguez (https://directory.westernsydney.edu.au/search/name/Rebecca Dominguez/)

Description This subject provides an internship opportunity for Juris Doctor students to be placed in host organisations (including NGOs and public interest organisations, community legal centres, government departments, corporations, barristers' chambers or private law firms). Internships provide students with invaluable access to opportunities to critically analyse the law in context, to apply their formal learning about legal principles, to demonstrate professional skills and to gain exposure to different career pathways. Students who successfully complete the orientation requirements will spend twelve days throughout the semester at a host organisation. This will usually be done on a one- day (7 hours) per week basis. An intern's duties will generally consist of a

combination of substantive tasks relating to law, policy and practice. Depending on the host organisation, these may include a combination of research, preparing background materials, briefing papers or research reports, liaising with other organisations, assisting in the provision of legal assistance and advice, observing interviews with clients, conferences with Counsel or in court proceedings, undertaking project and advocacy work, preparing/ giving presentations and assisting with administrative and editing work. The School will seek expressions of interest for the number of placements available with the School's partner host organisations each semester. Students are also able to arrange their own internships at organisations that are not currently host organisations, subject to the approval of the Director / Principal Solicitor and the agreement of the host organisation to complete the attendance and assessment requirements of the subject.

Pre-requisite(s) LAWS 7072 AND
LAWS 7048 AND
LAWS 7047 AND
LAWS 7066

Incompatible Subjects LAWS 3077 Legal Internship

Restrictions

Students must be enrolled in the 2826 Juris Doctor program. This subject is not available for self-select enrolment. Due to its popularity intake in the subject will be restricted to expressions of interest. GPA and progression in program will be considered. Students must have successfully completed 80 credit points of Juris Doctor core subjects, including the four prerequisite subjects before enrolling in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically evaluate law, the Australian legal system and process in practical contexts, including the perspectives of Aboriginal and Torres Strait Islander Peoples.
2. Effectively apply the principles and processes of legal reasoning in a practical context.
3. Demonstrate the ability to perform tasks in a professional legal context.
4. Assess ethical issues arising in legal practice and the professional responsibilities of lawyers in promoting justice and service to the community.
5. Critically reflect on professional development experiences and needs for ongoing improvement.

Subject Content

1. 12 days of practicum learning exposing interns to the internal workings of legal practice
2. Ethical client- centred practice
3. Reflective legal practice
4. Professional communication and interpersonal skills for the client-centred lawyer
5. Critical analysis of the operation of the law, policy and the legal system, including the operation of the law in relation to Aboriginal and Torres Strait Islander Peoples

Special Requirements

Legislative pre-requisites

Students will need a Criminal Record Check and Working With Children's Check if working with minors during their placement, or as required by the relevant host organisation.

Assessment

LANG 0001 Academic Communication 1 (WSTC Prep)

Credit Points 10

Legacy Code 700198

Coordinator Richard Robinson (https://directory.westernsydney.edu.au/search/name/Richard Robinson/)

Description This subject is designed to introduce students to academic culture as a culture of critical debate and equip students with the academic literacy skills necessary to perform successfully in this culture. In particular, the subject aims to help students access the conventions of academic English by focussing on attitudes to knowledge, and the ways in which ideas are structured and presented in academic texts and speech. The subject assists students to comprehend academic texts, identify key ideas and concepts, and identify and use the rhetorical moves used in academic texts. It also aims to help students compare and contrast ideas across texts, improve grammatical skills that relate to academic writing, summarise and synthesise information, and understand why, when and how to reference information.

LANG 0012 Academic and Professional Communication (WSTC Prep)

Credit Points 10

Legacy Code 700276

Coordinator Deborah Cronholm (https://directory.westernsydney.edu.au/search/name/Deborah Cronholm/)

Description The ability to communicate clearly and persuasively to diverse audiences is a key professional prerequisite. This subject provides students with a preliminary understanding of a range of communication theories and practices necessary for academic work and effective professional communication including presenting in a professional setting. Both professional and societal cultural norms are explored as a contextual basis of the subject. The subject assists in the acquisition of professional skills through authentic and meaningful learning experiences and assessment. The subject assists students to comprehend academic and professional texts, identify key ideas and evidence, and identify and apply certain rhetorical moves which are common in academic communication. It also aims to help students to improve grammatical skills that relate to academic writing, summarise and synthesise information, and understand why, when and how to cite information. In addition, the subject encourages students to develop strategies to maximize their learning and to reflect on their own learning styles.

School Western Sydney The College

Discipline English Language

Student Contribution Band HECS Band 1 10cp

Restrictions

Students must be enrolled in 7138 Diploma in Information and Communications Technology - ICT or 7139 Diploma in Information and Communications Technology or 7140 Diploma in Information and Communications Technology - Information Systems or 7141 Diploma in Information and Communications Technology (Health Information Management) Extended.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Outline a range of factors which affect oral and written communication within professional contexts.
2. Demonstrate an understanding of communication across cultures.
3. Demonstrate an understanding of multiple perspectives on issues relating to digital communication
4. Develop skills to write effectively using a variety of formats, including research and referencing.
5. Collaborate in large and small group environments.
6. Identify evidence to reinforce a position.
7. Understand academic and professional communication skills.
8. Demonstrate analytical thinking skills to develop innovative and well-founded perspectives related to course content.
9. Demonstrate an understanding of multiple perspectives on issues relating to digital communication
10. Outline a range of factors which affect professional oral and written communication within an ICT context.
11. Identify evidence to support a position by selecting valid information strategically.
12. Demonstrate an understanding of academic and professional communication skills.
13. Demonstrate analytical thinking skills to develop innovative and well-founded perspectives related to ICT innovations

Subject Content

1. What Professional Communication is and how it positively impacts the work environment
2. Critical thinking for academic and professional work
3. Introduction to a variety of professional writing skills
4. Group work in a professional setting
5. Public speaking and professional presentation of ideas
6. Cultural Communication in a professional context
7. Academic writing and referencing

LANG 0027 English for International Students 1 (WSTC)

Credit Points 0

Legacy Code 900120

Coordinator Jackson Howard (https://directory.westernsydney.edu.au/search/name/Jackson Howard/)

Description This subject is designed to meet the academic literacy needs of International students completing the Extended Diplomas in Arts, Building Design Management, Business, Communication, Construction Management, Criminal and Community Justice, Design, Engineering, Health Science, ICT, Science, Social Science and Policing. It is designed specifically for International students who have met the IELTS specifications of these courses. The subject will support these students in understanding how to perform successfully within it in terms of academic literacy skills. Specifically, this subject will focus on improving students' listening and reading comprehension skills, writing skills, speaking, vocabulary and grammar. It consists of 2 hours per week of face-to-face instruction in order to provide students with targeted, structured support.

Coordinator Richard Robinson (https://directory.westernsydney.edu.au/search/name/Richard Robinson/)

Description This subject is designed to introduce International students to academic culture as a culture of critical debate and equip them with the academic literacy skills necessary to perform successfully in this culture. In particular, the subject aims to help International students access the conventions of academic English by focussing on attitudes to knowledge, and the ways in which ideas are structured and presented in academic texts and speech. The subject assists students to comprehend academic texts, identify key ideas and concepts, and identify and use the rhetorical moves used in academic texts. It also aims to help students compare and contrast ideas across texts, improve grammatical skills that relate to academic writing, summarise and synthesise information, and understand why, when and how to reference information. In addition, there is a focus on listening and pronunciation skills for International students.

LANG 0040 Introduction to Academic Communication 2 (WSTC)

Credit Points 10

Legacy Code 900108

Coordinator Jackson Howard (https://directory.westernsydney.edu.au/search/name/Jackson Howard/)

Description This subject is designed to expand upon and extend the academic literacy skills acquired in Introduction to Academic Communication 1. The subject will assist students to critically read and analyse a variety of texts, and to develop their research and writing skills to produce complex texts. There is a particular focus in this subject on critique and analysis in the process of understanding and producing academic texts.

Equivalent Subjects LANG 0007 - Academic English 2 (UWSC) LANG 0033 - English for Tertiary Study 2 (UWSC) LANG 0002 - Academic Communication 2 (UWSCFS) LANG 0032 - English for Tertiary Study 2 (UWSCFS) LANG 0039 - Introduction to Academic English 2 (UWSCFS) LANG 0003 - Academic English (WSTC Prep) LANG 0005 Academic English (WSTC) COMM 1027 - Principles of Professional Communication (WSTC)

Restrictions

Students must be enrolled at The College in a Foundation Studies program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically read and analyse academic texts.
2. Summarise the main points of arguments.
3. Source and cite evidence using the conventions of academic research.
4. Apply the rhetorical moves of an analytical-persuasive essay.

5. Produce well structured, logical, coherent and cohesive responses to writing tasks.
6. Produce an academic evidence-based argument.

Subject Content

Critically reading and interpreting academic texts
Summarising arguments
Conducting academic research
Synthesising information from multiple sources
Using evidence to support an argument
Referencing
Cohesive devices in academic writing
Argument, counter-argument and concessions in analytical-persuasive essay writing
Planning, drafting and re-drafting essays
Critically reading and interpreting academic texts
Summarising arguments
Conducting academic research

LANG 0012 Academic and Professional Communication(WSTC Prep)

Restrictions

Students must be enrolled at Western Sydney University, The College in 7162 Diploma in Engineering Extended.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Interpret, analyse and describe data from graphs, charts and tables and identify and describe trends and differences.
2. Demonstrate an understanding of engineering technical terms, abbreviations and acronyms.
3. Identify and summarise main ideas and key information from written engineering texts.
4. Plan and develop written and oral responses to authentic engineering tasks.
5. Recognise language used to signpost main ideas and key information in lectures and record ideas and information using diagrams.
6. Deliver a presentation and participate in a seminar using prepared notes.

Subject Content

1. Reading authentic and/or related Engineering texts, and understanding main ideas and key information
2. Identifying and understanding technical terms and acronyms
3. Time management and prioritising in preparation for assessments
4. Listening to authentic and/or related engineering lectures
5. The importance of referencing and citation in Engineering texts
6. Actively engaging in oral discussions and presentations on the relative importance of key ideas identified in Engineering and/or related texts and lectures
7. Interpreting data in graphs and charts within the Engineering context

8. Contributing to and participating in a seminar

1. Reading authentic and/or related Engineering texts, and understanding main ideas and key information
2. Identifying and understanding technical terms and acronyms
3. Time management and prioritising in preparation for assessments

LANG 0045 The Structure of English (WSTC)

Credit Points 10

Legacy Code 900056

Coordinator Maria Charalambous (https://directory.westernsydney.edu.au/search/name/Maria Charalambous/)

Description This subject is designed to improve the English proficiency across the four macro skills (reading, writing, speaking and listening) of University Foundation Studies students who wish to progress to university studies. Students need preparation for both understanding the content of Foundation Studies and being able to participate fully in all subjects. Such preparation includes making clear the way English is used according to purpose, audience and subject. Moreover, students need to develop their confidence and competence in using the language in academic contexts. By raising the language awareness of students, they will be able to transfer the learning skills across the subject areas. The course also seeks to address the particular speaking needs of overseas students.

School Western Sydney The College

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 0 Preparatory subject

Restrictions

Only students enrolled at The College in Foundation Studies programs can enrol in this unit

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Communicate information in appropriate written mode according to purpose, audience and unit.
2. Understand and make meaning from a variety of written academic text types.
3. Communicate information in appropriate spoken mode according to purpose, audience and unit.
4. Research, interpret, organise and analyse information.
5. Understand and make meaning from a variety of spoken academic text types.
6. Work effectively in large and small group learning environments

Subject Content

1. Listening / note-taking skills
2. Oral presentation skills
3. Speaking skills
4. Academic reading skills
5. Report writing skills
6. Researching for information
7. Academic writing skills
8. Paraphrasing/summarising skills

LANG 0052 Academic Communication for Policing and Justice (WSTC Prep)

Credit Points 10

Legacy Code 700335

Coordinator Maria Charalambous (https://directory.westernsydney.edu.au/search/name/Maria Charalambous/)

Description Communication underpins all aspects of Policing and Justice interaction. This subject is designed to improve the English language skills of Policing and Community and Criminal Justice students through dynamic and engaging teaching methodology. The subject further develops foundational skills students possess and introduces the concept and application of critical analysis. The use

of authentic genres and writing techniques common in academic and professional writing in the fields of Policing and Justice lead to the improvement of critical literacy skills related to spoken and written genres.

School Western Sydney The College

Student Contribution Band HECS Band 1 10cp

Equivalent Subjects LANG 0003 - Academic English (WSTC Prep) LANG 0005 - Academic English (WSTC) LANG 0039 - Introduction to Academic Communication 2 (WSTC Prep) LANG 0040 - Introduction to Academic Communication 2 (WSTC)

Restrictions

Students must be enrolled in 7032 - Diploma in Criminal and Community Justice (exit only), 7154 - Diploma in Criminal and Community Justice Extended, 7167 - Diploma in Social Science (Policing) (exit only), 7168 - Diploma in Social Science (Policing) Extended, 6025 - Diploma in Criminal and Community Justice/Bachelor of Criminal and Community Justice, 6044 - Diploma in Social Science (Policing)/ Bachelor of Policing at Western Sydney University, The College.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an ability to critically read, summarise, analyse, synthesise and make meaning from academic and industry-related texts in Policing and Justice
2. Use advanced aspects of Academic Writing that are transferable to relevant tertiary level degrees, including different genres of Academic English
3. Demonstrate enhanced academic skills through critically assessing an identified theoretical framework in Policing and Community and Criminal Justice
4. Cite arguments and evidence using the conventions of academic research
5. Produce a well-structured, logical, coherent and cohesive response to writing tasks using appropriate academic language structures
6. Demonstrate an ability to communicate orally in formal context, including appropriate selection of material, clear organisation and effective presentation.

Subject Content

1. Academic and professional communication in the fields of Policing and Criminal and Community Justice
2. Academic writing skills: developing and applying features of academic and professional language
3. Academic reading skills: identifying, highlighting and applying key ideas, arguments and evidence
4. Academic Integrity: the importance and application of referencing, citation and paraphrasing
5. Academic writing skills: summarising, paraphrasing, synthesising
6. Academic writing skills: the report writing process including the achievement of coherence and cohesion
7. Critical thinking and reflection for academic and professional work within the Policing and Criminal and Community Justice fields
8. Oral Presentation skills: language and presentation techniques for presentation

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

LANG 1006 Chinese 102

Credit Points 10

Legacy Code 100057

Coordinator Lijiang Zhao (https://directory.westernsydney.edu.au/search/name/Lijiang Zhao/)

Description This is a post-beginner level subject in (Mandarin) Chinese intended for those with knowledge of Chinese 101 or equivalent. This subject builds on the knowledge and skills developed in (Mandarin) Chinese 101 and aims to further develop listening, speaking, reading and writing skills in elementary Modern Standard Chinese. The subject includes a socio-cultural component which will examine some aspects of China and Chinese culture as well as the Chinese community in

Australia. Students with a background of study in the language need to obtain advice on their appropriate level of language study. During the first two weeks of class, the lecturer will monitor the performance of students and advise students who need to transfer to a higher class. Students should consult the Languages Academic Course Advisor or Subject Coordinator if they are unsure of their entry level.

Level Undergraduate Level 1 subject

Assumed Knowledge

100056 Chinese 101 or equivalent knowledge.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. demonstrate beginning level language skills in listening, speaking, reading and writing in Modern Standard Chinese;
2. show mastery of the Pinyin Romanisation system;
3. deomstrate a core vocabulary, fundamental grammatical structures and text types to meet basic communicative needs.
4. interact in Modern Standard Chinese at post-beginner level in a range of communicative situations;
5. show greater knowledge of Chinese language, culture and way of thinking, and the Chinese-speaking community in Australia.

Subject Content

- Activities and tasks aimed at further developing listening comprehension, speaking, reading and writing skills at post beginner level;
- The development of lexical and grammatical knowledge at post-beginner level;
- An introduction to text types in everyday situations;
- further development of knowledge of Chinese language, culture and way of thinking, and The Chinese-speaking community in Australia.
-n The development of lexical and grammatical knowledge at post-beginner level;

Coordinator Anna Nettheim (https://directory.westernsydney.edu.au/search/name/Anna Nettheim/)

Description This is the second and last introductory subject in the Indonesian Language Specialisation. The subject further develops the basic language and communication skills students acquired in Indonesian 101 through the use of activities designed to practice and reinforce Indonesian language and grammar skills. This subject will also introduce a greater focus on the socio-cultural and linguistic diversity found in Indonesia through online powerpoint lectures and accompanying notes. The subject focuses on four language skills (listening, speaking, reading and writing). Students with a background of study in the language need to obtain advice on their appropriate level of language study. During the first two weeks of class, the lecturer will monitor the performance of students and advise students who need to transfer to a higher class. Students should consult the Languages Academic Course Advisor or Subject Coordinator if they are unsure of their entry level.

Level Undergraduate Level 1 subject

Equivalent Subjects LGYB 2089 - Interpreting 1 LGYB 2090 - Interpreting 2 LGYB 2851 - Introduction to Interpreting

Assumed Knowledge

Proficiency in English and other language (LOTE) at native or near-native level.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. apply the insights of linguistic theories that relate to the practice of interpreting;
2. resolve issues of accuracy and equivalence, including register equivalence and the difficulties and controversies surrounding it;
3. recognise cross-cultural differences that influence and are reflected in the use of language;
4. explain the different roles of the interpreter according to type of interpreting;
5. demonstrate proficiency in dialogue interpreting, chuchotage, consecutive interpreting and sight translation, at an introductory level in different settings;
6. demonstrate effective note-taking skills for dialogue and consecutive interpreting; and

7. identify significant aspects of the interpreting profession in Australia, NAATI qualifications, and ethics of the profession.

Subject Content

1.General overview of the theories of pragmatics and discourse analysis as they relate to interpreting,
2. The meaning of accuracy of interpretation and equivalence at the different levels of the language hierarchy and according to different types of interpreting,
3. The meaning of register, the importance of maintaining the source language register in interpretation and the implications of not maintaining it,
4. The different roles of the interpreter according to the type of interpreting,
5. Introduction to the techniques of dialogue interpreting, chuchotage, consecutive interpreting and sight translation,
6. Practice of the different interpreting techniques in education, housing and welfare settings,
7. Introduction to and practice of note taking skills for liaison and consecutive interpreting,
8. Familiarisation with available dictionaries, thesauruses, and other useful resources and guidance on how to use them effectively in the preparation of interpreting assignments.
9. The Interpreting profession in Australia and its codes of ethics.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

LANG 1014 Introduction to Linguistics

Credit Points 10

Legacy Code 101945

Coordinator Xiangdong Liu (https://directory.westernsydney.edu.au/search/name/Xiangdong Liu/)

Description Language is an integral component of human experience. This subject is designed to raise students' awareness of the nature, structures and functions of language and language use. Students will gain the conceptual tools to do basic analysis of language at the levels of phonology, morphology, syntax, semantics and pragmatics. By providing a basic understanding and appreciation of language from different perspectives, the subject establishes points of contact between language, the humanities, and beyond.

School Humanities & Comm Arts

Discipline Linguistics

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Equivalent Subjects LANG 2032 - Linguistics

Learning Outcomes

On successful completion of this subject, students should be able to:

1. explain what language is and how it is used
2. analyse grammatical aspects of language;
3. demonstrate basic knowledge about language acquisition and processing;
4. describe and explain how languages differ and change over time;
5. apply fundamental concepts and appropriate theoretical knowledge to analyse data and the selected problem set.

Subject Content

- Introduction to language and linguistics: Rationale for studying linguistics; sub-disciplines of linguistics, other linguistics-related disciplines and their objectives;
- Grammatical aspects of language: phonetics, phonology, morphology, syntax, semantics and pragmatics: the meanings of language;
- language and mind: language acquisition and processing.
- language and society: language in use and language change.
- language change over time

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	7 quizzes at 10-30 minutes each. The two lowest marks will be excluded from the final mark calculation.	40	N	Individual
Short Answer	Approximately 1,000 words	40	N	Individual
Applied Project	A project plan of up to 500 words and a 2.5~3-minute presentation	20	N	Individual

LANG 1015 Introduction to Literary Studies

Credit Points 10

Legacy Code 101907

Coordinator Helen Koukoutsis (https://directory.westernsydney.edu.au/search/name/Helen Koukoutsis/)

Description This subject involves the close reading of literary texts to explore concepts about meaning-making including the use of language, narrative form, and issues of genre. The subject asks questions about the role and function of literature. For example: is literature's purpose to entertain readers, to provide them with emotional release, to represent the world, or to allow people to make meaning from their experience? The primary texts span three genres - fiction, poetry and drama. Students will learn about the different ways in which these literary forms are constructed and the contrasting ways in which they represent reality.

Level Undergraduate Level 1 subject

Equivalent Subjects LGYB 2096 - Translation 1 LGYB 2097 - Translation 2 LGYB 2850 - Introduction to Translation

Assumed Knowledge

Proficiency in English and other language (LOTE) at native or near-native level.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. demonstrate knowledge of the different theories of translation throughout history, including those advanced by theorists such as Catford, Nida, Newmark, Steiner and others;
2. show familiarity with the different translation approaches such as literal versus free, semantic versus communicative;
3. explain the intricacies of language and the difficulties of achieving cross linguistic equivalence, at the morphemic, lexical, syntactic and textual levels;
4. describe the cross-cultural differences as they influence language;
5. compare different notions of accuracy and equivalence from the syntactic, to the semantic, to the pragmatic dimensions;
6. demonstrate linguistic proficiency by translating a variety of text genres;
7. show familiarity with existing resources for translation including dictionaries, thesauruses, the Internet; and
8. demonstrate the Translation profession in Australia, NAATI qualifications, and ethics of the profession.

Subject Content

1. General overview of translation theories through the ages.
2. Different approaches to translation according to genre and purpose of translation.
3. The hierarchy of language from the lexical to the textual and discourse as well as some typological differences found across languages.
4. Describe the cross cultural differences that influence language use and language choice.
5. The meaning of accuracy and the difficulties of finding cross linguistic and cross cultural equivalence at the different levels of the language hierarchy.
6. The Translation profession in Australia and its codes of ethics.
7. Semantic versus pragmatic equivalence.
8. The application of theory to problem solving and decision making in the process of translation.

Level Undergraduate Level 1 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. identify important characteristics of the Japanese language;
2. demonstrate basic skills in listening and speaking in Japanese;
3. apply these skills to interact, at a very basic level;
4. recognize and write basic Japanese characters (Hiragana and some Katakana);
5. demonstrate awareness of basic cultural information necessary for speaking the language.

Subject Content

An introduction to important characteristics of the Japanese language;
An introduction to some required elements of Japanese culture in relation to speaking the language;
Activities and tasks to develop fundamental grammatical forms at the beginner level;
Activities and tasks aimed at developing listening comprehension, speaking, reading and writing skills at beginner level;
An examination of the grammatical forms and vocabulary studied during the semester.

Inherent Requirements

There are inherent requirements for this subject that you must meet in order to successfully complete this subject. Make sure you read and understand the requirements for your subject online.

Inherent Requirements (https://www.westernsydney.edu.au/ir/inherent_requirements/)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Portfolio	800 Japanese characters	30	N	Individual
Practical	1.5 hours	30	N	Individual
Final Exam	2 hours	40	N	Individual

Prescribed Texts

LANG 1021 Japanese 102

Credit Points 10

Legacy Code 100086

Coordinator Xiangdong Liu (https://directory.westernsydney.edu.au/search/name/Xiangdong Liu/)

Description This is a post beginner level subject in Japanese built on the knowledge and skills developed in Japanese 101 and aims to further develop listening, speaking, reading and writing skills in elementary Japanese. Students who believe they have sufficient background in Japanese to do 102 without having done 101 should

apply by e-form for a Rule Waiver, explaining their situation, and have their language level evaluated. Students with a background of study in the language need to obtain advice on their appropriate level of language study. During the first two weeks of class, the lecturer will monitor the performance of students and advise students who need to transfer to a higher class. Students should consult the Languages Academic Course Advisor or Subject Coordinator if they are unsure of their entry level.

Level Undergraduate Level 1 subject

Pre-requisite(s) LANG 1020

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate basic knowledge and skills in the areas of Japanese morphology, lexicon, syntax and phonology;
2. Read and write using basic kanji characters;
3. Demonstrate further knowledge of Japan and its culture;
4. Utilise the Japanese language in a variety of genres and topics;
5. Communicate with native and non-native speakers of Japanese on various topics using the Japanese language;
6. Utilise key characteristics of the Japanese language in a variety of simple genres and text types;
7. Apply independent learning strategies to acquire another language.

Subject Content

Activities and tasks aimed at further developing listening comprehension, speaking, reading and writing skills at post beginner level;
Development of lexical and grammatical comprehension at post-beginner level;
An introduction to different genres and text types in Japanese;
Further studies of Japanese culture;
Further development of knowledge of Japan, its culture, and the Japanese-speaking community in Australia.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

LANG 1028 The Sound of Language

Credit Points 10

Legacy Code 102042

Coordinator Stacey Sherwood (https://directory.westernsydney.edu.au/search/name/Stacey Sherwood/)

Description The richness of information conveyed through spoken language owes its form to the combination and recombination of a small number of sounds. In this subject, students will learn the sounds of the world's languages (phonetics) and the ways in which they are combined to build words (phonology). Examples will be drawn from English, Australian Aboriginal languages, and a diverse range of languages spoken around the world. The subject includes an overview of Australian English phonetics and phonology.

School Humanities & Comm Arts

Discipline Linguistics

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Incompatible Subjects LANG 2045 - The Sound of Language

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Use the International Phonetic Alphabet to represent language sounds
2. Analyse sound patterns in familiar and unfamiliar languages
3. Read and summarize primary literature in the field of phonology
4. Apply appropriate methods to conduct a small research project on phonological aspects of language.
5. Use the International Phonetic Alphabet to represent language sounds.
6. Analyse sound patterns in familiar and unfamiliar languages, especially in Australian English.
7. Read and summarize primary literature in the field of phonology.

8. Apply appropriate methods to conduct a small research project on phonological aspects of language.

Subject Content

. The fundamentals of articulatory phonetics including how to produce and transcribe the sounds of the world's languages
. A broad sampling of sound patterns in the worlds languages including examples from English and Aboriginal languages of Australia
. Theoretical framework and analytical tools for describing sound patterns in language
The fundamentals of articulatory phonetics including how to produce and transcribe the sounds of the world's languages.
A broad sampling of sound patterns in the worlds languages emphasising examples from Australian English and Australian Aboriginal and Torres Strait Islander languages.
Theoretical framework and analytical tools for describing sound patterns in language.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	45 minutes each	40	N	Individual
Case Study	approx 1,000 words each	20	N	Individual
Report	2,500 words	40	N	Individual

Level Undergraduate Level 1 subject

Equivalent Subjects HUMN 1002 - Analytical Reading and Writing HUMN 1003 - Analytical Reading and Writing (WSTC) LANG 1031 - Foundations of Academic English (WSTC)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate university-level skills in reading, writing and analytical reasoning.
2. Identify and analyse arguments across different textual genres.
3. Construct formal and structured responses in academic English.
4. Develop practical and theoretical skills in formal grammar.
5. Construct logical arguments.
6. Engage with a range of Englishes, including Aboriginal and Torres Strait Islander varieties of English.
7. Integrate source material into student responses.

Subject Content

The history of the English language.
Vocabulary, lexicon and register in Academic English.
Performance of writing and reading across different academic texts.
Research, structure, argumentation and referencing in formal writing.
The sociolinguistics of grammar, accent and registers in different Englishes.
The semiotics of denotation and connotation in English words.
Formal and applied grammar.

Assessment

LANG 1030 Thinking Critically About Texts and Society

Credit Points 10

Legacy Code 102737

Coordinator Dimitris Vardoulakis (https://directory.westernsydney.edu.au/search/name/Dimitris Vardoulakis/)

Description In this subject students explore the application of texts - including works of literature, philosophy and sociology/cultural studies - to our understanding of contemporary debates and challenges in order to develop critical thinking skills. Developing skills in textual analysis, this subject addresses topical issues and social problems so as to consider enduring questions such as 'What is the human?', 'What is the good life?', 'What is meaning and how do we make it?', and 'What is inequality and what should we do about it?'.

School Humanities & Comm Arts

Discipline Literature

Level Undergraduate Level 1 subject

Equivalent Subjects LANG 1026 - Texts and Traditions LANG 1027 - Texts and Traditions (WSTC) LANG 1032 - Thinking Critically about Texts and Society (WSTC)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Implement high level skills in textual analysis
2. Apply various disciplinary approaches to contemporary political, moral and social issues
3. Recognise and interpret theories of society and social relations
4. Identify and construct sound and cogent arguments
5. Express opinions clearly across different spoken and written genres

Subject Content

Through the analysis of a range of texts, this subject will address one or more of the following contemporary social issues
- Work
- Technology
- Consumption
- Environment

It will do so by considering a variety of critical frames, including a combination of the following
- Australia?fs first nations people?fs histories and experiences
- Gender
- Sexuality
- Race
- Class
- Power
- Species

LANG 1034 Speaking Dharug and other Australian Indigenous Languages

Credit Points 10

Coordinator Jasmine Seymour (https://directory.westernsydney.edu.au/search/name/Jasmine Seymour/)

Description Indigenous languages have a growing profile in Australian life. Indigenous languages now feature across the media, literature, performing arts, environment and land management, education, and the corporate world. Western Sydney University acknowledges Dharug people as the traditional custodians of the land where several campuses are located, but relatively few people have had the chance to learn Dharug language. In this subject, students - Indigenous, non-Indigenous Australian and international students alike - have the opportunity to learn about the richness of Australian Indigenous languages, by learning to speak, listen, read and write some Dharug. The subject showcases the diversities and commonalities across Australian Indigenous languages, cultures and histories, the how and why of language revitalisation activities, and ways that everyone can play a role.

School Humanities & Comm Arts

Discipline Australian Indigenous Languages

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Learning Outcomes

1. Identify important characteristics of Australian Indigenous languages, including Dharug, their histories and revitalisation.
2. Interact in greetings, introductions and instructional language in Dharug.
3. Perform scripts for everyday communication and public presentations such as Acknowledgement of and Welcome to Country in Dharug.
4. Explain sound-letter patterns used to read, write and pronounce words and phrases in Dharug and other Australian Indigenous languages.
5. Appraise own understanding of new knowledge related to Indigenous Australian languages and peoples, including diversity of contexts and protocols for language use.

Subject Content

- Everyday communication in Dharug language
- Revitalisation of Australian Indigenous languages
- Histories of Australian Indigenous languages and their peoples
- Protocols for Australian Indigenous language use
- Sound-letter relationships and pronunciation in Australian Indigenous languages
- Characteristics of Dharug and other Australian Indigenous languages
- Approaches to accurate translation between English and Australian Indigenous languages
- Using Dharug words, phrases and scripts in communicative contexts and public presentations

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	15 mins in Week 3	25	N	Individual

Practical	100-200 words written version plus 2-minute spoken presentation in class.	35	N	Group
Applied Project	Approximately 600-700 words in Dharug and English; Dharug 10-100 words. English up 10-100 word translation	40	N	Individual

LANG 1035 Australian Indigenous Languages Revitalisation

Credit Points 10

Coordinator Corina Norman (https://directory.westernsydney.edu.au/search/name/Corina Norman/)

Description Where do iconic Australian words and place names come from? Words like koala, waratah, kangaroo, Parramatta belong to the original languages of Australia. We all know a few words like this, but we often don't know much about the languages to which they belong. In this subject you will learn about the current revitalisation of Australian Indigenous languages that reflect national and international movements of decolonisation recognising the rich knowledges, cultures and histories of First Nations peoples. Students - Indigenous, non-Indigenous Australian and international students alike - will have the opportunity to learn from the achievements of Indigenous people who are actively revitalising the languages of south-eastern Australia.

School Humanities & Comm Arts

Discipline Australian Indigenous Languages

Student Contribution Band

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Define key concepts and considerations in language revitalisation;
2. Describe examples of language revitalisation internationally;
3. Discuss the diversity that exists within and between Indigenous Australians and their languages in relation to Australian history from colonisation to the present;
4. Describe the basis for language revitalisation from archival and community sources;
5. Identify key characteristics of Indigenous Australian languages, linguistic similarities and differences and spelling systems;
6. Appraise own understanding of new knowledge related to Indigenous Australian languages and peoples, and their language revitalisation achievements, particularly across south-eastern Australia.

Subject Content

- Language revitalisation movements and progress in Australia and the world
- Histories of Australian Indigenous languages and their peoples
- Diversity of language revitalisation ecologies
- Experiences and achievements in language revitalisation across south-eastern Australia
- Key characteristics of Australian Indigenous languages and their spelling systems
- Important considerations in language revitalisation

Coordinator Hakeem Kasem (https://directory.westernsydney.edu.au/search/name/Hakeem Kasem/)

Description This is an intermediate level subject in Arabic intended for two groups of students: (a) students of English speaking backgrounds or other language backgrounds who have achieved a degree of competence in the language at least at the HSC Level; and (b) Arabic language background students whose education has been in English as the medium of instruction in all subjects other than Arabic and who, therefore, have some gaps in their knowledge of Arabic, particularly in situations requiring a more formal language register. The subject is designed to consolidate and advance the acquisition of Modern Standard Arabic for post beginner learners of the language. While consolidating language skills, students will also develop further knowledge of the Arab culture. A range of DELL (Digitally Enhanced Language Learning) activities are utilised as part of the blended learning mode of delivery for this subject. NOTE: Students enrolling in this subject as part of a major or sub major in Arabic must enrol in Arabic 202 at the same time. Students with a background of study in the language may need to take higher level subjects. During the first two weeks of class, the lecturer will monitor the performance of students and advise students who need to transfer to a higher class. Students should consult the Languages Academic Course Advisor or Subject Coordinator if they are unsure of their appropriate level.

Level Undergraduate Level 2 subject

Equivalent Subjects LANG 2052 - Language and Communication Skills 2A Arabic

Assumed Knowledge

100042 - Arabic 102 or equivalent knowledge.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. use an intermediate level of Arabic language skills, including listening, speaking, reading and writing;
2. demonstrate knowledge of intermediate Arabic grammatical structures and vocabulary;
3. converse intelligibly in Arabic within a wide range of situations;
4. read and respond to a range of genres and text types;
5. demonstrate understanding of the Arab culture within the context of different Arabic-speaking countries. In particular students will be able to demonstrate a basic knowledge of the physical and human geography of Arabic-speaking countries and of their early political and social development.

Subject Content

- Activities and tasks aimed at developing listening comprehension, speaking, reading and writing skills at post beginner level;
- Activities and tasks to develop grammatical forms at the post-beginner level;
- An examination of a variety of oral and written genres and text types;
- Listening and reading comprehension tasks for each of the different genres and text-types;
- A study of the physical and human geography of Arab countries with a particular emphasis on the unique characteristics of each country;
An examination of Arab culture within its political and - social contexts.

Coordinator Ruying Qi (https://directory.westernsydney.edu.au/search/name/Ruying Qi/)

Description This is a post-beginner subject for intermediate level study of modern Chinese (Mandarin) language and its culture, suitable for Post HSC entry or an equivalent level. This subject is designed for students who take it as part of the Chinese major/sub-major or as an elective subject. It will further develop the Pinyin system and the four core skills (listening, speaking, reading and writing), with a particular focus on core vocabulary and fundamental structures, using approximately 500 simplified Chinese characters. Aspects of culture and language acquisition strategies are explored through research projects. Differentiated learning and assessment tasks and multimedia activities are utilised to cater to non-background and quasi-background learners. The subject is not suitable for background speakers (i.e., who have completed formal secondary education where Mandarin Chinese is used as an official language and also the language of instruction at the School). Note: Students enrolling in this subject as part of a major or sub major in Chinese are encouraged to enrol in Chinese 202 at the same time.

LANG 2013 Comedy and Tragedy

Credit Points 10

Legacy Code 100900

Coordinator Helen Basides (https://directory.westernsydney.edu.au/search/name/Helen Basides/)

Description This subject will examine the theory, writing and performance of Western Tragedy and comedy. The generic terms "tragedy" and "comedy" will provide signposts for both historical and theoretically modern approaches to a range of plays. Texts selected from the period since 1950 may represent comedy and/or tragedy in popular culture, and may have been written for media other than the stage, such as television and film.

School Humanities & Comm Arts

Discipline Literature

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Equivalent Subjects LGYB 4589 - Comedy and Tragedy

Restrictions

Successful completion of 40 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of the plays under analysis in an intellectual context established in lectures, seminars and through wider secondary reading.
2. Identify generic conventions of tragedy and of comedy that are employed or subverted in the texts set for study.
3. Explain the relationship of the plays (and other texts set for study) to contemporary and modern genre theory.
4. Conceptualise and generalise historically concerning tragedy and comedy in the periods examined.
5. Produce an individual, carefully considered written and oral discussions on issues relating to the generic/historical study of the set texts.

Subject Content

Debates about the nature, origins, and cultural locus of the genres of comedy and tragedy (Aristotle, Hobbes, Freud, Steiner, Frye, Barber, Bakhtin, Eagleton)
Debates about the "continuity" and/or demise of traditions of comedy and tragedy
Comedy and tragedy in the classical period (5th Century BCE-1st Century AD)
Shakespearean comedy and tragedy in Elizabethan England (Bradley, Frye, Barber, Reiss, Greenblatt, Bloom)
Debates about the "death" of tragedy (Steiner) and the rise of "liberal" tragedy (Williams) in the 19th century
Modern tragedy (Eagleton)
Contemporary television comedy.
Case studies: selected comedies and tragedies from the classical, Shakespearean and "modern" periods.

LANG 2014 Community Translation (UG)

Credit Points 10

Legacy Code 100191

Coordinator Mustapha Taibi (https://directory.westernsydney.edu.au/search/name/Mustapha Taibi/)

Description Community Translation facilitates written communication between public services and community members with low literacy in the official or mainstream language(s) of a given country or region. The subject covers the translation of general awareness material (e.g. healthcare, civic responsibilities, social services, etc.) as well as the translation of official documents. Students develop skills in producing target texts in styles appropriate to specific communities and groups, and to the content and function of the source text. They also develop skills in researching and using appropriate specialist terminology, editing and revising, and producing camera-ready documents. On the basis of these skills, the subject further develops students' ability to reflect upon translation in terms of strategies and appropriateness in relation to the target audience as well as make critical written and oral assessment of relevant translations. Subject to demand, the subject will be available for Arabic, Japanese, Mandarin and Spanish.

School Humanities & Comm Arts

Discipline Translating and Interpreting

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Restrictions Students need to be bilingual (in the language combinations offered by the School).

Assumed Knowledge

Sufficient proficiency in English plus one other language at native or near-native level.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Appropriately translate general texts from English into their community language;
2. Demonstrate translation skills following NAATI guidelines (250 words of text in 60 minutes);
3. Analyse and reflect upon their own translations (in terms of translation strategies appropriate to their community) to develop resources for improvement;
4. Apply the insights of Translation Theory to translation critique as well as to their practice of translation; and
5. Demonstrate translation revision skills at a near-professional level of competence.

Subject Content

Development of general translation skills to and from English.
Development of ability to reflect upon students' own translations in terms of translation strategies, and making critical assessment of translations in general.
Translation of community information from English into the other language of texts relating to health, social security, and other government services as well as relevant private sector services.
Translation into English, including extract translation, of personal and official documents such as birth certificate, marriage certificate, driver's licence, and educational qualifications.
Translation into English of texts from community-language newspapers and magazines circulating in Australia.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Professional Task	Translation revision: 250 words approx. Commentary: 500-1,000 words	30	N	Individual
Translation	250 words or equivalent each	40	N	Individual

LANG 2015 Cultural History of Books and Reading

Credit Points 10

Legacy Code 101967

Coordinator Simon Burrows (https://directory.westernsydney.edu.au/search/name/Simon Burrows/)

Description This Subject explores the globally-transformative social and cultural changes associated withs books and reading from the European print revolution of the mid-fifteenth century to the present day. It considers the key innovations and continuities in the shift from oral and medieval manuscript cultures to printed books, before going on to explore the societal impact of the mass-produced printed book. Key topics include the relationship between printed books and the Protestant reformation, scientific revolution and Enlightenment; the 'reading revolution' and rise of the novel and popular literacy; reader responses; the emergence of the public sphere and mass media, and their links to consumer culture, colonialism and political modernity. Taking a culturally comparative approach wherever possible, the Subject also discusses indigenous peoples' encounters with print, attempts to control print through censorship and the future of the printed book. Assessment tasks and class activities will provide students with the opportunity to engage with printed artefacts and to hone their research skills using a variety of cutting-edge digital resources to explore print culture and reader response.

Level Undergraduate Level 2 subject

Restrictions

Successful completion of 40 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss the development of the book as a cultural and material object.
2. Critically analyse contemporary and historiographical debates about the past and future of the book and of reading.
3. Use digital resources to research the history of printed works or individual readers.
4. Critically evaluate issues of medium and form in relation to reader experience and cultural transformation.

Subject Content

Topics may include:

1. Scribal Culture in the Middle Ages
2. The Print Revolution in the West
3. Print and the Protestant Reformation
4. Reading, Science and Enlightenment
5. The Reading Revolution Debate and the Rise of the Novel
6. Popular and Associational Reading
7. Public Sphere, Politics and Revolution
8. Print and the Consumer Revolution
9. Censorship Regimes
10. Print and Colonisation
11. Literacy and Education
12. Mass Media and Social Control
13. Digital Publishing and the Future of the Book

Level Undergraduate Level 2 subject

Assumed Knowledge

102326 Indonesian 102 or introductory level knowledge of basic language skills and general knowledge about ethnic, cultural and linguistic diversity of Indonesia.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Use key Indonesian grammatical constructions;
2. Differentiate between formal and informal registers of Indonesian;
3. Demonstrate listening and reading comprehension skills;
4. Communicate orally and in writing using various Indonesian constructions;
5. Demonstrate awareness of some aspects of Indonesian culture and cultural appropriateness;
6. Use the online learning environment for further language study.

Subject Content

- post-beginner Indonesian Grammar and vocabulary
- Affixes in Indonesian
- common expressions in everyday situations
- formal and informal Indonesian registers
- formal and informal communication in different settings (healthcare, education, travel, etc.)

LANG 2023 Interpreting Skills

Credit Points 10

Legacy Code 100193

Coordinator Chong Han (https://directory.westernsydney.edu.au/search/name/Chong Han/)

Description This is a core component of the Bachelor of Arts (Interpreting and Translation) and a pool subject in some postgraduate courses. The subject is aimed at developing essential skills in interpreting and deals with the specialised technical skills necessary for the different modes of interpreting: dialogue, consecutive, simultaneous, and sight translation. Given the large amount of independent practice needed to develop competence in interpreting, it pays special attention to the teaching of techniques for autonomous learning. Lectures are held in English for students of all the languages available. The tutorials are language specific in Arabic, Japanese, Mandarin or Spanish.

School Humanities & Comm Arts

Discipline Translating and Interpreting

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Restrictions Students need to be bilingual (in the language combinations offered by the School).

Assumed Knowledge

Proficiency in English and their other language (LOTE) at native or near-native level.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. distinguish between spoken and written language in terms of content, structure, speed, text type, number of interlocutors, accent, etc;
2. apply knowledge about different speech styles, registers, social dialects and develop skills necessary to accurately render different discourses in the target language;
3. demonstrate an understanding of context-specific interpreting techniques used in dialogue, consecutive, simultaneous interpreting and sight translation;
4. improve listening skills in a variety of contexts such as business, immigration, tourism and motor transport, and develop techniques for autonomous learning of these skills;
5. use the memory skills required for dialogue interpreting and consecutive interpreting;
6. master the note taking skills necessary to accurately interpret in the long consecutive interpreting mode, and develop techniques for autonomous learning of these skills;
7. develop effective public speaking skills, including techniques for autonomous learning of these skills.

Subject Content

- Variables of spoken language; content, speed, text type, number of interlocutors, accent, speaker's gender; techniques for improving listening comprehension;.
- Different speech styles, registers and social dialects and interpreting exercises to develop the skill to accurately render such variables in the Target Language;.
- Characteristics of dialogue, consecutive, simultaneous interpreting and sight translation; participants and their roles; typical contexts and content and role implications for each mode; differing cognitive demands of each mode.
- Memory and interpreting: exercises and techniques for developing short-term memory.
- Standard systems for note taking; individual adaptation; techniques for note taking practice.
- Public speaking skills; voice work, audience contact, discourse organisation; techniques for autonomous development of public speaking skills.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

LANG 2025 Japanese 202 Speaking and Listening

Credit Points 10

Legacy Code 102029

Coordinator Hiromi Muranaka (https://directory.westernsydney.edu.au/search/name/Hiromi Muranaka/)

Description This subject is normally undertaken concurrently with, or after, Japanese 201. It is designed to develop and expand speaking and listening skills based on the grammatical knowledge developed in Japanese 201. The range of communicative transactions is increased so that more sophisticated exchanges are possible, for instance when using polite and plain (i.e. casual) styles of speech, describing one's conjecture, stating an opinion, asking for explanation, etc. Cultural and social understanding of Japanese society is also fostered. The subject is not suitable for background speakers (i.e., who have completed formal secondary education where Japanese is used as an official language and also the language of instruction at the School). Note: Students enrolling in this subject as part of a major or sub major in Japanese are encouraged enrol in Japanese 201 at the same time.

LANG 2033 Literature and Decolonisation

Credit Points 10

Legacy Code 102572

Coordinator Ben Etherington (https://directory.westernsydney.edu.au/search/name/Ben Etherington/)

Description Do you know why nearly a hundred new nations were founded between 1945 and 1970? Have you ever wondered who Mahatma Gandhi or Ho Chi Minh were? Why would you challenge authority 'non-violently'? How do you write creatively in a language that has been imposed through colonial conquest? These are all questions connected to decolonisation: the explosive process by which the great modern European empires were dissolved and scores of new nations were formed - from Indonesia to Algeria, India to Nigeria, Jamaica to Vietnam. With this process came a surge of creative energy, as formerly colonised peoples set out to produce new ways of writing and thinking. We will read classic anti-colonial politicians like Gandhi and Frantz Fanon and writers from different decolonising regions including India, Africa, South-East Asia, the Caribbean, the Middle East and Australia.

School Humanities & Comm Arts

Discipline Literature

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Equivalent Subjects LANG 3064 - Literatures of Decolonisation

Restrictions

Successful completion of 40 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. critically read and discuss a range of key works of anti-colonial literature including political and literary texts
2. compare literary writing from different regions and consider broader trends and divergences
3. critically read and contrast different kinds of literary writing
4. understand theoretical and historical problems peculiar to the field of postcolonial and world literatures
5. deploy critical approaches best suited to addressing those problems
6. articulate sustained critical argument, whether in essays or tutorial discussions, between literature, history and politics
7. discuss literatures from a range of cultures and language varieties.

Subject Content

The subject is divided into three modules. Each will focus on a region or thematic concern from the period of decolonisation. In each case, political texts will be read alongside literary works. Subjects, themes and questions considered will include:
- The emergence of new literary communities in decolonisation
- The emergence of new literary materials in decolonisation
- Conceptualising decolonisation and postcolonialism
- nation, nationalism and The people
- literature, utopia and revolution
- Anti-colonial polemic
- Gandhi and the 'Gandhism'
- Negritude and pan-Africanism
- language and violence
- new vernacular and creole languages
- white settler literatures and decolonisation
- rhetorical comparison of political and literary texts

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Essay	1,000 words	25	N	Individual
Participation	ongoing	10	N	Individual
Essay	2,000 words	50	N	Individual
Quiz	3 x 10 minutes	15	N	Individual

Prescribed Texts

- Subject Reader (this will include all set articles, political essays and shorter literary texts for the subject). Depending on the specific iteration of the subject one or more of the following books may also be prescribed -
- Aime Cesaire, Notebook of a Return to My Native Land, trans. Mireille Rosello and Annie Pritchard (Newcastle: Bloodaxe Books, 1995).
- Raja Rao, Kanthapura (New York: New Directions, 1967).
- Edward Kamau Brathwaite, The Arrivants: A New World Trilogy (Oxford: Oxford University Press, 1988).
- Chinua Achebe, Things Fall Apart (New York: Anchor, 1994) OR Arrow of God (New York: Anchor, 1989).
- Pramoedya Ananta Toer, This Earth of Mankind, trans. Max Lane (New York: Penguin Books, 1996).

LANG 2034 Meaning in Language

Credit Points 10

Legacy Code 102489

Coordinator Chong Han (https://directory.westernsydney.edu.au/search/name/Chong Han/)

Description This subject introduces students to how meaning is constructed in language. It gives an overview of context-free meaning (semantics) and context-dependent meaning (pragmatics). Students will learn how we can encode and access meaning in communication and how this can be studied scientifically. This subject builds on and expands knowledge and methods developed in other linguistics subjects, especially Structure of Language and Pragmatics. It further connects to more advanced subjects, in particular Historical Linguistics, Second Language Acquisition, Bilingualism, Sociolinguistics and Discourse Analysis.

School Humanities & Comm Arts

Level Undergraduate Level 2 subject

Pre-requisite(s) LANG 1014

Equivalent Subjects LANG 2038 - Pragmatics

Assumed Knowledge

Knowledge of introductory linguistic terminology, specifically in morphology and syntax.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. demonstrate knowledge of the key concepts of semantics and pragmatics and explain this knowledge to others;
2. analyse, discuss and reflect on significant knowledge in semantics and pragmatics;
3. apply theoretical knowledge to the analysis of data;
4. explain the principles and relevance of research in semantics and pragmatics; and
5. apply the acquired knowledge and skills in professional practice (translation, interpreting, education, business, etc.)

Subject Content

Concepts of meaning
Lexical semantics
Formal semantics
Pragmatics

Assessment

LANG 2035 Methods of Reading

Credit Points 10

Legacy Code 101909

Coordinator Lorraine Sim (https://directory.westernsydney.edu.au/search/name/Lorraine Sim/)

Description This subject aims to build the skills of reading, interpretation and theoretical and contextual analysis that are critical to the study of literary texts, skills that define scholarship in the discipline of English. Focusing on a sustained and careful study of a small number of literary texts the subject provides an in-depth exploration of technical approaches to close reading, cultural and historical contexts for the production and reception of the texts, and different theoretical approaches to their interpretation. The selected primary texts (one novel, one play and a selection of poems) will span two or three literary/historical periods.

School Humanities & Comm Arts

Discipline Literature

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Restrictions

Successful completion of 40 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify different modes of literary/theoretical interpretion
2. Apply different modes of literary/theoretical interpretation to a work of literature
3. Articulate the formal attributes of literary texts
4. Demonstrate competence in the methods and practices of reading that are key to the discipline.

Subject Content

The primary texts for this subject may change from one year of offer to the next, so the subject content as set out below attempts to capture the structure and coverage necessary to provision of the outcomes.
. Why so many ways to read? The values, benefits, and pleasures of different approaches to interpretation.
. Why does genre matter? Consideration of how the formal attributes of texts shape interpretation.
. Reception studies: the work and its readers across time
Alignment of a small number of primary texts in relation to key theoretical concepts, such as:
. The author,
. The uncanny,
. Text and world,
. Narrative,
. Ghosts,
. Sexual difference,
. Desire,
. Racial difference,

. Pleasure,
. History.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Short Answer	500 words	20	N	Individual
Reflection	1,000 words	30	N	Individual
Essay	1,500 words	40	N	Individual

LANG 2036 Modern Australian Poetry and Poetics

Credit Points 10

Legacy Code 101978

Coordinator Kate Fagan (https://directory.westernsydney.edu.au/search/name/Kate Fagan/)

Description This subject examines Australian poetries of the 20th and 21st centuries in context of parallel events in international poetry. It looks at histories and definitions of poetic 'innovation' and asks how Australian poetry has dealt with different waves of modernism. It studies dialogues between local and international avant-gardes, and surveys new poetic genres emerging in online environments. The subject aims to enrich students' critical understanding of poetry and poetics, and where relevant, to enhance their own creative writing practice. Topics addressed include poetic tradition and counter-tradition; form and experiment; colonialism, exile and belonging; literary communities; critical histories; digital and e-poetries.

School Humanities & Comm Arts

Discipline Literature

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Equivalent Subjects LGYB 0215 - Poetry and Poetics LGYA 0927 - Poetry and Poetics

Restrictions

Successful completion of 40 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of modern and contemporary Australian poetries and poetics
2. Analyse links between Australian poetries and those of other countries
3. Critically engage with a range of poems and poetic texts
4. Apply key theoretical perspectives relevant to modern and contemporary poetry and poetics

Subject Content

Content will draw from, or elaborate upon, a number of the following topics:
- Histories of innovation in Australian poetry of the 20th and 21st centuries
- Ecology, colonialism, place and 'landscape' in Australian poetry, including the poetics of Indigenous resistance
- Imagism in Anglo-American modernist poetries and its expression in Australian poetries
- International avant-gardes of the 20th century including French symbolism, futurism, objectivism, Latin American surrealisms, the New York School and Language Poetry
- Australian avant-garde movements and retreats including The Jindyworobak movement, Angry Penguins and The Ern Malley hoax
- Histories of poetry criticism and the transformation of the modernist critical 'enterprise'
- Literary and cultural histories of the 20th century
- The politics of poetic form
- New romanticism, postmodernism and the Generation of '68
- Urban Australian identities, migrant poetics and Collective publishing ventures
- Australian poetries in the early 21st century including digital poetics, online sampling, poetry blogs, e-poetries and poetry apps

Assessment

LANG 2037 Pragmatics

Credit Points 10

Legacy Code 102490

Coordinator Chong Han (https://directory.westernsydney.edu.au/search/name/Chong Han/)

Description This is an optional subject of the Linguistics Major which introduces students to pragmatics, the study of language use in context. It combines theoretical elements with practical applications through examples, exercises and authentic data analysis, which enable students to understand the significance of this field of linguistics to language professions, such as interpreting and translation and language teaching.

School Humanities & Comm Arts

Discipline Language And Literature

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) LANG 1014

Equivalent Subjects LGYA 1435 - English Semantics and Pragmatics

Incompatible Subjects LANG 2038 - Pragmatics

Learning Outcomes

On successful completion of this subject, students should be able to:

1. demonstrate general knowledge of different theories of pragmatics.
2. apply data collection skills to conduct research in pragmatics
3. apply the acquired knowledge and skills to analyse spoken and written data from the perspective of pragmatics
4. demonstrate awareness of the connection between pragmatic sensitivity and linguistic choices in intracultural and intercultural communication
5. apply the acquired knowledge and skills in professional practice (translation, interpreting, education, business, etc.)

Subject Content

- The theoretical foundations for the study of pragmatics, including speech act theory, relevance theory, metapragmatic awareness, Grice's theory of conversational implicature and cooperative principles.
- data collection and analysis skills necessary for research in pragmatics, e.g. using corpus data, collecting observational data, using TV data and internet resources, etc.
- pragmatics in specific discourse domains.
- pragmatic Issues in communication across time: The change of language and meaning over time.

LANG 2039 The Short Story: Nineteenth Century Women's Writing

Credit Points 10

Legacy Code 101964

Coordinator Anne Jamison (https://directory.westernsydney.edu.au/search/name/Anne Jamison/)

Description This subject will set Victorian women's writing in its historical, intellectual, publishing and cultural contexts, with particular emphasis on the multiple genres of writing within which women engaged in the nineteenth century. Using a broad range of short fiction, this subject will investigate topics such as gender and sexuality, colonialism and empire, and race and identity. It will also explore texts from across Australia, Britain, North America and Ireland and ask students to consider how these texts are still relevant to contemporary society and intellectual thinking.

School Humanities & Comm Arts

Discipline Literature

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Restrictions

Successful completion of 40 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate the intellectual and historical contexts that inform a range of nineteenth-century women's texts
2. Analyse a range of nineteenth-century women's texts and make connections between them
3. Summarise and evaluate literary-critical arguments relating to nineteenth-century women's writing.
4. Work effectively with other students on classroom team tasks
5. Participate effectively in the debate and sharing of complex ideas and concepts through high level oral, aural and language communication skills
6. Work independently to organise, plan and deliver a critically-informed research essay relating to nineteenth-century women's writing.

Subject Content

1. British, Irish, North American and Australian nineteenth-century women's short fiction published during the nineteenth century.
2. The intellectual, cultural, critical and publishing contexts of nineteenth-century women's short fiction.
3. The intersections of gender, race and sexuality in women's nineteenth-century short fiction.

4. The multiple genres of women's short fiction in the nineteenth-century, e.g. sensation fiction, the gothic, didactic fiction.
5. Women's subversive engagement with key public debates of the period via the short story format.
6. The uncertainties of home, colonialism and empire in women's short fiction in the nineteenth century.
7. The relevance of women's nineteenth-century writing to contemporary society and intellectual thinking, as well as an examination of literature as a socialising force.
8. Representations of the changing social role of women in the nineteenth century.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Short Answer	750 words	35	N	Individual
Portfolio	Class participation is graded across each week of the teaching semester, and students are given 60 minutes to complete each online quiz	20	N	Individual
Essay	1,500 words	45	N	Individual

Prescribed Texts

- The subject's prescribed primary texts vary from year to year subject to availability and the expertise of the teaching team, but they are consistently drawn from British, Irish, Australian and North American women's short fiction published during the nineteenth century. The current selection for the subject comprises:
- Maria Edgeworth, "The Limerick Gloves" (1804) Mary Shelley's "The Mortal Immortal" (1833) Elizabeth Gaskell's "The Grey Woman" (1863) Tasma's "Monsieur Caloche" (1878) Charlotte Perkins Gilman's "The Yellow Wallpaper" (1892)
- All prescribed readings for the subject are made available to students through the Subject Reader.

LANG 2040 Spanish 201

Credit Points 10

Legacy Code 102032

Coordinator Maria Isabel Pena (https://directory.westernsydney.edu.au/search/name/Maria Isabel Pena/)

Description This is post-beginner subject suitable for Post Beginners HSC entry or equivalent, within the Spanish programme, designed for students who take it as a major, sub-major or elective. Within the Spanish major or sub major set, it is normally taken concurrently with Spanish 202. The subject will further develop all language skills, listening, speaking, reading and writing with particular focus on a core vocabulary and fundamental structures. Cultural and social understanding is also fostered through research projects on specific cultural or social aspects that are of interest to students. A range of DELL (Digitally Enhanced Language Learning) activities are utilised for this subject. NOTE: Students enrolling in this subject as part of a major or sub major in Spanish must enrol in Spanish 202 at the same time.

School Humanities & Comm Arts

Level Undergraduate Level 2 subject

Equivalent Subjects LANG 2029 - Language and Communication Skills 2A Spanish

Assumed Knowledge

Spanish 102 or equivalent knowledge.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate knowledge of key morphological and syntactic structures of the Spanish language;
2. Use a broad lexical base and common expressions in a range of socio-cultural contexts and situations involving other learners and native speakers;
3. read a range of basic text types and respond appropriately either orally or in writing
4. express ideas in writing in a range of text types including descriptions, narratives, reports, journal entries, recipes, informal correspondence, short summaries;
5. demonstrate comprehension of spoken Spanish in a variety of informal and formal contexts and respond appropriately-- orally or in writing;
6. identify key elements of the traditional and contemporay culture and values of the Spanish-speaking people
7. apply independent learning strategies for acquiring another language.

Subject Content

. Activities and tasks aimed at developing listening comprehension, speaking, reading and writing skills at post beginner level
. Activities and tasks to develop grammatical forms at the post-beginner level
. An examination of a variety of oral and written genres and text types
. Listening and reading comprehension tasks for each of the different genres and text-types;
. A study of the geography of the Spanish-speaking countries with a particular emphasis on regional characteristics;
. An examination of cultural themes.

LANG 2041 Structure of Language

Credit Points 10

Legacy Code 101948

Coordinator Hannah Sarvasy (https://directory.westernsydney.edu.au/search/name/Hannah Sarvasy/)

Description This subject aims to equip students with knowledge about the structural aspects of language. Students will learn to describe, analyse and reflect on the structure and meaning of linguistic elements from word to sentence level. Using examples from different languages, including Australian Indigenous languages and other languages spoken in Australia, this subject will provide students with an understanding of how structure and meaning are connected, how they link up with other areas of linguistics, and how research in this field is relevant to the linguistic ecology of Australia.

School Humanities & Comm Arts

Discipline Linguistics

Student Contribution Band HECS Band 1 10cp

LANG 2044 The Gothic

Credit Points 10

Legacy Code 102507

Coordinator Helen Basides (https://directory.westernsydney.edu.au/search/name/Helen Basides/)

Description This subject examines the emergence and development of Gothic literature in English. It studies the rise of Gothic fiction in the late-eighteenth century, and the evolution of Gothic genres in the nineteenth and twentieth centuries. Students will examine key works of Gothic poetry and narrative fiction - such as vampire narratives - in order to consider the social, political and intellectual contexts for Gothic literature. The subject considers how Gothic forms negotiate cultural anxieties, such as those involving race, gender, sexuality, religion, scientific development and class. Set texts from the twentieth century onwards may include works from television, theatre and film.

School Humanities & Comm Arts

Discipline Literature

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Restrictions

Successful completion of 40 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine generic conventions of the Gothic that are employed or subverted in the texts set for study.
2. Explain the ways in which the Gothic is situated within particular historical, social, cultural, political and scientific contexts.
3. Demonstrate an understanding of the relationship between gender and genre, especially with respect to the female Gothic.
4. Evaluate different critical approaches to the Gothic in relation to the set literary texts on the subject.
5. Produce independently researched, critically engaged written discussions on topics relating to the generic and historical study of the set texts.

Subject Content

- The emergence of The Gothic in Late-eighteenth century in England and its development in The Nineteenth and twentieth centuries, in literatures of prose and verse.
- Terror Gothic and horror Gothic
- The female Gothic and The intersections of gender and genre
- Gothic fiction?fs exploration and Negotiation of cultural anxieties, including around race, gender, sexuality, religion, scientific development and class
- theoretical considerations of Gothic literature
- contemporary Gothic forms

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Short Answer	900–1,000 words	30	N	Individual
Essay	1,500 words	40	N	Individual

LANG 2047 Translation Technologies

Credit Points 10

Legacy Code 101302

Coordinator Anita Byrnes (https://directory.westernsydney.edu.au/search/name/Anita Byrnes/)

Description This subject aims to equip students with the theoretical and practical knowledge needed to effectively apply information and communication technologies to translation and other language related tasks. It focuses on translation memory and terminology management systems, and on the workflow involved in the handling of multilingual content. Emphasis is also put on uses of the Internet as a resource tool, and to the principles of controlled language for text to be processed by machine translation (MT). Tutorials will be conducted in a computer lab where students will familiarize themselves with leading computer-assisted translation (CAT) software applications.

School Humanities & Comm Arts

Discipline Translating and Interpreting

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Equivalent Subjects LGYA 0191 - Translation Skills

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply computer-aided translation (CAT) and related concepts and examine their place in the broad area of translation studies.
2. Examine in depth the fields of translation memory (TM) and terminology management, showing the skills required to compare applications and make informed judgments.
3. Describe the workings of one of the leading TM software packages and develop transferable troubleshooting strategies.
4. Explore the possibilities and limitations of machine translation (MT) by looking at the relevant literature and by analysing the outcome of some of the freely available engines on the internet.
5. Consolidate your expertise in internet mining, in particular for parallel corpora, terminological data and subject matter information.
6. Outline the workflows involved in multilingual content management, and explore the big-picture concepts of globalisation, internationalisation and localisation.

Subject Content

1. Overview of the principles of language engineering, and computer-assisted translation.
2. Basic 'generalist' computing skills of particular relevance to translators, in particular those related to data digitalisation, exchange and protection.
3. Desktop TM: components, workflow, and useful troubleshooting strategies.
4. Server TM: open standards for database content exchange, interface with multilingual content management.
5. Capabilities and limitations of MT (Machine Translation) engines and AI tools.
6. The principles and practice of writing in controlled language for TM and MT.
7. Internet mining for parallel corpus, terminology data and specific subject matter.

LANG 2048 Working Grammar

Credit Points 10

Legacy Code 102414

Coordinator David McInnes (https://directory.westernsydney.edu.au/search/name/David McInnes/)

Description How does grammar work? And how do languages function in different social contexts? This subject introduces students to a functional analysis of the English language, and relates the structure of English to its use in cultural and social contexts. It offers students of literature and training teachers an introduction to theories and forms of analysis that support much English language education in Australia. The functional model of language is used in a range of fields - including teaching in schools and universities, teaching ESL/EFL, and broader language research. Students will apply the functional analysis of English to a range of spoken and written texts from diverse literary, social and cultural contexts. This will help to provide grammatical skills and work-readiness, especially for students training to be professional teachers.

School Humanities & Comm Arts

Level Undergraduate Level 2 subject

Restrictions

Successful completion of 40 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate their understanding of how language relates to the cultural and social contexts in which it is used
2. Identify how texts are structured to achieve a range of social purposes
3. Identify the features of functional grammar at clause, sentence and text levels
4. Analyse grammatical structures and patterns in texts
5. Provide interpretations of texts patterns through their relationship to forms of social and cultural meaning in literary and other texts

Subject Content

- Models of text and context including genre, context of situation including field, tenor and mode
- Analyses of The Grammar of The English clause for documenting Three kinds of meaning - Ideational, interpersonal and textual
- The analysis of clause level Structures for: Transitivity, Nominal groups, mood, modality and appraisal, theme/Rheme and given/new
- Interpretive frameworks for language features and patterns

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Discourse Analysis	30 minutes	60	N	Individual
Practical Exam	1 hour	40	N	Individual

LANG 2050 Medieval and Early Modern Literature

Credit Points 10

Legacy Code 102626

Coordinator Anthony Uhlmann (https://directory.westernsydney.edu.au/search/name/Anthony Uhlmann/)

Description While films and books related to the fantastic and supernatural (like Game of Thrones, Lord of the Rings and Harry Potter) are extremely popular, it is sometimes forgotten that these works draw heavily on historical literary forms and works that engaged directly with the cultures from which they emerged. This subject will look at examples of literature from the Medieval and Early Modern periods (between 1000 and 1800) and the social and cultural worlds they both represented and supported. It will ask how these works still inform how we understand and represent things today.

School Humanities & Comm Arts

Discipline Literature

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Restrictions

Successful completion of 40 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse a range of pre-twentieth century texts from various historical and/or cultural contexts.
2. Demonstrate a familiarity with key literary genres (for example epic poetry, pre-novelistic prose narrative, allegory, satire and the novel).
3. Compare and critique interrelations between literary texts and their historical and cultural contexts.
4. Interpret the effects of cultural, social, and technological change on literary production.
5. Recall and analyse information gathered from lectures and set written texts.

6. Discuss and apply ideas related to the major themes and content of the subject.

Subject Content

The epic poem and its transformations.
Medieval allegory.
Prose romance.
The rise of realism.
Prose satire.
The novel.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

LANG 2051 Writing and Reading Sci-Fi and Fantasy

Credit Points 10

Legacy Code 102772

Coordinator Mette Jakobsen (https://directory.westernsydney.edu.au/search/name/Mette Jakobsen/)

Description This subject covers the basic creative writing techniques for 'worldbuilding' in the genres of science fiction and fantasy. Through guided reading and writing you'll explore what happens when ordinary human predicaments are deepened and complicated when represented as happening in a world not our own: one with different physical laws, belief systems, technologies and cultural practices. In a workshopping environment, you will build outward from a 'story-bud' about an alternative or alien world to explore the logic of that world and its implications for the creation of believable characters, setting, action and - overall - the development of a successful story.

School Humanities & Comm Arts

Level Undergraduate Level 2 subject

Incompatible Subjects LANG 3090 - Writing and Reading Sci Fi and Fantasy

Restrictions

Successful completion of 40 credit points of study in currently enrolled program.

Assumed Knowledge

Good standard of written English expression.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of the characteristics of science fiction and fantasy fiction.
2. Apply the techniques of world-building to flesh out story ideas.
3. Effectively utilise face-to-face and online workshop environments for the brainstorming of ideas and the troubleshooting of work in progress.
4. Critically assess works of published Science Fiction and Fantasy to identify the logic of world-building.
5. Demonstrate competence in writing coherent and credible fantasy or science fiction.
6. Identify the qualities of effective writing; and
7. Demonstrate those qualities in their own writing.

Subject Content

1. Genre reading for writing technique.
2. The story-bud: graft from an existing stock or invent something wholly new?
3. Consequential logic and the rules of invention: 'if this is so, then what...'
4. Cosmologies: world-building beliefs.
5. Science and Physics: how much do you need to know?
6. Future technologies and savage worlds: what kind of detail do I need?
7. Writing the credible incredible setting.

LANG 2054 Japanese 204: Speaking and Listening

Credit Points 10

Legacy Code 102804

Coordinator Hiromi Muranaka (https://directory.westernsydney.edu.au/search/name/Hiromi Muranaka/)

Description This subject is undertaken concurrently with, or after, Japanese 203. It is designed to further develop and expand speaking and listening skills on the basis of grammatical structure introduced in Japanese 203 and increase the range of communicative transactions developed in Japanese 202 so that more sophisticated exchanges are possible when stating a plan or intention, making a suggestion, offering advice, indicating the degree of certainty, describing a change in state, indicating causes, using the passive and the imperative, etc. This subject will also present further aspects of contemporary Japanese culture and society. The subject is not suitable for background speakers (i.e., who have completed formal secondary education where Japanese is used as an official language and also the language of instruction at the School). NOTE: Students enrolling in this subject as part of a major or sub major in Japanese are encouraged to enrol in Japanese 203 at the same time.

Level Undergraduate Level 2 subject

Equivalent Subjects LANG 2031 - Language Communication Skills 2B Japanese LANG 2027 - Japanese 204

Assumed Knowledge

Japanese 201 and 202 or equivalent knowledge.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Carry out conversation in such areas as stating a plan or intention, making a suggestion in the plain form, offering advice, indicating degree of certainty, describing a change in state, indicating causes, using the passive and the imperative.
2. Conduct a small research project and present the finding in oral and written Japanese on such topics as Japanese culture, customs and cross-cultural communication between Japan and Australia.
3. Use basic grammatical structures and vocabulary to carry out the exchanges stated above.
4. Demonstrate understanding of Japanese linguistic, pragmatic and cultural considerations when using Japanese.

Subject Content

Conversation needed for basic situations such as work, shopping, asking for information or explanations, what to say in troublesome situations.
Aspects of contemporary Japanese culture and society.
How to conduct and present a small research project on Japanese culture and society.
Listening practice of substantial passages and conversation.
Discourse pragmatics in Japanese oral interaction.

Assessment

LANG 2055 English Text

Credit Points 10

Legacy Code 102812

Coordinator David McInnes (https://directory.westernsydney.edu.au/search/name/David McInnes/)

Description The English Language is always used in context. The contexts in which we use English require us to use the language in specific ways. This subject introduces students to the analysis of English texts in context. Students will learn how to analyse text structure and purpose, and they will learn how to analyse the systems of the English language as they are used to facilitate context specific and context appropriate communication. Working between models of social contexts and the language level systems of English, students will develop a greater level of skill in using English for exposition, explanation, reporting, recounting and narrating.

School Humanities & Comm Arts

Discipline Literature

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Outline the relationship between text and context using functional models of context.
2. Describe the function, structure and features of key English text types/genres including recount, report, exposition, explanation and narrative
3. Outline the contextual dimensions of real-world texts used/produced across a range of contexts using the ideas of field, tenor and mode.
4. Analyse the use of English systems and structures to account for language use in context at lexicogrammatical and discourse levels.

Subject Content

1. Functional models of language, context and text.
2. Generic analysis of texts types including reports, recounts, narratives, explanations and expositions.
3. Models of context of situation including Field, Tenor and Mode.
4. Language analysis and text descriptions articulated to text structure, purpose and contextual variables including lexicogrammatical systems of transitivity, mood and theme and discourse level systems of thematic progression, hierarchies of periodicity and grammatical metaphor.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Discourse Analysis	3 x analysis tasks (20% each) 40 minutes each	60	N	Individual
Short Answer	2 x writing tasks (20% each) 500 words each	40	N	Individual

LANG 2056 Writing Industries

Credit Points 10

Coordinator Luke Carman (https://directory.westernsydney.edu.au/search/name/Luke Carman/)

Description Writing Industries takes a close look at the business of writing. Topics include literary cultures and economies, community activism, social media and author branding, Young Adult Literature, literary controversies and what Australian authors sell into overseas markets. Students will look closely at diverse literary organisations and festivals, and how they shape cultures and support writers. They will explore the role of editors, critics and publishers – from DIY zine-making to independent presses and large commercial ventures. Students will gain insights into building writing careers, working in the arts and publishing industries, community building and culture-making, and teaching practices of writing.

School Humanities & Comm Arts

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Equivalent Subjects COMM 2014 - Editing and Publishing

Restrictions

Successful completion of 40 credit points of study in currently enrolled program.

Assumed Knowledge

Students will be expected to have undergraduate first year level reading and writing skills.

Learning Outcomes

1. Compare and analyse different modes, genres and processes of publication
2. Analyse the economics of writing and publishing
3. Recognise and discuss the changing relationships between authors, publishers, editors and readers
4. Critically examine the role of digital cultures in marketing authors and stimulating literary debate
5. Critique the role of networks of organisations within the literary industry.

Subject Content

Students will explore the idea that the writer is part of a larger industry which includes an ecology of booksellers, festivals, funding bodies, publishers, agents, literary prizes, critics and community organisations. Through a mix of lectures and practical tutorials students will both explore a number of case studies of the industry as well as researching and writing their own case studies. Subject content will include:

1. An overview of the Australian publishing industry
2. The economics of writing and publishing
3. Literary trends, issues and controversies
4. The writer as change maker and literary activist
5. The writer and popular culture
6. The writer in the age of social media
7. The role of literary magazines, festivals and collectives

LANG 2057 Literature and Environment

Credit Points 10

Coordinator James Gourley (https://directory.westernsydney.edu.au/search/name/James Gourley/)

Description Present-day climate change is anthropogenic (human-caused), but not all humans bear equal responsibility. The planetary crises climate change has caused directly impact on the Earth's human and non-human worlds. Introducing an environmental humanities approach, this subject examines literature's role in conceiving, representing and understanding the 'environment' and, by extension, the interrelation of human and natural worlds. Using place-based reading practices, students will reflect on Greater Western Sydney's relative vulnerability to climate change. Reading a diversity of texts, with a focus on First Nations stories and writing, students will be encouraged to think about how we engage with human and natural communities beyond the classroom. Students will reflect on the cultures, practices and worlds that they identify in environmental writing and consider whether these enable climate justice in the present.

School Humanities & Comm Arts

Discipline Literature

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Restrictions

Successful completion of 40 credit points of study in currently enrolled program.

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Closely read diverse narratives and texts that represent natural worlds.
2. Analyse how different narrative and textual methods present the entanglement of human and natural worlds.
3. Critically assess how story and literature can envision and create climate justice.
4. Critique, with reference to relevant context, the motivating views that inform a text's representation of 'environment'.

Subject Content

- Historical and present-day factors that have led to the climate crisis.
- Diverse narrative and textual practices and their relation to natural worlds.
- Established and emergent literary cultures that respond to climate change.
- The contributions of storytelling and story-making to placemaking and activism in Greater Western Sydney and beyond.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

LANG 2058 Race in Literature

Credit Points 10

Coordinator Christopher Peterson (https://directory.westernsydney.edu.au/search/name/Christopher Peterson/)

Description This subject explores a selection of modern literary works that focus on racial difference. Readings will facilitate students learning on how notions of race have shifted over time, giving particular attention to how mixed-race people challenge racial categorisation. Readings may include one or more national literatures, such as American or Australian literature.

School Humanities & Comm Arts

Discipline Literature

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Equivalent Subjects LANG 3068

Restrictions

Successful completion of 40 credit points of study in currently enrolled program.

Learning Outcomes

After successful completion of this subject, students will be able to:

1. Discuss representations of race in literature;
2. Analyse critically the interaction between literary texts and shifting definitions of race in a culture;
3. Relate texts to the historical contexts from which literary and cultural texts emerge;
4. Critically analyse the intersection of the concepts of race, sexuality and gender; and
5. Construct analytical oral and written arguments.

Subject Content

The national literature or literatures studied in this subject will vary from year to year depending on the subject coordinator's area of expertise. Topics studied will address some of the following areas:

1. 19th and 20th century authors and race: exploration of how their literary production reflects their views on slavery, race, and animality.
2. The problem of racial "authenticity"; investigation of how people of mixed-race identity problematise the black/white division; legal prohibitions on miscegenation.
3. Cultural and theoretical concepts such as: “the tragic mulatto,” “the half-caste,” “passing for white,” “double consciousness” (Du Bois), “racial melancholia” (Cheng); and the one-drop rule.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

LANG 3012 Arabic 303: Advanced Writing Skills

Credit Points 10

Legacy Code 100049

Coordinator Nour Kamleh (https://directory.westernsydney.edu.au/search/name/Nour Kamleh/)

Description This subject is aimed at those who have successfully finished LANG 2006 - Arabic 202, or have an advanced speaking and writing proficiency in Modern Standard Arabic. It is one of the obligatory subjects for students intending to graduate with Arabic as a major or minor. It seeks to develop the writing skills to prepare students to make professional use of the language, and it is particularly recommended for those who wish to involve themselves in areas such as language teaching and translation. Students will be introduced to a full range of text types and language purposes. They will be guided to analyse, interpret and evaluate passages provided, and will be encouraged to extend their ability by experimenting with a variety of writing styles.

Level Undergraduate Level 3 subject

Assumed Knowledge

Arabic 304: Arabic Advanced Speaking.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Improve listening skills in a variety of genres and develop techniques for autonomous learning of those skills;
2. Master the note-taking skills necessary to accurately develop an argument or respond orally to one;
3. Demonstrate high level of grammatical accuracy and extensive knowledge of vocabulary when speaking;
4. Demonstrate breadth and depth in the treatment of relevant ideas and information;
5. Produce speech suited to a given audience, purpose and/or content, and to manipulate language to meet the requirements of the task with flair and originality;
6. Demonstrate effective public speaking skills, including techniques for autonomous learning of these skills;
7. Analyse oral production in Arabic, identifying its linguistic and contextual features.

Subject Content

- Variables of spoken language; content, speed, text type, number of interlocutors, accent, speaker's gender, techniques for improving listening comprehension.
- Aural comprehension practice in Arabic by listening to visiting speakers, audio and video tapes, radio and television broadcasts.
- Extensive practice with formal and informal registers, extempore and prepared speech, and group discussion.
- Analysis of a selection of contemporary oral texts: speeches, radio interviews, public affairs programs, lawyers court addresses, judge's sentences, etc.
- Rewording of a given text for a different audience or purpose.
- Standard systems of note-taking, individual adaptation; techniques for note-taking practice;
- Public speaking skills: voice work, audience contact, discourse organisation; techniques for autonomous development of public speaking skills.

LANG 3014 Arabic 306: Arabic Novel and Short Story

Credit Points 10

Legacy Code 100052

Coordinator Peter Mauch (https://directory.westernsydney.edu.au/search/name/Peter Mauch/)

Description This is an optional subject in the Arabic major, which aims to introduce students to the study of the Arabic novel and short story, and examines the historical, political, social and cultural context that this literature reflects. This will be done by studying selected novels and short stories. Students will be able to undertake a research project on a novel of their choice. This subject will also examine children's literature, including traditional children's stories and contemporary Arabic literature, as well as translated Western traditional stories.

School Humanities & Comm Arts

Discipline Southwest Asian and North African Languages

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Assumed Knowledge

Arabic 204 or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain key aspects of the historical, social and cultural context in which the modern Arabic novel, short story and play developed;
2. Identify the key characteristics of modern Arabic prose, especially in novels and short stories;
3. Analyse selected Arabic novels in terms of language, style and cultural context;
4. Evaluate Arabic literature for children and compare it with similar literature in other languages.

Subject Content

1. The historical, social and cultural context in which the Arabic novel and short story developed; and the impact of the political climate on the content of the novel and short story, especially the war situation in Lebanon, Iraq, Kuwait and Palestine and the influence of this on Arabic literature.
2. Study of selected short stories and novels.
3. Study of children's literature: themes, language, style, moral messages, graphics and presentation.

LANG 3016 Bilingualism and Biculturalism

Credit Points 10

Legacy Code 101449

Coordinator Ruying Qi (https://directory.westernsydney.edu.au/search/name/Ruying Qi/)

Description Bilingualism and biculturalism are important aspects of life in Australia: many Australian residents are, were, or could be, bilingual and/or bicultural. This subject aims to give students an understanding and appreciation of the most important facets and manifestations of bilingualism and biculturalism, in the linguistic, cognitive, personal, societal and educational spheres, particularly with regard to the Australian context. It also aims to show students how this subject relates to broader studies in education, humanities, linguistics, and social sciences.

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Equivalent Subjects LGYB 2371 - Bilingualism and Biculturalism

Learning Outcomes

On successful completion of this subject, students should be able to:

1. demonstrate knowledge about raising children bilingually and biculturally.
2. identify and explain language choice, language maintenance and language shift in multilingual societies as well as code-switching and language mixing in bilingual speakers.
3. identify relationships between bilingualism and cognitive development.
4. evaluate the effectiveness of bilingual education programs and aspects of cross-cultural and/or inter-cultural communication.
5. demonstrate understanding of the complex issues and different dimensions of individual and social bilingualism.
6. critically analyse a range of attitudes toward bilingualism and their relationships with multi-identity.

Subject Content

1. A short overview and introduction to the main concepts of bilingualism and biculturalism.
2. The concept of biculturalism; languages in contact - language maintenance, shift and change; language attitudes; multi-identity.
3. The nature of language interaction and codeswitching, e.g. language choice.
4. Bilingualism and cognitive development.
5. Bilingual language acquisition; raising children bilingually and biculturally.
6. Bilingual education in Australia and overseas; bilingual programs.
7. Bilingualism and aspects of cross-cultural, intercultural communication.

LANG 3018 Children's Literature: Image and Text

Credit Points 10

Legacy Code 101626

Coordinator Nicola Burke (https://directory.westernsydney.edu.au/search/name/Nicola Burke/)

Description This subject focuses on the interrelationships between image and text in children's literature. The subject examines both picture books and other image-based children's texts, including electronic texts and graphic novels. The subject will examine children's texts as cultural artefacts, theories of visual literacy and how image and text combine to create meaning. Students will have the opportunity to create their own picture book for their final project.

School Humanities & Comm Arts

Discipline Literature

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify children's texts as cultural artefacts produced in and through discourse that arise in particular social, historical contexts
2. Employ the concept of 'visual literacy' to explore how children/young people read and understand 'visual' texts
3. Identify and engage in key debates around children, childhood and children's literature
4. Compare and evaluate different perspectives for analysing how images and text combine to create meaning
5. Undertake close critical analysis of the visual aspects of children's texts and of the relationships between images and written text
6. Apply the knowledge gained in the subject to design their own picture books

Subject Content

Children, childhood and children's literature
The changing role of the visual in children's literature
History of the use of images in children's texts
The social, cultural and political contexts of children's literature
Ideology and the image
Theories of visual literacy and research on how children read images
The interrelationship of images and text in children's literature
Perspectives and approaches for studying the visual aspects of children's literature
Contemporary visual texts - e.g. picture books, electronic texts, graphic novels, multimodal texts

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	1,000 words	40	N	Individual

- A Subject Reader

LANG 3019 Children's and Young Adult Fiction

Credit Points 10

Legacy Code 102205

Coordinator Nicola Burke (https://directory.westernsydney.edu.au/search/name/Nicola Burke/)

Description This subject explores a wide range of fictional texts created for children, teenagers and young adults from folktales, fairytales and myths to contemporary examples. It focuses on the relationship between young people, the texts created for them and the cultures in which these texts are produced and read. The subject will examine a variety of genres and themes, for example, the experience of childhood as constructed by adult authors of children's texts; post-colonial children's literature; the emergence and development of distinctly Australian children's texts; the development of young adult; literature; the impact of new technologies on children's literature; and role of art in children's literature.

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Equivalent Subjects LANG 3017 - Children's Literature

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically describe the history, features and contemporary understandings of children's literature and young adult fiction.
2. Explain how young people's texts are cultural artefacts produced in and through discourse that arise in particular social, historical contexts
3. Undertake critical analysis of young people's texts from a variety of genres.
4. Identify and engage in key debates and issues around children's literature and young adult fiction.
5. Explain how young people's texts are cultural artefacts produced in and through discourse that arise in particular social, historical contexts.

Subject Content

1. What is children's literature and young adult fiction? The discourses that construct children's and young adult fiction will be examined, including educational and societal assumptions about the nature of childhood/adulthood/adolescence and what young people's fiction is, or should be.
2. The social, cultural and political contexts of children's and young adult fiction will be examined, including post-colonial children's literature, the emergence and development of distinctly Australian children's texts, issues of gender, identity, race and ethnicity.
3. Genres and themes in young people's fiction: the variety of texts for young people and the practises and assumptions that shape them.
4. History of children's literature, including folktales, fairy tales and myths.
5. Role of the visual in children's literature and young adult fiction.
6. Bridging the worlds of childhood and adulthood: the development of "young adult" or teenage/adolescent fiction.
7. Young people's fiction and popular culture.
8. Young people's fiction and new technologies.

Level Undergraduate Level 3 subject

Equivalent Subjects LANG 3058 - Languages and Grammatical Concepts 3A Chinese

Assumed Knowledge

Successful completion of 40 credit points of Chinese language at Level 2 or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. demonstrate a level of lexico-grammatical ability equivalent to, or above stage 5 in productive skills and higher stages in reading comprehension;
2. express themselves clearly and coherently on general as well as specific topics;
3. apply different reading and writing skills to different situations for different purposes;
4. use a range of Chinese cohesive devices and discourse strategies in both speaking and writing;
5. interact with native speakers in both spoken and written Chinese in a linguistically and culturally appropriate manner;
6. demonstrate understanding of aspects of Chinese culture and contemporary Chinese society;
7. use their research and critical-thinking skills developed in the subject to investigate Chinese cultural or social issues and express their opinions.

Subject Content

Introduction to aspects of Chinese grammar, cohesive devices and discourse strategies;
Speaking and aural comprehension practice in Chinese in spontaneous and prepared discussions as well as short talks on a variety of topics;
Practice in reading a variety of Chinese texts for different purposes;
Practice in various forms of writing in Chinese for practical and academic purposes.
Exploration of Chinese culture and contemporary society through a range of topics;
Research on social or cultural topics using data from newspapers, internet sites and/or other sources.

LANG 3021 Chinese 302

Credit Points 10

Legacy Code 100063

Coordinator Ruying Qi (https://directory.westernsydney.edu.au/search/name/Ruying Qi/)

Description This subject further develops the language skills and cultural understanding students already have or have acquired through Chinese 101-301, with an emphasis on oral expression, reading, writing and research skills. It enhances students' ability to interact in both spoken and written Chinese in various situations and ability to research and express their views on Chinese social and cultural issues. Authentic materials are used as much as possible in order to deepen students' understanding of the Chinese language, culture and society, and improve their ability to interact in various settings.

Level Undergraduate Level 3 subject

Assumed Knowledge

Chinese 301 or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Further improve their knowledge of Chines grammar and their ability to apply it to a range of spoken and written discourse
2. Further develop their listening skills and ability to express themselves clearly and coherently on general as well as specific topics
3. Further develop their reading and writing skills for different purposes
4. Further develop their ability to use Chinese cohesive devices and discourse strategies in both speaking and writing
5. Further develop their ability to appreciate major speech registers in the language and express themselves appropriately in different situations
6. Further develop their understanding of aspects of Chinese culture and contemporary Chinese society

7. Further develop their research and critical-thinking skills and ability to use such skills to investigate Chinese cultural or social issues and express their opinions

Subject Content

Speaking practice in Chinese in spontaneous and prepared discussions as well as short talks on a variety of topics
Practice in reading a variety of Chinese texts from different sources for different purposes
Practice in writing appropriately in Chinese for practical and academic purposes
A review of aspects of Chinese grammar, cohesive devices and discourse strategies
An exploration of Chinese culture and contemporary society through a range of topics
A research on a social or cultural topic using data from Internet sites and other sources

LANG 3022 Chinese 303: Twentieth-Century Chinese Literature

Credit Points 10

Legacy Code 100064

Coordinator Ruying Qi (https://directory.westernsydney.edu.au/search/name/Ruying Qi/)

Description This subject introduces students to modern and contemporary Chinese literature in the Chinese language. It includes a brief overview of Twentieth-century Chinese literature, and exposes students to a variety of literary genres. Students are expected to work individually and in groups in order to analyse, evaluate and critique these works, whose social and cultural context is integral to understanding them. This process will not only increase students' understanding and appreciation of Twentieth-century Chinese literature, but it will also develop their critical thinking skills.

Level Undergraduate Level 3 subject

Assumed Knowledge

Chinese 202 or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. gain an appreciation of the resilience and resourcefulness of China's ancient wisdom and of its historical development.

2. gain an insight into the interplay between philosophical thought, religion, society, government, culture and life to meet challenges and opportunities of a historical change.
3. have a deepened understanding of the true qualities and strengths of Chinese cultural traditions.
4. enhance their appreciation of the continuing relevance of traditional Chinese thought to contemporary Chinese society.
5. further develop their ability to appreciate classical Chinese texts.
6. develop their reflective, comparative and critical-thinking skills and ability to use such skills to analyse Chinese cultural or social issues through research, presentation and proposal/essay writing.
7. be enriched by the treasures of the past and participate in conversations concerning the present and future directions in Chinese culture, thought and philosophy.

Subject Content

- An overview of aspects of China's ancient wisdom and its historical development;
- Topics such as Philosophical thought, religion, education, government, management, strategy, health and life that have been important in history as well as in contemporary times in The Eastern and Western World serving as unifying themes.
- Critical analysis of China's influence across regions of Asia and comparative analysis of perspectives of the Eastern and Western values if applicable being brought to bear on the themes.
- An analysis and Understanding of complex social and cultural Issues in their historical, economic and political contexts.
- A series of guided readings, discussions, presentations and research on the nature and capacity of China's ancient wisdom and its application to today's world.

LANG 3026 Chinese 307: The Cultural Context of China

Credit Points 10

Legacy Code 100067

Coordinator Ruying Qi (https://directory.westernsydney.edu.au/search/name/Ruying Qi/)

Description This subject provides a brief overview of Chinese culture and examines the cultural interchanges of which it has been a part throughout history. Students will analyse the effects of these cultural contacts, both positive and negative. They will also evaluate and critique relevant cultural issues, from a comparative perspective. This process will increase students' understanding of the cultural identity of China, and it will also enable them to appreciate the importance of outside cultural influences, thereby reinforcing an open and mature attitude towards multiculturalism. The subject will be conducted in Chinese.

School Humanities & Comm Arts

Discipline Eastern Asian Languages

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Assumed Knowledge

Chinese 204 or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. demonstrate understanding of the essence of Chinese traditional culture and Chinese cultural identity;
2. identify the cultural exchanges that have taken place between Chinese and other peoples;
3. explain the impact of Chinese culture on other cultures and its continuing relevance to the contemporary world;
4. demonstrate an understanding of how other cultures have affected Chinese culture, up to the present;
5. assess cultural contact situations with an open and mature attitude towards multiculturalism;
6. apply sound analytical and critical thinking skills while dealing with cultural issues.

Subject Content

The essence of traditional Chinese culture and Chinese cultural identity;

The impact of Chinese culture on other cultures: great inventions, the explorers Zhang Qian and Zheng He, and overseas students;
The impact of other cultures on Chinese culture: Buddhism, Marco Polo, the Christian missionaries, the Opium War;
Chinese culture and Chinese people through Western eyes;
Western culture and Westerners through Chinese eyes;
Chinese subcultures in Taiwan, Hong Kong and overseas;
A brief history of Chinese migration to Australia.

Level Undergraduate Level 3 subject

Equivalent Subjects LGYB 6564 - Texts and Techniques

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Assumed Knowledge

A good standard of written expression.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the characteristics of genre in the categories of creative non-fiction studied;
2. Demonstrate their understanding of those characteristics in their own writing;
3. Analyse technical and aesthetic relationship of non-fiction to fiction;
4. Demonstrate the etiquette of editorial advice;
5. Practice the techniques of self-editing;
6. Demonstrate their own authorial voice across a range of autobiographical narrative genres.

Subject Content

Autobiographical narrative forms
The personal essay
The literary essay
The conceptual essay
Biography: writing the lives of others
Meta-fictional, experimental and hybrid fictions
Documentary fictions
Reportage

Prescribed Texts

- A Subject Reader of primary sources compiled by the subject coordinator

LANG 3028 Crime Fiction

Credit Points 10

Legacy Code 102315

Coordinator Matt Mcguire (https://directory.westernsydney.edu.au/search/name/Matt Mcguire/)

Description This subject will introduce students to a variety of texts drawn from the history of crime fiction; including the classic detective story, the Golden Age mystery, US 'Hard Boiled' fiction, the police procedural, and the literary crime novel. Students will develop their knowledge of theories of genre, specifically its formation and evolution, and its implications for the process of making meaning. They will learn about the changing place of crime fiction within the English literary canon, exploring the genre's relationship to questions of artistic value, the distinction between high and low culture, and the differences between literary and popular fiction.

School Humanities & Comm Arts

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 60 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. analyse a variety of texts drawn from the history of crime fiction
2. identify the formal and thematic elements within various sub-genres of crime fiction
3. employ genre theory to interpret individual texts and to situate them within the broader history of crime fiction
4. locate crime fiction within a series of arguments about the nature of high and low art, and within the critical approaches to the history of the genre.

Subject Content

Content may vary between semesters, but it will draw from, or elaborate on, the following pool of topics:
- The Classic detective story
- The Golden Age Crime novel
- the US 'hard boiled' tradition
- The police procedural
- contemporary Crime fiction
- genre theory
- theories of High and low art
- Critical history of Crime fiction

LANG 3029 Culture, Discourse and Meaning

Credit Points 10

Legacy Code 102185

Coordinator David McInnes (https://directory.westernsydney.edu.au/search/name/David McInnes/)

Description In Culture, Discourse and Meaning students explore our culture by looking closely at how we make and share meaning. You look at how power operates by supporting and promoting some ideas and ways of life but not others. In Culture, Discourse and Meaning you also consider how students might change our culture. In your work in the unit, you will develop analytical, interpretive, and critical skills for culture analysis. Through project-based work, students will develop the capacity to analyse and critique the production and operations of power and consider changes in cultural practice.

School Humanities & Comm Arts

Discipline Linguistics

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Incompatible Subjects COMM 2045 - Critical Discourse Analysis

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain how language use reproduces and has the potential to change culture
2. Analyse and interpret texts on their social contexts using language-focused analyses
3. Prepare a research-based report on a project investigating the formation and distribution of discursive formations through cultural practice.

Subject Content

- language, culture, discourse
- genres and social practices
- identity and cultural politics
- Intertextuality and recontextualisation
- Tools for Discourse analysis - models of text in context; the language of representation; the language of interaction and negotiation; modes and modalities of language use

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Discourse analysis (x2) (30% each)	500 words each	60	N	Individual
Research Report	1,500 words	40	N	Individual

Prescribed Texts

- Locke, T. (2004). Critical discourse analysis. Bloomsbury Publishing.

LANG 3030 Discourse Analysis

Credit Points 10

Legacy Code 101946

Coordinator Adrian Hale (https://directory.westernsydney.edu.au/search/name/Adrian Hale/)

Description This subject explores language at the discourse level, introducing different linguistic approaches used in the analysis of discourse. It provides a general overview of major theoretical frameworks and current issues in discourse analysis. It examines authentic spoken and written examples, and demonstrates how discourse analysis is relevant to other disciplines such as media and communication, education, cultural and gender studies, and so on.

School Humanities & Comm Arts

Discipline Linguistics

LANG 3031 Discovering language: Everything you've ever wanted to know but never asked

Credit Points 10

Legacy Code 102625

Coordinator Mark Antoniou (https://directory.westernsydney.edu.au/search/name/Mark Antoniou/)

Description Why can any child learn any language? How come there are so many languages on this planet? What is the most difficult language? What happens to us if we speak more than one language? There are plenty more questions about language that we all have and this subject is all about asking and finding out about language in an engaging way. Students will learn how to ask questions about language and what research can tell us in answering them. The subject will equip students with the tools to investigate many aspects of language as a defining feature of humans.

School Humanities & Comm Arts

Discipline Linguistics

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) LANG 1014

Equivalent Subjects LANG 3070 - Research Methods in Linguistics

Restrictions

Successful completion of 60 credit points of study including LANG 1014 - Introduction to Linguistics plus 20 credit points from subjects in the Linguistics major.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and analyse the parts of advanced research articles.
2. Demonstrate understanding of research methods used in the field of Language and Linguistics, including qualitative and quantitative approaches.
3. Identify, discuss and select appropriate research topics in the student's area of interest.
4. Demonstrate understanding of the basic steps to conducting research.
5. Use basic research methods for designing and analysing linguistic data.
6. Apply basic descriptive and inferential statistical concepts and techniques.
7. Write a research proposal.

Subject Content

Fundamental knowledge on how to read research articles: Identifying the basic parts of an article, reporting and critically assessing its content.
Identification of research-worthy and/or controversial topics.
Basic qualitative and quantitative tools to analyse linguistic data.
Step-by-step guidance on how to write a research proposal, including a summary, a research question, the motivation for the study through a literature review, methodology, analysis and predicted results.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Quizzes	1,500 words in total	30	N	Individual

LANG 3033 Film and Drama

Credit Points 10

Legacy Code 100866

Coordinator Anthony Uhlmann (https://directory.westernsydney.edu.au/search/name/Anthony Uhlmann/)

Description This subject offers a survey of one or more of the following: drama, drama on film and film drama. It will examine key concepts in cinema theory, dramatic form and film production. Comparison may be made between theatre texts and film adaptations related to the work of specific dramatists; or drama texts may be considered in themselves (often with the screening of filmed versions of these dramas). Alternatively, film itself will be considered as a disinct dramatic form whose contours will be traced in relation to the work of important directors. Viewing films will form an integral part of this subject and students will be expected to attend screenings of films as well as a lecture and tutorial.

School Humanities & Comm Arts

Discipline Literature

LANG 3034 Historical Linguistics

Credit Points 10

Legacy Code 102043

Coordinator Rachel Hendery (https://directory.westernsydney.edu.au/search/name/Rachel Hendery/)

Description This subject provides an introduction into the study of language change. It discusses fundamental questions such as how and why languages change, how we can investigate and theoretically capture language change, as well as how language change is connected to sociocultural change with special focus on the linguistic habitat of Australia.

School Humanities & Comm Arts

Discipline Linguistics

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) LANG 1014

Co-requisite(s) LANG 1028 AND
LANG 2041

Equivalent Subjects LANG 2018 - History of the English Language

Restrictions Successful completion of 60 credit points including the pre-requisite subject listed above.

Assumed Knowledge

Knowledge of fundamental linguistic terminology, introductory level linguistics; preferably phonetics/phonology and structure of language.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. demonstrate knowledge of the key concepts in historical linguistics, and explain this knowledge to others;
2. make connections between the topics in this subject and their significance within the discipline of historical linguistics, especially in relation to the linguistic ecology of Australia;
3. apply theoretical knowledge to the analysis of data;
4. explain the value and principles of research in historical linguistics.

Subject Content

- types, mechanisms and causes of language change
- theory and Models of language change
- investigative methodology of historical linguistics
- what language can tell US about history, especially The habitat and Ecology of languages in Australia

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	60 minutes	30	N	Individual
Case Study	1000 words or equivalent	30	N	Individual
Applied Project	2000 words	40	N	Individual

LANG 3043 Indonesian 305: Past and Present of Indonesian

Credit Points 10

Legacy Code 102331

Coordinator Mustapha Taibi (https://directory.westernsydney.edu.au/search/name/Mustapha Taibi/)

Description This is an advanced (Level 3) subject in the Indonesian Specialisation, which should ideally be undertaken after Indonesian 301 and Indonesian 302. The subject provides an overview of the history of the Indonesian language and its relation to the languages of neighbouring countries. Students will learn how Indonesian has developed as a standard language and how its spelling, lexicon and syntactical structures have changed over history.

School Humanities & Comm Arts

Discipline Southeast Asian Languages

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Assumed Knowledge

Indonesian 301 or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate advanced knowledge of the history and developments of Indonesian
2. Identify historical relationships between Indonesian and other languages
3. Identify the linguistic features of old and modern Indonesian
4. Discuss the relation between language policies and developments of Indonesian.

Subject Content

- history of The Indonesian language
- language planning and standardization
- linguistic variation throughout The history of Indonesian
- historical links with languages spoken in Malaysia, Brunei and Singapore

LANG 3045 Intercultural Communication

Credit Points 10

Legacy Code 101950

Coordinator Mustapha Taibi (https://directory.westernsydney.edu.au/search/name/Mustapha Taibi/)

Description This subject aims to develop the communicative competence of students in intercultural contexts and raise their awareness of issues in the use of languages. It helps the students understand hidden socio-cultural dimensions and equips them with the knowledge and skills necessary for intercultural communication. It also prepares them to critically analyse linguistic and cultural differences around them, appreciate linguistic and cultural diversity, and integrate the subject contents into their future careers. The impact of intercultural communication is highlighted in a range of real-life sectors, such as second language teaching and learning, translation and interpreting services, international business, tourism, community services, and organisational communication. Lectures will be delivered in English and depending on demand, language-specific tutorials will be delivered in Arabic, Chinese, Indonesian and Japanese as well as English.

School Humanities & Comm Arts

Discipline Linguistics

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Equivalent Subjects LANG 3046 - Intercultural Pragmatics

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the connection between language and culture;
2. demonstrate awareness of linguistic and cultural factors that contribute to (un)successful intercultural communication;
3. examine cross-linguistic and cross-cultural differences in verbal and nonverbal communication;
4. use linguistic tools to analyse authentic spoken and written discourses from an intercultural perspective;
5. analyse linguistic and cultural diversities by examining cultural differences;
6. identify effective cross-communicative strategies in various contexts;
7. discuss and apply intercultural communication knowledge and skills to professions (e.g. translation and interpreting services, multicultural education, international business, tourism, community services, etc.).

Subject Content

- relationships between language and culture
- Differences in language use (e.g. lexical equivalence and gap) and culture (e.g. self-orientation vs. other-orientation)
- cross-cultural variability (e.g. Individualism vs. collectivism)
- cross-cultural relationship management (e.g. horizontal vs. vertical)
- face Issues and face-work across cultures
- culture-specific manifestations in spoken (e.g. politeness and impoliteness) and written discourses (e.g. techniques and genres)
- speech acts across cultures (e.g. requests and apologies)
- Hidden dimensions across cultures (e.g. low-contact vs. High-contact)
- cross-cultural communication challenges and strategies (e.g. stereotyping, miscommunication and pragmatic failure)
- Cross-cultural sensitivities (e.g. cultural practices and values, address terms, taboos and solidarity-focused or power-focused communication)

Inherent Requirements

There are inherent requirements for this subject that you must meet in order to successfully complete this subject. Make sure you read and understand the requirements for your subject online.

LANG 3049 Interpreting and Translation Professional Practicum (UG)

Credit Points 10

Legacy Code 101944

Coordinator Anita Byrnes (https://directory.westernsydney.edu.au/search/name/Anita Byrnes/)

Description This subject is a capstone subject for the relevant Interpreting and Translation award and is aimed at assisting students in their transition from interpreting and translation trainees to successful professional interpreters and translators. It provides students with the opportunity to participate in practical aspects of the Interpreting and/or Translation professions and related fields, as well as to undertake supervised practice in the workplace. Students will complete the practical work relevant to their field of specialisation, i.e., Interpreting, Translation or both. Together with LANG3067 Preparation

for NAATI Certification UG it helps students prepare for the NAATI Certification test to be undertaken when they finish this course.

Students must be enrolled in 1519 Bachelor of Arts (Interpreting and Translation), 1692 Bachelor of Arts (Interpreting and Translation) Dean's Scholars or 6041 Diploma in Arts/Bachelor of Arts (Interpreting and Translation) and must have successfully completed 60 credit points. Students should enrol in this subject in their final session of study.

Assumed Knowledge

In order to do the professional practice, students need to have demonstrated a minimum ability to interpret and/or translate, as they will be dealing with real life situations.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply interpreting and/or translation-specific skills and knowledge to the workplace
2. Identify the characteristics and structures of different interpreting and translation settings
3. Articulate and operate with the complexities of professional translation and interpreting

Subject Content

1. Placement at an appropriate industry venue
2. Court attendance and observation
3. Group interpreting and translation practice within a simulated industry environment
4. Self-directed program involving the development of interpreting and translation skills
5. Submission of an observation journal

LANG 3050 Introduction to Stylistics

Credit Points 10

Legacy Code 102186

Coordinator Christopher Conti (https://directory.westernsydney.edu.au/search/name/Christopher Conti/)

Description The focus of this online subject is the language of literature and the craft of writing. The subject explores the rhetorical or figurative dimension of language across literary and non-literary texts. Students analyse a range of short texts - mostly passages from novels and poems - with an eye to the formal basis of their effects. Through recorded lecture pods and online exercises, students are introduced to the basic tools of stylistic analysis, including narrative analysis, metaphorical analysis and critical discourse analysis.

School Humanities & Comm Arts

Discipline Linguistics

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the linguistics basis of literary effects or "style"
2. analyse the rhetorical character of "ordinary" language and text, including the key tropes metaphor, metenymy and irony;
3. apply a range of analytical tools to literary and non-literary texts;
4. implement textual, interpretive and narrative analyses that have applications across discursive and disciplinary boundaries.

Subject Content

Introduction: Literature and literariness - Defamiliarisation - Foregrounding
Module 1: Language as system - Word choices - Collocation
Module 2: Grammar, syntax and function - Transitivity 1: Clauses and agents - Transitivity 2: Patterns
Module 3: Metaphor and metonymy -Tenor and vehicle - Cognitive metaphor theory
Module 4: Language, rhetoric and power - Text and context - Critical discourse analysis
Module 5: Narrative - Focalisation and free indirect discourse - Mind style

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Online quizzes	1,000 words in total	20	N	Individual
Transitivity analysis	1,000-1,500 words	30	N	Individual
Final essay	2,000 words	50	N	Individual

Prescribed Texts

- No prescribed textbook. Short texts for analysis will be drawn from a range of sources, including subjects in the BA English Major, and provided in PDF form (mostly poems and short stories).

LANG 3051 Japanese 301

Credit Points 10

Legacy Code 101952

Coordinator Xiangdong Liu (https://directory.westernsydney.edu.au/search/name/Xiangdong Liu/)

Description This is a Level 3 subject within the Japanese major program, intended for students who have successfully completed Japanese 202 or have acquired equivalent knowledge. It enhances students' comprehension of and ability to use new grammatical structures, expressions, interaction strategies and Kanji characters. In addition to improving the four primary language skills and ability needed for working in Japan or with Japanese people, this subject aims to advance students' knowledge of the modern Japan through the recommended texts and class discussions. Note: This subject is not suitable for native speakers.

Level Undergraduate Level 3 subject

Equivalent Subjects LGYA 0082 - Japanese 304 Discourse in Japanese

Assumed Knowledge

Japanese 203 and Japanese 204 or equivalent knowledge.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. demonstrate knowledge of a range of Japanese discourse styles;
2. analyse Japanese discourse from viewpoints such as identity, gender, politeness and level of formality;
3. explain the discourse functions of ellipsis and euphemism;
4. identify main functions of Japanese discourse particles and some other discourse markers;

5. apply their knowledge about Japanese discourse to produce the most appropriate utterances in a given situation including formal and informal talk with a friend or colleague, dealing with a customer, speaking at a job interview, etc.

Subject Content

Basic discourse styles of the Japanese language;
Major discourse markers and their functions;
Ellipsis and euphemism in Japanese spoken discourse;
Formal and informal expressions in different settings including small talk, telephone conversation, presentation, and interview;
Use of honorific expressions to reflect different levels of politeness and social distance;
Gender differences among Japanese speakers in terms of language use.

LANG 3056 Japanese 306: Japanese Popular Culture

Credit Points 10

Legacy Code 102219

Coordinator Hiromi Muranaka (https://directory.westernsydney.edu.au/search/name/Hiromi Muranaka/)

Description This subject aims to reinforce the Japanese language in all four skills: speaking, listening, reading and writing, via the medium of Japanese popular culture, e.g. manga, anime, Japanese drama and/or J-pop, by exploring and analysing culturally and linguistically specific issues of the language, e.g. address terms and taking turns. Students will explore natural Japanese text and speech in both casual and formal styles at an advanced level, as well as increase their knowledge and understanding of Japanese popular culture.

School Humanities & Comm Arts

Discipline Southeast Asian Languages

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Assumed Knowledge

Japanese 203 and 204 or equivalent knowledge.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Communicate in Japanese in a more natural fashion in a variety of situations.
2. Demonstrate skills in reading and comprehending authentic Japanese materials.
3. Identify linguistic varieties (e.g. based on gender, status and age) in the Japanese language.
4. Demonstrate an understanding of non-verbal communication patterns found in the Japanese culture and society.

Subject Content

- use of Japanese popular culture materials such as drama, animation, J-pop and manga to enhance Grammar and discourse in Japanese, both in spoken and written media.
- language tasks to promote fluency in all four language skills.
- Analysis of specific issues in Japanese language (e.g. address forms, characteristics of casual/formal speech, male/female speech, politeness, onomatopoeia).
- comprehension of non-verbal cultural Issues related to Japanese society through Japanese popular culture materials found in gesture, facial expressions and choice of Topics, etc.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	1 hour	30	N	Individual
Applied Project	10-20 minutes presentation and an essay equivalent to 2,000-3,000 Japanese characters	40	N	Individual
Intra-session Exam	UP to 2 hours	30	N	Individual

LANG 3057 Languages and Grammatical Concepts 3A: Arabic

Credit Points 20

Legacy Code 101709

Coordinator Zouhir Gabsi (https://directory.westernsydney.edu.au/search/name/Zouhir Gabsi/)

Description This is an advanced Level 3 language and linguistics subject for students of modern Arabic. Lectures for the grammatical concepts component are held in English for students of all languages while other activities are language-specific. The aim of the subject is twofold. On the one hand it aims, to develop a practical and theoretical understanding of the ways in which major concepts used in everyday speech and writing are mapped and organized in the lexicon and the grammar of human languages, and how these forms develop in learners and users. On the other hand, it aims to develop advanced comprehension and production skills in Arabic language, including higher stages optional structures, through critical examination of contemporary and historical text and discourse samples from a variety of registers. An understanding of contemporary Arab culture and society is also fostered through comparative research projects on specific cultural, social and/or linguistic, aspects that are of interest to students. A range of CALL (Computer Assisted Language Learning) activities are utilised for this subject.

Level Undergraduate Level 3 subject

Incompatible Subjects LANG 3010 - Arabic 301 LGYA 1259 - Languages 303 Grammatical Concepts Across Languages

Assumed Knowledge

Successful completion of 40 credit points of Arabic Language at Level 2.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. gained an understanding of languages families, main linguistic typologies and the collocation of Arabic within the Semitic languages family;
2. acquired an understanding of key concepts and terminology in the study of lexical categories and sentence structure in the world languages with a specific focus on Arabic;
3. developed ways for identifying those lexico-grammatical concepts through corpus analysis in Arabic compared to English and other languages;
4. identified and learned to describe key areas of interface between pragmatically motivated language use and language structure reflecting on texts from different historical periods and critically using their own bilingual and/or multilingual experience;
5. gained an appreciation of cross linguistic development and particular difficulties in learning other languages with specific focus on learning Arabic; and
6. attained an advanced level of lexico-grammatical ability in productive skills and in reading comprehension

Subject Content

The cross-linguistic and typological component includes:
- An introduction to Basic concepts in identifying language families and typologies
- identifying and discussing major grammatical concepts, Categories and terms across languages at lexical level including verb, noun, person, number, tense and modality
- identifying and discussing major grammatical concepts in reference to syntactic structure across languages with reference to canonical or default mappings
- pragmatic and Semantic contribution to syntactic choices. e.g. politeness and probability, Topic and focus and their contribution to special Mapping on linguistic structure, such as question formation, passives, emphatic constructions
- Developmental Issues and difficulties in The acquisition and/or translation of those Structures across languages
Grammatical structures and their functions in the following areas:
- Review of advanced aspects of Arabic grammar e.g. Nominal and Verbal Sentences; negating and expressing tense; reported speech; nominative, genitive and accusative cases and their applications
- Study and analysis of some exemplary texts: Classical, modern Standard Arabic and dialects
- Practice in applying grammatical aspects in writing to produce comprehensive and grammatically correct text across diverse genres;
- Searches of internet sites and other original sources for retrieval of relevant corpus data (diachronic and synchronic, written as well as, where Possible, spoken discourse) for processing, analysis and use. written and spoken materials may include short stories, Biographies, anthologies, children stories, articles from newspapers and magazines, plays or film excerpts, news and interviews

Prescribed Texts

- A collection of language and culture-specific reading materials, notes and exercises will be developed and made available including online material.

LANG 3058 Languages and Grammatical Concepts 3A: Chinese

Credit Points 20

Legacy Code 101710

Coordinator Chong Han (https://directory.westernsydney.edu.au/search/name/Chong Han/)

Description In 2013 this subject replaced by 101951 - Chinese 301. This is an advanced Level 3 language and linguistics subject for students of modern Chinese. Lectures for the grammatical concepts component are held in English for students of all languages while other activities are language-specific. The aim of the subject is twofold. On the one hand it aims, to develop a practical and theoretical understanding of the ways in which major concepts used in everyday speech and writing are mapped and organized in the lexicon and the grammar of human languages, and how these forms develop in learners and users. On the other hand, it aims to develop advanced comprehension and production skills in Chinese language, including higher stages optional structures, through critical examination of contemporary and historical text and discourse samples from a variety of registers. An understanding of traditional and contemporary Chinese culture and society is also fostered through comparative research projects on specific cultural, social and/or linguistic, aspects that are of interest to students. A range of CALL (Computer Assisted Language Learning) activities are utilised for this subject.

Incompatible Subjects LGYA 0055 - Chinese 301 LGYA 1259 - Languages 303 Grammatical Concepts Across Languages

Assumed Knowledge

Successful completion of 40 credit points of Chinese Language at Level 2.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Gained an understanding of languages families, main linguistic typologies and the collocation of Chinese within the Romance languages family;
2. acquired an understanding of key concepts and terminology in the study of lexical categories and sentence structure in the world languages with a specific focus on Chinese;
3. developed ways for identifying those lexico-grammatical concepts and through corpus analysis in Chinese compared to English and other languages;

4. identified canonical mappings of concepts to Chinese linguistic structure in contemporary and earlier historical texts using linguistic theory constructs and their own linguistic experience;
5. identified and learned to describe key areas of interface between pragmatically motivated language use and language structure reflecting on texts from different historical periods and critically using their own bilingual and/or multilingual experience;
6. attained a level of lexico-grammatical ability equivalent to stage 5 in productive skills and higher stages in reading comprehension; and
7. developed their understanding of aspects of Chinese culture and contemporary Chinese society, research and critical-thinking skills and ability to use such skills to investigate Chinese cultural or social issues and express their opinions.

Subject Content

Grammatical structures and their functions in the following areas:
- Review of fundamental aspects of Chinese grammar: Phonology, minimal pairs, syllabification, allophony and phonological variation. Lexical categories and their behaviour;
- A brief sketch of the history of the language through some exemplary texts: including the emergence of vernacular Chinese in Tang and Song dynasties and its development through Ming and Qing dynasties to early 20th century compared to contemporary texts
- Searches of internet sites and other original sources for retrieval of relevant corpus data (diachronic and synchronic, written as well as, where Possible, spoken discourse) for processing, analysis and use. written and spoken materials may include short stories, Biographies, anthologies, children stories, articles from newspapers and magazines, plays or film excerpts, news and interviews
- research on Issues in Chinese language, culture and contemporary society using data from internet sites and/or other sources.
The cross-linguistic and typological component includes:
- An introduction to Basic concepts in identifying language families and typologies
- identifying and discussing major grammatical concepts, Categories and terms across languages at lexical level including verb, noun, person, number, tense and modality.

- Developmental Issues and difficulties in The acquisition and/or translation of those Structures across languages.

LANG 3059 Law, Literature and Culture

Credit Points 10

Legacy Code 102416

Coordinator Christopher Conti (https://directory.westernsydney.edu.au/search/name/Christopher Conti/)

Description This subject explores the value of literature to provide insight into the role of law in society. With special emphasis on the post-Mabo context of Australian culture, students will examine the law not just as a set of codified rules or as a legal system but as a cultural story that embraces an understanding of who we are and where we came from. We view law not just as a set of rules but as a cultural story that defines our identity and roots. By analysing literary representations of legal notions such as justice, guilt, punishment, agency and confession, students will seek to understand the shared ground between literature and law, asking the thought-provoking question: "What can poets teach judges?" Through this exploration, students will enrich their understanding of both disciplines.

School Humanities & Comm Arts

Discipline Literature

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss the culture of the rule of law and its impact on minority groups in Australia.
2. Investigate the intersection of law, sovereignty, narrative and race.
3. Analyse key legal concepts and practices (e.g. testimony, confession, crime, punishment, judgment, justice, human rights, etc) in the critical terms of their literary representation
4. Critically examine the politics and aesthetics of literary/cinematic discourse on historical and environmental issues.
5. Evaluate and compare the literary representation of legal decisions and issues with selected case studies of legal and historic significance.

Subject Content

Topics include but are not limited to:

- Understanding the rule of law and its cultural/institutional supports;
- Following debates centring on the legal concept of sovereignty, including the distinction between settler sovereignty and Aboriginal sovereignty;
- Exploring practices of Aboriginal recognition in legal and cultural contexts, including the idea of legal story-telling and its cultural impact in The Bringing Them Home Report;
- Examining new genre distinctions like Indigenous Gothic, the sovereignty novel, and eco-fiction as ways of apprehending a new, post-Mabo cultural landscape;
- Investigate the discourse of ‘coming to terms with the past’ in comparative national and colonial contexts;
- Investigate the historical limitations of law to prosecute state crimes like genocide and the evolving legal and aesthetic discourses on the Holocaust;
- Inquire into the concept of emergency law or the state of exception and its fictional representations in comparative national contexts.

LANG 3060 Legal Interpreting (UG)

Credit Points 10

Legacy Code 100196

Coordinator Kenny Wang (https://directory.westernsydney.edu.au/search/name/Kenny Wang/)

Description Legal interpreting is a highly complex process that requires specialised training in interpreting techniques, litigation tactics, legal language and the legal system. This subject is a compulsory subject for students in the BA (Interpreting and Translation) course. It can also be offered to practising interpreters who wish to improve and perfect their knowledge and skills in legal interpreting. It aims to provide students with the theoretical background and the opportunity to develop the interpreting skills necessary to operate at the NAATI professional level as a court interpreter. Lectures are held in English for students of all languages. The tutorials are language specific in Arabic, Japanese, Mandarin and Spanish.

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) LANG 1017

Assumed Knowledge

Bilingual competence in English and one of the languages offered by the School for the interpreting and translation programs.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. interpret accurately in-person in court hearing situations in the consecutive mode
2. interpret accurately over the phone or via video-link in legal settings
3. interpret simultaneously in a court setting in the whispering mode
4. interpret in a triangular situation in a legal conference in the dialogue mode
5. demonstrate essential knowledge of the Australian legal system and awareness of cross cultural and cross linguistic differences and their relevance in the context of court interpreting
6. use essential legal vocabulary
7. sight translate court documents
8. demonstrate understanding of the complexity of the language of the courtroom, including question tactics and the importance of testimony style.

Subject Content

1. Theory and practice of dialogue interpreting in the legal setting.
2. Theory and practice of consecutive interpreting in the legal setting.
3. Theory and practice of sight translation of legal documents.
4. Theory and practice of simultaneous whispering interpreting in the courtroom.
5. Theory and practice of telephone and video-link interpreting in the legal setting.
6. Essential background concepts and vocabulary of the Australian legal system.
7. The language and strategic use of courtroom questions and their significance to interpreting.
8. The language of courtroom testimony and its significance to interpreting.
9. Essential concepts concerned with cross cultural and cross linguistic communication.
10. Ethical considerations and the role of the court interpreter.

Assessment

LANG 3061 Literary Animals

Credit Points 10

Legacy Code 101724

Coordinator Christopher Peterson (https://directory.westernsydney.edu.au/search/name/Christopher Peterson/)

Description This subject explores a selection of literary works that invite us to examine the tenuous border separating the "human" from the "non-human." Readings will allow students to learn how literary texts employ various formal techniques (allegory, anthropomorphism, etc.) that call into question the conventional opposition between human and animal. Particular attention will be given to the intersection of animality, race, gender, and sexuality. Readings may include one or more national literatures, such as American or Australian literature.

School Humanities & Comm Arts

Discipline Literature

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. develop knowledge of the human/animal distinction in literature.
2. gain the ability to identify and analyse formal techniques (allegory, anthropomorphism, etc.) that literary texts employ to explore the human/animal distinction.
3. develop knowledge of the historical contexts from which literary and cultural texts emerge.
4. explore how the concepts of animality, race, gender, and sexuality intersect.
5. develop advanced skills in writing and argument.

Subject Content

-Philosophical perspectives on animals: consideration of John Berger's claim that animals have disappeared from modern life; Cartesian notion that animals are machines and therefore lack language and reason; Bentham's assertion that animal suffering is un
-Ethics and politics of carnivorism: Elizabeth Costello's claim that humans and animals are essentially the same; the limits of sympathy for nonhumans.
-Allegorical animals: consideration of Steve Baker's assertion that literary animals are not transparent allegories about humans; anthropomorphism and anthropomorphobia.
-Intersection of animality with race, gender, and sexuality: how and why social and cultural minorities become associated with animals; investigation into how the opposition between human and animal conditions the bestialization of minorities.
-Emergence of the "posthumanities"; what does it mean to be posthuman? Can humans fully leave their humanity behind? What are the implications of the posthuman for the discourse of human rights?

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Tutorial Paper: Tutorial Discussion Leader	1,000 words	25	N	Individual
Short Written Assignment	1,500 words (4-5 pages)	35	N	Individual
Take-Home Examination	1,500 words (5-6 pages)	40	N	Individual

LANG 3062 Literature and Philosophy

Credit Points 10

Legacy Code 100875

Coordinator Charles Barbour (https://directory.westernsydney.edu.au/search/name/Charles Barbour/)

Description This subject will examine ways in which literature and philosophy interact. It will consider the ways in which literature and philosophy offer important and different ways of thinking. And it will consider the differences between literature and philosophy. Literature will be understood to involve thinking through sensations, while philosophy will be understood to involve thinking through concepts. The subject will examine examples of interaction between literary texts and philosophical texts, considering how literary effects can inhabit philosphical texts and philosophical ideas can permeate literary texts. The subject will consider frequently occurring themes within both literature and philosophy, such as ethics (ways of living and acting).

School Humanities & Comm Arts

Discipline Literature

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. demonstrate grounded theory for the way in which literature may generate ideas through emotions and sensations and the way philosophy generates ideas through concepts;

2. demonstrate an understanding of how philosophical thought differs from other kinds of thinking (science and art);
3. recognise the shared themes of philosophy and literature;
4. identify the ways in which philosophy offers important ways of thinking;
5. demonstrate how a knowledge of literature and philosophy might interact and to recognise the distinctions as well as the points of contact between literary and philosophical texts;
6. understand the ways in which literature and philosophy effect ways of thinking (outside their field); and
7. demonstrate knowledge of the effect of literature on language.

Subject Content

- introduction to theories of art and literature (aesthetics)
- introduction to understandings of thought processes (cognition)
- Discussion of A particular process of interaction between philosophy and literature (whether organised in relation to historical context or The tracing of A shared problematic)
- Examination of The different signs and their outcomes belonging to literature and philosophy

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

Level Undergraduate Level 3 subject

Assumed Knowledge

Bilingual competence in English and one of the languages offered by the School for the interpreting and translation programs.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. interpret a dialogue with segments of up to 60 words in length, in simulated triangular medical situations;
2. interpret accurately over the phone or via video-link in medical/ health settings;
3. sight-translate documents such as medical papers, consent forms, information sheets, into both languages;
4. interpret consecutively into both languages, passages of up to 300 words in length;
5. interpret simultaneously into both languages, medical conference material as well as doctor's consultations with mental health patients
6. acquire an understanding of doctor-patient communication in the Australian context
7. apply essential knowledge of medical language, its history and etymology, and use the vocabulary relating to advanced medical matters;
8. explain the ethical and cultural considerations of Health Care Interpreters;
9. apply knowledge of the Australian medical system and of the medical system in the country/ies where the student's other language is spoken;
10. demonstrate the skills to recognise prefixes, suffixes and root words, identify their meanings and build words, and identify words used with pathological conditions.

Subject Content

The history and main features of medical language
Theory and practice of simultaneous interpreting in medical settings
Theory and practice of dialogue interpreting in medical settings
Theory and practice of consecutive interpreting in medical settings
Theory and practice of telephone and video-link interpreting in medical/health settings
Theory and practice of sight translation of medical documents
Basic concepts and vocabulary relating to advanced medical matters
Knowledge relating to working as a Health Care Interpreter
Knowledge relating to the role and ethics of a Health Care Interpreter
Knowledge relating to the Health Care systems of Australia
Medical Terminology: prefixes, suffixes, and root words

LANG 3066 Postcolonial Literatures: Partition, Dependence and Exile

Credit Points 10

Legacy Code 102434

Coordinator Ben Etherington (https://directory.westernsydney.edu.au/search/name/Ben Etherington/)

Description This subject introduces the postcolonial literatures that emerged in the wake of decolonisation in the second half of the twentieth century. We will read literary works from across the postcolonial world, including from the Middle East, South and South-East Asia, Africa, the Caribbean and Australia, and look at the way in which writers contended simultaneously with the legacy of the colonial system and major historical crises that emerged in the wake of its collapse. We will trace the emergence of the postcolonial reality as writers registered the impact of partition, separatism, persistent dependency, and the large-scale movements of people to the first world, whether as migrants or refugees. Alongside the literature, we will read major works of postcolonial theory: one of the most influential intellectual movements in recent history.

School Humanities & Comm Arts

Discipline Literature

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Assumed Knowledge

A basic knowledge of literary forms, techniques, and styles (as acquired in core subjects for the English major) is desirable as the subject focuses on specific aspects of literary writing.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. critically read a range of key postcolonial literary and theoretical works;
2. compare literary writing from different regions and perceive broader trends and divergences between them;
3. critically read and contrast different modes of literary writing;
4. identify theoretical and historical problems peculiar to the field of postcolonial literature, and deploy critical approaches best suited to addressing those problems;
5. articulate sustained critical arguments, whether in essays or tutorial discussions, focused by a reflective understanding of the relationship between literature, history and politics;
6. identify and understand the impact of postcolonialism on the contemporary world

Subject Content

Postcolonialism was arguably the most vital cultural movement of the second half of the twentieth century, catalysing fundamental shifts in literary cultures, thinking across humanities disciplines and public discourse writ large. Students will encounter literary works and ideas that have shaped the world around them, and will be able to bring these ideas to bear on their studies in any number of other areas. The subject will encompass the following concerns:
1.Postcolonial partition and separatism, and their impact on literary practice;
2.Neo-colonialism and neo-imperialism, and their impact on literary practice;
3.Postcolonial displacement, migration, exile and their impact on literary practice;
4.The work of Edward Said and other major postcolonial theorists;
5. 'Orientalism' and the question of representation and power;
6.Postcolonial feminism;
7.The historical reasons for the confluence of postcolonial and post-structural theory;
8.Dependency and world-systems theories and their implications for literary interpretation;
9.Subaltem theory and its implications for literary interpretation;
10.Theories of diaspora, exile and refuge and their implications for literary interpretation;
11.Postcolonial writers and works from South and South-East Asia, Africa, the Caribbean, the Middle East and Australia.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Proficiency in English and one other language (LOTE) at native or near-native level.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate understanding of the format, standards and requirement of NAATI certification examinations;
2. Apply the translation and/or interpreting techniques necessary to sit the certification examinations;
3. Produce accurate and idiomatic translations and/or interpreting;
4. Critique interpreting and translation quality through implementing principles of translation/interpreting quality assessment.

Subject Content

Dialogue, consecutive and simultaneous interpreting in simulated settings such as medical consultations, public meetings, courtrooms.
Simulated dialogue interpreting over the telephone.
Sight translation of written texts (190-210 words in length).
Translation to and from English of 250-word passages in a variety of formal genres under timed conditions.
Revise translations.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Final Exam	3.5 hours, 3.5 hours, 1.5 hours	100	N	Individual

Prescribed Texts

- There is no set text. All tutorial materials are available on vUWS and should be downloaded and printed out for use in tutorials. The interpreting practice tests and trial exams are available on vUWS.

LANG 3068 Race in Literature

Credit Points 10

Legacy Code 101650

Coordinator Christopher Peterson (https://directory.westernsydney.edu.au/search/name/Christopher Peterson/)

Description In 2024, this subject is replaced by LANG 2058 Race in Literature. This subject explores a selection of modern literary works that focus on the question of "race." Readings will allow students to learn how notions of race have shifted over time, giving particular attention to how mixed-race people challenge dyadic conceptions of racial difference. Readings may include one or more national literatures, such as American or Australian literature.

School Humanities & Comm Arts

Discipline Literature

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. critically discuss the representation of race in literature;
2. analyse critically the interaction between literary texts and shifting definitions of race in a culture.;
3. identify the historical contexts from which literary and cultural texts emerge;

4. demonstrate the intersection of the concepts of race, sexuality and gender; and
5. demonstrate advanced capacities in oral and written argument.

Subject Content

The national literature or literatures studied in this subject will vary from year to year depending on the subject coordinator's area of expertise. Topics to be studied will address some of the following topics:
- 19th century white authors and race: exploration of how their literary production reflects their views on slavery; race and animality
- 20th century black authors and race
- the problem of racial "authenticity"; investigation of how people of mixed-race identity problematize the black/white division; legal prohibitions on miscegenation.
- "Nativism" and "Primitivism" in the 1920s: exploration of how race relates to gender and sexuality; the Jew as racial other.
- black/white conceptions of beauty; consideration of Cheng's notion of "racial melancholia."

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Essay	Tutorial Paper 500 words	25	N	Individual
Essay	1500 words (5-6 pages)	35	N	Individual
Final Exam	1500 words (5-6 pages)	40	N	Individual

LANG 3069 Contemporary Irish Writing

Credit Points 10

Legacy Code 102078

Coordinator Anne Jamison (https://directory.westernsydney.edu.au/search/name/Anne Jamison/)

Description 'Contemporary Irish Writing' is a level 3 subject within the English and Creative Writing Majors/Minors. This subject examines a range of contemporary Irish writing across several different genres. It will provide an opportunity for students to read and study in detail a variety of texts that explore Irish consciousness in light of the social, cultural and political transformations of contemporary Irish society. Students will be asked to consider the ways in which these texts interrogate Irishness and identity, as well as issues of gender, sexuality, race and the environment in rural and urban Ireland.

School Humanities & Comm Arts

Discipline Literature

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain a range of contemporary Irish texts in their intellectual, historical and critical contexts.
2. Discuss critical approaches to the study of a range of authors and the connections between them.
3. Critically analyse texts and other critical readings.
4. Appraise the formal and aesthetic dimensions of contemporary Irish literature.
5. Recognise and formally analyse, in context, different genres of writing.
6. Organise, plan and deliver a critically-informed literary essay.

Subject Content

1. Contemporary Irish writing.
2. Literary and cultural representations of gender, sexuality, race and the environment in contemporary Irish writing.
3. Irishness and Irish identity; personal and national self-definition in Ireland; Irish consciousness.
4. Contemporary social and political contexts within which recent Irish writing has been published.
5. Irish literary traditions and new directions in contemporary Irish writing.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Presentation	5-10 minutes	20	N	Individual
Essay	1000 words	35	N	Individual
Essay	1800 words	45	N	Individual

Prescribed Texts

The subject's set texts may vary from year to year depending on availability but selections will always be made from a variety of contemporary Irish writing across multiple genres (poetry, fiction, drama).

LANG 3071 Second Language Acquisition

Credit Points 10

Legacy Code 101451

Coordinator Kenny Wang (https://directory.westernsydney.edu.au/search/name/Kenny Wang/)

Description This subject is designed for students who are interested in understanding how a second language is learned. It examines learning in both natural or classroom contexts as well as language development in child and adult learners. Students are introduced to current theories of Second Language Acquisition, as well as current research and its applications to the classroom or the translation process. Students will conduct a small research project to become familiar with the process

of learning a second language and some basic research notions and techniques.

School Humanities & Comm Arts

Discipline Linguistics

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Equivalent Subjects LGYB 1999 - Second Language Acquisition

Learning Outcomes

On successful completion of this subject, students should be able to:

1. appreciate the widespread importance of the Second Language Acquisition in Australia and its relevance both to the teaching and learning of English as second language for non English background children and adults as well as overseas students (ESL);
2. demonstrate their understanding of the relevance of the teaching and learning of any language other than English (LOTE);
3. demonstrate an understanding of the development of the field and theories of Second Language Acquisition (SLA);
4. recognise developmental sequences in the acquisition of a second language with particular reference to English as a Second Language;
5. demonstrate their understanding of the variation and the role of individual differences and environmental factors in SLA;
6. conduct an SLA research project including elicitation, recording and analysis of interlanguage data;
7. apply their knowledge of the implications of SLA findings for language assessment and language instruction.

Subject Content

The relevance of Second Language Acquisition (SLA) to understanding learners in Australian and international contexts;
Key terms in SLA and central issues from observation of learners' behaviour;
Historical and theoretical developments in the SLA field: from Behaviourism and Contrastive Analysis to Current theories and Models of SLA;
Focus on one current theory: Processability Theory and its research methodology;
L1-L2 Transfer;
Language assessment and syllabus construction in L2: the Teachability Hypothesis and current developments.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Quiz	A combination of short quizzes, exercises conducted mainly over the first half of the semester requiring a total of 1.5-2 hrs of tutorial time.	30	N	Individual
Quiz	One short test on subject content, mainly multiple choice, held about mid semester, requiring about 45 minutes.	30	N	Individual
Report	2000 words	40	N	Individual

LANG 3072 Short Fiction in the Americas

Credit Points 10

Legacy Code 101791

Coordinator Chris Andrews (https://directory.westernsydney.edu.au/search/name/Chris Andrews/)

Description This subject surveys short fiction written in the Americas in English, French, Spanish and Portuguese during the twentieth century. It examines the history of short fictional genres, theories of their functioning, and the ways in which they register and transmit the various national and regional cultures of the Americas. The subject allows students majoring in Spanish to undertake language-specific assessment tasks (reading original texts in Spanish and writing their

essay in Spanish) while other students read the texts and complete their assessment tasks in English.

School Humanities & Comm Arts

Discipline Literature

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Articulate the key elements and features of a series of representative works of short fiction from the Americas.
2. Develop an original, closely-argued response to a question about short fiction couched in theoretical or historical terms.
3. Explain the role of the press and particular prestigious magazines in shaping American short fiction in the twentieth century.
4. Identify and describe genres of short fiction from the 'micro-story' to the novella, giving an account of their conventions.
5. Understand the mechanisms by which narrative tension is maintained in short fiction.
6. Analyze the ways in which short fiction constructs and undoes selves.

Subject Content

Short fiction in the twentieth century:
- The limits of short fiction: how short can It be? where does The novel begin?
- writers, publishers, editors, readers: The periodical press and The short story
- theories of short fiction from The Russian Formalists to Guillermo Martinez
- short fiction and narrative selves
- gender, race and culture in The short story
The texts will be drawn from the following national and regional literatures:
- Argentina
- Brazil
- Mexico
- The French-speaking Carribean
- USA
- Canada

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Essay	2,000 words	50	N	Individual
Presentation	5 minutes	25	N	Individual
Quizzes	2 x 10-minute quizzes	25	N	Individual

Prescribed Texts

- A course reader containing the essential primary texts will be available.

LANG 3073 Sociolinguistics

Credit Points 10

Legacy Code 101450

Coordinator Stacey Sherwood (https://directory.westernsydney.edu.au/search/name/Stacey Sherwood/)

Description This subject is designed to develop students' interest in language and society and give them an understanding and appreciation of variation in language (accents, dialects) and language change, language planning, as well as the interdependent relationship between language learning, communicative competence and cultural practices, both in the Australian context and also in a more global context. It also aims to show students how this subject fits in with other language and linguistics-related disciplines, e.g. Linguistics, Bilingualism and Biculturalism, Second Language Acquisition.

School Humanities & Comm Arts

Discipline Linguistics

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Equivalent Subjects LANG 1023 - Sociolinguistics

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Reflect and discuss language variation in its complex social context.
2. Investigate variation in language empirically.
3. Evaluate the significance of language variation and multilingualism with a particular focus on Australia.
4. Apply principles and approaches to sociolinguistics in the contexts of language policy and planning, communication and education.

Subject Content

- Overview of The field of sociolinguistics and its connections to other fields of linguistics and other disciplines.
- Dimension of variation in language: social, stylistic and regional.
- language variation in Australia.
- language variation and its relation to language change.
- Multilingualism and language variation.
- language variation and society, including education.

Assessment

Learning Outcomes

On successful completion of this subject, students should be able to:

1. improve listening skills in a variety of gemes and develop techniques for autonomous learning of those skills;
2. master the notetaking skills necessary to accurately develop an argument or respond orally to one;
3. demonstrate high level of grammatical accuracy and extensive knowledge of vocabulary when speaking;
4. demonstrate breadth and depth in the treatment of relevant ideas and information;
5. be able to produce speech suited to a given audience, purpose and/or content, and to manipulate language to meet the requirements of the task with flair and originality;
6. develop aspects of effective public speaking skills, including techniques for the autonomous learning of those skills;
7. be able to analyse oral production in Spanish, identifying its linguistic and contextual features;
8. be able to respond to an argument personally, critically and sensitively;
9. develop habits of lifelong language learning.

Subject Content

- Variables of spoken language; content, speed, text type, number of interlocutors, accent, speaker's gender; techniques for improving listening comprehension.

- Aural comprehension practice in Spanish by listening to visiting speakers, audio and video tapes, radio and television broadcasts.
- Extensive practice with formal and informal registers, extempore and prepared speech, and group discussion.
- Analysis of a selection of contemporary oral texts: parliamentary speeches, radio interviews, public affairs programs, lawyers court addresses, judges' sentences, etc.
- Rewording of A given text for A different audience or purpose.
- Standard systems for notetaking; individual adaptation; techniques for notetaking practice.
- Public speaking skills: voice work, audience contact, discourse organization; techniques for autonomous development of public speaking skills.
- The nature oflanguage acquisition, especially at advanced levels; techniques for developing habits of lifelong language learning.

LANG 3078 Spanish 305: Contemporary Literature

Credit Points 10

Legacy Code 100155

Coordinator Ignacio Garcia (https://directory.westernsydney.edu.au/search/name/Ignacio Garcia/)

Description This is a compulsory subject for students of the BA (Interpreting and Translation) (Spanish), and one of the optional subjects for students with advanced language skills in Spanish enrolled in the BA. It aims to introduce students to the study of contemporary Hispanic literary works so that they may acquire an appreciation of contemporary Latin American and Spanish literature and an understanding of the historical, political and social contexts in which that literature developed. Emphasis will be placed on the writer's role as an interpreter and critic of society.

School Humanities & Comm Arts

Discipline Southern European Languages

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. gain an understanding of the history of modern literature in Spanish;
2. improve their comprehension skills through reading a wide variety of Spanish texts, including regional and social variants, and specific registers;
3. understand some of the main events which shaped the character of Hispanic writing in the 20th Century;
4. gain insights into writers' attempts to interpret society (e.g. problems, trends, controversies);
5. acquire the vocabulary necessary to be able to discuss and write about the content and structure of these texts, as well as their historical and cultural context.

Subject Content

An overview of the history of literature in Spanish in the 20th Century.
Some significant events which had an impact on Hispanic literature: the Spanish-American War, the Spanish Civil War, the Cuban Revolution.

Examination of a selection of representative contemporary novels from Spain and Latin America.
Specific themes and leitmotifs developed by contemporary authors, e.g. passivity, waiting, guilt, love, uncertainty about identity.
The development of writing skills using genres such as reviews and essays.

LANG 3079 Spanish 306: Contemporary History

Credit Points 10

Legacy Code 100156

Coordinator Ignacio Garcia (https://directory.westernsydney.edu.au/search/name/Ignacio Garcia/)

Description This subject aims to introduce students to the history of Spain and Latin America in the Twentieth century to enable them to understand the historical background to present-day events, and to identify the major contemporary policy issues in these regions of the world.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. become familiar with main historical events during the Habsbourg monarchy;
2. delve into the culture of the Renaissance and the Baroque periods in Spain;
3. improve their reading skills through the reading of works of the major Golden Age poets and prose and play writers;
4. learn to analyse some of the great masterpieces of literature during this period;
5. acquire the vocabulary necessary to be able to discuss and write about the message, structure, historical and cultural context of these texts.

Subject Content

- general introduction to The history of The Iberian Peninsula during The XVI and XVII centuries.
- general introduction to The culture of The Renaissance and Baroque periods.
- An Overview of The history of literature of The Golden Age period.
- Examination of A selection of representative poems, novels and plays from this period.

LANG 3081 Spanish 308: Spanish Sociolinguistics

Credit Points 10

Legacy Code 100158

Coordinator Ignacio Garcia (https://directory.westernsydney.edu.au/search/name/Ignacio Garcia/)

Description This subject aims to give students an understanding of the phonological, morpho-syntactic, semantic and pragmatic changes in the Spanish language as spoken and written at the start of its second millennium. Particular attention will be paid to the dialectal geography of the Hispanic world, and to the problems faced by the language today, with particular reference to its 'Spanglish' version in emigre communities in the United States and Australia, and to information technology.

School Humanities & Comm Arts

Discipline Southern European Languages

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. understand the phonological, morphosyntactic and lexical variations and changes undergone by the Spanish language in the last decades;
2. recognise differences across regional varieties in terms of politeness, forms of address and speech acts;
3. have an overview of the dialectal geography of Spain, and of the problems encountered in the areas in which the language shares official status with other Spanish languages;
4. learn about the dialectal geography of Spanish America, the characteristics of the principles dialect groups, and the influences of migrant and indigenous languages;
5. explore the problems faced by Spanish today, especially when entering into contact with English as manifested in the 'Spanglish' versions of the language in the subjected States and in Australia;
6. gain an understanding of the extent and status of Spanish in the world, and of issues of standarisation.

Subject Content

- The Spanish language at the beginning of the 21th century: phonological, morphological, syntactic and lexical variation and change.
- Spanish pragmatics: terms of politeness, forms of address, speech acts.
- Peninsular Spanish: The main dialect groups. language policies regarding bilingualism in Catalonia, The Basque Country and Galicia.
- American Spanish. The main dialect groups and their structural characteristics. The impact of indigenous languages and of migrant communities.
- The phenomenon of 'Spanglish'; code switching and language function; 'diglossia' in emigre communities; problems in information technology.
- The extent and status of Spanish in The world.
- Issues of standarisation: The use of The language in The media and by The administration, The use of non-sexist language.

LANG 3082 Special Study in Languages and Linguistics

Credit Points 10

Legacy Code 100201

Coordinator Kenny Wang (https://directory.westernsydney.edu.au/search/name/Kenny Wang/)

Description This Level 3 Languages and Linguistics subject is, primarily, a self-study subject designed to cater for a special area of interest in languages and linguistics not otherwise covered in the subjects

on offer in the languages program or in the BA (Interpreting and Translation) and/or where the student may otherwise find it difficult to complete his or her program of study. Once the topic chosen by the student is approved by the Subject Coordinator a supervisor is nominated and an individually-tailored learning contract, including appropriate language-specific and/or linguistics readings and tasks, is drawn up in collaboration with the supervisor and is submitted to the Subject Coordinator for approval. This approval process should happen, ideally, at least one week prior to the beginning of the teaching semester.

School Humanities & Comm Arts

Level Undergraduate Level 3 subject

Restrictions Permission from the subject Coordinator or Academic program Advisor is required. A Rule Waiver is required to enrol in this subject.

Assumed Knowledge

Level 3 Languages and Linguistics subjects or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of a selected topic in humanities, languages, linguistics, literature, translation or language education.
2. Develop, negotiate and plan for the implementation and evaluation of a small-scale research project.
3. Demonstrate basic research skills such as writing a literature review, basic research methodology and critical evaluation of research.
4. Apply independent research skills to achieve further personal development.

Subject Content

Content will vary according to the topic chosen for study.
Where appropriate, workshops and/or seminars introducing approaches to research will be conducted.

Inherent Requirements

There are inherent requirements for this subject that you must meet in order to successfully complete this subject. Make sure you read and understand the requirements for your subject online.

Inherent Requirements (https://www.westernsydney.edu.au/ir/inherent_requirements/)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Proposal	1,000 - 1,200 words	35	N	Individual

LANG 3083 Specialised Translation (UG)

Credit Points 10

Legacy Code 100198

Coordinator Kenny Wang (https://directory.westernsydney.edu.au/search/name/Kenny Wang/)

Description This subject explores the functional, discursive, rhetorical, syntactic, semantic and lexical features of texts in the following specialised fields: tourism, news media, legal texts, technical & scientific materials. Knowledge of the functions and textual features of specialised texts will provide a basis for translating these specialised texts from and into English. Students will analyse the texts in both languages, and discuss ways in which the texts are to be translated. The subject will be available, depending on sufficient demand, for Arabic, Japanese, Mandarin and Spanish.

School Humanities & Comm Arts

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions Students must be bilingual in the language combinations offered by the School

Assumed Knowledge

Proficiency in English and one other language (LOTE) at native or near-native level.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. identify and analyse the functional, discursive, rhetorical, syntactic, semantic and lexical features of English texts in the specialised fields of tourism, law, journalism and science and technology;

2. identify and analyse the functional, discursive, rhetorical, syntactic, semantic and lexical features of LOTE texts in the specialised fields of tourism, law, journalism and science and technology; and
3. deploy translation strategies appropriate to the specific text types.

Subject Content

1. Development of general translation skills to and from English
2. Introduction of different specialised genres.
3. Translation of texts to and from English from specialised fields such as information booklets at museums, news articles of various types, prescriptive and non-prescriptive legal texts, technical manuals.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task

LANG 3084 Text Analysis for Translation (UG)

Credit Points 10

Legacy Code 102523

Coordinator Chong Han (https://directory.westernsydney.edu.au/search/name/Chong Han/)

Description The subject provides support for students in the BA (Interpreting and Translation) program to develop their analysis skills of the texts they will confront in their translation work. It is a bilingual subject, that is texts in both English and the respective Language Other Than English will be analysed to reveal the structures of meaning and linguistic and contextual features of the texts. It encourages close readings of source texts, understanding where extra-textual knowledge is relevant, and identifying essential meaning components underlying surface linguistic features.

School Humanities & Comm Arts

Discipline Translating and Interpreting

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions Students must be enrolled in 1519 Bachelor of Arts (Interpreting and Translation) or 1692 Bachelor of Arts (Interpreting and Translation) Deanfs Scholars.

Assumed Knowledge

Practice in translation and learning of translation strategies at Level 1 and 2 of the BA (Interpreting and Translation), or equivalent knowledge.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate understanding of theories of text analysis;
2. Identify linguistic and textual structures of English and LOTE passages;
3. Conduct textual analysis of English and LOTE passages;
4. Apply text analysis techniques to translation tasks; and
5. Evaluate and critique the quality of their own translations.

Subject Content

Theories of text analysis as they relate to the translation task.
Identifying different types of source texts
Conducting comparative and contrastive analysis of English and LOTE
Identifying of intra-linguistic factors in source texts in both English and LOTE
Identifying where extra-textual knowledge is required for full comprehension of source texts
Defining translation problems in source texts
Evaluating translation quality

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Translation	150 words x 2 (1 x English + 1 x LOTE)	30	N	Individual
Reflection	500 words x 2	30	N	Individual
Practical	2 Text analysis exercises (each exercise has both English and LOTE tasks)	40	N	Individual

LANG 3086 The Novel

Credit Points 10

Legacy Code 100893

Coordinator Jason Tuckwell (https://directory.westernsydney.edu.au/search/name/Jason Tuckwell/)

Description This subject explores the status and success of the novel as the dominant modern literary form. It examines aspects of the history and development of the novel from the seventeenth century up to the present, along with a range of novelistic texts from one or a number of literary traditions: from classic British and/or American texts to contemporary postcolonial fiction; from the search for the mythical "great Australian novel" to famous and not-so-famous works in languages other than English.

School Humanities & Comm Arts

Discipline Literature

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Read and critically examine a range of novelistic texts from one or a number of cultural traditions.
2. Demonstrate an understanding of a number of fictional modes eg.. modernist, post-modernist.
3. Describe and evaluate a range of narrative techniques and features - e.g. point of view, narrative time, plot versus story, characterisation, dialogue, structure.
4. Demonstrate an understanding of changes that have taken place in novelistic forms over a period of time, thereby showing also their understanding of literary genre.
5. Describe the relationships between the novel and other literary and narrative forms.

Subject Content

. The origins of the novel in earlier genres such as the poetic epic, the prose romance, and Menippean satire.
. The relationship between novelistic writing and journalism, from Defoe to the present.
. The epistolary novel, from Richardson to the present.
. The historical novel, from Scott to the present.
. Romanticism and the novel.
. Modernism and the novel.
. Postmodernism and the novel
. Focus study of a national tradition; for example, the American novel, the Australian novel, the English novel, the Irish novel, the Scottish novel, etc.
. Novels in languages other than English: French, German, Spanish, Russian, Indonesian, Japanese, etc. - to be studied in translation.
. The novel and high culture: F.R. Leavis and "The Great Tradition".
. "Genre" fiction - such as sci-fi, fantasy, thriller, romance, gothic - and popular culture.
. The adaptation of novels into film and television.

LANG 3087 Women's Writing

Credit Points 10

Legacy Code 102374

Coordinator Helen Koukoutsis (https://directory.westernsydney.edu.au/search/name/Helen Koukoutsis/)

Description This subject focuses on the study of women's writing from a broad social and cultural context. While the women writers will change from offering to offering, the content will remain centred on feminist theory and discourses of race, ethnicity, class and gender. The subject will draw on a variety of genres including drama, fiction, poetry, essay and short story. Students will explore women's concerns about motherhood, marriage, violence and domesticity; cultural identity, vocation and the body as (sexual) object. They will also explore women's experiences of madness and victimisation; segregation and alienation; power/lessness and the public sphere.

School Humanities & Comm Arts

Discipline Literature

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 60 credit points in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate knowledge and appreciation of women's writing from across various social and cultural contexts, including the U.S., Europe, Asia and Australia
2. Identify and analyse the generic features and thematic concerns of women's literature
3. Critically assess the extent to which race, ethnicity, class and gender factor into women's creative spaces and practices
4. Apply feminist literary criticism to a reading of the subject's primary texts
5. Conduct independent scholarly research to build on primary knowledge of women's literature
6. Prepare and write well-analysed critical literary essays.

Subject Content

- Women's writing from Australia, New Zealand, U.S., South America, Britain, Europe and Asia
- The changing Roles of women from specific Histories and contexts
- Feminist theory and literary criticism
- Women's rights and social movements
- Migration, diaspora and women's identity
- Critical discourses of race, ethnicity, class and gender
- Women's concerns about motherhood, marriage, violence and domesticity; cultural identity, vocation and the body as (sexual) object
- Women's experiences of madness and victimisation, segregation and alienation, power/lessness and the public sphere

Assessment

LANG 3094 The Value of Literature

Credit Points 10

Legacy Code 102765

Coordinator Christopher Conti (https://directory.westernsydney.edu.au/search/name/Christopher Conti/)

Description This subject explores the value of literature by examining its competing uses in a range of historical contexts down to and including our own. Literature's potent combination of pleasure and instruction embraces conflicting personal, ethical, political, social, and ideological uses even as it resists them. The subject brings a comparative focus to bear on texts from diverse historical and cultural settings as a way of reflecting on and rediscovering the value of literature in the digital age. Students will also explore the function of criticism to educate the individual sensibility and shape the cultures of public life. Primary texts include poems, narrative fiction, essays, and may include drama, film, and other audiovisual material.

School Humanities & Comm Arts

Discipline Literature

Student Contribution Band HECS Band 1 10cp

COMM 1004 OR
COMM 1005 OR
LANG 1015 OR
LANG 1016 OR
LANG 2035

Equivalent Subjects LANG 3032 - English Literature After 1830

Restrictions

Students are required to have completed two of the three level 1 & 2 English core subjects.
Successful completion of 60 credit points in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. demonstrate an understanding of literature as a form of writing and as a way of reading;
2. assess the value of literature across the range of its contested uses;
3. critically evaluate ongoing debates around the literary canon and the public value of literature;
4. evaluate literary texts and their interpretations as a means of cultural intervention as well as of cultural analysis;
5. articulate the distinction between literature&#65533;fs context of production and its context of reception as related but separate frames of interpretation;
6. identify the roles that literature and literary criticism have in cultivating the cognitive and affective potential for social and political change.

Subject Content

Content in this subject will include, but is not limited to, the following
1. debates about how literary texts have been used in order to effect, or resist, social, political, moral, economic, artistic and ethical change, and how language, form and genre are integral in comprehending the way texts pursue their ends;
2. debates about the degree to which literature is, or can be, an effective or viable medium of change;
3. consideration of the ways in which literature has been used as a vehicle for the understanding of self, society and other;
4. debates about literary value, including critical considerations of the canon and canonicity, literature?fs political capacities (or incapacities), and the role of literature in the digital era;
5. examination of literary texts for their uses in social, moral, and political discourse and for their ?euselessness?f or resistance to these uses.

LANG 3099 English Talk

Credit Points 10

Legacy Code 102813

Coordinator David McInnes (https://directory.westernsydney.edu.au/search/name/David McInnes/)

Description In English Talk students engage with spoken forms of English communication, ranging from the casual conversations and interactions of everyday life, through the spoken texts of contemporary media to the more formal spoken genres of political speeches, lectures and other forms of public discourse. Students learn how to analyse forms of spoken English using speech act theory, conversation analysis, and functional models of analysis. Students are provided opportunities to consider their own participation in spoken forms of discourse in English by constructing, analysing and redeveloping the kinds of spoken interaction they will participate in in professional and social settings.

Level Undergraduate Level 3 subject

Equivalent Subjects TEAC 3008 - English Language Linguistics

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Outline the key developments in linguistic approaches to the study of spoken English.
2. Apply a set of analyses to naturally occurring texts, including analysis of Speech Acts, Adjacency Pairs and Exchange Structure.
3. Use a combination of Mood and Speech Function analysis to describe the roles of participants in conversational exchange.
4. Construct, analyse and reconstruct interactive spoken text to facilitate more successful communication.

Subject Content

1. Speech Act Theory.
2. Ethnomethodology and Conversational Analysis: Turn constructional units and adjacency pairs.
3. The Birmingham School: The structure of conversational exchange.
4. Systemic Functional approaches to conversation: Speech Function, Exchange Structure and Negotiation.

LANG 3100 Comedy and Tragedy: Dramas of Death and Rebirth

Credit Points 10

Legacy Code 102914

Coordinator Helen Basides (https://directory.westernsydney.edu.au/search/name/Helen Basides/)

Description This subject examines the writing, performance and theories of Western tragedy and comedy since their beginnings in the ancient world to modern times. In this subject, students read tragic and comic drama, some of which is in translation, as well as key theories of tragedy and comedy. The subject begins with the dramas of the Ancient Greeks, and through an examination of the plays and their context of production, students will be introduced to key ideas about tragedy's and comedy's structure, dialogue, staging, characterisation, audience, and central themes. The subject will trace the development of tragedy and comedy through key periods, including the Renaissance; and it may include a consideration of texts from the twentieth century onwards that have been written for media other than the stage. While tragedy and comedy are intimately linked with ideas about death and rebirth, the subject is closely concerned with the way in which moral choice lies at the heart of both genres.

Level Undergraduate Level 3 subject

Incompatible Subjects LANG 2013 - Comedy and Tragedy

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

1. Analyse a range of tragedies and comedies and identify the way in which generic conventions of tragedy and comedy are employed or subverted.
2. Identify and assess the way in which the context of production of various dramatic tragedies and comedies informs the construction of the plays, including their structure, dialogue, characterisation and themes.
3. Analyse and apply key theories of tragedy and comedy.
4. Explain and analyse the relationship of the plays (and other texts set for study) to contemporary and modern genre theories of tragedy and comedy.
5. Produce independently researched, critically engaged written discussions on topics relating to the generic and historical study of the set texts.

Subject Content

- The nature, origins, and cultural locus of the genres of comedy and tragedy
- Comedy and tragedy in the Ancient Greek classical period
- Elizabethan comedy and tragedy, including the plays of Shakespeare
- Modern comedy and tragedy, both on stage and in other media
- Debates about the continuity or demise of traditions of comedy and tragedy
- Debates about the "death" of tragedy and the rise of liberal tragedy in the nineteenth century

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) LANG 7021 OR
LANG 7020

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Proficiency in English and one other language (LOTE) at native or near-native level.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. demonstrate a good understanding of subtitling and captioning;
2. explain constraints that govern subtitling and captioning and corresponding rules in subtitling and captioning;
3. demonstrate creative and intelligent condensing principles and strategies in subtitling and the principle of verbatim in captioning;
4. demonstrate understanding of domesticating and foreignising theories and their applications in subtitling;
5. explain the intricacies and difficulties of achieving cross-lingual and cross-cultural communications;
6. demonstrate a high level of language proficiency in a variety of text genres.

Subject Content

Presentation of specific nature of subtitling and captioning as audiovisual translation, including the governing constraints and principles
Introduction of linguistic and cultural dimensions to subtitling and captioning
Introduction of relevant translation theories and their application

Practical strategies in subtitling and captioning

LANG 7005 Bilingualism and Education

Credit Points 10

Legacy Code 102525

Coordinator Ruying Qi (https://directory.westernsydney.edu.au/search/name/Ruying Qi/)

Description Bilingualism and Biculturalism are important aspects of life in Australia. Throughout much of the world, bi-multilingualism is the norm for both children and adults. This subject aims to give students an understanding and appreciation of the most important facets and manifestations of bi-multilingualism and bi-multiculturalism, in the linguistic, cognitive, personal, societal and educational spheres. It also aims to show students how this subject relates to broader studies in education, humanities, linguistics, and social sciences. This subject equips students with current research theories and methods in working effectively in early childhood and primary education, language teaching and other workplaces in bi-multilingual and bi-multicultural contexts.

School Humanities & Comm Arts

Discipline Linguistics

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. demonstrate knowledge about raising children bilingually and biculturally;
2. explain language choice, language maintenance and language shift in multilingual societies as well as code-switching and language mixing in bilingual speaker;
3. identify relationships between bilingualism and cognitive development;
4. evaluate the effectiveness of bilingual education programs and aspects of cross-cultural and/or inter-cultural communication;
5. demonstrate understanding of the complex issues and different dimensions of individual and social bilingualism;
6. critically analyse a range of attitudes toward bilingualism and their relationships with multi-identity;
7. apply current research in bilingualism to teaching and professional contexts.

Subject Content

Main concepts of bi-multilingualism and bi-multiculturalism.
Language in contact - language maintenance, shift and change; language attitudes; multi-identity.
The nature of language interaction and code-switching, e.g. language choice.
Bilingualism and cognitive development.
Bilingual language acquisition; raising children bilingually and biculturally.
Bilingual education in Australia and overseas; bilingual programs.
Bilingualism and communication.
Bilingual children and families: Multiliteracies

Discipline Translating and Interpreting

Student Contribution Band HECS Band 1 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) LANG 7020

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Students should have at least an intermediate level of specialised technical skills necessary for the different modes of interpreting: dialogue, consecutive, simultaneous, and sight translation, before attempting this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Interpret with confidence in a variety of business settings
2. Understand, critically analyse and replicate business discourse patterns and business terminology
3. Explain and build into their practice the role demands and role limits of interpreters in diverse business settings
4. Identify appropriate behaviour in business settings including dress, observance of formalities, and awareness of site-specific requirements such as safety procedures
5. Appraise the non-interpreting functions affecting the interpreter in the context of business team needs and team priorities
6. Sight translate with confidence texts related to business settings

Subject Content

- Descriptions and analysis of representative business settings where interpreters are engaged
- interpreting and sight translation practice in business settings including formal greetings and introductions, meeting procedures, site visit formalities and negotiations
- The pragmatics and etiquette of business interpreting in The context of cultural differences and intercultural communication
- business terminology in finance, trade, contracts and Negotiation
- Examination of Roles and Ethical challenges for interpreters in business settings
- interpreters as members of business Negotiation teams
- Building interpreting teams and teamwork in business interpreting
- The interpreter as A small business

LANG 7007 Community and Social Services Translation (PG)

Credit Points 10

Legacy Code 101845

Coordinator Mustapha Taibi (https://directory.westernsydney.edu.au/search/name/Mustapha Taibi/)

Description This subject aims to develop skills in Community Translation (also known as Public Service Translation), which focuses on facilitating written communication between public services and community members who do not have a good command of mainstream language(s). The aim of the subject is for students to develop skills in producing target texts in styles appropriate to specific groups and communities, and to the content and function of the source text. The subject also aims to develop skills in researching and using appropriate specialist terminology, editing and revising, and producing camera-ready documents. On the basis of these skills, the subject is to further develop students' ability to reflect upon translation in terms of strategies and appropriateness in relation to the target audience as well as make critical written and oral assessment of relevant translations. The subject will be available, depending on sufficient demand, for Arabic, Japanese, Mandarin, Spanish, Korean, Persian and Vietnamese.

School Humanities & Comm Arts

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYB 3387 - Community Translation LGYA 0966 - Community Translation PG

Restrictions

Students must be bilingual in the language combinations offered by the School. Students must be enrolled in a postgraduate program.

Assumed Knowledge

Sufficient proficiency in English plus one other language at native or near-native level.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Effectively translate texts relevant to their specific communities and audiences;
2. Translate 250 words of texts in 60 minutes (based on NAATI marking guidelines) into and from English;
3. Analyse and reflect upon their own translations in terms of translation strategies appropriate to specific groups and communities to develop their own resources for improvement;
4. Apply the insights of Translation Theory to translation critique as well as to their practice of Community Translation; and
5. Demonstrate translation and revision skills at a near-professional level of competence.

Subject Content

1. Development of general translation skills to and from English.
2. Development of ability to reflect upon students' own translations in terms of translation strategies, and make critical assessment of translations in general.
3. Translation of community information from English into the LOTE of texts relating to health, social security, and other government services as well as relevant private sector services.
4. Translation into English, including extract translation, of personal and official documents such as birth certificate, marriage certificate, driver's licence, and educational qualifications.
