TRIM HPE Content Manager – Installations Instructions (May 2022)

Open the Software Centre on your computer and select Available Software tab (see IT Knowledge Article KB0014199)

1. Locate and select **HPE_Content Manager_9.4** and click **INSTALL**

2. Allow Software Center to download and install Content Manager. The install is complete when the status is **Installed.**

3. For **Windows 10** users, Content Manager will now be located in your All Apps folder. Click on the Windows Start Menu Icon and **All Apps. Alternatively, you can click on your Start menu and type Content Manager.**

4. Be sure to select only **Content Manager** (not any of the other options below it).

5. Right click and Pin to Start

6. **N.B** For **Windows 7** users, Content Manager will now be located in your All Programs folder. Click on the Windows Start Menu Icon and **All Programs.**

Contact IT Services Desk or RAMS if you need further assistance.
