Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 7004 Advanced Highway Infrastructure (10 Credit Points)
Subject Details (p. 2830) Legacy Code: 301011
This subject teaches pavement and ground engineering design as part of highway construction. Students will develop advanced knowledge and skills in designing pavement structures and ground improvement techniques dealing with soft and weak grounds related to the construction of highway pavements and embankments. Students will apply their knowledge and skills in accordance with Australian standards and practices. The knowledge and skills developed in this subject will provide students with opportunities in careers such as in ground engineering including those involving design, construction and maintenance of highway infrastructures.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 7005 Advanced Numerical Methods in Engineering (10 Credit Points)
Subject Details (p. 2831) Legacy Code: 301024
The finite element method is an essential tool for the analysis and design of machine parts and civil engineering structures. The objective of this subject is to introduce the principles of finite element method and the applications of one, two and three dimensional elements in solving various engineering problems.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 7006 Advanced Structural Analysis (10 Credit Points)
Subject Details (p. 2831) Legacy Code: 300594
This subject will introduce students at postgraduate level to structural analysis of trusses, beams, frames and plates. It covers the slope defection method and matrix method for analysis of beams, trusses and frames, and the bending and buckling analysis of beams and plates under various loading conditions. The theories learned in classes will be reinforced in practical sessions by using computer software packages.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: LGYA 5845 - Linear and Nonlinear Analysis of Structures LGYA 5976 - Advanced Structural Engineering LGYA 5837 - Numerical and Finite Element Methods
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 7007 Advanced Timber Structures (10 Credit Points)
Subject Details (p. 2832) Legacy Code: 301009
This subject enables students to gain an in-depth knowledge into timber structures based on Australian Standards. Design of timber beams, floors, columns and connections will be introduced with a focus on the use of plywood, round timbers, glue-laminated timber and structural laminated veneer lumber.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 7008 Advanced Waste Management (10 Credit Points)
Subject Details (p. 2833) Legacy Code: 301017
This subject covers sources, identification and characterisation of solid and hazardous waste generated from the community. Sustainable management of waste incorporating minimisation, recycle, recovery and disposable options is discussed. Also, atmospheric pollutants and their control, greenhouse gases and their impact on climate change are examined.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 7009 Advanced Water Engineering (10 Credit Points)
Subject Details (p. 2833) Legacy Code: 300595
This subject introduces advanced principles of engineering hydrology as it pertains to the surface water component of the hydrologic cycle. Students are exposed to floodplain analysis techniques. The focus is on practical engineering solutions to issues originating from catchment development. Students are exposed to commonly used hydraulic and hydrologic software packages to delineate flooded areas resulting from such developments.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: CIVL 4007 Hydrology EART 4001 Surface Water Hydrology
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 7011 Building Engineering (10 Credit Points)
Subject Details (p. 2834) Legacy Code: 300713
The aim of this subject is to provide students with an understanding of the factors that contribute to decisions in building design in respect of compliance with building regulations and standards. Topics include soil classification for construction, footing systems, loadings and their evaluation, structural materials and systems, structural behaviour and strength, and failure and rectification.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: CUVL5001 - Building Engineering
LGYB 8310 - Building Engineering
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 7012 Building Fire Services (10 Credit Points)
Subject Details (p. 2834) Legacy Code: 300711
This subject describes the various types and application of building services and fire safety systems. It introduces appropriate standards for building fire service system design and the methods of applying recommendations of fire engineering assessments with respect to building services and fire safety systems.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYC 0661 - Building Fire Services
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 7013 Deep Foundations (10 Credit Points)
Subject Details (p. 2835) Legacy Code: 301015
This subject covers advanced analysis and design criteria for deep foundations. Both statically and dynamically loaded deep foundations are covered including the site investigation methods and field testing methods adopted in practice for determining integrity and load carrying capacity. Appropriate computer software will be introduced to carry out the deep foundation design according to the Australian Standards.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 7014 Sustainable Systems (10 Credit Points)
Subject Details (p. 2836) Legacy Code: 301003
This subject teaches students the essential tools available to achieve environmental sustainability in various engineering/construction/industrial design professional settings. The focus of the subject is on the selection and application of methods and processes to achieve sustainable development goals (SDGs) in Australian and global context. The skills gained in this subject will help the student to work in professions such as an environmental engineer, an environmental manager, a sustainability advisor or a sustainability engineer.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 7015 Water Resources Systems Analysis (10 Credit Points)
Subject Details (p. 2836) Legacy Code: 301012
Water resources projects are large infrastructure projects requiring huge capital expenditure. In addition, multiple options are usually available to meet the project goals but at different costs and under varying constraints. This subject presents the application of optimisation techniques to select the best project from a list of competing projects. Applications of these techniques to optimally allocate available water resources are discussed. These are presented within the context of maximising the return of investment.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 7017 Wastewater Treatment and Recycling (10 Credit Points)
Subject Details (p. 2837) Legacy Code: 301278
This subject teaches students the fundamental science and hydraulic engineering principles necessary to design, operate and troubleshoot wastewater systems consisting of collection, treatment and recycling and resource recovery. Students will be exposed to emerging wastewater treatment processes and its applications through research and practical work.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 7018 Water Treatment and Distribution (10 Credit Points)
Subject Details (p. 2838) Legacy Code: 301279
This subjectt focuses on the design of conventional and emerging water treatment unit processes using fundamental science and hydraulic engineering principles. The emphasis is on practical design and water quality management in the distribution system. Students will be exposed to emerging water treatment processes and its applications through research and practical work.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CIVL 9001 Higher Degree Research Thesis - Engineering (Civil) (80 Credit Points)
Subject Details (p. 2838) Legacy Code: 800059
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

Communication and Media (COMM)

COMM 0001 Academic Literacy (WSTC) (10 Credit Points)
Subject Details (p. 2877) Legacy Code: 900095
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 0002 Academic Skills for Communication (WSTC Prep) (10 Credit Points)
Subject Details (p. 2877) Legacy Code: 700218
This subject introduces students to the essential academic skills required for success in tertiary studies. It employs an explicit pedagogy approach to teach students how to become independent, active, and reflective learners. The subject also includes essential research and writing skills specific to the Communication Arts.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 0003 Academic Skills for Design (WSTC Prep) (10 Credit Points)
Subject Details (p. 2877) Legacy Code: 700221
This subject introduces students to the essential academic skills required for success in tertiary studies. It employs an explicit pedagogy approach to teach students how to become independent, active, and reflective learners. The subject also includes essential research and writing skills specific to the Diploma in Design.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 0004 Communication and Media (WSTC Prep) (10 Credit Points)
Subject Details (p. 2878) Legacy Code: 700260
Communication and Media introduces students to key terminology, concepts and debates in the fields of Communication and Media Studies. The subject looks at the role of communication in a variety of private, professional and public contexts, developing students' ability to identify, evaluate and adopt effective communication practices. Students will also be introduced to the basic critical vocabulary and tools necessary to analyse media discourse and advertising.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: COMM 0005 - Communication and Media (UWSC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 0005 Communication and Media (WSTC) (10 Credit Points)
Subject Details (p. 2879) Legacy Code: 900026
The globalisation or interdependence caused by changes in economies and communications along with the influence of new forms of communication and mass media has led to the introduction of media and communications courses in secondary and tertiary education programs. This subject is one which will not only attempt to structure student interest in general communication principles, media, and information technology but also enhance their vocational, interpersonal and academic potential. It is designed to be an introduction to media and communication studies at university.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 0008 Developing Academic Language and Literacy (10 Credit Points)
Subject Details (p. 2879) Legacy Code: 900209
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 0009 Grammar Workshop (WSTC) (10 Credit Points)
Subject Details (p. 2880) Legacy Code: 900116
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 0010 Successful University Writing (10 Credit Points)
Subject Details (p. 2880) Legacy Code: 900210
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 0011 Texts and Communication (WSTC Prep) (10 Credit Points)
Subject Details (p. 2880) Legacy Code: 700192
This subject assists students to develop skills in reading and textual analysis. It introduces students to the basic principles of reader response theory and general strategies to improve reading resilience. Textual analysis skills are built through engagement with a diverse range of texts on a variety of themes, which are relevant both to the contemporary world and to later studies at both the Foundation and University level. By the end of this subject, students will be able to read, discuss, analyse and write about texts in ways appropriate to academic levels of study.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: COMM 0012 - Texts and Communication (UWSC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 0012 Texts and Communication (WSTC) (10 Credit Points)
Subject Details (p. 2881) Legacy Code: 900092
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 0013 Unistep Academic Literacy (10 Credit Points)
Subject Details (p. 2881) Legacy Code: 900205
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 0014 Graduate Research Literacy (WSTC) (10 Credit Points)
Subject Details (p. 2882) Legacy Code: 900122
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 0015 Communication Practices (WSTC Prep) (10 Credit Points)
Subject Details (p. 2882) Legacy Code: 700324
What does it mean to be a communication professional in the digital age? In this subject students will explore the various study and career options available to them in communication industries. They will engage with a range of skills and practices to boost their success in later subjects and to start thinking and working like a communication professional. Engaging in a case study of an Australian media professional and developing a professional profile of their own ensures that students can identify and develop their own strengths relevant to their communication journey.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 1004 Approaches to Text (10 Credit Points)
Subject Details (p. 2883) Legacy Code: 100641
Why do we read books? Reading literary texts is crucial to our ways of understanding the world and ourselves. In this subject students learn that reading resilience, close reading skills and the ability to identify specific literary techniques are foundational to studying literature. Students will read a range of Australian texts including fiction, poetry, short stories, drama and criticism. They will analyse how meanings in those texts are shaped by diverse cultural and international contexts. This subject builds reading capacity while engaging students in key debates about literature today: what it means, how it works, and why it matters.
Level: Undergraduate Level 1 subject
Equivalent Subjects: LGYB 0130 - Approaches to Text COMM 1005 - Aproaches to Text (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 1007 Communication in Health (10 Credit Points)
Subject Details (p. 2883) Legacy Code: 400732
Good communication within the health care setting is associated with improved health outcomes. This subject introduces students to foundation knowledge and skills required for effective communication with various stakeholders in varied and complex health situations. The subject is skills-based and uses case studies to create scenarios to which students learn to respond. There is a focus on the client interview and various questioning techniques designed to facilitate a therapeutic relationship as a means of developing rapport and trust. Strategies to promote communication within, between and across health professional disciplines, teams and government agencies is also explored. Written forms of documentation as well as communication skills required to communicate health information to clients, groups and the wider community are also presented. The subject uses a 'student capital' framework to facilitate reflection on current communication skills and those required for success at university and in future practice.
Level: Undergraduate Level 1 subject
Equivalent Subjects: LGYA 7034 - Communication for the Helping Professions COMM 1008 - Communication in Health (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 1008 Communication in Health (WSTC) (10 Credit Points)
Subject Details (p. 2885) Legacy Code: 700062
Communication is integral to professional relationships, whether working individually with a client, educating community members on health matters, or working with other professionals as part of a multidisciplinary team. This subject aims to develop communication skills in preparation for work within the health professions across these areas. Communication skills will include those needed to form therapeutic relationships with individual clients and groups, as well as those required to communicate health information to clients, groups and the wider community. Students will develop skills to establish appropriate working relationships with professional colleagues.
Level: Undergraduate Level 1 subject
Equivalent Subjects: COMM 1007 - Communication in Health LGYA 7034 - Communication for the Helping Professions COMM 1043 - CommsHealth(UGCert)
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 1009 Creative Writing: Practical Skills and Knowledge (10 Credit Points)
Subject Details (p. 2886) Legacy Code: 102437
This is the second of two Level 1 foundation subjects in the Creative Writing Major. The subject focuses on developing students into writers by giving them the practical skills and theoretical knowledge needed to become published writers. Students will develop a body of original creative work while reflecting critically upon writing practice. The subject is built around participation in writing workshops, which emphasise improving your work via practical feedback from tutors and peers. Themes covered include writing the personal, writing about place, experimentation, specificity, originality, voice and starting a career in writing. No previous creative writing experience is necessary.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 1010 Creative Writing: The Imaginative Life (10 Credit Points)
Subject Details (p. 2886) Legacy Code: 102436
What is an imaginative life, and how do we bring it into the practice of creative writing? This is the first of two Level 1 foundation subjects in the Creative Writing Major, in which students can find the right place to begin their own writing journey. They will learn how storytelling in all its forms shapes our imaginative life, and begin to acquire practical skills to develop their writing. The subject involves two-hour workshops taught by experienced and widely published writers from the Writing and Society Research Centre and the school of HCA. No previous creative writing experience is necessary.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 1011 Data, Mediation and Power (WSTC) (10 Credit Points)
Subject Details (p. 2887) Legacy Code: 700269
Data, Mediation and Power investigates the operation of power in contemporary digital media cultures and economy. The subject examines the primary role played by data in determining how we live in the world. This includes how we interact with the world, its people and digital artefacts, in terms of communication and meaning. The subject focuses on technologies of control and governance related to algorithmic architectures and data economies. Who benefits from data and mediation and what are the limits and possibilities of data? Ultimately, this kind of critical analysis invites us to think about what constitutes a just, democratic society and what constitutes an ethical media life.
Level: Undergraduate Level 1 subject
Co-requisite(s): Students enrolled in the combined DiplomaBachelor courses listed below must pass all College Preparatory units listed in the course structure before progressing to the Year Two units
Equivalent Subjects: COMM 1023 - Mediated Mobilities COMM 1012 - Data Mediation and Power
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 1012 Data, Mediation, Power (10 Credit Points)
Subject Details (p. 2888) Legacy Code: 102421
Data, Mediation, Power investigates the operation of power in contemporary digital media cultures and economy. The subject examines the primary role played by data in determining how we live in the world. This includes how we interact with the world, its people and digital artefacts, in terms of communication and meaning. The subject focuses on technologies of control and governance related to algorithmic architectures and data economies. COMM 1015 Foundations of Media Arts and Production (10 Credit Points)
Subject Details (p. 2889) Legacy Code: 101927
In 2021, this subject replaced by subject 102825 - Introduction to Screen Media. This subject explores creative and independent media arts practices across moving image, audio and participatory forms, and introduces students to fundamental principles of sound and screen production. The subject maps theoretical and practical connections between the creation and study of images and sound across media formats through an integrated theory/practice programme focused on the processes through which media artefacts are created. Students learn how to analyse and critically evaluate screen media and also to plan and make simple short works of their own. It introduces students to relevant media arts histories and contexts (with a focus on cinema) in addition to a range of technologies, media practices and production techniques.
Level: Undergraduate Level 1 subject
Equivalent Subjects: LGYB 0161 - Image Sound Text COMM 1028 - Screen MediaCOMM 1039 - Introduction to Screen Media COMM 1016 - Foundations of Media Arts and Production (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 1018 News and Media Today (10 Credit Points)
Subject Details (p. 2890) Legacy Code: 100556
Built on the ideas that we must tell a story about all that we are, and do, this subject introduces students to the fields of news, journalism, and media for a deeper understanding on the impacts of news, where it comes from, and how to spot key elements for compelling stories. Students learn to identify news, research, and write copy for local audiences while understanding the power of the media to reach global audiences. Highlights of the subject include pitching ideas, writing news with speed, accuracy, and to industry standards, for publishing and broadcasting to identified audiences. Ethical research, editing, and the importance of sources form an integral part of learning. Understanding the media landscape, the demand and importance of journalistic skills and inquiry across a variety of communication industries, corporate and government sectors allow students to critically consider career choices through the relevance of what they learn about storytelling.
Level: Undergraduate Level 1 subject
Equivalent Subjects: LGYB 0049 - Journalism News Reporting COMM 1019 - Introduction to Journalism (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 1019 Introduction to Journalism (WSTC) (10 Credit Points)
Subject Details (p. 2891) Legacy Code: 700182
This subject introduces students to the fields of journalism and new media, covering the concepts of news values and news research for target audiences. It looks at the role of the journalist and the professional skills of news gathering and news writing. The subject also considers the legal and ethical obstacles and obligations faced by journalists operating in an environment of fast paced communication. The methodologies underlying professional practice as well as delivering news with speed for multimedia platforms are central to this subject.
Level: Undergraduate Level 1 subject
Co-requisite(s): Students enrolled in the combined DiplomaBachelor courses listed below must pass all College Preparatory units listed in the course structure before progressing to the Year 2 units
Equivalent Subjects: COMM 1018 - Introduction to Journalism
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 1020 Media Cultures and Industries (10 Credit Points)
Subject Details (p. 2892) Legacy Code: 101926
This subject introduces students to the concept of media in terms of how it has changed, how it works and its impact on our lives and society. It builds the necessary foundation for further theoretical and practical study and understanding of the media in future years. Its approach brings practice-based research together with experiential learning and theoretical reflection. At the conclusion of this subject students will be able to demonstrate a fundamental critical understanding of the media. In addition, students will have developed their digital literacy through the creation of digital creative works.
Level: Undergraduate Level 1 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 1032 Writing Ecologies (10 Credit Points)
Subject Details (p. 2896) Legacy Code: 101920
In Autumn 2024, this subject is replaced by COMM 1044 Professional Communication. This subject introduces students to a set of theories and strategies for exploring storytelling in networked environments and the way social and cultural experiences continue to shape and inform the way we read, write and communicate. Grounded in contexts key to Communication Arts practice, the subject explores what it means to be digitally literate, the difference between newer and older storytelling environments, and the way networked technologies have re-shaped contemporary reading/writing practices. Students will complete a range of analytical and creative tasks that aim to build understanding of the dynamic nature of communication while further developing academic research and writing skills.
Level: Undergraduate Level 1 subject
Equivalent Subjects: LGYA 0212 - Writing as Communication COMM 1034 - Writing as Communication COMM 1002 - Approaches to Communication COMM 1033 - Writing Ecologies (WSTC)

COMM 1036 Introduction to the Creative Industries (10 Credit Points)
Subject Details (p. 2897) Legacy Code: 102836
Careers in the Creative Industries are on the rise. They're innovation-led, mobile, global and adaptable. In the short-term success can be a matter of luck but a long-term career requires tactics, talent, and savvy business acumen. In this hands-on subject we'll introduce you to some of the key opportunities in the Creative Industries in fields as diverse as Communication, Media, Music, Design, Writing and associated aspects of Intellectual Property Law and Entrepreneurship. We'll look at the Creative Industries from historical and contemporary perspectives, and hear from industry contributors working in the field right now. You'll be introduced to 'future of work' skillsets, including entrepreneurship, leadership, collaboration and communication capabilities, and you'll learn how to situate your own creative knowledge within them. Available to students from all disciplines, this subject will suit you if you're passionate about taking your creative career to the next level.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 1037 Digital Narrative (10 Credit Points)
Subject Details (p. 2898) Legacy Code: 102827
Effective storytelling is at the heart of engaging content. In this unit, you'll learn the basic principles of fictional, narrative storytelling used in screen media. Following on from Screen Media Fundamentals, you'll learn more advanced principles of screen media production, including genre, visual storytelling, camera coverage, lighting, visual style, editing, sound design and performance. You'll also develop an awareness of key narrative concepts such as narrative form, structure, conflict and basic scriptwriting techniques. You'll plan and create a short narrative screen media work, which will demonstrate your enhanced storytelling and production skills.
Level: Undergraduate Level 1 subject
Pre-requisite(s): COMM 1041
Incompatible Subjects: COMM 2036 - Screen and Sound Practices 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 1038 Digital Narrative (WSTC) (10 Credit Points)
Subject Details (p. 2899) Legacy Code: 700327
Effective storytelling is at the heart of engaging content. In this unit, you'll learn the basic principles of fictional, narrative storytelling used in screen media. COMM 1039 Introduction to Screen Media (10 Credit Points)
Subject Details (p. 2900) Legacy Code: 102825
Welcome to the dynamic and evolving world of Screen Media. In this subject you will learn how to analyse and critically evaluate cinema, from classic Hollywood to Arthouse and Australian films, along with a range of compelling documentary, animation, immersive and interactive content from around the globe. You'll reflect on the impact of technology and the different approaches to creating and producing powerful content. Inspired by best practice, you will have the opportunity to plan and create simple, short works of your own using accessible media.

COMM 1040 Introduction to Screen Media (WSTC) (10 Credit Points)
Subject Details (p. 2901) Legacy Code: 700325
Welcome to the dynamic and evolving world of Screen Media. In this subject you will learn how to analyse and critically evaluate cinema, from classic Hollywood to Arthouse and Australian films, along with a range of compelling documentary, animation, immersive and interactive content from around the globe. You'll reflect on the impact of technology and the different approaches to creating and producing powerful content. Inspired by best practice, you will have the opportunity to plan and create simple, short works of your own using accessible media.
Level: Undergraduate Level 1 subject
Co-requisite(s): Students enrolled in the combined DiplomaBachelor courses listed below must pass all College Preparatory units listed in the course structure before progressing to the Year Two units
Equivalent Subjects: COMM 1015 - Foundations of Media Arts and Production COMM 1039 - Introduction to Screen Media COMM 1016 - Foundations of Media Arts and Production (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 1041 Screen Media Fundamentals (10 Credit Points)
Subject Details (p. 2901) Legacy Code: 102826
Creating compelling video content requires more than just knowing how to use a camera or edit a video. In this hands-on, practical subject, you will develop an appreciation of different tools and techniques, and enhance your ability to be able to create more powerful moving visuals: from researching and planning ideas, composing and framing compelling images, recording, enhancing sound, and editing. You'll have the opportunity to create a range of short content using accessible media, and publish your work online. No prior skills required.
Level: Undergraduate Level 1 subject
Equivalent Subjects: COMM 2035 - Screen and Sound Practices 1
Incompatible Subjects: -
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 1042 Screen Media Fundamentals (WSTC) (10 Credit Points)
Subject Details (p. 2902) Legacy Code: 700326
Creating compelling video content requires more than just knowing how to use a camera or edit a video. In this hands-on, practical unit, you will develop an appreciation of different tools and techniques, and enhance your ability to be able to create more powerful moving visuals: from researching and planning ideas, composing and framing compelling images, recording, enhancing sound, and editing. You'll have the opportunity to create a range of short content using accessible media, and publish your work online. No prior skills required.
Level: Undergraduate Level 1 subject

COMM 1043 Communication in Health (UG Cert) (10 Credit Points)
Subject Details (p. 2903) Legacy Code: 500055
Communication is integral to professional relationships, whether working individually with a client, educating community members on health matters, or working with other professionals as part of a multidisciplinary team. This subject aims to develop written and verbal communication skills in preparation for work within the health professions across these areas. Communication skills will include those needed to form therapeutic relationships with individual clients and groups, as well as those required to communicate health information to clients, groups and the wider community. Students will develop skills to establish appropriate working relationships with professional colleagues.
Level: Undergraduate Level 1 subject
Equivalent Subjects: LGYA 7034 Communication for the Helping Professions COMM 1008 Communication in Health COMM 1007 Communication in Health
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 1044 Professional Communication (10 Credit Points)
Subject Details (p. 2903)
Understanding of the complexities of human communication is an important part of professional practice in all communication and creative industries. In this subject you will explore both theoretical and practical elements of professional communication and how these can be applied to understanding and solving real world communication problems. Subject content provides you with a range of communication contexts necessary for academic work and professional success. It also asks you to learn and practise a variety of professional writing styles and give class presentations with particular attention to how these vary according to the audience, context and medium.
Level: Undergraduate Level 1 subject
Equivalent Subjects: COMM 1026 COMM 1032 COMM 1033
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 1045 Foundations of the Communication Industry (10 Credit Points)
Subject Details (p. 2905)
In Foundations of the Communication Industry, students will be introduced to some of the key understandings and opportunities across a diverse set of communication disciplines (including Advertising, Journalism, Public Relations, and Screen Media), and how these disciplines intersect, integrate, and relate to each other. This hands-on subject will provide students with a strong understanding of the fundamental principles, theories, and practices that shape the contemporary communication landscape, and what the future holds for this dynamic industry. Students will learn from industry contributors working on the frontlines, and through a combination of theoretical concepts, guest lectures by industry professionals, and practical case studies, they will develop critical thinking, analytical skills, and an appreciation for the ethical considerations behind communication. Available to students from all disciplines, this subject will suit those starting out in their studies of Communication, and those who are seeking to become well-rounded professionals with the capacity to adapt and excel in the current and future contemporary communication landscape.
Level: Undergraduate Level 1 subject
Equivalent Subjects: COMM 1040 Introduction to Screen Media (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 1046 Data Dynamics: Influence, Ethics, and Power (WSTC) (10 Credit Points)
Subject Details (p. 2906)
This subject examines the primary role played by data in determining how we live in the world. This includes how we interact with the world, its people, and digital artefacts, in terms of communication and meaning. The subject focuses on technologies of control and governance related to algorithmic architectures and data economies. Who benefits from data and mediation and what are the limits and possibilities of data? Ultimately, this kind of critical analysis invites us to think about what constitutes a just, democratic society and what constitutes an ethical media life.
Level: Undergraduate Level 1 subject
Equivalent Subjects: COMM 1011
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 2001 Account and Client Management (10 Credit Points)
Subject Details (p. 2906) Legacy Code: 101941
Effectively managing a client or an 'account' requires a special combination of skills. In this subject, you'll learn the basic principles of account management and how to nurture and foster an environment of trust, respect and partnership. Working on an applied project, you'll explore best practice in 'hard skills': understanding clients' objectives, developing a strategy, managing a project, preparing and holding effective meetings, writing WIPs (work in progress) and contact reports, and working toward specific financial/success metrics. Just as important to your success in client-facing roles are 'soft skills'. You'll learn how to be more proactive, overcome procrastination, manage 'challenging' personalities, develop a network, adapt to cross-cultural differences, and present well. Both hard and soft skills are critical to the success of your project, your role as client liaison, and importantly, your career.
Level: Undergraduate Level 2 subject
Pre-requisite(s): -
Equivalent Subjects: COMM 2044 - Writing for the Professions
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 2006 Advertising: Media (10 Credit Points)
Subject Details (p. 2907) Legacy Code: 101034
This subject explores the critical role of Media in Advertising Campaigns. Through research, analysis and strategic thinking, students will develop media plans for clients. This subject covers media planning in depth: choosing different combinations of media to achieve campaign objectives - digital, outdoor, print, social, radio, TV, cinema, ambient; the use of consumer insight in planning, measures of performance, and creativity in planning and buying.
Level: Undergraduate Level 2 subject
Pre-requisite(s): MKTG 1001 OR
MKTG 1006
Equivalent Subjects: LGYA 0738 - Audience Analysis and Media Planning
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 2009 Cinema and Censorship (10 Credit Points)
Subject Details (p. 2908) Legacy Code: 102192
Censorship of the arts has long been a contentious issue. This subject examines the cultural contexts and debates surrounding censorship, as well as the institutions, policies, and people that figure prominently in the history of cinema censorship. Censorship discourses reveal shifts in how 'national morality' is constructed, and often display cultural anxieties about changing meanings of gender, sexuality, race, and class. This subject offers an historical survey of film censorship from the 1890s to today, utilising various theoretical approaches (feminist theory, critical race theory, queer theory, and cultural theory), with an emphasis on topics such as obscenity, pornography, violence, and blasphemy.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 2011 Communication Strategies (10 Credit Points)
Subject Details (p. 2909) Legacy Code: 102056
Communication Strategies is a dynamic practice-oriented subject designed to teach students how to interrogate and analyse real clients' products/services, issues and opportunities, markets and audiences, in order to develop effective communication strategies. Through discussion topics and project-based work, students will learn how to design and implement a holistic communications strategy that is relevant for a particular client.
Level: Undergraduate Level 2 subject
Equivalent Subjects: MKTG 2009 - Public Relations Tactics COMM 2007 - Advertising Strategy LGYA 1172 - Public Relations Strategy
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 2014 Editing and Publishing (10 Credit Points)
Subject Details (p. 2910) Legacy Code: 102435
What makes a good editor? How do editing and publishing work in Australia and the wider market? This subject provides an introduction to basic skills required when editing texts for publication, and a survey of key issues confronting literary publishing in Australia. Skills in editing and an understanding of Australian publishing are valuable assets for students of creative writing. They are also relevant to industry-based work in a range of related fields such as advertising, public relations and journalism. This subject will focus on three areas: the practice of editing, modes of publishing, and the economics of writing and publishing.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 2015 Events Management (10 Credit Points)
Subject Details (p. 2910) Legacy Code: 101940
This subject introduces understandings about events as forms of public relations typologies and promotional models. These include strategic public relations and management processes, researching the event promotion environment, infrastructure, organisational and event promotion processes and funding. Students will analyse behaviours of event publics, audiences and participants, matching event opportunities with publics, and conceptualising events as service experiences. Students will develop strategies for developing event partnerships, funding and sponsorship relationships. These include managing the development of the event setting/venue, programming and personnel affecting the on-site event experience, and developing appropriate merchandising strategies for events.
Level: Undergraduate Level 2 subject
Pre-requisite(s): MKTG 1009
Equivalent Subjects: COMM 3017 - Events Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 2016 Experimental Writing and Electronic Publication (10 Credit Points)
Subject Details (p. 2912) Legacy Code: 100584
Experimental Writing and Electronic Publication is a practical and experiential exploration of modernist writing practices.Students will be introduced to a range of innovative writing techniques designed to stimulate creative thinking and assist in the development of a regular writing practice. Areas of study include: exploration of pre-writing processes; experimental writing genres; power of language; evaluative process; and the development of individual and collaborative techniques for planning and executing writing projects. A primary component of this subject includes working on writing exercises both at home and in class. These exercises will be used to develop the end-of-unit major project.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 2017 Feature Writing (10 Credit Points)
Subject Details (p. 2912) Legacy Code: 102061
This subject takes students beyond event and reactionary reporting towards an understanding of the proactive process of exploration, interpretation and exposure in journalism. Students learn how to find, filter and file information in a dynamic and constantly changing environment. Given a lot more time to explore issues, students learn to add value to information while keeping the story current, to deadline and in the public sphere, while negotiating with the media industry to get their stories out into the public sphere. Students are encouraged to develop their unique writing styles while also focusing on social issues such as trauma, violence, mental health and wellbeing.
Level: Undergraduate Level 2 subject
Pre-requisite(s): COMM 1018
Equivalent Subjects: LGYA 0585 - Journalism Feature Writing COMM 2023 - Magazine Journalism
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 2019 Interactive Design: Games (10 Credit Points)
Subject Details (p. 2913) Legacy Code: 102272
This subject focuses on game design from an interactive design perspective. Approaches utilising current digital technologies for advanced interactive design are explored. Students will design and produce simple games for mobile and/or desktop delivery. The focus of the subject is about the communication and experience design, rather than technical implementation. Interactive game design examples are examined from the context of shifting production languages, convergent technologies and the design professional contexts. This subject includes game development concepts, platforms, goals and genres, player elements, simple story and character development, gameplay, levels, interface, and the game development process. Students will play games, analyse them, and complete a game design with appropriate documentation.
Level: Undergraduate Level 2 subject
Equivalent Subjects: COMM 2018 - Interactive Design II
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 2020 Introduction to Film Studies (10 Credit Points)
Subject Details (p. 2914) Legacy Code: 100964
The subject will introduce students to the key theoretical strands of film studies and key concepts in the analysis of film. The subject will explore techniques of narrative, performance, genre, realism and spectatorship, as well as introducing methods to analyse the use of editing, cinematography and sound. A case study of a key historical film movement or genre will introduce students to the study of cinema in its cultural contexts. The subject will also address the transformations in screen cultures as a result of digital technologies and new media.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 2022 Journalism: Research and Investigation (10 Credit Points)
Subject Details (p. 2915) Legacy Code: 102017
Investigation and research are fundamental to journalism and many other forms of writing. This subject provides students with the skills to dig deeper to uncover information with which they can build stories that have depth and impact. Students will analyse the role and power of investigative journalism within the information media industry.
Level: Undergraduate Level 2 subject
Pre-requisite(s): COMM 1018
Equivalent Subjects: LGYA 0583 - Speciality News Reporting COMM 2021 - Investigative Journalism
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 2024 Media Law and Ethics (10 Credit Points)
Subject Details (p. 2915) Legacy Code: 101928
Media Law and Ethics focuses on the media and communication industries of public relations, journalism, advertising and media production, and examines issues including: the legal framework in which these creative communication industries operate, the role of ethics in decision-making in these industries, and the impact of regulation. It considers these issues in relation to their historical and philosophical contexts, and in terms of the contemporary context of digital networked media. This subject provides a foundation for professional practice in the Communication and Creative Industries key programs.
Level: Undergraduate Level 2 subject
Equivalent Subjects: COMM 2010 - Communication Law and Ethics
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 2026 New Media Contexts (WSTC) (10 Credit Points)
Subject Details (p. 2917) Legacy Code: 700084
The convergences and diversifications in the communications media industries of the past two decades have completely altered the environment within which they operate for producers and consumers alike. Issues about digitalisation, convergence, globalisation, the network society and communications media governance require a complete reconceptualisation of the media in order to be able to understand the impact of these changes upon professional practices and consumer habits. This subject will introduce students to international perspectives on issues in the new media contexts, and an appreciation of some of the social and cultural implications.
Level: Undergraduate Level 2 subject
Equivalent Subjects: COMM 2025 - New Media Contexts
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 2027 News Reporting (10 Credit Points)
Subject Details (p. 2918) Legacy Code: 102062
This subject introduces students to news gathering, research, story construction and news writing for delivery over a variety of platforms, from print-based to online, broadcast and social media. It gives students foundation skills which they can then apply in the subsequent electronic and feature subjects.
Level: Undergraduate Level 2 subject
Pre-requisite(s): COMM 1018
Equivalent Subjects: LGYB 0129 - Online Journalism COMM 2028 - News Reporting for Convergent Media
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 2029 Photo Journalism (10 Credit Points)
Subject Details (p. 2918) Legacy Code: 100953
Students studying this subject examine the function of photojournalism in the process of newsgathering and production and examine the relationship between images and text and their communicative potential. The subject involves a variety of approaches to photojournalism using monochrome and colour photography and location lighting for social documentary for ultimate use in a range of published forms.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYA 0636 - Photo Journalism
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 2032 Professional Writing and Editing (10 Credit Points)
Subject Details (p. 2919) Legacy Code: 101929
Professional communicators require advanced writing and editing skills. This subject explores the nature of writing and preparation of texts for use across different media platforms and in various contexts. In particular, the subject develops skills in editing and re-purposing of writing, and further develops understanding of key writing tools such as voice, emphasis, tone, grammar and punctuation and Plain English for professional purposes. Through in-class workshops and time-restricted editing tasks, students will demonstrate a range of professional writing skills from corporate communications to advanced editing. Through in class presentations, discussions and short written tasks, students will demonstrate an applied understanding of conceptual and theoretical issues related to writing and editing for diverse audiences and applied to a range of current issues.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYA 0221 - Convergence and New Media COMM 2012 - Convergence and New Media COMM 2025 - New Media Contexts COMM 2026 - New Media Contexts (UWSC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 2035 Screen and Sound Practices 1 (10 Credit Points)
Subject Details (p. 2921) Legacy Code: 102406
This subject introduces students to the principles of screen and sound media production with an emphasis on digital video, new media, and short film drama production. Students develop an awareness of screen language through critical reflection upon classic and contemporary cinemas as well as practical exercises. Through a series of specialised modules and workshops, students develop their knowledge and skills in media production including camera coverage, visual storytelling, genre, narrative, montage, and sound design and editing. The subject is complemented by technical training in camera, sound and editing software.
Level: Undergraduate Level 2 subject
Equivalent Subjects: COMM 2034 Screen and Sound Practices
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 2036 Screen and Sound Practices 2 (10 Credit Points)
Subject Details (p. 2921) Legacy Code: 102407
Following on from Screen and Sound Practices 1, this subject introduces students to more advanced principles of screen and sound media production with an emphasis on digital video, new media, and short film drama production. Students develop a depth of awareness about screen language through critical reflection upon classic and contemporary cinemas as well as practical exercises. Through a series of specialised modules and workshops, students continue to develop their knowledge and skills in media production including camera coverage, visual storytelling, genre, narrative, montage, and sound design and editing. The subject is complemented by further technical training in camera, sound and editing software. Students produce a major creative media project for a video work under 10 minutes duration.
Level: Undergraduate Level 2 subject
Pre-requisite(s): COMM 2035
Equivalent Subjects: COMM 2034 - Screen and Sound Practices
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 2043 Writing Fiction (10 Credit Points)
Subject Details (p. 2922) Legacy Code: 100896
In this subject students explore, critically examine, and write in a range of fictional and essay forms. They critique a wide variety of published fiction in order to enhance their understanding of approaches, possibilities, and techniques, thereby developing a greater capacity to write and critically evaluate their own work. Students create their own fiction in the form of written exercises and assignments, which they will have the opportunity to workshop and present to peers in a supportive and constructive critical environment.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYB 6562 - Creative Writing LGYB 4536 - Writing Fiction
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 2047 Pitch: Podcasting Essentials (10 Credit Points)
Subject Details (p. 2923) Legacy Code: 102697
This subject will teach students the fundamentals of podcasting, giving them the expertise needed to produce their own podcast feature. Working with academics and industry experts students will learn research and communication skills for finding, pitching and developing audio stories (backgrounding, writing, interviewing, presentation, critical review) and basic technical skills in sound and editing. This subject will show students how to get the most out of their software and hardware, and how to maximise their distribution channels to reach target audiences. Students will also learn how to recognise and evaluate key legal and ethical issues in research and recording content for publication. There is no need to know any of these things already, or have a story ready to tell; this subject is for all levels of experience and disciplinary backgrounds.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 2048 Communicating for Sustainability (10 Credit Points)
Subject Details (p. 2923) Legacy Code: 102705
This subject will enable you to become an environmental sustainability leader by building your capacity to be a confident and effective communicator. Environmental sustainability is vital to human wellbeing and planetary health. Effective communication is required to bring about transformation at individual, organisational and societal scales. In this subject you will participate in three modules focused on the key ingredients required for communicating sustainability: strategy, design and storytelling. Weekly learning pods developed by industry and academic leaders are designed to demonstrate what has worked well in practice, across business, government, community and not-for-profit sectors. Assessments provide you with an opportunity to implement the models, concepts and ideas you've learnt during the weekly learning content. This subject is recommended for all students, regardless of discipline.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 2050 Multiliteracies (10 Credit Points)
Subject Details (p. 2924) Legacy Code: 102739
This subject develops students' skills, knowledge and competencies to address a wide range of literacies across multiple technologies, platforms and contexts, including the digital, written, visual, aural, spatial, gestural, and tactile dimensions of meaning production. In any society there are a range of literacies, and contexts in which those literacies might be deployed. Multiliteracies go beyond the traditional textual models of literacy to describe the rich variety of cognitive and cultural tools we use to make sense of the everyday. Multiliteracy is key to our professional and personal effectiveness as well as to our functioning as individuals and citizens in a world characterised by increasing local diversity and global connectedness.
Level: Undergraduate Level 2 subject
Equivalent Subjects: INFO 2009
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 2051 Animation and Visual Effects (10 Credit Points)
Subject Details (p. 2925) Legacy Code: 102828
Explore the art and technology of animation and visual effects as applied to digital screen media production. In this unit, you will be introduced to the principles of animation and compositing and learn how to create effective motion sequences integrated with sound. Working with commercial software, you will explore the unique possibilities of animation and visual effects production and experiment with alternative, creative, narrative storytelling approaches. Develop critical, conceptual and practical skills within the context of animation and visual effects which will then enable you to deliver powerful and compelling visual stories on multiple media platforms.
Level: Undergraduate Level 2 subject
Equivalent Subjects: COMM 2008 - Animation and Visual Effects COMM 2031 - Principles of Non-Linear Editing COMM 2042 - Visual Effects VISU 2007 - Animation and Visual Effects (WSTC) COMM 2054 - Animation and Visual Effects (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 2052 Documentary: Factual Screen Media (10 Credit Points)
Subject Details (p. 2926) Legacy Code: 102830
Documentary is an evolving area that continues to flux and change. Due to developments in media distribution, technological change and convergence, audiences are increasingly engaging with factual content in new and innovative ways. This subject explores both conceptual and production approaches to documentary in various forms. Students are introduced to key documentary histories and modes and examine a range of traditional and evolving practices including animated, online interactive and transmedia documentary outcomes. Students produce a short documentary project and in doing so develop professional skills and approaches to production roles as well as ethical relationships and responsibilities with participants and topics.
Level: Undergraduate Level 2 subject
Pre-requisite(s): COMM 1041 - Screen Media Fundamentals
Co-requisite(s): -
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 2053 Narrative: Fictional Screen Media (10 Credit Points)
Subject Details (p. 2927) Legacy Code: 102829
In the 21st Century the nature of storytelling has evolved. Fictional screen narratives are now delivered across multiple platforms, devices and spaces. At the same time different platforms are strategically used to extend and add new layers to stories while deepening audience interaction and engagement. This subject introduces students to more advanced principles and processes in the production of fictional screen media. Students will learn how to work effectively in collaborative production teams across various key roles in pre-production, production and post-production. Working in teams, students produce a creative cross-platform narrative screen media project.
Level: Undergraduate Level 2 subject
Pre-requisite(s): COMM 1037 Digital Narrative
Equivalent Subjects: COMM 3020 - Media Arts Project
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 2054 Animation and Visual Effects (WSTC) (10 Credit Points)
Subject Details (p. 2928)
Explore the art and technology of animation and visual effects as applied to digital screen media production. In this unit, you will be introduced to the principles of animation and compositing and learn how to create effective motion sequences integrated with sound. Working with commercial software, you will explore the unique possibilities of animation and visual effects production and experiment with alternative, creative, narrative storytelling approaches. Develop critical, conceptual and practical skills within the context of animation and visual effects which will then enable you to deliver powerful and compelling visual stories on multiple media platforms.

COMM 3005 Australian Textual Studies (10 Credit Points)
Subject Details (p. 2929) Legacy Code: 100849
This subject aims to increase students' knowledge of the scope and variety of Australian writing. It examines a range of Australian texts from a number of contexts, usually organised along historical and/or thematic lines, and considers the role of writing both "high" literature and more popular forms in constructions of Australian culture. Issues of place, gender and race may be foregrounded, and consideration given to how these influence images of Australia. Film and television texts may also be included or emphasised.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYB 0186 - Australian Textual Studies LGYB 4976 - Australian Authors Special Study LGYB 4974 - Australian Literature The City and The Bush
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 3006 Cinema and Experience (10 Credit Points)
Subject Details (p. 2929) Legacy Code: 101984
Film Studies and Literary Studies share some common theoretical foundations and analytical methods. However, considered in its cultural contexts, the question of how a film is experienced by spectators becomes critical. Films engage spectators in an embodied and affective way. The subject will argue that we cannot understand how a film takes up thematic and cultural questions without exploring the dynamics of spectatorship. This subject will explore some key approaches to film spectatorship and will look at how cinematic techniques shape narrative, genre, character, and thematic and cultural questions into embodied and affective experience.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYB 0027 - Film Genre and Affect LGYA 0256 - Film and Affect
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 3008 Communication Research Project (10 Credit Points)
Subject Details (p. 2930) Legacy Code: 101930
This final year subject provides a capstone experience as a bridge into professional work or as a precursor to further research studies. The 'open box' approach invites students to develop a concept for a research report or professional project, undertaking preparatory stages of collective and individual research in an area of interest that has emerged as a result of previous studies. Students will generate project options that draw on historical and contemporary research issues and approaches to guide the development of their own research questions and methods specific to their object of research. A range of methodological approaches will be explored, including practice-based methods, industry observation/shadowing, qualitative interviews, and quantitative digital methods. Students will develop their own reading lists, identify appropriate research methods and conduct some pilot testing and evaluation of findings for their project. Students will also learn how to read and consume academic and scholarly research in order to critique problematic issues in published research reports.
Level: Undergraduate Level 3 subject
Equivalent Subjects: COMM 3039 - Visual Thinking COMM 3019 - Media Analysis
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 3010 Creative Industries Professional Project or Internship (10 Credit Points)
Subject Details (p. 2931) Legacy Code: 102433
Creative Industries Professional Project or Internship will allow students to work with Creative Industries practitioners in a 'real world' context. Students will collaborate with an industry partner, applying design thinking to achieve creative solutions within an internship placement or develop their own creative industry project.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 3011 Creative TEAMS 1 (10 Credit Points)
Subject Details (p. 2932) Legacy Code: 102431
Creative TEAMS 1 will bring students together in interdisciplinary groups to work with Creative Industries practitioners in a 'real world' context. Students will learn how to collaborate to develop an original solution to a "wicked" problem set by the industry partner. Through research and planning, in relation to a set of relevant constraints: such as cultural, social, environmental, site and audience, students will develop a strategy that utilises the appropriate media, message and approach, to address the identified target audience, based on research findings.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 3012 Creative TEAMS 2 (10 Credit Points)
Subject Details (p. 2932) Legacy Code: 102432
Creative TEAMS 2 will bring students together in interdisciplinary groups to work with Creative Industries practitioners on professional projects. Students will learn how to collaborate to develop original solutions with industry partners. Through research and planning, in relation to a set of relevant constraints: such as cultural, social, environmental, site and audience, students will develop a strategy that utilises the appropriate media, message and approach, to address the identified target audience, based on research findings.
Level: Undergraduate Level 3 subject
Pre-requisite(s): COMM 3011
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 3013 Creative Writing Project (10 Credit Points)
Subject Details (p. 2933) Legacy Code: 100859
This subject extends students beyond the writing of individual stories and poems into larger areas of creative writing, such as the discontinuous narrative, the novella, and the cycle of related poems and/or stories. It involves students in the process of developing a major project from an initial set of ideas, through the stages of drafting to a "finished" product, using workshop techniques, individual interviews and peer critiquing. It aims to give each student some experience of a relationship with readers (fellow students) and an editor (the tutor).
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 3014 Digital Communication (20 Credit Points)
Subject Details (p. 2934) Legacy Code: 102518
This subject covers the theory and practice of social/digital media (SDM) for marketing and communication in a variety of business, advertising and public relations agency contexts. It provides an introduction to the areas of strategy, creative writing and media planning for SDM. It examines trends and issues surrounding the usage of SDM and application and development of practical and tactical tools. Case studies and examples are used to demonstrate best practices. Students develop a major project where they demonstrate appropriate and professional usage of SDM strategies and tactics in a marketing communication context.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MKTG 1001 OR
MKTG 1009 AND
COMM 2011
Equivalent Subjects: COMM 3016 - Digital and Social Media Communications
Incompatible Subjects: LGYA 1699 - Digital and Social Media Communication COMM 3004 - Advertising Digital Media
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 3015 Digital Journalism Production (20 Credit Points)
Subject Details (p. 2935) Legacy Code: 102057
Digital technologies have revolutionised news delivery. Journalists in every area of the profession now require video, audio, online and print skills to work across multiple platforms and contexts. This subject introduces students to multiplatform digital journalism and the ways in which multiple media can be used to tell stories for a range of contexts.Students develop their own blog site, that is populated using digital devices for working with video, audio and text to engage with a range of social media storytelling modes to extend stories across multiple media contexts. Based on an understanding of ethical and informed journalism practices, students are encouraged to develop their own voice as an independent thinker and writer into the public domain of online publishing.
Level: Undergraduate Level 3 subject
Equivalent Subjects: COMM 3036 - Television Journalism COMM 3030 - Radio Journalism
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 3018 Internship (10 Credit Points)
Subject Details (p. 2936) Legacy Code: 101173
This subject provides students with the opportunity to apply the skills and knowledge they are developing during their studies to tasks within a workplace (the host organisation). The subject may involve substantial contact with the public through workplace placements and, for this reason, it is equivalent to a professional placement. The subject is recommended for students in their third year of study (or part time equivalent).
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 0737 - Advertising Internship LGYB 0070 - Professional Internship - Public Relations LGYB 0119 - Professional Internship - Journalism LGYB 0074 - Media Co-Productions DESN 3009 Professional Practice Design
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 3022 Media Memory (10 Credit Points)
Subject Details (p. 2937) Legacy Code: 101931
Media memory is now a critical field of study in journalism, advertising, visual communication and media. The media builds local, national and transnational identities through the representation of the past. Media industries such as advertising rely upon collective memories to design campaigns in order to reach particular audiences. Journalists increasingly 'assemble' stories from digital archives, recombining similar or related events from the past to build stories and features of the present. Individuals increasingly contribute to news events through their own 'witnessing' of events, capturing and sharing material using mobile and social media. This subject addresses these processes by providing a brief history and overview of approaches to thinking about media and memory, in the context of the significance of media convergence and digital memory within contemporary media ecologies. The subject provides students with a series of case studies that approach the memory of particular events, drawing on examples from advertising, public relations, visual communication, animation, film, broadcasting and journalism. Students develop a media research project that engages with the material presented in the subject.
Level: Undergraduate Level 3 subject
Equivalent Subjects: COMM 3031 - Researching Media Audiences
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 3024 Modernity and Cinema (10 Credit Points)
Subject Details (p. 2938) Legacy Code: 101001
This subject will engage with the question of how social and aesthetic issues interact in films by examining specific questions which are related to cinema history. Issues of identity will be used to focus upon the ways in which historical contexts interrelate with artistic practice. The subject will consider the process of creating emotions, the consideration of techniques of production and the manipulation of cinema language, the use of narrative or non-narrative form to convey the sense of reality, (or the unreal, the uncertain).
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYC 1620 - Modernity and Cinema
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 3025 News Teams (10 Credit Points)
Subject Details (p. 2939) Legacy Code: 102063
This subject introduces students to the concept surrounding the editorial team process and the culture of the newsroom across all news media. It explores the social and organisational context of news production in commercial, public or community news organisations. It draws upon theory from communication, sociology, psychology, and management to provide a broad understanding of the principles and practices of effective and creative news teams. It critically analyses the structures, processes and techniques of news gathering to enable quality team outcomes. The subject encourages collaborative working relationships and develops students' own practice in a team.
Level: Undergraduate Level 3 subject
Equivalent Subjects: COMM 3026 - News Teams and Newsroom Cultures
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 3035 TV Production 2 (10 Credit Points)
Subject Details (p. 2939) Legacy Code: 102409
In 2023, this subject replaced by 102834 - Screen Media: Capstone Production. Television Production 2 is a practical and vocational subject that provides students with a range of advanced skills for working in the television production and broadcast sector. The course encourages multiplatform conceptualisation and distribution of projects exploring the futures of television in online, mobile and networked environments. Students build on their knowledge and experience from TV Production 1 across a range of roles including project planning, scriptwriting and research, filming, sound recording, video editing, and post production. Working in small teams students develop and produce a TV series with professional production values for broadcast through public media contexts.
Level: Undergraduate Level 3 subject
Pre-requisite(s): COMM 3034
Co-requisite(s): COMM 2036
Equivalent Subjects: COMM 3021 - Media Arts Workshop COMM 3038 - Video Project COMM 3033 - TV Production COMM 3050 - Screen Media Capstone Production
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 3037 Transmedia Production (10 Credit Points)
Subject Details (p. 2940) Legacy Code: 101939
In 2023, this subject replaced by COMM 3049 - Screen Media: Capstone Development. Video is now delivered across multiple platforms and spaces, both online and offline via mobile networks; through festivals, public spaces and galleries and across social network sites. At the same time video productions are increasingly designed to be Transmedia where different platforms are strategically used to extend and add new layers to stories while deepening audience interaction and engagement. Students will learn about 360 degree storytelling as strategic communications. Students will develop a professional transmedia project proposal for a service, product or system that works across multiple platforms, engaging with audiences through social network sites. Students will explore how content can be meaningfully embedded and linked across multiple platforms to engage target audiences.
Level: Undergraduate Level 3 subject
Pre-requisite(s): COMM 3020 OR
COMM 3015 OR
DESN 2010 OR
COMM 2018 OR
COMM 2018 OR
COMM 2034 OR
COMM 2042
Equivalent Subjects: COMM 3021 - Media Arts Workshop COMM 3049 - Screen Media Capstone Development
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 3041 Writing For Performance (10 Credit Points)
Subject Details (p. 2941) Legacy Code: 100895
In this subject students will consider the history and theory of a selection of performance traditions including Greek tragedy, Elizabethan and Jacobean and modern drama and post-modern performance and write scripts for one or a number of media, including screen (film and television), dramatic theatre, performance poetry and song lyrics and contemporary performance.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYB 4928 - Writing for Performance LGYA 0302 - Writing for Screen and Stage
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 3042 Writing Poetry (10 Credit Points)
Subject Details (p. 2942) Legacy Code: 101011
What does a poem look or sound like today? In this subject students examine poetic forms, styles and techniques from various cultures of the 20th and 21st centuries. Students are taught to analyse and write poetry via a series of guided workshop exercises. They learn that writing poetry also involves becoming a skilled reader of and about poetry. Students enrich their knowledge and love of poems by scrutinising a range of poetic types and methods including imagism, metaphor, free verse, humour, spoken word traditions, song-writing, ecological poetries, and visual and digital poetries. No previous experience in poetry writing is necessary.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYB 4537 - Writing Poetry
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 3043 Writing Portfolio (10 Credit Points)
Subject Details (p. 2942) Legacy Code: 100582
In this level 3 foundation subject of the Creative Writing Major, students are guided by experienced, professional writers in producing an extended portfolio of original creative writing, in a genre (or genres) of their choice. Students will read closely from a wide range of literary texts while completing an intensive program of in-class writing and workshopping activities. They will gain skills in reading and interpreting texts from different genres, eras and contexts - including culturally diverse settings. Students will develop skills in drafting, editing and polishing their own creative work, and in situating their writing within the Australian literary and publishing industries.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 3045 Advertising: Campaigns (10 Credit Points)
Subject Details (p. 2943) Legacy Code: 102730
In this capstone subject students will learn to professionalise key aspects of the advertising management process. The subject provides the opportunity to link and apply theoretical understanding with research, writing, planning, creative development and media, and presentation skills in response to a live client brief provided by a multi-national advertising agency. The 'real world' situation allows students to demonstrate their capacity for problem analysis and to develop appropriate and timely solutions. Students will work within an allocated budget and to realistic industry deadlines to produce a campaign they can include in their portfolio. Assessment tasks will enable students to demonstrate emerging professional capacity and prepare themselves for a communication position, either in an advertising agency, media agency or consultancy.
Level: Undergraduate Level 3 subject
Pre-requisite(s): COMM 2011 AND
COMM 2006
Equivalent Subjects: LGYA 1057 - Advertising Campaigns COMM 3007 - Communication Campaigns
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 3046 Personal Branding Strategies: Build and Manage Your Career Profile (10 Credit Points)
Subject Details (p. 2944) Legacy Code: 102780
A strong personal brand can open doors to career opportunities, promotions and partnerships in all industries. This subject is essential for anyone who wants to propel their career, build a reputation, capitalise on opportunities and stand out to future employers. Using user-centred theories and approaches, we'll teach you how to create a personal brand aligned to your values and goals in a way that engenders confidence, trust and credibility. You'll learn the skills to network so you can connect with and leverage the influencers who can accelerate your reputation. How to build and showcase your brand, both online and offline, and how to manage it over time. How to craft short talks and presentations (based on the philosophies and techniques of TED), to inspire your audience to action. This subject is recommended for all students, regardless of discipline.
Level: Undergraduate Level 3 subject
Incompatible Subjects: COMM 2049 - Personal Branding Strategies Build and Manage Your Career Profile
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 3047 Episodic Screen Media (10 Credit Points)
Subject Details (p. 2946) Legacy Code: 102831
In this subject students will analyse and develop an episodic narrative production proposal using concepts and production strategies for serialised narrative storytelling for online platforms. Students will be introduced to the University's broadcast television studio and operation. Students will build their knowledge and practical skills in the conceptualisation, planning, editing of serialised online web and streamed digital based narratives. This subject will require students' attendance in workshops delivered in blocks and participation in studio recording.
Level: Undergraduate Level 3 subject
Pre-requisite(s): COMM 2052 - Documentary Factual Screen Media OR COMM 2053 - Narrative Fictional Screen Media
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 3048 Immersive Screen Technologies (10 Credit Points)
Subject Details (p. 2946) Legacy Code: 102832
New technology developments have facilitated the integration and design of immersive technologies to more fully engage audiences with narratives and brands. In this subject, students will study user engagement and visual effects theory and analyse the application of these theories and business models on innovative commercial and creative industries case studies. Students will be introduced to using immersive cross platform technologies and 360 filming. Students will develop a scoping and design template for their own project concept. The project proposal will outline the rationale, using visual design elements and compositing requirements, to build a multi-layered digital experience for a venue, project or brand.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 3049 Screen Media: Capstone Development (10 Credit Points)
Subject Details (p. 2947) Legacy Code: 102833
In this subject students develop a major screen media project which will be produced in the subject Screen Media Capstone Production. The nature of the project may vary depending on students' interests and career aspirations. Projects may range from documentary, drama, episodic, animation, immersive, transmedia, interactive and other hybrid forms. Depending on the nature the project, projects maybe developed individually or in interdisciplinary groups. Projects may be original creative ideas or undertaken in collaboration with an industry and/or community partner.
Level: Undergraduate Level 3 subject
Pre-requisite(s): COMM 2052 Documentary Factual Screen Media AND COMM 3053 Narrative Fictional Screen Media
Equivalent Subjects: -
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 3050 Screen Media: Capstone Production (10 Credit Points)
Subject Details (p. 2948) Legacy Code: 102834
In this subject students produce projects that were planned and developed in the previous subject, Screen Media: Capstone Development. This subject provides the opportunity for students to consolidate theoretical knowledge and practise-based skills acquired throughout their course to produce a substantial screen media project. Students may choose to take on a leadership role such as producer or director, or students may choose develop their skills targeted to their own area of interest. This may involve a specific production area or crew role which may be undertaken on more than one project. Students will also produce an online portfolio featuring key achievements made throughout the course, for the purpose of enhancing graduate employment prospects.
Level: Undergraduate Level 3 subject
Pre-requisite(s): COMM 3049 - Screen Media Capstone Development
Equivalent Subjects: -
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 3052 Writing for our Digital Lives (10 Credit Points)
Subject Details (p. 2949)
The ability to critically consume and strategically create a range of digital media is vital to the health of a democratic, civic society. Through both the practice of writing, and the study of writing as a 'designed space', you'll learn techniques that will help you find your voice as a communicator so you can inspire, compel and inform audiences. You will be provided with opportunities to experiment with and study a number of media platforms as you consider how the digital sphere and its associated technologies are shaping and informing the way we read, write and communicate.
Level: Undergraduate Level 3 subject
Pre-requisite(s): COMM 1044
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 7001 Adaptive Leadership, Management and Team Work (20 Credit Points)
Subject Details (p. 2949) Legacy Code: 102519
The Creative Industries provide opportunities for innovative and integrative working styles and methods, particularly in SMEs and multi-disciplinary collaborations. This industry-facing subject provides an understanding and application of specified theories and methods of leadership, management and collaboration, with a creative, technological and/or entrepreneurial focus. You will devise an individual, semester-long professional development challenge in leadership, management or collaboration and apply your learnings to problem-solve a current professional situation. A supplementary collaborative group project allows you to apply and customise industry roles, techniques and processes in a strategic response to a client brief. You will investigate and analyse one model of leadership, management or collaboration that is found in the creative industries.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 7002 Convergent Media Internship (10 Credit Points)
Subject Details (p. 2950) Legacy Code: 101426
This professionally oriented subject consists of a work internship placement with a corporate media or community communications division of an organisation. These agencies may include WSU research centres, educational, community and cultural agencies within Sydney and corporate and professional organisations in Australia or off-shore, as agreed. The focus of the internship is to research and contribute to audience/community liaison and development, and/or to contribute to the cross media production and/or marketing plans of the organisation. During the placement students will develop documentation to capture and manage ideas about professional development, industry trends, professional links, case studies and associated documentation. On completion of the placement students will present a comprehensive report.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 7003 Foundations of Media Arts Production (PG) (10 Credit Points)
Subject Details (p. 2951) Legacy Code: 102300
This subject explores creative and independent media arts practices across moving image, audio and participatory forms, and introduces students to fundamental principles of long-form sound and screen production. The subject maps theoretical and practical connections between the creation and study of images and sound across media formats through an integrated theory/practice programme focused on the processes through which long-form media artefacts are created. Students learn how to analyse and critically evaluate screen media and also to plan and make simple short works of their own. It introduces students to relevant media arts histories and contexts (with a focus on cinema) in addition to a range of technologies, media practices and production techniques.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 7004 In the Realms of the Sensory: Ecologies of Word, Sound and Image (10 Credit Points)
Subject Details (p. 2952) Legacy Code: 102342
This subject develops an awareness of the cultural, aesthetic and sensory contexts in which the communication, design and creative arts are practiced. It examines approaches to creative practice and the role that creativity and experimentation, as well as collaboration and social creativity, play in the research process. Particular attention is paid to visual, aural, and alphabetic technologies, and the form of augmented virtual realities and artefacts they create. Mimicry, novelty and improvisation, critique and speculation, 'handlability' or tacit knowledge are some of the practices and concepts studied. While the subject is designed for students engaged in creative research, it has relevance for those analysing creative works as part of their research.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 7006 Media Project Production (20 Credit Points)
Subject Details (p. 2953) Legacy Code: 101745
This subject offers an individual, or group of, student(s) the opportunity to develop, produce and evaluate a Media Project developed in the Media Project Proposal Subject. The project production will cover implementation and evaluation issues relevant to media products. The final product is intended to be a significant new media project prototype. Individual students can negotiate the project of their choice, but this should be based on the Media Project Proposal (or equivalent) developed in the Spring Semester, or first half of semester if you are a full time student. A 5,000 word report forms part of the assessment.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): COMM 7007
Equivalent Subjects: LGYA 1411 - Media Production
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 7008 Media Research Project (20 Credit Points)
Subject Details (p. 2953) Legacy Code: 102521
This research-focused subject enables students to develop and produce a major work on a convergent media subject and theme, such as: communications and design theories and practices, data visualisation, content creation for convergent media, and digital humanities. The subject will cover methods for designing and implementing an academic or practice-based research project through workshops and exercises. Students may be introduced to techniques for: differentiating appropriate research methodologies; integrating research techniques into the planning and creation of a research project; field research, action research and research-creation; devising a literature review and constructing a logical argument; and critical reading.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 7009 Mobile Media (10 Credit Points)
Subject Details (p. 2954) Legacy Code: 101743
The proliferation of the mobile device and the evolution of mobile networks has profoundly changed the social and interpersonal sphere and the global media landscape. This subject combines both theory and practice to engage with Mobile Communications and Society: the cultural, family and interpersonal consequences of mobile communication and its effect on every day life, social cohesion, political and economic activities, social development and change, and Mobile Media: current media production and distribution platforms, practices and trends. This subject includes the production of content for distribution via mobile devices.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 7010 New Genres in Research Writing (10 Credit Points)
Subject Details (p. 2955) Legacy Code: 102662
This subject focuses on new, innovative, interdisciplinary genres of writing arising after the putative end of critique and with the rise of non-representational thought. These new writing practices mix genres and meld theoretical, critical and creative modes. Focusing on fictocriticism, creative nonfiction, documentary fiction and the multi-media essay, we explore the experimental ethos and affective and new materialist methodologies to which these forms lend themselves. Students will develop a body of original creative-critical work in any genre through a series of seminars and writing workshops.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 7011 Researching Convergent Media (10 Credit Points)
Subject Details (p. 2955) Legacy Code: 101962
The contemporary creative industries landscape is characterised by the breakdown of traditional media silos and the transformation of media production and consumption practices. Media, marketing and creative professionals are now required to understand and connect with their audiences across multiple media platforms and to undertake diverse research deploying many new methodologies. The aim of this subject is to provide students with an historical, geopolitical and theoretical introduction to research in the creative industries. The case studies and topics covered vary from semester to semester and can include data visualisation, digital ethnography, digital games, community media, digital arts, activist networks, social media and cross platform projects. Using current media theory, design theories, and research methodologies, students will select, analyse and contextualise case studies.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 1632 - Methods and Case Studies in Convergent Media
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 7012 Strategic Communication (20 Credit Points)
Subject Details (p. 2956) Legacy Code: 102292
Local and international industry trends show that strategic communication, particularly including agendas of innovation and ethics, are a growing force in the convergent media landscape. This subject introduces students to both the science and art of strategic communication. It is grounded in an advanced understanding of the complexity of human communication processes and driven by a conviction that systematic research and analysis is required to inform strategic communication responses. This subject is based around a series of assessments that require students to address a real-world business challenge or a social issue in ways that take advantage of convergent media environments.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: LGYA 1704 - Strategic Communication
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 7013 Ideate, Develop: Makerspace 1 (10 Credit Points)
Subject Details (p. 2957) Legacy Code: 102717
Ideation is at the core of creative industries. This practice-led research subject will teach you how to ideate, develop and pitch a major project, which you can then produce in the Makerspace 2 subject. We will show you how to mobilise your own creative interests, how to identify and research a creative or market challenge, and teach you techniques for generating ideas and innovative solutions-based responses. You'll learn systemic methods and tools for creative ideation across multiple platforms and channels, including UX (user experience), UI (user interactivity), design thinking, IA (information architecture) and UCD (user centred design). We'll also teach you how to pitch your project so it captures the imagination and attention of clients and audiences.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: COMM 7007 - Media Project Proposal
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 7014 Innovate: The Entrepreneurial Mindset (10 Credit Points)
Subject Details (p. 2958) Legacy Code: 102719
This subject focuses on current trends and issues in innovation and entrepreneurship in the creative industries with a strong focus on small to media enterprises (SME), ventures within existing business and within government. The subject addresses methodologies for innovation, such as design-thinking and futuring; the role and efficacy of public and private incubators; the forms, foundations, qualities and capacity of entrepreneurship and business development strategies; and the role of networking and industry partnerships, with a focus on the capacities of social media to effect change in markets and partnerships, and business development strategies.. The subject covers existing 'new' business models and emerging trends, such as social entrepreneurship and co-working spaces. The subject builds on previous capstone subjects Ideate, Develop: Makerspace 1 and Produce, Generate: Makerspace 2 in introducing further methods for creative ideation with a focus on technology.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: COMM 7005 - Innovation and Entrepreneurship PG
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 7015 Key Concepts in Communication and Media Research (10 Credit Points)
Subject Details (p. 2959)
Mobile and networked media technologies have massively transformed how we work, learn, interact and play. Given this transformation, media and communication is now a vital area of research in every field and discipline. In this subject, you will be introduced to classic and contemporary media and communication technologies, texts and scholars as you explore historical and still unfolding developments and events. In doing so, you will consider how changes to media technologies, industries and practices impact upon – and are influenced by – people, cultures and economies. As you expand your knowledge of existing scholarship, you will learn how to identify and integrate the concepts, theories, methods and ethical frameworks that are most appropriate for your own thesis project.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: CULT 7002 Engaging Discursive Fields
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMM 9001 Higher Degree Research Thesis - Communication and Media Studies (80 Credit Points)
Subject Details (p. 2960) Legacy Code: 800003
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

Complementary Therapies (CMPL)

CMPL 1001 Traditional Chinese Medicine 1 (10 Credit Points)
Subject Details (p. 2839) Legacy Code: 400346
This subject provides a comprehensive introduction to traditional Chinese medicine (TCM). Students are introduced to basic TCM theory, and the physiological principles of the diagnostic system that forms the basis of TCM practice. The history and philosophy of Chinese medicine is introduced and discussed in the light of contemporary clinical practice.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CMPL 1002 Traditional Chinese Medicine 2 (10 Credit Points)
Subject Details (p. 2840) Legacy Code: 400348
This subject provides learning experiences that enable students to expand upon their understanding of TCM philosophy and principles, with particular reference to developing diagnostic skills in TCM. Students acquire basic skills in case history taking, interpretation of relevant signs and symptoms, arriving at a TCM diagnosis, and devising suitable treatment strategies. The subject also covers basic Chinese language including Pin Yin and Romanisation to enable students to apply TCM terminology as part of clinical practice.
Level: Undergraduate Level 1 subject
Pre-requisite(s): CMPL 1001
Restrictions: Please see the Subject Details page for any restrictions for this subject

CMPL 2002 Channels and Points 1 (10 Credit Points)
Subject Details (p. 2841) Legacy Code: 400874
Acupuncture is one of the principal therapeutic interventions in Traditional Chinese Medicine (TCM). This subject introduces students to acupuncture theory and practice, and provides opportunity to develop practical skills. It covers the theory of channels and points, channel pathway, point location and indications of the conception and governor vessels, and the first 6 channels in the meridian cycle. This subject also expands upon the student's understanding of TCM theory and practice principles. This subject includes a minimum of 20 practicum hours at UniClinic.
Level: Undergraduate Level 2 subject
Pre-requisite(s): CMPL 1002
Co-requisite(s): CMPL 2006
Equivalent Subjects: LGYA 7238 - Acupuncture 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

CMPL 2003 Channels and Points 2 (10 Credit Points)
Subject Details (p. 2842) Legacy Code: 400875
Acupuncture is one of the principal therapeutic interventions in Traditional Chinese Medicine (TCM). This subject completes the study of the system of channels and points, which forms the basis of clinical application of acupuncture. It covers the channel pathway, point location and indications of the last 6 channels of the meridian cycle and the extra points. It also reinforces the student's ability to identify and palpate surface anatomy relevant to identifying the acupuncture point locations covered in this subject and relevant safe administration of needling. This subject expands the student's understanding of TCM theory and practice principles. This subject includes mandatory clinical placement. As an indication, this subject includes a minimum of 20 practicum hours at UniClinic, and 24 practicum hours at an external clinic.
Level: Undergraduate Level 2 subject
Pre-requisite(s): CMPL 2006 AND
CMPL 2002
Equivalent Subjects: LGYA 7238 - Acupuncture 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

CMPL 2004 Chinese Materia Medica 1 (10 Credit Points)
Subject Details (p. 2843) Legacy Code: 400876
Herbal medicine is one of the principal therapeutic interventions in Traditional Chinese Medicine. This subject introduces students to the therapeutic and reference organisation of Chinese medicinal herbs, and enables students to commence using the materia medica. It covers the commonly used herbs in each of the six categories of the Chinese materia medica, including the herbal properties, actions, indications, contraindications, combined usage as well as herbal dispensing. This subject also expands upon the student's understanding of TCM theory and practice principles. This subject includes a minimum of 20 practicum hours at UniClinic.
Level: Undergraduate Level 2 subject
Pre-requisite(s): CMPL 1002
Co-requisite(s): CMPL 2006
Equivalent Subjects: LGYA 7239 - Chinese Herbal Medicine 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

CMPL 2005 Chinese Materia Medica 2 (10 Credit Points)
Subject Details (p. 2844) Legacy Code: 400877
This subject completes the study of Chinese medicinal herbs, which forms the basis for Chinese herbal medicine. It covers the commonly used herbs in each of the twelve categories of the Chinese materia medica, including the herbal properties, actions, indications, contraindications and combined usage. It also introduces the basic knowledge of herbal pharmacognosy. This subject also expands upon the student's understanding of Traditional Chinese Medicine theory and practice principles. As an indication, this subject includes a minimum of 20 practicum hours at UniClinic, and 24 practicum hours at an external clinic.
Level: Undergraduate Level 2 subject
Pre-requisite(s): CMPL 1002 AND
CMPL 2004
Equivalent Subjects: LGYA 7240 - Chinese Herbal Medicine 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

CMPL 2006 Traditional Chinese Medicine 3 (10 Credit Points)
Subject Details (p. 2845) Legacy Code: 400352
This subject enables students to develop a sound understanding of causes of disease in TCM with a particular focus on TCM disease pattern differentiation. Students will be able to identify the clinical manifestations relating to specific patterns and develop the appropriate TCM treatment principles. This is complemented by the reinforcement of skills in case history taking and TCM diagnostics.
Level: Undergraduate Level 2 subject
Pre-requisite(s): CMPL 1002
Restrictions: Please see the Subject Details page for any restrictions for this subject

CMPL 3001 Acupuncture Techniques (10 Credit Points)
Subject Details (p. 2846) Legacy Code: 400873
This subject consolidates and extends students' knowledge of acupuncture theory and practice, and provides further opportunity to develop practical skills. Students are introduced to the theory of point combinations and the development of acupuncture prescriptions and treatment plans. Practical sessions include obtaining Qi (De Qi), promoting Qi techniques, tonifying and reducing needling techniques, moxibustion, cupping, Gua Sha, Tuina, intradermal/cutaneous needling, scalp acupuncture, auricular acupuncture, wrist/ankle acupuncture, electroacupuncture and laser acupuncture. This subject also expands upon the student's understanding of the theory and practice principles of traditional Chinese medicine.
Level: Undergraduate Level 3 subject
Pre-requisite(s): CMPL 2003 AND
CMPL 2006
Equivalent Subjects: CMPL 2001 - Acupuncture 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

CMPL 3002 Chinese Medicinal Formulas (10 Credit Points)
Subject Details (p. 2847) Legacy Code: 400878
Herbal medicine is the principal therapeutic intervention in Traditional Chinese Medicine (TCM). This subject follows from Chinese Materia Medica 1 & 2, and begins the study of major Chinese herbal formulas, which form the basis for clinical prescribing in Chinese herbal medicine. The focus of this subject is to compare and contrast the main formulas in specified categories, and to analyse the specific actions of the herbs that make up the formula. Students will be required to formulate, assemble and prepare complex prescriptions. This subject expands upon the student's knowledge of the Chinese Materia Medica, as well as the understanding of TCM theory and practice principles.
Level: Undergraduate Level 3 subject
Pre-requisite(s): CMPL 2006 AND
CMPL 2005
Equivalent Subjects: LGYA 7240 - Chinese Herbal Medicine 3
Restrictions: Please see the Subject Details page for any restrictions for this subject

CMPL 3003 Traditional Chinese Medicine Practice 1 (10 Credit Points)
Subject Details (p. 2848) Legacy Code: 400354
This subject is focused on introductory clinical practice in a clinical setting. It enables the students to link theory with practice. It expands the students' knowledge base of Chinese medicine theory and diagnosis, and the application of acupuncture and Chinese herbal medicine treatment. Students assist with clinical practice, take consultations, and perform basic acupuncture related techniques. Students will also learn basic skills in handling herbal preparation and dispensing. This subject includes mandatory clinical placement
Level: Undergraduate Level 3 subject
Pre-requisite(s): CMPL 2006
Co-requisite(s): CMPL 3001 AND
CMPL 3002
Restrictions: Please see the Subject Details page for any restrictions for this subject

CMPL 3004 Traditional Chinese Medicine Practice 2 (10 Credit Points)
Subject Details (p. 2849) Legacy Code: 400356
This subject focuses on the application of the skills and knowledge of TCM within a clinical setting. The subject provides the opportunity to expand students' knowledge base of the theory Chinese medicine through the work integrated experiential learning. Specifically, the subject covers TCM diagnosis, the application of Acupuncture techniques and the implementation of Chinese herbal medicine treatments. The subject also covers basic Chinese language including Pin Yin and Romanisation to enable students to apply TCM terminology as part of clinical practice. Under supervision, students have the opportunity to consult with clients/patients, perform basic acupuncture, and undertaken herbal prescription. Students will also undertake basic herbal processing and preparation of medicinal herbs.
Level: Undergraduate Level 3 subject
Pre-requisite(s): CMPL 3003
Restrictions: Please see the Subject Details page for any restrictions for this subject

CMPL 4001 Block Clinical Practicum (10 Credit Points)
Subject Details (p. 2849) Legacy Code: 401104
This subject provides the student with intensive, supervised clinical practice experience. Arrangements are usualy made for students to complete this stage in China. Due to the travel restriction as a result of COVID-19 pandemic, this subject in 2020 is wholly offered in Australia. The subject represents the final clinical practicum stage with an opportunity in develoing clinical skills. Students will be expected to demonstrate competence in handling patients in a clinical context, and manage their integrated care using Traditional Chinese Medicine.
Level: Undergraduate Level 4 subject
Incompatible Subjects: CMPL 7002 - Block Clinical Practicum (PG) AND LGYA 7257 - Block Clinical Practicum
Restrictions: Please see the Subject Details page for any restrictions for this subject

CMPL 4002 Chinese Internal Medicine 1 (10 Credit Points)
Subject Details (p. 2851) Legacy Code: 401098
The study of internal medicine forms the basis of clinical practice in Traditional Chinese Medicine (TCM). This subject begins to bridge the gap between theory and practice. It enables the health professional to analyse, diagnose and treat common internal diseases with both acupuncture and herbal medicine and using a TCM approach. The focus of this subject is on the analysis of major presenting symptoms.
Level: Undergraduate Level 4 subject
Pre-requisite(s): CMPL 2006 AND
CMPL 3001 AND
CMPL 3002
Incompatible Subjects: 400918 - Chinese Internal Medicine 1 (PG) LGYA 7251 - Chinese Internal Medicine 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

CMPL 4003 Chinese Internal Medicine 2 (10 Credit Points)
Subject Details (p. 2852) Legacy Code: 401102
This subject builds on Chinese Medicine 1 and extends the student's ability to analyse, diagnose and treat common and difficult diseases in internal medicine with both acupuncture and herbal medicine and using a TCM approach. Students will develop an understanding of the causes and pathophysiological mechanisms of a wide range of diseases.
Level: Undergraduate Level 4 subject
Pre-requisite(s): CMPL 2006 AND
CMPL 3001 AND
CMPL 3002
Incompatible Subjects: CMPL 7004 - Chinese Internal Medicine 2 (PG) AND LGYA 7251 - Chinese Internal Medicine 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

CMPL 4004 Classical Texts in Chinese Medicine (10 Credit Points)
Subject Details (p. 2853) Legacy Code: 401100
This subject provides further learning experiences that enable the students to explore the original theories on physiology, pathology, diagnosis, differentiation and treatment of diseases through select periods of Chinese history. Many theoretical concepts, diagnostic systems and therapeutic methods of Traditional Chinese Medicine (TCM) are still in current usage, and will be covered through the study of important classical texts and academic schools of TCM thought. This subject expands upon the student's understanding of TCM theories and practice principles through studies of the classical literature.
Level: Undergraduate Level 4 subject
Pre-requisite(s): CMPL 2006 AND
CMPL 3002
Incompatible Subjects: CMPL 7006 - Classical Texts in Chinese Medicine (PG)
Restrictions: Please see the Subject Details page for any restrictions for this subject

CMPL 4005 Specialities in Traditional Chinese Medicine 1 (10 Credit Points)
Subject Details (p. 2853) Legacy Code: 401099
This subject provides learning experiences that enable the health professional to analyse, diagnose and treat common gynaecological diseases and musculoskeletal conditions using a Traditional Chinese Medicine (TCM) approach with acupuncture and Chinese herbal medicine. Students will develop a good understanding of the causes and pathophysiological mechanisms of common gynaecological diseases and musculoskeletal conditions.
Level: Undergraduate Level 4 subject
Pre-requisite(s): CMPL 2006 AND
CMPL 3001 AND
CMPL 3002
Incompatible Subjects: CMPL 7021 - Specialties in Traditional Chinese Medicine Practice 1 (PG) LGYA 7248 - Specialties in Traditional Chinese Medicine 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

CMPL 4006 Specialities in Traditional Chinese Medicine 2 (10 Credit Points)
Subject Details (p. 2854) Legacy Code: 401103
The specialties of paediatrics, dermatology, ear, nose, throat (ENT) and eye diseases, are important divisions of Traditional Chinese Medicine (TCM) activity. This subject enables students to develop an understanding of the aetiology and pathophysiology of common paediatric, dermatological, ENT and eye disorders, and to analyse, diagnose and treat these conditions using acupuncture and Chinese herbal medicine.
Level: Undergraduate Level 4 subject
Pre-requisite(s): CMPL 2006 AND
CMPL 3001 AND
CMPL 3002
Incompatible Subjects: CMPL 7022 - Specialties in Traditional Chinese Medicine 2 (PG) LGYA 7259 - Specialties in Traditional Chinese Medicine 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

CMPL 4007 Traditional Chinese Medicine Practice 3 (10 Credit Points)
Subject Details (p. 2855) Legacy Code: 401101
This subject represents a continuation of the clinical practicum and development of clinical skills in relation to patient management and TCM health preservation and enhancement, including lifestyle, diet and physical exercise. Students will also be able to apply their knowledge of professional theory, practice, research and evaluation skills to the investigation of TCM problem. Students will be expected to demonstrate competence in handling patients in a clinical context, synthesise knowledge from their studies of specialities in Traditional Chinese Medicine and critically examine the practical aspects of acupuncture and Chinese herbal medicine research. This subject includes mandatory clinical placement
Level: Undergraduate Level 4 subject
Pre-requisite(s): CMPL 3004
Incompatible Subjects: CMPL 7023 - TCM Practice 3 (PG) AND LGYA 7249 - TCM Practice 3
Restrictions: Please see the Subject Details page for any restrictions for this subject

CMPL 4008 Traditional Chinese Medicine Practice 4 (10 Credit Points)
Subject Details (p. 2856) Legacy Code: 401105
This subject represents a continuation of the clinical practicum and development of clinical skills. Students will integrate theoretical knowledge, practical and research skills, learnt in previous units, into clinical practice, including in: case investigation; diagnosis; formulation of treatment strategies; and the delivery of treatments to patients. Students will learn to act ethically in professional contexts. Students are expected to demonstrate professional competence in handling patients in a clinical context, critically evaluating complex cases, diagnosing, devising and managing the patients using TCM therapies.
Level: Undergraduate Level 4 subject
Pre-requisite(s): CMPL 4007
Incompatible Subjects: CMPL 7024 - TCM Practice 4 (PG) AND LGYA 7255 - TCM Practice 4
Restrictions: Please see the Subject Details page for any restrictions for this subject

CMPL 7001 Advanced Acupuncture (10 Credit Points)
Subject Details (p. 2858) Legacy Code: 400578
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CMPL 7002 Block Clinical Practicum (PG) (10 Credit Points)
Subject Details (p. 2858) Legacy Code: 400927
This subject provides the student with intensive, supervised clinical practice experience. Arrangements will be made for students to complete this stage in China. This will involve students paying their own travel fares, as well as, training and accommodation fees to the Chinese institution. This subject represents the final clinical practicum stage and development of clinical skills. Students will be expected to demonstrate competence in handling patients in a clinical context, and manage their integrated care using TCM.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: LGYA 7257 - Block Clinical Practicum
Restrictions: Please see the Subject Details page for any restrictions for this subject

CMPL 7003 Chinese Internal Medicine 1 (PG) (10 Credit Points)
Subject Details (p. 2858) Legacy Code: 400918
The study of internal medicine forms the basis of clinical practice in traditional Chinese medicine. This subject begins to bridge the gap between theory and practice. It enables the health professional to analyse, diagnose and treat common internal diseases with both acupuncture and herbal medicine and using a TCM approach. The focus of this subject is on the analysis of major presenting symptoms.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: LGYA 7246 - Chinese Internal Medicine
Restrictions: Please see the Subject Details page for any restrictions for this subject

CMPL 7004 Chinese Internal Medicine 2 (PG) (10 Credit Points)
Subject Details (p. 2859) Legacy Code: 400922
This subject builds on Chinese Medicine 1 and extends the students ability to analyse, diagnose and treat common and difficult diseases in internal medicine with both acupuncture and herbal medicine and using a Traditional Chinese Medicine approach. Students will develop an understanding of the causes and pathophysiological mechanisms of a wide range of diseases.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: LGYA 7251 - Chinese Internal Medicine 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

CMPL 7005 Chronic and Complex Disorders in Chinese Medicine (10 Credit Points)
Subject Details (p. 2860) Legacy Code: 401137
This subject will enable practitioners to extend their clinical reasoning skills to chronic and complex conditions seen in contemporary Chinese Medicine clinical practice. The subject will analyse specific cases and conditions which present a range of complex and contradictory signs and symptoms making diagnosis and treatment challenging. Senior practitioners of both acupuncture and Chinese herbal medicine will present their own clinical experience and assist students to understand their diagnostic and treatment processes.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: NATS 7005 - Chinese Medicine Specialties AND CMPL 7011 - Dermatology in Chinese Medicine
Restrictions: Please see the Subject Details page for any restrictions for this subject

CMPL 7006 Classical Texts in Chinese Medicine (PG) (10 Credit Points)
Subject Details (p. 2860) Legacy Code: 400969
This subject provides further learning experiences that enable the students to explore the original theories on physiology, pathology, diagnosis, differentiation and treatment of diseases through select periods of Chinese history. Many theoretical concepts, diagnostic systems and therapeutic methods of Traditional Chinese Medicine (TCM) are still in current usage, and will be covered through the study of important classical texts and academic schools of TCM thought. This subject expands upon the students understanding of TCM theories and practice principles through studies of the classical literature.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: LGYA 7244 - Classical Texts in Chinese Medicine
Restrictions: Please see the Subject Details page for any restrictions for this subject

CMPL 7007 Clinical Application of Classical Chinese Herbal Medicine (10 Credit Points)
Subject Details (p. 2861) Legacy Code: 401130
This subject presents the origin, development and features of classical Chinese herbal medicine (Jing Fang), and reveals their pharmacological and clinical outcomes based on the latest clinical observation and research. This subject will appeal to practitioners seeking to extend and deepen their knowledge and clinical skills with Chinese herbs and to students embarking on research in this area. The classical texts contain deep insights on Chinese herbs and formulae for a range of conditions. Selective herbal formulae from the Treatise on Cold Pathogenic Diseases (Shanghan Lun) and the Synopsis of Golden Chamber (Jingui Yaolue) are explored in depth to demonstrate the clinical applications.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CMPL 7008 Clinical Applications of Classical Acupuncture (10 Credit Points)
Subject Details (p. 2862) Legacy Code: 401131
This subject presents the origin, development and features of classical acupuncture and reveals the clinical outcomes based on the latest clinical observation and research. This subject will appeal to practitioners seeking to extend and deepen their knowledge and clinical skills with traditional acupuncture and to practitioners embarking on research in this area. Ancient acupuncture theories and techniques will be taught with a focus on their application to contemporary practice based on latest research and on the different theoretical approaches in the design of acupuncture point prescriptions.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: CMPL 7001 - Advanced Acupuncture
Restrictions: Please see the Subject Details page for any restrictions for this subject

CMPL 7009 Clinical Oncology and Chinese Medicine (10 Credit Points)
Subject Details (p. 2863) Legacy Code: 401136
This subject is focused on the clinical application of Chinese herbal medicine (CHM) and acupuncture in the management of cancer. Today, cancer is one of the leading causes of death and disease burden. Survival rates for many types of cancer have improved in recent years and long-term survival challenges accepted practices in cancer care and management. This subject explores application of Chinese medicine to the management of cancer, through the ancient wisdom in the classic literature recourses and contemporary clinical practice and research. The subject addresses the commonly used strategies, approaches and roles of Chinese medicine at different stages of cancer as well as the use of Chinese medicine as a supplementary therapy for common types of cancer.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CMPL 7010 Clinical Placement (20 Credit Points)
Subject Details (p. 2864) Legacy Code: 401133
This subject provides four weeks of full-time (or part-time equivalent) clinical placement with a choice of clinical training in the defined specialty areas (women's health, musculoskeletal health, mental and neurological disorders, oncology, or chronic and complex diseases). The clinical placement is with experienced specialist practitioners provided in conjunction with the Beijing University of Chinese Medicine in China or by an approved alternative arrangement with the student and limited by available opportunities.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): CMPL 7025 OR
CMPL 7016 OR
CMPL 7009 OR
CMPL 7005
Restrictions: Please see the Subject Details page for any restrictions for this subject

CMPL 7011 Dermatology in Chinese Medicine 1 (10 Credit Points)
Subject Details (p. 2865) Legacy Code: 400572
This subject along with Dermatology in Chinese Medicine 2 will enable practitioners to develop an in-depth understanding of Traditional Chinese Medicine (TCM) diagnosis and management of a wide range of skin diseases using acupuncture and Chinese herbal medicine. This subject includes orthodox medical diagnosis and management of common skin disorders and the integration of this with TCM theory, diagnosis and management. Dermatology in Chinese Medicine 1 and 2 together provide a strong specialist clinical focus on the management of skin disorders with Chinese medicine.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CMPL 7012 Evidence Based Practice in Chinese Medicine (10 Credit Points)
Subject Details (p. 2866) Legacy Code: 401129
This subject will introduce and develop the concepts and principles of evidence-based practice as applied to Traditional Chinese Medicine (TCM) and explore specific aspects of research development. Furthermore, this subject will focus on the clinical applications of such research- based evidence and highlight integrative methods combining TCM and biomedical diagnostics and disease management. Students will gain an understanding of the complexities, practicality, and applied methodologies used in research to establish the validity and reliability of TCM theories, diagnostics and interventional techniques in addition to the appropriateness of various outcome measures for research and clinical practice. This subject will provide students with a practical skillset designed to facilitate location, evaluation, integration, and application of scientific research evidence in clinical practice whilst also preparing students for development of research proposals in subsequent subjects such as Research Protocol Design & Practice.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: CMPL 7013 - Evidence Based Practice in Chinese Medicine 1 CMPL 7014 - Evidence Based Practice in Chinese Medicine 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

CMPL 7013 Evidence Based Practice in Chinese Medicine 1 (10 Credit Points)
Subject Details (p. 2866) Legacy Code: 400567
This subject will provide the student with the opportunity to develop the skills necessary to search, understand and critically appraise scientific literature related to Chinese medicine. Basic research methods will be introduced sufficient to support the student through this subject. This subject will introduce and develop concepts and principles of evidence-based practice applied to Chinese medicine and explore specific research developments in Chinese medicine.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CMPL 7014 Evidence Based Practice in Chinese Medicine 2 (10 Credit Points)
Subject Details (p. 2867) Legacy Code: 400568
This subject will focus on the integration of Traditional Chinese Medicine (TCM) and Western medicine in the diagnosis and management of disease. A significant focus of this subject will be on the interpretation and integration of medical diagnostic tests with TCM diagnosis, and will include an examination of the research that attempts to validate TCM theory and diagnostic techniques. Students will learn how to integrate and prioritise clinical information and undertake the development of a research proposal.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CMPL 7015 Mental and Neurological Disorders and Chinese Medicine (10 Credit Points)
Subject Details (p. 2868) Legacy Code: 401135
This subject will enable practitioners to extend their understanding of Chinese Medicine management of a range of mental health conditions and neurological disorders. The clinical focus is on the Chinese Medicine diagnosis and management of these disorders and integration with the orthodox biomedical approaches to disorders that are common in the community. Chinese Medicine treatment will focus on acupuncture and Chinese herbal medicine treatments. Students will learn to apply Chinese Medicine's unique understanding and contribution to the rehabilitation of those who have suffered from disabling psychological/psychiatric and neurological diseases.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: NATS 7036 - Mental Health in Chinese Medicine NATS 7038 - Neurological Disorders in Chinese Medicine
Restrictions: Please see the Subject Details page for any restrictions for this subject

CMPL 7016 Musculoskeletal Health in Chinese Medicine (10 Credit Points)
Subject Details (p. 2868) Legacy Code: 401134
This subject will enable practitioners to develop an in-depth understanding of the diagnosis and management of musculoskeletal conditions with acupuncture and Chinese herbal medicine. This subject presents a systematic approach to the assessment of musculoskeletal disorders using Traditional Chinese Medicine (TCM), the application of specific medical tests and includes a focus on common musculoskeletal disorders, sports injuries and rehabilitation. Musculoskeletal Health in Chinese Medicine provides a strong specialist clinical focus on the management of musculoskeletal health disorders with acupuncture and Chinese herbal medicine.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: CMPL 7017 - Musculoskeletal Health in Chinese Medicine 1 CMPL 7018 - Musculoskeletal Health in Chinese Medicine 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

CMPL 7019 Pharmacology of Chinese Medicines (10 Credit Points)
Subject Details (p. 2869) Legacy Code: 400569
This subject will introduce the student to the pharmacology and toxicology of Chinese herbal medicine. The subject will cover the pharmacological principles of Chinese herbal medicines and identify basic active constituents that contribute to the actions of Chinese herbal medicines. This subject will also introduce safety and toxicology of herbal medicines including mechanisms and measurement of toxicity, known potential adverse reactions of commonly used Chinese herbs, known potential interactions with Western pharmaceuticals and management of adverse events.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CMPL 7020 Research Project and Thesis (60 Credit Points)
Subject Details (p. 2870) Legacy Code: 401138
This is a 60 credit point year-long subject taken over two terms (30 credit points in each term). This subject requires students to complete a substantial piece of independent research in Chinese Medicine including research planning, study design, data collection, analysis and interpretation. Dissertation projects are developed in consultation with staff who possess similar research interests and relevant research experience. Students may wish to submit their work for examination in a form suitable for publication in the peer-reviewed literature (with supplementary material as appropriate).
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): CMPL 7012 AND
PUBH 7016 OR
HLTH 7008
Co-requisite(s): AGEN 7005
Restrictions: Please see the Subject Details page for any restrictions for this subject

CMPL 7021 Specialities in Traditional Chinese Medicine 1 (PG) (10 Credit Points)
Subject Details (p. 2871) Legacy Code: 400919
This subject provides learning experiences that enable the health professional to analyse, diagnose and treat common gynaecological diseases and musculoskeletal conditions using a TCM approach with acupuncture and Chinese herbal medicine. Students will develop a good understanding of the causes and pathophysiological mechanisms of common gynaecological diseases and musculoskeletal conditions.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): CMPL 7003
Incompatible Subjects: LGYA 7248 - Specialities in Traditional Chinese Medicine
Restrictions: Please see the Subject Details page for any restrictions for this subject

CMPL 7022 Specialities in Traditional Chinese Medicine 2 (PG) (10 Credit Points)
Subject Details (p. 2871) Legacy Code: 400923
The specialties of pediatrics, dermatology, ear, nose, throat (ENT) and eye diseases, are important divisions of TCM activity. This subject enables students to develop an understanding of the aetiology and pathophysiology of common paediatric, dermatological, ENT and eye disorders, and to analyze, diagnose and treat these conditions using acupuncture and Chinese herbal medicine.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): CMPL 7003
Incompatible Subjects: LGYA 7259 - Specialities in Traditional Chinese Medicine 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

CMPL 7023 Traditional Chinese Medicine Practice 3 (PG) (10 Credit Points)
Subject Details (p. 2872) Legacy Code: 400920
This subject represents a continuation of the clinical practicum and development of clinical skills. Students will also be able to apply their knowledge of professional theory, practice, research and evaluation skills to the investigation of Traditional Chinese Medicine (TCM) problems. Students will be expected to demonstrate competence in handling patients in a clinical context, synthesise knowledge from their studies of specialities in TCM and critically examine the practical aspects of acupuncture and Chinese herbal medicine research. Students will also learn basic knowledge of health preservation and enhancement including lifestyle, diet and physical exercise.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: LGYA 7249 - Traditional Chinese Medicine Practice (Research Project)
Restrictions: Please see the Subject Details page for any restrictions for this subject

CMPL 7024 Traditional Chinese Medicine Practice 4 (PG) (10 Credit Points)
Subject Details (p. 2873) Legacy Code: 400924
This subject represents a continuation of the clinical practicum and development of clinical skills. Students will be able to integrate their theoretical knowledge, practice skills and research base to the investigation, diagnosis and supervised treatment of patients in a clinical context. Students will be able to synthesise knowledge and competency in the practice of clinical areas of focus taught in Chinese Medicine I and II, and Specialties in TCM I and II. Students will be expected to demonstrate professional competence in handling patients in a clinical context, diagnosing more complex cases and devising and managing the integrated care of patients using TCM.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: LGYA 7255 - Traditional Chinese Medicine Practice 4
Restrictions: Please see the Subject Details page for any restrictions for this subject

CMPL 7025 Women's Health in Chinese Medicine (10 Credit Points)
Subject Details (p. 2873) Legacy Code: 401132
This subject will enable practitioners to extend their understanding of Chinese Medicine management of a range of women's health conditions. The clinical focus of this subject is on the integration of Chinese Medicine and conventional therapies in the treatment of disorders of the menstrual cycle, obstetric disorders, fertility, menopause and breast disease.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: CMPL 7026 - Women’s Health in Chinese Medicine 1 AND CMPL 7027 - Women’s Health in Chinese Medicine 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

CMPL 7026 Women's Health in Chinese Medicine 1 (10 Credit Points)
Subject Details (p. 2874) Legacy Code: 400570
This subject enables practitioners to extend their understanding of a range of gynaecological and obstetric disorders and to diagnose and treat these using acupuncture and patent herbal medicines. The clinical focus of this subject is on the integration of Traditional Chinese Medicine (TCM) in the treatment of disorders of the menstrual cycle, obstetric disorders, menopause and breast disease.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: CMPL 7026 - Women's Health in Chinese Medicine 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

CMPL 7027 Women's Health in Chinese Medicine 2 (10 Credit Points)
Subject Details (p. 2875) Legacy Code: 400571
This subject enables practitioners to extend their understanding of a range of gynaecological and obstetric disorders and to diagnose and treat these primarily using Chinese herbal medicine. The clinical focus of this subject is on the integration of Traditional Chinese Medicine (TCM) in the treatment of complex disorders of the menstrual cycle, infertility, obstetric disorders, menopause, pelvic and breast disease.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: CMPL 7027 - Women's Health in Chinese Medicine 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

CMPL 9001 Higher Degree Research Thesis - Centre for Complementary Medicine (80 Credit Points)
Subject Details (p. 2876) Legacy Code: 800138
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CMPL 9002 Higher Degree Research Thesis - Traditional Chinese Medicine (80 Credit Points)
Subject Details (p. 2876) Legacy Code: 800105
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

Computer Science (COMP)

COMP 0001 Introductory Programming (WSTC Prep) (10 Credit Points)
Subject Details (p. 2961) Legacy Code: 700204
The subject introduces students to computer programming as an essential tool for problem-solving and data analysis in engineering and science. The focus is on using an algorithmic approach to problem solving. Students will learn how to analyse and solve problems by designing an algorithm and implementing it in a high-level programming language. This subject includes extensive practical work and problem-solving activities. It prepares students for the first year subject, Engineering Computing, in the Bachelor programs in Engineering. Students will also be able to use their acquired programming skills to perform calculations, analyse data and create graphs for their projects and reports in other subjects.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: COMP 0002 - Introductory Programming (UWSC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 0002 Introductory Programming (WSTC) (10 Credit Points)
Subject Details (p. 2962) Legacy Code: 900084
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 0003 Programming Design (WSTC Prep) (5 Credit Points)
Subject Details (p. 2962) Legacy Code: 700047
This subject introduces students to the principles required for the effective design and development of solutions to computer program related problems. This subject has been developed to enhance a student's practical ability as well as build a solid theoretical foundation for further study in programming.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: LGYB 0451 - Programming Design (UWSCDip) COMP 0004 - Programming Design (UWSC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 0004 Programming Design (WSTC) (5 Credit Points)
Subject Details (p. 2963) Legacy Code: 900009
Programming Design introduces students to the principles required for the effective design of solutions to computer program related problems. The course has been developed to enhance a student's practical ability as well as build a solid theoretical foundation for further study.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 1001 3D Modelling Fundamentals (10 Credit Points)
Subject Details (p. 2963) Legacy Code: 301164
This subject will introduce the fundamentals of 3D surface modelling. Students will learn the theory of 3D surface modelling and will gain practical skills in creating 3D assets using a popular software package from Autodesk. They will also learn how to design characters and how to integrate their assets with a purpose of producing complex 3D scenes and animated movies. This subject is aimed at students who have no prior knowledge of 3D modelling and are not familiar with associated software packages.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 1002 Advanced Computer Science Activities 1 (0 Credit Points)
Subject Details (p. 2964) Legacy Code: 300586
This subject is only for Bachelor of Computer Science (Advanced) students in year one of their studies. Students will participate in industry and research based extension activities (non-assessable). These activities will be identified with the goal of exposing students early in their degree and integrating them into a culture of academic enquiry, problem solving, knowledge generation and scholarship and an awareness of the challenges and current issues confronting the computing/IT industry. The subject will be used to record student activities and a satisfactory/ unsatisfactory grade will be applied at the end of each semester.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 1005 Programming Fundamentals (10 Credit Points)
Subject Details (p. 2964) Legacy Code: 300580
As a first subject in computer programming, Programming Fundamentals covers the basics of developing software with an emphasis on procedural programming. Students will learn about basic data structures, the concept of algorithms, fundamental programming constructs, common programming language features and functions, program design and good programming style. A high level programming language is combined with a highly visual framework to teach problem solving using software.
Level: Undergraduate Level 1 subject
Equivalent Subjects: COMP 1004 - Fundamentals of Programming LGYA 5799 - Programming Principles 1 LGYA 4364 - Business Application Development 1 COMP 1006 - Programming Fundamentals (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 1006 Programming Fundamentals (WSTC) (10 Credit Points)
Subject Details (p. 2966) Legacy Code: 700008
As a first subject in computer programming, Programming Fundamentals covers the basics of developing software with an emphasis on procedural programming. Students will learn about basic data structures, the concept of algorithms, fundamental programming constructs, common programming language features and functions, program design and good programming style. A high level programming language is combined with a highly visual framework to teach problem solving using software.
Level: Undergraduate Level 1 subject
Pre-requisite(s): Students enrolled in 7067 Diploma in Information and Communications Technology Extended must pass LANG 0002 Academic Communication 2 (WSTC Prep) or LANG 0032 English for Tertiary Study 2 (WSTC Prep) or LANG 0039 Introduction to Academic Communication 2 (WSTC Prep) and must pass INFO 0008 Computer Studies (WSTC Prep) and must pass COMP 0003 Programming Design (WSTC Prep) and must pass MATH 0008 Mathematics 2 (WSTC Prep) before enrolling in this unit

Students enrolled in 6035 DiplomaBachelor of Information and Communications Technology 6036 Diploma in Information and Communications TechnologyBachelor of Information Systems and 7005 Diploma in Information and Communications Technology must pass COMP 0003 Programming Design (WSTC Prep) before enrolling in this unit

Students enrolled in 6038 Dip in Information and Communications Technology BICT(HIM) 6039 Diploma in Information and Communications TechnologyBICT 6040 Diploma in Information and Communications TechnologyBIS 7067 Diploma in Information and Communications Technology Extended 7134 Diploma in Information and Communications Technology Extended - ICT 7138 Diploma in Information and Communications Technology Extended-ICT 7139 Diploma in Information and Communications Technology Extended 7140 Diploma in Information and Communications Technology Extended–IS 7141 Diploma in Information and Communications Technology Extended-HIM 7163 Diploma in Information and Communications Technology(International) and 7164 Dip Information and Communications Technology (HIM) (International) must pass COMP 0003 Programming Design (WSTC Prep) and must pass MATH 0008 Mathematics 2 (WSTC Prep) before enrolling in this unit
Equivalent Subjects: COMP 1004 - Fundamentals of Programming LGYA 5799 - Programming Principles 1 LGYA 4364 - Business Application Development 1 COMP 1005 - Programming Fundamentals
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 1012 Programming Fundamentals (UG Cert) (10 Credit Points)
Subject Details (p. 2967) Legacy Code: 500047
As a first subject in computer programming, Programming Fundamentals covers the basics of developing software with an emphasis on procedural programming. Students will learn about basic data structures, the concept of algorithms, fundamental programming constructs, common programming language features and functions, program design and good programming style. A high-level programming language is combined with a highly visual framework to teach problem solving using software.
Level: Undergraduate Level 1 subject
Equivalent Subjects: COMP 1004 Fundamentals of Programming LGYA 5799 Programming Principles 1
LGYA 4364 Business Application Development 1 COMP 1005 Programming Fundamentals
COMP 1006 Programming Fundamentals
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 1013 Analytics Programming (10 Credit Points)
Subject Details (p. 2968) Legacy Code: 301487
This subject covers the use of computers and computer programming for Data Science. After briefly considering spreadsheet systems, the subject will consider programming in the statistical system "R" in depth. Finally, other special purpose languages will be touched briefly (eg. SQL).
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 1014 Thinking About Data (10 Credit Points)
Subject Details (p. 2969) Legacy Code: 301488
This subject covers basic concepts of data centric thinking. The main areas discussed are; Populations and Samples; Sampling concepts; Types of Data; Descriptive Methods; Estimation and Inference; Modelling. The subject takes a computational and nonparametric approach, before briefly discussing theoretical concepts and distribution theory.
Level: Undergraduate Level 1 subject
Equivalent Subjects: MATH 1033 Thinking About Data
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 1015 Programming Fundamentals and Algorithmic Design (WSTC) (10 Credit Points)
Subject Details (p. 2970)
As a first subject in computer programming, this subject covers the basics of developing software with an emphasis on procedural programming. You will learn about basic data structures, the concept of algorithms, fundamental programming constructs, common programming language features and functions, program design and good programming style. The entry into programming is made more accessible by pairing a high-level programming language with a highly visual and interactive framework. On successful completion of this subject, you will be able to develop algorithms, design programs and solve programming problems.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 1016 Foundations of Networking and Cyber Security (WSTC) (10 Credit Points)
Subject Details (p. 2970)
In our interconnected modern world, understanding computer networks is fundamental for future ICT professionals. This subject will equip you with the basics of computer networking and internet architecture, covering OSI and TCP/IP models. You will explore modern networking technologies, authentication methods, and basic cybersecurity principles. You will also gain hands-on experience designing and troubleshooting a simple LAN and subnetting a network. This subject will also begin to prepare you for industry-based networking certifications such as the CCNA.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 2001 Advanced Computer Science Activities 2 (0 Credit Points)
Subject Details (p. 2970) Legacy Code: 300587
This subject is only for Bachelor of Computer Science (Advanced) students in year two of their studies. Students will participate in industry and research based extension activities (non-assessable). These activities will be identified with the goal of exposing students early in their degree and integrating them into a culture of academic enquiry, problem solving, knowledge generation and scholarship and an awareness of the challenges and current issues confronting the computing/IT industry. The subject will be used to record student activities and a satisfactory/ unsatisfactory grade will be applied at the end of each semester.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 2003 Computer Algebra (10 Credit Points)
Subject Details (p. 2970) Legacy Code: 301031
This subject will introduce the popular computational software Mathematica, through which students will explore and investigate real-world mathematical problems. The subject promotes an experimental side of mathematics and will employ symbolic computation to gain insight and intuition into problems, to discover mathematical patterns and relationships, and create impressive graphics to expose mathematical structures.
Level: Undergraduate Level 2 subject
Pre-requisite(s): MATH 1014
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 2004 Computer Networking (10 Credit Points)
Subject Details (p. 2971) Legacy Code: 300565
Computer Networking is an introductory subject in computer systems networking. It covers basic networking technologies, Ethernet fundamentals, ISO OSI model, routing, switching and subnetting, the Internet architecture, networking protocols including TCP/IP, important OSI layer 2 and 3 networking device fundamentals, basic network management and security issues. This subject is also the first of three units, which will prepare students for industry based networking certification (CCNA).
Level: Undergraduate Level 2 subject
Equivalent Subjects: COMP 2007 - Computer Networking Fundamentals LGYA 5739 - Applied Data Communications and Networking COMP 2006 - Computer Networking (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 2005 Computer Networking (Advanced) (10 Credit Points)
Subject Details (p. 2972) Legacy Code: 300946
This subject introduces students to computer systems networking. It covers basic networking technologies, Ethernet fundamentals, ISO OSI model, routing, switching and subnetting, the Internet architecture, networking protocols including TCP/IP, important OSI layer 2 and 3 networking device fundamentals, basic network management and security issues. This subject is also the first of three units, which will prepare students for industry based networking certification (CCNA). Students in this advanced subject will be required to undertake individual assessment activities demonstrating a high level of technical and applied theoretical competency.
Level: Undergraduate Level 2 subject
Incompatible Subjects: COMP 2007 - Computer Networking Fundamentals LGYA 5739 - Applied Data Communications and Networking COMP 2004 - Computer Networking
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 2006 Computer Networking (WSTC) (10 Credit Points)
Subject Details (p. 2973) Legacy Code: 700012
This is an introductory subject in computer systems networking. It covers basic networking technologies, Ethernet fundamentals, ISO OSI model, routing, switching and sub-netting, the internet architecture, networking protocols, including TCP/IP, important OSI layer 2 and 3 networking device fundamentals, basic network management and security issues. This subject is also the first of three subjects which will prepare students for industry based networking certification (CCNA).
Level: Undergraduate Level 2 subject
Pre-requisite(s): Students enrolled in 7067 Diploma in Information and Communications Technology Extended and 7134 Diploma in Information and Communications Technology Extended – ICT must pass LANG 0002 Academic Communication 2 (WSTC Prep) or LANG 0032 English for Tertiary Study 2 (WSTC Prep) or LANG 0039 Introduction to Academic Communication 2 (WSTC Prep) and must pass INFO 0008 Computer Studies (WSTC Prep) before enrolling in this unit

Students enrolled in 7138 Diploma in Information and Communications Technology Extended-ICT 7139 Diploma in Information and Communications Technology Extended 7140 Diploma in Information and Communications Technology Extended–IS and 7141 Diploma in Information and Communications Technology Extended-HIM must pass LANG 0012 Academic Professional Communication (WSTC Prep) and must pass INFO 0001 Academic Skills for ICT (WSTC Prep) before enrolling in this unit
Equivalent Subjects: COMP 2007 - Computer Networking Fundamentals LGYA 5739 - Applied Data Communications and Networking COMP 2004 - Computer Networking
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 2008 Computer Organisation (10 Credit Points)
Subject Details (p. 2974) Legacy Code: 300096
This subject is designed for computer science students, particularly those interested in systems programming and hardware development. The students will learn about the interface between the hardware and software of a computer system. This will involve study of some aspects of computer architecture and low level interfacing to gain an insight into central processing unit (CPU) organisation at the assembly language level. After completing this subject students will be able to write procedures in an assembly language, use their understanding of the relationship between the instruction set architecture and the implementation of high level languages to write efficient programs.
Level: Undergraduate Level 2 subject
Pre-requisite(s): The following pre-requisite unit applies to course 3771 only
ENGR 1045 Engineering Programming Fundamentals

The following pre-requisites apply to all courses except 3771
COMP 1005 Programming Fundamentals OR
ELEC 1006 Engineering Computing AND
MATH 1006 Discrete Mathematics OR
MATH 1016 Mathematics for Engineers 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 2009 Data Structures and Algorithms (10 Credit Points)
Subject Details (p. 2975) Legacy Code: 300103
This subject introduces students to fundamental data structures and algorithms used in computing. The material covered forms the basis for further studies in programming and software engineering in later subjects and for further training in programming skills. The subject focuses on the ideas of data abstraction and algorithm efficiency. The issues of computational complexity of algorithms are addressed throughout the semester. The topics covered include the fundamental abstract data types (lists, stacks, queues, trees, hash tables, graphs), recursion, complexity of algorithms, sorting and searching algorithms, binary search trees and graphs.
Level: Undergraduate Level 2 subject
Pre-requisite(s): COMP 2014 OR
COMP 2015 OR
COMP 2016 OR
ENGR 1045
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 2011 Games Technology (10 Credit Points)
Subject Details (p. 2976) Legacy Code: 300491
This subject provides an introduction to the game industry as well as introducing students to the techniques of game design and construction. Students will be exposed to the history of game development and the key aspects of different genres of computer games.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYA 5804 - Client Server Applications
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 2013 LAN Workshop (10 Credit Points)
Subject Details (p. 2977) Legacy Code: 300138
This subject provides students with the knowledge and skills necessary to install, test, tune, customise, repair and maintain networking hardware and software necessary to create a Local Area Network (LAN). Students also learn how to administer a LAN by setting up user accounts, access privileges, security procedures and back-up/recovery procedures.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYA 6157 Networking Workshop
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 2014 Object Oriented Programming (10 Credit Points)
Subject Details (p. 2978) Legacy Code: 300147
This subject presents the concepts and principles of programming languages with the emphasis on object oriented paradigm. It addresses the importance of the separation of behaviour and implementation as well as effective use of encapsulation, inheritance and polymorphism. The students will gain intensive training in programming skills with supervised laboratory sessions and task oriented assignments.
Level: Undergraduate Level 2 subject
Pre-requisite(s): COMP 1005 OR
ENGR 1045
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 2015 Programming Techniques (10 Credit Points)
Subject Details (p. 2979) Legacy Code: 300581
This subject is intended as a second subject of study in programming. It builds on a basic understanding of procedural programming as would be developed in a first subject. This subject continues the development of programming skills and methodologies required for professional programming and for further study in later computing subjects. Topics covered include multi-dimensional arrays, file I/O, searching and sorting, and an introduction to object-oriented programming involving classes and inheritance.
Level: Undergraduate Level 2 subject
Pre-requisite(s): COMP 1005
Equivalent Subjects: LGYA 5800
COMP 2017
Incompatible Subjects: COMP 2016 - Programming Techniques (Advanced)
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 2016 Programming Techniques (Advanced) (10 Credit Points)
Subject Details (p. 2980) Legacy Code: 300903
This subject builds on a basic understanding of procedural programming developed in previous subjects. Students continue to develop their programming skills and methodologies required for professional programming and for further study in later computing subjects. Topics covered include multi-dimensional arrays, file I/O, searching and sorting, and an introduction to object-oriented programming involving classes and inheritance. Students in this advanced subject will also investigate and apply advanced concepts such as function overloading and recursion.
Level: Undergraduate Level 2 subject
Pre-requisite(s): COMP 1005
Incompatible Subjects: COMP 2015 - Programming Techniques
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 2017 Programming Techniques (WSTC) (10 Credit Points)
Subject Details (p. 2981) Legacy Code: 700257
This subject is intended as a second subject of study in programming. It builds on a basic understanding of procedural programming as would be developed in a first subject. This subject continues the development of programming skills and methodologies required for professional programming and for further study in later computing subjects. Topics covered include multi-dimensional arrays, file I/O, searching and sorting, and an introduction to object-oriented programming involving classes and inheritance
Level: Undergraduate Level 2 subject
Pre-requisite(s): COMP 1006
Equivalent Subjects: COMP 2015 - Programming Techniques LGYA 5800 - Programming Principles 2
Incompatible Subjects: COMP 2016 - Programming Techniques (Advanced)
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 2018 Simulation Fundamentals (10 Credit Points)
Subject Details (p. 2982) Legacy Code: 301167
In the last couple of decades computer modelling and simulation has evolved into an important discipline used in nearly every aspect of life from computer games to banking. What was once a tool for training pilots is now a capability to better understand human behaviour, enterprise systems, disease proliferation, and much more. This is an introductory, problem-based unit, where students will learn by doing. Students will acquire ability to use different simulation methodologies and tools such as InsightMaker and AnyLogic to build new insights into the world around you and learn how to share these insights effectively with others.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 2019 Systems Programming 1 (10 Credit Points)
Subject Details (p. 2983) Legacy Code: 300167
This subject provides an introduction to the knowledge and skills required for the design, writing and support of technical software and other such functions normally falling within the role of the systems programmer. It provides for detailed study of a systems programming environment and its application to systems programming tasks.
Level: Undergraduate Level 2 subject
Pre-requisite(s): COMP 2015 OR
COMP 2016 OR
COMP 2020 OR
COMP 2014 OR
ELEC 1006 AND
ELEC 1001
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 2020 Technologies for Web Applications (10 Credit Points)
Subject Details (p. 2984) Legacy Code: 300582
Building on material covered in Programming Fundamentals this subject introduces students to some of the key technologies for developing interactive and dynamic web applications from both the client and server perspective. The subject covers web site design, web site development, web page accessibility and usability, HTML, CSS, client side and server side scripting, database interaction, web site promotion (Search Engine Optimisation) and web security.
Level: Undergraduate Level 2 subject
Pre-requisite(s): COMP 1005
Equivalent Subjects: COMP 2012 - Interactive Web Site Development
Incompatible Subjects: LGYA 5748 - Creating and Managing Web Sites
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 2021 Software Engineering Fundamentals (10 Credit Points)
Subject Details (p. 2985) Legacy Code: 301343
This subject introduces software engineering principles including basic software lifecycle concepts, modern development methodologies and version control, conceptual modelling and how these activities relate to programming. Students apply this knowledge together with essential team-based project management to design, build and deploy a simple web-based application. The subject provides students with the skills required in software design and development and prepares them to work in a team setting.
Level: Undergraduate Level 2 subject
Pre-requisite(s): ENGR 1045
OR
COMP 1005
Incompatible Subjects: INFS 1006
INFS 1007
INFS 1015
COMP 2020
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 2023 Mathematical Programming (10 Credit Points)
Subject Details (p. 2986) Legacy Code: 301375
This subject will introduce the programming language Python, through which students will explore and investigate practical mathematical problems. Python is one of the most powerful versatile programming languages, and it is increasingly used by engineers and scientists as well as banks and financial institutions to tackle their computational problems. The subject promotes an experimental side of mathematics and will employ Python-based computational tools to gain insight and intuition into problems, to discover mathematical patterns and relationships, and to use visualisation techniques to expose mathematical structures.
Level: Undergraduate Level 2 subject
Equivalent Subjects: COMP 2003 Computer Algebra
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 2024 Computer Networking (UG Cert) (10 Credit Points)
Subject Details (p. 2987) Legacy Code: 500049
This is an introductory subject in computer systems networking. It covers basic networking technologies, Ethernet fundamentals, ISO OSI model, routing, switching and sub-netting, the internet architecture, networking protocols, including TCP/IP, important OSI layer 2 and 3 networking device fundamentals, basic network management and security issues. This subject is also the first of three subjects which will prepare students for industry-based networking certification (CCNA).
Level: Undergraduate Level 2 subject
Equivalent Subjects: COMP 2004 Computer Networking COMP 2007 Computer Networking Fundamentals
LGYA 5739 Applied Data Communications and Networking COMP 2006 Computer Networking
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 2025 Introduction to Data Science (10 Credit Points)
Subject Details (p. 2988) Legacy Code: 301486
Analysis of data is essential for scientific investigation, modelling processes and predicting future events. Data Science is the investigation of the tools required that allow us to perform this modelling and prediction. The increase in accessible data over the past few decades has promoted the use of Data Science, making it a desired skill in many professions. In this subject we further investigate the methods of regression, clustering and classification that form the basis of a data scientist's toolbox.
Level: Undergraduate Level 2 subject
Equivalent Subjects: MATH 2009 - Introduction to Data Science
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 2026 Visual Analytics (10 Credit Points)
Subject Details (p. 2989) Legacy Code: 301489
This subject introduces the fundamentals and technologies of visual analytics to understand big data. It covers major concepts of information visualisation, human computer perception and methods for visual data analysis. Students will learn knowledge and skills for identifying suitable visual analytics techniques, methods and tools for handling various data sets and applications. The subject provides students with opportunities to explore novel research in visual analytics and visualisation.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 2027 Cyber Security (10 Credit Points)
Subject Details (p. 2990)
This subject focuses on, but is not limited to, the implementation and management of security and privacy policies of organisations within the standards and legal framework that is also applicable to the Australian standards. Knowledge gained in this subject will benefit students aspiring to careers in the Cyber Security industry.
Level: Undergraduate Level 2 subject
Equivalent Subjects: INFO 3001 - Computer Security
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 2028 Cryptography, Cryptocurrencies and Blockchain (10 Credit Points)
Subject Details (p. 2991)
Blockchain and cryptocurrency form the backbone of emerging technology systems to secure transactions. The design of blockchain involves cryptographic technology to secure data and ensure confidentiality, authenticity and integrity. Students are introduced to the concepts of blockchain, cryptography and cryptocurrency, and learn how these technologies are transforming online transactions, and solving some of the most important issues in trust, resilience, reputation and transparency. Students also learn about the risks and challenges involving cryptocurrencies, exchanges and wallets as well as money-laundering and criminal enterprises. Students develop practical experience in building blockchain systems and develop smart contract solutions.
Level: Undergraduate Level 2 subject
Pre-requisite(s): COMP 2027
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 2029 DevOps (10 Credit Points)
Subject Details (p. 2992)
DevOps engineers build tools and pipelines for companies delivering software solutions, assuring the quality of their products. By utilising DevOps, companies limit the risk of introducing errors when updating their applications and experiences which allows them to better serve their customers and dynamically react to their needs. In this subject, students learn the principles and philosophy of DevOps and how to build DevOps tools. Students apply their knowledge in practical activities to create and maintain pipelines for continuous delivery. This involves calculating delivery metrics, estimating and evaluating measures of success. Based on the performance in the subject, a selected number of students will have the opportunity to undergo a week-long placement with a target industry partner. Students doing the placement will work on industry projects assessed by professional staff at their placement venue.
Level: Undergraduate Level 2 subject
Pre-requisite(s): INFO1003
Co-requisite(s): INFO 3019
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 2030 Data Structures and Algorithms (Advanced) (10 Credit Points)
Subject Details (p. 2993)
This subject introduces students to fundamental data structures and algorithms used in computing related courses. The material covered forms the basis for further studies in programming and software engineering in later subjects and for further training in programming skills. The subject focuses on the ideas of data abstraction and algorithm efficiency. The issues of computational complexity of algorithms are addressed throughout the semester. The topics covered include the fundamental abstract data types (lists, stacks, queues, trees, hash tables, graphs), recursion, complexity of algorithms, sorting and searching algorithms, binary search trees and graphs. As a subject designed for advanced computer science students, the students will conduct an advanced project on top of the assignment tasks for further training of their programming skills.
Level: Undergraduate Level 2 subject
Pre-requisite(s): COMP2014
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 3001 Advanced Computer Science Activities 3 (0 Credit Points)
Subject Details (p. 2994) Legacy Code: 300588
This subject is only for Bachelor of Computer Science (Advanced) students in year three of their studies. Students will participate in industry and research based extension activities (non-assessable). These activities will be identified with the goal of exposing students early in their degree and integrating them into a culture of academic enquiry, problem solving, knowledge generation and scholarship and an awareness of the challenges and current issues confronting the computing/IT industry. The subject will be used to record student activities and a satisfactory/ unsatisfactory grade will be applied at the end of each semester.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 3002 Applications of Big Data (10 Credit Points)
Subject Details (p. 2994) Legacy Code: 301110
Many techniques and tools have been developed over the past decade to cope with the ever-growing needs for the processing and analysis of big data. This subject will cover the key techniques that have been widely used in big data applications, such as relational and Not Only Structured Query Language (NoSQL) databases, Web Services, parallel and cloud computing, MapReduce, Hadoop and its eco-system. It aims to introduce the emerging technologies and applications in big data to students, and keep up with the latest trends in the industry.
Level: Undergraduate Level 3 subject
Pre-requisite(s): COMP 1013 OR COMP 1005
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 3003 Cloud Computing Architecture (10 Credit Points)
Subject Details (p. 2995) Legacy Code: 301204
This subject, the second part of the Amazon Web Services (AWS) Academy Cloud Computing Architecture curriculum, provides deeper understanding about advanced cloud computing services and how to architect cloud applications that are scalable, reliable, and efficient in terms of cost and performance. Students will learn advanced cloud computing concepts including notification and messaging, serverless computing, API gateways, NoSQL databases, content delivery networks, stream processing, and long-term storage. The subject also covers advanced cloud security and infrastructure automation. All these aspects are explored in practice with AWS services. Upon completion of this subject, students will be prepared for the AWS Certified Solutions Architect - Associate exam.
Level: Undergraduate Level 3 subject
Pre-requisite(s): COMP 3012 AND
COMP 1005
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 3006 Computer Graphics (10 Credit Points)
Subject Details (p. 2996) Legacy Code: 300093
Computer Graphics will examine elementary graphics concepts, algorithms and programming skills for producing graphical applications, in both two-dimension (2D) and three-dimension (3D) using Open GL. Techniques and algorithms will be programmed in Processing, which is a very easy-to-learn programming language yet powerful and comprehensive.
Level: Undergraduate Level 3 subject
Pre-requisite(s): COMP 2014 OR
COMP 2015 OR
COMP 2016 OR
COMP 2020
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 3007 Computer Networks and Internets (10 Credit Points)
Subject Details (p. 2997) Legacy Code: 300095
This subject extends on the work undertaken in the prerequisite unit, Computer Networking, and provides students with an in-depth understanding of the role of switching technologies and router operations that support small to medium business networks. It includes wireless local area networks (WLANs) and security concepts. Students will also learn key switching and routing concepts allowing them to perform basic network configuration and troubleshooting, identify and mitigate LAN security threats, and configure and secure a basic WLAN. This is the second of three subjects that prepares the student for industry-based networking certification (CCNA).
Level: Undergraduate Level 3 subject
Pre-requisite(s): COMP 2004 OR
COMP 2005
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 3009 Distributed Systems and Programming (10 Credit Points)
Subject Details (p. 2998) Legacy Code: 300115
This subject covers the concepts, design, and programming of distributed systems. It builds on basic network communication protocols (specifically IP) to cover client server programming using both the system level socket interface and remote procedure calls. It also examines large scale distributed system architectures particularly those based on distributed objects and considers the complexities inherent in distributed transactions. Key concepts covered include data and algorithmic distribution, idempotent protocols, stateless and statefull servers, and distributed system transparency. Illustrative case studies are included.
Level: Undergraduate Level 3 subject
Pre-requisite(s): Successful completion of COMP 2004 Computer Networking and either COMP 2014 Object Oriented Programming or COMP 2015 Programming Techniques
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 3011 Internet Programming (10 Credit Points)
Subject Details (p. 2999) Legacy Code: 300130
This subject offers students basic concepts and latest technologies of internet programming and web-based application development. Utilising one of the popular internet programming languages, such as Java, it aims to develop the programming skills and methodologies required for both client-side and server-side programming as well as general purpose programming. The range of topics covered by the subject includes HTML, XML, Java applets, desktop application in Java, servlets, JavaServer Pages and JDBC.
Level: Undergraduate Level 3 subject
Pre-requisite(s): COMP 2014 OR
COMP 2015 OR
ELEC 1006 OR
COMP 2016
Equivalent Subjects: LGYA 5876 - Internet Computing
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 3012 Introduction to Cloud Computing (10 Credit Points)
Subject Details (p. 3000) Legacy Code: 301203
This subject provides deep understanding of fundamental cloud computing concepts and how they can be applied to build cost-effective, highly available and fault tolerant systems. Students will learn concepts including system virtualisation, virtual machines, cloud networks, basic cloud storage and cloud databases, security in clouds, and auto-scaling, load balancing and monitoring. The main content of this subject is formed around the industry-based curriculum from Amazon Web Services (AWS) Academy which can prepare students for the AWS Certified Cloud Practitioner exam. Based on the performance in the subject, a selected number of students will have the opportunity to undergo a week-long placement with a target industry partner. Students doing the placement will work on industry projects assessed by professional staff at their placement venue.
Level: Undergraduate Level 3 subject
Pre-requisite(s): COMP 2004 OR
COMP 2005
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 3013 Mobile Applications Development (10 Credit Points)
Subject Details (p. 3000) Legacy Code: 300960
This subject teaches technologies and programming languages for developing applications on common mobile platforms, such as Android and iOS. Students will learn skills for developing programs on the above platforms, along with in-class sample applications that highlight platform-specific implementation details.
Level: Undergraduate Level 3 subject
Pre-requisite(s): For students enrolled in 3687 Bachelor of Information Systems 3688 Bachelor of Information Systems Advanced 3744 Bachelor of Information SystemsBachelor of Business 3745 Bachelor of Information Systems AdvancedBachelor of Busines 6036 Diploma in Information and Communications TechnologyBachelor of Information Systemss or 6040 Diploma in Information and Communications TechnologyBachelor of Information Systems - COMP 2020 Technologies for Web Applications
For students enrolled in 3639 Bachelor of Information and Communications Technology - COMP 2015 Programming Techniques
For students enrolled in 3684 Bachelor of Information and Communications Technology (Advanced)- COMP 2016 Programming Techniques (Advanced)
For students enrolled in 3506 Bachelor of Computer Science - COMP 2014 Object Oriented Programming OR COMP 2020 Technologies for Web Applications
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 3014 Networked Systems Design (10 Credit Points)
Subject Details (p. 3001) Legacy Code: 300575
This subject builds on and consolidates the skills and knowledge gained in Computer Networking and Computer Networks and Internets. Students successfully completing this subject will acquire the necessary design skills and knowledge required to build and configure enterprise scale networks. The subject provides students with an opportunity to develop problem-solving techniques and decision-making skills to resolve networking issues. Students completing this subject and its prerequisites should also now be prepared to attempt world recognized network industry certification (CCNA).
Level: Undergraduate Level 3 subject
Pre-requisite(s): COMP 3007
Equivalent Subjects: LGYA 5741 - Broadband Networking
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 3015 Operating Systems Programming (10 Credit Points)
Subject Details (p. 3002) Legacy Code: 300698
This subject provides the knowledge of the internal structure and functionality of Operating Systems. An operating system defines an abstraction of hardware behavior and provides a range of services more suitable for ICT application development than what raw hardware could deliver, in terms of convenience, efficiency and security. It is important that ICT Professionals have some understanding of how these services are realized. For ICT Professionals whose role includes supporting the operating system this subject provides the introduction to the relevant theory and practice.
Level: Undergraduate Level 3 subject
Pre-requisite(s): COMP 2015 OR
COMP 2016 OR
COMP 2014
Equivalent Subjects: INFS 3014 - Operating Systems
Incompatible Subjects: COMP 3016 - Operating Systems Programming (Advanced)
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 3016 Operating Systems Programming (Advanced) (10 Credit Points)
Subject Details (p. 3003) Legacy Code: 300943
This subject provides the knowledge of the internal structure and functionality of Operating Systems. Through the use of case studies the abstraction that Operating Systems provide will be investigated, and techniques for programming with these abstractions will be developed.
Level: Undergraduate Level 3 subject
Pre-requisite(s): COMP 2016 OR
COMP 2015
Incompatible Subjects: LGYA 6233 - Operating Systems Programming
INFS 3014 - Operating Systems
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 3018 Professional Experience (10 Credit Points)
Subject Details (p. 3004) Legacy Code: 300579
Professional Experience is a final year 'capstone' project subject. This subject provides opportunities for students to gain hands-on experience in software systems requirements definition, analysis, design and implementation, in a real-world setting. Students work in groups, guided by an academic supervisor or an industry mentor, in achieving the goals set by the client that provides the project. Suitable projects are sourced from external organisations or within Western Sydney University by way of giving the students professional experience in independent learning and reflective practice.
Level: Undergraduate Level 3 subject
Pre-requisite(s): Students in the Bachelor of Information and Communications Technology and associated double degrees with BICT are required to complete the following subjects
INFS 2001 Database Design and Development AND
COMP 3028 Software Construction AND
INFO 3019 Project Management

Students in the Bachelor of Computer Science (catalogue term 2023 onwards) are required to complete the following subjects
COMP 2009 Data Structures and Algorithms AND
INFS 2001 Database Design and Development AND
INFO 3019 Project Management

Students in the Bachelor of Computer Science (catalogue term 2019-2022) are required to pass three of the following subjects
COMP 2020 Technologies for Web Applications OR COMP 2019 Systems Programming 1
INFS 2001 Database Design and Development OR INFS 2002 Database Design and Development (Advanced)
INFO 3008 Professional Development

Students in the Bachelor of Information Systems and associated double degrees are required to complete the following subjects
INFS 2001 Database Design and Development OR
INFS 2002 Database Design and Development (Advanced)
AND
COMP 2020 Technologies for Web Applications OR
COMP 2019 Systems Programming 1
AND
INFO 3008 Professional Development
Equivalent Subjects: INFS 3004
Incompatible Subjects: INFO 3005
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 3019 Professional Experience (Advanced) (10 Credit Points)
Subject Details (p. 3007) Legacy Code: 300900
Professional Experience (Advanced) is a final year 'capstone' work-placement subject. This advanced subject provides the opportunity for students to gain hands-on experience in software systems requirements definition, analysis, design, implementation and project management, in an external organisation under the supervision of industry experts. During the work placement students work in a real-life project applying the theories and technical skills learned in previous subjects in an industry setting. Students are allowed to propose a work-placement of their choice within an external organisation. School will assess the suggested work-placement for its suitability in meeting the set subject outcomes, prior to approval.
Level: Undergraduate Level 3 subject
Pre-requisite(s): INFS 2001 OR
INFS 2002 AND
COMP 2020 AND
INFO 3008
Incompatible Subjects: LGYA 5744 Computing Project 2 INFO 3005 IT Support Practicum
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 3020 Social Web Analytics (10 Credit Points)
Subject Details (p. 3008) Legacy Code: 300958
The Social Web provides everyone with a voice; information from Facebook, Twitter and other social networks allows us to identify trends and relationships in society. Whilst this has interest on a personal level, the killer-apps will be in analysing social Web data for business, such as tracking the buzz around a new product, and understanding the relationships between customers and products. This subject will introduce its students to the Social Web data that is available, and blend data science and machine learning concepts to allow extraction and analysis of such data.
Level: Undergraduate Level 3 subject
Pre-requisite(s): Students NOT enrolled in the 3770 must have successfully completed one of the following groupings
(MATH 1028 Statistical Decision Making OR
MATH 1003 Biometry OR
COMP 1014 Thinking about Data)
OR
(MATH 1030 Statistics for Business AND
COMP 1013 MATH 1002 Analytics Programming)
OR
(MATH 1012 Management Analytics AND
COMP 1013 MATH 1002 Analytics Programming)
OR
(MATH 2006 Experimental Design and Analysis AND
COMP 1013 MATH 1002 Analytics Programming)
Co-requisite(s): For students enrolled in courses 3769 Bachelor of Data Science or 3770 Bachelor of Applied Data Science
COMP 1014 Thinking About Data
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 3021 Special Effects Programming (10 Credit Points)
Subject Details (p. 3010) Legacy Code: 301173
This subject will focus on develop programming code to write shaders to create special effects, such as fog, shadows, fire, water, clouds, lightning, motion blur and reflections. These type of shaders are often seen in games and movies. Students will also learn about generic programming algorithms involved in building special effects.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 3022 Systems Administration Programming (10 Credit Points)
Subject Details (p. 3010) Legacy Code: 300165
This subject covers programming techniques and tools used to administer standalone and networked computer systems. The subject focuses on the use of high level interpretive scripting languages to automate everyday administrative tasks, and to monitor and control running systems. Techniques to extend scripting language capabilities by dynamic linking to compiled code are examined, particularly in terms of access to operating system level functions. The subject also examines the use of administrative programs and tools to monitor and adjust system performance and capacity.
Level: Undergraduate Level 3 subject
Pre-requisite(s): COMP 2019
Incompatible Subjects: LGYA 6160 - Script programming
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 3023 Systems and Network Management (10 Credit Points)
Subject Details (p. 3011) Legacy Code: 300166
With the advent of the era of Internet of Things, the Internet has become a huge infrastructure in which various kinds of systems are running to deliver a plethora of network services. To ensure the efficient utilization of network resources (e.g., bandwidth) and the convenient access to network services, systems and networks must be managed in a proper way. Facing this demand, this subject covers the standards, protocols and skills pertinent to the management of systems and networks. Moreover, this subject introduces Software Defined Networking (SDN), a new paradigm for conducting network management with programmability, flexibility and scalability.
Level: Undergraduate Level 3 subject
Pre-requisite(s): COMP 3007 OR
COMP 3025
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 3024 Video Games Development (10 Credit Points)
Subject Details (p. 3012) Legacy Code: 300862
This subject provides students with an in-depth understanding of the development and structure of game engines. It provides the student with a unifying overview of the many modules that are incorporated in a game engine as well as a detailed examination of game-play and engine programming.
Level: Undergraduate Level 3 subject
Pre-requisite(s): COMP 1005
Equivalent Subjects: LGYA 6086 - Games Theory and Design
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 3025 Wireless and Mobile Networks (10 Credit Points)
Subject Details (p. 3012) Legacy Code: 300952
This subject helps the students gain in depth knowledge in the core concepts and principles in the areas of wireless and cellular networks. It provides them with the technical skills needed to do requirement analysis and evaluate a range of wireless networked systems to plan their institution or expansion. The subject covers the communication characteristics and architecture of wireless systems along with various types of wireless networks, including wireless LANs, personal area networks, sensor networks, mesh networks, and broadband wireless networks. Given the widespread use of mobile phones and devices, a substantial part of the subject is devoted to the study of cellular networks. The subject also covers mobility management and wireless security issues and solutions. Upon completion of this subject, the students will have the capabilities needed for long term and independent learning in the rapidly evolving area of wireless and mobile networking.
Level: Undergraduate Level 3 subject
Pre-requisite(s): COMP 2004 OR
COMP 2005
Equivalent Subjects: LGYA 5741 - Broadband Networking
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 3027 Robotic Programming (10 Credit Points)
Subject Details (p. 3013) Legacy Code: 301205
Robot Operating System (ROS) is a software integration system that is now widely used for robotics software deployment. The philosophy behind ROS is to modularise software that can work for other robots through small changes in the code. This subject focuses on the main concepts of software development under ROS by looking at the file hierarchical systems (e.g. Packages, Stacks, Messages, Services and others), module communication types through Nodes, Topics, Services, Messages, Bags, Master and how they integrate to operate robot sensors and actuators. This subject also looks at actual AI software examples using C++/Python and Answer Set Programming (ASP).
Level: Undergraduate Level 3 subject
Pre-requisite(s): COMP 2014 Object Oriented Programming and COMP 2019 Systems Programming 1

OR

COMP 2014 Object Oriented Programming and COMP 3015 Operating Systems Programming

OR

MECH 4003 Mobile Robotics
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 3028 Software Construction (10 Credit Points)
Subject Details (p. 3014) Legacy Code: 301348
Students learn backend software design and secure API development, while also mastering testing and debugging processes. Students also examine development methodologies and build upon existing knowledge of version control and database queries. Throughout this subject, students have the opportunity to apply theoretical knowledge to practical software construction tasks and projects. This holistic approach ensures that they are not only prepared for subsequent software development subjects but are also conversant with current industry-relevant technologies for career pathways in Back-End Development such as Software Tester/Reviewer or DevOps Engineer.
Level: Undergraduate Level 3 subject
Pre-requisite(s): COMP2021
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 3029 Software Engineering Industry Project (10 Credit Points)
Subject Details (p. 3015) Legacy Code: 301349
This subject will be offered at Engineering Innovation Hub - Hassall St, Parramatta campus. This subject enables students to experience real-life involvement in designing and implementing a quality software system that conforms to stakeholder requirements in the domain of data analytics. It builds on the skills developed in previous project subjects in specifying requirements, managing projects, communicating, working in teams to achieve a completed system, and reinforces skills in software design, coding, testing, reporting and the use of support tools. Students integrate these skills while learning about the domain and professional ways to liaise with the stakeholder to develop appropriate requirements, documentation and a final product.
Level: Undergraduate Level 3 subject
Pre-requisite(s): ELEC 2017 AND
ELEC 2019
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 3032 Machine Learning (10 Credit Points)
Subject Details (p. 3015) Legacy Code: 301435
Machine Learning is one of the most important technologies in the fields of Artificial Intelligence and Data Science used to explain large datasets, inform decisions and highlight risks. Machine Learning is relevant for solving a range of problems in many industries dealing with significant amounts of information and the structure of that information. In this unit, students put Machine Learning theory into action through widely used algorithms and practical applications for designing, training, and evaluating common learning models and systems. Students use Python programming and, as a result, learn about its important machine learning libraries and packages, such as Scikit-Learn, Keras and TensorFlow for solving practical problems and tasks.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MATH 1028 OR MATH 1033 OR COMP 1014 OR MATH 1003 OR MATH 1030
AND
COMP 1005 OR MATH 1002 OR COMP 3002
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 3033 Quantum Computing and Communication (10 Credit Points)
Subject Details (p. 3016) Legacy Code: 301437
This subject discusses how computing and communication can be performed by utilising subatomic particles in quantum world, a way very different from classical computing. From a computer science perspective, this subject skips the details of quantum physics and directly explains the concepts of qubits and quantum circuits for the purpose of computing. Necessary mathematical preliminaries are included. Then, this subject discusses major quantum algorithms and communication protocols. Quantum programming will be practised throughout this subject with quantum simulators and real quantum computers in clouds. Students completing this subject will develop skills for designing quantum algorithms/protocols and conducting quantum programming and can pursue careers such as quantum software engineers, quantum security engineers or quantum researchers.
Level: Undergraduate Level 3 subject
Pre-requisite(s): COMP2014 OR
COMP2015 OR
COMP2016 OR
COMP2023
AND
MATH1028 OR
MATH1030 OR
COMP1014
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 3034 Multimodal Interaction (10 Credit Points)
Subject Details (p. 3017) Legacy Code: 301468
A key aspect within the field of Human Computer Interaction is capturing user input to a system or device. Called Multimodal Interaction, students learn about the variations of such inputs including how speech, vision, gesture and touch are used to interact with computing devices. Through a mixture of theoretical, research-oriented and practical concepts students will be introduced to novel techniques of interacting with computing devices and interfaces and discuss applications of them, across industrial and research applications, including digital assistants such as Siri, Alexa, facial recognition and surveillance systems.
Level: Undergraduate Level 3 subject
Pre-requisite(s): COMP 1005 AND
INFO 3003
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 3035 Discovery Project (10 Credit Points)
Subject Details (p. 3018) Legacy Code: 301490
In this subject students will gain experience in applying data science skills and using knowledge gained during their bachelor's course of their primary discipline. Students will carry out a real life project transforming data to knowledge under the supervision of an academic mentor. Students will develop a knowledge discovery project proposal and carry out a literature review highlighting the current status of the problem. Assisted by a mentor they will apply the data science skills learned through-out the degree and produce a final discovery project report and/or interactive project tool and give an oral presentation.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 3036 Full Stack Development (10 Credit Points)
Subject Details (p. 3019)
Full Stack Development delivers in-depth knowledge of systems development. Students learn how to develop, test and integrate client (front-end) and server (back-end) parts of the software system. The subject will explore various options for the client-server data communication, using either REST APIs, sockets for live subscriptions or graph-based solutions. The subject focuses also on various testing approaches (i.e. unit, integration and end to end), continuous delivery, containerisation with Docker, integration and deployment procedures. Students use versioning control and engage with the Github platform for project management and quality control; developing authentic, real-world projects. Based on the performance in the subject, a selected number of students will have the opportunity to undergo a week-long placement with a target business partner. Students doing the placement will work on industry projects assessed by professional staff at their placement venue.
Level: Undergraduate Level 3 subject
Pre-requisite(s): COMP 3028
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 3037 Cloud Security (10 Credit Points)
Subject Details (p. 3020)
The field of cloud security is rapidly growing providing benefits and challenges in comparison to traditional computing environments. The aim of this subject is to provide students with a foundational knowledge of cloud security theory as well as the concepts of cybersecurity principles and services. This subject incorporates the AWS Academy Cloud Security curriculum to support learning in the areas of security design principles, authentication and access management in the cloud and protecting data and applications for the cloud. In addition, students learn about security threats and best practices for securing the cloud through practical activities.
Level: Undergraduate Level 3 subject
Pre-requisite(s): COMP 3012 - Introduction to Cloud Computing
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 3038 Professional ICT Internship (30 Credit Points)
Subject Details (p. 3021)
Students will undertake a six month placement in a large IT infrastructure organisation where they actively engage with large-scale capital works projects. Students develop skills in the practical development of enterprise solutions and architectures, such as the infrastructure development for the Western Sydney airport. During their placement students will be mentored by the professional staff and incorporated into the client team at their placement venue. This integration into the client team will allow students to utilise and further develop skills in cloud computing, software development, DevOps and business operations in addition to providing them with valuable career contacts and contexts.
Level: Undergraduate Level 3 subject
Co-requisite(s): MATH 1006
COMP 2029
COMP 3036
COMP 3012
INFO 5001
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 6001 Neuromorphic Algorithms and Computation (10 Credit Points)
Subject Details (p. 3021) Legacy Code: 800232
Designing and implementing processing pipelines for event-based sensory data is a crucial skill for neuromorphic engineers to test novel hardware platforms or to develop new algorithms and learning mechanisms. This project-based subject focuses on principles of neuromorphic algorithm design and hardware-friendly neural architecture design for neuromorphic information processors. This subject consists of two streams of research: applied event-based algorithms and bio-inspired spiking networks. Through solving increasingly challenging tasks using distributed, event-based competitive processing elements, students will learn the differences between conventional and neuromorphic algorithm design, critically assessing real-world problems in a structured manner.
Level: Postgraduate Coursework Level 6 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 6002 Neuromorphic Sensing (10 Credit Points)
Subject Details (p. 3022) Legacy Code: 800233
Neuromorphic sensors offer a new way to electronically sense and process data that have a unique structure based on principles found in biology. Understanding how they operate is integral to their effective use in practical situations, to the development of algorithms, process their data, and to the optimisation of their electronic designs. This subject focuses primarily on neuromorphic vision sensors, which are rapidly being adopted by multiple industries, including exciting applications in automotive and space. Students will develop an in-depth understanding of neuromorphic sensors and the skills to operate a neuromorphic sensor for acquiring data and solving real-world problems. This practical experience is in high demand from both research labs and the industry.
Level: Postgraduate Coursework Level 6 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 6003 Computer Vision
Subject Details (p. 3023)
Computer vision uses artificial intelligence to train computers to interpret and understand visual images. Through the information that is derived, computer systems can make decisions and take actions. The amount of visual information today from digital devices and cameras along with improved technology has enabled considerable advances in automated image interpretation. In this subject students learn the state-of-the-art technologies of image processing and computer vision through practical activities. Computer vision is used, and has the potential to be used, in a range of industries, in novel ways. This presents a unique opportunity to students completing this subject.
Level: Postgraduate Coursework Level 6 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 7002 Advanced Topics in Networking (10 Credit Points)
Subject Details (p. 3025) Legacy Code: 300252
This subject focuses on the advanced features of networked systems and the emerging network technologies and services. The subject provides students with an in-depth understanding of relevant protocols, the emerging standards, and standards organisations. The emphasis of the subject is on development of the student skills to enable them to do proficient research and development works and studies in the computer networking discipline.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 7003 Big Data (10 Credit Points)
Subject Details (p. 3025) Legacy Code: 301046
"Big data" is the label for the ever-increasing gigantic amount of data with which humanity has to cope. The availability of data and the development of cloud computing architectures to process and analyse these data have made data analytics a central tool in our endeavours. This subject will introduce students to the realm of "big data", covering the important principles and technologies of retrieving, processing and managing massive real-world data sets. It is designed to provide the basic techniques required by any discipline that needs to make sense out of the growing amount of data, and to equip students with the knowledge and key set of skills set to be competitive in the growing job market in the analytics field.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 7004 Cloud Computing (10 Credit Points)
Subject Details (p. 3026) Legacy Code: 301042
Cloud computing has become a driving force for information technology over the past several years, and it is moving towards a future in which we won't rely on local computers, but on centralised facilities operated by third-party compute and storage utilities. Governments, research institutes, and industry leaders are rushing to adopt Cloud Computing to solve their ever-increasing computing and storage problems arising in the Internet Age. This subject offers "Academy Cloud Foundations" (ACF) curriculum as part of Amazon Web Services (AWS) Academy. Students will develop knowledge and skills in the areas of virtualization technologies, cloud architecture, AWS core services and their pricing, security, architecture, and support.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 7006 Data Science (10 Credit Points)
Subject Details (p. 3027) Legacy Code: 301044
The explosion of data in the internet age opens up new possibilities for agencies and business to better serve and market to its customers. To take full advantage of these opportunities requires the ability to consolidate, manage and extract information from very large diverse data sets. In science, data sets are growing rapidly, with projects routinely generating terabytes of data. In this subject we examine the software tools and analytic methods that underpin a successful Data Science Project and gain experience in big data analytics.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 7007 Information Security Management (10 Credit Points)
Subject Details (p. 3028) Legacy Code: 301162
Cyber Crime costs are increasing at an alarming speed. Security management and ICT project management skills are now essential for IT industry. This unit provides the knowledge, skills, techniques and mechanisms on information security management as well as general ICT project management for postgraduate students. It covers topics on management aspect of information security such as business and Cybercrime, security awareness, security risks, security fundamentals, risk assessment and security system design, planning and regulatory issues for information system security. It also covers general ICT project management phases such as conception and initiation, project planning, project execution, performance and monitoring, and project close.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 7008 Internet of Things (10 Credit Points)
Subject Details (p. 3028) Legacy Code: 301175
The Internet of Things (IoT) is drastically changing the way organisations operate and how individuals interact with the world. IoT is an infrastructure consisting of fairly constantly communicating objects, or things, that may be smart and process or act on data. The IoT facilitates detailed and meaningful interactions between humans, digital devices, and many other industrial and household equipment, appliances, and things. The IoT is also the enabler of smart environments, including smart homes, buildings, cities, transport, and healthcare, among many others. This subject discusses IoT technologies and applications in detail. It also introduces the students to trends, challenges, and key research topics in relevant areas.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 7009 Mobile Computing (10 Credit Points)
Subject Details (p. 3029) Legacy Code: 301043
This subject teaches technologies and programming languages for developing applications on common mobile platforms, such as Android and iOS. Students will learn skills for developing programs on the above platforms, along with in-class sample applications that highlight platform - specific implementation details.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): Students enrolled in 2761 Master of Business Administration Information and Communication Technology specialisation must have successfully completed COMP 7015 Programming Proficiency and INFS 7007 Systems Analysis and Database Management Systems
Students enrolled in all other courses must have successfully completed INFS 7009 Web Technologies
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 7011 Multimedia Communication Systems (10 Credit Points)
Subject Details (p. 3030) Legacy Code: 300256
This subject covers advanced concepts and technologies used in emerging multimedia communication systems. Theory, practice and standards for IT professionals endeavouring to build data compression systems for multimedia applications are emphasised.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 7012 Network Management (10 Credit Points)
Subject Details (p. 3031) Legacy Code: 300255
The performance of any modern organization is heavily dependent on their networked systems and how these systems are managed. The increasing demand for ICT services and the huge growth of the Internet have resulted in large heterogeneous networks. This subject addresses the issues relevant to management of such networks and the services that run on them. It covers the principles and current practices pertinent to integrated management of networks, systems, and services. The subject helps the students to understand relevant protocols, standards, and standards organizations. It also introduces them to trends and key research areas in management of networked systems.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): INFO 7002 Advanced Topics in Artificial Intelligence OR
COMP 7015 Programming Proficiency AND INFS 7007 System Analysis Database Management Systems OR
MATH 7012 Programming for Data Science AND MATH 7016 The Nature of Data
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 7013 Network Technologies (10 Credit Points)
Subject Details (p. 3032) Legacy Code: 300695
Computer networking is one of the fastest growing technologies of our time. The Internet interconnects billions of computers providing many new exciting opportunities and challenges. The Internet and the World Wide Web have provided the communication and infrastructure needed for global collaboration and information exchange. As a result of the rapid growth of networked systems and the diverse applications that run on them, success in many professions depends on a sound understanding of the technologies underlying these systems and applications. This subject explores these issues and provides the students with such an understanding. It covers the principles and current practices pertinent to computer networking and communications. It describes some of the important technologies and devices used in modern networks for information distribution and data sharing. The subject helps the students to understand important models, protocols and standards in networking and internetworking.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 5883 - Network Technology and Data Communications
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 7015 Programming Proficiency (10 Credit Points)
Subject Details (p. 3034) Legacy Code: 301038
This subject is aimed at the students whose undergraduate study is in a discipline other than computing or information technology. This subject first covers the programming fundamentals on data types, conditional selections and loop structures, and then further develops the problem solving skills through the use of user-defined functions, records, files, as well as the basic concept and techniques of object-oriented programming. A high level programming language is employed to implement all the problem solutions.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 7016 Visualisation (10 Credit Points)
Subject Details (p. 3035) Legacy Code: 301112
This subject introduces the fundamentals and technologies of information visualisation. It covers the major concepts of information visualisation, human-computer perception and methods for visual data analysis. Students will learn the knowledge and skills required for identifying suitable visualisation techniques and tools appropriate for various data types and applications. The subject provides students with opportunities to explore recent research in the visualisation field. Please note any offerings at Melbourne campus are only applicable for Australian Technical and Management College (ATMC) students.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): MATH 7016 (for students in 3779)
Incompatible Subjects: MATH 2014 Visual Analytics
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 7017 Wireless Networking (10 Credit Points)
Subject Details (p. 3036) Legacy Code: 300389
Wireless technologies are amongst the most exciting and rapidly growing areas in computing and information technology. They implement applications that profoundly impact our personal way of communication, as well as how business in a variety of industries and organisations are conducted. This subject goes into details of such issues. It discusses wireless networking technologies and their related applications. The main features of wireless and mobile communication systems and the networked services that are based on these systems are also presented. The subject provides students with an in-depth understanding of relevant protocols, the emerging standards and standard organisations. The students are also introduced to some of the relevant current key research issues of the field.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 7018 Advanced Cloud Computing (10 Credit Points)
Subject Details (p. 3037) Legacy Code: 301363
This subject offers the Amazon Web Services (AWS) Academy "Academy Cloud Architecting" (ACA) curriculum and provides deeper understanding of advanced cloud computing services and how to architect cloud solutions. Students will learn advanced cloud computing concepts including notification and messaging, serverless computing, API gateways, NoSQL databases, and content delivery networks. The subject also explores strategies to enable high scalability, reliability, cost-efficiency, performance, and operational excellence in a cloud-based system. All these aspects are explored in practice with AWS services. Upon completion of this subject, students will be prepared for the AWS Certified Solutions Architect - Associate exam.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): COMP 7004
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 7019 Applied Machine Learning (10 Credit Points)
Subject Details (p. 3037) Legacy Code: 301312
This subject introduces the foundation and concepts underpinning Machine Learning (ML) at a more abstract level, and provides more focus on its practical applications in areas such as: the classification and extraction of text data from various documents and web pages, image processing, Google's PageRank algorithm and relational data mining (RDM). These learning objectives are achieved through various ML software and a series of practicals and projects. The subject covers the concepts and notions of supervised, unsupervised and reinforcement learning, perceptron, neural networks, support vector machines (SVM), knowledge representation (KR) based RDM, and a comprehensive introduction to the Scikit-learn ML Python libraries.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 7020 Artificial Intelligence Ethics and Organisations (10 Credit Points)
Subject Details (p. 3038) Legacy Code: 301314
Artificial Intelligence Ethics and Organisations provides students with a comprehensive grounding in the ethical issues of general ICT and AI technologies. Students will learn the general ICT professionalism, the relevant laws, regulations and policies with respect to ICT and AI ethics, and the existing framework and research trend in the field. With a series of case studies, students will learn how to apply general principles and guidelines in practice. They will also learn to identify potential risks and impacts, to ensure AI ethics are followed in different circumstances regarding data governance, automatic decisions, predictive analytics, autonomous system design and deployment, and structure changes of labour markets.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 7021 Knowledge Representation and Reasoning (10 Credit Points)
Subject Details (p. 3039) Legacy Code: 301315
Knowledge representation and reasoning is one of the fundamental components of Artificial Intelligence. Students will learn the principles and methodologies that are used to represent and reason about human knowledge effectively in formal computational models, and eventually solve complex tasks using computer systems. This subject covers logic foundations of knowledge representation and reasoning, Answer Set Programming approaches for declarative problem solving, intelligent agent modelling, diagnostic and probabilistic reasoning. The subject plays an important part in preparing students for career paths as AI engineers, robotics engineers and intelligent software engineers.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): INFO 7002 Advanced Topics in Artificial Intelligence OR
COMP 7015 Programming Proficiency AND INFS 7007 System Analysis Database Management Systems OR
MATH 7012 Programming for Data Science AND MATH 7016 The Nature of Data
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 7022 Natural Language Understanding (10 Credit Points)
Subject Details (p. 3040) Legacy Code: 301313
Natural Language Understanding involves machine reading comprehension and the technologies using it are becoming increasingly widespread. This subject provides a foundation in using the Natural Language Toolkit, which is a leading platform for building Python programs working with 'human language' data, as well as an introduction to Python for Natural Language Processing. Students will use algorithms and explore accessing text corpora and processing raw text; categorising words and classifying text; understanding information from text and analysing sentence structures; and understanding semantic meanings of sentences. Students also gain real-world hands-on experience with Natural Language Understanding through the practical tasks and assignments.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 7023 Predictive Analytics (10 Credit Points)
Subject Details (p. 3041) Legacy Code: 301495
The information age has allowed business and science to take advantage of the vast amount of available data for predicting outcomes and estimating trends, to make informed decisions. Machine learning is the process of allowing a computer to learn from data, which at its heart is used in making these important decisions. This subject provides students with the knowledge and practice required to implement and effectively use these predictive models such as Neural Networks and Support Vector Machines, and provides opportunity for students to investigate state-of-the-art. Students will use the Python programming language throughout this subject.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: MATH 7011 Predictive Analytics
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 7024 Programming for Data Science (10 Credit Points)
Subject Details (p. 3041) Legacy Code: 301493
The use of computers and computer programming for Data Science is fundamental to the discipline. This introductory subject will briefly cover the use of spreadsheet systems and then will consider programming in the statistical system "R" in detail. Other special purpose languages will also be touched on briefly including SQL (Structured Query Language).
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 7025 Social Media Intelligence (10 Credit Points)
Subject Details (p. 3042) Legacy Code: 301494
Social Media Intelligence presents the theory and practice of extracting and analysing information from social media networks. The aims are to identify properties of social networks, and to make predictions about future events. Topics included will cover areas such as Graph theory, Game theory and Network dynamics and we will identify how these can be used to model and extract information from Facebook and Twitter.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 7028 Hands-on Quantum Computing (10 Credit Points)
Subject Details (p. 3043)
This subject enables students to understand the theory of quantum computing and build the skills needed for quantum programming. It covers essential topics, including basic principles of quantum mechanics, quantum bits (qubits), quantum gates, algorithms, programming with quantum simulators and with real quantum computers. Students will explore the fundamental differences between classical and quantum computation and learn quantum programming using a well-known open source toolkit. Additionally, the subject offers insights into quantum hardware and real-world applications, demonstrating the potential and relevance of quantum computing in various fields, from cryptography to optimisation problems. After completion students will be equipped with the essential knowledge to navigate the exciting realm of quantum computation.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 9001 Higher Degree Research Thesis - Computing and Information Technology (80 Credit Points)
Subject Details (p. 3043) Legacy Code: 800049
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 9002 Higher Degree Research Thesis - Computer Science (80 Credit Points)
Subject Details (p. 3044) Legacy Code: 800221
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

COMP 9003 Higher Degree Research Thesis - Artificial Intelligence (80 Credit Points)
Subject Details (p. 3046)
This is a 80 credit point year-long subject.
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

Curriculum and Ed. Studies (CEDS)

CEDS 3001 Bridging the Gap: Re-engaging Indigenous Learners (10 Credit Points)
Subject Details (p. 2767) Legacy Code: 101756
This subject is available to all undergraduate students who have open electives. Bridging the Gap: Re-engaging Indigenous Australian Learners will provide students with knowledge and skills to develop teaching strategies that will bridge the education gaps existing for many Indigenous Australian (Indigenous) learners. Students will gain knowledge of quality teaching frameworks to engage all learners and in particular Indigenous learners. The subject will also increase students' awareness of the complexities of the cultural inter-relationships between many Indigenous and non-Indigenous learners. The subject focuses on empowering students to effectively teach: Indigenous Australians; Indigenous studies in consultation with Indigenous communities; and assess as well as evaluate resources for use in teaching Indigenous studies.
Level: Undergraduate Level 3 subject
Equivalent Subjects: TEAC 1019 - Issues in Aboriginal Education
Restrictions: Please see the Subject Details page for any restrictions for this subject

CEDS 7001 Education Policy, Practice and Global Knowledge Co-construction (10 Credit Points)
Subject Details (p. 2768) Legacy Code: 102160
From 2020 students should note that core subjects are now taught in semesters rather than half yearly sessions. This subject explores the relationship between education and knowledge through reference to questions about the links between education policy practices and global knowledge production. The conceptual framework which provides the focus for this subject explores the dynamic, cyclical relations between the following: conditions of possibility for linking education policy practices and global knowledge production; contexts of negotiation/distance that affect this relationship; the modes of reception and rejection of the impact of linking of the two, and the mechanisms of connection that make this possible. These core concepts provide a focus for exploring questions about the relationship between 'education policy practices' and 'global knowledge production' in students' everyday work-life.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CEDS 7002 So, You Want to Be an Academic? (10 Credit Points)
Subject Details (p. 2769) Legacy Code: 800210
The knowledge labour market is tightening as more academics compete for the limited number of permanent and temporary positions available globally. Early career researchers must quickly adapt to established systems, increased workloads and sometimes stressful and changing work environments. They may be concerned about job security. The purpose of this subject is to introduce students to the world of academia, to assist them in developing the knowledge and skills required to thrive as early career researchers, and to establish networks that they can leverage in order to gain employment and be successful in their careers. Through an innovative model built on online activities and workshops, students will develop an understanding of the nature of academic work in Australia and around the world in the 21st century. Each student will partner with a mentor to develop time, project and people management skills, as well as mapping out networks to pursue near to and upon completion of the student's Doctoral (HDR) candidature.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): HUMN 7038 AND
HUMN 7005 AND
HUMN 7026 AND
HUMN 7037
Restrictions: Please see the Subject Details page for any restrictions for this subject

CEDS 7003 Research Methods in Education (10 Credit Points)
Subject Details (p. 2769) Legacy Code: 102824
Research Methods in Education provides students with an introduction to educational research methods and data analysis. It enables students to develop their understanding of how research evidence can be used to improve educational practice and policy, and the challenges associated with the use of research evidence in education. The subject will develop students' knowledge and skills to design research instruments and analyse research data. This subject is designed to provide students with foundational research skills for their application to research and professional projects.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CEDS 9001 Higher Degree Research Thesis - Education Studies (80 Credit Points)
Subject Details (p. 2770) Legacy Code: 800119
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

Earth Sciences (EART)

EART 1004 Soils (10 Credit Points)
Subject Details (p. 3133) Legacy Code: 300823
This subject provides students with a basic understanding of soil formation and erosion processes, soil physical, chemical and biological properties, and the diversity and classification of soils in the Australian landscape. These basic principles are explored in relation to the sustainable management of soils for horticultural and agricultural production and for environmental management, other land uses and in relation to forensic investigation and studies. The practical sessions are designed to reinforce the lecture material and include field description and analysis of soil profiles and properties, soil sampling principles and practice, laboratory measurement of soil physical and chemical properties essential/important for plant growth, soil biology and human and animal remains.
Level: Undergraduate Level 1 subject
Equivalent Subjects: LGYA 6191 - Noise Assessment PUBH 1003 - Environment and Health
Restrictions: Please see the Subject Details page for any restrictions for this subject

EART 2001 Climate Change Science (10 Credit Points)
Subject Details (p. 3134) Legacy Code: 300837
A factual understanding of the energy balance of the globe, how this impacts on climate and how climate has varied in the past, is essential for any person working in the climate change area. This subject will introduce students to the concept of energy balance and climate, our understanding of how climate works, and how it has changed through time. Topics in basic atmospheric science will give students a critical understanding of current environmental concerns and debates about radiative forcing (the greenhouse effect), climate change, ozone depletion, photochemical pollution and acid precipitation.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYA 6248 - Atmospheric Science
Restrictions: Please see the Subject Details page for any restrictions for this subject

EART 2004 Soils and Substrates (10 Credit Points)
Subject Details (p. 3135)
This subject provides you with a basic understanding of soil formation and erosion processes, soil physical, chemical and biological properties, and the diversity and classification of soils in the Australian landscape. These basic principles, along with alternative substrates, are explored in relation to the sustainable management of soils and substrates for horticultural and agricultural production and for environmental management and other land uses. The practical sessions are designed to reinforce the lecture material and include field description and analysis of soil profiles and properties, soil sampling principles and practice, laboratory measurement of soil and substrate physical and chemical properties essential/important for plant growth, soil/substrate biology.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

EART 3001 Biological Adaptation to Climate Change (10 Credit Points)
Subject Details (p. 3136) Legacy Code: 300909
This subject investigates how organisms respond to variation in climate and what can be done to reduce their vulnerability to anthropogenic climate change. The subject makes use of a novel conceptual framework that defines 'vulnerability' as a function of the 'exposure' and 'sensitivity' of organisms to climate change. Therefore, we will begin by exploring how organisms are exposed to climate change, from regional climatic changes acting at the scale of populations, to local climatological effects acting at the scale of individuals. Next, we will examine what determines the sensitivity of organisms, focusing on the physiological, behavioural, and life-history traits that affect the ability of organisms to cope with and adapt to climate change. Then, we will show how exposure and sensitivity combine to determine the vulnerability of organisms, including in both managed and natural ecosystems. Finally, we will discuss the 'mitigation' and 'adaptation' strategies that can prevent the worst of the potential impacts from becoming realised and help protect our biodiversity in the face of anthropogenic climate change.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

EART 3005 Statistical Hydrology (10 Credit Points)
Subject Details (p. 3137) Legacy Code: 300991
This subject covers the principles of statistical hydrology. It explores at-site flood frequency analysis, regional flood frequency analysis, trend analysis of hydrological data, linear regression analysis and multivariate statistical techniques to solve hydrological problems.
Level: Undergraduate Level 3 subject
Pre-requisite(s): EART 4001
Restrictions: Please see the Subject Details page for any restrictions for this subject

EART 3006 Science of the Anthropocene (10 Credit Points)
Subject Details (p. 3137) Legacy Code: 301212
The subject explores how the earth has been irreversibly altered through human activities. Topics include-the composition of the ocean, land, and atmosphere, and the impacts humans have had on these systems. The subject looks at the detection and control of modern pollutants with a focus on field sampling and modelling of selected environmental systems. These topics will be brought to life in a two-day field trip to sites of significant anthropogenic impact.
Level: Undergraduate Level 3 subject
Equivalent Subjects: EART 3002 Environmental Geochemistry EART 3003 Environmental Geochemistry
Restrictions: Please see the Subject Details page for any restrictions for this subject

EART 3007 Land Degradation and Contamination (10 Credit Points)
Subject Details (p. 3138) Legacy Code: 301273
This subject will examine current interdisciplinary topics on land degradation and contamination in both urban, peri-urbanand rural environments. The effects of the various human induced land degradation and contamination processes and pollutants in terrestrial environments will be explored and how impacts can be ameliorated and managed. The focus is on both the science of environmental pollutants and on the remediation strategies currently available. Topics include; basic concepts of soils, study of the processes, common soil pollutants, persistent organic contaminants and pesticides, acidification of soils, quantitative risk assessment, land reclamation, and landfill sites
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

EART 3008 Soils and Substrates (10 Credit Points)
Subject Details (p. 3135) Legacy Code: 301446
This subject provides you with a basic understanding of soil formation and erosion processes, soil physical, chemical and biological properties, and the diversity and classification of soils in the Australian landscape. These basic principles, along with alternative substrates, are explored in relation to the sustainable management of soils and substrates for horticultural and agricultural production and for environmental management and other land uses. The practical sessions are designed to reinforce the lecture material and include field description and analysis of soil profiles and properties, soil sampling principles and practice, laboratory measurement of soil and substrate physical and chemical properties essential/important for plant growth, soil/substrate biology.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

EART 7001 Advanced Hydrogeology (10 Credit Points)
Subject Details (p. 3139) Legacy Code: 301014
This subject covers occurrence of groundwater, groundwater movement, groundwater hydraulics, water wells, quality of groundwater, groundwater modelling and groundwater management. The objectives of this subject are to enable students to learn the associated concept of groundwater and apply the learnt concepts in solving groundwater problems in advanced engineering practice.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

EART 7002 Advanced Statistical Hydrology (10 Credit Points)
Subject Details (p. 3139) Legacy Code: 301013
This subject covers at-site flood frequency analysis, regional flood frequency analysis, trend analysis of hydrological data, linear regression analysis and multivariate statistical techniques to solve advanced hydrological problems.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

EART 9001 Higher Degree Research Thesis - Hydrology (80 Credit Points)
Subject Details (p. 3140) Legacy Code: 800079

Economics and Econometrics (ECON)

ECON 0001 Economics (WSTC Prep) (10 Credit Points)
Subject Details (p. 3141) Legacy Code: 700217
This subject is designed to familiarise students with some of the basic concepts and relationships of the discipline. It was developed to prepare students for undergraduate study in the academic discipline area of commerce/business and educate students as to the crucial role economic decisions have in society and how economic problems and issues dominate media and politics. By understanding Economics, students are empowered to participate effectively and knowledgeably in economic debate.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: ECON 0002 - Economics (UWSC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ECON 0002 Economics (WSTC) (10 Credit Points)
Subject Details (p. 3141) Legacy Code: 900030
This subject is designed to familiarise students with some of the basic concepts and relationships of the discipline. It was developed to prepare students for undergraduate study in the academic discipline area of commerce/business and educate students as to the crucial role economic decisions have in society and how economic problems and issues dominate media and politics. By understanding Economics, students are empowered to participate effectively and knowledgeably in economic debate.

ECON 1002 Consumers, Firms and Markets (WSTC) (10 Credit Points)
Subject Details (p. 3142) Legacy Code: 700249
This subject is an introduction to microeconomics. It provides students with an understanding of basic concepts such as value, rational consumer behaviour, the behaviour of firms in various market structures, the efficiency and failings of markets, the distribution of wealth and income, and the role of government regulation and intervention. It illuminates these concepts by considering and debating their application to contemporary economic and social issues such as: the influence of marketing on consumer choices, the concentration of market power in Australian industries, rising income and wealth inequality, minimum wage laws, and governmental responses to environmental problems and climate change.
Level: Undergraduate Level 1 subject
Equivalent Subjects: MKTG 1005 - Consumers Firms and Markets
Restrictions: Please see the Subject Details page for any restrictions for this subject

ECON 1003 Financial Institutions and Markets (10 Credit Points)
Subject Details (p. 3143) Legacy Code: 200048
The investment, financing and risk management decisions made by individuals, firms and governments are implemented by creating and trading financial instruments in financial markets, often with the involvement of a variety of institutions. Using the Australian financial system as an illustration, Financial Institutions and Markets introduces students to the theory and functions of financial institutions and markets. Students develop an understanding of the role and functions of bank and non-bank financial institutions and of markets in equities, debt, foreign exchange and derivatives.
Level: Undergraduate Level 1 subject
Equivalent Subjects: ECON 1004 - Financial Institutions and Markets (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ECON 1004 Financial Institutions and Markets (WSTC) (10 Credit Points)
Subject Details (p. 3145) Legacy Code: 700250
The investment, financing and risk management decisions made by individuals, firms and governments are implemented by creating and trading financial instruments in financial markets, often with the involvement of a variety of institutions. Using the Australian financial system as an illustration, Financial Institutions and Markets introduces students to the theory and functions of financial institutions and markets. Students develop an understanding of the role and functions of bank and non-bank financial institutions and of markets in equities, debt, foreign exchange and derivatives.
Level: Undergraduate Level 1 subject

ECON 1006 Introduction to Economic Methods (10 Credit Points)
Subject Details (p. 3146) Legacy Code: 200052
Introduction to Economic Methods covers basic concepts in mathematics and statistics to help student understanding of subjects such as accounting, management, marketing, finance, and economics. Students taking this subject are expected to improve their numeracy and analytical skills. In particular, students will learn how to collect, analyse and interpret data using simple descriptive and inferential statistical methods including simple regression analysis. In addition, by working through applied exercises, students are expected to improve their problem solving skills and acquire a basic understanding of calculus relevant to fields such as finance.
Level: Undergraduate Level 1 subject
Equivalent Subjects: LGYA 9799 - Introduction to Economic Methods MATH 1030 - Statistics for Business MATH 1028 - Statistical Decision Making MATH 1029 - Statistical Decision Making (UWSC) MATH 1012 - Management Analytics MATH 1031 - Statistics for Business (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ECON 1011 Principles of Economics (10 Credit Points)
Subject Details (p. 3147) Legacy Code: 200525
This subject is an introduction to economic concepts and contemporary economic issues. It introduces students to basic concepts such as markets and their operation, the behaviour of firms, the efficiency and potential failings of markets, the role of government, key macroeconomic problems such as recessions, inflation and unemployment, as well as contemporary fiscal and monetary policies. It illuminates concepts via application to contemporary economic issues and debates over different theoretical perspectives. This subject also exposes students to recent developments and policy controversies in economics.
Level: Undergraduate Level 1 subject
Equivalent Subjects: ECON 1007 - Introductory Economics ECON 1009 - Microeconomics ECON 1010 - Principles of Economics ECON 1012 - Principles of Econnomics (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ECON 1013 The Australian Macroeconomy (10 Credit Points)
Subject Details (p. 3148) Legacy Code: 200549
This subject is an introduction to macroeconomic concepts, analysis and issues in the Australian context. Basic concepts introduced and applied include: national income accounting, economic structure, price indexes and inflation, the balance of payments, and labour market aggregates. These concepts are applied in describing and explaining the recent evolution of the Australian economy in terms of growth, structural change, price stability, and employment. This leads to a discussion of major policy issues such as the role of governments in managing economic fluctuations, and the implications of Australia's foreign liabilities. The course ends with a brief introduction to modelling income determination.
Level: Undergraduate Level 1 subject
Equivalent Subjects: ECON 1008 - Macroeconomics
Restrictions: Please see the Subject Details page for any restrictions for this subject

ECON 1014 Consumers, Firms and Markets (10 Credit Points)
Subject Details (p. 3149) Legacy Code: 201099
This subject is an introduction to microeconomics. It provides students with an understanding of basic concepts such as value, rational consumer behaviour, the behaviour of firms in various market structures, the efficiency and failings of markets, the distribution of wealth and income, and the role of government regulation and intervention. It illuminates these concepts by considering and debating their application to contemporary economic and social issues such as: the influence of marketing on consumer choices, the concentration of market power in Australian industries, rising income and wealth inequality, minimum wage laws, and governmental responses to environmental problems and climate change.

Restrictions: Please see the Subject Details page for any restrictions for this subject

ECON 1015 Understanding the Economic Context of Enterprises (WSTC) (10 Credit Points)
Subject Details (p. 3150)
The notion of business in practice has its foundations in economic theory. To connect the dots between what an enterprise does and why in the broader global context of economic forces, it is crucial to develop an understanding of ideas and their relationship to the enterprise's goal. This subject will introduce the theoretical underpinning of economics, market forces and trending issues which ultimately shape enterprise behaviour in the global landscape. You will learn how the firm and its competitors adapt to each other's actions. You will also learn nuances of government policy and how the enterprise can adapt to the shifting of goalposts along the way.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ECON 2002 Corporate Financial Management (10 Credit Points)
Subject Details (p. 3150) Legacy Code: 200488
This subject introduces the fundamental concepts of finance theory and the tools of financial decision making in the context of the Australian institutional environment. These concepts relate primarily to the time value of money, risk and return, capital budgeting and capital structure. The unit's purpose is to develop an understanding of the basic practices of financial management from the perspective of a firm (both large and small). Students examine the investment, financing and dividend decisions of corporations.
Level: Undergraduate Level 2 subject
Pre-requisite(s): ECON 1006 OR
MATH 1030
Equivalent Subjects: ECON 2003 - Financial Management FINC 2001 - Corporate Financial Decision Making
Restrictions: Please see the Subject Details page for any restrictions for this subject

ECON 2004 Globalisation and Trade (10 Credit Points)
Subject Details (p. 3151) Legacy Code: 200541
Globalisation and Trade focuses on the role of trade in the process of globalisation. It covers the history and analytical methods of international trade theories and their applications in private industry and the public sector. The theories are applied to contemporary issues in their institutional settings, in particular to: growth and development; trading blocs; and trade strategies in the developed, underdeveloped and formerly planned economies. The subject provides students with a critical understanding of the major economic, environmental, social and ethical issues stemming from the process of globalisation and trade in the twenty first century.
Level: Undergraduate Level 2 subject
Pre-requisite(s): ECON 1011
Equivalent Subjects: ECON 2006 - International Trade Theory and Policy
Restrictions: Please see the Subject Details page for any restrictions for this subject

ECON 2007 Macroeconomic Theory (10 Credit Points)
Subject Details (p. 3152) Legacy Code: 200547
Macroeconomic Theory aims to provide alternative theoretical explanations of the working of the macroeconomy. The subject will be based on the analytical narratives of macroeconomic developments taught in Australian Macroeconomy. Starting from the basic IS-LM model, it derives the aggregate demand (AD) curve and examines the components of commodity and money markets. It also analyses the labour market and derives the aggregate supply (AS) curve of an economy. Using the AD-AS model, it examines the interdependent nature of macroeconomic problems (e.g. inflation, unemployment), and the effectiveness of fiscal and monetary policies within a closed economy context. The basic model is then extended to analyse open economy issues (e.g., exchange rates and balance of payments, external shocks and international interdependence). Whenever appropriate, alternative approaches to macroeconomics are evaluated.
Level: Undergraduate Level 2 subject
Pre-requisite(s): ECON 1013
Equivalent Subjects: LGYA 4311 - Macroeconomic Analysis
Restrictions: Please see the Subject Details page for any restrictions for this subject

ECON 3001 Applied Econometrics (10 Credit Points)
Subject Details (p. 3152) Legacy Code: 200054
This subject builds on the econometric methods of Economic Modelling. The focus is on the linear model in econometrics in its application to economic and financial time series. The emphasis is on learning by doing in small group workshops.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MATH 2002 OR
ECON 3004
Restrictions: Please see the Subject Details page for any restrictions for this subject

ECON 3002 Corporations, Economic Power and Policy (10 Credit Points)
Subject Details (p. 3153) Legacy Code: 200923
Australia's industrial, financial and retail sectors are dominated by powerful corporations which engage in a wide variety of competitive and cooperative behaviours. This subject examines how modern corporations position themselves in terms of investment in large-scale production, technological innovation, the manipulation of information, marketing, and cooperative strategies to gain market share and enhance their profitability. It also explores the effects of the interactions of corporate behaviour and public policy, including the governmental function of constructing and regulating explicit market rules of exchange.
Level: Undergraduate Level 3 subject
Equivalent Subjects: ECON 3018 - Microeconomic Theory and Applications
Restrictions: Please see the Subject Details page for any restrictions for this subject

ECON 3003 Derivatives (10 Credit Points)
Subject Details (p. 3153) Legacy Code: 200079
This subject provides an introduction to the major classes of derivatives: forwards, futures, swaps and options. It examines how these instruments can be used by companies for the purposes of hedging, speculation and arbitrage. Each of these categories of derivatives is examined in some detail. Considerable attention is also given to various models used to price derivative products. The historical background to contemporary risk management is also considered.
Level: Undergraduate Level 3 subject
Pre-requisite(s): ECON 1006 AND
ECON 2002
Equivalent Subjects: LGYA 9824 - Risk Management LGYB 9004 - Options Futures and Derivitive Products
Restrictions: Please see the Subject Details page for any restrictions for this subject

ECON 3005 Economic Theories, Controversies and Policies (10 Credit Points)
Subject Details (p. 3154) Legacy Code: 200816
In 2016, this subject replaced by 200925 - Growth, Cycles and Crises. Economic Theories, Controversies and Policies presents alternative approaches to economic theories, controversies and policies. Topics may include recent developments or theoretical controversies in development economics, international trade, monetary economics, labour economics, environmental economics, managerial and industry economics, political economy, the economics of inequality, behavioural economics or feminist economics. Controversial contemporary policy debates, both in Australia and globally, will be examined. This subject will be team taught to expose students to a range of perspectives.
Level: Undergraduate Level 3 subject
Pre-requisite(s): ECON 1011
Restrictions: Please see the Subject Details page for any restrictions for this subject

ECON 3006 Economic and Financial Modelling (10 Credit Points)
Subject Details (p. 3155) Legacy Code: 200916
Economic and Financial Modelling examines regression analysis and its use in business especially in economics, finance and accounting. Topics will include the properties of estimators, hypothesis testing, specification error, multicollinearity, dummy variables, heteroskedasticity, serial correlation. It also introduces other modelling techniques in finance and economics. Empirical assignments undertaken by the student form an integral part of the unit. The emphasis is on learning by doing in small group workshops.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MATH 1030 OR
ECON 1006
Equivalent Subjects: ECON 3004 - Economic Modelling
Restrictions: Please see the Subject Details page for any restrictions for this subject

ECON 3007 Economics and Finance Engagement Project (10 Credit Points)
Subject Details (p. 3156) Legacy Code: 200537
This subject will provide students with exposure to problems with which economists and finance professionals are confronted in their daily work. They will learn about and examine the multi-dimensional nature of the issues addressed by economists and finance professionals in real-life. Students will need to consider the nature of the problems, propose solutions, as well as address how realistic the solutions they are proposing are. They will learn how to systematically reflect on their contribution to the industry or community setting with which they engage.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ECON 3008 Financial Institutions Lending (10 Credit Points)
Subject Details (p. 3157) Legacy Code: 200062
The major focus of this subject is the assessment and management of credit risk exposures and resulting implications on loan decisions and loan pricing decisions. The subject provides students with knowledge of traditional and modern credit risk measurement and management techniques, regulatory capital adequacy guidelines and economic capital decisions. Special topics covered include modern lending products and pertinent issues in lending. The subject covers current developments and debates in the field.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ECON 3012 Growth, Cycles and Crises (10 Credit Points)
Subject Details (p. 3158) Legacy Code: 200925
Growth, Cycles and Crises gives students an up-to-date understanding of macroeconomic developments, empirical puzzles, theoretical controversies and policy dilemmas of the day. It begins with an overview of different schools of thought and their historical roots. There follows an investigation of recent global crises, their underlying causes, and the policy responses in the major economic powers. We also consider the stresses on Australia resulting from global economic fluctuations and shifts, causing disruptive exchange rate swings and fiscal difficulties. Finally with major developments around the world and the controversies arising from them, such as debt crises and austerity debate, the problem of unbalanced growth in rapidly developing economies, and stagnation and policy zigzags apparent in some advanced economies.
Level: Undergraduate Level 3 subject
Equivalent Subjects: ECON 3005 - Economic Theories Controversies and Policies
Restrictions: Please see the Subject Details page for any restrictions for this subject

ECON 3013 Industry Economics and Markets (10 Credit Points)
Subject Details (p. 3158) Legacy Code: 200531
The first part of this subject develops an understanding of the relationships between industry structure, the conduct of firms, and market performance. Alternative theories of the firm and strategic market behaviour are considered. The subject then examines the characteristics and operation of particular markets, including public goods and utilities, human resources, and natural and environmental resources. The analysis developed in the subject is used to provide insights into applied policy areas such as competition policy, regulation of public enterprises, microeconomic reform and industry policy.
Level: Undergraduate Level 3 subject
Pre-requisite(s): ECON 1009 OR
ECON 1007 OR
ECON 1011
Equivalent Subjects: LGYA 4313 - Industry Economics and Policy
Restrictions: Please see the Subject Details page for any restrictions for this subject

ECON 3014 International Finance (10 Credit Points)
Subject Details (p. 3159) Legacy Code: 200055
The study of international finance from the vantage point of a multinational enterprise provides students with a global insight into international trade for both manufactured and financial products. The subject recognises the increasing importance of global integration of money and capital markets - a trend that is creating expanded opportunities for both investors and organisations that need to raise capital. The recognition and management of risks associated with international operations are explored including cost of capital and financial structure, international financial markets crisis, international financial management, international monetary system, international diversification, foreign exchange risk management including the use of futures and options, foreign investment analysis, determination of exchange rates, balance of payments analysis, international debt crisis and country risk analysis.
Level: Undergraduate Level 3 subject
Pre-requisite(s): ECON 2002
Restrictions: Please see the Subject Details page for any restrictions for this subject

ECON 3017 Macroeconomic Measures and Models (10 Credit Points)
Subject Details (p. 3160) Legacy Code: 200926
The subject equips students with formal tools to analyse macroeconomic problems. Students learn to use macroeconomic terms and measures competently in discussion, and interpret data from the income, product, external and government accounts, and labour force surveys. Through hands-on experience constructing and applying price indices, deflators and productivity measures, they acquire practical skills and a sound conceptual understanding of economic variables and the accounting framework. Students come to appreciate the power of macroeconomic models, learning how to capture myriad mechanisms and feedbacks in a single framework, for example to define and quantify multipliers and crowding-out effects. Finally, students gain an understanding of fundamental external constraints, such as international parity and balance of payments equilibrium conditions.
Level: Undergraduate Level 3 subject
Equivalent Subjects: ECON 3016 - Macroeconomic Issues
Restrictions: Please see the Subject Details page for any restrictions for this subject

ECON 3019 Political Economy (10 Credit Points)
Subject Details (p. 3161) Legacy Code: 200065
This subject examines various political economy approaches to the analysis of economics, mainly associated with Marxian, post-Keynesian, evolutionary schools of thought as well as development economics and the perspectives of international political economy. These may be regarded as the main alternatives to neo-classical economic theory. As they do not represent a unified body of thought, the subject will survey the main contributions of each, focusing on both the positive aspects of theory and the negative aspects relating to the critique of neo-classical theory.
Level: Undergraduate Level 3 subject
Pre-requisite(s): ECON 1009 AND
ECON 1008 OR
ECON 1007
Restrictions: Please see the Subject Details page for any restrictions for this subject

ECON 3021 The Superannuation Industry (10 Credit Points)
Subject Details (p. 3161) Legacy Code: 200077
This subject provides students with an understanding of the economics of retirement and retirement income provision, with particular emphasis on the Australian superannuation industry. On completion of this subject, students should have a comprehensive understanding of superannuation in Australia, as well as an appreciation of the economic issues associated with alternative models of retirement income provision.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ECON 3022 Urban and Regional Economics (10 Credit Points)
Subject Details (p. 3162) Legacy Code: 200075
Students wishing to enrol in this subject are advised to contact the Subject Coordinator. This subject deals with: models of short-run fluctuations of regional aggregates and the economic relations between regions; models of long-run change in regional aggregates and the long-run economic relations between regions; equilibrium models of intra-urban location; optimal models of intra-urban allocation; and optimal allocation of capital to urban land.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ECON 4001 Advanced Analysis and Interpretation (10 Credit Points)
Subject Details (p. 3162) Legacy Code: 200897
Building on the introduction to the analysis of qualitative data presented in the core subject Research Design 1: Theories of Enquiry this subject, Advanced Analysis and Interpretation, will provide candidates with the techniques necessary to use, analyse and interpret qualitative data in business research. Presented as a series of seminar-workshops, candidates consider the theories that underpin the employed analytical methods, and then move to employ introduced qualitative software tools to analyse and interpret research data.
Level: Undergraduate Level 4 subject
Co-requisite(s): HUMN 4009
Restrictions: Please see the Subject Details page for any restrictions for this subject

ECON 5001 Innovation Economy (10 Credit Points)
Subject Details (p. 3163)
Innovation is essential to unlocking new frontiers of growth, development, and quality of life. Successful innovation requires a synergy of creative entrepreneurship and strategic management. In this subject, students will develop the ability to recognize both opportunities and the limitations of cognitive biases when pursuing potential prospects. Cognitive and neuropsychological processes underpin incremental and radical innovations and distinctive personality traits may also be associated with successful entrepreneurship. Further, students will also explore self-management, interpersonal management, and leadership skills as essential to succeeding in the innovation economy. Successful innovation has the potential to unleash forces of creative destruction that requires to assess the resultant social and economic transformations.
Level: Postgraduate Coursework Level 5 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ECON 5002 Sustainability Economy (10 Credit Points)
Subject Details (p. 3164)
What does it mean to live and work sustainably? There are many ways to ensure that businesses, communities and individuals continue to thrive into the future. This subject explores the evolving concept of sustainability in practice. Students will learn how to view complex policy, business, consumer, and individual performance problems and opportunities through the various lenses of sustainability. Through the application of psychological knowledge on individual values, collective power and impacts on human behaviour, student will develop the skills to implement new practices while also reconciling different aspects of sustainability in their own work or personal context.
Level: Postgraduate Coursework Level 5 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ECON 7001 Economics (10 Credit Points)
Subject Details (p. 3164) Legacy Code: 200425
This subject presents a broad overview of economics and the way economic activity, institutions and regulations shape social and business outcomes, knowledge that is critical for any student in a business-related discipline. Students will reflect critically on the key economic processes, theories and ideas. We study the way economics defines growth and wellbeing and the economic theories of income determination and business cycles that shape macroeconomic policy. Students will form perspectives on globalisation, trade, colonisation and development and the causes of, and solutions to, inequalities between Indigenous and non-Indigenous Australians. In the microeconomic component of the subject, we study the way economics understands and models individuals and the consumer, production and firms, markets and market structures, the role of government intervention and regulation, environmental outcomes and policy to control processes of economic power.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 8981 Economics (PG)
Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (p. 3165) Legacy Code: 800037
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ECON 9002 Higher Degree Research Thesis - Property Economics (80 Credit Points)
Subject Details (p. 3167) Legacy Code: 800035
In 2004, this subject replaced by 800035.2 Higher Degree Research Thesis FT - Property Economics.
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

Electrical and Electronic Eng. (ELEC)

ELEC 1001 Digital Systems 1 (10 Credit Points)
Subject Details (p. 3175) Legacy Code: 300018
This subject provides students with a solid background in digital logic design which is foundational to the fields of electrical and computer engineering. Digital logic design involves building electronic components and hardware, such as circuit boards and microchip processors. Students are first introduced to the fundamentals of digital logic, basic logic devices and Boolean algebra. This is followed by analysis and design of combinational and sequential logic circuits.
Level: Undergraduate Level 1 subject
Equivalent Subjects: ELEC 1002 - Digital Systems 1 (WSTC AssocD)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 1002 Digital Systems 1 (WSTC AssocD) (10 Credit Points)
Subject Details (p. 3176) Legacy Code: 700240
This subject provides students with a solid background in digital logic design which is foundational to the fields of electrical and computer engineering. Digital logic design involves building electronic components and hardware, such as circuit boards and microchip processors. Students are first introduced to the fundamentals of digital logic, basic logic devices and Boolean algebra. This is followed by analysis and design of combinational and sequential logic circuits.Offerings of alternate subjects are dependent on there being sufficient student enrolment numbers. If enrolments are low, the College may cancel delivery of the alternate subject.
Level: Undergraduate Level 1 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 1003 Electrical Fundamentals (10 Credit Points)
Subject Details (p. 3177) Legacy Code: 300021
This subject introduces essential electrical engineering concepts that provide students with the basic requirements for analysing, designing, building, and testing simple engineering systems. Students use techniques for analysing different types of circuits based on their knowledge of electrical theory and the characteristics of power, electrical energy, signals, and electrical circuit components. Students have practical activities including conducting experiments in learning how electrical systems work. Students are introduced to Electrical Machines and Renewable Energy systems for a fundamental understanding.
Level: Undergraduate Level 1 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 1004 Electrical Fundamentals (WSTC AssocD) (10 Credit Points)
Subject Details (p. 3178) Legacy Code: 700104
The objective of this subject is to introduce to the student a number of concepts within electrical engineering. These include basic definitions of charge, current, potential difference, power; electric circuits and basic laws such as Ohm's and Kirchoff's Laws; Thevenin, Norton's and the maximum power theorems; electromagnetism and the associated fundamental laws; capacitor and resistor circuits and time constants; an introduction to Electronics; communication waves; Logic gates and number systems; and an introduction to Electrical Machines and Renewable Energy systems. Basic principles are explained and applied to a range of typical electrical circuits and devices. These foundations provide students with the basic requirements for a career in engineering where the concepts can be developed or applied to more complex engineering systems.
Level: Undergraduate Level 1 subject

ELEC 1006 Engineering Computing (10 Credit Points)
Subject Details (p. 3180) Legacy Code: 300027
Engineering computing is an introduction to using computation to solve real problems. The subject also aims to instil sound principles of program design that can be utilised in many subjects throughout the students' course. The basic elements and structures of a high level language are taught. Students are exposed to numerous engineering problems and are encouraged to implement solutions using an algorithmic approach.
Level: Undergraduate Level 1 subject
Equivalent Subjects: ELEC 1008 Engineering Computing (WSTC) ELEC 1007 Engineering Computing (WSTC Assoc Deg)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 1007 Engineering Computing (WSTC AssocD) (10 Credit Points)
Subject Details (p. 3181) Legacy Code: 700106
Engineering computing is an introduction to using computation to solve real problems. The subject also aims to instil sound principles of program design that can be utilised in many subjects throughout the students' course. ELEC 1009 Electrical Circuit Fundamentals (10 Credit Points)
Subject Details (p. 3182) Legacy Code: 301336
This subject will be offered at Engineering Innovation Hub - Hassall St, Parramatta campus. This subject is an introductory unit in Electrical Engineering, which provides an introduction to electrical circuits and fundamental electrical elements as well as the technical skills to analyse such circuits. It is suitable for students pursuing further studies in Electrical Engineering such as Power and Energy, Telecommunications, Control, Instrumentation, as well as other related engineering disciplines including Computer Science and Engineering. In the practical section, this course provides hands-on experience in building and testing circuits. This subject is presented in such a way that students who have taken it are capable of building and analysing some practical, useful devices afterwards.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 1011 Engineering Computing (Block) (10 Credit Points)
Subject Details (p. 3183) Legacy Code: 500064
Engineering Computing is an introduction to using computation to solve real problems. The subject also aims to instil sound principles of program design that can be utilized in many subjects throughout the students' course. The basic elements and structures of a high level language are taught. Students are exposed to numerous engineering problems and are encouraged to implement solutions using an algorithmic approach.

ELEC 2006 Engineering Electromagnetics (10 Credit Points)
Subject Details (p. 3187) Legacy Code: 300481
This subject introduces Maxwell's equations in integral and differential form and their application to basic theory and application of electromagnetic structures, wave propagation, guides waves, antennas and Electromagnetic compatibility.
Level: Undergraduate Level 2 subject
Pre-requisite(s): MATH 1019 AND
ENGR 1011 OR
ENGR 1028
Equivalent Subjects: ELEC 2003 - Electromagnetics LGYA 5725 - Electromagnetic Compatibility
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 2007 Engineering Visualization (10 Credit Points)
Subject Details (p. 3188) Legacy Code: 300029
This subject aims to provide a comprehensive introduction to fundamental concepts and algorithms in engineering visualization. Topics covered include visualization hardware, scan conversion of geometric primitives, 2D and 3D transformations, 3D viewing and projection, hidden surface removal, solid modelling, illumination models and image manipulation.
Level: Undergraduate Level 2 subject
Pre-requisite(s): Students must have passed ELEC 1006 Engineering Computing and either ELEC 2009 Microprocessor Systems or ELEC 2008 Microcontrollers and PLCs
Equivalent Subjects: LGYB 0688 - Computer Graphics
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 2008 Microcontrollers and PLCs (10 Credit Points)
Subject Details (p. 3189) Legacy Code: 300044
Through completion of an applied project students will develop an understanding of the hardware, architecture and the assembly language of microcontrollers in addition to the control of a mechanical system with a programmable logic controller (PLC). The subject looks at the applications of timers, interrupts and serial ports. Furthermore, the general approach in designing a microcontroller in mechanical systems will be studied. Students will use an Omron PLC to control a factory represented by four pneumatic cylinders. After covering the Ladder Logic programming language, they will move on to cover sequential programming and numerical manipulation using PLCs.
Level: Undergraduate Level 2 subject
Pre-requisite(s): ELEC 2004 OR
ELEC 1003 OR
ELEC 1009
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 2009 Microprocessor Systems (10 Credit Points)
Subject Details (p. 3189) Legacy Code: 300076
This subject introduces students to the internal structure of microprocessors used in computing systems and their fundamental operations. Topics include assembly language programming, interrupt processing, CPU functions, memory organization, and peripheral programming. The microprocessor and embedded processors are discussed. Students write assembly language programs, debug and create executable files to control microprocessor systems.
Level: Undergraduate Level 2 subject
Pre-requisite(s): ELEC 1001
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 2010 Power and Machines (10 Credit Points)
Subject Details (p. 3190) Legacy Code: 300052
This subject develops an understanding an understanding of the basic concepts of power and machines, including modern power systems and transformers, in addition to the fundamentals of electromechanical energy conversion. Students will also study magnetic circuits, modern permanent magnet materials and their characteristics, and balanced and unbalanced three-phase power systems.
Level: Undergraduate Level 2 subject
Pre-requisite(s): ELEC 2001 OR
ELEC 2013
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 2011 Signals and Systems (10 Credit Points)
Subject Details (p. 3191) Legacy Code: 300057
This subject aims to develop students' understanding of continuous-time and discrete-time concepts and methods. It covers various signals and their analysis, as encountered in the fields of electrical, computer and telecommunication engineering.
Level: Undergraduate Level 2 subject
Pre-requisite(s): MATH 1019 AND
ELEC 1003
Equivalent Subjects: ELEC 2012 - Signals and Systems (WSTC AssocD)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 2012 Signals and Systems (WSTC AssocD) (10 Credit Points)
Subject Details (p. 3192) Legacy Code: 700241
This subject aims to develop students understanding of continuous-time and discrete-time concepts and methods. It covers various signals and their analysis, as encountered in the fields of electrical, computer and telecommunication engineering.Offerings of alternate subjects are dependent on there being sufficient student enrolment numbers. If enrolments are low, the College may cancel delivery of the alternate subject.
Level: Undergraduate Level 2 subject
Pre-requisite(s): MATH 1020 AND
ELEC 1004
Equivalent Subjects: ELEC 2011 - Signals and Systems
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 2013 Circuits and Signals (10 Credit Points)
Subject Details (p. 3193) Legacy Code: 301352
This subject will be offered at Engineering Innovation Hub - Hassall St, Parramatta campus. This subject covers the fundamentals of circuit, system and signal analysis on which most other courses in the electrical engineering curriculum are built. The subject provides a foundation in frequency domain analysis and in transform methods, as well as significantly extending alternate current analysis, transient analysis and other fundamental circuit analysis tools. Although there is a practical program in the laboratory, the theory aspects of this course are the primary focus.
Level: Undergraduate Level 2 subject
Pre-requisite(s): ELEC 1009
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 2014 Mathematics for Electrical Engineers 1 (10 Credit Points)
Subject Details (p. 3193) Legacy Code: 301338
This subject will be offered at Engineering Innovation Hub - Hassall St, Parramatta campus. The subject combines two maths components, Vector Calculus and Complex Analysis, both of which incorporate calculus and linear algebra and have many applications to physics, engineering and mathematics, particularly electrical engineering. Vector Calculus involves calculus in two and three dimensions, theory of curves, vector functions and partial derivatives, two- and three-dimensional integration, line integrals and curl and divergence. Complex Analysis extends calculus from real numbers to complex numbers, and develops the theory of analytic functions, complex integration and Cauchy's theorem, series expansions, the residue theorem and applications to real improper integrals and trigonometric integrals.
Level: Undergraduate Level 2 subject
Pre-requisite(s): MATH 1035
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 2015 Mathematics for Electrical Engineers 2 (10 Credit Points)
Subject Details (p. 3194) Legacy Code: 301339
This subject will be offered at Engineering Innovation Hub - Hassall St, Parramatta campus. This subject builds on two maths components begun in first year engineering, that is linear algebra and statistics. For linear algebra, the aim is to learn and apply the theoretical elements about linear combinations of vectors and matrices amongst other topics to problem sets. For statistics, the aim is to learn the various ways in which random variation arises in engineering contexts and apply methods and models for understanding data and making decisions. In both components, students will expand their skills in analytic thinking.
Level: Undergraduate Level 2 subject
Pre-requisite(s): MATH 1035
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 2016 Mathematics for Software Engineers (10 Credit Points)
Subject Details (p. 3194) Legacy Code: 301344
This subject will be offered at Engineering Innovation Hub - Hassall St, Parramatta campus. This subject builds on two maths components begun in first year engineering, which are Finite Maths and Statistics. For Finite Maths, the aim is for students to learn about the ideas in Number Theory, the theory of finite fields, cryptography and Algebraic Coding Theory as techniques for organising information and analysing it. For Statistics, the aim is to learn the various ways in which random variation arises in engineering contexts and apply methods and models for understanding data and making decisions. In both components, students will expand their skills in analytic thinking and making sense of data.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 2017 Requirements and Design Workshop (10 Credit Points)
Subject Details (p. 3194) Legacy Code: 301346
This subject will be offered at Engineering Innovation Hub - Hassall St, Parramatta campus. This subject has a series of software engineering workshops designed to teach students to work in teams and apply their knowledge to solve real-life problems. These workshops offer students opportunities to concentrate on software requirements analysis and design issues including artefacts produced as well techniques and tools to support this process (brainstorming, problem statements, requirements elicitation, producing design documents and prototyping). In addition, it provides students with some teamwork skills, requirements engineering and design techniques that an engineer would use in the early stages of the development process. The students are also getting experience on different aspects of designing a Web application with a major focus on the front-end.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 2018 Systems Modelling and Design (10 Credit Points)
Subject Details (p. 3194) Legacy Code: 301345
This subject will be offered at Engineering Innovation Hub - Hassall St, Parramatta campus. This subject reinforces the understanding of discrete mathematics and the role it plays in computing science and engineering. Students learn how to systematically derive implementations from formal specifications using simple mathematics. Students also learn to develop an understanding of the rules for deriving implementations from specifications. Why do they work? What do we have to prove and how? This is crucial for later industrial software engineering practice.
Level: Undergraduate Level 2 subject
Pre-requisite(s): MATH 1006 AND
ENGR 1045
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 2019 Workshop on Reasoning about Programs (10 Credit Points)
Subject Details (p. 3195) Legacy Code: 301347
This subject will be offered at Engineering Innovation Hub - Hassall St, Parramatta campus. The goal of this subject is to develop skills in writing precise specifications of software programs and to translate these specifications into correct implementations. Further methods for reasoning about programs are introduced, including methods for reasoning about termination, program refinement and data refinement. Students learn to apply these ideas to structure their thinking about programs as well as to build a web application within a project context.
Level: Undergraduate Level 2 subject
Pre-requisite(s): ELEC 2018
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 3001 Communication Systems (10 Credit Points)
Subject Details (p. 3195) Legacy Code: 300007
This subject will provide a basic introduction to communication systems and techniques. Specific topics covered include energy and power spectral density, amplitude modulation, frequency modulation, pulse modulation, an overview of digital modulation techniques, noise in communication systems and an overview of current telecommunication systems; spread spectrum systems, optical communication systems, radio broadcasting and mobile communication systems.
Level: Undergraduate Level 3 subject
Pre-requisite(s): ELEC 2011
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 3002 Data Communications (10 Credit Points)
Subject Details (p. 3196) Legacy Code: 300997
This subject is concerned with the principles and topics of fundamental importance to digital data communication, computer communication networks and telecommunications. The lower layers of the protocol structure (physical layer, data link layer and some aspects of the network layer) and the physical medium (hardware and transmission lines) are emphasized. An engineering approach will be taken to provide an insight to transmission and transmission media, communication techniques and transmission efficiency.
Level: Undergraduate Level 3 subject
Pre-requisite(s): ELEC 2011
Incompatible Subjects: ELEC 4001 - Data Networks
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 3003 Digital Signal Processing (10 Credit Points)
Subject Details (p. 3196) Legacy Code: 300069
Students will develop an understanding of the fundamental concepts and principles in digital signal processing by applying the theory learned in their classes to practical exercises. The subject matter includes discrete-time signals and systems, the z-transform, sampling of continuous-time signals, transform analysis of linear time-invariant systems, filter design techniques, structures for discrete-time systems, the discrete Fourier transform and computation of the discrete Fourier transform.
Level: Undergraduate Level 3 subject
Pre-requisite(s): ELEC 2011 OR
ELEC 2013
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 3004 Digital Systems 2 (10 Credit Points)
Subject Details (p. 3197) Legacy Code: 300019
This subject covers modern logic design techniques and the process of creating logic circuits and systems from design specifications to implementation. Topics include logic design techniques for combinational and sequential logic circuits; hardware description language (HDL); logic circuit implementation using an HDL; state-of-the-art logic circuit design tools; and programmable logic devices.
Level: Undergraduate Level 3 subject
Pre-requisite(s): ELEC 1001
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 3005 Electrical Drives (10 Credit Points)
Subject Details (p. 3198) Legacy Code: 300070
Through practical laboratory exercises students will analyse and evaluate electrical machines and drives. They will examine various types of electrical motors and drive systems, their applications and control. They will also study various types of speed control, starting and braking systems and dynamics.
Level: Undergraduate Level 3 subject
Pre-requisite(s): ELEC 3006
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 3006 Electrical Machines 1 (10 Credit Points)
Subject Details (p. 3199) Legacy Code: 300071
This subject introduces the fundamental principles of electrical machines, the principles of electromechanical energy conversion and the operation and analysis of Direct Current (DC) generators and motors, induction motors and synchronous machines. Students apply principles and theory to practical exercises to develop their understanding. The subject also introduces various special purpose electrical machines, such as permanent magnet machines, step motors and reluctance machines for an understanding on different types of machines.
Level: Undergraduate Level 3 subject
Pre-requisite(s): ELEC 2010 or
ELEC 3011
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 3008 Instrumentation and Measurement (10 Credit Points)
Subject Details (p. 3199) Legacy Code: 300075
Through practical exercises students will engage with engineering measurement and instrumentation systems. Students determine the most appropriate measurement method and instrument, such as multimeters, digital oscilloscopes and interfacing modules, for particular applications. They will gain experience with the measurement of physical quantities and the instrumentation required to accurately present information to a controller. Additionally, transducers used to measure common physical quantities are presented in detail, while instrumentation includes a detailed analysis of zero-span circuits, Wheatstone bridges, instrumentation amplifiers, isolation amplifiers, voltage-to-current and voltage-to-frequency modules used for faithful signal transmission, digital-to-analogue and analogue-to-digital circuits to deepen student learning.
Level: Undergraduate Level 3 subject
Pre-requisite(s): ELEC 2001 OR
ENGR 2001
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 3009 Power Systems (10 Credit Points)
Subject Details (p. 3200) Legacy Code: 300771
This subject provides students with a global picture of electrical energy systems. Through practical exercises students will examine and analyse the basic processes of generation, transmission and distribution, power system analysis and planning as well as power systems operation under steady-state and transient conditions. Various aspects of power system operation including harmonics, fundamentals of protection, environmental issues and renewable energy systems are also covered in this subject.
Level: Undergraduate Level 3 subject
Pre-requisite(s): ELEC 2010 or ELEC 3011
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 3010 Renewable Energy Systems Design (10 Credit Points)
Subject Details (p. 3201) Legacy Code: 301425
This subject prepares engineering students to be conversant with renewable energy systems. Students will learn to appraise environmental, social, legal, economic and political issues concerning renewable energy systems. Students will also learn relevant design skills related to renewable energy systems.
Level: Undergraduate Level 3 subject
Pre-requisite(s): ELEC 1003 AND
ENGR 1011
Equivalent Subjects: ELEC 4006 Sustainable Energy Systems
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 3011 Power and Machines (10 Credit Points)
Subject Details (p. 3201)
This subject develops an understanding of the basic concepts of power and machines, including modern power systems and transformers, in addition to the fundamentals of electromechanical energy conversion. Students engage in practical activities to develop knowledge and skills in magnetic circuits, balanced and unbalanced three-phase power systems, and transformers. These concepts comprise essential knowledge for electrical engineers.
Level: Undergraduate Level 3 subject
Pre-requisite(s): ELEC 2001 OR
ELEC 2013
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 4002 Power Electronics (10 Credit Points)
Subject Details (p. 3202) Legacy Code: 300772
The subject covers various types of power electronics systems, their applications and use in Electrical Drive Systems. It also covers application considerations and modern developments in electronic systems. This course provides the fundamentals of Power Electronics and Industrial Electronics.
Level: Undergraduate Level 4 subject
Pre-requisite(s): ELEC 2010 AND
ELEC 2004
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 4003 Power Quality (10 Credit Points)
Subject Details (p. 3203) Legacy Code: 300995
This subject focuses on general power quality phenomena, how to define them, locate their sources and how to apply mitigation techniques. Through independent learning and teamwork on real world case studies, and by incorporating current standards and practices, students will develop skills to simulate and analyse power quality events. The skills developed in this subject will benefit students who are looking to incorporate sustainable and renewable energy solutions into their engineering career pathways.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 4004 Radio and Satellite Communication (10 Credit Points)
Subject Details (p. 3204) Legacy Code: 300489
This subject is offered in alternate years. This subject will develop an understanding of the theory and practice of radio and satellite communication techniques and measurements and provide an introduction to space communication systems. It will complement the general communication engineering units, addressing advanced topics important and specific to radio and satellite communications.
Level: Undergraduate Level 4 subject
Pre-requisite(s): ELEC 3001 OR
ELEC 4001
Equivalent Subjects: LGYA 3699 - Satellite Communication
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 4005 Smart Grids and Distributed Generation (10 Credit Points)
Subject Details (p. 3205) Legacy Code: 300996
This subject is designed to model, analyse and control of newly developing areas of distributed generation and smart grids. The subject will cover modelling, control, simulation and protection of such systems. The subject will cover the impacts of renewable sources and power electronics on the operation of smart grids and micro-grids. The subject will also cover environmental and economic impacts of such systems.
Level: Undergraduate Level 4 subject
Pre-requisite(s): ELEC 3009
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 4006 Sustainable Energy Systems (10 Credit Points)
Subject Details (p. 3205) Legacy Code: 300998
This subject prepares engineering students to work in the area of renewable energy systems and to be knowledgeable and be in a position to appraise environmental, social, legal, economic and political issues concerned with renewable energy systems.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 4007 Wireless Communications (10 Credit Points)
Subject Details (p. 3206) Legacy Code: 300065
The subject covers the analysis, design and operation of modern wireless communication systems. The primary focus is on the physical layer and hardware, emphasizing the fundamentals of coding and modulation, spread spectrum and multiple access techniques. Current wireless architectures and mobile communication systems are also covered.
Level: Undergraduate Level 4 subject
Pre-requisite(s): ELEC 3001 OR
ELEC 3002
Equivalent Subjects: LGYA 5692 - Digital Communication Engineering
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 4008 Electrical Drives (10 Credit Points)
Subject Details (p. 3207)
Electrical drives are electromechanical systems which enable electrical machines to function. Through theoretical analyses and practical laboratory exercises, students analyse and evaluate electrical machines and drives as well as examine various types of electrical motors and drive systems, their applications and control. Students conduct experiments on speed control, starting and braking systems, and dynamics of electric motors. These activities comprise essential knowledge and skills for students to be competent in the area of power engineering.
Level: Undergraduate Level 4 subject
Pre-requisite(s): ELEC 3006
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 4009 Instrumentation and Measurement (10 Credit Points)
Subject Details (p. 3207)
Through practical exercises students will engage with engineering measurement and instrumentation systems. Students determine the most appropriate measurement method and instrument, such as multimeters, digital oscilloscopes and interfacing modules, for particular applications. They will gain experience with the measurement of physical quantities and the instrumentation required to accurately present information to a controller. Additionally, transducers used to measure common physical quantities are presented in detail, while instrumentation includes a detailed analysis of zero-span circuits, Wheatstone bridges, instrumentation amplifiers, isolation amplifiers, voltage-to-current and voltage-to-frequency modules used for faithful signal transmission, digital-to-analogue and analogue-to-digital circuits to deepen student learning.
Level: Undergraduate Level 4 subject
Pre-requisite(s): ELEC 2001 OR
ENGR 2001
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 6001 Applied Project in Neuromorphic Engineering (40 Credit Points)
Subject Details (p. 3208) Legacy Code: 800235
This 40 credit point semester-long subject provides a capstone experience to students enrolled in the Master of Applied Neuromorphic Engineering. Students work on an industry-oriented project with practical application and outcome. Having the intention to go into industry, this subject provides opportunities for students to explore a relevant problem that can be completed in one semester. Students will gain valuable experience and industry insights.
Level: Postgraduate Coursework Level 6 subject
Pre-requisite(s): INFO 7001 AND
ELEC 6003 AND
COMP 6001 AND
COMP 6002
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 6002 Master Dissertation in Neuromorphic Engineering (80 Credit Points)
Subject Details (p. 3209) Legacy Code: 800234
This is a 80 credit point year-long subject taken over two terms (40 credit points in each term). This subject is offered exclusively on campus for students to benefit from mentorships and regular interactions with leading researchers in the field. Students will have the opportunity to contribute towards impactful research projects, aiming at academic growth and progress. To achieve this goal, the Dissertation subject is designed for students to plan and execute a research-based project in the area of Neuromorphic Engineering. The main task in the year-long 80 credit point dissertation subject is an academic research paper that meets publishing standards and is peer-reviewed by external reviewers (getting the article published on a journal is not a completion requirement to the unit). The students shall be part of regular International Center for Neuromorphic Systems (ICNS) interactions, and benefit from supervisors in a discursive setting as the candidate makes progress.
Level: Postgraduate Coursework Level 6 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 6003 Neuromorphic Accelerators (10 Credit Points)
Subject Details (p. 3210) Legacy Code: 800231
Problem-oriented thinking and distributed system design are essential for neuromorphic engineers. This subject is designed to provide students with sufficient understanding to neuromorphic processor. Students will be able to implement spiking neural networks by programming neuromorphic processors The lab work and programming assignments focus on different key aspects of programming neuromorphic processor: Neural modelling, Python programming, debugging code and hardware/software co-simulation. The workshops focus on the concrete implementation of neural networks.
Level: Postgraduate Coursework Level 6 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 6004 Neuromorphic Electronics Design (10 Credit Points)
Subject Details (p. 3210) Legacy Code: 800229
Efficient, parallel, low-power computation is a hallmark of brain computation and the goal of neuromorphic engineering. The focus of this subject is to design, implement and test accurate, electronic, very large scale integrated (VLSI) circuit model of neural systems and the associated signal processing. Students will have opportunities to design and build a neural system on hardware and gain resultant insights into applying neuromorphic engineering to real-world problems. This subject will be undertaken at Parramatta City - Hassall St campus.
Level: Postgraduate Coursework Level 6 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 6005 Applied Project in Neuromorphic Engineering (Part-time) (40 Credit Points)
Subject Details (p. 3211)
This 40-credit point year-long subject over two semesters (20 credit points each semester) provides a capstone experience to students enrolled in the Master of Applied Neuromorphic Engineering (in the part-time offering). Students work on an industry-oriented project that has a practical application and outcome. Having the intention to go into industry, this subject provides opportunities for students to explore a relevant problem that can be completed in one year. Students will gain valuable experience and industry insights.
Level: Postgraduate Coursework Level 6 subject
Pre-requisite(s): INFO 7001 - Advanced Machine Learning
ELEC 6003 - Neuromorphic Accelerators
COMP 6001 - Neuromorphic Algorithms and Computation
COMP 6002 - Neuromorphic Sensing
Equivalent Subjects: ELEC 6001 - Applied Project in Neuromorphic Engineering
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 7001 Advanced Control Systems (10 Credit Points)
Subject Details (p. 3212) Legacy Code: 300603
This subject covers continuous and discrete control systems. It reviews and builds on the fundamental concepts of the theory of feedback in continuous and discrete time to examine the analysis and design of advanced continuous and discrete time linear control systems. Transfer function and state variable methods are employed. Instruction makes use of extensive experimental tasks. There is also considerable use of Matlab simulations.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: LGYA 5850 - Digital Control LGYA 5813 - Advanced Control Systems
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 7002 Advanced Data Networks (10 Credit Points)
Subject Details (p. 3213) Legacy Code: 300173
This subject covers all major network technologies: asynchronous transfer mode (ATM), Internet, and telephony. Essential networking topics such as protocol layering, multiple access, switching, scheduling, routing, congestion control, error and flow control, and network security are covered in detail. An engineering approach is taken to provide insight into network design.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 7003 Advanced Electrical Machines and Drives (10 Credit Points)
Subject Details (p. 3214) Legacy Code: 300601
The subject covers various types of electrical motors and drive systems, their applications and control. The subject aims to introduce an advanced study of electrical machines and drives. It also covers application considerations and modern developments in high performance drive systems. This course covers various types of the speed control, the starting, the braking and the dynamics of different electrical machines and drives.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: LGYA 5847 - Variable Speed Electric Drives LGYA 5844 - Special Electrical Machines
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 7004 Advanced Power Quality (10 Credit Points)
Subject Details (p. 3214) Legacy Code: 301025
This subject is to introduce students to power quality phenomena such as voltage sag/swell, distortions, unbalance, and flicker that occur in power systems. The subject also introduces terms and definitions associated with power quality, following which each phenomenon, that is, voltage sag/swell, transient overvoltage, and harmonics. In addition, flicker is presented and discussed in detail for students to understand the sources and impact of these occurrences on power system as well as typical mitigation techniques. Finally, students are introduced to power quality benchmarking, monitoring, assessment. In addition Advanced knowledge on network frequency responses is presented.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 7005 Advanced Signal Processing (10 Credit Points)
Subject Details (p. 3215) Legacy Code: 300596
This subject covers the principles and techniques in signal processing. The subject matter includes advanced topics in discrete-time signals and systems, the z-transform and its applications in signal processing, advanced topics in the sampling of continuous-time signals, FIR and IIR filter design, filter structures, and the discrete Fourier transform and its computation. Students develop skills of analysing and designing digital signal processing systems.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 5840 - Signal Processing 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 7006 Advanced Smart Grids and Distributed Generation (10 Credit Points)
Subject Details (p. 3216) Legacy Code: 301026
This subject is designed to model, analyse and control of newly developing areas of distributed generation and smart grids. The subject will cover modelling, control, simulation and protection of such systems. The subject will also cover the impacts of renewable sources and power electronics on the operation of smart grids and micro-grids. The subject will also cover environmental and economic impacts of such systems.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 7008 Instrumentation and Measurement (PG) (10 Credit Points)
Subject Details (p. 3217) Legacy Code: 300515
This subject covers topics associated with the measurement and presentation of physical parameters. A wide range of transducers are presented in detail, while instrumentation includes a detailed analysis of a multitude of analogue and digital circuits used to amplify, transmit, and display electrical signals. The application of these modules in modern measurement equipment is presented in details.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 7009 Personal Communication Systems (10 Credit Points)
Subject Details (p. 3217) Legacy Code: 300196
This subject covers the design fundamentals of cellular systems, including frequency reuse, channel assignments, radio wave propagation in mobile environments, modulation techniques, coding techniques, spread spectrum and multiple access. It includes topics from emerging wireless technologies, and third-generation mobile communication systems and standards.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 7010 Power System Planning and Economics (10 Credit Points)
Subject Details (p. 3218) Legacy Code: 300197
This subject covers planning techniques for energy and electrical power systems. It also covers the economics of various options and reliability of electrical power systems.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 9001 Higher Degree Research Thesis - Engineering (Computer) (80 Credit Points)
Subject Details (p. 3219) Legacy Code: 800053
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 9002 Higher Degree Research Thesis - Engineering (Electrical) (80 Credit Points)
Subject Details (p. 3219) Legacy Code: 800051
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 9003 Higher Degree Research Thesis - Engineering (Mechatronic) (80 Credit Points)
Subject Details (p. 3220) Legacy Code: 800057
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ELEC 9004 Higher Degree Research Thesis - Engineering (Telecommunications) (80 Credit Points)
Subject Details (p. 3220) Legacy Code: 800055
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

Environmental Studies (ENVL)

ENVL 1001 Understanding Landscape (10 Credit Points)
Subject Details (p. 3333) Legacy Code: 300812
This subject explores the historical and cultural perceptions and perspectives of the term 'landscape' and the sustainability and management of landscapes. Students become familiar with the terminology and concepts surrounding the natural landscape experientially through a series of field trips and develop an awareness and appreciation of both of the conceptual and actual landscape issues. Skills in mapping and spatial awareness skills and technologies will be developed through field trips and workshop sessions including GIS. Such skills will assist in developing a capacity to comprehensively describe and analyse the landscape.
Level: Undergraduate Level 1 subject
Equivalent Subjects: LGYA 6199 - Understanding Landscape LGYB 9526 - Understanding Landscape
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENVL 1002 Environmental Issues and Solutions (10 Credit Points)
Subject Details (p. 3334) Legacy Code: 301271
This subject explores a variety of environmental issues with a focus on emerging environmental issues. The relationships between human health and environmental health are explored through a number of case studies. Concepts explored include 21st Century contaminants, noise, energy and water. Through a combination of case studies and practical field experience, students will develop the skills and knowledge appropriate to develop solutions to a variety of environmental issues. Students enrolled in the Undergraduate Certificate in Environmental Sustainability will not complete the practical field experience component of this subject, as they will be studying online.
Level: Undergraduate Level 1 subject
Equivalent Subjects: PUBH 1002 Environment and Health
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENVL 1003 Environmental Issues and Solutions (WSTC) (10 Credit Points)
Subject Details (p. 3335) Legacy Code: 700296
This subject explores a variety of environmental issues with a focus on emerging environmental issues. The relationships between human health and environmental health are explored through a number of case studies. Concepts explored include 21st Century contaminants, noise, energy and water. Through a combination of case studies and practical field experience, students will develop the skills and knowledge appropriate to develop solutions to a variety of environmental issues.
Level: Undergraduate Level 1 subject
Equivalent Subjects: PUBH 1002 Environment and Health
ENVL 1002 Environmental Issues and Solutions
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENVL 1004 Introduction to Environmental Science (10 Credit Points)
Subject Details (p. 3335) Legacy Code: 301407
Students learn how biology, chemistry and the physical sciences interact to regulate environmental processes in natural and built environments. They will evaluate concepts of sustainability and resilience and apply these perspectives to understand how human actions can alter the natural world. Students will use interdisciplinary approaches, including field studies, to investigate environmental processes and evaluate specific environmental challenges. Local and global environmental issues, sustainability, resilience and stewardship will be explored across diverse social and ecological contexts.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENVL 1005 Environmental Issues and Solutions (UG Cert) (10 Credit Points)
Subject Details (p. 3336) Legacy Code: 500053
This subject explores a variety of environmental issues with a focus on emerging environmental issues. The relationships between human health and environmental health are explored through a number of case studies. Concepts explored include 21st Century contaminants, noise, energy and water. Through a combination of case studies and practical field experience, students will develop the skills and knowledge appropriate to develop solutions to a variety of environmental issues.
Level: Undergraduate Level 1 subject
Equivalent Subjects: PUBH 1002 Environment and Health ENVL 1003 Environmental issues and Solutions ENVL 1002 Environmental issues and Solutions
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENVL 1006 Environmental Health Issues and Solutions (10 Credit Points)
Subject Details (p. 3337)
This subject explores the interdependent nature of human health and that of the environment, both natural and urban. Concepts explored include 21st Century contaminants, noise, energy and water. Through a combination of case studies and practical field experience, students will develop the skills and knowledge appropriate to develop solutions to a variety of environmental health issues.
Level: Undergraduate Level 1 subject
Equivalent Subjects: PUBH 1002 - Environment and Health
ENVL 1002 - Environmental Issues and Solutions
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENVL 1007 Environmental Health Issues and Solutions (WSTC) (10 Credit Points)
Subject Details (p. 3337)
This subject explores the interdependent nature of human health and that of the environment, both natural and urban. Concepts explored include 21st Century contaminants, noise, energy and water. Through a combination of case studies and practical field experience, students will develop the skills and knowledge appropriate to develop solutions to a variety of environmental health issues.
Level: Undergraduate Level 1 subject
Equivalent Subjects: ENVL 1003 Environmental Issues and Solutions (WSTC)
ENVL 1006 Environmental Health Issues and Solutions
PUBH 1002 Environment and Health
ENVL 1002 Environmental Issues and Solutions
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENVL 2001 Analysis of Spatial Data (10 Credit Points)
Subject Details (p. 3338) Legacy Code: 101646
The making and the use of maps. This subject involves the critical examination of the way geographical data is produced, analysed, mapped and used to inform both private and public decisions. Natural environment, health, accessibility and residential amenity are examples of phenomena that have an important geographical dimension. Policy responses to these phenomena need to be specific with regard to locations and places. Geographic information systems software and census will be used to produce maps based on the analysis and interpretation of data relating to the student's field of interest.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYA 7235 - Analysis of Spatial Data
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENVL 2002 Environmental Regulation and Policy (10 Credit Points)
Subject Details (p. 3339) Legacy Code: 300841
This subject aims to provide students with a broad understanding of the current environmental regulations available to environment protection and planning authorities at the State and Local Government level to protect and manage the natural and built environments. This subject will also consider environmental policy introduced by the State and Commonwealth governments to manage land use activities so as to encourage sustainable development practices. It is a suitable subject for students entering government or industry in environmental management, health and planning roles. There is a particular focus on the use of legislation and preparation of policy to address environmental and health risks to the community.
Level: Undergraduate Level 2 subject
Equivalent Subjects: ENVL 3001 - Environmental Regulations and Policy
ENVL 3002 - Environmental Regulations
ENVL 3010 - Environmental Planning Policy Regulation
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENVL 2003 Landuse and the Environment (10 Credit Points)
Subject Details (p. 3339) Legacy Code: 300875
This subject will assist students develop a sound framework for the analysis of land use and its interactions with the environment. The skills gained will assist in the evaluation of land use at various levels from household to international level. Particular emphasis will be placed on students gaining a sound conceptual framework from which to examine sustainability at the environmental, economic, social, and production levels. Emphasis will be placed on the use of ecological footprinting as a tool.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYA 6188 - Landuse and the Environment
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENVL 2005 Internet of Things for the Environment (10 Credit Points)
Subject Details (p. 3340) Legacy Code: 301275
Internet of things (IoT) is about connecting platforms to internet for monitoring, managing and controlling them. Simply put, IoT can make 'dumb' things 'smart' by connecting them to the Internet and sensors. This results in improved efficiency of data collection, accuracy and decision making. The applications of IoT is rapidly expanding in environmental science and management, and the topics in this subject will cover aspects of IoT for water, air and noise pollution monitoring, extreme weather warning, river water flow monitoring, water quality management, irrigation management, flora and fauna monitoring, broadacre agriculture, protected cropping, biodiversity, ecosystems health, wildlife and more.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENVL 2006 Environmental Planning and Climate Change (10 Credit Points)
Subject Details (p. 3340) Legacy Code: 301390
This subject is an introduction to environmental planning in local and state government and in particular the role of planning in protecting the natural environment, enhancing population health and/or encouraging sustainable development practices. Students focus on goal-setting for environmental protection and then explore how planning policy can assist with achieving these goals. Current metropolitan planning and strategy is examined using the Metropolitan Strategy for Sydney as the primary case study. The subject scopes environmental planning policies introduced by state, local and Commonwealth governments to adapt to climate induced impacts on the environment and on community health and well being.
Level: Undergraduate Level 2 subject
Equivalent Subjects: PUBH 3009 - Environmental Planning PUBH 2008 - Environmental Planning Climate Change
Incompatible Subjects: NATS 2020 - Healthy Built Environments
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENVL 2007 Environmental Monitoring and Assessment (10 Credit Points)
Subject Details (p. 3341) Legacy Code: 301408
n this subject, you will develop the practical skills and underlying scientific knowledge required to address environmental questions across natural and built environments. Through practicals, workshops, and an independent research project you will learn how to design a monitoring and assessment program to characterise different environment situations, interpret data and propose management solutions to contemporary environmental challenges. The subject will introduce a range of topics, including the application of geographic information systems (GIS), remote sensing methodologies, environmental sensors, the internet of things and citizen science approaches to understand and improve environmental situations, and provides opportunities to research a chosen, real-world topic to assess an aspect of environmental sustainability.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENVL 2008 Australian Ecosystems: Threats and Solutions (10 Credit Points)
Subject Details (p. 3342)
Australian ecosystems are home to a unique and diverse set of plants and animals. This diversity underpins healthy functioning and resilience of our ecosystems, yet is under threat from habitat degradation, pollution, invasive species and climate change. In this subject you will be introduced to different Australian vegetation communities and explore interactions with soil, animals and climate. You will learn how environmental threats and disturbances affect Australian ecosystems and be introduced to the principles of ecosystem conservation and policy. Practicals include a mix of field- and lab-based activities to develop job-ready skills such as surveying and identifying ecological communities.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENVL 2009 Ecosystem Restoration (10 Credit Points)
Subject Details (p. 3342)
Ecosystem Restoration will cover the most widely used and successful management strategies employed to conserve and restore native species and communities facing land degradation and major threats. This subject will cover policy requirements and active management strategies involved in rewilding, ecological restoration, reintroductions, translocations, and their implementation at local, national and global levels. You will explore the full range of concepts and tools for conservation management. This subject will focus on restoration and conservation from individuals to landscapes. Indigenous and industry groups will guide workshop discussions. Its focus is ecological, although consideration is also given to socio-economic factors that influence restoration programs.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENVL 2010 Conservation Priorities and Process (10 Credit Points)
Subject Details (p. 3343)
Conservation Priorities and Practice examines the procedures involved in real world conservation interventions and their impact on biodiversity. You will develop the skills to assess the threatened status of species and ecosystems, and how decisions are made to prioritise resource allocation. You will be encouraged to think about conservation recovery plans in state, national, and international policy and governance frameworks. You will assess how conservation outcomes are managed on different land holdings such as private land including on farms (agroecology) and how biodiversity offsetting is applied. You will build a cross-disciplinary awareness of biodiversity conservation practices and how to engage with diverse interest groups.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENVL 3003 Environmental Risk Management (10 Credit Points)
Subject Details (p. 3344) Legacy Code: 300858
This subject examines the world of environmental risk management and will introduce students to environmental management systems including Environmental Impact Assessment and Environmental Auditing. The subject considers and examines the application of the precautionary principle in real world situations. Students will also be introduced to methods of quantitative risk assessment as applied to environmental and agricultural risks such as urban, peri-urban and rural growth; industrial and agricultural land use; contaminated land, and climate change.
Level: Undergraduate Level 3 subject
Equivalent Subjects: ENVL 3004 - Environment Risk Management LGYA 6128 - Agriculture Risk
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENVL 3005 Planning the City: Development, Community and Systems (10 Credit Points)
Subject Details (p. 3344) Legacy Code: 101593
This subject aims to provide students with a fundamental understanding of the role of government, focusing on the role and nature of planning across all levels of government from a variety of theoretical frameworks. It presents a critical examination of the urban development and planning processes, with particular attention given to the environmental and political issues associated with planning at the local government level. It looks at the changes and challenges confronting local government in view of the demands made on them by the changing social and economic conditions and societal values such as those relating to requirements for public participation, transparency and accountability. The subject also examines the role of private sector in planning and assessment processes.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENVL 3006 Transport, Access and Equity (10 Credit Points)
Subject Details (p. 3345) Legacy Code: 101645
This subject examines the equity and efficiency issues in the provision of transport in cities and regions from a critical social science perspective. Issues of transport disadvantage and policy and planning responses to improve access to urban services are examined. The social and environmental impact of transport systems are considered in the context of urban management.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 7234 - Transport Access and Equity
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENVL 3007 Urban Environment (10 Credit Points)
Subject Details (p. 3346) Legacy Code: 300860
This subject explores the relationships between community, the natural environment and government within an urban context through considering how housing and urban development can influence population health. Concepts explored include "healthy housing", "active living" "safety by design" and "energy efficiency". Through a combination of case studies and practical field experience, students will develop the skills and knowledge appropriate to assessing the "healthiness" and sustainability of urban environments. The subject examines methods of construction and building regulation aimed at the preservation of health and amenity.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 6254 - Urban Environment
Incompatible Subjects: LGYB 9943 - Environmental Health Law ARCH 3007 - Urban Development Systems NATS 2020 - Healthy Built Environments
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENVL 3009 Air Quality and Climate Change (10 Credit Points)
Subject Details (p. 3346) Legacy Code: 301391
Deteriorating air quality and climate change are two major challenges facing humanity and threatening environmental sustainability and human health. As such, air quality and climate change are of International, National, State and local community concern. This subject critically analyses the many issues that relate to air pollution, including its nature, extent, impacts and monitoring. Students will examine an air pollution issue of their choice.
Level: Undergraduate Level 3 subject
Equivalent Subjects: PUBH 3001 - Air Quality and Climate Change LGYA 6192 - Air Quality Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENVL 3010 Environmental Planning, Policy & Regulation (10 Credit Points)
Subject Details (p. 3347) Legacy Code: 301403
This subject is an introduction to environmental planning and environmental regulations in local and state governments. It covers the role of planning and enforcement of regulations in protecting the natural environment, enhancing public health and/or encouraging sustainable development practices. Students become familiar with the key legislation for environmental protection and then explore how planning and regulations can assist with achieving optimal environmental outcomes. Current planning and regulations are examined using urban development and planning in Sydney as the primary case study. The subject includes key environmental planning policies and important legislation used by state, local and Commonwealth governments to protect the natural and built environment and to protect public health.
Level: Undergraduate Level 3 subject
Equivalent Subjects: PUBH 2007 Environmental Planning and Climate Change
ENVL 2002 Environmental Regulations and Policy
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENVL 7002 Planning and Environmental Regulation (10 Credit Points)
Subject Details (p. 3348) Legacy Code: 101634
This subject provides students with an understanding of the planning process from both a state and local government perspective. The subject will cover concepts related to the planning process, focusing on development control and regulation issues, planning instruments and development applications. It will also address the areas of planning and environment law, with specific reference to the legal framework that regulates planning and development in NSW.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENVL 7003 Urban Research Report (10 Credit Points)
Subject Details (p. 3349) Legacy Code: 101637
This capstone subject requires students to write a 5,000 word comprehensive research report on a local or international urban planning issue. Students will select a research topic of individual interest, and work to assemble a range of evidence to address the research question. This facilitates an opportunity for students to apply their skills and knowledge acquired in the Master's program, through a high level of work and quality engagement in an authentic and professional context.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 1299 - Urban Management Placement Thesis
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENVL 9001 Higher Degree Research Thesis - Environmental Studies (80 Credit Points)
Subject Details (p. 3349) Legacy Code: 800067
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

Food and Hospitality (HOSP)

HOSP 3001 Approved Industrial Experience (400 Hrs) (0 Credit Points)
Subject Details (p. 3482) Legacy Code: HS305A
This is a "Work Experience in Industry" subject, for which no student contribution or fee is charged. Enrolment in the subject will not consume Student Learning Entitlement (SLE). Students in the Bachelor of Hospitality Management are required to obtain at least 400 hours, vocationally relevant, industrial experience during their program of study.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

General Education Programs (GEDU)

GEDU 0001 Tertiary Study Skills in Arts (WSTC Prep) (0 Credit Points)
Subject Details (p. 3373) Legacy Code: 700165
This subject is designed to assist students to become successful independent reflective learners. It introduces students to a range of theories and concepts to facilitate the development of practical skills and personal attitudes necessary for success in tertiary study.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

GEDU 0002 Tertiary Study Skills in Business (WSTC Prep) (0 Credit Points)
Subject Details (p. 3373) Legacy Code: 700247
This subject is designed to assist students to become successful independent reflective learners. It introduces students to a range of theories and concepts to facilitate the development of practical skills and personal attitudes necessary for success in tertiary study.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

GEDU 0005 Tertiary Study Skills in Construction Management (WSTC Prep) (0 Credit Points)
Subject Details (p. 3373) Legacy Code: 700167
This subject is designed to assist students to become successful independent, reflective, lifelong learners. It introduces students to a range of theories and concepts to facilitate the development of practical skills and personal attitudes necessary for success in tertiary study and the workplace.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

GEDU 0006 Tertiary Study Skills in Criminal and Community Justice (WSTC Prep) (0 Credit Points)
Subject Details (p. 3374) Legacy Code: 700168
This subject is designed to assist students to become successful independent reflective learners. It introduces students to a range of theories and concepts to facilitate the development of practical skills and personal attitudes necessary for success in tertiary study.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

GEDU 0007 Tertiary Study Skills in Design (WSTC Prep) (0 Credit Points)
Subject Details (p. 3375) Legacy Code: 700177
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

GEDU 0008 Tertiary Study Skills in Engineering (WSTC Prep) (0 Credit Points)
Subject Details (p. 3375) Legacy Code: 700169
This subject is designed to assist students to become successful independent reflective learners. It introduces students to a range of theories and concepts to facilitate the development of practical skills and personal attitudes necessary for success in tertiary study.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

GEDU 0009 Tertiary Study Skills in Health Science (WSTC Prep) (0 Credit Points)
Subject Details (p. 3376) Legacy Code: 700170
This subject is designed to assist students to become successful independent reflective learners. It introduces students to a range of theories and concepts to facilitate the development of practical skills and personal attitudes necessary for success in tertiary study.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

GEDU 0010 Tertiary Study Skills in Information and Communications Technology (WSTC Prep) (0 Credit Points)
Subject Details (p. 3377) Legacy Code: 700171
This subject is designed to assist students to become successful independent reflective learners. It introduces students to a range of theories and concepts to facilitate the development of practical skills and personal attitudes necessary for success in tertiary study.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

GEDU 0011 Tertiary Study Skills in Islamic Studies (WSTC Prep) (0 Credit Points)
Subject Details (p. 3377) Legacy Code: 700164
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

GEDU 0012 Tertiary Study Skills in Legal Studies (WSTC Prep) (0 Credit Points)
Subject Details (p. 3378) Legacy Code: 700172
This subject is designed to assist students to become successful independent reflective learners. It introduces students to a range of theories and concepts to facilitate the development of practical skills and personal attitudes necessary for success in tertiary study.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

GEDU 0013 Tertiary Study Skills in Science (WSTC Prep) (0 Credit Points)
Subject Details (p. 3378) Legacy Code: 700173
This subject is designed to assist students to become successful independent reflective learners. It introduces students to a range of theories and concepts to facilitate the development of practical skills and personal attitudes necessary for success in tertiary study and beyond.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

GEDU 0014 Tertiary Study Skills in Social Science (Policing) (WSTC Prep) (0 Credit Points)
Subject Details (p. 3378) Legacy Code: 700175
This subject is designed to assist students to become successful independent reflective learners. It introduces students to a range of theories and concepts to facilitate the development of practical skills and personal attitudes necessary for success in tertiary study.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

GEDU 0015 Tertiary Study Skills in Social Science (WSTC Prep) (0 Credit Points)
Subject Details (p. 3379) Legacy Code: 700174
This subject is designed to assist students to become successful independent reflective learners. It introduces students to a range of theories and concepts to facilitate the development of practical skills and personal attitudes necessary for success in tertiary study.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

GEDU 0016 Employability and Graduate Success (WSTC Prep)
Subject Details (p. 3380)
This subject is designed to complement the first six months of study in a College Diploma program by developing the skills required to be successful at University and beyond. The subject is delivered online with students accessing learning modules and connecting with their learner community in their own time and at their own pace to allow maximum flexibility. At the beginning of the subject students use diagnostic tools to identify their specific strengths and areas for improvement, and develop an individualised learning journey through the content. This learning journey will help to address individual study skill needs, while also developing employability skills, facilitating connection with peers and with the University community, as well as the student's future career.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

GEDU 0017 Transition Success (WSTC Prep)
Subject Details (p. 3380)
This subject is designed to assist students to take the next step in their academic development by helping them build higher level reflective skills that will allow them to critically consider their own learning and professional journey and make the adjustments required to achieve their goals. Students will begin to take ownership of their learning by developing proactive strategies that will allow them to study on their own terms. Students will begin engaging with their intended profession and reflect on the skills, attributes and qualifications that will be required to reach their goals. Students will also develop a transition plan to help them navigate the next steps in their academic journey so that they can identify the challenges they might encounter as they move forward, and develop the skills to overcome them.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

GEDU 1001 Introduction to University Life (WSTC) (10 Credit Points)
Subject Details (p. 3381)
This subject introduces students to university culture and life, and explores a range of skills, attributes and behaviours that will gear students for success in their first year of tertiary study. A range of topics will be covered to facilitate increased confidence in students as they embark upon their university journey, as well as enhance students' capacities to engaging critically and actively in their chosen field of study. This subject will equip students with a range of academic study skills, research techniques and multi-literacies, and support students to develop their own individualised learning model, personal learning objectives and academic capacities. Academic integrity is further positioned as a critical component of university life and this subject will prepare students to engage effectively in their future professional fields and as active citizens.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

GEDU 1002 Core Foundations and Key Ideas (WSTC) (10 Credit Points)
Subject Details (p. 3382)
This subject will support students across a range of Diplomas in Humanities, Arts and Social Sciences to gain foundational knowledge and capacities relevant to their future studies. The subject will enable students to begin actively engaging with the foundation theories and contemporary issues and controversies from a selected discipline area for future professional application. Students will learn about the discipline and professional pathways that are specific to their diploma area, and be introduced to how these might intersect with other disciplines in a changing tertiary education and societal context. Students will also enhance and further demonstrate foundational university research and communication skills.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

Geomatic Engineering (GEOM)

GEOM 3001 Advanced Building Measurement (10 Credit Points)
Subject Details (p. 3384) Legacy Code: 301233
This subject is designed to help students develop greater understanding of measurement for complex building works such as commercial and industrial construction. Students will be introduced to measurement used in specialised trades, such as building services and structural steel.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

Graphic and Design (DESN)

DESN 0001 Design Practice (WSTC Prep) (10 Credit Points)
Subject Details (p. 3103) Legacy Code: 700223
Design Practice introduces students to the fundamental principles of graphic design practice. This subject investigates how the design process is applied to real-world industry design briefs to create a visual design. Students develop an understanding of the processes and practices used to support collaboration between clients, designers and specialists when designing and producing visual communications. Students are guided through the process of interpreting a design brief, creating and pitching a design response, presenting work for critique, incorporating critique into a design solution and producing highly refined design outcomes to a professional standard. Students work on a number of design briefs using industry standard work practices, including time management strategies, multi-tasking, strict delivery deadlines, brief comprehension and job documentation as well as client/designer coordination and negotiation.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

DESN 0002 The Design Process (WSTC Prep) (10 Credit Points)
Subject Details (p. 3104) Legacy Code: 700197
The Design Process introduces the elements and principles of design as well as design processes and methods required to explore and creatively apply the design process. The Design Process focuses on the skills and concepts that contribute to interpreting and responding to design briefs, as well as researching, developing and presenting innovative design solutions. The core of any design process is the design brief. The Design Process acknowledges the importance of this and how it informs relationships between the client, designer and specialists engaged to develop the design process. The subject addresses the purpose, sequence, major stages and application of the design process to synthesise solutions relevant to the design industry.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

DESN 0003 Critical Thought in Design (WSTC Prep) (10 Credit Points)
Subject Details (p. 3105) Legacy Code: 700321
Critical Thought in Design provides students with an understanding of the process designers use to structure their thinking and communicate ideas with clients, target audiences, other designers and specialists. The ability to think critically, creatively and independently is essential for success as a designer in generating and communicating innovative design solutions that meet the needs of the client and target audience. The aim of this subject is to provide students with the skills and techniques necessary to become an independent thinker able to research, analyse, argue and communicate effectively with clients. The subject examines a wide range of critical thinking and design, problem-solving methods including problem definition techniques, idea generation, brainstorming, as well as evaluation and analysis skills.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

DESN 1003 Design Histories and Futures (10 Credit Points)
Subject Details (p. 3106) Legacy Code: 102262
This subject introduces students to historical accounts and theories of design from the dominant perspective of Modernism in the first half of the 20th century, through post-war consumerism and the ensuing movements of the 20th century, such as Postmodernism, Punk and New Wave; design reactions to corporate culture, design for change and activism; and the digital design enablers of the 21st century. Students learn a contextual history of 20th century design practice by studying the doctrines around which the modernist movement cohered, and the conditions under which these doctrines are challenged by later movements. The subject explores various roles of the visual designer through history-avant-garde, futurist, revolutionary, utopian design; client-service design; social activism, producer and digital enabler. These roles are expressed across a range of design outcomes such as photography, typography, illustration, print media, graphics, digital design, film and animation. Part of this exploration will examine the impacts of design histories on our past, present and future conditions, as well as changing the future for design. Students will complete visual and writing tasks that aim to build their understanding of design histories and futures, and scholarship in academic research and writing.
Level: Undergraduate Level 1 subject
Equivalent Subjects: DESN 1001 - 20th Century Design Histories DESN 1004 - Design Histories and Futures (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

DESN 1004 Design Histories and Futures (WSTC) (10 Credit Points)
Subject Details (p. 3107) Legacy Code: 700195
This subject introduces students to historical accounts and theories of design from two dominant perspectives, modernism and postmodernism. Students learn a contextual history of 20th century design practice by studying the doctrines around which the modernist movement cohered and the conditions under which these doctrines are questioned by postmodernism. The subject will explore various roles of the visual designer through history such as the avant gardist, futurist, revolutionary, utopian, client-service designer, social activist, producer and digital enabler, as these roles were expressed across a range of design outcomes such as photography, typography, illustration, print media, graphics, digital design, film and animation over a century and beyond. Part of this exploration will examine the impacts of design histories on our past, present and future conditions, as well as the investments in changing the future for design. Students will complete visual and writing tasks that aim to build their understanding of design histories and futures, and scholarship in academic research and writing.
Level: Undergraduate Level 1 subject
Co-requisite(s): Students enrolled in the combined DiplomaBachelor courses listed below must pass all College Preparatory units listed in the course structure before progressing to the Year Two units
Equivalent Subjects: DESN 1003 - Design Histories and Futures DESN 1001 - 20th Century Design Histories
Restrictions: Please see the Subject Details page for any restrictions for this subject

DESN 1007 Graphic Branding and Identity (20 Credit Points)
Subject Details (p. 3108) Legacy Code: 102264
This subject enables students to further develop their understanding and application of the design process within the field of graphic branding and identity design. Students will interrogate the fundamental principles of branding and explore diverse and creative approaches to branding and visual identity design from concept to outcome. Students' understanding of a design brief, client, competitors and audience will deepen and they will be introduced to some design specific research skills, such as mood board and persona development, which will help them begin to build a toolkit of methods to use throughout their degree. Students will explore the power of storytelling in the creation of compelling brand narratives and explore ways a brand can communicate with an intended audience. Key software will be introduced and supported by online resources, and students will continue to develop their visual design and communication skills in the fundamental areas of typography, image-making and composition.
Level: Undergraduate Level 1 subject
Pre-requisite(s): DESN 1009
Equivalent Subjects: DESN 1008 - Graphic Design Process and Practice (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

DESN 1008 Graphic Design: Process and Practice (WSTC) (20 Credit Points)
Subject Details (p. 3109) Legacy Code: 700194
This subject enables students to further develop their understanding of the design process within the context of project briefs that introduce areas of graphic design practice that include branding and identity and information design. Students' understanding of a design brief, the client and a clearly defined audience will deepen. Students will be introduced to some design specific research skills, such as mood board and persona development, which will help them begin to build a toolkit of methods which they will use throughout their degree. Students will develop their design process and a greater awareness of the role of research in the generation of ideas. Students will be introduced to further lateral thinking techniques and encouraged to develop creative responses to the project briefs within appropriate constraints for both client and audience needs. Further key software will be introduced and supported by online resources and students will continue to develop their visual design skills in the fundamental areas of type, image and composition.
Level: Undergraduate Level 1 subject
Pre-requisite(s): DESN 1010
Co-requisite(s): Course 6013 - Diploma in DesignBachelor of Graphic Design (Pathway to Teaching Secondary)
Course 6011 - Diploma in DesignBachelor of Design (Visual Communication)
Students enrolled in the combined DiplomaBachelor courses listed below must pass all College Preparatory units listed in the course structure before progressing to the Year 2 units
Equivalent Subjects: DESN 1007 - Graphic Design Process and Practice
Restrictions: Please see the Subject Details page for any restrictions for this subject

DESN 1009 Graphic Design: Understanding the Principles (20 Credit Points)
Subject Details (p. 3110) Legacy Code: 102261
This subject introduces students to the fundamental principles of visual language and graphic design practice. Through a series of workshops, exercises and project briefs, students will learn how elements such as colour, composition, text, typography and image can be used to communicate meaning in a variety of contexts. Through the project briefs students will begin to develop their awareness of graphic design as a problem solving activity and apply their understanding of the design process in relation to research skills, idea generation, reflective practice, and both written and verbal communication skills. Students will learn the importance of prototyping, developing and refining their ideas through practice, and aspects of the digital print production process will also be introduced. Students will be introduced to design software packages and to support the ongoing development of their digital media skills they will be provided with access to resources for independent online learning.
Level: Undergraduate Level 1 subject
Equivalent Subjects: DESN 1010 - Graphic Design Understanding the Principles (WSTC)
Incompatible Subjects: DESN 1016 Introduction to Typography DESN 1006 Digital Design Production
Restrictions: Please see the Subject Details page for any restrictions for this subject

DESN 1010 Graphic Design: Understanding the Principles (WSTC) (20 Credit Points)
Subject Details (p. 3111) Legacy Code: 700193
This subject introduces students to the fundamental principles of visual language and graphic design practice. Through a series of workshops, exercises and project briefs, students will learn how elements such as colour, composition, text, typography and image can be used to communicate meaning in a variety of contexts. Through the project briefs, students will begin to develop awareness of graphic design as a problem solving activity and apply their understanding of the design process in relation to research skills, idea generation, reflective practice and both written and verbal communication skills. Students will learn the importance of prototyping, developing and refining their ideas through practice and aspects of the digital print production process will also be introduced. Students will be introduced to design software packages and to support the ongoing development of their digital media skills they will be provided with access to resources for independent online learning.
Level: Undergraduate Level 1 subject
Co-requisite(s): Students enrolled in the combined DiplomaBachelor courses listed below must pass all College Preparatory units listed in the course structure before progressing to the Year 2 units
Equivalent Subjects: DESN 1009 - Graphic Design Understanding the Principles
Incompatible Subjects: DESN 1016 - Introduction to Typography DESN 1006 - Digital Design Production
Restrictions: Please see the Subject Details page for any restrictions for this subject

DESN 1011 Image Design (10 Credit Points)
Subject Details (p. 3113) Legacy Code: 102263
This subject introduces students to photographic image making and applications of photomedia in visual communication design contexts. The experience of image making is covered using the first principles of the photographic medium, camera handling and studio procedures. The principles of visual composition are learnt from the dual perspectives of creating and evaluating photographic and digital imagery, using lens and light-based techniques and methods.
Level: Undergraduate Level 1 subject
Equivalent Subjects: DESN 1013 - Image Design Illustration DESN 1015 - Introduction to Photomedia DESN 1012 - Image Design (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

DESN 1012 Image Design (WSTC) (10 Credit Points)
Subject Details (p. 3114) Legacy Code: 700196
This subject introduces students to the use of signification and metaphor in the visual communication of verbal and written concepts. The process of creating and evaluating images is explored through the principles of visual organisation and the experience of image making through photographic and illustrative methods, techniques and mediums.
Level: Undergraduate Level 1 subject
Co-requisite(s): Students enrolled in the combined DiplomaBachelor courses listed below must pass all College Preparatory units listed in the course structure before progressing to the Year Two units
Equivalent Subjects: DESN 1011 - Image Design DESN 1013 - Image Design Illustration DESN 1015 - Introduction to Photomedia
Restrictions: Please see the Subject Details page for any restrictions for this subject

DESN 1018 Visual Storytelling (10 Credit Points)
Subject Details (p. 3115) Legacy Code: 101921
Visual storytelling is increasingly being used in a variety of contexts including websites, magazines, advertising, business and public affairs, exhibitions and events and television, often working across a number of platforms at the same time as requiring responsive design approaches for a diversity of viewing experiences. With access to increasing amounts and types of data, professional communicators need to be able to extract meaning to connect with a variety of different audiences in creative, dynamic, and emotional ways. This subject introduces students to story archetypes, structure and flow. It encourages metaphorical and anagogical storytelling using appropriation making reference to genre and research. This practical subject explores a range of traditional hands-on techniques and digital software commonly used across the communications sector. Students are encouraged to explore and develop their own mark and image making skills aimed at specific target audiences and communication contexts.
Level: Undergraduate Level 1 subject
Equivalent Subjects: LGYA 2353 - Design Principles 2D3D DESN 1005 - Design Thinking DESN 1019 - Visual Storytelling (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

DESN 1019 Visual Storytelling (WSTC) (10 Credit Points)
Subject Details (p. 3115) Legacy Code: 700183
Visual storytelling is increasingly being used in a variety of contexts including websites, magazines, advertising, business and public affairs, exhibitions and events and television, often working across a number of platforms at the same time as requiring responsive design approaches for a diversity of viewing experiences. With access to increasing amounts and types of data communicators need to be able to extract meaning to connect with a variety of different audiences in creative, dynamic and emotional ways. This subject introduces students to story archetypes, structure and flow. This practical subject explores a range of traditional hands-on techniques and digital software commonly used across the communications sector. Students are encouraged to explore and develop their own mark and image making skills aimed at specific target audiences and communication contexts.
Level: Undergraduate Level 1 subject
Co-requisite(s): Students enrolled in the combined DiplomaBachelor courses listed below must pass all College Preparatory units listed in the course structure before progressing to the Year Two units

Restrictions: Please see the Subject Details page for any restrictions for this subject

DESN 1021 Web and Time-based Design (10 Credit Points)
Subject Details (p. 3116) Legacy Code: 101922
Students will develop fundamental computer software skills and design understandings appropriate to using major web and time based design technologies such as HTML and CSS. They will develop a working understanding of production literacies for online design and time-based design. Students will engage in practical studies of web authoring. Emphasis will be placed on understanding the roles, functions and features of key screen based technologies, design production context for online delivery, current industry best practices, and a working understanding of the responsibilities inherent in the digital design and production process.
Level: Undergraduate Level 1 subject
Equivalent Subjects: DESN 1020 - Web and Time-based Design DESN 1022 - Web and Time-based Design (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

DESN 1022 Web and Time-based Design (WSTC) (10 Credit Points)
Subject Details (p. 3117) Legacy Code: 700187
Students will develop fundamental computer software skills and design understandings appropriate to using major web and time based design technologies such as HTML and CSS. They will develop a working understanding of production literacies for online design and time-based design. Students will engage in practical studies of web authoring. Emphasis will be placed on understanding the roles, functions and features of key screen based technologies, design production context for online delivery, current industry best practices, and a working understanding of the responsibilities inherent in the digital design and production process.

Restrictions: Please see the Subject Details page for any restrictions for this subject

DESN 1023 Visual Media Design (WSTC) (10 Credit Points)
Subject Details (p. 3118)
Professional and emerging visual communicators all share a goal: to create unique imagery that conveys a narrative to meet a design brief. This subject introduces you to photographic image making and applications of photomedia in visual communication design contexts. You will learn practical and theoretical skills that provide you with an understanding of composition, exposure, light, interpreting and responding to a design brief, and constructing a visual narrative. This subject offers a context for you to understand photography by examining the contributions to established historical and contemporary visual communicators. As you advance through the subject, you will investigate and reflect on the components of image design, explore imaginative methods for creating photomedia, and develop your ability to critically assess traditional visual forms of communication. By the end of this subject, you will have developed the skills and ability to create a narrative and visualise the world through images.
Level: Undergraduate Level 1 subject
Equivalent Subjects: DESN 1012
Restrictions: Please see the Subject Details page for any restrictions for this subject

DESN 2001 Australian Design (10 Credit Points)
Subject Details (p. 3118) Legacy Code: 101923
This subject continues the focus on academic and visual literacies for visual communication designers initiated in level one subjects. Students will investigate the Australian visual communication design profession, largely through the documentation of selected output and established methods across industry sectors producing graphic, photographic, illustrative, typographic, broadcast, interactive and online design. Lectures and selected case studies will outline professional scenarios and support the student in learning about the design industry's organisation and methods. Assessment tasks are designed to develop research and writing skills through the evaluation of professional resources and publications.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

DESN 2005 Graphic Design: Interactive Digital Media (20 Credit Points)
Subject Details (p. 3119) Legacy Code: 102265
Digital technology shapes the way we interact with our world. Design of these interactions is a crucial role for today's designers. This subject will develop students' critical interaction and visual design skills in the digital realm, including interface and experience design. Digital design specific research skills, methods and processes are covered. These include user research, persona development, storyboard development, lo-fi and hi-fi prototyping, wireframes and proof of concept methods. Students will engage with problem-based project briefs, and develop solutions that are appropriate for both client and audience needs across a range of devices. Outcomes include app, web and screen designs.
Level: Undergraduate Level 2 subject
Pre-requisite(s): DESN 1021
Restrictions: Please see the Subject Details page for any restrictions for this subject

DESN 2006 Graphic Design: The Professional Context (20 Credit Points)
Subject Details (p. 3120) Legacy Code: 102270
In this subject, students begin to situate their graphic design practice within a contemporary professional context. Designers today need to collaborate with colleagues or other professionals, and the majority of graphic design briefs require solutions that converge across a variety of media platforms and two, three or four dimensions. Students will undertake projects that extend their design thinking in these areas. Part of the subject requires students to work as part of a team, to develop content and a solution that engages the audience through a range of different media. Throughout this subject, students continue to extend their visual language, and associated material and digital skills.
Level: Undergraduate Level 2 subject
Pre-requisite(s): DESN 1007
Restrictions: Please see the Subject Details page for any restrictions for this subject

DESN 2007 Illustrating Narrative (10 Credit Points)
Subject Details (p. 3121) Legacy Code: 101017
This subject explores the design of illustration as a linear narrative and its conceptual, stylistic, and format aspects. Students will create a linear illustrated narrative (12+ page book or equivalent digital format) where they will be encouraged to consider the design of different narrative forms, illustrative techniques, and styles for the target audience, client, context, and genre. Additionally, the subject aims to help students explore and enhance their image-making practices using traditional and digital tools.
Level: Undergraduate Level 2 subject
Pre-requisite(s): DESN 1013 OR
DESN 1011
Equivalent Subjects: LGYA 0045 - Illustrative Narrative 3 and LGYA 0052 - Illustrative Narrative 4
Restrictions: Please see the Subject Details page for any restrictions for this subject

DESN 2011 Motion Design (10 Credit Points)
Subject Details (p. 3121) Legacy Code: 102273
This subject introduces students to the fundamentals of motion design practice. Students will discover how elements of static graphic design can be incorporated with sequence, time, space and sound to enhance the exchange of information and meaning in a variety of project contexts and kinetic media outcomes. Additionally, students will discover the purpose and function of motion design and be able to identify professional pathways associated with these skills and knowledge. Students will be exposed to a range of motion design preproduction and production methods, from fundamentals and guidelines to experimental and expressive approaches. Students will learn the importance of planning, mapping and evaluating linear narrative, in combination with the introduction of key software supported by online video courses, for successful motion design outcomes.
Level: Undergraduate Level 2 subject
Pre-requisite(s): DESN 1021 OR
COMM 2042 OR
COMM 2051 OR
COMM 2051 AND
COMP 2020
Restrictions: Please see the Subject Details page for any restrictions for this subject

DESN 2013 Photomedia: Photographic Practice (10 Credit Points)
Subject Details (p. 3122) Legacy Code: 102268
This subject introduces and examines the multifaceted nature of photographic practice. Students will be introduced to current methods of photographic image production and design for the purpose of Visual Communication. It explores the relationship between photographic technique, genre and the reception of photographic imagery. Students will be introduced to photographic studio practice as the means of controlling image reception, through the intrinsic principles of the photographic medium, including the control of light, exposure in a studio situation and digital post production.
Level: Undergraduate Level 2 subject
Pre-requisite(s): DESN 1015 OR
DESN 1011
Equivalent Subjects: DESN 2012 - Photomedia LGYA 0818 - Designing the Image LGYA 0835 - Photo Documentary LGYA 2354 - Introduction to Photomedia
Restrictions: Please see the Subject Details page for any restrictions for this subject

DESN 2014 Researching the Visual (10 Credit Points)
Subject Details (p. 3123) Legacy Code: 102266
This subject will introduce students to various ways of seeing and reading images in the visual environment. Students will learn how to conduct visual research using a tool kit of methods including semiotic analysis, content and thematic analysis, and basic observational research across the digital and material environments of visual communications design, and to apply their findings in the development of visual concepts. Students will continue to engage as reflective practitioners and learn to position themselves as visual researchers within a particular cultural and personal context.
Level: Undergraduate Level 2 subject
Pre-requisite(s): DESN 1003 OR
DESN 1011 OR
DESN 1021
Restrictions: Please see the Subject Details page for any restrictions for this subject

DESN 2016 Creativity, Design Thinking and Visualisation (10 Credit Points)
Subject Details (p. 3124) Legacy Code: 800237
This cross-disciplinary subject allows students to explore their creative potential and broaden their perspectives of innovation, through the lens of design thinking. Design thinking offers a range of strategic and practical approaches to creativity and innovation, including making use of different 'types of thinking and reflection; leveraging the dynamics of teamwork; and how conversation and dialogue can generate new thinking about complex problems. Students will apply these key ideas methodologies form design thinking and methods of visual communication, to addressing broad social issues in innovative and creative ways.
Level: Undergraduate Level 2 subject
Equivalent Subjects: DESN2002 - Creativity Innovation and Design Thinking
Restrictions: Please see the Subject Details page for any restrictions for this subject

DESN 3001 Contextual Design Studies (10 Credit Points)
Subject Details (p. 3125) Legacy Code: 102275
Contextual design studies is the study of what happens around design practice - before, during and after - to explain its meaning and effect. Successful communication design has always depended on the connection between form, content, audience and context, and the designer's abilities to analyse, understand and clarify the contexts of communication have become more important to creative practice. In this subject students will learn to apply the theoretical frameworks of semiotic, thematic and rhetorical analysis used by the interdisciplinary field of Design Studies to interpret design's potential as cultural expression and communication. Students will analyse visual signs and conventions as both targeted and tacit responses to a range of contexts revealing design's interests in marketplaces, society and identity. Students will analyse various graphic examples, and design literature, as they investigate the significance and agency of design interactions, media artefacts and systems.
Level: Undergraduate Level 3 subject
Pre-requisite(s): DESN 2014
Equivalent Subjects: DESN 2003 - Design Issues
Restrictions: Please see the Subject Details page for any restrictions for this subject

DESN 3002 Data Visualisation (10 Credit Points)
Subject Details (p. 3126) Legacy Code: 102269
We live in an era of data. The designer's role is increasingly one of structuring and transforming data into accessible and meaningful information. In this subject students will be introduced to basic techniques for the visual representation of data. This subject covers both how to design successful charts, maps, and diagrams, as well as how to use these graphics to compose cohesive storytelling pieces. Students will also discuss both practical and theoretical issues when visualising data, and how Graphic Design and Interactive Design principles apply to the visualisation of information. Students will learn how to design basic infographics and mock ups for interactive visualisations, and they will develop skills to start producing compelling and elegant infographics and data visualisation.
Level: Undergraduate Level 3 subject
Pre-requisite(s): DESN 1021 OR
DESN 1007
Restrictions: Please see the Subject Details page for any restrictions for this subject

DESN 3003 Design Research Project (10 Credit Points)
Subject Details (p. 3126) Legacy Code: 102277
This subject offers students the opportunity to develop a self-negotiated design project through exploring a variety of research methods, reflective practice, and concept prototyping. Students will develop a project that focuses on a particular area of interest in order to consolidate their portfolio, and for students enrolled in B Design (Vis Comm), lay the foundation for their fourth year major design project.
Level: Undergraduate Level 3 subject
Pre-requisite(s): DESN 2014 OR
DESN 3013
Restrictions: Please see the Subject Details page for any restrictions for this subject

DESN 3006 Graphic Design: Developing a Personal Portfolio (10 Credit Points)
Subject Details (p. 3127) Legacy Code: 102276
This subject focuses on the development of your industry orientated practice and personal portfolio development. Throughout the previous core subjects and subject pairings you will have developed particular skills and interests that are beginning to define your design practice and your portfolio. The briefs set in this subject offer you the opportunity to specialise further and to develop your portfolio and will, where possible, include live briefs and competitions. You will continue to refine and develop your visual language, material and digital skills, and continue to develop as an independent learner. The subject will culminate in an industry event, where students will have the opportunity to get their portfolios critiqued by design industry representatives.
Level: Undergraduate Level 3 subject
Pre-requisite(s): DESN 2006 OR
DESN 3001 OR
MKTG 2003 OR
MKTG 2003
Restrictions: Please see the Subject Details page for any restrictions for this subject

DESN 3007 Illustrating Popular Culture (10 Credit Points)
Subject Details (p. 3128) Legacy Code: 102271
This subject explores the powerful qualities of illustration when used as a visual communication strategy in the design of popular culture: within an advertising campaign and as social commentary through editorial illustration. The potential of a range of illustrative styles, mediums and techniques, will be explored through experimentation with a variety of visual strategies that utilize lateral thinking, linked to the design of professional concepts, developmental processes and media considerations.
Level: Undergraduate Level 3 subject
Pre-requisite(s): DESN 1011
Equivalent Subjects: DESN 2008 - Illustration Advertising and Editorial
Restrictions: Please see the Subject Details page for any restrictions for this subject

DESN 3008 Interactive Design: Apps (10 Credit Points)
Subject Details (p. 3128) Legacy Code: 102267
This subject focuses on design methodology for the development and delivery of interactive media applications (apps). Particular concepts addressed include conceptual integration and convergence of various media forms, screen design, navigational hierarchy and structures, and designing engaging interactive interfaces. General principles of interface, information architecture and interaction design will be introduced, alongside principles of digital media production.
Level: Undergraduate Level 3 subject
Pre-requisite(s): ENGR 1021 OR
DESN 1021
Equivalent Subjects: DESN 2010 - Interactive Design 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

DESN 3011 Public Memory and Commemoration (10 Credit Points)
Subject Details (p. 3129) Legacy Code: 101253
Throughout history various forms of material culture (such as art, architecture, sculpture, objects and photographs) have been used to memorialize individuals as well as to commemorate events, both personal and national. As such, an examination of commemorative works offer valuable insights into the production of public memory and history. This subject explores the particular contexts of such memorials; their meaning, design and, politics. The diverse expressions of commemoration in Australia and the consequent production of public memory provides the arena for such considerations.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 0528 - Dangerous Visions LGYA 1028 - Dangerous Visions
Restrictions: Please see the Subject Details page for any restrictions for this subject

DESN 3013 Social Design: Research and Practice (10 Credit Points)
Subject Details (p. 3130) Legacy Code: 102274
This subject introduces students to the idea that graphic designers can be agents of change. Set project briefs will focus on social and political issues exploring the potential inherent in graphic design practice to make a real difference to society. The subject will encourage students to go beyond the definition of a problem solver, encouraging them to act as a problem seeker, who can use their design thinking skills to develop ideas that respond proactively to society's problems rather than reacting to a client's set brief. The subject will introduce further design-led, social and participatory research methods, that continue to build on the design process, and further expand the methods that underpin aspects of research and practice during the remainder of the degree. Students will refine and develop their visual language skills, in combination with material and digital skills, facilitating their development as an independent learner.
Level: Undergraduate Level 3 subject
Pre-requisite(s): DESN 2006 OR
DESN 2014
Equivalent Subjects: DESN 3004 Design Research Training
Restrictions: Please see the Subject Details page for any restrictions for this subject

DESN 4005 Major Design Project (20 Credit Points)
Subject Details (p. 3130) Legacy Code: 102279
In this year-long subject students will develop a self-directed project from initiation to completion, in consultation with an academic supervisor. The first semester involves engaging in background research to facilitate creative development. Students will survey the field for their project identifying precedents and contexts, leading to experimentation and exploration of a range of potential options and addressing any arising issues, to develop a proof of concept. In the second semester students will develop the work to completion, through an iterative process of prototyping, reflection and analysis. The completed work will be prepared to a professional standard for display at a showcase event, It is expected that there will be a documented developmental process undertaken consistently across the year, resulting in the final work, which will be a professional outcome, relevant to a field of Visual Communication design. Students are expected to be self-motivated, and work as an independent professional practitioner throughout the duration of the subject.
Level: Undergraduate Level 4 subject
Pre-requisite(s): DESN 3003 - Design Research Project
Equivalent Subjects: DESN 4001 - Communication Design Major Project
Restrictions: Please see the Subject Details page for any restrictions for this subject

DESN 4006 Professional Design Experience: The Individual Practitioner (20 Credit Points)
Subject Details (p. 3131) Legacy Code: 102280
Students will continue to work in the Burrow studio, but in this subject they are positioned as a junior designer who is working individually in response to a range of briefs with their tutor as Creative Director. Students will develop their capacity to manage projects independently from briefing, research, development, costing, and pitching. Through this capstone subject, students will also develop a self-promotion strategy, and increase their understanding of a range of professional practice issues as they relate to the individual practitioner, further preparing them for the industry.
Level: Undergraduate Level 4 subject
Pre-requisite(s): DESN 4007
Restrictions: Please see the Subject Details page for any restrictions for this subject

DESN 4007 Professional Design Experience: The Studio (20 Credit Points)
Subject Details (p. 3132) Legacy Code: 102278
The Burrow design studio simulates a professional environment where students heighten their design thinking and practice through work-integrated learning. In this subject, the student is positioned as a junior designer who is part of a team working in response to live briefs with real learning partners and tangible outcomes, under the guidance of tutors who act as creative directors. Students will develop their higher level professional design skills through working individually and collaboratively to manage projects from briefing, research, development, pitching, artworking, production and delivery. Through this subject, students will also advance their understanding of what the industry expects of junior designers, providing a bridge between study and work life.
Level: Undergraduate Level 4 subject
Pre-requisite(s): DESN 3006
Equivalent Subjects: DESN 4008 - Professional Design Studio
Restrictions: Please see the Subject Details page for any restrictions for this subject

DESN 9001 Higher Degree Research Thesis - Graphic and Design Studies (80 Credit Points)
Subject Details (p. 3133) Legacy Code: 800001
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

Horticulture and Viticulture (HORT)

HORT 1001 Crop Production (10 Credit Points)
Subject Details (p. 3472) Legacy Code: 300815
This subject aims to provide students with an understanding of the scientific basis of sustainable crop and food production and security. These include broad-acre cropping, fruits/orchards and vegetables. In this subject students will gain an understanding of the physiological controls on crop yield in the variable Australian environment in which crops are grown. Students will become familiar with the science and practice of sustainable crop production and develop crop management skills through the production of nursery crops, vegetables and fruits. Students will also gain an understanding of processing these crops after harvest, to develop an appreciation of factors impacting upon produce quality and safety.
Level: Undergraduate Level 1 subject
Equivalent Subjects: HORT 1003 - Horticultural Production 2 BIOS 2023 - Fruit Production LGYA 5943 - Floriculture HORT 1002 - Crop Production
Restrictions: Please see the Subject Details page for any restrictions for this subject

HORT 1004 Horticultural Production Systems (10 Credit Points)
Subject Details (p. 3472) Legacy Code: 301096
Food represents the single largest part of your environmental footprint. This means our modern, urban-oriented society must begin to reconnect with the sources of our food to create more sustainable future. This subject explores the scientific basis of sustainable crop production by examining fruit, vegetable and grain enterprises. Management of produce from harvest to consumption will also be explored to examine factors that impact upon food quality and safety. Students will compare and contrast growing conditions of the highly variable Australian environment to consider the global context for horticultural industry development. By delving into the world of crop management, students will identify the impacts (opportunities and constraints) of plant physiology on the sustainability of food. Students will also consider how novel food products can prompt consumers to appreciate the environmental, economic and social benefits that can arise from sustainable horticultural production.
Level: Undergraduate Level 1 subject
Equivalent Subjects: HORT 1003 - Horticultural Production 2 LGYA 5944 - Fruit Production HORT 1002 - Crop Production HORT 1001 - Crop Production
Restrictions: Please see the Subject Details page for any restrictions for this subject

HORT 1006 Protected Cropping Biosecurity and Pollination (10 Credit Points)
Subject Details (p. 3473) Legacy Code: 301214
The protected cropping industry in Australia is a rapidly expanding sector. There is an identified need for trained professionals who have an understanding of the management of plant pests and diseases. Students studying this course will learn industry best practice related to biosecurity, pest and disease management and emergency response procedures. In addition to pest and disease management the challenges of pollination in the context of Australian protected cropping will be explored. Western Sydney University is home to the state of the art National Vegetable and Protected Cropping Centre (NVPCC), this facility will be utilized in the on campus components of this course.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HORT 1007 Protected Cropping Plant Nutrition (10 Credit Points)
Subject Details (p. 3474) Legacy Code: 301277
Plant nutrition is essential to plant health and defence, productivity and crop quality; this is especially so in the soilless environment employed by the protected cropping industry. This subject will focus on crop nutrient requirements, nutrient deficiencies and their symptoms, practical nutrient monitoring using hand-held technologies and the PRIVA system and correction techniques. This subject also explores soilless substrates and their influence on nutrient loads, nutrient-rich waste water recovery, reuse and environmentally sustainable disposal options. Western Sydney University is home to the state of the art National Vegetable and Protected Cropping Centre (NVPCC), this facility will be utilized in the on campus components of this course.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HORT 2001 Greenhouse Technology for Food Sustainability (10 Credit Points)
Subject Details (p. 3474) Legacy Code: 301097
Greenhouses are enclosed structures that optimise temperature, light, water and carbon dioxide to maximise plant production. Also called 'greenhouse horticulture', these advanced systems integrate technologies across disciplines (e.g. horticultural, environmental and material sciences; mechanical engineering and design; robotics and computing programming) to create futuristic indoor environments that increase the quantity and quality of plant-derived foods. Controlled environments can significantly reduce reliance on inputs (fertiliser, pesticide, energy and water) and reduce environmental impacts (including 'food miles'). This subject explores a range of greenhouse technologies in Australia and overseas-from simple low-cost options, through to cutting-edge technology in energy and water-efficient production. Students will observe current status and future trends in the industry to examine how advanced technologies can improve sustainability measures along with the reliability of horticultural output. Students will consider how innovative horticultural enterprises can provide consumers with greater capacity to adopt more sustainable diets.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HORT 2003 Plant Production (10 Credit Points)
Subject Details (p. 3475) Legacy Code: 301447
This subject will provide you with an understanding of the scientific basis of sustainable plant production in natural and built environments. These include cropping of plants for food production in extensive and intensive systems. In this subject you will gain an understanding of the physiological controls on plant yield in the Australian environment. You will become familiar with the science and practice of sustainable plant production and develop crop management skills through the production of nursery crops, vegetables and fruits.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HORT 3001 Postharvest (10 Credit Points)
Subject Details (p. 3476) Legacy Code: 300869
This subject explores the factors affecting the retention of quality of fresh fruit, vegetables and cut flowers from grower to consumer. Topics include: the role of fresh produce for the health and happiness of people; the growth and maturation and physiology of fresh produce; the importance of managing temperature and relative humidity of the storage environment; the responses of fresh produce to changes in temperature and water loss; the role of ethylene in fruit ripening and senescence; the practical issues of assessing harvest maturity; packaging; distribution and the control of postharvest diseases and pest and the concepts of market access.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HORT 3002 Protected Cropping Technology (10 Credit Points)
Subject Details (p. 3476) Legacy Code: 301448
This subject will develop your understanding of the role technology plays in underpinning plant production, in built environments, as well as the impact on processing and consumption of established and emerging opportunities. This subject explores the factors affecting growth, maturation and physiology of plant products in the protected cropping environment. Industry issues of controlling pests and disease, assessing harvest maturity, post-harvest management are underpinned by systems modelling and sustainable practices.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HORT 7001 Advanced Greenhouse Technology (10 Credit Points)
Subject Details (p. 3477) Legacy Code: 301358
This subject explores a range of advanced greenhouse technologies in Australia and overseas-from simple low-cost options, through to cutting-edge technology in energy and water-efficient production. Students will observe current status and future trends in the industry to examine how advanced technologies can improve sustainability measures along with the reliability of horticultural output. This subject focuses on engineering aspects of greenhouse horticulture systems as well as crop growth and development. The basics of crop growth and development and the physical principles of greenhouse systems at different levels will be taught. The main in depth topics of the subject are: the selection of suitable greenhouse technology, physics of greenhouse climate, greenhouse systems (passive greenhouse, climate controlled, closed or semi-closed greenhouse), cropping systems, cover materials and smart glass technologies, energy saving technologies, water and nutrient recycling, and robotics for de-leafing and picking.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HORT 7002 Greenhouse Control Systems (10 Credit Points)
Subject Details (p. 3478) Legacy Code: 301359
This subject develops an understanding of the leading controlling systems for protected cropping in low, medium and high-tech greenhouses. The main topics are: the integration of hardware and software in a range of different protected cropping systems, management of the aerial environment (e.g. manageable parameters and greenhouse climate engineering, radiation management, energy sources and distribution systems, ventilation, air conditioning and cooling systems, screens, carbon dioxide-sources and distribution), and management of the hydroponic environment (factors, tools, control of water and nutrient balance, water quality, salinity effects). The subject emphasises computing skills, calculation, and analysis that are applicable to a range of different greenhouse control systems.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HORT 7003 Greenhouse Crop Production (10 Credit Points)
Subject Details (p. 3479) Legacy Code: 301360
This subject focuses on key concepts relating to the functioning of a range of greenhouse horticultural crops in their environment, biological mechanisms, crop growth and development, integrated pest management, crop production, quality and postharvest technology. Students will learn concepts and knowledge relevant to plant physiology, environmental sciences, horticultural production, food technology, and postharvest physiology. Students will be able to measure and interpret plant physiological, biochemical, genetic, and produce quality traits in greenhouse experiments in the context of the functional diversity in crops. The students will also integrate knowledge using plant growth modelling techniques, interpret model output, and address questions on functional diversity in crops by combining model output and experimental data.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HORT 7004 Industry Project (10 Credit Points)
Subject Details (p. 3479) Legacy Code: 301361
In this unit, students will complete an industry based project under the guidance of an industry partner and a member of the University's academic staff. Using a project based methodology, students will be required to solve a real world problem on behalf of a protected cropping industry partner. Students will develop skills in scoping, planning, implementing, reporting on the industry project; reflecting on what has been learned in the context of their personal and professional development and how this can be used in their future career.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HORT 7005 Industry Project (Extended) (10 Credit Points)
Subject Details (p. 3480) Legacy Code: 301362
In this subject, students will undertake a more in depth investigation of the project undertaken in 301361Industry Project. Students will extend their use of project based methodologies to solve the problem identified in the pre-requisite subject 301361 Industry Project for a protected cropping industry partner. Students will extend their skills in planning, implementing, collecting and analysing data, reporting on the industry project and reflecting on what has been learned in the context of their personal and professional development and how this can be used in future career.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): HORT 7004
Restrictions: Please see the Subject Details page for any restrictions for this subject

HORT 7006 Plant-Climate Interactions in Controlled Environments (10 Credit Points)
Subject Details (p. 3480) Legacy Code: 301357
This subject aims to provide knowledge of relationships between plant growth, controlled environment and crop physiological aspects relevant to protected crop production. The subject will provide students with relevant knowledge to explain and develop concepts that are key to understanding various areas of environmental plant physiology. The subject will also stimulate students to conceptualise interactions between the physical environment and plant functioning. The subject will compare the important parameters and concepts (e.g. plant growth, plant and fruit development, light interception, light use efficiency, biomass partitioning, and water use efficiency) in horticultural crop growth in the controlled systems.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HORT 9001 Higher Degree Research Thesis - Horticulture (80 Credit Points)
Subject Details (p. 3481) Legacy Code: 800071
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HORT 9002 Higher Degree Research Thesis - Viticulture (80 Credit Points)
Subject Details (p. 3482) Legacy Code: 800073
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

Human Welfare and Services (WELF)

WELF 1002 Context of Human Services (10 Credit Points)
Subject Details (p. 5272) Legacy Code: 101596
This subject introduces students to the role of human services within the Australian political context. Students will develop a critical analysis of the contribution of the market, state and community encouraging reflection on underpinning values. It will also identify the change strategies which can be developed and used in each of these domains to bring about socially just outcomes.
Level: Undergraduate Level 1 subject
Incompatible Subjects: WELF 1005 - Introduction to Welfare POLI 1005 - Social Policy
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 1003 Human Services Intervention Strategies (10 Credit Points)
Subject Details (p. 5273) Legacy Code: 400193
This is an introductory subject which examines underlying theories of social welfare work, community work, youth work and international social development. Students will explore the ideological underpinnings of theories and discourses in the human services, particularly with regard to the impact of poverty, inequity and the experience of vulnerable populations. The contribution of other disciplines to knowledge and practice in these fields of practice will also be examined. This subject will focus on developing beginning assessment and intervention skills in working with individuals, groups, and communities. Students will also develop an understanding of ethical issues related to social work practise and working in human service organisations as a member of a team.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 1004 Human Services Intervention Strategies (WSTC) (10 Credit Points)
Subject Details (p. 5274) Legacy Code: 700142
This is an introductory subject which examines underlying theories of social welfare work, community work, youth work and international social development. Students will explore the ideological underpinnings of theories and discourses in the human services, particularly with regard to the impact of poverty, inequity and the experience of vulnerable populations. The contribution of other disciplines to knowledge and practice in these fields of practice will also be examined. This subject will focus on developing beginning skills in working with individuals (casework), working with groups, community work and working in human service organisations as a member of a team.
Level: Undergraduate Level 1 subject
Equivalent Subjects: WELF 1003 - Human Services Intervention Strategies
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 1007 Mental Health Workforce Training (10 Credit Points)
Subject Details (p. 5275) Legacy Code: 102530
This subject is a Level 1 Open Elective for eligible students who have completed the Certificate IV in Mental Health (CHC43315) with Wesley Mission. This Certificate prepares mental health workers for the provision of self-directed, recovery oriented support for people affected by mental illness and psychiatric disability. The initial training is carried out on campus at Western Sydney University under the guidance of Wesley Mission (Sydney). The subject involves reflecting on the links between mental health workforce training and the academic discipline of psychology. The focus of this subject is on the knowledge required for mental health workers.
Level: Undergraduate Level 1 subject
Co-requisite(s): BEHV 1018 OR
BEHV 1016
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 1009 Welfare Field Education 1 (Block Mode) (10 Credit Points)
Subject Details (p. 5275) Legacy Code: 101765
This subject enables students to participate in a structured and supervised field placement (140 hours). Welfare Field Education 1 (Block Mode) provides students with the opportunity to apply their knowledge and experience in linking theory with practice, and extend their skills for community work with the support of practitioners working in the human services sector. Placements are offered in a variety of agency types spanning all areas of community work practice: work with individuals, groups and families, community development; research and policy.
Level: Undergraduate Level 1 subject
Equivalent Subjects: LGYA 7647 - Welfare Field Education 1 (AREPMETRO) WELF 2016 - Welfare Field Education 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 1010 Human Services Intervention Strategies (UG Cert) (10 Credit Points)
Subject Details (p. 5276) Legacy Code: 500045
This is an introductory subject which examines underlying theories of social welfare work, community work, youth work and international social development. Students will explore the ideological underpinnings of theories and discourses in the human services, particularly with regard to the impact of poverty, inequity and the experience of vulnerable populations. The contribution of other disciplines to knowledge and practice in these fields of practice will also be examined. This subject will focus on developing beginning assessment and intervention skills in working with individuals, groups, and communities. Students will also develop an understanding of ethical issues related to social work. Students will also develop an understanding of working in human service organisations as a member of a team.
Level: Undergraduate Level 1 subject
Equivalent Subjects: WELF 1003 - Human Services Intervention Strategies
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 1011 Introduction to Social Work in Australia (10 Credit Points)
Subject Details (p. 5277) Legacy Code: 102860
This subject introduces students to social work, its common values, different perspectives, and current debates. Diverse constructions of social work embedded in different knowledge systems and models will be explored. Social work perspectives in a multicultural cosmopolitan Australia will be analysed including, amongst others, Indigenous social work, White western social work, Pacific social work, Afrocentric social work, memorial social work, Brazilian social work, etc. An overview of the changing Australian socio-political environment, policy and practice context will be explored and the role of social work in the different fields of practice analysed, to locate strategies for generating positive and creative social change.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 1012 Understanding Disability: Historical and Contemporary Frameworks (10 Credit Points)
Subject Details (p. 5278) Legacy Code: 102846
Disability Studies is a multi-disciplinary field that investigates, critiques, and enhances society's understandings of disability. The subject will introduce students to contemporary frameworks for recognising how people with disabilities have experienced disadvantage and exclusion because of personal and societal responses to impairment. The subject will explore how disability activists and scholars have re-conceptualised disability from a more empowering social-political and human rights perspective as an element of human diversity. The subject is grounded in case study pedagogy to ensure the integration of applied practice with rich conceptual and rigorous frameworks.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 1013 Counselling Foundations (Block) (10 Credit Points)
Subject Details (p. 5278)
This subject introduces students to key concepts and theories of counselling and other therapeutic approaches. Students will also develop an understanding of counselling practice in an Australian context and will learn how to apply their knowledge of subject content to their own life experiences and real world examples. Students will also develop the capacity to critically evaluate the strengths and weaknesses of different counselling approaches.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 1014 Introduction to Youth Work: History, Theories & Approaches (10 Credit Points)
Subject Details (p. 5279)
This subject introduces learners to the theories and concepts of youth work from multiple perspectives. Discover the origins and development of youth work as a distinct profession, globally and in Australia. Gain an understanding of current youth work code of ethics, with a focus on social justice and human rights. The subject introduces varied approaches to understanding youth, exploring their depictions across time, space, and cultures.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 1015 Practicum1: Foundations in Practice (10 Credit Points)
Subject Details (p. 5279)
This subject explores various models and approaches to youth work practice that promote young people's active involvement, empower them to make decisions, and emphasise cooperation and collaboration, instead of coercion. The subject also incorporates a 140-hour practicum observation component, providing students with first-hand experience and insights into real-world youth work scenarios. Students gain theoretical insights, practical skills, and real-world experience by observing a youth worker in action and assisting with entry level tasks. This integrated approach equips students with a holistic understanding of youth work models and their practical application.
Level: Undergraduate Level 1 subject
Pre-requisite(s): WELF 1014 - Introduction to Youth Work Theory and Approaches
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 2001 Community Management and Organisations (10 Credit Points)
Subject Details (p. 5280) Legacy Code: 101644
This subject focuses on community management in Australia and the social and economic factors that influence and frame community management practices. At the macro level, it examines the effects of neo-liberal (economic rationalist) reforms in the public and community sectors; and the rise of developments such as managerialism and 'third way' approaches, on community management practices. The subject also explores developments in management practices in response to social developments such as multiculturalism, recognition of diversity, equal employment opportunity and recognition of contextual and local issues. It further looks at community management work practices, including volunteerism, steering committees, management committees, and collectives.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYA 1371 - Community Management and Organisations LGYA 9706 - Community Management and Organisations
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 2002 Community Work & Development (10 Credit Points)
Subject Details (p. 5281) Legacy Code: 101632
This subject introduces theories and skills in community work and community development. There will be an exploration of the range of ways the term "community" is used and an analysis of the assumptions, values, goals and visions behind community work will be discussed. The subject will explore the breadth and scope of community work at a local, state and global level. The subject will provide an opportunity to develop an understanding of the environmental, political, economic and cultural issues relevant to community work practice.
Level: Undergraduate Level 2 subject
Equivalent Subjects: WELF 1001 - Community Work and Community Development
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 2003 Community Work and Community Development (Block Mode) (10 Credit Points)
Subject Details (p. 5282) Legacy Code: 101774
This subject introduces theories and skills in community work and community development. It begins with an analysis of the terms community and community development and their competing meanings and discourses. This is followed by an examination of the breadth and scope of community work at a local, state and global level. The subject will provide an opportunity for students to develop an understanding of the environmental, political, economic and cultural issues relevant to community work and community development practice. The subject will explore examples of Aboriginal and Torres Strait Islander communities, to illustrate the subject content.
Level: Undergraduate Level 2 subject
Equivalent Subjects: WELF 2002 - Community Work and Community Development LGYA 7651 - Community Work and Community Development AREPMetro
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 2006 Fields of Practice 1 (10 Credit Points)
Subject Details (p. 5282) Legacy Code: 102172
Fields of Practice 1 introduces Social Work students to a range of skills and contexts of social work practice. The subject draws from the expertise of the Social Work team at Western Sydney University, engages with consumer educators and practitioners, and provides students with opportunities to practice their skills. The critical approach to the subject takes account of the diversity in social work in terms of the range of people, groups and communities with whom students will work.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 2007 Group Work in Social Work (10 Credit Points)
Subject Details (p. 5283) Legacy Code: 400509
This subject will provide students with the opportunity to develop knowledge of group work theory, group dynamics and facilitation skills in group work practice in the human services. In addition, students will be learning about working in teams in human service agencies, and effectively collaborate with their colleagues in group settings. Students will integrate theory with practice in an experiential group setting in the classroom. Students will also be examining issues related to culturally responsive group work practice with marginalised people, and addressing group work issues of diversity in gender and culture.
Level: Undergraduate Level 2 subject
Pre-requisite(s): WELF 1003
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 2008 Human Rights, Human Services and the Law (10 Credit Points)
Subject Details (p. 5284) Legacy Code: 400195
This subject aims to provide knowledge of human rights issues and laws which are particularly relevant to social workers, youth workers and community welfare workers. It provides an opportunity for students to reflect upon their powers, responsibilities and obligations in their professional roles and acquire skills to promote justice for disadvantaged individuals and groups through advocacy and law reform.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 2009 Human Rights, Human Services and the Law (WSTC) (10 Credit Points)
Subject Details (p. 5285) Legacy Code: 700141
This subject aims to provide knowledge of human rights issues and laws which are particularly relevant to social workers, youth workers and community welfare workers. It provides an opportunity for students to reflect upon their powers, responsibilities and obligations in professional roles and acquire skills to promote justice for disadvantaged individuals and groups through advocacy and law reform.
Level: Undergraduate Level 2 subject
Equivalent Subjects: WELF 2008 - Human Rights Human Services and the Law
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 2010 Lifespan Development and the Human Services (10 Credit Points)
Subject Details (p. 5286) Legacy Code: 400505
This subject takes a 'lifespan perspective' to studying human development, covering related concepts, theories, methods and debates, and develops an understanding of bio-psycho-social dimensions across the lifespan, underpinned by a sensitivity to cultural and social differences in development. There is an emphasis on relating lifespan issues to current human services.
Level: Undergraduate Level 2 subject
Pre-requisite(s): BEHV 1021
Equivalent Subjects: LGYB 6026 - Lifespan Development in the Human Services
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 2011 Management and Community Organisations (Block Mode) (10 Credit Points)
Subject Details (p. 5287) Legacy Code: 101775
This subject focuses on community management in Australian Aboriginal and Torres Strait Islander communities and the social and economic factors that influence and frame community management practices. At the macro level, it examines the effects of neo-liberal (economic rationalist) reforms in the public and community sectors; and the impact of developments such as managerialism and 'third way' approaches on community management practices. The subject has a specific focus on management practices and issues facing organisations operating in Indigenous communities. It explores the tensions and pressures faced by Indigenous organisations and strategies for developing sustainable management practices.
Level: Undergraduate Level 2 subject
Pre-requisite(s): WELF 2003
Equivalent Subjects: WELF 2001 - Community Management and Organisations LGYA 7654 - Managing in Community Services (AREPMetro)
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 2017 Working with Individuals and Families (10 Credit Points)
Subject Details (p. 5287) Legacy Code: 400508
This subject introduces students to the theories and practice related to social work with individuals and families in diverse practice contexts. It builds on knowledge gained through the prerequisite subjects. Students examine systems theory in relation to family work, and the contributions of feminist therapies and psychological themes. Relevant clinical and social issues such as cross-cultural casework, the impact of the stolen generation on indigenous people's access to social services, and working effectively with grief and loss are examined. This subject assists in preparing students for their first or second fieldwork placement.
Level: Undergraduate Level 2 subject
Pre-requisite(s): WELF 1003
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 2018 Working with Individuals and Families (Block Mode) (10 Credit Points)
Subject Details (p. 5288) Legacy Code: 101776
This subject builds on Introduction to Working with Families and Communities and focuses on direct practice skills with individuals and families in welfare and community settings. Students examine contemporary theories of direct practice and build upon their ability to use theory to reflect upon and develop practice skills. There is an emphasis on safe, inclusive and responsive practice with Aboriginal and Torres Strait Islander peoples with a focus on trauma informed practice.
Level: Undergraduate Level 2 subject
Pre-requisite(s): WELF 1006
Equivalent Subjects: WELF 2017 - Working with Individuals and families LGYA 7656 - Working with individuals and families
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 3001 Child Abuse as a Social Issue (10 Credit Points)
Subject Details (p. 5289) Legacy Code: 101381
This subject enables students to examine the way in which child abuse has become a public issue. It considers the assumptions, values and interests which underlie definitions of abuse as well as intervention and prevention strategies promoted to protect children from abuse. In order to do this, students will examine constructions of childhood, the positioning of children and attitudes towards children and families. They will explore the various responses to child abuse in contemporary systems, policies and practices that work to address child abuse. Students will develop the skills required to ensure that children are active participants in decisions made for their protection.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYB 5808 - Child Abuse as a Social Issue
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 3002 Child Abuse as a Social Issue (Block Mode) (10 Credit Points)
Subject Details (p. 5290) Legacy Code: 101768
This subject examines the way in which child abuse has become a public issue. It considers the assumptions, values and interests which underlie definitions of abuse as well as intervention and prevention strategies promoted to protect children from abuse. The subject examines cultural constructions of childhood, the positioning of children within society, relations of power between children and adults within communities and families, gender relations, and social discourses about children and families. The subject emphasises the importance of children being active participants in decisions made for their protection; and intervention and prevention strategies for Aboriginal and Torres Strait Islander communities.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYB 5808 - Child Abuse as a Social Issue
WELF 3001- Child Abuse as a Social Issue
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 3003 Community Engaged Learning (10 Credit Points)
Subject Details (p. 5290) Legacy Code: 102526
Community Engaged Learning offers students an opportunity to directly engage with communities (government, non-profits, industry) through hands-on experiences off-site from the university, including potential overseas opportunities where available. This block-mode subject fosters leadership and social responsibility through teamwork and real-world application of knowledge. It requires 60 hours of community engagement, 15 hours of workshops, and online academic support. Mandatory orientation, briefings, and debriefings are included. A Police Clearance is required before placement.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 3005 Families and Sustainable Communities (Block Mode) (10 Credit Points)
Subject Details (p. 5291) Legacy Code: 101778
This subject examines the concept of the family within different social and cultural contexts, with a particular focus on the place and significance of family and family relations in Aboriginal and Torres Strait Islander communities. The subject explores the impacts of colonisation and displacement in contributing to family breakdown in Indigenous communities. It also identifies the challenges and issues in building family resources for sustainable communities. Models of good practice for intervention and resource building are examined through case studies.
Level: Undergraduate Level 3 subject
Pre-requisite(s): WELF 1006 AND
WELF 1009 AND
HUMN 1014
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 3006 Family Violence: Policy and Practice (10 Credit Points)
Subject Details (p. 5292) Legacy Code: 101597
This subject examines the nature, incidence and extent of family violence. The focus is on the effects on women and children, who are the victims of this violence. Current sociological explanations are examined, including a critical examination of the myths and stereotypes that help to reinforce the hidden nature of this problem. Some solutions and possible ways of alleviating the suffering caused by this violence are canvassed.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 1388 - Family Violence
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 3007 Leadership, Alliances, Sustainability (Block Mode) (10 Credit Points)
Subject Details (p. 5293) Legacy Code: 101779
This subject offers students the opportunity to explore the central role of leadership and alliances in building sustainable Aboriginal and Torres Strait Islander communities. The subject focuses on theories and models of leadership appropriate for Aboriginal and Torres Strait Islander communities: initiating, building and maintaining alliances with individuals and groups and methods to build sustainable communities. In addition, students will examine case studies of Indigenous leadership and communities that have been successful in community building such as socio-economic development, education and community cohesion.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 3008 Learning through Indigenous Australian Community Service (Day Mode) (10 Credit Points)
Subject Details (p. 5294) Legacy Code: 101758
Learning through Indigenous Australian Community Service will provide students with an exciting opportunity to apply their disciplinary knowledge and skills in an Indigenous Australian cultural context. Students will negotiate and conduct an interview with an Indigenous or Non-Indigenous Service Provider working in an Indigenous context. Students will gain cross cultural awareness and insights as well as knowledge about Indigenous community affairs including cultural protocols, decision-making and leadership. This experience will provide students with a level of cultural understanding and competency that can lead to improved communication skills and effective partnering with Indigenous people, organisations and communities.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 3009 Managing Offenders in the Community (10 Credit Points)
Subject Details (p. 5294) Legacy Code: 102065
Managing Offenders in the Community is a subject that draws links between the theory and practice of working with offenders in a variety of roles and settings. It provides a legal and policy framework for this work and covers the main theoretical perspectives and research insights into what is effective practice in this work. The subject takes a practical, applied approach linking the material directly to work with offenders and will be of particular interest to current or future practitioners in community justice, corrections, social work and policing.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 3011 Professional Practice in Aged Care and Disability (10 Credit Points)
Subject Details (p. 5295) Legacy Code: 400968
This subject provides the student with an understanding of current trends underlying policies and services in the aged care and disability industry, which will help them to understand the dynamics of the changing aged care and disability service sector. Students will examine the strategic environments of aged care and disability to develop global and national perspectives, identify drivers of change and development, and the major players in aged care and disability policies. Students will develop an understanding of the aged care and disability competencies and determinants of well-being for aged and disabled persons, which can be used in their future roles in the health industry. Through reflections on practice in aged care and disability , students will develop an individual approach to aged care and disability service issues which they can use in the future as health care professionals.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 7162 - Professional Practice in Aged Care REHA 2008 - Professional Practice in Aged Care and Disability
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 3013 Social Work and Health (10 Credit Points)
Subject Details (p. 5296) Legacy Code: 400513
This subject integrates health as focus for social work as a profession and as a specific domain of practice. This advanced subject has three main areas of focus. The first area is developing knowledge and skills to critically analyse concepts related to health in global and local social work practice, including decolonising and Indigenous ways of knowing. The second is exploring health for specific populations and communities, the context of health service provision in Australia, and social work in health services. The third is professional skills for social work practice, including social work assessment and health promotion.
Level: Undergraduate Level 3 subject
Pre-requisite(s): WELF 2017
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 3014 Social Work and Social Policy (10 Credit Points)
Subject Details (p. 5297) Legacy Code: 400511
This subject examines the context and challenges for social policy in Australia and the relationship between social policy and social work practice. Topics covered include: fundamental debates in welfare policy; comparative and historical contexts in how welfare policy is developed; the impacts of remedial welfare policy and policy solutions to disadvantage; and strategies to influence policy development related to social work practice.
Level: Undergraduate Level 3 subject
Pre-requisite(s): WELF 1002
Equivalent Subjects: WELF 3010 - Political Economy of the Welfare State
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 3016 Theory and Critique of Welfare Practice (Block Mode) (10 Credit Points)
Subject Details (p. 5298) Legacy Code: 101777
This subject enables students to individually arrive at a meaningful synthesis of theoretical and practice elements of the course, and encourages a critical approach to the application of social theory to community and social development policy, practice and services, particularly in relation to Aboriginal and Torres Strait Islander Communities. Students will gain a good understanding of contemporary theories in social and community development and community leadership and sustainability and begin to use theoretical frameworks to critically analyse current policies and practice in the context of Aboriginal and Torres Strait Islander communities.
Level: Undergraduate Level 3 subject
Pre-requisite(s): WELF 1009 AND
WELF 1006 AND
JUST 2007 AND
WELF 2003 AND
WELF 2018
Equivalent Subjects: LGYA 7659 - Theory and Critique of Welfare Practice (AREP) WELF 3015 - Theory and Critique of Welfare Practice
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 3017 Understanding needs within Indigenous Australian Communities (10 Credit Points)
Subject Details (p. 5298) Legacy Code: 102411
In this unit, students build on their knowledge and experience to identify and service the needs of Aboriginal and Torres Strait Islander communities. Students will utilise their research and cultural competency skills to create a community profile and project brief within an Aboriginal and Torres Strait Islander community. This will enable students to effectively integrate theory, practice and culture to understand Aboriginal and Torres Strait Islander community needs. Students will also examine the role of an Aboriginal and Torres Strait Islander Professional in Community Development settings.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 1759 - Understanding Indigenous Australian Community Service LGYA 1678 - Learning through Indigenous Australian Community Service (Block Mode) WELF 3008 - Learning through Indigenous Australian Community Service (Day Mode)
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 3019 Welfare Field Education 2 (Block Mode) (20 Credit Points)
Subject Details (p. 5299) Legacy Code: 101769
This is a 20 credit point year-long subject taken over two terms (10 credit points in each term). This subject enables students to participate in a structured and supervised field placement (260 hours). Welfare Field Education 2 (Block Mode) provides students with the opportunity to extend their knowledge and experience in linking theory with practice and develop their skills for community work in the human services sector. Placements are offered in a variety of agency types spanning all areas of community work practice: work with individuals, groups and families, community development, research and policy.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 7657 - Welfare Field Education 2 (AREPMETRO) WELF 3018- Welfare Field Education 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 3020 Field Education 1 (20 Credit Points)
Subject Details (p. 5300) Legacy Code: 102782
This subject enables students to participate in a structured and supervised field placement experience, providing the opportunity for students to combine their knowledge of theory and application of their skills into practice in the human services sector. Placements will be offered in direct or indirect service work with a wide range of client groups and communities in the government and nongovernment sectors. A variety of social work and community welfare-related agencies in and around Sydney will be utilised. Students will attend skills based workshops and complete 400 hours of placement in accordance with accreditation requirements of the Australian Association of Social Workers (AASW) guidelines.
Level: Undergraduate Level 3 subject
Pre-requisite(s): WELF 2017
Incompatible Subjects: WELF 2005 - Field Education 1 WELF 3004 - Community Welfare Field Education
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 3021 Disability Rights, Policy and Governance (10 Credit Points)
Subject Details (p. 5301) Legacy Code: 102849
Since the ratification of the United Nations Convention on the Rights of Persons with Disabilities, laws, policy and service supports concerning persons with disability have transformed. This has resulted in significant reforms in Australia and globally. Disability rights have now become central to addressing long standing inequalities and discrimination experienced by persons with disability. Disability rights now also govern social services, supports and programs. This subject examines these developments with the global ratification of disability rights and critically evaluates the ensuing policies and practices that frame the context within which professional practice and expertise occurs. Drawing upon in-depth case studies, students will critically examine and engage in key issues surrounding the translation and realisation of disability rights in governance of social service systems, policy and practices.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 3022 Disability and Sexuality (10 Credit Points)
Subject Details (p. 5302) Legacy Code: 102848
This subject introduces students to the mutual fields of sexuality studies and disability studies by employing the critical lenses of queer, disability, and feminist theory to interrogate the privileging and ownership by mainstream culture of sex. By illuminating how people with physical, emotional, and cognitive disabilities experience romance, love, emotional intimacy and physical connection, students will explore how insufficient sexuality supports create diminished agency, excessive vulnerability, lack of access and "otherness" for disabled people. Students will ground their critical thinking by examining how they have constructed sexuality and disability norms based on their values, beliefs and views of these two intersecting and often taboo topics. Students will be encouraged to appreciate the importance of sexuality in the lives of people with disabilities and view the expression of our sexuality, sexuality agency, and access to sexual health as a basic human right.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 3023 Indigenous Disability and Inclusion (10 Credit Points)
Subject Details (p. 5302) Legacy Code: 102847
Intersecting two socially and economically marginalised groups, Australia's Indigenous peoples living with disability require services and supports that are both culturally safe and disability aware. Through this subject, future practitioners of the disability and Indigenous services workforce will be exposed to an Indigenous philosophy of disability that is characterised by a culture of inclusion, as a contrast to westernised medical models of disability. The subject will examine the unique exposures to social and economic marginalisation and discrimination encountered by people who are Indigenous and live with disability, and how these factors intersect as barriers to their access to service systems, supports and lives with dignity.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 3024 Professional Practice in Aged Care and Disability (UG Cert) (10 Credit Points)
Subject Details (p. 5303) Legacy Code: 500061
This subject provides the student with an understanding of current trends underlying policies and services in the aged care and disability industry, which will help them to understand the dynamics of the changing aged care and disability service sector. Students will examine the strategic environments of aged care and disability to develop global and national perspectives, identify drivers of change and development, and the major players in aged care and disability policies. Students will develop an understanding of the aged care and disability competencies and determinants of well-being for aged and disabled persons, which can be used in their future roles in the health industry. Through reflections on practice in aged care and disability, students will develop an individual approach to aged care and disability service issues which they can use in the future as health care professionals.
Level: Undergraduate Level 3 subject
Equivalent Subjects: WELF 3011 Professional Practice in Aged care and Disability
LGYA 7162 Professional Practice in Aged Care
REHA 2008 Professional Practice in Aged Care and Disability
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 4001 Contemporary Social Work Practice (10 Credit Points)
Subject Details (p. 5304) Legacy Code: 400518
This subject provides a forum in which students can examine contemporary issues that impact on social work practice. The use of technology in social work practice and its implications for clients and practitioners; the exploration of culturally and spiritually sensitive and creative approaches to social work practice; and human rights based practice. Students are encouraged to take a critical best practice approach, identifying the best aspects of social work practice and seeking to replicate it. There is a particular emphasis on applying this approach to child wellbeing and protection, mental health and work with Aboriginal Australians and Torres Strait Islander groups.
Level: Undergraduate Level 4 subject
Pre-requisite(s): WELF3020 - Field Education 1 OR WELF2005 - Field Education 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 4002 Counselling and Consultation (10 Credit Points)
Subject Details (p. 5305) Legacy Code: 101247
This subject introduces students to the basic skills underlying professional helping, providing a foundation for further training in counselling or psychological therapy. Students explore the professional helping relationship, the counselling process, common counselling and therapeutic frameworks, and learn key counselling micro-skills. There is a strong focus on applied skill development through in-class skills practice and assessment. Professional ethics and responsiveness to client characteristics including age, gender and cultural background are also emphasised. The subject provides structured opportunities to reflect on personal and professional development and readiness for further training in professional helping.
Level: Undergraduate Level 4 subject
Equivalent Subjects: LGYA 0475 - Counselling and Collaborative Consultation 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 4005 Field Education 2 (30 Credit Points)
Subject Details (p. 5306) Legacy Code: 400522
This subject incorporates the final social work placement and will consolidate the experiences gained from Field Education 1 and 2, and further assist students to clearly articulate their frame of reference within a critically reflective practice before entering employment. Students will be able to choose placements in direct service work, the community and organisational context of social work practice as well as community development and research. A variety of social work and related agencies in and around Sydney will be utilised. The Field Education Coordinator will be responsible for the selection and arrangement of placements according to AASW guidelines.
Level: Undergraduate Level 4 subject
Pre-requisite(s): WELF 3020 OR
WELF 2005
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 4006 Ideologies of Practice in Social Work (10 Credit Points)
Subject Details (p. 5307) Legacy Code: 400517
Social work practice is not a neutral activity arising from an objective viewpoint but is inextricably bound to varying ideologies and propositions that are concerned with human conduct. This subject examines the various ideologies that inform psycho-social and political analysis. Ideologies such as liberalism, critical feminism, critical masculinity, critical class theory, critical race theory, and adultism, and their explanations for psycho-social problems and proposals for change are examined in relation to methods of social work practice. Students will be encouraged to explore how all theory and practice methods incorporate ideological assumptions and how, therefore, the construction of creative solutions demands practice that is reflective and self-critical.
Level: Undergraduate Level 4 subject
Pre-requisite(s): WELF 3020 OR
WELF 2005
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 4007 Practice skills for social work (10 Credit Points)
Subject Details (p. 5308) Legacy Code: 102351
This subject aims to develop students' knowledge and skill base to work with people in varied environments and during difficult life transitions. The focus will be on acquiring knowledge of practice theory and models and then making use of this knowledge in simulated practice including interviewing and through written critical reflection. The subject emphasises use of self, emotion work and skills in negotiating preferred goals and outcomes with clients.
Level: Undergraduate Level 4 subject
Pre-requisite(s): WELF 3020 OR
WELF 2005
Equivalent Subjects: WELF 4003 - Critical Social Work Practice Direct
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 4008 Professional Decision Making in Social Work (10 Credit Points)
Subject Details (p. 5308) Legacy Code: 102352
This subject uses a problem-based learning approach to develop students' critical and practical reasoning abilities in professional decision making. Students will compare several models of decision making used at the interface of organisational and individual/family work contexts, and evaluate the usefulness of evidence based inquiry as a decision aid. Through case studies, students will discern the unique characteristics of a situation requiring professional judgement, explore their own habits or preferences in decision making, and develop reasoning skills that produce sound and ethical responses to the situation at hand.
Level: Undergraduate Level 4 subject
Pre-requisite(s): WELF 3020 OR
WELF 2005
Equivalent Subjects: WELF 4004 - Critical Social Work Practice Indirect
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 6001 Ethics and Diversity in Counselling (10 Credit Points)
Subject Details (p. 5309) Legacy Code: 102909
This subject is designed to prepare students to work in a diverse society as counsellors and advocates. Students will study the emergence of research in the counselling professions and explore connections and tensions between personal, professional and research ethics. Students will have the opportunity to examine their own cultural identity development, their own relationship with power and privilege and how these may impact their counselling practice. The subject will critically examine the evolution of the multicultural movement in the counselling profession and will consider issues and concerns of several non-dominant populations, including intersectionality in working with diverse ethnicities, genders, sexualities, religions, age and ability status.
Level: Postgraduate Coursework Level 6 subject
Equivalent Subjects: WELF 7008 - Ethics and Diversity in Research and Therapy HUMN 7036 - Research in the Social Sciences
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 7001 Clinical Studies (Art Therapy) (20 Credit Points)
Subject Details (p. 5310) Legacy Code: 101784
This subject aims to develop clinical practice skills for students enrolled in the Master of Art Therapy. The subject will involve preparation for the field placements and group supervision of casework and issues arising from the placements. The subject involves 375 hours of clinical placement working under the guidance of a clinical supervisor.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): CART 7004 AND
CART 7005 AND
CART 7010 AND
WELF 7009 OR
WELF 7029 AND WELF 7032
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 7002 Clinical Studies in Psychotherapy and Counselling (20 Credit Points)
Subject Details (p. 5311) Legacy Code: 102365
This subject aims to develop clinical practice skills. It will involve preparation for the field placements and group supervision of casework and issues arising from the placements. The subject involves a clinical placement working under the guidance of a clinical supervisor from the professional background of the students under supervision. Students are required to undertake 100 placement hours.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): WELF 7009 AND
WELF 7010 AND
WELF 7006
Equivalent Subjects: LGYA 1627 - Clinical Studies (Counselling)
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 7003 Contextualised Practice (10 Credit Points)
Subject Details (p. 5313) Legacy Code: 102394
Social work practice is informed by, and negotiated through, policy, legislative and ethical frameworks. This subject focuses on how these frameworks influence and shape social work practice in Australia and provides an opportunity for students to critically reflect upon their power, responsibilities and obligations In this subject, students will acquire the knowledge and skills to advocate for marginalised and disadvantaged individuals and groups through activism and advocacy and, work for social justice change through reform of legislation and policy.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 7006 Counselling and Psychotherapy Practice (10 Credit Points)
Subject Details (p. 5313) Legacy Code: 102364
This subject builds on the experiential learning from Foundations of Psychotherapy and Counselling 1 by offering further practice in interpersonal counselling skills in dyadic and group contexts. Students will consolidate and expand the range of skills appropriate to the unfolding counselling relationship through continued skills practice. Students will develop capacity to analyse their own responses in depth and respond reflexively in their work with clients, within an increased understanding of the therapeutic relationship and of what makes counselling effective. Students will continue to participate in small group experiential training, thereby increasing their awareness of interpersonal and group processes.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): WELF 7004 OR
WELF 7009
Equivalent Subjects: WELF 7005 - Counselling 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 7007 Critical Social Work Practice (10 Credit Points)
Subject Details (p. 5314) Legacy Code: 102395
This subject focuses on the application of critical theories, models and methods of social work practice through the exploration of diverse fields of practice including: child wellbeing and protection; mental health; working with older people; disability; housing and homelessness; LGBTQI social work; and rural and remote practice. The emphasis will be on the contribution of various critical perspectives (Feminist, Post-colonial, Postmodern, Marxist, Green, Critical Race, etc) to social work theory and to the development of alternative forms of practice.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): WELF 7023 AND
WELF 7024
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 7008 Ethics and Diversity in Research and Therapy (10 Credit Points)
Subject Details (p. 5315) Legacy Code: 102357
From 2022 this subject replaced by WELF6001 - Ethics and Diversity in Counselling for students enrolled in 1817 - Master of Psychotherapy and Counselling only. This subject introduces students to key considerations for practicing therapy and research in a diverse and neo-colonial context. Students will study the emergence of research in the arts therapy profession and explore connections and tensions between personal, professional and research ethics. Through close reading of professional documents, case studies and research papers, students will examine how the 'subjects' of therapy and research are conceptualised and constructed. From a perspective that links knowledge and power, students will look at what the published research says about what works and how in therapy; ask whom therapy and research work for; and examine the work these therapy and research practices do.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: HUMN 7036 - Research in the Social Sciences
WELF6001 - Ethics and Diversity in Counselling
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 7009 Foundations of Psychotherapy and Counselling 1 (20 Credit Points)
Subject Details (p. 5316) Legacy Code: 102353
Foundations of Psychotherapy and Counselling 1 is a foundational subject for postgraduate counselling and therapeutic studies. It forms the first part of a 40 credit point sequence undertaken during the first year. Foundations of Psychotherapy and Counselling 1 presents the foundational skills necessary for the successful inception of a productive therapeutic relationship. The sequenced, progressive presentation of these skills via experiential learning is framed by the simultaneous presentation of key theoretical concepts relevant to the skills in question. Students will be required to analyse the features of their own personalities, and to reflect on feedback that they receive from others in the role of psychotherapist/counsellor, in order to develop the self-awareness and sensitivity necessary for this professional role.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: WELF 7004 - Counselling 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 7010 Foundations of Psychotherapy and Counselling 2 (10 Credit Points)
Subject Details (p. 5317) Legacy Code: 102355
Foundations of Psychotherapy and Counselling 2 presents and critically evaluates the major theoretical paradigms of counselling and psychotherapy. These include; psychoanalytic / psychodynamictherapies; humanistic psychotherapies; behavioural and cognitive behavioural therapies; systemic therapies; constructivist/ postmodern therapies; and expressive therapies. Students will consider the assumptions about human development and behaviour that are central to each of these ways of working, as well as their underlying 'theory of change'. Students will also be introduced to common ways that clients present with psychological difficulties, and will explore various clinical responses to such client issues. These issues will be explored considering intrapsychic, relational and life stressor factors. Students will consider how presenting issues relate to the norms and extremes of various personality types, and what consideration should be given to life-stages in understanding client problems.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): WELF 7009
Equivalent Subjects: WELF 7005 - Counselling 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 7011 Further Clinical Studies (Art Therapy) (20 Credit Points)
Subject Details (p. 5318) Legacy Code: 101785
This subject aims to develop clinical practice skills to the level required for professional registration. The subject involves 375 hours of clinical placement working under the guidance of a clinical supervisor. It will involve group supervision of casework and in-depth discussion of issues arising from placements.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): WELF 7001
Equivalent Subjects: LGYA 1491 - Further Clinical Studies
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 7012 Further Clinical Studies in Psychotherapy and Counselling (20 Credit Points)
Subject Details (p. 5319) Legacy Code: 102366
This subject aims to develop clinical practice skills. It will involve preparation for the field placements and group supervision of casework and issues arising from the placements. The subject involves a clinical placement working under the guidance of a clinical supervisor from the professional background of the students under supervision. Students will undertake 200 placement hours.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): WELF 7002
Equivalent Subjects: LGYA 1628 - Further Clinical Studies (Counselling)
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 7013 Integrated Practice 1: Self and Story (10 Credit Points)
Subject Details (p. 5321) Legacy Code: 102370
This subject explores the concept of 'self' and how stories might shape self-identity or a sense of 'what it means to be me'. The enduring characteristics of stories will be examined alongside their different workings across cultures, traditions, technologies, genres and time. The subject will cover historical and contemporary notions of the unconscious as they inform an understanding of self and story.
It will examine how an understanding of the brain, particularly of memory, and the workings of the right and left hemispheres, fit into this exploration. Working with selves and stories, as instruments for change in therapeutic work, will be considered across lifespan and a range of psychotherapies.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): WELF 7009
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 7014 Integrated Practices 2: Affliction and Recovery (10 Credit Points)
Subject Details (p. 5322) Legacy Code: 102371
This subject critically examines the nature of mental illness and mental wellbeing. Historical and contemporary approaches to mental health and recovery will be reviewed. Diverse explanations for the origins of profound symptoms will also be explored. Mental health assessment tools commonly encountered by counsellors and psychotherapists are presented and their practical applications examined. Through case studies and autobiographical accounts, the voices of those with lived experience of major mental health issues will inform student learning in this subject. This subject invites students to critically evaluate mental health services from a range of perspectives and consider the role of counselling and psychotherapy alongside multiple pathways to recovery. Students will critically evaluate this knowledge and apply it in their development of skills in various psychotherapeutic methods to assist recovery and mental wellness.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): WELF 7009 AND
WELF 7013
Co-requisite(s): WELF 7010
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 7016 Integrated Practices 4: Self and Relationships (20 Credit Points)
Subject Details (p. 5322) Legacy Code: 102627
In this capstone unit, students integrate their learning about interpersonal awareness and the value of the therapeutic relationship, which are central to the Master of Psychotherapy and Counselling. A focus on multiple relational influences enhances students' ability to work therapeutically with individuals, couples and families. Clients bring themselves and their current and past relationships into the therapy room with them, as does their counsellor. Students will have the opportunity to investigate their personal values and beliefs about relationships and how these influence their work with clients. Family life-cycle and developmental models are discussed, critiqued and applied to promote understanding of common and diverse client issues and presenting concerns. Ultimately students will explore the concept of interdependence and how relationship is central to human wellbeing.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): BEHV 7018
Co-requisite(s): WELF 7012
Incompatible Subjects: HUMN 7010 - Critical and Creative Enquiry
WELF 7015 - Integrated Practices 4 Self and Relationships
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 7017 Integrated Project (10 Credit Points)
Subject Details (p. 5323) Legacy Code: 102398
Students will integrate theory and practice in social work through the development of a work-based project related to their organisational context or area of specialisation. The project will be negotiated with an academic advisor and be underpinned by concepts of community engagement/service learning. This project will be concurrent with the field placement and will allow students to plan, undertake and report on a specific aspect of practice in the context of work.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): WELF 7022
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 7018 Leadership in Organisations (10 Credit Points)
Subject Details (p. 5324) Legacy Code: 102392
This subject focuses on leadership in human service organisations and the social and economic factors that influence and frame practice. Students in the subject will briefly review the contemporary political economic circumstances underpinning human services and the ongoing changes to policy and practice. The subject will examine the idea of what leadership is and present major leadership theories relevant to the human services. The content will address contexts of leadership including setting organisational culture, situational leadership in relation to practice and people, management and governance and leading through change. The subject will also examine trust, ethics and fairness in leadership and leadership in difficult circumstances. The emphasis of the subject will be to equip students with the means to describe, question and reshape leadership practice.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 7019 Power and Marginalisation (10 Credit Points)
Subject Details (p. 5325) Legacy Code: 102393
This subject complements theoretical frameworks introduced in Difference and Diversity to explore issues of power and marginalisation through the experiences of Aboriginal and Torres Strait Islander peoples, mental health consumers, children and young people, and people with disability. Practice and policy responses that challenge or reinforce power and marginalisation are explored.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 7020 Practising Research and Researching Practice (10 Credit Points)
Subject Details (p. 5326) Legacy Code: 102358
This subject equips Therapy Studies students with the conceptual frameworks and skills needed to conduct basic research in the areas of counselling and psychotherapy. The question 'How do we know what we know?' becomes the connecting thread throughout an introduction to quantitative, qualitative and mixed method approaches to practitioner research. Building on considerations from the prerequisite subject WELF6001 Ethics and Diversity in Counselling, students will develop their understanding of research as a scholarly, professional, social and intersubjective practice. They will learn to generate answerable research questions and a coherent research proposal within appropriate intellectual and methodological frameworks.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): WELF 7008 - Ethics and Diversity in Research and Therapy
Or
WELF 6001 - Ethics and Diversity in Counselling
Equivalent Subjects: HUMN 7001 - Advanced Social Research Methods
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 7021 Social Work (Qualifying) Field Education 1 (20 Credit Points)
Subject Details (p. 5326) Legacy Code: 102391
This subject enables students to participate in a structured and supervised field placement (400 hours). Social Work (Qualifying) Field Education 1 provides students with the opportunity to apply their knowledge and experience in linking theory with the realities of practice, and extend their skills for social work practice with the support of practitioners working in the human services sector. Placements are offered in a variety of agency types spanning all areas of social work practice: direct service work with individuals, groups and families, community development; research and policy.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): WELF 7023
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 7022 Social Work (Qualifying) Field Education 2 (30 Credit Points)
Subject Details (p. 5327) Legacy Code: 102397
Social Work (Qualifying) Field Education 2 incorporates the final social work placement (600 hours) and will consolidate the experiences gained from both field placements. It will further assist students to clearly articulate their frame of reference within a critically reflective practice framework, before entering employment. Placements are offered in a variety of agency types spanning all areas of social work practice: direct service work with individuals, groups and families, community development; research and policy.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): WELF 7023 AND
WELF 7021
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 7023 Social Work Practice Methods 1 (10 Credit Points)
Subject Details (p. 5328) Legacy Code: 102390
Social Work Practice Methods1 introduces students to a range of skills, knowledge and professional values for work with individuals and families in diverse practice settings. Students are supported to develop core verbal and written communication skills including engagement, assessment, designing and implementing interventions, evaluation, report writing and record keeping practices. There is an emphasis on safe, inclusive and responsive practice with Aboriginal and Torres Strait Islander peoples and people from culturally diverse backgrounds.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 7024 Social Work Practice Methods 2 (10 Credit Points)
Subject Details (p. 5329) Legacy Code: 102396
Social Work Practice Methods 2 introduces theories and skills for work with groups and communities in diverse practice settings. This subject will provide students with the opportunity to develop core group work, community work and community development skills. Students will engage in simulated practice activities in Western's Social Work Skills Lab.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 7029 Indigenous Australia: History, Knowledge and Professional Practice (10 Credit Points)
Subject Details (p. 5330) Legacy Code: 102744
Working with Indigenous communities is an important field of practice for social and human service workers in statutory as well as community contexts. This subject introduces students to Aboriginal and Torres Strait Islander histories, including pre-contact, colonisation and contemporary developments. Specific attention will be paid to engaging communities - including practice principles, strategies and skills.
This subject will emphasise the importance of culturally responsive practices requiring students to have an understanding of their own values and cultures. Critical self-reflection and positioning are vital skills for cultural responsiveness, and will be developed in this subject.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 7030 Research for Social Work Practice (10 Credit Points)
Subject Details (p. 5330) Legacy Code: 102745
This subject introduces students to the different approaches to knowledge generation for social work practice and policy. The subject highlights how social workers can design and implement ethical research activities including the theories and methods that support different research approaches. The subject explores and analyses contemporary research design issues and the dominant qualitative, quantitative and mixed method approaches in knowledge generation. This is in the context of incorporating Indigenous knowledges and methodologies, and those specifically relevant to gender and cultural diversity. The subject highlights practice-based uses of research including program evaluation, meta-analysis, systematic reviews and community needs assessment.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 7031 Theories and Knowledges for Social Work (10 Credit Points)
Subject Details (p. 5331) Legacy Code: 102743
This subject explores different strands of social theory and their relevance for contemporary social work practice, both in the context of Western Sydney, and also globally. The heritage of the European Enlightenment will be critically examined as providing the basic paradigm for the construction of 'social theory' and also of social work knowledge and practice. The contribution of the humanities, as providing space for creativity and inspiration as well as insight, will also be considered. The limitations as well as the positives of Western epistemologies will be explored, and alternatives such as Southern Theory, Indigenous knowledges, critical theory, and 'new paradigm' thinking will be evaluated.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

WELF 7032 Counselling Skills for the Allied Professions (10 Credit Points)
Subject Details (p. 5332) Legacy Code: 102806
This subject introduces postgraduate students from allied professions to the major theoretical frameworks and foundational practices of counselling. An in-depth exploration of the embodied and situated experience of the trainee practitioner will be central to learning how to attend to and support others. Students will engage in an ongoing critical consideration of how discourses and practices of selfhood, social justice, power, colonisation, intersectionality, diversity and place shape the subjects of therapy and influence the therapeutic relationship. These intersubjective and scholarly enquiries will inform a scaffolded, intensive practice of microskills. (Legacy code 102806)
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: WELF 7009 - Foundations of Psychotherapy and Counselling 1 WELF 7004 - Counselling 1

Information Systems (INFS)

INFS 1002 Information Systems in Context (10 Credit Points)
Subject Details (p. 3719) Legacy Code: 300573
This subject aims to give students the ability to recognise and explain business information systems with regard to type, function, purpose, and the frameworks within which these systems are used. Topics in this subject include computing fundamentals; computer hardware and software; computers and society; use of business application packages - spreadsheets, word processing, database, graphics; organisational information systems; information systems development and acquisition; data and knowledge management; electronic commerce, internets, extranets; networking; enterprise-wide information systems; the internet and information systems security; privacy, ethics and computer crime.
Level: Undergraduate Level 1 subject
Equivalent Subjects: INFS 1003 Information Systems in Context (WSTC)
Incompatible Subjects: INFS 1004 Introduction to Information Systems
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFS 1003 Information Systems in Context (WSTC) (10 Credit Points)
Subject Details (p. 3720) Legacy Code: 700000
This subject aims to give students the ability to recognise and explain business information systems with regard to type, function, and purpose, and the frameworks within which these systems are used. Topics in this subject include computing fundamentals; computer hardware and software; computers and society; use of business application packages - spreadsheets, word processing, database, graphics; organisational information systems; information systems development and acquisition; data and knowledge management; electronic commerce, internets, extranets; networking; enterprise-wide information systems; the internet and information systems security; privacy, ethics and computer crime.
Level: Undergraduate Level 1 subject
Pre-requisite(s): Students enrolled in 7138 Diploma in Information and Communications Technology Extended - ICT 7139 Diploma in Information and Communications Technology Extended or 7140 Diploma in Information and Communications Technology Extended – Information Systems must pass LANG 0012 Academic and Professional Communication (WSTC Prep) and INFO 0001 Academic Skills for ICT (WSTC Prep)
Equivalent Subjects: INFS 1002 - Information Systems in Context
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFS 1006 Systems Analysis and Design (10 Credit Points)
Subject Details (p. 3721) Legacy Code: 300585
This subject introduces the concepts of System Analysis and Design. The study of methodologies and techniques for problem recognition, requirement analysis, process modelling, solution design and data modelling are essential elements of this subject. The Systems Development Life Cycle model is employed as the prime approach to teach the subject, equipping students with the basic skills required for developing models for analysis, design, implementation and solving information systems problems. This subject introduces students to approaches of system development including structured, object oriented and agile. Students are exposed well to system design activities including UI, data, basic system architecture and system processing. The use of drawing tools will be discussed in practical sessions.
Level: Undergraduate Level 1 subject
Equivalent Subjects: LGYA 5776 Introduction to Analysis and Design
INFS 1007 Systems Analysis and Design (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFS 1007 Systems Analysis and Design (WSTC) (10 Credit Points)
Subject Details (p. 3723) Legacy Code: 700013
This subject introduces the concepts of System Analysis and Design. The study of methodologies and techniques for problem recognition, requirement analysis, process modelling and/or data modelling are essential elements of this subject. The Systems Development Life Cycle model is employed as the prime approach to teach the subject, providing students with the basic skills required for analysis and design of logical solutions to information systems problems. The use of Computer Aided System Engineering tools will be discussed in practical sessions.
Level: Undergraduate Level 1 subject
Pre-requisite(s): Students enrolled in 7067 Diploma in Information and Communications Technology Extended must pass LANG 0002 Academic Communication 2 (WSTC Prep) or LANG 0032 English for Tertiary Study 2 (WSTC Prep) or LANG 0039 Introduction to Academic Communication 2 (WSTC Prep) and must pass INFO 0008 Computer Studies (WSTC Prep) before enrolling in this unit

Students enrolled in 7138 Diploma in Information and Communications Technology Extended-ICT 7139 Diploma in Information and Communications Technology Extended 7140 Diploma in Information and Communications Technology Extended–IS and 7141 Diploma in Information and Communications Technology Extended-HIM must pass LANG 0012 Academic Professional Communication (WSTC Prep) and must pass INFO 0001 Academic Skills for ICT (WSTC Prep) and must pass INFO 0010 Information Technology in Business (WSTC Prep) before enrolling in this unit
Equivalent Subjects: LGYA 5776 - Introduction to Analysis and Design
INFS 1006 - System Analysis and Design
INFS 1006 - Systems Analysis and Design
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFS 1013 Information Systems in Context (UG Cert) (10 Credit Points)
Subject Details (p. 3724) Legacy Code: 500046
This subject aims to give students the ability to recognise and explain business information systems with regard to type, function, purpose, and the frameworks within which these systems are used. Topics in this subject include computing fundamentals; computer hardware and software; computers and society; use of business application packages - spreadsheets, word processing, database, graphics; organisational information systems; information systems development and acquisition; data and knowledge management; electronic commerce, internets, extranets; networking; enterprise-wide information systems; the internet and information systems security; privacy, ethics and computer crime.

INFS 1015 Systems Analysis and Design (Advanced) (10 Credit Points)
Subject Details (p. 3725)
Computing graduates must be able to analyse business requirements and propose a design solution to those requirements. This subject equips students with these skills by further developing previously acquired concepts on systems analysis and design. Students are introduced to novel approaches in system development including Structured, Object oriented and Agile. The Systems Development Life Cycle model is employed as the prime approach equipping students with the basic skills required for developing models for analysis, design and implementation approaches to solving information systems problems. Students will engage in authentic real-world projects to understand requirements, analyse, design and develop models and artefacts using several systems development methodologies.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFS 1017 Database Design and Management (WSTC) (10 Credit Points)
Subject Details (p. 3726)
In today's data-driven world, an in-depth understanding of database management is vital for aspiring ICT professionals. In this subject, you will gain a comprehensive grasp of Relational Database Management Systems (RDBMS), emphasising their crucial role in modern business. You will acquire essential skills in database modelling and design, including database security and administration, and related ethical considerations. You will also gain experience using Structured Query Language (SQL). Finally, you will put theory into practice by designing, developing, and evaluating a business application database using a commercial RDBMS. This subject not only equips you with the knowledge to manage databases efficiently but also fosters and continues to build your professional communication and teamwork skills.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFS 2001 Database Design and Development (10 Credit Points)
Subject Details (p. 3726) Legacy Code: 300104
The main purpose of this subject is to provide students with an opportunity to gain a basic knowledge of database design and development including data modelling methods, techniques for database design using a set of business rules that are derived from a case study and finally implementation of the database using a commercial relational database management system. Through group work and tutorial practicals, students examine a number of important database concepts such as database administration, concurrency, backup and recovery and security whilst developing their professional communication and team work skills.
Level: Undergraduate Level 2 subject
Equivalent Subjects: INFS 2003 - Database Design and Development (WSTC)
Incompatible Subjects: LGYA 4371 - Database Management System for Business Information Systems
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFS 2002 Database Design and Development (Advanced) (10 Credit Points)
Subject Details (p. 3727) Legacy Code: 300941
This subject covers the principles, methodologies and technologies for the database design and development, exploring in particular the data modelling methods and the use of the language SQL for the database applications. The subject also examines a number of important database concepts such as database administration, concurrency, backup and recovery, and security. Students in this advanced subject are furthermore required to investigate new technological and theory advances in the database industry and apply them to the solution of concrete database problems.
Level: Undergraduate Level 2 subject
Incompatible Subjects: LGYA 4371 - Database Management System for Business Information Systems INFS 2001 - Database Design and Development
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFS 2003 Database Design and Development (WSTC) (10 Credit Points)
Subject Details (p. 3728) Legacy Code: 700011
The main purpose of this subject is to provide students with an opportunity to gain a basic knowledge of database design and development including data modeling methods, techniques for database design using a set of business rules that are derived from a case study and finally implementation of the database using a commercial relational database management system. Through group work and tutorial practicals, students examine a number of important database concepts such as database administration, concurrency, backup and recovery and security whilst developing their professional communication and team work skills.
Level: Undergraduate Level 2 subject
Pre-requisite(s): Students enrolled in 7067 Diploma in Information and Communications Technology Extended and 7134 Diploma in Information and Communications Technology Extended – ICT must pass LANG 0002 Academic Communication 2 (WSTC Prep) or LANG 0032 English for Tertiary Study 2 (WSTC Prep) or LANG 0039 Introduction to Academic Communication 2 (WSTC Prep) and must pass INFO 0008 Computer Studies (WSTC Prep) and must pass COMP 0003 Programming Design (WSTC Prep) before enrolling in this unit
Students enrolled in 7138 Diploma in Information and Communications Technology Extended-ICT 7139 Diploma in Information and Communications Technology Extended 7140 Diploma in Information and Communications Technology Extended–IS and 7141 Diploma in Information and Communications Technology Extended-HIM must pass LANG 0012 Academic and Professional Communication (WSTC Prep) and must pass INFO 0010 Information Technology in Business (WSTC Prep) and must pass COMP 0003 Programming Design (WSTC Prep)

INFS 2004 Introduction to Health Informatics (10 Credit Points)
Subject Details (p. 3730) Legacy Code: 300566
This introductory subject aims to give the student an insight into the key knowledge and skill set required in the emerging domain of Health Informatics. Critical topics include: The Australian healthcare system, health care improvement modelling, health information systems and management, paper-based v's electronic health records, clinical documentation and data quality, health information management, consumer information security, privacy and ethics, decision support and clinical delivery support systems, healthcare data representation and interchange standards, telehealth and Information Communication technologies (ICT). This will be complemented by practical exercises and assessment support sessions. Through these experiences students will gain an understanding of the application of ICT to the healthcare domain and the skills necessary to play a pivotal role in the design and delivery of healthcare systems and health information management.
Level: Undergraduate Level 2 subject
Equivalent Subjects: INFS 2005 - Introduction to Health Informatics (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFS 2005 Introduction to Health Informatics (WSTC) (10 Credit Points)
Subject Details (p. 3731) Legacy Code: 700258
This introductory subject aims to give the student an insight into the key knowledge and skill set required in the emerging domain of Health Informatics. Critical topics include: The Australian healthcare system, health care improvement modelling, health information systems and management, paper-based v's electronic health records, clinical documentation and data quality, health information management, consumer information security, privacy and ethics, decision support and clinical delivery support systems, healthcare data representation and interchange standards, telehealth and ICT technologies. This will be complemented by practical exercises and assessment support sessions. Through these experiences students will gain an understanding of the application of ICT to the healthcare domain and the skills necessary to play a pivotal role in the design and delivery of healthcare systems and health information management.
Level: Undergraduate Level 2 subject

INFS 2006 Object Oriented Analysis (10 Credit Points)
Subject Details (p. 3732) Legacy Code: 300144
The core strength of this subject is to analyse and model business objectives and critical requirements of software systems to be developed using object-oriented (OO) approaches. The system analysis is taken to greater depths within the context of Object Orientation. The Unified Modelling Language version 2.0 (notably use cases, user case diagrams, activity diagrams, class diagrams and sequence diagrams) is used as the modelling standard for creating OO models in the problem space. The subject also covers the rational unified process methodology and applications of design patterns for software development through practical case studies.
Level: Undergraduate Level 2 subject
Pre-requisite(s): INFS 1006
Equivalent Subjects: MATH 2013 Object Oriented Analysis (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFS 2007 Object Oriented Analysis (Advanced) (10 Credit Points)
Subject Details (p. 3733) Legacy Code: 300888
The core strength of this subject, as the advanced version of 300144 Object Oriented Analysis, is to analyse and model business objectives and critical requirements of software systems to be developed using object-oriented (OO) approaches. The system analysis is taken to greater depths within the context of Object Orientation. The Unified Modelling Language version 2.0 (notably use cases, user case diagrams, activity diagrams, class diagrams and sequence diagrams) is used as the modelling standard for creating OO models in the problem, solution and background modeling spaces. The subject also covers the rational unified process methodology and applications of design patterns for software development through real world case studies.
Level: Undergraduate Level 2 subject
Pre-requisite(s): INFS 1006
Incompatible Subjects: INFS 2006 - Object Oriented Analysis
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFS 2009 Database Design and Development (UG Cert) (10 Credit Points)
Subject Details (p. 3735) Legacy Code: 500048
The main purpose of this subject is to provide students with an opportunity to gain a basic knowledge of database design and development including data modeling methods, techniques for database design using a set of business rules that are derived from a case study and finally implementation of the database using a commercial relational database management system. The subject also examines a number of important database concepts such as database administration, concurrency, backup and recovery and security.
Level: Undergraduate Level 2 subject
Equivalent Subjects: INFS 2001 Database Design and Development INFS 2003 Database Design and Development
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFS 2010 Work-Integrated Learning in Digital Construction (10 Credit Points)
Subject Details (p. 3735) Legacy Code: 301428
The digitalisation of construction industries has grown considerably in the past decade and this subject responds in practical ways by engaging students in project-based learning related to Digital Construction within an industry framework. Students will select a project with an agreed industry partner, which involves simple digital applications in day-to-day construction such as software applications, information systems, digital solutions, apps and fintechs. This subject contributes towards the skills required for a work-ready graduate and allows the student to plan, undertake and report on a specific aspect of practice in the context of work.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFS 2011 Object Oriented Analysis (WSTC) (10 Credit Points)
Subject Details (p. 3736)
The core strength of this subject is to analyse and model business objectives and critical requirements of software systems to be developed using object-oriented (OO) approaches. The system analysis is taken to greater depths within the context of object orientation. The Unified Modelling Language version 2.0 (notably use cases, activity diagrams, class diagrams and sequence diagrams) is used as a modelling standard for creating OO models in the problem space. The subject also covers the rational unified process methodology and applications of design patterns for software development through practical case studies.
Level: Undergraduate Level 2 subject
Pre-requisite(s): Students enrolled in 7004 Diploma in Information and Communications Technology Fast Track 7005 Diploma in Information and Communications Technology 7067 Diploma in Information and Communications Technology Extended 7134 Diploma in Information and Communications Technology Extended – ICT 7138 Diploma in Information and Communications Technology Extended - ICT 7139 Diploma in Information and Communications Technology Extended 7140 Diploma in Information and Communications Technology Extended - Information Systems 7163 Diploma in Information and Communications Technology 6035 DiplomaBachelor of Information and Communications Technology 6036 Diploma in Information and Communications TechnologyBachelor of Information Systems 6039 DiplomaBachelor of Information and Communications Technology and 6040 Diploma in Information and Communications Technology Bachelor of Information Systems must pass INFS 1007 Systems Analysis and Design before enrolling in this unit
Equivalent Subjects: INFS 2006 Object Oriented Analysis MATH 2013 Object Oriented Analysis (WSTC)

INFS 3001 Activity Based Funding/Casemix and Data Quality (10 Credit Points)
Subject Details (p. 3737) Legacy Code: 300954
This subject will introduce students to Activity Based Funding and Casemix within the Australian healthcare system. It is designed to cover a variety of casemix classification systems for acute, non-admitted, sub-acute and mental health patients. Attention will be given to Diagnosis Related Groups (DRGs) with specific reference to the Australian Refined Diagnosis Related Groups (AR-DRGs) and the relationship to Activity Based Funding and purchasing models. Measuring performance with activity data and clinical costing methods will be explored. Emphasis will be placed on the impact of data quality as a critical component in achieving excellence in clinical costing, casemix and patient safety.
Level: Undergraduate Level 3 subject
Pre-requisite(s): PUBH 2004
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFS 3002 Advanced Clinical Classification (10 Credit Points)
Subject Details (p. 3738) Legacy Code: 300953
In this subject, the student will be introduced to disease notification and registration procedures. Mortality or cause of death coding will also be examined.Concepts of organising health information in a logical way to interface with an electronic information system will be investigated. The design and role of various health classification systems including the World Health Organizations Family of International Classifications (WHO FIC), specifically ICD 11 and casemix classification systems (e.g. AR DRGs, AN SNAP) will also be discussed. The practical component of this subject will focus on the student further developing their classification skills in the more complex areas of clinical coding including endocrine disorders, specifically diabetes mellitus, circulatory diseases and interventions, genitourinary disorders, specifically chronic kidney disease, obstetrics, paediatrics and congenital anomalies and trauma and procedural complications. The ACS will be applied in detail when classifying from complex discharge summaries and full clinical episodes of care. The student will also be exposed to electronic clinical coding tools that can be used in the classification process.
Level: Undergraduate Level 3 subject
Pre-requisite(s): PUBH 2004
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFS 3003 Artificial Intelligence (10 Credit Points)
Subject Details (p. 3740) Legacy Code: 301174
This subject provides basic studies in the major areas of artificial intelligence: search, knowledge representation, logic programming, machine learning and knowledge based systems, agent planning and learning. The first part of this subject will focus on the foundation of artificial intelligence: search algorithms and their implementations, game playing, logics and knowledge representation, and inference in reasoning systems. The second part will cover the principles of knowledge based systems (intelligent systems), planning, and machine learning. The subject plays an important part in preparing students for career paths as AI engineers, Machine Learning engineers and intelligent software engineers.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MATH 1006 AND
COMP 2009
Equivalent Subjects: LGYA 5740 Artificial Intelligence LGYA 5781 Knowledge Based Systems INFS 3013 Intelligent Systems
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFS 3005 Developing Web Applications with XML (10 Credit Points)
Subject Details (p. 3740) Legacy Code: 300111
This third year subject provides a comprehensive coverage of XML, related emerging technologies and their use in web applications. Students will be given opportunities to develop web based information systems which rely upon these technologies. This subject is heavily oriented to practical based work.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFS 3006 Emerging Trends in Information Systems (10 Credit Points)
Subject Details (p. 3741) Legacy Code: 300584
This subject provides a means for students to self-reflect on their future career and their possible involvement in the field of Information Systems and explore the changing nature of information systems in organisations via one of the following: engagements with local businesses, specifically crafted study tours or focused internships. In this subject students will study the role that emerging technologies play in selection, design and development of information systems. Students will be able to research and assess new technologies while networking and engaging with real life businesses, as well as develop and introduce effective strategies for achieving change and improvement that can be delivered by successfully implementing emerging technologies.
Level: Undergraduate Level 3 subject
Pre-requisite(s): INFS 1002 AND
COMP 2020
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFS 3007 Emerging Trends in Information Systems (Advanced) (10 Credit Points)
Subject Details (p. 3742) Legacy Code: 300942
This subject provides a means for students to self-reflect on their future career and their possible involvement in the field of Information Systems. In this advanced subject students will be required to undertake an individual but closely supervised research project. Students will explore the changing nature of information systems in organisations via one of the following: engagements with local businesses, specifically crafted study tours or focused internships. In this subject students will study the role that emerging technologies play in selection, design and development of information systems. Students will be able to research and assess new technologies while networking and engaging with real life businesses, as well as develop and introduce effective strategies for achieving change and improvement that can be delivered by successfully implementing emerging technologies. In addition, students in this subject will be required to present their findings in a form of an academic paper with a possibility of publishing.
Level: Undergraduate Level 3 subject
Pre-requisite(s): INFS 1002 AND
COMP 2020
Incompatible Subjects: INFS 3006 - Emerging Trends in Information Systems
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFS 3008 Formal Software Engineering (10 Credit Points)
Subject Details (p. 3743) Legacy Code: 300404
This subject is concerned with the design, development and maintenance of computer software systems. The subject focuses on current formal specification and system verification technologies and methodologies. Foundations of model checking such as Linear Temporal Logic and Computation Tree Logic, as well as a particular practical model checker SPIN will be thoroughly studied in this subject. The SPIN model checker with programming language PROMELA will be used for all software development and verification practices throughout this subject. The subject plays an important part in preparing students for career paths as software engineers and IT developers.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MATH 1006 AND
COMP 2009
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFS 3010 Healthcare Data Environments (10 Credit Points)
Subject Details (p. 3743) Legacy Code: 300955
This subject extends the student's knowledge of Health Informatics by introducing concepts relating to electronic communications within the health industry. It exposes students to a variety of environments used to create, store, transfer and deliver healthcare data. Areas include minimum data sets, data linkage, messaging concepts/ standards, terminologies, healthcare evaluation, electronic health records and related standards, security, privacy and trust, medico legal, epidemiology and population health together with TeleHealth/ TeleMedicine approaches, methodologies, tools and techniques.
Level: Undergraduate Level 3 subject
Pre-requisite(s): INFS 2004
Equivalent Subjects: INFS 3019 - e-Health
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFS 3011 Healthcare Software and Systems (10 Credit Points)
Subject Details (p. 3744) Legacy Code: 300956
In this subject students will learn the concepts underpinning the services computing paradigm of "bridging the gap between Business Services and IT Services". Services Computing technology includes Web services and serviceoriented architecture (SOA), business consulting methodology and utilities, business process modelling, transformation and integration. Students will learn, through the development of practical examples, how to utilise these technologies within a healthcare context
Level: Undergraduate Level 3 subject
Pre-requisite(s): INFS 2004
Equivalent Subjects: INFO 3009 Services Computing in Healthcare
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFS 3012 Information Systems Deployment and Management (10 Credit Points)
Subject Details (p. 3745) Legacy Code: 300572
This subject provides a detailed overview of system implementation and deployment stages taking into consideration the steps that are necessary to place a newly developed system into production. In this subject students learn the skills required for accurate requirements gathering, timely and effective system development, and successful implementation that would result in effective system performance. For this to be achieved successfully this subject also addresses the importance of project management skills. The subject also highlights the issues of transition processes after the development phase, the activities required in systems support and maintenance in the system's operational stage.
Level: Undergraduate Level 3 subject
Pre-requisite(s): COMP 1005 AND
INFS 1006 OR
COMP 1005 AND
DESN 1021
Equivalent Subjects: LGYA 5900 Enterprise Information Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFS 3017 Web Systems Development (10 Credit Points)
Subject Details (p. 3746) Legacy Code: 300583
In this subject students further develop their theoretical and practical skills in designing and developing web based information systems using systems analysis, programming, database, human computer interaction and web technologies skills that they have learnt in previous subjects. Current web development technologies and/or frameworks will be utilised to build a complex web information system in a collaborative web development team. Techniques of porting web systems to mobile platforms will also be explored.
Level: Undergraduate Level 3 subject
Pre-requisite(s): COMP 2020
Equivalent Subjects: LGYA 5737 Advanced Web Site Development
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFS 3018 Web Systems Development (Advanced) (10 Credit Points)
Subject Details (p. 3747) Legacy Code: 300902
This subject teaches state-of-the-art web frameworks for developing complex web systems. This subject utilises the skills of basic web programming, database design, and systems analysis that students have learnt in previous subjects. Major topics in this subject include Cascading Style Sheet (CSS) framework, Razor pages, Model-View-Controller (MVC) programming, object to relational database mapping, and authentication and authorization. Moreover, this subject trains students' collaborative skills by asking students to build a complex website in a small team. As an advanced subject, deeper topics such as custom data validation and error handling will be discussed.
Level: Undergraduate Level 3 subject
Pre-requisite(s): COMP 2020
Incompatible Subjects: INFS 3017 Web Systems Development
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFS 3020 Artificial Intelligence (Advanced) (10 Credit Points)
Subject Details (p. 3748)
Artificial Intelligence (AI) comprises the areas of: search, knowledge representation, logic programming, machine learning and knowledge based systems, agent planning and learning. This subject provides the students with the solid foundations on those areas. The first part will focus on the foundation of artificial intelligence: search algorithms and their implementations, game playing, logics and knowledge representation, and inference in reasoning systems. The second part will cover the principles of knowledge based systems (intelligent systems), planning, and machine learning. This subject also introduces students to current state-of-the-art AI systems for difficult (primarily NP-hard) search problems.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MATH1006
COMP2030
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFS 3021 Formal Software Engineering (Advanced) (10 Credit Points)
Subject Details (p. 3749)
This subject introduces the theory and practice of formal software engineering. It is concerned with the design, development, and maintenance of computer software systems. The subject teaches complex software system modelling and verification, it covers most fundamental and important topics in this area, such as currency system modelling, Linear Temporal Logic (LTL) and Computation Tree Logic (CTL) model checking algorithms, as well as the practical model checker system SPIN. Students will be also trained for practical problem solving by applying the theories, methodologies and tools taught from this subject.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MATH1006
COMP2030
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFS 7001 Advanced Healthcare Data Environments (10 Credit Points)
Subject Details (p. 3749) Legacy Code: 301028
This subject extends the students knowledge of Health Informatics by introducing concepts relating to electronic communications within the health industry. It exposes students to a variety of environments used to create, store, transfer and deliver healthcare data. Areas include minimum data sets, data linkage, messaging concepts/standards, terminologies, healthcare evaluation, electronic health records and related standards, security, privacy and trust, medico legal, epidemiology and population health together with TeleHealth/TeleMedicine approaches, methodologies, tools and techniques. Advanced skills and knowledge on researching into recent developments in specific sub-topics will be acquired through assessment components in the subject.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFS 7002 Advanced Healthcare Software and Systems (10 Credit Points)
Subject Details (p. 3750) Legacy Code: 301029
In this subject students will learn the concepts underpinning the services computing paradigm of "bridging the gap between Business Services and IT Services". Services Computing technology includes Web services and service-oriented architecture (SOA), business consulting methodology and utilities, business process modelling, transformation and integration. Students will learn, through the development of practical examples, how to utilise these technologies within a healthcare context. Advanced knowledge and knowledge of recent developments in specific sub-topics will also be acquired through practical components in the subject.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFS 7003 Advanced Topics in ICT (10 Credit Points)
Subject Details (p. 3751) Legacy Code: 300694
In the ever-changing landscape of Information and Communications Technologies (ICT), this subject places a strong emphasis on computer simulation as an essential tool for understanding and influencing complex systems in various domains, from Social Sciences, Innovation and Entrepreneurship, Management, Networking to Space Science. The subject unfolds over three topics with a primary focus on the practical and theoretical aspects of computer simulation. Students are equipped with the skills needed to develop, analyse, and apply simulations to real-world scenarios. Supplementing the core curriculum, guest lectures cover additional ICT trends in specialisation domains of individual students. Assessment methods comprise of a group simulation project portfolio, a report on state-of-the-art literature review and a report on societal perspective and application to specific domain area, where students demonstrate both simulation expertise and a grasp of broader ICT topics.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): COMP 7015
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFS 7004 Content Management Systems and Web Analytics (10 Credit Points)
Subject Details (p. 3752) Legacy Code: 300697
Content management systems (CMS) is a collective name for a wide range of web applications used by organisations/institutions/enterprises and social communities in establishing a continuing web presence. They may connect to backend systems and can provide complete web application services. This subject builds on both the conceptual and practical skills/knowledge to develop and utilise CMS's; in their management; in technical, legal, ethical and security issues; and in utilising web analytics to obtain business intelligence of their operation and impact.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 5891 Web Site Management and Security
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFS 7005 Smart Construction (10 Credit Points)
Subject Details (p. 3753) Legacy Code: 301189
This subject introduces the evolving smart technologies applicable to construction and facilitates critical thinking in how these technologies can be gainfully applied in the construction industry. It builds up understanding of the subject content from baseline principles of management information systems moving towards evolving new technologies such as digital engineering, Building Information Modelling, Blockchain, Artificial Intelligence among others. The modern construction enterprises are critically analysed to determine the application of suitable technologies for their advancement.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFS 7006 Software Testing and Automation (10 Credit Points)
Subject Details (p. 3753) Legacy Code: 300770
Software Testing and Automation will cover topics in two sections - Fundamentals of Software Testing and Test Automation. Section 1 will enable students to get a good understanding of different types of testing, the entire life cycle of Testing; how to design and prepare Test Cases, Test Data, execute these Test Cases and manage the defects. Students will also learn the importance of exclusive Test Environment for Testing and how to create a Traceability Matrix relating Requirements to Test Cases. Since approaches to testing software have also evolved with rigorous systematic approaches and advanced tools to automate some of the testing tasks. Section 2 will expose students to Test Automation using an automation tool, Object mapping and repository creation, Exception handling, logging and reporting, and Creation and Execution of Automation scripts.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFS 7007 Systems Analysis and Database Management Systems (10 Credit Points)
Subject Details (p. 3754) Legacy Code: 300977
The main purpose of this subject is to provide students with an opportunity to gain knowledge and experience of developing a business information system in a systematic way. This subject examines the general methodology of systems development life cycle, including different phases and various modeling techniques. The subject specialises in the development of a full systems analysis and design documentation by using system development methodologies, including data analysis and modeling methods. It extensively covers database design techniques where students will use a set of business rules obtained from requirements and use case analysis, and database implementation using a commercial database management system. At the same time, student learning, intercommunication and collaborative working skills are enhanced by student participation in tutorial presentations and group assignments.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFS 7008 Systems and Network Security (10 Credit Points)
Subject Details (p. 3756) Legacy Code: 300696
This subject is concerned with the protection of information in computing systems and when transferred over networks. It addresses techniques for securing networking applications and their security arrangements. Students gain an understanding of the fundamentals of the provision of security in networks and systems, as well as an appreciation of some of the problems that arise in devising practical security solutions.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 5882 - Distributed Systems and Network Security
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFS 7009 Web Technologies (10 Credit Points)
Subject Details (p. 3756) Legacy Code: 300693
This subject covers the technologies required for the construction and maintenance of web pages and web sites. It focuses on the web page and site design, markup languages, client-side technologies such as Cascading Style Sheets and Javascript, as well as server-side technologies such as web servers, database connectivity, and server side scripting. It also includes the use of multi-media, security, access rights, and the exploration of some of the latest technological wonders populated on the Internet. This subject is heavily orientated towards practical experience based on amplifying the theoretical concepts.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFS 9001 Higher Degree Research Thesis - Information Systems (80 Credit Points)
Subject Details (p. 3757) Legacy Code: 800222
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

Justice and Law Enforcement (JUST)

JUST 0001 Academic Skills for Criminal and Community Justice (WSTC Prep) (10 Credit Points)
Subject Details (p. 3759) Legacy Code: 700219
This subject introduces students to the essential academic skills required for success in tertiary studies. It employs an explicit pedagogy approach to teach students how to become independent, active, and reflective learners. The subject also includes essential research and writing skills specific to the social sciences and criminal justice.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

JUST 0002 Introduction to Australian Law Enforcement (WSTC Prep) (10 Credit Points)
Subject Details (p. 3760) Legacy Code: 700236
This subject provides a broad overview of law enforcement in Australia. It aims to equip students with an understanding of power, law and authority in relation to law enforcement agencies in Australia, as well as an overview of the operations and procedures of those agencies. The subject also provides students with an understanding of what it means to become a law enforcement professional in Australia.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

JUST 0003 Introduction to the Australian Legal System (WSTC Prep) (10 Credit Points)
Subject Details (p. 3760) Legacy Code: 700216
This subject is designed to develop an understanding of the Australian legal system for students whose courses involve law subjects relevant to their area of study, such as Business, Construction, Policing and Criminology. Students will investigate the role of the Australian legal system in contemporary society, and explore its relevance to their chosen career path through project-based assessments. The subject will also help students develop the language and communication skills necessary for further tertiary study.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: JUST 0005 - Introduction to the Australian Legal System – Fast Track (UWSC) JUST 0004 - Introduction to the Australian Legal System (UWSC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

JUST 0004 Introduction to the Australian Legal System (WSTC) (10 Credit Points)
Subject Details (p. 3761) Legacy Code: 900083
This subject is designed to develop an understanding of the Australian legal system for students whose courses involve law subjects relevant to their area of study, such as Business, Construction, Policing and Criminology. Students will investigate the role of the Australian legal system in contemporary society, and explore its relevance to their chosen career path through project-based assessments. The subject will also help students develop the language and communication skills necessary for further tertiary study.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: JUST 0003 - Introduction to the Australian Legal System (WSTC Prep)
JUST 0005 - Introduction to the Australian Legal System – Fast Track (UWSC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

JUST 1003 Policing Practices (10 Credit Points)
Subject Details (p. 3762) Legacy Code: 102314
This subject concentrates on the implications for police practice of the legislative framework, and police responsibilities including procedures, practices and methods. The content will focus on police decision-making and discretion, and the meaning and practice of police powers. The approach necessary for working with diverse communities is described and analysed, as are associated communication practices. Concepts examined include the appropriate use of force, the appropriate use of personal information and the characteristics of ethical policing practice. Although the key focus of learning relates to the New South Wales Police Force; examples are also drawn from Australian state and federal policing as well as international policing contexts.
Level: Undergraduate Level 1 subject
Equivalent Subjects: JUST 1004 - Policing Practices (UWSC) JUST 2004 - Contemporary Policing JUST 2003 - Contemporary Policing
Restrictions: Please see the Subject Details page for any restrictions for this subject

JUST 1004 Policing Practices (WSTC) (10 Credit Points)
Subject Details (p. 3763) Legacy Code: 700237
This subject concentrates on the implications for police practice of the legislative framework, police responsibilities including procedures, practices and methods. The content will focus on police decision-making and discretion, and the meaning and practice of police powers. The approach necessary for working with diverse communities is described and analysed, as are associated communication practices. Concepts such as the appropriate use of force, the appropriate use of personal information and the characteristics of ethical policing practice. By comparison, examples are drawn from Australian state and federal policing, and international contexts.
Level: Undergraduate Level 1 subject
Equivalent Subjects: JUST 1003 - Policing Practices JUST 2003 - Contemporary Policing JUST 2004 - Contemporary Policing (UWSC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

JUST 1005 Policing Practices (Block) (10 Credit Points)
Subject Details (p. 3764)
This subject concentrates on the implications for police practice of the legislative framework, police responsibilities including procedures, practices and methods. The content will focus on police decision-making and discretion, and the meaning and practice of police powers. The approach necessary for working with diverse communities is described and analysed, as are associated communication practices. Concepts such as the appropriate use of force, the appropriate use of personal information and the characteristics of ethical policing practice. By comparison, examples are drawn from Australian state and federal policing, and international contexts.
Level: Undergraduate Level 1 subject

JUST 2003 Contemporary Policing
JUST 2004 Contemporary Policing (UWSC)
JUST 1004 Policing Practices (UWSC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

JUST 2007 Human Rights, Human Services and the Law (Block Mode) (10 Credit Points)
Subject Details (p. 3764) Legacy Code: 101772
This subject aims to provide knowledge of human rights issues and laws which are particularly relevant to social workers and community welfare workers. It provides an opportunity for students to reflect upon the powers, responsibilities and obligations in their professional roles and acquire skills to promote justice for disadvantaged individuals and groups through advocacy and law reform.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYA 7655 - Human Rights Human Services and the Law (AREPMetro) WELF 2008 - Human Rights Human Services and the Law
Restrictions: Please see the Subject Details page for any restrictions for this subject

JUST 2011 Law of Commercial Obligations (10 Credit Points)
Subject Details (p. 3765) Legacy Code: 200554
This subject replaced by LAWS 2016 Law of Commercial Obligations from Spring 2023. This subject introduces students to the Australian laws governing transactions involving the transfer, registration and use of property. Focusing on commercial applications students will consider laws governing real, intellectual and personal property including topics such as registration requirements under the Torrens title system and the Personal Property Securities Act (PPSA) as well as enforceability and alienation of proprietary interests, leases and deeds, and subsidiary interests such as covenants and easements.
Level: Undergraduate Level 2 subject
Pre-requisite(s): LAWS 1001
Restrictions: Please see the Subject Details page for any restrictions for this subject

JUST 2013 Mediation (10 Credit Points)
Subject Details (p. 3766) Legacy Code: 200294
This subject will focus on the fundamental skills and theory of mediation, specifically in the context of the Australian legal system. It builds upon the more general introduction given in the subject Alternative Dispute Resolution (which is a prerequisite for this subject). This subject is experientially based, and students will be expected to participate in discussions, exercises and role-plays. The theory and practice of mediation will be critically considered, as will the social and legal contexts within which mediation is practised. The subject is presented with a multi-disciplinary, analytical and practical approach, including the perspectives of First Nations peoples. It will focus on mediation in different legal contexts such as commercial litigation, employment law and family law. Issues of culture, power, mediator neutrality and ethical dilemmas for the mediator will be considered. This subject is intended to be an introduction to the practice of mediation.
Level: Undergraduate Level 2 subject
Pre-requisite(s): LAWS 2001
Restrictions: Please see the Subject Details page for any restrictions for this subject

JUST 2020 Criminal Law for Policing (10 Credit Points)
Subject Details (p. 3766) Legacy Code: 102690
Knowledge of the criminal law is useful to state and federal police forces, government and private organisations, military police, private investigators, anti-corruption agencies, and in industries such as banking and insurance. All have a vested interest in preventing, detecting and investigating breaches of the criminal law through a policy framework. This subject introduces students to the common criminal offences encountered by police officers, with a focus on those investigating breaches of the criminal law rather than those prosecuting or defending. Common elements of Australian (particularly NSW legislation) and international jurisdictions and Commonwealth legislation are covered.
Level: Undergraduate Level 2 subject
Incompatible Subjects: CULT 2006 - Evidence Investigations and Police Intelligence
Restrictions: Please see the Subject Details page for any restrictions for this subject

JUST 3002 Assessment and Treatment of Offenders (10 Credit Points)
Subject Details (p. 3767) Legacy Code: 102068
This subject will provide an overview and analysis of the assessment and treatment of offenders from a range of perspectives. The assessment of violent, sexual, youth, gender, disabilities, cultural and institutional (i.e., policing and correctional) perspectives and developments will be considered in primarily Australian, but also, international contexts. There are equally variable treatment options considered including cognitive behavioural therapy, dialectical behavioural therapy, risk-need-responsivity, addictions, culturally appropriate, and alternatives such as music, animals, exercise, and art therapies. This subject will take a multi-disciplinary approach to the assessment and treatment of offenders, with particular attention to the inherent complexities and diversities associated with offender management.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

JUST 3003 Building Law (10 Credit Points)
Subject Details (p. 3768) Legacy Code: 200292
This subject is designed to provide students with a good understanding of the law and dispute resolution mechanisms that regulate the conduct of the building industry and building practices e.g. work health and safety, contract law, workers compensation, awareness of industrial relations and dispute resolution.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYB 9948 - Building Law 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

JUST 3006 Governance in Policing (10 Credit Points)
Subject Details (p. 3769) Legacy Code: 102169
In this subject students examine the nature and function of governance and accountability processes within policing and the broader private security industry. There is a focus on the commitment by governments to practices at an individual and organisational level that are based on accountability, contestability and continuous improvement. Issues such as human rights, ethics in policing, conflicts of interest, misconduct, and corruption and criminality within policing and related industries, are explored; and relevant explanatory theories are examined. Different models and levels of governance and accountability in Australia are also explored, as are the roles of professional standards subjects within police forces, external accountability agencies such as police integrity commissions, the ombudsman, and crime and misconduct agencies . These are compared with other approaches worldwide. Throughout the subject extensive use will be made of case studies and problem based learning where students will be invited to propose solutions to real world problems.
Level: Undergraduate Level 3 subject
Pre-requisite(s): CULT 3017 AND
CULT 2006 OR
CULT 2016
Restrictions: Please see the Subject Details page for any restrictions for this subject

JUST 3008 Independent Study (Law) (10 Credit Points)
Subject Details (p. 3770) Legacy Code: 200704
This subject will result in the writing of a research paper of 5,000 words on an approved topic in law. It is anticipated that the subject will be used in appropriate situations such as where the Law School has a Visiting Professor who is prepared to supervise independent study in an area related to their expertise. The intent is that the areas researched will focus principally on those areas identified by the Schools in its Research Strategy. These include (i) international and trans-national governance, (ii) elder law, (iii) law and medicine, (iv) revenue law and (v) professional services law.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

JUST 3011 Issues in the Criminal Justice System (10 Credit Points)
Subject Details (p. 3771) Legacy Code: 200701
This subject introduces candidates to the criminal justice system through an examination of justifications for punishment and the policy and practice of various criminal justice agencies. Attention is paid to the significance of race, class and gender, and how these variables impact upon justice within the criminal justice system. Where possible, visits to criminal justice agencies and a prison are organised, and practitioners are invited to seminars to enable candidates to gain a more practical understanding of the criminal justice system.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 2004
Restrictions: Please see the Subject Details page for any restrictions for this subject

JUST 3012 Policing Leaders Internship (10 Credit Points)
Subject Details (p. 3771) Legacy Code: 101969
The Policing Leaders Internship offers work experience to students enrolled in the Bachelor of Policing (Leadership) and Bachelor of Policing degrees within the School of Social Sciences. Internships can take place in a range of policing organisations such as the NSW Police Force, Police Association of NSW, and other member organisations of the Police Federation of Australia. Internship placements will require students to utilise a range of social science skills obtained throughout the Bachelor of Policing (Leadership) and Bachelor of Policing degree programs. This practical work schedule is supported by a reading program that examines different approaches to the study of policing organisations (their structures, functions and policies) and links these issues to the internship experience. The internship provides work at a host organisation for fourteen full days, totalling 105 hours. Typically, this internship component will be realised as one day per week for fourteen weeks, however an alternative spread of work may be agreed between the organisation, the student, and the subject coordinator. The subject is only offered in the Spring session of Level 3, and is worth 10 subjects of credit, which will be recorded as an elective on your degree transcript. There is only one lecture for this subject.
Level: Undergraduate Level 3 subject
Co-requisite(s): JUST 3006 AND
CULT 3001
Restrictions: Please see the Subject Details page for any restrictions for this subject

JUST 3014 Creating Criminal Justice Solutions (10 Credit Points)
Subject Details (p. 3772) Legacy Code: 102713
In this subject, students will consider some of the contemporary issues faced by the criminal justice system and the possible solutions to these real world problems. Using knowledge and skills drawn from their experience and study in their degree, students will be required to explore a critical policing or criminal justice issue and develop potential solutions. The subject aims to develop skills in problem analysis and managing the practical constraints faced by social scientists working in applied criminal justice and policing settings. Students will identify a critical issue (such as policing domestic violence, police engagement with CALD youth, criminal justice responses to cybercrimes), which they will explore individually and in groups throughout the semester. Students will become familiar with and learn to apply the policy/ practice development cycle to identify critical issues, survey existing research and practices, develop alternative strategies for resolving the identified problem, and evaluating the expected outcomes.
Level: Undergraduate Level 3 subject
Equivalent Subjects: JUST 3004 - Contemporary Issues in Criminal Justice and Policing
Restrictions: Please see the Subject Details page for any restrictions for this subject

JUST 6001 Comparative International Policing (10 Credit Points)
Subject Details (p. 3774)
This subject is designed to help you understand why international policing should be considered as an ongoing comparative global endeavour. This subject seeks to explore the possibilities and limitations of comparative international policing from a global perspective by examining policing case studies in both national contexts (for example comparing Australian police organisation's policing practices) and in international contexts (comparing global police organisation's policing practices). Within the framework of comparative criminology, we will examine the challenges of international comparative analysis and policing practice, compare national and international police organisations, and examine policing practices in relation to deviance and social response.
Level: Postgraduate Coursework Level 6 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

JUST 7006 Legal Internship (10 Credit Points)
Subject Details (p. 3774) Legacy Code: 201064
This subject provides an internship opportunity for Juris Doctor students to be placed in host organisations (including NGOs and public interest organisations, community legal centres, government departments, corporations, barristers' chambers or private law firms). Internships provide students with invaluable access to opportunities to critically analyse the law in context, to apply their formal learning about legal principles, to demonstrate professional skills and to gain exposure to different career pathways. Students who successfully complete the orientation requirements will spend twelve days throughout the semester at a host organisation. This will usually be done on a one- day (7 hours) per week basis. An intern's duties will generally consist of a combination of substantive tasks relating to law, policy and practice. Depending on the host organisation, these may include a combination of research, preparing background materials, briefing papers or research reports, liaising with other organisations, assisting in the provision of legal assistance and advice, observing interviews with clients, conferences with Counsel or in court proceedings, undertaking project and advocacy work, preparing/ giving presentations and assisting with administrative and editing work. The School will seek expressions of interest for the number of placements available with the School's partner host organisations each semester. Students are also able to arrange their own internships at organisations that are not currently host organisations, subject to the approval of the Director / Principal Solicitor and the agreement of the host organisation to complete the attendance and assessment requirements of the subject.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): LAWS 7072 AND
LAWS 7048 AND
LAWS 7047 AND
LAWS 7066
Incompatible Subjects: LAWS 3077 Legal Internship
Restrictions: Please see the Subject Details page for any restrictions for this subject

JUST 7007 Issues in the Criminal Justice System (10 Credit Points)
Subject Details (p. 3775) Legacy Code: 201068
This subject introduces candidates to the criminal justice system through a critical review of justifications for punishment and the policy and practice of various criminal justice agencies. Attention is paid to the significance of race, class and gender, and how these variables impact upon justice within the criminal justice system. Students will engage with contemporary issues and ongoing debates in criminal justice. Where possible, visits to criminal justice agencies and a prison are organised, and practitioners are invited to seminars to enable candidates to gain a more practical understanding of the criminal justice system.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): LAWS 7048 - Criminal Law
Incompatible Subjects: JUST 3011 - Issues in the Criminal Justice System
Restrictions: Please see the Subject Details page for any restrictions for this subject

Language and Literature (LANG)

LANG 0001 Academic Communication 1 (WSTC Prep) (10 Credit Points)
Subject Details (p. 3776) Legacy Code: 700198
This subject is designed to introduce students to academic culture as a culture of critical debate and equip students with the academic literacy skills necessary to perform successfully in this culture. In particular, the subject aims to help students access the conventions of academic English by focussing on attitudes to knowledge, and the ways in which ideas are structured and presented in academic texts and speech. The subject assists students to comprehend academic texts, identify key ideas and concepts, and identify and use the rhetorical moves used in academic texts. It also aims to help students compare and contrast ideas across texts, improve grammatical skills that relate to academic writing, summarise and synthesise information, and understand why, when and how to reference information.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: LANG 0030 - English for Tertiary Study 1 (UWSCFS) LANG 0036 - Introduction to Academic Communication 1 (UWSCFS) LANG 0006 - Academic English 1 (UWSC) LANG 0031 - English for Tertiary Study 1 (UWSC) LANG 0037 - Introduction to Academic Communication 1 (UWSC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 0002 Academic Communication 2 (WSTC Prep) (10 Credit Points)
Subject Details (p. 3777) Legacy Code: 700199
This subject is designed to expand upon and extend the academic literacy skills acquired in Academic Communication 1. The subject will assist students to develop the skills required to critically read and analyse a variety of texts, and to develop their research and writing skills to produce complex texts. There is a particular focus in this subject on critique and analysis in the process of understanding and producing academic texts.
Level: Undergraduate Level 0 Preparatory subject
Pre-requisite(s): LANG 0001
Equivalent Subjects: LANG 0032 - English for Tertiary Study 2 (WSTC Prep) LANG 0039 - Introduction to Academic Communication 2 (WSTC Prep) LANG 0007 - Academic English 2 (WSTC) LANG 0033 - English for Tertiary Study 2 (WSTC) LANG 0040 - Introduction to Academic Communication 2 (WSTC)

LANG 0003 Academic English (WSTC Prep) (10 Credit Points)
Subject Details (p. 3777) Legacy Code: 700056
This subject is designed to improve English proficiency for overseas and local students who wish to progress to university studies. In particular, the subject aims to help students access the conventions of academic English by focusing on attitudes to knowledge, the ways in which ideas are structured and presented and surface language correctness. In addition, the subject encourages students to develop strategies to maximise their learning and to reflect on their own learning styles.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: LANG 0005 - Academic English (UWSC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 0004 Academic English (WSTC Prep) Online (10 Credit Points)
Subject Details (p. 3778) Legacy Code: 700262
This subject is designed to improve English proficiency, across the four macro skills. The subject aims to help students access the conventions of academic English by focusing on attitudes to knowledge, the ways in which ideas are structured and presented and surface language correctness. In addition, the subject encourages students to develop strategies to maximize their learning and to reflect on their own learning styles.
Level: Undergraduate Level 0 Preparatory subject

LANG 0009 Academic Skills for Arts (WSTC Prep) (10 Credit Points)
Subject Details (p. 3781) Legacy Code: 700211
This subject is tailored to provide students in the Standard and Extended Diplomas in Arts and the Standard and Extended Bachelor of Arts (First Year Program) courses with an introduction to the Arts as a discipline area, and to the Bachelor of Arts as a degree. Its second aim is to help students develop the basic critical thinking skills necessary for study at university level, and to assist them in identifying and employing strategies to deal with many of the obstacles that make the transition to tertiary study difficult.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: LANG 0010 - Academic Skills for Arts (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 0010 Academic Skills for Arts (WSTC) (10 Credit Points)
Subject Details (p. 3781) Legacy Code: 900097
This subject introduces students to the essential academic skills required for success in tertiary studies. It employs an explicit pedagogy approach to teach students how to become independent, active, and reflective learners. The subject also includes essential research and writing skills specific to the arts.
Level: Undergraduate Level 0 Preparatory subject

LANG 0012 Academic and Professional Communication (WSTC Prep) (10 Credit Points)
Subject Details (p. 3783) Legacy Code: 700276
The ability to communicate clearly and persuasively to diverse audiences is a key professional prerequisite. This subject provides students with a preliminary understanding of a range of communication theories and practices necessary for academic work and effective professional communication including presenting in a professional setting. Both professional and societal cultural norms are explored as a contextual basis of the subject. The subject assists in the acquisition of professional skills through authentic and meaningful learning experiences and assessment. The subject assists students to comprehend academic and professional texts, identify key ideas and evidence, and identify and apply certain rhetorical moves which are common in academic communication. It also aims to help students to improve grammatical skills that relate to academic writing, summarise and synthesise information, and understand why, when and how to cite information. In addition, the subject encourages students to develop strategies to maximize their learning and to reflect on their own learning styles.

LANG 0045 The Structure of English (WSTC) (10 Credit Points)
Subject Details (p. 3804) Legacy Code: 900056
This subject is designed to improve the English proficiency across the four macro skills (reading, writing, speaking and listening) of University Foundation Studies students who wish to progress to university studies. Students need preparation for both understanding the content of Foundation Studies and being able to participate fully in all subjects. Such preparation includes making clear the way English is used according to purpose, audience and subject. Moreover, students need to develop their confidence and competence in using the language in academic contexts. By raising the language awareness of students, they will be able to transfer the learning skills across the subject areas. The course also seeks to address the particular speaking needs of overseas students.
Level: Undergraduate Level 0 Preparatory subject

Subject Details (p. 3814) Legacy Code: 100041
This subject is designed as an introduction to the Arabic language as well as the contemporary and popular culture of the Arabic-speaking people. It is intended for students who are at beginner level in Modern Standard Arabic in all four skills -listening, speaking, reading and writing. Components of this subject may be presented in English. Students with a background of study in the language need to obtain advice on their appropriate level of language study. During the first two weeks of class, the lecturer will monitor the performance of students and advise students who need to transfer to a higher class. Students should consult the Languages Academic Course Advisor or Subject Coordinator if they are unsure of their entry level.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 1003 Arabic 102 (10 Credit Points)
Subject Details (p. 3815) Legacy Code: 100042
This is a post beginner level subject in Arabic building on the knowledge and skills developed in Arabic 101. It aims to further develop listening, speaking, reading and writing skills in elementary Arabic. The subject includes a socio-cultural component which will examine aspects of the contemporary Arab world and its culture with a particular emphasis on the Arabic-speaking community in Australia. Students with a background of study in the language need to obtain advice on their appropriate level of language study. During the first two weeks of class, the lecturer will monitor the performance of students and advise students who need to transfer to a higher class. Students should consult the Languages Academic Program Advisor or Subject Coordinator if they are unsure of their entry level.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 1005 Chinese 101 (10 Credit Points)
Subject Details (p. 3816) Legacy Code: 100056
This subject is an introduction to the (Mandarin) Chinese language as well as aspects of Chinese culture which are necessary for language competency, using Pinyin and simplified characters. It is intended for students who are not from a Chinese-speaking background and who are at beginner level in all four skills -listening, speaking, reading and writing in Modern Standard Chinese. Components of this subject may be presented in English. Students with a background of study in the language need to obtain advice on their appropriate level of language study. During the first two weeks of class, the lecturer will monitor the performance of students and advise students who need to transfer to a higher class. Students should consult the Languages Academic Course Advisor or Subject Coordinator if they are unsure of their entry level.
Level: Undergraduate Level 1 subject

LANG 1011 Indonesian 101 (10 Credit Points)
Subject Details (p. 3818) Legacy Code: 102316
This is an introductory subject to the Indonesian language and culture, for students who commence a specialisation in Indonesian at a beginner level. The subject equips students with basic language skills, provides a basic knowledge about the ethnic, cultural and linguistic diversity of Indonesia. Students with a background of study in the language need to obtain advice on their appropriate level of language study and where required undertake brief spoken and written entry assessments. During the first two weeks of class, the lecturer will monitor the performance of students and advise students who need to transfer to a higher class. Students should consult the Languages Academic Course Advisor or Subject Coordinator if they are unsure of their entry level.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 1012 Indonesian 102 (10 Credit Points)
Subject Details (p. 3818) Legacy Code: 102326
This is the second and last introductory subject in the Indonesian Language Specialisation. The subject further develops the basic language and communication skills students acquired in Indonesian 101 through the use of activities designed to practice and reinforce Indonesian language and grammar skills. This subject will also introduce a greater focus on the socio-cultural and linguistic diversity found in Indonesia through online powerpoint lectures and accompanying notes. The subject focuses on four language skills (listening, speaking, reading and writing). Students with a background of study in the language need to obtain advice on their appropriate level of language study. During the first two weeks of class, the lecturer will monitor the performance of students and advise students who need to transfer to a higher class. Students should consult the Languages Academic Course Advisor or Subject Coordinator if they are unsure of their entry level.
Level: Undergraduate Level 1 subject
Pre-requisite(s): LANG 1011
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 1013 Introduction to Interpreting (10 Credit Points)
Subject Details (p. 3819) Legacy Code: 100194
This is a core subject for students in the Bachelor of Arts (Interpreting and Translation) course and an elective foundation subject for language key field of study in the BA. It introduces students to the theory and practice of Interpreting. Lectures are held in English for students of all the languages available. The tutorials are language specific in Arabic, Japanese, Mandarin or Spanish. This subject requires native or near-native proficiency in English and one of the languages offered in the subject.
Level: Undergraduate Level 1 subject
Equivalent Subjects: LGYB 2089 - Interpreting 1 LGYB 2090 - Interpreting 2 LGYB 2851 - Introduction to Interpreting
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 1014 Introduction to Linguistics (10 Credit Points)
Subject Details (p. 3820) Legacy Code: 101945
Language is an integral component of human experience. This subject is designed to raise students' awareness of the nature, structures and functions of language and language use. Students will gain the conceptual tools to do basic analysis of language at the levels of phonology, morphology, syntax, semantics and pragmatics. By providing a basic understanding and appreciation of language from different perspectives, the subject establishes points of contact between language, the humanities, and beyond.
Level: Undergraduate Level 1 subject
Equivalent Subjects: LANG 2032 - Linguistics
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 1015 Introduction to Literary Studies (10 Credit Points)
Subject Details (p. 3821) Legacy Code: 101907
This subject involves the close reading of literary texts to explore concepts about meaning-making including the use of language, narrative form, and issues of genre. The subject asks questions about the role and function of literature. For example: is literature's purpose to entertain readers, to provide them with emotional release, to represent the world, or to allow people to make meaning from their experience? The primary texts span three genres - fiction, poetry and drama. Students will learn about the different ways in which these literary forms are constructed and the contrasting ways in which they represent reality.
Level: Undergraduate Level 1 subject
Equivalent Subjects: COMM 1014 - English Text and Writing LANG 1016 - Introduction to Literary Studies (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 1016 Introduction to Literary Studies (WSTC) (10 Credit Points)
Subject Details (p. 3822) Legacy Code: 700288
This subject involves the close reading of literary texts to explore concepts about meaning-making including the use of language, narrative form, and issues of genre. The subject asks questions about the role and function of literature. For example: is literature's purpose to entertain readers, to provide them with emotional release, to represent the world, or to allow people to make meaning from their experience? The primary texts span three genres - fiction, poetry and drama. Students will learn about the different ways in which these literary forms are constructed and the contrasting ways in which they represent reality.
Level: Undergraduate Level 1 subject
Co-requisite(s): Students enrolled in the combined DiplomaBachelor courses listed below must pass all College Preparatory units listed in the course structure before progressing to the Year 2 units
Equivalent Subjects: COMM 1014 - English Text and Writing LANG 1015 - Introduction to Literary Studies

LANG 1020 Japanese 101 (10 Credit Points)
Subject Details (p. 3824) Legacy Code: 100085
This subject is an introduction to the Japanese language and some related culture. It is intended for beginner students only, who have never studied Japanese. This subject will cover the most basic level of the Japanese language in all four skills: listening, speaking, reading, and writing. The Japanese characters covered in this subject include the hiragana and katakana. Students with a background of study in the language need to obtain advice on their appropriate level of language study. During the first two weeks of class, the lecturer will monitor the performance of students and advise students who need to transfer to a higher class. Students should consult the Languages Academic Course Advisor or Subject Coordinator if they are unsure of their entry level.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 1021 Japanese 102 (10 Credit Points)
Subject Details (p. 3824) Legacy Code: 100086
This is a post beginner level subject in Japanese built on the knowledge and skills developed in Japanese 101 and aims to further develop listening, speaking, reading and writing skills in elementary Japanese. Students who believe they have sufficient background in Japanese to do 102 without having done 101 should apply by e-form for a Rule Waiver, explaining their situation, and have their language level evaluated. Students with a background of study in the language need to obtain advice on their appropriate level of language study. During the first two weeks of class, the lecturer will monitor the performance of students and advise students who need to transfer to a higher class. Students should consult the Languages Academic Course Advisor or Subject Coordinator if they are unsure of their entry level.
Level: Undergraduate Level 1 subject
Pre-requisite(s): LANG 1020
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 1028 The Sound of Language (10 Credit Points)
Subject Details (p. 3825) Legacy Code: 102042
The richness of information conveyed through spoken language owes its form to the combination and recombination of a small number of sounds. In this subject, students will learn the sounds of the world's languages (phonetics) and the ways in which they are combined to build words (phonology). Examples will be drawn from English, Australian Aboriginal languages, and a diverse range of languages spoken around the world. The subject includes an overview of Australian English phonetics and phonology.
Level: Undergraduate Level 1 subject
Incompatible Subjects: LANG 2045 - The Sound of Language
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 1029 Foundations of Academic English (10 Credit Points)
Subject Details (p. 3826) Legacy Code: 102735
Academic English is a particular kind of English that is used in academic writing and other professional contexts. This subject aims to improve students' written communication skills in academic English. The subject content includes English grammar as well as analytical reading and writing in academic English. Students will also learn to identify and to make cogent and sophisticated arguments using various written formats. Student work will be assessed in terms of theoretical and applied knowledge as well as in terms of writing skills.
Level: Undergraduate Level 1 subject
Equivalent Subjects: HUMN 1002 - Analytical Reading and Writing HUMN 1003 - Analytical Reading and Writing (WSTC) LANG 1031 - Foundations of Academic English (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 1030 Thinking Critically About Texts and Society (10 Credit Points)
Subject Details (p. 3827) Legacy Code: 102737
In this subject students explore the application of texts - including works of literature, philosophy and sociology/cultural studies - to our understanding of contemporary debates and challenges in order to develop critical thinking skills. Developing skills in textual analysis, this subject addresses topical issues and social problems so as to consider enduring questions such as 'What is the human?', 'What is the good life?', 'What is meaning and how do we make it?', and 'What is inequality and what should we do about it?'.
Level: Undergraduate Level 1 subject

LANG 1033 Cultural Crossroads: Understanding the World Through Texts (WSTC) (10 Credit Points)
Subject Details (p. 3830)
Reading literary texts is crucial to our ways of understanding the world and ourselves. This subject involves the close reading of literary texts to explore concepts about meaning-making, including the use of language, narrative form, and the issues of genre. In this subject you will acquire reading resilience and the ability to identify specific literary techniques. You will read a range of Australian texts and analyse how meanings in those texts are shaped by diverse cultural and international contexts. The subject will also guide you in the development of written communication skills in academic English, by teaching you how to identify and make critical arguments. Ultimately, you will learn about the different ways in which literary forms are constructed and the ways in which they represent reality.
Level: Undergraduate Level 1 subject

LANG 1034 Speaking Dharug and other Australian Indigenous Languages (10 Credit Points)
Subject Details (p. 3830)
Indigenous languages have a growing profile in Australian life. Indigenous languages now feature across the media, literature, performing arts, environment and land management, education, and the corporate world. Western Sydney University acknowledges Dharug people as the traditional custodians of the land where several campuses are located, but relatively few people have had the chance to learn Dharug language. In this subject, students - Indigenous, non-Indigenous Australian and international students alike - have the opportunity to learn about the richness of Australian Indigenous languages, by learning to speak, listen, read and write some Dharug. The subject showcases the diversities and commonalities across Australian Indigenous languages, cultures and histories, the how and why of language revitalisation activities, and ways that everyone can play a role.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 1035 Australian Indigenous Languages Revitalisation (10 Credit Points)
Subject Details (p. 3831)
Where do iconic Australian words and place names come from? Words like koala, waratah, kangaroo, Parramatta belong to the original languages of Australia. We all know a few words like this, but we often don't know much about the languages to which they belong. In this subject you will learn about the current revitalisation of Australian Indigenous languages that reflect national and international movements of decolonisation recognising the rich knowledges, cultures and histories of First Nations peoples. Students - Indigenous, non-Indigenous Australian and international students alike - will have the opportunity to learn from the achievements of Indigenous people who are actively revitalising the languages of south-eastern Australia.

LANG 2004 Arabic 201 (10 Credit Points)
Subject Details (p. 3832) Legacy Code: 102019
This is an intermediate level subject in Arabic intended for two groups of students: (a) students of English speaking backgrounds or other language backgrounds who have achieved a degree of competence in the language at least at the HSC Level; and (b) Arabic language background students whose education has been in English as the medium of instruction in all subjects other than Arabic and who, therefore, have some gaps in their knowledge of Arabic, particularly in situations requiring a more formal language register. The subject is designed to consolidate and advance the acquisition of Modern Standard Arabic for post beginner learners of the language. While consolidating language skills, students will also develop further knowledge of the Arab culture. A range of DELL (Digitally Enhanced Language Learning) activities are utilised as part of the blended learning mode of delivery for this subject. NOTE: Students enrolling in this subject as part of a major or sub major in Arabic must enrol in Arabic 202 at the same time. Students with a background of study in the language may need to take higher level subjects. During the first two weeks of class, the lecturer will monitor the performance of students and advise students who need to transfer to a higher class. Students should consult the Languages Academic Course Advisor or Subject Coordinator if they are unsure of their appropriate level.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LANG 2052 - Language and Communication Skills 2A Arabic
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 2006 Arabic 202 (10 Credit Points)
Subject Details (p. 3832) Legacy Code: 102020
This subject further develops students' language skills acquired in Arabic 201 to equip students with more sophisticated language skills and knowledge. It aims to extend learners' skills within a range of topics and to cover basic structural aspects of the language, at a post-beginner level. NOTE: Students enrolling in this subject as part of a major or sub major in Arabic must enrol in Arabic 201 at the same time. Students with a background of study in the language may need to take higher level subjects. During the first two weeks of class, the lecturer will monitor the performance of students and advise students who need to transfer to a higher class. Students should consult the Languages Academic Program Advisor or Subject Coordinator if they are unsure of their appropriate level.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LANG 2052 - Language and Communication Skills 2A Arabic
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 2007 Arabic 203 (10 Credit Points)
Subject Details (p. 3833) Legacy Code: 102021
This is one of the components of the Arabic major and minor. It assumes an intermediate level of competence in the language. It aims to extend (intermediate) learners' skills with a particular focus on listening, speaking and oral interaction in Arabic, in a range of situations, by exposing students to realistic interactions, including the Arabic-Australian community. The subject also aims to extend the learners' lexicon and structures, particularly those used in talking about current personal experiences as well as events, and popular Arab personalities. NOTE: Students enrolling in this subject as part of a major or minor in Arabic must enrol in Arabic 204 at the same time. Students with a background of study in the language may need to take higher level subjects. During the first two weeks of class, the lecturer will monitor the performance of students and advise students who need to transfer to a higher class. Students should consult the Languages Academic Program Advisor or Subject Coordinator if they are unsure of their appropriate level.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LANG 2053 - Language and Communication Skills 2B Arabic

LANG 2008 Arabic 204 (10 Credit Points)
Subject Details (p. 3834) Legacy Code: 102022
This is an intermediate subject in the Arabic major or minor. It provides an extension and consolidation of reading comprehension, and writing skills, as well as lexical enrichment in Modern Standard Arabic, particularly its range of written registers and their linguistic characteristics. The content for reading and writing activities will be selected from newspapers, magazines, short stories and other printed media. NOTE: Students enrolling in this subject as part of a major or minor in Arabic must enrol in Arabic 203 at the same time. Students with a background of study in the language may need to take higher level subjects. During the first two weeks of class, the lecturer will monitor the performance of students and advise students who need to transfer to a higher class. Students should consult the Languages Academic Program Advisor or Subject Coordinator if they are unsure of their appropriate level.

LANG 2009 Chinese 201 (10 Credit Points)
Subject Details (p. 3835) Legacy Code: 102024
This is a post-beginner subject for intermediate level study of modern Chinese (Mandarin) language and its culture, suitable for Post HSC entry or an equivalent level. This subject is designed for students who take it as part of the Chinese major/sub-major or as an elective subject. It will further develop the Pinyin system and the four core skills (listening, speaking, reading and writing), with a particular focus on core vocabulary and fundamental structures, using approximately 500 simplified Chinese characters. Aspects of culture and language acquisition strategies are explored through research projects. Differentiated learning and assessment tasks and multimedia activities are utilised to cater to non-background and quasi-background learners. The subject is not suitable for background speakers (i.e., who have completed formal secondary education where Mandarin Chinese is used as an official language and also the language of instruction at the School). Note: Students enrolling in this subject as part of a major or sub major in Chinese are encouraged to enrol in Chinese 202 at the same time.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LANG 2049 - Language and Communication Skills 2A Chinese
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 2010 Chinese 202 (10 Credit Points)
Subject Details (p. 3836) Legacy Code: 102025
This is a post-beginner subject for intermediate level study of modern Chinese (Mandarin) language and its culture suitable for Post Beginners or an equivalent level. Students can take it as part of a major/sub-major or as an elective subject. It aims to develop listening and speaking skills in a real communicative setting. Students will learn Pinyin, vocabulary, expressions and grammatical structures in a wide range of daily situations. In addition, students will have the chance to learn and research on some interesting aspects of Chinese culture. Differentiated learning and assessment tasks and multimedia activities are utilised to cater to non-background and quasi-background learners. The subject is not suitable for background speakers (i.e., who have completed formal secondary education where Mandarin Chinese is used as an official language and also the language of instruction at the School). Note: Students enrolling in this subject as part of a major or sub major in Chinese are encouraged enrol in Chinese 201 at the same time.

Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 2011 Chinese 203 (10 Credit Points)
Subject Details (p. 3837) Legacy Code: 102026
This is an intermediate level subject of modern Chinese (Mandarin) language and its culture suitable for students who undertake it as part of the Chinese major or sub-major or as an elective subject. It further develops students' language skills acquired in Chinese 201 and 202 to a level of proficiency to satisfy their general social needs. While students' aural/oral skills are further developed, emphasis is placed on reading and writing. A working knowledge of approximately 800 simplified Chinese characters is developed. Aspects of Chinese culture and society are explored through research work. Differentiated learning and assessment tasks and multimedia activities are utilised to cater to non-background and quasi-background learners. The subject is not suitable for background speakers (i.e., who have completed formal secondary education where Mandarin Chinese is used as an official language and also the language of instruction at the School). Note: Students enrolling in this subject as part of a major or sub major in Chinese are encouraged enrol in Chinese 204 at the same time.

LANG 2013 Comedy and Tragedy (10 Credit Points)
Subject Details (p. 3839) Legacy Code: 100900
This subject will examine the theory, writing and performance of Western Tragedy and comedy. The generic terms "tragedy" and "comedy" will provide signposts for both historical and theoretically modern approaches to a range of plays. Texts selected from the period since 1950 may represent comedy and/or tragedy in popular culture, and may have been written for media other than the stage, such as television and film.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYB 4589 - Comedy and Tragedy
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 2014 Community Translation (UG) (10 Credit Points)
Subject Details (p. 3840) Legacy Code: 100191
Community Translation facilitates written communication between public services and community members with low literacy in the official or mainstream language(s) of a given country or region. The subject covers the translation of general awareness material (e.g. healthcare, civic responsibilities, social services, etc.) as well as the translation of official documents. Students develop skills in producing target texts in styles appropriate to specific communities and groups, and to the content and function of the source text. They also develop skills in researching and using appropriate specialist terminology, editing and revising, and producing camera-ready documents. On the basis of these skills, the subject further develops students' ability to reflect upon translation in terms of strategies and appropriateness in relation to the target audience as well as make critical written and oral assessment of relevant translations. Subject to demand, the subject will be available for Arabic, Japanese, Mandarin and Spanish.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 2015 Cultural History of Books and Reading (10 Credit Points)
Subject Details (p. 3841) Legacy Code: 101967
This Subject explores the globally-transformative social and cultural changes associated withs books and reading from the European print revolution of the mid-fifteenth century to the present day. It considers the key innovations and continuities in the shift from oral and medieval manuscript cultures to printed books, before going on to explore the societal impact of the mass-produced printed book. Key topics include the relationship between printed books and the Protestant reformation, scientific revolution and Enlightenment; the 'reading revolution' and rise of the novel and popular literacy; reader responses; the emergence of the public sphere and mass media, and their links to consumer culture, colonialism and political modernity. Taking a culturally comparative approach wherever possible, the Subject also discusses indigenous peoples' encounters with print, attempts to control print through censorship and the future of the printed book. Assessment tasks and class activities will provide students with the opportunity to engage with printed artefacts and to hone their research skills using a variety of cutting-edge digital resources to explore print culture and reader response.

LANG 2021 Indonesian 201 (10 Credit Points)
Subject Details (p. 3842) Legacy Code: 102319
This is a Level 2 subject in the Indonesian Specialisation. It introduces students to formal and informal registers of Indonesian and exposes them to relatively complex aspects of Indonesian grammar such as affixes. Students will study the use of spoken language mainly through participation in dialogues and discussion. More formal registers will be studied through reading and writing. Communicative settings will include fields such as health, education, and tourism.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 2022 Indonesian 202 (10 Credit Points)
Subject Details (p. 3842) Legacy Code: 102327
This is a Level 2 subject in the Indonesian Specialisation. It builds on language skills developed in Indonesian 201 to extend students' use of formal and informal registers of Indonesian and further develop their knowledge of Indonesian communities, cultures and religions. The subject covers the four language skills (reading, listening, speaking and writing) with a special focus on listening and speaking.
Level: Undergraduate Level 2 subject
Pre-requisite(s): LANG 1012
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 2023 Interpreting Skills (10 Credit Points)
Subject Details (p. 3843) Legacy Code: 100193
This is a core component of the Bachelor of Arts (Interpreting and Translation) and a pool subject in some postgraduate courses. The subject is aimed at developing essential skills in interpreting and deals with the specialised technical skills necessary for the different modes of interpreting: dialogue, consecutive, simultaneous, and sight translation. Given the large amount of independent practice needed to develop competence in interpreting, it pays special attention to the teaching of techniques for autonomous learning. Lectures are held in English for students of all the languages available. The tutorials are language specific in Arabic, Japanese, Mandarin or Spanish.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 2024 Japanese 201 (10 Credit Points)
Subject Details (p. 3844) Legacy Code: 102028
This subject is designed as a post-beginner level language and culture subject intended for students who have studied this language to at least HSC level or equivalent. This subject focuses on the development of the grammatical structures and vocabulary in such areas as using polite and plain style of the language, verb conjugation for expressing conjecture, adverbial clauses indicating specific times and places, conditional, etc. The knowledge of kanji is increased to 260 characters. The subject is not suitable for background speakers (i.e., who have completed formal secondary education where Japanese is used as an official language and also the language of instruction at the School). Note: Students enrolling in this subject as part of a major or sub major in Japanese are encouraged to enrol in Japanese 202 at the same time.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LANG 2028 - Language Communication Skills 2A Japanese
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 2025 Japanese 202 Speaking and Listening (10 Credit Points)
Subject Details (p. 3845) Legacy Code: 102029
This subject is normally undertaken concurrently with, or after, Japanese 201. It is designed to develop and expand speaking and listening skills based on the grammatical knowledge developed in Japanese 201. The range of communicative transactions is increased so that more sophisticated exchanges are possible, for instance when using polite and plain (i.e. casual) styles of speech, describing one's conjecture, stating an opinion, asking for explanation, etc. Cultural and social understanding of Japanese society is also fostered. The subject is not suitable for background speakers (i.e., who have completed formal secondary education where Japanese is used as an official language and also the language of instruction at the School). Note: Students enrolling in this subject as part of a major or sub major in Japanese are encouraged enrol in Japanese 201 at the same time.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LANG 2028 - Language Communication Skills 2A Japanese
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 2026 Japanese 203 (10 Credit Points)
Subject Details (p. 3846) Legacy Code: 102030
This subject further develops students' language skills acquired in Japanese 201 to equip students with more sophisticated language skills and knowledge. Among the topics covered in Japanese 203 are: stating a plan or intention, making a suggestion in the plain form, offering advice, indicating the degree of certainty, describing a change in state, indicating causes of reasons, using of the passive and the imperative, etc. By the end of this subject, students will be able to read and write approximately 380 kanji characters. The subject is not suitable for background speakers (i.e., who have completed formal secondary education where Japanese is used as an official language and also the language of instruction at the School). Note: Students enrolling in this subject as part of a major or sub major in Japanese are encouraged to enrol in Japanese 204 at the same time.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LANG 2031 - Language Communication Skills 2B Japanese
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 2033 Literature and Decolonisation (10 Credit Points)
Subject Details (p. 3847) Legacy Code: 102572
Do you know why nearly a hundred new nations were founded between 1945 and 1970? Have you ever wondered who Mahatma Gandhi or Ho Chi Minh were? Why would you challenge authority 'non-violently'? How do you write creatively in a language that has been imposed through colonial conquest? These are all questions connected to decolonisation: the explosive process by which the great modern European empires were dissolved and scores of new nations were formed - from Indonesia to Algeria, India to Nigeria, Jamaica to Vietnam. With this process came a surge of creative energy, as formerly colonised peoples set out to produce new ways of writing and thinking. We will read classic anti-colonial politicians like Gandhi and Frantz Fanon and writers from different decolonising regions including India, Africa, South-East Asia, the Caribbean, the Middle East and Australia.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LANG 3064 - Literatures of Decolonisation
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 2034 Meaning in Language (10 Credit Points)
Subject Details (p. 3847) Legacy Code: 102489
This subject introduces students to how meaning is constructed in language. It gives an overview of context-free meaning (semantics) and context-dependent meaning (pragmatics). Students will learn how we can encode and access meaning in communication and how this can be studied scientifically. This subject builds on and expands knowledge and methods developed in other linguistics subjects, especially Structure of Language and Pragmatics. It further connects to more advanced subjects, in particular Historical Linguistics, Second Language Acquisition, Bilingualism, Sociolinguistics and Discourse Analysis.
Level: Undergraduate Level 2 subject
Pre-requisite(s): LANG 1014
Equivalent Subjects: LANG 2038 - Pragmatics
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 2035 Methods of Reading (10 Credit Points)
Subject Details (p. 3848) Legacy Code: 101909
This subject aims to build the skills of reading, interpretation and theoretical and contextual analysis that are critical to the study of literary texts, skills that define scholarship in the discipline of English. Focusing on a sustained and careful study of a small number of literary texts the subject provides an in-depth exploration of technical approaches to close reading, cultural and historical contexts for the production and reception of the texts, and different theoretical approaches to their interpretation. The selected primary texts (one novel, one play and a selection of poems) will span two or three literary/historical periods.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 2036 Modern Australian Poetry and Poetics (10 Credit Points)
Subject Details (p. 3849) Legacy Code: 101978
This subject examines Australian poetries of the 20th and 21st centuries in context of parallel events in international poetry. It looks at histories and definitions of poetic 'innovation' and asks how Australian poetry has dealt with different waves of modernism. It studies dialogues between local and international avant-gardes, and surveys new poetic genres emerging in online environments. The subject aims to enrich students' critical understanding of poetry and poetics, and where relevant, to enhance their own creative writing practice. Topics addressed include poetic tradition and counter-tradition; form and experiment; colonialism, exile and belonging; literary communities; critical histories; digital and e-poetries.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYB 0215 - Poetry and Poetics LGYA 0927 - Poetry and Poetics
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 2037 Pragmatics (10 Credit Points)
Subject Details (p. 3850) Legacy Code: 102490
This is an optional subject of the Linguistics Major which introduces students to pragmatics, the study of language use in context. It combines theoretical elements with practical applications through examples, exercises and authentic data analysis, which enable students to understand the significance of this field of linguistics to language professions, such as interpreting and translation and language teaching.
Level: Undergraduate Level 2 subject
Pre-requisite(s): LANG 1014
Equivalent Subjects: LGYA 1435 - English Semantics and Pragmatics
Incompatible Subjects: LANG 2038 - Pragmatics
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 2039 Sexual/Textual Politics in Victorian Women's Writing (10 Credit Points)
Subject Details (p. 3850) Legacy Code: 101964
This subject will set Victorian women's writing in its historical, intellectual, publishing and cultural contexts, with particular emphasis on the multiple genres of writing within which women engaged in the nineteenth century. Using a broad range of short fiction, this subject will investigate topics such as gender and sexuality, colonialism and empire, and race and identity. It will also explore texts from across Australia, Britain, North America and Ireland and ask students to consider how these texts are still relevant to contemporary society and intellectual thinking.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 2040 Spanish 201 (10 Credit Points)
Subject Details (p. 3851) Legacy Code: 102032
This is post-beginner subject suitable for Post Beginners HSC entry or equivalent, within the Spanish programme, designed for students who take it as a major, sub-major or elective. Within the Spanish major or sub major set, it is normally taken concurrently with Spanish 202. The subject will further develop all language skills, listening, speaking, reading and writing with particular focus on a core vocabulary and fundamental structures. Cultural and social understanding is also fostered through research projects on specific cultural or social aspects that are of interest to students. A range of DELL (Digitally Enhanced Language Learning) activities are utilised for this subject. NOTE: Students enrolling in this subject as part of a major or sub major in Spanish must enrol in Spanish 202 at the same time.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LANG 2029 - Language and Communication Skills 2A Spanish
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 2041 Structure of Language (10 Credit Points)
Subject Details (p. 3851) Legacy Code: 101948
This subject aims to equip students with knowledge about the structural aspects of language. Students will learn to describe, analyse and reflect on the structure and meaning of linguistic elements from word to sentence level. Using examples from different languages, including Australian Indigenous languages and other languages spoken in Australia, this subject will provide students with an understanding of how structure and meaning are connected, how they link up with other areas of linguistics, and how research in this field is relevant to the linguistic ecology of Australia.
Level: Undergraduate Level 2 subject
Co-requisite(s): LANG 1014 AND
LANG 1028
Equivalent Subjects: LANG 2046 - The Structure of English
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 2044 The Gothic (10 Credit Points)
Subject Details (p. 3852) Legacy Code: 102507
This subject examines the emergence and development of Gothic literature in English. It studies the rise of Gothic fiction in the late-eighteenth century, and the evolution of Gothic genres in the nineteenth and twentieth centuries. Students will examine key works of Gothic poetry and narrative fiction - such as vampire narratives - in order to consider the social, political and intellectual contexts for Gothic literature. The subject considers how Gothic forms negotiate cultural anxieties, such as those involving race, gender, sexuality, religion, scientific development and class. Set texts from the twentieth century onwards may include works from television, theatre and film.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 2047 Translation Technologies (10 Credit Points)
Subject Details (p. 3853) Legacy Code: 101302
This subject aims to equip students with the theoretical and practical knowledge needed to effectively apply information and communication technologies to translation and other language related tasks. It focuses on translation memory and terminology management systems, and on the workflow involved in the handling of multilingual content. Emphasis is also put on uses of the Internet as a resource tool, and to the principles of controlled language for text to be processed by machine translation (MT). Tutorials will be conducted in a computer lab where students will familiarize themselves with leading computer-assisted translation (CAT) software applications.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYA 0191 - Translation Skills
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 2048 Working Grammar (10 Credit Points)
Subject Details (p. 3853) Legacy Code: 102414
How does grammar work? And how do languages function in different social contexts? This subject introduces students to a functional analysis of the English language, and relates the structure of English to its use in cultural and social contexts. It offers students of literature and training teachers an introduction to theories and forms of analysis that support much English language education in Australia. The functional model of language is used in a range of fields - including teaching in schools and universities, teaching ESL/EFL, and broader language research. Students will apply the functional analysis of English to a range of spoken and written texts from diverse literary, social and cultural contexts. This will help to provide grammatical skills and work-readiness, especially for students training to be professional teachers.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 2050 Medieval and Early Modern Literature (10 Credit Points)
Subject Details (p. 3854) Legacy Code: 102626
While films and books related to the fantastic and supernatural (like Game of Thrones, Lord of the Rings and Harry Potter) are extremely popular, it is sometimes forgotten that these works draw heavily on historical literary forms and works that engaged directly with the cultures from which they emerged. This subject will look at examples of literature from the Medieval and Early Modern periods (between 1000 and 1800) and the social and cultural worlds they both represented and supported. It will ask how these works still inform how we understand and represent things today.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 2051 Writing and Reading Sci-Fi and Fantasy (10 Credit Points)
Subject Details (p. 3855) Legacy Code: 102772
This subject covers the basic creative writing techniques for 'worldbuilding' in the genres of science fiction and fantasy. Through guided reading and writing you'll explore what happens when ordinary human predicaments are deepened and complicated when represented as happening in a world not our own: one with different physical laws, belief systems, technologies and cultural practices. In a workshopping environment, you will build outward from a 'story-bud' about an alternative or alien world to explore the logic of that world and its implications for the creation of believable characters, setting, action and - overall - the development of a successful story.
Level: Undergraduate Level 2 subject
Incompatible Subjects: LANG 3090 - Writing and Reading Sci Fi and Fantasy
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 2054 Japanese 204: Speaking and Listening (10 Credit Points)
Subject Details (p. 3856) Legacy Code: 102804
This subject is undertaken concurrently with, or after, Japanese 203. It is designed to further develop and expand speaking and listening skills on the basis of grammatical structure introduced in Japanese 203 and increase the range of communicative transactions developed in Japanese 202 so that more sophisticated exchanges are possible when stating a plan or intention, making a suggestion, offering advice, indicating the degree of certainty, describing a change in state, indicating causes, using the passive and the imperative, etc. This subject will also present further aspects of contemporary Japanese culture and society. The subject is not suitable for background speakers (i.e., who have completed formal secondary education where Japanese is used as an official language and also the language of instruction at the School). NOTE: Students enrolling in this subject as part of a major or sub major in Japanese are encouraged to enrol in Japanese 203 at the same time.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LANG 2031 - Language Communication Skills 2B Japanese LANG 2027 - Japanese 204
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 2055 English Text (10 Credit Points)
Subject Details (p. 3856) Legacy Code: 102812
The English Language is always used in context. The contexts in which we use English require us to use the language in specific ways. This subject introduces students to the analysis of English texts in context. Students will learn how to analyse text structure and purpose, and they will learn how to analyse the systems of the English language as they are used to facilitate context specific and context appropriate communication. Working between models of social contexts and the language level systems of English, students will develop a greater level of skill in using English for exposition, explanation, reporting, recounting and narrating.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 2056 Writing Industries (10 Credit Points)
Subject Details (p. 3857)
Writing Industries takes a close look at the business of writing. Topics include literary cultures and economies, community activism, social media and author branding, Young Adult Literature, literary controversies and what Australian authors sell into overseas markets. Students will look closely at diverse literary organisations and festivals, and how they shape cultures and support writers. They will explore the role of editors, critics and publishers – from DIY zine-making to independent presses and large commercial ventures. Students will gain insights into building writing careers, working in the arts and publishing industries, community building and culture-making, and teaching practices of writing.
Level: Undergraduate Level 2 subject
Equivalent Subjects: COMM 2014 - Editing and Publishing
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 2057 Literature and Environment (10 Credit Points)
Subject Details (p. 3858)
Present-day climate change is anthropogenic (human-caused), but not all humans bear equal responsibility. The planetary crises climate change has caused directly impact on the Earth's human and non-human worlds. Introducing an environmental humanities approach, this subject examines literature's role in conceiving, representing and understanding the 'environment' and, by extension, the interrelation of human and natural worlds. Using place-based reading practices, students will reflect on Greater Western Sydney's relative vulnerability to climate change. Reading a diversity of texts, with a focus on First Nations stories and writing, students will be encouraged to think about how we engage with human and natural communities beyond the classroom. Students will reflect on the cultures, practices and worlds that they identify in environmental writing and consider whether these enable climate justice in the present.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 2058 Race in Literature (10 Credit Points)
Subject Details (p. 3858)
This subject explores a selection of modern literary works that focus on racial difference. Readings will facilitate students learning on how notions of race have shifted over time, giving particular attention to how mixed-race people challenge racial categorisation. Readings may include one or more national literatures, such as American or Australian literature.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LANG 3068
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3001 19th Century American Literature (10 Credit Points)
Subject Details (p. 3859) Legacy Code: 101796
This subject focuses on literature from the American Renaissance through to the end of the Civil War. Issues to be examined will include some of the following: the construction of a national literature, the ideology of American Exceptionalism, the tension between the religious and the secular, and the clash between freedom and slavery. Texts may include fiction, poetry and drama.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3002 20th Century American Literature (10 Credit Points)
Subject Details (p. 3860) Legacy Code: 102099
This subject explores twentieth century American literature. Issues to be examined include some of the following: the construction of a national literature, struggles for justice and human rights, the intersection of race, gender and sexuality, the ideology of American Exceptionalism, the rise and fall of 'The American Dream', place and time in American literature. A range of text types will be taught.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 0895 - American Literature LGYA 0671 - Classic American Literature LGYA 0672 - Modern American Literature LGYA 0527 - American Literature
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3003 Accreditation Studies (UG) (10 Credit Points)
Subject Details (p. 3860) Legacy Code: 101943
This is a compulsory subject in the Bachelor of Arts (Interpreting and Translation) and the Bachelor of Arts (Interpreting and Translation) Dean's Scholars. It aims to provide practice and constructive feedback to students preparing for the accreditation examination. A pass in the subject in at least one of the following options: Interpreting, Translation into English, or Translation from English, with a minimum mark of 70%, will make students eligible for NAATI accreditation on completion of the rest of the requirements of the course.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LANG 1013 AND
LANG 1017
Co-requisite(s): LANG 3049 OR
LANG 1014
Equivalent Subjects: LGYA 0187 - Accreditation Studies (UG) LANG 3047 - Interpreting Accreditation Studies UG LGYA 1667 - Translation Accreditation Studies UG

LANG 3004 Advanced Standing for Linguistics 310 (10 Credit Points)
Subject Details (p. 3861) Legacy Code: 102471
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3009 Arabic 301 (10 Credit Points)
Subject Details (p. 3861) Legacy Code: 101949
This is the first of a series of two subjects that aim to provide a thorough review of comprehension, speaking, reading and writing skills, as well as grammar and vocabulary of Modern Standard Arabic, its range of registers and its linguistic characteristics. This subject is intended for students who have knowledge and skills in Arabic equivalent to two years of tertiary education in the language and who wish to consolidate, develop and improve these skills.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3011 Arabic 302 - Arabic Advanced Language and Grammar (10 Credit Points)
Subject Details (p. 3862) Legacy Code: 100048
This is the second of a series of two subjects that aim to provide a thorough and more advanced review of comprehension, speaking, reading and writing skills, as well as grammar and vocabulary of modern Standard Arabic, its range of registers and its linguistic characteristics. This subject is intended for students who have knowledge and skills in Arabic equivalent to Arabic 301 and who wish to consolidate, develop and improve these skills. This subject is mandatory for students who wish to pursue a specialisation in Arabic.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3012 Arabic 303: Advanced Writing Skills (10 Credit Points)
Subject Details (p. 3863) Legacy Code: 100049
This subject is aimed at those who have successfully finished LANG 2006 - Arabic 202, or have an advanced speaking and writing proficiency in Modern Standard Arabic. It is one of the obligatory subjects for students intending to graduate with Arabic as a major or minor. It seeks to develop the writing skills to prepare students to make professional use of the language, and it is particularly recommended for those who wish to involve themselves in areas such as language teaching and translation. Students will be introduced to a full range of text types and language purposes. They will be guided to analyse, interpret and evaluate passages provided, and will be encouraged to extend their ability by experimenting with a variety of writing styles.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3013 Arabic 304: Arabic Advanced Speaking (10 Credit Points)
Subject Details (p. 3863) Legacy Code: 100050
This is an advanced Arabic subject for students undertaking a major in Arabic or the Bachelor of Arts (Interpreting & Translation) (Arabic stream). As a companion subject of Arabic 303 (Advanced Writing Skills), it aims at preparing students to make a professional use of the language, in this case by placing particular emphasis on oral skills, and it is also specially recommended for those wishing to pursue careers in areas such as language teaching, interpreting and translation. Students will be introduced to a full range of oral text types and language purposes. They will be guided to analyse, interpret and evaluate examples of oral discourse, and be encouraged to develop effective public speaking skills.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3014 Arabic 306: Arabic Novel and Short Story (10 Credit Points)
Subject Details (p. 3864) Legacy Code: 100052
This is an optional subject in the Arabic major, which aims to introduce students to the study of the Arabic novel and short story, and examines the historical, political, social and cultural context that this literature reflects. This will be done by studying selected novels and short stories. Students will be able to undertake a research project on a novel of their choice. This subject will also examine children's literature, including traditional children's stories and contemporary Arabic literature, as well as translated Western traditional stories.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3015 Arabic 308: Language Past and Present (10 Credit Points)
Subject Details (p. 3865) Legacy Code: 100054
This subject aims to give students an understanding of the phonological, morpho-syntactic, semantic and pragmatic changes that have occurred to the Arabic language both spoken and written in the last century. Particular attention will be paid to the different dialects spoken in some of the Arab countries and their relation to Modern Standard Arabic. A special study will be made of the Australian Arabic used by migrant communities.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3016 Bilingualism and Biculturalism (10 Credit Points)
Subject Details (p. 3866) Legacy Code: 101449
Bilingualism and biculturalism are important aspects of life in Australia: many Australian residents are, were, or could be, bilingual and/or bicultural. This subject aims to give students an understanding and appreciation of the most important facets and manifestations of bilingualism and biculturalism, in the linguistic, cognitive, personal, societal and educational spheres, particularly with regard to the Australian context. It also aims to show students how this subject relates to broader studies in education, humanities, linguistics, and social sciences.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYB 2371 - Bilingualism and Biculturalism
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3018 Children's Literature: Image and Text (10 Credit Points)
Subject Details (p. 3867) Legacy Code: 101626
This subject focuses on the interrelationships between image and text in children's literature. The subject examines both picture books and other image-based children's texts, including electronic texts and graphic novels. The subject will examine children's texts as cultural artefacts, theories of visual literacy and how image and text combine to create meaning. Students will have the opportunity to create their own picture book for their final project.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3019 Children's and Young Adult Fiction (10 Credit Points)
Subject Details (p. 3867) Legacy Code: 102205
This subject explores a wide range of fictional texts created for children, teenagers and young adults from folktales, fairytales and myths to contemporary examples. It focuses on the relationship between young people, the texts created for them and the cultures in which these texts are produced and read. The subject will examine a variety of genres and themes, for example, the experience of childhood as constructed by adult authors of children's texts; post-colonial children's literature; the emergence and development of distinctly Australian children's texts; the development of young adult; literature; the impact of new technologies on children's literature; and role of art in children's literature.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LANG 3017 - Children's Literature
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3020 Chinese 301 (10 Credit Points)
Subject Details (p. 3868) Legacy Code: 101951
This is an advanced Level 3 subject within the Chinese major program, designed for students who have acquired an intermediate level of proficiency, and who wish to consolidate and improve their language proficiency and understanding of Chinese culture. It further develops students' proficiency in both spoken and written Chinese, and enhances their comprehension of Chinese language, culture and society. Students are encouraged to express their own opinions in a wide range of social and cultural contexts. Interactive lecture/tutorials, online activities and authentic materials are used to facilitate a positive learning experience.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LANG 3058 - Languages and Grammatical Concepts 3A Chinese
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3021 Chinese 302 (10 Credit Points)
Subject Details (p. 3869) Legacy Code: 100063
This subject further develops the language skills and cultural understanding students already have or have acquired through Chinese 101-301, with an emphasis on oral expression, reading, writing and research skills. It enhances students' ability to interact in both spoken and written Chinese in various situations and ability to research and express their views on Chinese social and cultural issues. Authentic materials are used as much as possible in order to deepen students' understanding of the Chinese language, culture and society, and improve their ability to interact in various settings.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3022 Chinese 303: Twentieth-Century Chinese Literature (10 Credit Points)
Subject Details (p. 3870) Legacy Code: 100064
This subject introduces students to modern and contemporary Chinese literature in the Chinese language. It includes a brief overview of Twentieth-century Chinese literature, and exposes students to a variety of literary genres. Students are expected to work individually and in groups in order to analyse, evaluate and critique these works, whose social and cultural context is integral to understanding them. This process will not only increase students' understanding and appreciation of Twentieth-century Chinese literature, but it will also develop their critical thinking skills.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3023 Chinese 304: Chinese Classical Literature (10 Credit Points)
Subject Details (p. 3871) Legacy Code: 100065
This subject introduces students to Chinese classical literature in the Chinese language. It includes a brief overview of Chinese classical literature and exposes students to the prose, poetry, drama and fiction genres of Chinese classical works from the Han dynasty to the Qing dynasty. Through selected readings, students will gain some knowledge of the stylistic and linguistic features of classical prose and develop skills in reading classical Chinese. Students will also develop an understanding of the Chinese literary tradition and an appreciation of the continuing relevance of classical Chinese in contemporary China.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3024 Chinese 305: Chinese Cinema (10 Credit Points)
Subject Details (p. 3872) Legacy Code: 100066
This subject offers a brief review of Chinese film and introduces some of the best Chinese-language productions of the last two decades from mainland China and Taiwan. Students will be required to work individually and in groups to critique the social and moral issues raised in these films. They will also consider the historical context from which these films emerged. This process will develop a deeper understanding of Chinese society and the lives of Chinese people of different eras. It will also enhance students' appreciation of Chinese cultural identity and moral values.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3025 Chinese 306: Traditional Chinese Thought (10 Credit Points)
Subject Details (p. 3872) Legacy Code: 100510
This subject is a thematic subject in the BA Key Program Languages and the BA Interpreting and Translation. It is part of the Chinese major or sub-major and can also be taken as an elective. It introduces students to Chinese thought and way of life - the Confucian-Daoist tradition. Students will explore how China's ancient wisdom shapes its long resilient civilization and how it helps the nation maintain its cultural identity while it exerts an international influence on today's world. Students will read selected works of prominent Chinese thinkers in the original or English versions. This subject will be conducted in Chinese and English.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3026 Chinese 307: The Cultural Context of China (10 Credit Points)
Subject Details (p. 3873) Legacy Code: 100067
This subject provides a brief overview of Chinese culture and examines the cultural interchanges of which it has been a part throughout history. Students will analyse the effects of these cultural contacts, both positive and negative. They will also evaluate and critique relevant cultural issues, from a comparative perspective. This process will increase students' understanding of the cultural identity of China, and it will also enable them to appreciate the importance of outside cultural influences, thereby reinforcing an open and mature attitude towards multiculturalism. The subject will be conducted in Chinese.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3027 Creative Non-Fiction (10 Credit Points)
Subject Details (p. 3874) Legacy Code: 100856
This subject provides students with an advanced understanding of the issues, processes and practical questions involved in the writing of creative non-fiction. It is intended that students will gain both enhanced theoretical knowledge of writing practices and, through workshop participation and practical exercises, develop both their own writing skills and the ability to critique the writing of others on the basis of sound understanding of the characteristics of the genre.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYB 6564 - Texts and Techniques
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3028 Crime Fiction (10 Credit Points)
Subject Details (p. 3874) Legacy Code: 102315
This subject will introduce students to a variety of texts drawn from the history of crime fiction; including the classic detective story, the Golden Age mystery, US 'Hard Boiled' fiction, the police procedural, and the literary crime novel. Students will develop their knowledge of theories of genre, specifically its formation and evolution, and its implications for the process of making meaning. They will learn about the changing place of crime fiction within the English literary canon, exploring the genre's relationship to questions of artistic value, the distinction between high and low culture, and the differences between literary and popular fiction.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3029 Culture, Discourse and Meaning (10 Credit Points)
Subject Details (p. 3875) Legacy Code: 102185
In Culture, Discourse and Meaning students explore our culture by looking closely at how we make and share meaning. You look at how power operates by supporting and promoting some ideas and ways of life but not others. In Culture, Discourse and Meaning you also consider how students might change our culture. In your work in the unit, you will develop analytical, interpretive, and critical skills for culture analysis. Through project-based work, students will develop the capacity to analyse and critique the production and operations of power and consider changes in cultural practice.
Level: Undergraduate Level 3 subject
Incompatible Subjects: COMM 2045 - Critical Discourse Analysis
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3030 Discourse Analysis (10 Credit Points)
Subject Details (p. 3875) Legacy Code: 101946
This subject explores language at the discourse level, introducing different linguistic approaches used in the analysis of discourse. It provides a general overview of major theoretical frameworks and current issues in discourse analysis. It examines authentic spoken and written examples, and demonstrates how discourse analysis is relevant to other disciplines such as media and communication, education, cultural and gender studies, and so on.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LANG 1014
Equivalent Subjects: LANG 3085 - Text and Discourse in English
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3031 Discovering language: Everything you've ever wanted to know but never asked (10 Credit Points)
Subject Details (p. 3876) Legacy Code: 102625
Why can any child learn any language? How come there are so many languages on this planet? What is the most difficult language? What happens to us if we speak more than one language? There are plenty more questions about language that we all have and this subject is all about asking and finding out about language in an engaging way. Students will learn how to ask questions about language and what research can tell us in answering them. The subject will equip students with the tools to investigate many aspects of language as a defining feature of humans.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LANG 1014
Equivalent Subjects: LANG 3070 - Research Methods in Linguistics
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3033 Film and Drama (10 Credit Points)
Subject Details (p. 3877) Legacy Code: 100866
This subject offers a survey of one or more of the following: drama, drama on film and film drama. It will examine key concepts in cinema theory, dramatic form and film production. Comparison may be made between theatre texts and film adaptations related to the work of specific dramatists; or drama texts may be considered in themselves (often with the screening of filmed versions of these dramas). Alternatively, film itself will be considered as a disinct dramatic form whose contours will be traced in relation to the work of important directors. Viewing films will form an integral part of this subject and students will be expected to attend screenings of films as well as a lecture and tutorial.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3034 Historical Linguistics (10 Credit Points)
Subject Details (p. 3877) Legacy Code: 102043
This subject provides an introduction into the study of language change. It discusses fundamental questions such as how and why languages change, how we can investigate and theoretically capture language change, as well as how language change is connected to sociocultural change with special focus on the linguistic habitat of Australia.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LANG 1014
Co-requisite(s): LANG 1028 AND
LANG 2041
Equivalent Subjects: LANG 2018 - History of the English Language

Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3043 Indonesian 305: Past and Present of Indonesian (10 Credit Points)
Subject Details (p. 3878) Legacy Code: 102331
This is an advanced (Level 3) subject in the Indonesian Specialisation, which should ideally be undertaken after Indonesian 301 and Indonesian 302. The subject provides an overview of the history of the Indonesian language and its relation to the languages of neighbouring countries. Students will learn how Indonesian has developed as a standard language and how its spelling, lexicon and syntactical structures have changed over history.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3044 Indonesian 306: Indonesian Literature (10 Credit Points)
Subject Details (p. 3879) Legacy Code: 102332
This is an advanced (Level 3) subject in the Indonesian Specialisation, which should ideally be undertaken after Indonesian 301 and Indonesian 302. The subject introduces students to Indonesian literature through a historical review and reading and analysis of samples of literary works. Students will analyse and discuss the stylistic features of the works studied as well as the social and cultural aspects reflected in them.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3045 Intercultural Communication (10 Credit Points)
Subject Details (p. 3879) Legacy Code: 101950
This subject aims to develop the communicative competence of students in intercultural contexts and raise their awareness of issues in the use of languages. It helps the students understand hidden socio-cultural dimensions and equips them with the knowledge and skills necessary for intercultural communication. It also prepares them to critically analyse linguistic and cultural differences around them, appreciate linguistic and cultural diversity, and integrate the subject contents into their future careers. The impact of intercultural communication is highlighted in a range of real-life sectors, such as second language teaching and learning, translation and interpreting services, international business, tourism, community services, and organisational communication. Lectures will be delivered in English and depending on demand, language-specific tutorials will be delivered in Arabic, Chinese, Indonesian and Japanese as well as English.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LANG 3046 - Intercultural Pragmatics
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3049 Interpreting and Translation Professional Practicum (UG) (10 Credit Points)
Subject Details (p. 3880) Legacy Code: 101944
This subject is a capstone subject for the relevant Interpreting and Translation award and is aimed at assisting students in their transition from interpreting and translation trainees to successful professional interpreters and translators. It provides students with the opportunity to participate in practical aspects of the Interpreting and/or Translation professions and related fields, as well as to undertake supervised practice in the workplace. Students will complete the practical work relevant to their field of specialisation, i.e., Interpreting, Translation or both. Together with LANG3067 Preparation for NAATI Certification UG it helps students prepare for the NAATI Certification test to be undertaken when they finish this course.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LANG 1013 OR
LANG 1017
Co-requisite(s): LANG 3003 OR
LANG 3067 AND
LANG 2014 OR
LANG 2047 OR
LANG 2023 OR
LANG 3065 OR

LANG 3050 Introduction to Stylistics (10 Credit Points)
Subject Details (p. 3881) Legacy Code: 102186
The focus of this online subject is the language of literature and the craft of writing. The subject explores the rhetorical or figurative dimension of language across literary and non-literary texts. Students analyse a range of short texts - mostly passages from novels and poems - with an eye to the formal basis of their effects. Through recorded lecture pods and online exercises, students are introduced to the basic tools of stylistic analysis, including narrative analysis, metaphorical analysis and critical discourse analysis.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3051 Japanese 301 (10 Credit Points)
Subject Details (p. 3882) Legacy Code: 101952
This is a Level 3 subject within the Japanese major program, intended for students who have successfully completed Japanese 202 or have acquired equivalent knowledge. It enhances students' comprehension of and ability to use new grammatical structures, expressions, interaction strategies and Kanji characters. In addition to improving the four primary language skills and ability needed for working in Japan or with Japanese people, this subject aims to advance students' knowledge of the modern Japan through the recommended texts and class discussions. Note: This subject is not suitable for native speakers.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 1583 - Languages and Grammatical Concepts 3A Japanese
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3052 Japanese 302 (10 Credit Points)
Subject Details (p. 3883) Legacy Code: 100092
After covering basic Japanese grammar in previous units, this subject is designed to further improve and extend students' competence in Japanese. It enhances students' knowledge and comprehension of Japanese, and develops their ability to apply this knowledge and comprehension to written and spoken Japanese. In addition to the language skills, this subject covers further aspects of Japanese culture through the recommended texts and class discussions. Note: This subject is not suitable for native speakers.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3053 Japanese 303: Contemporary Culture and Society (10 Credit Points)
Subject Details (p. 3883) Legacy Code: 100093
This subject aims to provide students with a valuable insight into modern Japanese culture and society via learning the language at an advanced level. In this subject, students will further enhance their four skills in the language with a focus on listening and speaking.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3054 Japanese 304: Discourse in Japanese (10 Credit Points)
Subject Details (p. 3884) Legacy Code: 101970
This subject is designed to enable post-intermediate students of Japanese to learn and practice spoken Japanese at an advanced level. Students will explore Japanese discourse styles and discourse strategies in a range of situations, registers and levels of formality. In addition to the essential readings, materials drawn from educational videos, feature films, television dramas, news programs and language corpus will be used for class discussions and as data for analysis.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 0082 - Japanese 304 Discourse in Japanese
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3055 Japanese 305: Advanced Reading and Writing (10 Credit Points)
Subject Details (p. 3885) Legacy Code: 101971
Students in this subject will further develop their competency in Japanese with a focus on reading and writing at an advanced level. The subject content is organised around communicative and cultural themes on Japanese society. To expose students to authentic language use, reading materials of different genres are selected from Japanese newspapers, magazines, Japanese language corpus and the internet. Acquisition of Kanji is accelerated through reading and writing tasks.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3056 Japanese 306: Japanese Popular Culture (10 Credit Points)
Subject Details (p. 3886) Legacy Code: 102219
This subject aims to reinforce the Japanese language in all four skills: speaking, listening, reading and writing, via the medium of Japanese popular culture, e.g. manga, anime, Japanese drama and/or J-pop, by exploring and analysing culturally and linguistically specific issues of the language, e.g. address terms and taking turns. Students will explore natural Japanese text and speech in both casual and formal styles at an advanced level, as well as increase their knowledge and understanding of Japanese popular culture.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3057 Languages and Grammatical Concepts 3A: Arabic (20 Credit Points)
Subject Details (p. 3886) Legacy Code: 101709
This is an advanced Level 3 language and linguistics subject for students of modern Arabic. Lectures for the grammatical concepts component are held in English for students of all languages while other activities are language-specific. The aim of the subject is twofold. On the one hand it aims, to develop a practical and theoretical understanding of the ways in which major concepts used in everyday speech and writing are mapped and organized in the lexicon and the grammar of human languages, and how these forms develop in learners and users. On the other hand, it aims to develop advanced comprehension and production skills in Arabic language, including higher stages optional structures, through critical examination of contemporary and historical text and discourse samples from a variety of registers. An understanding of contemporary Arab culture and society is also fostered through comparative research projects on specific cultural, social and/or linguistic, aspects that are of interest to students. A range of CALL (Computer Assisted Language Learning) activities are utilised for this subject.
Level: Undergraduate Level 3 subject
Incompatible Subjects: LANG 3010 - Arabic 301 LGYA 1259 - Languages 303 Grammatical Concepts Across Languages
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3058 Languages and Grammatical Concepts 3A: Chinese (20 Credit Points)
Subject Details (p. 3887) Legacy Code: 101710
In 2013 this subject replaced by 101951 - Chinese 301. This is an advanced Level 3 language and linguistics subject for students of modern Chinese. Lectures for the grammatical concepts component are held in English for students of all languages while other activities are language-specific. The aim of the subject is twofold. On the one hand it aims, to develop a practical and theoretical understanding of the ways in which major concepts used in everyday speech and writing are mapped and organized in the lexicon and the grammar of human languages, and how these forms develop in learners and users. On the other hand, it aims to develop advanced comprehension and production skills in Chinese language, including higher stages optional structures, through critical examination of contemporary and historical text and discourse samples from a variety of registers. An understanding of traditional and contemporary Chinese culture and society is also fostered through comparative research projects on specific cultural, social and/or linguistic, aspects that are of interest to students. A range of CALL (Computer Assisted Language Learning) activities are utilised for this subject.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LANG 3020 - Chinese 301
Incompatible Subjects: LGYA 0055 - Chinese 301 LGYA 1259 - Languages 303 Grammatical Concepts Across Languages
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3059 Law, Literature and Culture (10 Credit Points)
Subject Details (p. 3888) Legacy Code: 102416
This subject explores the value of literature to provide insight into the role of law in society. With special emphasis on the post-Mabo context of Australian culture, students will examine the law not just as a set of codified rules or as a legal system but as a cultural story that embraces an understanding of who we are and where we came from. We view law not just as a set of rules but as a cultural story that defines our identity and roots. By analysing literary representations of legal notions such as justice, guilt, punishment, agency and confession, students will seek to understand the shared ground between literature and law, asking the thought-provoking question: "What can poets teach judges?" Through this exploration, students will enrich their understanding of both disciplines.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3060 Legal Interpreting (UG) (10 Credit Points)
Subject Details (p. 3889) Legacy Code: 100196
Legal interpreting is a highly complex process that requires specialised training in interpreting techniques, litigation tactics, legal language and the legal system. This subject is a compulsory subject for students in the BA (Interpreting and Translation) course. It can also be offered to practising interpreters who wish to improve and perfect their knowledge and skills in legal interpreting. It aims to provide students with the theoretical background and the opportunity to develop the interpreting skills necessary to operate at the NAATI professional level as a court interpreter. Lectures are held in English for students of all languages. The tutorials are language specific in Arabic, Japanese, Mandarin and Spanish.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LANG 1017
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3061 Literary Animals (10 Credit Points)
Subject Details (p. 3890) Legacy Code: 101724
This subject explores a selection of literary works that invite us to examine the tenuous border separating the "human" from the "non-human." Readings will allow students to learn how literary texts employ various formal techniques (allegory, anthropomorphism, etc.) that call into question the conventional opposition between human and animal. Particular attention will be given to the intersection of animality, race, gender, and sexuality. Readings may include one or more national literatures, such as American or Australian literature.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3062 Literature and Philosophy (10 Credit Points)
Subject Details (p. 3890) Legacy Code: 100875
This subject will examine ways in which literature and philosophy interact. It will consider the ways in which literature and philosophy offer important and different ways of thinking. And it will consider the differences between literature and philosophy. Literature will be understood to involve thinking through sensations, while philosophy will be understood to involve thinking through concepts. The subject will examine examples of interaction between literary texts and philosophical texts, considering how literary effects can inhabit philosphical texts and philosophical ideas can permeate literary texts. The subject will consider frequently occurring themes within both literature and philosophy, such as ethics (ways of living and acting).
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3065 Medical Interpreting (UG) (10 Credit Points)
Subject Details (p. 3891) Legacy Code: 100197
This subject aims to develop students' skills in interpreting at the professional level (formerly NAATI Level 3) through the modes of dialogue interpreting, consecutive interpreting, simultaneous interpreting, and sight translation in the domain of health services. Lectures are held in English for students of all languages. The tutorials are language specific in Arabic, Japanese, Mandarin and Spanish.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3066 Postcolonial Literatures: Partition, Dependence and Exile (10 Credit Points)
Subject Details (p. 3892) Legacy Code: 102434
This subject introduces the postcolonial literatures that emerged in the wake of decolonisation in the second half of the twentieth century. We will read literary works from across the postcolonial world, including from the Middle East, South and South-East Asia, Africa, the Caribbean and Australia, and look at the way in which writers contended simultaneously with the legacy of the colonial system and major historical crises that emerged in the wake of its collapse. We will trace the emergence of the postcolonial reality as writers registered the impact of partition, separatism, persistent dependency, and the large-scale movements of people to the first world, whether as migrants or refugees. Alongside the literature, we will read major works of postcolonial theory: one of the most influential intellectual movements in recent history.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3067 Preparation for NAATI Certification (UG) (10 Credit Points)
Subject Details (p. 3892) Legacy Code: 102550
This is a compulsory subject in the Bachelor of Arts (Interpreting and Translation) and the Bachelor of Arts (Interpreting and Translation) Dean's Scholars courses. It aims to provide practice and constructive feedback to students preparing to sit the external NAATI certification examinations.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LANG 1013 AND
LANG 1017
Co-requisite(s): LANG 3049
Equivalent Subjects: LANG 3003 - Accreditation Studies (UG)
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3068 Race in Literature (10 Credit Points)
Subject Details (p. 3893) Legacy Code: 101650
In 2024, this subject is replaced by LANG 2058 Race in Literature. This subject explores a selection of modern literary works that focus on the question of "race." Readings will allow students to learn how notions of race have shifted over time, giving particular attention to how mixed-race people challenge dyadic conceptions of racial difference. Readings may include one or more national literatures, such as American or Australian literature.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3069 Contemporary Irish Writing (10 Credit Points)
Subject Details (p. 3894) Legacy Code: 102078
'Contemporary Irish Writing' is a level 3 subject within the English and Creative Writing Majors/Minors. This subject examines a range of contemporary Irish writing across several different genres. It will provide an opportunity for students to read and study in detail a variety of texts that explore Irish consciousness in light of the social, cultural and political transformations of contemporary Irish society. Students will be asked to consider the ways in which these texts interrogate Irishness and identity, as well as issues of gender, sexuality, race and the environment in rural and urban Ireland.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3071 Second Language Acquisition (10 Credit Points)
Subject Details (p. 3894) Legacy Code: 101451
This subject is designed for students who are interested in understanding how a second language is learned. It examines learning in both natural or classroom contexts as well as language development in child and adult learners. Students are introduced to current theories of Second Language Acquisition, as well as current research and its applications to the classroom or the translation process. Students will conduct a small research project to become familiar with the process of learning a second language and some basic research notions and techniques.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYB 1999 - Second Language Acquisition
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3072 Short Fiction in the Americas (10 Credit Points)
Subject Details (p. 3895) Legacy Code: 101791
This subject surveys short fiction written in the Americas in English, French, Spanish and Portuguese during the twentieth century. It examines the history of short fictional genres, theories of their functioning, and the ways in which they register and transmit the various national and regional cultures of the Americas. The subject allows students majoring in Spanish to undertake language-specific assessment tasks (reading original texts in Spanish and writing their essay in Spanish) while other students read the texts and complete their assessment tasks in English.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3073 Sociolinguistics (10 Credit Points)
Subject Details (p. 3896) Legacy Code: 101450
This subject is designed to develop students' interest in language and society and give them an understanding and appreciation of variation in language (accents, dialects) and language change, language planning, as well as the interdependent relationship between language learning, communicative competence and cultural practices, both in the Australian context and also in a more global context. It also aims to show students how this subject fits in with other language and linguistics-related disciplines, e.g. Linguistics, Bilingualism and Biculturalism, Second Language Acquisition.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LANG 1023 - Sociolinguistics
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3074 Spanish 301 (10 Credit Points)
Subject Details (p. 3897) Legacy Code: 101953
This subject is a Level 3 component of the Spanish major. It is intended for students who have already acquired a high intermediate level of proficiency and who wish to consolidate and improve this proficiency. It enhances students' knowledge and comprehension of Spanish grammar, and develops their ability to apply such grammatical knowledge in their spoken and written language.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 1585 - Language and Grammatical Concepts 3A Spanish
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3075 Spanish 302 (10 Credit Points)
Subject Details (p. 3897) Legacy Code: 101954
This subject is a level 3 component of the Spanish major which extends the skills acquired in Spanish 301. It develops in students an advanced mastery of Spanish grammar, and develops their ability to apply this grammatical knowledge in oral and written communication. In addition to the language skills, this subject covers further aspects of Spanish culture through the recommended texts and class discussions.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 1585 - Languages and Grammatical Concepts 3A Spanish
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3076 Spanish 303: Advanced Writing Skills (10 Credit Points)
Subject Details (p. 3898) Legacy Code: 100153
This subject aims to develop the writing skills to prepare them to make professional use of the language. It is particularly recommended for those who wish to involve themselves in areas such as language teaching and translation. Students will be introduced to a full range of text types and language purposes. They will be guided to analyse, interpret and evaluate passages provided, and will be encouraged to extend their ability by experimenting with a variety of writing styles.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3077 Spanish 304: Advanced Speaking Skills (10 Credit Points)
Subject Details (p. 3898) Legacy Code: 100154
As a companion subject to Spanish 303: Advanced Writing Skills, this subject aims to prepare students to make professional use of the language, in this case by placing particular emphasis on oral skills. It is also specially recommended for those wishing to pursue careers in areas such as language teaching and translation. Students will be introduced to a full range of oral text types and language purposes. They will be guided to analyse, interpret and evaluate examples of oral discourse, and encouraged to develop effective public speaking skills.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3078 Spanish 305: Contemporary Literature (10 Credit Points)
Subject Details (p. 3899) Legacy Code: 100155
This is a compulsory subject for students of the BA (Interpreting and Translation) (Spanish), and one of the optional subjects for students with advanced language skills in Spanish enrolled in the BA. It aims to introduce students to the study of contemporary Hispanic literary works so that they may acquire an appreciation of contemporary Latin American and Spanish literature and an understanding of the historical, political and social contexts in which that literature developed. Emphasis will be placed on the writer's role as an interpreter and critic of society.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3079 Spanish 306: Contemporary History (10 Credit Points)
Subject Details (p. 3899) Legacy Code: 100156
This subject aims to introduce students to the history of Spain and Latin America in the Twentieth century to enable them to understand the historical background to present-day events, and to identify the major contemporary policy issues in these regions of the world.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3080 Spanish 307: Classical Literature (10 Credit Points)
Subject Details (p. 3900) Legacy Code: 100157
This subject provides an introduction to the social and cultural history of Spain of the Sixteenth and Seventeenth centuries, and to the principal literary monuments of this period. The subject is based on the study of selected representative texts and appropriate background readings.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3081 Spanish 308: Spanish Sociolinguistics (10 Credit Points)
Subject Details (p. 3900) Legacy Code: 100158
This subject aims to give students an understanding of the phonological, morpho-syntactic, semantic and pragmatic changes in the Spanish language as spoken and written at the start of its second millennium. Particular attention will be paid to the dialectal geography of the Hispanic world, and to the problems faced by the language today, with particular reference to its 'Spanglish' version in emigre communities in the United States and Australia, and to information technology.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3082 Special Study in Languages and Linguistics (10 Credit Points)
Subject Details (p. 3900) Legacy Code: 100201
This Level 3 Languages and Linguistics subject is, primarily, a self-study subject designed to cater for a special area of interest in languages and linguistics not otherwise covered in the subjects on offer in the languages program or in the BA (Interpreting and Translation) and/or where the student may otherwise find it difficult to complete his or her program of study. Once the topic chosen by the student is approved by the Subject Coordinator a supervisor is nominated and an individually-tailored learning contract, including appropriate language-specific and/or linguistics readings and tasks, is drawn up in collaboration with the supervisor and is submitted to the Subject Coordinator for approval. This approval process should happen, ideally, at least one week prior to the beginning of the teaching semester.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3083 Specialised Translation (UG) (10 Credit Points)
Subject Details (p. 3901) Legacy Code: 100198
This subject explores the functional, discursive, rhetorical, syntactic, semantic and lexical features of texts in the following specialised fields: tourism, news media, legal texts, technical & scientific materials. Knowledge of the functions and textual features of specialised texts will provide a basis for translating these specialised texts from and into English. Students will analyse the texts in both languages, and discuss ways in which the texts are to be translated. The subject will be available, depending on sufficient demand, for Arabic, Japanese, Mandarin and Spanish.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3084 Text Analysis for Translation (UG) (10 Credit Points)
Subject Details (p. 3902) Legacy Code: 102523
The subject provides support for students in the BA (Interpreting and Translation) program to develop their analysis skills of the texts they will confront in their translation work. It is a bilingual subject, that is texts in both English and the respective Language Other Than English will be analysed to reveal the structures of meaning and linguistic and contextual features of the texts. It encourages close readings of source texts, understanding where extra-textual knowledge is relevant, and identifying essential meaning components underlying surface linguistic features.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3086 The Novel (10 Credit Points)
Subject Details (p. 3903) Legacy Code: 100893
This subject explores the status and success of the novel as the dominant modern literary form. It examines aspects of the history and development of the novel from the seventeenth century up to the present, along with a range of novelistic texts from one or a number of literary traditions: from classic British and/or American texts to contemporary postcolonial fiction; from the search for the mythical "great Australian novel" to famous and not-so-famous works in languages other than English.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3087 Women's Writing (10 Credit Points)
Subject Details (p. 3904) Legacy Code: 102374
This subject focuses on the study of women's writing from a broad social and cultural context. While the women writers will change from offering to offering, the content will remain centred on feminist theory and discourses of race, ethnicity, class and gender. The subject will draw on a variety of genres including drama, fiction, poetry, essay and short story. Students will explore women's concerns about motherhood, marriage, violence and domesticity; cultural identity, vocation and the body as (sexual) object. They will also explore women's experiences of madness and victimisation; segregation and alienation; power/lessness and the public sphere.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3089 World Literature in Translation (10 Credit Points)
Subject Details (p. 3905) Legacy Code: 101669
This subject examines representative works of world literature written in languages other than English in order to address a range of literary and cultural issues, including the role of translation in crosscultural communication.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3091 Writing and Society (10 Credit Points)
Subject Details (p. 3905) Legacy Code: 101670
This subject explores the social dimensions of literature, both generally, by considering the role played by tradition, authorship, genre and style in the literary exploration of values, and in specific terms, through a close examination of works which have had an important social impact in their time, including those in translation, from a range of contemporary literatures. The lecturers are members of the Writing and Society Research Group, many of whom are practising authors.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3094 The Value of Literature (10 Credit Points)
Subject Details (p. 3906) Legacy Code: 102765
This subject explores the value of literature by examining its competing uses in a range of historical contexts down to and including our own. Literature's potent combination of pleasure and instruction embraces conflicting personal, ethical, political, social, and ideological uses even as it resists them. The subject brings a comparative focus to bear on texts from diverse historical and cultural settings as a way of reflecting on and rediscovering the value of literature in the digital age. Students will also explore the function of criticism to educate the individual sensibility and shape the cultures of public life. Primary texts include poems, narrative fiction, essays, and may include drama, film, and other audiovisual material.
Level: Undergraduate Level 3 subject
Pre-requisite(s): Any two of the following subjects -
COMM 1004 OR
COMM 1005 OR
LANG 1015 OR
LANG 1016 OR
LANG 2035
Equivalent Subjects: LANG 3032 - English Literature After 1830
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3095 Indonesian 301 (10 Credit Points)
Subject Details (p. 3907) Legacy Code: 102773
This is an advanced (Level 3) subject in the Indonesian Specialisation. It focuses on the Indonesian language styles and vocabulary appropriate for academic purposes. Students will learn formal language through reading authentic materials, engaging in open discussion, and writing on topics related to Indonesian culture, language, and other historic and current issues in an academic manner. Students will develop their formal writing skills in Indonesian and will learn how to discuss academic subjects in a formal style. They will begin to develop their ability to translate Indonesian and English texts in a formal manner. They will also develop intercultural awareness by comparing and contrasting academic styles and contexts in Australia and Indonesia.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LANG 3039 - Indonesian 301 Indonesian for Academic Purposes
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3096 Indonesian 302 (10 Credit Points)
Subject Details (p. 3907) Legacy Code: 102774
This is an advanced (Level 3) subject in the Indonesian Specialisation. It focuses on the Indonesian language styles and vocabulary appropriate for academic purposes. Students will learn formal language through reading authentic materials, engaging in open discussion, and writing on topics related to contemporary Indonesian society and current issues in an academic manner. Students will develop their formal writing skills in Indonesian and will learn how to discuss academic subjects in a formal style. They will further develop their ability to translate Indonesian and English texts in a formal manner. They will develop skills that will assist them to interpret spoken and written Indonesian texts through exploring ways of building up the specific language required to gain a deeper understanding of any particular topic.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LANG 3040 - Indonesian 302 Indonesian for Professional Purposes
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3097 Indonesian 303 (10 Credit Points)
Subject Details (p. 3908) Legacy Code: 102775
This is an advanced (Level 3) subject in the Indonesian Specialisation, which can be undertaken following on from Indonesian 202, 301, or 302 as well as by students with sufficient language skills due to Indonesian or Malay background. The subject further develops students' Indonesian academic language skills by focusing on language resources appropriate for academic purposes. Students will be exposed to a range of academic texts and related online materials to support the development of academic Indonesian skills.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LANG 3041 - Indonesian 303 Indonesian for Business
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3098 Indonesian 304 (10 Credit Points)
Subject Details (p. 3909) Legacy Code: 102776
This is an advanced (Level 3) subject in the Indonesian Specialisation, which can be undertaken following on from Indonesian 202, 301, or 302 as well as by students with sufficient language skills due to Indonesian or Malay background. The subject further develops students' Indonesian academic language skills by focusing on language resources in various genres appropriate for academic purposes. Students will be exposed to a range of academic texts and related online materials to support the development of academic Indonesian skills.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LANG 3042 - Indonesian 304 Contemporary Indonesia
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3099 English Talk (10 Credit Points)
Subject Details (p. 3910) Legacy Code: 102813
In English Talk students engage with spoken forms of English communication, ranging from the casual conversations and interactions of everyday life, through the spoken texts of contemporary media to the more formal spoken genres of political speeches, lectures and other forms of public discourse. Students learn how to analyse forms of spoken English using speech act theory, conversation analysis, and functional models of analysis. Students are provided opportunities to consider their own participation in spoken forms of discourse in English by constructing, analysing and redeveloping the kinds of spoken interaction they will participate in in professional and social settings.
Level: Undergraduate Level 3 subject
Equivalent Subjects: TEAC 3008 - English Language Linguistics
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 3100 Comedy and Tragedy: Dramas of Death and Rebirth (10 Credit Points)
Subject Details (p. 3910) Legacy Code: 102914
This subject examines the writing, performance and theories of Western tragedy and comedy since their beginnings in the ancient world to modern times. In this subject, students read tragic and comic drama, some of which is in translation, as well as key theories of tragedy and comedy. The subject begins with the dramas of the Ancient Greeks, and through an examination of the plays and their context of production, students will be introduced to key ideas about tragedy's and comedy's structure, dialogue, staging, characterisation, audience, and central themes. The subject will trace the development of tragedy and comedy through key periods, including the Renaissance; and it may include a consideration of texts from the twentieth century onwards that have been written for media other than the stage. While tragedy and comedy are intimately linked with ideas about death and rebirth, the subject is closely concerned with the way in which moral choice lies at the heart of both genres.
Level: Undergraduate Level 3 subject
Incompatible Subjects: LANG 2013 - Comedy and Tragedy
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 7001 Accreditation Studies (10 Credit Points)
Subject Details (p. 3911) Legacy Code: 101482
This is a compulsory subject in all the postgraduate NAATI approved awards. It aims to provide practice and constructive feedback to students preparing for the accreditation examinations. A pass in the subject in at least one of the following options: Interpreting, Translation into English, or Translation from English with 70% will make students eligible for NAATI accreditation on completion of the rest of the requirements of the course.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYB 3382 - Accreditation Studies
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 7004 Audiovisual Translation: Subtitling and Captioning (10 Credit Points)
Subject Details (p. 3912) Legacy Code: 101827
This subject aims to introduce students to the framework of audiovisual translation in the form of subtitling for films, documentaries and other screen programs and captioning for hearing impaired viewers. The content of the subject will cover the principles, constraints, guiding rules, translation strategies that specifically govern subtitling and captioning. It will also introduce students to related translation theories and the application in practice. The class will be non-language specific, but students will be expected to work from and into their language other than English.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): LANG 7021 OR
LANG 7020
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 7005 Bilingualism and Education (10 Credit Points)
Subject Details (p. 3913) Legacy Code: 102525
Bilingualism and Biculturalism are important aspects of life in Australia. Throughout much of the world, bi-multilingualism is the norm for both children and adults. This subject aims to give students an understanding and appreciation of the most important facets and manifestations of bi-multilingualism and bi-multiculturalism, in the linguistic, cognitive, personal, societal and educational spheres. It also aims to show students how this subject relates to broader studies in education, humanities, linguistics, and social sciences. This subject equips students with current research theories and methods in working effectively in early childhood and primary education, language teaching and other workplaces in bi-multilingual and bi-multicultural contexts.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 7006 Business Interpreting (10 Credit Points)
Subject Details (p. 3914) Legacy Code: 101868
The subject builds student skills in different settings of business interpreting, from formal business meetinfs to on-site work in production subjects to business social activities. Interpreting skills are honed through practice utilising live, media and internet input. The subject also examines the complexity of the interpreter's role and the interrelationship between business ethics and interpreting ethics when interpreters function as members of a business team.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): LANG 7020
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 7007 Community and Social Services Translation (PG) (10 Credit Points)
Subject Details (p. 3915) Legacy Code: 101845
This subject aims to develop skills in Community Translation (also known as Public Service Translation), which focuses on facilitating written communication between public services and community members who do not have a good command of mainstream language(s). The aim of the subject is for students to develop skills in producing target texts in styles appropriate to specific groups and communities, and to the content and function of the source text.
The subject also aims to develop skills in researching and using appropriate specialist terminology, editing and revising, and producing camera-ready documents. On the basis of these skills, the subject is to further develop students' ability to reflect upon translation in terms of strategies and appropriateness in relation to the target audience as well as make critical written and oral assessment of relevant translations.
The subject will be available, depending on sufficient demand, for Arabic, Japanese, Mandarin, Spanish, Korean, Persian and Vietnamese.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYB 3387 - Community Translation LGYA 0966 - Community Translation PG
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 7008 Conference Interpreting (10 Credit Points)
Subject Details (p. 3915) Legacy Code: 102167
Conference Interpreting is a highly complex activity which requires a high level of bilingualism, expertise in a variety of interpreting skills and knowledge of specialised discourse and contextual issues that relate to international fora. This subject aims to introduce students to the theory and practice of Conference Interpreting. The theoretical concepts that underpin Interpreting will be taught and become the basis for all practical work.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYB 3386 - Conference Interpreting LGYA 0965 - Conference Interpreting LGYA 1423 - Conference Interpreting 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 7009 Contexts of TESOL (10 Credit Points)
Subject Details (p. 3916) Legacy Code: 102335
This subject introduces students to the field of TESOL and to some of the historical, socio-cultural and academic contexts which influence it - adult education, linguistics, intercultural and migration factors, bilingualism studies and new technologies. It provides students with some insight into the key issues in these fields which impact on the teaching and learning of English as a second/foreign language.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: TEAC 7021 - Contexts of TESOL
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 7010 Critical Literature Review (20 Credit Points)
Subject Details (p. 3917) Legacy Code: 200744
The aim of this subject is to develop skills in applying rigorous analysis and critical assessment to research-based literature in general, through an examination of literature in a particular field. This subject is intended to provide candidates with the basic skills needed to do critical analysis of literature while also enabling them to gain more familiarity with theories, issues, and problems in a particular research area. Literature will be analysed through a balanced and constructive critique of its strengths and weaknesses, providing suggestions for how the work might have been improved.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 8710 - Critical Literature Review
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 7011 Formal and Functional Grammar (10 Credit Points)
Subject Details (p. 3918) Legacy Code: 102621
This subject invites students to study the grammar of English from two related perspectives, formal grammar and functional grammar. The subject provides students with skills in the use of grammar in application to the analysis of a diverse range of texts. Students will develop an understanding of the structures and the functions of English across contexts. This skilled application will enhance their capacities as teachers of English, understanding how English varies in its use and allowing them to support their own students' skilled use of English across contexts.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LANG 7012 - Functional Grammar LANG 7013 - Functional Grammar
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 7014 Gender and Genre (10 Credit Points)
Subject Details (p. 3918) Legacy Code: 102602
This subject considers the intersection of gender and genre in various narrative forms. Through a variety of texts that may include polemic, conduct literature, plays, novels, poetry and film, students will examine the construction of masculinity and femininity within various genres, and consider the ways in which genres themselves may be gendered. Beginning in the seventeenth century, the subject also considers the strategies that women writers, in particular, have used to participate in literary production by adopting and adapting particular generic conventions. A consideration of the ways in which gender and genre may be connected also allows students to consider questions of literary production and circulation, literary value and reputation.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 7015 Intercultural Communication (PG) (10 Credit Points)
Subject Details (p. 3919) Legacy Code: 102338
This subject aims to develop the students' communicative competence in intercultural contexts, raise their awareness of issues in language use and socio-cultural dimensions, and equip them with the knowledge and skills necessary for intercultural communication. It also prepares students to critically analyse linguistic and cultural differences around them, appreciate linguistic and cultural diversity, and integrate the subject contents into their future careers (e.g. further studies or employment). It highlights the impact of intercultural communication in a range of real-life sectors, such as second language teaching and learning, translation and interpreting services, international business, tourism, community services, and organisational communication.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 7016 Interpreting Skills (PG) (10 Credit Points)
Subject Details (p. 3920) Legacy Code: 102015
This is a pool subject in some postgraduate interpreting and translation courses. The subject is aimed at developing essential skills in interpreting and deals with the specialised technical skills necessary for the different modes of interpreting: dialogue, consecutive, simultaneous, and sight translation. Given the large amount of independent practice needed to develop competence in interpreting, it pays special attention to the teaching of techniques for autonomous learning. Lectures are held in English for students of all the languages available. The tutorials are language specific in Arabic, Japanese, Mandarin or Spanish.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 7017 Interpreting and Translation Professional Practicum (PG) (10 Credit Points)
Subject Details (p. 3921) Legacy Code: A7456
This subject is a capstone subject for the relevant Interpreting and Translation award and is aimed at assisting students in their transition from interpreting and translation trainees to successful professional interpreters and translators. It provides students with the opportunity to participate in practical aspects of the Interpreting and/or Translation professions and related fields, as well as to undertake supervised practice in the workplace. Students will complete the practical work relevant to their field of specialisation, i.e., Interpreting, Translation or both. Together with LANG7030 Preparation for NAATI Certification (PG) it helps students prepare for the NAATI Certification test to be undertaken when they finish their course.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): LANG7020 Introduction to Interpreting PG OR LANG7021 Introduction to Translation PG
Co-requisite(s): LANG7029 Medical Interpreting (PG) OR LANG7016 Interpreting Skills (PG) OR LANG7004 Audiovisual Translation Subtitling and Captioning OR LANG7032 Specialised Translation (PG) OR LANG7026 Legal Interpreting OR LANG7006 Business Interpreting OR LANG7036 Translation Technologies (PG) AND LANG7030 Preparation for NAATI Certification (PG) OR LANG7001 Accreditation Studies
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 7020 Introduction to Interpreting PG (10 Credit Points)
Subject Details (p. 3922) Legacy Code: 101695
This is the core subject for students in postgraduate coursework programs in Interpreting and Translation. It introduces students to translation theory and practice of Interpreting. Lectures are held in English for students of all languages. The tutorials are language specific in Arabic, Japanese, Chinese (Mandarin), Spanish, Korean and Vietnamese.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYB 2089 - Interpreting 1 LGYB 2090 - Interpreting 2 LGYB 2851 - Introduction to Interpreting
Incompatible Subjects: LANG 7019 - Interpreting and Translation Theory
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 7021 Introduction to Translation PG (10 Credit Points)
Subject Details (p. 3923) Legacy Code: 101696
This is a core subject for students in postgraduate coursework programs in Interpreting and Translation. It introduces students to the theory and practice of Translation. Lectures are held in English for students of all languages. The tutorials are language specific in Arabic, Japanese, Mandarin, Spanish, Korean and Vietnamese.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: LANG 7018 - Interpreting and Translation Skills
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 7022 Investigating Second Language Acquisition (10 Credit Points)
Subject Details (p. 3924) Legacy Code: 100919
This subject is intended for Linguistics Honours students as well as TESOL and Interpreting and Translation Postgraduate students aiming to provide a focused theoretical and research framework in the area of second language acquisition (SLA) from a psycholinguistic viewpoint. This subject widens the theoretical and methodological basis of students intending to undertake further studies and/or research in the Linguistics and SLA area and also serves the TESOL and languages teachers interested in applying SLA-based knowledge to language learning, pedagogy and classroom research.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYB 3375 - Investigating Second Language Acquisition
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 7023 Language and Linguistics Research Methods (10 Credit Points)
Subject Details (p. 3925) Legacy Code: 101854
This subject aims to help postgraduate students acquire the knowledge and skills to design and carry out a research project in the field of Languages and Linguistics (I.e. Contrastive Linguistics, Sociolinguistics, Language-in-Education Planning, First and Second Language Acquisition, Interpreting and Translation, Discourse Analysis and Descriptive Linguistics). It includes theoretical and practical work in specific areas of research in Languages and Linguistics.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LANG 7024 - Language and Linguistics Research Methods
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 7025 Languages and Linguistics Special Project (10 Credit Points)
Subject Details (p. 3926) Legacy Code: 101297
This subject provides the opportunity for students in postgraduate Interpreting and Translation and Research Studies programs to undertake an independent research project. The topics for the projects are related to their needs and interests in areas such as languages, linguistics, translation and interpreting studies or teaching related issues.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 0749 - TESOL Dissertation LGYA 0754 - TESOL Internship LGYB 3439 - Languages and Linguistics Dissertation
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 7026 Legal Interpreting (10 Credit Points)
Subject Details (p. 3927) Legacy Code: 100916
Legal interpreting is a highly complex process that requires specialised training in interpreting techniques, litigation tactics, legal language and the legal system. This subject is a compulsory subject for students in key postgraduate courses in Interpreting and Translation course. It can also be offered to practising interpreters who wish to improve and perfect their knowledge and skills in legal interpreting. It aims to provide students with the theoretical background and the opportunity to develop the interpreting skills necessary to operate at the NAATI professional level as a court interpreter. Lectures are held in English for students of all languages. The tutorials are language specific in Arabic, Japanese, Mandarin, Spanish, Korean and Vietnamese.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYB 3384 - Legal Interpreting
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 7027 Literary Theory (10 Credit Points)
Subject Details (p. 3928) Legacy Code: 102581
This subject examines a range of theoretical approaches to literature, the majority of which have proliferated since the beginning of the 20th century. These may include: structuralism, poststructuralism, feminism, postcolonialism, psychoanalysis and posthumanism. In presenting this 'contemporary' mode of engaging with literary texts, 'Literary Theory' asks how we might theorise our approach to reading, and how individual texts allow us to theorise the literary in general.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 7028 Literary Translation (10 Credit Points)
Subject Details (p. 3928) Legacy Code: 100925
This subject aims to develop in students an appreciation of different literary genres in English and in their other language (LOTE) with an emphasis on stylistic and cultural issues to provide a basis for literary translation. The subject will cover literary translation theory and introduce relevant strategies to be applied in practice. The class will be non-language specific, but students will be expected to work from and into their language other than English.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYB 3388 - Literary Translation
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 7029 Medical Interpreting (PG) (10 Credit Points)
Subject Details (p. 3929) Legacy Code: 100922
This subject aims to develop students' skills and knowledge in interpreting at the Professional level (formerly NAATI Level 3) through the modes of dialogue interpreting, consecutive interpreting, simultaneous interpreting and sight translation in the domain of health services. Lectures are held in English for students of all languages. The tutorials are language specific in Arabic, Japanese, Mandarin, Spanish, Korean and Vietnamese.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYB 3385 - Medical Interpreting
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 7030 Preparation for NAATI Certification (PG) (10 Credit Points)
Subject Details (p. 3930) Legacy Code: 102562
This is a compulsory subject in the Master of Interpreting and Translation, Master of Translation and TESOL, Graduate Diploma in Translation and Graduate Diploma in Interpreting courses. It aims to provide practice and constructive feedback to students preparing to sit the external NAATI certification examinations.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): LANG 7017
Equivalent Subjects: LANG 7001 - Accreditation Studies
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 7031 Second Language Assessment and Testing (10 Credit Points)
Subject Details (p. 3931) Legacy Code: 101824
This subject introduces students to fields of language assessment and testing in TESOL. It provides students with some insight into the key language components for assessment, assessment design and development. It also equips students with updated knowledge about different assessment approaches which impact on the teaching and learning of English as a second or other language in local and global contexts.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): TEAC 7140
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 7032 Specialised Translation (PG) (10 Credit Points)
Subject Details (p. 3931) Legacy Code: 100917
This subject explores the functional, discursive, rhetorical, syntactic, semantic and lexical features of texts in the following specialised fields: tourism, news media, legal texts, technical & scientific materials. Knowledge of the functions and textual features of specialised texts will provide a basis for translating these specialised texts from and into English. Students will analyse the texts in both languages, and discuss ways in which the texts are to be translated. The subject will be available, depending on sufficient demand, for Arabic, Japanese, Mandarin and Spanish.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYB 3389 - Specialised Translation
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 7033 TESOL Internship (20 Credit Points)
Subject Details (p. 3932) Legacy Code: 101698
This is a professional practice subject which consists of an internship in an English language teaching organisation for students of TESOL. It involves participation in the various aspects of the work of the teaching organisation, including a supervised English language teaching practice component for local students. Assessment items facilitate students' self-reflection on their teaching practice and critical evaluation of teaching methods and needs assessment in practice.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): TEAC 7140
Incompatible Subjects: LGYA 0754 - TESOL Internship
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 7034 TESOL Project (40 Credit Points)
Subject Details (p. 3933) Legacy Code: 102337
This subject is the final component in the Master of Arts in TESOL course. Equipped with knowledge and research skills developed in previous course components, students undertake independent and guided research activities and propose pedagogical solutions to specific TESOL classroom situations. Students will demonstrate the practical application of this research by undertaking a TESOL project which culminates in a 12,000-15,000 word research report or teaching proposal. Students have the opportunity to research specific TESOL interests in depth. These include, but are not limited to, generic Applied Linguistics, Task-Based Language Teaching, English as a Foreign Language (EFL), Second Language Acquisition, Second or Other Language Maintenance, English for Academic Purposes (EAP), or discrete elements of Pedagogy.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): TEAC 7140 AND

LANG 7031 AND
TEAC 7044 AND
LANG 7023 AND
TEAC 7076 AND

Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 7035 Text Analysis for Translation (PG) (10 Credit Points)
Subject Details (p. 3934) Legacy Code: 102524
The subject provides support for students in the postgraduate Interpreting and Translation programs to develop their analysis skills of the texts they will confront in their translation work. It is a bilingual subject, that is texts in both English and the respective Language Other Than English (i.e. Spanish, Chinese, Arabic, Japanese, Vietnamese, Korean) will be analysed to reveal the structures of meaning and linguistic and contextual features of the texts. It encourages close readings of source texts, understanding where extra-textual knowledge is relevant, and identifying essential meaning components underlying surface linguistic features.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 7036 Translation Technologies (PG) (10 Credit Points)
Subject Details (p. 3935) Legacy Code: 101750
This subject aims to equip students with the theoretical and practical knowledge needed to effectively apply information and communication technologies to translation and other language related tasks. It focuses on translation memory and terminology management systems, and on the workflow involved in the handling of multilingual content. Emphasis is also put on uses of the Internet as a resource tool, and to the principles of controlled language for text to be processed by machine translation (MT). Tutorials will be conducted in a computer lab where students will familiarize themselves with leading computer-assisted translation (CAT) software applications.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LANG 9001 Higher Degree Research Thesis - Languages and Linguistics (80 Credit Points)
Subject Details (p. 3935) Legacy Code: 800025
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

Law (LAWS)

LAWS 0001 Law Exchange Unit 1 (10 Credit Points)
Subject Details (p. 3936) Legacy Code: 900606
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 0002 Law Exchange Unit 2 (10 Credit Points)
Subject Details (p. 3937) Legacy Code: 900607
Level: Undergraduate Level 0 Preparatory subject

LAWS 0005 Law Exchange Unit 5 (10 Credit Points)
Subject Details (p. 3938) Legacy Code: 900610
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 1001 Enterprise Law (10 Credit Points)
Subject Details (p. 3939) Legacy Code: 200909
This is an introductory law subject designed to introduce the fundamentals of law in a commercial context. The subject introduces students to the basic principles of law and the legal system as well as examining some of the major areas of law that impact on commercial dealings. This subject examines the legal system, the way law is made and the main areas of law relevant to starting and running a business including contracts, negligence and consumer protection.
Level: Undergraduate Level 1 subject
Equivalent Subjects: LAWS 1004
LAWS 1005
LAWS 1002
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 1002 Enterprise Law (WSTC) (10 Credit Points)
Subject Details (p. 3940) Legacy Code: 700254
This is an introductory law subject designed to introduce the fundamentals of law in a commercial context. The subject introduces students to the basic principles of law and the legal system as well as examining some of the major areas of law that impact on commercial dealings. This subject examines the structure of the legal system, the way law is made, and the main areas of law relevant to starting and running a business including contracts, torts and consumer protection.
Level: Undergraduate Level 1 subject
Pre-requisite(s): JUST 0003
Equivalent Subjects: LAWS 1004 - Introduction to Business Law LAWS 1001 - Enterprise Law LAWS 1005 - Introduction to Business Law (UWSC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 1003 Fundamentals of Australian Law (10 Credit Points)
Subject Details (p. 3941) Legacy Code: 200977
This subject provides students with the fundamental legal skills required to succeed in the study and practice of law. Students will be introduced to the Australian legal system, legal study skills, academic integrity, how law is made, how cases and statute interact, the Australian court hierarchies, case analysis skills, statutory interpretation skills, an introduction to the role of legal professionals in Australia.
Level: Undergraduate Level 1 subject
Equivalent Subjects: LAWS 1006 - Introduction to Law LAWS 1007 - Introduction to Law (WSTC)
Incompatible Subjects: LAWS 1001 - Enterprise Law LAWS 1002 - Enterprise Law (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 1007 Introduction to Law (WSTC) (10 Credit Points)
Subject Details (p. 3943) Legacy Code: 700157
This subject introduces students to the Australian legal system. It considers the historical and legal factors which influenced its development and the key institutions and processes which have resulted. It considers the impact of Australian law and legal system on Indigenous Australians and their laws. The subject introduces students to legal method: legal reasoning and statutory interpretation. Students will also develop academic literacies, including study management, writing and referencing in a legal context.
Level: Undergraduate Level 1 subject
Equivalent Subjects: LAWS 1006 - Introduction to Law
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 1009 Legal Analysis and Critique (10 Credit Points)
Subject Details (p. 3943) Legacy Code: 200978
The subject exposes students to the contexts that affect how law is made, some of the institutional limitations on law and justice and the impact of globalisation on law. It introduces theories about the nature and function of law in historical, political, social, economic, cultural, ethical and international contexts. The connection between race, gender, culture and law is examined within the context of the Australian legal tradition, legal history, and the impact of the Australian legal system on Australian First Peoples. The subject introduces students to the processes of critical evaluation of arguments, legal communication and logical and critical problem solving.
Level: Undergraduate Level 1 subject
Co-requisite(s): LAWS 1003 OR
LAWS 1006
Equivalent Subjects: LAWS 1008 - Law Foundation
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 2001 Alternative Dispute Resolution (10 Credit Points)
Subject Details (p. 3944) Legacy Code: 200811
Alternative Dispute Resolution (ADR) processes are no longer 'alternative' but a major part of the contemporary justice system. Modern legal practice requires lawyers to negotiate settlements on behalf of clients and advise clients how to resolve disputes without litigation. Non-adversarial processes offer many benefits to parties, professionals and the community. This subject will introduce you to the theory and practice of alternative dispute resolution processes and provide you with the opportunity to develop key ADR practice.
Level: Undergraduate Level 2 subject
Co-requisite(s): LAWS 1003 OR
LAWS 1006
Incompatible Subjects: JUST 2001 - Alternative Dispute Resolution JUST 2019 Conflict Resolution
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 2003 Contracts (10 Credit Points)
Subject Details (p. 3945) Legacy Code: 200011
Contracts covers the formation of contracts, the requirement of writing, privity of contract, contractual terms and their interpretation, breach of contract, discharge of contractual obligations and elements vitiating its formation such as misrepresentation, misleading and deceptive conduct, mistake, undue influence, unconscionability, duress and discharge. Statutory developments are also considered such as the Contracts Review Act 1980 (NSW) and the Australian Consumer Law, as are the historic and theoretical aspects of the development of the law of contract.
Level: Undergraduate Level 2 subject
Co-requisite(s): LAWS 1006 OR
LAWS 1003
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 2004 Criminal Law (10 Credit Points)
Subject Details (p. 3946) Legacy Code: 200010
This subject introduces students to the basic principles of criminal law and criminal responsibility and the criminal justice process as located in its broader social and political context, including the impact of the criminal justice system on Indigenous Australians. Students will engage in collaborative class learning with a particular focus on legal problem solving and participate in a mock bail application.
Level: Undergraduate Level 2 subject
Co-requisite(s): LAWS 1006 OR
LAWS 1003
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 2005 Financial Services Law (10 Credit Points)
Subject Details (p. 3946) Legacy Code: 200271
Financial services is one of the fastest growing sectors of the Australian economy. This is an essential subject to understand legal, compliance and regulatory issues relating to the financial services sector in Australia. Students will be introduced to the licensing requirements for entering the financial services sector and the obligations for marketing and offering financial products and financial services to retail and wholesale clients. Students are then introduced to the main techniques of financial services regulation: disclosure, licensing, prohibitions or insider trading and market manipulation, self-regulation and powers of investigation and enforcement.
Level: Undergraduate Level 2 subject
Pre-requisite(s): LAWS 3045 OR
LAWS 2010
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 2007 First Peoples and the Australian Legal System (10 Credit Points)
Subject Details (p. 3947) Legacy Code: 200944
First Peoples and the Australian Legal System provides students with a grounding in the central legal issues associated with the historical and contemporary interaction of First Peoples with the Australian legal system.
Level: Undergraduate Level 2 subject
Pre-requisite(s): LAWS 1006 OR
LAWS 1003 AND
LAWS 1008 OR
LAWS 1009
Equivalent Subjects: LAWS 2009 - Indigenous Australians and the Law
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 2008 Government and Public Law (10 Credit Points)
Subject Details (p. 3948) Legacy Code: 200984
Government and Public Law introduces students to the field of public law and the operation of government in Australia. The subject has four key focus areas: Public Law in Australia, How Government Works, Government Accountability and Integrity, and Individuals and Government. The subject is intended to provide an overview of government and public law in Australia. The subject provides a foundation for the later study of Administrative Law and Constitutional Law.
Level: Undergraduate Level 2 subject
Pre-requisite(s): LAWS 1003 OR
LAWS 1006
Incompatible Subjects: LAWS 3010 - Commercial Transactions Law
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 2010 Law of Business Organisations (10 Credit Points)
Subject Details (p. 3949) Legacy Code: 200183
This subject deals with legal issues concerning the creation and control of companies and compares this structure with other forms of business organisations, such as joint venture, partnership, trusts and sole traders. This subject will provide students with an appreciation of partnership, and companies and a practical operation of a scheme of corporate regulation in the Australian federal system.
Level: Undergraduate Level 2 subject
Pre-requisite(s): LAWS 1004 OR
LAWS 1001
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 2012 Regulatory Risk and Compliance (10 Credit Points)
Subject Details (p. 3950) Legacy Code: 200928
This subject provides a general overview of key regulatory bodies as well as their associated remit, governing legislation, roles and responsibilities. Key regulatory fields relate to financial services, consumer credit, telecommunications, water, energy and employment regulation. The subject identifies and discusses key concepts including consumer protection laws, anti-money laundering and counter terrorism financing, privacy, whistle-blower regime, complaints handling and modern slavery obligations.
Level: Undergraduate Level 2 subject
Pre-requisite(s): LAWS 1001 AND LAWS 2010
OR
LAWS 1003 AND LAWS 1009
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 2013 Torts Law (10 Credit Points)
Subject Details (p. 3950) Legacy Code: 200008
The subject introduces students to the legal principles and policy of a variety of torts, defences and remedies. The subject also introduces students to the generic legal skills of case reading and, analysis and note taking, statutory interpretation and legal problem solving, as well as placing the law in the wider political and social context.
Level: Undergraduate Level 2 subject
Co-requisite(s): LAWS 1006 OR
LAWS 1003
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 2014 Bioethics (10 Credit Points)
Subject Details (p. 3951) Legacy Code: 201044
This subject covers the ethical and legal issues associated with medical practice and research, including issues raised by new developments in biotechnology. Topics covered include the following: the nature of moral thinking, issues of life and death, experimentation and research involving human subjects, genetic technology, new reproductive technologies, consent and confidentiality.
Level: Undergraduate Level 2 subject
Pre-requisite(s): LAWS 2013 AND
LAWS 1009
Equivalent Subjects: JUST 2002 - Bioethics
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 2015 Professional Responsibility and Legal Ethics (10 Credit Points)
Subject Details (p. 3952)
This subject examines the nature of the legal profession and its role in society. It deals with the professional, legal and ethical responsibilities legal practitioners owe to the law, the courts, their clients and to fellow practitioners, as well as the state and society at large. Students will be able to explain and evaluate the law and practice of legal practitioners, by reference to key topics, such as: professionalism; legal ethics; the history, structure and regulation of the legal profession; and the interpersonal, psychological and cultural factors affecting lawyers. Guided by an ethical decision-making model, students will demonstrate their ability to use primary legal materials to answer legal ethical problems.
Level: Undergraduate Level 2 subject
Co-requisite(s): 200006 Introduction to Law OR
200977 Fundamentals of Australian Law
Equivalent Subjects: 200020 Professional Responsibility and Legal Ethics
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 2016 Law of Commercial Obligations (10 Credit Points)
Subject Details (p. 3953)
This subject introduces students to the Australian laws governing transactions involving the transfer, registration and use of property. Focusing on commercial applications students will consider laws governing real, intellectual and personal property including topics such as registration requirements under the Torrens title system and the Personal Property Securities Act (PPSA) as well as enforceability and alienation of proprietary interests, leases and deeds, and subsidiary interests such as covenants and easements.
Level: Undergraduate Level 2 subject
Pre-requisite(s): LAWS 1001 - Enterprise Law
Equivalent Subjects: JUST 2011 - Law of Commercial Obligations
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 2017 Indonesia: Law, Governance and Culture (10 Credit Points)
Subject Details (p. 3953)
This subject provides students with the opportunity to visit and learn about the legal cultures and systems applied in Australia's nearest northern neighbour and a gateway to Asia – Indonesia. The Study Tour provides students with an introduction to Indonesia's rich tapestry of cultural, religious, legal and political issues. This subject is taught intensively, and students will visit an array of law and governance sites from transnational law firms in Jakarta to religious boarding schools in Yogyakarta and sultan's palaces in Surakarta, which are all pivotal to governance arrangements in Indonesia but in very different ways.
Level: Undergraduate Level 2 subject
Pre-requisite(s): LAWS 1003
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3001 Advanced Family Law (10 Credit Points)
Subject Details (p. 3954) Legacy Code: 200629
This subject provides a practical framework around complex family law matters and builds upon the skills obtained in Family Law. This subject provides students with the opportunity to obtain practical skills in taking instructions from clients, drafting orders, making urgent applications, children's matters including complex family dynamics, child dispute services, Family Reports, Magellan matters, drafting documents, Relocation Cases, Hague Convention Cases and Contravention Proceedings, Property Matters including assets and values, financial disclosure, conciliation conferences, contributions, expert evidence, spousal maintenance and enforcement proceedings, as well child support and running undefended hearings.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 3023
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3002 Advanced Torts and Civil Wrongs (10 Credit Points)
Subject Details (p. 3955) Legacy Code: 200650
Advanced Torts and Civil Wrongs examines in detail the basic principles and current issues in selected areas of torts law and civil liability.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 2013
Equivalent Subjects: LGYB 8513 - Advanced Torts and Civil Wrongs
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3003 Advocacy (10 Credit Points)
Subject Details (p. 3956) Legacy Code: 200646
This subject imparts basic courtroom trial skills giving practice in applying substantive law, practice, procedure and evidence in a simulated courtroom. It also explores both professional and ethical issues involved in the courtroom. There is a limit on enrolment in this subject because of the teaching method adopted.
Level: Undergraduate Level 3 subject
Co-requisite(s): LAWS 4004
Equivalent Subjects: LGYB 0403 - Advocacy
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3004 Anti-Discrimination Law (10 Credit Points)
Subject Details (p. 3956) Legacy Code: 200654
This subject provides students with a practical understanding of Australian anti-discrimination and equality law, including relevant state and federal legislation, and significant cases. It encourages the development of critical perspectives on the operation and effectiveness of existing regulatory responses to discrimination, including responses to discrimination experienced by First Nations people. Starting with a conceptual and historical overview, this subject considers the key grounds/attributes, types of conduct, and activities (areas of public life) that are protected under current Australian anti-discrimination law. Relevant defences, exceptions and exemptions are also considered, along with procedural requirements for bringing a discrimination complaint, remedies and costs.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 2008
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3005 Australian Competition Law (10 Credit Points)
Subject Details (p. 3957) Legacy Code: 200905
This subject examines the main competition law provisions of the Competition and Consumer Act 2010 (Cth). Specifically, it examines the key concepts and economic principles that form the basis of competition law, the relevant case law, the available statutory remedies, and enforcement powers of the Australian Competition and Consumer Commission. This subject will provide students with an in-depth understanding of the theoretical basis of competition law as well as a practical understanding of how the competition provisions (including restrictive trade practices and cartel provisions) are applied.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 2003
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3006 Australian Consumer Law (10 Credit Points)
Subject Details (p. 3958) Legacy Code: 200858
This subject examines the main statutory provisions of the Australian Consumer Law. Specifically, it examines key concepts and principles of Australian Consumer Law, relevant case law, and statutory remedies that are available. The subject will provide students with not only an understanding of the theoretical basis of Australian Consumer Law, but also a practical understanding of how the provisions are applied.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 2003
Equivalent Subjects: LGYA 4905 Consumer Law and Policy
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3007 Banking and Securities Law (10 Credit Points)
Subject Details (p. 3959) Legacy Code: 200697
This subject examines the Australian financial system and capital markets in the context of the banker customer relationship, commercial lending and security (including the Personal Property Securities Act 2009 (Cth)). The subject also introduces students to key financial instruments which are used in general banking and finance practice such as letters of credit and performance guarantees. Finally, students will examine key legal concepts in lending and structured finance including securitisation covered bonds and derivatives.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 3045
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3011 Comparative Law: Legal Systems of the World (10 Credit Points)
Subject Details (p. 3959) Legacy Code: 200529
The subject introduces students to the different legal systems of the world and to the study of comparative law. It covers the common law and civil law traditions, taxonomies of comparison, major political systems, modes of judicial review, and the protection of human rights. The course will draw on a range of case studies including Australia, major Western democracies (like the United States, France, and United Kingdom), as well as several countries in the Global South, including India, South Africa, and Mexico. It aims to provide an understanding of legal systems have developed in particular legal and cultural contexts. We will study the systems of both at the general level and in relation to specific laws, with an emphasis on comparative constitutional law. The subject is also concerned with the nature and function of comparative law as a discipline. Students will be encouraged to undertake individual research and to evaluate legal information derived from a variety of different sources and perspectives.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 2013 AND
LAWS 4015 AND
LAWS 2004 AND
LAWS 2003
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3013 Conflict of Laws (10 Credit Points)
Subject Details (p. 3960) Legacy Code: 200656
Conflict of Laws (also known as Private International Law) is about resolving legal questions involving more than one jurisdiction. Conflict of Laws issues may arise between the Australian States and Territories or between nations. The globalisation of economic activity, and ease and affordability of travel and telecommunications have contributed to the recent dramatic increase of trans-national dimensions in personal and commercial litigation. This subject provides an introduction to the sources of conflict of laws, the international jurisdiction of domestic courts, the recognition and enforcement of foreign judgements and decrees, and the problem of choice of law as it arises in various situations.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 2013 AND
LAWS 2003 AND
LAWS 3082
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3014 Corporate Governance (10 Credit Points)
Subject Details (p. 3961) Legacy Code: 200657
Through an interdisciplinary approach, this subject explores the place and role of the modern for profit business corporation in advanced and emerging capitalist economies. It examines the public and private role of public and private companies (and their equivalent in non-common law jurisdictions), their external and internal orientation, and issues relating to their accountability, responsibility, and transparency.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 3045 OR
LAWS 2010
Equivalent Subjects: LAWS 3026 - Governance
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3015 Cyber Law and Justice (10 Credit Points)
Subject Details (p. 3961) Legacy Code: 201018
The world is being transformed by digital technologies. The same technologies that make life more comfortable for some can unleash violence and destruction for others. Cyber war and cyber terrorism offer new risks for the international community. Bullying, identity theft and bank fraud, on a more local level, are given a new life in the cyber world. Cyber technologies also provide enhanced opportunities for detecting and apprehending criminals, resolving disputes and modernising justice processes. New social spaces are opened up (social media networks, the 'dark web'), and new identities made possible (online grooming profile, avatars). How does the law keep up with the emergence of new crimes and technology-enhanced versions of old ones, and how do the cultural worlds of hackers, crackers and trackers work? The subject examines how justice processes and spaces, as well as criminal networks and strategies, are being reimagined to take advantage of the new technologies.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 2008
Incompatible Subjects: HUMN 3030 - Cyber Justice (UG)
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3016 Elder Law (10 Credit Points)
Subject Details (p. 3962) Legacy Code: 200632
This subject examines law relevant to an aging community. The legal issues are examined in a broad social, cultural and ethical context. Issues of legal capacity relevant not only to the law of contracts but also to delegated decision making, medical treatment and end of life decisions are considered. Similarly the law relating to areas of special importance to the elder community such as, pensions, retirement villages, wills and estate planning and equitable remedies for financial elder abuse are also discussed.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 2013 AND
LAWS 2003
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3018 Equity & Trusts (10 Credit Points)
Subject Details (p. 3963) Legacy Code: 200757
This subject examines the principles of the law of equity and trusts in Australia. The primary emphasis is on the nature and development of the law of equity and students are also introduced to fundamental principles in the law of trusts in a culturally diverse society. Topics include the nature and application of principles and maxims of Equity, especially in relation to First Nations People, the trust, the types of trusts and introduction to express trusts.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 1006 OR
LAWS 1003
Co-requisite(s): LAWS 3082
Equivalent Subjects: LAWS 3019 - Equity Trusts and Remedies 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3022 Family Dispute Resolution (10 Credit Points)
Subject Details (p. 3964) Legacy Code: 200772
This subject develops mediation skills and understanding of family dispute resolution. It builds on LAWS 3023 (200633) Family Law to deepen student knowledge of and capacity to assist separated parents to resolve disputes about their children and property. Particular attention is given to processes concerning children and processes to assist families who present with highly complex family dynamics, including the presence of family violence. This subject develops students' skills to recognise and understand the drivers of conflict for separating couples, and how to conduct family dispute resolution in both the court and non-court context.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 3023
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3023 Family Law (10 Credit Points)
Subject Details (p. 3964) Legacy Code: 200633
This subject aims to graduate students who will become reflective, ethical and effective family lawyers and/or family dispute resolution practitioners. This subject adopts a range of perspectives to critically evaluate developments in theory, laws, policies and practices concerned with the legal regulation of intimate relationships, particularly after separation. Family law balances the competing rights, obligations and interests of partners, children and others following separation, often in the context of complex family dynamics. In addition to having a sound grasp of family law, family lawyers must also appreciate the social, political, psychological and economic contexts that influence separating families.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 1006 OR
LAWS 1003
Equivalent Subjects: LGYB 8494 - Family Law
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3024 Foundations of Chinese Law (10 Credit Points)
Subject Details (p. 3965) Legacy Code: 200759
An LLB alternate subject, Foundations of Chinese Law is taught intensively at a selected Chinese university. The subject introduces students to the basic structure of the Chinese legal system, its laws and the legal culture. Through seminars and field trips to Chinese courts and law firms, the subject aims to develop your understanding of how the Chinese legal system has developed in its political and cultural contexts. It covers the Chinese legal systems at the general level and in relation to specific law, such as contracts, foreign investment law, dispute resolution and procedure.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 2003
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3025 Law, Culture and Entrepreneurial Innovation in India (10 Credit Points)
Subject Details (p. 3966) Legacy Code: 200983
This subject is taught intensively at selected Indian university law schools. The subject introduces students to the basic structure of the Indian legal system, its laws and the legal culture. Through seminars and field trips to Indian courts and law firms, the subject aims to develop student understanding of how the Indian legal system has developed in its political and cultural contexts. It covers the Indian legal systems at the general level and in relation to specific law, such as contracts, human rights and labour law, Corporate Social Responsibility, Indian Stock Exchange and Trading Law, Corporate Governance and Board Diversity.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 1006 OR
LAWS 1003 AND
LAWS 2003
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3027 Human Rights Law (10 Credit Points)
Subject Details (p. 3966) Legacy Code: 200635
This subject examines the theory and practice of international human rights law through the framework of specific, current human rights issues. The Subject examines the moral and political justification for human rights; the foundations and historical development of key human rights instruments and institutions; the domestic, regional and global organisations that contribute to the promotion and protection of human rights; and challenges to realising human rights in different economic, cultural and religious contexts. Through a focus on contemporary issues and debates (which might include for example, the scope of the right to privacy; the effectiveness of measures to prevent genocide; the vulnerability of women and children in conflict situations) the Subject encourages a critical examination of the interconnectedness of rights and the way international human rights law is deployed to expand (or constrain) possibilities for social change and justice. The subject integrates the experience of the teachers as active human rights practitioners and academics in a range of institutions such as with National Human Rights Institutions, Human Rights NGOs, and Subjected Nations bodies to interrogate the range of ways in which human rights can be used to advance the equality and dignity of humanity.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 1003 OR
LAWS 1006
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3028 Human Rights and the Asia Pacific (10 Credit Points)
Subject Details (p. 3967) Legacy Code: 200908
This subject examines the place of regional human rights systems in the global architecture of human rights. Concepts of universalism, relativism and the 'Asian values' debate are examined. The record of human rights treaty ratification and compliance in Asia and the Pacific is examined within the context of the international treaty system as well as the ASEAN regional human rights regime. The development and implementation of international and domestic human rights protections in criminal law, constitutional law and institutional construction are examined across the region. The role of civil society, non-governmental organisations and networks, and middle powers in impacting the politics, law and institutions of human rights protections across the Asia-Pacific region is examined.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 1006 OR
LAWS 1003
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3029 Immigration Law (10 Credit Points)
Subject Details (p. 3968) Legacy Code: 200298
This subject offers a comprehensive overview of immigration law, focusing on the Australian immigration system and visa processes. Students will explore general principles, visa applications, including family inclusion and health requirements, and public interest criteria. The subject also covers the legal aspects of losing a visa, immigration offences, and visa conditions. Additionally, students will learn about the review and cancellation of visas. This subject provides essential knowledge and skills for navigating the complexities of immigration law and policy, preparing them for relevant legal careers.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 2008
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3030 Information and Data Governance Law and Regulation (10 Credit Points)
Subject Details (p. 3969) Legacy Code: 200955
This subject examines the operation of information technology for online data collection, information privacy and data governance laws and regulation. The subject focuses on the right to privacy, the protection of individuals with regard to the processing of personal data and the free movement of such data and the legal framework for information protection. The framework for information privacy and data governance is established by both international and domestic law and regulation. The subject introduces the basic legal framework for information privacy protection and governance under the European Union's Commission, the OECD Guidelines for the Protection of Privacy and Trans-Border Flows of Personal data and under the Australian Privacy protection framework. The subject compares the information governance policy and framework in the European Union and the United States with that in Australia.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 2003
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3031 Insolvency Law and Policy (10 Credit Points)
Subject Details (p. 3970) Legacy Code: 200659
The laws regulating insolvency administration have developed over time into an integral component of the legal system, domestic and international. By purposive analysis of the Australian and cross-border legislative provisions, this subject introduces the law and public policies by which regulators administer insolvent corporate entities and persons, and examines potential outcomes, including restructuring proposals.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 3045
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3032 Intellectual Property (10 Credit Points)
Subject Details (p. 3970) Legacy Code: 200637
This subject provides an introduction and overview of the legal principles of intellectual property law, and traces the development of this law in Australia. It is designed as an introductory survey subject for undergraduate law students. Students will be considering the nature of intellectual property, the legal framework which contains it, the ways in which it can be protected and the reasons why it might seem important to our society to uphold intellectual property rights. The modules will cover the four major intellectual property regimes of trademarks, copyright, designs, and patents as well as issues relating to traditional knowledge of Aboriginal and Torres Strait Islander Peoples.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 2003
Incompatible Subjects: LAWS 3060 - Protecting Ideas LAWS 7033 - Securing Ideas
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3033 International Business Transactions Law (10 Credit Points)
Subject Details (p. 3971) Legacy Code: 200638
This subject is designed to be taught offshore as well as in Australia. It examines the legal regimes governing international business; international sales transactions; licensing, and investment arrangements; build, operate and transfer schemes; what lawyers do when negotiating and drafting international trade; what needs to be taken into account when dealing with developed, developing, and non-market economies; and the interplay of law, politics and culture in these contexts.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 3045
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3034 International Criminal Law (10 Credit Points)
Subject Details (p. 3972) Legacy Code: 200220
This subject analyses the current state of international criminal law and its place in the modern international legal system in light of important recent developments. It discusses why States should reform their national criminal laws to accord with international developments. It focuses on both the substantive and procedural law. It examines relevant international legal concepts, general principles of international criminal law, and how international criminal tribunals function. It considers particular international crimes, participation in such crimes, defences, and important recent cases such as Pinochet and Slobodan Milosevic.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 2004
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3039 Islam, International Law and Human Rights (10 Credit Points)
Subject Details (p. 3973) Legacy Code: 200956
This subject explores the intersection between Islamic law, international law and human rights. The subject begins with providing a theoretical framework introducing international law and human rights from a secular and Islamic perspective, providing an overview of how classical and contemporary Muslim scholars engage with the human rights discourse. The second part of the subject will discuss human rights from the perspective of nation states, examining the legal framework (in the context of Islamic and secular law) of key nation states, as well as that of some international organisations (including the Organisation of Islamic Cooperation and the Arab League). Students will examine whether there is an ideal governance framework to protect human rights and discuss core international human rights treaties including Islamic Human Rights instruments (i.e. the Universal Islamic Declaration of Human Rights, the Cairo Declaration on Human Rights in Islam and the Arab Charter on Human Rights). Students will discuss specific human rights issues including Islam and gender, Islam and freedom of expression, Islam and freedom of religion and Islamic criminal law. When examining these topics, students will be encouraged to engage with various interpretations of Islamic law, as well as critically examine the human rights framework.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 2008
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3040 Islamic Law in a Changing World (10 Credit Points)
Subject Details (p. 3974) Legacy Code: 101465
This subject introduces students to Islamic legal theory, its sources and principles, and its application by different schools and scholars to derive religious verdicts. Students will study efforts to 'streamline' Islamic law through a number of Sunni and Shiite schools, various conceptions of shari'ah, and modern attempts at law reform through dynamic scholarship and ijtihad (independent judgment). Upon completion, students should be able to explain developments in Islamic legal thought within their socio-historical contexts, and identify key debates among Muslim scholars. Using current case studies, students will also study Islamic law issues affecting Muslims today, especially Muslim minorities.
Level: Undergraduate Level 3 subject
Pre-requisite(s): HUMN 1047 OR
LANG 2017
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3042 Jurisprudence (10 Credit Points)
Subject Details (p. 3974) Legacy Code: 200649
This subject engages students in the critical analysis of modern law through reflection on the major traditions and contemporary practices of legal theory. The subject encourages students to examine and question key legal concepts that inform the law, such as power, morality and truth. Students will interpret, analyse, justify and critique issues and ideas using tools of critical reflection drawn from texts in legal philosophy, ancient to modern. In this way, they will develop tools that allow them to understand and uncover the foundational ideas and assumptions on which we base our view of the law and its consequences, leaving students well-placed to embark upon systematic inquiries in legal reform and further studies in legal theory.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 1006 OR
LAWS 1003 AND
LAWS 1008 OR
LAWS 1009
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3044 Law and Public Policy (10 Credit Points)
Subject Details (p. 3976) Legacy Code: 200802
This subject examines the link between law, public policy and social reform and adopts a range of social, political and legal perspectives to examine the policy process and its interaction with law. Students will study and reflect on discourse and activism around selected case studies involving contemporary issues in public law and policy.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 2008 Government and Public Law
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3045 Law of Associations (10 Credit Points)
Subject Details (p. 3976) Legacy Code: 200018
This subject deals with issues that arise in relation to the selection of appropriate structures for the conduct of non-profit and commercial dealings. Students examine the legal and practical requirements involved in creating, operating and winding up associations, partnerships and corporations and their and their relationship to broader social, economic and political contexts. Emphasis is on the creation and operation of corporations, and the duties and liabilities of directors and officers, as well as the rights and obligations of shareholders. The subject will explore key ethical issues arising in the law of associations and consider different stakeholder perspectives.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 3018
Incompatible Subjects: LAWS 2010 - Law of Business Organisations
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3046 Law of Employment (10 Credit Points)
Subject Details (p. 3977) Legacy Code: 200297
This subject focuses on the law that regulates individual aspects of employment relationships including the contract of employment. It aims to place an examination of the development, nature and scope of relevant legal principles in the context of the key features of the contemporary Australian labour market.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 2003
Equivalent Subjects: LGYB 0299 - Law of Employment
Incompatible Subjects: LAWS 3017 - Employment Law and Policy
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3047 Law of International Organisations (10 Credit Points)
Subject Details (p. 3978) Legacy Code: 200803
This subject examines the structure and functions of the world's major transnational organisations. The subject extends students' understanding provided by Public International Law by examining the reality of international action and cooperation. Given that the European Union is the most highly evolved transnational organisation in the world today, the course will be centred around this organisation, while comparing it with other major international organisations such as the UN, the WTO and regional transnational organisations such as the African Union and the Organisation of American States. The Brexit process currently taking place in the EU will be analysed as a disruption to the trend of transnationalism.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 2008
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3048 Law of the Sea (10 Credit Points)
Subject Details (p. 3978) Legacy Code: 200804
This subject will introduce students to the rules regulating the principle uses of the world's oceans. It will highlight historical development of the law of the sea, the sources of the contemporary law of the sea and the adoption of the 1982 Convention on the Law of the Sea (UNCLOS). Legal regime of various maritime zones including territorial sea and contiguous zone, continental shelf, the exclusive economic zone and the high seas will be studied. Various sources of marine pollution, fisheries, marine scientific research, maritime spatial planning, deep sea bed mining and dispute settlement will also be explored in this subject.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 2008
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3049 Media Law (10 Credit Points)
Subject Details (p. 3979) Legacy Code: 200661
This subject examines various aspects of the laws that regulate the media. The central content of the subject consists of defamation, contempt, privacy and surveillance and a selection of other laws impacting upon this industry. Throughout the subject we will also explore two key themes. The first is whether, as a question of policy, current legal restrictions to media freedom appropriately balance the protection of free speech with various other interests, including protection of reputation, personal privacy and the effective administration of justice. The second theme asks whether media laws that were developed to regulate traditional mass-media organisations apply to individuals who publish their own content online, particularly via social media, and, if so, whether this application is appropriately balanced. Analysis of the application of existing media law principles to a range of new technologies will be featured throughout the subject.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 2013 AND
LAWS 2008
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3050 Medical Law (10 Credit Points)
Subject Details (p. 3980) Legacy Code: 200856
This subject aims to provide knowledge and understanding of Australian medical law, including some cutting edge legal and policy issues that arise in this field. The legal issues are examined in broad social, cultural and ethical contexts, including critical perspectives on medical law and policy relating to Indigenous people. Medical law is an exceptionally vibrant and challenging field, underpinned by the rapid pace of scientific and social developments that generate new issues for medicine and for the law. Many of the more challenging issues for the law are at the core of policy — birth and reproduction, choice and responsibility, life and death.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 2013 AND
LAWS 3082 AND
LAWS 2008 AND
LAWS 2004 AND
LAWS 2003
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3052 Mental Health Law (10 Credit Points)
Subject Details (p. 3980) Legacy Code: 200982
This subject is designed to give students an introduction to the interface between the disciplines of psychiatry and law. It examines how the empirical research and theories of psychiatry intersect with the application of legal principles and practices. As a result of successfully completing this subject, students should be able to translate personal and social issues concerning the study of mental illness and mental health into the practice of mental health law and critically evaluate different perspectives and contemporary debates about mental illness and mental health.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 2013 AND
LAWS 2004
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3053 Moot Court (10 Credit Points)
Subject Details (p. 3981) Legacy Code: 200773
This subject aims to train students in mooting conducted before an appellate court or tribunal. Students will be provided with a grounding in issues including jurisdiction, admissibility, and remedies. The subject will focus on one or more areas of domestic substantive law and will include a research component. The subject will also have a practical component aimed at enhancing the advocacy skills of participants and applying the theory to the practical aspects of the conduct of appellate advocacy. Students will be involved in the preparation and presentation of a hypothetical case before an appellate court or tribunal and will be given the opportunity to develop their advocacy skills, including the preparation of written submissions and delivery of oral submissions, in a non-competitive context. Undertaking this subject would be useful for students seeking to participate in one or more law mooting competitions, representing Western Sydney University such as the Sir Harry Gibbs Constitutional Law Moot, Sir John Peden Contracts Moot, Shine Lawyers Torts Moot, AAT Moot, and the Law Council of Australia Family Law Moot.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 2013 AND
LAWS 4015 AND
LAWS 2003 AND
LAWS 3082
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3055 Planning and Environment Law (10 Credit Points)
Subject Details (p. 3982) Legacy Code: 200647
This subject seeks to achieve a balance among theory, policy and practical issues in its approach, and it incorporates a strong interdisciplinary component in the introductory phase. It examines the planning laws in the state of New South Wales. Topics covered include an analysis of the functions of the relevant ministers, State government departments, and local councils; the role of public agencies; the effect of environmental planning instruments; and the impact of the planning system.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 1006 OR
LAWS 1003
Equivalent Subjects: LGYB 0303 - Planning and Environment Law
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3061 Public Health Law (10 Credit Points)
Subject Details (p. 3983) Legacy Code: 200702
This subject considers various legal issues related to population health. This area of law is relatively new and continually developing and expanding. This subject is primarily concerned with how law has and should respond to various health dilemmas at the population level. These include State protection of the community from death (for example requiring road users to wear a seatbelt or helmet) and disease including both communicable disease (for example immunisation, quarantine and managing disease outbreaks) and non-communicable disease (for example smoking, alcohol, obesity, diabetes and cardiovascular disease). This subject also considers frameworks for evaluating whether public health laws are justifiable regulation, taking into account the balance between public good and the autonomy of individuals.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 1006 OR
LAWS 1003 OR
LAWS 1006
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3063 Public International Law (10 Credit Points)
Subject Details (p. 3983) Legacy Code: 200653
This subject lays the foundation for an understanding of the international system of law, how it works and its relationship with domestic Australian law. It will challenge students to critically analyse the system and suggest ways in which the rules and principles can and should develop in the future in order to accommodate the changing needs and values of the international community of nations. It also represents the foundation for students to move on to the study of other International Law subjects offered by the School of Law.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 2008
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3066 Revenue Law Industry Placement (10 Credit Points)
Subject Details (p. 3984) Legacy Code: 201007
This work integrated learning subject builds upon the knowledge base of 200019 Revenue Law to provide industry experience for later year Law students. Students who have successfully completed 200019 Revenue Law with a Credit or above result will be eligible to apply for this industry experience. The placement will consist of a full time four week placement at the Australian Tax Office or other suitable workplace approved by the School of Law. Students will work in various practice areas with an emphasis on technical legal issues and will be supervised by senior staff members. The subject will provide students with practical and real-life work experience and will provide students with an appreciation of the professional responsibilities essential for 21st century legal practitioners.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 4008
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3067 Self-Managed Superannuation and Trusts (10 Credit Points)
Subject Details (p. 3985) Legacy Code: 200900
This subject provides students with the requisite skills to provide comprehensive financial advice, particularly within the context of an individual being able to choose a superannuation fund or create a self-managed superannuation fund (SMSF). The subject will provide students with an understanding of the implications of self-managed superannuation funds and the use of the trust structure, which are essential components for professionals in this area.
Level: Undergraduate Level 3 subject
Pre-requisite(s): FINC 3014 OR
LAWS 3018
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3068 Space Law - Commercial Aspects (10 Credit Points)
Subject Details (p. 3985) Legacy Code: 200652
This subject examines the underlying legal principles that regulate the use, exploration and exploitation of space, and how International Law can and should be applied to the many different State and private commercial uses of outer space. It examines the existing international legal regime - the five United Nations Space Treaties and key Declarations of Principles related to space activities - as well as a number of domestic regulatory systems, including the Australian legal regime. The subject also concentrates on the (many) uses and proposed uses of space for which the legal framework may not be particularly well suited.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 2008
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3069 State Taxes and GST (10 Credit Points)
Subject Details (p. 3986) Legacy Code: 200266
This subject examines the Commonwealth statutory regime to the Goods and Services Tax and the NSW statutory regimes relating to Payroll Tax, Land Tax and Stamp Duty. It provides the framework to critically assess proposals for reform of these taxes.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 1004
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3070 Taxation Law (10 Credit Points)
Subject Details (p. 3987) Legacy Code: 200187
This subject covers the constitutional basis of taxation, the process of determining income tax liability, the concept of income tax and allowable deductions, taxation of fringe benefits, taxation of certain entities (partnerships, companies and trusts), tax accounting, trading stock provisions, tax administration and practice, taxation planning and avoidance, and the Goods and Services Tax.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 2010 - Law of Business Organisations
Incompatible Subjects: LAWS 4008 - Revenue Law
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3071 Wills and Succession (10 Credit Points)
Subject Details (p. 3988) Legacy Code: 200641
Wills and Succession is that body of law that deals with the devolution of property upon death. The legal issues relating to wills and succession are examined in their social, cultural, and ethical contexts The subject includes an examination of law relating to intestacy, the making of a valid will, the administration of the estate and what is known as testator's family maintenance. This subject is of particular importance to those students who intend to practice either as a solicitor or barrister as Wills and Succession forms a significant part of private practice.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 3082
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3072 Work Health and Safety Law (10 Credit Points)
Subject Details (p. 3989) Legacy Code: 200799
This subject examines the different means in which the law protects workplace safety in Australia. The primary focus will be on the work health and safety regulatory framework and its underlying policy. The arbitrary nature of standard setting in the early systems of safety regulation is compared with later legislative models. The workings of these legislative strategies are illustrated by a series of selected issues relating to contemporary health risks in workplaces. Students will also examine issues surrounding enforcement and compliance and corporate governance in the safety context. Other topics include workers compensation and employment law.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 2013
Equivalent Subjects: LGYB 0395 - Occupational Health and Safety Law
LAWS 3054 Occupational Health and Safety Law
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3073 Elder Law Industry Placement (10 Credit Points)
Subject Details (p. 3990) Legacy Code: 201020
This elective work integrated learning subject builds on the knowledge base of 200632 Elder Law to provide work experience for later year Law students. Students who have successfully completed 200632 Elder Law will be eligible to apply for this industry experience. The placement will consist of a full time ten day placement at selected industry workplaces with supervision by experienced legal practitioners. The subject will provide students with real-life work experiences in the legal issues associated with the practice of elder law and with an appreciation of the professional responsibilities essential for a 21st Century legal practitioner.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 3016
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3074 Judicial Internship (10 Credit Points)
Subject Details (p. 3990) Legacy Code: 201028
This subject provides an internship opportunity for later year law students. Students will spend twelve days throughout the semester at selected courts and tribunals under the supervision of magistrates, judges or tribunal members. The subject will provide students with an opportunity to observe the courts and tribunals first hand, to be mentored by a judicial officer, to engage in practical assistance to the relevant court or tribunal, and to appreciate the professional responsibilities essential for a 21st Century legal practitioner and judicial officer. Entry is competitive and will include a written application and interview. The subject includes a class schedule with the requirement of regular reflection in order to learn deeply from the experience and teach students how to engage in ongoing lifelong learning.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 2015 AND
LAWS 2004 AND
LAWS 1008 OR
LAWS 1009
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3075 Law's Self-Understanding (10 Credit Points)
Subject Details (p. 3991) Legacy Code: 201027
This subject of study explores the central organising ideas for our present understanding of law. What do these ideas amount to? What, according to these ideas, is significant about us from the legal standpoint? Can the proponents of these ideas deal with their critics? What are the similarities and differences between the legal subject and other ways of thinking about ourselves, such as from a moral or political standpoint? How should we understand the connections between these three separate realms? What is the character of the legal sphere in comparison with these other spheres? What is the character of legal, moral and political reasoning?
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 1008 OR
LAWS 1009 AND
LAWS 2008
Incompatible Subjects: LAWS 3042 - Jurisprudence
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3076 Technology, Innovation and the Law (10 Credit Points)
Subject Details (p. 3992) Legacy Code: 201039
This subject enables students to proactively adapt to the transforming nature of the legal profession. Students will engage with the technology and innovation expectations of contemporary business, legal practice and community engagements - including the concepts and areas of Big data and Artificial Intelligence and machine learning, Blockchain, legal task automation, e-contracts and smart contracting, technology assisted review, e-Courts, FinTech and RegTech, law tech start-ups, chatbots, and the capacity to develop legal, ethical and regulatory digital literacies. The curriculum will offer insights from a number of innovative and technology focused legal industry experts.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3077 Legal Internship (10 Credit Points)
Subject Details (p. 3993) Legacy Code: 201080
This subject provides an internship opportunity for later year law students in host organisations (including NGOs and public interest organisations, community legal centres, government departments, corporations, barristers' chambers or private law firms). Internships provide students with invaluable access to opportunities to understand the law in context, to apply their formal learning about legal principles, to develop essential professional skills and to gain exposure to different career pathways. Students who successfully complete orientation requirements will spend twelve days throughout the semester at a host organisation. This will usually be done on a one- day (7 hours) per week basis. An intern's duties will generally consist of a combination of substantive tasks relating to law, policy and practice. Depending on the host organisation, these may include a combination of research, preparing background materials, briefing papers or research reports, liaising with other organisations, assisting in the provision of legal assistance and advice, observing interviews with clients, conferences with Counsel or in court proceedings, undertaking project and advocacy work, preparing/ giving presentations and assisting with administrative and editing work. The School will seek expressions of interest for the number of placements available with the School's partner host organisations each semester. Students are also able to arrange their own internships at organisations that are not currently host organisations, subject to the approval of the Clinical Director and the agreement of the host organisation to complete the attendance and assessment requirements of the subject.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 2015 AND
LAWS 2004 AND
LAWS 2013 AND
LAWS 2003 AND
LAWS 1009
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3078 Legal, Economic and Social Transformation in Taiwan (10 Credit Points)
Subject Details (p. 3994) Legacy Code: 201089
This subject introduces students to the foundational structures of Taiwan's legal system, its economy, and its socio-legal culture and practices. Students will participate in an exchange experience and will be intensively taught at selected Taiwanese university partners. Through engagement with Taiwanese academics, legal professionals (both in Australia at pre-departure programs and in Taiwan through engagements with leading Taiwanese law firms, courts and economic organisations), students will develop commercially relevant knowledge and contemporary practical legal skills to develop as global citizens. Students will examine diverse content areas including Taiwan's Constitutional Court, leading human rights cases, intellectual property protections, the Taiwanese electoral system, and Taiwan's innovative approaches to corporate social responsibility, big data analytics, and new technologies. Where travel to Taiwan is not possible, the subject will be offered online with the program of study to be offered 3-hours a week over a semester and supported online by university and industry partners in Taiwan. Where travel is possible, this online program will be supplemented by a week-long excursion to Taiwan. Interested students should contact the Subject Coordinator to confirm expected costs to the student (e.g. airfare, accommodation, meals, et cetera) and travel dates and requirements.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3079 Law, Economics, Ethics and Change (10 Credit Points)
Subject Details (p. 3994)
In this subject, students engage with and propose solutions for complex legal, industrial, ethical and societal problems. Students are required to work individually and as teams to identify and analyse contemporary transdisciplinary problems. The subject follows an innovation process including the processes of ideation, conceptualisation and the development and evaluation of solutions towards implementation, preparing students for the future of work. Students will be mentored by external partners. At the end of the subject, students will propose solutions and reflect advantages and disadvantages of different responses.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3080 Street Law Clinic (10 Credit Points)
Subject Details (p. 3995)
Street Law Clinic provides students with the opportunity to work with peers under the supervision of a Street Law solicitor to research, prepare, and deliver community legal education to partners including secondary schools and/or community organisations on legal topics chosen by these external stakeholders. Students will generate innovative resources to be added to the Street Law digital repository of resources available to the community. Community legal education is a core skill for all lawyers wanting to improve access to legal information for all members of the community. Students will collaborate with the Street Law solicitor and external stakeholders to identify the mode of delivery and content that best meets the stakeholder needs and context. Students will consolidate existing technical legal knowledge, learn new areas of law, develop advanced interpersonal and collaborative communication skills, and enhance their ability to explain complex legal information to diverse audiences.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 2015
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3081 Administrative Law (10 Credit Points)
Subject Details (p. 3996)
This subject examines the legal principles regulating the exercise of power by the executive arm of government in its various manifestations; ministers, government departments and officials, regulatory bodies, tribunals, inferior courts and local councils. This is examined in the context of Australian constitutional arrangements and it is taught in the context of constitutional themes and principles that underpin the law in this area. The exercise of power examined includes decision making, the exercise of discretion, delegated legislation and the decision making procedure of the major administrative tribunals. The focus is on the principles of judicial review developed by the courts, standing and remedies. There is also an examination of major non-judicial avenues of review by the major tribunals such as the Commonwealth Administrative Appeals Tribunal, and the Ombudsman. The subject will also examine Freedom of Information legislation. This subject examines a number of key cases relating to Indigenous land and political rights, including the dismissal of indigenous representatives.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 2008 Government and Public Law OR 200814 Commercial Transactions Law
Equivalent Subjects: 200013 Administrative Law
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3082 Property Law (10 Credit Points)
Subject Details (p. 3997)
This subject deals with concepts of property and the nature of property rights including the boundaries between property and other rights and the boundaries between different forms of property. The subject's content includes the doctrine of tenure and estates, native title, and legal and equitable interests in land. Specific topics to be covered include personal property and securities, mortgages, leases, easements and profits a prendre, co-ownership, systems of statutory registration of interests in property and the principles for resolving conflicting proprietary interests (priorities).
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 1003 Fundamentals of Australian Law AND LAWS 2003 Contracts
Equivalent Subjects: 200012 Property Law
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3083 Gender and the Law (10 Credit Points)
Subject Details (p. 3997)
This subject examines the way in which law and gender interact to produce gendered outcomes. The subject draws on feminist and queer theories to challenge traditional concepts of gender and notions of law as gender neutral. The subject will consider the way in which gender constructs influence the development and application of law. Students will study historical and contemporary legal issues to examine the way that gendered norms emerge and operate within the legal system, reproducing and reinforcing socially and politically constructed understandings of gender and sexuality. Students will be encouraged to think about the potential for law as a site of change and a means to promote gender equality.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3084 Law and Literature (10 Credit Points)
Subject Details (p. 3998)
This subject will explore the relationship between law and literature. Students will examine how works of literature reflect the law and its social context, with the objective of developing a facility with research and critical and analytical skills, as well as fostering a broader appreciation of the role of law within our society. It will also involve textual analysis of legal documents, judgments and literary writings to encourage students to develop both a greater understanding of the language of the law and the ability to communicate persuasively and effectively in legal contexts.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 1009
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3085 Law of War (10 Credit Points)
Subject Details (p. 3998)
This subject will consider the full spectrum of the international law that governs armed conflict involving States and non-State (rebel) armed groups. The subject will first explore the international law that governs the initiation of armed conflict (jus ad bellum), including the prohibition of the use of force under customary international law and the UN Charter (1945), self-defence, use of force authorised by the UN Security Council, humanitarian intervention, peacekeeping and the maintenance of international peace and security. The subject will then explore the international law that governs how armed conflict is conducted (jus in bello), namely, international humanitarian law/law of armed conflict in international and non-international armed conflicts.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 2008 Government and Public Law
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3086 Managing Legal Risk in Construction Law (10 Credit Points)
Subject Details (p. 3999)
This subject introduces students to legal risks related to construction processes and processes for risk mitigation. Students will examine the liabilities and responsibilities of various parties in construction contracts and different types of dispute avoidance, management and resolution mechanisms. Students will engage with subject-matter specialists to enhance their learning experiences in this subject.
Level: Undergraduate Level 3 subject
Co-requisite(s): LAWS 3088 Construction Law
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3087 Sports Law (10 Credit Points)
Subject Details (p. 4000)
This subject focuses on the general principles of law that play a significant role in sport. 'Sport law' is considered to be an emerging and developing subject area of law. This has been recognised in Europe where the 'specificity of sport' refers to the inherent characteristics of sport that set it apart from other economic and social activities. Sport is a global industry and one of the most popular pastimes and activities in Australia. Students will learn about world sports law or lex sportiva, which is regarded as an autonomous body of rules having a specific character. Students will engage in activities that develop their understanding of this body of law in practice. This subject will foster critical perspectives on discrimination in sport and the contribution of Indigenous people to sports law and policy in Australia.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 2003 Contracts and LAWS 2013 Tort Law
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3088 Construction Law (10 Credit Points)
Subject Details (p. 4000)
This subject introduces students to the legal and technical concepts required to understand the specialised area of construction law. Students will examine the key issues, concepts and topics that are specific to construction law from project preparation, through to contract formation, regulation, procurement methodologies, and finally to dispute avoidance and management. Students will engage subject-matter specialists to enhance their learning experiences in this subject.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 2003 Contracts
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3089 Children's Rights: Local and International (10 Credit Points)
Subject Details (p. 4001)
Children's Rights: Local and International introduces students to the rights of children at domestic and international level. Students are introduced to the rationale and the development of children's rights as well as the international and the Australian legal framework for their protection. Amongst the selected topics discussed in more detail are juvenile justice; families and child protection; First Nations children and the law; the exploitation of children; access to justice and governance (domestic and international) and the rights of children. The subject exposes students to multidisciplinary approaches to socio-legal issues and develops their analytical skills to help them conduct research that involves international and comparative legal materials. This subject can be taught either in a combination of onshore in Australia and offshore in a host country, or solely onshore in Australia. Students enrolled in the subject with an offshore component must be available to travel for two weeks to the host country. When no host country is available, this subject may be delivered wholly onshore (in Australia) only. Students will be advised whether there is an offshore component of study and the availability of a host country in advance of opportunities to enrol. When delivered offshore in a host country the teaching materials and tutorial activities will incorporate host country-specific issues and activities relevant to the topics covered in the subject. Offshore delivery integrated with host country specific delivery provides the students with an immersive international and comparative experience, which will enhance their ability critically to engage with Australian and international law relevant to the rights of children.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 2004 Criminal Law AND
LAWS 2008 Government and Public Law
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3090 Animal Law (10 Credit Points)
Subject Details (p. 4002)
This subject examines the legal and ethical relations between humans and non-human animals in Australia. It provides students with theoretical perspectives from which to develop their own stance regarding human/animal relations. Students will be encouraged to evaluate the legal framework which governs those relations. The subject will examine a range of topic such as the moral and legal status of animals, animal rights versus animal welfare, farming and husbandry practices, animals in scientific research, animals in the entertainment industry, wildlife protection and endangered species, companion animals and Indigenous approaches to animal welfare.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 1003 AND LAWS 1009
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3091 Globalisation, Law, Governance and Culture (10 Credit Points)
Subject Details (p. 4003)
"Globalisation, Law, Governance and Culture" provides students with a unique opportunity to explore the intricate dynamics of globalised legal systems, governance structures, and cultural influences. Through overseas visits and immersive experiences, students will gain a comprehensive understanding of these interconnections and develop the skills needed to excel in a globalised professional landscape. When the subject is delivered offshore, students must be able to travel to the offshore destination for the period specified for the relevant offering of the subject. The dates for the term of offer will be made available to students through the School of Law's regular communication channels.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 1009
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3096 Drug Policy and Law (10 Credit Points)
Subject Details (p. 4003)
Humans have always used psychoactive substances, and this interdisciplinary subject critically examines the evolving landscape of regulating this practice. It examines the historical aspects of drug use and prohibition, analyses the characteristics of different psychoactive substances, and explains and evaluates international and domestic drug laws and their effects. The subject also addresses contemporary issues such as harm reduction, pill testing, safe supply, safe consumption rooms and drug decriminalisation and legalisation. The subject examines the dynamic domestic and international legal frameworks surrounding cannabis and psychedelics, reflecting on the future trajectory of drug laws. Drawing upon various disciplines, including legal theory, sociology, psychology, and public health, this subject prepares students for advanced research, policy analysis, and roles in law-making, law enforcement, and drug-policy NGOs.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 1003 LAWS 2004 LAWS 1009 LAWS 2008
Incompatible Subjects: LAWS 3044
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 3097 Refugee Law (10 Credit Points)
Subject Details (p. 4004)
Refugee Law is a critical and dynamic subject that focuses on the legal frameworks and policies that govern the protection of refugees globally. This subject delves into the principles of international refugee law, including the definition of refugees, their rights, and the obligations of states under the 1951 Refugee Convention and its 1967 Protocol. Students will explore contemporary challenges in refugee protection, such as cross-border movements, statelessness, and non-refoulement. The subject also examines Australia's refugee policies in the context of international standards, fostering a deep understanding of the legal, ethical, and humanitarian issues surrounding refugees and asylum seekers.
Level: Undergraduate Level 3 subject
Pre-requisite(s): LAWS 2008
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 4002 Advanced Constitutional Law (10 Credit Points)
Subject Details (p. 4005) Legacy Code: 200755
This subject builds upon the compulsory subject Constitutional Law, and provides a deeper and broader understanding of Australian constitutional law. It examines the constitutional aspects of Australian parliamentary democracy and citizenship, the constitutional powers of the Commonwealth Executive Government, constitutional issues relating to the raising and spending of government revenues and the complexities of the relationship between the Commonwealth and State as independent polities. The subject also examines the limited way in which the Australian Constitution operates to protect particular rights, liberties and freedoms.
Level: Undergraduate Level 4 subject
Pre-requisite(s): LAWS 4015
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 4003 Advanced Taxation Law (10 Credit Points)
Subject Details (p. 4006) Legacy Code: 200186
Advanced Taxation law broadens and deepens the student's knowledge of taxation and revenue law by building upon existing knowledge of, and adding new topics to, those covered in 200187 Taxation Law and 200019 Revenue Law. Such topics include consideration fo the tax policy framework, superannuation and also further aspects of income, deductions, entity tax, tax administration, aspects of international tax and Goods and Services Tax.
Level: Undergraduate Level 4 subject
Pre-requisite(s): LAWS 4008 OR
LAWS 3070
Equivalent Subjects: LGYA 9868 - Advanced Taxation Law LGYB 8506 - Advanced Taxation Law
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 4004 Criminal Procedure and Evidence (10 Credit Points)
Subject Details (p. 4006) Legacy Code: 200015
The subject is designed to provide an understanding of the law, the theoretical underpinnings and the underlying policy issues, in the areas of evidence and criminal procedure.
Level: Undergraduate Level 4 subject
Pre-requisite(s): LAWS 2004
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 4007 International Environmental Law (10 Credit Points)
Subject Details (p. 4007) Legacy Code: 200801
This course provides a general introduction to international environmental law and policy. We will begin by exploring the economic, political, and legal concepts relevant to international environmental treaty regimes. We will then apply these concepts to concrete regimes designed to deal with specific international environmental problems, such as ozone depletion, transboundary air pollution, freshwater resources, marine pollution, world heritage, human rights, biodiversity and habitat loss. The course focuses principally on the dynamic of treaties, negotiations, and state and non-state actors in the international arena. Comparative approaches to national implementation, on selected issues, will also be covered.
Level: Undergraduate Level 4 subject
Pre-requisite(s): LAWS 2008
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 4008 Revenue Law (10 Credit Points)
Subject Details (p. 4008) Legacy Code: 200019
Revenue Law introduces you to the underlying principles of the Australian taxation system, with a particular focus on Commonwealth taxes. The subject of study is essential for all students intending to embark on a career in tax, law, business, commerce or the public sector. The subject covers the system of taxation; provides a critical analysis of the fundamental concepts of income and capital; and examines the key topics of taxation of remuneration, allowable deductions; taxation of entities, tax avoidance and aspects of tax administration.
Level: Undergraduate Level 4 subject
Pre-requisite(s): LAWS 2008
Incompatible Subjects: LAWS 3070 - Taxation Law
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 4009 Transactional Law (10 Credit Points)
Subject Details (p. 4009) Legacy Code: 200758
This subject is designed to equip students for professional practice by providing them with an understanding of what it means (and takes) to be and think like a transactional lawyer in practice and how to 'add value to the deal' and think like a deal lawyer. Students will also be introduced to a range of structured financing transactions including lending arrangements, securitisation (RMBS, CMBS and CDOs), straight vanilla bonds, convertible bonds, covered bonds, asset based financing, managed investment schemes and swaps and derivatives (ISDA). Students will then be introduced to the legal building blocks of those transactions, including the law relating to representations and warranties, covenants, guarantees, subordination, set-off, commingling, trusts, security interests and insolvency. Students will work in teams to analyse and dissect a range of structured financing transactions. Real-life examples from international and domestic practice are discussed.
Level: Undergraduate Level 4 subject
Pre-requisite(s): LAWS 3045
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 4010 Designing Law Apps for Access to Justice (10 Credit Points)
Subject Details (p. 4009) Legacy Code: 201040
This subject will teach students how to design and build an application using expert system software. This subject will provide students with a clinical legal experience by providing access to a community based client to ascertain their needs and undertake collaborative work to provide a solution that requires applied legal research, teamwork, innovative and creative design thinking, and the capacity to manage a project. This subject will teach students how to identify, design and build appropriate legal information systems for use in generating legal documents from precedents and assisting users to navigate solutions to legal problems. Students will be exposed to a variety of automated legal tasks and various legal and practical issues associated with their use, including issues of professional regulation. This will include guest lectures from those working on legal expert systems and related technologies. After learning the necessary skills, students will work in small groups to design and build a legal information system. This subject does not require students to have any pre-existing skills or experience in expert systems or computer programming. Instead, the subject itself includes instruction on how to use an expert system software.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 4011 Law Honours Dissertation (20 Credit Points)
Subject Details (p. 4010) Legacy Code: 200700
This subject comprises the continued research and writing of a research dissertation of between 8,000 and 12,000 words on an approved topic in law that was developed in unit LAWS 4016 Legal Research and Methodology with an approved research proposal and supervisor. The subject is only open to students who have successfully completed LAWS 4016 Legal Research and Methodology and are enrolled in a Bachelor of Laws (Honours) program. The subject provides an opportunity for law students to further develop and refine their legal research and writing skills and to explore and analyse a legal topic chosen in consultation with the School of Law Honours Coordinator, in order to produce a high-quality piece of academic work. This subject can only be commenced in Spring Session.
Level: Undergraduate Level 4 subject
Pre-requisite(s): LAWS 4016 Legal Research and Methodology
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 4012 First Nations Peoples' Access to Justice Clinic (10 Credit Points)
Subject Details (p. 4011)
In the First Nations Peoples' Access to Justice Clinic you will gain real life lawyering experience, working under the supervision of the Clinic solicitor one day a week for the semester. You will work collaboratively with students from other disciplines on advice, casework, policy or project work shaped by community stakeholders and you will critically reflect on the role of law, and of lawyers, in advancing social justice for First Nations Peoples. You will work with individual clients on their legal and non legal issues to provide assistance to resolve these issues. You will consolidate your existing legal knowledge, learn new areas of law, develop key professional and interpersonal skills, and the ability to work in inter-disciplinary collaborative teams. You will gain an understanding of your ethical and professional responsibilities as a lawyer in legal practice. You will learn practical legal skills through the seminar program and assessment items as well as your participation in direct legal service delivery. As a condition of enrolment, students must be available to attend a twelve day placement.
Level: Undergraduate Level 4 subject
Pre-requisite(s): LAWS 2015 AND
LAWS 2004
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 4013 Civil Procedure and Arbitration (10 Credit Points)
Subject Details (p. 4012)
This subject provides a comprehensive analysis of the practical and theoretical issues encountered in Australian civil procedure, including legal issues relating to First Nations peoples. . This Subject examines the major roles and practices governing court supervised processes which are involved in superior court litigation as well as key aspects of arbitration. This subject will include a selection from the following or similar topics: characteristics of an adversarial system, case management procedure, the rules of pleadings, jurisdiction and joinder, service, discovery and Interrogatories, means of gathering evidence at pre-trial including subpoenas and notice to produce, judgment and appeals, enforcement and costs, and arbitration.
Level: Undergraduate Level 4 subject
Pre-requisite(s): LAWS 1003 Fundamentals of Australian Law OR LAWS 1006 (200006) Introduction to Law
AND LAWS 1009 Legal Analysis and Critique OR LAWS 1008 (200007) Law Foundation
Equivalent Subjects: LAWS 4005 Dispute Resolution and Civil Procedure
LAWS 3008 Civil Procedure and Arbitration
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 4014 Remedies (10 Credit Points)
Subject Details (p. 4013)
This subject examines the principles of the major common law, equitable, restitutionary and statutory remedies available in Australia to wronged parties in a variety of circumstances. Emphasis is on the analysis of practical and theoretical advantages and disadvantages of various remedies in a culturally diverse society. Topics include the effectiveness of common law, equitable and statutory remedies and the law of restitution and the scope of each of these remedies.
Level: Undergraduate Level 4 subject
Pre-requisite(s): LAWS 3018 Equity and Trusts
Equivalent Subjects: LAWS 3020 Equity Trusts and Remedies 2 AND LAWS 3064 Remedies
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 4015 Constitutional Law (10 Credit Points)
Subject Details (p. 4013)
This subject introduces the legal rules and doctrines governing State and Commonwealth Constitutional systems in Australia. Topics covered include: Principles of State and Commonwealth Constitutions; Characterisation of Commonwealth Laws; The scope of Commonwealth legislative power; Relations between the different Commonwealth and States laws; Intergovernmental Immunities; Separation of Powers; Spending government revenue; Indigenous people and the Constitution and Express and Implied rights under the Australian Constitution.
Level: Undergraduate Level 4 subject
Pre-requisite(s): LAWS 2008 Government and Public Laws (200984)
Equivalent Subjects: 200009 Constitutional Law
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 4016 Legal Research and Methodology (10 Credit Points)
Subject Details (p. 4014)
This subject provides an opportunity for law students to further develop and refine their legal research and writing skills and to explore and analyse a supervised and structured legal research project. It includes advanced training in legal and inter-disciplinary research methodologies, exploration of theoretical frameworks leading to the development of a research proposal or project. This subject is a requirement for students who are intending to undertake the Bachelor of Laws (Honours) program. However, this subject is open to all law students seeking to further refine their legal research and writing skills who do not wish to join the Bachelor of Laws (Honours) program.
Level: Undergraduate Level 4 subject
Pre-requisite(s): LAWS 1009 Legal Analysis and Critique
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 4017 Access to Justice Clinic (10 Credit Points)
Subject Details (p. 4015)
Access to Justice Clinic is an experiential learning program in which students work for 12 days a semester at the Western Sydney University Justice Clinic (WSUJC), which is the university's community legal service. Students work under the supervision of the Director / Principal Solicitor and Clinic lawyers / clinical supervisors to gain practical lawyering experience and develop crucial professional skills, while critically reflecting on the role of law and of lawyers in advancing social justice. This subject provides students with an invaluable opportunity to use and reflect on their study of law in an interactive, legal service environment working on advice, casework, policy and / or project work. The specific placement activities and opportunities will align with clinic projects each semester and therefore cannot be advised in advance. Places are limited and enrolment is based on proximity to graduation.
Level: Undergraduate Level 4 subject
Pre-requisite(s): LAWS 2015 AND
LAWS 2004 AND
LAWS 2013 AND
LAWS 2003
Equivalent Subjects: JUST 4001 - Clinical Legal Placement
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 5001 Law of Employment (10 Credit Points)
Subject Details (p. 4016)
This subject focuses on the law that regulates individual aspects of employment relationships including the contract of employment. It aims to place an examination of the development, nature and scope of relevant legal principles in the context of the key features of the contemporary Australian labour market. Students will further develop essential problem solving and professional communication skills to enhance high level professional practice, including the experience of First Nations peoples.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): LAWS 7047 Contracts or LAWS 7078 Principles of Private Law
Incompatible Subjects: LAWS 3046 Law of Employment
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 5002 Planning and Environment Law (10 Credit Points)
Subject Details (p. 4017)
This subject examines the planning laws in the state of New South Wales and at the Commonwealth level that have a bearing in NSW. Topics covered include an analysis of the functions of the relevant ministers, State government departments, and local councils; the role of public authorities; the effect of environmental planning instruments; and the impact of the planning system, legal processes of plans and planning controls within the development context. This subject has the balance among theory, policy and practical issues in its approach and a strong interdisciplinary component in the introductory phase.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): LAWS 7056 Fundamentals of Australian Law
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 5003 International Commercial Conflicts (10 Credit Points)
Subject Details (p. 4017)
Students will explore real-world scenarios where international commercial disputes arise under the guidance of experts in the fields of building and construction practice. This subject is primarily concerned with how commercial disputes which have connections with more than one country are dealt with by Australian and international courts. Much of the law which provides the framework for the resolution of such disputes is derived from international instruments, including recent Conventions and Regulations which have significantly re-shaped the law in the European Union. This subject considers the jurisdiction of the Australian courts and the recognition and enforcement in Australia of judgments granted by the courts of other countries. Students will analyse both the Brussels I Regulation and the so-called traditional rules, jurisdiction in personam and in rem, anti-suit injunctions and provisional measures. The subject also examines the rules which determine whether Australian law or the law of another country is applicable to a given situation. This examination includes a discussion of choice of law in contract and tort, with particular attention being devoted to the recent Rome I and Rome II Regulations. The subject also includes consideration of international aspects of insolvency and an analysis of the legal aspects of international commercial arbitration. In particular, students will consider the powers of the Australian courts to support or supervise an arbitration; the effect of an arbitration agreement on the jurisdiction of the Australian courts; the law which governs an arbitration agreement and the parties' dispute; and the recognition and enforcement of foreign arbitration awards.
Level: Postgraduate Coursework Level 5 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 5004 Work Health and Safety Law (10 Credit Points)
Subject Details (p. 4018)
This subject aims to provide students with advanced and integrated understanding of how the law protects workplace safety in Australia by introducing the work health and safety regulatory framework and its underlying policy and history impacts on First Nations peoples. Students will also examine issues surrounding enforcement and compliance and corporate governance in the safety context. Other topics include workers compensation and employment law.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): LAWS 7072 Torts Law or LAWS 7078 Principles of Private Law
Incompatible Subjects: LAWS 3072 Work Health and Safety Law
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 5005 Construction Law (10 Credit Points)
Subject Details (p. 4019)
This subject introduces students to the foundational legal and technical concepts required to understand the specialised area of construction law practice. Students will examine the key issues, concepts and topics that are specific to construction law from project preparation, through to contract formation, regulation, procurement methodologies, and finally to dispute avoidance and management. Students will engage with construction practitioners to enhance their learning experiences in this subject.
Level: Postgraduate Coursework Level 5 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 5006 Law and Literature (10 Credit Points)
Subject Details (p. 4020)
This subject will examine the relationship between law and literature. Students will critically analyse works of literature that reflect the law and its social context, with the objective of developing research and analytical skills, as well as fostering a broader appreciation of the role of law within our society. In addition to providing students with an understanding of the historical development of the legal system through literary studies, it will also involve textual analysis of legal documents, judgments and literary writings to encourage students to engage with the language of the law and the ability to communicate persuasively and effectively in legal contexts.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): LAWS 7061
Incompatible Subjects: LAWS 3084
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 5007 Children's Rights: Local and International (10 Credit Points)
Subject Details (p. 4020)
Children’s Rights: Local and International provides students with the opportunity to critically analyse the rights of children at domestic and international level. Students will examine the rationale and the development of children’s rights as well as the international and the Australian legal framework for their protection. Selected topics discussed in more detail are juvenile justice; families and child protection; First Nations children and the law; the exploitation of children; access to justice and governance (domestic and international) and the rights of children. The subject develops multidisciplinary approaches to socio-legal issues and provides opportunities to apply analytical and research skills to special interest projects involving international and comparative legal materials.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): LAWS 7048 Criminal Law AND
LAWS 7057 Government and Public Law AND
LAWS 7027 Legal Philosophy and Methodology AND
Incompatible Subjects: LAWS 3089 Children’s Rights Local and International
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 5008 Law and Public Policy (10 Credit Points)
Subject Details (p. 4021)
This subject examines the link between law, public policy and social reform and adopts a range of social, political and legal perspectives to examine the policy process and its interaction with law. It invites students to critically engage, study and reflect on discourse and activism around selected case studies involving contemporary issues in public law and policy.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): LAWS 7057 Government and Public Law
Incompatible Subjects: LAWS 3044 Law and Public Policy (Development and Implementation)
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 6001 Law of Construction Delay and Disruption (10 Credit Points)
Subject Details (p. 4022)
This subject introduces students to legal principles and concepts required to analyse how the parties' respective liability is established and how impacts of delay and disruption are assessed in construction projects in Australia and internationally. Students will examine key issues, concepts, topics that are specific to delay and disruption investigation, analysis and resolution.
Level: Postgraduate Coursework Level 6 subject
Co-requisite(s): LAWS 5005 - Construction Law
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 6002 Remedies in the Construction Context (10 Credit Points)
Subject Details (p. 4022)
The subject aims to deepen student understanding of the nature utility of remedies in construction projects. The subject will explore the interaction between the technical, commercial and legal aspects of remedies in construction and procurement disputes. Practitioners in the field of construction require a working understanding of the remedies available in response to different claims that might arise in disputes. The nature and scope of remedies is a matter of constant development and refinement in Australia and abroad. This unit will explore a diverse range of remedies including damages in contract and in tort, the rule against penalties, quantum meruit, injunctive relief and remedies under the Australian Consumer Law.
Level: Postgraduate Coursework Level 6 subject
Co-requisite(s): LAWS 5005 - Construction Law
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 6003 Managing Legal Risk in Construction Law (10 Credit Points)
Subject Details (p. 4023)
This subject provides practical insights into legal risks related to construction processes and devise associated risk mitigation measures. Students will also examine the liabilities and responsibilities of various parties in construction contracts and different types of dispute avoidance, management and resolution mechanisms. Legal risks related to construction processes and devise associated risk mitigation measures are also covered. Students will examine approaches and strategies to proactively manage legal risk in construction projects.
Level: Postgraduate Coursework Level 6 subject
Co-requisite(s): LAWS 5005 - Construction Law
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 6004 Sports Law (10 Credit Points)
Subject Details (p. 4024)
The subject will provide students the opportunity to synthesise a number of areas of law in a practical way that enhances their employability and professionalism. It focuses on an emerging and developing subject area of law. This has been recognised internationally where the 'specificity of sport' refers to the inherent characteristics of sport that set it apart from other economic and social activities. Sport is a global industry. Students will master an understanding of world sports law or lex sportiva, which is regarded as an autonomous body of rules having a specific character. Students will engage in professional learning activities to demonstrate their application of this body of law in practice. This subject will foster critical perspectives on discrimination in sport and the contribution of Indigenous people to sports law and policy in Australia.
Level: Postgraduate Coursework Level 6 subject
Pre-requisite(s): LAWS 7047 Contracts and LAWS 7072 Tort Law
Incompatible Subjects: LAWS 3087 Sports Law
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 6005 International Banking and Finance Law (10 Credit Points)
Subject Details (p. 4024)
This subject compares the international financial system and capital markets to the Australian financial system in the context of the banker customer relationship, commercial lending and security. The subject also introduces students to key international legal issues that are relevant to international banking and securities practice. Finally, students will examine transactional practice in the context of transactions with an international element to it.
Level: Postgraduate Coursework Level 6 subject
Pre-requisite(s): LAWS 7060 Law of Associations OR LAWS 7010 Company Law
Equivalent Subjects: LAWS 7016 International Banking and Finance Law
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 6006 Medical Law (10 Credit Points)
Subject Details (p. 4025)
This subject analyses Australian medical law. The legal issues are examined in broad social, cultural and ethical contexts, including critical perspectives on medical law and policy relating to Indigenous people. Medical law is underpinned by the rapid pace of scientific and social developments that generate new issues for medicine and for the law, many of which are at the core of policy— birth and reproduction, choice and responsibility, life and death. Students will engage in professional learning activities to demonstrate their application of this body of law in practice.
Level: Postgraduate Coursework Level 6 subject
Pre-requisite(s): LAWS 7047
LAWS 7072
LAWS 7057 and
LAWS 7048
Incompatible Subjects: LAWS 3050
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 6008 Wills and Succession (10 Credit Points)
Subject Details (p. 4026)
This subject analyses law and policy relevant to the devolution of property upon death. The legal issues relating to wills and succession are examined in their social, cultural, and ethical contexts. The subject encompasses topics such as the law relating to intestacy, the making of a valid will, the administration of the estate and testator's family maintenance. This subject is of particular importance to those students who intend to practice either as a solicitor or barrister as Wills and Succession forms a significant part of private practice. Students will engage in professional learning activities to demonstrate their application of this body of law in practice.
Level: Postgraduate Coursework Level 6 subject
Pre-requisite(s): LAWS 7067 Property Law
Incompatible Subjects: LAWS 3071 Wills and Succession
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7001 Advanced Clinical Legal Placement (40 Credit Points)
Subject Details (p. 4027) Legacy Code: 201006
This 40 credit point subject consists of twenty days of clinical work within a legal practice environment. Students are mentored by experienced legal practitioners to develop and apply knowledge and skills in legal practice. Students are responsible for organising their placements with legal services or practices working in areas of interest to the student and the proposed placement must be approved by the School of Law. Students are required to perform professional tasks in the legal service or practice setting and to undertake self-directed study including completing a self- directed research report on a work- related project and workplace reflections. These together with a Professional Performance Report from their workplace supervisor/mentor, will comprise assessment for the subject on a satisfactory/unsatisfactory basis. Students are supported in this through the provision of supporting materials. Advanced Clinical Legal Placement may be undertaken in any study period and may, by agreement, be organised in ways which suit the workplace supervisor/mentor and the student and as agreed with the Subject Coordinator. This may include, for example, undertaking the 20 day clinical work placement as a four week block or distributed over the session parallel to their program of study.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7003 Australia's Visa System 1 (10 Credit Points)
Subject Details (p. 4027) Legacy Code: 200966
This subject provides students with a structured examination of issues common to all Australian visas, including public health criteria, implications for family members of visa applicants and visa conditions. The subject further provides a close analysis of issues common to some Australian visas, such as matters of sponsorship, assurances of support, family violence provisions, provisional visas, English language requirements, skills assessment and exclusion periods and other public interest requirements.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): LAWS 7007
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7004 Australia's Visa System 2 (10 Credit Points)
Subject Details (p. 4028) Legacy Code: 200967
This subject explores a number of substantive Australian visas, including those relating to work, doing business in Australia, study and visiting Australia (medical treatment, tourism, business, visitors). This subject focuses on providing students with a practical approach to addressing the eligibility criteria for relevant visa streams, lodgement of visa applications and processing considerations. Students will learn to evaluate pathways and options open to clients, determine strategies and formulate submissions.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): LAWS 7007 AND
LAWS 7003
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7005 Australia's Visa System 3, Cancellation and Review (10 Credit Points)
Subject Details (p. 4029) Legacy Code: 201005
This subject addresses the balance of visas in the Australian immigration system, including those related to bringing family to Australia, former resident and resident return visas, humanitarian program (onshore and offshore), bridging visas and other miscellaneous visas (Act-based visas and resolution of status visas). This subject also addresses the regime for review of immigration decisions, including informal review, merits review and judicial review. This subject provides an overview of ministerial intervention and cancellation powers under Australian immigration law. This subject also provides a brief overview of Australian citizenship laws.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): LAWS 7007 AND
LAWS 7003
Co-requisite(s): LAWS 7004
Incompatible Subjects: LAWS 7034 - Visa Compliance Cancellation and Review 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7007 Australian Migration Law (10 Credit Points)
Subject Details (p. 4029) Legacy Code: 200965
This subject provides students with an introduction to Australia's immigration system. It provides students with a broad overview of sources of Australian migration law, explores the role of government policy in migration law, and outlines the key components of Australia's migration program. The subject gives students a strong grounding in key terminology used in Australian migration law, and introducesto Australian visas. The subject explores the regulatory regime for losing a visa and addresses immigration offences.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7008 Bioethics (10 Credit Points)
Subject Details (p. 4030) Legacy Code: 200957
This subject explores a range of ethical and legal issues in public health, biomedical research, biotechnology and medical practice. Topics covered include the nature of moral thinking, issues of life and death, experimentation and research involving human subjects, genetic technology, new reproductive technologies, consent and confidentiality.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): For students in 2826 Juris Doctor LAWS 7072 and LAWS 7061
For students in 2824 Master of Laws LAWS 7078 and LAWS 7061
Equivalent Subjects: -
Incompatible Subjects: JUST 2002 Bioethics and LAWS 2014 Bioethics
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7009 Commercial Law (10 Credit Points)
Subject Details (p. 4031) Legacy Code: 200432
In this subject, students learn about the concepts of law, its impact on businesses, and how to apply the law to solve practical legal problems that arise in business. The subject is designed to help you identify where potential legal issues or problems can arise in business. It deals with concepts of Australian law and commercial legal obligations that are of importance both to professional practice and to studies in later subjects. The subject topics are: Australian Legal Institutions and Sources of Law, Case Law and Doctrine of Precedent, Legislation and Statutory Interpretation, The Australian Federation and Concepts of Constitutional Law, Principles of Tortious Liability, the formation, vitiation, performance and discharge of contracts, forms of business structure, consumer transactions, consumer protection and agency.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: LAWS 3009 - Commercial Law
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7010 Company Law (10 Credit Points)
Subject Details (p. 4032) Legacy Code: 200433
This subject mainly deals with legal issues concerning various aspects of companies: incorporation, regulation, membership and capital, company management, corporate officers, meetings, relations of the company with outsiders, accounts, reports and other disclosures, arrangements and reconstruction, receivers and winding up, and share acquisition and takeovers. It also considers public policy issues underlying the law in the above areas. Other forms of business organisation, such as partnership, trusts and sole traders, are also dealt with.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): LAWS 7009 or LAWS 7078
Equivalent Subjects: -
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7011 Contemporary Issues in Taxation (10 Credit Points)
Subject Details (p. 4032) Legacy Code: 200872
This advanced tax law course expands on foundational Australian taxation law studies, delving into new topics and a deeper exploration of core principles. Key topics include the taxation of non-profits and the professional legal and ethical obligations of tax practitioners. Students will apply tax law to real-life situations like end-of-life events, relationship breakdowns, and small business management. It prompts critical engagement with current tax issues, encouraging reflection on tax policy's role in advancing societal objectives such as education, housing, and social equality.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): LAWS 7031 or LAWS 7069
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7014 Human Rights in Practice and Theory (10 Credit Points)
Subject Details (p. 4033) Legacy Code: 200953
This subject examines the place of regional human rights systems in the global architecture of human rights. Concepts of universalism, relativism and the 'Asian values' debate are examined. The record of human rights treaty ratification and compliance in Asia and the Pacific is examined within the context of the international treaty system as well as the ASEAN regional human rights regime. The development and implementation of international and domestic human rights protections in criminal law, constitutional law and institutional construction are examined across the region.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7015 Information and Data Governance Law and Policy (10 Credit Points)
Subject Details (p. 4034) Legacy Code: 200958
This subject focuses on the right to privacy and examines the legal framework for information privacy protection and data governance that are established by both international and domestic law and regulation. This subject introduces students to the theoretical approaches to information privacy and data governance law and policy. In particular, the subject focuses on the European Union Directives and Regulation; the OECD Guidelines for the Protection of Privacy and Trans Border Flows of Personal data and the impact of international laws and regulation on information privacy and data governance regulation and policy in Australia. The subject explores some of the challenges in providing effective information privacy protection and data governance in cyberspace as existing laws adapt to new and advanced information technological developments and their use.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): LAWS 7047 or LAWS 7078
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7018 International Corporate Governance (10 Credit Points)
Subject Details (p. 4035) Legacy Code: 200902
The subject studies the evolution and transformation of the concept of corporate governance over the last five decades. Its focus is on the role of the large modern corporation in its economic and social setting, and it will in this context examine the challenges of ensuring the economic efficiency of the corporation while being responsive to the needs of the social environment it operates in. Examined will be issues of accountability, responsibility, and transparency of the corporation and its managers, to its investors, employees, consumers and society generally, the role of corporate social responsibility, enlightened shareholder value, and the notion of Accountable Capitalism. Also examined will be the role and responsibility of institutional investors, block holders, and other arbitrageurs of corporate control. While the primary focus of the study will be on the Australian, UK, and US models, comparisons will also be made with the German, Japanese, and Chinese systems of corporate governance.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): LAWS 7027 or LAWS 7057
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7019 International Criminal Law and Justice (10 Credit Points)
Subject Details (p. 4036) Legacy Code: 200962
This subject analyses the state of international criminal law and its place in the modern international legal system in light of important recent developments. It discusses why a State's national criminal laws should accord with international developments. It focuses on substantive and procedural law and examines relevant international legal concepts, general principles of international criminal law, and how international criminal tribunals function. It considers particular international crimes, participation in such crimes, defences, and important recent cases such as those of Augusto Pinochet and Slobodan Milosevic.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): LAWS 7057
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7020 International Environmental Law and Policy (10 Credit Points)
Subject Details (p. 4036) Legacy Code: 200907
This subject provides an overview of international environmental law and policy. It investigates legal and policy measures for managing and protecting the environment in a sustainable manner. The subject will begin by exploring the economic, political, and legal concepts relevant to international environmental legal regimes. It will then apply these concepts to concrete regimes designed to deal with specific international environmental problems, such as climate change, ozone depletion, air pollution, hazardous waste, freshwater resources, marine pollution, world heritage, human rights, biodiversity and habitat loss. The subject focuses principally on the dynamic of treaties, negotiations, and state and non-state actors in the international arena. Special attention will be given to 21st Century environmental problems. Appropriateness of the present environmental legal regimes and challenges for the future will also be mooted in the subject.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): LAWS 7057
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7021 International Governance Dissertation (10 Credit Points)
Subject Details (p. 4037) Legacy Code: 200904
This subject comprises the preparation of a research dissertation, of between 6,000 to 8,000 words, on a novel and/or in-depth study related to International Governance. The subject provides an opportunity for Master of Laws students to further develop and refine their legal research and writing skills and to explore and analyse a legal topic of international governance. It also requires the student to undertake a literature review, submission of a research proposal, upon acceptance of which the dissertation is written under supervision. The dissertation should be of sufficient quality for acceptance for publication in the online Journal of International Governance, hosted by WSU School of Law.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): LAWS 7027
Co-requisite(s): LAWS 7018 AND
LAWS 7013
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7022 International Human Rights Law (10 Credit Points)
Subject Details (p. 4038) Legacy Code: 200961
This subject examines the foundations of the concept of human rights under international law, how international law became concerned with the rights of individuals and the development of international measures for the protection of human rights. It examines the extent of compromise of international human rights where sovereignty, cultural relativism and political resistance preclude comprehensive incorporation of some fundamental human rights principles in domestic law. Instruments such as The Charter of the United Nations, The Universal Declaration of Human Rights, The International Covenant on Civil and Political Rights and International Covenant on Economic, Social and Cultural Rights are also examined.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): LAWS 7057
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7025 International Law of Ocean Governance (10 Credit Points)
Subject Details (p. 4039) Legacy Code: 200951
This subject examines the rules regulating the principle uses of the world's oceans. It explores the historical development and sources of contemporary law of the sea and the adoption of the 1982 Convention on the Law of the Sea (UNCLOS). Legal regimes of various maritime zones including territorial sea and contiguous zone, continental shelf, the exclusive economic zone and the high seas will be studied. Various sources of marine pollution, fisheries, marine scientific research, maritime spatial planning, maritime safety and security, mining of deep sea beds and dispute settlement will also be explored in this subject.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7026 International Space Law - Commercial Aspects (10 Credit Points)
Subject Details (p. 4040) Legacy Code: 200963
This subject examines the underlying legal principles that regulate the use, exploration and exploitation of space, and how International Law can and should be applied to the many different State and private commercial uses of outer space. It examines the existing international legal regime - the five United Nations Space Treaties and key Declarations of Principles related to space activities - as well as a number of domestic regulatory systems, including the Australian legal regime. The subject also concentrates on the (many) uses and proposed uses of space for which the legal framework may not be particularly well suited.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): LAWS 7057
Incompatible Subjects: LAWS 3068 - Space Law – Commercial Aspects
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7027 Legal Philosophy and Methodology (10 Credit Points)
Subject Details (p. 4040) Legacy Code: 200901
This subject equips postgraduate students with a solid understanding of theoretical and methodological approaches to studying law.
It encompasses essential aspects of the legal research process including; accessing relevant sources, defining a research question, selecting appropriate research methodologies, and presenting a research project. Students can choose from three topics selected by the subject coordinator for their project.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): LAWS 7061
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7029 Migration Practice 2 (10 Credit Points)
Subject Details (p. 4041) Legacy Code: 201004
This subject focuses on the practical processes involved in migration practice as a registered migration agent in Australia. The subject covers topics such as the interview consulting process with clients, the regime for lodging valid visa application (including the methods of lodgement and preparation procedures) and Freedom of Information requests and practical aspects of communicating with the Department. This subject also provides students with the opportunity to undertake a capstone practical training placement with a registered migration agent business. NOTE: All students must attend a mandatory onsite intensive one day workshop to address practical aspects of the Occupational Competency Standards of the department of Immigration and Border Protection. Students must also undertake a five day Capstone Practical training Placement to gain professional experience in the migration agent industry.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): LAWS 7007 AND
LAWS 7003 AND
LAWS 7004
Co-requisite(s): LAWS 7005 AND
LAWS 7028 OR
LAWS 7036
Incompatible Subjects: LGYA 4914 - Migration Law in Practice
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7030 Principles of International Law (10 Credit Points)
Subject Details (p. 4042) Legacy Code: 200964
This subject explores the nature, role and characteristics of international law; the concepts of statehood; sovereignty and jurisdiction; the relationships between domestic and international law; the role of law and treaties; and the role of international organisations such as the United Nations and International Court of Justice. The subject also examines contemporaneous and contentious issues of international law.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): LAWS 7056
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7031 Principles of Taxation (10 Credit Points)
Subject Details (p. 4042) Legacy Code: 200869
This subject provides an overview of the Australian taxation system as it affects the financial planning environment. Many financial planning decisions have a tax impact. Further, some financial products and much financial advice derive at least some of their value from their taxation consequences. Key topics covered include aspects of tax administration, tax planning concepts, the constitutional basis of taxation, assessable income concepts, international tax issues, the taxation of capital, allowable deductions and offsets, and taxation of such entities as partnerships, trusts, companies and shareholders. The course will also address other taxes that impact the financial advice environment including the FBT and the GST.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): Students in 2824 Master of Laws must have successfully completed LAWS 7056 before enrolling in this subject Students in all other PG programs must have successfully completed LAWS 7009 before enrolling in this subject
Equivalent Subjects: LAWS 7032
Incompatible Subjects: LAWS 7069
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7033 Intellectual Property (10 Credit Points)
Subject Details (p. 4043) Legacy Code: 200980
This subject provides an introduction and overview of the legal principles of intellectual property law in Australia. Students will consider the nature of intellectual property, the legal framework which contains it, and the ways in which it can be protected. The modules will cover the four major intellectual property regimes of trademarks, copyright, designs, and patents as well as issues relating to traditional knowledge of Aboriginal and Torres Strait Islander Peoples. Students will research the theoretical underpinnings of Intellectual Property Rights and whether they are fit for purpose in contemporary society.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): Students enrolled in 2824 Master of Laws must have successfully completed the prerequisite subject LAWS 7027 Legal Philosophy and Methodology and LAWS 7078 Principles of Private Law Students enrolled in 2826 Juris Doctor must have successfully completed the prerequisite subject LAWS 7027 Legal Philosophy and Methodology and LAWS 7047 Contracts
Co-requisite(s): -
Incompatible Subjects: LAWS 3032 Intellectual Property
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7035 International Criminology Project (20 Credit Points)
Subject Details (p. 4044) Legacy Code: 102689
Students enrolled in this subject will complete an original research project with a focus on a topic area of key interest from their studies in International Criminology, and in such fields as human rights, transnational crime, violence, terrorism, international criminal justice and global law enforcement. Topics will be negotiated and agreed between individual students and the subject coordinating staff, and will allow students to plan, undertake and report on a specific aspect of practice in the context of the field.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7036 Migration Practice and Theory 1 (10 Credit Points)
Subject Details (p. 4045) Legacy Code: 201031
This subject focuses on practical aspects of migration practice as a registered migration agent in Australia. The subject covers the practical role of migration agents in professional practice, the fundamental function of the Office of the Migration Agents Registration Authority (OMARA), the registration process involving migration agents, and provides a close analysis of the Code of Conduct. The subject provides a close examination of various aspects of running a migration agent business, including fees, client accounts, record keeping and the appointment and termination of services. The subject also provides an overview of the complaints and disciplinary regime involving registered migration agents.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): LAWS 7007 AND
LAWS 7003 AND
LAWS 7004
Co-requisite(s): LAWS 7038 OR
LAWS 7005
Equivalent Subjects: LAWS 7028 - Migration Practice 1
Incompatible Subjects: LGYA 4913 - Visa Compliance Cancellation and Review 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7037 Migration Practice and Theory 2 (20 Credit Points)
Subject Details (p. 4046) Legacy Code: 201030
This subject focuses on the practical processes involved in migration practice as a registered migration agent in Australia. The subject covers topics such as the interview consulting process with clients, the regime for lodging valid visa applications (including the methods of lodgement and preparation procedures) and Freedom of Information requests and practical aspects of communicating with the Department. This subject also provides students with the opportunity to undertake a capstone practical placement program with a registered migration agent business in Australia. NOTE: All students must attend a mandatory onsite intensive two-day weekend workshop to address practical aspects reflected in the Occupational Competency Standards of the Department of Home Affairs. Students may also undertake a five day capstone practical placement program to gain professional experience in the migration agent industry in Australia.
Level: Postgraduate Coursework Level 7 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7040 Financial Advice (Regulatory and Legal Obligations) (10 Credit Points)
Subject Details (p. 4047) Legacy Code: 201041
This subject examines the regulation of provision of financial advice within the Australian financial services sector - including the regulatory and legal obligations relating to financial advice that arise under Chapter 7 ("Financial Services and Markets") of the Corporations Act 2001 (Cth) and the reporting and notification requirements under the Anti-Money Laundering and Counter-Terrorism Financing Act 2006 (Cth) (AML/CTF Act) and the Anti-Money Laundering and Counter-Terrorism Financing Rules (AML/CTF Rules). The main object of Chapter 7 is to promote: confident and informed decision making by consumers of financial products and services while facilitating efficiency, flexibility and innovation in the provision of those products and services; fairness, honesty and professionalism by those who provide financial services; fair, orderly and transparent markets for financial products; and the reduction of systemic risk and the provision of fair and effective services by clearing and settlement facilities. Businesses that are required to comply with the AML/CTF Act are also required to comply with the Privacy Act 1988 (Cth) when handling personal information collected for the purposes of compliance with their AML/CTF Act obligations. The subject examines the role of the Australian Transaction Reports and Analysis Centre (AUSTRAC) which is the Australian Government agency responsible for ensuring compliance with the AML/CTF Act. The subject critically evaluates the reasons for regulation in the context of contemporary and evolving events which affect the financial services sector including the overarching Australian Privacy Principles (APPs) set out by the Privacy Act 1988 (Cth). The subject also examines the Tax Agent Services Act 2009 (Cth) (TASA) requirements for tax (financial) advisors and the role of the Tax Practitioners Board (TPB) in enforcing the requirements under TASA. The subject examines the professional and ethical obligations in providing financial advice and the consequences of failing to comply with these obligations with a particular focus upon the critical importance of professional ethical conduct, the consequences understanding the need to put the clients interest first, the importance of identifying and resolving conflict of interest, and the need to identify and avoid instances of professional misconduct and unsatisfactory conduct. This subject is available as a standalone bridging subject which is accredited by the Financial Adviser Standards and Ethics Authority (FASEA) having met the FASEA curriculum and standards requirements.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): LAWS 7010 or LAWS 7060
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7041 Administrative Law (10 Credit Points)
Subject Details (p. 4048) Legacy Code: 201056
This subject examines the legal principles regulating the exercise of power by the executive arm of government in its various manifestations; ministers, government departments and officials, regulatory bodies, tribunals, inferior courts and local councils. This is examined in the context of Australian constitutional arrangements and it is taught in the context of constitutional themes and principles that underpin the law in this area. The exercise of power examined includes decision making, the exercise of discretion, delegated legislation and the decision making procedure of the major administrative tribunals. The focus is on the principles of judicial review developed by the courts, standing and remedies. There is also an examination of major non-judicial avenues of review by the major tribunals such as the Commonwealth Administrative Appeals Tribunal, and the Ombudsman. The subject will also examine Freedom of Information legislation.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): LAWS 7057 Government and Public Law
Incompatible Subjects: LAWS 3081 Administrative Law
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7042 Advanced Legal Negotiation (10 Credit Points)
Subject Details (p. 4049) Legacy Code: 201062
This subject examines how conflict arises and engages students to apply the main theories related to conflict and its resolution within diverse practical environments. Students will analyse and synthesise negotiation theories, skill-sets and studies, and will evaluate their respective usefulness as future legal professionals. Students will develop a value-laden negotiation toolbox and will grow in confidence in negotiations within a broad array of environments essential to the legal profession. Students will examine written scholarship, engage in negotiation simulations involving role- scenarios, case hypotheticals, experimental games, and will become intricately involved in other negotiation-related scenarios. Classes will include presentation of conceptual and strategic theories, simulations and role-playing scenarios applying these theories, and de-briefing of the theoretical and practical components of legal negotiation.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): LAWS 7044
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7043 Advocacy (10 Credit Points)
Subject Details (p. 4050) Legacy Code: 201063
This subject imparts basic courtroom trial skills giving practice in applying substantive law, practice, procedure and evidence in a simulated courtroom. It also explores both professional and ethical issues involved in the courtroom. Students will engage with advocacy techniques and problem solving and reflect on advocacy problems such as those in leading cases and trial transcripts. Enrolment in this subject is limited owing to the practical nature of the subject.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): LAWS 7049
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7044 Alternative Dispute Resolution (10 Credit Points)
Subject Details (p. 4051) Legacy Code: 201052
Alternative Dispute Resolution (ADR) processes are no longer 'alternative' but a major part of the contemporary justice system. Modern legal practice requires lawyers to negotiate settlements on behalf of clients and advise clients how to resolve disputes without litigation. Non-adversarial processes offer many benefits to parties, professionals and the community. This subject introduces students to the theory and practices of alternative dispute resolution processes and provide students with the opportunity to develop key ADR practice. Students will employ cultural awareness and appropriate communication strategies required for professional practice in dispute resolution, particularly in relation to Aboriginal and Torres Strait Islander peoples.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): LAWS 7056 Fundamentals of Australian Law
Incompatible Subjects: LAWS 2001 Alternative Dispute Resolution
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7045 Civil Procedure and Arbitration (10 Credit Points)
Subject Details (p. 4052) Legacy Code: 201061
This subject provides a comprehensive analysis of the practical and theoretical issues encountered in Australian civil procedure, including legal issues relating to First Nations peoples. It examines the major roles and practices governing court supervised processes which are involved in superior court litigation as well as key aspects of arbitration. This subject will include a selection from the following or similar topics: characteristics of an adversarial system, case management procedure, the rules of pleadings, jurisdiction and joinder, service, discovery and Interrogatories, means of gathering evidence at pre-trial including subpoenas and notice to produce, judgment and appeals, enforcement and costs, and arbitration.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): LAWS 7056 Fundamentals of Australian Law AND LAWS 7061 Legal Analysis and Critique
Incompatible Subjects: LAWS 4013 Civil Procedure and Arbitration
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7046 Constitutional Law (10 Credit Points)
Subject Details (p. 4053) Legacy Code: 201058
Constitutional Law introduces the legal rules and doctrines governing Commonwealth Constitutional systems in Australia. Topics covered include: Commonwealth Constitutions; legislative powers of the Commonwealth and State governments; Executive; the separation of powers doctrine; the legal relations between State and Commonwealth laws; Constitutional freedoms and restrictions on Commonwealth legislative powers; First Nations peoples and Constitutional change.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): LAWS 7057 Government and Public Law
Incompatible Subjects: LAWS 4015 Constitutional Law
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7047 Contracts (10 Credit Points)
Subject Details (p. 4054) Legacy Code: 201048
This subject deals with legal principles related to the development and application of contract law with an awareness of broader political, social, economic, cultural and ethical considerations. Contracts covers the formation of contracts, the requirement of writing, privity of contract, contractual terms and their interpretation, breach of contract, discharge of contractual obligations and elements vitiating its formation such as misrepresentation, misleading and deceptive conduct, mistake, undue influence, unconscionability, duress and discharge. Statutory developments are also considered such as the Contracts Review Act 1980 (NSW) and the Australian Consumer Law, as are the historic and theoretical aspects of the development of the law of contract. Students will collaborate in problem/case-based learning, engage with online learning materials, and participate in a Moot and viva voce to develop knowledge and skills in authentic ways.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): LAWS 7056 Fundamentals of Australian Law
Incompatible Subjects: LAWS 2003 Contracts
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7048 Criminal Law (10 Credit Points)
Subject Details (p. 4055) Legacy Code: 201047
This subject examines the principles and aims of criminal law and criminal procedure. Students will engage with the definition, elements and application of crimes in the context of fatal and non-fatal offences against the person, the major sexual offences, property offences, and relevant defences. Students will analyse the elements of offences and apply the principles of statutory interpretation of offence provisions. Concepts of criminal responsibility and strict liability, the roles of principal agencies in the criminal justice system, and the central elements of the criminal process and sentencing are examined. Students will be introduced to the institutional arrangements of criminal procedure and their respective legislative and policy rationales. Students will engage with contemporary and historical considerations of criminal law, criminal responsibility and the impact of the criminal justice process in a broad social, political and economic context with a particular focus on issues including domestic violence and the impact of the criminal justice system on Aboriginal and Torres Strait Islander peoples. Students will be engaged with a range of practice-oriented exercises including Bail Applications.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): LAWS 7056 Fundamentals of Australian Law
Incompatible Subjects: LAWS 2004 Criminal Law
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7049 Criminal Procedure and Evidence (10 Credit Points)
Subject Details (p. 4055) Legacy Code: 201059
The subject is designed to provide an understanding of the law, the theoretical underpinnings and the underlying policy issues, in the areas of evidence and criminal procedure. This subject deals with principles and stages of civil and criminal procedure in order to comply with the formal requirements for admission to legal practice, themes and theories of procedural law, identification and interpretation of the key legislative provisions and key stakeholders, and techniques of statutory interpretation including comprehension of the interpretation of statute through case law and academic commentary. It is expected that the students will be able to solve hypothetical problem questions through the application of procedural legislation and precedent.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): LAWS 7048 Criminal Law
Incompatible Subjects: LAWS 4004 Criminal Procedure and Evidence
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7050 Designing Law Apps for Access to Justice (10 Credit Points)
Subject Details (p. 4057) Legacy Code: 201065
This subject will teach students how to design and build an application using expert system software. This subject will provide students with a clinical legal experience by providing access to a community based client to ascertain their needs and undertake collaborative work to provide a solution that requires applied legal research, teamwork, innovative and creative design thinking, and the capacity to manage a project. This subject will teach students how to identify, design and build appropriate legal information systems for use in generating legal documents from precedents and assisting users to navigate solutions to legal problems. Students will be exposed to a variety of automated legal tasks and various legal and practical issues associated with their use, including issues of professional regulation. This will include guest lectures from those working on legal expert systems and related technologies. After learning the necessary skills, students will work in small groups to design and build a legal information system. This subject does not require students to have any pre-existing skills or experience in expert systems or computer programming. Instead, the subject itself includes instruction on how to use an expert system software.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7051 Elder Law (10 Credit Points)
Subject Details (p. 4057) Legacy Code: 201066
Whilst Elder Law has been an acknowledged speciality for many years in countries such as Canada and the United States of America, it is only in the last two decades that it has gained recognition in Australia. This subject examines law, theories and issues relevant to an ageing community. The legal issues are examined in a broad social, cultural and ethical context. Issues of legal capacity relevant not only to the law of contracts but also to delegated decision making, medical treatment and end of life decisions are considered. Similarly, the law relating to areas of special importance to the elder community such as, pensions, retirement villages, wills and estate planning and equitable remedies for financial elder abuse are also discussed.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): Students enrolled in 2826 Juris Doctor must have successfully completed subjects LAWS 7072 and LAWS 7047 and students enrolled in 2824 M Laws must have successfully completed LAWS 7078 before enrolling in this subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7053 Equity & Trusts (10 Credit Points)
Subject Details (p. 4058) Legacy Code: 201054
This subject examines the principles of Equity and the law of trusts in Australia. The primary emphasis is on the nature and development of equitable principles and introduces students to fundamental principles in the law of trusts in a culturally diverse society. Topics include the nature and application of principles and maxims of Equity, the trust, the types of trusts and introduction to express trusts. The subject emphasises contemporary applications of the rules, principles and remedies of Equity, including the operation of the principles of Equity in relation to First Nations peoples. It also explores issues that are presently unresolved and the subject of contention. Students will be able to use a range of legal research tools to select high quality and relevant primary and secondary legal information to support the construction of solutions to hypothetical problems and theoretical legal issues that indicate a deep comprehension of Equity and trusts.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): LAWS 7056 Fundamentals of Australian Law
Co-requisite(s): LAWS 7067 Property Law
Incompatible Subjects: LAWS 3018 Equity Trusts
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7056 Fundamentals of Australian Law (10 Credit Points)
Subject Details (p. 4059) Legacy Code: 201046
This subject provides students with the fundamental legal skills required to succeed in the study and practice of law. Students will be introduced to the Australian legal system, legal study skills and the importance of academic integrity for law students, how law is made, how cases and statute interact, the Australian court hierarchies, , case analysis skills, statutory interpretation skills, an introduction to legal ethics and justice, and an introduction to the impact of the Australian legal system on Australian First Peoples.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): None
Incompatible Subjects: LAWS 1003 Fundamentals of Australian Law
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7057 Government and Public Law (10 Credit Points)
Subject Details (p. 4060) Legacy Code: 201053
Government and Public Law is designed to provide an overview of government and public law in Australia and a foundation for the later study of Administrative Law and Constitutional Law. It introduces students to the principles and structures that underpin constitutional and administrative law in Australia. The subject. The subject has four key focus areas: Public Law in Australia, How Government Works, Government Accountability and Integrity, and Individuals and Government. Students will collaborate in problem/case-based learning and engage with online learning materials to develop knowledge and skills in legal research and communication enabling them to address critical contemporary public law challenges.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): LAWS 7056 Fundamentals of Australian Law and LAWS 7058 Introduction to Law
Incompatible Subjects: LAWS 2008 Government and Public Law
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7058 Introduction to Law (10 Credit Points)
Subject Details (p. 4061) Legacy Code: 201045
This intensive subject provides students with an introduction to the discipline of law and inducts students to the Australian Legal System, the School of Law, the legal profession, and the wider legal community. The subject surveys the fundamentals of the Australian legal systems and introduces students to a range of key legal concepts and debates. Students will be introduced to legal problem-solving methodology, the classifications of law, and skills needed to succeed in the study law. Students are introduced to the intellectual skills of fact-finding, critical analysis, logic, reasoning, evaluation and communication. Students will attend excursions to courts, tribunals, law firms and community legal centres. Students will reflect upon their emerging professional profiles to foster and develop career aspirations.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: LAWS 1007 Introduction to Law (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7059 Judicial Internship (10 Credit Points)
Subject Details (p. 4062) Legacy Code: 201069
This subject provides an internship opportunity for later year law students. Students will spend twelve days throughout the semester at selected courts and tribunals under the supervision of magistrates, judges or tribunal members. The subject will provide students with an opportunity to observe the courts and tribunals first hand, to be mentored by a judicial officer, to engage in practical assistance to the relevant court or tribunal, and to appreciate the professional responsibilities essential for a 21st Century legal practitioner and judicial officer. The subject will assist students in advancing their legal and research skills and deepen their experience of the social, practical and ethical complexities encountered by the legal profession. The subject will also assist students in their transition from university to the profession. Entry is competitive and will include a written application and interview.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): LAWS 7066 AND
LAWS 7048 AND
LAWS 7072 AND
LAWS 7061 AND
LAWS 7047
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7060 Law of Associations (10 Credit Points)
Subject Details (p. 4062) Legacy Code: 201057
This subject deals with issues that arise in relation to the selection of appropriate structures for the conduct of non-profit and commercial dealings. Students examine the legal and practical requirements involved in creating, operating and winding up associations, partnerships and corporations, and their relationship to broader social, economic and political contexts. Emphasis is on the creation and operation of corporations, and the duties and liabilities of directors and officers, as well as the rights and obligations of shareholders. It is expected that students will be able to propose solutions to legal problem questions and issues relating to commercial associations with a focus on corporate law displaying a clear and coherent argument that evidences legal research, legal reasoning and professional judgement in responding to issues relating to commercial associations with a focus on corporate law. This subject will critically analyse key ethical issues arising in the law of associations and consider different stakeholder perspectives.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): LAWS 7053 or LAWS 7078
Incompatible Subjects: LAWS 3045 Law of Associations
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7061 Legal Analysis and Critique (10 Credit Points)
Subject Details (p. 4064) Legacy Code: 201050
This subject introduces students to the processes of critical evaluation of arguments, legal communication and logical and critical problem solving. Students will have the opportunity to explore how law is made, some of the institutional limitations on law and justice, and the impact of globalisation on law. It introduces theories about the nature and function of law in historical, political, social, economic, cultural, ethical and international contexts. The connection between race, gender, culture and law is examined within the context of the Australian legal tradition, legal history, and the impact of the Australian legal system on Aboriginal and Torres Strait Islander Peoples. Students will use logical and critical skills to develop solutions to problems involving statutory interpretation and the application of precedent; and articulate legal thought effectively and persuasively for diverse audiences.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): LAWS 7056 Fundamentals of Australian Law
Incompatible Subjects: LAWS 1009 Legal Analysis and Critique
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7062 Legal Research Dissertation (20 Credit Points)
Subject Details (p. 4064) Legacy Code: 201074
This is a 20-credit point subject. This subject provides students with a capstone research experience in relation to a supervised legal dissertation. Students develop and refine legal research and writing skills by analysing a legal topic chosen in consultation with an academic supervisor. This subject requires the student to undertake a literature review, to develop a research proposal, to present on the proposal and finished work, and to submit a dissertation. The research project areas will principally focus upon those areas identified by the School of Law in its Research Strategy.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): LAWS 7027
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7063 Legal Research Project 1 (10 Credit Points)
Subject Details (p. 4065) Legacy Code: 201075
This subject provides students with a capstone research experience in relation to a structured research project. Students will develop and refine their legal research and communication skills by exploring and analysing a legal topic chosen by the Law School. Students will compose a research paper of 5,000 words on an approved topic in law and will provide a 20-minute presentation based upon the completed project. The research project areas will principally focus upon those areas identified by the School of Law in its Research Strategy.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): LAWS 7027
Equivalent Subjects: LAWS 7023 - International Independent Study Law 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7064 Legal Research Project 2 (10 Credit Points)
Subject Details (p. 4066) Legacy Code: 201076
This subject provides students with a capstone research experience in relation to a structured research project. Students will develop and refine their legal research and communication skills by exploring and analysing a legal topic chosen by the Law School. Students will compose a research paper of 5,000 words on an approved topic in law and will provide a 20-minute presentation based upon the completed project. The research project areas will principally focus upon those areas identified by the School of Law in its Research Strategy. This subject can be delivered either in a combination of onshore in Australia and offshore in a host country, or solely onshore in Australia. Students enrolled in the subject with an offshore component must be available to travel for two weeks to the host country. When no host country is available, this subject may be delivered wholly onshore (in Australia) only. Students will be advised whether there is an offshore component of study and the availability of a host country in advance of opportunities to enrol. When delivered offshore in a host country the teaching materials will incorporate host country-specific issues and activities relevant to the topics covered in the subject. Offshore delivery integrated with host country specific delivery provides the students with an immersive international and comparative experience to help them develop their research project.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): LAWS 7027
Equivalent Subjects: LAWS 7024 - International Independent Study Law 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7065 Moot Court (10 Credit Points)
Subject Details (p. 4067) Legacy Code: 201070
Students will participate in mooting conducted before an appellate court or tribunal. Students will be provided with a grounding in issues including jurisdiction, admissibility, and remedies. The subject will focus on one or more areas of domestic substantive law and will include a research component. Students will prepare and present a hypothetical case before an appellate court or tribunal and will be given the opportunity to develop their advocacy skills, including the preparation of written submissions and delivery of oral submissions. Undertaking this subject would be useful for students seeking to participate in one or more law mooting competitions representing Western Sydney University.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): LAWS 7072 AND
LAWS 7046 AND
LAWS 7047 AND
LAWS 7067
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7066 Professional Responsibility and Legal Ethics (10 Credit Points)
Subject Details (p. 4068) Legacy Code: 201049
This subject provides students with the opportunity to critically reflect on the legal, statutory and ethical principles and standards that underpin the professional obligations of legal practitioners. Students will also analyse ethical issues that commonly occur in professional legal practice in contemporary multicultural Australia, particularly with Aboriginal and Torres Strait Islander peoples. It deals with the professional, legal and ethical responsibilities legal practitioners owe to the law, the courts, their clients and to fellow practitioners, as well as the state and society at large. Students will be able to explain and evaluate the law and practice of legal practitioners, by reference to key topics, such as: professionalism; legal ethics; the history, structure and regulation of the legal profession; and the interpersonal, psychological and cultural factors affecting lawyering. Guided by an ethical decision-making model, students will demonstrate their ability to use primary legal materials to answer legal ethical problems, and explore the relationship between personal and professional attitudes and values by reflecting on their own views and observations.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): LAWS 7056 Fundamentals of Australian Law
Incompatible Subjects: LAWS 2015 Professional Responsibility and Legal Ethics
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7067 Property Law (10 Credit Points)
Subject Details (p. 4068) Legacy Code: 201055
Students will learn about the concept of property and the nature of property rights including the boundaries between property and other rights and the boundaries between different forms of property. The subject content includes the doctrine of tenure and estates, native title, and legal and equitable interests in land. Specific topics to be covered include personal property and securities, mortgages, leases, easements and profits a prendre, co-ownership, the Torrens system of statutory registration of interests in land, and the principles for resolving conflicting proprietary interests.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): LAWS 7056 Fundamentals of Australian Law AND LAWS 7047 Contracts
Incompatible Subjects: LAWS 3082 Property Law
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7068 Remedies (10 Credit Points)
Subject Details (p. 4069) Legacy Code: 201060
This subject examines the nature, goals and principles of private law remedies. Both judicial and non-judicial remedies in Australian private law are examined including the principles of the major common law, equitable, restitutionary, and statutory remedies available to wronged parties in a variety of circumstances. Emphasis is on the analysis of practical and theoretical advantages and disadvantages of various remedies in a culturally diverse society.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): LAWS 7053 LAWS 7072 LAWS 7047
For 2824 Master of Laws students - LAWS 7010 LAWS 7078
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7069 Revenue Law (10 Credit Points)
Subject Details (p. 4070) Legacy Code: 201071
This subject examines the legal basis for the Australian taxation system and its application. It will cover taxation of income from personal exertion, business and property, as well as the taxation of fringe benefits provided in the context of employment and the goods and services tax (popularly known as the GST). Lectures and tutorials cover the constitutional basis of taxation, income tax assessment and the concepts of income tax, allowable deductions, other federal and state taxes, taxation of business associations (partnerships, companies, trusts and primary producers), taxation accounting, administration and practice, taxation planning and avoidance.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): LAWS 7057
Incompatible Subjects: LAWS 7031
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7071 Technology, Innovation and the Law (10 Credit Points)
Subject Details (p. 4071) Legacy Code: 201073
This subject enables students to proactively adapt to the transforming nature of the legal profession. Students will engage with the technology and innovation expectations of contemporary business, legal practice and community engagements - including the concepts and areas of Big Data, Artificial Intelligence, machine learning, Blockchain, legal task automation, e-contracts and smart contracting, technology assisted review, e-Courts, FinTech and RegTech, law tech start-ups, and chatbots. Students will be able to develop legal, ethical and regulatory digital literacies and personal professional strategies to maintain and use these literacies innovatively. The curriculum will offer insights from a number of innovative and technology focused legal industry experts.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): LAWS 7056 or LAWS 7009
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7072 Torts Law (10 Credit Points)
Subject Details (p. 4072) Legacy Code: 201051
Torts Law will provide students with the opportunity to critically analyse the key principles of Australian torts law and its impact within the broader legal context. The topics covered include legal principles and policy of a variety of torts, defences and remedies. The subject also introduces students to legal skills, statutory interpretation and legal problem solving, as well as placing the law in the wider political and social context. Students will be able to search for, analyse, and evaluate cases, statutes, and theoretical writings relevant to torts law to resolve legal problems.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): LAWS 7056 Fundamentals of Australian Law
Incompatible Subjects: LAWS 2013 Torts Law
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7073 Animal Law (10 Credit Points)
Subject Details (p. 4073)
This subject examines the legal and ethical relations between humans and non-human animals. Students will apply theoretical perspectives to support their own stance regarding human/animal relations. They will critically evaluate the legal framework which governs those relations. The subject will examine a range of topic such as the moral and legal status of animals, animal rights versus animal welfare, farming and husbandry practices, animals in scientific research, animals in the entertainment industry, wildlife protection and endangered species, companion animals and Indigenous approaches to animal welfare. Students will engage in professional learning activities and use a range of legal research tools to demonstrate their application of this body of law in practice.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): LAWS 7056 AND LAWS 7061
Incompatible Subjects: LAWS 3090
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7074 Family Law (10 Credit Points)
Subject Details (p. 4073)
Family Law is a key area of study for students who intend to enter legal practice. This subject aims to graduate students who will become reflective, ethical, and effective family lawyers and/or family dispute resolution practitioners. Students will engage in professional learning activities to demonstrate their application of this body of law in practice. This subject adopts a range of critical perspectives in relation to developments in theory, laws, policies, and practices concerned with the legal regulation of intimate relationships, particularly after separation. Family law balances the competing rights, obligations and interests of partners, children and others following separation, often in the context of complex family dynamics. It also examines the cultural, social, political, psychological and economic contexts that influence separating families.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): LAWS 7056
Incompatible Subjects: LAWS 3023
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7075 Mediation (10 Credit Points)
Subject Details (p. 4074)
Mediation is an essential skill for law graduates. This subject will provide students the opportunity to develop mediation skills in a practical way that enhances their employability and professionalism. It will focus on the skills and theory of mediation, specifically in the context of the Australian legal system. Students will further develop the knowledge and skills introduced in Alternative Dispute Resolution (which is a prerequisite for this subject). This subject is experientially based, and students will engage in professional activities such as role-plays. The theory and practice of mediation will be critically considered, as will the social and legal contexts within which mediation is practised. The subject will adopt a multi-disciplinary approach and will consider issues of culture (including the perspectives of First Nations peoples), power, mediator neutrality and ethical dilemmas for the mediator.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): LAWS 7044
Incompatible Subjects: JUST 2013
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7076 Media Law (10 Credit Points)
Subject Details (p. 4075)
This subject analyses various aspects of the laws that regulate the media. The content of the subject includes defamation, contempt, privacy and surveillance and a selection of other laws impacting upon the media industry. It explores two key themes. The first is whether, as a question of policy, current legal restrictions to media freedom appropriately balance the protection of free speech with various other interests, including protection of reputation, personal privacy and the effective administration of justice. The second theme asks whether media laws that were developed to regulate traditional mass-media organisations apply to individuals who publish their own content online, particularly via social media, and, if so, whether this application is appropriately balanced. Analysis of the application of existing media law principles to a range of new technologies will be featured throughout the subject. Students will engage in professional learning activities to demonstrate their application of this body of law in practice.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): LAWS 7072 AND LAWS 7057
Incompatible Subjects: LAWS 3049
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7077 Self-Managed Superannuation and Trusts (10 Credit Points)
Subject Details (p. 4075)
This subject equips students with the ability to critically analyse law and policy relating to self-managed superannuation funds and the use of the trust structure, which are essential components for professionals in this area of practice. It provides students with the requisite skills to provide comprehensive financial advice, particularly within the context of an individual being able to choose a superannuation fund or create a self-managed superannuation fund (SMSF). The subject will provide students the opportunity to synthesise areas of law in a practical way that enhances their employability and professionalism.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): LAWS 7053 OR LAWS 7010
Incompatible Subjects: LAWS 3067
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 7078 Principles of Private Law (10 Credit Points)
Subject Details (p. 4076)
This subject provides students with a comprehensive introduction to the fundamental principles of private law covering core legal principles in contracts, torts, and property Law in the Australian legal and commercial context. Students will explore the key concepts, legal frameworks, and principles governing contracts, torts, and property rights in Australia. They will gain a solid understanding of contractual formation, enforceability, and remedies, as well as the elements of tort liability and the application of property law principles. Students will acquire a strong foundation in these core areas of Australian law, enabling them to apply their knowledge in practical legal scenarios.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): LAWS 7056
Incompatible Subjects: LAWS 7009
Restrictions: Please see the Subject Details page for any restrictions for this subject

LAWS 9001 Higher Degree Research Thesis - Law (80 Credit Points)
Subject Details (p. 4077) Legacy Code: 800039
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

Manufacturing Eng. (MANU)

MANU 2001 Design and Manufacturing (10 Credit Points)
Subject Details (p. 4078) Legacy Code: 301340
This subject will be offered at Engineering Innovation Hub - Hassall St, Parramatta campus. This subject introduces basic aspects of design and manufacturing, process selection, manufacturing processes, material selection based on material properties and the use of computers in the design process. A project selected allows students to work individually and in a team environment to achieve the final objective which is a workable product. As part of the project, students are asked to develop a product from a page of functional requirements by developing a concept sketch, material selection, detail engineering drawings, process plan and finally making the product in a workshop. At the end of the semester, the products are tested.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MANU 3003 Creative Digital: Robots and Avatars (10 Credit Points)
Subject Details (p. 4078) Legacy Code: 301307
This is a project-based learning subject that assists students to creatively synthesise skills learned in previous subjects. Students are introduced to current problem solving in professional practice that negotiates between physical and digital components to form smart artefacts. That relation is represented with the development of an interactive robot and its digital mirror counterpart as its avatar. The subject also assists in the preparation of a professional portfolio show piece for job applications in the industry. Learning by experimentation, the subject links traditional skillsets including software and 3D printing with new forms of design, from engineering narratives to digital creativity within augmented and virtual environments.
Level: Undergraduate Level 3 subject
Equivalent Subjects: MANU 3001 - Graphics 5 Creative Computing
Restrictions: Please see the Subject Details page for any restrictions for this subject

Mathematics (MATH)

MATH 0002 Foundations of Mathematics (WSTC) (10 Credit Points)
Subject Details (p. 4079) Legacy Code: 900055
Foundations of Mathematics is designed to develop knowledge, understanding and skills in Mathematics to a level, which is appropriate for day-to-day life and also as a basis for further study at university entrance level. The course aims to build on existing skills, develop skills in new areas and encourage students' confidence in their own ability.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 0003 Introductory Business Mathematics (WSTC) (10 Credit Points)
Subject Details (p. 4080) Legacy Code: 900114
This subject consists of two modules. The first module has been designed to provide a revision of basic mathematical concepts and methods that apply to business situations. They include basic mathematical operations, percentages, equations, index numbers, logarithms, direct and inverse variation, and graphs. The second module has been designed to provide students with the necessary skills for making practical financial decisions. The concepts taught include simple interest, compound interest, annuities and their applications as they apply in a business environment.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: MATH 0007 - Mathematics 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 0004 Mathematics (WSTC Prep) (10 Credit Points)
Subject Details (p. 4080) Legacy Code: 700044
The Mathematics subject is designed and written to prepare students for further mathematical study at first year university level. It provides a comprehensive introduction to the study of calculus and its applications in the real world. The subject develops those skills peculiar to the mathematical requirements of further study in the areas of Business, Computing, Information Technology, Science and Engineering.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: MATH 0005 - Mathematics (UWSC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 0005 Mathematics (WSTC) (10 Credit Points)
Subject Details (p. 4081) Legacy Code: 900032
The Mathematics subject is designed and written to prepare students for further mathematical study at first year university level. It provides a comprehensive introduction to the study of calculus and its applications in the real world. The subject develops those skills peculiar to the mathematical requirements of further study in the areas of Business, Computing, Information Technology, Science and Engineering.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 0006 Mathematics 1 (WSTC Prep) (10 Credit Points)
Subject Details (p. 4081) Legacy Code: 700284
This subject has been designed to enhance students' numeracy skills and their understanding of basic mathematical concepts taught in high school mathematics. The topics include arithmetic and algebra, elementary functions, and basic geometry and trigonometry. The subject will prepare students and help them follow more advanced topics in Mathematics 2, Mathematics for Engineers Preliminary and Mathematics for Engineers 1, as well as various other Engineering and ICT subjects.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 0007 Mathematics 1 (WSTC) (10 Credit Points)
Subject Details (p. 4082) Legacy Code: 900085
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 0008 Mathematics 2 (WSTC Prep) (10 Credit Points)
Subject Details (p. 4082) Legacy Code: 700146
This subject has been specifically designed for students who need to refresh or upgrade their understanding of basic mathematical concepts taught in high school mathematics. The topics include basic arithmetic and algebra, elementary functions, geometry, trigonometry and coordinate geometry.
Level: Undergraduate Level 0 Preparatory subject
Pre-requisite(s): Students enrolled in 7162 Diploma in Engineering Extended 7138 Diploma in Information and Communication Technology Extended - ICT 7139 Diploma in Information and Communication Technology Extended 7140 Diploma in Information and Communication Technology Extended – Information Systems and 7141 Diploma in Information and Communication Technology (Health Information Management) Extended must pass MATH 0006 Mathematics 1 prior ro enrolling in this unit
Equivalent Subjects: MATH 0009 - Mathematics 2 (UWSC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 0009 Mathematics 2 (WSTC) (10 Credit Points)
Subject Details (p. 4084) Legacy Code: 900086
This subject has been specifically designed for students who need to refresh or upgrade their understanding of basic mathematical concepts taught in high school mathematics. The topics include basic arithmetic and algebra, elementary functions, geometry, trigonometry and coordinate geometry.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: MATH 0008 - Mathematics 2 (WSTC Prep)
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 0010 Mathematics 3 (WSTC Prep) (10 Credit Points)
Subject Details (p. 4085) Legacy Code: 700203
This subject is designed to prepare students for further mathematical study at first year university level. It provides a comprehensive introduction to the study of calculus and its applications in the real world. The concepts studied also include arithmetic and geometric series, trigonometry, inverse trigonometric functions, vectors and matrices.
Level: Undergraduate Level 0 Preparatory subject
Pre-requisite(s): MATH 0008
Equivalent Subjects: MATH 0011 - Mathematics 3 (UWSC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 0011 Mathematics 3 (WSTC) (10 Credit Points)
Subject Details (p. 4086) Legacy Code: 900087
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 0012 Mathematics B (WSTC Prep) (10 Credit Points)
Subject Details (p. 4086) Legacy Code: 700069
This subject is replaced by 700146 - Foundation Mathematics 2 (UWSCFS) from Term 1 2014. This subject has been specifically designed for students who need to refresh or upgrade their understanding of basic mathematical concepts taught in high school mathematics. The topics include basic arithmetic and algebra, geometry, trigonometry, coordinate geometry, quadratic functions, indices, logarithms and an introduction to differential calculus.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: MATH 0013 - Mathematics B
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 0013 Mathematics B (WSTC) (10 Credit Points)
Subject Details (p. 4086) Legacy Code: 900033
The Mathematics B course is designed and written to prepare students for further mathematical study at first year university level in courses that do not demand an in-depth study of Calculus. The course particularly develops those skills peculiar to the mathematical requirements of further study in the area of Business, Finance and Economics. It is usually studied in conjunction with 'Commercial Mathematics'.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 0014 Mathematics C (WSTC Prep) (10 Credit Points)
Subject Details (p. 4087) Legacy Code: 700025
The Mathematics C subject is designed and written to prepare students for mathematical study at first year university level, specifically in the area of Engineering. It provides a comprehensive introduction to the study of calculus and its applications in the real world.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 0015 Mathematics Extension (WSTC) (10 Credit Points)
Subject Details (p. 4087) Legacy Code: 900034
The course Mathematics Extension is designed and written to prepare students for further mathematical study at first year university level, particularly in the areas of Science and Engineering. Mathematical concepts developed in the 'Mathematics' course are expanded upon and harder mathematical concepts are introduced. The course develops those skills peculiar to the mathematical requirements of further study in the areas of Computing, Information Technology, Science and Engineering. Undergraduate study in the Physics and Engineering areas of university require the student to have been exposed to the mathematics presented at Extension level.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 0017 Mathematics for Health Science (WSTC) (10 Credit Points)
Subject Details (p. 4087) Legacy Code: 900088
This subject is designed to prepare students for further study at university level in the areas of Health Science and, in particular, Nursing. Undergraduate study in Health Science places a particular emphasis on mathematical skills in the workplace and this subject provides a basis for developing those skills. The subject places equal emphasis on both theoretical and practical application of mathematical techniques as would apply in practice in the Health environment.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: None
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 0018 Maths Start Algebra 1 (10 Credit Points)
Subject Details (p. 4088) Legacy Code: 900646
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 0019 Maths Start Algebra 2 (10 Credit Points)
Subject Details (p. 4089) Legacy Code: 900647
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 0020 Maths Start Calculus (10 Credit Points)
Subject Details (p. 4089) Legacy Code: 900648
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 0021 Maths Start Preparation for Calculus (10 Credit Points)
Subject Details (p. 4089) Legacy Code: 900652
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 0022 Maths Start Statistics (10 Credit Points)
Subject Details (p. 4089) Legacy Code: 900650
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 0023 Maths Start Trigonometry (10 Credit Points)
Subject Details (p. 4090) Legacy Code: 900651
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 0024 Maths Start for Engineering (10 Credit Points)
Subject Details (p. 4090) Legacy Code: 900649
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 0025 Nursing Numeracy (5 Credit Points)
Subject Details (p. 4090) Legacy Code: 900206
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 0026 Practical Mathematics (WSTC) (10 Credit Points)
Subject Details (p. 4091) Legacy Code: 900115
This subject has been designed to develop the students' mathematical literacy and mathematical thinking necessary for further education, work and everyday life. The subject aims to build on existing skills, develop skills in new areas and encourage students' confidence in their own ability by applying mathematical concepts to a series of real life problems.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: MATH 0002 - Foundations of Mathematics (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 0027 Scientific Methods for Construction Management (WSTC Prep) (10 Credit Points)
Subject Details (p. 4092) Legacy Code: 700264
This subject is designed to assist students to become competent in the fields of mathematics and basic physical science. It reinforces the mathematical skills in the areas of basic arithmetic, algebra, geometry and trigonometry. The subject introduces the study of forces, work and energy and selected applications of these concepts. Emphasis is placed on developing the key competencies of scientific methods to provide the necessary introduction for Building Design and Construction Technology.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 0028 Statistics for Academic Purposes (WSTC Prep) (5 Credit Points)
Subject Details (p. 4092) Legacy Code: 700045
Understanding, creating and working with statistics are fundamental skill requirements in many areas and career pathways within the arts, business, science and the humanities disciplines. This subject will provide students with a comprehensive overview of statistics in order to prepare them for success in first year university subjects of study where they will further develop their skills. Through both individual and group tasks students will use statistics to organize and display data as well as draw valid inferences, based on data, by using appropriate statistical tools.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: MATH 0029 - Statistics for Academic Purposes (UWSC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 0029 Statistics for Academic Purposes (WSTC) (5 Credit Points)
Subject Details (p. 4093) Legacy Code: 900011
Understanding, creating and working with statistics are fundamental skill requirements in many areas and career pathways within the arts, business, science and the humanities disciplines. This subject will provide students with a comprehensive overview of statistics in order to prepare them for success in first year university subjects of study where they will further develop their skills. Through both individual and group tasks students will use statistics to organize and display data as well as draw valid inferences, based on data, by using appropriate statistical tools.
Level: Undergraduate Level 0 Preparatory subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 0030 Introduction to Building Calculations (WSTC Prep) (10 Credit Points)
Subject Details (p. 4094) Legacy Code: 700317
This subject is designed to assist students to become competent in the field of basic and introductory senior mathematics. It introduces and reinforces mathematical skills in the areas of basic arithmetic, algebra and geometry. Emphasis is placed on developing key competencies in building calculations.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 1001 Analysis of Change (10 Credit Points)
Subject Details (p. 4095) Legacy Code: 300830
This Level 1 subject introduces students to the mathematical modelling techniques that are used to formulate and solve problems in the physical and biological sciences. To use these techniques successfully, students must develop the ability to formulate a problem mathematically and then be able to use the appropriate knowledge to test conclusions by analytical and numerical means. These skills will be emphasized as each technique in introduced. Apart from some introductory work on logarithms and exponentials (essential concepts in the sciences), the main techniques developed involve aspects of differential calculus, culminating in the use of differential equations to model real phenomena in the sciences.
Level: Undergraduate Level 1 subject
Equivalent Subjects: MATH 1011 - Fundamentals of Mathematics LGYB 0484 - Analysis of Change (WSTC)
Incompatible Subjects: MATH 1014 - Mathematics 1A
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 1002 Analytics Programming (10 Credit Points)
Subject Details (p. 4096) Legacy Code: 301107
This subject covers the use of computers and computer programming for Data Science. After briefly considering spreadsheet systems, the subject will consider programming in the statistical system "R" in depth. Finally, other special purpose languages will be touched briefly (eg. SQL).
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 1003 Biometry (10 Credit Points)
Subject Details (p. 4096) Legacy Code: 200263
Biometry introduces students to various statistical techniques necessary in scientific endeavours. Presentation of the content will emphasise the correct principles and procedures for collecting and analysing scientific data, using a hands-on approach. Topics include effective methods of gathering data, statistical principles of designing experiments, error analysis, describing different sets of data, probability distributions, statistical inference, non-parametric methods, simple linear regression and analysis of categorical data.
Level: Undergraduate Level 1 subject
Equivalent Subjects: MATH 1032 - Statistics for Science MATH 1028 - Statistical Decision Making MATH 1030 - Statistics for Business ECON 1006 - Introduction to Economic Methods 30123 - Management Analytics
Incompatible Subjects: MATH 1025 - Quantitative Techniques
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 1004 Biometry (WSTC) (10 Credit Points)
Subject Details (p. 4098) Legacy Code: 700033
This subject introduces students to various statistical techniques necessary in scientific endeavours. Presentation of the content will emphasize the correct principles and procedures for collecting and analysing scientific data, using a 'hands-on' approach. Topics include effective methods of gathering data, statistical principles of designing experiments, error analysis, describing different sets of data, probability distributions, statistical inference, non-parametric methods, and simple linear regression and correlation.
Level: Undergraduate Level 1 subject
Equivalent Subjects: MATH 1030 Statistics for Business ECON 1006 Introduction to Economic Methods MATH 1032 Statistics for Science MATH 1028 Statistical Decision Making MATH 1031 Statistics for Business (WSTC) MATH 1029 Statistical Decision Making (WSTC)
Incompatible Subjects: MATH 1025 Quantitative Techniques
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 1006 Discrete Mathematics (10 Credit Points)
Subject Details (p. 4099) Legacy Code: 200025
Discrete Mathematics introduces set theory, symbolic logic, graph theory and some counting techniques. The subject develops mathematical thinking and builds problem solving skills. It provides a solid foundation for further study in mathematics or computing.
Level: Undergraduate Level 1 subject
Equivalent Subjects: LGYB 0448 - Discrete Mathematics (UWSC)
Incompatible Subjects: MATH 2004 - Discrete Structures and Complexity
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 1010 Fundamentals for Engineering Studies (WSTC AssocD) (10 Credit Points)
Subject Details (p. 4100) Legacy Code: 700112
This subject serves as an introduction to the key mathematics and physics concepts required to study engineering at a tertiary level. This subject has two major components, physics and mathematics. The physics component includes physical quantities, scalars and vectors, kinematics and dynamics. The mathematics component includes basic arithmetic and algebra, trigonometry, coordinate geometry, relations and functions and introduction to differentiation.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 1012 Management Analytics (10 Credit Points)
Subject Details (p. 4100) Legacy Code: 301123
Management Analytics provides students with introductory knowledge and skills in identifying, analysing and interpreting data relevant to Business, Human Resources and Management. In order to develop evidence-based decision-making skills, students will learn how to work with data. Students will organise and summarise data, present data visually and design surveys for new data collection and use. Students will develop skills in understanding decision-making models and forecasting as a means of improving business processes and HR, management and business metrics.
Level: Undergraduate Level 1 subject
Equivalent Subjects: MATH 1030 Statistics for Business ECON 1006 Introduction to Economic Methods MATH 1028 Statistical Decision Making MATH 1003 Biometry MATH 1032 Statistics for Science MATH 1031 Statistics for Business (WSTC) MATH 1029 Statistical Decision Making (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 1014 Mathematics 1A (10 Credit Points)
Subject Details (p. 4102) Legacy Code: 300672
This Level 1 subject provides a solid foundation in the theory and applications of differential calculus, as well as some introductory work on complex numbers. It is the first of two subjects developing aspects of calculus.
Level: Undergraduate Level 1 subject
Equivalent Subjects: LGYA 4423 Concepts of Mathematics
Incompatible Subjects: LGYA 4295 Mathematics for Business MATH 1016 Mathematics for Engineers 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 1015 Mathematics 1B (10 Credit Points)
Subject Details (p. 4103) Legacy Code: 300673
This Level 1 subject provides a solid foundation in the theory and applications of integral calculus, as well as some introductory work on linear algebra and infinite sequences and series. It is the second of two subjects developing aspects of calculus.
Level: Undergraduate Level 1 subject
Pre-requisite(s): MATH 1014
Equivalent Subjects: LGYA 4423 - Concepts of Mathematics
Incompatible Subjects: LGYA 4295 - Mathematics for Business MATH 1016 - Mathematics for Engineers 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 1016 Mathematics for Engineers 1 (10 Credit Points)
Subject Details (p. 4104) Legacy Code: 200237
This subject is the first of two mathematics subjects to be completed by all students enrolled in an engineering degree during their first year of study. The content covers a number of topics that underpin the later-stage engineering mathematics subjects. The subject matter includes: differential and integral calculus of a single variable, complex numbers, aspects of matrix algebra, vectors, and some elementary statistics and probability theory. The aim of this subject is to introduce a number of key mathematical concepts needed in the study of Engineering, and to provide a solid foundation for the follow-on subject Mathematics for Engineers 2.
Level: Undergraduate Level 1 subject
Pre-requisite(s): Students enrolled in 3740 Bachelor of Engineering (Honours) or 3689 Bachelor of Engineering must have passed MATH 1021 Mathematics for Engineers Preliminary otherwise permission is required
Equivalent Subjects: MATH 1007 Engineering Mathematics 1 LGYA 4425 Mathematical Methods A LGYA 4426 Mathematical Methods B MATH 1018 Mathematics for Engineers 1 (WSTC) MATH 1017 Mathematics for Engineers 1 (WSTC Assoc Deg)
Incompatible Subjects: LGYA 4295 Mathematics for Business LGYA 4423 Concepts of Mathematics MATH 1014 Mathematics 1A MATH 1015 Mathematics 1B
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 1017 Mathematics for Engineers 1 (WSTC AssocD) (10 Credit Points)
Subject Details (p. 4106) Legacy Code: 700101
The content of this subject covers a number of topics in mathematics essential to the study of engineering. The subject matter includes: matrix algebra, complex numbers, vectors, functions and inverse functions, differential and integral calculus of a single variable and some elementary statistics and probability theory.
Level: Undergraduate Level 1 subject
Pre-requisite(s): MATH 1022
Equivalent Subjects: MATH 1018 - Mathematics for Engineers 1 (WSTC)
Incompatible Subjects: MATH 1014 - Mathematics 1A MATH 1015 - Mathematics 1B MATH 1011 - Fundamentals of Mathematics MATH 1021 - Mathematics for Engineers Preliminary
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 1018 Mathematics for Engineers 1 (WSTC) (10 Credit Points)
Subject Details (p. 4107) Legacy Code: 700019
The content of this subject covers a number of topics that underpin the later-stage engineering mathematics subjects. The subject matter includes: differential and integral calculus of a single variable, complex numbers, aspects of matrix algebra, vectors and some elementary statistics and probability theory.
Level: Undergraduate Level 1 subject
Pre-requisite(s): MATH 1023
Equivalent Subjects: MATH 1017 - Mathematics for Engineers 1 (WSTC Assoc Deg)
Incompatible Subjects: MATH 1014 - Mathematics 1A MATH 1015 - Mathematics 1B MATH 1011 - Fundamentals of Mathematics
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 1019 Mathematics for Engineers 2 (10 Credit Points)
Subject Details (p. 4108) Legacy Code: 200238
This subject is the second of two mathematics subjects to be completed by students enrolled in an Engineering degree during their first year of study. The content covers a number of topics that build on the calculus knowledge from Mathematics for Engineers 1. The subject matter includes: ordinary differential equations, Laplace transforms and multi-variable calculus.
Level: Undergraduate Level 1 subject
Pre-requisite(s): MATH 1016
Equivalent Subjects: -
Incompatible Subjects: MATH1035
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 1020 Mathematics for Engineers 2 (WSTC AssocD) (10 Credit Points)
Subject Details (p. 4109) Legacy Code: 700102
The content of this subject covers a number of topics that build on the student's calculus knowledge from Mathematics for Engineers 1. The subject matter includes: ordinary differential equations, Laplace transforms and multi-variable calculus.Offerings of alternate subjects are dependent on there being sufficient student enrolment numbers. If enrolments are low, the College may cancel delivery of the alternate subject.
Level: Undergraduate Level 1 subject
Pre-requisite(s): MATH 1017
Equivalent Subjects: MATH 1019 - Mathematics for Engineers 2 LGYB 0454 - Mathematics for Engineers 2 (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 1021 Mathematics for Engineers Preliminary (10 Credit Points)
Subject Details (p. 4110) Legacy Code: 300743
This subject is specifically designed for students enrolling in the Bachelor of Engineering (Honours) and Bachelor of Engineering Science degree courses, who do not have a mathematical background in differential and integral calculus. The content of the subject consists of topics in arithmetic and algebra, trigonometry and trigonometric functions, logarithmic and exponential functions, differential and integral calculus.
Level: Undergraduate Level 1 subject
Equivalent Subjects: -
Incompatible Subjects: LGYA 4425 - Mathematical Methods A MATH 1011 - Fundamentals of Mathematics MATH 1016 - Mathematics for Engineers 1 MATH 1018 - Mathematics for Engineers 1 (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 1022 Mathematics for Engineers Preliminary (WSTC AssocD) (10 Credit Points)
Subject Details (p. 4111) Legacy Code: 700103
This subject covers the fundamental mathematical concepts and techniques necessary for the study of Engineering. Topics include Arithmetic and Algebra, Trigonometry, Functions, and Introductory Differential and Integral calculus.
Level: Undergraduate Level 1 subject
Equivalent Subjects: MATH 1023 - Mathematics for Engineers Preliminary (WSTC)
Incompatible Subjects: MATH 1011 - Fundamentals of Mathematics
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 1023 Mathematics for Engineers Preliminary (WSTC) (10 Credit Points)
Subject Details (p. 4112) Legacy Code: 700100
This subject covers the fundamental mathematical concepts and techniques necessary for the study of Engineering. Topics include Arithmetic and Algebra, Trigonometry, Functions, and Introductory Differential and Integral calculus.
Level: Undergraduate Level 1 subject
Pre-requisite(s): Students enrolled in 6033 Diploma in EngineeringBachelor of Engineering Studies 7034 Diploma in Engineering or 7162 Diploma in Engineering Extended must pass MATH 0008 Mathematics 2 (WSTC Prep) before enrolling in this unit Students enrolled in 7066 Diploma in Engineering Extended must pass MATH 0010 Mathematics 3 (WSTC Prep) before enrolling in this unit
Equivalent Subjects: MATH 1022 - Mathematics for Engineers Preliminary (WSTC Assoc Deg)
Incompatible Subjects: MATH 1011 - Fundamentals of Mathematics
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 1026 Quantitative Thinking (10 Credit Points)
Subject Details (p. 4113) Legacy Code: 300831
This subject develops the quantitative skills that underpin many fields of study in the sciences. The content covered includes basic algebra, functions, graphs, equations, linear and quadratic, introductory probability and descriptive statistics. These mathematical/statistical concepts will be revised and developed using scientific concepts such as molarity and dilution, optical density, population growth, and predator-prey models. In all aspects of this subject, students will be developing and using critical thinking skills to solve mathematical/statistical problems set in a scientific context.
Level: Undergraduate Level 1 subject
Equivalent Subjects: MATH 1011 - Fundamentals of Mathematics
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 1027 Quantitative Thinking (WSTC) (10 Credit Points)
Subject Details (p. 4115) Legacy Code: 700123
This Level 1 subject develops the quantitative skills that underpin many fields of study in the sciences. The content covered includes basic algebra, functions, graphs, equations - linear and quadratic, introductory probability and descriptive statistics. These mathematical/statistical concepts will be revised and developed using scientific concepts such as molarity and dilution, optical density, population growth, and predator-prey models. In all aspects of this subject, students will be developing and using critical thinking skills to solve mathematical/statistical problems set in a scientific context.
Level: Undergraduate Level 1 subject
Equivalent Subjects: MATH 1011 - Fundamentals of Mathematics
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 1028 Statistical Decision Making (10 Credit Points)
Subject Details (p. 4116) Legacy Code: 300700
Statistical Decision Making introduces students to various statistical techniques for analysing and interpreting data. Presentation of the content will emphasise the correct principles and procedures for collecting and analysing data, using statistical software. Topics include describing different sets of data, probability distributions, statistical inference, and simple linear regression and correlation. The open-source statistical software package R will be introduced and used in this subject. Analysing and interpreting data is crucial in many sectors of modern economy and society. Thus, basic competencies in statistics, data collection and data analysis are essential employability skills in virtually every profession.

MATH 1030 Statistics for Business (10 Credit Points)
Subject Details (p. 4118) Legacy Code: 200032
Statistics for Business introduces the basic concepts and techniques of statistics that are particularly relevant to problem solving in business. It also provides a sound base for more advanced study in statistics and forecasting in subsequent sessions. Topics include: presentation of data; descriptive statistics; the role of uncertainty in business decision making; hypothesis testing; and basic forecasting.
Level: Undergraduate Level 1 subject
Equivalent Subjects: MATH 1032 Statistics for Science MATH 1028 Statistical Decision Making MATH 1003 Biometry ECON 1006 Introduction to Economic Methods MATH 1012 Management Analytics MATH 1031 Statistics for Business (WSTC) MATH 1004 Biometry (WSTC) MATH 1029 Statistical Decision Making (WSTC)

MATH 1031 Statistics for Business (WSTC) (10 Credit Points)
Subject Details (p. 4119) Legacy Code: 700007
Statistics for Business introduces the basic concepts and techniques of statistics that are particularly relevant to problem solving in business. It also provides a sound base for more advanced study in statistics and forecasting in subsequent sessions. Topics include: presentation of data; descriptive statistics; the role of uncertainty in business decision making; hypothesis testing; and basic forecasting.
Level: Undergraduate Level 1 subject
Pre-requisite(s): For students enrolled in courses 71024 and 7177 BUSM 0029 Decision Making for Business
For students enrolled in courses 7005 7098 71021 71022 and 71023 MATH 0028 Statistics for Academic Purposes (WSTC Prep)
Equivalent Subjects: MATH 1030 - Statistics for Business MATH 1032 - Statistics for Science ECON 1006 - Introduction to Economic Methods
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 1034 Mathematics for Engineers 1 (Advanced) (10 Credit Points)
Subject Details (p. 4121) Legacy Code: 301333
This subject will be offered at Engineering Innovation Hub - Hassall St, Parramatta campus. This subject provides foundational knowledge in key mathematical concepts which are essential for other mathematics subjects in engineering degrees. The subject matter includes: differential and integral calculus of a single variable, complex numbers, aspects of matrix algebra, vectors, and some elementary statistics and probability theory. In applying maths concepts to problems, students develop analytical thinking and problem solving skills, as well as communication skills to present clear and logical arguments. Students are encouraged to be independent and reflective learners in completing tutorial problems and online assessments.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 1035 Mathematics for Engineers 2 (Advanced) (10 Credit Points)
Subject Details (p. 4122) Legacy Code: 301337
This subject will be offered at Engineering Innovation Hub - Hassall St, Parramatta campus. This subject covers a number of topics that build on calculus knowledge from Mathematics for Engineers 1 (Advanced). Calculus is essential for engineering as it involves studying how things change over small intervals of time and allows for modelling such changes. Topics include ordinary differential equations, Laplace transforms and multi-variable calculus. In applying mathematical concepts to problems, students develop analytical thinking and problem solving skills, as well as communication skills to present clear and logical arguments. Students are encouraged to be independent and reflective learners in completing tutorial problems and online assessments.
Level: Undergraduate Level 1 subject
Pre-requisite(s): MATH 1034
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 1036 Mathematics for Engineers Preliminary (UG Cert) (10 Credit Points)
Subject Details (p. 4122) Legacy Code: 500065
This subject covers the fundamental mathematical concepts and techniques necessary for the study of Engineering. Topics include Arithmetic and Algebra, Trigonometry, Functions, and Introductory Differential and Integral calculus.
Level: Undergraduate Level 1 subject
Equivalent Subjects: MATH 1021 Mathematics for Engineers Preliminary MATH 1023 Mathematics for Engineers Preliminary (WSTC) MATH 1022 Mathematics for Engineers Preliminary (WSTC AssocD)
Incompatible Subjects: LGYA 4425 Mathematical Methods A MATH 1011 Fundamentals of Mathematics MATH 1016 Mathematics for Engineers 1 MATH 1018 Mathematics for Engineers 1 (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 1038 Mathematics for Computing (10 Credit Points)
Subject Details (p. 4122)
Mathematics forms the backbone of information and communication technology. Video games and multimedia programmers use linear algebra to control movement, actions and animations; analysts depend on number and graph theory to devise models of complex systems; data scientists and machine learning specialists use statistics to train their machine counterparts. The knowledge of mathematics is the difference between a good programmer and a great one. In this subject, we build a foundation of mathematical concepts that computing graduates require for their careers. During tutorials students will use an online interactive system allowing them to interactively explore mathematical concepts.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 1039 Engineering Mathematics and Statistics (WSTC) (10 Credit Points)
Subject Details (p. 4124)
This subject will introduce you to fundamental mathematical concepts crucial for comprehending, interpreting, and resolving contemporary engineering problems. By developing their numeracy skills, you will enhance your problem-solving abilities, critical thinking, and creativity, all of which are transferrable to your future careers and ongoing educational pursuits. Moreover, a grasp of these fundamental principles in mathematics and statistics will empower you to navigate our ever-evolving, complex world.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 1040 Engineering Mathematics and Computing (WSTC) (10 Credit Points)
Subject Details (p. 4124)
The subject aims to equip you with fundamental skills in calculus and computer programming as essential tools for problem-solving and data analysis in engineering. You will be introduced to basic calculus (differentiation and integration) and their common applications in engineering. The subject will also introduce you to computer programming and other technology tools for calculation and data analysis and visualisation. This subject will also include extensive practical work and problem-solving activities focusing on algorithmic approach to problem-solving. You will be able to apply the acquired skills and knowledge in various engineering subjects as well as in your future careers.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 1042 Mathematics for the Digital World (WSTC) (10 Credit Points)
Subject Details (p. 4125)
In the ever-evolving field of information and communications technology, a strong grasp of mathematics can set you apart. This subject is designed to equip aspiring ICT professionals with a solid mathematical foundation. You will explore algebraic and trigonometric problem-solving and explore number systems crucial to computing and programming applications. Through a combination of inductive and deductive reasoning, you will gain the skills to develop and apply problem-solving strategies across a range of contexts in the field.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 2001 Advanced Calculus (10 Credit Points)
Subject Details (p. 4125) Legacy Code: 200028
This subject is designed for students undertaking studies in mathematics, statistics, operations research and mathematical finance. It provides further mathematical training in the areas of multivariable and vector calculus, which is essential to the understanding of many areas of both pure and applied mathematics.
Level: Undergraduate Level 2 subject
Pre-requisite(s): MATH 1015
Equivalent Subjects: LGYA 3785 - Advanced Calculus LGYA 3865 - Mathematics 4 LGYB 9666 - Mathematics 21
Incompatible Subjects: MATH 1019 - Mathematics for Engineers 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 2003 Differential Equations (10 Credit Points)
Subject Details (p. 4126) Legacy Code: 200030
Differential equations arise naturally both in abstract mathematics and in the study of many phenomena. This subject provides the theory of ordinary differential equations and an introduction to partial differential equations together with methods of solution. Examples are drawn from a wide range of biological, chemical, physical and economic applications.
Level: Undergraduate Level 2 subject
Pre-requisite(s): MATH1015 - Mathematics 1B
Incompatible Subjects: MATH 1019 - Mathematics for Engineers 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 2004 Discrete Structures and Complexity (10 Credit Points)
Subject Details (p. 4127) Legacy Code: 300699
The fact that computers work at all in the way they do is due to the formal mathematical structure that is used in their design. The same holds for establishing important matters such as the reliability of our computer networks. This subject presents, in their computing context, a range of mathematical concepts that are essential for understanding a number of topics concerning computers: the ways they work, they ways they interact, and the ways we interact with them.
Level: Undergraduate Level 2 subject
Pre-requisite(s): MATH 1028
Incompatible Subjects: MATH 1006 - Discrete Mathematics
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 2006 Experimental Design and Analysis (10 Credit Points)
Subject Details (p. 4127) Legacy Code: 100013
This subject is driven by the scientific method with a focus on experimental design and related data analysis. Research design and methodology and ethical issues, statistical concepts and techniques, computer analysis of data, and communicating research findings are all features of this subject, which build on the content in its prerequisite.
Level: Undergraduate Level 2 subject
Pre-requisite(s): For students NOT enrolled in programs 1630 Graduate Diploma in Psychological Studies 1796 Graduate Diploma in Psychology and 1837 Bachelor of Cyber Security and Behaviour - BEHV 1016
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 2009 Introduction to Data Science (10 Credit Points)
Subject Details (p. 4128) Legacy Code: 301033
This subject is replaced by equivalent subject COMP 2025 Introduction to Data Science from 2022. Analysis of data is essential for scientific investigation, modelling processes and predicting future events. Data Science is the investigation of the tools required that allow us to perform this modelling and prediction. The increase in accessible data over the past few decades has promoted the use of Data Science, making it a desired skill in many professions. In this subject we further investigate the methods of regression, clustering and classification that form the basis of a data scientist's toolbox.
Level: Undergraduate Level 2 subject
Pre-requisite(s): For students NOT enrolled in 3769 Bachelor of Data Science or 3770 Bachelor of Applied Data Science - MATH 1028 Statistical Decision Making or MATH 1003 Biometry or MATH 1030 Statistics for Business
Co-requisite(s): For students enrolled in 3769 Bachelor of Data Science or 3770 Bachelor of Applied Data Science - MATH 1033 Thinking About Data
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 2010 Linear Algebra (10 Credit Points)
Subject Details (p. 4129) Legacy Code: 200027
The objective of this subject is to present the main fundamentals of linear algebra and includes such topics as solving systems of linear equations, matrix algebra, determinants, eigenvalues and eigenvectors, Euclidean vector spaces, general vector spaces, inner product spaces and linear transformations.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 2011 Making Sense of Data (10 Credit Points)
Subject Details (p. 4130) Legacy Code: 301032
The subject builds on the basic statistical concepts introduced in first year, and also prepares students for broader application of statistics for those majoring in science or business. Topics include hypothesis testing; analysis of categorical data; analysis of variance; non-parametric methods; re-sampling (cross validation/bootstrapping); Introduction to visual data analysis; simple Multivariate statistics and sampling and design.
Level: Undergraduate Level 2 subject
Pre-requisite(s): MATH 1028 OR
MATH 1003 OR
MATH 1030
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 2012 Mathematics for Engineers 3 (10 Credit Points)
Subject Details (p. 4131) Legacy Code: 200242
Students enrolled in Bachelor of Engineering who are yet to successfully complete 200242 Mathematics for Engineers 3, are to seek advice from Dr Jamal Rizk to enable them to complete the course. This subject is a core subject in the Computer, Electrical, or Telecommunications key programmes of the Bachelor of Engineering course. It builds on the first two mathematics subjects in that course and provides mathematical tools and techniques needed for the above key programmes. The subject covers topics from advanced calculus including vector calculus, complex analysis, Fourier series, heat and wave equations, Fourier integrals and transforms; discrete mathematics including logic and set theory; random variables and random processes including mean, correlation and covariance functions, ergodicity, ensemble averages, and Gaussian processes.
Level: Undergraduate Level 2 subject
Pre-requisite(s): MATH 1008 OR
MATH 1019
Equivalent Subjects: MATH 2005 - Engineering Mathematics 3
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 2013 Object Oriented Analysis (WSTC) (10 Credit Points)
Subject Details (p. 4132) Legacy Code: 700039
The core strength of this subject is to analyse and model business objectives and critical requirements of software systems to be developed using object-oriented (OO) approaches. The system analysis is taken to greater depths within the context of object orientation. The Unified Modelling Language version 2.0 (notably use cases, activity diagrams, class diagrams and sequence diagrams) is used as a modelling standard for creating OO models in the problem space. The subject also covers the rational unified process methodology and applications of design patterns for software development through practical case studies.
Level: Undergraduate Level 2 subject
Pre-requisite(s): Students enrolled in 7004 Diploma in Information and Communications Technology Fast Track 7005 Diploma in Information and Communications Technology 7067 Diploma in Information and Communications Technology Extended 7134 Diploma in Information and Communications Technology Extended – ICT 7138 Diploma in Information and Communications Technology Extended - ICT 7139 Diploma in Information and Communications Technology Extended 7140 Diploma in Information and Communications Technology Extended - Information Systems 7163 Diploma in Information and Communications Technology 6035 DiplomaBachelor of Information and Communications Technology 6036 Diploma in Information and Communications TechnologyBachelor of Information Systems 6039 DiplomaBachelor of Information and Communications Technology and 6040 Diploma in Information and Communications Technology Bachelor of Information Systems must pass INFS 1007 Systems Analysis and Design before enrolling in this unit
Equivalent Subjects: INFS 2006 Object Oriented Analysis INFS 2011 Object Oriented Analysis (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 3001 Abstract Algebra (10 Credit Points)
Subject Details (p. 4133) Legacy Code: 200193
This subject develops algebraic thought to a high level. The abstract concepts involved in the main topics (group theory and number theory) have many applications in science and technology, and the subject includes an application to cryptography.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MATH 1006
Equivalent Subjects: LGYA 3893 - Advanced Algebra LGYA 3789 - Algebra 3
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 3003 Analysis (10 Credit Points)
Subject Details (p. 4133) Legacy Code: 200023
Analysis provides the theoretical basis of real and complex numbers, including differentiation and integration. Topics include: field axioms and completeness, sequences, series, convergence, compactness, continuity, differentiability, integrability, and related theorems in both the real and complex number systems.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MATH 2001
Equivalent Subjects: LGYA 3794 - Advanced Mathematical Topics
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 3004 Discovery Project (10 Credit Points)
Subject Details (p. 4134) Legacy Code: 301111
In this subject students will gain experience in applying data science skills and using knowledge gained during their bachelor's course of their primary discipline. Students will carry out a real life project transforming data to knowledge under the supervision of an academic mentor. Students will develop a knowledge discovery project proposal and carry out a literature review highlighting the current status of the problem. Assisted by a mentor they will apply the data science skills learned through-out the degree and produce a final discovery project report and/or interactive project tool and give an oral presentation.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 3005 Environmental Informatics (10 Credit Points)
Subject Details (p. 4135) Legacy Code: 301035
Today, the environment is becoming more and more in the public eye. Methods of environmental monitoring and data analysis are an important source of information for science, business and government regulation. This subject aims to give students a good introduction to environmental informatics and the analysis of spatio-temporal data.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MATH 1028 OR
MATH 1003 OR
MATH 1030
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 3006 Mathematical Modelling (10 Credit Points)
Subject Details (p. 4135) Legacy Code: 200022
Mathematical Modelling is about solving real world problems. The real world is a complicated place which we often need or want to understand better. One way to do this is to set up a mathematical model which we hope can provide insights, predictions and a greater understanding of a complex system. Selected real-world problems are approximated by mathematical models that are amenable to being written in terms of linear and non-linear equations or differential equations. Once equations are solved emphasis is placed on interpreting solutions, modifying models as required and using models for prediction.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MATH 2003
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 3007 Predictive Modelling (10 Credit Points)
Subject Details (p. 4136) Legacy Code: 301034
In this information age, business and science depend on accurate predictions to make informed decisions. Machine learning is the process of allowing a computer to learn from data, which at its heart is used in making these important decisions. This unit provides students with the knowledge and practice required to implement and effectively use these predictive models such as Neural Networks and Support Vector Machines. Students will use the Python programming language throughout this unit.
Level: Undergraduate Level 3 subject
Pre-requisite(s): For students not enrolled in 3734 Bachelor of Data Science 3769 Bachelor of Data Science or 3770 Bachelor of Applied Data Science - MATH 1028 Statistical Decision Making or MATH 1003 Biometry or MATH 1030 Statistics for Business
Co-requisite(s): Students in Bachelor of Data Science or Bachelor of Applied Data Science must be enrolled in MATH 1033 Thinking About Data
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 3008 Quantitative Project (10 Credit Points)
Subject Details (p. 4137) Legacy Code: 200045
In this subject, students can deepen or apply knowledge gained during their course and practise verbal and written presentation skills. Students will carry out a project under the supervision of an academic staff member. Assisted by their supervisor, students will define the problem to be studied and then acquire, develop and apply the appropriate theory or methodology. They will prepare a final report presenting theoretical results or methodology, an analysis and a discussion followed by an appropriate conclusion, as well as a literature review or a list of references as appropriate. Students will also give a talk on their project.
Level: Undergraduate Level 3 subject
Pre-requisite(s): Students must have successfully completed 30 credit points of Level 2 mathematicsstatistics units from MATH 2010 Linear Algebra
MATH 2001 Advanced Calculus
MATH 2003 Differential Equations
COMP 2003 Computer Algebra
MATH 2011 Making Sense of Data
MATH 2009 Introduction to Data Science
Students must also have completed 30 credit points of Level 3 mathematicsstatistics units from MATH 3006 Mathematical Modelling
MATH 3003 Analysis
MATH 3001 Abstract Algebra
COMP 3020 Social Web Analytics
MATH 3007 Predictive Modelling MATH 3005 Environmental Informatics
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 3011 Probabilistic Models and Inference (10 Credit Points)
Subject Details (p. 4137) Legacy Code: 301250
The subject provides students with an understanding of probabilistic models and inference. It covers model-based approaches for complex systems - from constructing these models to applying information to models. The models, which can be created manually and obtained by learning from data, will also be useful to make decisions under uncertainty. A variety of models and techniques will be discussed; examples include Monte Carlo Methods, Decision Theory, Bayesian networks, Markov networks, and the use of information theory.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MATH 1033
OR
MATH 1028
AND
COMP 1013
OR
COMP 2023
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 3012 Combinatorics (10 Credit Points)
Subject Details (p. 4138) Legacy Code: 301378
This subject builds upon the knowledge acquired in the prerequisite subject Discrete Mathematics and helps students to develop understanding and mathematical maturity. The subject covers more sophisticated counting techniques, additional concepts in graph theory, and it introduces coding theory. Many applications of these concepts are included, and some combinatorial algorithms are studied. The applications and techniques presented in the subject are used to model systems such as transport networks and social networks, and they have relevance for communication, computing, probability, statistics, and science, and for many everyday problems such as scheduling.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MATH 1006 AND
MATH 1015
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 3013 Fields and Equations (10 Credit Points)
Subject Details (p. 4139) Legacy Code: 301377
This subject develops abstract algebraic thought to a higher level. The abstract concepts introduced in the subject, ring theory, field theory and algebraic equations, have many applications in science and technology. The theory of algebraic equations is the study of solutions of polynomial equations. Although the problem originates in explicit manipulations of polynomials, the modern (and far more powerful) treatment is in terms of field extensions. The subject is an introduction to ring theory and field theory; it includes applications to cryptography (RSA) and geometry (proving that it is impossible to trisect an arbitrary angle using only a straightedge and compass).
Level: Undergraduate Level 3 subject
Pre-requisite(s): MATH 3015
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 3014 Financial Mathematics (10 Credit Points)
Subject Details (p. 4139) Legacy Code: 301380
This subject is an introduction to stochastic calculus and relevant simulation techniques applied to modern finance and the mathematical modelling of financial markets. The core topics developed in the subject are the Ito stochastic integral, Ito's formula, and basic stochastic differential equations, as well as computer simulation techniques with emphasis on Monte Carlo simulations. Some mathematical background is assumed, but the subject will cover any necessary material that is not contained in prerequisites subjects.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MATH 1014 AND
MATH 1015 AND
MATH 2010 AND
MATH 2003
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 3015 Groups and Symmetry (10 Credit Points)
Subject Details (p. 4140) Legacy Code: 301376
This subject develops abstract algebraic thinking to a higher level. The abstract concepts introduced in the subject, the theory of groups and abstract symmetry, have many applications in science and technology. Symmetry plays a role in many different contexts: in crystals, in visual arts, in music and in architecture, to name a few. Analysing and exploiting the symmetries of a particular problem often is the first step towards finding a practical solution to the problem. Group theory is the study of symmetry. This subject develops the language of groups and techniques to understand the structure of groups.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MATH 1006
Equivalent Subjects: MATH 3001 Abstract Algebra
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 3016 Mathematics Project (10 Credit Points)
Subject Details (p. 4141) Legacy Code: 301379
In this subject, students can deepen or apply knowledge gained during their course and practise verbal and written presentation skills. Students will carry out a project under the supervision of an academic staff member. Assisted by their supervisor, students will define the problem to be studied and then acquire, develop and apply the appropriate theory or methodology. They will prepare and present on a final report detailing theoretical results or methodology, an analysis and a discussion followed by an appropriate conclusion, as well as a literature review or a list of references as appropriate.
Level: Undergraduate Level 3 subject
Pre-requisite(s): None
Equivalent Subjects: MATH 3008 Quantitative Project
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 3017 Data Analysis and Visualisation for Social Policy (10 Credit Points)
Subject Details (p. 4142)
This subject provides students with an applied interdisciplinary understanding of statistics and quantitative data science methods, commonly used within the social sciences and social policy environments. The subject will equip learners with quantitative tools and methods utilised with small and large datasets, and data visualisation techniques to answer questions of cultural, social, economic, and policy interest. The subject develops students' theoretical knowledge of statistical methods, practical knowledge of commonly used statistical software package, and applied knowledge through the analysis of real-world social problems. The knowledge and skills of this subject are of relevance to students seeking to work in social policy and/or social research within academia, government, industry and/or NGOs.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 4001 Mathematics Honours Thesis (40 Credit Points)
Subject Details (p. 4143) Legacy Code: 200413
This is a 40 credit point year-long subject taken over two terms (20 credit points in each term). The aim of this subject is to further develop the student's research and problem solving skills. The student is required to implement the research plan, complete a substantive piece of research in the field of Mathematics/Statistics, and to communicate the results of that work to an interested and technically literate audience. All projects will therefore contain at least two broad areas of assessment: the substantive work itself, and the oral and written communication of the work to others. All assessment components submitted in both of these areas are expected to be of a high professional standard. Students will present their research in the thesis. The thesis topic and structure will vary according to the area of interest of the student and the expertise of the supervisor. Throughout this subject regular planned consultations between the student and supervisor will occur. Students are expected to work to a schedule devised in consultation with their supervisor. The schedule will include set dates for the presentation of draft chapters for review by the supervisor.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 7001 Advanced Mathematical Investigations (20 Credit Points)
Subject Details (p. 4143) Legacy Code: 301176
Advanced Mathematical Investigations is an integral part of the Master of Research for students planning a future in mathematical and/or statistical research. Students will carry out extensive investigations under the supervision of an academic staff member that will allow the development of skills, knowledge and a way of thinking that will assist in the learning of mathematics and/or statistics needed for research in their chosen field of mathematics. They will also develop their written and oral communication skills, culminating in a paper which will be written as though it is to be submitted to a mathematics/statistics journal for publication (including following the journal's requirements for presentation) and an oral presentation of the style expected at a mathematics/statistics conference.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 7002 Advanced Statistical Methods (10 Credit Points)
Subject Details (p. 4144) Legacy Code: 301115
There has been a significant trend away from simple statistical models for complex and Big Data. Advanced Statistical Methods is a technical subject that looks at computer intensive statistical techniques for modelling complex data. Students will learn about methods including Density Estimation, the Expectation-Maximisation (EM) algorithm, Bayesian, Markovian and Hidden Markov Models, enabling them to apply sophisticated statistical tools in a Data Science setting.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): MATH 7012 AND
MATH 7016
Co-requisite(s): COMP 7006
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 7003 Applied Business Statistics (10 Credit Points)
Subject Details (p. 4145) Legacy Code: 300962
This subject introduces the basic statistical concepts and techniques for descriptive and inferential data analysis. It will aid and improve business decision-making, especially when faced with uncertain outcomes.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 7005 Approximation Theory (20 Credit Points)
Subject Details (p. 4145) Legacy Code: 301060
Approximation theory is concerned with approximating functions of a given class using functions from another, usually more elementary, class. The efficient solution of such problems is of great importance for computing, and this online unit will provide a general introduction to the mathematical theory behind many approximation methods in common use.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 7008 Mathematical Investigations (10 Credit Points)
Subject Details (p. 4146) Legacy Code: 301106
Mathematical Investigations will prepare Master of Research for students planning a future in mathematical/statistical research. Students will carry out investigations under the supervision of an academic staff member that will allow development of skills, knowledge and a way of thinking that will assist in the learning of mathematics/statistics that will prepare them for research in their chosen field of mathematics. They will also develop their written and oral communication skills, culminating in a poster presentation of significant findings as if being submitted at a mathematics/statistics conference, following that conference's directions for submission.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 7009 Mathematical Proof and Reasoning (10 Credit Points)
Subject Details (p. 4146) Legacy Code: 301177
Proving and getting a new proposition by careful reasoning from given propositions, is the essence of mathematics. Proof is what makes mathematics special and eternal. This subject looks at the different methods of proof and reasoning that can be employed to verify that statements are true or not. Students will consider propositions and theorems from various areas of mathematics and look at classic, interesting and sometimes novel ways these can be proved. Successful students taking this subject will not only be able to follow and determine if a proof is correct, but become proficient at mathematical reasoning.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 7011 Predictive Analytics (10 Credit Points)
Subject Details (p. 4147) Legacy Code: 301117
The information age has allowed business and science to take advantage of the vast amount of available data for predicting outcomes and estimating trends, to make informed decisions. Machine learning is the process of allowing a computer to learn from data, which at its heart is used in making these important decisions. This subject provides students with the knowledge and practice required to implement and effectively use these predictive models such as Neural Networks and Support Vector Machines, and provides opportunity for students to investigate state-of-the-art. Students will use the Python programming language throughout this subject.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): MATH 7016
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 7012 Programming for Data Science (10 Credit Points)
Subject Details (p. 4148) Legacy Code: 301113
The use of computers and computer programming for Data Science is fundamental to the discipline. This introductory subject will briefly cover the use of spreadsheet systems and then will consider programming in the statistical system "R" in detail. Other special purpose languages will also be touched on briefly including SQL (Structured Query Language).
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 7014 Social Media Intelligence (10 Credit Points)
Subject Details (p. 4148) Legacy Code: 301116
Social Media Intelligence presents the theory and practice of extracting and analysing information from social media networks. The aims are to identify properties of social networks, and to make predictions about future events. Topics included will cover areas such as Graph theory, Game theory and Network dynamics and we will identify how these can be used to model and extract information from Facebook and Twitter.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 7015 Statistics for Accountants (PG) (10 Credit Points)
Subject Details (p. 4149) Legacy Code: 200424
Statistics for Accountants introduces the basic concepts and techniques for statistical inference and decision making in a business context.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 7016 The Nature of Data (10 Credit Points)
Subject Details (p. 4149) Legacy Code: 301114
This subject covers concepts of data centric thinking. The main areas discussed are; Populations and Samples; Sampling concepts; Types of Data; Descriptive Methods; Estimation and Inference; and Modelling. The subject takes a computational and nonparametric approach, before discussing theoretical concepts and Normal distribution theory as large sample approximations.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 7017 Probabilistic Graphical Models (10 Credit Points)
Subject Details (p. 4150) Legacy Code: 301365
Modelling data provides us with a method for inference, but there are many occurrences when interest lies in the reasoning behind the decision making. In this subject, students learn to model processes and the reasoning behind the processes using probabilistic graphical models. The subject investigates the construction and application of model-based approaches for complex systems. Students will manually create models based on prior knowledge and investigate methods of learning model structures from data, which can be used to make decisions under uncertainty. Topics covered include Monte Carlo Methods, Decision Theory, Bayesian networks, Markov networks, and the use of information theory.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): MATH 7016
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 7018 Scientific Informatics (10 Credit Points)
Subject Details (p. 4151) Legacy Code: 301388
This subject discusses the most important scientific revolutions in informatics throughout history and the role of Scientific Informatics in modern scientific research. It examines the influence of computing and informatics on the major paradigm shifts in the social, behavioural, biological, health and physical sciences and assesses the societal impact of future discoveries. The subject aims to provide training for Research and Coursework Masters in the computational techniques that are integral to much of modern scientific research as well as cultural and philosophical perspectives on the Science, Technology, Engineering and Mathematics (STEM). Students complete practical assessment items that are relevant to their field of research, which are designed to develop transferrable skills and familiarity with computing tools.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: MATH 7013 - Scientific Informatics
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 7019 Mathematics of Signal Processing (10 Credit Points)
Subject Details (p. 4152) Legacy Code: 301440
This subject teaches students to abstract and develop algorithms, in Python, for analysing and processing deterministic and stochastic data/signals. Students are taught strategies in developing solutions that are optimal and efficient to implement. They learn how to analyse signals under the Fourier transform and under different bases, allowing for an appreciation of how lossy compression works, and how to formulate and solve some convex optimisation algorithms. This subject will be undertaken at Parramatta City - Hassall St campus.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 9001 Higher Degree Research Thesis - Centre for Research in Mathematics (80 Credit Points)
Subject Details (p. 4152) Legacy Code: 800165
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MATH 9002 Higher Degree Research Thesis - Quantitative Methods and Mathematical Sciences (80 Credit Points)
Subject Details (p. 4153) Legacy Code: 800047
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

Mechanical and Industrial Eng. (MECH)

MECH 2001 Kinematics and Kinetics of Machines (10 Credit Points)
Subject Details (p. 4154) Legacy Code: 300035
Kinematics is the study of the motion of objects, and Kinetics is the study of the causes of the motion. The focus for this subject is on rigid body kinematics which involves the study of a solid body with little or no deformation in planar motion, such as those in machines. The motion of key machine components and the forces they generate gives rise to design problems. Students gain an understanding of the relevance of kinematics and kinetics in the analysis and design of mechanical systems and of methods to ensure machines operate efficiently and safely.
Level: Undergraduate Level 2 subject
Pre-requisite(s): MATH 1016 AND
ENGR 1018
Equivalent Subjects: MECH 2002 Kinematics and Kinetics of Machines (WSTC AssocD)
Restrictions: Please see the Subject Details page for any restrictions for this subject

MECH 2002 Kinematics and Kinetics of Machines (WSTC AssocD) (10 Credit Points)
Subject Details (p. 4155) Legacy Code: 700244
Kinematics is the study of the motion of objects, and Kinetics is the study of the causes of the motion. The focus for this subject is on rigid body kinematics, which involves the study of a solid body with little or no deformation in planar motion, such as those in machines. The motion of key machine components and the forces they generate gives rise to design problems. Students gain an understanding of the relevance of kinematics and kinetics in the analysis and design of mechanical systems and of methods to ensure machines operate efficiently and safely.
Level: Undergraduate Level 2 subject
Pre-requisite(s): MATH 1017 AND
ENGR 1019
Equivalent Subjects: MECH 2001 - Kinematics and Kinetics of Machines
Restrictions: Please see the Subject Details page for any restrictions for this subject

MECH 2003 Mechanics of Materials (10 Credit Points)
Subject Details (p. 4156) Legacy Code: 300040
Mechanics of Materials is the study of the stresses and deformation of a body made of any elastic solid material, and how these are related to the body's shape and the load applied to it. This subject looks at how and why structural components including bars and beams deform and break. It concentrates on how these are affected by the geometry of the body and loading. Types of loadings considered include normal loads, torsional loads and bending loads. The main objective of the subject is to introduce students to the aspects of stress, strain and internal force development in the components and the methods to determine the deformation and deflections of the components. Energy methods and impact loadings are also considered.
Level: Undergraduate Level 2 subject
Pre-requisite(s): ENGR 1018
Equivalent Subjects: LGYA 5707 Mechanics and Materials MECH 2004 Mechanics of Materials (WSTC Assoc Deg)
Restrictions: Please see the Subject Details page for any restrictions for this subject

MECH 2004 Mechanics of Materials (WSTC AssocD) (10 Credit Points)
Subject Details (p. 4157) Legacy Code: 700116
Mechanics of Materials is the study of the stresses and deformation of a body made of any elastic solid material and how these are related to the body's shape and the load applied to it. This subject looks at how and why structural components including bars and beams deform and break. It concentrates on how these are affected by the geometry of the body and loading. Types of loadings considered include normal loads, torsional loads and bending loads. The main objective of the subject is to introduce students to the aspects of stress, strain and internal force development in the components and the methods to determine the deformation and deflections of the components. Energy methods and impact loadings are also considered.Offerings of alternate subjects are dependent on there being sufficient student enrolment numbers. If enrolments are low, the College may cancel delivery of the alternate subject.
Level: Undergraduate Level 2 subject
Pre-requisite(s): ENGR 1019
Equivalent Subjects: MECH 2003 - Mechanics of Materials
Restrictions: Please see the Subject Details page for any restrictions for this subject

MECH 2005 Mathematics for Mechanical and Mechatronic Engineers (10 Credit Points)
Subject Details (p. 4158) Legacy Code: 301342
This subject will be offered at Engineering Innovation Hub - Hassall St, Parramatta campus. This subject introduces mathematical tools and analytical reasoning useful for a wide range of professions, as well as highlighting mathematical foundations that have contributed to advances in engineering. The course content focuses more on useful concepts at the core of applied mathematics rather than theoretical mathematics. Students learn a range of concepts and methods from applied mathematics and how these apply to various fields of engineering.
Level: Undergraduate Level 2 subject
Pre-requisite(s): MATH 1035
Restrictions: Please see the Subject Details page for any restrictions for this subject

MECH 3001 Advanced Dynamics (10 Credit Points)
Subject Details (p. 4158) Legacy Code: 300763
This subject covers the analysis and control of dynamical behaviour of mechanical systems. It discusses the fundamental principles in controlling mechanical dynamic systems. In particular, the subject will cover contents in: multi-degree of freedom vibration analysis and modelling; open and closed loop systems; transfer function and state variable methods in mechanical system modelling; concepts of stability; design and analyse control systems using root-locus, bode diagram and state-space methods for mechanical systems.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MECH 3004 OR
MECH 2001
Incompatible Subjects: ENGR 3006 - Control Systems
Restrictions: Please see the Subject Details page for any restrictions for this subject

MECH 3002 Advanced Mechanics of Materials (10 Credit Points)
Subject Details (p. 4159) Legacy Code: 300761
This subject builds on the Mechanics of Materials to provide students with knowledge about impacts of deformation, stresses, strains and strength on materials and components essential in understanding how to improve mechanical design. Students' analytic and problem solving skills are developed through analysis of impacts including non-elastic deformation, orientation of the reference axes, and how materials fail. Using knowledge about materials, students evaluate impacts on materials, the mechanisms to control properties of materials, and use mathematical calculations and techniques to determine stresses and strains on simple components. Overall, students develop the capacity to select appropriate materials and improve mechanical design.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MECH 2003
Restrictions: Please see the Subject Details page for any restrictions for this subject

MECH 3004 Dynamics of Mechanical Systems (10 Credit Points)
Subject Details (p. 4160) Legacy Code: 300480
This subject looks at how non-rigid components deform and oscillate. It looks at undamped and damped systems undergoing free vibration, steady state forced vibration and transient forced vibration. The principles of virtual work are used to investigate the equilibrium and dynamics of mechanisms.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MECH 2001 AND
MECH 2003
Equivalent Subjects: LGYA 5694 - Dynamics and Mechanical Systems
Restrictions: Please see the Subject Details page for any restrictions for this subject

MECH 3005 Mechanical Design (10 Credit Points)
Subject Details (p. 4161) Legacy Code: 300764
This subject introduces students to the design of machine components providing a link between engineering science and practice. Students will examine the design of machine components to ensure their functionality, strength and durability in order to identify and provide innovative solutions to complex real-world problems. Knowledge gained in this subject will benefit students aspiring to careers in mechanical and mechatronic engineering.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MECH 2003 AND
MECH 2001
Equivalent Subjects: MECH 3003 - Design of Servo-Systems
Restrictions: Please see the Subject Details page for any restrictions for this subject

MECH 3006 Mechatronic Design (10 Credit Points)
Subject Details (p. 4162) Legacy Code: 300487
Through practical lab exercises and a design project, students will integrate basic skills of mechanics, mechanical systems, and automation in the practice of engineering design (Design for X and system engineering) as applied to mechatronic devices and systems. Students will perform detailed design analysis on important machine elements such as bearings, brakes, clutches, shaft, motor and to integrate those elements to form an automatic mechatronic system is the intended outcome of undertaking this unit. The project-based tasks incorporated into this program build team work experience as well as each student's individual capabilities.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MECH 2003
Equivalent Subjects: LGYA 5708 - Mechatronic Design 1 LGYA 5709 - Mechatronic Design 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

MECH 3007 Thermal and Fluid Engineering (10 Credit Points)
Subject Details (p. 4163) Legacy Code: 300759
The subject provides an understanding of thermo-fluid principles and their engineering applications related to career pathways in manufacturing, renewable energy, human health and the environment. In addition to examining theoretical principles, students' analytical skills are developed as they evaluate thermal and fluid systems and apply basic computational techniques to solve problems in practical laboratory sessions. Students will explore topics such as aerodynamics, hydrodynamics, turbomachinery, combustion, and ventilation to develop industry applicable, practical skills.
Level: Undergraduate Level 3 subject
Pre-requisite(s): CIVL 2003 AND
MECH 3008
Restrictions: Please see the Subject Details page for any restrictions for this subject

MECH 3008 Thermodynamics and Heat Transfer (10 Credit Points)
Subject Details (p. 4164) Legacy Code: 300760
This subject introduces students to the fundamentals of thermodynamics which involves energy in the form of heat and heat transfer. Students explore the basic laws and properties of thermodynamics to discover how energy is converted and transferred. Students will apply their knowledge to evaluate power and refrigeration cycles, industrial devices, as well as to design a simple industrial device.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MATH 1019 AND
ENGR 1011 OR
ENGR 1028
Restrictions: Please see the Subject Details page for any restrictions for this subject

MECH 3009 Thermodynamics and Heat Transfer (WSTC AssocD) (10 Credit Points)
Subject Details (p. 4165) Legacy Code: 700312
This subject introduces students to the fundamentals of thermodynamics which involves energy in the form of heat and heat transfer. Students explore the basic laws and properties of thermodynamics to discover how energy is converted and transferred. Students will apply their knowledge to evaluate power and refrigeration cycles, industrial devices, as well as to design a simple industrial device.Offerings of alternate subjects are dependent on there being sufficient student enrolment numbers. If enrolments are low, the College may cancel delivery of the alternate subject.
Level: Undergraduate Level 3 subject
Pre-requisite(s): ENGR 1012 AND
MATH 1017 AND
LGYB 0486
Equivalent Subjects: MECH 3008 - Thermodynamics and Heat Transfer
Restrictions: Please see the Subject Details page for any restrictions for this subject

MECH 4001 Computational Fluid Dynamics (10 Credit Points)
Subject Details (p. 4165) Legacy Code: 300999
This subject introduces students to the fundamentals of computational fluid dynamics. The subject covers the conventional methods for solving the ordinary and partial differential equations. The numerical method for solving the inviscid flow and the viscous flow problems will be introduced. The students learn the application of the commercial software in the engineering problems.
Level: Undergraduate Level 4 subject
Pre-requisite(s): ELEC 1006 AND
MECH 3007
Restrictions: Please see the Subject Details page for any restrictions for this subject

MECH 4002 Computer Aided Engineering (10 Credit Points)
Subject Details (p. 4166) Legacy Code: 301000
This subject describes the basics and fundamentals of computer aided engineering focusing on the advanced topics of finite element methods, which is a powerful numerical tool for analysing a wide range of engineering problems. Through applied projects students will apply the finite element method (FEM)-based computer aided engineering (CAE) and its applications in the fields of solid mechanics, fluid mechanics, thermodynamics and heat transfer and product design and development as well. The development of students' academic skills in research and communication are also achieved through the completion of FEM-based CAE projects.
Level: Undergraduate Level 4 subject
Pre-requisite(s): ENGR 3020
Restrictions: Please see the Subject Details page for any restrictions for this subject

MECH 4003 Mobile Robotics (10 Credit Points)
Subject Details (p. 4167) Legacy Code: 300043
To develop an understanding of the basic concepts involved in Mobile Robotics. The areas of mobile robot mechanics, localisation, map building and path planning of mobile robots will be introduced. Various sensors and their applications in mobile robotics are also to be introduced.
Level: Undergraduate Level 4 subject
Pre-requisite(s): ENGR 1018
Restrictions: Please see the Subject Details page for any restrictions for this subject

MECH 4004 Robotics (10 Credit Points)
Subject Details (p. 4168) Legacy Code: 300056
The aim of this subject is to develop an understanding of the basic concepts involved in Robotics. The kinematics, dynamics, control and sensing aspects in robotics will be introduced. In addition, the concepts of artificial intelligence (AI) and their applications in robotics will also be introduced. There will be considerable use of MATLAB in the subject.
Level: Undergraduate Level 4 subject
Pre-requisite(s): MECH 3004
Restrictions: Please see the Subject Details page for any restrictions for this subject

MECH 4005 Advanced Engineering Thesis 1: Preliminary Investigations (10 Credit Points)
Subject Details (p. 4169) Legacy Code: 300969
Advanced Engineering Thesis 1 - Preliminary Investigations subject consists of a research project designed and implemented under the direction of an academic supervisor and research mentor. This subject is the culmination of studies for students who have completed their first three years of an undergraduate degree and provides substantial training in Preliminary Investigations. Under staff supervision, students are allocated a particular topic for their research, design their own programme of research, and perform the research. The emphasis of this subject is on the application of research knowledge gained in other subjects to the practical conduct of the individual research project. This subject provides final year Advanced engineering students with the opportunity to undertake research on a specialist topic within their Key Program of undergraduate study.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MECH 4006 Advanced Engineering Thesis 2: Detailed Investigations (10 Credit Points)
Subject Details (p. 4169) Legacy Code: 300970
Advanced Engineering Thesis 2 - Detailed Investigations unit consists of a research project designed and implemented under the direction of an academic supervisor and research mentor. This unit is the culmination of studies for students who have completed their first three years of an undergraduate degree and provides substantial training in detailed Investigations. Under staff supervision, students are allocated a particular topic for their research, design their own programme of research, and perform the research. The emphasis of this unit is on the application of research knowledge gained in other units and in Engineering Thesis 1 - Preliminary Investigations to the practical conduct of the individual research project. This unit provides final year Advanced engineering students with the opportunity to undertake research on a specialist topic within their Key Program of undergraduate study.
Level: Undergraduate Level 4 subject
Pre-requisite(s): MECH 4005
Restrictions: Please see the Subject Details page for any restrictions for this subject

MECH 5001 Vertical Transportation Technology (10 Credit Points)
Subject Details (p. 4170)
As technology, architecture and building construction advance, vertical transportation systems must keep up to ensure best performance of systems in terms of safety, sustainability, passenger comfort and accessibility. This subject addresses the complexity of integrating systems to ensure best performance in specific contexts and for multiple stakeholders. Students work on projects and use computer-aided design (CAD) to develop design solutions that maximise performance while meeting requirements. In doing so, students further develop their technical and professional communication skills. Knowledge gained in this subject will benefit students aspiring to careers such as system, electrical and mechanical design of vertical transportation.
Level: Postgraduate Coursework Level 5 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MECH 5002 Fundamentals of Vertical Transportation Systems (10 Credit Points)
Subject Details (p. 4170)
Vertical transportation, which includes lifts and escalators, has undergone significant changes over the last 10 years. This subject provides an overview of these changes and introduces current requirements that are essential for the safety and flow of people in and around different building types and systems. Students learn various technical and engineering aspects of vertical transportation systems and evaluate designs in relation to compliance with regulations and standards. Knowledge gained in this subject will benefit students aspiring to careers such as vertical transportation planning, design and installation.
Level: Postgraduate Coursework Level 5 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MECH 5003 Vertical Transportation Operations and Management (10 Credit Points)
Subject Details (p. 4171)
The focus in this subject is on integrating the electrical and mechanical elements as part of selecting a suitable vertical transportation system in line with the standards and regulations. In making the selection, students create layouts, use simulation and methods of calculation. Students then determine an appropriate maintenance plan. Students are encouraged to assess their professional development needs given the integration of different engineering disciplines in the context of vertical transportation, as well as to evaluate their performance in group work. Knowledge gained in this subject will benefit students aspiring to careers such as vertical transportation operations, maintenance and service.
Level: Postgraduate Coursework Level 5 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MECH 7001 Advanced Computational Fluid Dynamics (10 Credit Points)
Subject Details (p. 4171) Legacy Code: 301023
This subject introduces students to commonly used numerical methods used in computational fluid dynamics (CFD). The subject covers the theory and the application of CFD for solving engineering problems. The numerical methods for solving the in viscid flow and the viscous flow problems will be introduced. The students learn the application of the engineering software in the engineering problems.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MECH 7002 Advanced Computer Aided Engineering (10 Credit Points)
Subject Details (p. 4172) Legacy Code: 301022
This subject focuses on advanced topics in computer aided engineering and their applications in mechanical engineering in analysing a wide range of engineering problems. The objective of this subject is to advance students' knowledge and skill level on the finite element method (FEM)-based computer aided engineering (CAE) and its advanced applications in the fields of solid mechanics, fluid mechanics, thermodynamics and heat transfer and product design and development as well. Academic skills on research and communication are ensured to be achieved through conducting FEM-based CAE projects.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MECH 7003 Advanced Dynamic Systems (10 Credit Points)
Subject Details (p. 4173) Legacy Code: 301019
This subject covers three-dimensional kinematics and kinetics of a rigid body. The principles of virtual work are used to investigate the equilibrium and dynamics of mechanisms. Some key aspects of mechanical vibrations are introduced, including vibration response, vibration isolation and vibration measurement.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MECH 7004 Advanced Mobile Robotics (10 Credit Points)
Subject Details (p. 4173) Legacy Code: 301020
This subject aims to develop an understanding of Mobile Robotics, encompassing fundamental concepts such as mobile robot mechanics, localisation, map building, and path planning. Additionally, the subject will introduce diverse sensors and their applications in the field of mobile robotics.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MECH 7005 Advanced Robotics (10 Credit Points)
Subject Details (p. 4174) Legacy Code: 300599
This subject is designed to introduce the engineering concepts involved in Robotics. The kinematics, dynamics, control and sensing aspects in robotics will be introduced. In addition, the concepts of artificial intelligence and their applications in robotics will also be discussed and assessed.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: LGYA 5817 - Advanced Robotics LGYA 5833 - Mobile Robotic Systems
Restrictions: Please see the Subject Details page for any restrictions for this subject

MECH 7006 Advanced Thermal and Fluid Engineering (10 Credit Points)
Subject Details (p. 4175) Legacy Code: 301021
This subject covers fundamental principles in the thermal and fluid engineering. While the main focus will remain on incompressible fluids, effects of compressible fluids will also be discussed. The contents of this subject include fluid mechanics, thermodynamics and heat transfer. Students will learn the engineering applications of thermal and fluid principles.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MECH 7007 Mechanical System Design (10 Credit Points)
Subject Details (p. 4175) Legacy Code: 301018
This subject advances students understanding on product design and development of machine components and assemblies using systems engineering approaches. The subject covers a review on the design of main components of machinery to ensure their functionality, strength and durability, which includes drive components - gears, shafts, belt drives, and bearings, and structural components - welds and treaded fasteners. The machine assembly design is delivered based on systems engineering. Academic skills on research and communication are ensured to be achieved through conducting systems engineering approached-based mechanical system design projects.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MECH 7008 Mechatronic System Design (10 Credit Points)
Subject Details (p. 4176) Legacy Code: 300600
This subject will advance the skills of mechanics, mechanical systems and automation in the practice of engineering design as applied to mechatronic devices and systems. The ability to perform detailed design analysis of machine elements as well as control systems as applicable to manufacturing and process machinery is the intended outcome of undertaking this subject and project-based tasks will form part of the learning process and team work experience.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: LGYA 6106 - Servo Systems Design (PG) LGYA 5832 - Mechatronic System Design
Restrictions: Please see the Subject Details page for any restrictions for this subject

MECH 9001 Higher Degree Research Thesis - Engineering (Industrial Design) (80 Credit Points)
Subject Details (p. 4177) Legacy Code: 800063
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MECH 9002 Higher Degree Research Thesis - Engineering (Mechanical) (80 Credit Points)
Subject Details (p. 4178) Legacy Code: 800185
Level: PhD and Research Masters Level 9 subject

MEDI 1002 Foundations of Medicine 1 (80 Credit Points)
Subject Details (p. 4181) Legacy Code: 400861
This is a 80 credit point year-long subject taken over two terms (40 credit points in each term). This subject integrates the foundational sciences with clinical skills. Students learn the structure and function of the human body, particularly, whole body organisation, basic anatomy, nutrition and metabolism, function and pathology of the gastrointestinal system (including liver), cardiovascular system and respiratory system. In addition, students will gain an understanding of health psychology, patient experience, the medical system, identifying risk, errors in medical practice, managing error and basic procedures such as hand washing. A particular focus will be the communities that make up Greater Western Sydney. Students will also participate in clinical tutorials and will gain skills in history taking and communication in Session 1H and skills in history and examination of the gastrointestinal tract, cardiovascular system and respiratory systems during Session 2H. The subject outline is available from the link on the left-hand menu.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 1004 Clinical Sciences 1 (80 Credit Points)
Subject Details (p. 4183) Legacy Code: 401276
This is a 80 credit point year-long subject taken over two terms (40 credit points in each term). Foundational learning for medicine is provided in this yearlong subject that integrates the biomedical sciences through the use of authentic clinical scenarios. Small group problem based learning and bedside teaching with patients, scaffolded by lectures, tutorials and practicals cover each of the body systems in turn, so that students are well prepared for clinical learning. Students will also learn about the human context of health and disease, medical professionalism, the quality and safety of healthcare, evidence based practice, research and clinical skills through community visits, hospital based sessions and workshops. The Professional Portfolio component within this subject will provide students in the Doctor of Medicine (MD) program with the means to monitor and support their acquisition of professional competencies in medicine. Supported by teaching sessions, learning resources and Professional Advisors, students will collate and review evidence of their learning, such as clinical assessments and case studies, preparatory work and outcomes from research and scholarly projects. By identifying and addressing their learning and professional development needs, students will create their own personalised learning journey as the basis for life-long learning in medicine. The Professional Portfolio will also prepare students for the portfolios used extensively in post graduate specialty training in medicine. The subject outline is available from the link on the left-hand menu.
Level: Undergraduate Level 1 subject
Incompatible Subjects: MEDI 1002 Foundations of Medicine 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 2002 Foundations of Medicine 2 (80 Credit Points)
Subject Details (p. 4185) Legacy Code: 400862
This is a 80 credit point year-long subject taken over two terms (40 credit points in each term). This subject integrates the biomedical sciences with clinical skills. Students continue to build their knowledge of the structure and function of the human body, particularly: renal, musculoskeletal, neuroscience, reproduction and development, endocrinology, infectious disease, immunology and cancer. In addition, students will gain an understanding of the human context of health and disease, global health, medical professionalism, the quality and safety of healthcare, evidence based practice and research skills. On clinical days, students will participate in bedside tutorials to further develop their skills in history and examination of body systems and will also learn how to carry out basic clinical procedures. The subject outline is available from the link on the left-hand menu.
Level: Undergraduate Level 2 subject
Pre-requisite(s): MEDI 1002
Incompatible Subjects: MEDI 2003 - Clinical Sciences 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 2003 Clinical Sciences 2 (80 Credit Points)
Subject Details (p. 4186) Legacy Code: 401277
This is a 80 credit point year-long subject taken over two terms (40 credit points in each term). Foundational learning for medicine is provided in this yearlong subject that integrates the biomedical sciences through the use of authentic clinical scenarios. Small group problem based learning, bedside teaching with patients and procedural skills teaching scaffolded by lectures, tutorials and practicals cover each of the body systems in turn, so that students are well prepared for clinical learning. Students will also learn about the human context of health and disease, medical professionalism, the quality and safety of healthcare, evidence based practice, research and clinical skills through community visits, hospital based-sessions and workshops. The Professional Portfolio component within this subject will provide students in the Doctor of Medicine (MD) program with the means to monitor and support their acquisition of professional competencies in medicine. Supported by teaching sessions, learning resources and Professional Advisors, students will collate and review evidence of their learning, such as clinical assessments and case studies, preparatory work and outcomes from research and scholarly projects. By identifying and addressing their learning and professional development needs, students will create their own personalised learning journey as the basis for life-long learning in medicine. The Professional Portfolio will also prepare students for the portfolios used extensively in post graduate specialty training in medicine.
Level: Undergraduate Level 2 subject

Incompatible Subjects: MEDI 2002 Foundations of Medicine 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 3002 Clinical Assessment Methods (10 Credit Points)
Subject Details (p. 4188) Legacy Code: 400879
This subject is designed to introduce students to basic principles and essential skills of physical examination and diagnostic/laboratory investigation procedures, required for successful approach to diagnosis of health impairment states. Primary contact health practitioners are expected to have sound understanding of disease presentation, techniques of patient interviewing and examination for collection of relevant clinical information as well as the ability to select appropriate laboratory tests and interpret their findings. This subject will also help students to develop fundamental clinical reasoning skills required in the medical decision making process.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BIOS 2029 AND
NATS 1009 AND
NATS 1010
Equivalent Subjects: LGYA 7174 - Clinical Diagnosis
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 3003 Integrated Clinical Rotations 1 (80 Credit Points)
Subject Details (p. 4189) Legacy Code: 400810
This is a 80 credit point year-long subject taken over two terms (40 credit points in each term). Integrated Clinical Rotations 1 is the first major clinical year of the MBBS program. It consists of 10 weeks each in Surgery, Medicine and Medicine in Context (MiC), and 5 weeks in Critical Care. Surgery, Medicine and Critical Care attachments will be at Campbelltown, Blacktown, Mt Druitt, Bankstown, Fairfield and Liverpool hospitals. In Surgery and Medicine students spend 5 weeks in each of two sub-specialities. In Critical Care students spend time in Emergency and Anaesthetics Departments. The 10-week MiC attachment is conducted in two 5-week blocks and involves community-based aspects of the health care system including community organisations and general practice. Students also have 3 Conference Weeks; tutorials in clinical communication skills; and undertake an assignment in Evidence-Based Medicine and 3 online Scientific Streams learning modules. The subject outline is available from the link on the left-hand menu.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MEDI 2002
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 3004 Medical Research Project (60 Credit Points)
Subject Details (p. 4193) Legacy Code: 400813
This is a 60 credit point year-long subject taken over two terms (30 credit points in each term). This subject is the principal component in the Bachelor of Medical Research. It aims to give students, enrolled in the Western Sydney University MBBS, the opportunity to develop their critical thinking and gain a more detailed experience in medical research than is provided in the medical program. It consists of a research project in any area of medical research for which the School can provide suitable supervision. Students will study the relevant literature, develop and conduct the program of research with the assistance of their supervisor, take part in research seminars in their research group, and present the results as a dissertation. The main learning outcomes are a subset of the 15 Learning Tasks/Outcomes for the medical program as a whole, but will be achieved at a considerably higher level than is expected in the main MBBS program. The task numbers relate to the complete set in the MBBS learning outcomes.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MEDI 1002 AND
MEDI 2002
Co-requisite(s): Must pass two of the following- HLTH 3006 Methods of Scientific Researching HLTH 2021 - Research Methods (Quantitative and Qualitative) HLTH 1001 -Foundations of Research and Evidence-Based Practice
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 3005 Professional Portfolio 2 (10 Credit Points)
Subject Details (p. 4194) Legacy Code: 401257
This is a 10 credit point year-long subject taken over two terms (5 credit point in each term). This subject is the second of five Professional Portfolio subjects which will provide students in the Doctor of Medicine (MD) course with the means to monitor and support their acquisition of professional competencies in medicine. Supported by workshops, resources and your Academic Supervisor, you will collate and review evidence of your learning, such as clinical assessments and case studies, preparatory work and outcomes from research and scholarly projects. By identifying and addressing your learning and professional development needs, you will create your own personalised learning journey as the basis for life-long learning in medicine. The Professional Portfolio will also prepare you for the portfolios used extensively in post graduate specialty training in medicine.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MEDI 1001 AND
MEDI 1003
Co-requisite(s): MEDI 2001
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 3006 Applied Clinical Sciences 1 (80 Credit Points)
Subject Details (p. 4195) Legacy Code: 401278
This is a 80 credit point year-long subject taken over two terms (40 credit points in each term). Applied Clinical Sciences 1 is the first major clinical year of the Doctor of Medicine. Students will apply and extend the knowledge and skills gained in previous subjects during clinical and community placement rotations. Attachment modules Surgery 1 and General Medicine 1 each cover two placement rotations. The Critical Care 1 placement includes experience in the Emergency, Intensive Care, and Anaesthetics departments. The Medicine in Context 1 placement focuses on community-based aspects of the health care system, including community services and general practice. The Doctor of Medicine MD Scholarly Project attachment rotation will be conducted in a site suited to the student's medical research, service, or education project. Placement sites include the Campbelltown, Blacktown/Mt Druitt, Bankstown, Fairfield and Liverpool hospitals, and a variety of community organisations throughout the Greater Western Sydney region. Theoretical Modules support student experiential learning and research skills development in the clinical and community placements. These are 'Evidence -based Medicine and Research Skills 1', 'Professional and Personal Development 1', 'Scientific Streams 1'. Students continue preparation of their Professional Practice Portfolio. Students undertake a minimum of 1050 clinical practice hours, a 175-hour project rotation, and 3 conference weeks in this unit. Travel and accommodation - Students are required to arrange and pay for their own travel, accommodation, and living expenses for the duration of the placement rotations.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MEDI 2003
Incompatible Subjects: MEDI 3003 - Integrated Clinical Rotations 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 3007 Professional Health Placement (10 Credit Points)
Subject Details (p. 4196) Legacy Code: 401406
This subject involves a 140hr work-integrated placement conducted at a health setting. Depending on availability, placements may be in-person, online, or hybrid. For in-person placements, a placement will be arranged for students to be within a reasonable distance from their place of residence.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 3008 Mortuary Practice (10 Credit Points)
Subject Details (p. 4198) Legacy Code: 301394
This subject introduces the student to processes and techniques used in a forensic mortuary context. Students will undertake activities that prepare them for clinical placement with an operational forensic mortuary setting, which includes a brief placement within a NSW Forensic and Analytical Science Service (FASS) facility or NSW Organ and Tissue Donation Service. Student must have demonstrated full compliance with NSW Health placement requirements in the first year of their candidature before enrolling in this subject and 301128 Advanced Mortuary Practice. This subject, together with completion of 301128 Advanced Mortuary Practice is essential for graduates of this course seeking employment as a forensic mortuary technician with FASS.
Level: Undergraduate Level 3 subject
Co-requisite(s): NATS 2004
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 3009 Foundational Diagnostic Imaging (10 Credit Points)
Subject Details (p. 4199) Legacy Code: 401468
This subject will introduce students to a range of diagnostic imaging modalities providing an overview of both the technical and practical aspects. Three imaging modalities will be covered, MRI, cardiac sonography and vascular sonography. Within the MRI module, you will learn how to view MRI images and compare them with CT/ultrasound as well as understand the clinical values of each modality and the risks associated. In the cardiac module you will learn the principles of cardiac ultrasound image acquisition, methods used to evaluate cardiac anatomy and function, and the essentials of complimentary tests such as electrocardiograms and stress tests. In the vascular module, undertaking non-imaging assessments will be covered, alongside imaging principles. The practical skills are aimed at providing students with a working knowledge of imaging modalities and enhancing students' prospects of successful application for a training position. The majority of this course is delivered online. However, students must attend a compulsory one-day face-to-face practical skills workshop at Blacktown clinical school.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 4001 Integrated Clinical Rotations 2 (80 Credit Points)
Subject Details (p. 4200) Legacy Code: 400811
This is a 80 credit point year-long subject taken over two terms (40 credit points in each term). Integrated Clinical Rotations 2 is the second major clinical year of the MB BS program. It consists of 9 weeks in each of Paediatrics, Obstetrics & Gynaecology and Mental Health and four weeks in each of Oncology/Palliative Care and Community Research. There will also be 2 weeks of "Year 4 Campus Learning". These will be one week each and held at either Campbelltown Campus or Blacktown Clinical School. During the year, students will be based at a number of appropriate hospitals throughout Sydney, Bathurst and Lismore. Students will also undertake 3 online learning modules (Scientific Streams). Students will complete a reflective portfolio. Slight variations in the delivery of ICR2 occur in the Rural clinical schools. Learning outcomes & assessment requirements do not differ.The subject outline is available from the link on the left-hand menu.
Level: Undergraduate Level 4 subject
Pre-requisite(s): MEDI 3003
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 4002 Integrated Clinical Rotations 3 (40 Credit Points)
Subject Details (p. 4202) Legacy Code: 400977
The Subject Outline for this subject can be found by clicking on the "Current MBBS, MD Subject Outlines" link in the left-hand menu. Integrated Clinical Rotation 3 is the first session of the third major clinical year of the MB BS program. It consists of five weeks in each Medicine, Surgery, General Practice or Indigenous Health or ICU, ED & Anaesthetics. There will also be two Conference weeks where all students will be based at either Campbelltown Campus, Macarthur Clinical School or Blacktown Clinical School. Students will be based at a number of appropriate hospitals throughout Sydney. Students will also undertake two online learning modules (Scientific Streams). Students will also undertake a reflective portfolio. The subject outline is available from the link on the left-hand menu.
Level: Undergraduate Level 4 subject
Pre-requisite(s): MEDI 4001
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 4003 Integrated Clinical Rotations 4 (40 Credit Points)
Subject Details (p. 4204) Legacy Code: 400978
Integrated Clinical Rotations 4 is the final subject in the MBBS course and consists of clinical rotations in Medicine, Surgery and two of General Practice, Indigenous Health and ICU/Emergency/Anaesthetics. Students also undertake two Scientific Streams and two Conference weeks.
Level: Undergraduate Level 4 subject
Pre-requisite(s): MEDI 4002 OR
LGYA 7789
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 4004 Integrated Clinical Rotations General (ICR General) (120 Credit Points)
Subject Details (p. 4206) Legacy Code: 401201
This is a 120 credit point year-long subject taken over two terms (60 credit points in each term). Integrated Clinical Rotations General is a specific subject for students who have deficiencies in performance at the end of Integrated Clinical Rotations 3 or who have not completed Integrated Clinical Rotations 2 and Integrated Clinical Rotations 3. The content will be tailored to each student to enable them to achieve competence in medicine. The subject will run from the middle of one year to the middle of the following year and the examination assessment will be held in conjunction with Integrated Clinical Rotations 3.
Level: Undergraduate Level 4 subject
Pre-requisite(s): MEDI 3003
Equivalent Subjects: LGYA 7789 - Integrated Clinical Rotations (General)
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 4005 Professional Portfolio 3 (10 Credit Points)
Subject Details (p. 4207) Legacy Code: 401259
This is a 10 credit point year-long subject taken over two terms (5 credit point in each term). This subject is the third of five Professional Portfolio subjects which will provide students in the Doctor of Medicine (MD) program with the means to monitor and support their acquisition of professional competencies in medicine. Supported by workshops, resources and your Academic and Project Supervisors, you will collate and review evidence of your learning, such as clinical assessments and case studies, preparatory work and outcomes from research and scholarly projects. By identifying and addressing your learning and professional development needs, you will create your own personalised learning journey as the basis for life-long learning in medicine. The Professional Portfolio will also prepare you for the portfolios used extensively in post graduate specialty training in medicine.
Level: Undergraduate Level 4 subject
Pre-requisite(s): MEDI 2001 AND
MEDI 3005
Co-requisite(s): MEDI 3001
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 4006 Honours Project (Medicine) (0 Credit Points)
Subject Details (p. 4208) Legacy Code: 401172
Students who meet prerequisite requirements are offered an opportunity in this Subject to undertake enhanced research and scholarship activities while enrolled in the Bachelor of Medicine / Bachelor of Surgery (MBBS) 4641.5. A key objective is to assist students towards the independent application of knowledge and skills in the principles and methods of medical research on a specialist topic of their choice. With supervision, students will further develop their ability to critically evaluate theories and evidence in disciplines relevant to medicine, and to disseminate their work to a range of audiences. Prior to enrolment in the subject, students must have satisfactorily completed a Research Portfolio and given a 10 minute oral PowerPoint presentation summarising the research program and outcomes. The presentation is to be at a venue approved by the research supervisor and the supervisor must consider the presentation to be of a satisfactory standard.
Level: Undergraduate Level 4 subject
Pre-requisite(s): MEDI 4002
Co-requisite(s): MEDI 4003
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 5001 Newborn and Infant Development (10 Credit Points)
Subject Details (p. 4209)
This subject introduces students to the foundational concepts and knowledge of newborn and infant development required to understand the specialised area of infant health practice. Students will examine the key issues, concepts and topics that are specific to newborn and infant development. This subject covers the techniques needed to carry out a comprehensive newborn examination, and to be able to assess common acute, chronic, and critical issues in infancy to ensure improved health outcomes. Students will be provided with a practical approach to the management of newborn medical presentations, feeding and sleeping issues, and updates to the Australian Immunisation schedule.
Level: Postgraduate Coursework Level 5 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 5002 Behaviour, development and disability (10 Credit Points)
Subject Details (p. 4210)
This subject provides guidance to students in conducting a thorough paediatric history and examination, including strategies to engage children and communicate effectively with parents. Students will develop skills to assess normal childhood developmental milestones and behaviours, and recognise key factors that indicate at-risk and vulnerable populations so they can benefit from timely interventions. This subject specifically addresses common conditions such as ADHD, autism and language delay. This subject outlines non-pharmacological and pharmacological approaches to management for common behavioural and developmental issues in children. Students will learn to implement management plans effectively and advocate for vulnerable populations, including children with disabilities.
Level: Postgraduate Coursework Level 5 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 5003 Adolescent, mental health and health inequity (10 Credit Points)
Subject Details (p. 4211)
This subject provides students with an informed, structured approach to common acute and chronic adolescent issues, including approaches to mental health (HEADSS), substance use, and sexual health assessments. This subject outlines evidence-based strategies in non-pharmacological and pharmacological management of common mental health conditions in adolescents and young adults. This subject includes insights from clinical experts on improving health outcomes for refugee populations and current global paediatric health initiatives aimed at improving child health outcomes. Experienced academics, clinical experts and adolescent health practitioners will provide students with resources to effectively communicate with adolescents and their families, understanding informed consent and confidentiality.
Level: Postgraduate Coursework Level 5 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 5004 Emergency and acute care (10 Credit Points)
Subject Details (p. 4212)
This subject is designed to provide students with a systematic approach to assess common emergency presentations in children, including unwell infants, febrile children, and children with breathing difficulties. Students are guided by clinical experts in the provision of emergency care and appropriate referral pathways to maximise patient outcomes, minimise complications and avoid unnecessary hospital presentations. Students will learn to communicate effectively with parents enabling them to detect and manage common clinical situations and prevent adverse outcomes. In this subject, students learn to identify children at risk and appropriately intervene and advocate to ensure safety and protection of these children.
Level: Postgraduate Coursework Level 5 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 6001 Cardiorespiratory, ENT and Allergy (10 Credit Points)
Subject Details (p. 4213)
This subject provides participants with a systematic approach to the assessment of children with common cardiorespiratory, ENT and allergy presentations, a structured approach to management, and practical advice on communicating care plans and health promotion strategies with parents and carers. This subject specifically addresses chest pain, asthma, bronchiolitis, tonsillitis and dermatitis. Students will learn to differentiate between common food allergies and intolerances and arrange appropriate investigations to assist with diagnosis minimising cost and distress to the family. Throughout this subject, students will consider the specific health needs of our First Nations people to maximise health outcomes and close the gap.
Level: Postgraduate Coursework Level 6 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 6002 Gastroenterology, Urology and other specialties (10 Credit Points)
Subject Details (p. 4214)
This subject examines gastroenterological, urological and haematological presentations commonly encountered in paediatric clinical practice. It provides students with a systematic approach to assessment and practical advice on communicating with parents and carers. This subject focuses on common conditions in primary care, including the approach to abdominal pain, nocturnal enuresis and urinary tract infections. Students learn the essential work-up and critical management for these conditions. This subject also addresses the assessment and management of anaemia, bleeding disorders and childhood malignancy. This subject includes health promotion strategies and parental education to ensure parents recognise when there is a need for emergency care.
Level: Postgraduate Coursework Level 6 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 6003 Infectious Disease and Autoimmune conditions (10 Credit Points)
Subject Details (p. 4215)
This subject covers a structured approach to the recognition and assessment of acute and critical childhood infections commonly encountered in primary care, from common paediatric skin infections and gastroenteritis to bone and joint infections and meningitis.
This subject also addresses antibiotic resistance and teaches best prescribing practices. Given the incidence and impact of paediatric skin infections globally, students will also develop a systematic approach to address health inequities experienced by children both nationally and internationally. This subject also addresses common childhood autoimmune conditions and juvenile arthritis, providing students with a systematic approach to assessment and management of these conditions.
Level: Postgraduate Coursework Level 6 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 6004 Neurology, Musculoskeletal and Surgical problems (10 Credit Points)
Subject Details (p. 4216)
This subject introduces the key features of a comprehensive neurological examination. Clinical experts will guide the student on the important clinical features to recognise, assess and manage acute, chronic, and critical neurological disorders. This subject specifically addresses the approach to the child with weakness, headaches in children and concussion. It also addresses common surgical presentations providing students with a pathway of escalation of care. Participants will be provided with resources and advice for communicating the management plans of neurological and common surgical conditions with children, parents and carers and provide long-term surveillance and family support.
Level: Postgraduate Coursework Level 6 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7002 Allergic Sciences 1 (20 Credit Points)
Subject Details (p. 4217) Legacy Code: 401249
This subject will consist of four online modules dealing with the immunological and clinical aspects of allergic diseases. These modules will cover basic immunology and fundamental theoretical and clinical concepts underlying Eczema and Contact Dermatitis, Urticaria and Angioedema, and Drug Hypersensitivity Reactions, Insect Allergy and Anaphylaxis. The purpose of Allergic Sciences 1 is to provide students with sound knowledge of essential immunological principles and common allergic conditions. Students will use self directed learning to link basic science with clinical understanding, and must attend a written exam at a university approved venue for one of the assessments.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 7790 Allergic Sciences 1 AND LGYA 7791 Allergic Sciences 2 MEDI 7001 Allergic Sciences
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7003 Allergic Sciences 2 (20 Credit Points)
Subject Details (p. 4218) Legacy Code: 401250
This subject will consist of four online modules dealing with the immunological and clinical aspects of allergic diseases. These modules will cover fundamental theoretical and clinical concepts underlying Food Allergy, Allergic Airways Diseases, and Rhinoconjunctivitis, Sinusitis and Immunotherapy. The purpose of Allergic Sciences 2 is to complement Allergic Sciences 1 and provide students with comprehensive knowledge for managing patients with allergic conditions in clinical practice. Students will use self directed learning to link basic science with clinical understanding, and must attend a written exam at a university approved venue for one of the assessments.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): MEDI 7002
Equivalent Subjects: LGYA 7790 - Allergic Sciences 1 and LGYA 7791 - Allergic Sciences 2 MEDI 7001 - Allergic Sciences
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7004 Applications of Magnetic Resonance from Cancer to Neuroanatomy (10 Credit Points)
Subject Details (p. 4219) Legacy Code: 401203
Magnetic resonance (MR) provides a suite of versatile information rich and non-invasive techniques of which magnetic resonance imaging (MRI), Magnetic Resonance Spectroscopy (MRS) and Nuclear Magnetic Resonance (NMR) spectroscopy are the best known. These techniques have enormous applications across the sciences (e.g., inorganic and organic chemistry) but increasingly to medicine (e.g., to cancer diagnosis and treatment). Western Sydney University has state-of-the-art MR infrastructure and an international reputation in MR development. This subject will explore the diverse applications and teach experimental practice and fundamental physical principles that underpin all the MR-based techniques. It is intended for medical science, medical and science students who use/intend to use NMR/MRI technology or merely want a deeper understanding of its rapidly expanding capabilities (e.g., functional MRI) and applications.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7008 Chronic Disease Management in Rural Practice (10 Credit Points)
Subject Details (p. 4220) Legacy Code: 401272
This subject will examine the pathophysiology, epidemiology, clinical presentation and treatment of chronic diseases in rural and remote settings in the Australian context. Students will develop systems to effectively manage chronic disease within their clinical environment and consider key aspects of the professional practice required of doctors caring for patients with chronic diseases. This subject will also introduce the concepts of collaboration with a multidisciplinary team.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7009 Clinical Allergy (20 Credit Points)
Subject Details (p. 4221) Legacy Code: 401064
This is a 20 credit point year-long subject taken over two terms (10 credit points in each term). This yearlong subject will consist of 50 hours of supervised consultation of patients with allergic diseases within the setting of a specialist Immunology/Allergy clinic. The purpose of Clinical Allergy is to apply previously acquired knowledge of allergic diseases to patient care in real time. Students will be supervised by experienced Clinical Immunologists/Allergists and develop skills in allergy diagnosis and management of children and adults. Clinical experiences will include history taking, physical examination, skin prick testing and spirometry interpretation, and management of various allergic conditions. Students will need to participate in online case conference discussions also, and attend two course workshops, the Australasian Society of Clinical Immunology and Allergy (ASCIA) Annual Scientific Meeting and the Macarthur Series in Immunology.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): MEDI 7002 AND
MEDI 7003
Equivalent Subjects: LGYA 7792 - Clinical Allergy 1 LGYA 7793 - Clinical Allergy 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7011 Clinical Minimally Invasive Gynaecological Surgery 2 (30 Credit Points)
Subject Details (p. 4222) Legacy Code: 401057
This is a 30 credit point year-long subject taken over two terms (15 credit points in each term).Students undertaking this subject will have a detailed knowledge of open abdominal surgery at commencement. This subject will extend their knowledge in the practical aspects of laparoscopic surgery. This subject will be completed in Year 2 of the program.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): MEDI 7010
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7012 Critical Care: Skills and Practice (10 Credit Points)
Subject Details (p. 4223) Legacy Code: 401271
This subject that will enhance the student's critical and practical clinical skills for rural generalist practice. The student will become familiar with common critical care presentations and develop a structured approach to the common practical skills of practice. They will also develop effective decision making skills that incorporate a team management approach. The development of these skills will be supported by a mandatory two day face to face practical simulation workshop.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7015 Diversity in Generalist Practice (10 Credit Points)
Subject Details (p. 4225) Legacy Code: 401273
This subject will explore the diversity of populations and examine the complexities of health and health care delivery in rural and remote settings in Australia. Students will develop a structured approach to managing the undifferentiated clinical presentations in a rural practice setting and will also analyse cultural, social, community, population and health factors influencing the practice of rural and remote medicine. Critical reasoning skills will be developed and students will be encouraged to self-reflect on their current clinical situation.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7016 Endometriosis (10 Credit Points)
Subject Details (p. 4225) Legacy Code: 401058
This is an alternate subject in Year 2 of the Master of Surgery (Advanced Gynaecological Surgery) course. Endometriosis commonly presents with pelvic pain and infertility, with gynaecological surgery being a significant treatment option. Surgery in women with endometriosis can be challenging, with gynaecological surgeons requiring advanced training and a multi-disciplinary approach to obtain the best patient outcomes. This subject will provide the students with the opportunity to explore management aspects of endometriosis tailoring treatment options depending on the patient's symptoms and goals. By enrolling in this subject, the student will be expected to produce a detailed discussion on various aspects of endometriosis, focusing on minimally invasive techniques. This includes exploring the pre-operative rationale to perform surgery, intra-operative nuances of surgical techniques used and post-operative care of importance to ensure the best outcomes for the patient.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7017 Gynaecological Surgery Ergonomics (10 Credit Points)
Subject Details (p. 4226) Legacy Code: 401059
This is an alternate subject in the Graduate Diploma in Advanced Gynaecological Surgery and Year 1 of the Master of Surgery (Advanced Gynaecological Surgery) course. This subject provides students with the knowledge on surgical ergonomics in both open and minimally invasive gynaecological surgery. This subject will extend their knowledge in theoretical and practical aspects, focusing on strategies to maximise ergonomics and its effects on situational awareness, communication and leadership during gynaecological surgery. Students will explore factors associated with gynaecological surgery ergonomics, such as surgeon and surgical assistant positions, theatre setup, incision sites, port placement and surgical techniques to maximise surgical ergonomics in order to reduce surgeon fatigue, injury and improve patient safety and outcomes. It is expected the student will be able to perform operations safely, with economy of movement to optimise surgeon comfort and ultimately improve patient outcomes.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7021 Mental Health Aspects of Allergic Diseases (10 Credit Points)
Subject Details (p. 4227) Legacy Code: 401252
Allergic diseases are chronic conditions which can influence psychosocial wellbeing. Early recognition of effects on mental health is essential to ensure optimal support and enhance quality of life. This subject provides students with knowledge and skills to address mental health concerns in patients with allergic diseases. Modules will cover the psychological effects of living with chronic disease, anxiety and depression, somatic symptom disorders and eating disorders. Students will use online lectures, case discussion and evidence-based materials to explore key elements and strategies for effective mental health assessment and management in clinical allergy practice.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): MEDI 7002 AND
MEDI 7003 OR
MEDI 7001
Co-requisite(s): MEDI 7009
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7022 Nutritional Aspects of Allergic Diseases (10 Credit Points)
Subject Details (p. 4228) Legacy Code: 401251
Dietary and nutritional aspects of allergic diseases often need consideration in patient management. This subject provides students with a detailed understanding of nutritional fundamentals and requirements especially for children and adults with food allergy. Online learning materials and case discussion facilitated by an experienced dietitian will promote essential knowledge and practical skills. Modules will provide the latest evidence on nutritional basics, weight management, diagnosis and management of food allergies and intolerances, food labelling, and early infant feeding recommendations. This content will complement the clinical experiences in the Master of Medicine (Allergic Diseases) and enhance clinical allergy practice.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): MEDI 7002 AND
MEDI 7003 OR
MEDI 7001
Co-requisite(s): MEDI 7009
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7023 Pelvic Anatomy (10 Credit Points)
Subject Details (p. 4229) Legacy Code: 401061
This is an alternate subject in the Graduate Diploma in Advanced Gynaecological Surgery and Year 1 of the Master of Surgery (Advanced Gynaecological Surgery) course. The student is expected to attain an advanced understanding and knowledge of the Anatomy of the Female Pelvis. The eventual aim is to become a competent surgeon in this field. Detailed Pelvic Anatomy is a vital component required to attain the skills necessary for the performance of Advanced Gynaecological Surgery. Knowledge of the normal versus the abnormal anatomy is required for the correct identification of pelvic structures. When abnormal features are present caused by pathological changes, the student is expected to know how to recognise the distortion caused, thus paving the way to try and normalise the anatomy as best as possible. The student should choose a topic relevant to the operations observed and learned. An analysis of the anatomy important to the topic should be presented in a detailed fashion. Evidence for any conclusions drawn or reflections made should be provided from a review of the literature. An important aspect of detailed knowledge of Pelvic Anatomy is crucial in the avoidance or detection and management of complications at surgery.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7025 Port Entry (10 Credit Points)
Subject Details (p. 4230) Legacy Code: 400995
This is an alternate subject in the Graduate Diploma in Advanced Gynaecological Surgery and Year 1 of the Master of Surgery (Advanced Gynaecological Surgery) course. Students undertaking this subject are expected to have a working knowledge on port entry techniques at commencement. This subject will extend their knowledge in theoretical and practical aspects, focusing on the port entry techniques and strategies of port placement and management of port site complications. Students will explore the multitude of port types which are commercially available in minimally invasive gynaecological surgery, the current technologies and tailoring their use in patients to provide optimal surgical outcomes. By enrolling in this subject, the student will be expected to produce a detailed discussion on various aspects of minimally invasive port entry, exploring the pre-operative and intra-operative nuances of surgical planning and techniques. This will extend the student's knowledge so they can safely and effectively establish port entry in minimally invasive gynaecological surgery.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7026 Power Modalities (10 Credit Points)
Subject Details (p. 4231) Legacy Code: 400996
This is an alternate subject in the Graduate Diploma in Advanced Gynaecological Surgery and Year 1 of the Master of Surgery (Advanced Gynaecological Surgery) course. A thorough understanding of the range of power modalities available when performing gynaecological surgery is a key fundamental concept to gynaecologists performing such surgery. Students undertaking this subject are expected to have a working knowledge on power modalities at commencement. This subject will extend their knowledge in theoretical and practical aspects. Students will explore the physics behind various power modalities, its physiological effect on human tissue and potential complications related to each power modality. Students will review and compare the current range of commercially available power modalities, assisting them to be competent with its use in a clinical setting and tailoring their use dependent on the type of surgery and pathology. By enrolling in this subject, the student will be expected to produce a detailed discussion on various aspects of power modalities, exploring the nuances of surgical planning and techniques. This will extend the student's knowledge so they can safely and effectively use various power modalities in gynaecological surgery.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7027 Professional Portfolio 4 (40 Credit Points)
Subject Details (p. 4232) Legacy Code: 401261
This is a 40 credit point year-long subject taken over two terms (20 credit points in each term). This subject is the penultimate subject of five Professional Portfolio subjects which will provide students in the Doctor of Medicine (MD) program with the means to monitor and support their acquisition of professional competencies in medicine. Supported by workshops, resources and your Academic Supervisor, you will collate and review evidence of your learning, such as clinical assessments and case studies, preparatory work and outcomes from research and scholarly projects. By identifying and addressing your learning and professional development needs, you will create your own personalised learning journey as the basis for life-long learning in medicine. The Professional Portfolio will also prepare you for the portfolios used extensively in post graduate specialty training in medicine.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): MEDI 3001 AND
MEDI 4005
Co-requisite(s): MEDI 7006
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7028 Professional Portfolio 5 (40 Credit Points)
Subject Details (p. 4232) Legacy Code: 401263
This is a 40 credit point year-long subject taken over two terms (20 credit points in each term). This subject is the final subject of five Professional Portfolio subjects which will provide students in the Doctor of Medicine (MD) program with the means to monitor and support their acquisition of professional competencies in medicine. Supported by workshops, resources and your Academic Supervisor, you will collate and review evidence of your learning, such as clinical assessments and case studies, preparatory work and outcomes from research and scholarly projects. By identifying and addressing your learning and professional development needs, you will create your own personalised learning journey as the basis for life-long learning in medicine. The Professional Portfolio will also prepare you for the portfolios used extensively in post graduate specialty training in medicine.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): MEDI 7006 AND
MEDI 7027
Co-requisite(s): MEDI 7007 AND
MEDI 7020
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7029 Reflective Clinical Allergy Practice (20 Credit Points)
Subject Details (p. 4233) Legacy Code: 401253
This is an online bridging subject for students with a Graduate Certificate in Allergic Diseases qualification or other recognised allergy training who wish to pursue further study in allergic diseases. Students with acceptable prior learning to enrol in this subject will enter Year 2 of the Master of Medicine (Allergic Diseases) with the option to exit at the Diploma level. The subject enables students to revise the latest theoretical and clinical concepts in allergic diseases and reflect on their own clinical allergy practice. Reflection will be promoted through case presentation and reports and literature review.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): MEDI 7001 OR
MEDI 7002 AND
MEDI 7003
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7030 Research Project in Rural Generalist Medicine (20 Credit Points)
Subject Details (p. 4234) Legacy Code: 401275
This subject is an essential part of the final year of the Masters of Medicine (Rural Generalism). It will build on the students' knowledge and skills gained in prior subjects and the aim of this subject is to design and conduct a research project from an area relevant to their practice of rural generalism. Successful completion of the subject results in the composition of a report, and in an oral presentation, which will include details of the aims, methods, results and conclusions of the project.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7031 Rural and Remote Medicine: The Generalist Approach (10 Credit Points)
Subject Details (p. 4235) Legacy Code: 401270
This subject introduces the student to the concepts of rural generalist practice and provides them with an understanding of the complexities and inequalities of providing health care in rural and remote Australian settings. Students will be expected to appraise the current literature around generalist practice and evaluate the models of care and health systems that support a generalist approach. The students will also determine the skills required to effectively deliver the required scope of practice
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7033 Surgical Pathology 2 (10 Credit Points)
Subject Details (p. 4236) Legacy Code: 401229
In 2022 this subject replaced by subject 401474 - Surgical Pathology of the Genito-urinary Tract, Salivary Gland and Endocrine System. This subject will re-inforce the diagnostic entities in genito-urinary tract, salivary gland and endocrine system pathology that were introduced in Surgical Pathology I. Two self-directed online learning modules with digitalized images and practical notes on the diagnostic approach to important pathological entities of the above sub-specialties will be provided. The basic concepts in surgical, cyto- and small biopsy pathology, including the appropriate ancillary techniques in the diagnosis, prognostication and treatment prediction will be assessed. This subject is designed to further develop the basic research and communication skills, and critical thinking acquired in Surgical Pathology I, and to reinforce the resources and technical requirements needed to reach the correct pathological diagnosis.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7034 Surgical Pathology 3 (10 Credit Points)
Subject Details (p. 4237) Legacy Code: 401230
In 2022 this subject replaced by subject 401475 - Surgical Pathology of Skin, Bone and Soft Tissue. This subject will re-inforce the diagnostic entity in skin and soft tissue pathology that were introduced in Surgical Pathology I. The first self-directed online learning module is composed of digitalized images and practical notes on the diagnostic approach to important pathological entities of these sub-specialties. The second online module will revise prior learning of the sub-specialities neuropathology, cardiorespiratory pathology, genito-urinary pathology, salivary gland and endocrine pathology. A literature review and discussion of contemporary and emerging developments in the relevant pathological entity will be conducted. This subject is designed to not only re-inforce/revise the above topics, but to harness effective communication and analytical research skills and to understand the importance of professional development.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7035 Surgical Pathology 4 (10 Credit Points)
Subject Details (p. 4237) Legacy Code: 401231
In 2022 this subject replaced by subject 401476 - General Surgical Pathology and Gastrointestinal Pathology. This subject introduces diagnostic entities in surgical pathology entities gastrointestinal and liver, breast, head and neck, paediatric, gynaecological and haemato-pathology. The subject provides training in basic research skills, communication skills, and critical thinking. The self-directed online learning module is composed of digitalized images, practical notes, recorded lectures and quizzes on the diagnostic approach to important pathological entities of the gastrointestinal tract and liver.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7036 Surgical Pathology 5 (10 Credit Points)
Subject Details (p. 4238) Legacy Code: 401233
In 2022 this subject replaced by subject 401478 - Surgical Pathology of the Head and Neck, Haematopatholgy and Paediatric Pathology. This subject will re-inforce the diagnostic entities in haematopathology, head and neck, and paediatric pathology that were introduced in Surgical Pathology IV. Two self-directed online learning modules with digitalized images and practical notes on the diagnostic approach to important pathological entities of the above sub-specialties will be provided. Upon completion of the subject students will have advanced knowledge in surgical, cyto- and small biopsy pathology, including appropriate ancillary techniques and recent research developments. This subject will promote behaviours that create a safe, caring, ethical and professional practice required by pathologists.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7037 Surgical Pathology 6 (10 Credit Points)
Subject Details (p. 4239) Legacy Code: 401234
In 2022 this subject replaced by subject 401479 - Surgical Pathology of the Female Genital Tract. This subject will revise the diagnostic entities in gynaecological pathology that were introduced in Surgical Pathology IV. The first self-directed online learning module is composed of digitalized images and practical notes on the diagnostic approach to important pathological entities of gynaecological pathology. A second online module will revise the sub-specialities covered in Surgical Pathology I through V. Students will be required to complete a literature review of contemporary and emerging developments in a relevant pathological entity. This subject is designed to revise all areas of surgical pathology within the Master of Pathology as well as promote engagement with professional development activities relevant to a career as a pathologist.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7038 Telehealth and Rural Communities (10 Credit Points)
Subject Details (p. 4239) Legacy Code: 401274
This subject will examine the main clinical, technical and contextual aspects of telehealth relevant to the practice in rural and remote communities. Students will appraise the literature and evidence-based resources regarding e-health to promote best practice in rural generalism and formulate an implementation plan for the introduction or expansion of telehealth services in their practice. They will also develop skills that will enable them to conduct a safe, effective and culturally appropriate telehealth consultation
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7039 Clinical Practice in Diabetes 1 (10 Credit Points)
Subject Details (p. 4240) Legacy Code: 401284
This subject introduces students to the aetiology, pathophysiology and clinical picture of the various types of diabetes and the short and long term physical impact on individuals. This is the basis for all clinical subjects in this course. Students will comprehensively examine the overall management of the different types of diabetes that are fundamental for advance and specialised diabetes clinical practice.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7040 Clinical Practice in Diabetes 2 (10 Credit Points)
Subject Details (p. 4241) Legacy Code: 401286
This subject will focus on the disease process leading to chronic complications of diabetes. Students will examine the screening process, interventions and the management of established microvascular and macrovascular disease associated with diabetes. Students investigate the elderly and vulnerable populations for the synthesis of individualisation of diabetes care and management. Health practitioner clinical skills directly impact on the short and long term health status of people with diabetes. In this online subject, there is a mandatory five day face-to-face clinical workshop component and a mandatory 40 hours of clinical practicum that will be undertaken by all students in this subject.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): MEDI 7039 AND
MEDI 7041
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7041 Diabetes Self-Management Support 1: Individuals (10 Credit Points)
Subject Details (p. 4242) Legacy Code: 401285
Supporting individuals to self-manage their diabetes is the central element of advanced diabetes practice. Underpinned by the empowerment approach, students undertaking this subject will learn the necessary knowledge and skills in educating people with diabetes how to best manage their condition and support behaviours and emotional wellbeing that achieves person centred goals. Drawing on educational, psychological, social and behavioural theories students will learn practical skills in communication, psychological assessment, goal setting and problem-solving that will promote self-care for people with prediabetes and diabetes. This subject is only offered in Spring Session.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7042 Diabetes Self-Management Support II: Systems and Organisations (10 Credit Points)
Subject Details (p. 4243) Legacy Code: 401287
The increasing number of people with diabetes in Australia and globally is a major public health issue. This subject will explore the increasing burden of diabetes, why some groups of people are more at risk of developing diabetes then others, how society and the way health services are organised and delivered influence the risk of developing diabetes, access to quality health care and individual health outcomes. This subject with examine social determinants related to diabetes, the impact of diabetes on Indigenous Australians, diabetes public policy, workforce capability and the integrated nature of service delivery in reducing prevalence and improving health outcomes for people with diabetes and prediabetes.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7043 Diabetes in Paediatrics, Transition and Pregnancy (10 Credit Points)
Subject Details (p. 4244) Legacy Code: 401290
The physical and psychosocial developmental stage and age of the person with diabetes directly impacts on diabetes self-management, diabetes care and quality of life. This specialised subject will explore diabetes in the context of physical, psychological and social development with a focus on children, young adults and pregnant women. Ongoing family, therapeutic and social relationships are central to optimising diabetes management. Family, friends, peers, healthcare providers/organisations role will be examined in the ongoing holistic care and self-management of diabetes and prevention of diabetes complications. Students will evaluate the physiological impact of diabetes, treatment and emerging technology in the management of diabetes such as insulin pump therapy and continuous blood glucose monitoring systems. Accessing and interpreting data for the overall management of diabetes will be undertaken in this subject.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): MEDI 7039 AND
MEDI 7041 AND
MEDI 7040 AND
MEDI 7042
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7044 Diabetes in Primary Care (10 Credit Points)
Subject Details (p. 4245) Legacy Code: 401288
Most of the health care provided to people with diabetes is provided by general practice clinicians and multidisciplinary health care professionals in primary care. This subject will explore the core issues that arise in primary care relating to foundational aspects of care. The subject will comprise of Learning Pods/modules that enable students to choose and learn about areas of practice that are most relevant to their health discipline, context of care and gap in knowledge. There will be a compulsory Learning Pod/modules on primary prevention, secondary and tertiary prevention in primary care and the role of inter-professional integrated practice. Students will also be able to choose from the following diabetes related Learning Pods such as medication therapy, exercise therapy, nutrition therapy and podiatry, insulin pumps and continuous glucose monitoring sensors, cardiovascular and renal health, aged care in diabetes in primary care.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7045 Diabetes in the Hospital (10 Credit Points)
Subject Details (p. 4246) Legacy Code: 401289
People with diabetes are more likely to be admitted to hospital, experience more complications, have longer length of stay and have higher mortality rates compare to people without diabetes. This subject will provide students with the skills and knowledge to optimise metabolic health in the complex care of i- patients with diabetes. The subject will examine the prevalence and economic costs of people with diabetes in hospitals and review current pathological hypotheses on why poor glycaemic control is associated with poorer inpatient health outcomes. Best practice management in inpatient diabetes care, treatment targets and medication intensification for patient in critical, noncritical, peri-operative, end of life will be analysed Clinical governance in providing safe quality diabetes care and organisation response will be included in this subject. An online inter-professional case based approached to learning will be the mode of delivery.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7046 Advanced Gynaecological Surgery 1 (20 Credit Points)
Subject Details (p. 4246) Legacy Code: 401317
This is a 20 credit point year-long subject taken over two terms (10 credit points in each term). This is a year long core subject in the Graduate Diploma in Advanced Gynaecological Surgery and Year 1 of the Master of Surgery (Advanced Gynaecological Surgery). This subject aims to allow students to discuss and reflect on a broad range of topics pertaining to Advanced Gynaecological Surgery with an emphasis on minimally invasive techniques. The pre-operative, intra-operative and post-operative management of patients and their conditions are considered with a review of the literature to substantiate and support any conclusions made which may help shape future clinical practice.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7047 Advanced Gynaecological Surgery 2 (20 Credit Points)
Subject Details (p. 4247) Legacy Code: 401318
This is a 20 credit point year-long subject taken over two terms (10 credit points in each term). This is a yearlong core subject in Year 2 of the Master of Surgery (Advanced Gynaecological Surgery) program. The student is expected to attain a comprehensive understanding and knowledge of the procedures performed in the management of Gynaecological Disorders where surgery is indicated. The ultimate aim is to become a competent surgeon in this field. This subject aims to build upon the knowledge gained from Advanced Gynaecological Surgery 1 to allow students to further discuss and reflect on a broad range of topics pertaining to Advanced Gynaecological Surgery with an emphasis on minimally invasive techniques. The theoretical aspects of teaching surgery is an important aspect in the development of competent surgeons. A review of teaching techniques, including simulation is an area to be evaluated, appraised and developed. The pre-operative, intra-operative and post-operative management of patients and their conditions are considered with a critical review of the literature to substantiate and support any conclusions made which may help shape future clinical practice.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): MEDI 7046
Co-requisite(s): MEDI 7050
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7048 Advanced Imaging Research Project (20 Credit Points)
Subject Details (p. 4249) Legacy Code: 401330
In 2021 this subject replaced by 401467 - Medical Research Project (PG). This subject is an essential part of the final year of the Masters of Advanced Imaging (MRI). It will consolidate and build on the students' knowledge and skills gained in prior subjects. Students will design and conduct a research project from an area of inqury relevant to Adavnced Imaging - MRI. Successful completion of the subject results in the composition of a report, and in an oral presentationwhich will include details of the aims, methods, results and conclusions of the project.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7049 Advanced MR Theory (10 Credit Points)
Subject Details (p. 4249) Legacy Code: 401324
This subject provides students with a detailed understanding of "MR Accessories, Image Quality and Contrast Media" employed in Magnetic Resonance Imaging (MRI) technology and the relationship between magnet and coil, the utilisation of the different channels for image formation and pixilation, as well as exploring the role contrast media plays in enhancing body organs. Students will have an in-depth understanding of interactive effects of scanning parameters on the image quality and how to prevent the formation of artefacts and reduce Specific Absorption Rate to improve image quality, reduce artefact and reduce heat generation, and to prevent harm of burns to the patient.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): MEDI 7057 MRI Physics
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7050 Advanced Practice in Gynaecological Surgery (10 Credit Points)
Subject Details (p. 4250) Legacy Code: 401314
This is a 10 credit point year-long core subject taken over two terms (5 credit point in each term) in Year 2 of the Master of Surgery (Advanced Gynaecological Surgery) program. Students undertaking this subject are expected to apply advanced knowledge and skills in clinical settings in a safe and effective manner. There is a strong emphasis in reflecting and reviewing surgical cases based on clinical experience the student has gained at surgery. A review of the relevant medical literature and what changes are envisaged when performing this procedure into the future. This subject provides students with the opportunity to produce a detailed discussion on various aspects relating to pre-operative, intra-operative and post-operative gynaecological surgery and provide an evidence based approach. Ultimately, the aim is to improve the student's surgical skills and patient outcomes.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): MEDI 7046
Co-requisite(s): MEDI 7047
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7051 Evidence Based Imaging and Clinical Pathways (10 Credit Points)
Subject Details (p. 4251) Legacy Code: 401321
Evidence based imaging is a foundation tool that ensures patients are referred to pertinent modalities for tests of high sensitivity and specificity while fostering a cognisance to the harm of investigations such as the low sensitivity of certain modalities to certain investigations, radiation effects and the societal costs of the health budget. This core subject will enable health professionals with an understanding of the best evidence based diagnostic algorithm "pathway" for the different clinical presentations. In conjunction with the radiobiology subject, this will also equip clinicians with the knowledge to better evaluate the risk versus benefit for any examination requested.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): MEDI 7059
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7052 MR Angiography and Cardiac (10 Credit Points)
Subject Details (p. 4252) Legacy Code: 401329
The MR Angiography (MRA) and MR Cardiac (MRC) Imaging unit is a core unit in the course of Advanced Imaging (MRI). The subject provides students with in-depth knowledge of cardiac anatomy, the vascular system, and the relevant protocols to create MRI sequences for the anatomical regions of MRC and MRA in different clinical examinations. It is expected that students will develop the ability to recognise normal anatomy, identify common pathologies and be able to provide diagnostic solutions and/or develop new MRI algorithms for clinical problems. They will have the ability to either produce, request or recommend the proper sequence and the best method of operating the MRI equipment for the anatomical region in question. The subject is offered to students who completed the Graduate Diploma in Advanced Imaging (MRI) 4768, with a varied pathway for the clinical component relevant to their undergraduate discipline. Students will have 2 weeks of clinical training in an MRI clinical site.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): MEDI 7055 MR Neurology - Head Neck and Spinal Imaging
MEDI 7054 MR Musculoskeletal Imaging
MEDI 7053 MR Body and Pelvis Imaging
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7053 MR Body and Pelvis Imaging (10 Credit Points)
Subject Details (p. 4253) Legacy Code: 401327
MR Body and Pelvis Imaging is a core subject in the course of Advanced Imaging (MRI). The subject provides students with in-depth knowledge of Body and Pelvis anatomy and the relevant protocols to create Magnetic Resonance Imaging (MRI) sequences for the anatomical regions in the Thoracic, Abdominal and Pelvic Region for different clinical examinations. It is expected that students will develop the ability to recognise normal anatomy, identify common pathologies and be able to provide diagnostic solutions and/or develop new MRI algorithms for clinical problems. They will have the ability to either produce, request or recommend the proper sequence and the best method of operating the MRI equipment for the anatomical region in question. The subject is offered to all eligible students with a varied pathway for the two weeks clinical component relevant to their undergraduate discipline. Students will have 2 weeks of clinical training in an MRI clinical site.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): MEDI 7051 AND
MEDI 7049
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7054 MR Musculoskeletal Imaging (MSK) (10 Credit Points)
Subject Details (p. 4254) Legacy Code: 401326
MR Musculoskeletal ﷺ Imaging is a core subject in the course of Advanced Imaging (MRI). The subject provides students with in-depth knowledge of MSK anatomy and the relevant protocols to create Magnetic Resonance Imaging (MRI) sequences for MSK anatomical regions such as the knee, ankle and hip as well as the spine for different clinical examinations. It is expected that students will develop the ability to recognise normal anatomy, identify common pathologies and be able to provide diagnostic solutions and/or develop new MRI algorithms for clinical problems. They will have the ability to either produce, request or recommend the proper sequence and the best method of operating MRI equipment for the anatomical region in question. The subject is offered to all eligible students with a varied pathway for the two weeks clinical component relevant to their undergraduate discipline. Students will have 2 weeks of clinical training in an MRI clinical site.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): MEDI 7051 AND
MEDI 7049
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7055 MR Neurology - Head, Neck and Spinal Imaging (10 Credit Points)
Subject Details (p. 4256) Legacy Code: 401325
MR Neurology ﷺHead, Neck and Spinalﷺ Imaging is a core unit in the course of Advanced Imaging (MRI). The unit provides students with in-depth knowledge of neuro-anatomy and the relevant protocols to create Magnetic Resonance Imaging (MRI) sequences for the anatomical regions in the Head, Neck and Spinal Region for different clinical examinations. It is expected that students will develop the ability to recognise normal anatomy, identify common pathologies to provide diagnostic solutions and/or develop new MRI algorithms for clinical problems. They will have the ability to either produce, request or recommend the proper sequence and the best method of operating MRI equipment for the anatomical region in question. The subject is offered to all eligible students with a varied pathway for the two weeks clinical component relevant to their undergraduate discipline. Students will have 2 weeks of clinical training in an MRI clinical site.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): MEDI 7051 Evidence Based Imaging and Clinical Pathways
MEDI 7057 MRI Physics
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7056 MR Screening (10 Credit Points)
Subject Details (p. 4257) Legacy Code: 401328
MR Screening is a core subject in the course of Advanced Imaging. Magnetic Resonance (MR) Screening tests are essential to categorise patients' conditions for faster and reliable patient management. In a real clinical environment, less than 10 per cent of MR Screening patients will need to go for a full Magnetic Resonance Imaging (MRI) examination. This subject will provide students with a detailed understanding of the rationale and principles of setting up MR Screening protocols. It will demonstrate the determinant criteria for the setup of the screening protocols in collaboration with the referring clinical team. Students will learn to create research programs to validate the effectiveness of the screening protocols. It is expected that students will develop the ability to recognise normal anatomy, identify common pathologies and be able to provide diagnostic solutions and/or develop new MRI algorithms for clinical problems. They will have the ability to either produce, request or recommend the proper sequence and the best method of operating the MRI equipment for the anatomical region in question. Students will have 2 weeks of clinical training in an MRI clinical site under the supervision of a WSU MRI clinician.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): MEDI 7055 MR Neurology - Head Neck and Spinal Imaging
MEDI 7054 MR Musculoskeletal Imaging
MEDI 7053 MR Body and Pelvis Imaging
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7057 MRI Physics (10 Credit Points)
Subject Details (p. 4259) Legacy Code: 401323
This subject provides the students with a detailed understanding of the design of the different Magnetic Resonance Imaging (MRI) Scanners. Differences in Electromagnets and Superconducting magnets; production of the magnetic field; radiofrequency (RF) energy; the physics behind pulse sequence absorption of RF Energy and MR Property of Protons are explored. This subject briefly explains their application and how they interrelate with essential accessories such as coils to form an image. The subject also explores the various forms of image contrast that can be obtained using MRI, along with various basic and intermediate MRI pulse sequences and image reconstruction techniques. Students will learn the factors that may cause artefact formation, image quality concerns, and an understanding of the noise producing factors. It also focuses on the safety requirements, and the serious consequences if proper safety procedures are not implemented and followed.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7058 Multi-sectional and 3D Human Anatomy (10 Credit Points)
Subject Details (p. 4259) Legacy Code: 401320
This subject includes detailed 3D high resolution multi-sectional anatomy of the human body. Learning human anatomy in a 3D high resolution platform will enable students to conceptualise biological organs in 3D. Students will develop the ability to differentiate between normal and abnormal anatomy as well as understanding the demographics of pathological lesions in their daily clinical works. Delivered online, students will have opportunities to interact with medical imaging specialists as well as other subspecialists, such as surgeons, neurologists, and Emergency Specialists.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7059 Radiobiology (10 Credit Points)
Subject Details (p. 4260) Legacy Code: 401322
This subject provides a specialised study of the Characteristics and Properties of Radiation Chemistry, Structure of Matter, Chemical Behaviour, Ionisation and Excitation, as well as in-depth study of the effects of exposure to ionising radiation on biological systems from the cellular level to systemic effects. The topics of the subject will be focused on the biological response to irradiation which will be considered from the perspective of susceptibility versus resistance for the purposes of radiation protection in medical, occupational and environmental exposures to radioactivity. There will be specialist lectures by radiobiology and/or radiotherapy experts during the subject.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): MEDI 7058
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7060 Adnexal Surgery (10 Credit Points)
Subject Details (p. 4261) Legacy Code: 401319
This is an alternate subject in Year 2 of the Master of Surgery (Advanced Gynaecological Surgery) course. The performance of Adnexal Surgery and the ability to avoid complications is paramount in order to produce a safe environment for the patient. The ability to diagnose and successfully manage complications, should they occur, is a necessary part of every surgeon's makeup. The preoperative assessment of adnexal masses is to be considered, with data provided to help avoid the inadvertent operation on malignant lesions by the generalist. This subject will allow the student to explore various aspects of adnexal surgery and review evidence in the literature to support any conclusions made by the student.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): MEDI 7046
Equivalent Subjects: MEDI 7018 Laparoscopic Adnexal Surgery
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7061 Hysterectomy (10 Credit Points)
Subject Details (p. 4262) Legacy Code: 401315
This is an alternate subject in Year 2 of the Master of Surgery (Advanced Gynaecological Surgery) course. Students undertaking this subject will be expected to explore aspects of hysterectomy through various approaches in different clinical and pathological settings. This subject will enhance their ability to develop a foundation for improving their skills and achieving competency at hysterectomy, particularly utilising minimally invasive techniques. This subject will allow students to explore the rationale behind decisions to perform a hysterectomy, the nuances of surgical techniques used in a safe manner. It will allow an appreciation of the pre-operative and post-operative issues to ensure optimal patient outcomes.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): MEDI 7046
Equivalent Subjects: MEDI 7019 Laparoscopic Hysterectomy
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7062 Pelvic Floor Surgery (10 Credit Points)
Subject Details (p. 4262) Legacy Code: 401316
This is an alternate subject in Year 2 of the Master of Surgery (Advanced Gynaecological Surgery) course. This subject provides the student with in depth knowledge of procedures to treat pelvic floor disorders. The performance of Pelvic Floor Surgery and the ability to avoid complications is paramount in order to produce a safe environment for the patient. This subject will allow the student to explore and critically appraise various aspects of Pelvic Floor Surgery and utilise the evidence in the literature to support any conclusions made.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): MEDI 7046
Equivalent Subjects: MEDI 7024 Pelvic Floor Function and Dysfunction
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7063 Applied Clinical Sciences 2 (80 Credit Points)
Subject Details (p. 4263) Legacy Code: 401279
This is a 80 credit point year-long subject taken over two terms (40 credit points in each term). Applied Clinical Sciences 2 covers the second clinical year of the Doctor of Medicine. Students apply and extend on clinical knowledge and skills learned in previous subjects. Students engage in clinical and community placements to develop professional competencies. Placements may be held in hospitals and community-based service organisations in the Greater Western Sydney area, or as rural placements in Bathurst or Lismore. Students enrolled in this subject must complete each of the subject's theoretical modules and each compulsory attachment module which corresponds with the student's allocated placement site rotations. Students will also continue to work through the MD Scholarly Project. Note: The professional practice students undertake in this subject is a minimum of 1225 hours (subject to location- based placement availability) Travel and accommodation - Students are required to arrange and pay for their own travel, accommodation and living expenses for the duration of the placement.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): MEDI 3006
Incompatible Subjects: MEDI 4001 - Integrated Clinical Sciences 2
MEDI 7006 - Applied Clinical Sciences 2
MEDI 7027 - Professional Portfolio 4
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7064 Applied Clinical Sciences 3 (40 Credit Points)
Subject Details (p. 4265) Legacy Code: 401280
During Applied Clinical Sciences 3 students will complete clinical attachments from the pool of clinical rotations (General Medicine 2 or 3, Surgery 2 or 3, General Practice, Aboriginal Health, Critical Care, Paediatrics, Obstetrics and Gynaecology, Mental Health and Oncology) which they did not undertake during enrolment in subject 401279 'Applied Clinical Science 2'. Placements may be held across a range of hospitals and community- based services and organisations in Greater Western Sydney, Bathurst or Lismore. The learning and assessment requirements of each rotation are consistent across training sites. This learning is underpinned by the theoretical modules Professional and Personal Development 3', 'Professional Portfolio 3' and 'Scientific Streams 3'. Students will also prepare for barrier exams and continue their MD Scholarly Project. Experiential learning is supported by campus, clinical school and online activities designed to prepare students for clinical practice as a graduate doctor. Note: The professional practice students undertake in this subject is a minimum of 525 hours (subject to location-based placement availability) Note: Travel and accommodation - Students are required to arrange and pay for their own travel, accommodation and living expenses whilst on clinical placement.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): MEDI 7063
Incompatible Subjects: MEDI 4002 - Integrated Clinical Rotations 3
MEDI 4001 - Integrated Clinical Rotations 2
MEDI 4004 - Integrated Clinical Rotations General
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7065 Medicine in Practice (40 Credit Points)
Subject Details (p. 4267) Legacy Code: 401281
This capstone experience subject will engage students in professional practice placement rotations drawn from the integrated fields of General Medicine, Surgery, Critical Care, Aboriginal and Torres Strait Islander People's Health and General Practice. Depending on rotations already taken, and the meeting of minimum clinical training hours requirements of the course, students may have the opportunity for an elective rotation. Students will complete their study in scientific streams, professional and personal development and finalise their Professional Practice Portfolio and MD Scholarly Project. The professional practice students undertaken in Medicine in Practice is approximately 700 hours. (subject to location based placement availability). Travel and accommodation - Students are required to arrange and pay for their own travel, accommodation and living expenses whilst on clinical placement.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): MEDI 7064
Incompatible Subjects: MEDI 4002 - Integrated Clinical Rotations 3
MEDI 4003 - Integrated Clinical Rotations 4
MEDI 4004 - Integrated Clinical Rotations General
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7066 Medical Research Project (PG) (20 Credit Points)
Subject Details (p. 4268) Legacy Code: 401467
This capstone subject requires students to design and conduct a research-based project in an area of interest or discipline specialty in consultation with the Subject Coordinator and relevant Program Coordinator.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: RADI 7010 - Research Project in Cardiac Sonography MEDI 7048 - Advanced Imaging Research Project
NURS 7042 - Research Project in Health Care
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7067 Cytopathology, Small Biopsy and Breast Pathology (10 Credit Points)
Subject Details (p. 4269) Legacy Code: 401477
This subject introduces diagnostic entities in surgical pathology entities gastrointestinal and liver, breast, head and neck, paediatric, gynaecological and haemato-pathology. The unit provides training in basic research skills, communication skills, and critical thinking. The self-directed online learning module is composed of digitalized images, practical notes, recorded lectures and quizzes on the diagnostic approach to important pathological entities of the breast pathology.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: MEDI 7014 - Cytopathology and Small Biopsy Pathology 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7068 Cytopathology, Small Biopsy and Cardiorespiratory Pathology (10 Credit Points)
Subject Details (p. 4270) Legacy Code: 401473
This subject uses a blended learning approach to introduce diagnostic entities in surgical pathology entities of neuropathology, cardiorespiratory pathology, genito-urinary pathology, salivary gland and endocrine pathology, skin and soft tissue pathology. The subject provides training in basic research skills, communication skills, and critical thinking. The self-directed online learning module is composed of digitalized images, practical notes, recorded lectures and quizzes on the diagnostic approach to important pathological entities of the respiratory and cardiovascular systems.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: MEDI 7013 - Cytopathology and Small Biopsy Pathology 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7069 General Surgical Pathology and Gastrointestinal Pathology (10 Credit Points)
Subject Details (p. 4270) Legacy Code: 401476
This subject introduces diagnostic entities in surgical pathology entities gastrointestinal and liver, breast, head and neck, paediatric, gynaecological and haemato-pathology. The subject provides training in basic research skills, communication skills, and critical thinking. The self-directed online learning module is composed of digitalized images, practical notes, recorded lectures and quizzes on the diagnostic approach to important pathological entities of the gastrointestinal tract and liver.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: MEDI 7035 - Surgical Pathology 4
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7070 General Surgical and Central Nervous System Pathology (10 Credit Points)
Subject Details (p. 4271) Legacy Code: 401472
This subject uses a blended learning approach to introduce diagnostic entities in surgical pathology entities of neuropathology, cardiorespiratory pathology, genito-urinary pathology, salivary gland and endocrine pathology, skin and soft tissue pathology. The subject provides training in basic research skills, communication skills, and critical thinking. The self-directed online learning module is composed of digitalized images, practical notes, recorded lectures and quizzes on the diagnostic approach to important pathological entities of the central nervous system and spinal cord.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: MEDI 7032 - Surgical Pathology 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7071 Surgical Pathology of Skin, Bone and Soft Tissue (10 Credit Points)
Subject Details (p. 4272) Legacy Code: 401475
This subject will re-inforce the diagnostic entity in skin and soft tissue pathology that were introduced in Surgical Pathology I. The first self-directed online learning module is composed of digitalized images and practical notes on the diagnostic approach to important pathological entities of these sub-specialties. The second online module will revise prior learning of the sub-specialities neuropathology, cardiorespiratory pathology, genito-urinary pathology, salivary gland and endocrine pathology. A literature review and discussion of contemporary and emerging developments in the relevant pathological entity will be conducted. This subject is designed to not only re-inforce/revise the above topics, but to harness effective communication and analytical research skills and to understand the importance of professional development.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: MEDI 7034 - Surgical Pathology 3
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7072 Surgical Pathology of the Female Genital Tract (10 Credit Points)
Subject Details (p. 4273) Legacy Code: 401479
This subject will revise the diagnostic entities in gynaecological pathology that were introduced in Surgical Pathology IV. The first self-directed online learning module is composed of digitalized images and practical notes on the diagnostic approach to important pathological entities of gynaecological pathology. A second online module will revise the sub-specialities covered in Surgical Pathology I through V. Students will be required to complete a literature review of contemporary and emerging developments in a relevant pathological entity. This subject is designed to revise all areas of surgical pathology within the Master of Pathology as well as promote engagement with professional development activities relevant to a career as a pathologist.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: MEDI 7037 - Surgical Pathology 6
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7073 Surgical Pathology of the Genito-urinary Uract, Salivary Gland and Endocrine System (10 Credit Points)
Subject Details (p. 4273) Legacy Code: 401474
This subject will re-inforce the diagnostic entities in genito-urinary tract, salivary gland and endocrine system pathology that were introduced in Surgical Pathology I. Two self-directed online learning modules with digitalized images and practical notes on the diagnostic approach to important pathological entities of the above sub-specialties will be provided. The basic concepts in surgical, cyto- and small biopsy pathology, including the appropriate ancillary techniques in the diagnosis, prognostication and treatment prediction will be assessed. This subject is designed to further develop the basic research and communication skills, and critical thinking acquired in Surgical Pathology I, and to reinforce the resources and technical requirements needed to reach the correct pathological diagnosis.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: MEDI 7033 - Surgical Pathology 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7074 Surgical Pathology of the Head and Neck, Haematopathology and Paediatric Pathology (10 Credit Points)
Subject Details (p. 4274) Legacy Code: 401478
This subject will re-inforce the diagnostic entities in haematopathology, head and neck, and paediatric pathology that were introduced in Surgical Pathology IV. Two self-directed online learning modules with digitalized images and practical notes on the diagnostic approach to important pathological entities of the above sub-specialties will be provided. Upon completion of the subject students will have advanced knowledge in surgical, cyto- and small biopsy pathology, including appropriate ancillary techniques and recent research developments. This subject will promote behaviours that create a safe, caring, ethical and professional practice required by pathologists.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: MEDI 7036 - Cytopathology and Small Biopsy Pathology 5
Restrictions: Please see the Subject Details page for any restrictions for this subject

MEDI 7075 Advanced Imaging Clinical Practice and Research (20 Credit Points)
Subject Details (p. 4275)
This is a 20 credit point year-long subject taken over two sessions (10 credit points in each session). This year long subject will consist of 560 hours of supervised Clinical MRI Practice within the setting of a MRI Clinical Service. The purpose of Clinical MRI Practice is to apply academically acquired knowledge of MRI Practice to patient care in real time. Students will be supervised by experienced Medical MRI Practitioners to develop skills in operating MRI equipment and MR image interpretation for children and adults. Clinical experiences will include history taking, MR safety check, and MRI Protocol setting, Image interpretation, and performing various MRI examinations and understanding the specific sequences of various clinical conditions. Students will need to participate in online case conference discussions. The program will also include 5 assessment case studies selected from their work during placements, and a Research Paper of 5000 words from a case that requires improvement for existing protocols or the introduction of a new protocol.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: MEDI 7048 - Advanced Imaging Research Project
Restrictions: Please see the Subject Details page for any restrictions for this subject

Non Award (NOAW)

NOAW 0002 WSUIC Unit for Service Access (0 Credit Points)
Subject Details (p. 4469) Legacy Code: 900304
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NOAW 0003 WSUIC Unit for Service Access (FS) (0 Credit Points)
Subject Details (p. 4469) Legacy Code: 900305
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NOAW 0004 Academic Integrity Module (0 Credit Points)
Subject Details (p. 4470) Legacy Code: 900306
The Academic Integrity Module (AIM) introduces students to the importance of studying with integrity at Western and the value of integrity in professional life. Students completing the AIM commit to the values of Western's Student Honour Code, developed in partnership with students. The AIM outlines requirements and expectations regarding ethical academic behaviour including use and acknowledgement of sources and presenting your own work in assessments. It also introduces key academic integrity concepts in the Student Misconduct Rule that all students need to be aware of, including academic misconduct, plagiarism, contract cheating and collusion. Students who complete the AIM feel more confident in approaching their studies with integrity and identifying potential risks to their academic integrity. Satisfactory completion of the AIM is mandatory for all commencing students. Once completed, students will be able to register for subsequent teaching sessions.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NOAW 3001 Biomedical and Health Science Internship (0 Credit Points)
Subject Details (p. 4485) Legacy Code: 900510
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NOAW 3003 Computing and Mathematics Internship (0 Credit Points)
Subject Details (p. 4485) Legacy Code: 900511
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NOAW 3004 Education Internship (0 Credit Points)
Subject Details (p. 4485) Legacy Code: 900502
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NOAW 3005 Engineering Internship (0 Credit Points)
Subject Details (p. 4486) Legacy Code: 900512
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NOAW 3006 Humanities and Languages Internship (0 Credit Points)
Subject Details (p. 4486) Legacy Code: 900503
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NOAW 3007 Law Internship (0 Credit Points)
Subject Details (p. 4486) Legacy Code: 900507
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NOAW 3008 Medicine Clerkship (0 Credit Points)
Subject Details (p. 4486) Legacy Code: 900513
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NOAW 3009 Natural Sciences Internship (0 Credit Points)
Subject Details (p. 4487) Legacy Code: 900514
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NOAW 9001 Research Internship (0 Credit Points)
Subject Details (p. 4487)
This is a 0 credit point non-award subject. Research Internship is an activity where a candidate gain experience working with the end-user of their research and apply their subject knowledge trying to solve a real-life problem. An internship with the end-user of research provides opportunities for new research, research application and more importantly may create a pathway for a research impact. Master of Research candidates are encouraged to undertake a research internship, where possible.
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NOAW 9002 Industry Research Internship (0 Credit Points)
Subject Details (p. 4487)
This is a 0 credit point non-award subject. Industry Research Internship is an activity where a candidate gain experience working with the end-user of their research and apply their subject knowledge trying to solve a real-life problem. An internship with the end-user of research provides opportunities for new research, research application and more importantly may create a pathway for a research impact. Doctor of Philosophy candidates are encouraged to undertake an industry research internship, where possible.
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

Nursing (NURS)

NURS 0001 Nursing and Midwifery Exchange Unit 1 (10 Credit Points)
Subject Details (p. 4488) Legacy Code: 900616
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 0002 Nursing and Midwifery Exchange Unit 2 (10 Credit Points)
Subject Details (p. 4488) Legacy Code: 900617
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 0003 Nursing and Midwifery Exchange Unit 3 (10 Credit Points)
Subject Details (p. 4489) Legacy Code: 900618
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 0004 Nursing and Midwifery Exchange Unit 4 (10 Credit Points)
Subject Details (p. 4489) Legacy Code: 900619
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 0005 Nursing and Midwifery Exchange Unit 5 (10 Credit Points)
Subject Details (p. 4490) Legacy Code: 900620
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 1001 Approaches to Professional Nursing Practice (10 Credit Points)
Subject Details (p. 4490) Legacy Code: 401007
Approaches to Professional Nursing Practice explores the nature and professional context of nursing. The roles and functions of the nurse and their relationship to others are considered in terms of expected competence, responsibilities, accountabilities, and scope of practice. Students will gain an understanding of information enabled care, which is central to modern practice.
Level: Undergraduate Level 1 subject
Incompatible Subjects: NURS 1002 - Becoming a Nurse NURS 1008 - Knowing Nursing
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 1004 Bioscience for Midwifery (10 Credit Points)
Subject Details (p. 4492) Legacy Code: 401031
This subject extends knowledge gained in Bioscience 1 and introduces midwifery students to concepts associated with early human development, labour, birth and postpartum changes. Physiological changes in the newborn at birth are identified together with growth and development to six weeks of age. The subject includes an introduction to principles of pharmacology and pharmacological agents that may be used as a supportive resource during pregnancy and birth. In addition to this, the subject also explores the impact of microorganisms on maternal and newborn health and the body's natural defenses in maintaining health.
Level: Undergraduate Level 1 subject
Pre-requisite(s): NURS 1023 - Bioscience 1 for students in 4684
Co-requisite(s): NURS 1010 - Midwifery Knowledge 2 and NURS 1013 - Midwifery Professional Practice 2 for students in 4684
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 1005 Foundations for Nursing Practice (10 Credit Points)
Subject Details (p. 4493) Legacy Code: 401029
This subject is conducted in an intensive study mode that is offered to students with a previous degree in biological or behavioural science or who are registered nurses with registration from overseas. The subject provides foundational and core learning activities to support student transition into second year subjects of the Bachelor of Nursing (Graduate Entry).
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 1006 Human Relationships and Life Transitions (10 Credit Points)
Subject Details (p. 4494) Legacy Code: 401005
This subject enables students to develop an understanding of human relationships and life transitions, and introduces concepts that inform nursing and midwifery practice. The subject explores frameworks that support an understanding of the psychological, social, cognitive and moral components of human development throughout the lifespan, the development of self, and normative (expected) and non-normative (deviation from the expected) life transitions in the context of people realising their health potential.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 1009 Midwifery Knowledge 1 (10 Credit Points)
Subject Details (p. 4495) Legacy Code: 401030
This subject introduces students to the meaning of birth in society and the historical and social contexts of midwifery, from its early beginnings, to its current professional standing. The philosophy of midwifery and the role of the midwife within a continuity of care framework will be explored with a particular focus on the provision of care in the antenatal period. This will include approaches for working in partnership with women and their families. Students will investigate, identify and access scientific information and research in order to develop academic literacy at a beginning level. They will identify the principles of communication and explore educational resources for childbirth.
Level: Undergraduate Level 1 subject
Co-requisite(s): NURS 1023 AND NURS 1012 for students in program 4684
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 1010 Midwifery Knowledge 2 (10 Credit Points)
Subject Details (p. 4496) Legacy Code: 401032
This subject introduces students to midwifery knowledge for childbirth within a woman centred partnership model. It provides the theoretical foundations to equip students in understanding the role of the midwife during late pregnancy, labour and birth and the initial care of the newborn. The educational, psychological and social needs of women are explored and integrated with learning from the Bioscience for Midwifery subject. The subject briefly introduces students to midwifery care related to the immediate postnatal and newborn period including lactation and breastfeeding.
Level: Undergraduate Level 1 subject
Pre-requisite(s): NURS 1009 AND
NURS 1012
Co-requisite(s): NURS 1004 AND
NURS 1013
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 1012 Midwifery Professional Practice 1 (10 Credit Points)
Subject Details (p. 4497) Legacy Code: 401219
In this subject students will learn the necessary midwifery skills for the provision of woman-centred antenatal care. In a simulated practice environment students will gain practical skills to provide midwifery care to the woman and her supportive others during pregnancy. This subject will also focus on preparing students for clinical placement. The importance of work health and safety and effective communication and documentation will be reinforced. This subject will include recruitment of women for the continuity of care experience.
Level: Undergraduate Level 1 subject
Co-requisite(s): NURS 1009
Equivalent Subjects: NURS 1007 Introduction to Midwifery Practice Experience
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 1013 Midwifery Professional Practice 2 (10 Credit Points)
Subject Details (p. 4499) Legacy Code: 401220
In this subject students will develop skills for the provision of midwifery care across the birthing continuum. The primary focus of this subject will be the acquisition of skills for supporting women during normal pregnancy and birth. Students will apply knowledge gained from Midwifery Knowledge 1 and 2 in simulated practice environments and will gain a comprehensive understanding of the practical aspects of midwifery care for women experiencing normal labour and birth. Students will gain practical experience in designated clinical areas and will follow women through pregnancy, birth and the postnatal period in a continuity of care experience.
Level: Undergraduate Level 1 subject
Pre-requisite(s): NURS 1012 and NURS 1009 for program 4684
Co-requisite(s): NURS 1010 for program 4684
Equivalent Subjects: NURS 1011
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 1017 Primary Health Care in Action (10 Credit Points)
Subject Details (p. 4501) Legacy Code: 401001
This subject introduces nursing and midwifery students to Primary Health Care (PHC) as a social model of health and a World Health Organization (WHO) strategy for achieving just and humane health care. The subject explores the impact and relevance of PHC as a framework for organising an Australian health care system that decreases health inequities and optimises the health of all people. Students will examine the dimensions of PHC that assist in establishing collaborative partnerships in which people are supported to take responsibility for their health, including members of culturally diverse groups.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 1019 Professional Communication in Nursing (10 Credit Points)
Subject Details (p. 4502) Legacy Code: 401205
This subject will be replaced from Autumn 2022 by 401448 Becoming a Professional Nurse. This subject develops the written and interpersonal skills of students in preparation for professional practice. Students are introduced to the concepts of language, literacy and learning styles that are required for both academic and professional life. Cultural sensitivity, safety and competence that facilitate appropriate intercultural communication are explored within the context of contemporary healthcare.
Level: Undergraduate Level 1 subject
Equivalent Subjects: NURS 1018 Professional Communicatoin
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 1020 Professional Practice Experience 1 (10 Credit Points)
Subject Details (p. 4503) Legacy Code: 401000
Professional Practice Experience 1 focuses on the development of the role and clinical skills of the registered nurse when promoting, maintaining, and supporting a person's health and wellbeing across the lifespan. Students will be able to develop the foundational clinical skills in a simulated clinical environment to enable the further development of more complex skills in a health care setting.
Level: Undergraduate Level 1 subject
Co-requisite(s): NURS 1022 AND NURS 1023
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 1021 Professional Practice Experience 2 (10 Credit Points)
Subject Details (p. 4504) Legacy Code: 401004
Professional Practice Experience 2 focuses on the development of the role and clinical skills of the registered nurse when promoting, maintaining, and supporting person centred care. A simulated professional task will assist with the development of essential clinical communications and a professional experience placement to evaluate clinical skills development. The subject includes 80 hours of Professional Experience Placement.
Level: Undergraduate Level 1 subject
Pre-requisite(s): NURS 1020 - Professional Practice Experience 1 (PPE1)
Co-requisite(s): NURS 1024 - Bioscience 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 1022 Becoming a Professional Nurse (10 Credit Points)
Subject Details (p. 4506) Legacy Code: 401448
Becoming a Professional Nurse or Midwife facilitates a students understanding of becoming a health care professional. Students are introduced to cultural sensitivity, safety, and competence to facilitate appropriate intercultural communication within the context of contemporary healthcare. The role of the registered nurse or midwife is explored, with students gaining an understanding of accountability, responsibility, therapeutic and professional relationships, and their capability for practice.
Level: Undergraduate Level 1 subject
Co-requisite(s): NURS 1020 - Professional Practice Experience 1
Equivalent Subjects: NURS 1018 - Professional Communication
NURS 1019 - Professional Communication in Nursing
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 1023 Bioscience 1 (10 Credit Points)
Subject Details (p. 4507) Legacy Code: 401469
Bioscience 1 introduces the core concepts and terminology related to the structure, function and homeostasis of the human body. Students begin to describe the relationships between the Australian National Health Priority areas and performances of activities of living and healthy lifestyle practices.
Level: Undergraduate Level 1 subject
Equivalent Subjects: BIOS 1010 - Bioscience 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 1024 Bioscience 2 (10 Credit Points)
Subject Details (p. 4508) Legacy Code: 401470
Bioscience 2 introduces the concepts associated with alterations in health across the lifespan. It will introduce pathophysiology, pharmacology, immunology, and microbiology related to health breakdown due to injury or disease. This subject specifically examines impact of microorganisms on the health of people and the body's natural defences when dealing with infections and injuries and its significance to person centred care.
Level: Undergraduate Level 1 subject
Co-requisite(s): NURS 1023 Bioscience 1
Equivalent Subjects: BIOS 1011 - Bioscience 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 1025 Person-centred Care Across the Lifespan (10 Credit Points)
Subject Details (p. 4510) Legacy Code: 401453
This subject introduces the concept of person-centred care as an approach that is respectful of, and responsive to, the preferences, needs and values of individual people throughout the lifespan. Students develop an understanding of human relationships and life transitions, including concepts that inform nursing and midwifery practice. The subject explores frameworks that support an understanding of the psychological, social, cognitive and moral components of human development including mental health and care of the older person.
Level: Undergraduate Level 1 subject
Co-requisite(s): NURS 1017 - Primary Health Care in Action
Equivalent Subjects: NURS 1006 - Human Relationships and Life Transitions
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 2001 Aboriginal and Torres Strait Islander Health (10 Credit Points)
Subject Details (p. 4511) Legacy Code: 401206
In Autumn 2022 this subject will be replaced by subject 401454 - Indigenous Australian Health, Wellness and Culture. This subject will specifically enable nursing and midwifery students to investigate, discuss and develop an understanding of Aboriginal and Torres Strait Islander health, health statistics, historical and present day issues associated with poor health outcomes in Aboriginal and Torres Strait Islander people. In addition, the general concepts of cultural safety and health and illness, will be explored in terms of Aboriginal and Torres Strait Islander populations. Further, the subject promotes the development of critical knowledge essential for students to understand their own values, beliefs, biases, and perceptions to become culturally sensitive and appropriately adaptable when meeting the health needs of Aboriginal and Torres Strait Islander People. A case study approach will provide the framework for students to explore and reflect on the impact of the different attitudes, institutional policies and value systems relating to the health of Aboriginal and Torres Strait Islander people in Australia.
Level: Undergraduate Level 2 subject
Equivalent Subjects: NURS 2017 Health in a Culturally Diverse Community
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 2004 Complex Care 1 (10 Credit Points)
Subject Details (p. 4511) Legacy Code: 401036
This subject introduces students to complexities in health that emerge during pregnancy, labour, birth and the postnatal period which require additional care when the health of the mother and/or neonate may be compromised. This module also focuses on the midwifery care of the sick neonate.
Level: Undergraduate Level 2 subject
Pre-requisite(s): NURS 2022 AND
NURS 2025
Co-requisite(s): NURS 2026
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 2008 Graduate Entry Practice Experience (10 Credit Points)
Subject Details (p. 4512) Legacy Code: 401218
This subject provides the student with an opportunity to consolidate their clinical skills development in an Australian health care facility, and contributes to the minimum professional practice experience placement requirement.
Level: Undergraduate Level 2 subject
Pre-requisite(s): NURS 1005
Co-requisite(s): NURS 2028
Equivalent Subjects: NURS 2030 Professional Practice Experience A
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 2010 Health Variations 1 - Perioperative (10 Credit Points)
Subject Details (p. 4513) Legacy Code: 401207
In Autumn 2022 this subject will be replaced by subject 401455 - Health Variations 1 - Introduction to Alterations in Health. This subject provides the theoretical background knowledge for Professional Practice 3. It introduces the student to the fundamental principles of perioperative nursing care in supporting clients undergoing surgical interventions incorporating the related pathophysiology and pharmacology. In particular, nursing care of surgical interventions relating to the gastrointestinal, musculoskeletal and reproductive systems, and injury prevention and controls will be the focus of case history reviews. The National Health Priority Areas of Injury Prevention and Control, Arthritis and Musculoskeletal conditions and Cancer Control will be addressed.
Level: Undergraduate Level 2 subject
Co-requisite(s): Co-requisites for 4691 and 4693 BIOS 1010 Bioscience 1 and BIOS 1011 Bioscience 2
Equivalent Subjects: NURS 2009 Health Variations 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 2013 Health Variations 2 - Chronic Illness and Disability (10 Credit Points)
Subject Details (p. 4514) Legacy Code: 401209
This subject will be replaced from Spring 2022 by 401444 Health Variations 2 - Chronic Conditions and Disability. This subject explores the concepts of chronicity, disability, habilitation and rehabilitation in relation to chronic conditions, functional and intellectual disabilities and their implications for nursing practice. The relevance of the International Classification of Functioning, Disability and Health (ICF) to primary health care is the core philosophy of the subject. National Health Priority case studies drawn from across the lifespan will provide a focus for exploring pathophysiology, pharmacological interventions and nursing care related to chronic conditions of the endocrine, neurological and respiratory body systems. In addition, the nursing role in supporting those with physical and intellectual disability will be examined.
Level: Undergraduate Level 2 subject
Equivalent Subjects: NURS 2011 Health Variations 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 2014 Health Variations 2 Advanced - Chronic Illness and Disability (10 Credit Points)
Subject Details (p. 4515) Legacy Code: 401215
This subject encourages critical analysis to explore the concepts of chronicity, disability, habilitation and rehabilitation in relation to chronic conditions, functional and intellectual disabilities and their implications for nursing practice. National Health Priority Case Studies drawn from across the lifespan will provide a focus for exploring pathophysiology, pharmacological interventions and nursing care related to chronic conditions of the endocrine, neurological and respiratory body systems. In addition, a problem-solving nursing approach will be developed for supporting those with physical and intellectual disability.
Level: Undergraduate Level 2 subject
Equivalent Subjects: NURS 2012 Health Variations 2 (Advanced)
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 2016 Health Variations 3 - Acute Exacerbations of Chronic Conditions (10 Credit Points)
Subject Details (p. 4515) Legacy Code: 401210
Health Variations 3 - Acute Exacerbations of Chronic Conditions utilises an evidence base to develop an understanding of pathophysiology, pharmacological interventions, and nursing care for people who experience acute exacerbations of chronic conditions.
Level: Undergraduate Level 2 subject
Co-requisite(s): NURS 2037 - Health Variations 1 - Introduction to Alterations in Health
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 2018 Legal and Ethical Issues in Midwifery (10 Credit Points)
Subject Details (p. 4517) Legacy Code: 401037
This subject explores responsibilities related to the nature and professional context of midwifery. It focuses on developing students understanding of legal and ethical issues and the midwives obligation to work within ethical and legal frameworks for safe practice. The legal and ethical roles and functions of the midwife and their relationship to others are considered in terms of expected standard, responsibilities, accountabilities and scope of practice within the regulatory framework. It will provide an opportunity for students to explore and discuss ethical issues related to midwifery, reproductive and maternal health.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 2022 Midwifery Knowledge 3 (10 Credit Points)
Subject Details (p. 4518) Legacy Code: 401034
This subject provides students with the midwifery knowledge related to the postnatal period. It will focus on maternal postnatal and newborn care including infant feeding, bonding and attachment. Breastfeeding is a core maternity indicator and is a focus for improving public health. Midwifery skills and knowledge to assist women in the preparation, initiation and establishment of breastfeeding will be examined as well as the historical and social contexts of infant feeding and challenges that this and other problems may pose for women. The midwives role in supporting women who are breastfeeding is addressed including the need to offer consistent evidence-based information.
Level: Undergraduate Level 2 subject
Pre-requisite(s): NURS 1010
Co-requisite(s): NURS 2025
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 2025 Midwifery Professional Practice 3 (10 Credit Points)
Subject Details (p. 4519) Legacy Code: 401221
In this subject students will learn the necessary midwifery skills for the provision of woman centred post birth care. In a simulated practice environment students will gain practical skills to provide midwifery care to both the woman and her baby up until six weeks postpartum. The importance of effective communication and documentation will also be reinforced. This subject will also include blocks of practical experience in designated clinical areas and the provision of continuity of care.
Level: Undergraduate Level 2 subject
Pre-requisite(s): NURS 1013 AND
NURS 1004
Co-requisite(s): NURS 2022
Equivalent Subjects: NURS 2023 Midwifery Practice Experience 3
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 2026 Midwifery Professional Practice 4 (10 Credit Points)
Subject Details (p. 4521) Legacy Code: 401222
In this subject students will develop the necessary skills to provide midwifery care to women and neonates with complex health needs. In lab based simulation environments students will gain confidence in providing midwifery care following the detection of deviations from normal. Students will gain practical experience in designated clinical areas and will follow women through pregnancy, birth and the postnatal period in a continuity of care experience.
Level: Undergraduate Level 2 subject
Pre-requisite(s): NURS 2025 AND
NURS 2022
Co-requisite(s): NURS 2004
Equivalent Subjects: NURS 2024 Midwifery Practice Experience 3
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 2028 Professional Practice Experience 3 (10 Credit Points)
Subject Details (p. 4522) Legacy Code: 401008
Professional Practice Experience 3 focuses on the development of the role and clinical skills of the registered nurse when assessing and caring for people across the lifespan who are experiencing acute but usually resolvable conditions. A simulated professional task will assist with the development of essential clinical communications and a professional experience placement to evaluate clinical skills development. The subject includes 160 hours of Professional Experience Placement.
Level: Undergraduate Level 2 subject
Pre-requisite(s): NURS 1021
Co-requisite(s): NURS 2037 and NURS 2040
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 2029 Professional Practice Experience 4 (10 Credit Points)
Subject Details (p. 4524) Legacy Code: 401012
Professional Practice Experience 4 focuses on the development of the role and clinical skills of the registered nurse when caring for people experiencing an acute exacerbation of a chronic condition. A simulated professional task will assist with the development of essential clinical communications and a professional experience placement to evaluate clinical skills development. The subject includes 160 hours of Professional Experience Placement.
Level: Undergraduate Level 2 subject
Pre-requisite(s): NURS 2028 Professional Practice Experience 3
Co-requisite(s): NURS 2038 Health Variations 2 – Chronic Conditions and Disability AND
NURS 2016 Health Variations 3 - Acute Exacerbations of Chronic Conditions
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 2031 Promoting Mental Health and Wellbeing 1 (10 Credit Points)
Subject Details (p. 4526) Legacy Code: 401013
This subject introduces students to the care of individuals with mental health concerns and/or illness. The national mental health policies provide a framework to focus on a range of determinants and consequences of mental health and illness in Australia. The principles of stress vulnerability and recovery will be introduced. The subject will offer an introduction for students to caring for individuals with depression, anxiety and substance use, and their families/significant others. The concepts of therapeutic use of self and reflection when engaging with people with mental health needs will be introduced. Students will develop their knowledge of mental health assessment, risk assessment and risk management across the lifespan. Self-care strategies in everyday collaborative nursing and midwifery practice will be considered.
Level: Undergraduate Level 2 subject
Equivalent Subjects: NURS 2021 - Mental Health Nursing 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 2034 Research for Nursing (Advanced) (10 Credit Points)
Subject Details (p. 4527) Legacy Code: 401214
This subject introduces students to the major research paradigms, research principles, concepts that inform critical analysis of literature, the basis of evidence based practice and oral presentation skills.
Level: Undergraduate Level 2 subject
Equivalent Subjects: NURS 2032 Research Principles for Nursing (Advanced)
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 2035 Research for Nursing and Midwifery (10 Credit Points)
Subject Details (p. 4528) Legacy Code: 401208
This subject will be replaced from Autumn 2022 by 401449 Evidence-based Practice for Nursing and Midwifery. In this subject nursing and midwifery students will develop a foundational understanding of research concepts that inform analysis of literature and evidence based practice. These skills will broaden the students understanding of the importance of research that underpins nursing and midwifery practice.
Level: Undergraduate Level 2 subject
Co-requisite(s): Co-requisite for 4691 NURS 1019 Professional Communication in Nursing
Equivalent Subjects: NURS 2005 Evidence-Based Nursing NURS 2033 Research Principles for Nursing and Midwifery
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 2036 Evidence-Based Practice for Nursing and Midwifery (10 Credit Points)
Subject Details (p. 4528) Legacy Code: 401449
Evidence-Based Practice for Nursing and Midwifery is designed to develop students' knowledge in accessing and making judgements to translate the best available evidence, which includes the most current, valid, and available research findings into practice. General concepts associated with evidence-based health care are explored including conducting literature searches from a wide range of sources, reviewing and appraising research and other evidence, using and translating research into practice.
Level: Undergraduate Level 2 subject
Equivalent Subjects: NURS 2033 - Research Principles for Nursing and Midwifery NURS 2035 - Research for Nursing and Midwifery
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 2037 Health Variations 1 - Introduction to Alterations in Health (10 Credit Points)
Subject Details (p. 4529) Legacy Code: 401455
Health Variations 1 utilises an evidence base to develop an understanding of pathophysiology, pharmacological interventions, and nursing care of people across the lifespan who are experiencing acute but usually resolvable alterations in health. A particular focus of this subject are the Australian National Health Priority Areas.
Level: Undergraduate Level 2 subject
Pre-requisite(s): NURS 1023 - Bioscience 1
NURS 1024 - Bioscience 2
Equivalent Subjects: NURS 2010 - Health Variations 1 - Perioperative
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 2038 Health Variations 2 - Chronic Conditions and Disability (10 Credit Points)
Subject Details (p. 4531) Legacy Code: 401444
Health Variations 2 - Chronic Conditions and Disability utilises an evidence base to develop an understanding of pathophysiology, pharmacological interventions, and nursing care for people across the lifespan who experience chronic conditions and disability.
Level: Undergraduate Level 2 subject
Co-requisite(s): NURS 2037 - Health Variations 1 - Introduction to Alterations in Health
Equivalent Subjects: NURS 2013 - Health Variations 2 - Chronic Illness and Disability
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 2039 Indigenous Australian Health, Wellness and Culture (10 Credit Points)
Subject Details (p. 4532) Legacy Code: 401454
Indigenous Australian Health, Wellness and Culture subject will specifically enable nursing and midwifery students to investigate, discuss and develop an understanding of Aboriginal and Torres Strait Islander health, health statistics, historical and present-day issues associated with poor health outcomes in Aboriginal and Torres Strait Islander people. The concepts of cultural safety, health and illness will be discussed in terms of Aboriginal and Torres Strait Islander people. Students will explore and reflect on the impact of the different attitudes, institutional policies and value systems relating to the health of Aboriginal and Torres Strait Islander people in Australia.
Level: Undergraduate Level 2 subject
Equivalent Subjects: NURS 2001 - Aboriginal and Torres Strait Islander Health
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 2040 Pharmacology in Nursing (10 Credit Points)
Subject Details (p. 4533) Legacy Code: 401450
It is imperative that registered nurses have a solid understanding of pharmacology. This subject introduces principles and core concepts of pharmacology with a distinct emphasis on safe medication administration in nursing. Students will acquire knowledge of pharmacokinetics and pharmacodynamics and systematically develop an understanding of actions and reactions of commonly prescribed drugs to individual people across the lifespan. Electronic medication management systems, patient education and engagement in medication management are addressed in this subject.
Level: Undergraduate Level 2 subject
Co-requisite(s): NURS 2036
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 2041 Promoting Mental Health and Wellbeing (10 Credit Points)
Subject Details (p. 4534) Legacy Code: 401451
Promoting Mental Health and Wellbeing develops mental health nursing knowledge and skill needs of the nursing workforce across a range of service delivery settings. It explores contemporary models of care such as recovery-oriented practice, trauma-informed care, and social determinants approach. Students will plan evidence-based initiatives that promote mental health, prevent and intervene early in illness, facilitate recovery, and promote wellbeing.
Level: Undergraduate Level 2 subject
Pre-requisite(s): NURS 1025 - Person-centred Care Across the Lifespan
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 2042 Psychosocial Issues in the Perinatal Period (10 Credit Points)
Subject Details (p. 4536)
In this subject students will gain knowledge of the psychosocial risk and protective factors that influence outcomes for women and their babies. Students will explore issues related to perinatal mental health. This will include antenatal and postnatal depression and anxiety, substance misuse, domestic violence and the midwife's role in supporting women and their families in perinatal grief and loss situations. Through interactive discussions and role play students will strengthen their skills in psychosocial assessment and working in partnership with women and families to explore concerns, facilitate behaviour change in individual and group-based learning contexts and identify effective early intervention strategies and referral pathways. There will also be a focus on the importance of self-care for midwives.
Level: Undergraduate Level 2 subject
Equivalent Subjects: NURS 3027 - Midwifery Practice – Teaching and Learning
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 2043 Pharmacology and Microbiology for Midwifery (10 Credit Points)
Subject Details (p. 4537)
The purpose of this subject is twofold. It develops students' knowledge in pharmacology including, pharmacokinetics, pharmacodynamics and the quality use of medicine in midwifery. The subject also builds knowledge in microbiology and the impact of microorganisms on maternal, fetal and newborn health and examines the body's natural defences including the microbiome.
Level: Undergraduate Level 2 subject
Pre-requisite(s): NURS 1010 - Midwifery Knowledge 2
NURS 1013 - Midwifery Professional Practice 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 3001 Being a Professional Nurse (Advanced) (10 Credit Points)
Subject Details (p. 4538) Legacy Code: 401027
This subject explores the process of transition from student to professional practitioner. Students undertaking the BN Advanced course will gain a critical understanding of the congruence between the provision of health care and professional regulatory frameworks. The role of the graduate nurse will be explored through a detailed examination of case studies that apply relevant nursing theory to professional practice. This subject will build capacity in students to meet their professional responsibilities as new graduate practitioners in nursing. Students will also have the opportunity to discuss career planning and set priorities for ongoing professional development.
Level: Undergraduate Level 3 subject
Co-requisite(s): NURS 3033
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 3002 Being a Professional Nurse or Midwife (10 Credit Points)
Subject Details (p. 4539) Legacy Code: 401021
Being a Professional Nurse or Midwife explores the process of transition from student to a registered health care professional. Students analyse their role as a registered nurse or registered midwife, reflecting on accountability, responsibility, therapeutic and professional relationships, and their capability for practice. This subject will build capacity in students to meet their professional responsibilities as capable practitioners in nursing or midwifery and will have an opportunity to demonstrate job readiness skills in preparation for new graduate employment opportunities.
Level: Undergraduate Level 3 subject
Pre-requisite(s): NURS 1022 - Becoming a Professional Nurse in program code 4691 4692 4693 4780
NURS 2026 - Midwifery Professional Practice 4 in program code 4684
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 3003 Clinical Leadership and Professional Relationships (10 Credit Points)
Subject Details (p. 4541) Legacy Code: 401213
The subject explores fundamental concepts and issues related to leadership in nursing and midwifery. The subject focuses on exploration of contemporary innovative approaches to leadership that may contribute to nursing and midwifery standards, person and woman centred practice, critical reflection and critical thinking in dynamic healthcare contexts.
Level: Undergraduate Level 3 subject
Equivalent Subjects: NURS 3019 Leadership in Graduate Practice NURS 3021 Leadership in Nursing and Midwifery
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 3004 Clinical Leadership in Nursing (Advanced) (10 Credit Points)
Subject Details (p. 4541) Legacy Code: 401217
This subject explores fundamental and advanced concepts and issues related to leadership in nursing to enable the advanced student to reflect on future leadership aspirations. The subject focuses on exploration of contemporary, emerging and innovative approaches to leadership that contribute to nursing standards, person-centred practice, evidence-based leadership, critical reflection and critical thinking in dynamic healthcare contexts.
Level: Undergraduate Level 3 subject
Equivalent Subjects: NURS 3020 Leadership in Nursing (Advanced)
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 3005 Collaborative Care (10 Credit Points)
Subject Details (p. 4542) Legacy Code: 401040
The Australian College of Midwives and the National Health and Medical Research Council (NHMRC) provide guidelines to assist midwives to recognise when to refer or consult with other midwives or health care practitioners, as well as collaborative care arrangements. This subject provides students with the knowledge to collaborate with all health professionals. This includes assessing procedures for managing obstetric emergencies; transferring women or newborns; assessing referral pathways; and caring for bereaved families.
Level: Undergraduate Level 3 subject
Pre-requisite(s): NURS 2004 and NURS 2026 for program 4684
Co-requisite(s): NURS 3006 and NURS 3030 for program 4684
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 3006 Complex Care 2 (10 Credit Points)
Subject Details (p. 4543) Legacy Code: 401039
This subject continues to explore the complex issues surrounding childbirth with a particular emphasis on those women who have pre-existing conditions. Dilemmas and challenges that surround infertility, medical conditions and previous surgical conditions as well as environmental issues that may impact on pregnancy and or birth, are examined. In addition, the subject includes the implications and management for the care of the associated neonate.
Level: Undergraduate Level 3 subject
Pre-requisite(s): NURS 2004 and NURS 2026
Co-requisite(s): NURS 3030 and NURS 3005 for students in 4684
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 3007 Contemporary Issues in Child and Adolescent Health (10 Credit Points)
Subject Details (p. 4544) Legacy Code: 401196
In Spring 2023, this subject replaced by NURS 5004 - Contemporary Issues in Child and Adolescent Health. This subject begins with a brief examination of socio-cultural theories of childhood and adolescence as a background for the critical analysis of current debates about the health and wellbeing of children and adolescents. Case studies will be used to explore contestable topics in child and youth health from an interdisciplinary perspective. The subject will address issues of child protection and parental responsibility in the mainstream community, Aboriginal and Torres Strait Islanders, and refugee health care settings. Knowledge gained in this subject will assist beginning practitioners in a variety of disciplines to take informed positions on topics relevant to child and adolescent health.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 3014 Health Variations 4 (Advanced) - Acute Life Threatening Conditions (10 Credit Points)
Subject Details (p. 4545) Legacy Code: 401216
This subject develops a student's knowledge, critical thinking and problem-solving skills related to the pathophysiology, pharmacology and nursing care for people who experience an acute life-threatening and/or traumatic condition that may involve multiple systems failure. National Health Priority case histories used in the subject will focus on cardiovascular disease, and injury prevention and control. The subject will also consider habilitation and rehabilitation of people who have experienced acute life-threatening or traumatic complex health issues. Workshops will be used to provide the student with the necessary advanced assessment, clinical problem-solving skills and simulation experiences to recognise the deteriorating patient with potential life-threatening conditions and intervene with reporting, monitoring and initiation of treatment skills.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 3015 Health Variations 4 - Acute Life Threatening Conditions (10 Credit Points)
Subject Details (p. 4546) Legacy Code: 401211
Health Variations 4 - Acute Life-Threatening Conditions utilises an evidence base to develop an understanding of the pathophysiology, pharmacological interventions, and nursing care for people across the lifespan who experience acute life-threatening conditions. An important area of focus is detecting and recognising acute deterioration and escalating care.
Level: Undergraduate Level 3 subject
Pre-requisite(s): NURS 2016 - Health Variations 3 - Acute Exacerbations of Chronic Conditions
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 3017 Health Variations 5 - Palliative and End of Life Care (10 Credit Points)
Subject Details (p. 4547) Legacy Code: 401212
Health Variations 5 - Palliative and End of Life Care focuses on the palliative approach as a model of care, exploring the benefits of this approach when supporting dying individuals with any life limiting illness. Students will also acquire the capabilities to develop self-care strategies to manage their own grief, loss and stress associated with working in a palliative setting.
Level: Undergraduate Level 3 subject
Co-requisite(s): NURS 2016 - Health Variations 3 - Acute Exacerbations of Chronic Conditions
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 3023 Maternal and Infant Health Care (10 Credit Points)
Subject Details (p. 4549) Legacy Code: 401237
In Spring 2023, this subject replaced by NURS 5006 - Maternal and Infant Health Care. Maternal and Infant Health care introduces students from Nursing, Health Sciences and other disciplines to the key physiological, social and emotional issues around pregnancy, labour and birth and early parenthood. It also examines the Australian maternity care system and model of care. Content covered in the subject will include; foetal development, normal physiological labour and birth, health promoting behaviours and development of parenting confidence. Importance will also be placed on the role of social support, infant feeding practices and communication and newborn care. Models of care and the impact of the media on shaping parenting ideas and practices will be covered.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 3025 Midwifery Practice - Global Maternal Health (10 Credit Points)
Subject Details (p. 4550) Legacy Code: 401226
This subject will provide students with an opportunity to explore the full scope of midwifery practice from a global perspective. Students will gain an understanding of the role midwifery plays within the broader context of women's health both in Australia and globally. It will provide an opportunity for students to experience an alternative midwifery model. Students will undertake a three week practice placement. The practice placement can be located locally, nationally or internationally. The purpose of this placement is for students to consider the role of midwifery and its impact on improving women's health in a range of settings. It will support the development of skills in assessing the need and rationale for the provision of midwifery services in different environments and settings.
Level: Undergraduate Level 3 subject
Pre-requisite(s): NURS 3030 AND
NURS 2004
Equivalent Subjects: NURS 3026 Midwifery Practice - Models of Care
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 3030 Midwifery Professional Practice 5 (10 Credit Points)
Subject Details (p. 4551) Legacy Code: 401223
In this subject students will further develop midwifery skills for the management of complications and emergency situations. In simulated practice environments students will gain the skills necessary to work collaboratively with interdisciplinary colleagues. Students will gain practical experience in designated clinical areas and will follow women through pregnancy, birth and the postnatal period in a continuity of care experience.
Level: Undergraduate Level 3 subject
Pre-requisite(s): NURS 2026
Co-requisite(s): NURS 3005 and NURS 3006 for program 4684
Equivalent Subjects: NURS 3028 Midwifery Practice Experience 5
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 3031 Midwifery Professional Practice 6 (10 Credit Points)
Subject Details (p. 4552) Legacy Code: 401224
This subject provides the opportunity for students to consolidate their knowledge and skills in preparation for their role as a midwife. Students will be assessed across the seven standards of the Midwife standards for practice. Students will gain practical experience in designated clinical areas and will follow women through pregnancy, birth and the postnatal period in a continuity of care experience.
Level: Undergraduate Level 3 subject
Pre-requisite(s): NURS 2039 and NURS 3005 and NURS 3006 and NURS 3030 for program 4684
Co-requisite(s): NURS 3025
Equivalent Subjects: NURS 3029 Midwifery Practice Experience 5
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 3032 Professional Practice Experience 5 (10 Credit Points)
Subject Details (p. 4554) Legacy Code: 401016
Professional Practice Experience 5 focuses on the development of the role and clinical skills of the registered nurse when assessing and caring for people across the lifespan who are experiencing acute life-threatening illness and life limiting illness. A simulated professional task will assist with the development of essential clinical communications and a professional experience placement to evaluate clinical skills development. The subject includes 160 hours of Professional Experience Placement.
Level: Undergraduate Level 3 subject
Pre-requisite(s): NURS 2029
Co-requisite(s): NURS 3015
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 3033 Professional Practice Experience 6 (10 Credit Points)
Subject Details (p. 4556) Legacy Code: 401020
This subject will be replaced from Spring 2022 by 401452 Professional Experience Placement. This subject provides a unique opportunity to consolidate and extend the students skill base in preparation for graduate practice. Students will gain an understanding of the congruence between the provision of health care and professional regulatory frameworks in dynamic healthcare contexts. The role of the graduate nurse will be explored through critical reflection and critical thinking of case studies that reflect person-centered practice.The subject includes 240 hours of clinical placement.
Level: Undergraduate Level 3 subject
Pre-requisite(s): Pre-requisites for 4691 and 4693 NURS 1020 Professional Practice Experience 1 NURS 1021 Professional Practice Experience 2 NURS 2028 Professional Practice Experience 3 and NURS 2029 Professional Practice Experience 4 Pre-requisites for 4692 NURS 2028 Professional Practice Experience 3 NURS 2029 Professional Practice Experience 4 NURS 1005 Foundations for Nursing Practice and NURS 2008 Graduate Entry Practice Experience
Co-requisite(s): NURS 3032
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 3034 Promoting Mental Health and Wellbeing 2 (10 Credit Points)
Subject Details (p. 4558) Legacy Code: 401017
This subject builds on the foundations of mental health and wellbeing established in earlier subjects. The relationship between stress and vulnerability will be explored within the context of the psychotic disorders schizophrenia and bipolar affective disorder. Students will gain an understanding of how the principles of recovery, introduced in an earlier subject, are applied to caring for people with schizophrenia and bipolar affective disorder. Altered mood, perception, and thinking will be explored and evidence-based assessment tools and biological and psychosocial interventions introduced for facilitating recovery towards mental health and wellbeing.
Level: Undergraduate Level 3 subject
Co-requisite(s): NURS 2031
Equivalent Subjects: NURS 3024 Mental Health Nursing
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 3035 Promoting Mental Health and Wellbeing 2 (Advanced) (10 Credit Points)
Subject Details (p. 4559) Legacy Code: 401025
This subject will expand further the concepts of mental health and wellbeing established in Promoting Mental Health and Wellbeing 1. The relationship between stress and vulnerability will be critically analysed within the context of the psychotic disorders such as schizophrenia and bipolar affective disorder. Altered mood, perception, and thinking will be explored and evidence-based assessment tools and biological and psychosocial interventions introduced for facilitating recovery towards mental health and wellbeing.
Level: Undergraduate Level 3 subject
Co-requisite(s): NURS 2031
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 3036 Psychosocial Issues in the Perinatal Period (10 Credit Points)
Subject Details (p. 4560) Legacy Code: 401225
In this subject students will gain knowledge of the psychosocial risk and protective factors that influence outcomes for women and their babies. Students will explore issues related to perinatal mental health. This will include antenatal and postnatal depression and anxiety, substance misuse, domestic violence and the midwife's role in supporting women and their families in perinatal grief and loss situations. Through interactive discussions and role play students will strengthen their skills in psychosocial assessment and working in partnership with women and families to explore concerns, facilitate behaviour change in individual and group-based learning contexts and identify effective early intervention strategies and referral pathways.
Level: Undergraduate Level 3 subject
Pre-requisite(s): NURS 2004
Co-requisite(s): NURS 3006 AND
NURS 3030 AND
NURS 3005
Equivalent Subjects: NURS 3027 Midwifery Practice – Teaching and Learning
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 3037 Risk Mitigation and Ethics for Australian Health Professionals (10 Credit Points)
Subject Details (p. 4561) Legacy Code: 401240
This subject will provide a comprehensive understanding of the ethical standards required by health care professionals when providing patient care with a focus on risk minimisation for patients. Recently litigated cases will be used as case studies to explore ethical dilemmas that health professionals can expect to arise over the course of their professional careers. Knowledge gained will greatly assist health professionals to deliver safe and ethical health care to their patients. Only health professionals regulated in Australia whose professional bodies have designated codes of conduct, codes of professional practice and / or codes of ethics will be utilised in this subject.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 3039 Professional Experience Placement (20 Credit Points)
Subject Details (p. 4561) Legacy Code: 401452
Professional Experience Placement is a capstone subject which provides students an opportunity to consolidate the development of the role and clinical skills of the registered nurse in preparation for transition to graduate practice. A simulated professional task will assist with the development of essential clinical communications and a professional experience placement to evaluate clinical skills development. The subject includes 240 hours of Professional Experience Placement.
Level: Undergraduate Level 3 subject
Pre-requisite(s): NURS 1020 AND
NURS 1021 AND
NURS 2028 AND
NURS 2029 AND
NURS 3032
Co-requisite(s): NURS 3002
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 3040 Foundations of Nursing Practice (10 Credit Points)
Subject Details (p. 4563)
Foundations of Nursing Practice is conducted in an intensive study mode that is offered to students with a previous Bachelor degree, Master degree, or higher and completed within the last 10 years. This subject will provide students with the essential foundational and core learning activities to support student transition into the Master of Nursing Practice (Preregistration). If a student is unsuccessful in attaining a satisfactory grade for this subject they will be requested to transfer into the undergraduate Bachelor of Nursing. All assessments in this subject are mandatory with a threshold requirement. There is a 100% attendance requirement in all workshops, tutorials and Clinical Practice Unit sessions.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 3041 Indigenous Australian Health, Wellness and Culture (10 Credit Points)
Subject Details (p. 4564)
Indigenous Australian Health, Wellness and Culture subject will specifically enable nursing and midwifery students to investigate, discuss and develop an understanding of Aboriginal and Torres Strait Islander health, health statistics, historical and present-day issues associated with poor health outcomes in Aboriginal and Torres Strait Islander people. The concepts of cultural safety, health and illness will be discussed in terms of Aboriginal and Torres Strait Islander people. Students will explore and reflect on the impact of the different attitudes, institutional policies and value systems relating to the health of Aboriginal and Torres Strait Islander people in Australia.
Level: Undergraduate Level 3 subject
Pre-requisite(s): NURS 1025 Person-centred Care across the lifespan
Equivalent Subjects: NURS 2001 - Aboriginal and Torres Strait Islander Health
NURS 2039 - Indigenous Australian Health Wellness and Culture
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 3043 Midwife as a Facilitator of Learning (10 Credit Points)
Subject Details (p. 4566)
In this subject students will gain knowledge of adult learning principles and skills in facilitating learning in a range of hospital and community settings, including group antenatal care and childbirth and parenting education sessions. The role of the midwife in supporting women to make informed choices and be self-determined will be explored. In addition, students will gain knowledge and skills in facilitating student and peer learning and will begin to understand their role in teaching and learning as a registered midwife.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 4001 Methods and Methodologies in Midwifery Research (10 Credit Points)
Subject Details (p. 4567) Legacy Code: 401439
This subject will broaden and deepen students understanding of research methodologies and methods and develop research skills in order to apply these to a specific Bachelor of Midwifery (Honours) research project.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 4002 Midwifery Honours Thesis (Part-Time) (60 Credit Points)
Subject Details (p. 4567) Legacy Code: 401443
This is a 60 credit point subject taken over three terms (20 credit points in each term). Research is a necessary undertaking toward the continued development of midwifery science and practice.
The aim of this unit is to both broaden and deepen Bachelor of Midwifery (Honours) students' understanding of research methods and the application of knowledge and skills to conceptualise, design and conduct a research project. The unit provides an opportunity for students, under the guidance of their supervisors to plan and implement a research project related to midwifery which results in the production of a written thesis of between 15,000 to 20,000 words in length, which demonstrates proficiency in the execution of the study and ability to effectively communicate results and conclusions.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 4003 Midwifery Honours Thesis A (Full-time) (20 Credit Points)
Subject Details (p. 4568) Legacy Code: 401441
Research is a necessary undertaking toward the continued development of midwifery science and practice. Midwifery Thesis is comprised of Midwifery Thesis A (20 credit points) which is a continuing subject to Midwifery Thesis B (40 Credit points) in which the completed Midwifery Thesis is due to be submitted for examination. In the Midwifery Thesis A subject, in consultation with their academic supervisors, the student will select a topic, conduct a literature review, design and implement a research study, and report the findings and their implications. The subject provides an opportunity for students, under the guidance of their supervisors to propose, plan and implement a research project related to midwifery, and work towards planning, developing and producing a written thesis due to be completed in the Midwifery Thesis B subject.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 4004 Midwifery Honours Thesis B (Full-time) (40 Credit Points)
Subject Details (p. 4569) Legacy Code: 401442
Research is a necessary undertaking toward the continued development of midwifery science and practice. The aim of this subject is to both broaden and deepen Bachelor of Midwifery (Honours) students' understanding of research methods and the application of knowledge and skills to conceptualise, design and conduct a research project. The subject provides an opportunity for students, under the guidance of their supervisors to plan and implement a research project related to midwifery which results in the production of a written thesis of between 15,000 to 20,000 words in length, which demonstrates proficiency in the execution of the study and ability to effectively communicate results and conclusions.
Level: Undergraduate Level 4 subject
Pre-requisite(s): NURS 4003
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 4005 Midwifery Research (10 Credit Points)
Subject Details (p. 4569) Legacy Code: 401438
Research is a necessary undertaking toward the continued development of midwifery science and practice. The aim of this subject is to both broaden and deepen Bachelor of Midwifery (Honours) students' understanding of various research methods and to extend their ability to discuss, appraise and critique the work of others.
An awareness of available methodologies will prepare students to participate in their own research.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 4006 Nursing Honours Thesis (Part-time) (60 Credit Points)
Subject Details (p. 4570) Legacy Code: 400204
Nursing Honours Thesis Part-Time is a 60 Credit Point multi-term subject (MTS) taken over 18 months comprising three (3) half - Year Terms, with each term having a value of 20 credit points. The first two half year sessions are continuing MTS terms to the third and final half year term in which the written thesis is due to be submitted and examined. The subject provides an opportunity for students, under the guidance of their supervisors to plan and implement a research project related to nursing which results in the production of a written Honours thesis of 15,000-20,000 words in length, which demonstrates proficiency in the execution of the study and ability to effectively communicate results and conclusions.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 4007 Nursing Honours Thesis A (Full-time) (20 Credit Points)
Subject Details (p. 4571) Legacy Code: 400202
Research is a necessary undertaking towards the continued development of nursing science and practice. Nursing Honours Thesis in the full time mode is a 60 Credit Point (CP) subject comprised of Nursing Honours Thesis A FT (20 CP) which is a Multi Term (MTS) continuing subject to Nursing Honours Thesis B FT (40 CP). The subject provides an opportunity for students under the guidance of their academic supervisors to propose, plan and implement a research project related to nursing, and work towards planning, developing and producing a written thesis due to be completed and submitted for examination in the Nursing Honours Thesis B FT subject.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 4008 Nursing Honours Thesis B (Full-time) (40 Credit Points)
Subject Details (p. 4571) Legacy Code: 400203
Research is a necessary undertaking toward the continued development of nursing science, research and practice. Nursing Honours Thesis in the full time mode is a 60 Credit Point (CP) subject comprised of Nursing Honours Thesis A FT (20 CP) which is a Multi Term (MTS) continuing subject to Nursing Honours Thesis B FT (40 CP). The subject provides an opportunity for students under the guidance of their academic supervisors to propose, plan and implement a research project related to nursing, and work towards planning, developing and producing a written thesis due to be completed and submitted for examination in this subject, Nursing Honours Thesis B FT.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 4009 Readings and Methodology (10 Credit Points)
Subject Details (p. 4572) Legacy Code: 400201
This subject will broaden and deepen students understanding of research methodologies and methods and develop research skills in order to enable them to apply these to a specific Bachelor of Nursing (Honours) research project that can contribute to evidence-based practice and nursing disciplinary knowledge.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 4010 Research in Nursing Practice (10 Credit Points)
Subject Details (p. 4573) Legacy Code: 400803
Research is a necessary undertaking toward the continued development of nursing science and practice. The aim of this subject is to both broaden and deepen Bachelor of Nursing (Honours) students' understanding of research methods and to extend their ability to discuss, appraise the work of others and participate in their own research.
Level: Undergraduate Level 4 subject
Incompatible Subjects: LGYA 7109 - Applied Nursing Research
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 5001 Child and Family Health Practice: Supporting Growth and Development (10 Credit Points)
Subject Details (p. 4573)
This subject provides the student with knowledge of the theories of child development and the foundational knowledge and skills to be applied in the screening, surveillance and promotion of health and well-being of young children and families. This includes current immunisation schedules and use of evidence-based developmental screening tools. Content will focus on the normal physical, social and emotional growth and development of young children (0-5 years). The importance of the early years in brain development including infant-parent attachment will be linked to an exploration of child behaviour, sleep and settling, play and safety issues. The child and family health nurses' role in supporting families experiencing infant sleep and settling difficulties and behaviour problems will be addressed. The knowledge gained in this subject will be consolidated through virtual clinical placement.
Level: Postgraduate Coursework Level 5 subject
Equivalent Subjects: NURS 7009 - Child and Family Health Practice Supporting Growth and Development
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 5002 Clinical Practice: Infant and Child Nutrition and Feeding (10 Credit Points)
Subject Details (p. 4574)
This subject focuses on infant feeding including breast feeding as a significant social and cultural process not just an issue of physiology and nutrition. The theoretical component of this subject will focus on the age-appropriate nutrition of infants and young children linked to developmental stages and the role the child and family health professional in supporting families manage associated issues. All areas of early nutrition will be covered including breastfeeding, use of breast-milk substitutes, introduction of solids and toddler nutrition. The knowledge gained in this subject will be consolidated through virtual clinical placement.
Level: Postgraduate Coursework Level 5 subject
Equivalent Subjects: NURS 7012 - Clinical Practice Infant and Child Nutrition and Feeding
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 5003 Perinatal, Infant and Child Mental Health (10 Credit Points)
Subject Details (p. 4575)
This subject enables students to explore the complex issues related to Perinatal, Infant and Child mental health including: the importance of the parent infant relationship to maternal and infant mental health, antenatal and postnatal depression and anxiety, substance misuse and domestic violence. Through examination of these complex issues, students will gain knowledge of the risk and protective factors that influence outcomes for infants, children and families. Strategies to promote emotional wellbeing, positive parent- child relationships and social support for these families is an essential learning component supported by the concepts of targeted and specialist intervention, and early intervention. The knowledge gained in this subject will be consolidated through virtual clinical placement.
Level: Postgraduate Coursework Level 5 subject
Equivalent Subjects: NURS 7055 - Perinatal Infant and Child Mental Health
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 5004 Contemporary Issues in Child and Adolescent Health (10 Credit Points)
Subject Details (p. 4576)
This subject begins with a brief examination of biopsychosocial theories of childhood and adolescence as a background for the critical analysis of current topics in the health and wellbeing of children and adolescents. Case studies will be used to explore topics in child and adolescent health from an interdisciplinary perspective. The subject will also address issues of child and adolescent health amongst diverse populations and in different health care settings. Knowledge gained will support beginning practitioners in nursing to take informed positions on topics relevant to child and adolescent health.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): NURS 7075 - Nursing Practice 3 for program 4785
NURS 3032 - Professional Practice Experience 5 for program 4691 4692 4693 4780
Co-requisite(s): NURS 3002 - Being a Professional Nurse or Midwife for program 4691 4692 4693 or 4780
NURS 7079 - Transition to Professional Nursing for program 4785
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 5005 Waluwin: Health across the lifespan for Mob (10 Credit Points)
Subject Details (p. 4577)
Building on the broad concepts learnt in core subjects either NURS7070 Health, Culture and Wellbeing of Aboriginal and Torres Strait Islander Peoples or NURS3041 Indigenous Australian Health, Wellness and Culture, this subject introduces the student to perspectives of Aboriginal and Torres Strait Islander people's health. Critical aspects of nursing care across the lifespan are examined focusing on the patients emotional, social, physical, and significantly, spiritual wellbeing in addition to family and the communities' response to the key alterations in health. Classroom learning will be supported by a field trip which allows students to experience a culturally immersive experience on Country facilitated by Aboriginal Elders. The field trip will also allow students to develop new skills for practice and develop a deeper appreciation for Aboriginal and Torres Strait Islander peoples and culture. This subject will interest anyone with an interest in contemporary Aboriginal and Torres Strait Islander culture and health care. The field trip may incur an additional cost for students.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): NURS 7070 - Health Culture and Wellbeing of Aboriginal and Torres Strait Islander Peoples for course 4785
NURS 3041 - Indigenous Australian Health Wellness and Culture for course 4691 4692 4693 4780
Co-requisite(s): NURS 3002 - Being a Professional Nurse or Midwife for course 4691 4692 4693 4780
NURS 7079 - Transition to Professional Nursing for course 4785
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 5006 Maternal and Infant Health Care (10 Credit Points)
Subject Details (p. 4578)
Maternal and Infant Health care introduces students to the key physiological, social and emotional issues around pregnancy, labour and birth and early parenthood. It also examines the Australian maternity care system and model of care. Content covered in the subject will include; foetal development, normal physiological labour and birth, health promoting behaviours and development of parenting confidence. Importance will also be placed on the role of social support, infant feeding practices and communication and newborn care. Models of care and the impact of the media on shaping parenting ideas and practices will be covered.
Level: Postgraduate Coursework Level 5 subject
Pre-requisite(s): NURS 7075 - Nursing Practice 3 for program 4785
NURS 3032 - Professional Practice Experience 5 for programs 4691 4692 4693 4780
Co-requisite(s): NURS 3002 - Being a Professional Nurse or Midwife OR
NURS 7079 - Transition to Professional Nursing
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 6001 Clinical Supervision in Health Care (10 Credit Points)
Subject Details (p. 4579)
This subject provides students with the foundational knowledge and skills to enable them in their professional role to become a clinical supervisor. The practice of clinical supervision is one that is a supportive formal process enabling health care professionals to further develop and improve practice, ultimately improving outcomes for health care services and patients. Students will be able to differentiate between clinical supervision and other clinical support alternatives on the supervision continuum that are available to nurses and midwives. Students will also draw on various clinical supervision models and educational theories which underpin clinical supervision practices. Utilising principles of effective supervision (including ethical, legal and professional considerations) students will develop their own skills in self-awareness and reflective practice and be able to apply these skills to enhance the professional growth of peers, colleagues and other health care practitioners.
Level: Postgraduate Coursework Level 6 subject
Equivalent Subjects: NURS 7013 - Clinical Supervision in Health Care
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7001 Advanced Clinical Practice in Mental Health Nursing (20 Credit Points)
Subject Details (p. 4580) Legacy Code: 401202
This is a 20 credit point year-long subject taken over two terms (10 credit points in each term). Students are required to demonstrate the capacity to work autonomously in a mental health setting and be able to utilise supervision to support achievement of subject learning outcomes. Students undertake at least 300 hours supervised advanced clinical practice in assessment, treatment planning and provision of care for clients in a mental health setting. Clinical practice supervision and support is provided by a Primary Supervisor/Mentor/Assessor and a multidisciplinary clinical support network who will review the student's work in respect of working at an advanced level of clinical practice towards the attainment of a Nurse Practitioner qualification. A clinical assessment peer review panel will be convened at the end of the session to assess the student's knowledge, clinical decision-making, understanding of therapeutic interventions including pharmacological and non-pharmacological agents, as well as their capacity to meet all requirements of the Nurse Practitioner Standards for Practice.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): NURS 7006 AND
NURS 7005 AND
NURS 7041
Equivalent Subjects: NURS 7046 Advanced Mental Health Nursing Clinical Practice 1 NURS 7047 Advanced Mental Health Nursing Clinical Practice 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7002 Advanced practice: Infant and Child feeding and Nutrition (10 Credit Points)
Subject Details (p. 4581) Legacy Code: 400834
This subject provides students with advanced theoretical knowledge around infant and young child feeding. The course is predominantly theoretical although students will also be expected to gain practical skills including developing the capacity to undertake comprehensive breastfeeding assessments and assessment of nutritional status in children 0 to 5 years of age. Topics covered include management of complex breastfeeding problems and skills to support women who have unexpected birth outcomes with breastfeeding; the impact of acute and chronic infant and childhood illness on nutritional status and feeding; evidence based strategies and approaches to facilitate good nutritional practices including breastfeeding among disadvantaged and vulnerable populations and working effectively in multidisciplinary teams and with peer or volunteer support groups to promote and support healthy infant and young child feeding practices. There is 120 hours of theoretical content of which approximately 90 hours is directly related to breastfeeding and human lactation. The role of the lactation consultant and legal and ethical issue are addressed for those who wish to work towards this qualification in the future.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7003 Applied Clinical Practice using Simulation (10 Credit Points)
Subject Details (p. 4582) Legacy Code: 401204
Components of skilled nursing practice in acute and critical care settings include clinical reasoning, accountability and patient advocacy. In this subject students will identify a complex case study from their current practice world as the basis for their assessment. This subject utilises clinical simulation and a case study approach to enable students to develop their clinical expertise in their individual workplace. Students will be required to participate in clinical simulation workshops which will be utilised to develop and enhance clinical nursing skills in acute or critical care settings.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7004 Applied Research in Health Care (10 Credit Points)
Subject Details (p. 4582) Legacy Code: 401167
Research is a necessary undertaking toward the continued development of nursing, midwifery and health science and practice. This subject prepares students for undertaking or participating in research in the clinical setting. It also seeks to prepare students to consider higher degree research opportunities. Students will explore the various theoretical underpinnings of research as well as develop a clear understanding of various research designs, data collection methods, sampling techniques and data analysis.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 7109 - Applied Nursing Research
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7005 Assessment for Advanced Practice Mental Health Nurses (10 Credit Points)
Subject Details (p. 4583) Legacy Code: 400228
This subject examines assessment and treatment planning practices for advanced practice nurses. Components of the subject include advanced assessment skills, diagnostic decision making, judicious ordering, reading and interpretation of pathology and radiology tests, triaging and prioritisation, pharmacology, intervention and referral skills. These skills will be addressed in a range of assessment and decision-making situations, to include assessment across the lifespan and recognizing deviation from the norm. Nurses working at an advanced practice level are expected to be able to autonomously undertake comprehensive mental health assessments, and to apply clinical judgement to decision making and treatment planning.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7006 Biological Considerations in Mental Health and Mental Illness for Advanced Practice (10 Credit Points)
Subject Details (p. 4584) Legacy Code: 400957
This subject examines neuroanatomy and neurophysiology as they apply to altered thought, mood, perception and behaviour associated with mental illness and knowledge of physical health problems commonly associated with psychiatric treatment and/or mental illness, their identification, management and treatment.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): -
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7007 Bioscience for Midwifery Practice (10 Credit Points)
Subject Details (p. 4585) Legacy Code: 401088
This subject provides students with an understanding of the biological and physiological aspects of human reproduction including the menstrual cycle, fertilisation and embryology, pregnancy, labour, birth and the early postnatal weeks. Emphasis will be placed on normal maternal anatomy and physiology of pregnancy, labour and birth and the postnatal period. It will include fetal growth and development, adaptation of the newborn and growth and development to six weeks of age.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7009 Child and Family Health Practice: Supporting Growth and Development (10 Credit Points)
Subject Details (p. 4586) Legacy Code: 400972
This subject provides the student with knowledge of the theories of child development and the foundational knowledge and skills to be applied in the screening, surveillance and promotion of health and well-being of young children and families. This includes current immunisation schedules and use of evidence-based developmental screening tools. Content will focus on the normal physical, social and emotional growth and development of young children (0-5 years). The importance of the early years in brain development including infant-parent attachment will be linked to an exploration of child behaviour, sleep and settling, play and safety issues. The child and family health nurses' role in supporting families experiencing infant sleep and settling difficulties and behaviour problems will be addressed. The knowledge gained in this subject will be consolidated through virtual clinical placement.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7010 Child and Family Health: Professional Practice and Frameworks (10 Credit Points)
Subject Details (p. 4586) Legacy Code: 400971
Child and family health is a diverse speciality area with child and family health professionals required to work autonomously across a variety of clinical settings. This subject will focus on the scope and standards of practice of Child and family health practise exploring; historical beginnings and current models of care, appropriate legal & ethical issues and government policies and initiatives that influence practice. Informed by the principles of Primary Health Care, the student will gain skills in supporting families and children within the context of a strengths based partnership model. Health promotion, public health, health surveillance and cultural competence are introduced in this subject. The various strategies for the appropriate support of child and family health professionals will be addressed. In this subject emphasis is also placed on critical thinking and the development of scholarly writing.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: NURS 7063 - Child Family Health Nursing Professional Practice and Frameworks
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7011 Childbirth in the Australian Context (20 Credit Points)
Subject Details (p. 4587) Legacy Code: 401089
This subject provides students with the knowledge to work, using a primary health care approach, with women and their families during childbirth including the transition to parenthood. Emphasis will be placed on the biological, psychosocial and cultural aspects of the pregnancy, birth and the postnatal period and understanding of the role of the midwife in maintaining a woman and family focus within a continuity of care model. The neonatal period will also be examined. Childbirth in our culturally diverse maternity health system will be explored, investigated, analysed and discussed with a specific focus on Aboriginal and Torres Strait Islander peoples. This will include the history of Aboriginal and Torres Strait Islander peoples and how events in history have impacted on their health and birthing practices. Experiences of women from other countries and cultures will be examined.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7012 Clinical Practice: Infant and Child Nutrition and Feeding (10 Credit Points)
Subject Details (p. 4589) Legacy Code: 400830
This subject focuses on infant feeding including breast feeding as a significant social and cultural process not just an issue of physiology and nutrition. The theoretical component of this subject will focus on the age-appropriate nutrition of infants and young children linked to developmental stages and the role the child and family health professional in supporting families manage associated issues. All areas of early nutrition will be covered including breastfeeding, use of breast-milk substitutes, introduction of solids and toddler nutrition. The knowledge gained in this subject will be consolidated through virtual clinical placement.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7013 Clinical Supervision in Health Care (10 Credit Points)
Subject Details (p. 4589) Legacy Code: 401139
This subject aims to provide students with foundational knowledge related to clinical supervision. Clinical supervision is a supportive formal process which enables health care professionals to develop and improve practice, thus potentially improving outcomes for services and service users. Students will explore various models and theories which underpin clinical supervision, and the principles of effective supervision, including legal, ethical and professional considerations. Students will be encouraged to develop skills in self-awareness and reflective practice and to apply these skills to enhance professional growth and outcomes for service users.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7015 Clinical Teaching for Learning (10 Credit Points)
Subject Details (p. 4590) Legacy Code: 400974
This subject prepares nurse educators, clinical facilitators and clinicians for their role as a clinical teacher. Students will identify learner needs to create, plan and implement evidence based teaching interventions and evaluation strategies. Theoretically informed teaching and learning frameworks will be drawn upon in the subject to enable students to develop their knowledge and skills as a clinical teacher in their workplace. The subject utilises an authentic assessment approach to enable students to develop expertise with clinical teaching, student learning and program evaluation.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7016 Collaborative Inquiry for Primary Health Care Action (10 Credit Points)
Subject Details (p. 4591) Legacy Code: 400839
This subject provides students with the opportunity to apply the principles of primary health care to an area of primary health care concern in their workplace or community. Each student will gain comprehensive knowledge of the process of action research, participatory action research and collaborative inquiry to improve an identified issue their workplace practice.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7017 Complex Care (10 Credit Points)
Subject Details (p. 4592) Legacy Code: 401091
This subject provides students with knowledge of complex conditions that may arise during pregnancy, labour, birth and the postnatal period for the woman or her newborn/s. Emphasis will be placed on the biological and physiological aspects of these conditions. In addition, issues surrounding infertility and reproductive technologies available to women will be explored. The subject also integrates physiological, psychosocial and cultural aspects relating to a woman experiencing a complex pregnancy, labour, birth or post birth period. The role of the midwife in maintaining partnerships with women even when childbearing experiences are complex will be discussed and critically analysed. In addition this subject includes critical analysis of ethical aspects affecting midwifery and maternity care.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): NURS 7011 AND
NURS 7034
Co-requisite(s): NURS 7035
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7018 Contemporary Professional Practice in Mental Health Nursing (10 Credit Points)
Subject Details (p. 4593) Legacy Code: 400220
Professional practice in Mental Health Nursing is continually evolving to meet changing social, political and legal requirements related to mental health issues. These requirements include changes in social and political understandings of mental illness and the rights and responsibilities of consumers, carers and providers. There has also been increased emphasis on health promotion, prevention and education in population specific contexts (eg, aged care, child and family, adolescent mental health, alcohol and other drugs services). Mental Health Nurses thus face challenges to develop practice that is congruent with the context of these changing requirements. This subject aims to provide a basis of inquiry into contemporary practice(s) from which the nurse can build an ongoing understanding and appreciation of changing influences.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7019 Cultural and Social Diversity in Health Care (10 Credit Points)
Subject Details (p. 4594) Legacy Code: 401082
This subject encourages students to investigate and discuss the concepts of health and illness in the context of cultural and social diversity. The subject promotes the attainment of critical knowledge and core principles necessary for students to become holistic, culturally and socially sensitive and appropriately adaptable when meeting the health needs of Aboriginal and Torres Strait Islander people, other marginalised and vulnerable groups including refugees and those from LGBTI community, and people from culturally and linguistically diverse (CALD) backgrounds. A multicultural approach provides a framework for students to explore the impact of different attitude and value systems relating to the health of peoples in Australia.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7020 Essentials in Vascular Access (10 Credit Points)
Subject Details (p. 4596) Legacy Code: 401241
Vascular access devices (VADs) are utilised in health care settings across the world. Nurses, junior medical officers and paramedics are typically at the forefront of having to gain peripheral venous access. Many important aspects of vascular access are taught in isolation which are typically brief and provide surface learning rather than good theoretical understanding that underpin sound clinical skill and safe practice required for inserting and managing VADs. This subject focuses on developing knowledge, competency and skills to safely insert peripheral VADs and manage most acute and chronic devices through access to online material, facilitated simulated workshops and practical application in the workplace with a nominated clinical mentor approved by the school.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7021 Essentials of Best Practice in Midwifery (10 Credit Points)
Subject Details (p. 4597) Legacy Code: 401092
This subject provides students with the opportunity to critically evaluate and apply evidence-based approaches to midwifery practice. The subject addresses the value of evidence-based midwifery practice, overviews the contribution of different research approaches to midwifery knowledge development and assists students to develop skills to locate and critique sources of evidence including systematic reviews, meta-analysis, meta-synthesis, integrative reviews, and clinical guidelines. Students are encouraged to become critical consumers of evidence relevant to midwifery practice and to appreciate the process of research design, practice development and practice change.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7022 Ethics in Health Research (10 Credit Points)
Subject Details (p. 4597) Legacy Code: 400975
This subject equips students to explore ethical issues impacting on the conduct of research in the health setting. Students will critically explore ethical issues and their implications in health research, understand the process of gaining Human Research Ethics Approval for research, gain practical experience of developing an ethically sound research plan and application for human ethics approval.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7023 Evidence Based Health Care (10 Credit Points)
Subject Details (p. 4598) Legacy Code: 401168
This subject is designed to develop students' knowledge of the principles and processes necessary for evidence-based clinical practice. General concepts associated with evidence-based health care are explored. In addition, students are assisted to formulate focused clinical questions and conduct a comprehensive literature search for research evidence that may assist in answering such questions. Issues and techniques involved in the rigorous appraisal of research reports are addressed. The importance of clinical significance when making clinical judgements about the implementation of research findings are also explored. All assessments in this subject are mandatory.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: NURS 7024 Evidence Based Nursing
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7025 Health Promotion and the Nurse (10 Credit Points)
Subject Details (p. 4599) Legacy Code: 400210
The challenge for nursing in terms of health promotion is to acknowledge the complex interrelatedness between a person's social and economic situation, their sense of power and control over their life and their physical, emotional and spiritual well-being, i.e. To understand that health is determined by the totality of a person's life circumstances and their inherent traits. This subject uses a social health perspective to examine evidence-based health promotion strategies that can be implemented in the context of nursing practice.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7026 Healthy Families and Communities (10 Credit Points)
Subject Details (p. 4600) Legacy Code: 400831
This subject explores the diversity and complexity of families and communities by examining differing cultural and social values, beliefs and practices relating to family structure, functioning and parenting practices. Students will be encouraged to reflect on their own cultural values and beliefs and how these influence practice when working with children and families. The subject will provide an introduction to community needs, assessment and principles of community development. Focusing on contemporary issues, content includes transition to parenthood, father-inclusive practice, parenting children with disabilities, the changing role of grandparents and carers in Australian society and how neighbourhood and communities influence outcomes for children. This subject will provide students with foundational knowledge in identifying and supporting families with vulnerabilities and fostering resilience. Child protection issues will be addressed.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7027 Infant Mental Health (10 Credit Points)
Subject Details (p. 4601) Legacy Code: 400835
This subject will provide an overview of the issues that impact on infant mental health. Theoretical frameworks influencing the study of infant-parent relationships will be discussed. Nursing management strategies relating to infant mental health disorders and the promotion of positive parent-child relationships will be examined.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 7114 - Introduction to Infant Mental Health - Child and Family Health Nursing
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7028 Leadership in Clinical Practice (10 Credit Points)
Subject Details (p. 4602) Legacy Code: 400235
We are all confronted with the challenge of leadership, regardless of nursing or other healthcare speciality, role, or status. Encompassed within leadership is knowledge of self, relevant theories, skills, and political awareness which are developed through higher education. By developing leadership skills and knowledge we can influence better outcomes for our patients/clients and create more positive working environments. In the unit, Leadership in Clinical Practice, nursing and other healthcare leadership arising from expert clinical practice is explored as a general notion rather than as one arising from any particular clinical speciality. Content includes theories, concepts and styles of leadership, the development of leadership potential, motivation, coaching, and mentorship, concepts of power, authority and empowerment and discussion of contemporary leadership issues. Assignments provide students with the opportunity to apply new knowledge about leadership to their practice, whether they be in management, education, or clinical roles.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): -
Equivalent Subjects: -
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7029 Mental Health Assessment and Application (10 Credit Points)
Subject Details (p. 4603) Legacy Code: 400217
Assessment is an essential component of the nurse/client interaction in mental health/psychiatric nursing. Effective nursing depends on comprehensive, accurate, systematic and continuous data collection. This assists the nurse and client to accurately identify and document critical client issues and formulate management strategies. This subject prepares the student in the area of mental health assessment, in identifying the factors that affect individual/family mental health and applying this knowledge to decisions about appropriate interventions.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): Prerequisite for students in 4691 4780 - NURS 3032 Professional Practice Experience 5
Prerequisite for students in 4785 - NURS 7075 Nursing Practice 3
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7030 Mental Health Nursing Practice 1 (10 Credit Points)
Subject Details (p. 4605) Legacy Code: 400218
This subject will assist the student to develop a comprehensive understanding of the nurse-client relationship in mental health nursing, presenting this relationship in its multiple contexts, (e.g., the interpersonal, cultural and socio-political), in order to appreciate factors influencing this relationship and the way it might be 'lived out' in practice. The subject assists students to understand: (1) the nurse-client relationship and its development; (2) the nature of the relationship between the client and nurse; (3) how skilled nurses use this relationship to assist their clients; and (4) how the type of relationship the nurse develops with the client frequently determines the quality of work they do together.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7031 Mental Health Nursing Practice 2 (10 Credit Points)
Subject Details (p. 4606) Legacy Code: 400219
This subject is designed to challenge the student to consider evidence-based practice in mental health nursing. Nurses are required to be accountable for their clinical practice and to be able to argue the evidence for specific nursing interventions. Students undertake critical analysis of evidence-based practice in mental health nursing as a concept, a means of accountability, as a means of defining nursing knowledge. Students will apply evidence-based practice concepts to specific psychiatric disorders and problems.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7032 Mental Health for Communities (10 Credit Points)
Subject Details (p. 4606) Legacy Code: 400773
Evolving diversity and changes within societies mean that what are understood as adaptive and maladaptive lifestyles, behaviours and attitudes towards mental illness and traditional healing approaches will vary greatly. This subject presents an outline of the themes and topics central to discussions of mental health and illness within a community. It examines the influences of stereotype and stigma, environment, culture, adaptive ability and support systems for psychological well-being while considering approaches which focus on and promote resilience, attachment, a sense of belonging and empowerment. Contemporary mental health and illness issues relating to selected vulnerable groups will be explored.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7034 Midwifery Practice 1 (10 Credit Points)
Subject Details (p. 4607) Legacy Code: 401090
In this subject students will develop skills for the provision of midwifery care across the childbirth continuum through working with women in a continuity of care model and also practice experience in designated maternity practice areas. Using a woman-centred, primary health care model, students will commence recruitment and follow 10 women throughout their pregnancy, labour, birth and for up to six weeks post birth; and under supervision will provide midwifery care to these women. The subject commences with a one week intensive workshop, to expose the students to an elementary level of understanding and application of midwifery care in the antenatal clinic, antenatal ward, birth unit, postnatal ward and special care nursery in preparation for their employment. Concepts introduced during this intensive week will be covered with more complexity during future subsequent weekly workshops.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): NURS 7011
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7035 Midwifery Practice 2 (10 Credit Points)
Subject Details (p. 4608) Legacy Code: 401093
During this subject students will continue to gain practical experience in designated clinical areas and follow their 10 women throughout pregnancy, labour, birth and the postnatal period in a continuity of care model. They will strengthen their skills in undertaking psychosocial assessment, effectively engaging women in services, facilitating groups and working in collaboration with other professionals to support women. In addition, they will work with women with complex health issues. This subject provides students with the knowledge to collaborate with all health professionals and includes assessing procedures for managing obstetric emergencies; transferring women or newborns with complex health issues; and assessing referral pathways.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): NURS 7011 AND
NURS 7034
Co-requisite(s): NURS 7017
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7036 Midwifery Practice 3 (20 Credit Points)
Subject Details (p. 4610) Legacy Code: 401094
In this subject students will consolidate their knowledge and midwifery skills in preparation for their role as a midwife. They will continue to practice in designated clinical areas and follow through their 10 continuity of care experiences. Students will have completed a professional portfolio and reflected on how they can identify and plan for personal professional development and leadership as midwives, including the professional development needs of others. Students will be assessed across the seven midwife standards for practice.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): NURS 7035
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7037 Midwifery as a Profession (10 Credit Points)
Subject Details (p. 4610) Legacy Code: 401087
This subject introduces students to the profession of midwifery. It explores: the meaning of birth; the historical and social contexts of birth; and the role of the midwife through the continuum, from early beginnings to its current legal and professional standing. Within a legal and ethical framework, the Australian College of Midwives (ACM) philosophy and role of the midwife will be explored. Students will also be required to discuss and critically analyse current models of midwifery care.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7038 Partnership in Practice (10 Credit Points)
Subject Details (p. 4611) Legacy Code: 400832
Health services across Australia have demonstrated commitment to the roll-out of Family Partnership Training to all health professionals who support families with young children. This subject will provide an overview of the Family Partnership Model. Participants will examine the theoretical framework underlying the model which emphasises the need for highly skilled professional communication to develop supportive and effective relationships with families. Students will participate in 5 interactive webinars to embed the fundamental concepts and skills associated with the model. Facilitating groups for parents is a key skill of the child and family health professional. In this subject participants will also study how adults learn, and the key skills in understanding and promoting the group process. Working in partnership extends to other professional and agencies, enabling students to develop skills in professional collaboration.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7040 Perspectives on Nursing (10 Credit Points)
Subject Details (p. 4612) Legacy Code: 400774
This subject addresses the origins and development of nursing knowledge. A major focus is the development and progress of the discipline of nursing. It includes an in-depth exploration of the history and philosophy of nursing science, including epistemology and strategies for theory generation in nursing. The impact of borrowed perspectives on research, theory and practice in the discipline of nursing is also explored. In addition, the subject addresses the development of theoretical perspectives in nursing including areas of controversy in the discipline. Numerous perspectives on the relationship between nursing theory, research and practice are considered. A major emphasis in the subject is development of knowledge and understanding of the link between nursing theory, research, practice and related issues.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 7149 - Nursing Knowledge Concepts Models and Theories
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7041 Psychopharmacology for Advanced Practice Mental Health Nurses (10 Credit Points)
Subject Details (p. 4613) Legacy Code: 400858
This subject examines pharmacological principles including functional neuroanatomy review, pharmacokinetic principles, pharmacodynamic principles, and neuropharmacology. Students examine a number of psychotropic drugs: antipsychotic, mood stabilisers, complementary medicines, drugs of abuse/misuse, antidepressant, anxiolytic and hypnotic drugs in relation to targeted symptoms, titration, side-effects, and monitoring of clients from across the lifespan. Decision-making in psychopharmacology is explored. The importance of appropriate collaborative processes between the nurse practitioner, clients across the lifespan and their families in medication management is addressed.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7042 Research Project in Health Care (20 Credit Points)
Subject Details (p. 4614) Legacy Code: 401084
This is a 20 credit point year-long subject taken over two terms (10 credit points in each term). This subject will assist in the further development and maintenance of research culture in health care, and thus enhance the implementation of evidence-based practice. This subject is designed to assist students in applying their research knowledge and skills and provides them with the opportunity to undertake an independent research project and write a dissertation. It is recommended that students interested in undertaking this subject first complete Applied Research in Health Care (NURS 7004) and Ethics in Health Research (NURS 7022) where the dissertation topic will be identified and students will be allocated a supervisor.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): Students in the Master of Child Family Health (Karitane) Master of Nursing or Master of Mental Health Nursing must complete NURS 7004 Applied Research in Health Care AND NURS 7022 Ethics in Health Research before enrolling in this unit

Students in the Master of Primary Health Care must pass NURS 7022 Ethics in Health Research before enrolling in this unit
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7043 Scholarship for Practice Change in Health Care (10 Credit Points)
Subject Details (p. 4614) Legacy Code: 401085
The transformation of practice in healthcare is facilitated when information about creative and innovative practice change and development is documented, disseminated and critiqued through professional channels such as peer reviewed journals, conference papers, discussion papers or project reports. In this subject students will be provided with an opportunity to produce a scholarly piece of work that will disseminate information about transforming practice and improving patient care. The subject aims to enhance scholarly communication skills, provide a vehicle for demonstrating leadership by informing the health professions of innovative solutions for practice change.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: NURS 7044 - Transforming Nursing Practice
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7045 Writing for Publication (10 Credit Points)
Subject Details (p. 4615) Legacy Code: 401086
This subject is about writing for publication in the scholarly health and welfare literature. Students will investigate: the range of publications available and the media through which they are delivered; the process of publishing, the key people involved and their roles; the means by which quality is assured in the publishing process and the ways publications are rated for quality and impact; and the influence of social networking media on publishing. Specifically, the influence of online publishing will be investigated. Students will also gain experience of writing for publication under the guidance of an experienced editor and colleagues from the publishing industry. The subject is also available as an elective to all Postgraduate students in the University.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7048 Aboriginal and Torres Strait Islander Maternal and Newborn Health (10 Credit Points)
Subject Details (p. 4616) Legacy Code: 401349
This subject will specifically enable students to investigate, discuss and develop an understanding of Aboriginal and Torres Strait Islander peoples' sense of identity, culture, and health. Health statistics, as well as historical and contemporary practice issues will be identified. In addition, the subject will explore strategies that have been implemented to address inequities in health outcomes for Aboriginal and Torres Strait Islander families. Further, the subject promotes the development of critical knowledge essential for students to understand their own values, beliefs, biases, and perceptions to become culturally sensitive and appropriately adaptable when meeting the health needs of Aboriginal and Torres Strait Islander women and families.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7049 Care of People with Tuberculosis (TB) (10 Credit Points)
Subject Details (p. 4617) Legacy Code: 401376
This subject examines the care of individuals with Tuberculosis (TB), from initial diagnosis through treatment phases of the disease. Students will explore the role of case management in the care of patients with TB, including strategies to enhance the effectiveness of case managers. Drug resistant TB will be a focus of the subject, especially in relation to its prevention, and the safe management and treatment of patients with different types of drug resistance. Strategies for facilitating community participation in health care will be provided and students will have the tools to develop a community-based health education program focusing on TB. Case studies drawn from across the lifespan and different populations will provide a focus for exploring the pathophysiology of Tuberculosis, diagnostic options, modes of transmission and the pharmacological and non-pharmacological treatment options available.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7050 Clinical Management of Tuberculosis (TB) (10 Credit Points)
Subject Details (p. 4617) Legacy Code: 401377
This subject examines the clinical management of Tuberculosis, particularly in relation to cause, prevalence, transmission, diagnosis, treatment and prevention of the disease. Students will be introduced to the different diagnostic tests used in the management of the disease in both adults and children. Case studies drawn from across the lifespan and different populations will provide a focus for exploring the pathophysiology of Tuberculosis, diagnostic options, modes of transmission and the pharmacological and non-pharmacological treatment options available.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7051 Complex Midwifery Care (10 Credit Points)
Subject Details (p. 4618) Legacy Code: 401350
This subject provides students with knowledge of complex conditions that may arise during pregnancy, labour, birth and the postnatal period for the woman or her newborn/s. Emphasis will be placed on the biological and physiological aspects of these conditions. In addition, issues surrounding infertility and reproductive technologies, and contemporary issues that impact women, such as pre-existing medical conditions and mental health, will be explored. The subject integrates physiological, psychosocial and cultural aspects relating to a woman experiencing a complex pregnancy, labour, birth or post birth period. The role of the midwife in maintaining partnerships with women, even when childbearing experiences are complex, will be discussed and critically analysed. Students will also critically analyse key ethical and legal aspects affecting midwifery and maternity care.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): NURS 7053 AND
NURS 7054
Co-requisite(s): NURS 7052
Equivalent Subjects: NURS 7017 Complex Care
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7052 Complex Midwifery Practice (10 Credit Points)
Subject Details (p. 4619) Legacy Code: 401351
This subject provides students with the knowledge to collaborate with all health professionals and includes developing clinical skills; assessing procedures for managing obstetric emergencies; undertaking simulations of obstetric emergencies; transferring women or newborns with complex health issues; and assessing referral pathways. Students will continue to gain practical experience in designated clinical areas and follow their 10 women throughout pregnancy, labour, birth and the postnatal period in a continuity of care model. They will strengthen their skills in undertaking psychosocial assessment, effectively engaging women in services, facilitating groups and working in collaboration with other professionals to support women.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): NURS 7053 AND
NURS 7054
Co-requisite(s): NURS 7051
Equivalent Subjects: NURS 7035 Midwifery practice 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7053 Foundations of Antenatal and Birth Care (10 Credit Points)
Subject Details (p. 4620) Legacy Code: 401347
This subject provides students with an understanding of the biological and physiological aspects of human reproduction, pregnancy, labour and birth. Emphasis will be placed on the normal maternal anatomy and physiology of pregnancy, labour and birth and applications of skills in the Clinical Practice Unit. Students will apply a primary health care approach to working with women and their families during pregnancy and childbirth. Students will consider psychosocial and cultural aspects of pregnancy, birth and breastfeeding, and the role of the midwife in maintaining a woman and family focus within a continuity-of-care model. Childbirth in our culturally diverse maternity health system will be explored, analysed and discussed. The experiences of Aboriginal and Torres Strait Islander women across health services will also be examined. Concepts introduced during the intensive week will be covered in greater complexity across the semester.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): NURS 7054
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7054 Foundations of Postnatal and Newborn Care (10 Credit Points)
Subject Details (p. 4621) Legacy Code: 401348
This subject is centred on using a primary health, with continuity of- care approach to the care of women and their families during transition to parenthood. Students will investigate the biological, physiological and psychosocial aspects of the postnatal period and the midwife's role.at this time. Culturally diverse practices, including those of Aboriginal and Torres Strait Islander peoples and women from other countries and cultures will be explored. Students develop midwifery skills working with women in a continuity-of- care model and gain experience in maternity practice areas. The subject commences with a one-week intensive workshop exposing students to an elementary level of understanding and application of midwifery care in a maternity setting in preparation for employment. Postnatal care concepts introduced during this intensive practice week will be covered in more detail during subsequent weeks.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): NURS 7053
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7055 Perinatal, Infant and Child Mental Health (10 Credit Points)
Subject Details (p. 4623) Legacy Code: 401375
This subject replaced by NURS 5003 - Perinatal, Infant and Child Mental Health in Spring 2023. This subject enables students to explore the complex issues related to Perinatal, Infant and Child mental health including: the importance of the parent infant relationship to maternal and infant mental health, antenatal and postnatal depression and anxiety, substance misuse and domestic violence. Through examination of these complex issues, students will gain knowledge of the risk and protective factors that influence outcomes for infants, children and families. Strategies to promote emotional wellbeing, positive parent- child relationships and social support for these families is an essential learning component supported by the concepts of targeted and specialist intervention, and early intervention. The knowledge gained in this subject will be consolidated through virtual clinical placement.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7056 Preparation for Midwifery Practice (10 Credit Points)
Subject Details (p. 4623) Legacy Code: 401352
In this unit, students will consolidate their knowledge and midwifery skills in preparation for their role as a midwife. They will continue to practice in designated clinical areas and follow through their 10 continuity of care experiences. Students will complete the professional portfolio and reflect on how they can identify and plan for personal professional development and leadership as midwives, including the professional development needs of others. Students will be assessed across the midwife standards for practice. In addition, students will have the opportunity to examine leadership development and styles within the midwifery profession. Students are encouraged to consider their role in future midwifery leadership.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): NURS 7052
Incompatible Subjects: NURS 7036 Midwifery Practice 3
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7057 Professional Foundations of Midwifery (10 Credit Points)
Subject Details (p. 4624) Legacy Code: 401374
This subject will introduce students to the profession of midwifery from a philosophical, historical, global, and Australian perspective. It will highlight the important role Midwifery plays in the provision of cost effective, high quality care to both women and newborns globally. It will focus on policies and practices that promote respectful and collaborative woman centred care and the value of continuity of midwifery care to achieving these goals. Students will be required to reflect on beliefs around childbirth including their own personal beliefs.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: NURS 7037 Midwifery as a Profession
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7058 Public Health Management of Tuberculosis (TB) (10 Credit Points)
Subject Details (p. 4625) Legacy Code: 401378
This subject examines the ways in which Tuberculosis (TB) is managed from a public health perspective. Students will be introduced to the essential components of a TB Program, particularly focusing on preventing transmission of TB and promoting the health of individuals and communities affected by TB. Learning materials in the subject will be provided to enable students to undertake a Tuberculosis contact investigation, including risk assessment of transmission and management of contacts. Case studies will be utilised to facilitate students' development of effective patient and community education programs.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7059 Ageing in Place: Wellbeing and Sustainability (10 Credit Points)
Subject Details (p. 4626) Legacy Code: 401417
This subject addresses a multi-faceted perspectives of healthy and successful ageing. A major focus is to raise awareness about creating an age-friendly community which facilitates older age groups, including those from culturally diverse backgrounds, and Aboriginal and Torres Straits Islander peoples, to be actively involved in all community activities to stay connected to people and place that are important to them. The multiple perspectives of ageing in place integrates biomedical, physical environment/design, legal, ethical, policy, service provision and social contexts of ageing. Knowledge and skills acquired in this subject are useful for planners, managers and health care providers for those working with aged communities. The subject covers evidence-based approaches affecting physical environment, personal characteristics and psychosocial mechanisms that facilitate older people to age successfully.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): Prerequisite for students in 4785 - NURS 7075 Nursing Practice 3
Prerequisite for students in 4691 and 4780 - NURS 3032 - Professional Practice Experience 5
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7060 Optimising Contribution of Older People (10 Credit Points)
Subject Details (p. 4627) Legacy Code: 401418
This subject addresses issues related gerontocracy (a society whereby elders have power and influence), versus ageism (age-related prejudice or discrimination based on a person's age). Stages of ageing and risk will also be covered, including ethical issues related to the aged communities and the aged care sector. Importantly, this subject will address strategies that need consideration to optimise integration of aged communities, including: active adult retirement communities, poverty safety net and governmental policies, housing, the use of technology, strategies to slow and reverse age-related decline including emerging developments. Issues related to optimising self-determination and 'dignity of risk' among aged communities will also be covered.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7061 Professional Focus: Age-Friendly Future (10 Credit Points)
Subject Details (p. 4628) Legacy Code: 401420
Accepting and embracing the ageing population as assets and not a burden is important towards enabling older people to continue living in security and to fully participate in society. For this to occur, the future of work, design and social spaces need to be responsive to the needs of ageing populations. This subject offers students with the opportunity to assess and reflect on the domains of age-friendliness in alignment with World Health Organisation (WHO) Age-friendly framework relevant to their interest, or their work practice settings. The WHO age-friendly domains, inputs from older people, carers of older people and service providers, are elements to be considered in this proposed quality improvement project.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7062 Project Management in Healthcare (10 Credit Points)
Subject Details (p. 4628) Legacy Code: 401419
Project management knowledge and skills are vital in the healthcare professional work environment. Using scenarios, students will explore their topic of interest, applying principal project management concepts, and integrate these into project planning. Students will learn how to appraise existing projects using a review framework, and identify the key steps within a project life cycle, starting from the conception stage to creating a project implementation plan.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7064 Clinical Teaching and Workplace Learning for Competent Practice (10 Credit Points)
Subject Details (p. 4629) Legacy Code: 401437
This subject prepares educators and clinicians for their role in clinical education by examining educational theory and its relevance and application to teaching and learning in the clinical workplace. Students will identify and operationalise key priorities for learning and teaching in their organisation and address these by providing appropriate and relevant teaching and learning experiences that build the capacity of colleagues (this can also be extended to include patient and family education). The subject also explores the principles and challenges that are associated with the assessment of competence and the strategies that can be utilised to further develop the knowledge and skills of the clinical educator in the professional practice environment.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 7676 - Clinical Teaching and Professional Development NURS 7014 - Clinical Teaching and Professional Development
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7065 Capstone Experience in Health Care (20 Credit Points)
Subject Details (p. 4630) Legacy Code: 401440
This subject offers a range of options for students to integrate, extend and reflect on the professional knowledge and skills gained through their master's level studies. It will provide a framework within which students can explore professionally relevant situations. Students will have the opportunity to nominate, plan and execute a capstone experience relevant to their professional interests. In doing so, students will develop a professional portfolio or e-portfolio that will incorporate the work undertaken during the degree studies and extend to include a critical reflection of their graduate capacity and professional development.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: NURS 7008 - Capstone Experience in Health Care
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7066 Acute Exacerbations of Chronic Conditions (10 Credit Points)
Subject Details (p. 4631) Legacy Code: 401446
Acute Exacerbations of Chronic Conditions utilises an evidence-based approach to develop an understanding of pathophysiology, pharmacological interventions, and nursing care for patients who experience acute exacerbations of chronic conditions.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): NURS 7071 - Introduction to alterations in health
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7067 Acute Life-Threatening Conditions (10 Credit Points)
Subject Details (p. 4632) Legacy Code: 401447
Acute Life-Threatening Conditions utilises an evidence-based approach to develop an understanding of the pathophysiology, pharmacological interventions, and nursing care for people across the lifespan who experience an acute life-threatening condition. An important area of focus is detecting and recognising acute deterioration and escalating care.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): NURS 7066
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7068 Chronic Conditions and Disability (10 Credit Points)
Subject Details (p. 4633) Legacy Code: 401456
Chronic Conditions and Disability utilises an evidence-based approach to develop an understanding of pathophysiology, pharmacological interventions, and nursing care for people across the lifespan who experience chronic conditions and/or disability.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): NURS 7071 - Introduction to alterations in health
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7070 Health, Culture and Wellbeing of Aboriginal and Torres Strait Islander Peoples (10 Credit Points)
Subject Details (p. 4635) Legacy Code: 401445
This subject will specifically enable nursing students to investigate, discuss and develop an understanding of Aboriginal and Torres Strait Islander health, health statistics, historical and present-day issues associated with poor health outcomes in Indigenous Australians. The concepts of cultural safety, health, illness and wellbeing will be discussed and synthesised in relation to Aboriginal and Torres Strait Islander Peoples. Students will explore and reflect on the impact of the different attitudes, institutional policies and value systems relating to the health of Aboriginal and Torres Strait Islander Peoples in Australia.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7071 Introduction to Alterations in Health (10 Credit Points)
Subject Details (p. 4636) Legacy Code: 401458
The primary focus of this subject is the application of the National Safety and Quality Health Service Standards related to regional, national and global Health Priorities . This introduction to Alterations in Health utilises an evidence-based approach to develop an understanding of pathophysiology, pharmacological interventions, and justification of appropriate safe nursing care of people across the lifespan who are experiencing acute, but usually resolvable alterations in their health.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): NURS 3040 - Foundations of Nursing Practice
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7072 Mental Health Nursing Practice (10 Credit Points)
Subject Details (p. 4637) Legacy Code: 401459
Mental Health Nursing Practice develops knowledge and skills to support nursing practice when providing care for people with mental health issues in a range of health care settings. It explores contemporary models of care such as recovery-oriented practice, trauma-informed care, and social determinants approach. Students will develop awareness and plan evidence-based initiatives that promote mental health, prevent and intervene early in illness, facilitate recovery, and promote wellbeing. The subject includes 80 hours of clinical placement.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): NURS 3040 - Foundation of Nursing Practice
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7073 Nursing Practice 1 (10 Credit Points)
Subject Details (p. 4639) Legacy Code: 401460
Nursing Practice 1 focuses on the development of the role and skills of the registered nurse when assessing and providing care for people across the lifespan who are experiencing acute, but usually resolvable conditions. A simulated professional task will assist with the development of essential clinical communications and simulated skills assessment and a professional experience placement will support clinical skill development. The subject includes 160 hours of Professional Experience Placement.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): NURS 3040 Foundations of Nursing Practice
NURS 7077 Pharmacology Knowledge for Nursing Practice
NURS 7071 Introduction to Alterations in Health
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7074 Nursing Practice 2 (10 Credit Points)
Subject Details (p. 4640) Legacy Code: 401461
Nursing Practice 2 focuses on the development of the role and skills of the registered nurse when providing care for people experiencing an acute exacerbation of a chronic condition. A simulated professional task will assist with the development of essential clinical communications and simulated skills assessment and professional experience placement will support clinical skill development. The subject includes 160 hours of Professional Experience Placement.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): NURS 7073
Co-requisite(s): NURS 7068 AND
NURS 7066
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7075 Nursing Practice 3 (10 Credit Points)
Subject Details (p. 4642) Legacy Code: 401462
Nursing Practice 3 focuses on the development of the role and skills of the registered nurse when assessing and caring for people across the lifespan who are experiencing acute life-threatening illness and life limiting illness. A simulated professional task will assist with the development of essential clinical communications and simulated skills assessment and professional experience placement will support clinical skill development. The subject includes 160 hours of Professional Experience Placement.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): NURS 7074
Co-requisite(s): NURS 7067
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7076 Palliative and End of Life Care (10 Credit Points)
Subject Details (p. 4643) Legacy Code: 401463
Palliative and End of Life Care focuses on the palliative approach as a model of care, exploring the benefits of this approach when supporting dying individuals with any life limiting illness. Students will acquire the capabilities to develop self-care strategies to manage their own grief, loss and stress associated with working in a palliative care context.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): NURS 7066
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7077 Pharmacology Knowledge for Nursing Practice (10 Credit Points)
Subject Details (p. 4644) Legacy Code: 401464
Safe medication administration is a fundamental requirement in nursing. It is vital that registered nurses have a solid understanding of pharmacology in order to maximise patient safety in the quality use of medications. This subject will introduce the principles and core concepts of pharmacology where students will combine cognitive, technical and research skills to develop the essential knowledge of pharmacokinetics and pharmacodynamics. Students will be required to systematically develop an understanding of actions and reactions of commonly prescribed drugs using concepts of person-centred care across the lifespan. Principles of safe administration, prescribing, electronic medication management systems, patient education and engagement in medication management are the focus of this subject.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): NURS 7023 - Evidence-based Health Care
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7078 Professional Nursing Practice (20 Credit Points)
Subject Details (p. 4645) Legacy Code: 401465
Professional Nursing Practice provides an opportunity to consolidate the development of the role and clinical skills of the registered nurse in preparation for transition to graduate practice. A simulated professional task will assist with the development of essential clinical communications and a professional experience placement to evaluate clinical skills development. The subject includes 240 hours of Professional Experience Placement. All assessments in this subject are mandatory. Attendance is also mandatory in all workshops and Clinical Practice Unit sessions in this subject.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): NURS 7074 and NURS 7075
Co-requisite(s): NURS 7079
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7079 Transition to Professional Nursing (10 Credit Points)
Subject Details (p. 4646) Legacy Code: 401466
Transition to Professional Nursing explores the process of transition from student to registered health care professional. Students analyse their role as a registered nurse, reflecting on accountability, responsibility, therapeutic and professional relationships, as well as their capability for practice. This subject will build capacity in students to meet their professional responsibilities as capable practitioners in nursing and assist in demonstrating job readiness skills in preparation for new graduate employment opportunities.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): NURS 7075
Co-requisite(s): NURS 7078
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7080 Waluwin: Health across the lifespan for Mob (10 Credit Points)
Subject Details (p. 4647) Legacy Code: 401502
In Spring 2023, this subject replaced by NURS 5005 - Waluwin: Health across the lifespan for Mob. Building on the broad concepts learnt in core subject 401454 - Indigenous Australian Health, Wellness and Culture or subject 401445 - Health, Culture and Wellbeing of Aboriginal and Torres Strait Islander Peoples, this subject introduces the student to perspectives of Aboriginal and Torres Strait Islander people's health looking across the lifespan. Critical aspects of nursing care across the lifespan are examined focusing on the patients emotional, social, physical, and significantly, spiritual wellbeing in addition to family and the communities' response to the key alterations in health. Classroom learning will be supported by a field trip which allows students to experience a culturally immersive experience on Country facilitated by Aboriginal Elders. The field trip will also allow students to develop new skills for practice and develop a deeper appreciation for Aboriginal and Torres Strait Islander peoples and culture. This subject will interest anyone with an interest in contemporary Aboriginal and Torres Strait Islander culture and health care.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): NURS 7070 OR
NURS 2039
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7081 Tuberculosis (TB) Screening and Immunisation (10 Credit Points)
Subject Details (p. 4648)
This subject will prepare registered nurses with the essential knowledge and skills required to perform Tuberculosis (TB) screening and immunisation, semi-independently. Students will be introduced to nurse led approaches for population-based screening and immunisation within a public health disease framework. The governance supporting nurse initiated diagnostic tests for TB and latent TB, as well as immunisation, will be explored. Students will develop the skills (including intradermal injection) required to perform, advocate, and promote screening for TB; latent TB infection and immunisation to prevent TB and vaccine preventable disease, in at risk populations. This will be supported with clinical practice tasks. Case studies will provide a focus for exploring risk factors for latent TB infection and progression to TB disease and opportunities for immunisation against TB and vaccine preventable disease. The nationally endorsed Clinical Skills Sets and Standards of Practice for the Specialist Tuberculosis Nurse will be used as the framework for student learning and assessment.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 7082 Legal and Ethical Requirements to Support Decision Making in Health Care (10 Credit Points)
Subject Details (p. 4649)
Ongoing advances in technology and demands on health care resources mean that health care professionals are required to participate in decisions of legal, ethical, and professional significance. This subject will provide a comprehensive overview about potential legal, ethical, and professional issues that need to be considered in clinical practice. International and Australian legislation, case law and examples of ethical and moral reasoning will be used to provide a framework to support clinical decision-making. The subject design enables students to think critically and support learning using ethical and legal frameworks to provide a real and relevant connection to impact upon clinical practice.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 9001 Higher Degree Research Thesis - Aged Care Nursing (80 Credit Points)
Subject Details (p. 4650) Legacy Code: 800111
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 9002 Higher Degree Research Thesis - Midwifery (80 Credit Points)
Subject Details (p. 4651) Legacy Code: 800109
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NURS 9003 Higher Degree Research Thesis - Nursing (80 Credit Points)
Subject Details (p. 4653) Legacy Code: 800107

Restrictions: Please see the Subject Details page for any restrictions for this subject

Other Ag, Env and Related (AGEN)

AGEN 1001 Water Quality Assessment and Management (10 Credit Points)
Subject Details (p. 2333) Legacy Code: 300814
Water is essential for all life on earth. This subject will equip students with skills in biological, chemical and physical water quality assessment for a sustainable water future. The subject introduces students to healthy natural waterways and contrasting degraded waters impacted by disturbance from human activities. A broad range of pollutants, their sources and the consequences for human health and the ecology of water ways will be investigated. Management strategies will also be examined based on the sound scientific assessment of water quality. Students in this subject will cover water quality legislation, regulation, policy, guidelines and develop competencies in water monitoring, regulation, treatment and management.
Level: Undergraduate Level 1 subject
Equivalent Subjects: AGEN 2002 - Water Quality Assessment and Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

AGEN 1002 Water Quality Assessment and Management (WSTC) (10 Credit Points)
Subject Details (p. 2334) Legacy Code: 700298
Water is essential for all life on earth. This subject will equip students with skills in biological, chemical and physical water quality assessment for a sustainable water future. The subject introduces students to healthy natural waterways and contrasting degraded waters impacted by disturbance from human activities. A broad range of pollutants, their sources and the consequences for human health and the ecology of water ways will be investigated. Management strategies will also be examined based on the sound scientific assessment of water quality. Students in this subject will cover water quality legislation, regulation, policy, guidelines and develop competencies in water monitoring, regulation, treatment and management.

Restrictions: Please see the Subject Details page for any restrictions for this subject

AGEN 3001 Animal Behaviour (10 Credit Points)
Subject Details (p. 2336) Legacy Code: 300878
Focusing on a variety of wildlife and domestic animal species, the subject addresses how classic ecological and evolutionary principles shape animal behaviour by weighing the experimental and observational evidence for each idea. We illustrate concepts with examples from a wide range of taxonomic groups of animals in diverse ecosystems. Students will conduct experimental field and laboratory procedures, as well as observe and work with groups of animals on the UWS Hawkesbury campus.
Level: Undergraduate Level 3 subject
Equivalent Subjects: AGEN 3002 - Animal Behaviour
Restrictions: Please see the Subject Details page for any restrictions for this subject

AGEN 4001 Researching our Changing Environment (10 Credit Points)
Subject Details (p. 2337) Legacy Code: 800195
This subject focuses on learning to critically evaluate current research in topics under study at the Hawkesbury Institute for the Environment and how advanced scholarship in your field of study is conducted. The Hawkesbury Institute for the Environment spans a broad set of fields from soil microbial genomics and microbial ecology to the biogeochemistry, ecology and physiology of plants and microbes, animal ecology and evolution, to ecosystems, landscapes and Australia-wide processes. Teaching sessions are designed around a thematic cross-section of research within HIE, representing many of these areas. The subject also involves enhancing skill in evaluating appropriate research methodologies for asking questions and testing hypotheses, including an introduction to some of the large-scale research facilities within HIE that students may be involved with.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

AGEN 7001 Bushfire Behaviour (10 Credit Points)
Subject Details (p. 2338) Legacy Code: 200457
This subject describes the factors affecting bushfire behaviour and the models which are used to predict bushfire behaviour, the principles of fire ecology, and the assessment of bushfire hazards on property and the environment. Topics include the measurement of fuel, rates of spread and flame length equations, fire danger indices and landscape issues, topographical influences on fire behaviour, the importance of fire regimes and fire thresholds on flora and fauna, habitat and fire impacts on environmental services such as soils and water catchments. The role of fire behaviour in determining impacts on structures is also described.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

AGEN 7002 Ecosystems in a Changing World (10 Credit Points)
Subject Details (p. 2339) Legacy Code: 800170
Natural and managed ecosystems on our planet are experiencing a rapidly changing environment as a consequence of changing patterns of land and resource use, loss of biodiversity, altered atmospheric composition and anthropogenic climate change. This subject will introduce students to ecosystem concepts in the context of ecological and evolutionary responses to global change. Students will obtain practical experience in quantitative analysis of carbon, nutrient, water and energy budgets, and explore the consequences of global change for ecosystem services and biodiversity over a range of spatial and temporal scales. Teaching will be led by HIE staff with expertise in ecosystem responses to environmental change, soil microbial contributions to ecosystem function and the impacts of environmental change on plants, animals and their interactions.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

AGEN 7004 Perspectives of Sustainable Development (10 Credit Points)
Subject Details (p. 2340) Legacy Code: 300397
This subject explores the philosophy, policies and practice of sustainable development. In exploring environmental philosophy the subject provides students with an understanding of the nature and emergence of both modern and post-modern paradigms that influence the direction and nature of current development policy. The nature of environmental policy is examined by developing an understanding of how values and attitudes shape a governing ethic about environmental management. The social, political, economic and ecological elements of sustainable development are unfolded to aid students understanding of what needs to be managed. Particular attention is given to those issues confronting developing countries as they move to become industrialised nations yet have high levels of poverty. Finally, the subject introduces the practice of environmental impact assessment as one management tool used in the management process.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYB 8266 - Environmental Management Core Studies 1 LGYB 8275 - Environmental Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

AGEN 7005 Research Protocol Design and Practice (10 Credit Points)
Subject Details (p. 2340) Legacy Code: 401080
In this subject postgraduate students develop a proposal for a research study in an area of interest, drawing upon their knowledge and experiences from other subjects in their program of study. Students learn how to apply research methods to a variety of research situations and questions; to understand how research questions are developed and answered empirically through suitable choice of research methodology, design and method; and how research findings are validated and communicated.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): All Students must do PUBH 7016
HLTH 7008 for students in 4702
HLTH 7025 for students in 4698
CMPL 7012 for students in 4716
Equivalent Subjects: AGEN 7003 - Methods of Researching
Restrictions: Please see the Subject Details page for any restrictions for this subject

AGEN 7007 Water Planning, Policy and Governance (10 Credit Points)
Subject Details (p. 2341)
The growing pressure on water resources is leading to new and more interconnected challenges of water planning, policy and governance. There have been new developments in water management in the last two decades to cope with the challenges through the introduction of new disciplines, new techniques, new language, and new thinking. In planning, policy and governance of water resources, we need to incorporate ecology, economics, and other social sciences along with water engineering as part of solution to the challenges of water management. This unit will focus on the understanding the complexity water planning, policy and governance and understand how water sustainability can be achieved in integrated and meaningful way in different sectors, scales and landscapes. The topics to be covered include the following: water resources development; monitoring and protection of water resources; adaptive water management; water demand management; national and international water policy; water economics; institutional arrangements; water law; water rights; property regimes; hydro-diplomacy; trans-boundary water issues; national and international water allocation agreements and treaties; water conflict resolution; public participation, consensus building and confidence building; water trading; water politics; water security; water resources management, policy and governance in socially and environmentally sensitive areas and regions.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

AGEN 7008 Water Sustainability in Agriculture (10 Credit Points)
Subject Details (p. 2342)
Population growth, urbanisation and climate change have increased the competition for water and affected water available for agriculture. The growing demand for food must be obtained using existing water resources sustainably. This subject will focus on the current status, trends and challenges of agricultural water management; understanding the practical and technical aspects of crop water requirement; the allocation, distribution, governance and use of water in agriculture; water management at the farm and regional levels; crop water relations, crop yields and water productivity; irrigation, drainage, and salinity in cultivated areas; rainwater harvesting and crop water management in rainfed areas; the use of wastewater and other low quality waters in agriculture; groundwater management in agriculture and conjunctive use of groundwater and surface water; and the internet of things and digital technologies for managing water in agriculture.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

AGEN 7009 Water Sustainability in Catchments (10 Credit Points)
Subject Details (p. 2343)
With global climate change and other extreme weather conditions, water catchments have never been under more pressure than ever. Professionals with training in catchment management are in high demand. This subject will cover four interconnected themes: (i) Water sustainability in the natural catchments; (ii) Water sustainability in urban catchments; (iii) Water sustainability in peri-urban catchments; and (iv) Sustainability through integrated water resources management. These themes will focus on how key hydrologic processes and anthropogenic activities shape water availability. They will examine the complexity of managing water supplies and river systems in different catchments to address a multitude of challenges and issues to achieve water security and sustainable living. In particular, the subject will enable insight into various natural, environmental and socio-economic parameters affecting water sustainability and achieving catchment-level water sustainability.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

AGEN 7010 Sustainability through Transdisciplinary Approaches (10 Credit Points)
Subject Details (p. 2344)
Water sustainability faces enormous social, cultural, ecological, technological, economic, gender and political challenges in an era of climate induced drought and floods, water scarcity, over exploitation and increasing pollution and deepening social inequities. Professionals working in the water management grappling with these challenges usually have disciplinary specific training. To lead positive change requires working in and understanding complexity and communicating with a wide range of different people in varying capacities. This unit will equip participants with critical thinking, self-reflexivity and systemic thinking competences that are required beyond technical and discipline specific knowledge. The subject will cover aspects of transdisciplinary thinking and approaches for sustainable development and resources management, the role of people, culture, society in environmental sustainability and transdisciplinary leadership and professional practice. The subject will include social hydrology, gender equity diversity and social inclusion (GEDSI) water challenges and global Indigenous and traditional water perspectives and practices.
Level: Postgraduate Coursework Level 7 subject

Other Creative Arts (CART)

CART 1009 Exploring the Creative Industries (WSTC) (10 Credit Points)
Subject Details (p. 2751)
Careers in the Creative Industries are on the rise. They're innovation-led, mobile, global and adaptable. In the short-term success can be a matter of luck but a long-term career requires tactics, talent, and savvy business acumen. In this hands-on subject we'll introduce you to some of the key opportunities in the Creative Industries in fields as diverse as Communication, Media, Music, Design, Writing and associated aspects of Intellectual Property Law and Entrepreneurship. We'll look at the Creative Industries from historical and contemporary perspectives and hear from industry contributors working in the field right now. You'll be introduced to 'future of work' skillsets, including entrepreneurship, leadership, collaboration, and communication capabilities, and you'll learn how to situate your own creative knowledge within them. Available to students from all disciplines, this subject will suit you if you're passionate about taking your creative career to the next level.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CART 3001 Modernism (10 Credit Points)
Subject Details (p. 2752) **Legacy Code:** 101033
This subject aims to introduce students to important works of literature from the earlier part of the 20th century. Throughout the course we will be concentrating on literature but will make reference to other art forms (in particular the visual arts) to provide the intellectual context necessary to understanding the ideas of the period. There will be a close study of a small number of important novels or works of poetry from the period, with a close consideration of techniques of writing and the way these techniques contribute to an understanding of the themes in the works.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CART 6001 Writers at Work (10 Credit Points)
Subject Details (p. 2752)
This subject introduces students to Australian writers currently at work in the industry. How do Australian writers juggle the business and creative aspects of writing? Where do they publish, what forms do their creative practices take, and how do they survive financially? The classes will be a mixture of guest lectures and interviews in which writers, editors and agents share their experience of writing industries. Students will be encouraged to actively engage with industry professionals, and to engage critically with the work of significant Australian writers.
Level: Postgraduate Coursework Level 6 subject
Equivalent Subjects: CART 7020 - Writing Form
Restrictions: Please see the Subject Details page for any restrictions for this subject

CART 6002 Reading and Writing Australia (10 Credit Points)
Subject Details (p. 2753)
This subject will be a course of reading, taking in a variety of Australian narratives across the country's long cultural history. Students will look at art, oral storytelling, film, fiction, poetry and non-fiction, and use these texts as a jumping-off point or inspiration for their own work, simultaneously finding themselves in and creating new spaces in Australian narrative. The subject will consider Indigenous storying, urban and regional literatures, colonial legacies and how these shape aesthetics and narratives of belonging. Does Australia have a national literature, and if so, what does it mean to writers and readers in the 21st century?
Level: Postgraduate Coursework Level 6 subject
Equivalent Subjects: CART 7022 - Writing Sounds Images Texts
Restrictions: Please see the Subject Details page for any restrictions for this subject

CART 6003 Research Methods in the Creative Arts (10 Credit Points)
Subject Details (p. 2753)
This subject investigates conceptual, theoretical and practice-based models used in Creative Arts Research. It introduces students to a variety of important methodologies, including empiricism, experimentation, practice-based research, performativity-as-method, and narrative inquiry. It also focuses on writing as a creative praxis that has an important relationship to all the creative arts. Methodologies will be explored through the analysis of various theoretical and conceptual models that are produced through and applied in creative work. The subject will include the production of a creative work, and a variety of strategies for analysing and documenting this and other creative work, including observation, participation, reflection, contextualisation and representation. The subject also examines the relationships between theory and practice, and it will look at the conditions under which creative arts research is produced, exploring its meanings, effects and affects. The subject is suitable for academic research students who intend to include some non-traditional research outcomes in their work.
Level: Postgraduate Coursework Level 6 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CART 6004 Creative Writing Practice (20 Credit Points)
Subject Details (p. 2754)
This subject consolidates the student's journey towards producing an extended creative work in Year 2 for the Masters Project. Students are guided in responding to writing exercises set by their tutor and are given feedback on their writing practice. They explore and experiment within different forms and genres, including genres of fiction (such as the short story, the novel, YA fiction and auto-fiction), non-fiction (including the personal essay, environmental writing, memoir and the art of criticism) and poetry (including experimental narrative). This subject progresses towards writing and workshopping a lengthier creative piece, which will form part of the student's final assessment.
Level: Postgraduate Coursework Level 6 subject
Equivalent Subjects: CART 7002 Applied Practice in Literary Studies and Creative Writing
Restrictions: Please see the Subject Details page for any restrictions for this subject

CART 6005 Creative Methods in Research (20 Credit Points)
Subject Details (p. 2755)
What is practice-led research, and how do its methods differ from more traditional research approaches? This subject familiarises students with methods of pursuing and presenting practice-led research across the disciplines of literary studies and creative writing. Working with experienced authors and researchers, students will have the opportunity to explore these methods in their own research or creative practice. The subject includes specific writing exercises that cover a range of practice-led research skills, such as using research databases, critical writing, and building research arguments using creative texts. Students will be guided to develop the skills needed to undertake their extended Masters Project.
Level: Postgraduate Coursework Level 6 subject
Equivalent Subjects: CART 7001 - Applied Methods in Literary Studies and Creative Writing
Restrictions: Please see the Subject Details page for any restrictions for this subject

CART 6006 Creative Non-Fiction (10 Credit Points)
Subject Details (p. 2756)
This subject engages with the diverse and growing field of creative non-fiction. Students will read and analyse a wide range of non-fiction forms and subjects such as the personal essay, memoir, criticism, true crime, nature and travel. They will discuss various ethical complexities of telling true stories or representing 'truth', and address why creative non-fiction has become one of the most visible and rapidly growing genres in Australian and international publishing. Students will consider voice, form and point-of-view and produce a creative assessment with a view to pitching for publication in an Australian journal.
Level: Postgraduate Coursework Level 6 subject
Equivalent Subjects: CART 7019 - Writing Process
Restrictions: Please see the Subject Details page for any restrictions for this subject

CART 6007 Writing and Genre (10 Credit Points)
Subject Details (p. 2756)
In this subject, students engage with the conventions of genre writing, including (but not limited to) crime, fantasy, romance, historical and/or speculative fiction. Students will study a range of genre texts as a jumping-off point for their own work, gaining experience in the conventions of different genres as a pathway to producing a longer work in a chosen genre and form. The class includes collective workshopping and discussion with peers about drafts of written work. Students' work for final assessments will demonstrate both an understanding of the conventions of a chosen genre and a willingness to challenge and extend them.
Level: Postgraduate Coursework Level 6 subject
Equivalent Subjects: CART 7021 - Writing and Ideas
Restrictions: Please see the Subject Details page for any restrictions for this subject

CART 7001 Applied Methods in Literary Studies and Creative Writing (20 Credit Points)
Subject Details (p. 2757) Legacy Code: 102220
From Autumn 2023, this subject is replaced by CART 6005 - Creative Methods in Research. This subject familiarises students with methods of pursuing and presenting research across the discipline of literary studies as well as with regard to the kinds of research required for undertaking creative writing. It further provides students with the opportunity to explore these methods in their own research or creative practice. The subject is comprised of specific training exercises, which will enable students to develop the research skills necessary to developing for their masters project.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: HUMN 4009 - Research Design 1 Theories of Enquiry HUMN 4010 - Research Design 2 Practices of Research
Restrictions: Please see the Subject Details page for any restrictions for this subject

CART 7002 Applied Practice in Literary Studies and Creative Writing (20 Credit Points)
Subject Details (p. 2758) Legacy Code: 102222
In 2023, this subject is replaced by CART 6004 - Creative Writing practice. This subject familiarises students with the practice of pursuing and presenting research and methods in literature and related forms as well as with regard to the kinds of research required for undertaking creative work. It provides students with the opportunity to explore these methods in their own research and/or creative practice. This subject opens out into workshops in which students work through elements of the work they are developing for their masters project.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: HUMN 4009 - Research Design 1 Theories of Enquiry HUMN 4010 - Research Design 2 Practices of Research
Restrictions: Please see the Subject Details page for any restrictions for this subject

CART 7004 Art Therapy: Approaches and Applications (20 Credit Points)
Subject Details (p. 2759) Legacy Code: 102354
This subject introduces the spectrum and variety of contemporary art therapy approaches, as they are taken up with and regarded by diverse participants in a range of community and clinical contexts. Students will critically consider how art therapy is applied and adapted to assist people with particular problems and categories of distress. The emergence and problematisation of clinical populations and client groups will be examined, with a view to developing an art therapy practice informed by critical psychological and social perspectives. An experiential component will provide practical experience in exploring art therapy processes and techniques by working in group situations led by experienced art therapists.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): CART 7005
Equivalent Subjects: CART 7003 - Art Therapy Application to Client Groups
Restrictions: Please see the Subject Details page for any restrictions for this subject

CART 7005 Art Therapy: Histories, Theories, Groups (20 Credit Points)
Subject Details (p. 2759) Legacy Code: 101303
This subject explores theories and practical experiences relevant to art therapy. Consideration is given to the major theoretical frameworks of art therapy, its historical development and group processes. There is a major experiential component which provides practical experience in exploring the process of art therapy by working in a group situation led by an experienced art therapist/s. The process will be explored and examined in relation to the self, to the self as artist and to therapeutic practice.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: LGYA 7428 - Art Therapy Theory and Practice 1 LGYA 9676 - Art Therapy Theory and Practice 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

CART 7007 Creativity: Theory and Practice (20 Credit Points)
Subject Details (p. 2760) Legacy Code: 102376
Research in communication arts utilises a range of investigative procedures appropriate to the theory and practice of each creative arts discipline. This subject will introduce fundamental research languages, methods, and outcomes relevant to the creative arts disciplines, and encourage students to develop approaches best suited to their theory and practice. Students will write and defend a research proposal and paper for a research program: the subject will enable students to apply a rigorous research framework to their work. Students will engage with a range of significant and critical texts which address the broad implications of practices and theories in creative arts disciplines.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CART 7010 Integrating Arts and Therapy (20 Credit Points)
Subject Details (p. 2761) Legacy Code: 102527
This subject introduces art therapy students to an understanding of art psychotherapy theory through the lens of contemporary art and the translation of foundational psychotherapy knowledge and skills into art therapy practice. This subject builds on the micro skills of counselling and psychotherapy learned in Counselling Skills for the Allied Professions, through the scaffolded introduction and practice of art therapy clinical skills during intensive group work supported by staff. The subject also offers an opportunity for students to demonstrate their emerging understandings of art therapy by producing and exhibiting an artwork on a chosen aspect of the relationship between art and psychotherapy.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): CART 7005 AND
WELF 7032 AND
WELF 7029
Equivalent Subjects: WELF 7005 - Counselling 2
Incompatible Subjects: WELF 7010 - Foundations of Psychotherapy and Counselling 2 CART 7011 - Integrating Arts and Therapy
Restrictions: Please see the Subject Details page for any restrictions for this subject

CART 7013 Masters Project (40 Credit Points)
Subject Details (p. 2762) Legacy Code: 102255
The Masters Project is the culmination of the Master of Arts in Literature and Creative Writing. Students will build up to being able to complete a long written project. For many students this will be a creative project (creative writing, or related media including music). This involves both the creative work (normally 11,000 words) along with an 'exegesis' that offers a critical overview of the ideas within it (4,000 words). Other students might choose to write a long critical essay in literary studies (15,000 words). There is no class work; rather, students work individually with a supervisor with significant expertise in the area in researching and writing their Project.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: LGYA 1660 - Masters Project
Restrictions: Please see the Subject Details page for any restrictions for this subject

CART 7014 Research Methods in the Creative Arts (20 Credit Points)
Subject Details (p. 2762) Legacy Code: 102375
In Spring 2023, this subject is replaced by CART 6003 - Research Methods in the Creative Arts.This subject investigates conceptual and theoretical models used in Creative Arts Research. It introduces students to a variety of important methodologies, including empiricism, experimentation, practice-based research, performativity-as-method, and narrative inquiry. It will also focus on writing as a creative praxis that has an important relationship to all the creative arts. Methodologies will be explored through the analysis of various theoretical and conceptual models that are applied in and produced through creative work. The subject will include a variety of strategies for analysing and documenting creative work, including observation, participation, reflection and representation. It will also examine the divisions between theory and practice, asking whether theory is in itself a practice that empiricism describes. It will look at the conditions under which creative arts research is produced, exploring its meanings, effects and affects.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CART 7018 Writing Practice and Tradition (10 Credit Points)
Subject Details (p. 2763) Legacy Code: 102498
This subject will consider the nature of writing in terms of both writing and editorial practice. It will involve the analysis of major works by writers (both of fiction and non-fiction) within particular traditions and communities and reflect on the themes of these works and the processes through which they emerge. It will explore the power of the word to shape our understanding of the world. This reflection will be both theoretical and practical.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: CART 7016 - Word (Literary Traditions)
Restrictions: Please see the Subject Details page for any restrictions for this subject

CART 7019 Writing Process (10 Credit Points)
Subject Details (p. 2764) Legacy Code: 102499
In Quarter 4 2023, this subject is replaced by CART 6006 - Creative Non-Fiction. This subject will consider elements of the physical world around us: the phenomena we inhabit which form our sense of self. Focusing on literature and how meaning is created in literary form the subject will consider the interaction between the created world and the real world. It will focus on method and process in writing. In doing this it will engage with ideas from a number of areas, including science, philosophy, and literary theory in considering particular aspects of both our interaction with world, and how it shapes us, and the manner in which art shapes and forces itself upon the world. A specific theme related to the process of creation in art will be addressed.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: CART 7017 - World (Art and Nature)
Restrictions: Please see the Subject Details page for any restrictions for this subject

CART 7020 Writing and Form (10 Credit Points)
Subject Details (p. 2764) Legacy Code: 102500
In Quarter 2, 2023 this subject replaced by CART 6001 - Writers at Work. Literature has always involved playing with language and shaping words into specific forms. The European avant-gardes of the 1910s, 20s and 30s swept aside traditional forms and valued kinds of playing that many cultural institutions and aesthetic authorities of the times regarded as childish. This unit will examine the interactions of play and form in experimental writing. Taking the manifesto as a means for outlining the scope and parameters of experimentation, it will explore a variety of calls-to-action regarding writing and form, and reactions to these in a range of literary forms including short fiction, poetry, and the essay.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: CART 7015 - Search (Translation)
CART 6001 - Writers at Work
Restrictions: Please see the Subject Details page for any restrictions for this subject

CART 7021 Writing and Ideas (10 Credit Points)
Subject Details (p. 2765) Legacy Code: 102497
From Autumn 2024, this subject is replaced by CART 6007 - Writing and Genre. This subject will focus on a particular idea or concept that is of major importance to the diverse cultural, artistic and philosophical understandings we have of ourselves. It will then look to explore how the idea operates through these differing understandings and the problems it poses for representation. The theoretical and creative texts examined will focus both on the nature of the idea and how it might be better understood or made use of in creative practice.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: CART 7009 - Idea (Conceiving Experience)
Restrictions: Please see the Subject Details page for any restrictions for this subject

CART 7022 Writing, Sounds, Images, Texts (10 Credit Points)
Subject Details (p. 2766) Legacy Code: 102501
In Spring 2023 this subject replaced by CART 6002 - Reading and Writing Australia. This subject will involve a reflection on practice-based research in the arts. It will involve a consideration of how various art-forms might interact and inform one another. There will, then, be a focus on interdisciplinary interaction in the arts: across music, visual arts, and writing, with a strong interest in the potentials of new media. Throughout we will make comparisons with the relationship between sound and text in film, and in the media more broadly.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: CART 7008 - Display (Sounds Images Text)
Restrictions: Please see the Subject Details page for any restrictions for this subject

EDUC 1010 Educational Psychology (WSTC) (10 Credit Points)
Subject Details (p. 3171)
This subject is designed to help students to develop the dispositions and critical skills to create learning communities that are academically challenging, developmentally appropriate and culturally responsive. The subject highlights how the inherent qualities of a child and their environmental systems interact to influence how they grow, develop, and learn. It will develop students knowledge of the ways in which children's development is embedded in context to inform their instructional strategies. It examines a body of classic and current theories, research and practice relating to the cognitive, physiological, and social/emotional needs of children and the relevance of these for classroom practice. Particular emphasis is given to developing responsive teaching practices which promote social and emotional wellbeing of children and are underpinned by high-quality relationships which extend to include the valuing of families and the wider community.
Level: Undergraduate Level 1 subject
Equivalent Subjects: TEAC 1011
Restrictions: Please see the Subject Details page for any restrictions for this subject

EDUC 1012 Literacy and Numeracy for Educators (WSTC) (10 Credit Points)
Subject Details (p. 3172)
The primary purpose of this subject is to equip students with personal literacy and numeracy skills necessary for academic success. This subject aims to develop students personal literacy and numeracy skills necessary for participating in academic and professional contexts. It also supports pre-service teachers as literate and numerate citizens to strengthen positive attitudes, skills, and knowledge about literacy and numeracy roles in everyday contexts. Students will have opportunities to develop their interpersonal, verbal, and non-verbal communication skills. These skills are integral to the inherent requirements of a graduate teacher who will be required to undertake the national literacy and numeracy test mandated by the Australian Government. As a pre-service teacher, students will also develop confidence and competence in their understanding of the roles of literacy and numeracy in society, with particular emphasis on problem-solving and effective communication in practical situations. Students will be provided with opportunities to develop critical self-awareness, self-regulation, and the ability to organise oneself as a self-directed learner. Essential elements of academic scholarship, including information media literacy, understanding assessment, and academic integrity, will be developed.
Level: Undergraduate Level 1 subject
Equivalent Subjects: TEAC 1038
Restrictions: Please see the Subject Details page for any restrictions for this subject

EDUC 1013 Sociology for Educators(WSTC) (10 Credit Points)
Subject Details (p. 3172)
This subject#includes the study of society, culture, gender, ethnicity, sexuality, and social class. It explores sociological understandings of the impact of the social on individuals and how this influences education, knowledge, society, and change. The subject addresses the diverse needs of children in complex contexts. It will provide students with opportunities to reflect on universal assumptions often imposed on children, families, and communities, through applying analytical tools and developing their professional identity as critical reflexive educators.
Level: Undergraduate Level 1 subject
Equivalent Subjects: TEAC 1031
Restrictions: Please see the Subject Details page for any restrictions for this subject

EDUC 2015 Education for Sustainability (WSTC) (10 Credit Points)
Subject Details (p. 3172)
Increasingly, the need to develop sustainable ways of living that can reduce our ecological footprint and conserve precious natural resources for future generations is recognised as a critical concern of education at all levels. Developing 'sustainability literacy' requires new ways of thinking and learning that enable us to recognise the connections between environmental concerns, social patterns, and individual actions. This subject approaches key issues in sustainability education with a learner-centred approach that builds skills for inquiry, analysis and creative action and involves a three-hour field trip. It promotes personal and social change, develops civic values, and will empower students to be a leader for a sustainable future.
Level: Undergraduate Level 2 subject
Equivalent Subjects: TEAC 2018
Restrictions: Please see the Subject Details page for any restrictions for this subject

Other Engr. and Related Tech (ENGR)

ENGR 0001 Academic Skills for Engineering (WSTC Prep) (10 Credit Points)
Subject Details (p. 3221) Legacy Code: 700202
This subject is designed to assist students to become successful independent reflective learners. It introduces students to a range of theories and concepts to facilitate the development of practical skills and personal attitudes necessary for success in tertiary study. Emphasis is placed on developing the key competencies of scientific inquiry - collecting, analysing, organising and communicating information as well as solving problems, particularly when related to using mathematical ideas and techniques.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1004 Design Science (WSTC) (10 Credit Points)
Subject Details (p. 3224) Legacy Code: 700126
An explanation and description of how the built environment works is essential to designers and construction professionals. This subject provides an introduction to physical units of measurement, tolerance, statics, dynamics, acoustics and thermal properties. It also allows students to interpret and apply the concepts of electricity, energy, work and power to the built environment. Students engage with these concepts through a hands-on learning experience including practical projects and live demonstrations.
Level: Undergraduate Level 1 subject
Pre-requisite(s): Students enrolled in 7015 Diploma in Construction Management or 7065 Diploma in Construction Management Extended or 7042 Bachelor of Construction Management (WSTC FYP) or 7081 Bachelor of Construction Management Extended (WSTC FYP) must pass MATH 0027 Scientific Methods for Construction Management (WSTC Prep) before enrolling in this unit
Equivalent Subjects: ENGR 1003 Design Science
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1006 Design Studio 2: Form and Production (10 Credit Points)
Subject Details (p. 3225) Legacy Code: 301075
From Spring 2020, this subject will be replaced by301286 - Designing for People: Applied Ergonomics. This subject equips students with the skills to use creative design and structured decision making to solve challenging problems. Students will develop their understanding of design process by creating experimental models using various methods, including 3D rapid prototyping. Students will also record their design process via multimodal media, in both digital and non-digital format. They will also reflect upon the design process through the CDIO framework (Conceive, Design, Implement, Operate) and CAD (Computer-Aided Design).
Level: Undergraduate Level 1 subject
Equivalent Subjects: ENGR 1017 - Form and Production ENGR 1014 - Engineering and Design Concepts
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1008 Engineering Materials (10 Credit Points)
Subject Details (p. 3225) Legacy Code: 300965
This subject will introduce fundamentals of engineering materials. The topics will include materials structure, properties, processing and applications, degradation of materials, sustainability, and the selection of materials for various engineering applications.
Level: Undergraduate Level 1 subject
Equivalent Subjects: ENGR 1014 - Engineering Design Concepts (EDC) ENGR 1034 - Engineering and Design Concepts (UWSC) LGYB 0481 - Engineering and Design Concepts (UWSC Assoc Deg) ENGR 1009 - Engineering Materials (WSTC Assoc Deg) ENGR 1010 - Engineering Materials (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1009 Engineering Materials (WSTC AssocD) (10 Credit Points)
Subject Details (p. 3226) Legacy Code: 700147
This subject will introduce fundamentals of engineering materials. The topics will include materials structure, properties, processing and applications, degradation of materials, sustainability and the selection of materials for various engineering applications.
Level: Undergraduate Level 1 subject
Equivalent Subjects: ENGR 1014 - Engineering and Design Concepts ENGR 1034 - Engineering and Design Concepts (UWSC) LGYB 0481 - Engineering and Design Concepts (UWSC Assoc Deg) ENGR 1008 - Engineering Materials ENGR 1010 - Engineering Materials (WSTC)

ENGR 1011 Engineering Physics (10 Credit Points)
Subject Details (p. 3228) Legacy Code: 300963
This subject serves as an introduction to the fundamentals of engineering physics with appropriate applications in a wide range of engineering and industrial design systems.
Level: Undergraduate Level 1 subject
Equivalent Subjects: ENGR 1028 - Physics and Materials ENGR 1035 - Physics and Materials (UWSC) LGYB 0486 - Physics and Materials (UWSC Assoc Deg) ENGR 1013 - Engineering Physics (WSTC) ENGR 1012 - Engineering Physics (WSTC AssocD)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1012 Engineering Physics (WSTC AssocD) (10 Credit Points)
Subject Details (p. 3229) Legacy Code: 700153
This subject serves as an introduction to the fundamentals of engineering physics with appropriate applications in a wide range of engineering and industrial design systems. Students will be expected to solve problems by applying the laws and principles of engineering physics in the following areas covered by the subject - units and vectors, linear and circular motion, photons, electrons and atoms, force systems and equilibrium, work and energy applications, dynamics of rotational motion, fluid dynamics, heat and thermodynamics, periodic motion and wave phenomena, electricity and magnetism.
Level: Undergraduate Level 1 subject
Equivalent Subjects: ENGR 1011 - Engineering Physics ENGR 1013 - Engineering Physics (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1013 Engineering Physics (WSTC) (10 Credit Points)
Subject Details (p. 3229) Legacy Code: 700151
This subject serves as an introduction to the fundamentals of engineering physics with appropriate applications in a wide range of engineering and industrial design systems.
Level: Undergraduate Level 1 subject
Pre-requisite(s): Students enrolled in 7034 Diploma in Engineering 7066 Diploma in Engineering Fast Track or 6033 Diploma in EngineeringBachelor of Engineering Studies must pass PHYS 0003 Foundation Physics 2 before enrolling in this unit
Equivalent Subjects: ENGR 1028 - Physics and Materials ENGR 1011 - Engineering Physics ENGR 1035 - Physics and Materials (UWSC) LGYB 0486 - Physics and Materials (UWSC Assoc Deg) ENGR 1012 - Engineering Physics (WSTC Assoc Deg)

ENGR 1018 Fundamentals of Mechanics (10 Credit Points)
Subject Details (p. 3230) Legacy Code: 300463
In this subject students acquire knowledge about the action and interaction of forces, moments and couples in two and three dimensions. Students then apply this to the analysis of the equilibrium of single bodies, and of trusses, mechanisms, and transversely loaded beams. In addition, students study the dynamics of a non-rotating body, and a body rotating about a fixed axis. Further, they study the friction between bodies. Students conduct experiments to see how the lecture content applies to the real world, and make extensive use of vector algebra.
Level: Undergraduate Level 1 subject
Equivalent Subjects: ENGR 1020 Fundamentals of Mechanics (WSTC) ENGR 1019 Fundamentals of Mechanics (WSTC Assoc Deg)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1019 Fundamentals of Mechanics (WSTC AssocD) (10 Credit Points)
Subject Details (p. 3231) Legacy Code: 700113
This subject deals with the action and interaction of forces, moments and couples in two and three dimensions. It examines the equilibrium of single bodies, and of trusses and mechanisms. It then looks at the friction between bodies. It covers the dynamics of a non-rotating body, and a body rotating about a fixed axis. Finally, internal loadings are investigated - particularly within a transversely loaded beam. The subject makes extensive use of vector algebra.
Level: Undergraduate Level 1 subject
Equivalent Subjects: ENGR 1020 - Fundamentals of Mechanics (WSTC) ENGR 1018 - Fundamentals of Mechanics
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1020 Fundamentals of Mechanics (WSTC) (10 Credit Points)
Subject Details (p. 3232) Legacy Code: 700023
This subject deals with the action and interaction of forces, moments and couples in two and three dimensions, on machine elements and simple structures. It examines the equilibrium of single bodies, of multi-body structures and of mechanisms. It then covers the dynamics of a particle. A systematic approach to solving practical engineering design problems is provided. The subject makes extensive use of vector algebra.
Level: Undergraduate Level 1 subject
Pre-requisite(s): Students enrolled in 7034 Diploma in Engineering 7066 Diploma in Engineering Extended or 6033 Diploma in EngineeringBachelor of Engineering Studies must pass PHYS 0003 Foundation Physics 2 before enrolling in this unit
Equivalent Subjects: ENGR 1018 - Fundamentals of Mechanics ENGR 1019 - Fundamentals of Mechanics (WSTC Assoc Degree)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1023 Introduction to Engineering Business Management (WSTC AssocD) (10 Credit Points)
Subject Details (p. 3233) Legacy Code: 700114
This subject will cover aspects of modern engineering business management. This subject of study will provide students an opportunity to look at small, medium and large Engineering businesses and the role of Engineering Associates in those organisations.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1024 Introduction to Engineering Practice (10 Credit Points)
Subject Details (p. 3234) Legacy Code: 300964
This subject encourages students to explore the professional responsibilities and challenges faced by Engineers. Students are introduced to emerging issues and approaches in the engineering profession, with particular attention given to using a systems approach to solve engineering problems. Students engage in a semester-long research and problem solving task that addresses technical, environmental and social sustainability imperatives and fosters fundamental research and communication skills. Special emphasis is placed on lifelong learning, academic literacy and professional skills including information literacy, project management, engineering drawing and teamwork which equip students for subsequent academic and professional pursuits.
Level: Undergraduate Level 1 subject
Equivalent Subjects: ENGR 1015 Engineering and Industrial Design Practice LGYA 5705 Introduction to Professional Practice ENGR 1016 Engineering Design and Construction Practice ENGR 1033 Engineering Design and Construction Practice LGYB 0482 Engineering Design and Construction Practice ENGR 1026 Introduction to Engineering Practice and ENGR 1025 Introduction to Engineering Practice
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1025 Introduction to Engineering Practice (WSTC AssocD) (10 Credit Points)
Subject Details (p. 3235) Legacy Code: 700149
This subject encourages students to explore the professional responsibilities and challenges faced by Engineers. Students are introduced to emerging issues and approaches in engineering profession, especially particular attention will be given to systems approach. Students engage in a term-long research and problem solving task that addresses technical, environmental and social sustainability imperatives and fosters fundamental research, communication skills. Special emphasis is placed on lifelong learning, academic literacy and professional skills including information literacy, project management, engineering drawing and teamwork which equip students for subsequent academic and professional contexts.
Level: Undergraduate Level 1 subject
Equivalent Subjects: ENGR 1016 Engineering Design and Construction Practice ENGR 1024 Introduction to Engineering Practice ENGR 1033 Engineering Design and Construction Practice LGYB 0482 Engineering Design and Construction Practice ENGR 1026 Introduction to Engineering Practice
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1026 Introduction to Engineering Practice (WSTC) (10 Credit Points)
Subject Details (p. 3236) Legacy Code: 700148
This subject encourages students to explore the professional responsibilities and challenges faced by Engineers. Students are introduced to emerging issues and approaches in engineering profession, especially particular attention will be given to systems approach. Students engage in a term-long research and problem solving task that addresses technical, environmental and social sustainability imperatives and fosters fundamental research, communication skills. Special emphasis is placed on lifelong learning, academic literacy and professional skills including information literacy, project management, engineering drawing and teamwork which equip students for subsequent academic and professional contexts.
Level: Undergraduate Level 1 subject

ENGR 1036 Construction Communication (10 Credit Points)
Subject Details (p. 3237) Legacy Code: 301213
This subject encourages students to explore professional responsibilities and challenges faced by construction professionals. Students are introduced to the construction profession through the use of industry case studies and project problems. Students engage in a research and problem-solving task that addresses sustainability imperatives and fosters fundamental research and communication skills. Special emphasis is placed on academic and business literacy, project management and teamwork which equip students for subsequent academic and professional contexts.
Level: Undergraduate Level 1 subject
Equivalent Subjects: ENGR 1016 - Engineering Design Construction Practice ENGR 1029 - Professional Competencies ENGR 1033 - Engineering Design and Construction Practice (UWSC) LGYB 0482 - Engineering Design and Construction Practice (UWSC Assoc Deg) ENGR 1030 - Professional Competencies
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1037 Construction Communication (WSTC) (10 Credit Points)
Subject Details (p. 3238) Legacy Code: 700290
This subject encourages students to explore professional responsibilities and challenges faced by construction professionals. Students are introduced to the construction management profession through the use of industry case studies and project problems. Students engage in a research and problem-solving task that addresses sustainability imperatives and fosters fundamental research and communication skills. Special emphasis is placed on academic and business literacy, project management and teamwork which equip students for subsequent academic and professional contexts.

ENGR 1029 Professional Competencies
ENGR 1033 Engineering Design Construction Practice (WSTC) LGYB 0482 Engineering Design Construction Practice (Assoc Deg)
ENGR 1036 Construction Communication and
ENGR 1030 Professional Competencies (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1038 Design Graphics: Presenting Innovation (10 Credit Points)
Subject Details (p. 3239) Legacy Code: 301283
Design visualisation in the form of 2D and 3D graphics is fundamental to the overall design process. This subject provides students with essential knowledge of design principles as used in visual communication. Students will employ graphic techniques to effectively convey a design proposal using creativity, technical skill, and quality design principles in a manner that is consistent with industry expectations. Students will produce graphic work that is portfolio-ready and suitable to display to potential clients and employers.
Level: Undergraduate Level 1 subject
Equivalent Subjects: ENGR 1022 Industrial Graphics 1 Presentation ENGR 1021 Graphics 1 2D 3D Industrial Design Communication
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1039 Designing for Circular Economy (10 Credit Points)
Subject Details (p. 3240) Legacy Code: 301281
Traditional linear consumption patterns have placed considerable load on available natural resources. The lack of comprehensive mitigation strategies has motivated local and international efforts around the United Nations Sustainable Development Goals (UNSDGs 2030) to finding resolutions towards making the world more equitable, sustainable, liveable and with opportunities for new sustainable businesses. Students will choose an existing product and apply the principles of the UNSDGs and Circular Economy to create a proposal and prototype to improve upon its current design. Throughout this process the students will consider product usage, durability, bio-ingredients, the product lifecycle, community impact, and sustainability.
Level: Undergraduate Level 1 subject
Equivalent Subjects: ENGR 1004 Design Science (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1040 Designing for People: Applied Ergonomics (10 Credit Points)
Subject Details (p. 3241) Legacy Code: 301286
Ergonomics is the study of the interaction between people, their environments, and their objects. A sound understanding of the principles of ergonomics allows a designer to develop products, systems and environments with optimum product usability and end user safety. In this unit, students are introduced to modelling workshop procedures and undertake their own ergonomic study. Students then build and test a hand-held scale product, and integrate user feedback into their redesign.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1041 Designing for User Experience (UX) (10 Credit Points)
Subject Details (p. 3242) Legacy Code: 301284
Understanding product-oriented user requirements and mapping user experience journeys provide rich inputs for new product and service innovations. In this subject students will focus on user needs and the interactive elements which, when combined, create successful user experiences through impactful user interfaces, and highly differentiated outcomes. Students will engage in an applied project in response to an interaction design challenge. As part of their project students will incorporate elements to evoke strong emotional, sensorial and functional connections which are essential in creating inclusive design, engaged usability, and high-quality human-centred experiences, for successful products and services.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1042 Sustainable Materials and Smart Manufacturing (10 Credit Points)
Subject Details (p. 3242) Legacy Code: 301288
In this subject we explore the circular 'Cradle to Cradle' design philosophy through material choice and manufacturing systems. Introduced are conventional materials, smart materials, and manufacturing systems within an ecological assessment framework, equipping designers with the tools to select and assess materials and manufacturing processes appropriate to use. Students undertake a life cycle materials research project and a design for manufacture (DFM) project in the context of emergent Industry 4.0 principles.
Level: Undergraduate Level 1 subject
Equivalent Subjects: ENGR 1032 Sustainable Design Materials Technology ENGR 1031 Sustainable Design 1 Materials Technology
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1043 Co-Designing Change with Local Communities (10 Credit Points)
Subject Details (p. 3243) Legacy Code: 301282
Collaboration is the foundation for some of the most successful world achievements ranging from medical breakthroughs, to space travel, to smart phones, to drones. Effective collaboration in diverse teams promotes a dynamic environment for creativity and innovation with good prospects for developing novel solutions. In a real world collaborative, co-design partnership with an external university partner, students will create a design proposal and prototype, based on a project brief. Through this collaborative process, students will develop skills in research, conceptualisation, communication and reflective practice whilst prototyping and testing their ideas before presenting them to their client.
Level: Undergraduate Level 1 subject
Equivalent Subjects: ENGR 1002 Applied Erognomics ENGR 1005 Design Studio 1 Patterns and Products
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1044 Drawing Skills for Design Thinking (10 Credit Points)
Subject Details (p. 3244) Legacy Code: 301285
Drawing skills can unlock and translate creative thoughts as actions, iterations, and guide collaborative dialogue in meeting common goals. In combination with Design Thinking essentials which include empathy, ideation, and experimentation, practiced drawing skills can accelerate decision-making for individuals or groups. This subject is focused on developing hand drawing skills as a tool for generating creative ideas and design solutions. Students will attain an understanding of spatial relationships between humans and objects, and natural and built environments. The emphasis is on using drawing as a method for conducting exploratory investigations, recording creative thinking processes through ideation and inspiring innovation. Students will gain confidence in communicating their creative ideas to a wide audience.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1045 Engineering Programming Fundamentals (10 Credit Points)
Subject Details (p. 3245) Legacy Code: 301335
An introduction to problem-solving via programming, which aims to have students develop proficiency in using a high level programming language. Topics covered in this subject include: algorithms, program structures (statements, sequence, selection, iteration, functions), data types (numeric, character), data structures (arrays, tuples, pointers, lists), storage structures (memory, addresses), introduction to analysis of algorithms, testing, code quality, teamwork, and reflective practice. The subject includes extensive practical work in labs and programming projects.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1046 Human Centred Design Research Methods (10 Credit Points)
Subject Details (p. 3245) Legacy Code: 301280
This subject introduces Human-Centred Design (HCD) to students as an interactive practice that puts people's views, behaviour, and their environment at the centre of problem-solving, design and innovation processes. Students will work on an applied research project that allows them to observe, experiment, gain feedback from participants, and think critically through co-designing to propose new interpretations and solutions for our changing built environment, design artefacts and social habits. In alignment with the United Nations Sustainability Development Goals (UNSDG), this subject's research methods cover professional skills on ethics, academic literacy, design and research iteration processes, interdisciplinary team approaches, and sustainability. Students will be presented with opportunities to interact with industry and community experts to enhance their understandings and make potential career connections.
Level: Undergraduate Level 1 subject
Equivalent Subjects: LGYA 5705 - Introduction to Professional Practice ENGR 1015 - Engineering Industrial Design Practice ENGR 1016 - Engineering Design Construction Practice ENGR 1033 - Engineering Design Construction Practice LGYB 0482 - Engineering Design Construction Practice ENGR 1027 - Introduction to Industrial Design methods
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1047 Advanced Engineering Physics 1 (10 Credit Points)
Subject Details (p. 3246) Legacy Code: 301334
This subject will be offered at Engineering Innovation Hub - Hassall St, Parramatta campus. The aim of this subject is to introduce students to the conceptual, mathematical and practical aspects of the following topics in advanced engineering physics, viz: vectors, linear and circular motion, photons, electrons and atoms, Newtons laws of motion, work and kinetic energy, dynamics of rotational motion, fluid dynamics, thermodynamics, periodic motion and waves/acoustics. The content will be delivered via a combination of lectures, tutorials and hands-on practicals in order to develop the growth of theoretical and applied engineering physics knowledge. This will provide students with a solid foundation for their engineering studies.
Level: Undergraduate Level 1 subject
Equivalent Subjects: ENGR 1011 - Engineering Physics
ENGR 1013 - Engineering Physics
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1048 Engineering Materials (UG Cert) (10 Credit Points)
Subject Details (p. 3247) Legacy Code: 500066
This subject will introduce fundamentals of engineering materials. The topics will include materials structure, properties, processing and applications, degradation of materials, sustainability and the selection of materials for various engineering applications.
Level: Undergraduate Level 1 subject
Equivalent Subjects: ENGR 1008 Engineering Materials ENGR 1014 Engineering and Design Concepts ENGR 1009 Engineering Materials (WSTC AssocD) ENGR 1010 Engineering Materials (WSTC) ENGR 1034 Engineering and Design Concepts (WSTC) LGYB 0481 Engineering and Design Concepts (WSTC AssocD)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1049 Introduction to Engineering Practice (Block) (10 Credit Points)
Subject Details (p. 3247) Legacy Code: 500063
This subject encourages students to explore the professional responsibilities and challenges faced by Engineers. Students are introduced to emerging issues and approaches in engineering profession, especially particular attention will be given to systems approach. Students engage in a term-long research and problem solving task that addresses technical, environmental and social sustainability imperatives and fosters fundamental research, communication skills. Special emphasis is placed on lifelong learning, academic literacy and professional skills including information literacy, project management, engineering drawing and teamwork which equip students for subsequent academic and professional contexts.
Level: Undergraduate Level 1 subject
Equivalent Subjects: ENGR 1024 Introduction to Engineering Practice ENGR 1025 Introduction to Engineering Practice (WSTC) ENGR 1026 Introduction to Engineering Practice (UWSC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1050 Sustainable Engineering Fundamentals (10 Credit Points)
Subject Details (p. 3248) Legacy Code: 301418
Engineers need to ensure that their practice is guided by sustainability principles. This subject will introduce students to sustainability and provide an understanding of the environmental and social impacts of human development. Students will be introduced to various national and international initiatives including the United Nations Sustainable Development Goals. Students will learn fundamental scientific concepts in chemistry and ecology, and conduct and report on laboratory experiments relevant for emerging issues. Students will apply concepts such as material and energy flow, limiting nutrients, carrying capacity, climax, biodiversity, food chain and irreversibility in relation to how an ecosystem responds to changes in the environment to real world case studies.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1051 Engineering Physics (Block) (10 Credit Points)
Subject Details (p. 3249)
This subject serves as an introduction to the fundamentals of engineering physics with appropriate applications in a wide range of engineering and industrial design systems. Students will be expected to solve problems by applying the laws and principles of engineering physics in the following areas covered by the Subject – units and vectors, linear and circular motion, photons, electrons and atoms, force systems and equilibrium, work and energy applications, dynamics of rotational motion, fluid dynamics, heat and thermodynamics, periodic motion and wave phenomena, electricity and magnetism.
Level: Undergraduate Level 1 subject
Equivalent Subjects: ENGR 1011 (300963) Engineering Physics
ENGR 1013 (700151) Engineering Physics (WSTC)
ENGR 1028 (300464) Physics and Materials
ENGR 1035 (700020) Physics and Materials (WSTC)
700117 Physics and Materials (WSTC Assoc Deg)
ENGR 1012 (700153) Engineering Physics (WSTC AssocD)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1052 Fundamentals of Mechanics (Block) (10 Credit Points)
Subject Details (p. 3250)
In this subject students acquire knowledge about the action and interaction of forces, moments and couples in two and three dimensions. Students then apply this to the analysis of the equilibrium of single bodies, and of trusses, mechanisms, and transversely loaded beams. In addition, students study the dynamics of a non-rotating body, and a body rotating about a fixed axis. Further, they study the friction between bodies. Students conduct experiments to see how the lecture content applies to the real world, and make extensive use of vector algebra.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 1053 Applied Physics for Engineers (WSTC) (10 Credit Points)
Subject Details (p. 3250)
This subject provides you with an introduction to the fundamentals of engineering physics, tailored for relevance in various engineering contexts. You will master the use of System Internationale (SI) units and engage deeply with core principles spanning from mechanics and thermodynamics to electricity and magnetism. This subject not only equips you with an understanding of the theoretical knowledge of engineering physics, but also places a strong emphasis on the practical application through a series of experiments. You will hone your skills in planning, conducting, and documenting experiments, allowing you to draw meaningful connections between theoretical principles and experimental results.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 2001 Automated Manufacturing (10 Credit Points)
Subject Details (p. 3251) Legacy Code: 300735
Automated manufacturing is about increasing the capacity of productivity through a range of integrated technologies, such as digital transformation platforms so that manufacturing operations can run simultaneously. These processes are used in industrial settings. Students will be introduced to the fundamentals of manufacturing operations, automation, and control technologies, including numerical control and industrial robotics. This subject aims to deepen the understanding of the material selection process and enables students to identify appropriate manufacturing processes in a product manufacturing design. Various manufacturing processes such as material removal, bulk deformation, sheet-metal forming, and non-traditional processes will be examined. Through problem-solving activities, students will enhance their manufacturing engineering skills in the computer-aided design (CAD) and computer-aided manufacturing (CAM) areas and acquire the skills to machine their CAD models on a computer numerical control (CNC) machine.
Level: Undergraduate Level 2 subject
Pre-requisite(s): Students must have passed the two subjects MATH 1016 Mathematics for Engineers 1 and ENGR 1018 Fundamentals of Mechanics OR must have passed the two subjects MATH 1034 Mathematics for Engineers 1 (Advanced) and ENGR 1018 Fundamentals of Mechanics before they can enroll in this subject
Equivalent Subjects: ENGR 3002 - Automated Manufacturing
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 2009 Engineering Management for Engineer Associates (WSTC AssocD) (10 Credit Points)
Subject Details (p. 3252) Legacy Code: 700109
The subject will provide the knowledge and skills to enable students to support the achievement of organisational goals through applying knowledge of environment and internal culture. The subject evaluates planning processes and goal setting to achieve superior performance and compares alternative approaches to motivation of work team members. Students will consider types of managerial communications and their associated communications channels in achieving best professional practice.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 2010 Engineering Project (WSTC AssocD) (10 Credit Points)
Subject Details (p. 3253) Legacy Code: 700110
In this unit, students will use project management tools, techniques and practices to plan and control a project that achieves stated requirements on time and within budget. Students will plan a project including the creation of a statement of work, a work breakdown structure and an appropriate set of supporting work packages.
Level: Undergraduate Level 2 subject
Pre-requisite(s): ENGR 2018 OR
ENGR 2031
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 2011 Graphics 2: Visual Simulation (10 Credit Points)
Subject Details (p. 3254) Legacy Code: 301076
From 2020, this subject will be replaced by 301287 - Designing Graphics: Engineering Documentation. Three-dimensional digital simulations are used to model manufactured artefacts, create virtual environments and simulate dynamic processes or systems. In this subject students will use 3D modelling software to simulate static and dynamic 3D structures. High quality photorealistic rendering and 3D printing file preparation will also be covered.
Level: Undergraduate Level 2 subject
Equivalent Subjects: ENGR 2015 - Industrial Graphics 3 3D Solids
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 2012 Graphics 3: 3D Engineering Specifications and Visualisation (10 Credit Points)
Subject Details (p. 3254) Legacy Code: 301079
From 2020, this subject will be replaced by 301290 - Design Graphics: Communication for Manufacture. This subject introduces formal graphical communication methods used by professionals engaged in the design, manufacture and management of manufactured items. Students will learn how to follow Australian Standards for engineering drawings, and to use Computer-Aided Design (CAD) software for accurately representing and modelling basic parts and assemblies. The documentation of design concepts in the form of three dimensional (3D) computer models provides data that can be applied in a wide variety of ways to facilitate the understanding and production of parts and assemblies. The objective of this subject is to introduce students to the industry standard software and hardware employed to generate these models, via a "hands on" approach to creating 3D data. Issues such as data transfer, rapid prototyping, computer numerical control (CNC) machining and visualisation will also be discussed.
Level: Undergraduate Level 2 subject
Pre-requisite(s): ENGR 2011 OR
ENGR 1024
Equivalent Subjects: ENGR 2014 Industrial Graphics 2 Transition
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 2013 Graphics 4: Kinetic Narratives (10 Credit Points)
Subject Details (p. 3254) Legacy Code: 301091
From 2020, this subject will be replaced by 301308 - Design Practice: Sustainable Manufacturing. This subject introduces students to real life applications of graphics technology, such as 3D games, 3D virtual environments, immersive learning spaces, dynamic 3D simulations of ecosystems, artwork for public spaces, virtual agents. Students will use different software platforms to create interactive 3D environments. They will apply theories of human-computer interaction to design projects where they develop: "a dynamic simulation of a natural or artificial ecosystem", a dynamic 3D virtual environment in which users interact with agents.
Level: Undergraduate Level 2 subject
Pre-requisite(s): ENGR 2012
Equivalent Subjects: ENGR 3018 - Industrial Graphics 4 Surface
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 2016 Pavement Materials and Design (10 Credit Points)
Subject Details (p. 3255) Legacy Code: 300984
This subject will provide students the basic knowledge and concepts on pavement materials and design. It will cover the common materials used in pavement construction such as aggregates, cement, asphalt, and concrete. It will also cover the pavement design system, pavement construction, design of flexible pavements, design of rigid pavements, and pavement maintenance.
Level: Undergraduate Level 2 subject
Pre-requisite(s): ENGR 1008 or PROC 1008
Equivalent Subjects: ENGR 1007 - Engineering Geology and Concrete Materials ENGR 2017 - Pavement Materials and Design
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 2017 Pavement Materials and Design (WSTC AssocD) (10 Credit Points)
Subject Details (p. 3256) Legacy Code: 700239
This subject will provide students with the basic knowledge and concepts on pavement materials and design. It will cover the common materials used in pavement construction such as aggregates, cement, asphalt and concrete. It will also cover the pavement design system, pavement construction, design of flexible pavements, design of rigid pavements and pavement maintenance.Offerings of alternate subjects are dependent on there being sufficient student enrolment numbers. If enrolments are low, the College may cancel delivery of the alternate subject.
Level: Undergraduate Level 2 subject
Pre-requisite(s): ENGR 1009
Equivalent Subjects: ENGR 2016 - Pavement Materials and Design
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 2018 Professional Practice for Engineer Associates (WSTC AssocD) (10 Credit Points)
Subject Details (p. 3257) Legacy Code: 700118
This subject will provide the knowledge and skills to enable students to support the achievement of organisational goals through applying knowledge of environment and internal culture. The subject evaluates planning processes and goal setting to achieve superior performance and compares alternative approaches to motivation of work team members. Students will consider types of managerial communications and their associated communications channels in achieving best professional practice.
Level: Undergraduate Level 2 subject
Pre-requisite(s): ENGR 2009
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 2022 Design Practice: Sustainable Manufacturing (10 Credit Points)
Subject Details (p. 3257) Legacy Code: 301308
Reflecting upon the life cycle of products and their components is important in understanding how decisions at the design level impact on people, resources, sustainable goals and how these contribute towards sustainability-oriented local and global value chains. This subject focuses on sustainable decision-making at the design level. It challenges and motivates students towards using sustainability principles to promote good Design for Disassembly (DfD) practices with linkages to material durability, and material reuse. Through a project-based approach, students will appraise manufacturing considerations for product design applying in succession Design for Manufacturing, Assembly and Disassembly (DfM, DfA, DfD) principles to their products and reflect on product lifecycle management best practice.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 2023 Advanced Engineering Physics 2 (10 Credit Points)
Subject Details (p. 3258) Legacy Code: 301351
This subject will be offered at Engineering Innovation Hub - Hassall St, Parramatta campus. The aim of the subject is to introduce students to topics such as electricity, magnetism, induction and semiconductivity, and to equip them with mathematical approaches for solving problems in these areas. Content in this subject will be delivered via the combination of lectures, tutorials and practicals in order to foster in students the growth of theoretical and applied physics knowledge. Students completing this subject will have a solid foundation upon which to base their continued engineering studies.
Level: Undergraduate Level 2 subject
Pre-requisite(s): ENGR 1047
Co-requisite(s): MATH 1035
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 2024 Design Graphics: Communication for Manufacture (10 Credit Points)
Subject Details (p. 3259) Legacy Code: 301290
Students will design manufacture ready product samples through the use of computer graphics including three-dimensional (3D) surfacing and solids modelling methods used by professionals engaged in engineering and industrial design practice. Students will produce two-dimensional (2D) and three-dimensional (3D) documentation, which can be widely applied to facilitate the understanding and production of parts and assemblies.
Level: Undergraduate Level 2 subject
Pre-requisite(s): ENGR 2025
Equivalent Subjects: ENGR 2014 Industrial Graphics 2 Transition
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 2025 Design Graphics: Engineering Documentation (10 Credit Points)
Subject Details (p. 3260) Legacy Code: 301287
Current and future growth in the areas of product design, virtual reality, and high technology innovation industries require a foundation and working knowledge of 3D computer modelling. In this subject students will be introduced to 3D modelling software and the fundamental principles of current Australian Standards for engineering drawing and documentation. The skills gained will contribute to preparation for future complex projects in engineering, industrial design and creative industries that require prototyping, files for additive manufacturing (3D printing), and component designs that can perform at exact specifications and standards.
Level: Undergraduate Level 2 subject
Equivalent Subjects: ENGR 2011 - Graphics 2 Visual Simulation
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 2026 Design Semantics: Exploring Product Form (10 Credit Points)
Subject Details (p. 3261) Legacy Code: 301289
Products can engage our senses to evoke an emotional response or mediate an experience. This is a powerful psychological tool for industrial designers to understand in terms of the design interface as it provides a strategic opportunity for innovation. In this subject students will create meaningful and active product relationships, and use product semantics as an agency for proposing design solutions in areas such as health and well-being, ageing populations, and sustainable design.
Level: Undergraduate Level 2 subject
Equivalent Subjects: ENGR 2006 - Design Studio 1 Themes and Variations ENGR 2008 - Design Studio 3 Design Process and Function
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 2027 Engineering Design (10 Credit Points)
Subject Details (p. 3262) Legacy Code: 301341
This subject will be offered at Engineering Innovation Hub - Hassall St, Parramatta campus. Design thinking is a fundamental skill that every engineer must have for the 21st Century. It is one of the skills that profoundly distinguish human intelligence from artificial intelligence, which greatly impacts an engineer's long-term career success in the workplace. This subject aims to equip students with the domain-independent and solution-neutral design thinking, which can be applied to whatever technical stream students choose to pursue in the future.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 2028 New Product Innovation with IoT Data (10 Credit Points)
Subject Details (p. 3262) Legacy Code: 301305
Design Thinking has had a considerable effect on the ways firms innovate, design and evaluate products and services for use. The evolution of smart products and services in recent years offers both challenges and rewards for organisations as the big data generated provides insights to current product and service utilisation. Interpretation and integration of these new knowledge streams can support future product development, by enhanced understanding of human behaviour and features of sensor technologies. Students will produce an IoT influenced project design brief that provides the directional basis for the deployment of both human and technological resources in preparation for their career progression as a future innovation manager in a global, online marketplace.
Level: Undergraduate Level 2 subject
Equivalent Subjects: ENGR 2003 - Design Management 1 Product Design Audit
ENGR 2002 - Design Management 1 Process and Manufacturing
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 2029 Simulation in Virtual and Augmented Realities (10 Credit Points)
Subject Details (p. 3263) Legacy Code: 301306
Simulation in three-dimensional (3D) environments provide valuable insights to human-centred perspectives. Whilst investigating the fundamentals of Virtual Reality (VR) and Augmented Reality (AR), students will analyse aspects of functionality, user interfaces, spatial relationships in built environments, sustainability, efficient resource management, instructional support for safety and training, and accelerated design conceptualisation in detailed new product, service or environmental innovation. Students' experiences will equip them for future employment as VR and AR experience designers, interactive experience producers, or creative technologists.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 2030 Industrial Experience (Associate Engineer) (WSTC AssocD) (10 Credit Points)
Subject Details (p. 3264) Legacy Code: 700311
Industry experience provides a significant opportunity for students to understand employer expectations in relation to working on projects and with others in a professional capacity. Students undertake six weeks full-time (37.5 hours per week) employment (or part time equivalent) to obtain relevant workplace experience in Engineering under the supervision of professional engineers in one or more companies. Students identify learning opportunities and goals with a focus on applying academic learning in practice, learning project management, work culture, professional attitude and self-awareness. Students develop critical reflective skills in reporting their progress.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 2031 Management Practices for Engineer Associates (WSTC AssocD) (10 Credit Points)
Subject Details (p. 3264) Legacy Code: 700307
This subject will enable students to support the achievement of organisational goals. The unit's major focus is project management, culminating in a practical project which gives students the opportunity to work as part of a team to apply key project management skills and knowledge. It also introduces some of the management practices engineers need to understand and master in order to work effectively in the field. This includes effective communication, especially when working in a team, work health and safety, and an ability to plan, develop and build a career as an Engineer Associate.
Level: Undergraduate Level 2 subject
Equivalent Subjects: ENGR 2009 Engineering Management for Engineer Associates (WSTC AssocD)
ENGR 2018 Professional Practice for Engineer Associates (WSTC AssocD)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 2032 Sustainability Analysis and Design (10 Credit Points)
Subject Details (p. 3265) Legacy Code: 301419
In this unit, students will learn and appropriately apply technical and socio-economic approaches of achieving sustainability, such as life cycle assessment, environmental impact assessment, environmental auditing, circular economy, design for the environment and cleaner production to real world problems. The students will be taught about policy, financial and social approaches to achieving sustainability through real life problems/cases.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 2033 Industrial Experience (Engineering Technologist) (0 Credit Points)
Subject Details (p. 3266) Legacy Code: 301441
Industry experience is a significant opportunity for students to understand employer expectations in relation to working on projects and with others in a professional capacity. Students undertake 8 weeks full-time (37.5 hours per week) employment (or equivalent) to obtain relevant workplace experience in Engineering under the supervision of professional engineers or engineering technologists in one or more companies. Students identify learning opportunities and goals with a focus on applying academic learning in practice, learning project management, work culture, professional attitude and self-awareness. Students develop critical reflective skills in reporting their progress.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 2034 Geometric Design of Roads (WSTC AssocD) (10 Credit Points)
Subject Details (p. 3267)
This is an introductory subject covering the design of dimensions and configurations of the visible features of a roadway. It will provide students with an understanding of pavement widths, horizontal and vertical alignment, slopes channelization, intersections and other features that can significantly affect the operations, safety, and capacity of the roadway network. This subject is designed in collaboration with Transport for NSW.
Level: Undergraduate Level 2 subject
Pre-requisite(s): MATH1010 Fundamentals for Engineering Studies
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 2035 Modern Digital Design and Development (10 Credit Points)
Subject Details (p. 3267)
This subject provides fundamental knowledge and skills development in Digital Manufacturing and Design (DMD) technologies for Advanced Manufacturing, Product Design and Industry 4.0. Digital transformation happens throughout the world in Product Development and Design (PDD). Students will engage with digital technologies which stimulate innovative, integrated and sustainable product development processes and workflows from design to manufacturing. As part of their engagement with real-world design projects, students will apply their skills to areas such as design, scenario analysis, rapid prototyping and testing for improved manufacturing outcomes. A number of opportunities, such as the WSU Formula SAE Race Car project, will allow students to work alongside industry partners and develop job ready practices for their future careers.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 2036 Professional Development in Teams-based Projects
Subject Details (p. 3268)
Voluntary student-led projects provide many benefits to students including improved on-campus experience and the expansion of peer, academic and professional networks alongside extra-curricular opportunities for skills development. Students working on these projects will develop their professional skills to match the expectations of partners, stakeholders, and team-mates who they are working alongside. This subject will support the development of professional skills among students who have demonstrated a significant commitment to a recognised student-led project which will contribute to their career development.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 3001 Advanced Engineering Topic 1 (10 Credit Points)
Subject Details (p. 3269) Legacy Code: 300666
This subject provides students with the opportunity to tackle challenging engineering problems. They will study advanced topics in selected areas under the supervision of academics. The advanced topics will prepare students for further study and research.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 3003 Biomedical Electronics (10 Credit Points)
Subject Details (p. 3270) Legacy Code: 301122
This subject will cover recent advances in biomedical electronics including electronic diagnostic devices, implanted devices, human-computer-interface, bioinstrumentation and neuromorphic engineering. Topics covered span from the bio-electromagnetism and related applications to regulatory aspects (IEC standards and TGA/FDA approval processes) and electrical safety of instrumentation. This subject will have a strong practical design focus with laboratories and tutorials focused on the design of real instrumentation (including manufacturing) dealing with real biomedical signals.
Level: Undergraduate Level 3 subject
Pre-requisite(s): ELEC 2001 OR
ENGR 2001
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 3004 Biomedical Signals and Data Analysis (10 Credit Points)
Subject Details (p. 3270) Legacy Code: 301121
This subject will cover recent advances in biomedical signal and data analysis including electrocardiography, electroencephalography, human-computer-interface, electromyography, biomedical images and spikes processing. Topics covered span from basic to advanced signal processing. This subject will have a strong practical design focus with laboratories and tutorials focused on the design of usable software packages dealing with real biomedical signals.
Level: Undergraduate Level 3 subject
Pre-requisite(s): ELEC 2001 OR
ENGR 2001
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 3006 Control Systems (10 Credit Points)
Subject Details (p. 3271) Legacy Code: 300009
This subject introduces the fundamental concepts of automatic control engineering. It covers traditional and contemporary design and analysis techniques; the concepts required to design continuous time and discrete time controllers. Matlab is utlilized considerably.
Level: Undergraduate Level 3 subject
Pre-requisite(s): ELEC 2011 OR
MECH 3004
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 3010 Design Studio 4: Innovation through Systems Thinking (10 Credit Points)
Subject Details (p. 3272) Legacy Code: 301080
From 2020, this unit will be replaced by 301292 - Biomechanics in Product Innovation. This unit explores strategies for Industrial Design within the complex context of design work in the 21st century. Students will carry out projects in user-centred design, developing an innovative responses to a semi-open and open briefs using the CDIO (Conceive, Design, Implement, Operate) process. The projects will range from low fidelity cardboard prototypes to more fully developed everyday products and services that can be implemented and operated to meet an identified user need.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 3013 Engineering Science Project 1 (10 Credit Points)
Subject Details (p. 3272) Legacy Code: 300967
This subject describes engineering as a profession, including professional ethics, legal obligations and fundamentals and theories related to project management. The focus will be on development of research and presentation skills of students enrolled in this subject. It will be achieved through employment of appropriate research skills on a capstone project which demonstrates student's knowledge in identifying and planning an engineering project.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 3014 Engineering Science Project 2 (10 Credit Points)
Subject Details (p. 3273) Legacy Code: 300968
In this unit, the focus will be on development of research and presentation skills of students, which will be achieved through employment of appropriate research skills on a capstone project. It will demonstrate student's knowledge by conducting an engineering project and completion of a technical report.
Level: Undergraduate Level 3 subject
Pre-requisite(s): ENGR 3013
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 3017 Industrial Experience (Engineering) (0 Credit Points)
Subject Details (p. 3274) Legacy Code: 300741
Industry experience is a significant opportunity for students to understand employer expectations in relation to working on projects and with others in a professional capacity. Students undertake 12 weeks full-time (37.5 hours per week) employment (or equivalent) to obtain relevant workplace experience in Engineering under the supervision of professional engineers in one or more companies. Students identify learning opportunities and goals with a focus on applying academic learning in practice, learning project management, work culture, professional attitude and self-awareness. Students develop critical reflective skills in reporting their progress.
Level: Undergraduate Level 3 subject
Equivalent Subjects: ENGR 3016 - Industrial Experience (Engineering)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 3020 Numerical Methods in Engineering (10 Credit Points)
Subject Details (p. 3275) Legacy Code: 300488
The finite element method is a powerful numerical tool for analysing a wide range of engineering problems. The objective of this subject is to introduce the basic and fundamental principles of the finite element techniques by primarily focusing on their applications in the area of structural, solid and soil mechanics.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MATH 1019 AND
MECH 2003
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 3021 Professional Practice (10 Credit Points)
Subject Details (p. 3276) Legacy Code: 300053
This subject focuses on ethical conduct for construction managers and on the range of procurement systems utilised in the modern construction industry. It deals with matters of professional responsibility to the community, as well as, honourable and lawful practices in the conduct of business. The issues of confidentiality of information and conflict of interest are examined in the context of real project histories. Risk management and its relationship with quality project delivery are considered in the light of the changing nature of an industrialised, digitalised and globalised construction industry.
Level: Undergraduate Level 3 subject
Pre-requisite(s): ENGR 1029 OR
ENGR 1024 OR
ENGR 1036
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 3022 Special Technical Project (10 Credit Points)
Subject Details (p. 3277) Legacy Code: 301089
This is an elective subject offered to students who are engaged in a School of Engineering, Design and Built Environment approved project (solar car, Greenhouse, Formula SAE, Purple roof and sustainable house). The subject can be taken during the third year of Engineering, Construction Management and Industrial Design programs and is a capstone subject for students enrolled in Minor Eco-Socially Conscious Design and Manufacturing. This subject consolidates and deepens a student's knowledge and capabilities developed through previous years of study. Students will develop complex solutions by collaborating with various discipline specialists. This subject develops management, reflective and leadership skills including the ability to work with team members from other fields of study through practical application.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 3023 Biomechanics in Product Innovation (10 Credit Points)
Subject Details (p. 3278) Legacy Code: 301292
In this subject students apply practical design thinking skills to propose viable solutions for solving complex problems in both human and environment centred contexts. Whilst working on an industry-based project, students will develop an understanding of human biomechanics and human anatomy and the challenges they bring to the design process. Students interested in design-based careers which involve improving ways people interact with products, systems and spaces will benefit from the skills developed in this subject.
Level: Undergraduate Level 3 subject
Equivalent Subjects: ENGR 3010 Design Studio 4 Innovation through Systems Thinking
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 3024 Design Research Methods (Advanced) (10 Credit Points)
Subject Details (p. 3279) Legacy Code: 301291
Design and user research methods are critical in establishing efficient and effective processes around resource utilisation in designing, conducting and presenting research findings that are succinct yet open to new innovations. A range of advanced research design methods are presented and students are guided to the strategic selection of methods appropriate to their own self-sourced project theme. Data collection instruments are designed, operationalised, data coded and analysed via both qualitative and quantitative techniques and discussed in a vibrant peer environment inspired by design thinking and other research methods unique to the design profession and within university human ethics policy protocols.
Level: Undergraduate Level 3 subject
Equivalent Subjects: ENGR 3012 - Designed Inquiry ENGR 3005 - Contextual Inquiry
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 3025 Designing for Circular Economy (Advanced) (10 Credit Points)
Subject Details (p. 3280) Legacy Code: 301293
Students examine their local circular economy and the United Nations Sustainable Development Goals 2030 (UNSDG) principles as they apply to designing a sustainable future with Circularity for extended product life cycle, reuse, remanufacture, value up-cycling, production, and waste resource management. Students work on an industry-based, real-world, socio-technical, environmental challenge project in collaboration with community and industry partners. The project is based in the local Western Sydney region and students propose design solutions that are scalable and relatable in diverse contexts. Students will be able to apply their awareness of the sustainability requirements within the community and industry to their future career activities, by creating new value, and new green employment opportunities with a sustainability skills approach.
Level: Undergraduate Level 3 subject
Equivalent Subjects: ENGR 2021 Sustainable Design Sustainable Futures
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 3026 Design Thinking for Successful Brands and Products (10 Credit Points)
Subject Details (p. 3280) Legacy Code: 301301
Students will learn how to develop a strategic design management plan that helps a firm not only present itself to its target audience but also clearly differentiate amongst competitors. Foundation design principles involving the evaluation of two-dimensional and three-dimensional designs are explored through a series of case studies based on commercially successful design management strategies. To simulate global, real-world design consultation scenarios students interact in an online environment in preparation for evidence-based innovation in their future workplaces as design managers.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 3027 Mentored Practice in Design Innovation (0 Credit Points)
Subject Details (p. 3281) Legacy Code: 301296
Students will be acculturated to professional practice and conduct in a real work environment setting through a series of webinars and self-guided industry placement. On conclusion of the unit, students will develop a report that summarises their own personal reflections relating to workplace responsibilities, and other experiences accrued throughout the unit. Mentored Practice in Design Innovation seeks to match students with mentors in areas they aspire to be prospective employees or in related fields of professional interest across a 10-week program.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 2390 - Industrial Experience ENGR 3015 - Industrial Experience
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 3028 Mentored Practice in Design Innovation (10 Credit Points)
Subject Details (p. 3282) Legacy Code: 301401
Mentored Practice offers a program of professionally oriented activities that refine planning for graduate destinations in the design, innovation and manufacturing industries and in particular new product development. Students will focus on career and practical industry attributes, and attend design industry seminars that directly influence their major project, honours thesis, or industrial design capstone project from a strategic and professional practice perspective. This subject assists students on preparing a strategic early career plan which includes a personal portfolio of works with tips on how to commercialise their current academic project, observations and analysis of current design industry practice, and a self-directed practical placement for up to 70 hours.
Level: Undergraduate Level 3 subject
Equivalent Subjects: ENGR 3031 Mentored Practice in Design (Industry)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 3029 Specialisation Workshop 1 (10 Credit Points)
Subject Details (p. 3282) Legacy Code: 301438
This subject is designed to enhance technical skills development in an engineering discipline. The subject enables students to perform the practical aspects that relate to product development, manufacturing, infrastructure development and service delivery. It also enables students to gain skills to plan, communicate, operate and manage workshops, laboratory settings and work sites while working in a team environment.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 3030 Specialisation Workshop 2 (10 Credit Points)
Subject Details (p. 3283) Legacy Code: 301439
This subject is designed to further enhance technical skills development in a team environment and in an engineering discipline through additional workshops that compliment and strengthen those completed in previous subject Specialisation Workshop 1. The subject enables students to perform and manage the practical aspects that relate to product development, manufacturing, infrastructure development and service delivery. It also enables students to gain skills to plan, communicate, operate and manage workshops, laboratory settings and work sites while working in a team environment.
Level: Undergraduate Level 3 subject
Pre-requisite(s): ENGR 3029
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 3031 Mentored Practice in Design (Industry) (10 Credit Points)
Subject Details (p. 3284)
Mentored Practice in Design (Industry) is designed to provide students with professional practice experience working with an industry mentor and a multi-disciplinary team. Students prepare for their experience and create an action plan documenting their skills and knowledge with the aim of enhancing these throughout the semester. This prepares them for a reflective report and mentorship presentation. Students are assisted finding a suitable mentor in areas in which they aspire to be prospective employees or in related fields of professional interest across a 10-week program responding to the changing Future of Work. This subject can be undertaken during any semester during the year and can most likely be completed during semester breaks either in Winter or Summer. Students gain valuable insights in the professional practice setting of themselves and of industry expectations, providing opportunities for employment.
Level: Undergraduate Level 3 subject
Equivalent Subjects: ENGR3015 Industrial Experience
ENGR3027 Mentored Practice in Design Innovation
ENGR3028 Mentored Practice in Design Innovation
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 3032 Humanitarian Design and Practice (10 Credit Points)
Subject Details (p. 3285)
In this subject, students will learn community engagement strategies and prototype development using the framework of human-centered design. Through international and domestic mobility programs students will collaborate with local stakeholders to co-develop solutions for priority community needs. Drawing on inter-disciplinary approaches (combining social sciences, design and engineering), students will gain socio-technical skills and apply these to real-world humanitarian problems such as disaster preparedness and sustainable development. This subject is co-designed and delivered with industry partners (e.g. Engineers Without Borders, RedR) and will prepare students for career pathways working with regional and international industry agencies and local community partners in other countries to develop humanitarian engineering interventions.
Level: Undergraduate Level 3 subject
Pre-requisite(s): ENGR 1043 OR
ENGR 1024
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 3033 Digital Manufacturing and IIoT (10 Credit Points)
Subject Details (p. 3285)
This subject offers specialised knowledge and skill development in the areas of Digital Manufacturing and Industrial Internet of Things (IIoT), both important components within the landscape of Industry 4.0 and Advanced Manufacturing. Built into an ecosystem of connected devices in the digital manufacturing context, IIoT serves as an invaluable tool, providing insights into production processes. Moreover, it equips industries with heightened competitiveness, fosters innovation, and enhances customer experiences. As these technologies continue to evolve, artificial intelligence and machine learning will play an essential role in providing useful data for informed decision-making and production enhancements. Throughout this subject, students will discover the significance of IIoT in digital manufacturing, including its underlying technologies and system architecture while cultivating proficiency in digital manufacturing processes. Upon successful completion of this subject, students can explore a range of career avenues, including roles such as Digital Manufacturing Engineer, IIoT Solutions Architect, Manufacturing Data Analyst and IoT Product Manager.
Level: Undergraduate Level 3 subject
Co-requisite(s): ENGR 2035
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4001 Advanced Engineering Topic 2 (10 Credit Points)
Subject Details (p. 3286) Legacy Code: 300667
This subject provides students with the opportunity to tackle engineering problems that are more challenging than those in Advanced Engineering Topic 1. They will study advanced topics in selected areas under the supervision of academics. The advanced topics will prepare students for further study and research.
Level: Undergraduate Level 4 subject
Pre-requisite(s): ENGR 3001
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4004 Design Studio 6: Ambience, Place and Behaviour (10 Credit Points)
Subject Details (p. 3287) Legacy Code: 301084
Designers responding to complex societal challenges require focus on people, places and systems thinking to make sense in guiding new investment in innovation. This subject builds industrial design expertise in four domains including human environments, responsible design, user-centred design, and technology development through applied design research, contextual inquiry methods, and articulation of innovation proposals through conceptual and validated physical modelling, and an interdisciplinary consultative viewpoint.
Level: Undergraduate Level 4 subject
Pre-requisite(s): ENGR 4003
Equivalent Subjects: ENGR 3011 - Design Studio 4 Simulate to Innovate
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4005 Engineering Project (20 Credit Points)
Subject Details (p. 3287) Legacy Code: 300483
This is a 20 credit point year-long subject taken over two terms (10 credit points in each term). This subject includes a capstone project which demonstrates student's professional level of identifying, planning, designing, executing, testing and documenting an engineering project or activity.
Level: Undergraduate Level 4 subject
Pre-requisite(s): ENGR 3021
Co-requisite(s): ENGR 3017
Equivalent Subjects: LGYB 1037 - Civil and Environmental Engineering Project 2
Incompatible Subjects: LGYA 6084 - Engineering Thesis ENGR 4023 - Advanced Engineering Thesis
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4006 Engineering Project 1 (10 Credit Points)
Subject Details (p. 3288) Legacy Code: 300971
This subject describes engineering as a profession, including professional ethics and legal obligations highlighted. Fundamentals and theories related to contract and project management will form part of this subject. Throughout the semester, the focus will be on development of research and presentation skills of students enrolled in this subject. This will be achieved through employment of appropriate research skills on a capstone project which demonstrates student's professional level of identifying, planning, and designing engineering project and completion of a technical progress report. The capstone project will be continued in subject 300972 Engineering Project 2.
Level: Undergraduate Level 4 subject
Co-requisite(s): ENGR 3017
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4007 Engineering Project 2 (10 Credit Points)
Subject Details (p. 3289) Legacy Code: 300972
Throughout the semester, the focus will be on development of research and presentation skills of students enrolled in this subject. This will be achieved through employment of appropriate research skills on a capstone project which demonstrates student's professional level of executing, testing and documenting an engineering project and completion of a technical report. This subject is a continuation of 300971 Engineering Project 1.
Level: Undergraduate Level 4 subject
Pre-requisite(s): ENGR 4006
Co-requisite(s): ENGR 3017
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4010 Major Project Completion (30 Credit Points)
Subject Details (p. 3290) Legacy Code: 300460
Major Project Completion is the project realisation component of the student's final year program. The subject offers the student the chance to consolidate the range of methodologies and processes developed and evaluated in Major Project Commencement, that contextualise the principles and practices that will lead to the realisation of their identified design solution. The final design outcome will form part of the final year graduate exhibition. The design solution which students will be developing and submitting for this subject responds to the design brief developed in Major Project Commencement.
Level: Undergraduate Level 4 subject
Pre-requisite(s): ENGR 4009
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4011 Sustainability and Risk Engineering (10 Credit Points)
Subject Details (p. 3291) Legacy Code: 300798
Analysis of sustainability with engineering perspectives is increasingly becoming important in the modern world. Also, often the risk analysis is required to be carried for true sustainable solutions. Engineers with in-depth understanding of different tools that can be used for both sustainability and risk analysis will have significant edge in their future career. The students will discuss and understand various engineering issues including renewable/alternative energy systems, energy/resource efficiency, sustainable/green buildings, sustainable transport and infrastructure, sustainable water management, environmental management systems, sustainability reporting, life cycle analysis, probability/reliability theory, risk assessment models and, overall system analysis.
Level: Undergraduate Level 4 subject
Pre-requisite(s): CIVL 2002 AND CIVL 4017
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4012 Industrial Design Major Project (Ideation) (10 Credit Points)
Subject Details (p. 3292) Legacy Code: 301297
In this capstone subject students will immerse themselves in a complex real-world design problem and apply their expertise in conceptualisation, problem solving, human factors and aesthetics to create a novel solution. User-centred design, digital futures and sustainable design practice underpin all learning activities. A multidisciplinary approach is fostered, whereby students will engage with industry experts and community groups reinforcing the role of the graduate designer as an empathetic innovator.
Level: Undergraduate Level 4 subject
Pre-requisite(s): ENGR 4020 OR
ENGR 4004
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4013 Creative Business Model Innovation (10 Credit Points)
Subject Details (p. 3292) Legacy Code: 301303
Innovation requires an agile mindset (being flexible and responsive), a broad view of social, economic, and environmental factors, and awareness of interdisciplinary approaches to succeed in a competitive marketplace. Students explore strategic directions for enterprises in creative ways through practical engagement and application of business model innovation methods and tools in a fully online learning environment comprising digital content and live webinars. Creative sustainable business model specialists are sought after in the marketplace, and this subject provides insights in developing these specialist skills, thus highlighting students' potential as future business leaders.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4014 Design Practice: Manufactured Product Lifecycle (10 Credit Points)
Subject Details (p. 3293) Legacy Code: 301310
Visualisation analytics for sustainable manufacturing practices provide an essential contribution to planning and adoption for new product development. The application of product lifecycle management (PLM) methods through software interfaces permits the establishment of a digital environment to create, manufacture and manage innovation on a comprehensive basis. Students will engage with an innovation project from a PLM perspective as an extended enterprise with focus on time to market, waste optimisation, prototyping efficiency, and value chain collaboration.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4015 Design Practice: Self-Directed Specialised Mentor Project (10 Credit Points)
Subject Details (p. 3293) Legacy Code: 301311
Mentorship is highly regarded in preparation for accelerated understanding of the competitiveness and excitement of professional practice. Specialised mentors provide insights and engage students in co-creative processes and guide the pursuit of design innovations that challenge markets and redefine career progression and employment opportunities. This subject permits students to develop their own idea from conceptual discovery to market strategy and launch preparations with the view to build a new commercial pathway and personal resilience by creating a new value proposition of merit.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4016 Design Practice: Sustainable Components (10 Credit Points)
Subject Details (p. 3293) Legacy Code: 301309
New Product development in architecture and construction industries draws upon construction knowledge, applied materials specification, design for durable systems, component interfaces supporting assembly and robust design principles with aesthetic considerations, functional and desirable product attributes. This subject forms part of the Design Practice specialisation and builds upon the principles of sustainable manufacturing and product life cycle in response to an emergent construction theme. In this subject, entrepreneurship and product detailing assist decisions that drive future advancements in construction component design.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4017 Design Thinking for Competitive Advantage (10 Credit Points)
Subject Details (p. 3294) Legacy Code: 301302
Design Thinking has become widely adopted as a novel problem solving mechanism and asset to market growth, resource utilisation, and competitiveness. This approach incorporates human-centric attributes and iterative processes which are features of professional designers co-creating with stakeholders. In this unit, students focus on empathic viewpoints associated with understanding people, markets and the environment. They explore future possibilities for communities using decision-making processes, informed by global challenges as represented through the UNSDGs. This new global societal driver for equitable living standards, economic prosperity, and sustainable societies is explored through online study involving a series of webinars, digital interactions, and conclude with a student prototype presentation.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4018 Industrial Design Major Project (Conclusion) (20 Credit Points)
Subject Details (p. 3295) Legacy Code: 301298
In collaboration with industry experts and community groups students will refine and complete their capstone project which was conceptualised and proposed in Industrial Design Major Project (Ideation). Students will advance their responses to complex, real-world design problems and refine their expertise in conceptualisation, problem solving, human factors, aesthetics, innovation and communication to deliver a novel product solution to stakeholders as work-ready graduates.
Level: Undergraduate Level 4 subject
Pre-requisite(s): ENGR 4020 OR
ENGR 4004
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4019 Start-Up Product Launch (10 Credit Points)
Subject Details (p. 3295) Legacy Code: 301304
Students, working in cross functional teams and as individuals, will develop a mature value proposition for validation and launch of a market-ready product or service that includes promotional narratives and artefacts. Students will focus on entrepreneurial innovation and lean start-up models using design-led strategies such as CANVAS modelling, minimum viable product (MVP), and launching in addition to strategies for securing external funding for projects. Students will be well placed to create dynamic adaptive organisation for business, government, wider communities and start-up businesses as career professionals.
Level: Undergraduate Level 4 subject
Equivalent Subjects: ENGR 3008 - Design Management 4 Design Process ENGR 4002 - Design Management 4 Strategy and Lean Start-Up
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4021 Studio: Interdisciplinary Global (10 Credit Points)
Subject Details (p. 3296) Legacy Code: 301294
This subject engages students in a collaborative evidenced based project with local and international expert partners including NASA in the thematic area of Designing for Space Missions 2025 for astronaut health and space architecture for habitat design. Students are able to explore new concepts and integrate their skills within teams across unique research domains. The traditional linear thinking of creativity and innovation is challenged, giving way to a dynamic workspace for discussion, exploration, discovery, critical reflective practice, and maker-culture. This leads to new co-created interdisciplinary innovations which assist in the preparation of students for the Future of Work and decision-making across diverse teams. The focus on the physical and psychological aspects of space are also informing new viewpoints in designing with COVID19 in the Built Environment.
Level: Undergraduate Level 4 subject
Equivalent Subjects: ENGR 3009 - Design Studio 3 Product Realisation ENGR 4003 - Design Studio 5 Symbol and Meaning Making
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4022 Studio: Design Synthesis Capstone (10 Credit Points)
Subject Details (p. 3297) Legacy Code: 301402
This subject engages students in a significant project that synthesises creative thinking, design strategy and practical design skills in preparation to be 'work-ready' as a designer upon graduation. Students will apply the skills that they have acquired throughout their degree in core and specialised elective subjects toward their Design Capstone project. The amalgamation of multidisciplinary viewpoints with industry collaborators throughout the subject ensures a vibrant learning environment, culminating in well resolved design outcomes within a Work Integrated Learning (WIL) Framework with linkages to a real-world challenge.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4023 Advanced Engineering Thesis (60 Credit Points)
Subject Details (p. 3298) Legacy Code: 300668
This is a 60 credit point year-long subject taken over two terms (30 credit points in each term).This subject provides students with the opportunity to conduct original research on their chosen topics under the supervision of academics. Students are encouraged to disseminate their research results as refereed publications.
Level: Undergraduate Level 4 subject
Incompatible Subjects: LGYA 6084 - Engineering Thesis ENGR 4005 - Engineering Project ENGR 4033 Honours Thesis
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4024 Construction Management Honours Thesis (20 Credit Points)
Subject Details (p. 3299) Legacy Code: 301160
This is a 20 credit point year-long subject taken over two terms (10 credit points in each term). This subject provides honours level students with the opportunity to undertake research on a specialist topic within their program of undergraduate studies. Each student is assigned to a supervisor (an expert researcher) based on the chosen research topic. Students are expected to meet the supervisor regularly and work progressively to complete the research. This research will be an extended investigation of a chosen subject that is undertaken using appropriate research methods. In addition to the specialist knowledge on the chosen research topic, students will learn a range of skills including academic writing, project management, critical thinking and analytical skills.
Level: Undergraduate Level 4 subject
Incompatible Subjects: BLDG 4005 - Major Project in Construction
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4025 Final Year Project 1 (UG Engineering) (10 Credit Points)
Subject Details (p. 3299) Legacy Code: 301245
This subject describes engineering as a profession, highlighting professional ethics and legal obligations. The focus will be on the development of design skills or research and presentation skills for students enrolled in this subject. This will be achieved through the use of appropriate design/research skills on a capstone project, which will be either design oriented or research oriented on a specialist topic. Under the direction of an academic supervisor and research mentor, the project will demonstrate the student's professional level of identifying, planning, and designing an engineering project while at the same time completing a technical progress report. The capstone project will be continued in the subject Final Year Project 2 (UG Engineering).
Level: Undergraduate Level 4 subject
Co-requisite(s): ENGR 3017
Equivalent Subjects: ENGR 4031 Engineering Thesis 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4026 Final Year Project 2 (UG Engineering) (10 Credit Points)
Subject Details (p. 3300) Legacy Code: 301246
This subject continues the on-going work started in subject Final Year Project 1 (UG Engineering). Throughout the semester students will further develop their design, research and presentation skills. This will be achieved through employment of appropriate design/research skills to finish a capstone project, either design-oriented or research-oriented project, which demonstrates student's professional level of executing, testing, documenting an engineering project and completing a technical report.
Level: Undergraduate Level 4 subject
Pre-requisite(s): ENGR 4025
Equivalent Subjects: ENGR 4032 Engineering Thesis 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4027 Industrial Design Applied Research Project (Honours) (20 Credit Points)
Subject Details (p. 3302) Legacy Code: 301299
The Industrial Design Honours Program provides candidates with an opportunity to undertake a significant design research project and research training component that explores design issues including products, services, systems and research methods. In this subject students combine scholarly inquiry, critical thinking, design thinking, applied design research methods and exploratory prototyping informed by state of the art research via literature review, and human-centred design methods with ethical considerations. Discussion of results of preliminary concept explorations of low to medium fidelity are further refined towards a reframed and detailed design brief, research project timeline, and evolved design research methodology in preparation for a high quality research proposal and a substantial creative work.
Level: Undergraduate Level 4 subject
Equivalent Subjects: LGYC 4734 Industrial Design Project (Commencement)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4029 Industrial Design Project (Completion) (40 Credit Points)
Subject Details (p. 3303) Legacy Code: 300774
The Industrial Design Honours Program provides students with an opportunity to apply their industrial design skills to an in-depth year long design research project. In Industrial Design Major Project (Completion), Honours candidates respond to the research findings and design brief that they produced in Autumn semester. They undertake detailed design development to resolve and communicate a final design solution, which is publicly exhibited at the end of the year. Their design and research communications present a strong argument for the final design and demonstrate the honours candidates capacity to undertake postgraduate design research and to join professional design practice.
Level: Undergraduate Level 4 subject
Pre-requisite(s): ENGR 4028
Equivalent Subjects: LGYB 1049 - Industrial Design Project (Completion)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4030 Industrial Design Research Thesis (Honours) (20 Credit Points)
Subject Details (p. 3304) Legacy Code: 301300
In this unit, students will extend their research journey using appropriate applied design research methods that explore usability, design semantics, functionality, sustainability and product considerations. Students will submit a creative project and exegesis on their research endeavour providing a critical analysis and reflection on outcomes that situate the work within relevant literature, ideas and industrial design field discourse. In addition to the specialist knowledge on the chosen research topic, students will learn a range of skills including academic writing, and project management.
Level: Undergraduate Level 4 subject
Pre-requisite(s): ENGR 4027
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4034 Climate Smart Engineering (10 Credit Points)
Subject Details (p. 3304) Legacy Code: 301420
Climate change is one of the most significant and urgent challenges facing the world today. In this unit, students will learn and appropriately apply scientific principles, in an engineering context, to reduce our impact on climate as well as in adopting to changing climate conditions. Students will explore both current and emerging technologies, that address climate change, in order to propose workable real world solutions.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4035 Smart and Liveable Cities (10 Credit Points)
Subject Details (p. 3305) Legacy Code: 301423
Students will apply smart and sustainability perspectives to design urban centres. Students will use a range of tools to conduct integrated system analysis for smart and liveable cities. Students work on real world projects including green buildings, blue/green space, sustainable transport and infrastructure, sustainable water management. Though these projects, students will achieve significant edge in their employability.
Level: Undergraduate Level 4 subject
Pre-requisite(s): CIVL 2002 OR
ENGR 1050
Equivalent Subjects: ENGR 4011 Sustainability and Risk Engineering
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4036 Advanced Engineering Thesis 2: Detailed Investigations (10 Credit Points)
Subject Details (p. 3305) Legacy Code: 301484
Advanced Engineering Thesis 2 - Detailed Investigations subject consists of a research project designed and implemented under the direction of an academic supervisor and research mentor. This subject is the culmination of studies for students who have completed their first three years of an undergraduate degree and provides substantial training in detailed Investigations. Under staff supervision, students are allocated a particular topic for their research, design their own programme of research, and perform the research. The emphasis of this subject is on the application of research knowledge gained in other subjects and in Engineering Thesis 1 - Preliminary Investigations to the practical conduct of the individual research project. This subject provides final year Advanced engineering students with the opportunity to undertake research on a specialist topic within their Key Program of undergraduate study.
Level: Undergraduate Level 4 subject
Pre-requisite(s): ENGR 4037
Equivalent Subjects: MECH 4006 - Advanced Engineering Thesis 2 Detailed Investigations
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4037 Advanced Engineering Thesis 1: Preliminary Investigations (10 Credit Points)
Subject Details (p. 3306) Legacy Code: 301485
Advanced Engineering Thesis 1 - Preliminary Investigations subject consists of a research project designed and implemented under the direction of an academic supervisor and research mentor. This subject is the culmination of studies for students who have completed their first three years of an undergraduate degree and provides substantial training in Preliminary Investigations. Under staff supervision, students are allocated a particular topic for their research, design their own programme of research, and perform the research. The emphasis of this subject is on the application of research knowledge gained in other subjects to the practical conduct of the individual research project. This subject provides final year Advanced engineering students with the opportunity to undertake research on a specialist topic within their undergraduate field of study.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4038 Biomedical Electronics (10 Credit Points)
Subject Details (p. 3307)
This subject will cover recent advances in biomedical electronics including electronic diagnostic devices, implanted devices, human-computer-interface, bioinstrumentation and neuromorphic engineering. Topics covered span from the bio-electromagnetism and related applications to regulatory aspects (IEC standards and TGA/FDA approval processes) and electrical safety of instrumentation. This subject will have a strong practical design focus with laboratories and tutorials focused on the design of real instrumentation (including manufacturing) dealing with real biomedical signals. This subject uses basic and advanced electronic concepts including circuit simulator(s), embedded systems and requires manual assembly of circuits. Recap and catch-up modules to electronics, signal conditioning, advanced mathematics concepts such us Fourier Transform and their application to electronics as well as circuit simulator training and electronic instruments use training are provided, for students from non Electronic/ Electrical background.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4039 Design for Advanced Manufacturing (10 Credit Points)
Subject Details (p. 3308)
This subject develops specific knowledge and skills in Design for Advanced Manufacturing technologies in the context of Industry 4.0 and Advanced Manufacturing. Advanced manufacturing represents state-of-the-art and cutting-edge manufacturing technologies and processes for high-quality and high precision production of materials and products. Throughout this subject, students will learn advanced manufacturing technologies and processes that lead to the transformation of materials and products into intelligent, sustainable, eco-friendly, and environmentally-conscious practices. Moreover, students will develop the ability to discern suitable practices, materials, and manufacturing processes, as well as analyse the outcomes of Advanced Manufacturing, with a focus on sustainability, efficiency, safety, and ethical considerations, all in the context of their application to the WSU Formula SAE Car Project. Upon successful completion of this subject, students can explore a range of career avenues, including roles such as Manufacturing Engineer, Product Designer, CAD/CAM Engineer, Materials Engineer, and related opportunities.
Level: Undergraduate Level 4 subject
Co-requisite(s): ENGR 3033
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 4040 Industrial Design Major Project (Ideation & Studio Practice) (20 Credit Points)
Subject Details (p. 3308)
In this Industrial Design capstone subject, students will immerse themselves in a complex real-world design problem, with considerable social impact, which consolidates their industrial design knowledge and skills. Students will apply themselves in the areas of concept generation and iterative industrial design processes and problem solving. They will incorporate human factors and desirable consumer attributes to produce a creative and novel solution which meets manufactured quality standards and high-level sustainability principles. All learning activities are underpinned by Industrial Design professional practice, as well as research methods for user-centred design, health and wellbeing, digital futures, ergonomics, and sustainable design practice. During their design project, students will engage with industry experts and community groups reinforcing their role, upon graduation, as empathic innovators, and industrial design practitioners with a multidisciplinary viewpoint.
Level: Undergraduate Level 4 subject
Pre-requisite(s): ENGR4022 Studio Design Synthesis Capstone
OR
ENGR4004 Design Studio 6
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 5001 Fire Engineering 1 (Fire Dynamics) (10 Credit Points)
Subject Details (p. 3309)
This subject is essential for anyone considering a career in Fire Safety and aims to develop detailed knowledge of fire behaviour and dynamics in the built environment. Students will better understand fuels and combustion processes, the chemistry of combustion, flammability limits, ignition characteristics and different types of flames and fire plumes. The subject also introduces students to the basic principles of fire safety design so that they can appreciate fire safety and develop appropriate fire safety engineering solutions.
Level: Postgraduate Coursework Level 5 subject
Equivalent Subjects: ENGR7006 Fire Engineering 1 (Fire Dynamics)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 6001 Bushfire Design and Climate Change (10 Credit Points)
Subject Details (p. 3310)
This subject considers the concept of 'design bushfire' and the impact of climate change upon varying weather and climate conditions in Australia and globally. The potential implications of climate change on bushfire behaviour and bushfire design are developed. Students will be introduced to the concept of "Bushfire Protection Design Guidelines" including the concepts of Bushfire Design Brief and Bushfire Design Subsystems, as well as the Bushfire Verification Method adopted by the National Construction Code. Students will be able to calculate recurrence conditions for bushfire behaviour and bushfire weather conditions using extreme values techniques. Students will compare different bushfire behaviour models and their implications for future climatic conditions in developing performance solutions for bushfire protection. The role of landscape fires and fire generated winds will also be considered in the context of planning and building for bushfire protection. The role of traditional Aboriginal burning practices and culture also forms an important aspect of this subject.
Level: Postgraduate Coursework Level 6 subject
Equivalent Subjects: -
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 6002 Planning for Bushfire Prone Areas (10 Credit Points)
Subject Details (p. 3311)
This subject describes the relevant planning issues for bushfire prone areas and the measures that can be implemented to ensure appropriate development in these areas. Through collaboration with industry professionals students learn that knowledge and understanding of the planning, design and construction of the urban form is important in managing the risk of bushfire in the community. It is also fundamental in understanding of the management of development for bushfires and the necessary infrastructure requirements for bushfire suppression and property protection in bushfire prone areas. Students evaluate and report on planning principles and legal issues in bushfire prone areas, as well as use the legislative framework to determine impacts on property and assets. This subject challenges students to become more strategic thinkers in planning and preparing for bushfire. Knowledge gained in this subject/program will benefit students aspiring to careers such as bushfire consultants and land-use planners.
Level: Postgraduate Coursework Level 6 subject
Equivalent Subjects: ENGR 7016 - Planning for Bushfire Prone Areas
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 6003 Fire Technology and Engineering Principles
Subject Details (p. 3312)
The subject introduces students to the basic principles of fire behaviour and fire safety design so that they can appreciate fire safety principles and interpret fire safety engineering design concepts. Students will learn the basics of combustion, building fire characteristics, smoke movement, responses of fire safety devices, building fire resistance, response of building occupants, fire safety engineering design and assessment methodology. The subject provides the basis for understanding fire safety engineering and the techniques and tools used in fire safety engineering. The subject is designed for building surveyors, who will be assessing performance solutions by fire safety engineers.
Level: Postgraduate Coursework Level 6 subject
Incompatible Subjects: ENGR7011 Fire Technology Principles
ENGR7009 Fire Engineering Principles
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 7001 Advanced Engineering Project 1 (10 Credit Points)
Subject Details (p. 3313) Legacy Code: 301006
In this unit, the students will be working on a major engineering project as a team of 2 to 5 students. The project will be supervised by an academic staff on topics related to his/her research expertise. The students will apply and further develop their expertise in research, engineering project management and planning, work health and safety, and professional writing skills. The students are required to present outcomes using a professional report which should include a background, objectives, a comprehensive literature review, the methodology and a project plan which can then be completed in Advanced Engineering Project 2.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): ENGR 7013
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 7002 Advanced Engineering Project 2 (10 Credit Points)
Subject Details (p. 3313) Legacy Code: 301007
In this subject, students will complete the major engineering project commenced in subject 301006 Advanced Engineering Project 1. The students are expected to develop advanced technical knowledge and skills in their field of study as well as the ability to function effectively as an individual in a team, with the capacity to be a leader or manager. The students are required to present outcomes using a professional report and an oral presentation.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): ENGR 7001
Co-requisite(s): ENGR 7013
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 7004 Bushfire Fighting (10 Credit Points)
Subject Details (p. 3314) Legacy Code: 200500
This subject describes the techniques, hardware and extinguishing agents used to fight and control bushfires and focuses on the logistics involved in ensuring safe, efficient and effective control. The content includes bushfire fighting strategies in the context of rural and interface environments, hazard reduction and brigade structure arrangements. The role of planning in supporting firefighting through water supply and access is also considered as are the findings from various Public Inquiries.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 7005 Emergency Management for Bushfire Prone Areas (10 Credit Points)
Subject Details (p. 3314) Legacy Code: 200459
This subject describes the organisational and administrative arrangements for the management of emergency events in Australia, including the role of States and local government and the techniques available to develop risk management strategies in order to minimise loss of life and property arising from bushfire emergencies. The subject describes how the three tiers of Government interact during major emergency events, the role of community engagement in emergency management and the process of developing a risk management plan for bushfire emergencies. The subject also discusses the role of post-event survey and emergency and evacuation planning at the property scale.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 7006 Fire Engineering 1 (Fire Dynamics) (10 Credit Points)
Subject Details (p. 3315) Legacy Code: 300709
This subject aims to develop a detailed knowledge of fire behaviour and dynamics in the built environment. Students will be able to understand fuels and combustion processes; the chemistry of combustion; flammability limits; ignition characteristics; and different types of flames and fire plumes. The content also covers the burning of liquids and solids; flammable vapour/air mixtures; extinction and extinguishment; flame spread mechanisms and modeling; flashover; fire resistance and fire severity; projection of flames from burning compartment openings; spread of fire from a compartment; production and measurement of smoke; and smoke movement.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYB 8308 - Fire Engineering 1 (Fire Dynamics)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 7007 Fire Engineering 2 (Fire Models) (10 Credit Points)
Subject Details (p. 3316) Legacy Code: 300710
This subject aims to develop an understanding of various types of computational tools used in engineering design of fire safety systems. The fundamentals of control volume, applications of conservations laws in modeling and the form of predictive equations are explained. The content includes evaluations of fire severity, fire resistance levels of various types of building structures and elements. Hand calculation equations, zone models and field models are covered. The limitations of the models in representing the real phenomena are also discussed.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYC 0673 - Fire Engineering 2 (Fire Models)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 7008 Fire Engineering Design and Assessment (10 Credit Points)
Subject Details (p. 3317) Legacy Code: 300718
This subject helps to develop a high level of knowledge of fire safety systems relevant to life protection and the design and assessment of such systems. The subject covers the process of fire safety engineering design and assessment including the fire engineering brief, conceptual design, regulatory objectives, fire safety engineering subsystems, verification methods, timeline analysis, design fires, evaluation of performance of passive and active fire protection systems, risk analysis and fire engineering project reporting.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYB 5425 - Fire Safety Systems (Life Safety)
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 7010 Fire Engineering Science (10 Credit Points)
Subject Details (p. 3318) Legacy Code: 301048
This subject aims to enhance students' knowledge of the fundamental principles of physics, including heat and mass transfer, fluid mechanism and thermodynamics, which govern the natural phenomena associated with fires. The subject also covers properties of materials, basic mathematics and numerical methods for students to become familiar with quantitative analysis of fire dynamics and structural response. In addition, students will learn probability and risk concepts in fire safety engineering. This is a bridging subject for students who are admitted to the Graduate Certificate and Graduate Diploma in Fire Safety Engineering without an engineering or physical science background. It lays the foundation for further studies in fire safety engineering courses.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 7012 Fire Technology and Engineering Principles (10 Credit Points)
Subject Details (p. 3318) Legacy Code: 300948
The subject introduces students to the basic principles of fire behaviour and fire safety design so that they can appreciate fire safety systems and interpret fire safety engineering design concepts. The subject covers the basics of combustion, building fire characteristics, smoke movement, responses of fire safety devices, building fire resistance, response of building occupants, fire safety engineering design and assessment methodology. The subject provides the basis for understanding fire safety engineering and the techniques and tools used in fire safety engineering.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: ENGR 7011 - Fire Technology Principles ENGR 7009 - Fire Engineering Principles
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 7013 Industrial Experience (PG) (0 Credit Points)
Subject Details (p. 3319) Legacy Code: 301027
Students will undertake 12 weeks full time (37.5 hours per week) employment (or part time equivalent) to obtain relevant workplace experience in Engineering companies under the supervision of professional engineers in one company or more. This will give the student a solid grounding in the Key Program of engineering which they have chosen to pursue.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 7014 Master Project 1 (10 Credit Points)
Subject Details (p. 3320) Legacy Code: 300597
This subject is a problem based project subject. Students are expected to conduct self studies under supervision by academic staff. Students will identify research topics in consultation with supervisors, carry out literature survey in one of the fields of engineering, construction, information technology or data science. Students will be required to define research objectives and scope, establish research methodology and prepare a research plan.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 5830 - Master of Engineering Specialist Reading LGYA 4574 - Built Environment Project LGYA 4576 - Built Environment Research Project
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 7015 Master Project 2 (10 Credit Points)
Subject Details (p. 3320) Legacy Code: 300598
This subject is a continuation of subject Master Project 1 and is a problem based project subject. Students are expected to conduct self studies under supervision by academic staff and deliver the final outcomes of the research topics that are proposed in Master Project 1. Students will employ the identified methodologies to carry out the research plans and fulfil the research objectives with the defined scope. Each individual student is required to produce an oral presentation and a final written report in one of the fields of engineering, construction, information technology or data science. Students will acquire problem solving skills in this subject.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): ENGR 7014
Equivalent Subjects: LGYA 5829 - Master of Engineering Project LGYA 4576 - Built environment Research Project
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 7016 Planning for Bushfire Prone Areas (10 Credit Points)
Subject Details (p. 3321) Legacy Code: 301049
This subject describes the relevant planning issues for bushfire prone areas and the measures that can be implemented to ensure appropriate development in these areas. A knowledge and understanding of the planning, design and construction of the urban form is important if we are to manage the risk of bushfire on the community. It is also fundamental in our understanding of the management of development for bushfires and the necessary infrastructure for bushfire suppression and property protection in bushfire prone areas. Topics include conceptual planning issues, determining bushfire prone areas, bushfire and planning legislation, strategic and regional planning for bushfire, subdivision, defendable space and construction, design, staging and siting, vulnerable developments, industry and other forms of commercial use, landscaping and maintenance, and water and access.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: ENGR 6002 - Planning for Bushfire Prone Areas ARCH 7004 - Planning and Development Control
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 7017 Professional Practice and Communication (10 Credit Points)
Subject Details (p. 3322) Legacy Code: 301005
This subject introduces some of the concepts, standards and techniques associated with the current professional practice for engineering and information technology students. These include the various elements of engineering and IT practice, basic knowledge of contract laws and legal responsibility, competence in verbal and written communication, and an understanding of ethical considerations.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 7019 Specialised Software Applications (10 Credit Points)
Subject Details (p. 3323) Legacy Code: 301002
This subject offers several streams of practical applications in engineering and industrial design software. Students get to choose a software application stream depending on their key program. Lectures and assignments are delivered online and are enhanced by face to face contact with stream coordinators. Emphasis is placed on teaching students practical software applications skills relevant to industry needs.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: ELEC 7007 - Engineering Software Applications
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 7020 Sustainability and Risk Engineering (PG) (10 Credit Points)
Subject Details (p. 3323) Legacy Code: 300939
Analysis of sustainability with engineering perspective is increasingly becoming important in the modern world. Also, in the future sustainability will include risk engineering. Hence, engineers with in-depth understanding of different tools that can be used for both sustainability and risk analysis will have significant competitive edge in their future career. The main objective of this subject is to introduce different tools available for sustainability and risk analysis in various engineering applications. The content includes renewable/alternative energy systems, energy/resource efficiency, sustainable/green buildings, sustainable transport and infrastructure, sustainable water management, environmental management systems, sustainability reporting, life cycle analysis, probability/reliability theory, risk assessment models, overall system analysis.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 7023 Advanced Biomedical Data and Images (10 Credit Points)
Subject Details (p. 3324) Legacy Code: 301211
This subject will cover advanced biomedical signal and data analysis including electrocardiography, electroencephalography, human-computer-interface, electromyography, machine learning and biomedical images. This subject will have a strong practical design focus with laboratories and tutorials focused on the design of usable software packages dealing with real biomedical signals.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 7024 Advanced Biomedical Electronics (10 Credit Points)
Subject Details (p. 3325) Legacy Code: 301209
This subject will cover advanced design of biomedical electronic devices including, implanted devices, human-computer-interface, bioinstrumentation and neuromorphic engineering. Topics covered span from the bioelectromagnetism and related applications to regulatory aspects (IEC standards and TGA/FDA approval processes) and electrical safety of instrumentation. This subject will have a strong practical design focus with laboratories and tutorials focused on the design of real instrumentation (including manufacturing) dealing with real biomedical signals.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 7025 Human Physiology and Biomedical Technologies (10 Credit Points)
Subject Details (p. 3325) Legacy Code: 301210
This subject aims to introduce a wide range of biomedical technologies and how they are used in medical practice. Topics will span from data acquisition technologies such as ECG, EEG, body plethysmography, to large imaging diagnostics such as CT scanner, PET scanner and bio-mechanical assisting devices often used for rehabilitation and support. The first part of this subject will include a module on human physiology and bio-mechanics. This module gives a basic understanding of the human body and introduces the scientific and medical terminology used for anatomy, physiology and biochemistry and bio-mechanics.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 7026 Performance Solutions for Bushfire Protection (10 Credit Points)
Subject Details (p. 3326) Legacy Code: 301265
This subject describes the processes and techniques available to develop performance outcomes to the planning and building of structures required for bushfire protection in Australia. This subject provides advanced methods to address performance when considering bushfire protection measures. It also introduces the 'bushfire protection guidelines' and processes similar to that used in developing performance solutions under the National Construction Code.
These include the use of event tree analysis, verification methods, consideration of climate change and the use of annual exceedance probabilities when developing performance solutions. Students are required to develop suitable measures through a performance solution for bushfire protection of a building.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): None
Co-requisite(s): None
Equivalent Subjects: ENGR 7003 Alternate Solutions for Bushfire Prone Areas
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 7027 Spatial Tools and Mapping (10 Credit Points)
Subject Details (p. 3327) Legacy Code: 301264
This subject offers practical applications in spatial information software. Students will be taught using Geographical Information Systems (GIS) software to prepare maps (such as bushfire prone land) as well as management plans required of planning and design practitioners. Workshops are provided to assist students in the practical use of the GIS system. Students are provided with online module notes and readings as well as assignments being submitted online. Emphasis is placed on teaching students practical software applications skills relevant to industry needs.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 7028 Engineering Project 1 (PG) (20 Credit Points)
Subject Details (p. 3327) Legacy Code: 301395
This subject introduces the professional engineering skills necessary to practice as an engineer, including project management, professional communication, professional ethics and legal obligations. Students are required to conduct a critical literature survey on a relevant area, identify the design or research problems, propose a plan and methodology for the design or research problems, conduct some preliminary work and analysis, present their work, and complete a project proposal and a project report.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 7029 Engineering Project 2 (PG) (20 Credit Points)
Subject Details (p. 3328) Legacy Code: 301396
This subject is a continuation of subject Engineering Project 1 (PG). Students will further develop their professional skills in engineering design, research, and presentation. This will be achieved through the independent work on the proposed engineering design or research topic under an academic supervisor. Students are required to employ the identified design plan or research methodologies to carry out the proposed design or research work, fulfil the design or research objectives, evaluate and analyse the results, and present the results and findings in an oral presentation, a research paper and a final project report. This subject will demonstrate students' professional level of conducting an engineering project.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): ENGR 7028
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 7030 Bushfire Design and Climate Change (10 Credit Points)
Subject Details (p. 3329)
This subject considers the concept of ‘design bushfire’ and the impact of climate change upon varying weather and climate conditions in Australia and globally. The potential implications of climate change on bushfire behaviour and bushfire design are developed. Students will be introduced to the concept of “Bushfire Protection Design Guidelines” including the concepts of Bushfire Design Brief and Bushfire Design Subsystems, as well as the Bushfire Verification Method adopted by the National Construction Code. Students will be able to calculate recurrence conditions for bushfire behaviour and bushfire weather conditions using extreme values techniques. Students will compare different bushfire behaviour models and their implications for future climatic conditions in developing performance solutions for bushfire protection. The role of landscape fires and fire generated winds will also be considered in the context of planning and building for bushfire protection. The role of traditional Aboriginal burning practices and culture also forms an important aspect of this subjectt.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 9001 Higher Degree Research Thesis - Engineering (80 Credit Points)
Subject Details (p. 3329) Legacy Code: 800179
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 9002 Higher Degree Research Thesis - Engineering (80 Credit Points)
Subject Details (p. 3331) Legacy Code: 800202
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

ENGR 9003 Higher Degree Research Thesis - Engineering (Environmental) (80 Credit Points)
Subject Details (p. 3332) Legacy Code: 800061
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

Other Health (HLTH)

HLTH 0001 Health Care Environments (WSTC Prep) (10 Credit Points)
Subject Details (p. 3384) Legacy Code: 700226
Health care environments introduces students to foundation knowledge for health science level subjects in their degree. This includes supporting the independence and well being of clients, regardless of age or disability. Focus in this subject includes working legally and ethically, working with diverse people and following safe work practices. Effective communication is imperative, through written care plans, identifying what has been provided using client centred practice. This subject incorporates most core and elective subjects in the Certificate III in Individual Support. Students can pursue a qualification through the College RTO in one of three specialisations- Disabilities, Ageing, and Home & Community.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: HLTH 0002 - Health Care Environments (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 0002 Health Care Environments (WSTC) (10 Credit Points)
Subject Details (p. 3385) Legacy Code: 900106
Health care environments introduces students to foundation knowledge for health science level subjects in their degree. This includes supporting the independence and wellbeing of clients, regardless of age or disability. Focus in this subject includes working legally and ethically, working with diverse people and following safe work practices. Effective communication is imperative, through written care plans, identifying what has been provided using client centred practice. This subject incorporates most core and elective subjects in the Certificate III in Individual Support. Students can pursue a qualification through the College RTO in one of three specialisations- Disabilities, Ageing, and Home & Community.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: HLTH 0001 - Health Care Environments (UWSCFS)
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 0003 Literacy in Health Science (WSTC Prep) (10 Credit Points)
Subject Details (p. 3386) Legacy Code: 700227
This subject provides an introduction to the provision of health, services and fields associated with the provision of health in Australia. The subject covers a range of health science concepts, including what health literacy is and why it is important and other concepts such as acute care, chronic care, National Health Priority Areas (NHPAs) in Australia, and health education, The subject also introduces examples of terminology used for measuring the distribution and determinants of disease and illness in varied population groups (epidemiology). This includes terms such as health data, morbidity, co-morbidities, mortality, quality of life and disability adjusted life years. This subject aims to give students an understanding of health science practice in Australia both in city and rural settings and identifies minority group issues and challenges in accessing healthcare and services.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 0004 Organisation for Tertiary Study (WSTC) (5 Credit Points)
Subject Details (p. 3387) Legacy Code: 900089
This subject aims to familiarise students with some of the concepts and issues surrounding healthy living, particularly for young people in an environment far from parental support. It introduces students to academic skills and the expectations of learners in a tertiary environment while further developing their language skills. By the end of this subject, the goal is for students to have a better knowledge and understanding of how to improve their health, develop organisational skills and learn to manage their time. The subject also aims to develop their understanding of the effect of drug use on health and lifestyle. There will be a range of teaching and learning strategies used in this subject including working in groups. The aims of this subject are to develop an understanding of the concept of health and wellbeing; develop and maintain organisational skills for various areas of life; create a mindset and learn skills to manage time well.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: LGYB 1377 - Living Skills (UWSC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 0005 The Health Science Professional (WSTC Prep) (10 Credit Points)
Subject Details (p. 3388) Legacy Code: 700303
The Health Science Professional is designed to enhance Academic English skills whilst exploring different pathways available in the Bachelor of Health Science degree, and the majors associated with Testamur majors including Clinical Science, Health Promotion, Health Services Management, Public Health and Recreation Therapy. The subject will lead students through the compliance requirements of their intended pathway, and map out the process of meeting these requirements. Students are encouraged to develop their ideas and understanding of health sciences and the areas of specialisation they can pursue.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 1001 Foundations of Research and Evidence-Based Practice (10 Credit Points)
Subject Details (p. 3388) Legacy Code: 400863
This subject considers the reasons and roles for evidence-based practice and research in healthcare, introducing students to core concepts and relevant terminology. Skills are developed for asking clinical or professional healthcare questions and translating these skills into search strategies for finding evidence. To make sense of that evidence, students are introduced to quantitative and qualitative research methods, types of data, how data are described and how biostatistics is used to provide meaning to research data.
Level: Undergraduate Level 1 subject
Equivalent Subjects: HLTH 1002 - Foundations of Research and Evidence-Based Practice (UWSC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 1002 Foundations of Research and Evidence-Based Practice (WSTC) (10 Credit Points)
Subject Details (p. 3389) Legacy Code: 700064
This subject will consider the reasons and roles of evidence-based practice and research, and introduce students to their language and core concepts. Skills will be developed for asking clinical or professional healthcare questions and to translate these into search strategies for finding evidence. To make sense of that evidence, students will be introduced to quantitative and qualitative research methods, types of data, how data is described and how biostatistics is used to provide meaning to research data.
Level: Undergraduate Level 1 subject
Equivalent Subjects: HLTH 1001 - Foundations of Research and Evidence-Based Practice
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 1003 Introduction to Paramedicine (10 Credit Points)
Subject Details (p. 3390) Legacy Code: 401066
This subject introduces students to the paramedic profession and its scope of practice in Australia. It includes exploration of the roles and responsibilities of paramedics in the context of the changing health environment. Ethical issues and relevant legal and regulatory requirements will also be discussed. Students will be introduced to the key concepts of paramedicine and to the complexity of normal development and its relationship to the processes of health science.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 1006 Movement and Skill Development (10 Credit Points)
Subject Details (p. 3391) Legacy Code: 400891
This subject examines the scientific basis for movement and sports skill development. An understanding of the principles of movement and motor skill and how they apply to performance is examined through a range of movement tasks required for track and field athletics and some team sports. Laboratory activities will focus upon the basic movement tasks of throwing, jumping, balancing, striking, running and rotary activities. An examination of the instruments used in efficient movement analysis is undertaken.
Level: Undergraduate Level 1 subject
Incompatible Subjects: HLTH 1008 - PDHPE Exploring Movement Skills HLTH 3013 - PDHPE Efficient Movement Principles
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 1009 Paramedic Practice 1 (10 Credit Points)
Subject Details (p. 3391) Legacy Code: 401067
This subject allows the student to develop professional and clinical skills and techniques in preparation for paramedic practice. Students will be exposed to manual handling techniques to enable safe lifting and movement of patients and equipment, and discuss principles of infection control and scene safety. Students will learn how to undertake a holistic patient assessment and perform basic diagnostic tests. Students will have the opportunity to practice new skills and become oriented to the prehospital setting during clinical placements on non-emergency transport ambulances, preparing them for an extended emergency ambulance clinical placement in the following semester.
Level: Undergraduate Level 1 subject
Pre-requisite(s): HLTH 1003
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 1010 Professional Health Competencies (10 Credit Points)
Subject Details (p. 3393) Legacy Code: 400871
This subject introduces skills for studying and working in health science. Students will gain an understanding of the interdisciplinary and multi-disciplinary nature of health science practice in the 21st century, and how this interacts with the specialty health professions, client and community expectations of health care and employment opportunities in health science. Students will learn foundation competencies that will underpin their academic development and their safe, responsible and ethical practice in health science service environments.
Level: Undergraduate Level 1 subject
Equivalent Subjects: HLTH 1011 - Professional Health Competencies (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 1011 Professional Health Competencies (WSTC) (10 Credit Points)
Subject Details (p. 3393) Legacy Code: 700067
This subject introduces skills for studying and working in health science. Students will gain an understanding of the interdisciplinary and multi-disciplinary nature of health science practice in the 21st century, and how this interacts with the specialty health professions, client and community expectations of health care and employment opportunities in health science. Students will learn foundation competencies that will underpin their academic development and their safe, responsible and ethical practice in health science service environments.
Level: Undergraduate Level 1 subject
Equivalent Subjects: HLTH 1010 - Professional Health Competencies
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 1012 Evidence in Health (10 Credit Points)
Subject Details (p. 3394) Legacy Code: 401383
This subject will introduce skills for finding and using the best available evidence in health. This begins with understanding thinking systems, biases and why we often don't accept, or respond, to facts, science and evidence. Students will learn the evidence-based practice process to formulate questions and find appropriate and relevant evidence from the unending amount of information available. The subject covers key concepts in how to read and understand a research paper. Students will develop skills for communicating evidence to strengthen arguments in academic writing and professional practice.
Level: Undergraduate Level 1 subject
Equivalent Subjects: HLTH 1001 - Foundations of Research and Evidence-Based Practice HLTH 1002 - Foundations of Research and Evidence-Based Practice (UWSC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 1013 Professional Competencies in Health (10 Credit Points)
Subject Details (p. 3395) Legacy Code: 401396
This subject, taken in the first session for commencing students in health science courses, offers an introduction to foundation knowledge and skills required for future practice in the health workforce. Students will gain an understanding of their roles and will develop skills required for safe, responsible and ethical practice required as health professionals. There is a specific focus on developing students' understanding of the roles of others in the interprofessional health care team as a way of establishing -professional identity. The International Classification of Functioning provides a framework within which client centred and community focussed approaches to practice is discussed. The subject also uses a 'student capital' framework to facilitate reflection of academic capability and development of skills required for success at university.
Level: Undergraduate Level 1 subject
Equivalent Subjects: HLTH 1011 - Professional Health Competencies
HLTH 1010 - Professional Health Competencies
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 1014 Evidence in Health (WSTC) (10 Credit Points)
Subject Details (p. 3396) Legacy Code: 700315
This subject will introduce skills for finding and using the best available evidence in health. This begins with understanding thinking systems, biases and why we often don't accept, or respond, to facts, science and evidence. Students will learn the evidence-based practice process to formulate questions and find appropriate and relevant evidence from the unending amount of information available. The subject covers key concepts in how to read and understand a research paper. Students will develop skills for communicating evidence to strengthen arguments in academic writing and professional practice.

HLTH 1001 Foundations of Research and Evidence-Based Practice
HLTH 1012 Evidence in Health
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 1015 Professional Competencies in Health (WSTC) (10 Credit Points)
Subject Details (p. 3397) Legacy Code: 700313
This subject, taken in the first session for commencing students in health science courses, offers an introduction to foundation knowledge and skills required for future practice in the health workforce. Students will gain an understanding of their roles and will develop skills required for safe, responsible and ethical practice required as health professionals. There is a specific focus on developing students' understanding of the roles of others in the inter-professional health care team as a way of establishing professional identity. The International Classification of Functioning provides a framework within which client centred and community focussed approaches to practice is discussed. The subject also uses a 'student capital' framework to facilitate reflection of academic capability and development of skills required for success at university.
Level: Undergraduate Level 1 subject
Co-requisite(s): Students in programs 6000 or 6001 must
- have passed or be registered in 1 subject from HLTH 0005 or LANG 0003
- have passed or be registered in NATS 0006
Equivalent Subjects: HLTH 1011 Professional Health Competencies (WSTC)
HLTH 1010 Professional Health Competencies
HLTH 1013 Professional Health Competencies in Health
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 1016 Professional Competencies in Health (UG Cert) (10 Credit Points)
Subject Details (p. 3398) Legacy Code: 500054
This subject offers an introduction to foundation knowledge and skills required for future practice in the health workforce. Students will gain an understanding of their roles and will develop skills required for safe, responsible and ethical practice required as health professionals. There is a specific focus on developing students' understanding of the roles of others in the interprofessional health care team as a way of establishing -professional identity. HLTH 1018 Paramedicine Foundations 1 (10 Credit Points)
Subject Details (p. 3399)
This subject introduces students to the theoretical and practical aspects of modern paramedicine throughout Australia and internationally. It includes exploration of the roles and responsibilities of paramedics within healthcare systems considering relevant regulatory, ethical, and legal issues. Students will gain foundational practical knowledge in key concepts of paramedicine, in line with standards such as the National Safety and Quality Health Services Standards (NSQHS). Students will also begin to analyse typical out of hospital case scenarios to introduce the application of theory to practical contexts.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 1019 Paramedicine Foundations 2 (10 Credit Points)
Subject Details (p. 3399)
In this Subject, students develop additional skills around patient assessment and the management of basic medical and trauma conditions. Students also learn to work in clinical teams in a range of environments and focus on the provision of person-centred care. Students continue to explore the role and context of paramedicine within the health system including existing and emerging paramedic practice environments. Students will have the opportunity to practice new and existing skills. Students become oriented to the out of hospital setting during clinical placements in the community preparing them for an emergency ambulance clinical placement in the following semester
Level: Undergraduate Level 1 subject
Pre-requisite(s): 401481 Paramedicine Foundations 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 1020 Foundations of HPE (10 Credit Points)
Subject Details (p. 3401)
This subject introduces foundational disciplinary knowledge and elementary principles of practice within sport, health, and physical education across a variety of contexts. It aims to commence the development of the key professional practices of the field, where students will learn the basic processes of design, implementation, and evaluation inherent in the teaching and learning cycle. This will require students to engage in a variety of practical activities such that they begin to understand the essential requirements for creating learning experiences in HPE and sport settings.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 1021 Effective Communication in Health (WSTC) (10 Credit Points)
Subject Details (p. 3401)
Effective communication in health is fundamental to establishing professional connections, whether it involves one-on-one interactions with clients, educating the community about health-related topics, or collaborating with fellow health professionals within a multidisciplinary framework. This subject is designed to enhance communication competencies essential for future roles in the healthcare sector, spanning various contexts. These communication abilities encompass establishing therapeutic rapport with both individual clients and groups, as well as conveying health-related information to clients, groups, and the broader community. Moreover, students will cultivate the proficiency needed to establish suitable collaborative relationships with their professional peers.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 1022 Evidence in Health Practice (WSTC) (10 Credit Points)
Subject Details (p. 3402)
This subject will introduce skills for finding and using the best available evidence in health. This begins with understanding thinking systems, biases and why we often don't accept, or respond to facts, science and evidence. Students will learn the evidence-based practice process to formulate questions and find appropriate and relevant evidence from the unending amount of information available. The subject covers key concepts in how to read and understand a research paper. Students will develop skills for communicating evidence to strengthen arguments in academic writing and professional practice.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 1023 Diversity in Health (WSTC) (10 Credit Points)
Subject Details (p. 3403)
This subject prepares health science students with the foundational abilities to comprehend and interact proficiently within our culturally and socially varied society, both in our daily lives and professional endeavours. A significant emphasis will be placed on exploring Indigenous Australia, allowing students to develop a deep understanding of the accomplishments and requirements of Indigenous Australians. The subject will also delve into the concept of cultural safety on a broader scale, placing these topics within the framework of healthcare professionals operating in diverse cultural environments and managing distinct health beliefs and practices. An understanding of cultural diversity plays a crucial role in healthcare delivery and cultural competence significantly influences the health of Indigenous and other minority populations.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 2001 A Field Study: Comparative Studies of Health Care Delivery (10 Credit Points)
Subject Details (p. 3404) Legacy Code: 400958
Australia has strict border measures in place to protect the health of the Australian community. Travel restrictions between Australian states and territories and in some remote areas of Australia are in place to help prevent the spread of COVID-19. Further to this, there is a ban on overseas travel from Australia. You can't leave Australia unless you get an exemption from the Department of Home Affairs (source - https://covid19.homeaffairs.gov.au/leaving-australia). Due to this ban on international travel, this subject will not be offered 2021 Summer A. The focus of this subject is to provide nursing students with the problem-solving skills required in assessing and caring for people who are living in poverty in remote or rural areas in Australia and/or internationally. This subject is designed to enable students to develop cultural awareness and understanding of health care delivery and contemporary issues confronting health care for people who are living in remote or rural areas in Australia and/or internationally. Students will be eligible for up to 80 hours of approved clinical hours following successful completion of the clinical assessment tool by an accredited registered nurse.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 2003 Biomechanics (10 Credit Points)
Subject Details (p. 3405) Legacy Code: 401140
Level: Undergraduate Level 2 subject
Equivalent Subjects: BIOS 2004 - Biomehanics and Kinesiology HLTH 2008 - Introduction to Biomechanics
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 2004 Exercise Bioenergetics (10 Credit Points)
Subject Details (p. 3406) Legacy Code: 400883
This subject investigates exercise metabolism and related genomics and proteomics in an integrated fashion. Covering: energy pathways; metabolic control; metabolism, oxygen consumption and respiratory quotient relationships; metabolic responses to acute and chronic exercise; pathway contributions to exercise; metabolic limitations to exercise; metabolic contributions to fatigue; metabolic acidosis, cellular and systemic implications of metabolic thresholds, conditions that can alter cellular metabolism. Whilst skeletal muscle metabolism is the primary focus, liver and adipose tissue metabolism are also considered as are anabolic pathways. Students will be exposed to basic biochemical assays of interest to the exercise physiologist.
Level: Undergraduate Level 2 subject
Pre-requisite(s): NATS 1009 AND
NATS 1010 AND
SPRT 1001 AND
HLTH 1001
Equivalent Subjects: BIOS 2003 - Bioenergetics of Exercise
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 2005 Exercise Prescription I (10 Credit Points)
Subject Details (p. 3407) Legacy Code: 401143
This subject is designed to give students an understanding of and experience in exercise prescription and fitness program construction for the general population (apparently healthy) across all ages and genders. It will focus on the development of general health-related exercise programs, which improve aerobic and anaerobic fitness, muscular strength and endurance, flexibility and body composition. Students will design, implement, supervise and evaluate a self-prescribed exercise program, and instruct training sessions for fellow students.
Level: Undergraduate Level 2 subject
Pre-requisite(s): HLTH 2003 AND
SPRT 2002
Equivalent Subjects: HLTH 2006 - Exercise Prescription for General Populations
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 2006 Exercise Prescription for General Populations (10 Credit Points)
Subject Details (p. 3408) Legacy Code: 400326
In 2016, this subject is replaced by 401143 - Exercise Prescription I. The exercise prescription area is designed to give students an understanding of and experience in exercise prescription and fitness program construction for the general population of all ages and both genders, including pre exercise screening and fitness testing. It will focus on the development of general health related fitness programs, which improve aerobic and anaerobic fitness, flexibility, muscular strength and endurance, including resistance training. Students will design, implement and evaluate a self-prescribed exercise program as well as provide one-to-one training sessions for fellow students.
Level: Undergraduate Level 2 subject
Pre-requisite(s): HLTH 2008 AND
BIOS 2011 AND
BIOS 2037
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 2007 Fundamentals of Medical Concepts and Terminology (10 Credit Points)
Subject Details (p. 3409) Legacy Code: 300950
This subject is designed to provide the student with the knowledge necessary to understand the information contained in the health record, to function in a medical environment through an understanding of the fundamentals of medicine and to effectively use disease classification systems. Within each body system, the student will study anatomy and physiology, disease processes and their treatment, and medical terminology (disease titles, symptomatic terms, surgical terms and investigations). The subject will also focus on specialist topics such as mental health, obstetrics, paediatrics, infectious diseases, oncology, radiotherapy, nuclear medicine, diagnostic and surgical interventions.
Level: Undergraduate Level 2 subject
Pre-requisite(s): INFS 2004
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 2009 Mental Health and Substance Abuse (10 Credit Points)
Subject Details (p. 3410) Legacy Code: 401095
This subject introduces students to mental health and behavioural presentations, and emergencies arising from legal and illegal substance use. Students will explore the epidemiology, pathophysiology, manifestation, recognition, assessment and management of common mental health problems, behavioural presentations, and cases involving legal and illegal drug use in the context of paramedicine. Students will practice techniques for managing these presentations from an interpersonal communication perspective and a clinical management perspective. Acute and sub-acute presentations will be discussed, with specific attention given to the role of the paramedic regarding risk assessment, counselling, and health promotion. Legalities associated with management of behaviourally disturbed or cognitively impaired patients will be discussed, and issues relating to multi-agency care, collaboration and co-operation will be examined.
Level: Undergraduate Level 2 subject
Pre-requisite(s): HLTH 1009
Co-requisite(s): HLTH 2017
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 2012 Nutrition and Health 1 (10 Credit Points)
Subject Details (p. 3412) Legacy Code: 300933
Nutrition is the science that applies knowledge of the nutritional components of foods to ensure the wellbeing of the human body. This subject presents the basic principles and concepts of human nutrition including nutrient requirements, functions, deficiency symptoms and the effects of dietary excess as well as energy balance and weight control. Students will gain a general understanding of the macronutrients such as carbohydrates, proteins and lipids in human metabolism, energy release and common diseases and disorders such as obesity, malnutrition, diabetes etc. The role of water and electrolytes in cellular and tissue functions, as well as alcohol metabolism and its impact on human health will be covered. The micronutrients are also studied, including the properties, general requirements, functions and the effects of deficiency and excess consumption of vitamins and essential minerals.
Level: Undergraduate Level 2 subject
Equivalent Subjects: HLTH 2011 - Nutrition and Health 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 2013 Nutrition and Health 2 (10 Credit Points)
Subject Details (p. 3412) Legacy Code: 300934
This subject explores the basic concepts of human nutrition in relation to various stages of the lifespan from infants to late adulthood. It also explores nutrition in relation to chronic health conditions such as obesity, cardiovascular disease and eating disorders. Students will learn about the development of the Australian Dietary Guidelines and Nutrient Reference Values. Students will also learn to make informed decisions with regard to nutritionally critical moments of the life span, emerging nutrition opinions or contemporary uses of nutrition in physical activity, sports and chronic health conditions.
Level: Undergraduate Level 2 subject
Pre-requisite(s): HLTH 2012
Equivalent Subjects: HLTH 2014 - Nutrition and Health 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 2015 Out-of-hospital Medical Care 1 (10 Credit Points)
Subject Details (p. 3413) Legacy Code: 401074
The aim of this subject is to extend knowledge and clinical skills required for the assessment and management of cardiovascular, respiratory and neurological medical emergencies. The subject combines pathophysiological principles development of skills and interpretation of diagnostic technology with clinical decision-making to implement advanced life support.
Level: Undergraduate Level 2 subject
Pre-requisite(s): BIOS 2029 or
NATS 2038
Co-requisite(s): HLTH 2018
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 2017 Paramedic Practice 2 (10 Credit Points)
Subject Details (p. 3414) Legacy Code: 401068
This subject focuses on the core competencies for paramedic practice in real world situations. These competencies will be developed through on-campus simulation learning, clinical placements with an emergency ambulance crew over a period of 3 weeks, and through an evidence-based exploration of paramedic practice. The core competencies include communication, documentation, reflections and professional ethical behaviour. In addition, students will practice patient assessment and supervised procedures appropriate to their level.
Level: Undergraduate Level 2 subject
Pre-requisite(s): HLTH 1009 AND
NATS 1010 AND
NATS 1009
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 2018 Paramedic Practice 3 (10 Credit Points)
Subject Details (p. 3415) Legacy Code: 401073
This subject introduces students to advanced elements of paramedic practice including advanced life support (ALS) resuscitation, and systematic examination of the cardiorespiratory and neurological systems. Core psychomotor procedures will be explored including advanced airway management and intravenous access. The subject has a strong practical component, during which students can apply theoretical learning to simulated cases of moderate complexity. The unit is underpinned by a strong focus on reasoning and decision making.
Level: Undergraduate Level 2 subject
Pre-requisite(s): HLTH 2017
Co-requisite(s): HLTH 2015
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 2021 Research Methods (Quantitative and Qualitative) (10 Credit Points)
Subject Details (p. 3416) Legacy Code: 400864
This subject further explores research methods used to acquire knowledge in healthcare. This includes research designs, international standards, key statistics, and interpretation of results. The range of health research methods will be presented, and studies about treatment effectiveness (clinical trials and systematic reviews), diagnostic effectiveness and qualitative approaches will be explored in detail. Pathways for early-career research are also introduced.
Level: Undergraduate Level 2 subject
Pre-requisite(s): HLTH 1001
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 2022 Biostatistics in Health (10 Credit Points)
Subject Details (p. 3417) Legacy Code: 401381
This subject introduces concepts and practice of biostatistics related to public health, healthcare policy and practice, and health science generally. Evidence-based health professionals must be able to interpret and act upon quantitative data from research about the health of individuals, communities and populations; and factors affecting health including determinants of health, and the effects of policies and interventions on the health of individuals and groups. The subject covers essential principles of statistical reasoning, assumptions and methods applied to health scenarios. Learning is achieved by students exploring available statistical information and through analysis of numerical data sets.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 2023 Introduction to Physical Cultural Studies (10 Credit Points)
Subject Details (p. 3418) Legacy Code: 401413
From 2020 this subject replaces 401239 - Introduction to Physical Cultural Studies. The subject explores the interconnection between physical movement, culture, and society. Students will investigate the relationships among physical culture in its various forms (including health, physical activity, sport, dance, leisure, and movement related practices) and broader contexts (pedagogical, social, cultural, political, economic, and technological). The subject will equip students with knowledge and skills in becoming active, reflective and critical learners in physical culture thereby enacting meaningful changes in sites of inequality.
Level: Undergraduate Level 2 subject
Equivalent Subjects: PUBH 1005 - Foundations of Wellbeing PUBH 2014 - Introduction to Physical Cultural Studies
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 2024 Research Methods in Health (10 Credit Points)
Subject Details (p. 3418) Legacy Code: 401403
This subject explores quantitative and qualitative research methods used to generate and expand knowledge in healthcare. The principal practice and policy questions in healthcare are identified, along with the research paradigms, methodologies, rationales, designs, sampling, data collection and measurement methods, analysis, controls over bias and validity, reporting methods and ethical standards applied to answer these questions and inform evidence-based practice. Practical experience is gained with tools for the appraisal of research evidence guiding practice. Workplace research and organisation research for quality assurance are included. Pathways to a professional career in research are explained.
Level: Undergraduate Level 2 subject
Pre-requisite(s): HLTH 1012 OR
HLTH 1001
Equivalent Subjects: HLTH 2021 Research Methods (Quantitative and Qualitative)
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 2025 Exercise Nutrition (10 Credit Points)
Subject Details (p. 3419) Legacy Code: 401436
This subject provides students with an understanding of the interdependent areas of nutrition within the context of sport, physical activity, and exercise. Nutritional needs and recommendations for all levels and types of physical activity are covered along with the links between nutrition and health, sport performance, body composition and control of body weight. Students will develop skills in nutritional analysis and program development, measurement of energy expenditure and body composition assessment. Students will use these skills and knowledge in the individualisation of advice on exercise nutrition for health and sport performance.
Level: Undergraduate Level 2 subject
Pre-requisite(s): NATS 1009 AND
SPRT 1001
Equivalent Subjects: BIOS 2010 - Exercise Nutrition BIOS 2011 - Exercise Nutrition Body Composition and Weight Control
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 2026 Paramedicine Care 1 (10 Credit Points)
Subject Details (p. 3420)
This subject develops core competencies for paramedic practice in real-world situations by facilitation of an emergency ambulance placement. These core competencies include communication, documentation, reflections, and professional behaviour. In addition, this unit aims to build foundational skills and knowledge relating to the assessment and management of neurological, musculoskeletal, and integumentary patient presentations. The subject also deals with the assessment and management of pain in the out-of-hospital setting. The subject combines theoretical and practical aspects to develop knowledge, skills, interpretation, and application of diagnostics and clinical decision-making to implement appropriate patient care.
Level: Undergraduate Level 2 subject
Pre-requisite(s): NATS 1009
NATS 1010
HLTH 1019
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 2027 Paramedicine Care of Diverse Patients 1 (10 Credit Points)
Subject Details (p. 3422)
This subject introduces students to diverse populations including those with mental illness, substance dependence issues including drugs and alcohol, and those who engage in recreational drug use. Students will explore health behaviour and contemporary models of care including recovery-focussed care, underpinned by a biopsychosocial framework. The nature of contemporary paramedicine will be examined, with a focus on concepts including motivational interviewing, opportunistic counselling, and brief interventions.
Level: Undergraduate Level 2 subject
Pre-requisite(s): HLTH 1019
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 2028 Paramedicine Care 2 (10 Credit Points)
Subject Details (p. 3423)
The aim of this subject is to extend the foundational knowledge relating to the assessment and management of cardiovascular and respiratory patient presentations. The unit combines theoretical and practical aspects to develop knowledge, skills, interpretation and application of diagnostics and clinical decision-making to implement appropriate patient care.
Level: Undergraduate Level 2 subject
Pre-requisite(s): HLTH 2026
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 2029 Paramedicine Care 3 (10 Credit Points)
Subject Details (p. 3423)
The aim of this subject is to extend the foundational knowledge relating to the assessment and management of renal, urinary, gastrointestinal, and endocrinological presentations. The subject combines theoretical and practical aspects to develop knowledge, skills, interpretation and application of diagnostics and clinical decision-making to implement appropriate patient care. This subject will provide the opportunity to develop skills in interprofessional practice, through work-integrated learning in a variety of non-paramedic settings.
Level: Undergraduate Level 2 subject
Pre-requisite(s): HLTH 2026
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 2030 Paramedicine Care of Diverse Patients 2 (10 Credit Points)
Subject Details (p. 3424)
Paramedics encounter a diverse range of patients. Many of these patients are vulnerable because of their social, clinical or cultural situation. Vulnerable and diverse populations are often overrepresented in paramedic caseload. Paramedics also encounter patients with a wide range of physical and cognitive disabilities. Paramedics are increasingly a key profession in helping diverse and vulnerable patients navigate the health system. This subject explores how paramedics can provide culturally safe and appropriate patient-centred care to these populations.
Level: Undergraduate Level 2 subject
Pre-requisite(s): HLTH 2026
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 2031 Motor Behaviour (10 Credit Points)
Subject Details (p. 3425)
Motor Behaviour is an investigation of the physiological and psychological processes involved in both the control and the learning of movement. As such, it considers the control mechanisms which are innate to the learner, how these mechanisms change by virtue of both maturation and experience, and how the latter type of changes may be facilitated by manipulation of the learning environment.
Level: Undergraduate Level 2 subject
Equivalent Subjects: BEHV 3015 Motor Control and Skill Acquisition
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 3001 Applied Nutrition (10 Credit Points)
Subject Details (p. 3426) Legacy Code: 300908
This subject builds on basic concepts in human nutrition and facilitates the study of nutrition needs across the lifecycle and for specific lifestyle and nutrition related diseases. This study will incorporate how to assess nutritional status (incorporating anthropometric, biochemical, clinical, dietary and physical activity assessment) of individuals and groups, understand the strengths and limitations of various methods, how to manipulate diets to ensure nutritional sufficiency and how to provide nutrition education regarding lifestyle related diseases and sports nutrition.
Level: Undergraduate Level 3 subject
Equivalent Subjects: HLTH 3002 - Applied Nutrition
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 3003 Clinical Leadership and Patient Safety (10 Credit Points)
Subject Details (p. 3427) Legacy Code: 401097
This subject introduces students to clinical leadership, supervision and patient safety in the context of paramedicine. Students will undertake a 4 week clinical placement block with an emergency ambulance crew, which will in part be used as a basis for reflective learning activities and critical analysis. Students will explore and discuss concepts of clinical leadership and supervision, drawing from their clinical placement experiences. Students will learn about leadership styles, principles of clinical education, mentoring and supervision in the field, clinical governance and patient safety.
Level: Undergraduate Level 3 subject
Pre-requisite(s): HLTH 3014
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 3004 Emergency Care for Special Populations (10 Credit Points)
Subject Details (p. 3428) Legacy Code: 401070
This subject explores the issues in caring for special populations in the emergency situation - multicultural and Indigenous settings, the elderly, people with disabilities and people experiencing mental illness. Current trends underlying policies and services and determinants of wellbeing in these contexts are discussed. Particular attention is given to issues, principles and practices relating to ageing, and to the assessment, treatment, rehabilitation strategies and crisis counselling for people experiencing mental illness.
Level: Undergraduate Level 3 subject
Pre-requisite(s): HLTH 3014
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 3005 Evidence-Based Practice (10 Credit Points)
Subject Details (p. 3429) Legacy Code: 400865
In this subject, students incorporate previous research and biostatistics knowledge to develop new skills for using evidence to inform all aspects of their professional practice. Evidence-based practice uses an enquiry led approach to manage expanding and uncertain knowledge by formulating answerable questions, effectively searching literature, critically appraising evidence validity and results, and to assess its significance in clinical practice and healthcare decision-making. Students will incorporate evidence in communication and shared decision making processes for patient scenarios relevant to their program.
Level: Undergraduate Level 3 subject
Pre-requisite(s): Students need to have done HLTH2024 Research Methods in Health PLUS ONE clinical subject from their specific program This will be one of four possible subjects
Students enrolled in Program Code 4661 (Continuing) or 4708 (Current) must have completed REHA 2007
Students enrolled in Program Code 4663 (Continuing) or 4711 (Current) must have completed REHA 2004
Students enrolled in Program Code 4662 (Continuing) or 4706 (Current) must have completed REHA 3003 AND
REHA 3049 - Speech Pathology Practice 3 for students enrolled in 4763 - Bachelor of Speech Pathology (First clinical practice subject)
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 3007 Global Nutrition, Food and Community (10 Credit Points)
Subject Details (p. 3430) Legacy Code: 300917
This subject aims to develop an understanding of the inter relationship between nutrition and health in Australian and Global contexts. The aim is to provide the student with a sound foundation in nutritional anthropology, public health nutrition and health promotion in order that they can systematically analyse nutritional problems associated with world food issues; including those affecting minority and culturally and linguistically diverse groups within Australia; diseases of affluence and current health and nutrition issues in the community. An important objective of the subject is that students learn the principles of health promotion and how to apply effective nutrition promotion strategies in community and population settings in order to reduce the burdens of various nutritional and lifestyle related disorders and diseases like: obesity, some cancers, diabetes and cardiovascular disease and malnourishment.
Level: Undergraduate Level 3 subject
Pre-requisite(s): HLTH 2012
Equivalent Subjects: HLTH 3010 - Nutrition and Community Health
HLTH 3006 - Global Nutrition Food and Community
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 3008 Gymnastics and Dance (10 Credit Points)
Subject Details (p. 3430) Legacy Code: 400896
Students actively engage in a variety of gymnastics activities to develop skill competencies on vault, bars, beam, and floor. Students will also learn about a variety of dance styles and apply movement composition principles. Students will consider safety principles and learn teaching strategies that will enable them to teach gymnastics and dance accurately and safely in line with the Health and Physical Education curriculum. Students will also design their own original teaching and learning ideas that are active, enjoyable, and educational, to ensure they can implement quality gymnastics and dance learning experiences in PE.
Level: Undergraduate Level 3 subject
Incompatible Subjects: LGYA 0700 - Human Movement 5 PERF 3008 - Introduction to Dance
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 3009 Major Incident Management (10 Credit Points)
Subject Details (p. 3431) Legacy Code: 401075
This subject examines the tactical and strategic issues facing a health response team in a major incident. Students will practice team responses to critical incidents and evaluate the effectiveness of different approaches to response and recovery.
Level: Undergraduate Level 3 subject
Pre-requisite(s): HLTH 3014
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 3011 Obstetrics and Paediatrics (10 Credit Points)
Subject Details (p. 3431) Legacy Code: 401072
The aim of this subject is to prepare the student for out-of-hospital care and management of obstetric, neo-natal and paediatric emergencies. It focuses on understanding human birth and development, normal and complicated delivery and the changes that occur in the pregnant woman. Developmental changes throughout childhood and the skills required to manage a broad range of clinical paediatric emergencies are explored.
Level: Undergraduate Level 3 subject
Pre-requisite(s): HLTH 2018 AND
HLTH 2015
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 3012 Out-of-hospital Medical Care 2 (10 Credit Points)
Subject Details (p. 3432) Legacy Code: 401096
The aim of this subject is to extend the foundational knowledge relating to the assessment and management of medical presentations across the spectrum of acuity, including, gastrointestinal, renal, genitourinary, gynaecological and endocrine medical emergencies, sepsis, ear/nose/throat presentations and complex co-morbid conditions. The unit combines pathophysiological principles with development of skills in the use and interpretation of diagnostic technology with clinical decision-making to implement advanced life support. Students will investigate fundamental elements of paramedic practice relating to medicolegal documentation, risk assessment and clinical reasoning relating to determination of patient disposition.
Level: Undergraduate Level 3 subject
Pre-requisite(s): NATS 1009 AND
NATS 1010 AND
HLTH 2015
Co-requisite(s): HLTH 3014
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 3014 Paramedic Practice 4 (10 Credit Points)
Subject Details (p. 3433) Legacy Code: 401069
This subject focuses on the core competencies for paramedic practice in real world situations. Students will review high fidelity simulation scenarios to facilitate simulation debrief sessions exploring scene management, interpersonal communication, decision making, inter-professional cooperation and clinical management, Students will then consolidate and extend these skills through supervised clinical placements with an emergency ambulance crew over a period of 5 weeks. Experiences and exposure gained during the placement will form the basis for analysis of case studies and reflective learning.
Level: Undergraduate Level 3 subject
Pre-requisite(s): HLTH 2018
Co-requisite(s): HLTH 3012
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 3015 Resistance Training and Physiology (10 Credit Points)
Subject Details (p. 3434) Legacy Code: 400890
In 2016, this subject is replaced by 401148 - Strength and Conditioning. Resistance Training and Physiology presents the growing body of research evidence supporting specific methods of resistance exercise and training, as well as the role of resistance exercise in disease prevention and health promotion. Students gain an increased understanding of the energetics and physiology of resistance exercise by also completing laboratories focussed on the research of important applied concepts in resistance exercise and training. Students also experience resistance training.
Level: Undergraduate Level 3 subject
Pre-requisite(s): HLTH 2004 AND
BIOS 2037 AND
BIOS 3003
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 3016 Strength and Conditioning (10 Credit Points)
Subject Details (p. 3435) Legacy Code: 401148
Strength and Conditioning presents the growing body of research evidence supporting specific methods of resistance exercise and training, as well as the role of resistance exercise in disease prevention and health promotion. Students gain an understanding of the energetics and physiology of resistance exercise by also completing and experiencing laboratories focussed on the important applied concepts in resistance exercise and training.
Level: Undergraduate Level 3 subject
Pre-requisite(s): HLTH 2003 AND
BIOS 2012 AND
SPRT 2002
Equivalent Subjects: HLTH 3015 - Resistance Training and Physiology
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 3017 Traumatic and Environmental Emergencies (10 Credit Points)
Subject Details (p. 3436) Legacy Code: 401071
This subject deals with pathophysiology and pathogenesis of traumatic injuries and environmental emergencies as well as safe and effective out-of-hospital management of these patients. Best patient outcomes are achieved when out-of-hospital care forms part of a trauma system. Paramedics are required to make decisions to achieve the provision of the right care and transfer to the right hospital in the right time. This applies to both, the single-patient incident and the mass casualty situation. This subject aims to develop the knowledge and skills to safely and effectively manage the patient(s) suffering traumatic injury or an environmental emergency. Furthermore, the subject aims to prepare the paramedic student to be part of a major incident response.
Level: Undergraduate Level 3 subject
Pre-requisite(s): HLTH 3014
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 3018 Ethical and Legal Issues in Health Care (10 Credit Points)
Subject Details (p. 3437) Legacy Code: 401408
From 2020 this subject replaces 400249 - Ethical and Legal Issues in Health Care. This subject enables students to explore and develop an understanding of the ethical and legal issues important within contemporary health care. Through the use of case studies students will analyse profound ethical and legal challenges facing current health care that are equally important to health professionals, patients/clients and society generally. Critical thinking about these issues will be encouraged. Students will also be encouraged to consider differing theoretical perspectives in their examination of ethical issues. Additionally, students studying to work within health care, including complementary medicine, will develop a comprehensive understanding of the requirements for ensuring that their practice conforms to legal doctrines and ethical standards.
Level: Undergraduate Level 3 subject
Equivalent Subjects: JUST 3005 - Ethical and Legal Issues in Health Care
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 3019 Nutrition, Health and Disease (10 Credit Points)
Subject Details (p. 3438) Legacy Code: 301457
In this subject you will explore the basic concepts of human nutrition in relation to various stages of the lifespan from infants to late adulthood. It also explores nutrition in relation to chronic health conditions such as obesity, cardiovascular disease and eating disorders. You will learn about the development of the Australian Dietary Guidelines and Nutrient Reference Values. You will also learn to make informed decisions with regard to nutritionally critical moments of the life span, emerging nutrition opinions or contemporary uses of nutrition in physical activity, sports and chronic health conditions.
Level: Undergraduate Level 3 subject
Equivalent Subjects: HLTH 2014 - Nutrition and Health 2 HLTH 2013 - Nutrition and Health 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 3020 Global Nutrition and Food (10 Credit Points)
Subject Details (p. 3439) Legacy Code: 301458
This subject aims to develop an understanding of the inter relationship between nutrition and health in Australian and Global contexts. The aim is to provide you with a sound foundation in nutritional anthropology, public health nutrition and health promotion in order that they can systematically analyse nutritional problems associated with world food issues; including those affecting minority and culturally and linguistically diverse groups within Australia; diseases of affluence and current health and nutrition issues in the community. An important objective of the subject is that you will learn the principles of health promotion and how to apply effective nutrition promotion strategies in community and population settings in order to reduce the burdens of various nutritional and lifestyle related disorders and diseases like: obesity, some cancers, diabetes and cardiovascular disease and malnourishment.
Level: Undergraduate Level 3 subject
Equivalent Subjects: HLTH 3007 Global Nutrition Food and Community HLTH 3006 Global Nutrition Food and Community HLTH 3010 Nutrition and Community Health
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 3021 Obstetrics and Gynaecology (10 Credit Points)
Subject Details (p. 3440)
The aim of this subject is to prepare the student for out-of-hospital care of gynaecological, obstetric, and neonatal patient presentations. It focuses on understanding the theoretical and practical requirements to assess and manage female patients throughout the lifespan including management of the foetus and neonate.
Level: Undergraduate Level 3 subject
Pre-requisite(s): HLTH 2028 AND
HLTH 2029
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 3022 Paramedicine Leadership (10 Credit Points)
Subject Details (p. 3440)
This subject introduces students to Paramedicine leadership in the context of an emerging profession. Students will undertake a 4-week clinical placement block with an emergency ambulance crew, which will, in part, be used as a basis for reflective learning activities and critical analysis. Students will explore and discuss concepts of organisational and clinical leadership and supervision, drawing from their clinical placement and other experiences. Students will learn about leadership styles, principles of clinical education, mentoring and supervision strategy, as well as risk assessment, mass casualty and organisational behaviour. Staff wellness, organisational efficiency and sustainable practices will be common goals to aspire to. This ground-up leadership is intended to contribute to organisational success and mitigates the risk of victimology among new entrants to the field.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 3023 Integrated Paramedicine (20 Credit Points)
Subject Details (p. 3440)
In this capstone subject students will extend their learning to include knowledge production and translation to practice. Students will investigate clinical questions through engagement in collaborative processes such as peer to peer teaching and critical observation. Students will develop the capacity to analyse practice and provide constructive feedback to improve clinical quality and enable translation and dissemination of knowledge into practice.
Level: Undergraduate Level 3 subject
Pre-requisite(s): HLTH 2028 AND
HLTH 2029
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 3024 Safety and Quality in Paramedicine (10 Credit Points)
Subject Details (p. 3441)
This subject develops core competencies for paramedic practice in real-world situations by facilitation of an emergency ambulance placement. This unit introduces students to patient safety and quality in paramedicine. Students are taught about the principles of patient safety and how these are applied in the out-of-hospital setting and paramedicine context. Besides ensuring patient safety, healthcare organisations need to monitor, analyse, and improve the care they provide. This unit will teach students about quality in healthcare and more specifically in paramedicine. Students will learn about the science of improvement and how it can be applied to continuously improve the care for patients. The role and responsibilities of the individual frontline paramedic within an organisation's patient safety and quality framework will be explored.
Level: Undergraduate Level 3 subject
Pre-requisite(s): HLTH 3022
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 3025 Paramedicine Trauma Care (10 Credit Points)
Subject Details (p. 3442)
This subject deals with pathophysiology and pathogenesis of traumatic injuries, conditions arising from uncompensated environmental exposures, and toxicological emergencies. Students are taught how to care for these patients in the out-of-hospital setting. Best patient outcomes are achieved when out-of-hospital care forms part of a trauma system. Therefore, paramedics are required to make decisions to achieve the provision of the right care and transfer to the right hospital in the right time. This unit aims to develop the knowledge and skills to safely and effectively care, treat and manage adult and paediatric patients who have sustained traumatic injury or injuries, conditions arising from uncompensated environmental exposures, and toxicological emergencies.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 3026 Movement and Skill Analysis (10 Credit Points)
Subject Details (p. 3443)
This subject examines the scientific basis for movement and sports skill development. An understanding of the principles of movement and motor skill and how they apply to performance is examined through a range of movement tasks required for track and field athletics and some team sports. Laboratory activities will focus upon the basic movement tasks of throwing, jumping, balancing, striking, running and rotary activities. An examination of the instruments used in efficient movement analysis is undertaken.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 4001 Professional Reasoning (10 Credit Points)
Subject Details (p. 3443) Legacy Code: 401125
This final year subject focuses on the transition from student to practitioner. The aim of this subject is to provide students with learning opportunities that will consolidate and enhance their competence in professional practice throughout their career. Professional competencies of central concern include advanced professional reasoning skills, evidence based-practice, reflective practice, personal and career management strategies, self-directed and life-long learning. These competencies contribute positively to the effective management of graduates' professional practice in various work contexts, and their future career paths. Acquisition of such skills will allow the graduate to direct and adapt to change in these areas.
Level: Undergraduate Level 4 subject
Incompatible Subjects: HLTH 7013 - Professional Reasoning
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 4002 Evidence-Based Practice (Advanced) (10 Credit Points)
Subject Details (p. 3444) Legacy Code: 400944
In this subject, students incorporate previous research and biostatistics knowledge to develop new skills for using evidence to inform all aspects of their professional practice. Evidence-based practice uses an enquiry led approach to manage expanding and uncertain knowledge by formulating answerable questions, effectively searching literature, critically appraising evidence validity and results, and to assess its significance in clinical practice and healthcare decision-making. Students will incorporate evidence in communication and shared decision-making processes for patient scenarios relevant to their program. Students will embark on research training through studying the theory and application of research methods to honours research in their chosen field and practising the skills to analyse evidence in the health sciences.
Level: Undergraduate Level 4 subject
Pre-requisite(s): Students need to have done HLTH2024 Research Methods in Health PLUS students in Occupational Therapy Physiotherapy and Podiatric Medicine must have done ONE clinical subject from their specific program These are outlined below
Students enrolled in Program Code 4663 (Continuing) or 4711 (Current) must have completed REHA 2007
Students enrolled in Program Code 4663 (Continuing) or 4711 (Current) must have completed REHA 2004
Students enrolled in Program Code 4663 (Continuing) or 4711 (Current) must have completed REHA 3004 AND
HLTH 2024 - Research Methods in Health AND
REHA 3049 - Speech Pathology Practice 3 for students enrolled in 4788 - Bachelor of Speech Pathology (Honours)
Incompatible Subjects: HLTH 3005 - Evidence-Based Practice
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 7001 A Global Perspective on Social Determinants of Health (10 Credit Points)
Subject Details (p. 3445) Legacy Code: 400841
Evidence is mounting that the health of individuals, groups and whole populations is significantly determined by social factors - the social determinants. The related research has its origins in concern for the growing inequalities in health both within and between countries. This subject examines the framework of the social determinants of health in a global perspective and includes a reflection on the phenomenon of globalisation and its impact, both positive and negative on people's health. Students will critically reflect on this relatively new and emerging body of knowledge and research which clearly situates the maintenance of health and healthy societies within their socioeconomic and socio-cultural contexts. They will also examine implications for policy, health systems and different groups within society.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 7002 Building Organisational Capacity in Health Care (10 Credit Points)
Subject Details (p. 3446) Legacy Code: 400846
The concept, form and structure of health care organisations are explored. Organisational theory is used to analyse contemporary health care structures. Factors which influence organisational design, function and effectiveness are discussed including: organisational behaviour, strategy, culture, power and politics, technology, sustainability and effectiveness. A major focus is planning for strategic organisational development to meet the challenges of rapid change and the need for performance improvements in patient care delivery. Concepts related to the strategic development of workforce capacity in the health care arena considered through the application of theories including the learning organisation. Leadership is examined with emphasis on change management.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: PUBH 7017 - Leadership and the Development of Organisational Capacity in Health Care
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 7003 Community and Public Health Nutrition (10 Credit Points)
Subject Details (p. 3447) Legacy Code: 301186
This subject examines the principles of public health nutrition and a systems approach, and enables students to use them to identify and analyse nutrition issues and outcomes. Students will learn about the food and nutrition system and its drivers, and examine their impact on current food, nutrition and nutrition-related health issues. They will explore public health nutrition priorities in Australia and 'at risk' groups such as Aboriginal and Torres Strait Islander peoples, culturally and linguistically diverse groups, and other vulnerable groups. They will learn to interrogate nutrition-related policies in relation to public health nutrition priorities and contemporary topics in Australia and similar contexts. Students will learn about the role of advocacy in promoting a sustainable and equitable food supply system, and improving food and nutrition outcomes for populations.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 7004 Dissertation (40 Credit Points)
Subject Details (p. 3448) Legacy Code: 401079
This subject requires students to complete a substantial piece of independent research. Dissertations will involve the in-depth examination of a particular topic/question, and should demonstrate evidence of ability to undertake sustained critical analysis. The dissertation provides an opportunity for students to demonstrate that they can consolidate knowledge acquired throughout their course of study, understand how existing evidence/information relates to research topics, and how their own work adds to this body of knowledge. Independent thinking is required, including the ability to critique one's own work and that of others, as well as articulating the implications of their own research and support their findings through their written dissertation. Students will have the opportunity to participate in workshops where they will gain skills in defining a clear research question, preparing a formal research proposal, conducting a literature review, ethics and research, and formal writing at a professional standard. Findings of student work with be presented at an end of semester research seminar. This subject can also be taken over two semesters (see 401282 Dissertation (Part-Time)).
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): For students enrolled in 4702 Master of Public Health or 4698 Master of Health Science courses only
AGEN 7005 Research Protocol Design and Practice
and
HLTH 7008 Introduction to Biostatistics
OR
HLTH 7025 Healthcare Data for Decision making
OR
HLTH 7015 Qualitative Research Methodology in Health
For students enrolled in 3749 Master of Science and 4738 Master of Epidemiology courses only
HLTH 7008 Introduction to Biostatistics
For all students
PUBH 7016 Introduction to Epidemiology
Equivalent Subjects: The two units below are equivalent to each other

HLTH 7004 Dissertation (Full-time)
HLTH 7020 Dissertation (Part-time)
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 7005 Health Financial Management (10 Credit Points)
Subject Details (p. 3449) Legacy Code: 400845
This subject provides health leaders with an introduction to financial management in health and aged care settings as a basis for understanding the impact of leadership decision-making on financial outcomes and how financial decision-making impacts on clinical service delivery. Content includes an overview of health economics and economic evaluation, health care funding models, the principles, practices and tools for financial planning and management, basic accounting principles and financial terminology and using financial information and reporting for negotiating financial plans, tracking and evaluating financial performance and using financial information in decision-making within the clinical environment.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 7322 - Health Economics and Comparative Health Systems LGYA 7489 - Resources management in Aged Care
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 7006 Health Services and Facilities Planning (10 Credit Points)
Subject Details (p. 3449) Legacy Code: 400844
Planning occurs at all levels within all health organisations, government, non-government and in the private sector. There is a hierarchy in planning health services with some global overarching policy documents, national agreed priorities which affect corporate and regional plans as well as local services and projects. Planning focuses on future directions for health, is value based and resource allocation driven. The process of health planning will be outlined including how to conduct a needs analysis, develop an evidence based approach, consult with stakeholders including the community, document an implementation plan and evaluate outcomes.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: BUSM 7104 - Strategic Analysis and Decision Making
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 7007 Health Workforce Planning (10 Credit Points)
Subject Details (p. 3450) Legacy Code: 400843
This is a flexible learning subject looking at Human Resource Management as a strategic activity of health organisations especially as workforce shortages pose significant challenges to the health, welfare and aged care sectors. The workforce, with appropriate knowledge and expertise, is essential to the efficient and effective delivery of quality health services. Successful organisations shape their workforce to anticipate current and future business directions and goals. Workforce planning is a crucial element of this approach and its success.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 8572 - Human Resources Management LGYA 7490 - Workforce Planning and HR Issues in Aged Care LGYA 4898 - Human Resource Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 7008 Introduction to Biostatistics (10 Credit Points)
Subject Details (p. 3451) Legacy Code: 401077
Most professions in the health sciences need to read and interpret statistics relating to individual health status, interpret health risks in communities, and engage in the evaluation of interventions, or impact of health policies or programs. Many public health practitioners are actively involved in surveillance, quantitative research and/or evaluation. This subject provides students with the fundamental skills they need to analyse and interpret results from quantitative data collections. Content includes descriptive statistics, undertaking comparisons between groups, quantifying associations between variables, and statistical power. The subject is highly applied with the main focus being on interpretation and appraisal of statistical results and conducting analyses using statistical software.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 7009 Leadership and Change (10 Credit Points)
Subject Details (p. 3452) Legacy Code: 400414
Within the context of a society where change is ongoing, leadership is required in order to achieve optimum outcomes. Students in this subject will be encouraged to critically explore leadership styles, leadership and change theories, leadership in learning organisations and the community within a primary health care framework. This subject will enable students to assess both the internal and external environments of organisations, communities and individuals as the need for change is identified, planned and implemented. The subject identifies the central strategies necessary for the development of leaders who are able to achieve sustainable change outcomes.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYC 0566 - Processes of Change
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 7010 Nutrition Promotion (10 Credit Points)
Subject Details (p. 3453) Legacy Code: 301185
This subject aims to introduce students to the principles and practices of nutrition and health promotion, for use in primary and secondary prevention. Students will learn and critically appraise all aspects of the program planning cycle, from needs assessment to evaluation. Students will develop their capabilities to design initiatives that are responsive to, and contribute to, the community and public health nutrition evidence base. Students will acquire knowledge related to communication, food and social marketing, nutrition education, and nutrition and behaviour change theories; and learn how to translate this into effective nutrition promotion initiatives that aim to influence food choice, intake, supply and/or access. Lastly, students will learn to work in, and/or manage, multi-disciplinary teams and work with key stakeholders. Negotiation and influencing skills, together with capacity building skills, to guide and upskill individuals and groups, will be developed for the purpose of improving the nutritional status of groups.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 7011 Nutritional Assessment Methods (10 Credit Points)
Subject Details (p. 3454) Legacy Code: 301184
This subject aims to introduce students to methodologies that incorporate anthropometric, biochemical, clinical, dietary and physical activity assessment to assess the nutritional status of individuals and groups. Students will critically explore the strengths and limitations of various methods. Students will also learn to make professional judgement regarding when and how to use methods, including validating nutritional status assessment methods to achieve valid and reliable nutritional assessment outcomes.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 7013 Professional Reasoning (10 Credit Points)
Subject Details (p. 3454) Legacy Code: 400925
This final year subject focuses on the transition from student to practitioner. The aim of this subject is to provide students with learning opportunities that will consolidate and enhance their competence in professional practice throughout their career. Professional competencies of central concern include advanced clinical reasoning skills, evidence based-practice, reflective practice, personal and career management strategies, self-directed and life long learning. These competencies contribute positively to the effective management of graduates clinical practice in various work contexts, and their future career paths. Acquisition of such skills will allow the graduate to direct and adapt to change in these areas.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): REHA 7011 OR
REHA 7013
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 7014 Professional Topic (10 Credit Points)
Subject Details (p. 3455) Legacy Code: 400850
This subject is designed to allow high achieving students to comprehensively explore a relevant topic of interest to them, either through a minor supervised research project or industry-based project. This unit's flexible delivery offers a unique experience specific to each project and student. Students in this subject will develop extensive skills through project-based learning essential for employment and/or higher degree studies.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 7015 Qualitative Research Methodology in Health (10 Credit Points)
Subject Details (p. 3455) Legacy Code: 401238
This subject prepares students to conduct qualitative research. The subject covers ontologies, epistemologies, methodologies, and research methods, particularly those that involve the collection, management and analysis of qualitative data, and how findings are communicated. It also addresses the ethics of research.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 7016 Quality and Safety in Health Care (10 Credit Points)
Subject Details (p. 3456) Legacy Code: 400842
Health care managers and clinicians are responsible for the quality and safety of patient care within their subjects. To introduce a culture of safety they must understand and work within current policy, surveillance and governance strategies. In this subject students will study the cultural and governance environments within which quality and safety systems are introduced in health care. Students will also develop skills required to effectively use the tools available for managing and monitoring quality and safety issues within their workplace.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: PUBH 7018 - Leadership in Quality and Safety in Health Care
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 7020 Dissertation (Part Time) (40 Credit Points)
Subject Details (p. 3457) Legacy Code: 401282
This is a 40 credit point year-long subject taken over two terms (20 credit points in each term). This subject requires students to complete a substantial piece of independent research. Dissertations will involve the in-depth examination of a particular topic/question, and should demonstrate evidence of ability to undertake sustained critical analysis. The dissertation provides an opportunity for students to demonstrate that they can consolidate knowledge acquired throughout their program of study and understand how existing evidence/information relates to research topics, and how their own work adds to this body of knowledge. Independent thinking is required, including the ability to critique one's own work and that of others, as well as articulating the implications of their own research and support their findings through their written dissertation. Students will have the opportunity to participate in workshops where they will gain skills in defining a clear research question, preparing a formal research proposal, conducting a literature review, ethics and research, and formal writing at a professional standard. Findings of student work with be presented at an end of semester research seminar. This subject can also be taken over one semester (see HLTH 7004 Dissertation (Full Time)).
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): For students enrolled in the 4702 Master of Public Health or 4698 Master of Health Science courses only
AGEN 7005 Research Protocol Design and Practice
and
HLTH 7008 Introduction to Biostatistics
OR
HLTH 7025 Healthcare Data for Decision making
OR
HLTH 7015 Qualitative Research Methodology in Health
For students enrolled in 3749 Master of Science and 4738 Master of Epidemiology courses only
HLTH 7008 Introduction to Biostatistics
For all students
PUBH 7016 Introduction to Epidemiology
Equivalent Subjects: The two units below are equivalent to each other
HLTH 7004 Dissertation (Full-time)
HLTH 7020 Dissertation (Part-time)
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 7022 Advanced Health Service Management (10 Credit Points)
Subject Details (p. 3458) Legacy Code: 401361
This subject focuses on the principles and practice of health service management. The subject draws on material from different settings to consider governance, policy, and strategic planning. Students will critique health system reforms, including those that aim to address healthcare inequity. The role of politics and policy will be discussed to clarify the impact on health service management. The subject will explore how health service operations are managed and how performance and outcomes are measured. Students will also explore how patients, carers, and other stakeholders shape health service management.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): PUBH 7031
Equivalent Subjects: HLTH 7007 Health Workforce Planning
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 7023 Advanced Sport and Exercise Science (20 Credit Points)
Subject Details (p. 3459) Legacy Code: 401414
Please note, subject 401291.1 Advanced Sport and Exercise Science replaced by 401414.1 Advanced Sport and Exercise Science from 2020.This subject provides Bachelor of Research Studies/Masters of Research candidates with an interest in Sport & Exercise Science with an opportunity to further their knowledge and skill-sets in the field. Working closely with their assigned supervisor(s), students will prepare a work-plan to further enhance their theoretical knowledge through a combination of independent and guided-study. The subject will provide students with an opportunity to strengthen their knowledge and expertise in their selected field of Sport & Exercise Science. The subject is focused on the development of discipline-specific knowledge (theoretical and practical) to prepare students for their research thesis and future career in a Sport & Exercise Science related field.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 7024 Health Services Financing (10 Credit Points)
Subject Details (p. 3460) Legacy Code: 401362
This subject provides health leaders with an introduction to financial management in both public and private sector health services.
The learning from this subject forms a basis for understanding the impact of leadership decision-making on financial outcomes and how financial decision-making impacts on clinical service delivery. The development of different approaches to funding to address issues of effectiveness, efficiency and acceptability (including equity) are examined. Pressures for reform are linked to developments at various levels of management and organisation type to enable analysis of potential impacts on clinical delivery. Students will critically analyse the relationship between performance and principles of governance, focusing on developing an improvement in the quality of service delivery. Reflective practice will be used to facilitate the application of resource management and clinical governance to a self-identified workplace issue warranting a clinical governance business case.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): PUBH 7031
Equivalent Subjects: HLTH 7005 Health Financial Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 7025 Healthcare Data for Decision-Making (10 Credit Points)
Subject Details (p. 3461) Legacy Code: 401365
Most professions in the health sciences need to read and interpret data relating to individual health status, interpret health risks in communities, and engage in the evaluation of interventions, or impact of health policies or programs. Many public health practitioners are actively involved in surveillance, quantitative research and/or evaluation. This subject provides an opportunity to learn about making health service decisions using appropriate data. Students learn how to explore and use data that are assembled to replicate real patient data to both generate and answer questions. The focus may be managerial or clinical, or an integration of these. Students analyse the assembled patient dataset to generate and interpret health statistics, and translate them into health information and knowledge for decision-making. Students completing this subject develop the ability to explore health data and provide recommendations based on the findings.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 7026 Professional Internship in Health (40 Credit Points)
Subject Details (p. 3462) Legacy Code: 401368
This subject provides students with the opportunity to translate the content of the postgraduate program to the context of the workplace through an integrated workplace internship. This experience will allow the student to develop the necessary skills and competencies expected of high performing health professionals. The Internship enables a focused opportunity to work in contemporary healthcare settings with leaders and managers from a variety of professions. Students will also engage in coursework with a focus on creating an portfolio that revisits all content learned throughout their courses to critically assess their learning journey and learning outcomes. This process will teach students how to systematically self-reflect in deep and transformative ways, engaging with theory and knowledge acquired and developed through their studies to design and create a portfolio of their skills and competencies through a social capital framework. The subject will culminate in a presentation of the results of their internship project in a research and practice seminar.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 7027 Professional Project in Health 1 (20 Credit Points)
Subject Details (p. 3463) Legacy Code: 401369
Health professionals, particularly those at managerial positions, are frequently tasked with solving very complex problems in their practice. Some of these problems are so complex that they can be called 'wicked' problems, or problems that are highly resistant to resolution. This subject uses project-based learning to provide students with the opportunity to work collaboratively and inter-disciplinarily to solve an industry-driven 'wicked' problem, using systematic and evidence-based techniques to do so. Students will be challenged to think broadly to take into account the interrelationships among a full range of causal factors underlying the 'wicked' problem at hand, and will be required to use more collaborative and innovative approaches to solve industry challenges. Students will be exposed to a range of industry representatives who will pose the difficult, 'wicked' problems to them and who will return to assess the proposed solutions.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 7028 Professional Project in Health 2 (20 Credit Points)
Subject Details (p. 3464) Legacy Code: 401370
This capstone subject intends to develop students' work-readiness. Health professionals are recurrently asked to engage in reflective practice as a way to improve clinical and non-clinical reasoning. The ability to reflect on action and in action allows health professionals not only to improve their practice but also to more clearly articulate their strengths and weaknesses to potential employers. In this subject, students will focus on creating an portfolio that will require revisiting all content learned throughout their courses to critically assess their learning journey and learning outcomes. It will teach students how to systematically self-reflect in deep and transformative ways, engaging with theory and knowledge acquired and developed through their studies to design and create a portfolio of their skills and competencies through a social capital framework.
Level: Postgraduate Coursework Level 7 subject

HLTH 7029 Quality and Safety (10 Credit Points)
Subject Details (p. 3465) Legacy Code: 401371
This subject provides an overview of emerging health policy with particular attention to quality and safety. Students develop a critical view on the organisation of healthcare, measurement and delivery of outcomes from the patient and population perspective as well as organisational accountability for quality and safety. The course consists of three components. The first component targets the main constituents of clinical governance, including practice design, analysis and improvement, error reporting and investigation, public accountability and open disclosure, multi-disciplinary teamwork and clinical leadership. The second component introduces the tools of clinical process redesign which help managers make practical improvements to practices in their subjects. The third component targets risk management by providing an overview of the kinds of risks faced by health service managers by outlining perceptions of risk such as adverse effect versus opportunity capital.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: HLTH 7012 - Organisational Governance and Performance Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

HLTH 7030 Professional Internship in Health (Part-time) (40 Credit Points)
Subject Details (p. 3466) Legacy Code: 401435
This is a 40 credit point year-long subject taken over two terms (20 credit points in each term). This subject provides students with the opportunity to translate the content of the postgraduate program to the context of the workplace through an integrated workplace internship. This experience will allow the student to develop the necessary skills and competencies expected of high performing health professionals. The Internship enables a focused opportunity to work in contemporary healthcare settings with leaders and managers from a variety of professions. Students will also engage in coursework with a focus on creating a portfolio that revisits all content learned throughout their programs to critically assess their learning journey and learning outcomes. This process will teach students how to systematically self-reflect in deep and transformative ways, engaging with theory and knowledge acquired and developed through their studies to design and create a portfolio of their skills and competencies through a social capital framework. The subject will culminate in a presentation of the results of their internship project. This subject can also be taken over one semester (see HLTH 7026 Professional Internship in Health (Full Time).

Other information Technology (INFO)

INFO 0001 Academic Skills for Information Communications Technology (WSTC Prep) (10 Credit Points)
Subject Details (p. 3662) Legacy Code: 700205
This subject is designed to assist students to become successful independent reflective learners. It introduces students to a range of theories and concepts to facilitate the development of practical skills and personal attitudes necessary for success in tertiary study. Emphasis is placed on developing the key competencies of scientific inquiry - collecting, analysing, organising and communicating information as well as solving problems, particularly when related to using mathematical ideas and techniques.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 0002 Academic Skills for Information Communications Technology (WSTC) (10 Credit Points)
Subject Details (p. 3663) Legacy Code: 900100
This subject is designed to assist students to become successful independent reflective learners. It introduces students to a range of theories and concepts to facilitate the development of practical skills and personal attitudes necessary for success in tertiary study. Emphasis is placed on developing the key competencies required to be successful in an Information Communications Tschnology course-research, analysis, problem solving, communication and team work.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: INFO 0001 - Academic Skills for ICT (UWSCFS)
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 0003 Advanced Computer Studies (WSTC Prep) (10 Credit Points)
Subject Details (p. 3663) Legacy Code: 700259
This subject has been developed to enhance a student's problem solving skills in the context of software development. Students are introduced to more advanced material in computer studies, including advanced features of Microsoft Access, web page development using HTML and CSS, the fundamentals of Systems Analysis and Design, programming and object-oriented analysis.
Level: Undergraduate Level 0 Preparatory subject
Pre-requisite(s): INFO 0008
Equivalent Subjects: INFO 0004 - Advanced Computer Studies (UWSC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 0004 Advanced Computer Studies (WSTC) (10 Credit Points)
Subject Details (p. 3664) Legacy Code: 900076
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 0005 Computer Competency (WSTC) (5 Credit Points)
Subject Details (p. 3664) Legacy Code: 900027
Computer Competency aims to provide students with the computing skills necessary to research information on the Internet and produce documents and presentations at a level suitable for their academic studies.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 0006 Computer Fundamentals (WSTC Prep) (10 Credit Points)
Subject Details (p. 3665) Legacy Code: 700277
The Computer Fundamentals subject aims to develop a solid theoretical foundation to help students prepare for further study in Information and Communications Technology while developing/ enhancing students' practical skills in Business Processing Applications. Topics in the subject include the underpinning concepts of Information Technology, Software and Hardware, Computer Networking, Internet, Security of Information Systems, Privacy and Ethics, Use of MS Office applications and HTML.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 0007 Computer Literacy (WSTC) (5 Credit Points)
Subject Details (p. 3665) Legacy Code: 900051
This subject is intended to familiarise the University Foundation Studies students with the basic functions of computers and the skills necessary to use the common applications such as Microsoft Word, Microsoft PowerPoint and the Internet. These skills are introduced to students through structured activities that will assist students to complete the research and document preparation requirements of their other subjects.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 0008 Computer Studies (WSTC Prep) (10 Credit Points)
Subject Details (p. 3666) Legacy Code: 700201
This subject introduces and develops basic competencies in using computers and application software for the Building Design Management and Construction Management industries. The ability to use computers and application software for creating word-processed documents, spreadsheets, as well as understanding the processes involved with creating and analysing designs and managing projects has become an integral part of the required skill set for these industries. This subject has been developed to enhance students' practical ability as well as build a theoretical foundation for further study.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: INFO 0009 - Computer Studies (UWSC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 0009 Computer Studies (WSTC) (10 Credit Points)
Subject Details (p. 3667) Legacy Code: 900028
Computer Studies introduces to the students the new age of information, where computers and communication play an integral part in our lives. The course has been developed to enhance a student's practical ability as well as build a solid theoretical foundation for further study.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 0010 Information Technology in Business (WSTC Prep) (10 Credit Points)
Subject Details (p. 3667) Legacy Code: 700278
This subject introduces basic business concepts and how Information Systems can be used in Business. It also deals with Systems Analysis and Design, and Database Design and Development concepts. These concepts are introduced using a variety of case studies to provide authentic learning opportunities.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 1001 Introduction to Information Technology (10 Credit Points)
Subject Details (p. 3668) Legacy Code: 300134
This introductory subject gives students an insight into the history, structure, operations and uses of computers, and their impact on society. This will be complemented by hands-on use of computers and popular application software packages in a graphical user interface environment. Students gain a basic understanding of the uses of computers, and the skills necessary to use popular applications software, including word processing, spreadsheet and database packages, and Internet tools and services.
Level: Undergraduate Level 1 subject
Equivalent Subjects: LGYB 4133 - Introduction to Computers LGYB 9621 - Computer Fundamentals LGYA 9786 - Information Technology
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 1002 PC Workshop (10 Credit Points)
Subject Details (p. 3669) Legacy Code: 300150
This subject introduces students to the hardware and software components of a stand-alone personal computer (PC). Students become familiar with the CPU, memory, secondary storage, IO peripherals and communications devices commonly found in a PC. They learn to assemble and disassemble a PC and to install hardware and software components according to supplier specifications. Students also learn to use and customise the PC operating system to maintain and optimise PC performance.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 1003 Professional Practice, Communication and Ethics (10 Credit Points)
Subject Details (p. 3670)
Working in ICT business environments requires awareness of how individuals can collaborate to achieve project goals in an ethical and professional way. This subject introduces students to concepts of professional behaviour, including ethics and professional conduct and associated industry behavioural codes, as well as legal aspects related to ICT. Students learn about various types of written and oral communication, professional behaviour when working in teams, and personal project management. In addition, the subject also introduces students to academic integrity and how to practice this during their degree. Students with professional practice skills combined with technical abilities are in high demand.
Level: Undergraduate Level 1 subject
Equivalent Subjects: COMM 1026 Principles of Professional Communication 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 1004 Data Analysis and Storytelling (10 Credit Points)
Subject Details (p. 3671)
This subject will introduce students to the fundamentals of data analysis and data storytelling skills for the communication industries. Students will gain practical experience finding data sets, cleaning and analysing data, developing insights and communicating findings in visual, oral and written formats for various audiences in contexts including advertising, journalism and public relations. Students will use industry standard analysis and visualisation tools to effectively answer research problems and communicate the impact of data, ethically and mindfully. Skills learned are transferable, for example, to audience analysis, market research, product development and other research contexts.This subject will introduce students to the fundamentals of data analysis and data storytelling skills for the communication industries. INFO 1005 Website Design(WSTC) (10 Credit Points)
Subject Details (p. 3672)
The interactive digital media industry requires professionals whose knowledge extends across a wide range of visual communication skills and web technologies. With a focus on both creative and technical aspects, the web design subject will address how to apply principles of visual design, usability, accessibility, and information architecture to web design. Web Design is a practical subject that involves hands-on exploration of the processes involved in the creation, design, and development of web content. Emphasis will be placed on understanding the roles, functions and features of key screen-based technologies, design production context for online delivery, current industry best practices, and a working understanding of the responsibilities inherent in the digital design and production process. By the end of this subject, you will understand web design principles, from concept to execution, and how you can create web design outcomes that align with client and user expectations.
Level: Undergraduate Level 1 subject
Incompatible Subjects: DESN 1022
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 2002 Tangible Interaction Design (10 Credit Points)
Subject Details (p. 3672) Legacy Code: 301088
This subject will provide students with the capacity to create interactive products that can sense environmental stimuli and exhibit an appropriate yet intelligent response. Students will be expected to write script based programs to control hardware circuits connecting various Input/Output peripherals (sensors, actuators). The range of interactive products studied and built by the students will be diverse; ranging from household everyday products to artifacts that can be used in public spaces.
Level: Undergraduate Level 2 subject
Pre-requisite(s): INFO 3003
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 2003 Technologies for Mobile Applications (10 Credit Points)
Subject Details (p. 3673) Legacy Code: 300976
This subject introduces students to the technologies used to develop and deploy mobile applications. The subject covers evaluating organisational needs in the mobile space, responsive web design, web technologies, interface challenges, location awareness, cloud services and data storage.
Level: Undergraduate Level 2 subject
Pre-requisite(s): COMP 1005
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 2004 Cyber Crime and Social Engineering (10 Credit Points)
Subject Details (p. 3673) Legacy Code: 102700
This subject focuses on both the theory and application of cyber crime and cybersecurity. More specifically, it focuses on the intersection between human behaviour, cyber crime, and cyber security with topics ranging from social engineering to organisational security infrastructure. It asks - What outcomes do cyber criminals seek? How can you protect yourself and your business from cyber crime? What methods do cyber criminals typically use to gain their desired outcomes? In this subject, cyber crime and cyber security is covered from both a theory-based and applied understanding of how to reduce the likelihood of or harm caused by cyber crime.
Level: Undergraduate Level 2 subject
Pre-requisite(s): -
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 2005 Cyber Security and Behaviour Research Project (40 Credit Points)
Subject Details (p. 3674) Legacy Code: 102704
This is a 40 credit point year-long subject taken over two terms (20 credit points in each term). This subject comprises the research pathway of the Bachelor of Cyber Security and Behaviour. Students will undertake a major research project in the field of behavioural cyber security. The specifics of the project will be coordinated between the student and the research supervisor at Western, which is undertaken over two semesters. Students should firstly discuss their proposed research project with the research supervisor, as it may require prior approval by the University's Ethics Committee depending on the research topic chosen. In the first semester, students plan their research, complete a literature review and propose the project plan to a panel of experts. By the end of the second semester students will have completed their thesis by research and will defend that thesis to a panel of experts. As such, students will have contributed to research in the field of cyber security and behaviour which prepares them for further studies towards a Masters or PhD qualification.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 2006 Usable Security (10 Credit Points)
Subject Details (p. 3675) Legacy Code: 102757
This subject will cover the human factors of security and privacy, as well as address emerging issues, challenges and regulations which underpin the need for usable security and privacy. After introducing the fundamental principles of security and privacy, these will be explored while considering how these principles shape the experience of users who are interacting with the designed product. Humans are an essential part of security and privacy, and they also inherently pose significant challenges. Students will be introduced to some of the fundamental security and privacy standards and regulations. They will learn about cognitive and perceptual approaches to usable security as well as how to create systems that are usable and trusted alongside fulfilling the requirements of remaining secure and private. Research topics such as how to design user studies to critically evaluate security, privacy, trust and usability interfaces will be addressed to provide students with an informed view on emerging best practices.
Level: Undergraduate Level 2 subject
Pre-requisite(s): BEHV 1025 AND
COMP 1005
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 2007 Cyber Crime and Social Engineering (Block) (10 Credit Points)
Subject Details (p. 3676) Legacy Code: 500075
This subject focuses on both the theory and application of cyber crime and cybersecurity. More specifically, it focuses on the intersection between human behaviour, cyber crime, and cyber security with topics ranging from social engineering to organisational security infrastructure. It asks - What outcomes do cyber criminals seek? How can you protect yourself and your business from cyber crime? What methods do cyber criminals typically use to gain their desired outcomes? In this subject, cyber crime and cyber security is covered from both a theory-based and applied understanding of how to reduce the likelihood of or harm caused by cyber crime.
Level: Undergraduate Level 2 subject
Pre-requisite(s): INFS 1013
Equivalent Subjects: INFO 2001 - Cyber Crime and Cyber Safety
INFO 2004 - Cyber Crime and Social Engineering
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 2008 Cyber Incident Response and Risk Management (10 Credit Points)
Subject Details (p. 3677)
Cyber risk management is the process of identifying, analysing, and evaluating how to handle an organisations' cyber security threats. This subject will introduce the fundamental tenets of risk management, and explore cybersecurity risk management frameworks. Cyber incident response is an organised approach to addressing and managing a major security breach, threat or attack. The goal is to handle the incident in a way that limits damage, reduces recovery time and losses, and take pro-active measures in the follow up and recovery phase to prevent future attacks. Students will explore common cyber attacks requiring incident response such as payment diversion fraud (business email compromise), ransomware, data breach, and advanced persistent threats. They will learn about each of these threats and how to manage such threats through the development of incident response plans including people, process, technology and information. This subject is taught with industry partners through case studies and simulations. Due to the sensitive nature of the subject and the requirement of hands on training, it cannot be taught online and is not on offer to WSU Online students. Online students will take an additional elective.
Level: Undergraduate Level 2 subject
Co-requisite(s): COMP 2027 - Cyber Security
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 2009 Multiliteracies (10 Credit Points)
Subject Details (p. 3678)
This subject develops students' skills, knowledge and competencies to address a wide range of literacies across multiple technologies, platforms and contexts. In any society there are a range of literacies, and contexts in which those literacies might be deployed. These include the digital, written, visual, aural, spatial, gestural, and tactile dimensions of meaning production. Multiliteracies go beyond the traditional textual models of literacy to describe the rich variety of cognitive and cultural tools we use to make sense of the everyday. Multiliteracy is key to our professional and personal effectiveness, as well as to our functioning as individuals and citizens in a world characterised by increasing dependency on information technologies.
Level: Undergraduate Level 2 subject
Equivalent Subjects: COMM2050 Multiliteracies
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 3001 Computer Security (10 Credit Points)
Subject Details (p. 3679) Legacy Code: 300569
This subject aims in particular at, but is not limited to, the implementation and management of security and privacy policies of organisations within the standards and legal framework that is also applicable to the Australian standards.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 3002 Ethical Hacking Principles and Practice (10 Credit Points)
Subject Details (p. 3680) Legacy Code: 301124
This subject teaches students ethical hacking principles and skills with the ultimate goal of defence. It covers practical skills in different stages of ethical hacking, including reconnaissance on public information, port and vulnerability scanning, exploitation of vulnerabilities, post exploitation, and writing a comprehensive report to document detected vulnerabilities and proposed solutions. Students will not only practise with major tools in ethical hacking, but also learn the principles of how these tools work and hence how to defend against them. Students completing this subject can pursue careers such as ethical hackers, security architects or security analysts.
Level: Undergraduate Level 3 subject
Pre-requisite(s): COMP 2004 OR
COMP 2005 AND
COMP 2020 OR
COMP 2021
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 3003 Human-Computer Interaction (10 Credit Points)
Subject Details (p. 3681) Legacy Code: 300570
A key component to the discipline of Information Systems is the understanding and the advocacy of the user in the development of IT applications and systems. IT graduates must develop a mind-set that recognizes the importance of users and organisational contexts. They must employ user centered methodologies in the development, evaluation, and deployment of IT applications and systems. This subject examines human-computer interaction in order to develop and evaluate software, websites and information systems that not only look professional but are usable, functional and accessible.
Level: Undergraduate Level 3 subject
Equivalent Subjects: INFS 3015 - Software Interface Design
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 3004 Human-Computer Interaction (Advanced) (10 Credit Points)
Subject Details (p. 3682) Legacy Code: 300901
IT graduates must be able to develop and evaluate software, websites and mobile apps that not only look professional but are usable, functional and accessible. However, the study of HCI is often restricted to its use as a tool in the software development process. This advanced subject also examines HCI as a field of research and how to conduct research into human user factors. Students in this advanced subject will be required to complete a research project and produce a final research report, which is of a standard capable of being considered for publication in a HCI conference or journal.
Level: Undergraduate Level 3 subject
Incompatible Subjects: INFO 3003 - Human-Computer Interaction INFS 3015 - Software Interface Design
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 3005 I.T. Support Practicum (10 Credit Points)
Subject Details (p. 3684) Legacy Code: 300136
This subject provides students real-world experience in the area of Information Technology (IT) support. Students are located with industry partners in the Greater Western Sydney region in IT support positions for 10 hours per week over a 12 week period. In addition, students receive instruction and tuition in aspects of professional practice such as code of ethics.
Level: Undergraduate Level 3 subject
Pre-requisite(s): INFO 1002 AND
COMP 2013 OR
LGYA 6157
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 3006 Information Security (10 Credit Points)
Subject Details (p. 3684) Legacy Code: 300128
Information Security is concerned with the protection and privacy of information in computer systems. The focus is primarily on introducing cryptography concepts, algorithms and protocols in information security and applying such knowledge in the design and implementation of secure computer and network systems. The subject also addresses conventional and public key encryption, number theory and algebra and their application in public key encryption and signatures. Students will learn the application of cryptography algorithms in current computer systems and information security management. This subject also provides students with the practical experience around security programming.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MATH 1006 AND
COMP 2009 OR
COMP 2015 OR
COMP 2016
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 3007 Network Security (10 Credit Points)
Subject Details (p. 3685) Legacy Code: 300143
This subject is concerned with the protection of information transferred over computer networks. It includes discussion of techniques for securing data transported over local and wide area networks. At the conclusion of the subject students will have a good understanding of the practical aspects of securing a computer network against internal and external attacks.
Level: Undergraduate Level 3 subject
Pre-requisite(s): COMP 2007 OR
COMP 2004 OR
COMP 2005
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 3008 Professional Development (10 Credit Points)
Subject Details (p. 3686) Legacy Code: 300578
This is a final year subject that builds on foundation and intermediate computing subjects to prepare students for professional experience. The subject covers the content in three modules as 1) Ethics and Professional Code of Conduct, 2) Project Management, and 3) Legal, Social, Environmental issues, Quality Assurance and IT Compliance. The content covered in these three modules are carefully designed to fill in the gaps in knowledge that is not so far covered in previous subjects in preparing students for the challenging projects subjects and professional working life ahead. This subject is a pre-requisite to the capstone project, covered in Professional Experience Project subject.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 5983 - Professional Preparation and Project Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 3011 Social Computing (10 Credit Points)
Subject Details (p. 3687) Legacy Code: 300961
Rapid growth of computational devices connected to the internet such as mobile phones, tablets, personal computers have made us into a digitally connected society. This has enabled us to develop a new computing paradigm: Social Computing to enhance ways we can fulfil a range of primary and secondary human needs. Already many new businesses have evolved making use of these possibilities surpassing the number of users in corresponding conventional businesses such as retail, transportation and hotel chains. In this subject students will learn the fundamental concepts of Social Computing, how Social Computing is evolving, explore interaction models of social networks, analyse a few reported cases that relate to social computing in detail to understand the impact on society and businesses and explore ways to enhance a range of livelihood activities and future possibilities. This subject will also cover underpinning technologies related to social computing such as Web 2.0, knowledge management and related ethical, security and privacy issues.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 3012 Cyber Security and Behaviour Placement 1 (20 Credit Points)
Subject Details (p. 3688) Legacy Code: 102702
In 2022, this subject replaced by subject INFO3016 - Cyber Security and Behaviour Community Placement. This subject is the initial placement for the work integrated learning embedded in the Bachelor of Cyber Security and Behaviour degree. There are three options: 1. WSU-brokered industry placement on a competitive basis; 2. an approved placement at the student's place of work, or via the student's networks and contacts; 3. an industry project report based on industry-generated case studies and problems. In addition, workshops will be conducted throughout the semester to aid in your learning and to support your professional development during this placement or project. Contact the subject coordinator well in advance to elect your own industry placement (such as your current employer). Only options 2 and 3 are available to WSU Online students.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 3013 Cyber Security and Behaviour Placement 2 (20 Credit Points)
Subject Details (p. 3689) Legacy Code: 102703
In 2022, this subject replaced by subject INFO3017 - Cyber Security and Behaviour Industry Placement. This subject is the second placement for the work integrated learning embedded in the Bachelor of Cyber Security and Behaviour degree. There are three options: 1. WSU-brokered industry placement on a competitive basis; 2. an approved placement at the student's place of work, or via the student's networks and contacts; 3. an industry project report based on industry-generated case studies and problems. Students may continue the option chosen for Cyber Security and Behaviour Placement 1, or choose another available option. Workshops will be conducted throughout the semester to aid in your learning and to support your professional development during this placement or project. Contact the subject coordinator well in advance to elect your own industry placement (such as your current employer). Only options 2 and 3 are available to WSU Online students.
Level: Undergraduate Level 3 subject
Pre-requisite(s): INFO 3012
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 3014 Digital Investigations and Forensics (10 Credit Points)
Subject Details (p. 3689) Legacy Code: 102701
This subject focuses on the concepts, theories, and practice of digital investigations and forensics. More specifically, it focuses on using a detailed hands-on approach to the use of computer technology in investigating and demonstrating that particular digital media contains incriminating evidence. With topics ranging from data acquisition, file systems examination, social media, email and network investigations, mobile and cloud forensics, a working knowledge of how to approach digital investigations and utilise various forensic tools to collect, analyse and present digital evidence will be gained. In this subject, digital investigations and forensics is covered from both a theory-based and applied understanding of how to recover admissible legal evidence after an incident, or proactively as a key defence to reduce the likelihood of cyber attacks.
Level: Undergraduate Level 3 subject
Pre-requisite(s): INFS 1002 AND
INFO 2001 OR
INFO 2004
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 3015 Internet of Things and Smart Environments (10 Credit Points)
Subject Details (p. 3690) Legacy Code: 301436
This subject covers the essential components and the dominant and emerging applications of the Internet of Things (IoT) and smart environments. These include the functions of sensors, actuators, and relevant communication networks in collecting, analysing, and acting on smart environment data. The role of machine learning in developing smart environment solutions, such as smart cities, smart transportation, smart healthcare, and other leading applications, are also discussed. The subject additionally covers critical IoT cybersecurity and privacy issues and examines approaches for addressing them. It presents the relevant principles and current practices and explores the trends in IoT and smart environments.
Level: Undergraduate Level 3 subject
Pre-requisite(s): COMP 2004
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 3016 Cyber Security and Behaviour Community Placement (20 Credit Points)
Subject Details (p. 3691) Legacy Code: 102905
This subject is the first placement for the work integrated learning embedded in the Bachelor of Cyber Security and Behaviour degree. Students will do an internal cyber security placement with the new live security operations centre known as the Western centre for Cybersecurity Aid and Community Engagement (Western CACE). Western CACE will provide training for students as well as members of the small business communities with cyber preparedness training. Students will be guided through handling real cyber attacks and assisting small business respond to these attacks. There are a paucity of government services that address and aid small business with live cyber attacks. Western CACE fills this necessary gap where students will exit knowing how to deal with ransomware, payment diversion fraud, data breach, emerging threats, and the security control implementations post-incident. The placement with Western CACE acts as a stepping stone to their next placement which is their external industry placement (INFO 3017 Cyber Security and Behaviour Industry Placement). A two day induction/workshops will be conducted in the week prior to commencing with Western CACE with ongoing professional development onsite within the Centre as directed by the Centre Manager, Director and industry leaders. WSU Online students will not do a face to face placement at Western CACE unless they are able to attend face to face sessions in Sydney for both INFO 2008 Cyber Incident Response and Risk Management and this unit. WSU Online students will have the following options: an approved placement at the student's place of work, or via the student's networks and contacts OR an industry project report based on industry-generated case studies and problems.
Level: Undergraduate Level 3 subject
Equivalent Subjects: INFO 3012 - Cyber Security and Behaviour Placement 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 3017 Cyber Security and Behaviour Industry Placement (20 Credit Points)
Subject Details (p. 3692) Legacy Code: 102904
This subject is the industry placement for the work integrated learning embedded in the Bachelor of Cyber Security and Behaviour degree. Students will work with an industry placement or its equivalent. There are four options for industry placement: 1. WSU-brokered industry placement on a competitive basis; 2. an approved placement at the student's place of work, or via the student's networks and contacts; 3. an industry project report based on industry-generated case studies and problems; 4. continuing at WCACE. In addition, workshops will be conducted throughout the semester to aid in your learning and to support your professional development during this placement or project. Contact the subject coordinator well in advance to elect your own industry placement (such as your current employer). Only options 2 and 3 are available to WSU Online students.
Level: Undergraduate Level 3 subject
Equivalent Subjects: INFO 3013 - Cyber Security and Behaviour Placement 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 3018 Computing Practicum (10 Credit Points)
Subject Details (p. 3693)
This subject provides students with real-world experience in the Computing industry in Australia and other locations around the world. Students undertake 120 hours of full-time or part-time equivalent industry placement as a Work Integrated Learning (WIL) component, carrying out computing related tasks and receive instructions and tuition in aspects of professional practice. Students may nominate an organisation of their choice, in Australia, or within a department/ division of Western Sydney University carrying out computing related tasks locally or globally, with the exception of their home country for non-Australian resident students. However, for all cases, students must seek the approval of the Subject Coordinator before the commencement of their industry placement.
Level: Undergraduate Level 3 subject
Pre-requisite(s): Students in 3687 Bachelor of Information Systems and 3639 Bachelor of Information and Communications Technology - COMM 1026 INFS 1006
Students in 3688 Bachelor of Information Systems (Advanced) - COMM 1026 INFS 1015
Students in 3506 Bachelor of Computer Science - COMM 1026
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 3019 Project Management (10 Credit Points)
Subject Details (p. 3694)
This subject is designed to provide students with the fundamental project management skills, theories and methods required in today's complex business environment with a focus on project conception, initiation, planning, monitoring and control in ICT. Students explore developing project solutions in various ICT areas, project management methodologies, time management, team management, and different knowledge areas contributing to the successful delivery of a project life cycle. Students work in teams under the supervision of a staff member, to plan and investigate their projects using a range of project management tools and techniques and integrate ethical principles into project planning, execution, and stakeholder interactions. Skills in project management and working with others on projects in the ICT context are in demand by employers.
Level: Undergraduate Level 3 subject
Pre-requisite(s): Students who are NOT in 3769 Bachelor of Data Science must complete
INFO 1003 - Professional Practice Communication and Ethics -OR- COMM 1044 Professional Communication -OR- COMM 1026 Principles of Professional Communication 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 3020 Cyber Security and Behaviour Research Project (40 Credit Points)
Subject Details (p. 3695)
This is a 40 credit point year-long subject taken over two terms (20 credit points in each term). This subject comprises the research pathway of the Bachelor of Cyber Security and Behaviour. Students will undertake a major research project in the field of behavioural cyber security. The specifics of the project will be coordinated between the student and the research supervisor at Western, which is undertaken over two semesters. Students should firstly discuss their proposed research project with the research supervisor, as it may require prior approval by the University's Ethics Committee depending on the research topic chosen. In the first semester, students plan their research, complete a literature review and propose the project plan to a panel of experts. By the end of the second semester students will have completed their thesis by research and will defend that thesis to a panel of experts. As such, students will have contributed to research in the field of cyber security and behaviour which prepares them for further studies towards a Masters or PhD qualification.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 3021 Information Security (Advanced) (10 Credit Points)
Subject Details (p. 3695)
This subject introduces cryptography theory and application. It teaches cryptography algorithms and protocols in information security and the application of such knowledge in the design and implementation of secure computer and network systems. The contents include symmetric and asymmetric encryptions, signature, matrix, number theory, algebra, and security protocols. Students will learn the application of cryptography algorithm in current computer systems and information security management. This subject also provides practical exercises by security programming.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MATH1006
COMP2030
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 5001 Workflow Management for Business Solutions (10 Credit Points)
Subject Details (p. 3696)
Through project-based learning, students will learn how to configure digital workflows applications and build custom applications with a strong emphasis on human centered design and end-to-end process re/engineering. Mentoring and coaching is provided by the industrial-academic team to allow students to develop real world, work ready skills to fulfil various organisational roles implementing the digital workflows platform. Teaching and learning activities focus on ServiceNow which is a cloud-based platform that delivers cross-enterprise digital workflows, connecting people, functions and systems. At the conclusion of this subject, you will have completed certifications for both the ServiceNow Fundamentals and Application Development Fundamentals, both highly sought after in the current job market.
Level: Postgraduate Coursework Level 5 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 6001 IT Project Management (10 Credit Points)
Subject Details (p. 3697)
This subject is designed to provide students with an opportunity to learn and apply the knowledge, values and skills of consultancy, project management, and research by undertaking an IT project. The subject prepares students on presenting project proposals in various ICT areas, project management, time management, communication skills, and the evolving legal, ethical, and social responsibilities of IT professionals. Students will work in teams under the supervision of a staff member, to plan and investigate their project.
Level: Postgraduate Coursework Level 6 subject
Pre-requisite(s): ENGR 7017 - Professional Practice and Communication
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 6002 Postgraduate Capstone Project
Subject Details (p. 3698)
This capstone subject organises students in groups to work on industry-based projects. It provides students with opportunities to gain substantial practice in the development of information systems or software projects including requirements analysis, data gathering and synthesising, system design, implementation, data processing and testing, in a real-world context. Suitable projects are featured with complex computing problems and are sourced from external organisations or within the university. Students work in groups. Each group is guided by an academic supervisor or an industry mentor to achieve the goals set by a client who provides the project. The subject aims to develop students' project management skills, effective teamwork, analytical problem-solving, computational and big data thinking, as well as valuable experience in self-directed learning and reflective practice within a professional setting.
Level: Postgraduate Coursework Level 6 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 6003 Postgraduate Research Project
Subject Details (p. 3699)
This project-based subject provides students with opportunities to develop comprehensive research and project management skills. Students are matched with a supervisor to explore an area of research interest. Working closely with their supervisor, each student will identify their individual research topic then engage in theoretical and practical research investigations. Each student is expected to develop their skills to work independently as a researcher to manage their research project as well as produce and deliver a comprehensive research report on their findings. This subject provides students with the skills necessary to move on to higher academic research levels or pursue career opportunities in industry-based research.
Level: Postgraduate Coursework Level 6 subject
Equivalent Subjects: INFO 7017
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 7001 Advanced Machine Learning (10 Credit Points)
Subject Details (p. 3700) Legacy Code: 301119
Advanced Machine Learning explores modern methods of classification, clustering and regression to make predictions and analyse different forms of data. Issues that face all machine learning methods, such as model evaluation, assessment and generalisation will also be analysed.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): COMP 7024
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 7002 Advanced Topics in Artificial Intelligence (10 Credit Points)
Subject Details (p. 3701) Legacy Code: 301196
This subject introduces the most fundamental techniques of artificial intelligence (AI), including knowledge representation, searching, machine learning and intelligent agents. Students will learn the basic theories and algorithms that are essential in the design and development of intelligent systems. The subject will focus on two typical AI applications: game playing and e-trading. Students will have the chance of using existing multiagent system platforms to design and develop intelligent software for game playing and automated trading in e-markets.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: LGYA 5875 Intelligent Agents LGYA 5991 Automated Negotiation and e-Trading INFO 7006 Intelligent Agents for eMarkets
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 7003 Advanced Topics in User System Interaction (10 Credit Points)
Subject Details (p. 3702) Legacy Code: 301045
The domain of User System Interaction or also known as Human Computer Interaction (HCI) dictates that IT graduates must be able to develop and evaluate interfaces that not only look professional but are usable, functional and accessible. This post graduate subject also examines HCI as a field of research and discusses novel areas of research in the area. Students in this subject will be required to complete a research project alongside a literature review document both of which comprise of content that is of a standard of being able to be considered for publication and/or presentation in a HCI conference or journal.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): INFS 7007
Incompatible Subjects: INFO 3003 - Human-Computer Interaction INFO 3004 - Human-Computer Interaction (Advanced)
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 7004 ICT Practicum (0 Credit Points)
Subject Details (p. 3703) Legacy Code: 301047
In this subject, students undertake 120 hours of full-time or part-time equivalent industry placement as a Work Integrated Learning (WIL) component required for the successful completion of their course. Students can nominate an organisation of their choice however, they must seek the approval of the Subject Coordinator before the commencement of the industry placement. Students have the option to work in an organisation in Australia, or within a department/division of Western Sydney University carrying out ICT related tasks or globally, with the exception of their home country for non-Australian resident students. This provides an opportunity for real-world experience in the ICT industry in Australia as well as anywhere in the world. Students with substantial post-qualification work experience in Australia or globally (with the exception of their home country for non-Australian residents) may be eligible for advanced standing for this subject.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): For students enrolled in 3698 Master of Information and Communications Technology (Advanced) or 3699 Master of Information and Communications Technology - ENGR 7017 Professional Practice in Communication
For students enrolled in 3765 Master of Artificial Intelligence - COMP 7020 Artificial Intelligence Ethics and Organisations
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 7005 IT Project Management (10 Credit Points)
Subject Details (p. 3704) Legacy Code: 300260
This subject is designed to provide students with an opportunity to learn and apply the knowledge, values and skills of consultancy, project management, and research by undertaking an IT project. The subject covers preparing and presenting project proposals in various ICT areas, project management, time management, communication skills, and the evolving legal, ethical, and social responsibilities of IT professionals. Students will work in teams under the supervision of a staff member, to plan and investigate their project.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 7007 Masters Thesis (80 Credit Points)
Subject Details (p. 3705) Legacy Code: 301125
This is a 80 credit point year-long subject taken over two terms (40 credit points in each term). This subject provides an opportunity for masters students to carry out a comprehensive investigation and practical work on a cutting edge research topic in the area of Information and Communication Technologies. Students are encouraged to select topics they envisage to be of value to their future careers. Students will undertake individual research-intensive project-based study under the guidance of an academic supervisory panel.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): ENGR 7017 AND
ENGR 7018 AND
HUMN 4009 AND
HUMN 4010
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 7010 Research Project A (20 Credit Points)
Subject Details (p. 3706) Legacy Code: 301055
This subject is a problem based research subject. Students are expected to conduct individual studies under supervision by academic staff. Students will acquire the basic skills that are essential for completing a research project. They will learn how to identify research topics in the fields relevant to their courses. They will be required to define research objectives and scope, conduct literature survey, establish research methodology, prepare a research plan and present these contents in a final report and through an oral presentation. This subject is a pre-requisite of subject Research Project B in which the research plan will be carried out.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): Students enrolled in 3716 Master of Mathematics student must have successfully completed MATH 7006 Calculus of Variations and Advanced Calculus MATH 7010 Non-linear Ordinary Differential Equations MATH 7004 Applied Complex Variables and MATH 7005 Approximation Theory
Students enrolled in 3752 Master of Project Management must have successfully completed BUSM 7064 Managing Project Teams and Stakeholders MGMT 7003 Financial Management of Projects BUSM 7097 Time and Quality Management BLDG 7009 Project Procurement Systems BUSM 7082 Risk Management and Decision Making and BUSM 7090 Strategic Project Management
Incompatible Subjects: ENGR 7014 Master Project 1 ENGR 7015 Master Project 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 7011 Research Project B (20 Credit Points)
Subject Details (p. 3707) Legacy Code: 301056
This subject is a continuation of the subject Research Project A and is a problem based project subject. Students are expected to conduct individual studies under supervision by academic staff and deliver the final outcomes/findings on the research topics that are proposed in Research Project A. Students will employ the identified methodologies to carry out the research plans and fulfil the research objectives with the scope defined in the Research Project A. Each individual student is required to produce an oral presentation and a final written report. In this subject, students will acquire research related problem solving skills. Note that students enrolled in the course Master of Project Management (only) must seek permission to enrol in this subject.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): INFO 7010
Incompatible Subjects: ENGR 7014 Master Project 1 ENGR 7015 Master Project 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 7012 Strategy for Technological Innovation (20 Credit Points)
Subject Details (p. 3708) Legacy Code: 301053
This online subject introduces a range of perspectives on the strategy formation process, recognising that there is no one universal process to fit all needs. A significant part of the teaching centres on an overview of strategic management. This is then placed into the context of technological innovation through six teaching blocks, each block providing a different perspective on the strategy formation process.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 7013 Web Engineering (10 Credit Points)
Subject Details (p. 3709) Legacy Code: 300443
Today organizations extensively rely on web based information systems to market, sell, manage customer relations, and for most of the internal operations. Users are increasingly using mobile devices to interact with this information. Due to rapidly changing business environment these systems need to be designed in away to accommodate the frequent changes. New technologies and frameworks have been developed to support development of large, complex, mobile based, maintainable and evolutionary web systems. In this subject students will study some of these technologies, design methods and frameworks that can be successfully used to engineer such web systems. They will get hands on experience by developing such a system.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYA 5881 - Web Application Development
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 7014 Advanced Topics in Cybersecurity (10 Credit Points)
Subject Details (p. 3710) Legacy Code: 301236
This subject focuses on the advanced features of Cybersecurity, contemporary views on security, and the solutions that aim to protect the emerging services and technologies. The emphasis is on the development of student skills to enable them to do proficient research and development works and studies in the cybersecurity discipline. On successful completion of this subject, students will be equipped with an in-depth understanding of relevant issues, attacks on massively interconnected systems, and the evolving approaches to improve the reliability of advanced services.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 7015 Applied Cybersecurity (10 Credit Points)
Subject Details (p. 3710) Legacy Code: 301235
This subject covers the current approaches, technologies, and applied practices pertinent to cybersecurity and helps the student to understand important related protocols and standards. It describes the features needed for the mitigation of cyber vulnerabilities for improving the reliability of the underlying systems, privacy preservation, and achieving protections against cybercrime and internet fraud. It also examines the basics of ethical hacking, network assurance, cyber risk management, and incident analysis. The subject discusses the trends in applied cybersecurity and introduces some of the relevant current key research issues and features of the field.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): COMP 7013
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 7016 Postgraduate Project A (10 Credit Points)
Subject Details (p. 3711) Legacy Code: 301384
This is a project-based subject for the Master studies in Computers, Data and Mathematical Sciences. The purpose of this subject is to develop research skills and learn how to manage a research project. Students will engage in research investigation and practical work on a topic in a field of current research interest that is of value to the candidate's professional and intellectual development. Students are expected to actively pursue their interest in an individual research area and undertake self-studies under guidance of a project supervisor. Students will identify research topics in consultation with supervisors, carry out a literature review, define research objectives, establish research methodology, and prepare a research plan. Eventually each student is required to produce a research report with preliminary findings.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: ENGR 7014 - Master Project 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 7017 Postgraduate Project B (10 Credit Points)
Subject Details (p. 3712) Legacy Code: 301385
This project based subject is a continuation of subject Postgraduate Project A. Students are expected to work individually under the supervision of academic staff to solve a research problem and deliver the final outcomes on the research topics they selected in Postgraduate Project A. Students will carry out the research plans, employ the identified methodologies, and fulfil the research objectives within the defined scope. Students will acquire problem solving skills and research experience necessary to participate in a future research projects. To complete their project each student is required to deliver an oral presentation and a final written report detailing the outcomes of their research project.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): INFO 7016
Equivalent Subjects: ENGR 7015 - Master Project 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 7018 Cloud Systems Development (10 Credit Points)
Subject Details (p. 3713) Legacy Code: 301386
The majority of backend systems supporting modern mobile applications as well as commercial applications are built to run on the cloud. This requires a shift of design where reliability, scalability, performance, and security are key considerations in every stage of the software development process. This subject incorporates the AWS Academy Cloud Developing curriculum, to support learning in the areas of designing, developing, deploying, and monitoring applications for the cloud. Through the completion of an applied project, students will implement the techniques they have learned to enable communication and coordination between services, options for data persistence in the cloud, and optimisation of applications for, potentially, millions of users. Students completing this subject can pursue careers as Cloud Engineers and Software Developers.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): COMP 7004
Equivalent Subjects: INFO 7008 Modern Software Architectures
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 7019 Smart Construction (10 Credit Points)
Subject Details (p. 3714) Legacy Code: 301491
This subject introduces the evolving smart technologies applicable to construction and facilitates critical thinking in how these technologies can be gainfully applied in the construction industry. It builds up understanding of the subject content from baseline principles of management information systems moving towards evolving new technologies such as digital engineering, Building Information Modelling, Blockchain, Artificial Intelligence among others. The modern construction enterprises are critically analysed to determine the application of suitable technologies for their advancement.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 9001 Higher Degree Research Thesis - Information Technology (80 Credit Points)
Subject Details (p. 3714) Legacy Code: 800178
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 9002 Higher Degree Research Thesis - Information Technology (80 Credit Points)
Subject Details (p. 3716) Legacy Code: 800201
This is a 80 credit point year-long subject.
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

INFO 9003 Higher Degree Research Thesis - Mathematics Sciences (80 Credit Points)
Subject Details (p. 3717) Legacy Code: 800223
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

Other Management and Commerce (MGMT)

MGMT 1001 Introduction to Property (10 Credit Points)
Subject Details (p. 4276) Legacy Code: 200601
Introduction to Property comprises six main topic areas. The first section covers the various professions within the property industry with particular emphasis on the valuation profession. The second section covers land law and legal concepts concerning property. The third section addresses issues in property development controls and planning. The fourth section concentrates on the areas of academic and industry report writing. This section also addresses the areas of academic study, lecture procedures and examination technique. The fifth section covers topics in relation to residential valuation and introduces methodologies for valuing more advanced properties as well as the skills required for collecting data for valuation purposes. The sixth section introduces students to mathematics required for later valuation units.
Level: Undergraduate Level 1 subject
Equivalent Subjects: LGYC 1563 - Introduction to Property
Restrictions: Please see the Subject Details page for any restrictions for this subject

MGMT 1002 Principles of Valuation (10 Credit Points)
Subject Details (p. 4277) Legacy Code: 200602
This subject covers five main topic areas. The first area covers various valuation methods and extends the students' knowledge in relation to industrial property valuation. The second area covers the hypothetical development method of valuation as well as strata valuation principles. The third area introduces the valuation of partial interests and advanced valuation mathematics. The fourth area provides an introduction to statutory valuation, rating and taxing of property. The last area introduces the students to commercial property valuation.
Level: Undergraduate Level 1 subject
Equivalent Subjects: LGYC 1564 - Principles of Valuation
Restrictions: Please see the Subject Details page for any restrictions for this subject

MGMT 2001 Commercial Valuation (10 Credit Points)
Subject Details (p. 4278) Legacy Code: 200603
This subject provides students with a comprehensive understanding of theory and practice of commercial valuation. All aspects of commercial valuation are covered, including commercial valuation reporting standard of the Australian Property Institute. Knowledge of land use planning, property economics and property investment are applied to commercial valuation in this subject.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYC 1565 - Commercial Valuation
Restrictions: Please see the Subject Details page for any restrictions for this subject

MGMT 3001 Property Project (10 Credit Points)
Subject Details (p. 4278) Legacy Code: 200360
Property Project is the integrating capstone subject, which brings together the skills that property students have developed during the course in preparing high quality professional property industry reports. The subject enables students to critically evaluate issues in the property industry to determine and assess potential property industry implications as well as conduct a feasibility study using an appropriate property software.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MGMT 3002 Rural Valuation (10 Credit Points)
Subject Details (p. 4279) Legacy Code: 200605
To provide students with a full understanding of rural land/property valuation procedures and techniques. This includes being aware of those factors, inherent and external, that need to be taken into account when assessing different types of rural property holdings. To be aware of those environmental factors that affect rural land productivity, sustainability and end value.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYC 1567 - Rural Valuation
Restrictions: Please see the Subject Details page for any restrictions for this subject

MGMT 3003 Specialised Valuation (10 Credit Points)
Subject Details (p. 4280) Legacy Code: 200876
The value of special premises constitutes an important segment of valuation practice in Australia. A number of special valuation considerations arise in the appraisal of this class of premises. However, the most compelling reason for studying the valuation of special premises is the fact that these classes of property provide an ideal vehicle whereby valuation principles and methods of valuation can be critically evaluated by students.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYC 1566 Valuation of Special Premises MGMT 3005 Valuation of Special Premises
Restrictions: Please see the Subject Details page for any restrictions for this subject

MGMT 3004 Statutory Valuation (10 Credit Points)
Subject Details (p. 4280) Legacy Code: 200711
This subject covers the area of statutory valuation. It is the prescribed subject for registration as a valuer with the NSW Fair Trading. It is also the prescribed subject for Certified Practicing Valuer (CPV) membership of the Australian Property Institute. Upon completion of this subject, students will demonstrate a comprehensive understanding of the relevant property and related laws, necessary valuation methods and principles required for statutory valuations.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 4819 - Compulsory Acquisition and Litigation
Restrictions: Please see the Subject Details page for any restrictions for this subject

MGMT 7003 Financial Management of Projects (10 Credit Points)
Subject Details (p. 4281) Legacy Code: 301194
Projects are always unique and their processes are always subject to elements of uncertainty and change. The skill of project management professionals in securing the best return for their organisation's efforts is thus held in great value. This subject is concerned with financial aspects of project management from both theoretical and practical perspectives. The aim is to explain how financial management tasks are carried out in the context of projects as well as stimulate students' reflection on best practice in project financial management.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

MGMT 9001 Higher Degree Research Thesis - Management and Commerce (80 Credit Points)
Subject Details (p. 4282) Legacy Code: 800206

Restrictions: Please see the Subject Details page for any restrictions for this subject

Other Natural and Physical Sci (NATS)

NATS 0001 Academic Skills for Health Science (WSTC Prep) (10 Credit Points)
Subject Details (p. 4338) Legacy Code: 700225
This subject is designed to assist students to become successful independent learners. It introduces students to a range of theories and concepts to facilitate the development of practical skills and personal attitudes necessary for success in tertiary study. Emphasis is placed on developing the key competencies such as time management, critical thinking, researching, learning how to learn and referencing.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: NATS 0002 - Academic Skills for Health Science (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 0002 Academic Skills for Health Science (WSTC) (10 Credit Points)
Subject Details (p. 4339) Legacy Code: 900099
This subject is designed to assist students to become successful independent learners. It introduces students to a range of theories and concepts to facilitate the development of practical skills and personal attitudes necessary for success in tertiary study. Emphasis is placed on developing the key competencies such as time management, critical thinking, researching, learning how to learn and referencing.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: NATS 0001 - Academic Skills for Health Science (UWSCFS)
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 0003 Academic Skills for Science (WSTC Prep) (10 Credit Points)
Subject Details (p. 4339) Legacy Code: 700230
This subject is designed to assist students to become successful independent reflective learners. It introduces students to a range of theories and concepts to facilitate the development of practical skills and personal attitudes necessary for success in tertiary study. Emphasis is placed on developing the key competencies of scientific enquiry - collecting, analysing, organising and communicating information as well as solving problems, particularly when related to using mathematical ideas and techniques.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 0004 Academic Skills for Science (WSTC) (10 Credit Points)
Subject Details (p. 4340) Legacy Code: 900101
This subject is designed to assist students to become successful independent reflective learners. It introduces students to a range of theories and concepts to facilitate the development of practical skills and personal attitudes necessary for success in tertiary study. Emphasis is placed on developing the key competencies of scientific enquiry - collecting, analysing, organising and communicating information as well as solving problems, particularly when related to using mathematical ideas and techniques.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: NATS 0003 - Academic Skills for Science (UWSCFS)
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 0005 Foundations of Science (WSTC) (10 Credit Points)
Subject Details (p. 4341) Legacy Code: 900053
This subject aims to provide students with sufficient knowledge of scientific facts and theories to provide the basis for further studies in science, engineering and technology. Emphasis is placed on developing the key competencies of scientific inquiry - collecting, analysing, organising and communicating information as well as solving problems, particularly when related to using mathematical ideas and techniques. Major areas of science - physics, chemistry and biology are represented within the subject and presented in context within an integrated framework.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 0006 Fundamentals of Health Science (WSTC Prep) (10 Credit Points)
Subject Details (p. 4342) Legacy Code: 700190
The depth of knowledge and practical skills required by health professionals in the 21st century is very different to that which was required in the past. Medical treatment of illness and disease has become increasingly technical and health professionals are expected to work in partnership in determining patient care. In order to achieve this, today's health professional must have a basic understanding of the fundamental scientific principles behind health and disease. Increasingly, modern health science is concerned with maintaining health as a way of preventing disease and this is achieved through a holistic approach to the human condition. This subject is an introduction to the basic concepts in human body systems, health and disease, that is required in order to commence any tertiary health science course.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: NATS 0016 - Science for Health Professionals (UWSC) NATS 0018 - Science for Health Science (UWSCFS)
Incompatible Subjects: BIOS 1023 - Introduction to Human Biology (WSTC) BIOS 1022 - Introduction to Human Biology
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 0007 Fundamentals of Science (WSTC Prep) (10 Credit Points)
Subject Details (p. 4343) Legacy Code: 700231
In its broadest sense, science is an evolving body of skills, theories and knowledge about the nature of the world, based on observation, measurement and experiment. In order to begin participating in tertiary science studies, students require a fundamental toolkit of scientific literacy that includes key concepts, language, and skills. This subject provides an overview of, and grounding in, fundamental scientific concepts including the nature of matter and energy, and the flow of energy and cycling of matter through key processes in the biosphere. Integrating these concepts within a framework of a contemporary issue, climate change, enables students to build skills in applying scientific concepts, methods and problem-solving techniques, as well as furthering an understanding of interrelationships between science and other aspects of society. The subject imparts a basic body of essential scientific knowledge, as well as facilitating skills in collecting and analysing information and writing coherent explanations within a scientific framework.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: NATS 0008 - Fundamentals of Science (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 0008 Fundamentals of Science (WSTC) (10 Credit Points)
Subject Details (p. 4344) Legacy Code: 900105
In its broadest sense, science is an evolving body of skills, theories and knowledge about the nature of the world, based on observation, measurement and experiment. In order to begin participating in tertiary science studies, students require a fundamental toolkit of scientific literacy that includes key concepts, language, and skills. This subject provides an overview of, and grounding in, fundamental scientific concepts including the nature of matter and energy, and the flow of energy and cycling of matter through key processes in the biosphere. NATS 0009 Health Communication (WSTC) (10 Credit Points)
Subject Details (p. 4345) Legacy Code: 900081
Health Care Professionals work in an environment where a high level of communication with others is of paramount importance. Oral, written and interpersonal communication skills form the cornerstone of good professional practice. This subject is designed to help students develop self-awareness, increase their confidence and skills in communicating with others in preparation for the practicum experiences during their undergraduate studies.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: LGYB 1382 - Nursing Communication (UWSC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 0010 Interpreting Data In Science (WSTC Prep) (10 Credit Points)
Subject Details (p. 4346) Legacy Code: 700287
Science is a way of knowing about the world. It is a process of discovery whose product, an evolving body of scientific knowledge and technology, is a significant determinant of modern Western societies. Engaging with the content, process, and social functions of science requires foundational scientific literacy, including the ability to access multiple textual forms, to construct meaning, and to critically evaluate new information in a scientific framework. In this subject students will develop skills in scientific literacy through undertaking case studies of contemporary relevance. Emphasis is placed on key competencies in scientific academic writing - collecting, analysing, organising, interpreting and communicating information - as well as solving problems related to mathematical ideas and techniques.

NATS 1001 Concepts in Human Anatomy (10 Credit Points)
Subject Details (p. 4353) Legacy Code: 301126
This subject provides a basic understanding of human embryological development, anatomical terminology, and a range of foundation concepts in human anatomy. Students must attend a 'wet' laboratory session where the learning of anatomy will be enhanced through the study of human cadaveric material. Wet laboratory sessions are not available on all campuses, and therefore students will need to travel to other campuses in order to attend.
Level: Undergraduate Level 1 subject
Equivalent Subjects: NATS 1013 - Introduction to Anatomy
NATS 1002- Concepts in Human Anatomy (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 1002 Concepts in Human Anatomy (WSTC) (10 Credit Points)
Subject Details (p. 4354) Legacy Code: 700266
This subject provides a basic understanding of human embryological development, anatomical terminology, and a range of foundation concepts in human anatomy. Students must attend a 'wet' laboratory session where the learning of anatomy will be enhanced through the study of human cadaveric material. Wet laboratory sessions are not available on the Nirimba campus, and therefore students will need to travel to Campbelltown in order to attend these sessions.
Level: Undergraduate Level 1 subject
Equivalent Subjects: NATS 1001 - Concepts in Human Anatomy
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 1003 Digital Forensic Photography (10 Credit Points)
Subject Details (p. 4354) Legacy Code: 300874
Forensic photography serves an important function within forensic science for the purpose of scene and item documentation, as well as the detection and enhancement of forensic evidence. This subject introduces the student to the fundamental principles and practices of forensic photography. Topics include: principles of light science, digital imaging, camera and lighting operations, technical photography composition, and the maintenance of image integrity.
Level: Undergraduate Level 1 subject
Pre-requisite(s): NATS 1008
Equivalent Subjects: NATS 2012 - Digital Forensic Photography 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 1004 Drugs on Line (10 Credit Points)
Subject Details (p. 4355) Legacy Code: 400961
This subject deals with selected issues in drug use, misuse and abuse. An introductory section discusses mechanisms of drug action in the body and their likely effects. Some topical areas include; drugs in society (illicit drug taking and drug taking in sports), antidepressants and weight management therapeutic agents, and the exploration of complementary alternative medicines (CAMs) in Australian society.
Level: Undergraduate Level 1 subject
Equivalent Subjects: NATS 1005 - Drugs On Line
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 1008 Forensic Science (10 Credit Points)
Subject Details (p. 4356) Legacy Code: 300806
This subject aims to give students a basic understanding of scientific methodology as it applies to the collection, analysis and interpretation of forensic evidence. Students are introduced to a range of crime scene investigation methods and analysis methods that are used with various types of forensic evidence. The concept of individualisation is introduced and the importance of this concept in forensic science is explained. Case studies are used to explain the concepts discussed in this subject. The role of human factors is discussed, together with the importance of critically evaluating forensic evidence and the means by which it was obtained.
Level: Undergraduate Level 1 subject
Equivalent Subjects: NATS 1006 - Forensic Science NATS 1007 - Forensic Science
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 1009 Human Anatomy and Physiology 1 (10 Credit Points)
Subject Details (p. 4357) Legacy Code: 400868
This is the first of two subjects covering systematic anatomy and physiology at an introductory level. This subject is designed to provide students in medical science and applied health science programs with an overview of body systems and their functions to ensure a suitable basis for their future studies. The subject studies the basic concepts of biochemistry and histology, general anatomy and physiology of the major body systems including the central and peripheral nervous systems, integumentary system, musculoskeletal system (bones, muscles and joints), special senses and endocrine system. Emphasis will be placed on the interconnection and relationship between structure and function at every level of organisation.
Level: Undergraduate Level 1 subject
Equivalent Subjects: BIOS 1033
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 1010 Human Anatomy and Physiology 2 (10 Credit Points)
Subject Details (p. 4358) Legacy Code: 400869
Human Anatomy and Physiology 2 systematically covers anatomy and physiology at an introductory level. This subject is designed to provide students, especially those in clinical health science programs, with an overview of body systems and their functions, to ensure a suitable basis for their future studies. The subject studies the basic structure and function of the major body systems such as cardiovascular, respiratory, digestive, urinary, reproductive and lymphatic. This subject also explores the physiological processes involved in the immune response, cell metabolism, regulation of body fluids and acid-base balance. Emphasis is placed on the interconnection and relationship between structure and function at every level of organisation.
Level: Undergraduate Level 1 subject
Equivalent Subjects: NATS 1030

Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 1019 Scientific Literacy (10 Credit Points)
Subject Details (p. 4358) Legacy Code: 300811
This subject is designed to provide students with scientific literacy, personal and employability skills and attitudes required to successfully undertake science-related undergraduate studies and to prepare for professional life. Students learn, develop and utilise academic and interpersonal methodologies and approaches within the context of applied scientific principles and take responsibility for their own learning and develop a work ethic. Students are introduced to the contestable and uncertain nature of science and the scientific method that underpins academic integrity and ethical behaviour. Activities encourage development of oral and written communication skills, self-confidence, self-efficacy, creative and critical thinking through problem solving, group process, and peer support and assessment. Academic and employability skills include scientific reading and writing, time management, researching scientific information and library skills, oral presentation, taking tests and exams, effective personal and group based learning strategies, and approaches to online learning.
Level: Undergraduate Level 1 subject
Equivalent Subjects: NATS 1018 - Professional Skills for Science NATS 1020 - Scientific Literacy (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 1020 Scientific Literacy (WSTC) (10 Credit Points)
Subject Details (p. 4360) Legacy Code: 700124
This subject is designed to provide students with scientific literacy, personal and employability skills and attitudes required to successfully undertake science-related undergraduate studies and to prepare for professional life. NATS 1021 Concepts in Human Physiology (WSTC) (10 Credit Points)
Subject Details (p. 4361) Legacy Code: 700295
This subject introduces the core concepts and terminology necessary to provide a basic understanding of the physiological responses of the human body using relevant examples. These include the processes of homeostasis, cell-cell interactions and the physical and chemical transport processes that are required to carry out integrated functions. Students will explore these key physiological concepts through practical hands-on experiments and in interactive group work in prac and tutorial classes, respectively. The subject provides the foundation to study the physiology of human organ systems.
Level: Undergraduate Level 1 subject
Equivalent Subjects: BIOS 1033 Concepts in Human Physiology
Incompatible Subjects: BIOS 1025 Introduction to Physiology

NATS 1022 Functional Anatomy (10 Credit Points)
Subject Details (p. 4361) Legacy Code: 401410
From 2020 this subject replaces 400881 - Functional Anatomy. This subject covers in depth the functional anatomy of the musculoskeletal system. Special attention is given to the relationship between form and function, the terminology used to describe human movement and thorough knowledge of the bony landmarks, joints, muscle attachments, innervation, blood supply along with detailed actions of specific muscles and muscle groups. Emphasis is on a practical functional context with the relevance to clinical applications such as surface and imaging anatomy, and the anatomical basis of common injuries. Learning experience intends to stimulate proactive deep approach in learning anatomy motivated by the outcomes driven from specialist work within the Health professions.
Level: Undergraduate Level 1 subject
Pre-requisite(s): NATS 1009
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 1023 Introduction to Physiology (10 Credit Points)
Subject Details (p. 4362) Legacy Code: 301353
From 2020 this subject replaces 300818 - Introduction to Physiology. This subject introduces the concept of homeostasis and critically examines examples of how the body systems are regulated and homeostatically controlled. The subject uses a body-systems approach to examine the physiology of tissues, organs and systems in order to develop an integrated view of the regulated functioning of the human body.
Level: Undergraduate Level 1 subject
Equivalent Subjects: NATS 1017 - Introduction to Human Physiology LGYA 6186 - Physiology 1 BIOS 1026 - Introduction to Physiology (WSTC) BIOS 1025 - Introduction to Physiology

NATS 1025 Management of Aquatic Environments (UG Cert) (10 Credit Points)
Subject Details (p. 4364) Legacy Code: 500051
This subject introduces students to the physical, chemical and biological nature of water systems and the linkages to human activity. These linkages include a development of an appreciation of the essential services and broad uses and values of water in modern human society, and the natural environment. Students are challenged to examine the causes and effects of water pollution and environmental degradation. Students are introduced to scientific water sampling, analysis and reporting of water quality and pollution.
Level: Undergraduate Level 1 subject
Equivalent Subjects: BIOS 1028 Management of Aquatic Environments BIOS 1027 Management of Aquatic Environments BIOS 1034 Management of Aquatic Environments
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 1026 Digital Forensic Photography (WSTC) (10 Credit Points)
Subject Details (p. 4364) Legacy Code: 700329
Forensic photography serves an important function within forensic science for the purpose of scene and item documentation, as well as the detection and enhancement of forensic evidence. This subject introduces the student to the fundamental principles and practices of forensic photography. Topics include: principles of light science, digital imaging, camera and lighting operations, technical photography composition, and the maintenance of image integrity.
Level: Undergraduate Level 1 subject
Pre-requisite(s): NATS 1027

NATS 1032 Introduction to Applied Science and Technology (WSTC) (10 Credit Points)
Subject Details (p. 4369)
In this subject, you will explore the science behind ground-breaking inventions that have revolutionised contemporary society and made it what it is today. You will delve into historic innovations, such as the Haber Process, which played a pivotal role in urbanisation, as well as contemporary marvels like the lithium-ion battery, fundamental to our technology-driven lifestyle. Additionally, you will answer the "big philosophical questions" associated with these inventions. For example, 'Why did the cheap replacement lithium battery that I brought off the internet for my mobile phone or laptop explode on recharging?' and 'Why are foods and drinks, including my morning coffee, acidic?'.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 2001 Advanced Science Project A (10 Credit Points)
Subject Details (p. 4369) Legacy Code: 300937
The subject is design to teach students what is required to successfully begin to answer a scientific question. It specially focuses on teaching students how to access and critically review literature on a given topic, chosen in consultation with a supervisor in the student's preferred field of study. Students will present their findings in both written and poster formats. Students also attend a one day workshop where they engage with researchers in a wide variety of fields to broaden their understanding of research.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYA 6165 - Advanced Science Research Project A
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 2002 Advanced Science Project B (10 Credit Points)
Subject Details (p. 4370) Legacy Code: 300938
This subject continues the students' training in thinking as a research scientist whilst developing analytical and critiquing skills in a range of science disciplines. In this subject, students gain theoretical knowledge of common methods and techniques and choose to gain hands-on experience in interdisciplinary laboratory sessions, focusing on current techniques and methods in a range of science disciplines including but not limited to cell and molecular biology, chemistry, physics, biomedical science, microbiology, anatomy and physiology, and nutrition. Students will develop a strong foundation in understanding the relationship between practical techniques and data quality and reliability, which is crucial for validating research outcomes. Training in laboratory notebook best practices will be provided, emphasising the importance of accurate record-keeping in both academic and industrial research settings. Students will prepare summaries of research findings, project proposals, and progress reports from their chosen laboratory sessions using discipline-specific formats and notation. By engaging in discussions, feedback, and data analysis, students will enhance their scientific communication, presentation, and collaborative decision-making skills.
Level: Undergraduate Level 2 subject
Pre-requisite(s): NATS 2001
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 2004 Anatomy of the Thorax and Abdomen (10 Credit Points)
Subject Details (p. 4371) Legacy Code: 300894
This subject builds on the systems anatomy studied during first year, and explores the regional anatomy of the contents and walls of the human thorax and abdominopelvic cavities. Emphasis is placed on the relationship between structures, and the nexus between form and function. Cadaveric specimens are used in this subject to illustrate the array of normal anatomical variation.
Level: Undergraduate Level 2 subject
Pre-requisite(s): NATS 1010
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 2005 Appendicular Skeleton (10 Credit Points)
Subject Details (p. 4372) Legacy Code: 300898
This musculoskeletal subject builds on the basic anatomy taught during the first year, offering a regional study of the human upper and lower limbs, including their respective girdles. Emphasis is placed on the identification and description of the structures, including the correlation of structure and function. Cadaveric specimens are used to aid the learning of these regions and their three-dimensional aspect, including the anatomical variation found in these regions.
Level: Undergraduate Level 2 subject
Pre-requisite(s): NATS 1013 OR
NATS 1001
Equivalent Subjects: NATS 2029 - The Appendicular Skeleton LGYA 5937 - The Appendicular Skeleton
Incompatible Subjects: BIOS 1015 - Functional Anatomy
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 2006 Approved Industrial Experience (0 Credit Points)
Subject Details (p. 4373) Legacy Code: 300655
This is a "Work Experience" subject, for which no student contribution fee is charged, nor will it consume Student Learning Entitlement (SLE). Students are required to obtain at least ten weeks, vocationally relevant, industrial experience during their course of study. The aim of this is to provide students with opportunities to apply theoretical concepts to real world situations, assisting their personal and professional development. Approved industrial experience aims to provide flexibility for students to pursue areas of interest and to assist in their selection of appropriate elective subjects in their program and to met the professional accreditation requirements as maybe required in your key program. Students are required to organise, formalise and validate at least ten weeks of university approved industry experience within an industrial, commercial or government situation during the course of their study.
Level: Undergraduate Level 2 subject
Equivalent Subjects: NATS 2007 - Approved Industrial Experience LGYB 8194 - Approved Industrial Experience
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 2008 Clinical Pharmacology (10 Credit Points)
Subject Details (p. 4373) Legacy Code: 400981
This subject explores in depth clinical pharmacology fundamental to the practice of allied health (Physiotherapy, Podiatric Medicine and Paramedicine) and complementary medicine (Traditional Chinese Medicine). General principles of pharmacology will be briefly discussed. This subject imparts detailed knowledge on the classification, mechanism of action, therapeutic effects, clinical applications and side effects of major drug classes acting on musculo-skeletal, nervous, cardiovascular, respiratory, gastrointestinal, endocrine, urinary and reproductive system diseases. In the context of antimicrobial pharmacology, general concepts of microbiology will be introduced offering students an understanding of the causative microorganisms, the complex relationship between host and pathogen, the pharmacological actions, mechanism of action, and clinical uses of antimicrobial drugs and the principles of infection control.
Level: Undergraduate Level 2 subject
Pre-requisite(s): NATS 2038 or NATS 2045
Equivalent Subjects: LGYA 7037 - Clinical Pharmacology and Microbiology
Incompatible Subjects: NATS 2026 - Pharmacology
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 2010 Crime Scene Investigation (10 Credit Points)
Subject Details (p. 4375) Legacy Code: 300873
A substantial amount of forensic evidence used in the prosecution of criminal cases is initially established at the crime scene. Recognising, detecting, recovering, preserving and recording this evidence forms a critical function within forensic science and criminal investigation. This subject introduces the student to a range of crime scene practices that provides the knowledge and skill to interpret a complex scene with voluminous detail, into a more specifically targeted range of forensic evidence items. This subject will explore aspects of crime scene investigation including; crime scene processes, recognition of evidence, documentation of crime scenes, evidence detection and enhancement, and maintaining evidence integrity. It also introduces professional practices associated with maintaining evidence integrity and continuity.
Level: Undergraduate Level 2 subject
Pre-requisite(s): NATS 1003
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 2015 Evidence and Crime Scene Management (10 Credit Points)
Subject Details (p. 4375) Legacy Code: 300935
Evidence and Crime Scene Management is a subject designed to provide students with an understanding and knowledge of critical principles associated with the management of evidence and sites considered as crime scenes. The subject is particularly designed for students wishing to enter professional domains involving; policing, nursing, animal welfare, workplace investigators, health inspectors, WHS officers, fire investigation, council and park rangers, social welfare, environmental protection, fraud and insurance investigation and others where the collection of evidence is a component of professional practice within the discipline. The subject covers topics such as; recognition of various evidence, the recording and documentation of evidence, crime scene or site photography, managing scenes, maintaining evidence integrity, sexual assault evidence, the reporting and presentation of evidence in court and others.
Level: Undergraduate Level 2 subject
Equivalent Subjects: NATS 2014 - Evidence and Crime Scene Management
Incompatible Subjects: NATS 2010 - Crime Scene Investigation
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 2019 Forensic and Environmental Analysis (10 Credit Points)
Subject Details (p. 4376) Legacy Code: 300843
This subject extends the student's knowledge and experience of analytical techniques by applying them to forensic investigations and analysis in the environmental and food sciences. It will provide an understanding of the chemical and physical principles underlying the use of instrumentation in chemical analysis. Topics include principles of spectroscopic techniques, separation methods; sample collection and storage; presumptive testing; modern chemical instrumentation for gas and liquid chromatography; atomic spectroscopy; mass spectroscopy; x-ray methods and spectroscopic methods.
Level: Undergraduate Level 2 subject
Pre-requisite(s): CHEM 1008 - Introductory Chemistry
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 2021 Imaging Science (10 Credit Points)
Subject Details (p. 4377) Legacy Code: 401171
Imaging science is a key area within the forensic sciences. This subject explores the application of imaging science and forensic photography practices to detect, preserve, enhance and examine forensic evidence. The subject focuses on optical and digital enhancement methods that provide essential non-destructive methods for evidence preservation and analysis. The subject provides the learner with necessary theoretical concepts of imaging science that underpin the practice of forensic photographic evidence.
Level: Undergraduate Level 2 subject
Pre-requisite(s): NATS 1003 - Digital Forensic Photography
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 2023 Integrated Science (10 Credit Points)
Subject Details (p. 4378) Legacy Code: 300931
Science and the scientific process of discovery have been successful in offering explanations for the world we live in. Due to scientific advances, we have eradicated some disease, explored the moon and the deepest parts of our oceans and created communication across distances on the planet previously unimaginable. We now face the major challenge of creating a future world which is sustainable for life on Earth. Solving our contemporary complex human and environmental issues to create a sustainable future, however, requires integrative and multidisciplinary research frameworks, an understanding of the relationship between science and society including cultural, social, economic and political and ethical factors. Students will critically examine such perspectives in a series of contemporary 'real-life' case studies such as climate change, medical breakthroughs, biodiversity loss, environmental sustainability and human-animal interactions. They will undertake research into the relationship of science integrated with society, and the uncertainty and bias of evidence in decision making.
Level: Undergraduate Level 2 subject
Equivalent Subjects: NATS 1011 - Integrated Science AGEN 2001 - Science in Society NATS 2024 - Integrated Science (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 2024 Integrated Science (WSTC) (10 Credit Points)
Subject Details (p. 4379) Legacy Code: 700096
Science and the scientific process of discovery have been successful in offering explanations for the world we live in. Due to scientific advances, we have eradicated some disease, explored the moon and the deepest parts of our oceans and created communication across distances on the planet previously unimaginable. We now face the major challenge of creating a future world which is sustainable for life on Earth. Solving our contemporary complex human and environmental issues to create a sustainable future, however, requires integrative and multidisciplinary research frameworks, an understanding of the relationship between science and society including cultural, social, economic, political and ethical factors. Students will critically examine such perspectives in a series of contemporary 'real-life' case studies such as climate change, indigenous health, medical breakthroughs, biodiversity loss, environmental sustainability and human-animal interactions. They will undertake research into the relationship of science integrated with society, and the uncertainty and bias of evidence in decision making. They will demonstrate their understanding by analysis of a contemporary issue by producing a scientific report and a powerpoint or video.

Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 2025 Natural Science Research Methods (10 Credit Points)
Subject Details (p. 4379) Legacy Code: 300932
This subject aims to introduce students to the theories and practices underpinning the scientific processes. Students will learn to identify an issue, review the literature to identify gap(s) and formulate a hypothesis or a question to address the gap(s). Students will then explore research methods and designs to safely and ethically conduct an experiment or study to collect data to answer the hypothesis/question. They will also learn to analyse and interpret the data and report on the findings of the research in a written format. The subject is structured so that lectures will provide theoretical expertise and workshops will reinforce student learning with practical experience. This knowledge and skills are essential for stage 3 subjects and a career in science.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYA 5920 - Research Communities and their Environments NATS 2028 - Research Methods LGYA 6151 - Animal Research
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 2027 Pharmacology (10 Credit Points)
Subject Details (p. 4380) Legacy Code: 300884
Pharmacology is the study of the therapeutic interactions of drugs with the human body, focusing on mechanisms of action at the biochemical and cellular level, on adverse reactions and on clinical applications. This subject provides students with a sound understanding of fundamental aspects of this field to prepare for further study of advanced pharmacology or other biomedical sciences. General principles of pharmacokinetics and pharmacodynamics, will be discussed in detail. The major drug categories that affect different organ systems will be addressed, and research methods in pharmacology and the drug development process will also be introduced.
Level: Undergraduate Level 2 subject
Pre-requisite(s): BIOS 1025 OR
BIOS 1026 OR
BIOS 1033 OR
BIOS 1033
Equivalent Subjects: NATS 2026 - Pharmacology

NATS 2031 Toxicology (10 Credit Points)
Subject Details (p. 4381) Legacy Code: 300877
Toxicology is the study of toxicants or poisonous substances: their nature, effects on the human body, and on human, animal and plant populations. Poisonous substances have been used by humans from antiquity for both beneficial and malevolent purposes and today a vast array of toxic industrial chemicals are produced. Both accidental (workplace and environmental) and intentional (forensic) exposure are covered, in terms of group properties, chronic and acute, toxicity, exposure potential, health impact and intervention are presented through forensic case studies. Students carry out a toxicology audit of an operation or premises of their choice.
Level: Undergraduate Level 2 subject
Equivalent Subjects: NATS 2030 - Toxicology
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 2032 Work Integrated Learning in Science (10 Credit Points)
Subject Details (p. 4382) Legacy Code: 301161
This subject will provide second and third year science students with an opportunity to undertake a short work placement within a professional organisation. The placement will allow students to observe and develop professional skills and behaviour and integrate theoretical and practical science knowledge and conventions into a real world setting. During the semester preceding the placement students need to complete three career preparation workshops run by Western Sydney University Careers and attend a Pre-Placement seminar run by the subject coordinator. These will aid students in finding their own placement. Prior to the placement, and in consultation with the subject coordinator and the workplace supervisor, students will develop a Professional Task to accomplish during the placement. The task will enhance their workplace skills and highlight how their science knowledge can be adapted and integrated into a professional career. The subject aims to promote greater engagement with career planning and progression and hence improve job readiness.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 2033 Cell Form and Function (10 Credit Points)
Subject Details (p. 4383) Legacy Code: 301267
This subject will develop a comprehensive understanding of eukaryotic cellular components, with an emphasis on animal cells. The subject will focus on distinct functions of organelles/cellular structures, the relevant mechanisms involved, and the broader role of such functions in a whole cell context. The subject will encompass a detailed study of cellular components including: the nucleus, ribosomes, the endoplasmic reticulum, the Golgi apparatus, lysosomes, the plasma and organellar membranes, mitochondria, peroxisomes and the cytoskeleton. This subject will also investigate how organellar function is relevant to an appropriately functioning cell, and how cell dysfunction impacts the cell and leads to disease. The subject covers contemporary techniques used to study cells including: cell culture, advanced cell imaging, a range of investigative and analysis techniques, and additional experimental approaches enabling thorough understanding of the incredibly fascinating yet complex nature of cells.
Level: Undergraduate Level 2 subject
Pre-requisite(s): BIOS 1012
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 2034 Human Systems Physiology 1 (10 Credit Points)
Subject Details (p. 4383) Legacy Code: 301269
This subject builds upon the core concepts and terminology introduced in Concepts in Physiology, focussing on the function of body organ systems, exploring the knowledge of how these organ systems are regulated, integrated, and function within the human body. The focus will be on the muscular, nervous, cardiovascular, respiratory and endocrine organ systems. Students will collect, interpret and analyse data to develop an understanding of the physiological responses of the human body.
Level: Undergraduate Level 2 subject
Pre-requisite(s): NATS 1009 - Human Anatomy and Physiology 1
Incompatible Subjects: BIOS 1025 - Introduction to Physiology BIOS1022 - Introduction to Human Biology
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 2035 Human Systems Physiology 2 (10 Credit Points)
Subject Details (p. 4384) Legacy Code: 301270
Human Systems Physiology 2 builds upon the core concepts and terminology introduced in Concepts in Physiology and Human Systems Physiology 1, focusing on the function of visceral organs and explore how these organ systems are regulated, integrated, and function within the human body. The focus will be on the lymphatic, immune, digestive, renal and reproductive systems. Students will collect, interpret and analyse data to develop an understanding of the physiological responses of the human body.
Level: Undergraduate Level 2 subject
Pre-requisite(s): NATS 1010 - Human Anatomy and Physiology 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 2036 Immunology (10 Credit Points)
Subject Details (p. 4385) Legacy Code: 301354
From 2020 this subject replaces 300847 - Immunology. This subject aims to provide students with an understanding of the structure and function of the immune system, and particularly highlights common and unique systems that exist across kingdoms and phyla. A foundation is built by examining the organs and cells of the human immune system. The peculiarities associated with the immune systems of marsupials, due to their early developmental stage at birth, will also be examined. Students will also develop laboratory expertise that involves immunological principles, investigative proficiency, and science communication skills, leading to understanding the knowledge base through self-learning and group work.
Level: Undergraduate Level 2 subject
Pre-requisite(s): BIOS 2014
Equivalent Subjects: LGYA 5863 - Immunology BIOS 2020 - Immunology
Incompatible Subjects: LGYA 5857 - Cell Signalling and Molecular Immunology
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 2037 Pathological Basis of Disease (10 Credit Points)
Subject Details (p. 4386) Legacy Code: 301356
From 2020 this subject replaces 300889 - Pathological Basis of Disease. Pathology is the study of disease. Students will gain an understanding of human pathogenesis, general and systems pathological processes, and the scientific basis of diagnostic and treatment options. The subject also introduces normal human tissue and organ histology, and examines histopathological changes evident in disease states.
Level: Undergraduate Level 2 subject
Pre-requisite(s): BIOS 1025
Equivalent Subjects: BIOS 2028 - Pathological Basis of Disease BIOS 2027 - Pathological Basis of Disease
Incompatible Subjects: BIOS 2029 - Pathophysiology 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 2038 Pathophysiology 1 (10 Credit Points)
Subject Details (p. 4386) Legacy Code: 401407
This subject is intended for students enrolled in Health and Medical Science courses and is designed to equip students with a detailed knowledge of pathophysiological processes evident in a number of key human diseases that are vocationally relevant to these students. The content is organised using a systems-based approach. Problem-based learning methods will be adopted in the tutorial component of this subject to help students develop crucial problem-solving skills.
Level: Undergraduate Level 2 subject
Pre-requisite(s): NATS 1010 - Human Anatomy and Psysiology 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 2039 Pathophysiology 2 (10 Credit Points)
Subject Details (p. 4387) Legacy Code: 401409
From 2020 this subject replaces 400267 - Pathophysiology. This subject extends the scope of topics explored in Pathophysiology 1 and is designed to equip students enrolled in health science courses of the School with detailed knowledge of pathophysiological processes evident in a number of key human diseases that are vocationally relevant to these students. Problem-based learning methods will be adopted in the tutorial component of this subject to help students develop crucial problem solving skills.
Level: Undergraduate Level 2 subject
Pre-requisite(s): NATS 2038 - Pathophysiology 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 2040 Physical Activity, Nutrition and Health (10 Credit Points)
Subject Details (p. 4388) Legacy Code: 401411
From 2020 this subject replaces 400892 - Physical Activity, Nutrition and Health. This subject examines the interdependence between physical activity, nutrition and health and the role of key lifestyle behaviours in improving health outcomes, longevity, and quality of life. Throughout this theoretical and practical subject, students explore personal and socio-cultural health issues, and identify how these health issues can be addressed in a proactive, holistic, and sustainable manner at an individual and population level.
Level: Undergraduate Level 2 subject
Equivalent Subjects: HLTH 1007 - Nutrition Physical Activity Mental Health HLTH 2019 - Physical Activity Nutrition and Health
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 2041 Experimental Foods (10 Credit Points)
Subject Details (p. 4389) Legacy Code: 301455
Developing innovative foods requires an understanding of food science and the principles that are applied when experimenting with food ingredients and processes. This subject will enable you to gain the scientific knowledge and methodology skills the food industry employs in the sustainable production of nutritious, healthy and appealing foods. Understanding the physical and chemical properties of, and current process techniques to produce different food types, will enable you to develop attributes required by the world's largest employment sector.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 2042 Science Research Methods (10 Credit Points)
Subject Details (p. 4389) Legacy Code: 301445
This subject aims to introduce you to the theories and practices underpinning scientific method. Through the course of the subject, you will develop analytical skills to quantify and interpret agricultural, zoological, and environmental data. You will use real-world issues, formulate an aim and research hypothesis and explore research methods and designs to conduct an experiment to test the hypothesis. You will also will be introduced to the types of biological variables, sources of measurement error, and the relationship between sample size and the conclusions that can be drawn from data; This subject enables you to develop skills in data analysis, interpretation and how to report on the findings of the research. The subject is structured so that lectures will provide theoretical expertise and workshops will reinforce your learning with practical experience preparing you for a career in science.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYA 5920 - Research Communities and their Environments NATS 2028 - Research Methods LGYA 6151 - Animal Research NATS 2025 - Natural Science Research Methods
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 2045 Introduction to Pharmacology
Subject Details (p. 4390)
This subject provides the fundamental knowledge in pharmacology required by students enrolled in the Pharmacology minor. The subject covers basic introduction to drugs, drug dosage forms and routes of drug administration, introducing students with fundamental principles and basic concepts of pharmacokinetics, pharmacodynamics, and understanding receptor theory of drug action. The subject covers the general principles of absorption, distribution, metabolism and excretion of drugs as well as the basic mechanisms of drug action at the biochemical and cellular levels on important drug targets. The subject also covers factors of individual variation to drugs, types of adverse drug reactions and types of drug interactions including common drug-drug and herb-drug interactions. The subject also introduces general concepts of neuropharmacology and neurohumoral transmission in the body.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3001 Advanced Immunology (10 Credit Points)
Subject Details (p. 4391) Legacy Code: 300905
The human immune system is a milieu of cells, cytokines, chemokines, growth factors and cell adhesion molecules which form an elaborate molecular communication network through a number of signalling networks and molecules. The relevance of this knowledge for understanding the pathology and specific diseases of the human immune system are emphasised through the subject. This subject also provides an in depth analysis of the molecular mechanisms of cell to cell communication, cell activation, the immunological synapse, transplant rejection (including adoptive transfer experimentation), antigen presentation, B and T cell recruitment and MHC restriction. Medical and diagnostic applications of hybridoma technology, antibody engineering and advances in vaccine development are discussed. The laboratory course will develop technical and interpretative skills in relevant techniques, in particular the ImmunoCAP technology for asthma and allergy diagnosis.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BIOS 2014
Equivalent Subjects: NATS 3033 - Molecular Biological of the Immune System
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3002 Advanced Medicinal Chemistry (10 Credit Points)
Subject Details (p. 4392) Legacy Code: 300891
Medicinal Chemistry is an interdisciplinary science that exists at the intersection of chemistry, pharmacology, physiology and human health. Students will explore the multidisciplinary nature and interconnectedness of medicinal chemistry through in-depth study of topics that relate medicinal chemistry to disciplines such as physiology, natural product science, biochemistry and pharmacology. It will also explore the expectations of a professional medicinal chemist.
Level: Undergraduate Level 3 subject
Pre-requisite(s): CHEM 1005
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3003 Advanced Mortuary Practice (10 Credit Points)
Subject Details (p. 4393) Legacy Code: 301128
This subject further develops skills in a forensic mortuary practice. Students will undertake a placement within a NSW Forensic and Analytical Science Service (FASS) facility or NSW Organ and Tissue Donation Service. This subject, together with completion of 301127 Mortuary Practice is essential for graduates of this course seeking employment as a forensic technician with FASS.
Level: Undergraduate Level 3 subject
Pre-requisite(s): MEDI 3008 - Mortuary Practice
Co-requisite(s): NATS 3006
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3004 Advanced Science Project C (10 Credit Points)
Subject Details (p. 4394) Legacy Code: 300910
This subject advances the students' training in thinking as a research scientist whilst developing practical skills in a particular area of interest. The student undertakes a minor research project under supervision, during which they plan how to answer a research problem, conduct research and present their findings in a research paper format and seminar.
Level: Undergraduate Level 3 subject
Pre-requisite(s): NATS 2002
Equivalent Subjects: LGYA 6169 - Advanced Science Research Project C
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3006 Anatomy of the Head and Neck (10 Credit Points)
Subject Details (p. 4395) Legacy Code: 300897
This subject builds on the systems anatomy taught during the first year, offering a regional study of the human head & neck. Emphasis is placed on the identification and description of the structures, including the correlation of structure and function. Cadaveric specimens are used to aid the learning of these regions and their three-dimensional aspect, including the anatomical variation found in these regions.
Level: Undergraduate Level 3 subject
Pre-requisite(s): NATS 1010 - Human Anatomy and Physiology 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3008 Complex Forensic Studies (10 Credit Points)
Subject Details (p. 4396) Legacy Code: 300911
This is an advanced and integrating capstone subject for students studying forensic science. It incorporates previous science, forensic science and social science subjects to form a comprehensive examination of the functionality of forensic evidence within the contemporary Australian judicial system. This capstone highlights the needs for an interdisciplinary approach to define and critique forensic science evidence from various perspectives including science, law, criminology, policing and social science. Students are required to use their skills and knowledge with additional independent research and inquiry using a range of set literature. The subject will study a range of contemporary issues including how the judicial system evaluates the reliability of evidence from an admissibility threshold, identification evidence from CCTV, contextual bias with forensic examination, contamination issues with forensic evidence and methods of expressing forensic findings and/or significance.
Level: Undergraduate Level 3 subject
Pre-requisite(s): NATS 3026 - Forensic Biology
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3009 Consumer Issues in Nutrition (10 Credit Points)
Subject Details (p. 4396) Legacy Code: 300928
This subject explores current food and nutrition issues. It introduces students to the factors that influence public health nutrition and explores (a) the contribution food systems and food security makes to consumer wellbeing; (b) the changing global marketplace and the impact of globalisation on food security and ecological sustainability; and (c) the complex inter-connections between government policy, globalisation, consumerism and human health. Students will assess nutritional status from available data and explore the role of community food systems. Students will also be introduced to social research methods and plan a social research study to address a nutrition related issue.
Level: Undergraduate Level 3 subject
Equivalent Subjects: NATS 2009 - Consumer Issues in Nutrition
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3010 Culinary Science (10 Credit Points)
Subject Details (p. 4397) Legacy Code: 300871
This subject applies scientific principles to the development, preparation and presentation of food products. Students are encouraged to become autonomous learners through problem-solving activities and experiential techniques. Students integrate and apply knowledge and skills from areas such as chemistry, biology, food science and nutrition to nutritionally focussed food products. Students are encouraged to keep abreast of food trends in the dynamic food industry as well as current nutritional issues within domestic, multicultural and indigenous communities. Students will utilise prior knowledge and skills to address specific nutritional issues and the development of new food products to fit within these boundaries.
Level: Undergraduate Level 3 subject
Pre-requisite(s): NATS 3014
Equivalent Subjects: NATS 3011 - Culinary Science LGYA 6198 - Culinary Studies
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3012 Environmental Forensic Investigations (10 Credit Points)
Subject Details (p. 4398) Legacy Code: 300981
This subject examines the forensic processes required to conduct investigations into environmental crime and incidents. The subject extends the student's knowledge and understanding of forensic science concepts to environmental scenarios, including illegal dumping, spills and water pollution incidents. The subject will discuss how scenes are investigated, what methods and techniques are used to analyse environmental samples, and how the results are interpreted and presented in the NSW Land and Environment Court. Factors effecting the collection, analysis and interpretation of evidence, such as weathering, are also discussed, as these are crucial to understand the scenes and to correctly present evidence in court.
Level: Undergraduate Level 3 subject
Pre-requisite(s): NATS 2019 - Forensic and Environmental Analysis
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3014 Experimental Foods (10 Credit Points)
Subject Details (p. 4399) Legacy Code: 300879
This subject aims to build on students' knowledge of food preparation gained in Food Science 1 and 2, the focus of this subject includes; food science and principles, the interaction of ingredients and the added effects of physical procedures on the end product. Students develop advanced scientific methodologies to give reproducibility. This is a recommended subject for those intending to advance in the areas of recipe development and new product development.
Level: Undergraduate Level 3 subject
Pre-requisite(s): PROC 2002 - Innovative Foods
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3015 Field Project 1 (10 Credit Points)
Subject Details (p. 4399) Legacy Code: 300913
Subject NATS 3015 Field Project 1 and the associated subject NATS 3017 Field Project 2 are designed as capstone subjects of study for either the Bachelor of Science or Bachelor of Natural Science degrees. They draw together the skills acquired in previous years of the course and apply them in the context of either a six-month or a year-long research project exploring a real world problem on behalf of an industry, government or community agency client. The student will develop skills in scoping, planning, implementing, reporting on the research project; reflecting on what has been learned in the context of their personal and professional development and how this can be used in future career planning. In this Field Project 1 subject the focus is on developing skills in designing an appropriate research project in collaboration with the industry client, contextualising the problem and appropriate research methods in the academic literature, developing and implementing a pilot study to test the proposed research methods, and reporting the results. Note: Students enrolling in the external offering of this subject must be externally enrolled in either the Bachelor of Science (Environmental Health) or Bachelor of Natural Science (Environment and Health) degrees. All other students enrolling externally will need Subject Coordinator approval.
Level: Undergraduate Level 3 subject
Equivalent Subjects: NATS 3016 - Field Project 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3017 Field Project 2 (10 Credit Points)
Subject Details (p. 4400) Legacy Code: 300914
Field Project 2 allows the student to extend the research project undertaken as the pilot study in Field Project 1. Note: Students enrolling in the external offering of this subject must be externally enrolled in either the Bachelor of Science (Environmental Health) or Bachelor of Natural Science (Environment and Health) degrees. All other students enrolling externally will need Subject Coordinator approval. Students who completed the Field Project 1 Subject in a previous year (i.e. are not continuing directly into this unit) will need to demonstrate that they have the data from this earlier Subject that can be used to produce an analysis and a report for their original client.
Level: Undergraduate Level 3 subject
Pre-requisite(s): NATS 3015
Equivalent Subjects: NATS 3018 - Field Project 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3020 Food Safety (10 Credit Points)
Subject Details (p. 4400) Legacy Code: 300859
Food safety is rapidly evolving with the emergence of new foodborne diseases, changing disease patterns, evolving approaches to risk analysis and an emerging requirement that food producers, processors, handlers and consumers take shared responsibility for food safety. This subject aims to equip students with the necessary skills to identify, evaluate and control foodborne hazards in order to protect the safety and quality of the food supply and reduce associated risks to human health. Content includes the key elements of food safety and regulation, food contamination, food spoilage agents, foodborne hazards, principles of good hygienic practice and preservation in food production, preparation and distribution.
Level: Undergraduate Level 3 subject
Equivalent Subjects: NATS 3021 - Food Safety
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3023 Forensic Anthropology (10 Credit Points)
Subject Details (p. 4401) Legacy Code: 301120
The objectives of this subject are to gain an understanding of the changes to the human body from death to discovery and how we can use the biological variability of humans to assist in the identification of human remains. Students will learn the fundamentals of detection, excavation and identification of human and non-human remains and learn how to prepare their findings for court. Students will be required to apply the knowledge gained during lectures to a practical based excavation, analysis and preparation of a case file.
Level: Undergraduate Level 3 subject
Pre-requisite(s): NATS 1008 - Forensic Science
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3026 Forensic Biology (10 Credit Points)
Subject Details (p. 4402) Legacy Code: 401170
This subject is designed to extend your knowledge and understanding regarding forensic biology and its relevance to forensic investigations. You will gain experience and understanding regarding the recognition and collection of biologically relevant evidence (including blood, semen and saliva), through to the application of presumptive testing, confirmatory testing, DNA profiling methods and evidence reporting. There is a focus on front-end forensic biology work (item examination, presumptive testing, DNA recovery via swabbing and isolation of biological material) coupled with a theoretical understanding of the scientific principles that underpin current DNA analysis techniques, presumptive tests and DNA profiling results.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BIOS 2018
Equivalent Subjects: NATS 2017 - Forensic Analysis of Physical Evidence BIOS 3017 - Invertebrate Biology
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3027 Laboratory Quality Management (10 Credit Points)
Subject Details (p. 4403) Legacy Code: 300883
This capstone subject is directed towards the accreditation of a laboratory for chemical, microbiological or forensic testing, using the standards that are applicable in industry. The subject focuses upon the importance and coordination of good laboratory management, teamwork, calibration, record keeping and laboratory manuals. Groups of students are required to develop, establish and operate a comprehensive Laboratory Quality Management system designed for a specific class of chemical, microbiological or forensic test. The students' technical competence and quality system are then assessed using the guidelines laid down by the National Association of Testing Authorities (NATA).
Level: Undergraduate Level 3 subject
Equivalent Subjects: NATS 3029 - Laboratory Quality Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3030 Medical Microbiology (10 Credit Points)
Subject Details (p. 4404) Legacy Code: 300826
Infectious diseases worldwide are the most common cause of illness. Medical microbiology is subdivided into four areas: virology, bacteriology, mycology (the study of fungi) and parasitology. The rapid evolution of microbes means that this is an area that does not remain static. This subject has a modern approach to the study of the balance between the host, humans, and the very large army of potential invaders. Students will embark on a journey into the world of pathogenic micro-organisms exploring the molecular mechanisms by which these override host defences leading to disease. Infectious diseases of the human body systems as well those of the immunocompromised and infections contracted in the healthcare setting (nosocomial) are discussed. The theory will be supported with laboratory experience representing diagnostic procedures for the identification of infectious agents.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BIOS 2022
Equivalent Subjects: LGYA 5866 - Medical Microbiology NATS 3031 - Medical Microbiology
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3032 Medical Science Project (10 Credit Points)
Subject Details (p. 4405) Legacy Code: 300892
Students will undertake a short research project specific to the field of Medical Science. This will involve undertaking a review of the literature and generating appropriate hypotheses that will subsequently be tested and analysed. Findings will be presented orally and as a written manuscript.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 6140 - Biomolecular Science Project NATS 3039 Science Research Project
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3034 Molecular Medicine (10 Credit Points)
Subject Details (p. 4405) Legacy Code: 300927
Molecular Medicine is an inquiry based capstone subject that integrates core concepts in molecular and cell biology with a focus on cancer as a framework to discuss autoimmune, infectious and genetic diseases. This subject aims to enhance critical thinking for the professional environment and prepares students for future innovations in prevention, management and cure of catastrophic diseases. Current research, diagnosis, treatment and policy issues, related to health and disease states, are placed in the context of real world experiences and changing imperatives.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 6144 - Molecular Basis of Disease LGYA 6012 - Mamalian Molecular Medicine
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3035 Molecular Pharmacokinetics (10 Credit Points)
Subject Details (p. 4406) Legacy Code: 300912
Molecular Pharmacokinetics builds on the fundamental chemical kinetic principles learnt in Physical Chemistry and extends them to the study of absorption, distribution, metabolism, and elimination of pharmaceutical drugs in human body. Upon completing this unit, students will gain a firm understanding of why the pharmacokinetic behaviour of a drug can be fully described by two key pharmacokinetic parameters (i.e. clearance and volume of distribution) and why the absorption rate of a drug can be predicted by examining its chemical structural features alone. Students will also gain the capability of designing dosage regimens for simplified pharmacokinetic scenarios and extracting important kinetic information from plasma drug concentration versus time data obtained experimentally.
Level: Undergraduate Level 3 subject
Pre-requisite(s): CHEM 2010
Equivalent Subjects: LGYA 6080 - Molecular Pharmacokinetics
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3037 Neuroanatomy (10 Credit Points)
Subject Details (p. 4407) Legacy Code: 300754
This subject builds on the human anatomy and physiology studied in first and second year, equipping students with detailed knowledge of functional neuroanatomy, with particular emphasis on the central nervous system. Cadaver specimens are used to facilitate the learning of spatial relationships between structures. The study of neurological function and dysfunction integrates many previously learned scientific principles.
Level: Undergraduate Level 3 subject
Pre-requisite(s): NATS 1009 Human Anatomy and Physiology 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3038 Quality Assurance and Food Analysis (10 Credit Points)
Subject Details (p. 4408) Legacy Code: 300922
This subject covers the knowledge and tools required to maintain food quality. Students will develop an awareness of food laws, regulations and codes at the state, national and international levels. Students will be introduced to elementary toxicology and risk analysis as it applies to the regulation of food additives. The subject also integrates previous studies in HACCP (Hazard Analysis Critical Control Point) to develop deeper understanding of food quality assurance and quality management systems as they are applied to the control and management of the food supply. Students are introduced to the standard methods of analysis of foods as used for nutritional and quality assessment of foods. Practicals include determination of major and minor food components; functionality tests and sensory analysis of foods.
Level: Undergraduate Level 3 subject
Pre-requisite(s): PROC 2002 - Innovative Foods
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3039 Science Research Project (10 Credit Points)
Subject Details (p. 4409) Legacy Code: 300924
Science Research Project is a final-year capstone subject that gives students an introduction to scientific research, while extending their knowledge and practical skills. Each student undertakes a research project supervised by an academic staff member. With the assistance of their supervisor, students will research the literature and define the problem to be studied, carry out a risk assessment, develop the appropriate experimental methods, carry out research on their project, and present a final written report and a poster or oral presentation. This subject offers a challenge to final-year students, and allows innovation by the student with respect to both method and research direction.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 6252 - Science Research Project
Incompatible Subjects: LGYA 6201 - Science Research Project 2 LGYA 5927 - Chemistry Project 3 LGYB 9720 - Biological Science Project 3 LGYA 3545 - Chemistry Project LGYA 6140 - Biomolecular Science Project
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3040 Topics in Medical Science (10 Credit Points)
Subject Details (p. 4409) Legacy Code: 300893
This subject builds on the content and concepts developed across multiple discipline areas during the Bachelor of Medical Science, integrating them together into the context of human health and disease. Students will work in groups to undertake an in depth exploration of an issue related to Medical Science. Topics addressed each year will vary, and will include issues currently at the forefront of Medical Science, issues for which there is currently significant scientific debate, and issues in which students have expressed a particular personal interest.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3041 Topics in Physiology (10 Credit Points)
Subject Details (p. 4410) Legacy Code: 300819
This subject builds on the physiological concepts of "Introduction to Physiology". It provides a greater depth and breadth of understanding of aspects of whole-body physiology which are explored in group work. Topics may include, but are not limited to, locomotion, physiology of reproductive technology, physiology of interaction between humans, physiology under extreme conditions (including pathophysiology), physiology of learning and memory, sleep physiology, animal physiology, nutritional physiology and others.
Level: Undergraduate Level 3 subject
Pre-requisite(s): BIOS 1025 OR
BIOS 2006 OR
BIOS 3002
Equivalent Subjects: NATS 3042 - Topics in Physiology
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3043 Advanced Science Research Project C (20 Credit Points)
Subject Details (p. 4411) Legacy Code: 301258
This is a 20 credit point year-long subject taken over two terms (10 credit points in each term). This subject provides a unique opportunity for Advanced Science and Advanced Medical Science students to work with and be mentored by academics in diverse areas of science. In this 20 credit point subject, students will complete a small research project aligned with the research activity of the academic and be integrated into the research environment of the School. Students will demonstrate time management skills, project design, data collection, analysis and communication. Students will be required to reflect on their capacity and areas of passion for transitioning into either further education or the workplace. Please note this subject is not timetabled so completion will be subject to approved timelines negotiated with the appropriate academic staff and subject co-ordinator. Students may be required to travel to a different campus or location to undertake this subject.
Level: Undergraduate Level 3 subject
Incompatible Subjects: NATS 3004 - Advanced Science Project C
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3044 Complex Case Studies in Science (10 Credit Points)
Subject Details (p. 4412) Legacy Code: 301261
Science and the scientific process of discovery have been successful in offering explanations for the world we live in. Even seemingly simple problems can disguise a far greater degree of complexity. Indeed, the more we develop our tools for scientific discovery the greater the degree of complexity that is revealed. Exploring and unravelling the complexity of the world we live in requires integrative and multidisciplinary research frameworks, and it can be complicated further by the relationship between science and society, culturally, socially, economically and politically. In this subject we will begin the life-long journey to develop the enquiring scientific mind by exploring the complexities of seemingly innocuous everyday elements. Students will critically examine such perspectives in a series of contemporary 'real-life' case studies such as foods and food security, medicines and drugs.
Level: Undergraduate Level 3 subject
Incompatible Subjects: NATS 2023 Integrated Science
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3045 Work Internship for Science Professionals (10 Credit Points)
Subject Details (p. 4413) Legacy Code: 301259
This subject will provide second and third year science students with an opportunity to undertake a short work placement within a professional organisation. The placement will allow students to observe and develop professional skills and behaviour and integrate theoretical and practical science knowledge and conventions into a real world setting. Students will find their own placement but may be aided by the Subject Coordinator. In consultation with the Subject Coordinator and the workplace supervisor, students will develop a Professional Task to accomplish during their placement. The Professional Task will enhance their workplace skills and highlight how their science knowledge can be adapted and integrated into a professional career. The subject will assure that students have job readiness. Students may need to travel to other campuses or locations to complete this subject.
Level: Undergraduate Level 3 subject
Equivalent Subjects: NATS 2032 Work Integrated Learning in Science
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3046 Advanced Physiology (10 Credit Points)
Subject Details (p. 4414) Legacy Code: 301355
From 2020 this subject replaces 300851 - Advanced Physiology. Physiology is the study of the way in which a living organism and its bodily parts function. This subject will examine integrative aspects of physiological control mechanisms comprising multiple organ systems and mechanisms of adaptation to environmental factors. It will focus on regulatory function of ion channels, neurophysiology, sensory physiology, motor control, metabolism, cardiovascular and respiratory systems. Students will have the opportunity to independently research, in depth, an area of physiology pertinent to their interest.
Level: Undergraduate Level 3 subject
Pre-requisite(s): NATS 2034 - Human Systems Physiology 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3047 Applied Physiology (10 Credit Points)
Subject Details (p. 4414) Legacy Code: 401412
From 2020 this subject replaces 401146 - Applied Physiology. This subject focuses on the application of exercise physiology in sporting and physically demanding occupation contexts. Concepts covered include: muscular fatigue, soreness & recovery, General Adaption Syndrome Theory, testing, training and periodisation in an individualised approach to the client. Students will develop skills to appropriately: select, justify perform and evaluate a number of laboratory, field and functional tests; analyse, interpret and communicate test results; prepare, justify, implement and evaluate individualised training and recovery plans (long and short term); incorporate other sport and exercise science sub-disciplines into plans and appropriately adjust plans for environmental challenges.
Level: Undergraduate Level 3 subject
Pre-requisite(s): HLTH 2005 AND
HLTH 2004 AND
BIOS 2012
Equivalent Subjects: BIOS 3022 - Sport Physiology BIOS 3003 - Advanced Sport Physiology BIOS 3008 - Applied Physiology
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3048 Food Formulations (10 Credit Points)
Subject Details (p. 4416) Legacy Code: 301453
This subject applies scientific principles to the development, preparation and presentation of food products. You will be encouraged to become autonomous learners through problem-solving activities and experiential techniques. You will integrate and apply knowledge and skills from areas such as chemistry, biology, food science and nutrition to nutritionally focussed food products. You will also be encouraged to keep abreast of food trends in the dynamic food industry as well as current nutritional issues within domestic, multicultural and indigenous communities. Students will utilise prior knowledge and skills to address specific nutritional issues and the development of new food products to fit within these boundaries.
Level: Undergraduate Level 3 subject
Equivalent Subjects: NATS 3011 - Culinary Science LGYA 6198 - Culinary Studies NATS 3010 - Culinary Science
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3051 Innovation in Design and Delivery (10 Credit Points)
Subject Details (p. 4417)
What is innovation? Innovation can be thought of as the application of existing knowledge or processes to solve a problem. Innovation requires an interdisciplinary approach to problem solving, encompassing discipline-specific knowledge, as well as an awareness of social, economic, and environmental factors. You will work as part of a team to use existing data or processes to deliver an innovative solution to a problem. In this subject you will develop important job-ready skills to translate ideas into outcomes.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3053 Crime Scene Investigation (10 Credit Points)
Subject Details (p. 4417)
A substantial amount of forensic evidence used in the prosecution of criminal cases is derived from crime scenes. It is therefore critical that forensic practitioners understand appropriate crime scene investigation procedures for dealing with forensic evidence at the scene, and that they can apply these procedures in a practical manner during investigations. This subject will explore the practical aspects of crime scene investigation including scene preservation and documentation, scene searching and detection of forensic evidence as well as evidence enhancement and collection. Professional practices for maintaining evidence integrity and continuity will also be implemented. In additional to the practical components of this subject, a range of specialised crime scene investigation sub-disciplines will also be discussed along with crime scene legislation and the role of the crime scene investigator in court.
Level: Undergraduate Level 3 subject
Pre-requisite(s): NATS 1003
Equivalent Subjects: NATS 2010
Incompatible Subjects: NATS 2014
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3054 Human Systems Physiology 2 (10 Credit Points)
Subject Details (p. 4418)
Human Systems Physiology 2 builds upon the physiological concepts and terminology introduced in level 1 and level 2 physiology subjects. The focus of this subject is on the function and regulation of the renal, lymphatic, immune, digestive, hepatic, and reproductive systems, and their physiological integration with other organ systems and processes within the body. This subject emphasises how visceral organ system function and integration is essential for maintaining homeostasis within the human body. The integrative physiology of the visceral organ systems is explored through problem-based learning activities assuring application of critical analysis and effective oral and written communication.
Level: Undergraduate Level 3 subject
Pre-requisite(s): NATS1010
Equivalent Subjects: NATS2035
Incompatible Subjects: BIOS1025
BIOS1022
BIOS 1022
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3055 Practicum 1 (10 Credit Points)
Subject Details (p. 4419)
Practicum 1 will develop your job-readiness in areas of practical skills, problem solving, critical thinking, and teamwork. Working in real-world situations you will apply your knowledge of theory, experimental design, methodology, and analysis, in your discipline area to solving defined problems. The subject will provide you with the opportunity to initially discuss and plan methods to solve a defined problem, and then using laboratory experiments, fieldwork, or other activities relevant to professional practice, to test your approach to the problem.
Level: Undergraduate Level 3 subject
Pre-requisite(s): NATS 3044
OR NATS 3045
Equivalent Subjects: NATS 3015
NATS 3040
BIOS 3012
NATS 3027
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3056 Practicum 2 (10 Credit Points)
Subject Details (p. 4420)
In this subject you will build on the skills you developed in Practicum 1 to solve a defined problem. In Practicum 2 you will be expected design and deliver solutions to a complex problem using methodologies and data analysis approaches applicable to your area of professional practice. As this subject has a strong focus on job-ready skills, the reporting of outcomes of the project will include writing and presentation of a professional report and completing a resume of your skills and abilities.
Level: Undergraduate Level 3 subject
Pre-requisite(s): NATS 3055
Equivalent Subjects: NATS 3017
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3057 Topics in Pharmacology (10 Credit Points)
Subject Details (p. 4420)
This subject builds on basic pharmacological principles and concepts, extending to advanced pharmacokinetics in the study of absorption, distribution, metabolism, and elimination (ADME) of pharmaceutical drugs in human body. Students will understand the processes of bioavailability and bioequivalence testing of generic and innovator drugs. This subject also covers the drug development process including stages of drug discovery, preclinical development, clinical development, drug approval and post-market drug safety monitoring., Phases of clinical development, types and design of clinical trials, drug regulatory and pharmacovigilance procedures will be introduced. This subject will also investigate the research methods used in pharmacological enquiry and investigate the cellular signalling pathways targeted by different life-saving drugs. Pharmacogenetics, genetic polymorphism and its impact on drug metabolism and precision medicine will be covered. Drug toxicity and drug-induced organ toxicity will also be discussed. Practical classes and computer simulations will support the key concepts taught in this subject.
Level: Undergraduate Level 3 subject
Pre-requisite(s): NATS 2045
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 3058 Pharmacological Chemistry (10 Credit Points)
Subject Details (p. 4421)
This interdisciplinary subject covers the principles of medicinal chemistry, which combines chemistry, physiology, biochemistry, and pharmacology. The subject focuses on the principles of medicinal chemistry and aims to provide students with an understanding of the relationships between atomic interactions and molecular structure to biomolecular targets and quantitative structure-activity relationships of drugs. Through the exploration of lead compounds design and discovery strategies, chemical synthesis, structure-activity relationship analysis, and in silico-aided methods, students will gain an understanding of the principles of drug design. The subject also emphasises on selected topics of medicinal chemistry including anti-microbial and chemotherapeutic agents to understand and explore their chemistry and structure-activity relationships. Practical experience in compound isolation, synthesis, purification, and characterization is also provided, allowing students to gain hands-on knowledge of the dynamic field of medicinal chemistry.
Level: Undergraduate Level 3 subject
Pre-requisite(s): CHEM 1012
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 5001 Crime Scene Investigation (PG) (10 Credit Points)
Subject Details (p. 4422)
A substantial amount of forensic evidence used in the prosecution of criminal cases is initially established at the crime scene. Recognising, detecting, recovering, preserving, and recording this evidence forms a critical function within forensic science and criminal investigation. This subject explores the main aspects of crime scene investigation, including: crime scene processes, recognition of evidence, documentation of crime scenes, evidence detection and enhancement, maintaining evidence integrity, and bloodstain pattern analysis. It also covers professional practices associated with evidence handling and case file management.
Level: Postgraduate Coursework Level 5 subject
Equivalent Subjects: NATS7006 Crime Scene Investigation (PG)
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 6001 Introduction to Neuroscience (10 Credit Points)
Subject Details (p. 4422) Legacy Code: 401471
This subject is an introduction to the nervous system with a focus on its role and the function. It provides a strong foundation in modern neuroscience for those wishing to apply the principles of sensory and motor system function with the aim of mimicking human biology via neuromorphic implementations. Students will have access to expertise from a multidisciplinary team, guiding their learning in the areas of cellular, computational, behavioural and biomedical neuroscience. Topics covered in the subject will include introductory biology, structure and function of the nervous system, computational modelling, bio-signal acquisition and signal processing. This subject will be undertaken at Parramatta City - Hassall St campus.
Level: Postgraduate Coursework Level 6 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7001 Advanced Criminalistics (10 Credit Points)
Subject Details (p. 4423) Legacy Code: 301151
This subject is designed to provide an in-depth knowledge of the following eight evidence categories: glass, textile fibres, paint, fire debris, explosives, firearm discharge residues, illicit drugs, and hair. Each stand-alone module introduces the evidence type and its forensic significance, details the relevant distinguishing and discriminating characteristics for the trace material in question, presents the analytical techniques commonly applied in the criminalistics laboratory, and discusses data interpretation and evidential value. The subject is unique in terms of its coverage of these trace evidence categories from an operational forensic science perspective.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): None
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7002 Biological Agents 1 (10 Credit Points)
Subject Details (p. 4424) Legacy Code: 301154
This subject introduces students to the key concepts involved in Biosecurity and Microbial Forensics, with a focus on understanding the types of biological agents that pose potential security risks and the system and practices involved in investigation and management of potential threats.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7003 Biological Agents 2 (10 Credit Points)
Subject Details (p. 4424) Legacy Code: 301155
This subject builds on the knowledge gained in the Biological Agents 1 and develops students' understanding of the tools and processes involved in the field of biosecurity. This subject is taught by the University of Canberra as part of a collaborative venture between the University of Canberra and Western Sydney University. Note: Further information on this subject is available from the University of Canberra.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7004 Blood Distribution and Spatter (10 Credit Points)
Subject Details (p. 4425) Legacy Code: 301149
This subject will provide an in-depth review of the principles of blood spatter creation, and blood stain interpretation as it pertains to biological evidence. This subject is taught by the University of Florida as part of a collaborative venture between the University of Florida and Western Sydney University. Note: Further information on this subject is available from the University of Florida.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7005 Chinese Medicine Specialities 1 (10 Credit Points)
Subject Details (p. 4426) Legacy Code: 400687
This subject will enable practitioners to extend their understanding of the Traditional Chinese Medicine (TCM) diagnosis and management of a range of gastrointestinal and paediatric disorders. A feature of this subject is the integration of TCM and western medical approaches. Treatment will focus on acupuncture with common patent Chinese herbal medicine treatments included.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7006 Crime Scene Investigation (PG) (10 Credit Points)
Subject Details (p. 4427) Legacy Code: 301131
A substantial amount of forensic evidence used in the prosecution of criminal cases is initially established at the crime scene. Recognising, detecting, recovering, preserving and recording this evidence forms a critical function within forensic science and criminal investigation. This subject explores the main aspects of crime scene investigation, including: crime scene processes, recognition of evidence, documentation of crime scenes, evidence detection and enhancement, maintaining evidence integrity, and bloodstain pattern analysis. It also covers professional practices associated with evidence handling and case file management.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7007 Drug Biotransformation and Molecular Mechanisms of Toxicity (10 Credit Points)
Subject Details (p. 4427) Legacy Code: 301139
This subject provides a strong conceptual foundation of enzymology and mechanisms of drug biotransformation pathways. As a foundation for learning we will provide examples of drugs and other xenobiotics that exhibit toxicity related to biotransformation. This subject is taught by the University of Florida as part of a collaborative venture between the University of Florida and Western Sydney University. Note: Further information on this subject is available from the University of Florida.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): NATS 7030
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7008 Environmental Forensics 1 (10 Credit Points)
Subject Details (p. 4428) Legacy Code: 301152
The subject is designed for professionals working in environmental regulatory authorities and laboratories at the federal, state or local level. This includes but is not limited to police jurisdictions, environmental protection agencies (EPAs), coastguards, park rangers, customs and quarantine officials. It is designed to give the environment law enforcement officer a background in the principles of contaminant analysis and transport in the environment with the ultimate aim of determining liability for pollution. The syllabus includes the main modes of contaminant transport in air, water and land, as well as an in-depth look at hydrocarbon fingerprinting.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7009 Environmental Forensics 2 (10 Credit Points)
Subject Details (p. 4429) Legacy Code: 301153
The subject is designed for professionals working in environmental regulatory authorities and laboratories at the federal, state or local level. This includes but is not limited to police jurisdictions, environmental protection agencies (EPAs), coastguards, park rangers, customs and quarantine officials. The subject consists of four case studies drawn from real-world scenarios. The skills and knowledge gained from Environmental Forensics 1 will be used to produce environmental forensic reports related to the case studies. The assessment is problem-based.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): NATS 7008
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7011 Experimental Design and Analysis PG A (20 Credit Points)
Subject Details (p. 4429) Legacy Code: 401266
Experimental Design and Analysis can be taken independently or in combination in Autumn (Experimental Design and Analysis PG A) and/or Spring (Experimental Design and Analysis PG B) semesters. Working closely with their assigned supervisor(s), students in the health, medical, biomedical and natural sciences will enhance their expertise in experimental methodologies and knowledge of advanced discipline-specific concepts in the first year of the Masters of Research. Completion of one these two units will allow students to demonstrate theoretical and practical skills directly relevant to their proposed research project. Completion of both units will allow students to build upon initial results, and to gain experience in additional methodologies and experimental techniques. These units will also complement the Master of Research core units Research Design 1 and 2, providing a foundation for students to formulate their research question and thesis proposal.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: NATS 7010 - Experimental Design and Analysis PG NOTE Co-Requisite units removed from Spring 2021
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7012 Experimental Design and Analysis PG B (20 Credit Points)
Subject Details (p. 4430) Legacy Code: 401267
Experimental Design and Analysis can be taken independently or in combination in Autumn (Experimental Design and Analysis PG A) and/or Spring (Experimental Design and Analysis PG B) semesters. Working closely with their assigned supervisor(s), students in the health, medical, biomedical and natural sciences will enhance their expertise in experimental methodologies and knowledge of advanced discipline-specific concepts in the first year of the Masters of Research. Completion of one these two units will allow students to demonstrate theoretical and practical skills directly relevant to their proposed research project. Completion of both units will allow students to build upon initial results, and to gain experience in additional methodologies and experimental techniques. These units will also complement the Master of Research core units Research Design 1 and 2, providing a foundation for students to formulate their research question and thesis proposal.
Level: Postgraduate Coursework Level 7 subject
Incompatible Subjects: NATS 7010 - Experimental Design and Analysis PG NOTE Co-Requisite units removed from Spring 2021
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7013 Explosives (10 Credit Points)
Subject Details (p. 4431) Legacy Code: 301156
The subject provides information on the range of explosive compounds that may be encountered in incidents involving national security. It also covers improvised explosive devices, security screening applications, bomb scene management, and the forensic recovery and analysis of explosive residues. The subject concludes with case studies designed to illustrate the concepts covered in the preceding modules.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7014 Fingerprint Detection and Identification (10 Credit Points)
Subject Details (p. 4432) Legacy Code: 301132
This subject aims to provide the student with a detailed understanding of the scientific methodologies applied to the detection, enhancement and identification of fingerprint evidence in a forensic context. The detection methods presented cover all of the current optical, physical and chemical techniques, as well as an insight into new approaches that are likely to have an impact over the next decade. The generally-accepted ACE-V methodology for fingerprint identification is discussed, together with the application of Bayesian statistics that has gained momentum as a preferred assessment method for this form of forensic evidence.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7015 Food Evaluation (10 Credit Points)
Subject Details (p. 4433) Legacy Code: 301181
This subject aims to provide students with the knowledge and skills required to evaluate food quality and safety. Students are introduced to contemporary methods of analysis of foods as used for nutritional, quality and safety assessment. Practical work includes determination of major and minor food components; physical and functionality tests; sensory assessment and microbiological analysis of foods.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7016 Food Preservation and Packaging Technologies (10 Credit Points)
Subject Details (p. 4433) Legacy Code: 301180
The objective of this subject is to provide students with an understanding of food preservation and food packaging technologies. Contemporary physical and chemical food preservation technologies will be examined, including chilling, freezing, thermal processing, fermentation, dehydration, chemical agents and novel non-thermal techniques. The chemical, physical, functional and nutritional properties of food commodities will also be examined, providing a scientific context for food quality, safety and nutrition. Students will study packaging materials science to be able to select the most appropriate packaging solutions for a range of food applications.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7017 Food Product Design (10 Credit Points)
Subject Details (p. 4434) Legacy Code: 301183
This subject introduces students to theories and practices underpinning new product development, including idea generation, market research and product lifecycles. Students will apply emerging technologies, new ingredients and other innovative concepts relating to food preservation and food evaluation to research and develop new food products. Students will work on formulation design, assessment of ingredient and additive functions, effects of processing, optimization of quality and acceptability of foods. They will assess product packaging and storage stability, along with developing a food safety plan. They will also produce a final product specification and labelling requirements compliant with current food regulations.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): None
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7018 Food Quality Management (10 Credit Points)
Subject Details (p. 4435) Legacy Code: 301182
This subject introduces students to food quality management principles and their application in ensuring product quality and safety. Students will learn to develop, evaluate and audit food safety programs based on Hazard Analysis and Critical Control Point and total quality management systems. Students will also examine statistical process control, food laws, regulations and codes at the state, national and international levels, as well as the application of scientific risk assessment to the development of food regulations.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): NATS 7016
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7019 Forensic Analysis of DNA (10 Credit Points)
Subject Details (p. 4436) Legacy Code: 301148
This subject will introduce students to the identification and evaluation of biological evidence in criminal matters using DNA technologies, including the methods routinely used for the isolation of DNA from cells and techniques applied to DNA quantitation, electrophoretic separation, sequence determination, as well as data interpretation, analysis and reporting. This subject is taught by the University of Florida as part of a collaborative venture between the University of Florida and Western Sydney University. Note: Further information on this subject is available from the University of Florida.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7020 Forensic Anthropology (PG) (10 Credit Points)
Subject Details (p. 4437) Legacy Code: 301147
This subject will provide an introduction to the basic knowledge needed to perform some of the forensic anthropologist's tasks, especially anatomy and human osteology. Due to the impossibility of teaching a laboratory class, we will substitute the hands-on experience by a carefully selected set of pictures and material in order to familiarize you with the practice of the discipline. This subject is taught by the University of Florida as part of a collaborative venture between the University of Florida and Western Sydney University. Note: Further information on this subject is available from the University of Florida.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7022 Forensic Genetics (10 Credit Points)
Subject Details (p. 4438) Legacy Code: 301144
The subject is designed to introduce genetics so that even if you haven't studied it before you will develop an understanding that will inform your practice in work. The context of this subject is forensic science but rather than jump straight into forensic DNA analysis this is a foundation subject, designed to give a framework of human molecular genetics. We will also look at some of the important issues in genetics including genome mapping and the role of gene dysfunction in disease. The first module is an overview and it is very important that you use the assignment time to check out some websites that will be very useful later on. This subject is taught by the University of Florida as part of a collaborative venture between the University of Florida and Western Sydney University. Note: Further information on this subject is available from the University of Florida.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7023 Forensic Immunology (10 Credit Points)
Subject Details (p. 4438) Legacy Code: 301146
This subject will introduce students to the principles of immunology, immunological techniques, and their application to forensic analyses. This subject is taught by the University of Florida as part of a collaborative venture between the University of Florida and Western Sydney University. Note: Further information on this subject is available from the University of Florida.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7024 Forensic Medicine I (10 Credit Points)
Subject Details (p. 4439) Legacy Code: 301133
This subject covers the basic elements of forensic medicine and focuses on the role of the forensic pathologist in the investigation of crime and death. Although much of forensic medicine, based as it is on observations made at a post-mortem examination, relies on the principles of morbid anatomy as discovered in earlier centuries, more recent techniques are also presented. This subject is taught by the University of Florida as part of a collaborative venture between the University of Florida and Western Sydney University. Note: Further information on this subject is available from the University of Florida.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7025 Forensic Medicine II (10 Credit Points)
Subject Details (p. 4440) Legacy Code: 301134
This subject gives knowledge and understanding of relevant medical concepts, techniques and methods in order that the candidate has sufficient competence to interpret human diseases, conditions and behavior in a forensic setting. An understanding of the organizational structures involved in the practice of forensic medicine both locally and internationally, increase in the candidate's awareness of how forensic medicine relates to the wider context of society and how it contributes towards improving that society. This subject is taught by the University of Florida as part of a collaborative venture between the University of Florida and Western Sydney University. Note: Further information on this subject is available from the University of Florida.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): NATS 7024
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7026 Forensic Research 1 (10 Credit Points)
Subject Details (p. 4441) Legacy Code: 301129
This subject provides the basic framework and methodology required for planning and executing forensic research. The subject encompasses the scientific methods, practical tools and organizational skills important for implementing independent and original forensic research at an international level.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7027 Forensic Research 2 (10 Credit Points)
Subject Details (p. 4442) Legacy Code: 301130
This subject builds on the knowledge gained in the prerequisite subject Forensic Research 1 and further develops skills to enable the independent and confident planning, design and execution of an original forensic research project chosen by the student. The skills and tools acquired in Forensic Research 1 will help facilitate effective communication of research project findings through scientific report writing and presentation in formats appropriate for international journal publication and conferences.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): NATS 7026
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7028 Forensic Toxicology I (10 Credit Points)
Subject Details (p. 4442) Legacy Code: 301136
This course has been developed to introduce students to the concepts, procedures, processes and terminology routinely encountered in the execution of applied forensic toxicological analyses. Our objective is to educate students in the theoretical aspects of drug and analytical chemistry applied to forensic toxicology. This subject is taught by the University of Florida as part of a collaborative venture between the University of Florida and Western Sydney University. Note: Further information on this subject is available from the University of Florida.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7029 Forensic Toxicology II (10 Credit Points)
Subject Details (p. 4443) Legacy Code: 301137
This subject will expand on concepts encountered in Forensic Toxicology I, providing in-depth knowledge of pharmacology and toxicology as it pertains to commonly encountered abused and toxic substances. This subject is unique in offering modules in doping control, expert testimony and human performance and postmortem toxicology. This subject is taught by the University of Florida as part of a collaborative venture between the University of Florida and Western Sydney University. Note: Further information on this subject is available from the University of Florida.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): NATS 7028
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7030 General Toxicology (10 Credit Points)
Subject Details (p. 4444) Legacy Code: 301135
This subject, which is primarily book-based, is structured to comprehensively provide the student with the fundamental concepts of toxicology as they relate to specific organ and tissue systems. We aim to supplement this information with online study guides, detailed module objectives and critical thinking exercises. The objective of this subject is to familiarize students with the procedures for using WWW resources for communication and educational purposes and to introduce students to the principles, concepts and terminology utilized in the field of toxicology. This subject is taught by the University of Florida as part of a collaborative venture between the University of Florida and Western Sydney University. Note: Further information on this subject is available from the University of Florida.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7033 MSc Research Project (20 Credit Points)
Subject Details (p. 4445) Legacy Code: 401156
Science Research Project is a capstone subject that gives students the opportunity to conduct scientific research, while extending their knowledge and practical skills. Each student undertakes a research project supervised by an academic staff member which has as its central focus the scientific analysis and resolution of a complex problem. The research project is conducted in an area of relevance to professional discipline, and students can choose from a range of approved research designs. Students must undertake a review of the relevant literature, formulation of a research question, design of an appropriate method, collection and analysis of data, interpretation of findings, the production of a research report and presentation of these findings.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7034 Managing for Sustainability (20 Credit Points)
Subject Details (p. 4446) Legacy Code: 401155
This online subject is concerned with delivering and supporting sustainability management. Students will develop a multi-disciplinary perspective on resources, sustainability and health and safety management which will incorporate strategy, policy, data collection and knowledge management. It will introduce students to a systemic approach for studying organisational operations and methods for quantifying and optimising resource use and energy use while using tools to reduce environmental, societal and financial risk. Students will also learn how to improve the efficiency and effectiveness with which organisations can incorporate sustainability issues and to identify future trends and drivers for change in this area.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7035 Medicinal Chemistry of Drugs of Abuse (10 Credit Points)
Subject Details (p. 4447) Legacy Code: 301140
This subject will address the fundamental concepts and principles involved in the examination of biological evidence and the practices of serology as they relate to crime scene and forensic investigation. This subject is taught by the University of Florida as part of a collaborative venture between the University of Florida and Western Sydney University. Note: Further information on this subject is available from the University of Florida.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7037 Natural Medicinal Products (10 Credit Points)
Subject Details (p. 4448) Legacy Code: 301141
This subject has been developed to introduce students to the procedures and processes associated with the production, isolation, characterization and use of medicinal drugs of plant origin. This subject is taught by the University of Florida as part of a collaborative venture between the University of Florida and Western Sydney University. Note: Further information on this subject is available from the University of Florida.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7039 Pharmaceutical Analysis (10 Credit Points)
Subject Details (p. 4448) Legacy Code: 301143
This subject focuses on the characterisation and the structural proof of drug compounds routinely encountered in Forensic and Pharmaceutical laboratories. This subject is taught by the University of Florida as part of a collaborative venture between the University of Florida and Western Sydney University. Note: Further information on this subject is available from the University of Florida.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7040 Research Skills in Science (20 Credit Points)
Subject Details (p. 4449) Legacy Code: 401154
This subject builds on undergraduate level science to develop a strong appreciation of postgraduate research skills. It will develop knowledge and understanding of techniques and skills applicable to postgraduate scientific study and research methodologies and critical awareness of literature. It will support you in understanding and evaluating current research. You will use technology to develop your information literacy skills, to communicate and to collaborate with others. You will also learn to act autonomously in planning and implementing work at a professional level. You will recognise how skills are continually developed through experience and can be transferred to other situations.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7044 Science and Health Research Project PG (20 Credit Points)
Subject Details (p. 4450) Legacy Code: 300742
This is a 20 credit point year-long subject taken over two terms (10 credit points in each term). This subject develops critical and analytical skills by undertaking and completing a research project in an area of relevance. The project is carried out on an individual basis. Research projects are offered in consultation with staff who possess research interests and experience in relevant areas.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): AGEN 7003 OR
LGYA 6022
Equivalent Subjects: LGYB 8292 - Masters research project LGYB 9563 - Research Project 811 LGYB 9568 - Research Project 821 LGYB 9570 - Research Project 831 LGYB 9572 - Research Project - Science LGYB 9574 - Research Project 841 LGYA 6231 - Science Research Project PG
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7045 Special Issues in Science - PG (10 Credit Points)
Subject Details (p. 4450) Legacy Code: 300685
This is an individual project subject that is designed for the Master of Science program. It provides the student with an in depth understanding of a specific topic relevant to their field of study. It will include information retrieval techniques as well as written and oral communication skills. In addition, it may include the acquisition of technical skills.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: LGYB 8291 - Special Issues In Sustainable Development LGYB 8470 - Special Issues In Environmental Management LGYC 0924 - Special Issues In Science Technology LGYB 9581 - Personal Study M
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7046 Strategic Management in the Sciences A (20 Credit Points)
Subject Details (p. 4451) Legacy Code: 401158
This preparatory online subject introduces students to the strategic, business and operational aspects of the life science industry. The subject equips students to understand the challenges and conventional wisdom within this industry with a particular focus on research and innovation. Students will learn techniques to develop coherent and credible alternative future scenarios including an understanding of strategic option development, and strategic resource allocation. Students will also acquire research, analytical and critical judgement skills enabling them to deal with important issues such as finance, uncertainty and risk.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7047 Synthetic Medicinal Chemistry (10 Credit Points)
Subject Details (p. 4452) Legacy Code: 301142
This subject has been developed to introduce students to the chemical principles and procedures surrounding the synthesis of commonly encountered licit and illicit chemical substances, and to introduce you to the processes involved in the forensic analysis of clandestine drug laboratories. This subject is taught by the University of Florida as part of a collaborative venture between the University of Florida and Western Sydney University. Note: Further information on this subject is available from the University of Florida.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7048 Toxic Substances (10 Credit Points)
Subject Details (p. 4452) Legacy Code: 301138
This subject, which is primarily book-based, will comprehensively provide the student with the fundamental concepts of toxicology as they relate to specific organ and tissue systems. We aim to supplement this information with online study guides, detailed module objectives and critical thinking exercises using online journal articles. The objective of this subject is to familiarize students with many of the most important toxic substances, their toxic effects, and ways to treat poisoned patients. Several example toxicants are presented and discussed in detail.. There are literally tens of thousands of chemicals in commerce, and nature offers even greater numbers of chemicals to which individuals are exposed. According to the basic tenets of toxicology, any of these substances in sufficient doses is toxic, although some clearly are of greater health concern than others. The objective of this subject is to provide the student with information on the toxic properties of selected chemicals to illustrate principles regarding mechanisms of toxicity, the array of signs and symptoms associated with intoxication, approaches to clinical assessment of poisoning, and methods of treatment. Examples have been selected from several chemical classes and include agents that may be encountered occupationally, environmentally, in medicine, or in the context of substance abuse. This subject is taught by the University of Florida as part of a collaborative venture between the University of Florida and Western Sydney University. Note: Further information on this subject is available from the University of Florida.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): NATS 7030
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7049 Toxicology of Chemical Weapons (10 Credit Points)
Subject Details (p. 4453) Legacy Code: 301150
This subject is structured to comprehensively provide the student with the fundamental toxicologically relevant concepts of weapons that can be used to create mass casualties. These weapons are often called weapons of mass destruction, a term that is closely related to but not synonymous with mass-casualty weapons (a technically more appropriate term). This subject will focus on chemical agents and toxins as the toxicologically relevant mass-casualty weapons. Each of the eight modules in the subject will consist of specific objectives, one or more illustrative cases, a list of the primary references that the student will be expected to acquaint himself or herself with, a brief introduction, a section of teaching material and study tips, and assignments designed to stimulate critical thinking. The general objectives of this subject are to familiarize the student with the toxicological concepts applicable to chemical and toxin weapons of mass destruction; to provide useful references for study, discussion, and reference; and to provide experience in critical thinking about the clinical toxicology of these agents. This subject is taught by the University of Florida as part of a collaborative venture between the University of Florida and Western Sydney University. Note: Further information on this subject is available from the University of Florida.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7050 Transferable Research Skills (10 Credit Points)
Subject Details (p. 4454) Legacy Code: 401164
This subject is an elective subject as part of the Master of Research and provides training in essential skills for research students in the health, medical, biomedical and natural sciences. Students will select two modules that will provide experience in advanced techniques and methodologies directly relevant to a specific area of research. It is expected that this subject, together with the subject Experimental Design and Analysis, will provide students in the health, medical, biomedical and natural sciences with a solid foundation before commencing the research project in the second year of the Master of Research degree.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7051 Applied research with marginalised populations and sensitive health topics (10 Credit Points)
Subject Details (p. 4455) Legacy Code: 800215
This subject will teach students practical knowledge and skills for conducting research with marginalised populations and on sensitive health topics. Students will learn ethical, methodological, and practical considerations in applied qualitative and mixed method research. Upon completion of the subject students will be able to develop a theoretically coherent qualitative or mixed method research protocol and justify their decision making at every stage of the research process. The skills developed in this subject will enable students to adapt research methods to ensure the integrity of the research process with marginalised populations and sensitive health topics.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7053 MSc Research Project (extended) (20 Credit Points)
Subject Details (p. 4456) Legacy Code: 301372
This subject extends the research project undertaken in 401156 MSc Research Project into a substantial piece of research work. This subject provides a further opportunity for students to demonstrate that they can consolidate the knowledge acquired through their course of study, understand how existing evidence/information relates to research topics, and how their own work adds to this body of knowledge.
The finding of the project will be presented in a thesis and in an oral presentation. On completion of the MSc with this subject, the student should have sufficient research project work to qualify for entry into a PhD program.
Level: Postgraduate Coursework Level 7 subject
Co-requisite(s): NATS 7033
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7054 Professional Topic (10 Credit Points)
Subject Details (p. 4457) Legacy Code: 301374
This subject is designed to allow high achieving students to comprehensively explore a relevant topic of interest to them, either through a minor supervised research project or an investigation of an issue directly related to their chosen discipline or a work internship in your chosen discipline. This unit's flexible delivery offers a unique experience specific to each project and student. Students in this subject will develop extensive skills through project-based learning essential for employment and/or higher degree studies.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7055 Experiment Design and Project Management (10 Credit Points)
Subject Details (p. 4457) Legacy Code: 301371
Essential to a career in any branch of science is the ability to design the experiments of a project and manage this project to an outcome. This subject provides an introduction to the general theory of experiment design. The subject reviews the role of randomisation and replication in experiment design, considers the design techniques of constancy, blocking, and presents a number of experimental designs. This subject also covers the tools and techniques for effectively managing projects. Topics include development of project plans; estimation of time and resources; risk analysis and management; scheduling and control; resource allocation; project tracking; project closure and review.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7056 Clinical Research in Health Science (10 Credit Points)
Subject Details (p. 4458) Legacy Code: 800225
This subject will teach students practical knowledge and skills for conducting clinical research within the field of Health Science. Students will learn ethical, methodological and practical considerations in applied quantitative and mixed- method research within the framework of a human clinical trial. Upon completion of the subject students will have an understanding of basic human clinical trial design, novel clinical trial designs, specialisation within various study fields. They will also have consideration of stakeholders and translational importance, trial governance, regulations and the Therapeutic Goods Administration (TGA), intellectual property, commercialisation, recruitment, and advertising and marketing. Finally, they will understand the importance of translational impact via publications and the media, and be able to synthesise trial data via knowing how to conduct systematic reviews and meta-analyses.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7057 Research Preparation in Post Graduate Studies (10 Credit Points)
Subject Details (p. 4459) Legacy Code: 301387
Life is research! This subject introduces students to the nature of research and why it is essential to today's way of living. What are the current and big questions in research? How to prepare for conducting a research in various areas? What are the differences between study, investigation and research? In this subject, the main emphasis will be on different types of modern research and their methods/methodologies with special emphasis on Science, Technology, Engineering & Mathematics (STEM). This subject will also encompass various advanced tools that support research, its writing styles, publication channels and research ethics. Key elements of good research design are also introduced as well as the concepts of intellectual property and commercialisation.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: ENGR 7018 - Research Preparation in Post Graduate Studies
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7058 Forensic Analysis of DNA 2 (10 Credit Points)
Subject Details (p. 4460) Legacy Code: 301434
Forensic Analysis of DNA 2 is a continuation of 301148 Forensic Analysis of DNA where students learn about the methods routinely used for the isolation of DNA from cells and techniques applied to DNA quantitation and electrophoretic separation, as well as data analysis, interpretation and reporting. In DNA 2, students learn how to interpret DNA data to include mixture deconvolution and the statistics that apply to DNA matches/inclusions. Modules also guide the student through the basis of Y-STR and Kinship testing statistical applications. Students will also learn the report writing, review and testimony skills required of a DNA analyst. This subject is taught by the University of Florida as part of a collaborative venture with Western Sydney University. (Note: This subject description is as provided by the University of Florida; see: https://forensicscience.ufl.edu/programs/courses/forensic-analysis-of-dna-2/)
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): NATS 7019
Restrictions: Please see the Subject Details page for any restrictions for this subject

NATS 7059 Forensic Digital Imaging (10 Credit Points)
Subject Details (p. 4461) Legacy Code: 301442
This online subject is designed to provide an in-depth knowledge of scientific and forensic imaging. Forensic digital imaging serves important functions within forensic science for the purpose of scene and item documentation, detection and enhancement of forensic evidence, and as a means of communicating forensic observations and interpretations. The subject includes modules covering the following areas: physics of light, colour and optics; forensic photographic lighting techniques; image recording systems; image processing; and principles of forensic photography and imaging. This subject is taught by the University of Lausanne, Switzerland, as part of a collaborative venture between Western Sydney University and the University of Lausanne.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 0006 Key Concepts and Skills in the Social Sciences (WSTC Prep) (10 Credit Points)
Subject Details (p. 3049) Legacy Code: 700323
The subject will introduce academic skills allowing students to become successful, reflective and independent tertiary learners. Students will develop a foundational understanding of key theories, concepts, debates and perspectives relevant to the successive first year university subjects within the field of Social Sciences. This subject will support students towards completion of an interactive authentic task, designed to explore possible positive change in contemporary social life.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: HUMN 0016 - Key Ideas in Arts and Social Science (WSTC Prep)
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 1001 Asia in the World (10 Credit Points)
Subject Details (p. 3050) Legacy Code: 101442
This subject introduces Asian societies, cultures, religions, and histories. Considering both traditional and contemporary times, it seeks to place Asia's diverse cultures in a global context. It examines issues such as how to define Asia, how Asian states related to each other, and how Western ideas of international relations have transformed these relations. The subject considers how the great religions/philosophies of Asian societies - Buddhism, Hinduism, Islam, Christianity and Confucianism - have influenced Asian states and relations between them. It explores other forces which have shaped the civilisations, polities and communities of Asia and how they have related to each other and the world beyond.
Level: Undergraduate Level 1 subject
Equivalent Subjects: LGYA 0912 - Foundations of Asia
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 1005 Crime, Deviance and Society (10 Credit Points)
Subject Details (p. 3050) Legacy Code: 102039
This subject introduces students to the theory and practice of criminology and the sociology of deviance. It considers the ways in which social order is produced, maintained and transgressed from a range of perspectives, including the Chicago school, labelling and deviance theory, Marxism, feminism, and post-colonial theory. These perspectives are explored through a discussion of contemporary issues and controversies, such as terrorism, asylum seeking, the criminalisation of protest, Indigenous incarceration, alcohol and other drug use, and transnational crime.
Level: Undergraduate Level 1 subject
Equivalent Subjects: CULT 1009 - Introduction to Criminology LGYB 0467 - Introduction to Criminology CULT 1006 - Crime Deviance and Society (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 1006 Crime, Deviance and Society (WSTC) (10 Credit Points)
Subject Details (p. 3052) Legacy Code: 700156
This subject introduces the major approaches to the study of criminology and the sociology of deviance. It considers the ways in which social order is produced, maintained and transgressed from a range of perspectives, including the Chicago school, labelling and deviance theory, Marxism, feminism and queer theory. These perspectives are explored through a discussion of contemporary issues and controversies, such as crime in Western Sydney, the media and moral panic, the criminalisation of HIV transmission, Indigenous incarceration, and alcohol and drug abuse. The subject also addresses the politics of law and order and the resurgence of neo-liberalism in debates over crime and deviance.
Level: Undergraduate Level 1 subject
Equivalent Subjects: CULT 1009 Introduction to Criminology CULT 1005 Crime Deviance and Society LGYB 0467 Introduction to Criminology (UWSC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 1007 Introduction to Crime and Criminal Justice (10 Credit Points)
Subject Details (p. 3053) Legacy Code: 101560
In 2019 this subject replaced by 102709 - Introduction to Criminal Justice.This subject provides an introduction to the study of criminal justice from a critical criminological perspective. How crime is measured and explained, who are identified as criminals or victims, and how to effectively respond to crime is not straightforward. The subject examines the workings of the criminal justice system, and analyses how police, courts and corrections influence the processes of criminalisation and victimisation, and the societal context in which this occurs. The subject looks at other forms of control and prevention beyond those of the criminal justice system.
Level: Undergraduate Level 1 subject
Equivalent Subjects: CULT 1024 - Introduction to Criminal Justice CULT 1025 - Introduction to Criminal Justice (WSTC) CULT 1008 - Introduction to Crime and Criminal Justice (WSTC) CULT 1003 - Crime and Criminal Justice
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 1013 Policing, Justice and Society (WSTC) (10 Credit Points)
Subject Details (p. 3053) Legacy Code: 700238
In this unit, the role and function of police from a social, historical and comparative perspective as well as different policing practices in Australia and other nations, are described, explained and analysed. The structure, roles, and reform of police are addressed, as are other issues such as social diversity and community relations and debates about distinct policing strategies and their social impact. Students will explore the relevance of policing theories and concepts in contemporary society.
Level: Undergraduate Level 1 subject
Equivalent Subjects: JUST 2012 - Law Evidence and Procedure CULT 1016 - Theories and Concepts of Policing (UWSC) CULT 1015 - Theories and Concepts of Policing CULT 1012 - Policing Justice and Society
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 1017 Understanding Society (10 Credit Points)
Subject Details (p. 3054) Legacy Code: 101551
Understanding Society introduces first year students to key sociological concepts, methods and theories used for the examination of individuals, social interactions, institutions and structures. Students explore how individual experiences are connected to wider social patterns. Considering questions of power, students will be introduced to various debates concerning structure and agency, and will examine social inequality. With a focus on contemporary social life, the subject provides opportunity for students to consider current social issues and processes of social change. At the conclusion of their studies in this subject students will have been presented with opportunities to develop skills in critical reading and sociological analysis.
Level: Undergraduate Level 1 subject
Equivalent Subjects: HUMN 1037 – Introduction to Sociology CULT 1019 - Understanding Society (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 1019 Understanding Society (WSTC) (10 Credit Points)
Subject Details (p. 3055) Legacy Code: 700049
Understanding Society introduces first year students to key sociological concepts, methods and theories used for the examination of individuals, social interactions, institutions and structures. Students explore how individual experiences are connected to wider social patterns. Considering questions of power, students will be introduced to various debates concerning structure and agency, and will examine social inequality. With a focus on contemporary social life, the subject provides opportunity for students to consider current social issues and processes of social change. CULT 1020 Working with Communities (10 Credit Points)
Subject Details (p. 3056) Legacy Code: 101900
In 2021, this subject replaced by 102815 - Introduction to Indigenous Australia: Peoples, Places and Philosophies. A diverse range of professionals use social science research, theories and principles in their work with communities. In this subject students will explore common scholarly ideas and practices that inform work with communities and how these are applied in a range of professional settings. This subject introduces students to the methods and principles of community participation, capacity-building, community needs assessment, and resilience. Students will be guided to identify and analyse global, local, government and organisational aspects and interests in the development of their own and wider communities. Students will plan a professional approach to working with an example community by building and reporting on a chosen case study.
Level: Undergraduate Level 1 subject
Equivalent Subjects: CULT 1011 - Organisations Communities and Communication BUSM 1033 - Working with Communities HUMN 1060 - Introduction to Indigenous Australia Peoples Places and Philosophies CULT 1021 Working with Communities (WSTC)

Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 1021 Working with Communities (WSTC) (10 Credit Points)
Subject Details (p. 3057) Legacy Code: 700139
This introductory subject provides foundational skills and knowledge required for professional practice in a range of social science related careers in which working with and as part of communities is essential. With an emphasis on practical understanding through both team-work and fieldwork it introduces students to a range of skills in interpersonal and written communication, and to community and organisational processes and structures. It enables students to identify issues of change; conflicting and collaborative interests; participation and collaboration. It provides practical experience in working with others to achieve shared objectives with mechanisms for goal setting, issues identification, information and resource sharing that operate in everyday life and all professional contexts
Level: Undergraduate Level 1 subject
Equivalent Subjects: CULT 1011 - Organisations Communities and Communication CULT 1020 - Working with Communities LGYB 0465 - Organisations Communities and Communication

Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 1022 Working with Cultural Differences (10 Credit Points)
Subject Details (p. 3058) Legacy Code: 101664
This subject is designed to develop student awareness of culture, identity and difference in the Australian context. Students are introduced to and expected to develop a working knowledge of the concepts of culture, identity, power relations, whiteness and difference. From these theoretical bases, issues of identity and difference and power relations are explored in the Australian context with particular focus on Indigenous/non-Indigenous relations and multiculturalism. In addition, the effects of socially constructed differences of race, gender, class, and sexuality are explored.
Level: Undergraduate Level 1 subject
Equivalent Subjects: CEDS 2002 - Working with Cultural Differences in Educational Settings (UG) CULT 1023 - Working with Cultural Differences (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 1023 Working with Cultural Differences (WSTC) (10 Credit Points)
Subject Details (p. 3058) Legacy Code: 700140
The purpose of this subject is to develop awareness and understanding of cultural differences, whiteness and power relations in Australian society. Students are introduced to and required to develop a working understanding of theories of whiteness, culture, identity, difference and relations of power. Through assignments and activities students have the opportunity to work through the application of these theories in relation to different groups and social issues in the Australian context.
Level: Undergraduate Level 1 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 1024 Introduction to Criminal Justice (10 Credit Points)
Subject Details (p. 3059) Legacy Code: 102709
This subject introduces students to criminal justice issues and practices through an examination of the Australian criminal justice system and its processes. This is achieved through a court visit (either virtual or physical) as a method of unobtrusive participant observation. Students will examine how the criminal justice system works (and sometimes fails to work), and how police, courts, and corrections influence the processes of criminalisation, victimisation, and (in)justice.
Level: Undergraduate Level 1 subject
Equivalent Subjects: CULT 1007 - Introduction to Crime and Criminal Justice CULT 1003 - Crime and Criminal Justice CULT 1008 - Introduction to Crime and Criminal Justice (WSTC) CULT 1025 - Introduction to Criminal Justice (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 1025 Introduction to Criminal Justice (WSTC) (10 Credit Points)
Subject Details (p. 3060) Legacy Code: 700300
This subject introduces students to criminology, policing, and criminal justice issues and practices through an examination of the Australian criminal justice process. Students will examine how the criminal justice system works (and sometimes fails to work), and how police, courts, and corrections influence the processes of criminalisation, victimisation, and (in)justice.
Level: Undergraduate Level 1 subject
Equivalent Subjects: CULT 1007 - Introduction to Crime and Criminal Justice CULT 1024 - Introduction to Criminal Justice CULT 1003 - Crime and Criminal Justice CULT 1008 - Introduction to Crime and Criminal Justice (WSTC)

Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 1027 Working with Communities (UG Cert) (10 Credit Points)
Subject Details (p. 3062) Legacy Code: 500043
A diverse range of professionals use social science research, theories and principles in their work with communities. In this subject students will explore common scholarly ideas and practices that inform work with communities and how these are applied in a range of professional settings. This subject introduces students to the methods and principles of community participation, capacity-building, community needs assessment, and resilience. Students will be guided to identify and analyse global, local, government and organisational aspects and interests in the development of their own and wider communities. Students will plan a professional approach to working with an example community by building and reporting on a chosen case study.
Level: Undergraduate Level 1 subject
Equivalent Subjects: CULT 1011 - Organisations Communities and Communication BUSM 1033 - Working with Communities CULT 1020 - Working With Communities CULT 1021 - Working with Communities (WSTC) CULT 1027 - Working with Communities (UG Cert)
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 1028 Introduction to Criminology and Justice (WSTC) (10 Credit Points)
Subject Details (p. 3063)
This subject introduces students to the development of criminology as a framework for analysis and offers a critical introductory insight into various applied institutional and legislative contexts through which criminal justice occurs. Students will consider the ways in which deviant and/or criminal behaviour is defined and how the legislative and policy responses to crime operate at the level of Police, Courts and Corrections as well as the communities in which they operate. By the end of this subject, students will consider a crime or deviance issue and reflect on current practice. Students will gain skills in assessing criminal justice issues holistically through a critical lens.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 1029 The individual in a global context: The Concepts and ideas that shape us (WSTC) (10 Credit Points)
Subject Details (p. 3064)
The aim of this subject is to get you thinking critically about the world around you! We live in turbulent, uncertain times and this can often make us feel powerless. However, learning to think sociologically — and developing a critical understanding of how society and culture work — are the first steps towards understanding how to challenge disadvantage and create positive change. The purpose of this subject is to equip you with the skills to navigate a culturally and linguistically diverse society, including that of Greater Western Sydney. You will gain an historically informed, critical understanding of the meaning of culture, the impact of colonisation, Indigenous Australian cultures, and of approaches to diversity, multilingualism and multiculturalism. You will explore the value of existing and emerging skills in multilingualism and cross-cultural communication as tools to navigate a rapidly changing global environment. You will have the opportunity to develop your intercultural communication skills through interactive learning activities and a field-trip.
Level: Undergraduate Level 1 subject
Equivalent Subjects: HUMN 1053
HUMN 1056
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 1030 Pancasila (5 Credit Points)
Subject Details (p. 3064)
The Pancasila subject equips students with essential guidelines for studying and analysing state and national issues through the lens of Pancasila values, the foundational philosophy of the Republic of Indonesia. During the introductory session, students will explore the lives of key national figures from the independence movement, seeking examples that embody Pancasila values. Subsequently, students will examine some real-world applications of Pancasila values by looking into contemporary state issues. By engaging in discussions and analyses focusing on national values and Pancasila, students are encouraged to foster a positive attitude towards Pancasila as the cornerstone of the state and the guiding ideology of the Indonesian nation.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 1031 Civic Education (5 Credit Points)
Subject Details (p. 3064)
This subject serves as an introductory exploration into the fundamental aspects of Civics. Through case studies and presentations, problem-solving tasks, and reflective exercises, students delve into key concepts such as national identity, national integration, constitution, and the reciprocal obligations and rights between the state and its citizens. Students will address crucial aspects of governance, including law enforcement, human rights, democracy, and the dissemination of knowledge across societal domains. Furthermore, they will examine critical issues such as national defense, gender dynamics, and anti-corruption measures, fostering an understanding of the multifaceted responsibilities inherent in citizenship. By engaging with these topics, students will be able to navigate through the complex civic landscapes and contribute meaningfully to the benefit of society.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 2004 Culture, Identity, Difference (Block Mode) (10 Credit Points)
Subject Details (p. 3065) Legacy Code: 101766
This subject introduces students to a range of contemporary theories and concepts that will develop their understanding and analysis of culture, identity and difference within the Australian context. Students will explore the historical and social aspects of culture and identity, and the power and positioning within these. Locations of difference will also be explored such as gender, race, class, ethnicity, sexuality, ability, geography in the Australian context.
Level: Undergraduate Level 2 subject
Equivalent Subjects: CULT 1022 - Working with Cultural Differences CEDS 2002 - Working with Cultural Differences in Educational Settings LGYA 7380 - Working with Cultural Differences in Educational Settings
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 2005 Ethics in the Social Sciences (10 Credit Points)
Subject Details (p. 3066) Legacy Code: 101555
This subject introduces students to the nature of western ethics and moral discourses, to ethical methodology and to the possibilities and limits of ethical discourse and practice. It covers the history of the formalisation of ethics as well as its current philosophical, sociological, and professional dimensions. It also deals with various case studies of ethical issues and moral debates students may encounter in their everyday day and professional lives. Students will be invited to reflect on moral discourse(s), their own understanding of morality, and on the use of ethics for social justice and fairness.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 2007 International Politics of North Asia (10 Credit Points)
Subject Details (p. 3067) Legacy Code: 100872
This subject examines contemporary foreign policy issues in North Asia from the perspective of China and Japan. Core issues include a critical evaluation of contemporary Sino-Japanese relations, the role both countries play in regional affairs and why North Asia (in particular the Korean Peninsular) is an intersection point for geo-politics.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYA 0268 - International Relations of Northeast Asia
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 2011 Prisons, Punishment and Criminal Justice (10 Credit Points)
Subject Details (p. 3067) Legacy Code: 102036
The demise of corporal punishment and the regular use of imprisonment are defining features of control in modern states. This subject provides an historical and sociological examination of the models, practices and justifications for punishment and incarceration. It begins with an overview of early liberal notions of the social contract, the modern movement away from corporal punishment towards incarceration, and criminology's emphasis on treatment, reform and rehabilitation. Following from this, the subject explores the development of probation and parole systems, decarceration, community corrections, mass imprisonment, and the contemporary control of risk and 'dangerous' populations. These themes are considered through the role of intersecting structural factors such as age, gender, sexuality, social class, racial/ethnic identity and disability, and the impact of imprisonment and corrections on different individuals and groups.
Level: Undergraduate Level 2 subject
Equivalent Subjects: CULT 2010 - Prisons and Punishment
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 2016 Evidence and Investigation (10 Credit Points)
Subject Details (p. 3068) Legacy Code: 102691
This subject provides an overview of police investigations with a specific focus on understanding the interaction of police powers and the investigative process. The subject will build on knowledge of the common criminal offences covered in the subject 'Criminal Law for Policing' and outline the investigative process through scenario-based case studies. The subject will refer to both NSW and Commonwealth legislation, and examine the role of the courts in applying the rules of evidence to determine its reliability to be admitted as evidence at a trial. The subject will examine the impact of technological change and forensic science on the traditional investigative process, and provide students an introduction to research into the organisation, processes and governance of Investigative Units.
Level: Undergraduate Level 2 subject
Equivalent Subjects: JUST 2005 - Criminal Investigations
Incompatible Subjects: CULT 2006 - Evidence Investigations and Police Intelligence
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 2017 Youth Justice and Practice (10 Credit Points)
Subject Details (p. 3069) Legacy Code: 102699
This subject develops an understanding of the complexity of youth justice by addressing the historical, political, cultural and socio-economic factors associated with youth crime, constructions of youth, and, governmental strategies for regulating and preventing youth crime. Insights from legal practitioners, police, youth workers, adolescent psychologists, and juvenile justice case managers form part of the unit's inter-disciplinary framework. This is used to develop a critical appreciation of the impacts of the regulation of particular youth groups that are over-represented in the juvenile justice system, including Aboriginal and Torres Strait Islander youth, youth in out-of-home care, and other racial/ethnic minority youth. Lastly, the subject critically assesses a range of official interventions for working with young people within the youth justice system.
Level: Undergraduate Level 2 subject
Equivalent Subjects: CULT 2009 - Juvenile Crime and Justice
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 2018 Crime Prevention and Drugs (10 Credit Points)
Subject Details (p. 3070) Legacy Code: 102708
This subject will examine the theory, politics and practice of crime prevention while exploring how this relates to alcohol, illicit drug use and criminalisation. In particular, this subject will explore key elements of alcohol and other drugs (AOD) research, service delivery and policy approaches that are framed, both practically and symbolically as crime prevention measures. It will address current approaches to crime prevention, evaluate their effectiveness and examine emerging strategies in the field. Some key case studies in the field of critical drugs studies will be used throughout this subject to demonstrate some principles of crime prevention introduced in the first part of the subject.
Level: Undergraduate Level 2 subject
Incompatible Subjects: CULT 3008 - Crime Prevention and Community
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 2019 First Peoples and Criminal Justice (10 Credit Points)
Subject Details (p. 3071) Legacy Code: 102712
In 2022 this subject replaced by HUMN 2070 First Peoples and Criminal Justice. How does colonialism underscore the foundational narratives, knowledges and operation of the legal and criminal justice institutions of colonised nations? Focusing primarily on the Australian context of colonial invasion and settlement, this subject explores the plight of Indigenous peoples and their severe over-representation in the Australian criminal justice system. Studying the impact of colonisation and exploring Indigenous narratives, students will critically examine issues faced by Aboriginal and/or Torres Strait Islander people and their experience of criminal justice in Australia. Overall, the subject will equip students with an understanding of the relationship between dominant colonial narratives of race and institutional racism, while considering how Indigenous knowledge can inform better social and criminal justice outcomes for Indigenous populations. Comparative examples of criminal (in)justice for Indigenous populations in other colonised nations will also be considered.
Level: Undergraduate Level 2 subject
Incompatible Subjects: WELF 2008 - Human Rights Human Services and the Law
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 3001 Applied Social Research (10 Credit Points)
Subject Details (p. 3071) Legacy Code: 101552
In this subject students continue their education in social research, building on 400337 Social Research Methods. Students gain experience in using tools and techniques for the collection, analysis and interpretation of quantitative and qualitative data using real world examples. They gain experience in using various primary and secondary sources of data and designing the collection of data through surveys and interviews. Students will also examine the application of research to, for example, program evaluation and policy development, thus preparing students for professional contexts as generators and critical consumers of social research.
Level: Undergraduate Level 3 subject
Pre-requisite(s): HUMN 2066 Investigating and Communicating Social Problems
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 3002 Children's Culture (10 Credit Points)
Subject Details (p. 3072) Legacy Code: 101265
This subject explores the concept of children's culture and the diversity of cultures to which children belong. The subject focuses on current debates about childhood and children's culture, including the rise of children's consumer culture. Students will gain insights into children's lives and culture by critically engaging with a variety of objects and institutions that are part of children's lives, for example, toys, videogames, children's television programs, films and books. The subject will also examine the role of adults in children's culture, including in marketing and advertising to children.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 3004 Consumer Culture (10 Credit Points)
Subject Details (p. 3073) Legacy Code: 102413
Consumption and consumerism are words that frequently have negative connotations in popular usage, yet globally, rates of consumption and consumerism continue to grow. This subject presents cultural research that investigates the range of consequences - positive, negative or otherwise - that the rise of consumer culture has brought to contemporary global societies. Students analyse a range of cultural products and practices, and consider topics including the ethics of consumption, the role of consumption in forming identities, how consumer culture relates to class, gender, race and ethnicity, the rise of brands, and consumer culture in the digital age.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 1026 - Consumer Culture
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 3007 Contemporary Social Issues and Professional Practice (10 Credit Points)
Subject Details (p. 3074) Legacy Code: 102203
Focused upon professional practice this subject will provide Social Sciences students with an opportunity to improve their career readiness. Using a combination of practical and theoretical teaching framework, this subject will teach students how to translate their social science knowledge to professional, career relevant knowledge. In doing so, it will also provide students an opportunity to engage with contemporary social issues related, for example, to diversity, work and employment, place, sustainability, violence and alternative to violence, health and cyberworld and cyber-experiences.
Level: Undergraduate Level 3 subject
Equivalent Subjects: CULT 3005 - Contemporary Debates in Social Sciences
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 3008 Crime Prevention and Community (10 Credit Points)
Subject Details (p. 3075) Legacy Code: 102038
In Spring 2020 this subject replaced by 102708 - Crime Prevention and Drugs. This subject will examine the theory, politics and practice of crime prevention. It will address current approaches to crime prevention, evaluate their effectiveness and examine emerging strategies in the field. The subject will consider the diversity of crimes and the ways in which some are constructed as preventable and others are not, while discussing the challenges posed by unreported crime, fear of crime and the relation between patterns of victimisation and social disadvantage. The subject will draw on empirical literature linking individual, social and contextual factors to the production and prevention of deviant behaviours and explore the potential of crime prevention strategies for alleviating the social ills associated with crime and deviance.
Level: Undergraduate Level 3 subject
Equivalent Subjects: CULT 2014 - Victimisation and Crime Prevention
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 3010 Culture and Crime (10 Credit Points)
Subject Details (p. 3076) Legacy Code: 101562
In 2020 this subject replaced by 102710 - Crime, Media, Culture. Contemporary societies are replete with images of crime, including in fiction, the media, film and television. In this subject we explore this phenomenon through the lens of cultural criminology and its interest in the exciting and adrenaline-inducing aspects of crime. We explore the link between culture and crime by looking at both textual/visual and ethnographic research. This means studying the way crime is experienced as 'thrilling' not only by those who consume it via images but also by those who actually engage in violent and transgressive conduct. This subject examines the relationship between cultural images of crime, the lived experience of criminal activity and its social and cultural impact.
Level: Undergraduate Level 3 subject
Equivalent Subjects: CULT 3024 - Crime Media Culture
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 3011 Ethical Leadership (10 Credit Points)
Subject Details (p. 3076) Legacy Code: 102250
This subject focuses on major ethical theories, challenges, and concepts in a cross disciplinary environment. Students' knowledge and understanding of ethics will be further developed through interdisciplinary lenses on critical ethical thinking and decision-making. Students will be required to analyse ethical frameworks and systemic failure to discuss and reflect on various cross disciplinary challenges in diverse settings. By applying ethical concepts to personal journeys as citizen scholars and future professionals, students will develop their own ethical framework and gain skills required for future success as emergent leaders.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 3013 Gender, Crime and Violence (10 Credit Points)
Subject Details (p. 3077) Legacy Code: 101561
In recent decades, models and understanding of gender have become a major way of explaining crime and victimisation. Most obviously, feminist researchers have pioneered studies of the neglected victimisation of women from male violence and the impact of gendered discourses on the criminal justice system. This subject will critically engage with this material and also focus on contemporary accounts of the links between criminal offending and different violent and non-violent masculinities. Lastly, the shifting regulation of different sexualities and their criminalisation will be analysed.
Level: Undergraduate Level 3 subject
Pre-requisite(s): CULT 1024
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 3014 Heritage Interpretation (10 Credit Points)
Subject Details (p. 3078) Legacy Code: 101643
In 2023, this subject is replaced by HUMN 3117 - Place-Making for Tourism and the Cultural Economics. This subject examines the theory and practice of heritage interpretation for visitors at natural and cultural heritage sites. It examines the development of heritage interpretation within national parks and museums and explores the various issues facing contemporary interpretation in the context of multicultural and postcolonial societies and the advent of digital media.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 6067 Heritage Interpretation LGYA 1270 - Heritage Interpretation
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 3015 Heritage and Tourism (10 Credit Points)
Subject Details (p. 3079) Legacy Code: 101599
In 2023 this subject is replaced by TOUR 3002 - Cultural Tourism and Events. This subject examines the relationship between heritage (both cultural and natural) resources and tourism. It firstly provides an introduction to contemporary issues in heritage and tourism management. Secondly, it investigates the phenomenon of heritage and tourism - its nature, the market, visitors, the issues in planning and management - in the context of sustainable tourism praxis in Australia (and globally) as well as in the context of local communities.
Level: Undergraduate Level 3 subject
Incompatible Subjects: LGYA 6066 Cultural Heritage and Tourism LGYA 1269 Cultural Heritage and Tourism
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 3016 Indigenous Cultures: A Global Perspective (10 Credit Points)
Subject Details (p. 3079) Legacy Code: 101905
In 2023, this subject is replaced by HUMN 3118 - Indigenous Cultures: A Global Perspective. Drawing on global case studies, this subject aims to introduce students to some of the pressing socio-cultural issues facing indigenous peoples around the world. The subject examines the complex relationships between globalisation, colonialism and post-colonialism and contemporary indigenous cultures and identities. It draws attention to the way in which issues of representation, cultural autonomy, cultural commodification, development and human rights play out with respect to indigenous peoples' lives. More specifically, the subject interrogates the power relations and politics central to many of these issues and examines the nature of contemporary indigenous and non-indigenous interactions, particularly in the contexts of tourism and heritage, the cultural industries, the environment, development and urbanisation.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 5759 - Indigenous Tourism LGYA 0631 - Indigenous Cultures and Tourism A Global Perspective
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 3017 Legislation, Courts and Policing (10 Credit Points)
Subject Details (p. 3080) Legacy Code: 101568
This subject introduces students to the adversarial system, the legislative context of everyday policing, and the different forms of state and federal courts. It includes an emphasis on police powers (NSW and elsewhere), summary and indictable offences, and the role of enforcement and discretion. In particular alternative resolution and specialist courts are described and their role and function analysed. This subject is of value to students in policing, criminology, law, and community welfare.
Level: Undergraduate Level 3 subject
Incompatible Subjects: JUST 2012 - Law Evidence and Procedure
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 3018 Perspectives in Criminology (10 Credit Points)
Subject Details (p. 3081) Legacy Code: 102037
Contemporary criminological knowledge typically concerns explanations of offending, victimisation, prevention and safety, but debates about these matters also reflect unequal power, social division and exclusion. The subject will focus on the criminological concern with offenders across all domains, with particular attention to crimes of the powerful. Additionally, it will analyse the impacts of the blurred lines between the public and private, the national and global, citizens and aliens, as well as evidence about the expansion of more intensive forms of governance in national and global contexts.
Level: Undergraduate Level 3 subject
Pre-requisite(s): CULT 1005 AND
CULT 1024
Equivalent Subjects: CULT 3006 - Contemporary Perspectives in Criminology
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 3020 Representing Crime (10 Credit Points)
Subject Details (p. 3082) Legacy Code: 101005
This subject deals with the evolution of the figure of the detective and of the criminal; the development of an aesthetics of crime from the later 18th Century; the dynamic nature of fiction, film and television genres of detection. Literatures of sensation, detective fictions, true crime writing and the non-fiction novel will all be examined to allow an in-depth analysis of the changing ethical and psychological character of the detective, and of his nemeses. The crime story in film, television and in other new media may also be addressed to facilitate an analysis of changing cultural contexts for the crime story.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYC 1299 - Representing Crime
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 3021 Theories of Authority (10 Credit Points)
Subject Details (p. 3082) Legacy Code: 101913
The subject will trace the idea of authority in the West back to its genesis in Ancient Greece and track its development in modern thought. The aim is to demonstrate the variegated relation between power, law and revolution by closely examining a wide array of texts in a variety of disciplinary fields, including literature.
Level: Undergraduate Level 3 subject
Equivalent Subjects: CULT 3019 - Politics and Religion
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 3023 Global Citizenship and Engagement (10 Credit Points)
Subject Details (p. 3083) Legacy Code: 301218
This is a 10 credit point year-long subject taken over two terms (5 credit point in each term). The subject claims to engage students with current global contexts to integrate professional knowledge and develop skills, attitudes and behaviours that support them to be global citizens with inter-cultural competence. As part of the subject students will be required to undertake an global learning experience relevant to their studies. This experience may involve travel to an overseas organisation and/or community, or participation with a local or online globally focused organisation. The subject is completed across a year of study, with the first semester a preparatory experience, mid-semester the opportunity to complete an global short program, and the final semester a time to reflect. Students will immerse themselves in their new global environment, make sense of the organisation's or a community's modes of action and meaning, and negotiate their ways of acting and being in the process of becoming a member and contributing to the organisation and/or community with which they engage. Students in this subject will reflect on global engagement experiences to discuss self-learning and how this learning informs personal and professional development.
Level: Undergraduate Level 3 subject
Pre-requisite(s): Students must have completed 120cp in their currently enrolled course prior to enrolling in this unit
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 3024 Crime, Media, Culture (10 Credit Points)
Subject Details (p. 3083) Legacy Code: 102710
There is a close relationship between representations of crime in mass and social media, and policy and legal responses to crime. Media consumers are producing and circulating content about crime and criminality through new media technologies, and some are using social media and the internet to engage in new forms of criminality. In this subject, we explore the complex role of mass media and 'new' media in debates over crime and crime control, and the facilitation of criminality by media technologies. This means studying contemporary media theory and its relevance for criminology, and the effects of social media and computing technology on representations and practices of criminality. The subject maintains a strong focus on the ways in which media and culture informs crime policy and criminal justice processes.
Level: Undergraduate Level 3 subject
Equivalent Subjects: CULT 3010 - Culture and Crime
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 3025 Prisons, Punishment and Criminal Justice (10 Credit Points)
Subject Details (p. 3085) Legacy Code: 102711
The demise of corporal punishment and the rise of incarceration are defining features of control in modern states. This subject provides an historical and sociological examination of the models, practices and justifications for punishment and incarceration. It begins with an overview of early liberal notions of the social contract, the modern movement away from corporal punishment towards incarceration, and a subsequent welfare oriented emphasis on treatment, reform and rehabilitation. Following from this, the subject explores the development of probation and parole systems, decarceration, community corrections, mass imprisonment, and the contemporary control of risk and 'dangerous' populations. These themes are considered through an intersectional analysis of structural factors such as age, gender, sexuality, social class, racial/ethnic identity and the impact of imprisonment and corrections on different individuals and groups. This subject pays particular attention to the over-representation of Indigenous populations in Australian prisons.
Level: Undergraduate Level 3 subject
Incompatible Subjects: CULT 2011 - Prisons Punishment and Criminal Justice (Level 2)
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 5001 Organised Crime and Criminal Organisations (10 Credit Points)
Subject Details (p. 3086)
Organised crime generates serious individual and collective social harm, and poses threat to both national, regional and international security. It challenges states, exploits individuals, pursues profit, wrecks economies, destroys civil society, and ultimately weakens democracy. This subject explores the emergence and growth of various types of organised crime and criminal organisations over the world from critical and inter-disciplinary perspectives. It also equips students with critical understanding of the nature and operation of various organised crime and criminal organisations, as well as their growing portfolio of illicit activities across borders and its impact on national and global security. While considering the security threat organised crime and criminal organisations pose at national and global level, this subject aims at nurturing students ability to develop a wholistic, humanistic, and just policies to prevent and control organised crime - not just stepping up policing and securities measures.
Level: Postgraduate Coursework Level 5 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 5002 Fundamentals of Cyber Crime and Security in a Global World (10 Credit Points)
Subject Details (p. 3086)
This subject focuses on cyber-crime theory, and analyses the intersection between criminal behaviour, cyber-crime trends and patterns, and security and justice. It analyses topics ranging from online identity theft and fraud to cyber terrorism. Common cyber-attacks, offending methodologies, and victimology are explored to understand the multi-faceted nature of these crimes and their prevalence. In this subject, the essential cyber security concepts, risk management procedures, and data protection and security measures are introduced for the detection and prevention of cyber-crime across human and technology dimensions.
Level: Postgraduate Coursework Level 5 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 6002 Gender Security and Violence (10 Credit Points)
Subject Details (p. 3087)
Deploying critical feminist and gender theory, this subject examines and distinguishes between specific issues pertaining to gender violence within war and peace, and across different domestic and international contexts. Through the lens of actual, threatened, and symbolic gender violence and its consequences, this subject also unpacks the concept of gender (in)security as both a part of, and as a distinct component from, human security more broadly. Throughout the semester, students will consider these themes through domestic and international case studies and will be required to discern effective practices and responses to gender violence, from those approaches that perpetuate gender inequity and harm. By the end of this subject, students will be able to draft theoretically informed gender security initiatives.
Level: Postgraduate Coursework Level 6 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 7001 Economies and Ecologies (10 Credit Points)
Subject Details (p. 3087) Legacy Code: 800174
This subject examines how the economy is being reclaimed as a space of political decision in the Anthropocene, the new geological epoch in which human activity is having global impact on the Earth's ecosystems. It critically explores how different ways of thinking about economy shape the worlds we inhabit. It analyses contemporary examples of economic experimentation and human-non-human assemblages that are making 'other worlds' possible. It explores connections between ecological and economic thinking and asks how our conception of the economy and subjectivity changes when we consider the needs of other species as well as our own.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 7002 Engaging Discursive Fields (10 Credit Points)
Subject Details (p. 3088) Legacy Code: 102340
This subject creates an opportunity for intensive reading on the candidate's research project. Lectures and seminars direct students to identify classic texts, watershed publications, leading scholars, and current debates in their chosen field of research. While expanding their knowledge of existing scholarship, they will become aware of the discursive structures and academic protocols that govern their discipline. What theoretical approaches are used? What does the field of research require of its scholars? What makes their work authoritative? What sources do they use? What questions guide their research? In what context? How has the discursive field changed over time? Such questions direct the formulation of a research project of current relevance.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 7003 Environmental Humanities (10 Credit Points)
Subject Details (p. 3088) Legacy Code: 102339
This subject provides an overview of the emerging interdisciplinary field of Environmental Humanities. It provides a space of dialogue for Humanities, Arts and Social Sciences (HASS) and Science, Technology, Engineering and Mathematics (STEM) students to work collaboratively in developing novel ways of thinking about the relationships between culture and nature. The subject centres on emerging conceptual trends interrogating notions such as: Anthropocene, extinction, planetary boundaries, critical zones, socio-ecological change dynamics, as a way of engaging with fundamental questions of meaning, justice, value, responsibility and purpose in a time of rapid and escalating change. The subject also focuses on methodological issues and tackles questions of co-construction between HASS and STEM disciplines.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 7004 Global Digital Futures (10 Credit Points)
Subject Details (p. 3089) Legacy Code: 102412
This subject explores how innovation in the digital era is transforming society on a global scale. Reflecting on examples drawn from around the world, students learn about the latest trends in communication, media, computing and the knowledge economy. Current and future directions are surveyed in the context of contemporary issues such as big data, digital identity and privacy, social media and crowdsourcing, gaming and visualisation, geographical information systems, virtual environments and artificial intelligence.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: CULT 7007 - Text Media and Memory
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 7006 Rethinking Culture and Society (10 Credit Points)
Subject Details (p. 3090) Legacy Code: 800196
This subject explores key ideas in social and cultural analysis - such as culture, society, experience, power, nature, local/global, etc - as a way of helping students think through their own research projects. It draws on an approach to cultural and social research, developed at the Institute for Culture and Society, which addresses the contradictions of a world that is increasingly globalised, culturally diverse and technologically mediated. A key aspect of this approach is to revisit the central concepts of social and cultural theory, linked to an overview of existing approaches, developing skills of critical analysis and reflecting on the challenges of interdisciplinarity, methodological pluralism, cultural complexity and engaged research.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 7008 The Cutting Edge: Advanced Studies in Humanities and Communication Arts (10 Credit Points)
Subject Details (p. 3090) Legacy Code: 102298
The School of Humanities and Communication Arts teaches across a range of disciplines including Design, Music, Creative Arts, Communications and Media, Languages and Linguistics, Cultural and Social Analysis, Philosophy, Literary Studies, History and Political Thought, International Relations and Asian Studies, Indigenous Studies. This shell subject provides advanced academic training, advanced knowledge and intellectual development in the student's academic discipline by focusing on current debates in selected fields of study. The content of this subject will change according to fields of research represented in the cohort of each year, the issues of current concern in the discipline streams taught, and staff expertise. It will be taught in streamed, parallel seminars organised by broadly defined disciplinary grouping.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

CULT 7010 Researching Post-Capitalist Possibilities (PhD Summer School) (10 Credit Points)
Subject Details (p. 3091) Legacy Code: 800216
Researching Post-Capitalist Possibilities offers HDR students the opportunity to explore how the humanities and social sciences can play a role in making other worlds possible. It develops the thinking capacities we need as scholars to shape the world and reviews the ethical responsibilities that come with this work. It offers an opportunity to work with scholar members of the Community Economies Collective within the Institute for Culture and Society (ICS) who have been thinking outside or beyond capitalist relations since the publication of J.K. Gibson-Graham's The End of Capitalism (As We Knew It) in 1996.
Level: Postgraduate Coursework Level 7 subject

Performing Arts (PERF)

PERF 1010 Music Performance 1 (10 Credit Points)
Subject Details (p. 4655) Legacy Code: 102553
In this subject, students will develop their performance skills through participating in three modularised workshops. The first two workshops will run in parallel with each other and will be rotated: module 1 will focus on improvisation; and module 2 will focus on (western or non-western) music from an oral tradition. Module 3 will then extend students' skills in reading and arranging music, utilising their preferred performing media (voice or instrument). In this third module, they will perform set technical tasks (such as scales and arpeggios) and, in groups, they will arrange and perform one set piece of music from a basic notated score, and they will choose, arrange and perform another piece. They will perform one piece chosen from modules 1, 2, or 3 in a public venue on campus. The subject will also introduce basic music business skills, such as how to advertise and mount a public performance.
Level: Undergraduate Level 1 subject
Equivalent Subjects: PERF 1008 - Introduction to Music Performance
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 1012 Music Performance 2 (10 Credit Points)
Subject Details (p. 4656) Legacy Code: 102554
Students will extend their performance skills acquired in Music Performance 1 through participating in three modularised workshops. The first two workshops will run in parallel with each other and will be rotated: module 1 will focus on free and notated improvisation; and module 2 will focus on choral performance. Module 3 will extend the skills of reading and arranging music in students' preferred performing media (voice or instrument). In this module, they will perform set technical tasks (such as scales and arpeggios), adding to the skills acquired in Music Performance 1 and, continuing to work in small groups, they will arrange and perform one set piece of music from a basic notated score, and choose, arrange and perform another piece that is different from the music performed in Music Performance 1. They will perform one piece chosen from modules 1, 2, or 3 in a public venue on campus. The subject will also introduce music business skills, such as how to publicise and mount a performance, and how to upload a sample of work to YouTube.
Level: Undergraduate Level 1 subject
Pre-requisite(s): PERF 1008 OR
PERF 1010
Equivalent Subjects: PERF 1013 - Music Performance 2 Notated and Free Musics PERF 1007 - Free and Notated Music Performance
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 1014 Music Production (10 Credit Points)
Subject Details (p. 4657) Legacy Code: 102558
This subject presents an overview of the basic concepts and applications of electronic and digital music production technology in current music and media arts practice. Students will learn the fundamentals of musical acoustics, stereo recording and mixing techniques, and they will be introduced to MIDI systems and sequencing. Technical concepts are contextualised within a survey of current music production practice.
Level: Undergraduate Level 1 subject
Equivalent Subjects: PERF 1005 - Digital Musics 1 Musical Contexts PERF 1009 - Introduction to Sound Technologies
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 1015 Music Theory Fundamentals (10 Credit Points)
Subject Details (p. 4658) Legacy Code: 102564
This subject introduces basic theoretical knowledge such as scales, intervals, chords and progressions. It provides musicianship training in aural, reading and keyboard skills and an introduction to Finale software. Students will learn to analyse harmony and to compose melodies and simple chordal accompaniments in song and theme and variation forms. Keyboard and aural classes will build on the theoretical content presented in lectures.
Level: Undergraduate Level 1 subject
Equivalent Subjects: PERF 1003 - Composition Craft and Theory 1 PERF 1001 - Basic Composition Craft and Theory
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 1016 Popular Music Histories (10 Credit Points)
Subject Details (p. 4658) Legacy Code: 102547
Students will explore some of the most significant trajectories of popular music of the last 100 years. Each week will look a different facet of popular music history, stretching from the stars of the early years of the recorded music industry to the development of electronic dance music. The subject will touch upon folk, jazz, blues, rock, soul, funk, pop, disco, metal, punk, and hip hop to offer a necessarily incomplete tapestry of music scenes, chains of influence, and theories on the points of origin of styles and genres. Indigenous Australian artists are included in this historical survey. Concepts that will be investigated include the relationship of recording and dissemination technologies with popular music creation; the notion of a "mainstream" and its margins; and the idea of a grand narrative of popular music history, including the problems of canonicity.
Level: Undergraduate Level 1 subject
Equivalent Subjects: CART 1006 - Music History 2 PERF 1022 - Western Art Music 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 1023 Western Art Music History (10 Credit Points)
Subject Details (p. 4659) Legacy Code: 102546
This subject explores a range of musical works, styles, genres and composers from the Middle Ages to the twenty-first century. It shows how music evolved through the centuries, suggesting that stylistic changes are linked to innovative musical thinking on the one hand and conformity to established practices on the other. The subject asks how and why different genres and styles in different periods in western art music history come to the foreground while others recede into the background. Within a socio-historical context, the subject investigates the practices that produce musical innovation and considers how the various historical epochs have shaped our understanding of music. The subject includes some rudimentary music analysis and key terminologies and music vocabularies.
Level: Undergraduate Level 1 subject
Equivalent Subjects: CART 1005 - Music History 1 PERF 1021 - Western Art Music 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 1024 Music Theory and Songwriting (10 Credit Points)
Subject Details (p. 4660) Legacy Code: 102770
This subject studies harmony and musical techniques used in a variety of styles, and applies these in the development of song-writing and composition skills. Keyboard and aural classes include practical musicianship training related to the lectures.
Level: Undergraduate Level 1 subject
Pre-requisite(s): PERF 1001 OR
PERF 1015
Equivalent Subjects: PERF 1004 - Composition Craft and Theory 2 LGYA 6571 - Music Craft and Theory 2 PERF 1002 - Composition Craft and Theory PERF 1017 - Songwriting and Music Theory
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 1025 Sound Design (10 Credit Points)
Subject Details (p. 4661) Legacy Code: 102759
The subject builds on the conceptual and practical work presented in Music Production, deepening students' understanding of technology in contemporary music and media arts practice. Students will study the digital field recording for sound design and composition, the basic principles of sound synthesis procedures and musical acoustics, and creative sound design and synthesiser patch editing. Technical concepts are contextualised within a critical survey of contemporary music and sound design practice.
Level: Undergraduate Level 1 subject
Pre-requisite(s): PERF 1009 OR
PERF 1014
Equivalent Subjects: PERF 1006 - Digital Musics 2 - Studio and Soundscape PERF 1019 - Sound Synthesis and the Sound Environment PERF 1018 - Sound Design
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 2001 Arranging Music (10 Credit Points)
Subject Details (p. 4661) Legacy Code: 102566
This subject introduces concepts and skills necessary to arrange music in popular-commercial and orchestral contexts. Lectures provide background on the use of instruments, harmony, timbre and texture, and tutorials provide practical exercises in preparation for the assignments.
Level: Undergraduate Level 2 subject
Pre-requisite(s): PERF 2015 OR
PERF 2004
Equivalent Subjects: LGYA 0425 - Arranging Popular Music PERF 2002 - Arranging Musics
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 2004 Composition and Creativity (10 Credit Points)
Subject Details (p. 4662) Legacy Code: 102548
This subject provides students with a firm grasp of creative principles and practical experience in the range of compositional techniques and skills required as a composer within a range of commonly employed artistic media and genres (classical, world, popular and avant-garde styles). These skills will provide the basis for professional compositional activity. Students will cover creative and technical issues with reference to a wide range of genres to stimulate across boundary thinking towards personal voice within lectures and tutorials. Practical workshops using compositional principles through student improvisation within creative groups will provide sonic demonstration of compositional ideas. The assessments will include both notated scores and recordings (improvisations; one notated score), in keeping with the Internet distribution age.
Level: Undergraduate Level 2 subject
Pre-requisite(s): PERF 1001 OR
PERF 1015
Equivalent Subjects: LGYA 1103 - Music Composition PERF 2015 - Music Composition Concepts and Creativity
Incompatible Subjects: PERF 2009 - Digital Musics 3 Composition Crossovers
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 2011 From Corroborees to Curtain Raisers (Day Mode) (10 Credit Points)
Subject Details (p. 4663) Legacy Code: 101754
This subject will provide students with an understanding of the historical framing and cultural re-framing of Indigenous Australians in the live arts. Students will be provided with a theoretical understanding of the politics of representation through examining and reflecting on the transitional shifts that Indigenous artists' have made from: cultural performance to theatre productions; 'traditional' storytelling to telling of stories through poetry and writing; ceremonial sounds to music and spoken word performance; documentary film to screen based drama to exploring new technologies and moving image performance. Students will be introduced to a variety of Indigenous artists and their creative works.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 2016 Music Group Performance (10 Credit Points)
Subject Details (p. 4664) Legacy Code: 102555
This subject replaces 101521- Collaboration and Live Music Performance. Through a series of lectures and workshops, students will pursue two main threads of practical study imperative to any working musician. The first is collaboration, which will be practised in workshops (with repertoire determined by lecturers) and probed in a written task. The second area of study is the development of a suite of onstage skills and strategies including physical gesture, audience communication and facility with musical equipment.
Level: Undergraduate Level 2 subject
Pre-requisite(s): PERF 1007 OR
PERF 1008 OR
PERF 1012 OR
PERF 1010
Equivalent Subjects: LGYA 1098 - Music Performance 3 Australian Repertoire PERF 2003 - Collaboration and Live Music Performance
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 2017 Music and Wellbeing (10 Credit Points)
Subject Details (p. 4664) Legacy Code: 102248
This subject looks at the psychosocial importance of music to our wellbeing throughout our lives and during each day. Delivered in a lectorial format (lecture with practical activities throughout), the subject explores the relationship between music and the body, mind, emotions, mood, memory, communication and creativity from experimental studies through to practice-based evidence. This subject is not necessarily about performing music, although some music making will take place. Rather, it is focused on how music can improve our wellbeing throughout our lives. The ideas and approaches discussed are important across the humanities, the social sciences and the health sciences, as well as to musicians who are looking to use their music in the therapeutic context.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 2023 The Composer-Performer (10 Credit Points)
Subject Details (p. 4665) Legacy Code: 101539
Students are required to both perform and compose in this subject. While students may choose to perform their own work, this subject also offers the opportunity for students to experience the particular challenges and rewards offered by the close collaboration entailed in both sides of the composer/performer interface. Each student will choose a balance of performance and composition tasks appropriate to her/his specific musical path. The subject presents basic compositional techniques and canvasses issues regarding the composer/performer relationship through a series of lectures, tutorials and workshops. Students will also continue to develop their event administration skills.
Level: Undergraduate Level 2 subject
Pre-requisite(s): PERF 1017
Equivalent Subjects: LGYA 1099 - Music Performance 4 The Composer-Performer
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 2028 World Music (10 Credit Points)
Subject Details (p. 4667) Legacy Code: 102762
This subject examines music from diverse cultures, such as African, Latin American, Middle Eastern, Asian, and the Australia-Oceania region, focusing on the performance, production, and transmission of contemporary fusion music. It explores the cultural-political ways in which the West represents world music as a commodity and considers how the music is inflected with notions of identity, modernity, globalisation, displacement and migration. It charts the ways in which, as a social practice, world music engages politics to promote change, giving voice to marginalised groups. Students will have the opportunity to perform selected rhythms from different cultures. Additionally, they will learn elements of music theory that pertain to the cultures studied in the subject.
Level: Undergraduate Level 2 subject
Equivalent Subjects: PERF 3002 - Contemporary Arts 3 Politics and Communities PERF 2014 - Modes and Codes of Music Production PERF 2025 - The Politics of Australian Music
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 2029 Music Multimedia Project (10 Credit Points)
Subject Details (p. 4668) Legacy Code: 102855
In small groups, students will develop a creative music/sound and multimedia project. The multimedia aspects can include any subset of video, art, text, lighting, digital technology, installations, sound spatialisation, and algorithmic sound/music generation. Students will learn how to integrate music and sound with multimedia; develop their skills in audio and video software; and create interactions between software and hardware devices. Students will gain experience in collaborating on a creative project and contextualising and promoting their work within a broader cultural and intercultural context. Students will be exposed to ways in which music multimedia is used in professional contexts such as web-design, public art, and music software development. The teaching material comprises pre-recorded lectures and guided workshops undertaken on campus.
Level: Undergraduate Level 2 subject
Pre-requisite(s): PERF 1025
Equivalent Subjects: PERF 2027 - Electronic Music Production PERF 2010 - Digital Musics 4 Synthesis and Performance PERF 2021 - Sound Technologies and Machine Musicianship PERF 2008 - Digital Musicianship
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 2030 Musicology as a Professional Practice (10 Credit Points)
Subject Details (p. 4669) Legacy Code: 102858
This subject offers the opportunity for students to apply musicological skills and knowledge to real-world contexts, such as writing program notes, music reviews, and blogs, researching and retrieving music repertories for performance in various ensemble configurations, researching, analysing and critically writing about music from a range of genres, and adopting key analytical strategies for considering music in its cultural, intercultural and historical contexts. The teaching materials and content in this subject will be designed to closely align with and support the practical projects being chosen and designed by students in two project subjects (1 and 3) in the Bachelor of Music. The subject will provide students with a broadly informed view of current issues in music practice.
Level: Undergraduate Level 2 subject
Equivalent Subjects: PERF 2006 - Contemporary Arts Music (Histories) PERF 2007 - Cultural Paradigms and Music
PERF 2018 - Music Culture and Discourse
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 2031 The Music Industry (10 Credit Points)
Subject Details (p. 4669) Legacy Code: 102854
From Autumn 2024, this subject is replaced by PERF 2033 Recording Studio Practices. In this subject students will be given an overview of the music industry, applying music industry theory to real-life situations, and working on real-world projects such as creating a unique image for an artist or band, and promoting and marketing a live gig. Responsibilities, and the pros and cons of going solo or working as a group will be explored together with income generation through record sales, live performance, song publishing, merchandise, and sponsorship. Other aspects, such as artist management, copyright, and contracts, will be covered along with the independent musician and new DIY models for the fast-paced, high-tech world of the future.
Level: Undergraduate Level 2 subject
Equivalent Subjects: PERF 2009 - Digital Music 3 - Composition Crossovers PERF 2013 - Introduction to the Sound Studio PERF 2022 - Studio Production PERF 2026 - Advanced Production
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 2032 Music-making applications for education and therapy (10 Credit Points)
Subject Details (p. 4670) Legacy Code: 102910
This subject assists you in developing your musical competency with a view to applications in education and therapy, since particular types of music skills and applied competencies are required for music teachers and music therapists as they work with students and clients. If you want to develop your musical skills to engage more actively in musical interaction with people, then this is the subject for you! This very practically oriented subject explores applied music literacy and aspects of using music as a tool within the social/educational context, engaging you in vocal, guitar, piano/keyboard and aural activities, as taught by experienced music therapy and education staff. This subject helps you expand your musical potential and career options, supporting you in developing skills to set you up for success in entering your chosen field of study, completing your studies and ultimately being career-ready for your future in the musical context.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 2033 Recording Studio Practices
Subject Details (p. 4671)
This subject builds on concepts and practical work from Music Production and Sound Design. It prepares students creatively and technically to undertake self-directed technology-based projects as composers, sound designers and producers. Students will study professional-level sound studios, multi-track, hard disk recording systems, critical listening, and principles of sonic composition and studio production. Students will propose and complete a major studio-based creative project.
Level: Undergraduate Level 2 subject
Pre-requisite(s): PERF 1019 OR PERF 1018 OR PERF 1025
Equivalent Subjects: PERF 2009 PERF 2013 PERF 2022 PERF 2026 PERF 2031
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 3009 Music Research Methods (10 Credit Points)
Subject Details (p. 4672) Legacy Code: 102429
This capstone musicology subject will consolidate approaches to research transferable to a variety of music careers and post-graduate study. Students will learn to critique various methods, considering their strengths, weaknesses and appropriateness to a self-devised research project. Delivered in a workshop format, each week students will consider a method or aspect thereof and develop skills in pursuing these towards their research outcome. Methods canvassed in the subject include practice-led research, where creative practice can be both the starting point and the research outcome; primary research (where the researcher gathers information from interviews, surveys and so on), music science (cognition and computation); ethics in research; identifying appropriate fields of research; and quantitative and qualitative methods.
Level: Undergraduate Level 3 subject
Equivalent Subjects: PERF 3017 - Music in Theory and Practice
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 3013 Music and Analysis (10 Credit Points)
Subject Details (p. 4672) Legacy Code: 101152
Analysis enables students to acquire a deep and rich understanding of music. This subject will focus on the formal designs, rhythmic, melodic and harmonic structures of notated music, and the structures, contexts and processes of non-notated music. It will include notated and recorded music from the popular song traditions, as well as studio recordings, electronic music and improvisation. It will consider the strengths, weaknesses and cultural biases of various modes of analysis, including the use of musical notation. Students will learn to apply these methods in lectures and tutorials.
Level: Undergraduate Level 3 subject
Pre-requisite(s): PERF 2001 OR
PERF 2004
Equivalent Subjects: LGYA 0424 - Analytical Models in Music
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 3014 Music and Critical Thought (10 Credit Points)
Subject Details (p. 4673) Legacy Code: 102573
Music and Critical Thought considers definitions of music and how music is constituted. It asks how we encounter and experience music, and what makes a piece of music aesthetically pleasing and who decides. It asks whether the meanings attributed to music are as much intrinsic as they are cultural. The subject considers emotions and feelings in music, and why we would listen to music if it makes us feel sad. When music is used as an instrument of torture is it still music? How do we view the composer in the musical work? Where does creativity reside in a musical work? Is there a difference between musical thinking and thinking about music? Is music representational or immanent or both? Is music political? The subject provides an historical overview of the important debates and considers the poststructuralist critique of these debates. Students will design a question chosen from the topics covered in the subject, and retrieve and critically evaluate the appropriate literature for their project.
Level: Undergraduate Level 3 subject
Equivalent Subjects: PERF 3015 - Music and Meaning PERF 3016 - Music and Philosophy
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 3022 Screen Media Composition (10 Credit Points)
Subject Details (p. 4674) Legacy Code: 102563
This subject is the final stage in the Composition and Music Production sub-major sequences. The subject is also available to Media Arts Production and Creative Industries students. The subject aims to prepare students creatively and technically to undertake self-directed sound composition projects for screen media. The areas to be examined include: sound studio techniques, mix processing for sound recording and screen media, an introduction to surround audio techniques, sound composition (score-based and/or sound-scape) for screen, film spotting for sound, audio-visual interactions, and professional communication/pitching of sound composition proposals. Each student produces a complete sound-composition for screen package including sound composition, sound recording, screen media product (including film), and promotional documentation and samples.
Level: Undergraduate Level 3 subject
Pre-requisite(s): PERF 1009 OR
PERF 1014 OR
COMM 2030 OR
PERF 2015 OR
PERF 2004 OR
PERF 3010 OR
PERF 3023
Equivalent Subjects: PERF 3024 - Sound Composition for Screen Media
Incompatible Subjects: PERF 3005 - Digital Musics 6 - Performance Contexts LGYA 1104 - Music Composition Advanced
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 3023 Songwriting and Composer Collaborations (10 Credit Points)
Subject Details (p. 4675) Legacy Code: 102549
This subject extends on the creative principles and practical experience in the range of compositional techniques and skills in the preceding subject Composition and Creativity. It will have two focuses: songwriting in both popular and art-music traditions to allow for the exploration of lyrics/texts; and composer collaborations with large scores for film, photography and dance. Students will work in a wide variety of commonly-employed artistic media and genres at a higher level than in the preceding subject. They will acquire the ability to write for larger instrumental combinations in cross-artform collaborations and songwriting skills. Practical workshops using compositional principles through student improvisation within creative groups will provide sonic demonstration of compositional ideas in relation to songwriting and other media. The assessments will include both notated scores (with visual media options) and recordings (improvisation; one notated score), in keeping with the Internet distribution age.
Level: Undergraduate Level 3 subject
Pre-requisite(s): PERF 2015 OR
PERF 2004
Equivalent Subjects: LGYA 1104 - Music Composition Advanced PERF 3010 - Music Composition Text and Visual Interactions
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 3028 Expanded Performance (10 Credit Points)
Subject Details (p. 4677) Legacy Code: 102856
In small groups, students will plan, prepare, and perform a substantial artistically and technically challenging live performance project. Students' performance practices will be expanded by integrating any thematically linked subset of software, hardware (controllers and synths), video and other multimedia, stagecraft, lighting, spatialisation, algorithms, theory, and improvisation. Students will learn how to integrate music and sound with multimedia and technology; develop their skills in digital audio software and interactive technology; gain experience of working collaboratively on a creative project; and contextualise their work within a broader cultural context. The teaching material comprises lectures and guided workshops, which are undertaken on campus.
Level: Undergraduate Level 3 subject
Pre-requisite(s): PERF 1025
Equivalent Subjects: PERF 3025 - Sound and Performance Expanded Practice PERF 3007 - Expanded Music Performance PERF 3027 - Interactive Electronic Media and Performance
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 3029 Intercultural Music Project (10 Credit Points)
Subject Details (p. 4678) Legacy Code: 102857
In this capstone subject students collaboratively research and create an intercultural music performance, incorporating Diaspora and Indigenous (Aboriginal and Torres Strait Islander peoples) Australian musics and their interaction with global intercultural music perspectives. Collaboration may include musicians from diverse communities in relation to the UN cultural diversity mandate. Activities such as performance, composition, arranging, sound engineering, music administration and other industry-related work will occur in integrated learning contexts and/or placement opportunities that have practical creative or project management outcomes. This subject provides training in music business and personal branding towards creating visibility of cultures and personal creative identity, and it allows students to work as individuals or in groups to build on skills and knowledge developed through their degree.
Level: Undergraduate Level 3 subject
Equivalent Subjects: PERF 3019 - Professional Music Project PERF 3012 - Music Project PERF 3026 - Applied Professional Music Contexts
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 3030 Performing as a Professional Musician (10 Credit Points)
Subject Details (p. 4678) Legacy Code: 102859
Performance as a Professional Musician builds upon preceding subjects in the Performance sub-major to equip students for performance opportunities in real-world environments. Subject matter canvassed includes arrangement and interpretation, real-world writing about performance, stagecraft and event production. With the guidance of the subject coordinator/tutors, vetted through a professional project proposal process, students will prepare and mount a 30-minute performance project as featured performer. The type of repertoire, instrumentation and personnel will be up to the student and will reflect acquired strengths and aspirations. Through a workshop process, students will be encouraged to refine their performance and to further develop their capacity to give colleagues measured and constructive feedback. Short written tasks reflect real-world expectations of the professional musician in the form of project proposal, program note and festival pitch.
Level: Undergraduate Level 3 subject
Pre-requisite(s): PERF 3007 OR
PERF 3028 OR
PERF 3025 OR
PERF 2023
Equivalent Subjects: LGYA 1102 - Music Performance 6 Repertoire and Identity PERF 3011 - Music Performance Repertoire and Identity PERF 3021 - Repertoire and Identity in Performance

PERF 3031 Arranging Music (10 Credit Points)
Subject Details (p. 4679)
This subject extends concepts and skills necessary to arrange music in popular-commercial and orchestral contexts. Lectures provide background on the use of instruments, harmony, timbre and texture, and tutorials provide practical exercises in preparation for the assignments.
Level: Undergraduate Level 3 subject
Pre-requisite(s): PERF 2015 OR PERF 2004
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 3032 Music and Cultural Frameworks (10 Credit Points)
Subject Details (p. 4680)
The cultural frameworks of this subject's title are both the lenses through which we receive and critique music (gender, class, postcolonialism, sexuality, power etc) and the various types of writing through which we perform these critiques. Through this subject, students will be immersed in literature that engages with music through those big lenses, but will also consider various types of writing. Journal articles, conference papers, liner notes, program notes and reviews each do a distinct kind of cultural work. The assessment tasks will enable students to think about their subject positions and develop both their cultural engagement and capacity to choose appropriate forms for their writing.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 6001 Music Therapy Foundations & Approaches (10 Credit Points)
Subject Details (p. 4680)
Music Therapy Foundations & Approaches provides a background to the historical development and theoretical underpinnings of music therapy, with focus on a broad range of music therapy approaches and orientations including Culture-Centred Music Therapy and Nordoff-Robbins Music Therapy. Human development through the lifespan is studied, along with an overview of disability and disorders. The fundamental principles of self-care and supervision for music therapy practitioners and students are introduced within this subject and continued in later subjects of the Master of Creative Music Therapy program.
Level: Postgraduate Coursework Level 6 subject
Equivalent Subjects: PERF 7003 - Music Therapy Method
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 6002 Music Therapy Theory & Practice 1 (10 Credit Points)
Subject Details (p. 4681)
This subject focuses on the delivery of music therapy to infants, children and adolescents with various approaches and settings being explored across the semester. There is an emphasis on the eclectic music therapy approach and how current psychotherapy approaches, practice approaches and music therapy approaches can be successfully combined to meet the therapeutic needs of the music therapy participant/s. An introduction to music therapy research, with particular attention to writing a literature review, is included. The Australian Music Therapy Association (AMTA) standards of practice are overviewed and explored through active group work. In addition, musical analysis, teamwork approaches, creative arts therapy models and group work in music therapy are also explored.
Level: Postgraduate Coursework Level 6 subject
Pre-requisite(s): PERF 6001 - Music Therapy Foundations Approaches OR
PERF 7003 - Music Therapy Method
Equivalent Subjects: PERF 7007 - Music Therapy Theory and Practice 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 6003 Music Therapy Skills & Practice A (20 Credit Points)
Subject Details (p. 4682)
This subject focuses on the development of creative therapeutic music skills to support the delivery of music therapy to individual and group participants across the lifespan. Students learn, practice, and demonstrate a diverse range of skill sets that can be applied within their practicum placements as appropriate. This subject utilises creative active learning experiences within a lectorial (a synthesis of lecture and tutorial) format and addresses focus areas including: practicum placement; therapeutic music skills; music therapy methods (improvisational); technology in music therapy; and culture-centred music therapy.
Level: Postgraduate Coursework Level 6 subject
Equivalent Subjects: PERF 7005 Music Therapy Skills 1 and PERF 7009 Music Therapy Skills and Practice A
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 6004 Music Therapy Skills & Practice B (20 Credit Points)
Subject Details (p. 4684)
This subject focuses on the creative development of therapeutic music skills to support the delivery of music therapy to individual and group participants across the lifespan. Students learn, practice, and demonstrate a diverse range of skill sets that can be applied within their Registered Music Therapist Practicum Placement or Independent Placement as appropriate. This subject utilises creative active learning experiences within a lectorial format and addresses focus areas including: practicum placement; therapeutic music skills; music therapy methods (re-creative); technology in music therapy; and culture-centred music therapy.
Level: Postgraduate Coursework Level 6 subject
Pre-requisite(s): PERF 6003 Music Therapy Skills Practice A OR
PERF 6005 Music Therapy Skills Practice C
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 6005 Music Therapy Skills & Practice C (20 Credit Points)
Subject Details (p. 4685)
This subject focuses on the development of creative therapeutic music skills to support the delivery of music therapy to individual and group participants across the lifespan. Students learn, practice, and demonstrate a diverse range of skill sets that can be applied within their Simulated Music Therapy Practicum or Registered Music Therapist Practicum Placement as appropriate. This subject utilises creative active learning experiences within a lectorial format and addresses focus areas including: practicum placement; therapeutic music skills; music therapy methods (compositional); technology in music therapy; and culture-centred music therapy.
Level: Postgraduate Coursework Level 6 subject
Equivalent Subjects: PERF 7006 Music Therapy Skills 2 and PERF 7011 Music Therapy Skills Practice C
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 6006 Music Therapy Skills & Practice D (20 Credit Points)
Subject Details (p. 4687)
This subject focuses on the development of creative therapeutic music skills to support the delivery of music therapy to individual and group participants across the lifespan. Students learn, practice, and demonstrate a diverse range of skill sets that can be applied within their Registered Music Therapist Practicum Placement or Independent Placement as appropriate. This subject utilises creative active learning experiences within a lectorial format and addresses focus areas including: practicum placement; therapeutic music skills; music therapy methods (receptive); technology in music therapy; and culture-centred music therapy.
Level: Postgraduate Coursework Level 6 subject
Pre-requisite(s): PERF 6003 - Music Therapy Skills Practice A
OR
PERF 6005 - Music Therapy Skills Practice C
Equivalent Subjects: PERF 7002 - Creative Music Therapy Practicum 2

PERF 7003 Music Therapy Method (10 Credit Points)
Subject Details (p. 4688) Legacy Code: 100910
In 2023, this subject replaced by PERF 6001 - Music Therapy Foundations & Approaches. Music Therapy Method provides a background to the historical development and theoretical underpinnings of music therapy, with focus on a broad range of music therapy approaches and orientations including Culture-Centred Music Therapy and Nordoff-Robbins Music Therapy. Human development through the lifespan is studied, along with an overview of disability and disorders. The fundamental principles of self-care and supervision for music therapy practitioners and students are introduced within this subject and continued in later subjects of the Master of Creative Music Therapy course.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 7004 Music Therapy Professional Practice & Research (10 Credit Points)
Subject Details (p. 4689) Legacy Code: 100911
This subject focuses on music therapy professional practice issues including ethics, standards of practice, starting a music therapy business, developing new music therapy positions, working within the National Disability Insurance Scheme (NDIS) and working within interprofessional workplaces. Of equal focus is the further development of research knowledge with an emphasis on research proposal development as relevant to applied music therapy practice across a wide range of settings. Students are engaged in further developing reflective practice and critical thinking skills for effective music therapy practice. The principles of self-care and supervision for music therapy practitioners and students are re-visited within this subject in preparation for completion of the Master of Creative Music Therapy, and graduation as a career-ready music therapist.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): PERF 6001 - Music Therapy Foundations Approaches
PERF 6002 - Music Therapy Theory Practice 1
PERF 7008 - Music Therapy Theory Practice 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 7007 Music Therapy Theory and Practice 1 (10 Credit Points)
Subject Details (p. 4690) Legacy Code: 100912
In 2023, this subject replaced by PERF 6002 - Music Therapy Theory & Practice 1. This subject focuses on the delivery of music therapy to infants, children and adolescents with various approaches and settings being explored across the semester. There is an emphasis on the eclectic music therapy approach and how current psychotherapy approaches, practice approaches and music therapy approaches can be successfully combined to meet the therapeutic needs of the music therapy participant/s. An introduction to music therapy research, with particular attention to writing a literature review, is included. The Australian Music Therapy Association (AMTA) standards of practice are overviewed and explored through active group work. In addition, musical analysis, teamwork approaches, creative arts therapy models and group work in music therapy are also explored.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): PERF 7003
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 7008 Music Therapy Theory & Practice 2 (10 Credit Points)
Subject Details (p. 4691) Legacy Code: 100914
This subject focuses on the delivery of music therapy to young adults, adults and older adults with various approaches and settings being explored across the semester. There is an emphasis on the role that music therapy plays in addressing the therapeutic goals of adult participants within settings including: community, medical, mental health, rehabilitation, and aged care. Verbal skills for music therapists and facilitating music therapy group work are also explored. The next steps in music therapy research are covered, with particular attention to conducting a systematic literature review. Students are guided in how to draw on evidence and examples from music therapy and related fields, through developing applied critical thinking skills and gathering knowledge in a systematic manner. Abstract writing and introduction to writing a research proposal is also included.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): PERF 6001 - Music Therapy Foundations Approaches
PERF 6002 - Music Therapy Theory Practice 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 7009 Music Therapy Skills & Practice A (20 Credit Points)
Subject Details (p. 4692) Legacy Code: 102800
From 2024 this subject will be replaced by PERF 6003 Music Therapy Skills & Practice A. This subject focuses on the development of therapeutic music skills to support the delivery of music therapy to individual and group participants ranging in age from infants to the elderly. Students learn, practice and demonstrate a diverse range of skill sets that can be applied within their SiMPrac field work or Practicum Placement as appropriate. This subject utilises active learning methods within a lectorial format and addresses focus areas including: methods; goals; technology; culture and improvisation.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: PERF 7005 - Music Therapy Skills 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 7010 Music Therapy Skills & Practice B (20 Credit Points)
Subject Details (p. 4693) Legacy Code: 102801
In 2024, this subject is replaced by PERF 6004 Music Therapy Skills & Practice B. This subject focuses on the development of therapeutic music skills to support the delivery of music therapy to participants ranging in age from infants to the elderly. Students practice and demonstrate a diverse range of skill sets that can then be applied within their practicum placement as a major component of this subject. Considerations when planning and delivering individual and group programs are explored, along with technology, composition and cultural issues within music therapy. This subject utilises active learning techniques within a lectorial format.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: PERF 7001 - Creative Music Therapy Practicum 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 7011 Music Therapy Skills & Practice C (20 Credit Points)
Subject Details (p. 4694) Legacy Code: 102802
From 2023, this subject will be replaced by PERF 6005 Music Therapy Skills & Practice C. This subject focuses on the development of therapeutic music skills to support the delivery of music therapy to individual and group participants ranging in age from infants to the elderly. Students learn, practice and demonstrate a diverse range of skill sets that can be applied within their SiMPrac field work or Practicum Placement as appropriate. This subject utilises active learning methods within a lectorial format and addresses focus areas including: methods; goals; technology; culture and improvisation.
Level: Postgraduate Coursework Level 7 subject
Equivalent Subjects: PERF 7006 - Music Therapy Skills 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

PERF 7012 Music Therapy Skills & Practice D (20 Credit Points)
Subject Details (p. 4696) Legacy Code: 102803
In Spring 2023, this subject replaced by PERF 6006 - Music Therapy Skills & Practice D. This subject focuses on the development of therapeutic music skills to support the delivery of music therapy to participants ranging in age from infants to the elderly. Students practice and demonstrate a diverse range of skill sets that can then be applied within their practicum placement as a major component of this subject. Considerations when planning and delivering individual and group programs are explored, along with technology, written case study report writing and cultural issues within music therapy. This subject utilises active learning techniques within a lectorial format.
Level: Postgraduate Coursework Level 7 subject

Philosophy and Religious (PHIL)

PHIL 1001 Ethics and Philosophy (10 Credit Points)
Subject Details (p. 4700) Legacy Code: 101915
This subject introduces students to ethical enquiry - the ways in which we explain what is right and wrong behaviour, perceive good and evil, and try to deal with the different values people hold. Philosophy has long traditions of debating ethical matters, and offers perspectives for trying to answer our ethical questions: this subject introduces the most important and established of those fundamental perspectives, and explains how they arose in their social and historical contexts. The philosophical material will be also be explored through practical examples and questions from contemporary life, in order to enable students to consider ethics today and the sorts of issues they might face.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 1002 Hadith: The Prophetic Tradition (10 Credit Points)
Subject Details (p. 4700) Legacy Code: 102296
The Islamic canon is comprised of two chief sources: Qur'an and Hadith. Muslim life is governed by the manner in which these are understood and applied to the everyday. Whilst the Qur'an is the foundational corpus of the religion, it does not provide specifics on many facets of social and political activity. For this, Muslims rely on sunnah: "habitual practice", which is the body of traditional social and legal custom and practice of the Islamic community. The specialised documentation of Hadith (sayings or actions attributed to the Prophet) made this body of text a reliable and favoured method of knowing the sunnah of the Prophet Muhammad. In this subject students will explore the origin and development of hadith, its sources, and function in Muslim life.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 1003 Hadith: The Prophetic Tradition (WSTC) (10 Credit Points)
Subject Details (p. 4701) Legacy Code: 700161
Islam is a way of life which is governed by the Qur'an, the Muslim principal source of guidance. However, while the Qur'an is the foundation of authority in Islam, it provides few legal injunctions. Hadith (the saying, deeds and actions of Prophet Muhammad) forms the basis for the details of Islamic law and for many tenets of Islamic creed. This subject introduces students to the second most fundamental source of Islam, Hadith. It aims to familiarise students with the origins of the Hadith, its overall structure, content and importantly, its function in Muslim living and to assist them in understanding contemporary issues and debates surrounding Islam.
Level: Undergraduate Level 1 subject
Equivalent Subjects: PHIL 1002 - Hadith The Prophetic Tradition
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 1004 Introduction to Logical Thinking (10 Credit Points)
Subject Details (p. 4702) Legacy Code: 101189
This subject introduces psychology students to the basic aspects of reasoning and argument, with particular emphasis on psychological and scientific thinking. It aims to help students develop the skills needed to understand and evaluate psychological research and the processes of scientific reasoning, and to present their own ideas and arguments effectively. Topics covered include: barriers to critical thinking; nonrational forms of persuasion; the structure of arguments; the concepts of knowledge, belief, truth, validity, soundness, values; linguistics sources of confusion; evaluating arguments; formal and informal fallacies in reasoning; deduction and induction in science; arguments related to enduring debates and worldviews in psychology.
Level: Undergraduate Level 1 subject
Equivalent Subjects: PHIL 1005 - Introduction to Logical Thinking
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 1006 Introduction to Philosophy (10 Credit Points)
Subject Details (p. 4702) Legacy Code: 101918
This subject is an introduction to Western philosophical inquiry: it looks at fundamental questions we have about the way we think of the world around us, and the way we act. It presupposes no prior knowledge of philosophy. We will examine philosophical issues by looking at classic statements from the philosophical tradition. The subject will also help students to develop their skills in writing clear arguments. After completion of the subject students will have a critical understanding of some of the fundamental ideas that shape our thinking and our world.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 2008 Philosophy and the Good Life (10 Credit Points)
Subject Details (p. 4704) Legacy Code: 101881
What does it mean to live a "good life"? One conception of philosophy that goes back to the teachings of the ancient Greeks and Romans is that it is the discipline pre-eminently concerned with teaching people how to live a good life. This subject will investigate the idea of "the good life" through an examination of select texts in ancient and modern philosophy. It will address questions that both ancient and modern philosophers have grappled with: on the right relation between reason and emotion, on the role of pleasure in human life, on the development of character, on the "care of the self," and on pursuing a meaningful life.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 2010 The Ethical Life (10 Credit Points)
Subject Details (p. 4704) Legacy Code: 101867
This subject introduces students to time-honoured ethical questions and controversies. The issues to be examined point to questions that students are likely to face at some stage during their lives: Is death always a bad thing? Is abortion immoral? Are we obligated to give to charity? Should we be vegetarian? Should you have sex outside of a committed relationship? Is ethics founded upon religion, reason or community standards? As well as examining specific issues, students will be introduced to the leading secular and theistic ethical theories.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 2011 The Qur'an: An Introduction (10 Credit Points)
Subject Details (p. 4705) Legacy Code: 101911
This subject is an introduction, in English translation, to the most important text of Islam, the Qur'an, which Muslims regard as the primary source of Islam. Students will study: the origins of the Qur'an, its overall structure and content, major themes, approaches to its interpretation, and its function in Muslim religious, social, cultural and political life. The themes and topics covered (such as God, ethics, women, state, inter-faith relations, and violence) should assist students in understanding contemporary debates on the relevance of Islam today.
Level: Undergraduate Level 2 subject
Pre-requisite(s): HUMN 1061 - Islam Past Present and Future
Equivalent Subjects: LANG 2017 - Great Texts of Islam Qur'an and Hadith
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 2012 The Qur'an: An Introduction (WSTC) (10 Credit Points)
Subject Details (p. 4705) Legacy Code: 700163
This subject is an introduction, in English translation, to the most important text of Islam, the Qur'an, which Muslims regard as the primary source of Islam. Students will study: the origins of the Qur'an, its overall structure and content, major themes, approaches to its interpretation and its function in Muslim religious, social, cultural and political life. The themes and topics covered (such as God, ethics, women, state, inter-faith relations and violence) should assist students in understanding contemporary debates on the relevance of Islam today.
Level: Undergraduate Level 2 subject
Equivalent Subjects: PHIL 2011 - The Qur'an An Introduction
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 2014 Thinkers That Changed the World (10 Credit Points)
Subject Details (p. 4706) Legacy Code: 102571
This subject involves detailed study of a thinker whose work has had a significant influence on how we understand the world. The subject will focus on the thinker's important primary texts, and any other writings that aid an understanding of their contribution to philosophical tradition, ethics, politics, and culture in general. Students will study how the philosopher's ideas have been original, and influenced others to see the world and themselves in new ways. A different philosopher will be the focus of study each year. Thinkers that may be studied in depth include Plato, Aristotle, Hume, Locke, Spinoza, Kant, Kierkegaard, Hegel, Marx, Nietzsche, Arendt, Foucault, Derrida and Girard.
Level: Undergraduate Level 2 subject
Equivalent Subjects: PHIL 2006 - Key Philosophers PHIL 2005 - Case Studies in Philosophy Thinker
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 2015 Thinking Cinema (10 Credit Points)
Subject Details (p. 4707) Legacy Code: 101989
Through close examinations of key philosophical and theoretical writings on film, this subject considers the many ways in which cinema has been 'thought' throughout its short history. Incorporating ontological, phenomenological, psychoanalytic, poststructuralist, cognitivist and other approaches, the subject explores the ways in which key philosophical and theoretical concepts have been taken up and addressed by film, in addition to considering the ways in which cinema can be seen to 'think' for itself.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYA 1673 - Film and Philosophy
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 2016 Truth and Knowledge (10 Credit Points)
Subject Details (p. 4707) Legacy Code: 101983
Attaining knowledge and defining truth are fundamental concerns for all university studies. Philosophy has a long history of explaining what constitutes truth, and how we know what counts as legitimate knowledge. This subject introduces students to the most important conceptions of truth and knowledge, and explains the fundamental methods of reasoning and testing knowledge claims established through the Western philosophical tradition. It should be useful to both studentsspecialising in philosophy, and those interested in discovering more about how knowledge is justified and standards of truth established.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 2017 Western Political Philosophy (10 Credit Points)
Subject Details (p. 4708) Legacy Code: 101912
The major social and political philosophy of the West, from the 5th century BC Greece till the 18th century will be examined. The development of ideas of citizenship, subjectivity, freedom, equality and the democratic state will be explored. The influence of Christianity will also be a major theme. Authors will include: Plato, Aristotle, Augustine, Aquinas, More, Hobbes, Locke, Vico, Rousseau.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYB 0228 - The Western Philosophical Tradition PHIL 2013 - The Western Philosophical Tradition
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 3005 Aesthetics (10 Credit Points)
Subject Details (p. 4709) Legacy Code: 101295
The major philosophies of art will be examined. The Western tradition will be surveyed from the Ancient Greeks through medieval and Renaissance theories of art to modern and postmodern aesthetics beginning with Kant. Marxist and feminist aesthetics will be especially emphasised. The artistic material will primarily come from the visual arts.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYB 0055 - Aesthetics
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 3006 Books that Changed how we Think (10 Credit Points)
Subject Details (p. 4710) Legacy Code: 102570
This subject involves an in-depth study of a philosophical text that has reshaped our understanding about the world we live in. The close reading and discussion will develop the students' capacity to read and think deeply about particular problems. Students will follow the text step by step, gaining insights as to why it has had such a lasting influence.
Level: Undergraduate Level 3 subject
Equivalent Subjects: PHIL 3014 - Philosophy in Focus PHIL 3007 - Case Studies in Philosophy Text
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 3008 Classics of Modern Philosophy (10 Credit Points)
Subject Details (p. 4710) Legacy Code: 102420
Classics of Modern Philosophy introduces students to a selected number of 'great' (highly influential) philosophical texts from the seventeenth up to the twentieth century. Addressing fundamental issues such as human freedom, the nature of truth and knowledge, technological progress, problems of modern life, this subject guides students through key statements with supporting explanation of the philosophers, their projects and careers, and relevant social contexts.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 0902 - Classics of Modern Philosophy
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 3009 Ethical Traditions in Islam (10 Credit Points)
Subject Details (p. 4711) Legacy Code: 101466
This subject introduces students to the rich heritage of ethical traditions in Islamic thought. Students will study and critically evaluate the key features and contributions of Muslim theologians, philosophers and Sufis, who attempted to deal with revelation and rationalistic discourse in exploring the meaning of ethical life for Muslims and discussing whether philosophy and religious wisdoms were equals and allies in the pursuit of happiness. The origin and development of these traditions will be introduced with an emphasis on the relevance and application of some ethical issues, such as free will, predestination, human responsibility, and bioethics, to contemporary Muslim societies.
Level: Undergraduate Level 3 subject
Pre-requisite(s): HUMN 1047 OR
LANG 2017
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 3010 Philosophies of Love and Death (10 Credit Points)
Subject Details (p. 4712) Legacy Code: 100275
The Western experience of the fundamental questions of love and death will be examined. What is love? Is love between friends more important than romantic love? Is death always a bad thing? Is 'coming to terms with death' important for a meaningful life? Ancient Greek, Christian and medieval attitudes will be contrasted with romantic and contemporary views.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 3012 Philosophy and Environment (10 Credit Points)
Subject Details (p. 4712) Legacy Code: 102417
Philosophy and Environment focuses on how we understand and value our interactions with the natural environment, how humans have changed the world and themselves through those interactions and the questions and problems created through that dynamic. Contemporary issues such as climate change, resource depletion, land degradation, conflict over resources, and treatment of animals have become prominent ethical, political and philosophical concerns. This subject looks at these sort of environmental problems through philosophical methods that reveal the traditions of thought, attitude and action underlying them. Students will be introduced to the major approaches and questions most relevant to explaining contemporary environmental problems.
Level: Undergraduate Level 3 subject
Equivalent Subjects: PHIL 2007 - Philosophy and Environment
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 3015 Philosophy of History (10 Credit Points)
Subject Details (p. 4713) Legacy Code: 102493
What is History? This question has been an object of inquiry as much for philosophers as for historians themselves. Large historical forces were at work in the Enlightenment--both in the sciences and in politics--and philosophers like Rousseau and Kant sought to understand these movements philosophically. For Rousseau, the lens was genealogical as he worked to produce a "natural history" of politics and society; for Kant, the historical lens was teleological as he narrated instead a philosophical history full of notions of progress and improvement. In the 19th century, philosophers like Hegel and Marx were concerned to think about history as a dialectical movement, while Nietzsche applied Darwin's new theory of evolution to his understanding of history and morals alike. The great shockwaves wrought by the two World Wars of the 20th century brought new philosophical writers to the problem of history, though now with an eye back toward the seemingly failed vision of inevitable progress so successfully peddled by the Enlightenment. This philosophical tradition and its changing approaches to history will be the focus of this unit.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 3016 Philosophy of Religion (10 Credit Points)
Subject Details (p. 4714) Legacy Code: 101965
This subject examines central issues in the philosophy of religion. Students will look at a variety of ideas emanating from a philosophical consideration of religious belief and practice. Issues include arguments for and against the existence of God, conceptions of religious experience and faith, the relationship between science and religion, and religion and ethics.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 3017 The Body in Culture (10 Credit Points)
Subject Details (p. 4714) Legacy Code: 101009
This subject introduces students to key theorists, concepts, and debates in socio-cultural studies of embodiment. The first module introduces the field of study and explores influential perspectives on bodies as biocultural and social. The subject explores topics such as the social brain, culture and the senses, the modern 'civilised' body, sexed and racialised bodies, ableism and bodily diversity. It will demonstrate how even colonialism, multiculturalism and socio-economic inequalities are lived on the skin, in the body and through the senses. The second module explores current debates and body politics and the content is determined in collaboration with enrolled students. The topics can be as diverse as digital self-tracking; 'fat wars'; race and cosmetic surgery; bodies as commodities, and; sexual difference and sport.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYC 1291 - Gender Culture and the Body LGYA 0293 - The Body in Culture
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 3018 Philosophy of Race and Racism (10 Credit Points)
Subject Details (p. 4715) Legacy Code: 102789
This subject focuses on philosophical approaches to race and racism. Academic discourse about race sits at the intersection of overlapping research programs taking place in a number of fields including cultural anthropology, the history of science, sociology, political theory, communication studies, and critical philosophy of race. This subject will draw on discussions from a number of these fields. Students will interrogate the ways in which subjects are racialized, both by culture and by the state. They will analyse major texts concerned with race and racism, and examine and critique the role of ignorance within racist discourse.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 3019 Thought and Action in Greece and Rome (10 Credit Points)
Subject Details (p. 4716) Legacy Code: 102908
The end of the Peloponnesian War marks the end of the classical period in the history of Ancient Greece. The rise of the Macedonian Empire and then of the Roman Republic prompted the ancients to reflect on their social and political existence. In this subject you will examine how the schools of thought from the Hellenistic period onwards influenced the history, politics and culture of the period. The competing conceptions of thought and action had a profound influence in the history of the political events, economic arrangements, and technological progress of the period.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 7001 Advanced Research Project in Philosophy (10 Credit Points)
Subject Details (p. 4716) Legacy Code: 102617
Advance Research Project in Philosophy enables students with significant knowledge in philosophy and some experience in research techniques and methodologies in philosophy to plan and draft a philosophical project. By identifying a significant question suitable for graduate-level research, students will each develop an individual written project that articulates a coherent philosophical perspective. The aim of the subject is to develop students' capacity to employ philosophical vocabularies and specific discourses in an advanced and sophisticated way.
Level: Postgraduate Coursework Level 7 subject
Pre-requisite(s): PHIL 7012
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 7002 Ethics (10 Credit Points)
Subject Details (p. 4717) Legacy Code: 102381
Since the beginning of philosophy, the question of how to live has taken on an indefinite variety of forms, as befits the variability of its subject matter. This includes the Platonic and Aristotelian conception of the good life, the Kantian categorical imperative, and social ethics. In recent Continental philosophy, this has encompassed the ethics of responsibility, the attempt to investigate the ethics of alterity, interest in the 'care-of-the-self', and the ethics of truth.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 7003 History of Ideas (10 Credit Points)
Subject Details (p. 4717) Legacy Code: 102583
Ideas matter. It has been said that "ideas are what men and women live by, and will occasionally die for." If you want to explore and understand the relationship between ideas and actions across a range periods, places and perspectives, then this is the subject for you. The history of ideas is concerned with exploring and understanding the lived experience, the reality of ideas. We consider how the history of ideas can help us to interpret key thinkers and their ideas and how these ideas have shaped societies past and present.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 7004 Masters Project in Philosophy (40 Credit Points)
Subject Details (p. 4718) Legacy Code: 102401
In this unit, those enrolled in the MA in Continental Philosophy will write a minor thesis on a research question in philosophy. For this project, the students will be supervised by one or two members of staff working in philosophy.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 7005 Philosophical Aesthetics (10 Credit Points)
Subject Details (p. 4718) Legacy Code: 102380
This subject involves study of aesthetics, which may include philosophical approaches to art and artistic genres such as literature and cinema, and to beauty itself. It will include an historical overview of the field, an analysis of one particular set of problems or debates, and a close examination of a specific school or thinker. It will explore concepts of aesthetic judgement and value, as well as the relationship between aesthetics and other aspects of philosophy.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 7006 Philosophy and Literature (10 Credit Points)
Subject Details (p. 4719) Legacy Code: 102616
The relationship between philosophy and literature is as old as philosophy itself. In fact, philosophy begins and defines itself in Ancient Greece by setting itself apart from literature - specifically, epic and tragic writings - and claiming for itself a more original role in the effort to understand what is true, what matters, and how one should be with others. From Ancient Greece, through Hellenism and the Roman world, and into the Medieval and Modern periods there was an enduring concern in philosophical traditions with literature, literary themes, and questions of style. However, at the end of the Modern period the concern with literature became so pronounced that philosophers began to write literary texts and to experiment with new styles of expression. Beginning with Kierkegaard and Nietzsche, and moving up to Sartre and Camus, this question of the relation of philosophy and literature has become a central concern of many contemporary philosophical traditions. This subject will be devoted to exploring both the history of this relation between philosophy and literature, as well as looking more carefully at various moments in that history.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 7007 Philosophy of History and Politics (10 Credit Points)
Subject Details (p. 4720) Legacy Code: 102582
What is History? What justifies the State? These questions have been an object of inquiry as much for philosophers as for historians and political theorists. Large socio-political forces were at work during the Enlightenment and philosophers like Rousseau and Kant sought to understand these movements philosophically. For Rousseau, the lens was genealogical as he worked to produce a "natural history" of politics and society; for Kant, the historical lens was teleological as he narrated instead a philosophical history full of notions of progress and improvement. In the 19th century, philosophers like Hegel and Marx were concerned to think about history and politics as a dialectical movement, while Nietzsche applied Darwin's new theory of evolution to his understanding of history and morals alike. The great shockwaves wrought by the two World Wars of the 20th century brought new philosophical writers to the problems of history and politics, though now with an eye back toward the seemingly failed vision of inevitable progress so successfully peddled by the Enlightenment. This philosophical tradition and its changing approaches to history and politics will be the focus of this unit.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 7008 Philosophy of Nature (10 Credit Points)
Subject Details (p. 4720) Legacy Code: 102619
This subject examines questions and problems concerning the concept of nature or 'naturalness'. What does it mean to call something 'natural' and how are natural things to be distinguished from artificial things or things that are human made? How does technology influence our understanding of nature? What are the ethical implications arising from human relations with the natural world? As well learning time-honoured answers to such questions, students will appreciate the practical relevance of philosophical theorising about nature.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 7009 Philosophy, History and Interpretation (10 Credit Points)
Subject Details (p. 4721) Legacy Code: 102620
The focus of this subject will be a topic, or range of topics, particularly relevant in philosophy, which will be analysed both in their historical context and through subsequent interpretations by other philosophers or philosophical traditions. The subject will combine the hermeneutic interpretation of texts together with conceptual and argumentative analysis. Close attention will be paid to the language and systematic content of the philosophical issues examined. Moreover, students will be guided in factoring in the historical situation both for the philosopher(s) examined and for us as interpreters.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 7010 Political Philosophy (10 Credit Points)
Subject Details (p. 4721) Legacy Code: 102384
According to Aristotle's famous definition, the human is a political animal. Since the first theorization of the political in ancient Greek philosophy, politics has been thought from a variety of different angles. These range from traditional approaches such as the forms of government or the ways in which the sovereign can exercise power, to contemporary alternative approaches, such as theories of radical democracy which emphasize the participatory and agonistic aspects of the political. This subject will cover some fundamental texts and ideas in political philosophy.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 7011 Practical Philosophy (20 Credit Points)
Subject Details (p. 4722) Legacy Code: 102618
The subject Practical Philosophy deals with the application of philosophical understanding to human activity. 'Practical philosophy' in principle encompasses questions of the meaning and appropriateness of various practices, as well as theoretical questions about the nature of practices themselves, questions such as 'What should we do?' and 'What is it that we are doing?' The subject may thus involve considering philosophical perspectives on ethical, political, educational, and legal questions, and more abstract considerations relating to practices such as the philosophy of action.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 7012 Research Project in Philosophy (10 Credit Points)
Subject Details (p. 4723) Legacy Code: 102382
Research Project in Philosophy develops research techniques, understanding of methodologies, and procedures in planning and drafting a philosophical project. Through identifying contemporary issues and questions suitable for graduate-level research. Students will each develop an individual written project that articulates a coherent philosophical perspective. The aim of the subject is to develop students' understanding of philosophical vocabularies, specific discourses, and logics as they pertain to a particular philosophical issue or problem that they will address in writing.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 7013 Special Topics in Philosophy (20 Credit Points)
Subject Details (p. 4723) Legacy Code: 102379
The Special Topics in Philosophy subject engages with current debates and developments in philosophy. These contemporary debates will be contextualized within the historical and conceptual framework of the continental tradition of philosophical inquiry. Engagement with contemporary topics in philosophy and the most recent developments in the field will enable students to find what is innovative and original in their own thought and field of research.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 7014 The Image of Thought: Art, Film and Philosophy (10 Credit Points)
Subject Details (p. 4724) Legacy Code: 102584
Working on the assumption that art is capable of exploring philosophical issues in its own right, the subject considers how various arts from poetry to contemporary film help shape our understanding of things like metaphysics, epistemology, ethics and morality.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 7015 Theoretical Philosophy (20 Credit Points)
Subject Details (p. 4724) Legacy Code: 102615
Theoretical Philosophy focuses on theories of knowledge, theories of being, and systems of thought. While it is traditionally described under the heading of epistemology and metaphysics, theoretical philosophy should be more broadly understood as devoted to philosophical investigations into the underlying systems, theories, and presuppositions upon which any account of the world, experience, or even truth has been built. This subject will be devoted to an explication of either thematically related theoretical investigations, such as, for example, '17th-century theories of matter,' or 'the nature of language,' or it will focus instead on one central philosophical figure, e.g., 'Plato's metaphysics of the soul,' 'Kant's system of transcendental idealism,' etc.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 7016 Topics in the History of Philosophy (20 Credit Points)
Subject Details (p. 4725) Legacy Code: 102383
This subject surveys selected philosophers or philosophical movements in the history of philosophy, and of the relevance of such philosophical perspectives for contemporary debates. The subject will include a selection of material that will give students a deeper understanding of the history of philosophy from Ancient Greece to the present day.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHIL 7017 What is Islam? (10 Credit Points)
Subject Details (p. 4725) Legacy Code: 102585
The 'Muslim question' has been a topic of interest to Western scholarship for over four hundred years. The subject addresses this question in two ways: firstly, by exploring internal historical conceptualisations of the faith-identity of Islam, and examining how these have shaped modern understandings of Islam from within the faith; secondly, by introducing students to multidisciplinary approaches to the study of Islam and inviting them to consider the construction and deconstruction of Islamic Studies as a field of study at various stages of history. The subject provides students with the opportunity to gain increased awareness of both debates within the field and those that scrutinise the field, that is, becoming comfortable with interrogating the cluster of theoretical and methodological strategies for scholarly inquiry into the study of Islam.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

Physics and Astronomy (PHYS)

PHYS 0001 Foundation Physics 1 (WSTC Prep) (10 Credit Points)
Subject Details (p. 4726) Legacy Code: 700144
This subject replaces 700026 - Physics (UWSCFS) from Term 1 2014. This subject provides a brief introduction to the essentials of Physics. This subject is focused on skills and knowledge that students from a variety of science, construction and engineering courses need in their first year of study. Students cover introductory topics in Mechanics, Energy and Power, Electricity and waves.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: PHYS 0002 - Foundation Physics 1 (UWSC)
Incompatible Subjects: PHYS 0006 - Physics (UWSCFS) PHYS 0005 - Physics (UWSC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHYS 0002 Foundation Physics 1 (WSTC) (10 Credit Points)
Subject Details (p. 4727) Legacy Code: 900079
This subject provides a brief introduction to the essentials of Physics. This subject is focused on skills and knowledge that students from a variety of science, construction and engineering courses need in their first year of study. Students cover introductory topics in Mechanics, Energy and Power, Electricity and Waves.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: PHYS 0001 - Foundation Physics 1 (WSTC)
Incompatible Subjects: LGYB 1383 - Physics (WSTC) PHYS 0006 - Physics (WSTC Prep)
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHYS 0003 Foundation Physics 2 (WSTC Prep) (10 Credit Points)
Subject Details (p. 4727) Legacy Code: 700145
This subject provides students with the background knowledge and skills in physics needed for Engineering courses. Students will cover more advanced content in Mechanics, Electricity, Magnetism and waves.
Level: Undergraduate Level 0 Preparatory subject
Pre-requisite(s): Students enrolled in 7066 Diploma in Engineering Extended must have passed PHYS 0001 Foundation Physics
Equivalent Subjects: PHYS 0004 - Foundation Physics 2 (UWSC)
Incompatible Subjects: LGYB 1383 - Physics (UWSC) PHYS 0006 - Physics (UWSCFS)
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHYS 0004 Foundation Physics 2 (WSTC) (10 Credit Points)
Subject Details (p. 4728) Legacy Code: 900080
This subject provides students with the background knowledge and skills in physics needed for Engineering courses. Students will cover more advanced content in Mechanics, Electricity, Magnetism and waves.
Level: Undergraduate Level 0 Preparatory subject
Pre-requisite(s): PHYS 0002
Equivalent Subjects: PHYS 0003 - Foundation Physics 2 (UWSCFS)
Incompatible Subjects: PHYS 0005 - Physics (UWSC) PHYS 0006 - Physics (UWSCFS)
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHYS 0006 Physics (WSTC Prep) (10 Credit Points)
Subject Details (p. 4729) Legacy Code: 700026
This subject serves as an introduction to the fundamentals of physics with appropriate applications in a wide range of engineering areas.
Level: Undergraduate Level 0 Preparatory subject
Equivalent Subjects: PHYS 0005 - Physics (UWSC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHYS 1002 Physics 1 (10 Credit Points)
Subject Details (p. 4729) Legacy Code: 300828
Physics is the study of the fundamental nature of matter, energy, space-time, and motion. It uses conceptual, mathematical and experimental tools to achieve this understanding. In this subject, we survey mechanics, electromagnetism, optics and thermal physics, and briefly consider relativity, quantum physics and nuclear physics. Conceptual, mathematical and experimental understanding of physics will be developed, and the use of the tools of physics (e.g. estimation, uncertainty, dimensional analysis) will be introduced. This subject provides non-specialists (e.g. students in other majors and aspiring secondary teachers) with a good basic overview of the subject, and prepares specialist students for further study.
Level: Undergraduate Level 1 subject
Equivalent Subjects: PHYS 1003 - Physics 1 PHYS 1004 Physics 1 (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHYS 1004 Physics 1 (WSTC) (10 Credit Points)
Subject Details (p. 4730) Legacy Code: 700035
This subject provides an introduction to physics for science and medical science students as well as providing a basis for further study of more advanced physics for students pursuing courses in nanotechnology, chemical, physical and mathematical sciences. It provides a foundation to understand the physical principles which underlay scientific instrumentation and analysis. Topics covered include systems of units; Introductory mechanics, Newton's laws, work, conservation of energy and momentum; Electricity, electrostatics, DC and AC circuits and components, introductory electromagnetism; Waves and optics, electromagnetic radiation, reflection, refraction, image formation, polarisation, interference and diffraction.
Level: Undergraduate Level 1 subject
Equivalent Subjects: LGYA 3630 - Engineering Physics PHYS 1001 - Physics 1 LGYA 5727 - Physics 1D PHYS 1003 - Physics 1 PHYS 1002 - Physics 1
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHYS 1006 Physics 2 (10 Credit Points)
Subject Details (p. 4731) Legacy Code: 300829
This subject develops a deeper understanding of physics for students pursuing courses in nanotechnology, chemical, physical and mathematical sciences. Topics covered include Mechanics: Equilibrium, stress and strain, harmonic oscillators, rotational motion, moment of inertia. Gravitation, types of force in nature. Thermal Physics: temperature, specific & latent heat, heat transfer, kinetic theory of gases, first law of thermodynamics, isothermal, isobaric & adiabatic processes. Introduction to Modern Physics: special relativity, time dilation, length contraction, momentum, mass, rest energy, velocity addition. Basic quantum theory, Planck's hypothesis, wave nature of matter, quantum mechanical view of atoms. Nuclear physics, radiation, half-life, nuclear reactions.
Level: Undergraduate Level 1 subject
Equivalent Subjects: LGYA 6150 - Physics 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHYS 2004 The Cosmos in Perspective: Information and Life (10 Credit Points)
Subject Details (p. 4731) Legacy Code: 300966
From the Big Bang to the end of the Universe, from our own Solar System to the farthest superclusters of galaxies, our knowledge of the Universe is growing at an amazing rate. This subject will explore the cosmos at scales from planets to the edge of the visible universe. We develop an appreciation of the processes of science, and an understanding of how astrophysicists know what they know. We will consider cultural perspectives on the cosmos, including that of indigenous Australians. We will consider our place in the cosmos: the requirements for life to exist, and the possibility of other life in the Universe.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHYS 2005 Classical Physics and Advanced Technologies (10 Credit Points)
Subject Details (p. 4732) Legacy Code: 301393
This subject explains in depth aspects of classical mechanics related to forced and damped oscillations. Physical waves are introduced and formalized by describing applications of the wave equation to mechanical systems and electromagnetic radiation. Interference and diffraction are detailed using electromagnetic fields (physical optics). Main technological applications of mechanical oscillations and electromagnetic waves are also explained, such as the atomic force microscope, laser, optical tweezers and the zeta-sizer.
Level: Undergraduate Level 2 subject
Pre-requisite(s): PHYS 1006
Equivalent Subjects: LGYA 6024 - Applied Instrumentation in Nanotechnology
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHYS 3001 Astroinformatics (10 Credit Points)
Subject Details (p. 4733) Legacy Code: 300916
Modern astronomy is strongly driven by large datasets, which require advanced computing procedures to analyse. Students will learn about the science of stars, planets and galaxies; the use of computers in science; and how to formulate and solve challenging problems in modern science using high-level computer skills. These skills are highly transferable to other occupations.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHYS 3006 Classical Physics (10 Credit Points)
Subject Details (p. 4733) Legacy Code: 301262
This subject covers the key components of classical physics to the advanced level expected of a physics major. Newtonian mechanics will focus on realistic problems, in three dimensions and in the presence of friction and drag. Electromagnetism introduces Maxwell's equations, and applies them in the presence of matter. Thermodynamics is presented rigorously, focusing on the most general forms of the first and second laws. We will also introduce the basic elements of statistical physics. Fluids and waves will introduce the basic equations of fluids, and in particular the full (PDE) wave equation and its solution.
Level: Undergraduate Level 3 subject
Pre-requisite(s): PHYS 1006
Incompatible Subjects: CHEM 2003 Classical Physics and Applied Technologies
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHYS 3007 Quantum Physics (10 Credit Points)
Subject Details (p. 4734) Legacy Code: 301392
The subject builds on quantum concepts that have been introduced in earlier subjects such Physics 1,2, Nanotechnology and Chemistry. It aims at developing the student's understanding of quantum principles as they apply to hard and soft matter systems, including atoms , molecules and extended arrays such as metal and semiconductors as well as biological tissue
Level: Undergraduate Level 3 subject
Pre-requisite(s): PHYS 1006 - Physics 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHYS 3008 Biomedical Physics (10 Credit Points)
Subject Details (p. 4735) Legacy Code: 301459
Students completing this subject will be able to apply the principles and practice of physics to advanced biomedical applications, to critically analyse data regarding, and solve problems involving the physics of living systems, and to work with a range of advanced instrumentation. This subject will provide advanced training in biomedical physics and prepare students for career pathways in medical and biomedical physics. The subject content includes concepts of diffusion and Brownian motion; applications of thermodynamics to biological systems and the origin of life; biomolecular self-assembly; nuclear magnetic resonance and magnetic resonance imaging; atomic force microscopy; molecular dynamics simulations; biophotonics; and nuclear and radiation physics in biomedical sciences.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHYS 7001 A Cosmic Perspective (10 Credit Points)
Subject Details (p. 4735) Legacy Code: 301247
The subject explores and challenges scientific as well as cultural perspectives on the cosmos, from its composition, expansion and the development and endings of the stars and planets, to life, its limits, evolution and mass extinctions on Earth. The subject also considers the development of consciousness, astrology vs astronomy, expanding horizons, space travel and space exploration.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHYS 7002 Space Instrumentation, Technology and Communication (10 Credit Points)
Subject Details (p. 4736) Legacy Code: 301248
The Space Instrumentation, Technology and Communication subject is focussed on the application of space technology in industrial settings. Its main objective is to provide a sound knowledge of the underlying principles which form a thorough basis for careers in space technology, satellite communications and related fields. This subject gives the student grounding in the technologies used in space science. By considering the underlying scientific principles and case studies of the instrumentation used in space, students will not only understand the current state of the art in space science, but also the foundations of the field in order to be able to stay current in this fast-moving field. Content includes but is not limited to: Imaging, Detectors, Principles of Communication, and Principles of Space Technology.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHYS 7003 Space Science, Planetary Science and Meteorology (10 Credit Points)
Subject Details (p. 4737) Legacy Code: 301249
This subject examines the six key priorities of the Australian Space Agency: communication, space debris monitoring, navigation and positioning, Earth observation, space technology research and development, and remote asset management. Students will examine the Sun and Solar System, planetary science, meteorology, and the physics of rockets and satellites. Students will explore the interconnections between the Earth land, ocean, atmosphere, and life of our planet in the era of modern satellite technologies. These include the critical review of our understanding about the cycles of water, carbon, rock, and other materials that continuously shape, influence, and sustain Earth and its inhabitants. Students will also be able to design new models of the cyclical interactions between the Earth system and the Sun, Moon and will discover the fundamental processes which define our Universe and our planet.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PHYS 9001 Higher Degree Research Thesis - Physics (80 Credit Points)
Subject Details (p. 4738) Legacy Code: 800121
Level: PhD and Research Masters Level 9 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

Political Science and Policy (POLI)

POLI 1001 Australian Politics (10 Credit Points)
Subject Details (p. 4738) Legacy Code: 100848
In 2013 this subject replaced by 101973 - Australian Politics. This subject provides an introduction to Australian Politics. It outlines the central features of the federal political system with attention to both historical background and current debates. In addition to study of the institutional frameworks (the Constitution, parliament, political parties and so on), the subject examines the dynamics of inclusion and exclusion that have shaped Australian politics. It explores what it has meant in the past, what it means in the future, for Australians to live together as members of a political community.
Level: Undergraduate Level 1 subject
Equivalent Subjects: LGYB 0226 - Australian Politics LGYA 0270 - Introduction to Australian Politics
Restrictions: Please see the Subject Details page for any restrictions for this subject

POLI 1002 Introduction to International Relations (10 Credit Points)
Subject Details (p. 4739) Legacy Code: 101956
In 2022, this subject is replaced by POLI 1007 World Politics and International Relations. This is a foundation subject for the major in International Relations and Asian Studies. As such, this subject will introduce students to key topics and debates in the field of International Relations (IR). The subject will familiarise students with leading IR theories and their explanation of political events, phenomena, and processes which cross the territorial boundaries of the state. Students will be exposed to the interplay between power, interest, ideas, identity, and resistance, in explaining continuity and change in international relations. The subject is designed to provide students with the analytical tools and intellectual frameworks needed to understand the behaviour of different international actors in contemporary global affairs.
Level: Undergraduate Level 1 subject
Equivalent Subjects: POLI 1003 - Introduction to International Relations (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

POLI 1003 Introduction to International Relations (WSTC) (10 Credit Points)
Subject Details (p. 4739) Legacy Code: 700268
In Term 3, 2022 this subject replaced by POLI 1008 - World Politics and International Relations (WSTC). This subject will introduce students to key topics and debates in the field of International Relations (IR). The subject will familiarise students with leading IR theories and their explanation of political events, phenomena, and processes which cross the territorial boundaries of the state. Students will be exposed to the interplay between power, interest, ideas, identity, and resistance, in explaining continuity and change in international relations. The unit is designed to provide students with the analytical tools and intellectual frameworks needed to understand the behaviour of different international actors in contemporary global affairs.
Level: Undergraduate Level 1 subject
Co-requisite(s): Students enrolled in the combined DiplomaBachelor courses listed below must pass all College Preparatory units listed in the course structure before progressing to the Year 2 units
Equivalent Subjects: POLI 1002 - Introduction to International Relations
Restrictions: Please see the Subject Details page for any restrictions for this subject

POLI 1007 World Politics and International Relations (10 Credit Points)
Subject Details (p. 4740)
This subject is an introduction to the key topics and debates that make up contemporary world politics and international relations. The subject will address the major historical developments, key issues and the various actors and institutions that make up world politics. Students will be introduced to some of the principal international relations theories that will provide them with the tools to investigate specific challenges confronting states, citizens, and non-state actors in our increasingly interconnected world. Issues of war and peace, state sovereignty, globalisation, global inequality, humanitarian intervention and human security will be addressed.
Level: Undergraduate Level 1 subject
Equivalent Subjects: POLI 1002 Introduction to International Relations POLI 1003 Introduction to International Relations (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

POLI 1008 World Politics and International Relations (WSTC) (10 Credit Points)
Subject Details (p. 4741)
This subject is an introduction to the key topics and debates that make up contemporary world politics and international relations. The subject will address the major historical developments, key issues and the various actors and institutions that make up world politics. Students will be introduced to some of the principal international relations theories that will provide them with the tools to investigate specific challenges confronting states, citizens, and non-state actors in our increasingly interconnected world. Issues of war and peace, state sovereignty, globalisation, global inequality, humanitarian intervention and human security will be addressed.
Level: Undergraduate Level 1 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

POLI 1010 Advanced Standing for Global Politics and International Relations 120 (20 Credit Points)
Subject Details (p. 4742)
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

POLI 2006 Politics of Australia and Asia Relations (10 Credit Points)
Subject Details (p. 4743) Legacy Code: 100277
In 2024, this subject is replaced by POLI 2008 - Transnational Diplomacy. In this subject students will become familiar with Australian diplomacy and appreciate the range of pressing historical, political and cultural issues that affect Australia's place in the Asia Pacific region. It explores the factors that have shaped Australia's relationships with key countries in the region and considers the vital impact of political actors and their ideological stances. In developing a depth of knowledge on the importance of Australia's regional policies, this subject provides students with the opportunity to be involved in a simulation task dealing with a 'hot topic' for Australia's relations within the Asia Pacific region.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

POLI 2008 Transnational Diplomacy (10 Credit Points)
Subject Details (p. 4743)
In an interconnected, globalised and complex world, diplomatic dialogue on multiple levels has become increasingly important for peaceful relations. This subject provides an introduction to the important and prestigious arena of diplomatic practice for students interested in an international career. Transnational diplomacy takes into consideration the perspective of multiple international actors in dealing with contemporary challenges including states, international organisations, and non-state actors. In considering multi-track diplomacy in the context of contemporary bilateral, regional, and multilateral relations, you will have the opportunity to engage with senior diplomats from Australia and elsewhere. Students will participate in a simulated soft power diplomacy campaign built upon the rich cultural diversity and international connections unique to Western Sydney, equipping you with real-world skills to effectively represent your country or organisation at an international level.
Level: Undergraduate Level 2 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

POLI 3001 Activism, Engagement and Social Change (10 Credit Points)
Subject Details (p. 4744) Legacy Code: 101981
This subject is designed for students interested in the politics, processes and ethics of social change. It covers the topics of Internet activism, NGO politics and ethics, identity politics, legal lobbying, revolutions and regime changes, and the role of art in consciousness raising. We will explore the efficacy of different social change strategies, the ethics of various modes of activism, the role that national and transnational politics plays in campaigning, the importance of identity for engagement with social change processes, and the ideologies informing theories of change.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

POLI 3004 American Foreign Policy Since 1945 (10 Credit Points)
Subject Details (p. 4745) Legacy Code: 100985
This subject will analyse both the major international issues and crises which America confronted after 1945 and how successive American presidents and their policy makers responded to these problems
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYB 4964 - American Foreign Policy LGYA 0954 - American Foreign Policy Since 1945
Restrictions: Please see the Subject Details page for any restrictions for this subject

POLI 3005 Democracy in Asia (10 Credit Points)
Subject Details (p. 4746) Legacy Code: 100903
This subject is concerned with the theory and practice of democracy in modern and contemporary history of Asia. It explores a range of issues relating to liberalism, human rights, political reform and democratization. It seeks to explain the differences in the ways in which democracy has been conceived, understood and practiced in different cultures and societies. It also examines the East-West debate on "Asian values" and the suitability of Western-style democracy to Asia. Finally, it discusses the prospects for democracy in Asia.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 9998 - Democracy in Asia
Restrictions: Please see the Subject Details page for any restrictions for this subject

POLI 3006 International Organisations and Global Governance (10 Credit Points)
Subject Details (p. 4746) Legacy Code: 102189
This subject addresses the competing concepts inherent in global governance through an examination of the existing international society of states whose principle is based on respect for state sovereignty. It also addresses the complex process of global governance in which states, non-governmental organisations, multinational corporations, and intergovernmental organisations participate and pursue their goals. It will specifically look at the complex role of the United Nations, the United Nations Security Council, and the role of international organisations aimed at addressing issues, such as security, human rights, humanitarian intervention, trade, the environment, health, migration, and labour rights.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

POLI 3007 International Relations of Southeast Asia (10 Credit Points)
Subject Details (p. 4747) Legacy Code: 102190
This subject focuses on the key international relations issues and challenges facing the Southeast Asian region in the 21st century. Commencing with the historical issues that have shaped the nations of Southeast Asia it will then consider the issues, such as the war on terrorism; the economic demands of globalism; maritime security; and social and political demands centred around issues such as democracy, human rights, the environment, and transnational crime. Finally, it will consider the shifting power structure within the Asian region and whether this will result in Southeast Asia gaining genuine autonomy and the impact this has on regionalism.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

POLI 3008 International Special Study (10 Credit Points)
Subject Details (p. 4748) Legacy Code: 102193
This subject provides students with opportunities outside the usual classroom experience. It is designed particularly for students who (1) enrol in short-course study tours, and/or (2) who take a placement within an international workplace. Several Western Sydney University partner institutions (e.g., the University of Seoul) run annual short-course study programs. With regard to placements (internships), students must seek a placement that connects directly with their areas of study.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

POLI 3009 Looking at Global Politics Through Film (10 Credit Points)
Subject Details (p. 4748) Legacy Code: 101733
Popular representations of world politics shape our collective understanding of political history and international relations. This subject examines the ways in which film can communicate political messages to its audience, as well as the far more difficult issue of the effects that those messages might have on viewers. Although the discipline of International Relations (IR) has overwhelmingly ignored popular culture, it is the argument of this subject that popular culture actually provides us with a wealth of significant representations of world politics.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

POLI 3010 Politics of Post-War Japan (10 Credit Points)
Subject Details (p. 4749) Legacy Code: 100278
The subject studies the post-war Japanese political experience: a vanquished country transformed into an economic super power with a 'peace' constitution and now in relative decline. In particular the subject will examine the impact of the dominance of the Liberal Democratic Party on domestic politics and the intersection between domestic political developments and security and foreign policy matters.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

POLI 3012 The Politics of Civilisation (10 Credit Points)
Subject Details (p. 4750) Legacy Code: 102005
What is civilisation? What are civilisations? What does it mean to be civilised? What does it mean to be uncivilised, barbaric or savage? These are some of the key questions explored in this unit. We will investigate the normative demands of civilisation, from 16th Century European colonial 'civilising missions' to the 21st Century global war on terror. We will explore the history of relations between civilisations in light of the 'clash of civilisations' thesis, including relations between the Western and Islamic worlds. We will discover the power of ideas and the influence they can have on real world policy-making.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

POLI 3014 War and Peace (10 Credit Points)
Subject Details (p. 4750) Legacy Code: 101375
This subject examines problems and issues in international politics. In particular the subject critically assesses the major theoretical paradigms associated with attempts to explain international behaviour of key individuals, nations and the international system. Major issues and key problems in world affairs since the end of World War Two (such as justice and equality, human rights and terrorism) are examined.
Level: Undergraduate Level 3 subject
Incompatible Subjects: LGYB 0053 - War and Peace

POLI 3016 International Relations Project (10 Credit Points)
Subject Details (p. 4751)
This is a capstone subject in the Bachelor of International Studies and forms one of the core subjects. The aim of the subject is for students to apply the skills and knowledge developed during the Bachelor of International Studies and relate this to a range of real-world issues of a global nature. Students will develop an individual project based around an actual scenario in International Studies. It may be a project based on an authentic real-world issue for an industry partner; a project designed to address an issue which the student has identified; or a research proposal for future postgraduate study. Industry partners include companies, government departments, IGOs, NGOs and other organisations that have some international focus.
Level: Undergraduate Level 3 subject

POLI 7001 Development and Security (10 Credit Points)
Subject Details (p. 4751) Legacy Code: 101896
Successful development requires the provision of security. As a corollary, lack of development can breed insecurity and violence. The overall nexus between development and security is not only about a country's domestic affairs; it concerns the global community. Amid the increasing pace of globalisation, global inequalities both within and between countries have increased, which have been complicated by competitions between groups, actors and countries. These may pose development and security challenges at national and global scales. This subject will concentrate on three key aspects. First, it will interrogate the complex relationship between development and security from interdisciplinary perspectives. Second, this subject will examine the development roots of insecurity focusing on social and economic structures and key issues in development and security from local and global perspectives as well as from micro and macro outlooks. Third, relevant case studies will be embedded throughout the subject contents to enhance students' analytical skills and practical orientation on the field of development and security.
Level: Postgraduate Coursework Level 7 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

POLI 7002 Translation from Theory and Research to Policy (10 Credit Points)
Subject Details (p. 4752) Legacy Code: 102180
The focus of study in this subject is on policy-making and implementation and the place of theory and research in policy formation. In the first part of the subject students explore the nature of public policy - addressing constructs of policy and policy-making and approaches to analysing public policy. The political and social practices of policy-making and implementation in Australia are contextualised and examined at the local, national and global levels. The second part of the subject takes examples of policy-making in the field of social sciences and examines the role of theory and research in the problematisation of issues and identification of solutions. The identification of competing interests, relations of power and key players in understanding, analysing and responding to policy and its outcomes will be undertaken.

Process and Resources Eng. (PROC)

PROC 1002 Food Science 1 (10 Credit Points)
Subject Details (p. 4754) Legacy Code: 300805
Food provides sustenance to life, nutrition for good health, enjoyment and cultural identity. Students will gain an awareness of the history and cultural significance of food and its traditions in Australia and around the world. This subject introduces the basic principles for understanding the science behind food; its composition, chemical, physical and functional characteristics. Fruits and vegetables, cereal, meat and dairy products will be covered, how they are processed and impacts on food quality and nutrition. Current issues will be discussed, such as world food supply, food-borne disease, diet and health, and new trends in food.
Level: Undergraduate Level 1 subject

PROC 1006 Materials Engineering Fundamentals (10 Credit Points)
Subject Details (p. 4755) Legacy Code: 301414
This subject will introduce students to the foundations of chemistry, exploring the molecular nature of matter and change which is essential foundational knowledge for a career in materials engineering. From atomic structure and the understanding of the periodic properties of elements, students learn about the chemical bonds and intermolecular forces that are responsible for determining the structure and properties of materials. Students put theory into practice by conducting and reporting on laboratory experiments to test the principles of chemical equilibrium, chemical reactions involving acids/bases, electron transfer as well as thermodynamics and kinetics of chemical processes.
Level: Undergraduate Level 1 subject

PROC 1008 Introduction to Materials Engineering (10 Credit Points)
Subject Details (p. 4757) Legacy Code: 301421
Modern science and technology is highly dependent on materials whose properties can be controlled to accommodate a wide range of applications. Materials are of the utmost importance for scientists and engineers who need to select appropriate materials for system design and engineering applications. Students will explore the structure and properties of all types of materials, including metals, ceramics, polymers and composites through theories, principles and a range of experiments. Participation in the lab experiments puts theoretical knowledge into practice enhancing each student's understanding of materials properties, diffusion mechanisms, corrosion, and degradation as well as ways to achieve equilibrium. Graduates who have completed this subject may pursue careers as materials scientists, engineers, researchers, or consultants in industries such as aerospace, automotive, electronics, energy, biomedical, and manufacturing, among others.
Level: Undergraduate Level 1 subject

PROC 1009 Materials Science in Engineering (WSTC) (10 Credit Points)
Subject Details (p. 4758)
This subject provides you with an introduction to the science of engineering materials and their application across various industries. It covers key topics such as atomic structure, interatomic bonding, crystalline structure, and defects in solids. You will learn about the mechanical and physical properties of a wide range of materials, including metals, ceramics, polymers, composites, and advanced materials. This subject will teach you how to select the right materials for specific engineering needs, while emphasising sustainability principles. You will gain hands-on experience in analysing material properties and understanding phase diagrams, corrosion, and degradation.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PROC 2001 Food Science 2 (10 Credit Points)
Subject Details (p. 4759) Legacy Code: 300842
This subject introduces students to the principles of food preservation, including heat treatments, chilling, freezing, dehydration, pickles and fermentation. Factors affecting food quality are explored with respect to microbial, chemical and physical changes in food and their effects on food safety, nutritional value and sensory characteristics. The basic principles of good manufacturing practises, sanitation and Hazard Analysis Critical Control Point (HACCP) for control of food safety will be studied in relation to the design of safe food manufacturing processes. The application of the food preservation principles to the processing of food products is covered through hands-on practicals in the pilot plant.
Level: Undergraduate Level 2 subject
Pre-requisite(s): PROC 1002
Equivalent Subjects: LGYB 8737 - Food Science Technology Practicum 12 PROC 1004 - Food Science 2
Restrictions: Please see the Subject Details page for any restrictions for this subject

PROC 2002 Innovative Foods (10 Credit Points)
Subject Details (p. 4759) Legacy Code: 301452
This subject introduces students to the principles of food preservation, including heat treatments, chilling, freezing, dehydration, pickles and fermentation. Factors affecting food quality are explored with respect to microbial, chemical and physical changes in food and their effects on food safety, nutritional value and sensory characteristics. The basic principles of good manufacturing practises, sanitation and Hazard Analysis Critical Control Point (HACCP) for control of food safety will be studied in relation to the design of safe food manufacturing processes. The application of the food preservation principles to the processing of food products is covered through hands-on practicals in the pilot plant.

Restrictions: Please see the Subject Details page for any restrictions for this subject

PROC 2003 Materials Selection and Design (10 Credit Points)
Subject Details (p. 4760) Legacy Code: 301415
Materials are a critical point of consideration when designing a solution to a technical problem. However, materials can also be quite complex by themselves and can possess a range of properties which may only partially suit an intended solution. In this unit, students use real world scenarios to learn to make decisions concerning material selection under different circumstances, based upon technical requirements, and balanced against sustainability and cost.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PROC 3002 Advanced Food Science and Technology (10 Credit Points)
Subject Details (p. 4760) Legacy Code: 300904
This subject will extend student understanding of current and emerging food processes and packaging technologies. Students will gain an appreciation of the physicochemical processes involved in food manufacture and their integration to produce safe, nutritious and palatable food. Students will become familiar with methods to monitor shelf life of foods, learn about packaging science and be able to select the most appropriate packaging solution for a range of food applications. The environmental impact of food processing and packaging will also be explored, along with the factors affecting the sustainability of food manufacture. Practical workshops will be conducted to produce and analyse food products, plus factory tours to food manufacturing and packaging sites.
Level: Undergraduate Level 3 subject
Pre-requisite(s): PROC 2001 AND
NATS 3038
Equivalent Subjects: PROC 3001 - Advanced Food Science and Technology
Incompatible Subjects: NATS 2016 - Food Processing and Analysis PROC 3006 - Packaging Science and Technology
Restrictions: Please see the Subject Details page for any restrictions for this subject

PROC 3003 Food Product Development (10 Credit Points)
Subject Details (p. 4761) Legacy Code: 300915
This subject is a final year capstone subject where students work in a team environment to apply the knowledge previously gained through their studies in nutrition and food science to develop a novel food product. The entire process of product development will be covered, including: idea generation; collating market, technical and consumer information; consumer surveying to establish the need/desire for a new product; product innovation development; quality testing and packaging. Students will develop specialised knowledge of the total product development system, including the ability to design, develop formulations and evaluation of sensory properties. Final product assessment includes nutritional composition, microbiological analysis, sensory evaluation and labelling compliant with regulations. The project is run in the simulated industry environment; team work among the members plays a key part of the subject.
Level: Undergraduate Level 3 subject
Pre-requisite(s): NATS 3038 - Quality Assurance and Food Analysis
Restrictions: Please see the Subject Details page for any restrictions for this subject

PROC 3007 Food Innovation and Technology (10 Credit Points)
Subject Details (p. 4762) Legacy Code: 301454
This subject will extend your understanding of current and emerging food processes and packaging technologies. You will gain an appreciation of the physicochemical processes involved in food manufacture and their integration to produce safe, nutritious and palatable food. You will become familiar with methods to monitor shelf life of foods, learn about packaging science and be able to select the most appropriate packaging solution for a range of food applications. The environmental impact of food processing and packaging will also be explored, along with the factors affecting the sustainability of food manufacture.

PROC 3008 Materials Processing and Applications (10 Credit Points)
Subject Details (p. 4762) Legacy Code: 301411
This subject focuses on the materials aspects of advanced material processing with an emphasis on microstructures. This extends students' knowledge in advanced materials, their properties, processing technologies, potential applications and simulations. Students will gain skills and experience with commercial software packages to solve sophisticated problems associated with materials engineering as well as develop experimentation techniques for the validation of these problems.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PROC 4001 Advanced Materials Topics (10 Credit Points)
Subject Details (p. 4763) Legacy Code: 301416
Advancements in materials have underpinned technological development since the earliest days of human civilisation. As the challenges of the 21st Century emerge, the development of advanced materials will undoubtedly prove crucial for achieving sustainable solutions. This subject is a research-led learning experience for students whereby advanced materials researchers from WSU and beyond will deliver a series of real-world case studies on their research. Students will be challenged to assess these different material contexts and respond to hypothetical problems by performing critical reviews, in-depth analyses and presenting expert recommendations.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PROC 4002 Engineering Materials from Waste (10 Credit Points)
Subject Details (p. 4764) Legacy Code: 301417
Students will learn about the high potential of waste materials produced by continually growing rapid urbanisation and rising populations, which can be widely reused in engineering projects such as buildings, roads. The focus of this subject is the use of solid waste such as glass, tailings and demolished waste in engineering materials such as concrete, road base and asphalt. In addition, students will explore several recycling and recovery processes and investigate the performance of waste incorporated into engineering materials. Students report on real world state-of-the-art developments while integrating concepts of the circular economy, Australian standards and regulations to ensure the compliance of the developed materials. Work Integrated Leaning (WIL) is a component of this subject.
Level: Undergraduate Level 4 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

Public Health (PUBH)

PUBH 0001 Empowering Individual Health (WSTC Prep) (10 Credit Points)
Subject Details (p. 4764) Legacy Code: 700279
Empowering Individual Health focuses on the health care system in Australia. It aims to give students an understanding of the different elements that constitute the health care system in Australia and abroad. The subject will look at how the structure and funding of the health care system, as well as the political environment in which it operates, impacts life expectancy in a country, as well as how the elements of the health care system impact national and individual health enabling behaviours.
Level: Undergraduate Level 0 Preparatory subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 1005 Foundations of Wellbeing (10 Credit Points)
Subject Details (p. 4765) Legacy Code: 400962
This subject provides an introduction to wellbeing through a reflective and strengths-based approach that seeks to enhance personal, social and community wellbeing. Students will be able to understand, analyse and synthesize personal and structural factors that influence wellbeing. When considering how these factors and how issues of social justice and equity have differential impacts on both individuals and communities, students will be able to develop relevant strategies for taking personal and social action to enhance wellbeing.
Level: Undergraduate Level 1 subject
Equivalent Subjects: HUMN 1020 - Foundations of Wellbeing
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 1006 Population Health and Society (10 Credit Points)
Subject Details (p. 4766) Legacy Code: 400870
This subject will provide you with foundational concepts and factors relating to population health in our society. The social and environmental determinants of health will be introduced and their roles toward disease, health and wellbeing will be explored. The Australian health care system will be compared with alternative models to examine strengths and challenges in advancing population health.
Level: Undergraduate Level 1 subject
Equivalent Subjects: PUBH 1007 - Population Health and Society (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 1007 Population Health and Society (WSTC) (10 Credit Points)
Subject Details (p. 4767) Legacy Code: 700066
This subject will provide you with foundational concepts and factors relating to population health in our society. The social and environmental determinants of health will be introduced and their roles toward disease, health and wellbeing will be explored. The Australian health care system will be compared with alternative models to examine strengths and challenges in advancing population health.
Level: Undergraduate Level 1 subject
Co-requisite(s): Students in programs 6000 or 6001 must have passed or be registered in HLTH0005 and NATS0006

Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 1008 Professional Pathways in Health Science (10 Credit Points)
Subject Details (p. 4768) Legacy Code: 400783
The subject introduces students to the health science workforce. It discusses professional issues, history and philosophy in health sciences as they relate to health promotion, health service management, therapeutic recreation and public health. In addition, this subject explores the career pathways for health science students, discusses the Australian health system, and examines the impacts of potential changes in the health system to a career in health science. This subject helps students define what area within health science they would like to examine and study in more detail.
Level: Undergraduate Level 1 subject
Equivalent Subjects: PUBH 1004 - Foundations of Health Sciences LGYA 7157 - Foundation of Therapeutic Recreation PUBH 1009 - Professional Pathways in Health Science (UWSC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 1009 Professional Pathways in Health Science (WSTC) (10 Credit Points)
Subject Details (p. 4768) Legacy Code: 700075
This subject introduces students to professional issues, history and the philosophy in health sciences: health promotion, health service management and therapeutic recreation. Theories and key concepts of health promotion, health service management and therapeutic recreation are introduced. Students will be introduced to an understanding of human development and the health science processes. Students will examine how human growth and development influences development of socio-economic, cultural, gender, environmental, health science issues. Students will begin an electronic portfolio to help them take more control over their education and assist students to make connections with their learning experiences while building critical and reflective skills.
Level: Undergraduate Level 1 subject
Equivalent Subjects: PUBH 1008 - Professional Pathways in Health Science PUBH 1004 - Foundations of Health Science LGYA 7157 - Foundations of Therapeutic Recreation

PUBH 1010 Health Promotion Theory and Approaches (10 Credit Points)
Subject Details (p. 4769) Legacy Code: 401392
Health promotion is a process that seeks to enable individuals, communities and populations to increase control over their health. It does so by addressing the determinants of health and equity issues, in addition to providing individuals and communities with the skills and knowledge to make healthy lifestyle choices and to improve health outcomes. Theoretical underpinnings of the various approaches to health promotion are explored in this unit. In addition, factors that enhance and limit health promotion are analysed in conjunction with bigger picture approaches of working with policy. The evidence-based practice for health promotion is outlined together with the need to move beyond education. Approaches to health promotion at the individual, community and population level are explored, including particular considerations for working with Indigenous people.
Level: Undergraduate Level 1 subject
Incompatible Subjects: PUBH 2001 - Approaches to Health Promotion
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 1011 Promoting Health Collaboratively in Communities (10 Credit Points)
Subject Details (p. 4770) Legacy Code: 401415
Health Promotion is everyone's business. All health professionals should seek opportunities to promote health equity and social justice, to support healthy lifestyle choices and to connect communities with appropriate health and social services. To do this effectively, health professionals must work collaboratively with communities. This subject focuses on theories and principles that support community-centred transformative action in health promotion, and how to apply them in various local, national and global contexts. Students will be introduced to concepts and practice related to community engagement, participation, development and empowerment; community capacity and resilience-building. There will also be a focus on community identity, social justice and ethical considerations associated with working with communities. Particular focus is made on approaches to working with Aboriginal and Torres Strait islander peoples, marginalised and vulnerable communities.
Level: Undergraduate Level 1 subject

PUBH 1012 Public Health (10 Credit Points)
Subject Details (p. 4771) Legacy Code: 401398
The subject introduces fundamental concepts of public health. Public health is examined from individual, community, historical, contemporary, cultural, gender, ethnic, economic, political, environmental, population, emergency and epidemiological perspectives. The subject shows how innovation and development in public health thinking and practice have improved the health of populations in Australia and globally. Continuing and recently emerging challenges to local, Indigenous, national and international public health are explored, along with public health challenges facing future generations.
Level: Undergraduate Level 1 subject
Incompatible Subjects: PUBH 2016 - Public Health
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 1013 Health Promotion Theory and Approaches (UG Cert) (10 Credit Points)
Subject Details (p. 4773) Legacy Code: 500059
Health promotion is a process that seeks to enable individuals, communities and populations to increase control over their health. It does so by addressing the determinants of health and equity issues, in addition to providing individuals and communities with the skills and knowledge to make healthy lifestyle choices and to improve health outcomes. Theoretical underpinnings of the various approaches to health promotion are explored in this unit. In addition, factors that enhance and limit health promotion are analysed in conjunction with bigger picture approaches of working with policy. The evidence-based practice for health promotion is outlined together with the need to move beyond education. Approaches to health promotion at the individual, community and population level are explored, including particular considerations for working with Indigenous people.
Level: Undergraduate Level 1 subject

PUBH 1015 People, Health and Society (WSTC) (10 Credit Points)
Subject Details (p. 4774)
This subject will provide you with foundational concepts and factors relating to population health in our society. The social and environmental determinants of health will be introduced and their roles toward disease, health and wellbeing will be explored. The Australian health care system will be compared with alternative models to examine strengths and challenges in advancing population health.
Level: Undergraduate Level 1 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 2001 Approaches to Health Promotion (10 Credit Points)
Subject Details (p. 4775) Legacy Code: 400867
For Campbelltown or Online 4656 Bachelor of Health Science students, 400867 Approaches to Health Promotion is replaced with 401392 Health Promotion Theory and Approaches. Health promotion is a process that seeks to enable individuals, carers, communities and populations to increase control over their health. It does so by addressing the determinants of health and equity issues, leading to improved health outcomes. Theoretical underpinnings of the various approaches to health promotion are explored in this unit. In addition, factors that enhance and limit health promotion are analysed in conjunction with bigger picture approaches of working with policy. The best evidence-based practice for health promotion is outlined together with the need to move beyond education.
Level: Undergraduate Level 2 subject

PUBH 2003 Bugs and Drugs (10 Credit Points)
Subject Details (p. 4776) Legacy Code: 400621
Throughout history humans have sought to control their well-being whether it be in response to disease-producing microbes or situations inherent in modern day life. This subject examines an eclectic range of treatments and technologies. Some have been triggered by ancient and enduring infectious foes such as smallpox and the plague or emerging menaces including Ebola and SARS. Others are nested within contemporary living and may be constructed as communicable in the social sense. Selected issues will be explored including agents utilised in the alteration of sensory perception including hallucinogens as well as reaction to and manipulation of body image.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 2004 Clinical Classification and Coding (10 Credit Points)
Subject Details (p. 4777) Legacy Code: 300951
This subject is designed to enable the student to classify diseases and interventions using the current version of the International Statistical Classification of Diseases and Related Health Problems, Tenth Revision, Australian Modification, the Australian Classification of Health Interventions and the Australian Coding Standards (ICD-10-AM/ACHI/ACS). The subject will also include the historical development of clinical classification systems as well as the purpose and value of classifying diseases and interventions within the health system. The student will become familiar with the structure and content of ICD-10-AM ACHI/ACS and be introduced to the rules and conventions associated within ICD-10-AM/ACHI. The primary ACS for ICD-10-AM/ACHI will be studied and applied when coding from line diagnoses/interventions, case studies, simple discharge summaries and clinical record reports. They will gain skills in data abstraction for clinical coding, specifically, the selection of principal and additional diagnoses and interventions.
Level: Undergraduate Level 2 subject
Pre-requisite(s): HLTH 2007
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 2005 Culture, Diversity and Health (10 Credit Points)
Subject Details (p. 4778) Legacy Code: 400866
This subject introduces skills for understanding and engaging effectively with the culturally and socially diverse world in which we live and work. Indigenous Australia is a major theme and students will gain an appreciation of the achievements and needs of Indigenous Australians. The subject examines cultural safety more broadly and puts these issues in the context of health professionals working in multi-cultural settings and handling culturally different health philosophies and practices. Cultural diversity is increasingly recognised as a major issue in the delivery of health care and a major determinant of Indigenous health.
Level: Undergraduate Level 2 subject
Equivalent Subjects: PUBH 2006 - Culture Diversity and Health (WSTC)
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 2006 Culture, Diversity and Health (WSTC) (10 Credit Points)
Subject Details (p. 4779) Legacy Code: 700072
This subject introduces skills for understanding and engaging effectively with the culturally and socially diverse world in which we live and work. Indigenous Australia is a major theme and students will gain an appreciation of the achievements and needs of Indigenous Australians. The subject examines cultural safety more broadly and puts these issues in the context of health professionals working in multi-cultural settings and handling culturally different health philosophies and practices. Cultural diversity is increasingly recognised as a major issue in the delivery of health care and a major determinant of Indigenous health.

Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 2010 Epidemiology (10 Credit Points)
Subject Details (p. 4780) Legacy Code: 300872
Epidemiology is an analytical science concerned with the distribution and determinants of health-related states in populations, aimed at the management of health problems. Epidemiology is not limited to controlling epidemics but assesses and manages physical, mental and social well-being in living, working and recreational environments. The subject introduces identification and understanding of risk factors for health and disease, and assists the student to develop an investigation protocol for assessing a specific health state within their own field of interest. This addresses career needs for a range of health studies while introducing the epidemiological analytical approach to risk assessment and research.
Level: Undergraduate Level 2 subject
Equivalent Subjects: PUBH 2009 - Epidemiology
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 2012 Health Care Systems (10 Credit Points)
Subject Details (p. 4781) Legacy Code: 400965
The tools of economic appraisal and decision making permeate all aspect of modern life. Reliance on economic analysis is highly evident in contemporary health care systems. The funding and provision of health care/services is continuingly changing and subject to ever increasing demand for limited and finite resources. The subject explores, examines and reviews the impact these limitations have on selected health care systems. Students are encouraged to research and examine their own and other health care systems and investigate the differences in access, equity, and efficiency. Practical, contemporary and applied case studies/examples are continuously utilised and students are encouraged to channel the knowledge gained into key areas of interest at the macro and micro level.
Level: Undergraduate Level 2 subject
Equivalent Subjects: BUSM 2019 - Health Care Systems
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 2015 Mental Health in the Community (Block Mode) (10 Credit Points)
Subject Details (p. 4782) Legacy Code: 101773
Mental health service delivery in the community is now the main form of care for people across the lifespan living with mental and emotional disorders. The development of a wider range of pharmacological, psychological and psychosocial treatments has enabled many people to live productively in the community. This subject explores the changes in policy and practice in the development of integrated mental health care and the impact of these changes on the lives of people living with mental illness and their communities. Early intervention, resilience and community capacity building are concepts explored in this subject in terms of mental health and wellbeing. The subject explores these issues with a focus on Aboriginal and Torres Strait Islander communities and mental health.
Level: Undergraduate Level 2 subject
Equivalent Subjects: LGYA 7541 - Community Mental Health Services BEHV 2008 - Mental Health in the Community
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 2016 Public Health (10 Credit Points)
Subject Details (p. 4782) Legacy Code: 400285
This is a flexible learning subject that deals with foundational concepts and issues relating to public health. The philosophical and historical development and the roles of public health in Australia are examined, as are the theories, policies, politics and principles that govern and inform practice. Emphasis is placed on understanding health issues and concerns in Greater Western Sydney Region as well as on national and international contexts of population health. The subject draws on current and emerging practical situations to highlight the dynamic yet continuing legacy of public health.
Level: Undergraduate Level 2 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 2018 Culture Diversity and Health (UG Cert) (10 Credit Points)
Subject Details (p. 4783) Legacy Code: 500056
This subject introduces skills for understanding and engaging effectively with the culturally and socially diverse world in which we live and work. Indigenous Australia is a major theme and students will gain an appreciation of the achievements and needs of Indigenous Australians. The subject examines cultural awareness more broadly and puts these issues in the context of health professionals working in multi-cultural settings and handling culturally different health philosophies and practices. Cultural diversity is increasingly recognised as a major issue in the delivery of health care and a major determinant of Indigenous health.
Level: Undergraduate Level 2 subject

PUBH 2020 Epidemiology for Public Health (10 Credit Points)
Subject Details (p. 4784)
Epidemiology is the foundation of public health and as outlined by the Council of Academic Public Health Institutions Australasia (CAPHIA). In their national core competency framework, epidemiology and biostatistics are key competencies for all public health graduates. The current subject will build on prior biostatical knowledge to equip students with foundation skills that are essential for public health practice. The subject will provide public health students with a foundational understanding of the distribution and determinants of diseases or disorders within populations and how to apply this knowledge in the public health setting.
Level: Undergraduate Level 2 subject
Pre-requisite(s): HLTH 2022 Biostatistics in Health
Equivalent Subjects: PUBH 2010 (300872) Epidemiology
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 3003 Contemporary Issues in Public Health (10 Credit Points)
Subject Details (p. 4785) Legacy Code: 401194
This subject focuses on contemporary issues in public health. These priority concerns include chronic and age-related disease, communicable disease, mental health, sexual and reproductive health, child and maternal health, indigenous health, migrant health and environmental health. You will bring together your knowledge in public health, epidemiology, sociology and economics to identify and evaluate social and environmental factors that affect these health issues. By evaluating effectiveness of current public policy you will make recommendations for policy and program development to improve outcomes for contemporary health issues. These topics will be explored in national and international contexts.
Level: Undergraduate Level 3 subject
Pre-requisite(s): PUBH 2016 AND
PUBH 2010
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 3005 Disaster and Emergency Management (10 Credit Points)
Subject Details (p. 4785) Legacy Code: 300880
This subject explores the management of planning and preparation for and community responses to disasters and emergencies. Through case studies and presentations from current and cutting-edge professional practitioners in the field, students develop a 'hands on' understanding of risk assessment and prevention strategies for community safety during times of critical incidents. This includes emergency management strategies for community recovery and public education and preparation for potentially critical incidents. Workshop activities facilitate collaborative student learning through the use of developing scenarios including infectious disease pandemics, natural disasters and manmade emergencies such as terrorism.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 6064 - Environment Health and Emergency Management PUBH 3004 - Disaster and Emergency Management
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 3007 Disease Prevention and Control (10 Credit Points)
Subject Details (p. 4786) Legacy Code: 300867
Globally we are witnessing an epidemiological transition with the emergence and re-emergence of diseases through social, political and environmental changes including rapid urbanisation, social media influence, international migration/travel, political instability and climate change. This subject of study will provide students with an introduction into the epidemiology of public health diseases of significance in Australia and internationally through exploration of current strategies for the detection, monitoring and control of existing and emerging diseases. The principles of risk management will also be discussed and applied in relation to disease prevention, containment or eradication including vector-borne, vaccine preventable, zoonotic, food and waterborne disease.
Level: Undergraduate Level 3 subject
Equivalent Subjects: PUBH 3006 - Disease Prevention and Control
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 3008 Drugs in Sport (10 Credit Points)
Subject Details (p. 4787) Legacy Code: 400963
This subject examines the dominant issues and discourse around the use of drugs in sport. The focus will be on exploring the socio-cultural, political and personal reasons why drugs are used in sport from the perspective of athletes, coaches, administrators and educators. Students will need to continually reflect upon their own practices and beliefs around drug use and sport. The subject offers challenging and relevant theoretical and practical experiences to students from a variety of professional backgrounds.
Level: Undergraduate Level 3 subject
Equivalent Subjects: CEDS 3002 - Drugs in Sport
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 3010 Health Planning Project (10 Credit Points)
Subject Details (p. 4788) Legacy Code: 400275
This subject extends the theoretical concepts introduced in the subject, Health Politics, Policy and Planning with an emphasis on practical application and obtaining skills in health project management. It concentrates on the development of project management skills required for comprehensive assessment, planning and implementation of health programs or projects. The subject is designed so that students work collaboratively as a multidisciplinary team to develop and manage a workplace health planning project, on a current health issue identified by the health industry. Students thus develop knowledge of skills in project management, stakeholder negotiation, intergroup dynamics, committee structure and functioning, project consultation and planning and management with a deliverable outcome (report).
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 3011 Health Politics, Policy and Planning (10 Credit Points)
Subject Details (p. 4788) Legacy Code: 401195
Health professionals work in a complex health and healthcare sector governed by policy on population health and healthcare. This subject considers the role of policy in health and healthcare. It examines policy making as both a rational and linear process responding to population health needs in just and fair ways, and the reality of policy making which occurs within a complex socio-political and economic environment, shaped by powerful groups. The aim of this subject is therefore to consider how health professionals can develop effective policy and the role advocacy can play in the health policy arena to engender greater health equity.
Level: Undergraduate Level 3 subject
Equivalent Subjects: PUBH 2013 - Health Politics Policy and Planning
LGYA 7182 - Health Politics Policy and Planning
PUBH 3025 - Health Policy and Advocacy
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 3012 Health Promotion Practice 1 (10 Credit Points)
Subject Details (p. 4789) Legacy Code: 400784
This subject builds on the knowledge gained in Approaches to Health Promotion. It provides the opportunity to apply health promotion theory to practical projects in the field related to current population health priorities, through 120 hours service learning experience. It is concerned with developing knowledge and skills related to needs analysis, prioritising, and awareness of core values and principles associated with health promotion practice.
Level: Undergraduate Level 3 subject
Pre-requisite(s): PUBH 2001 or
PUBH 1010
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 3013 Health Promotion Practice 2 (10 Credit Points)
Subject Details (p. 4790) Legacy Code: 400785
This subject builds on the knowledge gained in Health Promotion Practice 1 through ongoing study of the processes required in project design and management in health promotion. The 120 hour placement provides students with the opportunity to apply health promotion theory to practical projects on current population health priorities. Students develop knowledge and skills related to implementation and evaluation of health promotion projects, highlighting the importance of the core values and principles necessary for effective and ethical health promotion practice.
Level: Undergraduate Level 3 subject
Pre-requisite(s): PUBH 2001 AND
PUBH 3012
Equivalent Subjects: LGYA 7184 - Community Development and Health
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 3014 Injury Prevention (10 Credit Points)
Subject Details (p. 4792) Legacy Code: 400286
Injury Prevention is a National Health Priority. Injury is the preferred term rather than 'accident' with its connotations of inevitability and lack of apparent cause, to promote development of inter-disciplinary prevention initiatives. An evidence based scientific approach to injury research and prevention is well established for road and occupational safety, supported by well resourced implementation structures. Other settings/sectors include sport, recreation, falls, firearms, farm, product and water safety, which are also seeing the benefits of injury prevention principles, but are less well developed. Injury prevention principles include thorough analysis of current data and the literature to identify what works to reduce injury rates, also use of intervenation strategies termed the 4Es, (education, enforcement, engineering and environment).
Level: Undergraduate Level 3 subject
Pre-requisite(s): PUBH 2001
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 3017 Occupational Health and Safety (10 Credit Points)
Subject Details (p. 4792) Legacy Code: 300919
This subject provides students with an essential working knowledge of occupational health and safety (OHS), work health and safety (WHS) legislation and risk management required which is a requirement for graduate employment across a broad range of workplaces and industries. The subject provides a foundation in the principles and practice of hazard identification and risk management, including an introduction to specific workplace hazards such as; moving and fixed plant, electrical, biomechanical (ergonomic), gravitational (slips, trips and falls), manual handling. Students will also explore the chemical, biological and physical hazards that may be encountered in a variety of graduate employment industries, as well as the management of health and safety hazards in relation to current WHS legislation, Codes of Practices and Australian and International Standards.
Level: Undergraduate Level 3 subject
Equivalent Subjects: PUBH 3016 - Occupational Health and Safety
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 3018 Professional Transition Project (10 Credit Points)
Subject Details (p. 4793) Legacy Code: 400786
This subject is designed to assist students to make the transition from undergraduate student life to professional life. Professional Transition Project provides students with a unique opportunity to integrate knowledge gained throughout their course from an operational, practical and theoretical perspective into an engaging project. Students will engage in comprehensive projects which bring together real world opportunities and health science theory.
Level: Undergraduate Level 3 subject
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 3019 Public Health Practice (10 Credit Points)
Subject Details (p. 4794) Legacy Code: 401193
This subject is an online equivalent of a workplace learning (placement) subject. You will engage in workplace activities with a public health organisation by using prepared resources, online discussion and videoconferencing. In this subject you will evaluate, develop and recommend public health policy or program change. The subject will involve the use of skills required to work in the public health arena; conducting needs analysis, collecting quantitative and qualitative data, facilitating stakeholder engagement, project development, management and evaluation, report writing and competent oral presentation skills, in an organisational setting.
Level: Undergraduate Level 3 subject
Pre-requisite(s): PUBH 2016
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 3020 Work Health and Safety (10 Credit Points)
Subject Details (p. 4795) Legacy Code: 200861
Work Health and Safety introduces participants to work health and safety concepts, terminology, legal frameworks and research sources. It includes practical activities around hazard identification and risk assessment. The many academic disciplines that contribute to work health and safety policy and practice will be critiqued: from epidemiology to engineering to ergonomics to employment relations. Ideologies that shape how workers, managers and organisations approach work health and safety will be examined, particularly via the notion of safety culture. This subject is designed for participants from all academic programs. Successful completion means being able to engage critically and practically in work health and safety challenges in multiple contexts, with competing stakeholder interests in mind.
Level: Undergraduate Level 3 subject
Equivalent Subjects: LGYA 9851 - Occupational Health and Safety PUBH 3015 - Occupational Health and Safety BUSM 3049 - Occupational Health and Safety
Restrictions: Please see the Subject Details page for any restrictions for this subject

PUBH 3021 Air Pollution & Control (10 Credit Points)
Subject Details (p. 4796) Legacy Code: 301276
